# Academic Calendar

Welcome to the Academic Calendar for the 2021-22 academic year. This calendar is designed to provide a comprehensive overview of important dates and events across all University campuses. However, official dates for degrees awarded apply to all schools, on all University campuses. Specific dates affecting the professional programs in the Schools of Dental Medicine, Law, Medicine, Pharmacy, and Joseph M. Katz Graduate School of Business, as well as graduate programs with specialized accreditation requirements may be obtained from the appropriate Dean’s Office.

* Employees covered by the collective bargaining agreements will be governed by the terms of those agreements.

**NOTE: THE UNIVERSITY RESERVES THE RIGHT TO MAKE SUCH CALENDAR CHANGES AS IT DEEMS NECESSARY**

**University of Pittsburgh Nondiscrimination Policy Statement**

The University of Pittsburgh, as an educational institution and as an employer, values equality of opportunity, human dignity, and racial/ethnic and cultural diversity. Accordingly, as fully explained in Policy 07-01-03, the University prohibits and will not engage in discrimination or harassment on the basis of race, color, religion, national origin, ancestry, sex, age, marital status, familial status, sexual orientation, gender identity and expression, genetic information, disability, or status as a veteran. The University also prohibits and will not engage in retaliation against any person who makes a claim of discrimination or harassment or who provides information in such an investigation. Further, the University will continue to take affirmative steps to support and advance these values consistent with the University's mission. This policy applies to admissions, employment, access to and treatment in University programs and activities. This is a commitment made by the University and is in accordance with federal, state, and/or local laws and regulations.

For information on University equal opportunity and affirmative action programs, please contact: University of Pittsburgh, Office of Diversity and Inclusion, Cheryl Ruffin, Institutional Equity Manager, 4415 Fifth Avenue, 2nd Floor Webster Hall, Pittsburgh, PA 15260 (412) 648-7860.

For complete details on the University's Nondiscrimination Policy, please refer to Policy 07-01-03. For information on how to file a complaint under this policy, please refer to Procedure 07-01-03.

About the University of Pittsburgh

The University of Pittsburgh is an internationally respected center of learning and research, offering exceptional educational opportunities in the arts, sciences, and professions.

Mission

The University of Pittsburgh, founded in 1787, is one of the oldest institutions of higher education in the United States. As one of the nation's distinguished comprehensive universities, the resources of the University constitute an invaluable asset for the intellectual, economic, and social enrichment of Pennsylvania, while the international prestige of the University enhances the image of Pennsylvania throughout the world.

The University's mission is to:

• Provide high-quality undergraduate programs in the arts and sciences and professional fields, with emphasis upon those of special benefit to the citizens of Pennsylvania;

• Offer superior graduate programs in the arts and sciences and the professions that respond to the needs of Pennsylvania, as well as to the broader needs of the nation and the world;

• Engage in research, artistic, and scholarly activities that advance learning through the extension of the frontiers of knowledge and creative endeavor;

• Cooperate with industrial and governmental institutions to transfer knowledge in science, technology, and health care;

• Offer continuing education programs adapted to the personal enrichment, professional upgrading, and career advancement interests and needs of adult Pennsylvanians; and

• Make available to local communities and public agencies the expertise of the University in ways that are consistent with the primary teaching and research functions and contribute to social, intellectual, and economic development in the Commonwealth, the nation, and the world.

The trustees, faculty, staff, students, and administration of the University are dedicated to accomplishing this mission, to which they pledge their individual and collective efforts, determined that the University shall continue to be counted among the prominent institutions of higher education throughout the world.

History

The University began in the Pennsylvania wilderness as the Pittsburgh Academy in 1787, the year the U.S. Constitution was adopted. Thirty-two years later, the Pittsburgh Academy became the Western University of Pittsburgh, and in 1908, the school changed its name to the University of Pittsburgh. Graduate degrees have been conferred since 1836, and the first doctoral program was developed in 1884. A private institution for most of its past, the University of Pittsburgh became state-related in 1966, establishing a relationship with the Commonwealth of Pennsylvania that continues to benefit both partners. Today, as an elected member of the prestigious Association of American Universities, the University of Pittsburgh claims its place among the top public research universities in the nation.

Accreditation

The University of Pittsburgh is accredited by the Middle States Commission on Higher Education, 3624 Market Street, Philadelphia, PA 19104, (267) 284 - 5000. In addition, programs may be accredited by discipline-specific accrediting bodies. See Schools, Departments, and Programs section of this catalog for this information.

Academic Organization and Pittsburgh Campus Overview
As a state-related, coeducational institution, the University of Pittsburgh's Pittsburgh campus offers a multitude of degree-granting and other programs housed in 16 undergraduate, graduate, and professional schools. The University system includes the Pittsburgh campus and four regional campuses at Bradford, Greensburg, Johnstown, and Titusville.

There are more than 100 academic, research, and administrative buildings and residence halls located on the Pittsburgh campus, which covers 132 acres in the culturally rich Oakland neighborhood. At the heart of the campus stands a central landmark—the Cathedral of Learning, a 42-story Gothic tower, which is the tallest school building in the Western Hemisphere. The Cathedral contains the Nationality Rooms, 27 classrooms, each designed to reflect a distinct culture and providing an overall, multidimensional understanding of America's heritage.

At the Pittsburgh campus, over 4,900 faculty serve over 28,500 students, including 9,500 graduate and more than 19,000 undergraduate students. Alumni accomplishments range from managing Fortune 500 corporations, to writing best-selling novels, to unlocking the secrets of DNA ... and more.

Administrative Officers, Schools, and Campuses

Administrative Officers of the University of Pittsburgh

Thomas E. Richards, Chairperson of the Board of Trustees
Mary Ellen Callahan, Vice Chairperson of the Board of Trustees
Louis R. Cestello, Vice Chairperson of the Board of Trustees
Patrick Gallagher, Chancellor and Chief Executive Officer
Ann E. Cudd, Provost and Senior Vice Chancellor
Anantha Shekhar, Senior Vice Chancellor for Health Sciences
Geovette E. Washington, Senior Vice Chancellor and Chief Legal Officer
Narahari Sastry, Senior Vice Chancellor and Chief Financial Officer
David N. DeJong, Acting Senior Vice Chancellor for Business and Operations
Rob A. Rutenbar, Senior Vice Chancellor for Research
Rosalyn E. Jones, Vice Chancellor and Secretary of the Board of Trustees
Paul Lawrence, Treasurer and Interim Chief Investment Officer

University of Pittsburgh Board of Trustees

The Board of Trustees is responsible for advancing the purposes of the University; promoting and protecting its independence, academic freedom, and integrity; and enhancing and preserving its assets for the benefit of future students and society at large. In addition, because the University of Pittsburgh is a state-related institution, the trustees ensure that Pitt meets its obligations both to the Commonwealth of Pennsylvania and to society generally.

General administrative, academic, and management authority is delegated to the chancellor. However, the board retains ultimate responsibility for all University affairs.

There are three or more regular meetings of the Board of Trustees each year, including an annual meeting. Special meetings also may be called. Much of the board’s work is carried out by committees; many of these committees include faculty, staff, and students as non-voting representatives.

Thomas E. Richards, Chairperson

Academic Regulations

Advising

Academic advising is a key part of every undergraduate's experience at the University of Pittsburgh. An academic advisor helps a student determine the appropriate academic path to further the student's educational and career goals. To be a success, the advising process must work both ways: The advisor will be there to help when the student needs it, and the student must actively seek out an advisor for help. Before signing up for classes each term, students meet with their advisors. Though each school may have different advising requirements, students are generally required to meet with their advisors at least two times per term-for an advising appointment and a subsequent registration appointment. Consult with the individual school for school-specific advising services.

Allowable Credits (Credit and Course Limitations)

There are certain limitations on credits, other than those earned as part of regular undergraduate courses taken at the University, that may be applied toward a degree. Those limitations are detailed below.

Advanced Standing Credits

Each school determines whether and under what circumstances the advanced standing credits listed below will be awarded toward a University of Pittsburgh degree or certificate offered by the school. Contact the individual schools for details.

Transfer Credit

The University will grant credit earned at other institutions based on course equivalencies, including expected learning outcomes, with those of the University curriculum and standards, subject to University policy and individual school requirements. The University will not refuse to consider a transfer credit based on the accreditation of the sending institution. Transfer credit is subject to University policy and individual school requirements.

Advanced Placement

Credits may be earned toward a University of Pittsburgh degree or certificate through standardized examinations such as the College-Level Examination Program (CLEP), Occupational Competency, Excelsior College Examination Program, and Advanced Placement (AP) Exams. In addition, some schools give credit for the International Baccalaureate Higher-Level Examinations. Students should contact their school to determine how credit may be granted based on completion of these examinations.

Credit by Examination

In some cases, students may earn credits toward a University of Pittsburgh degree or certificate by passing a course examination without registering for the course. Contact the individual department or school for information, as each sets its own policies as to the specific courses for which students may request credit by examination.

Career Development Courses

Noncredit, career development courses are not applicable to the bachelor's degree but may be included among the requirements for certain professional certificates.

Cooperative Programs
The University has established some arrangements with industries that permit students to rotate four-month terms between the workplace and the classroom. These are paid positions related to the student's field of study. These programs are administered by the Swanson School of Engineering and are available to any student with a science-related major. The experience normally starts in the sophomore or junior year. Students should contact their school or department to determine the maximum number of credits that may be earned toward their degree requirements through cooperative programs. Call 412-624-9826 for more information.

**Duplication of Course Content**

Students may not earn credit for courses that substantially duplicate the content of other courses for which they have already received credit.

**Directed Reading and Research, Independent Study, Internships**

Some schools offer individually designed study other than regular courses. Students are limited by the individual schools as to how many such independent study, directed reading, directed research, and internship credits can be counted among the required credits for the degree. Requirements and procedures may also differ. Contact school for details.

**Directed Reading**

The student undertakes a specified course of study comparable to a regular course under the direct supervision of a faculty member.

**Directed Research**

The student pursues a defined research project on campus under the guidance of a faculty member.

**Independent Study**

Independent study involves an independent program of study, research, or creative activity designed under specified conditions and is usually conducted off campus with less immediate direction by the sponsoring faculty member.

**Internships**

Some schools provide internship experiences appropriate to the student's academic discipline. An internship is a supervised, work-related experience, either volunteer or compensated. It is intended to be a new experience, not an existing position in which the student is already working. Students will only get internship credit for a current employment situation that has been pre-approved as an internship by the relevant school or department.

**English Language Institute Courses**

Credit for certain English Language Institute courses may be applied toward the undergraduate degree. See school for details.

**Enrollment in Graduate Courses**

University of Pittsburgh undergraduate students with sufficient preparation are permitted to enroll in certain graduate courses at the University following procedures determined by each school. The graduate credits earned may be counted toward the undergraduate degree if approved by the student's school. These may not be counted as credits toward a graduate degree except as noted below.

Undergraduate students who need fewer than 15 credits to complete requirements for the baccalaureate degree and who intend to continue study toward an advanced degree may be permitted during their final term to register for graduate courses that will later apply toward a graduate degree. The student must obtain written permission from the school of proposed graduate study that the courses may count when and if the student is admitted into the graduate degree program. This privilege should not be granted if the proposed total program exceeds a normal full-time load.
Although these credits will appear on the undergraduate transcript, they will not count toward fulfilling undergraduate degree requirements. They will be posted as advanced standing credits on the graduate transcript.

**Reserve Officer Training Corps (ROTC) Credits**

Students may elect to participate in either the Air Force ROTC or Army ROTC Programs at the University of Pittsburgh or the Navy ROTC Program at Carnegie Mellon University. Contact individual schools to determine which credits earned in ROTC courses may be applied toward a degree. (For more information on ROTC, see the Special Academic Opportunities section of this catalog.)

**Registration**

For additional registration information, visit the University registrar's Web site at www.registrar.pitt.edu

**Full-Time and Part-Time Study**

Full-time study is defined as enrollment for 12 to 18 credits per term, and part-time study is defined as enrollment for one to 11 credits per term. Students are charged a flat tuition rate for full-time study in the fall and spring terms. For part-time students, tuition payment is on a per-credit basis. Students may exceed the 18-credit limit with written permission from the dean of their school, but they will be billed on a per-credit basis for each additional credit. University fees and other applicable charges are assessed on student statements. Some schools within the University may also apply academic limitations on the number of credits for which a student is permitted to enroll each term. For instance, students in Arts and Sciences must get permission to enroll for more than 18 credits. During the summer term and summer sessions, most students are billed on a per-credit basis regardless of the number of credits taken.

**Registering for Classes**

After students are admitted to a school they will be assigned an academic advisor. All Undergraduate students must meet with their academic advisor each term prior to enrolling in classes. Most students have the ability to use the self-service enrollment tools available through the Student Portal or Pitt PS Mobile.

Continuing students with the ability to utilize self-service enrollment will be assigned an enrollment appointment during the first two weeks of the enrollment period. Students in programs that do not permit self-service enrollment should contact their academic advisor regarding the enrollment process for their program. The enrollment period for a term or session is published in the University’s *Academic Calendar*.

Once students have enrolled they may view their class schedules online via the Student Portal or Pitt PS Mobile.

**Adding and Dropping Courses**

Students may add or drop courses from the start of their enrollment appointment until the end of the add/drop period. The dates for the add/drop periods are published in the University's *Academic Calendar*. Students are encouraged to consult their academic advisors regarding the impact of course changes on their academic career. Students who no longer wish to remain enrolled in a course after the add/drop period has ended may withdraw from the course or resign from the University. See Monitored Withdrawal from a Course and Resigning from the University.

**Extended Drop Period**

Under special circumstances, undergraduate students may be eligible to drop a course in the third week of the fall or spring semester, effective with the Spring 2018 semester. Students must meet all of the following criteria to drop a course during the extended drop period:

- Undergraduate students at all campuses
- Undergraduate courses
- Fall and spring semesters
Students must remain in full-time status after dropping the course(s).

The student's advisor must provide permission to drop.

Students must review the proposed drop with their academic advisor. If the student's advisor finds that the student is eligible, the advisor will process the drop(s). If the student's advisor cannot process the drop for any reason, then the advisor will request that the Registrar's Office at the student's campus process it.

Cross-Registration

Cross-registration provides students with the opportunity to enroll in courses at member institutions of the Pittsburgh Council on Higher Education (PCHE). The designated colleges and universities at which undergraduate students may cross-register include Carlow University, Carnegie Mellon University, Chatham University, Community College of Allegheny County, Duquesne University, La Roche College, Pittsburgh Theological Seminary, Point Park University, and Robert Morris University. Only full-time students may cross-register. Please note that students must maintain a full-time course load (at least 12 credits as an undergraduate) at Pitt while cross-registered. Students who cross-register do not pay tuition to the host institution; however, they are responsible for any additional fees associated with the course such as laboratory fees, books, and the like. Students normally may register for only one course off campus in a given term. The grades and credits earned at the host institution are transferred to the home school. The academic policies of the host institution prevail.

Cross-registration is only available in the fall and spring terms. During the summer, students may attend one of the above colleges as guest students, but they must pay that institution's tuition and fees. Students are discouraged from cross-registering during their term of graduation to avoid any delays in the receipt of course credit needed to graduate. Students should meet with their advisors or a school representative before they cross-register. For more information on cross-registration, visit pche-pa.org/.

Monitored Withdrawal from a Course

After the add/drop period has ended, students may withdraw from a course that they no longer wish to attend by completing a Monitored Withdrawal Request form in the office of the school offering the course. Students must process the Monitored Withdrawal Request form within the first nine weeks of the term in the fall and spring. Because summer sessions vary in length, students should check the University's Academic Calendar for those deadlines. Students should check with the school offering the course for the last day to submit a Monitored Withdrawal Request form. The grade W will appear on the student's grade report and transcript. There is no financial adjustment to students' tuition or fee obligations involved in withdrawing from courses, but withdrawing may jeopardize satisfactory academic progress, financial aid, and athletic eligibility.

Resigning from the University/Termination of Registration

If students decide to drop all of their courses after the add/drop period has ended and before 60 percent of the term or session has been completed, they must resign from the University for that term. Official resignation from the University requires students to contact the Student Appeals Office. Students have several options. They may resign in person, by mail, or by calling 412-624-7585, where students may leave a message 24 hours a day, including weekends and holidays. An R grade will appear on the student's academic transcript for each course in the term of resignation. Tuition is prorated from the date of the student's notification to the Student Appeals Office of the student's desire to resign, unless 60 percent of the term has been completed, in which case there is no refund.

After the 60 percent point in time of the term or session has passed, students who wish to terminate their registration may process withdrawal from all classes only with the permission of the academic dean. If the reason for withdrawal is medical or psychological in nature, the academic dean may consult with the director of Student Health Service prior to making a determination. There is no financial adjustment associated with this procedure, which results in the assignment of W grades for the courses.

Grading and Records

For additional grading and records information, visit the University Registrar's Web site at www.registrar.pitt.edu.

GPA
The Grade Point Average (GPA) is the numeric indication of a student's academic achievement based on a 4.00 grade point scale. Undergraduates must have a 2.00 GPA in order to graduate from the University of Pittsburgh. The value is the average of total letter grades earned and is available by term or career. Some academic centers may also maintain degree and/or major/departmental GPA values.

**Grading System**

The University of Pittsburgh has a standard letter grade system (see Letter Grade Option). Some additional grading options are available in some courses as determined by the school and the instructor (see Grading Options below). Finally, undergraduate students may choose to audit a course. Students must complete Grade Option/Audit Request forms to request a grading option available in a particular course.

**Grading Options**

Individual schools may elect to offer a course with the following grade options:

- **LG**  Letter grade
- **H/S/U**  Honors/Satisfactory/Unsatisfactory
- **S/NC**  Satisfactory/No-Credit (Formerly the S/N Option)
- LG and H/S/U  Letter grade and Honors/Satisfactory/Unsatisfactory
- LG and S/NC  Letter grade and Satisfactory/No-Credit

Students may select a grade option for those courses that offer more than one option at the point of enrollment or by submitting a Grade Option/Audit Request form by the established deadline to the school offering the course (generally four weeks from the start of the term, but check with the school for specific deadlines). If the student does not select a grade option for a course when more than one grade option is available, the default option (generally the letter grade option) will automatically apply.

**Letter Grade Option**

The University's letter grade system identified below will be followed without exception:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Quality Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+</td>
<td>4.00</td>
</tr>
<tr>
<td>A</td>
<td>4.00 Superior</td>
</tr>
<tr>
<td>A-</td>
<td>3.75</td>
</tr>
<tr>
<td>B+</td>
<td>3.25</td>
</tr>
<tr>
<td>B</td>
<td>3.00 Meritorious</td>
</tr>
<tr>
<td>B-</td>
<td>2.75</td>
</tr>
<tr>
<td>C+</td>
<td>2.25</td>
</tr>
<tr>
<td>C</td>
<td>2.00 Adequate</td>
</tr>
<tr>
<td>C-</td>
<td>1.75</td>
</tr>
<tr>
<td>D+</td>
<td>1.25</td>
</tr>
</tbody>
</table>
H/S/U Grade Option

Certain courses are offered on the H/S/U (Honors/Satisfactory/Unsatisfactory) grade option. Under this option, students earn an H if they do exceptional work (equivalent to an A- or higher under the letter grade system), an S if they do satisfactory work (equivalent to grades from a C up to a B+), or a U if they do unsatisfactory work (equivalent to a C- or lower). The H and S grades received under this option are counted toward graduation but are not computed in the student's GPA. The U grade is counted toward neither graduation nor the GPA.

S/NC Grade Option (Formerly the S/N Option)

Certain courses are offered on the S/NC (Satisfactory/No-Credit) grade option. This option was designed to encourage students to explore new and potentially difficult subjects without fear of the risks of failure. Under this option, a student who does satisfactory work (a grade of C or better) in a course receives the grade of S. If the student's work is not satisfactory (a grade of C- or lower), the grade of NC (No Credit) is given. Courses for which an S is received are counted toward graduation, but are not computed in the GPA. Courses in which an NC is received are counted toward neither graduation nor the GPA.

Other Grades: Unfinished, Resign, Withdraw

Upon a student's completion of a course, one of the grades listed below may appear on the student's transcript in lieu of one of the options selected by the student and/or instructor (the options are listed under Grading Options). None of these grades carries quality points:

G Grade

The G grade signifies unfinished course work due to extenuating personal circumstances. Students assigned G grades are required to complete course requirements no later than one year after the term or session in which the course was taken. Some schools have a shorter deadline for completion of G grades; see school for details.

The NG grade will remain on the record and the student will be required to re-register for the course if it is needed to fulfill requirements for graduation.

R Grade

The R grade signifies that a student resigned from the University for the term. (See Resigning from the University for more information.)

W Grade

The W grade signifies that a student has withdrawn from a course. (See Monitored Withdrawal from a Course for more information.)

Auditing a Course

With the consent of the school and instructor, students may choose to audit a course. To audit a course, a student must register and pay tuition for the course. The audit grade (N) is not counted toward graduation or the GPA.
Repeating Courses

A student may repeat any course, except as noted below. No sequence course may be repeated for credit after a higher numbered course in that sequence has been passed with a C or higher grade. This also pertains to graduate and first professional students who have passed with a B or higher grade. No course may be repeated at any other institution and have that grade accepted as a replacement for the original grade earned at the University of Pittsburgh. The grade earned by repeating a course is used in lieu of the grade originally earned.

The following calculations apply to all students at the University of Pittsburgh:

- The original course and grade remain on the transcript and/or the academic record, however, the grade and credits originally earned are not counted in the calculation of the QPA (prior to Fall term 2005) or the GPA.
- The repeated course does not increase the number of credits counted toward meeting the degree requirements unless an F is replaced by a passing grade.

W, R, N, or NC grades reported for the repeated course will not be identified as a course repeat, thus the original grade earned will continue to be counted in the QPA (prior to Fall term 2005) or GPA. Incomplete grades (G or I) will not be identified as repeated courses until the course work is completed. Students may repeat a course no more than two times. Any grade earned in the repeated course will be posted to the academic record even if it is lower than the original grade. The repeated course must be the same in which the original grade was earned. In extenuating circumstances, a department chairman, with the dean's approval, may substitute another course of similar content. Course repeat forms must be submitted to the Office of the Registrar to affect grade replacement.

Grade Changes

The instructor of a course may change a student's grade by submitting a grade change through Grade Change Work Flow which can be found on the Faculty Portal. All grade changes require the authorization of the dean of the school from which the original grade was issued. Students can verify grade changes for the terms available online via Student Portal at my.pitt.edu or via Pitt PS Mobile.

Viewing Grades

Students can access their grades online via the Student Center at my.pitt.edu or via Pitt PS Mobile. Grade submission deadlines can be found in the University's Academic Calendar.

Transcripts

An academic transcript serves as a permanent record of a student's academic progress. The transcript is a cumulative record of the student's GPA, as well as a record of the department, title, and grade for each course in which the student has enrolled and summary advanced standing information. Students may request an official transcript that bears the seal and signature of the University Registrar. Upon graduation, the transcript reflects a student's degree and date, major, minor, or certificate, and, if applicable, honors and area of concentration.

Academic Record

The academic record is not an official University transcript, but a document containing a student's complete University of Pittsburgh academic history. In addition to the information provided on the transcript, the academic record may display additional course details, certain academic events and detailed advanced standing/placement/transfer credit information. Students can view a copy of their academic record in the Student Center at my.pitt.edu.

Academic Standing

Undergraduate students' academic standing is maintained and monitored each term by the school in which a student is enrolled. Students who are not on academic probation or academic suspension (i.e., students who maintain a cumulative grade point average of 2.00 or higher) are considered to be in good academic standing.
Dean's List

Students whose grades indicate outstanding academic achievement are recognized on their school's Dean's List. The following schools have a Dean's List:

- Dietrich School of Arts and Sciences
- College of Business Administration
- School of Dental Medicine
- Swanson School of Engineering
- College of General Studies
- School of Health and Rehabilitation Sciences
- School of Information Sciences
- School of Nursing
- School of Pharmacy

Other Academic Honors

Schools and programs may have additional ways of recognizing academic achievement by students, such as Phi Beta Kappa, Tau Beta Pi, or a Term Honor List. More information about these opportunities is available through the school.

Probation, Suspension, and Dismissal

Students who fail to make satisfactory progress may be subject to academic probation and/or suspension and dismissal. Students who have completed at least 12 quality point credits and whose GPA falls below 2.00 will be placed on academic probation by the dean of the school. After a certain period of time on academic probation (determined by the student's school), a student is subject to academic suspension and restricted from registering for classes in that school. Details of the undergraduate school's probation system are available through that school.

Effect on Financial Aid

Conditions for financial aid eligibility usually require students to complete a specified number of credits each year and maintain a specified grade point average (GPA; credits counting toward the degree). Questions about the effect of unsatisfactory academic standing on financial aid should be directed to the Office of Admissions and Financial Aid in Alumni Hall at 412-624-7488.

Graduation

Requirements for Graduation

Graduation requirements differ among schools. However, all undergraduate schools require a minimum of 120 passing credits to graduate, as well as a GPA of at least 2.00. (See specific schools and programs for detailed graduation requirements.) For more policy information please refer to the University of Pittsburgh Policies page.

Application to Graduate

Students must file an application for graduation through their college or school. Generally, students must apply for graduation before the end of the term preceding the one during which they expect to complete all degree requirements. Each school establishes its own deadline by which students must apply for graduation. Students should check with their schools for the deadlines.
Graduation with Honors

Undergraduate members of a graduating class who have attained an outstanding scholastic record may be graduated with University honors. To be eligible, a student must complete at least 60 letter-graded credits at the University of Pittsburgh. All degree-related course work completed at the University is calculated in the grade point average. Receipt of University honors is based on having obtained the following grade point average at graduation:

- Summa Cum Laude 3.75
- Magna Cum Laude 3.50
- Cum Laude 3.25

The honor status achieved by a student will appear on the student's official University transcript and diploma.

Each school may award undergraduate program honors based on the major GPA and other criteria, as determined by the school and department.

Commencement

Candidates for graduation are encouraged to appear in person at commencement, usually held the Sunday after the spring term ends. Although degrees are conferred at commencement for all graduation periods, the official certification for April and May graduates occurs several weeks after the ceremony.

With the exception of students who receive their diplomas at individual school ceremonies, all diplomas are mailed to students approximately four weeks after the official certification date for each graduation period.

Student Rights and Responsibilities

The University has a number of official policies affecting students. For complete and current text on all University policies, please see www.cfo.pitt.edu/policies/.

The information that follows summarizes several key University-wide policies affecting undergraduate students, but students are also responsible for being cognizant of those University, school, and departmental regulations relevant to their programs of study.

Academic Integrity Policy

Students have the responsibility to be honest and to conduct themselves in an ethical manner while pursuing academic studies. Students have the right to be treated by faculty in a fair and conscientious manner in accordance with the ethical standards generally recognized within the academic community (as well as those recognized within the profession). Should a student be accused of a breach of academic integrity or have questions regarding faculty responsibilities, procedural safeguards including provisions of due process have been designed to protect student rights. These may be found in Guidelines on Academic Integrity: Student and Faculty Obligations and Hearing Procedures here.

Computing Use Policy

Every member of the University community has two basic rights regarding computing: privacy and a fair share of resources. It is unethical for another person to violate these rights. All users, in turn, are expected to exercise common sense and decency with regard to the campus computing resources. Please read Acceptable Computing Access and Use, available in campus computing labs or online at technology.pitt.edu/security/acceptable-computing-access-and-use for details.

Students are subject to the rules and regulations as described in the University of Pittsburgh Student Code of Conduct. Students should realize that any misuse of computing resources may result in the suspension of their computing privileges.
Student Code of Conduct

The Student Code of Conduct is an outline of the nonacademic rights and responsibilities of University students. The code defines offenses by and against students. A student or University official may file a complaint of violation of the Student Code of Conduct at the University Student Judicial System. For a copy of the code, please contact the judicial system office in 738 William Pitt Union at 412-648-7910 or see www.studentaffairs.pitt.edu/studentconduct.

Judicial System

The Office of Student Conduct of the University Student Judicial System coordinates the Campus Judicial Board. It also receives, previews, and acts upon complaints of violations of the Student Code of Conduct. Its purpose is to provide due process and fair treatment in adjudicating charges filed for violations of the code. All complaints about nonacademic student behavior should be filed here.

Pitt Promise: A Commitment to Civility

The University of Pittsburgh is committed to the advancement of learning and service to society. This is best accomplished in an atmosphere of mutual respect and civility, self-restraint, concern for others, and academic integrity. Students are asked to accept the obligation to live by these common values and commit themselves to principles of behavior that contribute to a civil campus environment and to support this behavior in others. The Pitt Promise is online at www.studentaffairs.pitt.edu/pitt-promise/.

Other Policies

Affirmative Action and University of Pittsburgh Nondiscrimination Policy Statement

The University of Pittsburgh, as an educational institution and as an employer, values equality of opportunity, human dignity, and racial/ethnic and cultural diversity. Accordingly, as fully explained in Policy 07-01-03, the University prohibits and will not engage in discrimination or harassment on the basis of race, color, religion, national origin, ancestry, sex, age, marital status, familial status, sexual orientation, gender identity and expression, genetic information, disability, or status as a veteran. The University also prohibits and will not engage in retaliation against any person who makes a claim of discrimination or harassment or who provides information in such an investigation. Further, the University will continue to take affirmative steps to support and advance these values consistent with the University's mission. This policy applies to admissions, employment, access to and treatment in University programs and activities. This is a commitment made by the University and is in accordance with federal, state, and/or local laws and regulations.

For information on University equal opportunity and affirmative action programs, please contact: University of Pittsburgh, Office of Diversity and Inclusion, Cheryl Ruffin, Institutional Equity Manager, 4415 Fifth Avenue, 2nd Floor Webster Hall, Pittsburgh, PA 15260 (412) 648-7860.

For complete details on the University's Nondiscrimination Policy, please refer to Policy 07-01-03. For information on how to file a complaint under this policy, please refer to Procedure 07-01-03.

Drug-Free School and Workplace Policy

The University of Pittsburgh prohibits the unlawful manufacture, distribution, dispensation, possession, or use of a controlled substance on University property or as part of any University activity. Faculty, staff, and students of the University must also comply with the laws of the Commonwealth of Pennsylvania on the possession and consumption of alcohol.

Violation of this policy will result in disciplinary action within 30 days, including, but not limited to, a warning, written reprimand, suspension, dismissal, expulsion, and/or mandatory participation and successful completion of a drug abuse assistance or rehabilitation program approved by an appropriate health or law-enforcement agency.
Any University employee paid from federally funded grants or contracts, or any students participating in any federally funded or guaranteed Student Loan Program, must notify the University of any criminal drug statute conviction for a violation occurring at the University or while engaged in University activities. For more information, see www.cfo.pitt.edu/policies/procedure/06/06-02-01.html.

E-mail Communication Policy

The University of Pittsburgh has established e-mail as an official means of communication with students. For more information, see www.cfo.pitt.edu/policies/policy/09/09-10-01.html.

Faculty-Student Relationships

The University's educational mission is promoted by professional relationships between faculty members and students. Relationships of an intimate nature (that is, sexual and/or romantic) compromise the integrity of a faculty-student relationship whenever the faculty member has a professional responsibility for the student. The University prohibits intimate relationships between a faculty member and a student whose academic work, teaching, or research is being supervised or evaluated by the faculty member.

If an intimate relationship should exist or develop between a faculty member and a student, the University requires the faculty member to remove himself/herself from all supervisory, evaluative, and/or formal advisory roles with respect to the student.

Definition note: In this policy, the definition of faculty member refers to anyone appointed by the University as a teacher, researcher, or academic administrator, including graduate and undergraduate students so appointed. For complete text on this policy, see www.cfo.pitt.edu/policies/policy/02/02-04-03.html.

Family Educational Rights and Privacy Act (FERPA)

In compliance with the Family Educational Rights and Privacy Act of 1974, the University guarantees that students have the right to inspect all personally identifiable records maintained by the institution and may challenge the content and accuracy of those records through appropriate institutional procedures. It is further guaranteed by the University that student records containing personally identifiable information will not be released except as permitted by the Family Educational Rights and Privacy Act. See www.registrar.pitt.edu/ferpa.html for more information.

Statement of Compliance Regarding Satisfactory Academic Progress (SAP) for VA Educational Beneficiaries - 38 US Code Section 3675(b)

This policy applies to students who are VA beneficiaries and is intended to prevent the submission of VA-claims ("certifications") for those students who are suspended. Specifically:

- In this instance, VA beneficiaries are defined as students receiving VA educational benefits under Chapter-30, Chapter-33, Chapter-35 and Chapter-1606, Title 38 U.S. Code.
- Students placed on academic probation at the end of the term may be certified for VA educational benefits for the subsequent term. If the student does not meet satisfactory academic progress in that subsequent term-defined as attaining a cumulative GPA at or above 2.00 for full-time students or attaining a cumulative GPA at or above 2.00 after attempting 12 additional credits for part-time students-the university will immediately suspend further VA certifications on behalf of the student.
- Students returning from one calendar year of suspension must re-apply for admission to the university. If accepted, those students may be certified for VA educational benefits.

Certification of Chapter-31 students will be at the discretion of the student's VA vocational rehabilitation counselor.

Statement of Compliance Regarding VA Educational Beneficiaries - 38 US Code Section 3679(e)
As a matter of policy, the University of Pittsburgh allows students identified as covered individuals* to attend and participate in all course(s) of education for any given term in which the student has been certified for VA educational benefits. This policy includes those circumstances in which VA payment(s) for student tuition and fees is late or delayed for up to 90 days after date of certification. The University retains the right to impose late fees upon those students who incur or retain an outstanding balance beyond the amount of expected VA tuition & fee payment for the term.

It is school policy to request all beneficiaries of VA educational benefits-including covered individuals*-provide the following documentation as part of certification process:

- VA Certificate of Eligibility (COE) or Statement of Benefits as printed from the VA.gov website
- Completion of a certification request form (in hard-copy or on-line), which includes biographical information necessary for submission in the VA's IT system of record-VA-Once.

Failure to provide such documentation will result in the delay of any VA claim or certification.

* Note: VA defines a Covered Individual as any individual who is entitled to VA educational assistance under the VA's Vocational Rehabilitation and Employment program (38 U.S. Code Chapter 31) or the VA's Post-9/11 GI Bill® (38 U.S. Code Chapter 33).

("GI Bill®" is a registered trademark of the U.S. Department of Veterans Affairs (VA). More information about education benefits offered by VA is available at the official U.S. government website at www.benefits.va.gov/gibill).

Harassment Policies

Harassment

No University employee, student, or individual on University property may intentionally harass or abuse a person (physically or verbally) with the purpose or effect of unreasonably interfering with such person's work or academic performance, or of creating an intimidating, hostile, or offensive work or academic environment.

Sexual Harassment

The University of Pittsburgh is committed to the maintenance of a community free from all forms of sexual harassment. Sexual harassment violates University policy as well as state, federal, and local laws. It is neither permitted nor condoned.

It is also a violation of the University of Pittsburgh's policy against sexual harassment for any employee or student at the University of Pittsburgh to attempt in any way to retaliate against a person who makes a claim of sexual harassment. Any individual who, after thorough investigation and an informal or formal hearing, is found to have violated the University's policy against sexual harassment will be subject to disciplinary action, including, but not limited to, reprimand, suspension, termination, or expulsion.

Any disciplinary action taken will depend upon the severity of the offense. For more information, see www.cfo.pitt.edu/policies/documents/policy06-05-01web.pdf.

Immunization Policy

The University of Pittsburgh requires the immunization of all incoming freshmen against measles, mumps, and rubella as a condition of attendance at the University. Incoming freshmen must provide to the University Student Health Service documentation of immunization that includes the month, day, and year that the immunizations were administered. Completed immunization forms must be kept on file in the Student Health Service.

Exemptions may be granted based on a written statement from a physician that the immunization may be detrimental to the health of the student or on a student's objection to immunization on religious grounds or on the basis of a strong moral or ethical conviction similar to a religious belief. However, if an outbreak of measles, mumps, or rubella occurs, the State Health Department may exclude from classes students who do not provide proof of immunity to these diseases. For more information, see www.cfo.pitt.edu/policies/policy/06/06-01-02.html.

Patent Policy
A University student, during his or her period of enrollment, may be responsible for new discoveries and inventions that could have commercial value and contribute to scientific, technological, social, and cultural progress. Those accomplishments should be patented in the best interest of the student, the University, the public, and the government. The University's policy on patents determines the rights and obligations of the student and the University in any technology the student may invent while enrolled in the University. Details of this University policy are available from the Office of Technology Management or at www.cfo.pitt.edu/policies/policy/11/11-02-01.html.

**Research Integrity**

The University of Pittsburgh seeks excellence in the discovery and dissemination of knowledge. Excellence in scholarship requires all members of the University community to adhere strictly to the highest standards of integrity with regard to research, instruction, and evaluation. Research misconduct carries potential for serious harm to the University community, to the integrity of science, and to society as a whole. The University's Research Integrity Policy is available online at www.cfo.pitt.edu/policies/policy/11/11-01-01.html.

**Smoking Policy**

Smoking is prohibited in all University-owned and -leased facilities, including residence halls and off-campus housing facilities, and in all University vehicles, including motor pool vehicles, campus buses, and vans, with explicit limited exceptions described in University Policy 04-05-03. For complete policy text, see www.cfo.pitt.edu/policies/policy/04/04-05-03.html.

**Student Service Indicators Policy**

Access to many student services including registration and access to grades may be delayed for a number of reasons ranging from financial liability to missing data. Complete information on this policy is available online at www.cfo.pitt.edu/policies/policy/09/09-04-09.html.

**Use of Alcohol Policy**

The University of Pittsburgh prohibits use and dispensing of alcohol in compliance with the laws of the Commonwealth of Pennsylvania. For more information, see www.cfo.pitt.edu/policies/policy/04/04-05-02.html.
Application for Admission

Most undergraduate admissions to the University of Pittsburgh's Pittsburgh campus are handled by the Office of Admissions and Financial Aid. This section details the general requirements and procedures for admissions to the University through that office and also provides admissions information for prospective students whose applications are not handled by that office. Some schools and programs require supplemental application materials or admission requirements in addition to those requested by the Office of Admissions and Financial Aid. Those requirements are listed within the Schools and Academic Programs section of this bulletin.

The admissions information in this section is subject to change at any time. It is intended to serve only as a general source of information.

Pittsburgh Campus First-Year Student Admissions

Prospective students who have not earned college credits since graduating from high school with a diploma or GED should consult this section for information on admission to the University of Pittsburgh.

Admissions Contact Information

University of Pittsburgh
Office of Admissions and Financial Aid
Alumni Hall
4227 Fifth Ave.
Pittsburgh, PA 15260-6601
412-624-PITT (7488)
Admissions: pitt.admissions@pitt.edu
Financial Aid: finaid@pitt.edu
admissions.pitt.edu
financialaid.pitt.edu

High School Preparation

First-Year Student applicants to the University of Pittsburgh should have completed a minimum of 17 units of credit in college-preparatory-level courses in high school. Specific course requirements for first-year entry schools include:

- Swanson School of Engineering applicants should have completed four units of mathematics through trigonometry/pre-calculus-as well as a unit each of chemistry and physics.
- School of Nursing applicants should have three units of laboratory science, including one year of chemistry with a lab, and four units of mathematics.
- College of Business Administration applicants should have completed four units of mathematics through trigonometry, pre-calculus or calculus in their senior year.

Application Procedures

Students seeking admission to the University of Pittsburgh must complete the online application, a Self-Reported Academic Record or an official high school transcript, and the $55 application fee. Students may choose to submit SAT or ACT scores but are not required to do so. The Personal Statement, included with the First-Year Student Application, is optional but required for scholarship candidates.

Exceptions: Applicants to the Dental Hygiene Program, and students seeking special or non-degree status should see the application procedures outlined under their respective admissions sections (Dental Hygiene Program-School of Dental Medicine Admissions, and Special and Non-Degree Status).
Application Deadlines

The University of Pittsburgh practices a rolling admissions policy, meaning there is not a specific deadline by which prospective students must apply. Applicants are considered and informed of admission decisions on a first-come, first-served basis. However, applicants who want to be automatically reviewed for institutional merit scholarships must submit applications by December 1. See Academic Merit Scholarships.

Note: International students must apply by:

- April 1: for fall and summer term admission
- October 1: for spring term admission

Academic Merit Scholarships

Applicants are automatically considered for Pitt academic merit scholarships if their applications and all supporting materials are received by December 1. Scholarships are awarded for four years or eight semesters, provided that the student adheres to University Scholarship Guidelines.

Graduate School Guarantees

Outstanding first-year students applicants who indicate certain professional programs as their intended field of study on their application will automatically be reviewed for guaranteed admission into that professional program. We offer guarantees for 20 graduate programs, including business, law, medicine, dental medicine, and physician assistant studies.

A separate application is not necessary, although some programs have additional application requirements. Pitt Guaranteed Admissions Programs are competitive, so we highly recommend you apply for admission early in your senior year of high school. Early application is recommended as spaces are limited. Please note that the Medical School Guarantee has a deadline of November 1.

Enrollment Fee/Tuition Deposit

Once accepted, students must reserve their positions in the upcoming class by submitting a nontransferable, nonrefundable $300 enrollment fee by May 1 for the fall term. This fee is a combined $100 tuition deposit and a $200 orientation fee). Residence hall accommodations on the Pittsburgh campus are guaranteed to first-year students admitted for the fall term who pay the $300 enrollment fee by May 1 and meet all housing contract and deposit deadlines. Housing is guaranteed for three full years from the time admission is offered. After that housing is available on a first-come, first-served basis.

Deferred Admission

First-Year Student applicants who are interested in deferring University of Pittsburgh admissions may do so for up to one academic year following the term for which admission was offered, provided the enrollment fee has been paid by the May 1 deadline.

Examples of deferrals may include, but are not limited to a religious activity, community service, or world travel. Students may only defer to the same term as their original admission. For example, spring term admission students may only defer to the following spring term. Please refer to the deferral website for most up-to-date information.

International first-year students are eligible for deferral but must work with the Office of International Services regarding visas.

Regional Campus Admissions

Listed below is the contact information for the admissions offices of the University of Pittsburgh's four regional campuses. Contact the regional campuses for more information on their particular requirements:
Transfer Student Admissions

Prospective students who are high school graduates and have attended postsecondary institutions, colleges, or universities (except those who took college classes while in high school and are considered first-year students with advanced standing) apply for admission as transfer students through the Office of Admissions and Financial Aid. Transfers between University of Pittsburgh schools or campuses are handled through the school or campus.

Application Procedures

Degree-seeking transfer students who wish to be considered for admission to the University of Pittsburgh must complete an online application, an official high school transcript or GED, an official transcript from each postsecondary institution attended (whether or not it is intended that all
courses will be counted toward a degree at the University of Pittsburgh), official SAT or ACT test result score if either test was taken, and the $45 application fee.

Exceptions: Applicants to the Dental Hygiene Program, and students seeking special or non-degree status should see the application procedures outlined under their respective admissions sections (PharmD Program, Dental Hygiene Program-School of Dental Medicine Admissions, and Special and Non-Degree Status).

NOTE: International transfer students must apply online.

Admission Deadlines

The University of Pittsburgh practices a rolling admissions policy, meaning there is not a specific deadline by which transfer students must apply. Applicants are considered and informed of admission decisions as they apply. The following schools practice rolling admission for all three terms, except where noted: Dietrich School of Arts and Sciences, College of Business Administration, Swanson School of Engineering, College of General Studies, School of Nursing (fall and spring term admission only) and the School of Social Work (fall and spring term admission only). However, there are several schools and programs that have definitive deadlines by which applications must be submitted for consideration. You can verify deadlines for your school of interest online.

NOTE: International applicants must apply by the deadlines specified or the specific program deadline, whichever comes first.

Articulation Agreements and Transfer Credit Guide Summaries

The University of Pittsburgh has formal articulation agreements with various higher education institutions throughout the state of Pennsylvania to facilitate the transfer of students from one institution to the other as they pursue their educational goals. The table lists the current articulation agreements and their specific requirements.

Transfer Scholarships

Transfer scholarships are available to College of General Studies students who are U.S. citizens and eligible non-citizens. Degree-seeking applicants are automatically reviewed for eligibility. These annual scholarships range in value from $600 to $2,500. The scholarships are offered through: the CGS Alumni Endowment Scholarship Fund including John O. Bolvin and Anne E. Levenson scholarships, The Brackmann and Saalbach Family Endowed Scholarship, Joan C. Dash Scholarship, Bruce P. McGough Scholarship, Tom R. Slone Scholarship (designated for students who are active in the Big Brothers Big Sisters youth mentoring organization), and the Grace C. Stewart Fund. Awarding of these scholarships is handled through the Office of Admissions and Financial Aid.

Evaluation of Transfer Credits

Credits earned at another accredited institution are evaluated by the admitting school, which determines the number of advanced standing credits the transfer student will be awarded and the distribution of these credits in relation to the school's degree requirements and University policy. See the appropriate school's information in this bulletin.

Deferred Admission

The University does not offer deferred admission for a subsequent term to admitted students not enrolling for the term of their admission. However, students wishing to have their applications re-reviewed for another term may submit a request in writing to the Office of Admissions and Financial Aid.

Readmission

Students who previously attended the University of Pittsburgh then attended other institutions and wish to return to the University are considered transfer students and must reapply following the guidelines for transfer students. The admitting school will evaluate the credits previously earned at
the University of Pittsburgh along with credits earned elsewhere to determine the number of credits the transfer student will be allowed. Acceptable credits from institutions other than Pitt will appear on the student transcript as advanced standing credits and will not count in the GPA calculation. Credits earned at the University of Pittsburgh will appear as term entries on the student transcript, and courses accepted toward the degree will be used when calculating the student's GPA.

Former University of Pittsburgh students who have not attended another institution may be reinstated through the dean's office of the school in which they were previously enrolled.

**Dental Hygiene Program-School of Dental Medicine**

**Admissions**

The School of Dental Medicine offers a two-year (six consecutive terms) Associate of Science Degree in Dental Hygiene. The program is designed to fulfill the professional and academic requirements of the Commission on Dental Accreditation. Completion of the program prepares the student for licensure as a dental hygienist in most states.

**Admissions Contact Information**

University of Pittsburgh
School of Dental Medicine
Dental Hygiene Program
B-82 Salk Hall
Pittsburgh, PA 15261-1937
412-648-8432
hygieneadmissions@pitt.edu
dental.pitt.edu/students/dental-hygiene-program

**Admission Requirements**

Applicants to the Dental Hygiene Program must fulfill the following criteria before applying: have a high school diploma, have a minimum GPA of 3.0 at all academic institutions, have a minimum SAT I combined math and verbal score of 1200 or ACT score of 24, have successfully completed chemistry and biology courses with laboratory components, and have successfully completed a college-level English composition course and a college-level introduction to sociology course.

**Application Procedures**

Applicants to the Dental Hygiene Program must submit the following items to the School of Dental Medicine by November 1 for early decision review: a completed Dental Hygiene Program application, including the Personal Essay; three professional references; transcripts from all academic institutions attended; 15 hours of job shadowing with a practicing dental hygienist; and SAT I/ACT scores. Once the application materials have been received, the qualified applicant will be invited to attend a mandatory Applicant Seminar and participate in a personal interview with the admissions committee.

Students who complete this program also have the option of completing a Bachelor of Science in Dental Hygiene offered by the College of General Studies (see the College of General Studies listing in the Schools and Academic Programs section of this bulletin for information on BS degree completion option).

**School of Nursing-RN Options (Early admissions To MSN Or DNP)**
The University of Pittsburgh RN Options (Early Admission to MSN or DNP) curriculum is designed for registered nurses, who obtained their initial nursing education through either a CCNE, ACICS or ACEN [NLN] accredited diploma or associate degree or diploma program and want to pursue undergraduate education with early admission to graduate nursing program. Courses are taught by nursing leaders who are experts in their field. Faculty serve as educators, role models and mentors for their students. The RN Options curriculum builds upon the individual professional nurse's strengths and experiences to expand professional knowledge and practice skills. Graduates of the University of Pittsburgh School of Nursing possess critical appraisal/thinking skills, sophisticated clinical practice knowledge, and the ability to integrate the latest research findings to provide quality, safe and effective patient care.

Course offerings are flexible and students may begin coursework in any term (fall/spring/summer).

Applicants should apply using the online application.

Contact Information

Admission Requirements and Application Procedures

Application Guidelines

RN-MSN or DNP early admission track:

- Successful completion of a nursing diploma or associate degree program submitting official Transcripts from institution.
- Cumulative Grade Point Average (GPA) of 3.0 for previous college and/or coursework, which must be semester credits or the equivalent.
- Copy of current RN license (All students must obtain a Pennsylvania license) (students may be permitted to take theory courses only until evidence of successful completion of NCLEX is provided)
- Successful completion of all prerequisite courses
- ≥ 3.0 GPA in Associate Degree or nursing diploma (from ACEN (NLN), ACICS, or CCNE accredited program)
- Graduate Record Exam (GRE) :
  - MSN track - may be waived if the RN program GPA is 3.5 or higher; or DNP track - no waiver, Verbal & Quantitative sections (competitive score), Analytical Writing (≥ 3)
- Brief type written essay (as needed DNP project statement)
- Current resume
- Three letters of professional recommendation, one from current manager
- Completed online application
- International applicants: consult nursing.pitt.edu & ois.pitt.edu

Formal interview*

Applicants must meet the admission criteria for the BSN Program and simultaneous conditional admission to the preferred graduate program. If admitted they will complete the remaining 24 credits will be at the graduate level. Full and part-time schedules are available.

*Potential students will meet with the RN Options Coordinator for an interview and must meet with the coordinator of the graduate program.

School of Nursing - Accelerated 2nd Degree BSN Program
The Accelerated 2nd Degree BSN is designed to enable individuals with a Baccalaureate Degree in another discipline the ability to earn a Bachelor's of Science Degree in Nursing (BSN) in three consecutive full-time terms. The Accelerated 2nd Degree BSN requires 122 credits: 31 credits from a previous degree, 36 to 38 prerequisite credits, and 54 curriculum credits. The curriculum is fast-paced and designed to build upon the individual's previous education while providing additional science and nursing content. At the completion, graduates are eligible to take the National Council Licensure Examination (NCLEX) to become Registered Nurses (RN).

Admission to the Accelerated 2nd Degree BSN is competitive and is based upon proven academic achievement and grades earned in prerequisite courses. The school admits three cohorts, Fall, Spring and Summer.

Contact Information

University of Pittsburgh
School of Nursing
239 Victoria Hall
Pittsburgh, PA 15261
1-888-747-0794
sao50@pitt.edu
http://www.nursing.pitt.edu

Admission Requirements and Application Procedures

The Accelerated 2nd Degree BSN requires an applicant to complete 36 prerequisite credits. These courses may be taken at any college or university. Courses from other institutions must be evaluated as equivalent to University of Pittsburgh courses. (Coursework taken at the University of Pittsburgh School of Nursing prior to admission may be taken as a non-degree seeking student.)

Required prerequisites include:

<table>
<thead>
<tr>

*Should have been completed within the past ten years
+Should have achieved a grade of "B-" or better

Application Deadlines and Other Information

Early submission of an application is recommended. New classes begin in the Fall, Spring and Summer term. Accelerated 2nd Degree BSN applications are reviewed, and admission decisions made, based on the application deadlines: Fall Term -- February 15/June 1; Spring Term--June 1/October 1; Summer Term--October 1/February 15.
Prospective students must apply online to the School of Nursing.

**School of Pharmacy PharmD Program**

Transfer students, both within the Pitt system and from other colleges and universities, applying for admission to the School of Pharmacy must: (1) file an online PharmCAS application with all supporting credentials by the deadline; and (2) submit a School of Pharmacy Supplemental Application by the deadline specified in the online instructions. For more information on deadlines, online applications, admission calendar, and application instructions, please visit the school's "Admission Process" Web site.

**Transfer within University Schools and Regional Campuses**

**Transfer between Schools**

Students enrolled in an undergraduate school of the University who wish to transfer to another undergraduate school at the University should contact the school in which they are currently enrolled to request a transfer of their records. The student's records will be evaluated by the receiving school, which will then notify the student of acceptance or rejection.

**Transfer between Campuses**

Students enrolled in one campus of the University who wish to transfer to another campus of the University should contact the school at the campus in which they are currently enrolled to request a transfer of their records. The receiving schools will evaluate the records and notify students of acceptance or rejection.

**Reinstatement**

Students who have left the University for one calendar year or more (whether of their own volition or as a result of a suspension) and who wish to continue their studies must apply for reinstatement through the school to which they were previously admitted.

**Second-degree Candidates**

**Previous Degree Earned Elsewhere**

Students who have earned a previous undergraduate degree from an institution other than the University of Pittsburgh and wish to earn a second degree are treated as transfer students and must apply through the Office of Admissions and Financial Aid. (See Transfer Student Admissions.)

**Previous Degree Earned at the University of Pittsburgh**

Students who have earned an undergraduate degree from a school or campus of the University of Pittsburgh and who now wish to earn another bachelor's degree should apply as second-degree students directly through the desired school. This process may vary with some upper-level division schools.

Each school determines the number of previously earned credits that will apply. A minimum of 30 new credits must be earned to receive a second degree. In addition to those general rules, schools may have other requirements.

**Special and NonDegree Admissions**
**College in High School**

The College in High School Program, offered through the Dietrich School of Arts and Sciences, offers qualified area high school students the opportunity to earn college credits from the University during their regular school day. Courses in chemistry, communication, computer science, French, Latin, mathematics, physics, and statistics are offered. There is a registration process and fee for this program. For further information, contact the College in High School office at 412-624-6828.

**Postbaccalaureate Students**

Some of the schools at the University will allow students who have already earned a bachelor's degree to take courses at the University as nondegree students. Students should contact the appropriate school for information about admission requirements.

Students interested in the Dietrich School of Arts and Sciences or the College of General Studies should contact the College of General Studies, 412-624-6600, 407 Cathedral of Learning; College of Business Administration students should contact 412-383-9600, 2100 Sennott Square; Swanson School of Engineering students should contact the Engineering Administration Office 412-624-9800, 253 Benedum Hall.

NOTE: International applicants should file an online application.

**Guest/Visiting Students**

Guest students are those who are seeking a degree at another university but want to take courses at the University of Pittsburgh for credit with the expectation that the credits will transfer back to the student's home institution. Guest students must be in good academic standing and generally must apply at least a few weeks before the start of a given term. Contact the appropriate school for other admission requirements. Admission for the fall and spring terms is handled through the school. Summer admission for visiting students is handled through the College of General Studies.

NOTE: International applicants should file an online application.

**Summer Visiting Students**

Students who are seeking a degree at another university but want to take courses at the University of Pittsburgh for credit during the summer should apply through the College of General Studies (CGS). Contact CGS at 412-624-6600.

EXCEPTION: International students
Campus Facilities and Student Services

Academic Resources

A strong infrastructure of services is key to ensuring academic success at any institution of higher learning. The University of Pittsburgh has a wide variety of academic resources that provide that infrastructure to aid students with their research, computing, tutoring, and advising needs.

University Library System

271 Hillman Library
412-648-7710
feedback@library.pitt.edu
www.library.pitt.edu

The University of Pittsburgh libraries and collections provide an abundant amount of information and services to the University's students, faculty, staff, administrators, and researchers. In fiscal year 2007, the University's 28 libraries and collections have surpassed 5.1 million volumes. In addition, they contain more than 5 million pieces of microforms, and more than 48,000 current serials.

Under the administration of the Hillman University Librarian and Director, the University Library System (ULS) includes the following libraries and collections: Hillman (main), African American, Allegheny Observatory, Archives Service Center, Buhl (social work), Center for American Music, Chemistry, Darlington Memorial (American history), East Asian, Engineering (Bevier Library), Frick Fine Arts, Government Documents, Katz Graduate School of Business, Langley (biological sciences, behavioral neuroscience), Mathematics, Music, Public and International Affairs/Economics, and Special Collections. Libraries are also located at each of the University's four regional campuses. The ULS maintains a high-density storage area at the Library Facility in the Point Breeze section of Pittsburgh.

The Hillman Library is the largest facility, with seating for 1,530 users. It offers an open stack arrangement and an extensive range of library services. Hillman Library houses collections in the humanities and social sciences and includes area studies, psychology, computer science, maps, and government documents. In addition to the ULS, the University offers the Barco Law Library and the Health Sciences Library System.

The Health Sciences Library System (HSLS) at the University of Pittsburgh comprises several libraries that support the educational, research, patient care, and service activities of the schools of the health sciences (Medicine, Dental Medicine, Pharmacy, Health and Rehabilitation Sciences, Nursing, and Public Health) as well as the hospitals of the University of Pittsburgh Medical Center. The HSLS includes Falk Library of the Health Sciences, The Western Psychiatric Institute and Clinic Library, The Libraries at UPMC Shadyside, and the Children's Hospital of Pittsburgh Libraries. The Computer and Media Center in Falk Library is the primary health sciences facility and service point for audiovisual and microcomputer resources. HSLS Online (www.hsls.pitt.edu) is the gateway to extensive electronic resources for clinical and research needs.

This year, the University of Pittsburgh's online library catalog, PITTCat, which provides access to materials held in all University libraries, has been updated. PITTCat+ now offers, in addition to the more than five million titles from PITTCat Classic, all items from the D-Scribe Digital Collections, along with enhanced book content such as integrated article searching, access to tables of contents, jacket covers, and book reviews. Further features are a word cloud of associated search terms, spelling variants, translated terms, and thesaurus terms, as well as refined search options that allow searches based on library location. Searches can also be saved as an RSS feed that will send notifications when new items are added to the catalog.

The ULS also provides access to a comprehensive journal and magazine article discovery tool, Zoom!, as well as other online resources such as: Web of Science, Science Direct, and Scopus in the physical sciences; PsycINFO, ERIC, and Congressional Quarterly for the social sciences; Historical Abstracts, Philosopher's Index, and RILM Abstracts of Music Literature in the arts and humanities; and additional collections of article and newspaper databases from EBSCO and Lexis-Nexis.

These and hundreds of other online resources are available via the Pitt Digital Library at www.library.pitt.edu. The University of Pittsburgh is a member of the Association of Research Libraries. Through membership in several Pennsylvania consortia of libraries (PALCI, PALINET, and the Oakland Library Consortium), cooperative borrowing arrangements have been developed with other Pennsylvania institutions.

Information Technology (CSSD)
University of Pittsburgh students have access to the latest information technology resources provided by Computing Services and Systems Development.

**Connect to Wi-Fi**

Depending on location, you'll find one of two networks on campus: PittNet in academic and administrative buildings-including the William Pitt Union-and MyResNet in all rooms, common areas, and dining facilities in residence halls. pi.tt/pittnet

**Sign In Once, Authenticate Twice**

Use Pitt Passport single sign-on to access many of the University's web-based services. Download the Duo Mobile app to verify your identity with multifactor authentication. For services that don't use single sign-on, Pitt Password Manager creates strong, unique passwords and saves them in a secure vault-that you can access from any device-using a single master password. pi.tt/passport

**Log In to Your Pitt Email**

Your email address begins with your University Computing Account username: abc123@pitt.edu. The email account is yours to keep, even after you graduate. pi.tt/emailsetup

**Install Free Software-Including Office**

Install the software you need at no charge, including Microsoft Office, Antivirus (Symantec Endpoint Protection), Anti-Malware (Malwarebytes), and nearly 70 additional titles. Gain cloud-based access to even more applications via Office 365 ProPlus, along with Office apps for Android and iPhone. pi.tt/studentsoftware

**Browse the Pitt App Center**

Find nearly 50 free University-related iOS and Android apps for doing everything from viewing class assignments to checking the Panthers' score. pi.tt/appcenter

**Find Focus in Student Computing Labs**

Eight computing labs around campus-some open 24 hours a day-provide convenient access to Windows and Mac computers with a variety of software, as well as scanners, printers, charging stations, and space to use your own device. What's more, computer kiosks throughout campus provide a quick alternative for getting online if you forget your phone or your battery dies. pi.tt/labs

**Print from Your Laptop or Smartphone**

It's easy to print to any of the 80 print stations across the Pittsburgh campus. Download the Pitt Print Client from software.pitt.edu to print from your computer. Using a phone or tablet? Simply email the file to mobileprint@pitt.edu or colorpint@pitt.edu. Alternatively, visit print.pitt.edu to upload files and manage your Pitt Printing account. pi.tt/print
Manage Your Academics

Register for classes, message the instructor, get assignments, and see grades using the Pitt PS Mobile and Courseweb (Blackboard) apps. pi.tt/courseapps

On-Demand Learning

Brush up on your tech skills, learn a new topic or take up a new hobby with thousands of free courses offered through LinkedIn Learning. pi.tt/linkedin

Cloud Storage & Collaboration

Store, work on, and share files in real time, from any device, using Box and/or Microsoft OneDrive. pi.tt/collaboration

Discover Additional Online Services

Whether you need help connecting to PittNet Wi-Fi, finding a campus shuttle, or loading Panther Funds, AskCathy Service Discovery (askcathy.pitt.edu) can help you quickly find online University resources. pi.tt/askcathy

Get Help When and How You Want It

The 24/7 IT Help Desk is your central point of contact for all Pitt Information Technology services. Get fast and friendly support via phone, chat, email, walk-in locations, or an online form—even on holidays. pi.tt/help

Writing Center

Writing Center
317B O'Hara Student Center
412-624-6556
writingcenter.pitt.edu

The Writing Center provides a place for all University of Pittsburgh students to come to work on their writing. The Center is staffed by experienced consultants who have been trained to help others with their writing. The Center also offers Writers’ Café (for anyone interested in the craft of creative writing) and International Café (for international undergraduate and graduate students). Online tutoring is available for students who are off campus. For more information (including our schedule of events) or to make an appointment, visit our website.

English Language Institute

M13 Parkvale Building
412-624-5901

The English Language Institute (ELI) is part of the Department of Linguistics and offers a variety of English-as-an-additional-language courses and programs, as well as courses and support for matriculated students at the University and expertise for other University-related endeavors that involve English language learners and Teaching English to Speakers of Other Languages (TESOL).

Non-Credit English Classes

- Speaking, listening, writing, reading, and grammar courses in English for speakers of other languages from abroad and the local international community who want to improve their English for academic, professional, or personal reasons
Admission to the ELI's non-credit courses and programs does not include admission to the University of Pittsburgh.

**Support for Matriculated Students at the University of Pittsburgh**

- English proficiency testing of non-native speakers of English who are matriculating in University programs
- Credit and non-credit English language support courses for matriculated students and teaching assistants/fellows who are non-native speakers of English
- Specialized English instruction to University programs by request
- Assessment of teaching assistants/fellows who are non-native speakers of English to ensure compliance with the legal requirements of the Commonwealth of Pennsylvania
- Teacher training, internships, and research opportunities for matriculated students in University programs in the areas of Applied Linguistics and TESOL
- Expertise for various other University-related endeavors that involve English language learners and TESOL

Additionally, the ELI actively participates in and contributes to the development of the field of English for speakers of other languages, especially in areas of classroom instruction, second language learning and acquisition, curriculum design, program structure, and administrative practices. For more information about the English Language Institute, contact elipitt@pitt.edu, visit www.eli.pitt.edu, or call 412-624-5901.

**Housing**

The University provides a variety of housing options and support services to students, including Residence Life and Off-Campus Living. Students may choose to live on campus in University-owned housing or in off-campus housing.

**Housing Application Process**

**Incoming Students**

As part of the admissions process, the University provides entering freshmen with a three-year housing guarantee, provided they

- Have been admitted through the Office of Admissions and Financial Aid and their tuition deposit has been received by May 1, and
- Have submitted their Housing/Dining Services Application, contract, and deposit by the due date.

**Returning Guaranteed Students**

Students who have lived in University housing during their first year with a housing "guarantee" are guaranteed housing for their second and third years at the University provided that they

- Maintain their status as current and continuing full-time undergraduate students in each successive year and
- Currently reside in University Housing and meet all housing requirements (application, contract, deposit, and due date) in each successive year.

The housing application process takes place each spring and is administered by Panther Central, which is located in the Litchfield Towers main lobby. For all housing information, stop in or call Panther Central at 412-648-1100 or visit https://www.pc.pitt.edu/housing-services.

**Residence Life**

The director and assistant directors of Residence Life are responsible for resident assistants and resident directors, who work with students as their live-in advisors and resource persons within the residence halls. The office also advises the Resident Student Association (RSA), the Residence Life governing body. The staff offers a variety of educational and social activities within the residence halls, addresses student counseling and conduct issues, and provides other assistance to residents on matters affecting the quality of life in the residence halls.

Residence Life also offers students opportunities to live in focused living learning communities, which are linked with specific academic departments. Residence Life staff provide personal assistance 24 hours a day, seven days a week. For more information, students should contact the resident director in their hall, visit or call the office in 203 Bruce Hall (412-648-1200/1201), or go to www.reslife.pitt.edu.
Off-Campus Living

The Off-Campus Living (OCL) Center provides assistance to students, staff, and faculty in identifying, renting, leasing, or purchasing suitable living accommodations. Off-Campus Living provides the following: information on University-owned apartments, an apartment roommate matching service, a sublet service, maps of Pittsburgh and surrounding areas, rental tips, campus shuttle schedules, free local telephone service to contact landlords, and listings of apartments inspected and approved by the City of Pittsburgh. Call 412-624-6998, visit the office at 204 Brackenridge Hall, 3959 Fifth Avenue, or go to www.ocl.pitt.edu.

Student Resources

The University is committed to providing a high quality of life for its students and toward that end supports a variety of offices and activities designed to aid students in realizing their potential and having a fulfilling on-campus life.

Affirmative Action

In addition to its work with developing, implementing, and monitoring the University's affirmative action program, the Office of Affirmative Action is responsible for receiving, investigating, and mediating complaints from any members of the University community who believe they have been discriminated against or harassed on the basis of their race, color, religion, national origin, ancestry, sex, age, marital status, familial status, sexual orientation, gender identity or expression, disability, or status as a disabled veteran or a veteran of the Vietnam era. Individuals may request information and advice anonymously if they wish. The privacy of all parties will be respected. The office is in 412 Bellefield Hall, 315 S. Bellefield Ave.; the phone number is 412-648-7860.

Athletics

The University offers a variety of opportunities for students to participate in athletics on the varsity, intramural, and club levels, as well as on-campus facilities for group sports and individual exercise.

Varsity Sports

The University offers 10 sports for men (baseball, basketball, cross country, diving, football, soccer, softball, swimming, indoor and outdoor track, and wrestling) and nine sports for women (basketball, cross country, diving, gymnastics, soccer, swimming, tennis, indoor and outdoor track, and volleyball) at the varsity level as well as cheerleading activities. For more information about these sports and contact numbers for varsity coaches, call 412-648-8200 or visit the Pittsburgh Panthers Web site at www.pittsburghpanthers.com.

Intramural and Club Sports

New outdoor playing fields are available behind the renovated Cost Sports Center. Call 412-648-8210 for more information or visit the intramural program's Web site at www.intramurals.pitt.edu.

Sports clubs offer participation in sports ranging from bowling to rowing. Contact the Student Organization Resource Center (833 William Pitt Union, 412-624-7116) for more information on sports clubs or visit the Web site at www.sorc.pitt.edu.

Sports Facilities

There are a variety of sports facilities available for use by individuals and groups. Fitness centers are available in Litchfield Towers, Schenley Quadrangle, Lothrop Hall, Sutherland Hall, Bellefield Hall, Trees Hall, and the Baierl Student Recreation Center in the Petersen Events Center. Gymnasiums and swimming pools are available in Trees Hall and Bellefield Hall. The Baierl Student Recreation Center has two convertible racquetball/squash courts and four racquetball courts. In addition, eight squash courts are available in the Fitzgerald Field House, and soccer fields are available through the Department of Athletics.
Visit www.intramurals.pitt.edu for a virtual tour of the facilities, reservation information, and hours of operation.

Book Centers

The University owns and operates two bookstores on campus: The Book Center and The Health Book Center. The Book Center, at 4000 Fifth Ave., carries textbooks for most University courses, as well as a general book selection, school supplies, and sundries such as art supplies, stationery, greeting cards, and calendars. Call 412-648-1455 or visit http://www.pittuniversitystore.com/home.aspx for more information. The Health Book Center, at 3527 Forbes Ave., carries all course books for the Schools of Medicine, Dental Medicine, Health and Rehabilitation Sciences, Nursing, and Pharmacy, as well as the Graduate School of Public Health. Call 412-648-8915 or visit http://www.pittuniversitystore.com/home.aspx for more information.

The University Counseling Center

The University Counseling Center, in 334 William Pitt Union, is staffed by licensed psychiatrists, psychologists, social workers, and counselors who provide a variety of services for undergraduate and graduate students. All services of the center are accredited by the International Association of Counseling Services and are confidential, free, and voluntary.

We provide individual, couples, and group counseling for students seeking assistance for relationship problems, anxiety, depression, stress, and concerns about academic progress or direction. We also provide psychiatric services and medication management for currently enrolled students. Special services such as sexual assault counseling and advocacy are provided through the center's Office of Sexual Assault Services. In addition, drug and alcohol assessments and counseling are provided at the center.

For information about the center and its services, see www.counseling.pitt.edu. To schedule an appointment, call 412-648-7930.

Sexual Assault Services/University Counseling

The Office of Sexual Assault Services provides individual and group counseling designed to alleviate the trauma associated with sexual victimization. Emergency medical, legal, and police support is provided. Students are assisted in negotiating course schedules or room changes and in obtaining medical, legal, and counseling resources available to them in the University and local communities.

The Office of Sexual Assault Services also sponsors Peers 2 Peers. This is a volunteer student outreach program whose mission is to create an awareness of the dynamics of sexual assault on the Pittsburgh campus, promote effective communication, and prevent sexual victimization through educational programming. For more information, call 412-648-7856 or 412-648-7930, visit 334 William Pitt Union, or see http://www.saserv.pitt.edu.

Disability Resources and Services

The Office of Disability Resources and Services (DRS) provides a broad range of support services to assist students with disabilities. Services include, but are not limited to, tape-recorded textbooks, sign language interpreters, adaptive computer technology, Braille translation, and nonstandard exam arrangements. Contact DRS at 412-648-7890 or 412383-7355 (TTY) in 140 William Pitt Union or see www.drs.pitt.edu for more information.

Dining Services

Campus Dining Services offers students a variety of dining options. All student dining services are coordinated and administered through Panther Central, which is located in the Litchfield Towers main lobby. All students residing in residence halls are required to purchase a meal plan. Students living in University apartment-style accommodations may purchase a meal plan but are not required to do so. Students can select from a variety of meal plans, each offering different combinations of dining passes and dining dollars. Campus Dining Services invites you to check out all of our dining options across campus.

Major Residence Hall Dining Facilities
Retail Operations

- Quick Zone in Litchfield Towers and Sutherland Hall
- Market to Go in Litchfield Towers
- Schenley Café in William Pitt Union
- Cathedral Café in the Cathedral of Learning
- Petersen Events Center Food Court
- Starbucks Coffee Carts across campus
- Einstein Bros. Bagels in Posvar Hall and Benedum Hall

For all dining information, stop in or call Panther Central at 412-648-1100 or visit www.pc.pitt.edu/dining/index.html.

Health Care and Student Health Service

All full-time students pay a student health fee each term to cover a variety of services at the Student Health Service in Suite 500 of the Medical Arts Building, 3708 Fifth Ave., Pittsburgh, PA 15213. The Student Health Service is a multiservice health care facility that offers outpatient clinical services, gynecology, and comprehensive health education programs. Call 412-383-1800 or visit www.studenthealth.pitt.edu for more information.

The University of Pittsburgh Pharmacy, in the same suite as the Student Health Service, offers over-the-counter and prescription medicines, often at lower prices than available elsewhere. Call 412-383-1850 or visit www.studentaffairs.pitt.edu/shsp pharmacy for more information.

Students should have health insurance to protect themselves in the event of illness or injury. A direct-pay medical insurance plan is available to students through University health plans. The plan is designed to provide insurance benefits for services not offered at the Student Health Service as well as for hospitalization and emergency care. Applications and product information are available at the Student Health Service.

ID Cards (Panther Cards)

Every student, faculty, and staff member at the University must obtain an ID card from Panther Central, located in the Litchfield Towers main lobby. Student IDs, or "Panther Cards," are used to access residence halls (your assigned residence only), meal plan, athletic events, campus shuttle buses, recreational facilities (within your residence hall, Bellefield Hall, Trees Hall, and the Baierl Student Recreation Center), Student Health Services, computer labs, and Pitt Program Council events. The Panther Card also affords access to off-campus benefits such as free admission to some Pittsburgh cultural facilities. In addition, the Panther Card offers access to Panther Funds at local participating merchants. For all Panther Card information, stop in or call Panther Central at 412-648-1100 or visit www.pc.pitt.edu/card/index.html.

International Services

708 William Pitt Union
412-624-7120
www.ois.pitt.edu

The Office of International Services (OIS) advises international students on how to maintain their immigration status and helps to ensure compliance for both international visitors and the University, with respect to federal regulations. OIS also provides generalized support in connecting the University's international community and their hosting departments with resources inside and outside campus. For more information, contact OIS at ois@pitt.edu, or call 412-624-7120.

Parking and Transportation

The University provides a variety of parking and transportation services, both on and off campus. For more information, contact the University Department of Parking, Transportation, and Services at 412-624-8612 or visit www.pts.pitt.edu.
Parking Services

Student parking is available year-round. The Parking Services Office provides several parking options to meet the different schedules and needs of students. Commuter parking is available daily on a cash basis or by the term in selected facilities by permit only. Resident student permits are available for full-time students residing in one of the University residence halls operated through the Housing Office. Evening permits are available for parking after 2:50 p.m. weekdays and all day on weekends, except during special events, in many University lots. For more information, visit our Web site at www.pts.pitt.edu/parking. The Parking Services Office is located at 204 Brackenridge Hall, 412-624-4034.

Commuting Alternatives (Ridesharing)

Daily commuter students can save money by sharing a ride. A free, computerized matching service is available to help you locate others interested in carpooling. Contact the University's ridesharing partner online at commuteinfo.org, or call 888-814-6110. For additional commuting alternatives, visit www.pts.pitt.edu/commuting.

Public Transportation

Students may ride any Port Authority bus, incline, or light-rail train within Allegheny County for free by showing their valid University ID cards. The Department of Parking, Transportation, and Services, at 3525 Forbes Ave., maintains all Port Authority rider information, including maps, schedules, and routes to facilitate the use of public transit. Port Authority bus schedules are also available in the lobby of the William Pitt Union.

Pittsburgh campus Transportation System

University of Pittsburgh students may ride all of the Pitt buses and shuttles fare-free by showing a valid University ID.

In addition, students are permitted two guest riders (space permitting). Buses and shuttles normally have a 20- or 30-minute route. Detailed maps and time schedules are available online at www.pc.pitt.edu/transportation/index.html and at the William Pitt Union information desk. The Department of Parking, Transportation, and Services is located at 3525 Forbes Ave.

SafeRider

A night-time, non-emergency van service called SafeRider is available during the evening and early morning hours to transport you from one campus building to another, from local residences to campus buildings, and from campus buildings to local residences within the University boundaries, and it is not on a regular University bus route. SafeRider operates during the following hours:

Fall and Spring:
Sunday-Wednesday and days when the shuttle system operates on a holiday schedule
7 p.m.-3 a.m.

Thursday-Saturday
7 p.m.-5 a.m.

Summer:
Daily 9 p.m.-3 a.m.

For service, call the dispatcher at 412-648-CALL (2255) during these times. You will need to provide the following information when you call: your name, pick-up location and the telephone number at the pick-up location, destination, number of individuals with you, and student ID number. Consult the SafeRider brochure for additional information concerning policies and procedures.

Buses Home for the Holidays
This program is designed to give students a safe, comfortable, alternative ride home for the three major recesses: Thanksgiving, winter, and spring. Buses depart from the William Pitt Union, and most of the destinations served are direct routes. Deluxe motor coaches (Lenzer/Coach USA) transport the students in air-conditioned comfort while movies are shown en route.

**Bicycle Registration Program**

Registration of bicycles is recommended as a deterrent to theft, to help in the identification of lost or stolen bicycles, and to help better accommodate cyclists at the University. Registration is easy, and it is free. You may register bikes at www.pts.pitt.edu/commuting/bicycling/bike-registration.php.

Bicycle lockers are available at two convenient locations. The locker totally encloses the bicycle, protecting it from rain and snow. There is also room to store a helmet, riding shoes, and other accessories. Lockers may be rented by the term at the Parking Services Office in 204 Brackenridge Hall.

**Career Development**

The Career Development Office is dedicated to helping students prepare for rewarding careers by providing individual assistance and a variety of professional development programs. Career counselors and consultants assist students with choosing or changing an academic major through personal assessments, writing effective resumes and cover letters, networking with professionals, exploring internship opportunities, applying for graduate or professional school, and preparing for job interviews. Career Development has a variety of online resources that are available through the my.pitt.edu portal, including *FutureLinks*, a career management software program that enables students to apply for jobs and internships, as well as register for job fairs, career workshops, and other programs and events. Diverse educational programs are offered for students in all stages of their journey. For more information, call 412-648-7130, stop by 224 William Pitt Union, or see www.careers.pitt.edu.

**Police Department**

The University of Pittsburgh Police Department provides police and security services to the University community. For emergency calls, dial 811 from on-campus phones or 412-624-2121 from off-campus phones. The University of Pittsburgh Police Department's main headquarters is in G1N30 Wesley W. Posvar Hall. For general information calls (non-emergency), dial 412-624-4040 or see http://www.police.pitt.edu.

**Student Government**

Undergraduates at the University are represented by two primary governing bodies, the Student Government Board and the College of General Studies (CGS) Student Government Council.

**The Student Government Board (SGB)**

The Student Government Board (SGB) is an elected body of nine students that exists to promote the concerns, interests, needs, and welfare of non-College of General Studies undergraduates at the Pittsburgh campus of the University of Pittsburgh. As the governing body for students, SGB serves as the liaison to University faculty, administration, and staff. SGB also distributes student activity fee funds to student clubs and organizations.

SGB makes appointments to University committees and also oversees SGB committees, whose membership is open to all undergraduates. These SGB committees include Academic Affairs; Allocations; Communications; Community and Governmental Relations; Elections; Facilities, Technology, and Transportation; First Year Council; Judicial; Wellness; and any existing task force or ad-hoc committee. The SGB meets weekly during the fall and spring terms. For more information, call 412-648-7970, visit 848 William Pitt Union, or see www.sgb.pitt.edu.

**The CGS Student Government Council**

The CGS Student Government Council is composed of five elected members who represent the interests of students in the College of General Studies. The Council coordinates a variety of student programs and services and allocates the CGS student activity fee. In addition to the five members of the Council, there are five divisions that help carry out the Council's business: Budget and Finance, Judicial Affairs, First Degree, Marketing and Advertising, and Student Programs. For more information, call 412-648-7895, visit 824 William Pitt Union, or see www.cgssg.pitt.edu.
PITT Arts

Each year, 22,000 Pitt students experience the power of the visual and performing arts in Pittsburgh through the PITT ARTS program, which sponsors 110 free student outings per year, including trips to the symphony, cinema, opera, ballet, theater, and museums. Students may also use their student ID cards (Panther Card) to visit the Carnegie Museums of Art and Natural History, Phipps Conservatory and Botanical Gardens, and The Andy Warhol Museum at no cost. Visit the PITT ARTS Web site at www.pitt.edu/~pittarts to find a listing of current arts events in Pittsburgh and on campus, and explore the cheap seats page to find out about deeply discounted tickets, sold right in the William Pitt Union, to local arts organizations.

Pitt Program Council

A variety of entertainment and educational activities are planned each year by the student committees of the Pitt Program Council (PPC), the central programming organization on campus. Programs include lectures, travel packages, weekend films, miniseminars, recreational tournaments, annual homecoming activities, and art gallery exhibits. New members are always welcome. For more information, contact the Pitt Program Council at 412-648-7900, or visit www.pitt.edu/~ppc.

Student Employment and Placement Assistance

The mission of the Office of Student Employment and Placement Assistance (SEPA) is to connect Pitt students who are actively seeking jobs or internships with recruiters and human resources professionals at businesses and organizations throughout the country. SEPA staff work to build relationships with representatives in a variety of career fields and help match qualified students with companies. SEPA hosts several career fairs each semester, facilitates the on-campus interviewing process, and helps students to tap into the Pitt Career Network sponsored by the Pitt Alumni Association. Employers and students use the online career management software program FutureLinks, which is accessible on the my.pitt.edu portal, to make connections. For more information, call 412-648-HIRE (4473), stop by the office located at 200 William Pitt Union, or visit www.sepa.pitt.edu.

Student Media

Student-produced media creates original news and entertainment for students and provides training to students interested in working in the media.

The Pitt News publishes a daily newspaper in print, online, social media and mobile app and features news, sports, opinions, art and entertainment and videos.

WPTS-FM radio station broadcasts alternative and independent music, campus news and sports via the FM dial, webstreaming and mobile apps. Their website provides music articles, concert reviews, and news and sports reports.

UPTV-21 television station posts varied short comedic and dramatic video entertainment programs on YouTube and streams some programming live on its website.

Student Organizations

More than 500 registered student organizations provide myriad opportunities for extracurricular activity. In addition to government, media, publications, programming, fraternity, sorority, and honor societies, there are clubs for sports, recreation, performing arts, politics, religion, service, professional and academic pursuits, ethnic and cultural enrichment, and many other specialized interests. Students may also participate in organizations that represent the interest of specific student groups, such as the Black Action Society. A complete list of registered student organizations is available at www.sorc.pitt.edu. The Student Organization Resource Center (SORC) is the office that oversees registered student organizations and is located in 833 William Pitt Union.

Student Volunteer Outreach

The Student Volunteer Outreach (SVO) promotes, supports, and provides opportunities for students to participate in community service and service-learning activities ranging from one-time service projects and alternative break projects to internships and ongoing volunteer opportunities. It also
sponsors annual projects and events, including the SVO/SGB Pittsburgh Project, Pitt Partnership for Food, and the Agency Fair for student volunteers. The SVO is on the ninth floor of the William Pitt Union; its Web site is www.svo.pitt.edu.

University Child Development Center

The University Child Development Center is a developmental child-care facility for children between the ages of 6 weeks and 5 years. The center is open to children of University students, faculty, and staff. The children are free to select activities from an age-appropriate environment prepared by the teaching staff. The environment allows children to practice previously learned skills and challenges children to develop new psychosocial, cognitive, and motor skills in a relaxed, nurturing atmosphere. The center is at 635 Clyde St. and is open from 7 a.m. to 6 p.m. Monday through Friday. For more information, call 412-383-2100 or see www.hr.pitt.edu/ucdc.

Veterans Services

The staff of the Office of Veterans Services facilitates the transition of veterans from military to University life, supports their ongoing academic success, and assists veterans, guardsmen, reservists, spouses, and dependents in receiving their military education benefits. In addition to these services, the office implements the VA work study program. The Office of Veterans Services is located on the first floor of Posvar Hall, inside of the College of General Studies. Please call 412-624-3213 or email veterans@pitt.edu for more information.

William Pitt Union

The William Pitt Union, built more than 100 years ago and located across Bigelow Boulevard from the Cathedral of Learning, serves as the focal point for campus activities, student organizations, and the Division of Student Affairs. The union features a recreation center, videogame center, dining service, information service, art gallery, dance studio, lounges, meeting rooms, student organization offices, ticket office, dining rooms, and several multi-use spaces for programs. To reach the union's information desk, call 412-648-7815.

Financial Information

Tuition

Enrollment Fee or Tuition Deposit

Upon acceptance to the University, students may be required to pay a nonrefundable, nontransferable enrollment fee or tuition deposit. If paying an enrollment fee, part of that fee will be considered to be a tuition deposit, and part might be used to pay for new student programming of some nature. The tuition deposit component will be applied toward their first-term tuition. The amount of the deposit varies, depending on your program of admission. Instructions for payment will be specified in the admission letter.

Full-time and Part-time Tuition and Mandatory Fees

This information can be found on the Tuition Rates and Mandatory Fees page and information for Pitt Online Tuition and Mandatory Fees page.

Determining How Full-Time vs Part-Time Students are Billed

In the Fall and Spring Terms:

Undergraduate students registered for 12 to 18 credits in the Fall and Spring Terms are regarded as full-time students, and are assessed the current undergraduate "flat" tuition rate for their academic center.
Undergraduate students registered for fewer than 12 credits are considered part-time, and are billed on a per-credit basis.

Graduate students registered for 9 to 15 credits in the Fall and Spring Terms are regarded as full-time students, and are assessed the current graduate "flat" tuition rate for their academic center.

Graduate students registered for fewer than 9 credits are considered part-time, and billed on a per-credit basis.

Students will be charged per credit for each credit exceeding the maximum full-time credit limit.

In the Summer Term:

All students are billed on a per-credit basis in the Summer Term with the exception of students in the School of Dental Medicine Dental Hygiene Certificate Program; the Swanson School of Engineering undergraduate program; the Katz Graduate School of Business Full-time MBA, MBA/MS and EMBA Programs; and the School of Nursing Accelerated Nursing Program.

DETERMINING HOW UNDERGRADUATE VS. GRADUATE STUDENTS ARE BILLED

Students are billed at the undergraduate or graduate tuition level in accordance with University of Pittsburgh Tuition and Fees Policy 09-05-03.

- A student enrolled in an associate's or bachelor's degree program is considered an undergraduate student and is billed at the appropriate undergraduate tuition rate.
- A student who has already been awarded a bachelor's degree and is enrolled in a graduate or doctorate-professional practice program is considered a graduate student and is billed at the appropriate graduate tuition rate, even for undergraduate classes taken during the student's graduate career.
- A student who has already been awarded a bachelor's degree and is enrolled in an associate's program or in another bachelor's program is considered a post-baccalaureate student. Post-baccalaureate students enrolled in an undergraduate academic center are billed at the
undergraduate tuition rate, while post-baccalaureate students enrolled in an academic center that has both undergraduate and graduate degree programs may be billed at either the undergraduate or graduate rate, according to the admitting school's program requirements.

**About Mandatory Fees**

Mandatory Fee figures are applicable to students regardless of Pennsylvania or Out-of-State residency. Not listed under Mandatory Fees are:

1. **Course/major fees** that are based upon registration in specific courses (e.g., lab fees).
2. **Academic fees** (e.g., application fees, academic program fees for programs such as Cooperative Engineering Program and Study Abroad).
3. **Service fees** (e.g., late application for graduation and lost ID cards).
4. **Professional workshop and professional development fees**
5. **Specific-student fees** such as the Freshman Socialization Fee at the Greensburg Campus.

**Residency/Reduced Tuition**

Admitted students who are United States citizens and have lived in Pennsylvania for a continuous period of 12 months before enrollment in any institution of higher education may be eligible for Pennsylvania tuition rates. Students who wish to challenge their residency classification may petition for Pennsylvania tuition rates by submitting convincing evidence for review to the Student Appeals Office in Thackeray Hall. The University's policy on Pennsylvania Residency Classification is located online at https://www.cfo.pitt.edu/policies/policy/09/09-05-04.html.

Military affiliated students and students who are not U.S. citizens may be eligible for Pennsylvania tuition rates if they meet the qualifications and provide the documentation required by University of Pittsburgh Policy 09-05-04, Pennsylvania Residency Classification.

For any student younger than 22, both the student and parent(s) or legal guardian(s) must meet the residency requirements to be eligible for reduced tuition.

**Financial Obligation**

Students establish a financial obligation to the University when they enroll in courses and will be asked to acknowledge that obligation to be permitted to enroll in classes each term. The agreement to pay (Promissory Note) the student electronically agrees to provides detailed information about the student's financial obligation and also the consequences of default of that obligation. Unpaid accounts may be referred to a collection agency, reported to credit bureau(s), and/or the student may be subject to legal action. In either case, the student will be responsible for any and all expenses incurred, including attorney fees. Students will bear the University's costs and fees associated with all collection activity resulting from the student's failure to make payment under the agreement they will sign each term.

**Fees**

**Special Service Fees** may be charged for University transactions that are processed beyond deadlines, due dates, and specified time limits. Special service fees are listed each term in the Schedule of Classes.

**Course Fees** are associated with certain courses and will be charged when the student enrolls in those courses. These courses are identified in the Schedule of Classes and Course Descriptions. Course fee information is also available on the Academic Regulations page.

**Late Payment Fees** are charged when students make payment after the published due date for their charges for the term.

**Payments and Credit Balance Refunds**

PittPAY is the University's online financial portal for students and the Authorized Users that students have designated as having access to their financial information.

Payments may be made in PittPAY by electronic check (eCheck) or by credit or debit card. While there is no charge for eCheck transactions, our vendor will charge a non-refundable 2.75% convenience fee for all debit or credit card payments. Check payments can be mailed to the address on the Remittance Form at the bottom of the Term Statement, which students and Authorized Users can generate and print themselves.
International Payments can be processed in PittPAY through the University's partnership with Flywire. Flywire offers a streamlined and cost effective way for students and Authorized Users to make international payments on the student account from almost any country, in most currencies.

PittPAY Payment Plans are available for those who elect to make payments in a series of monthly installments, instead of one payment by the due date. Participation in a payment plan is optional. To view available payment plan offers, go to the Payment Plans tab in PittPAY.

eRefunds are automatic refunds of credit balances from the student account. Credit balances occur when payments to the account, including the disbursement of loans and financial aid, exceed the amount you owe. Students and Authorized Users who are Parent PLUS loan borrowers, go to the eRefund tab in PittPAY to designate the checking or savings account where your credit balances should be directly deposited.

*The International Services Fee is charged to all full-time, international undergraduate students enrolled at the Pittsburgh Campus. For Academic Year 2021-2022, international undergraduate students are charged $1,000 per year or $500 per term.

Note: The mandatory fees exhibited are applicable to Fall Term 2021 and are subject to change in subsequent terms of Academic Year 2021-2022.

Pitt Online Tuition and Mandatory Fees

Pitt Online is a division of the University Center for Teaching and Learning. Through Pitt Online, several of the graduate programs offered in traditional classroom settings are available to qualified applicants regardless of their geographical location. Please note, these rates apply to students admitted to one of the Pitt Online programs, not to students taking one or more online classes as part of a traditional academic program.

### Due Date Schedule

**Notifications and Due Dates**

Weekly Balance Due Notifications are sent by email and text to students and their Authorized Users from pittpay@pitt.edu when there is a balance due on the student account. To view and edit your email and mobile phone number settings for these notifications, login to PittPAY, select Actions, then Manage Notifications.

*Please note, due dates provided here are for planning purposes. The due dates for future terms are estimates, and are subject to change. When balance due notifications begin for each new term, the official due date will be presented in PittPAY on the Account Summary and Account Activity tabs. The current due date is always provided on the Student Payment Center's homepage, as well.*

As soon as you make an online payment in PittPAY, your balance due will be updated to reflect the payment. You can view your payment receipt in Transaction History. Late fees, collection costs, and financial holds are placed on past due accounts.

If you prefer to make monthly payments, learn about the PittPAY Payment Plan. **There is a deadline to enroll in a payment plan each term** and you can take advantage of more monthly installments by enrolling in a plan early.
College of Business Administration

The College of Business Administration (Pitt Business) is the undergraduate division of the Joseph M. Katz Graduate School of Business and awards the Bachelor of Science in Business Administration (BSBA) degree. Detailed information about the College of Business Administration is available at our website: http://www.cba.pitt.edu/about/. Pitt Business offers full-time and part-time programs with majors in accounting, business information systems, finance, global management, human resources management, marketing, and supply chain management. Double-degree programs are also available to BSBA students in conjunction with the Dietrich School of Arts and Sciences, School of Information Sciences (SIS) and the College of General Studies. Pitt Business also offers certificate programs in international business, leadership and ethics, supply chain management, innovation and entrepreneurship and business analytics for students in the BSBA degree program.

Additional degree programs include the arts and sciences/business dual major program offered through the Dietrich School of Arts and Sciences in conjunction with Pitt Business, and a post-baccalaureate career development certificate program in accounting available through the College of General Studies. Pitt Business draws its faculty from the Katz School and is accredited by AACSBIInternational-The Association to Advance Collegiate Schools of Business.

Application Procedures

First-time freshman and external transfer admissions to Pitt Business are handled through the Office of Admissions and Financial Aid. Students planning to relocate to Pitt Business from another Pitt academic program or campus should contact the program in which they are currently enrolled to have their records forwarded to Pitt Business for evaluation. Details for freshman and transfer admissions, as well as for relocation, are provided in the Application for Admission section of this catalog.

Special Admissions

Under certain circumstances, second-degree, post-baccalaureate, and guest students may apply directly to the College of Business Administration for admission. Students applying under one of these statuses are considered for admission based on the strength of their academic records. (See Second Degree Candidates and Special and Nondegree Admissions sections of this catalog for more information.) Contact the Pitt Business Office of Admissions for specifics on admission requirements and other procedures.

Evaluation of Transfer Credits

Students transferring from other colleges or universities are encouraged to apply to the College of Business Administration through the Office of Admissions and Financial Aid. (See Transfer Student Admissions section of this catalog for detailed information.) Upon admission to Pitt Business, transfer students will receive a BSBA degree requirements checklist by email. Pitt Business will evaluate coursework from other colleges based on content and equivalency to coursework offered at the University of Pittsburgh. The degree checklist shows how the transferred courses will apply to the student's BSBA degree. To transfer, a course must be completed with a grade of C or better. The University does not accept grades for transfer, only credits. A minimum of 40 credits must be completed at the University of Pittsburgh. Students who have questions about their credit evaluation should contact the Pitt Business Office of Admissions. Please see our website for additional details on transfer credits:
http://www.cba.pitt.edu/admissions/transfer/credit-policies
Academic Standards

The following section details the school's academic standards:

Academic Standing Policy

The academic standing of all BSBA students is reviewed at the end of the fall and spring terms. As a result of this review, students are assigned one of the following academic standing codes: good academic standing, academic probation, academic suspension, or academic dismissal.

Good Academic Standing

Students remain in good standing as long as they maintain a cumulative grade point average (GPA) of 2.00 in all courses taken at the University of Pittsburgh.

The cumulative GPA includes all courses taken on a Letter Grade grading basis at all campuses of the University of Pittsburgh. The course repeat rules require the most recent grade of a repeated course be included in the GPA.

Academic Probation

Any student who has a cumulative GPA below 2.00 is placed on academic probation.

Academic Suspension

Full-time students

If after one term of additional enrollment, the cumulative GPA of a full-time student on probation remains below 2.00, the student is subject to suspension or dismissal.

Students on probation

Students on probation who enroll and then withdraw from all courses are still subject to suspension because they have not raised their cumulative GPA to 2.00 after an additional term of attempted enrollment.

Part-time students

If, after attempting 12 additional credits, the cumulative GPA of a part-time student on probation remains below 2.00, the student is subject to suspension or dismissal.

An academic suspension from Pitt Business prohibits students from enrolling in courses at the University of Pittsburgh for one calendar year. Students will not be awarded transfer credit for courses taken at other colleges or universities while on academic suspension.

Reinstatement after the First Suspension

After one calendar year, suspended students are eligible to apply for reinstatement to the College of Business Administration by writing to the Pitt Business Associate Dean presenting a rationale for reinstatement.

Reinstated students return on academic probation and have one term of enrollment to raise their cumulative GPA to 2.0 or be subject to a second suspension or dismissal.
Second Academic Suspension

If suspended a second time, a student is not eligible for reinstatement for five years. After five years, suspended students are eligible to apply for reinstatement to the College of Business Administration by writing to the Pitt Business Associate Dean presenting a rationale for reinstatement.

Academic Dismissal

Dismissal from Pitt Business is a permanent action, and dismissed students are not eligible for reinstatement at any University of Pittsburgh school or campus.

Grade Point Average Standards

Overall GPA

A cumulative grade point average (GPA) of 2.00 is required in all courses applied toward the BSBA degree.

Major GPA

A minimum cumulative GPA of 2.25 (C+ average) is required in all courses applied toward a student's major. A C- or better must be earned in each individual course applied toward a student's major.

For full-time students: If a full-time student's major GPA drops below 2.25 for two consecutive terms, no new major courses may be taken until the major GPA is raised to 2.25 through course repeats.

For part-time students: If a part-time student's major GPA drops below 2.25 for 9 consecutive credits in his/her major, no new major courses may be taken until the major GPA is raised to 2.25 through course repeats.

Satisfactory/No-Credit Grade Option Policy

All required BSBA core courses and all courses to be applied to a student's major must be taken on a letter grade basis. In addition, courses taken to fulfill the requirements in microeconomics, macroeconomics, calculus, and statistics must also be taken on a letter grade basis. Language classes, arts and sciences general education courses, and electives may be taken on a satisfactory/no-credit (S/NC) grade basis.

Under the satisfactory/no-credit option, a student who does satisfactory work (C or better) receives the grade of S for the course and earns credit for the course. If a student does unsatisfactory work (defined as C- or lower), the student receives the grade of NC and does not earn credit for the course. These courses are not calculated as part of the GPA.

Students may select the S/NC grade option when enrolling online or by visiting 140 Thackeray Hall and completing the grade option form prior to the appropriate deadline.

Course Repeat Policy

A Pitt Business student may repeat a required Arts & Sciences course (including calculus, statistics, microeconomics, macroeconomics and composition), a business core requirement and/or a business major requirement once. If the minimal acceptable grade is not earned after repeating the course, the student may have to transfer out of Pitt Business, or select a different business major.

In the calculation of the major and overall grade point averages, the grade earned in the second taking of a course replaces the grade earned in the first taking; however, the grade earned in the first taking of the course, remains on the student's transcript with a notation indicating the course was repeated.
Academic Integrity

All Pitt Business students are responsible for adhering to Pitt Business policies on academic integrity. The Pitt Business academic integrity guidelines follow the University's guidelines with some procedural changes. Please see the guidelines for details.

Advising

Students pursuing the BSBA degree receive academic advising from full-time professional academic advisors in the College of Business Administration. Each new BSBA student is assigned an academic advisor, establishing a relationship that usually continues through graduation unless the student requests an advisor assignment change.

Academic advisors are information resources. Advisors meet with BSBA students at least once during the fall and spring academic terms to help students create customized academic and career individual development plans and prepare for course enrollment. BSBA students are required to meet with their academic advisor at least once per term, prior to enrollment.

BSBA students are responsible for their academic and career development choices and decisions, but Pitt Business academic advisors are an integrative information and planning resource for students.

BSBA Learning Goals

Graduates of the University of Pittsburgh's College of Business Administration should achieve the following learning outcomes in the four broad components of the BSBA program (major, electives, core and foundations courses):

Demonstrate in-depth knowledge and skills in at least one academic/career focus through completion of majors, certificates, minors and electives.

Demonstrate business management literacy.

Demonstrate competency in the fundamentals of analyzing problems and making decisions with standard business data and data sources using appropriate quantitative and qualitative methodologies.

Demonstrate competency in professional communication and leadership.

Demonstrate competency in applying acquired knowledge and skills in real-world situations.

Acquire a basic knowledge of at least one nation, region or culture in areas such as language, history, political systems, literature and artistic expression.

Acquire an exposure to the knowledge and methodologies used to explore natural, individual, social and cultural phenomena.

Major and Degree Options

The College of Business Administration offers the following degree options:

BSBA Degree

The College of Business Administration awards the Bachelor of Science in Business Administration (BSBA) degree and offers majors in accounting, business information systems, finance, global management, human resources management, marketing and supply chain management.

Pitt Business Certificate Programs
BSBA students have the opportunity to specialize their studies in business analytics, innovation and entrepreneurship, international business, leadership and ethics, supply chain management, innovation and entrepreneurship and business analytics through certificate programs.

The Certificate Program in Business Analytics (CPBA) is designed to give students a strong foundation in the theory, processes, and tools of business analytics in the organizational setting. The CPBA will help students to understand both the statistical and managerial sides of business analytics so that students can add value to organizations of all sizes and types.

The Certificate Program in Innovation and Entrepreneurship (CPIE) is a unique opportunity for Pitt Business students who wish to explore the interface between innovation and entrepreneurship as an enhancement to their business major. The CPIE will contribute to a student's preparation for an entrepreneurial endeavor or a career within an organization committed to innovation and entrepreneurial thinking.

The Certificate Program in International Business (CPIB) builds upon the core curriculum in the College of Business Administration. Requirements include satisfactory completion of level 4 of a second language (a two-year, four-course sequence at the University of Pittsburgh), specialized course work, and one term of approved study abroad or an international internship. Students majoring in Global Management may not also earn the Certificate in International Business. (15 credits, plus foreign language study, and international experience).

The Certificate Program in Leadership and Ethics (CLE) builds upon the core curriculum in the College of Business Administration. Students admitted to the CLE will be required to successfully complete all requirements for the BSBA degree requirements including satisfactory completion of specialized course work, internships, and a service-learning project integrating ethics and leadership. (16 credits)

The Certificate in Supply Chain Management (CSCM) is offered jointly by the College of Business Administration and Swanson School of Engineering. Enrollment is available to BSBA students and students enrolled in the BS engineering programs in the School of Engineering. The CSCM provides students with the opportunity to understand important concepts in supply chain management and develop managerial and technical skills which are highly valued in today's corporate environment. The program also offers an international travel experience for students to gain hands-on exposure to global supply chain organizations. The CSCM requires 15 credits and is comprised of coursework offered by both CBA and the School of Engineering.

The Certificate Program in Innovation and Entrepreneurship (CPIE) builds upon the core curriculum in the College of Business Administration. CPIE students will explore the interface between innovation and entrepreneurship as an enhancement to their business major. The CPIE will contribute to a student's preparation for an entrepreneurial endeavor or a career within an organization committed to innovation and entrepreneurial thinking. (15 credits)

Pitt Business/A&S Double Degree

Pitt Business offers the double degree program for students seeking to earn degrees in both business and the arts and sciences. Students earning degrees from both Pitt Business and A&S complete a 150-credit program of study, generally requiring five years of study. Students considering this option should consult with advisors in both Pitt Business and A&S, as well as a representative from Career Services, to determine how this program will advance their academic and career goals.

Pitt Business/SIS Double Degree

Pitt Business offers a double degree program for BSBA students seeking to earn degrees in both business and information sciences. Students earning degrees from both Pitt Business and SIS complete a 150-credit program of study, generally requiring five years of study. Students considering this option should consult with advisors in both Pitt Business and SIS, as well as a representative from Career Services, to determine how this program will advance their academic and career goals.

Special Academic Opportunities/Programs

The College of Business Administration offers the following special programs:
Internship Programs

Internships and other career development experiences are an absolutely essential part of business education. The Office of Career Development team works closely with business students to prepare them to successfully launch their careers. A wide range of services, including individualized resume development reviews, mock interviews and career coaching are provided by the Career Development team. The Career Development team also works closely with a wide network of employers and alumni to help business students find internships, as well as full-time positions upon graduation.

Additionally, an international internship program is available to qualified Pitt Business students. This six-credit global immersion program provides a valuable professional experience for students to develop their functional skills, gain a better understanding of cultural differences in the workplace, and enhance their language skills. Sites include: Berlin, Germany; San Paulo, Brazil; Dublin, Ireland; Beijing, China; and Madrid, Spain.

Study Abroad

The Pitt Business International Programs Office connects students to opportunities in more than 75 countries, and the insights Pitt Business students gain into other cultures and economies through these experiences abroad helps them stand out in the competitive global marketplace. Each program is designed to promote cultural development and adheres to our standard of academic excellence. For additional details, please visit our website at: http://www.cba.pitt.edu/study_abroad.

Student Organizations

Business students must diversify their experiences at Pitt and develop hands-on leadership skills essential to a career in business. Pitt Business student organizations are a good way to do this. Designed to run like small businesses, the organizations put students in control. We count on members to coordinate speaker visits from the corporate community, to arrange site visits to local offices of financial institutions and accounting firms, to sponsor social activities for members, and much more. As a member of a student organization, you will make friends for life and develop skills that enhance your resume for your first job. For additional details, please visit our website at: http://www.cba.pitt.edu/studentlife/organizations.

BSBA Degree Program Descriptions

BSBA students may choose a major in accounting, finance, general management, global management, or marketing. To earn the BSBA degree in any of these majors, students must complete a minimum of 120 credits, fulfill all arts and sciences foundation requirements, complete all BSBA core curriculum requirements, and fulfill any major-specific requirements as detailed below.

Certificate

Sports Management Certificate

A total of 18 credits is needed to complete the CPSM certificate. This includes a 6-credit required core, plus 9 credits of elective courses and a 3-credit required experience-based learning component course, a sport or sports-related internship, or a global sports or sports-related experience. Students are strongly encouraged to participate in related non-credit sports or sports-related immersion experiences such as competitions, workshops sponsored by local sports-based organizations (e.g. WISE workshops) or activities sponsored by sports or sports-related organizations (e.g. Pirates Charities or Pitt Athletics events). The courses outlined have been selected to build a solid business foundation while permitting students an in-depth analysis of a chosen major field complemented by a personal interest in sports.

Required Courses (6 credits)

The following courses are required:

- BUSHRM 1050 - HUMAN RESOURCES MANAGEMENT
- BUSHRM 1689 - SPORTS MANAGEMENT
Elective Courses (9 credits)

Select three (3) from the following (elective choices can correspond to elective choices within the student's major).

- BUSHRM 1675 - HUMAN RESOURCES STAFFING
- BUSHRM 1688 - HUMAN RESOURCE ANALYTICS
- BUSENV 1760 - BUSINESS LAW
- BUSORG 1660 - MANAGING DIVERSITY IN ORGANIZATIONS
- BUSMKT 1428 - DIGITAL AND SOCIAL MEDIA MARKETING
- BUSMKT 1470 - SPORTS MARKETING
- BUSBIS 1625 - ELECTRONIC COMMERCE
- BUSFIN 1321 - INVESTMENT MANAGEMENT
- BUSSCM 1750 - REVENUE MANAGEMENT
- BUSSCM 1760 - DATA MINING

Experiential Learning Requirement (3 credits)

Select one of the following.

- BUSHRM 1686 - SPORTS MANAGEMENT PROJECT COURSE
- BUSHRM 1690 - HUMAN RESOURCES MANAGEMENT INTERNSHIP

Minor

Business for Non-Business Students Minor

This document proposes the creation of an eighteen-credit business minor that will be offered to and taken only by non-business students. The proposed program would include five three-credit courses that are part of the current CBA degree requirements and a specially-developed, three-credit capstone course. The program would admit students who have completed their freshman year who have completed 30 or more University credits and who meet admissions requirements of an overall GPA and performance in program prerequisites. Except for the capstone, students in the minor take classes with CBA students, and would need comparable preparation for those classes. The capstone will be designed for this program as a final, integrative, experiential class and would serve as the vehicle for assessment of student learning in the minor.

Choose 5 of the following (15 credits)

- BUSACC 0030 - FINANCIAL ACCOUNTING
- BUSBIS 1060 - INTRODUCTION TO INFORMATION SYSTEMS
- BUSFIN 1030 - INTRODUCTION TO FINANCE
- BUSMKT 1040 - INTRODUCTION TO MARKETING
- BUSORG 1020 - ORGANIZATIONAL BEHAVIOR
- BUSQOM 0050 - QUANTITATIVE METHODS

Required (3 credits)

Department of Business Administration

Certificate
International Business Certificate

The Certificate Program in International Business (CPIB) builds upon the core curriculum in the College of Business Administration and is available only to BSBA students. Requirements include satisfactory completion of level 4 of a second language (a two-year, four-course sequence at the University of Pittsburgh), specialized course work, and one term of approved study abroad or an international internship (3-12 credits). Students majoring in Global Management may not also earn the Certificate in International Business.

Leadership and Ethics Certificate

The Certificate Program in Leadership and Ethics (CLE) builds upon the core curriculum in the College of Business Administration and is available only to BSBA students. Students admitted to the CPLE will be required to successfully complete all requirements for the BSBA degree requirements including satisfactory completion of specialized course work, internships, and a service-learning project integrating ethics and leadership.

Supply Chain Management Certificate

The Certificate in Supply Chain Management (CSCM) is offered jointly by the College of Business Administration and Swanson School of Engineering. Enrollment is available to BSBA students and students enrolled in the BS engineering programs in the School of Engineering. The CSCM provides students with the opportunity to understand important concepts in supply chain management and develop managerial and technical skills which are highly valued in today's corporate environment. The program also offers an international travel experience for students to gain hands-on exposure to global supply chain organizations. The CSCM requires 15 credits and is comprised of coursework offered by both CBA and the School of Engineering.

Joint Major

Business Information Systems, BSBA

BSBA Degree Requirements

The following sections describe the general requirements for all majors within the Bachelor of Science in Business Administration (BSBA) degree program:

The degree requirements applicable to a particular student are based upon the student's term of entry into the program and reflect any requirement changes that have been approved since this bulletin was published. These requirements and the student's progress toward the BSBA degree are noted on the student's online Undergraduate Advisement Transcript.

Graduation Requirements

One-hundred twenty credits are required for graduation with a BSBA degree. A minimum of 51 credits must be taken in the arts and sciences.

A student may use one course to fulfill two arts and sciences requirements.

Arts and Sciences Foundations: Basic Skills Requirements

There are seven basic skills that all BSBA students must master; these basic skills prepare students for future classes. The basic skills requirements include:

English Composition

- Students who earn 500 or above on SAT Verbal (Critical Reading) are placed into Seminar in Composition (or equivalent course).
- Students who earn below 500 on SAT Verbal (Critical Reading) will be placed into a Workshop in Composition course.
- Recommendations for ENGCMP 0201 or ENGCMP 0151 (tutorials) will be based on class diagnostic writing during add/drop period.
English as a Second Language students will be placed into appropriate courses based on English Language proficiency. All students are strongly encouraged to complete their English composition requirement(s) in the freshman year.

Students earning a score of 600 on the critical reading portion of the SAT, who also earn a score of 5 on the Advanced Placement (AP) English exam, will be awarded advanced standing credit for ENGCMP 0200 - SEMINAR IN COMPOSITION and 3 additional credits in English composition.

Second Language

Any one of the following fulfills the language requirement:

- Three years of study of a single second language in high school, passed with an average of C or better over the three years.
- Placement into level III of a second language on a University of Pittsburgh language placement test.
- Placement into level II of a second language on a University of Pittsburgh language placement test and completion of the appropriate course from the second course list below.
- Completion of an approved two course sequence of a foreign language.

Students should discuss specific foreign language course options with their academic advisor.

Calculus

Taking one course from the following list fulfills this requirement:

*Note: Only one of these courses may apply to the 120 total credits required for graduation.*

- MATH 0120 - BUSINESS CALCULUS
- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
- or both
- MATH 0125 - CALCULUS FOR BUSINESS 1 and
- MATH 0126 - CALCULUS FOR BUSINESS 2

Statistics

- STAT 1100 - STATISTICS AND PROBABILITY FOR BUSINESS MANAGEMENT fulfills this requirement.

Economics

Both of the following courses must be taken to fulfill this requirement:

- ECON 0100 - INTRODUCTION TO MICROECONOMIC THEORY
- ECON 0110 - INTRODUCTION TO MACROECONOMIC THEORY

Arts and Sciences General Education Electives

In addition to fulfilling the basic skills requirements, students further supplement their business curriculum by taking courses from six general education categories including:

- Literature (one course)
- Music/art (one course)
- Philosophy (one course)
- Social sciences (two courses, each from a different discipline)
- Natural sciences (two courses)
- Foreign culture (two courses or participation in an approved study abroad program)

*Note: All students, including international students and U.S. citizens who have lived abroad for any length of time, must complete the foreign culture requirement.*
Contact the school for a complete listing of approved courses that meet these elective requirements.

Business Core Curriculum

The Business Core Curriculum:

The following courses (36 credits) are required of all CBA students:

- BUSSPP 0020 - MANAGING COMPLEX ENVIRONMENTS
- BUSACC 0030 - FINANCIAL ACCOUNTING
- BUSACC 0040 - MANAGERIAL ACCOUNTING
- BUSQOM 0050 - QUANTITATIVE METHODS
- BUSENV 0060 - MANAGERIAL ETHICS AND STAKEHOLDER MANAGEMENT
- BUSORG 1020 - ORGANIZATIONAL BEHAVIOR
- BUSORG 1101 - FUNDAMENTALS OF BUSINESS COMMUNICATION (prerequisite 30 credits)
- BUSFIN 1030 - INTRODUCTION TO FINANCE (prerequisite 30 credits)
- BUSMKT 1040 - INTRODUCTION TO MARKETING (prerequisite 30 credits)
- BUSECN 1010 - MANAGERIAL ECONOMICS (prerequisite 30 credits)
- BUSQOM 1070 - OPERATIONS MANAGEMENT
- BUSSPP 1080 - STRATEGIC MANAGEMENT

Other Business Requirements

CBA students must also satisfy one of the following requirements:

BUS 0010 - YOUR ACADEMIC AND CAREER SUCCESS This one-credit course is required of all first-time CBA freshmen. In the course, new BSBA students will explore the majors offered in CBA, investigate global opportunities, develop networking and professional skills, create a resume, and learn how to connect with CBA's Career Services team regarding events, internship opportunities, and career development.

BUS 0020 - YOUR CAREER SUCCESS This one-credit course is required of all new CBA transfer students. In the course, students will participate in career exploration, develop and implement a personal strategy for career goal setting and planning, learn and practice communication and other professional skills, and become familiar with the internship and job search processes.

**Other Business Requirements**

CBA students must also satisfy one of the following requirements:

**BUS 0010 - YOUR ACADEMIC AND CAREER SUCCESS** This one-credit course is required of all first-time CBA freshmen. In the course, new BSBA students will explore the majors offered in CBA, investigate global opportunities, develop networking and professional skills, create a resume, and learn how to connect with CBA's Career Services team regarding events, internship opportunities, and career development.

**BUS 0020 - YOUR CAREER SUCCESS** This one-credit course is required of all new CBA transfer students. In the course, students will participate in career exploration, develop and implement a personal strategy for career goal setting and planning, learn and practice communication and other professional skills, and become familiar with the internship and job search processes.

**Requirements**

The major in accounting is designed to provide students with the general, business, and accounting knowledge necessary for them to succeed as professional accountants. As accounting is a dynamic field, all accounting majors will learn how to keep their knowledge up to date so they can continue to grow throughout their professional careers. Accounting majors will acquire the communication, computer, and interpersonal skills necessary to successfully resolve complex problems in unstructured settings. Accounting majors benefit from participation in extracurricular activities and organizations such as the University of Pittsburgh Accounting Association and Beta Alpha Psi, the national accounting honorary society.
All accounting majors must complete the two (2) BSBA core courses in accounting as well as the seven (7) required accounting major courses listed below. All courses are three credits unless noted otherwise.

BSBA Core Courses in Accounting

Students must complete these courses with a C or better in each course to be eligible to take additional accounting courses:

- BUSACC 0030 - FINANCIAL ACCOUNTING
- BUSACC 0040 - MANAGERIAL ACCOUNTING

Required Accounting Major Courses (22 credits)

Courses are offered on a rotating basis.

- BUSACC 1204 - INTERMEDIATE FINANCIAL REPORTING 1
- BUSACC 1205 - INTERMEDIATE FINANCIAL REPORTING 2
- BUSACC 1216 - ADVANCED FINANCIAL ACCOUNTING
- BUSACC 1221 - STRATEGIC COST MANAGEMENT
- BUSACC 1236 - ACCOUNTING INFORMATION SYSTEMS
- BUSACC 1238 - AUDITING
- BUSACC 1242 - INDIVIDUAL TAX ACCOUNTING AND PLANNING

Accounting Electives

- BUSACC 1210 - FINANCIAL STATEMENT ANALYSIS
- BUSACC 1296 - ACCOUNTING INTERNSHIP (requires CBA approval)
- BUSACC 1298 - ACCOUNTING INDEPENDENT STUDY (requires CBA approval)

BSBA Program Learning Goals

Graduates of the University of Pittsburgh's College of Business Administration should achieve the following learning outcomes in the four broad components of the BSBA program (major, electives, core and foundations):

- Demonstrate in-depth knowledge and skills in at least one academic/career focus through completion of majors, certificates, minors and electives.
- Demonstrate what every BSBA graduate is expected to know about business and management at graduation. This literacy is developed in courses taught in CBA and in particular courses required of all students and offered by the School of Arts and Sciences.
- Demonstrate competency in the fundamentals of analyzing problems and making decisions with standard business data and data sources using appropriate quantitative and qualitative methodologies.
- Demonstrate competency in interpersonal skills, including concise and persuasive written and presentation communication.
- Demonstrate competency in applying acquired knowledge and skills in real-world situations.
- Acquire a basic knowledge of at least one nation, region or culture in areas such as language, history, political systems, literature and artistic expression.
- Acquire an exposure to the knowledge and methodologies used to explore natural, individual, social and cultural phenomena.

Students preparing for the Certified Public Accounting (CPA) Exam will need to complete 150 total credit hours. These credits may be completed through the BSBA program and/or through the MS in Accounting program. Particular CPA Exam requirements vary by state. Academic Advisors and members of the Accounting faculty provide guidance to students preparing for the CPA exam, but students are responsible for confirming with the appropriate state board of accountancy that all educational and experiential requirements are met.
Finance, BSBA

BSBA Degree Requirements

The following sections describe the general requirements for all majors within the Bachelor of Science in Business Administration (BSBA) degree program:

The degree requirements applicable to a particular student are based upon the student's term of entry into the program and reflect any requirement changes that have been approved since this bulletin was published. These requirements and the student's progress toward the BSBA degree are noted on the student's online Undergraduate Advisement Transcript.

Graduation Requirements

One-hundred twenty credits are required for graduation with a BSBA degree. A minimum of 51 credits must be taken in the arts and sciences. A student may use one course to fulfill two arts and sciences requirements.

Arts and Sciences Foundations: Basic Skills Requirements

There are seven basic skills that all BSBA students must master; these basic skills prepare students for future classes. The basic skills requirements include:

English Composition

- Students who earn 500 or above on SAT Verbal (Critical Reading) are placed into Seminar in Composition (or equivalent course).
- Students who earn below 500 on SAT Verbal (Critical Reading) will be placed into a Workshop in Composition course.
- Recommendations for ENGCMP 0201 or ENGCMP 0151 (tutorials) will be based on class diagnostic writing during add/drop period.
- English as a Second Language students will be placed into appropriate courses based on English Language proficiency.

All students are strongly encouraged to complete their English composition requirement(s) in the freshman year.

Students earning a score of 600 on the critical reading portion of the SAT, who also earn a score of 5 on the Advanced Placement (AP) English exam, will be awarded advanced standing credit for ENGCMP 0200 - SEMINAR IN COMPOSITION and 3 additional credits in English composition.

Second Language

Any one of the following fulfills the language requirement:

- Three years of study of a single second language in high school, passed with an average of C or better over the three years.
- Placement into level III of a second language on a University of Pittsburgh language placement test.
- Placement into level II of a second language on a University of Pittsburgh language placement test and completion of the appropriate course from the second course list below.
- Completion of an approved two course sequence of a foreign language.

Students should discuss specific foreign language course options with their academic advisor.

Calculus

Taking one course from the following list fulfills this requirement:

**Note:** Only one of these courses may apply to the 120 total credits required for graduation.

- MATH 0120 - BUSINESS CALCULUS
- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
  or both
- MATH 0125 - CALCULUS FOR BUSINESS 1 and
• MATH 0126 - CALCULUS FOR BUSINESS 2

Statistics

• STAT 1100 - STATISTICS AND PROBABILITY FOR BUSINESS MANAGEMENT fulfills this requirement.

Economics

Both of the following courses must be taken to fulfill this requirement:

• ECON 0100 - INTRODUCTION TO MICROECONOMIC THEORY
• ECON 0110 - INTRODUCTION TO MACROECONOMIC THEORY

Arts and Sciences General Education Electives

In addition to fulfilling the basic skills requirements, students further supplement their business curriculum by taking courses from six general education categories including:

• Literature (one course)
• Music/art (one course)
• Philosophy (one course)
• Social sciences (two courses, each from a different discipline)
• Natural sciences (two courses)
• Foreign culture (two courses or participation in an approved study abroad program)

Note: All students, including international students and U.S. citizens who have lived abroad for any length of time, must complete the foreign culture requirement.

Contact the school for a complete listing of approved courses that meet these elective requirements.

Business Core Curriculum

The Business Core Curriculum:

The following courses (36 credits) are required of all CBA students:

• BUSSPP 0020 - MANAGING COMPLEX ENVIRONMENTS
• BUSACC 0030 - FINANCIAL ACCOUNTING
• BUSACC 0040 - MANAGERIAL ACCOUNTING
• BUSQOM 0050 - QUANTITATIVE METHODS
• BUSENV 0060 - MANAGERIAL ETHICS AND STAKEHOLDER MANAGEMENT
• BUSORG 1020 - ORGANIZATIONAL BEHAVIOR
• BUSORG 1101 - FUNDAMENTALS OF BUSINESS COMMUNICATION (prerequisite 30 credits)
• BUSFIN 1030 - INTRODUCTION TO FINANCE (prerequisite 30 credits)
• BUSMKT 1040 - INTRODUCTION TO MARKETING (prerequisite 30 credits)
• BUSECN 1010 - MANAGERIAL ECONOMICS (prerequisite 30 credits)
• BUSQOM 1070 - OPERATIONS MANAGEMENT
• BUSSPP 1080 - STRATEGIC MANAGEMENT

Other Business Requirements

CBA students must also satisfy one of the following requirements:
BUS 0010 - YOUR ACADEMIC AND CAREER SUCCESS This one-credit course is required of all first-time CBA freshmen. In the course, new BSBA students will explore the majors offered in CBA, investigate global opportunities, develop networking and professional skills, create a resume, and learn how to connect with CBA's Career Services team regarding events, internship opportunities, and career development.

BUS 0020 - YOUR CAREER SUCCESS This one-credit course is required of all new CBA transfer students. In the course, students will participate in career exploration, develop and implement a personal strategy for career goal setting and planning, learn and practice communication and other professional skills, and become familiar with the internship and job search processes.

Requirements

The major in finance is designed to provide students with the financial knowledge and skills required for a successful business career. It attempts to give students a thorough understanding of the theoretical financial principles and the practical implementation of these principles in the world of business. Students learn how financial markets operate and how to make effective investment and financial decisions. The major is designed to develop analytical skills and problem-solving abilities.

Finance knowledge and practice have become crucial for the success of corporations and of the individuals employed by them. Financial markets are the major conduits through which investments are channeled in the global marketplace.

Understanding these markets and how to make investment decisions are crucial for success in business.

In addition to the BSBA core course, BUSFIN 1030 - INTRODUCTION TO FINANCE, at least fifteen (15) credits in finance course work are required for the finance major.

BSBA Core Course in Finance

This course must be completed with a C or better to take additional finance courses:

- BUSFIN 1030 - INTRODUCTION TO FINANCE

Required Finance Major Courses

- BUSFIN 1311 - CORPORATE FINANCE
- BUSFIN 1321 - INVESTMENT MANAGEMENT

Finance Electives

Courses are offered on a rotating basis.
(A minimum of three courses must be taken.)

- BUSFIN 1316 - ADVANCED CORPORATE FINANCE
- BUSFIN 1326 - EFFICIENCY OF CAPITAL MARKETS
- BUSFIN 1327 - RISK MANAGEMENT
- BUSFIN 1328 - CAPITAL MARKETS
- BUSFIN 1331 - FINANCIAL INSTITUTIONS AND MARKETS
- BUSFIN 1341 - INTERNATIONAL FINANCE
- BUSFIN 1345 - MARKETS AND TRADING
- BUSFIN 1347 - MERGERS, ACQUISITIONS AND CORPORATE STRUCTURES
- BUSFIN 1351 - FINANCIAL MODELING
- BUSFIN 1354 - Valuation
- BUSFIN 1390 - FINANCE INTERNSHIP
- BUSFIN 1395 - FINANCE INDEPENDENT STUDY

BSBA Program Learning Goals
Graduates of the University of Pittsburgh's College of Business Administration should achieve the following learning outcomes in the four broad components of the BSBA program (major, electives, core and foundations):

Demonstrate in-depth knowledge and skills in at least one academic/career focus through completion of majors, certificates, minors and electives.

Demonstrate what every BSBA graduate is expected to know about business and management at graduation. This literacy is developed in courses taught in CBA and in particular courses required of all students and offered by the School of Arts and Sciences.

Demonstrate competency in the fundamentals of analyzing problems and making decisions with standard business data and data sources using appropriate quantitative and qualitative methodologies.

Demonstrate competency in interpersonal skills, including concise and persuasive written and presentation communication.

Demonstrate competency in applying acquired knowledge and skills in real-world situations.

Acquire a basic knowledge of at least one nation, region or culture in areas such as language, history, political systems, literature and artistic expression.

Acquire an exposure to the knowledge and methodologies used to explore natural, individual, social and cultural phenomena.

General Management, BSBA

BSBA Degree Requirements

• BUSMKT 1040 - INTRODUCTION TO MARKETING (prerequisite 30 credits)
• BUSQOM 1070 - OPERATIONS MANAGEMENT
• BUSSPP 1080 - STRATEGIC MANAGEMENT

Other Business Requirements

CBA students must also satisfy one of the following requirements:

BUS 0010 - YOUR ACADEMIC AND CAREER SUCCESS This one-credit course is required of all first-time CBA freshmen. In the course, new BSBA students will explore the majors offered in CBA, investigate global opportunities, develop networking and professional skills, create a resume, and learn how to connect with CBA's Career Services team regarding events, internship opportunities, and career development.

BUS 0020 - YOUR CAREER SUCCESS This one-credit course is required of all new CBA transfer students. In the course, students will participate in career exploration, develop and implement a personal strategy for career goal setting and planning, learn and practice communication and other professional skills, and become familiar with the internship and job search processes.

Requirements

The major in general management provides students with interests in more than one discipline with the flexibility to concentrate their elective course work in two areas. Course work in the areas noted below may be used for the general management major. Courses with significant international content are offered in several areas. Students with international business interests should also consider a study abroad program.

The core courses in the two focused areas of study must be completed with a C or better to take additional courses in those areas. Courses are offered on a rotating basis.

Accounting

• BUSACC 1204 - INTERMEDIATE FINANCIAL REPORTING 1
• BUSACC 1205 - INTERMEDIATE FINANCIAL REPORTING 2
• BUSACC 1210 - FINANCIAL STATEMENT ANALYSIS
• BUSACC 1216 - ADVANCED FINANCIAL ACCOUNTING
• BUSACC 1221 - STRATEGIC COST MANAGEMENT
• BUSACC 1236 - ACCOUNTING INFORMATION SYSTEMS
• BUSACC 1238 - AUDITING
• BUSACC 1242 - INDIVIDUAL TAX ACCOUNTING AND PLANNING
• BUSACC 1296 - ACCOUNTING INTERNSHIP *
• BUSACC 1298 - ACCOUNTING INDEPENDENT STUDY **

Finance

• BUSFIN 1311 - CORPORATE FINANCE
• BUSFIN 1316 - ADVANCED CORPORATE FINANCE
• BUSFIN 1321 - INVESTMENT MANAGEMENT
• BUSFIN 1326 - EFFICIENCY OF CAPITAL MARKETS
• BUSFIN 1327 - RISK MANAGEMENT
• BUSFIN 1328 - CAPITAL MARKETS
• BUSFIN 1331 - FINANCIAL INSTITUTIONS AND MARKETS
• BUSFIN 1341 - INTERNATIONAL FINANCE
• BUSFIN 1345 - MARKETS AND TRADING
• BUSFIN 1347 - MERGERS, ACQUISITIONS AND CORPORATE STRUCTURES
• BUSFIN 1351 - FINANCIAL MODELING
• BUSFIN 1355 - VALUATION
• BUSFIN 1390 - FINANCE INTERNSHIP *
• BUSFIN 1395 - FINANCE INDEPENDENT STUDY **

Human Resources Management

• BUSHRM 1665 - NEGOTIATING IN BUSINESS
• BUSHRM 1670 - GLOBAL WORKFORCE MANAGEMENT AND CHANGE
• BUSHRM 1675 - HUMAN RESOURCES STAFFING
• BUSHRM 1680 - COMPENSATION AND PERFORMANCE MANAGEMENT
• BUSHRM 1685 - EMPLOYMENT AND LABOR RELATIONS
• BUSHRM 1690 - HUMAN RESOURCES MANAGEMENT INTERNSHIP *
• BUSHRM 1695 - HUMAN RESOURCES MANAGEMENT INDEPENDENT STUDY **

Management Information Systems

• BUSBIS 1060 - INTRODUCTION TO INFORMATION SYSTEMS
• BUSBIS 1600 - TECHNOLOGY-ENABLED BUSINESS TRANSFORMATION
• BUSBIS 1605 - DATABASE MANAGEMENT
• BUSBIS 1625 - ELECTRONIC COMMERCCE
• BUSBIS 1630 - PROJECT MANAGEMENT
• BUSBIS 1635 - INFORMATION TECHNOLOGY SYSTEMS IN SUPPLY CHAINS
• BUSBIS 1640 - IT ARCHITECTURE AND Platforms
• BUSBIS 1645 - INFORMATION SYSTEMS ETHICS
• BUSBIS 1615 - BUSINESS INFORMATION SYSTEMS INTERNSHIP
• BUSBIS 1620 - BUSINESS INFORMATION SYSTEMS INDEPENDENT STUDY

Marketing

• BUSMKT 1411 - MARKETING RESEARCH
• BUSMKT 1422 - PRINCIPLES OF SELLING
• BUSMKT 1425 - SALES FORCE MANAGEMENT
• BUSMKT 1426 - ADVERTISING AND SALES PROMOTION
• BUSMKT 1427 - PUBLIC RELATIONS MANAGEMENT
• BUSMKT 1428 - DIGITAL AND SOCIAL MEDIA MARKETING
• BUSMKT 1431 - PRODUCT DEVELOPMENT AND MANAGEMENT
• BUSMKT 1435 - SERVICES MARKETING
• BUSMKT 1441 - CONSUMER BEHAVIOR
• BUSMKT 1451 - RETAIL MANAGEMENT
• BUSMKT 1461 - INTERNATIONAL MARKETING
• BUSMKT 1481 - BRAND MANAGEMENT
• BUSMKT 1485 - PROJECTS IN MARKETING
Supply Chain Management

- BUSQOM 1725 - GLOBAL SUPPLY NETWORKS AND MANUFACTURING CULTURES IN LATIN AMERICA
- BUSSCM 1730 - MANAGING GLOBAL SUPPLY CHAINS
- BUSBIS 1635 - INFORMATION TECHNOLOGY SYSTEMS IN SUPPLY CHAINS
- BUSQOM 1790 - SUPPLY CHAIN MANAGEMENT INTERNSHIP *

Organizational Behavior

- BUSORG 1640 - THE ENTREPRENEURSHIP PROCESS
- BUSORG 1645 - CORPORATE ENTREPRENEURSHIP
- BUSORG 1650 - ISSUES IN CAREER MANAGEMENT
- BUSORG 1655 - INTERNATIONAL DIMENSIONS OF ORGANIZATIONAL BEHAVIOR
- BUSORG 1660 - MANAGING DIVERSITY IN ORGANIZATIONS
- BUSORG 1670 - ORGANIZATIONAL BEHAVIOR INDEPENDENT STUDY **

Note:

* Plans for Internships must be approved by CBA Career Services before registration for the course is permitted. Internships will not be counted toward fulfilling Major requirements for students declaring after August 26, 2012.

** Plans for Independent Study courses must be approved by the Associate Dean before registration for the course is permitted.

Global Management, BSBA

BSBA Degree Requirements

The following sections describe the general requirements for all majors within the Bachelor of Science in Business Administration (BSBA) degree program:

The degree requirements applicable to a particular student are based upon the student's term of entry into the program and reflect any requirement changes that have been approved since this bulletin was published. These requirements and the student's progress toward the BSBA degree are noted on the student's online Undergraduate Advisement Transcript.

Graduation Requirements

One-hundred twenty credits are required for graduation with a BSBA degree. A minimum of 51 credits must be taken in the arts and sciences.

A student may use one course to fulfill two arts and sciences requirements.

Arts and Sciences Foundations: Basic Skills Requirements

English Composition

- Students who earn 500 or above on SAT Verbal (Critical Reading) are placed into Seminar in Composition (or equivalent course).
• Students who earn below 500 on SAT Verbal (Critical Reading) will be placed into a Workshop in Composition course.
• Recommendations for ENGCMP 0201 or ENGCMP 0151 (tutorials) will be based on class diagnostic writing during add/drop period.
• English as a Second Language students will be placed into appropriate courses based on English Language proficiency.
All students are strongly encouraged to complete their English composition requirement(s) in the freshman year.

Students earning a score of 600 on the critical reading portion of the SAT, who also earn a score of 5 on the Advanced Placement (AP) English exam, will be awarded advanced standing credit for ENGCMP 0200 - SEMINAR IN COMPOSITION and 3 additional credits in English composition.

Second Language

Any one of the following fulfills the language requirement:

• Three years of study of a single second language in high school, passed with an average of C or better over the three years.
• Placement into level III of a second language on a University of Pittsburgh language placement test.
• Placement into level II of a second language on a University of Pittsburgh language placement test and completion of the appropriate course from the second course list below.
• Completion of an approved two course sequence of a foreign language.
Students should discuss specific foreign language course options with their academic advisor.

Calculus

Taking one course from the following list fulfills this requirement:

Note: Only one of these courses may apply to the 120 total credits required for graduation.

• MATH 0120 - BUSINESS CALCULUS
• MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
or both
• MATH 0125 - CALCULUS FOR BUSINESS 1 and
• MATH 0126 - CALCULUS FOR BUSINESS 2

Statistics

• STAT 1100 - STATISTICS AND PROBABILITY FOR BUSINESS MANAGEMENT fulfills this requirement.

Economics

Both of the following courses must be taken to fulfill this requirement:

• ECON 0100 - INTRODUCTION TO MICROECONOMIC THEORY
• ECON 0110 - INTRODUCTION TO MACROECONOMIC THEORY

Arts and Sciences General Education Electives

In addition to fulfilling the basic skills requirements, students further supplement their business curriculum by taking courses from six general education categories including:

• Literature (one course)
• Music/art (one course)
• Philosophy (one course)
• Social sciences (two courses, each from a different discipline)
• Natural sciences (two courses)
• Foreign culture (two courses or participation in an approved study abroad program)
Note: All students, including international students and U.S. citizens who have lived abroad for any length of time, must complete the foreign culture requirement.

Contact the school for a complete listing of approved courses that meet these elective requirements.

Business Core Curriculum

The Business Core Curriculum:

The following courses (36 credits) are required of all CBA students:

- BUSSPP 0020 - MANAGING COMPLEX ENVIRONMENTS
- BUSACC 0030 - FINANCIAL ACCOUNTING
- BUSACC 0040 - MANAGERIAL ACCOUNTING
- BUSQOM 0050 - QUANTITATIVE METHODS
- BUSENV 0060 - MANAGERIAL ETHICS AND STAKEHOLDER MANAGEMENT
- BUSORG 1020 - ORGANIZATIONAL BEHAVIOR
- BUSORG 1101 - FUNDAMENTALS OF BUSINESS COMMUNICATION (prerequisite 30 credits)
- BUSFIN 1030 - INTRODUCTION TO FINANCE (prerequisite 30 credits)
- BUSMKT 1040 - INTRODUCTION TO MARKETING (prerequisite 30 credits)
- BUSECN 1010 - MANAGERIAL ECONOMICS (prerequisite 30 credits)
- BUSQOM 1070 - OPERATIONS MANAGEMENT
- BUSSPP 1080 - STRATEGIC MANAGEMENT

Other Business Requirements

CBA students must also satisfy one of the following requirements:

BUS 0010 - YOUR ACADEMIC AND CAREER SUCCESS This one-credit course is required of all first-time CBA freshmen. In the course, new BSBA students will explore the majors offered in CBA, investigate global opportunities, develop networking and professional skills, create a resume, and learn how to connect with CBA's Career Services team regarding events, internship opportunities, and career development.

BUS 0020 - YOUR CAREER SUCCESS This one-credit course is required of all new CBA transfer students. In the course, students will participate in career exploration, develop and implement a personal strategy for career goal setting and planning, learn and practice communication and other professional skills, and become familiar with the internship and job search processes.

Requirements

The global management major enables students to develop expertise in important dimensions of management in a global context. The GLMGT major requires six (6) courses exposing students to the management of people (International Dimensions of Organizational Behavior, Global Workforce Policy), process (Managing Global Supply Chains), and policy (International Economic Issues for Managers; Global Strategy and Competitive Advantage), plus an integrative, senior-level course, focusing on either a company project or a major global industry. We see these three dimensions as intertwined and mutually critical for those who seek to add value to the management function of today's organizations and the firms of tomorrow. To the core understanding of a traditional management foundation, we add knowledge of a second language at the conversational level with the goal of preparing students to conduct business in a second language.

Second Language Requirement

Global management majors must complete second language study through Level 4 at the University of Pittsburgh with a minimum grade of C+ in each course, along with an additional 3-credit course in the language, also to be completed with a minimum grade of C+. If, for a particular language, the University offers instruction only through Level 4, this requirement is fulfilled by 3 credits of a course specific to the region in which the language is widely spoken, completed with a minimum grade of C+. For students already fluent in a second (or third) language, it is required that they will earn at least 8 credits in another language with a minimum grade of C+ in each course.

A student is not permitted to earn both a Global Management major and a Certificate in International Business.
Required Global Management Major Courses

Earn a minimum grade of C (2.00) in each of the following prerequisites to GLM courses:

- BUSORG 1020 - ORGANIZATIONAL BEHAVIOR
- ECON 0100 - INTRODUCTION TO MICROECONOMIC THEORY
- ECON 0110 - INTRODUCTION TO MACROECONOMIC THEORY
- BUSHRM 1050 - HUMAN RESOURCES MANAGEMENT
- BUSQOM 1070 - OPERATIONS MANAGEMENT
- BUSSPP 1080 - STRATEGIC MANAGEMENT

Global management majors must successfully complete the following courses

Global management majors must successfully complete the following courses with a C- or better in each course and a cumulative grade point average of 2.25.

- BUSORG 1655 - INTERNATIONAL DIMENSIONS OF ORGANIZATIONAL BEHAVIOR
- BUSECN 1508 - INTERNATIONAL ECONOMICS FOR MANAGERS
- BUSHRM 1670 - GLOBAL WORKFORCE MANAGEMENT AND CHANGE
- BUSSCM 1730 - MANAGING GLOBAL SUPPLY CHAINS
- BUSSPP 1740 - GLOBAL STRATEGY AND COMPETITIVE ADVANTAGE
- BUSSPP 1745 - PROJECTS IN GLOBAL MANAGEMENT

Note:

Global management majors must also earn a minimum GPA of 2.25 in nine (9) credits of second language beyond Level II or 6 credits of language beyond Level II plus 3 credits of a course specific to the region in which the language is widely spoken.

Complete a study abroad experience of at least four weeks in an internationally-based educational or work experience, preferably one making active use of a student's second language training. With permission, up to six (6) credits of the major area courses may be taken abroad as part of a semester study outside of the U.S. Permission will be based on examination of all course material.

* Plans for Internships must be approved by CBA Career Services before registration for the course is permitted. Internships will not be counted toward fulfilling Major requirements for students declaring after August 26, 2012.

** Plans for Independent Study courses must be approved by the Associate Dean before registration for the course is permitted.

Human Resources Management, BSBA

BSBA Degree Requirements

The following sections describe the general requirements for all majors within the Bachelor of Science in Business Administration (BSBA) degree program:

The degree requirements applicable to a particular student are based upon the student's term of entry into the program and reflect any requirement changes that have been approved since this bulletin was published. These requirements and the student's progress toward the BSBA degree are noted on the student's online Undergraduate Advisement Transcript.

Graduation Requirements

One-hundred twenty credits are required for graduation with a BSBA degree. A minimum of 51 credits must be taken in the arts and sciences.

A student may use one course to fulfill two arts and sciences requirements.
Arts and Sciences Foundations: Basic Skills Requirements

There are seven basic skills that all BSBA students must master; these basic skills prepare students for future classes. The basic skills requirements include:

English Composition

- Students who earn 500 or above on SAT Verbal (Critical Reading) are placed into Seminar in Composition (or equivalent course).
- Students who earn below 500 on SAT Verbal (Critical Reading) will be placed into a Workshop in Composition course.
- Recommendations for ENGCMP 0201 or ENGCMP 0151 (tutorials) will be based on class diagnostic writing during add/drop period.
- English as a Second Language students will be placed into appropriate courses based on English Language proficiency.

All students are strongly encouraged to complete their English composition requirement(s) in the freshman year.

Students earning a score of 600 on the critical reading portion of the SAT, who also earn a score of 5 on the Advanced Placement (AP) English exam, will be awarded advanced standing credit for ENGCMP 0200 - SEMINAR IN COMPOSITION and 3 additional credits in English composition.

Second Language

Any one of the following fulfills the language requirement:

- Three years of study of a single second language in high school, passed with an average of C or better over the three years.
- Placement into level III of a second language on a University of Pittsburgh language placement test.
- Placement into level II of a second language on a University of Pittsburgh language placement test and completion of the appropriate course from the second course list below.
- Completion of an approved two course sequence of a foreign language.

Students should discuss specific foreign language course options with their academic advisor.

Calculus

Taking one course from the following list fulfills this requirement:

Note: Only one of these courses may apply to the 120 total credits required for graduation.

- MATH 0120 - BUSINESS CALCULUS
- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1

There are seven basic skills that all BSBA students must master; these basic skills prepare students for future classes. The basic skills requirements include:

**English Composition**

- Students who earn 500 or above on SAT Verbal (Critical Reading) are placed into Seminar in Composition (or equivalent course).
- Students who earn below 500 on SAT Verbal (Critical Reading) will be placed into a Workshop in Composition course.
- Recommendations for ENGCMP 0201 or ENGCMP 0151 (tutorials) will be based on class diagnostic writing during add/drop period.
- English as a Second Language students will be placed into appropriate courses based on English Language proficiency.

All students are strongly encouraged to complete their English composition requirement(s) in the freshman year.

Students earning a score of 600 on the critical reading portion of the SAT, who also earn a score of 5 on the Advanced Placement (AP) English exam, will be awarded advanced standing credit for ENGCMP 0200 - SEMINAR IN COMPOSITION and 3 additional credits in English composition.

**Second Language**

Any one of the following fulfills the language requirement:

- Three years of study of a single second language in high school, passed with an average of C or better over the three years.
- Placement into level III of a second language on a University of Pittsburgh language placement test.
- Placement into level II of a second language on a University of Pittsburgh language placement test and completion of the appropriate course from the second course list below.
- Completion of an approved two course sequence of a foreign language.

Students should discuss specific foreign language course options with their academic advisor.

**Calculus**

Taking one course from the following list fulfills this requirement:

*Note: Only one of these courses may apply to the 120 total credits required for graduation.*

- MATH 0120 - BUSINESS CALCULUS
- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
  or both
- MATH 0125 - CALCULUS FOR BUSINESS 1 and
- MATH 0126 - CALCULUS FOR BUSINESS 2

**Statistics**

- STAT 1100 - STATISTICS AND PROBABILITY FOR BUSINESS MANAGEMENT fulfills this requirement.

**Economics**
Both of the following courses must be taken to fulfill this requirement:

- ECON 0100 - INTRODUCTION TO MICROECONOMIC THEORY
- ECON 0110 - INTRODUCTION TO MACROECONOMIC THEORY

Arts and Sciences General Education Electives

In addition to fulfilling the basic skills requirements, students further supplement their business curriculum by taking courses from six general education categories including:

- Literature (one course)
- Music/art (one course)
- Philosophy (one course)
- Social sciences (two courses, each from a different discipline)
- Natural sciences (two courses)
- Foreign culture (two courses or participation in an approved study abroad program)

**Note:** All students, including international students and U.S. citizens who have lived abroad for any length of time, must complete the foreign culture requirement.

Contact the school for a complete listing of approved courses that meet these elective requirements.

Business Core Curriculum

The Business Core Curriculum:

The following courses (36 credits) are required of all CBA students:

- BUSSPP 0020 - MANAGING COMPLEX ENVIRONMENTS
- BUSACC 0030 - FINANCIAL ACCOUNTING
- BUSACC 0040 - MANAGERIAL ACCOUNTING
- BUSQOM 0050 - QUANTITATIVE METHODS
- BUSENV 0060 - MANAGERIAL ETHICS AND STAKEHOLDER MANAGEMENT
- BUSORG 1020 - ORGANIZATIONAL BEHAVIOR
- BUSORG 1101 - FUNDAMENTALS OF BUSINESS COMMUNICATION (prerequisite 30 credits)
- BUSFIN 1030 - INTRODUCTION TO FINANCE (prerequisite 30 credits)
- BUSMKT 1040 - INTRODUCTION TO MARKETING (prerequisite 30 credits)
- BUSECN 1010 - MANAGERIAL ECONOMICS (prerequisite 30 credits)
- BUSQOM 1070 - OPERATIONS MANAGEMENT
- BUSSPP 1080 - STRATEGIC MANAGEMENT

Other Business Requirements

CBA students must also satisfy one of the following requirements:

BUS 0010 - YOUR ACADEMIC AND CAREER SUCCESS This one-credit course is required of all first-time CBA freshmen. In the course, new BSBA students will explore the majors offered in CBA, investigate global opportunities, develop networking and professional skills, create a resume, and learn how to connect with CBA's Career Services team regarding events, internship opportunities, and career development.

BUS 0020 - YOUR CAREER SUCCESS This one-credit course is required of all new CBA transfer students. In the course, students will participate in career exploration, develop and implement a personal strategy for career goal setting and planning, learn and practice communication and other professional skills, and become familiar with the internship and job search processes.

Requirements
The major in marketing is designed to provide students with the conceptual background and practical skills necessary to address questions such as what new products a firm should introduce, how products should be priced, how to identify the best channels of distribution, and how best to promote new and existing products. Students majoring in marketing can pursue careers in retailing, sales management, marketing research, advertising and promotion, consumer product marketing, or industrial marketing.

In addition to the general BSBA requirements, 18 credits in marketing course work, plus the BSBA core course BUSMKT 1040 - INTRODUCTION TO MARKETING, are required for the marketing major.

BSBA Core Course in Marketing

Students must complete this course with a C or better to be eligible to take additional marketing courses:

- BUSMKT 1040 - INTRODUCTION TO MARKETING

Required Marketing Major Courses

- BUSMKT 1411 - MARKETING RESEARCH
- BUSMKT 1441 - CONSUMER BEHAVIOR

Marketing Electives

Courses are offered on a rotating basis.

(A minimum of four courses must be taken.)

- BUSMKT 1422 - PRINCIPLES OF SELLING
- BUSMKT 1425 - SALES FORCE MANAGEMENT
- BUSMKT 1426 - ADVERTISING AND SALES PROMOTION
- BUSMKT 1427 - PUBLIC RELATIONS MANAGEMENT
- BUSMKT 1428 - DIGITAL AND SOCIAL MEDIA MARKETING
- BUSMKT 1431 - PRODUCT DEVELOPMENT AND MANAGEMENT
- BUSMKT 1435 - SERVICES MARKETING
- BUSMKT 1451 - RETAIL MANAGEMENT
- BUSMKT 1461 - INTERNATIONAL MARKETING
- BUSMKT 1481 - BRAND MANAGEMENT
- BUSMKT 1485 - PROJECTS IN MARKETING
- BUSMKT 1490 - MARKETING INTERNSHIP (requires CBA approval)
- BUSMKT 1495 - MARKETING INDEPENDENT STUDY (requires CBA approval)
- BUSSCM 1730 - MANAGING GLOBAL SUPPLY CHAINS

Supply Chain Management, BSBA

BSBA Degree Requirements

The following sections describe the general requirements for all majors within the Bachelor of Science in Business Administration (BSBA) degree program:

The degree requirements applicable to a particular student are based upon the student's term of entry into the program and reflect any requirement changes that have been approved since this bulletin was published. These requirements and the student's progress toward the BSBA degree are noted on the student's online Undergraduate Advisement Transcript.

Graduation Requirements
One-hundred twenty credits are required for graduation with a BSBA degree. A minimum of 51 credits must be taken in the arts and sciences.

A student may use one course to fulfill two arts and sciences requirements.

**Arts and Sciences Foundations: Basic Skills Requirements**

There are seven basic skills that all BSBA students must master; these basic skills prepare students for future classes. The basic skills requirements include:

**English Composition**

- Students who earn 500 or above on SAT Verbal (Critical Reading) are placed into Seminar in Composition (or equivalent course).
- Students who earn below 500 on SAT Verbal (Critical Reading) will be placed into a Workshop in Composition course.
- Recommendations for ENGCMP 0201 or ENGCMP 0151 (tutorials) will be based on class diagnostic writing during add/drop period.
- English as a Second Language students will be placed into appropriate courses based on English Language proficiency.

All students are strongly encouraged to complete their English composition requirement(s) in the freshman year.

Students earning a score of 600 on the critical reading portion of the SAT, who also earn a score of 5 on the Advanced Placement (AP) English exam, will be awarded advanced standing credit for ENGCMP 0200 - SEMINAR IN COMPOSITION and 3 additional credits in English composition.

**Second Language**

Any one of the following fulfills the language requirement:

- Three years of study of a single second language in high school, passed with an average of C or better over the three years.
- Placement into level III of a second language on a University of Pittsburgh language placement test.
- Placement into level II of a second language on a University of Pittsburgh language placement test and completion of the appropriate course from the second course list below.
- Completion of an approved two course sequence of a foreign language.

Students should discuss specific foreign language course options with their academic advisor.

**Calculus**

Taking one course from the following list fulfills this requirement:

*Note: Only one of these courses may apply to the 120 total credits required for graduation.*

- MATH 0120 - BUSINESS CALCULUS
- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1 or both
- MATH 0125 - CALCULUS FOR BUSINESS 1 and
- MATH 0126 - CALCULUS FOR BUSINESS 2

**Statistics**

Chad J. Zutter, Associate Professor of Business Administration and Dean's Excellence Faculty Fellow, PhD, Indiana University
College of General Studies

The College of General Studies (CGS) provides adult and nontraditional students with a wide variety of learning options. Students who enroll in the College of General Studies can complete a Bachelor of Arts or Bachelor of Science degree in career-oriented fields and in concentrations in the arts and sciences. In addition to a degree, students may prepare for transfer to any of the University's upper-division and professional schools. The College also offers a wide range of certificate programs in specialized fields such as health services, accounting, and information sciences. For those students who already have a degree but desire career-related study or preparation for graduate study, the College of General Studies permits them to register in a non-degree program. The College of General Studies uses the same faculties as the Dietrich School of Arts and Sciences and the professional schools of the University to provide instruction.

Professors and instructors teaching for the College of General Studies come from several undergraduate and professional schools across the University of Pittsburgh. CGS instructors include full-time faculty, regular part-time faculty, adjunct, graduate students, and professionals and leaders from throughout the greater Pittsburgh region. A list of CGS-affiliated instructors is available on the CGS Web site.

The College of General Studies targets its curriculum to adult and transfer students who have been out of high school at least two years. Most of the students attending the College have full-time work or family responsibilities and therefore take full advantage of the unique delivery systems available for instruction. Students may enroll in traditional day classes, evening classes, or Saturday classes; or they may enroll for CGS Online courses.

Admission through the Office of Admissions and Financial Aid

Degree-seeking students are admitted to the College of General Studies by the Office of Admissions and Financial Aid (OAFA).

Degree-Seeking Students

Those students who desire to complete a degree at the University of Pittsburgh, either in the College of General Studies or ultimately transferring elsewhere in the University, are required to apply as degree-seeking students through the University's Office of Admissions and Financial Aid (OAFA).

Students must meet a number of specific admissions criteria, depending on their previous experience. For details, refer to the Office of Admissions and Financial Aid website.

Admission through the College of General Studies
Transfers from Other University of Pittsburgh Schools at the Pittsburgh Campus

To transfer to CGS from another school at the Pittsburgh campus, students should request that the other Pittsburgh campus school send their records to CGS. CGS will review the student records and send letters of acceptance to students who are eligible to transfer into CGS. To qualify, students must have:

- a minimum overall GPA of 2.0,
- at least 12 completed credits in their current program, and
- fulfilled the Mathematics and Seminar in Composition requirements.

Upon acceptance into CGS, students will receive evaluations of their previous course work, acknowledging the courses that have fulfilled CGS skills and general education requirements. To graduate with a degree from CGS, students are required to earn their last 30 credits while enrolled in CGS and to earn at least half of the credits for their majors, minors, and certificates while enrolled in the CGS.

Relocation from University of Pittsburgh Regional Campuses

- For students seeking guaranteed relocation who have earned credits only from one of the regional campuses, the normal requirement is for completion of 45 credits at the specific regional campus, with a minimum GPA of 2.5.
- For students seeking guaranteed relocation who have earned 30 or more credits at the specific regional campus and a total of 45 credits overall, a minimum GPA of 2.5 in all courses is required.
- Students with a 3.0 GPA, who would have been directly admissible to the Pittsburgh campus as freshmen, may be considered for relocation with fewer than the above number of college credits.
- You must have completed the Algebra and Seminar in Composition requirements with a grade of C- or better.

Students Seeking a Second University of Pittsburgh Degree

Students who have earned a bachelor's degree in any University of Pittsburgh school or campus and wish to earn a second undergraduate degree in CGS should apply directly to CGS. Applicants should note the following.

- Course work for the second degree will continue to be recorded on the original University of Pittsburgh undergraduate transcript.
- All appropriate course work from the first degree will apply to the second degree.
- Students must earn a minimum of 30 new credits. No coursework repeated from the first degree will count toward the second degree.
- At least half of the credits for the second major toward the second degree must be earned while enrolled in CGS.
- The cumulative GPA and credit total will be based on all credits from the first degree and all new course work taken that applies to the second degree.

Students Seeking Reinstatement

The following students must apply for reinstatement through the College of General Studies.

- CGS students who have not enrolled for three consecutive terms (one calendar year);
- CGS students who have completed their suspension periods and wish to continue their studies; and
- Students who last attended another school at the Pittsburgh campus but have not enrolled in classes for three consecutive terms (one calendar year), have not attended another institution, and wish to be admitted to CGS.

Students who are returning after completing their suspension period will be reinstated on probation.

The deadline for reinstatement is August 15 for the fall term, December 15 for the spring term, and one week before the beginning of classes in the summer term or summer session. Students who last attended another University of Pittsburgh school on the Pittsburgh campus or who attended a regional campus must meet the admissions requirements for transfer to CGS. Students' academic standing upon reinstatement will continue to be that attained at the end of their last term in residence.
Students who are reinstated for a particular term but do not enroll for that term must apply for reinstatement again if they wish to attend for a later term. Students who have been away from the University for two or more years will be subject to the requirements of the school and of their major at the time of their reinstatement, rather than those in place at the time of their last attendance.

Certificate Program Admission

Students looking to broaden their educational experience or seeking professional development may elect to enroll in an academic certificate program. Certificate programs offer a course concentration in a specific area of study and may partially fulfill the student's degree requirements.

Students seeking admission to one of the certificate programs in the College of General Studies must meet CGS certificate admission criteria and complete the CGS online application. Students are required to provide transcripts from all colleges and universities attended. Students must take at least one-half of the coursework for the certificate at the University of Pittsburgh and earn a 2.0 or better GPA in certificate courses. The certificates offered by CGS are as follows:

- Accounting (post-baccalaureate program)
- Communication
- Community health assessment
- Corporate/community relations
- Digital media
- Gender, sexuality, and women's studies
- Information system design
- Leadership
- Managing health services programs and projects
- National preparedness and homeland security
- Nonprofit management
- Writing
- Writing for the professions

* Please note that the Leadership certificate must be earned in conjunction with a degree. To enter the Accounting certificate, students must already have a bachelor's degree with at least a 2.75 GPA.

Non-Degree Admission

Post-Baccalaureate Students

Students who already hold a bachelor's degree and desire to complete University course work as preparation for graduate study or for personal or professional interest, but do not desire to complete a second degree, may apply for admission as non-degree students. These students need to complete the CGS online application for admission and provide transcripts for all previous college work. Students who enroll under this program and later desire to earn a degree will be reviewed for admission under the normal admission criteria. Additional details are available at www.cgs.pitt.edu/admission.

Guest, Visiting, and Summer Visiting Students

Guest, Visiting, and Summer Visiting students are students enrolled in an undergraduate degree program at another university who plan to take courses for credit at the University of Pittsburgh with the intention of transferring those courses back to their home institution. To be eligible for admission, students must have a minimum 2.0 cumulative or overall GPA. Additional details are available at www.cgs.pitt.edu/admission.

Financial Aid

The Office of Admissions and Financial Aid handles all financial aid processing for College of General Studies students. Obtain information regarding the necessary forms and important deadline dates from the University's financial aid Web site, https://FinancialAid.Pitt.edu or call 412-624-7488 (option 2).
Students who wish to be considered for supplemental financial aid may apply through the Office of the Associate Dean. Students must have a completed current Free Application for Federal Student Aid (FAFSA) on file with the Office of Admissions and Financial Aid. CGS supplemental aid is awarded on a rolling basis and is need-based. The CGS supplemental financial aid application is available at www.cgs.pitt.edu/scholarships. Academic and need-based scholarships are available through CGS. Information concerning these scholarships for enrolled CGS students is available at www.cgs.pitt.edu.

**Career Services**

A CGS career consultant is available to assist students with the formulation of career objectives and preparation for the job search. Various seminars are offered throughout the year, and a variety of resource materials are available for student use. For more information on CGS career services, visit: www.cgs.pitt.edu/career-services.

**Class Locations and Times**

Students in the College of General Studies have an array of options for where and when to pursue their course work.

**Pittsburgh Campus**

The full range of courses offered by the College of General Studies is available at the Pittsburgh campus. The 120-acre campus is located in Oakland.

**CGS Online**

CGS Online provides students with the opportunity to earn credit towards degrees and certificates through two course formats. All courses offered through CGS Online are Web-based, meaning that most course materials can be accessed through the University's course learning management system. CGS Online courses are offered in the following formats:

- **Web** courses feature Web-based instruction and interaction. Students interact with their instructors and other students through the Learning Management System Web site. Students are required to participate in online discussions and activities. Students complete the course requirements within one term and move through the course materials as a cohort.

- **Hybrid** courses combine Web-based interaction and face-to-face or virtual, synchronous instruction. Students are required to attend scheduled workshops and participate in online discussions and activities. Students complete the course requirements within one term and move through the course materials as a cohort.

CGS Online courses meet the same standards for content excellence and expert instruction as our traditional classroom courses.

**Saturday Classes**

Saturday classes are offered on the Pittsburgh campus for students who find Saturday a convenient time to attend class.

**Advanced Standing Policy**

Applicants must submit official transcripts from each accredited college or university attended, whether or not it is intended that the courses be counted toward a degree. Grades for credits transferred are not used in computing a student's grade point average (GPA). All credits eligible for transfer are subject to the following regulations:

- Only courses with C or better grades will be considered for transfer.
- Courses must correspond with those offered by the University in objectives and content.
- The number of credits granted for a given course cannot exceed the number on the transcript from the school where they were earned, nor can it exceed the number earned in the corresponding courses at the University of Pittsburgh.
• A maximum of 90 credits may be transferred from a four-year institution and 60 credits from a two-year institution, however no more than 90 credits can be transferred.

• All of the credits required for a degree, whether earned in residence or transferred from another institution, must have been earned within 12 years prior to the date on which the degree is awarded. However, when given evidence that the previous courses still provide adequate preparation for courses yet to be taken and still represent a reasonable part of the total academic program, the statute of limitation may be waived. In such cases, the waiver is for a specific period during which the program must be completed.

• Upper-class students (those who have earned 60 or more credits) may not take courses at two-year schools.

• All transfer credits may be subject to reevaluation if a student transfers from one school to another or from one major to another within the University of Pittsburgh or becomes inactive and is subsequently readmitted.

• If a course for which advanced standing is given is repeated at the University of Pittsburgh, the advanced-standing credit is cancelled.

Advanced Placement and Credit by Examination

Students in CGS may also earn advanced standing credits through the following means:

College Level Examination Program (CLEP)

The CLEP program provides a way of earning college credits through testing. Specific regulations governing the awarding of CLEP general examination credits are available by calling 412-624-6480, from an academic advisor, or at www.cgs.pitt.edu/clep-exams.

Credit by Examination

In rare circumstances, credit by examination may be offered. Contact the Office of Student Records (studentrecords@as.pitt.edu or 412-624-6480) with questions. Students may be given credit for successfully completing the advanced-standing tests of the College Entrance Examination Board.

Students who are majoring in administration of justice and who have successfully completed Pennsylvania Act 120 or state police cadet training can receive up to 15 credits of advanced standing. The credits are awarded for specific courses.

Reserve Officer Training Corps (ROTC) Courses

Credits earned in aerospace science (Air Force ROTC), military science (Army ROTC), or naval science (Navy ROTC) through cross registration at Carnegie Mellon University are accepted toward a College of General Studies degree. CGS will grant up to four credits toward graduation for the following courses in lieu of or in combination with physical education courses: AFROTC 0001, AFROTC 0002, AFROTC 0003, and AFROTC 0004; MILS 0011, MILS 0012, MILS 0021, and MILS 0022; or first-year/sophomore level Navy ROTC courses from CMU.

Also, four junior and senior level courses from these three ROTC programs may be used as professional electives for the CGS degree program, if professional electives are permitted. These courses are AFROTC 1013, AFROTC 1014, AFROTC 1015, and AFROTC 1016 (all 3-credit courses); MILS 1031, MILS 1032, MILS 1041 and MILS 1042 (all 1-credit courses); and similar courses from Navy ROTC.

Internships

An internship is a supervised, work-related experience, volunteer or paid, which is related to an academic discipline and is sponsored, evaluated, and graded by a University faculty member. The internship is a new experience and does not represent credit for past work or continuation of the current employment situation. A detailed outline of CGS internship requirements is available at www.cgs.pitt.edu/programs/internships.

PLEASE NOTE: Several CGS majors require that you complete an internship at a facility that may or will require a criminal background check, an ACT 33/34 clearance, and perhaps a drug screen to determine whether you are qualified to participate in the internship. Additionally, in order to become licensed or employed, many states will inquire as to whether the applicant has been convicted of a misdemeanor, a felony, or a felonious or illegal act associated with alcohol and/or substance abuse.

Study Abroad
College of General Studies students are encouraged to enhance their undergraduate education by including a study abroad experience. Credit may be earned toward a CGS degree through participation in either Pitt-sponsored, exchange, or Pitt-recognized programs. Students may study in virtually any part of the world in these programs or others offered by many American and international institutions. Some programs are of short duration to fit the schedules of students with extensive work, family and other commitments.

Approval for credit must be obtained before studying abroad. The study abroad advisor provides program approval and CGS Academic Affairs approves course selection and credits. You should have at least a 2.75 GPA before seeking permission to study abroad.

See www.cgs.pitt.edu/study-abroad for further details. Visit www.abroad.pitt.edu for additional information.

Students with a GPA of 3.5 or better planning to pursue graduate work at the University of Pittsburgh may want to consider the Early Admission Option for Graduate Study. This option allows students to use the first 24 credits of graduate work as the last 24 elective credits of their undergraduate program. The following graduate schools at Pitt allow this option in conjunction with the College of General Studies degree program: Graduate School of Public and International Affairs (GSPIA), Graduate School of Public Health, and the School of Law.

Note: Students interested in the early admission option for graduate study should contact their CGS advisor as soon as possible to discuss their intention and the process that needs to be followed.

Guidelines:

- Must be superior graduate school candidates and be admitted to the Pitt graduate program. Admissions requirements can be obtained from the graduate schools.
- Must have completed a minimum of ninety-six (96) credits toward the CGS degree, including all general education and major requirements (and no G grades), before the graduate program begins.
  - At least, the last thirty (30) of the ninety-six (96) undergraduate credits should be taken while the student is in residence in CGS, and before acceptance as a graduate student. Satisfactory completion of these requirements does not guarantee acceptance into the graduate program. This decision is made by the graduate program.
  - All other regulations governing the completion of credits for a CGS degree also apply.
- The graduate program must include a minimum of twenty-four (24) credits of graduate-level coursework. Students must earn a B or better grade in all graduate coursework. (S or H grades in the MSL program)
- Twenty-four (24) credits is the maximum number of graduate credits that can be used to fulfill free elective requirements of the undergraduate degree. A student may seek to use fewer than twenty-four (24) graduate credits toward their free elective credits if they have already partially fulfilled their elective requirements.
- Students must apply for graduation from CGS after completion of the first twenty-four (24) credits in their graduate program with grades of B or better. Students must have earned a total of at least 120 credits.

Note: Students who choose this option must be aware that enrolling as a graduate student may affect their financial aid package. Students are responsible for contacting the Financial Aid Office regarding this issue.

Academic Standards

The College of General Studies' Guidelines on Academic Integrity outlines obligations of both students and instructors for maintaining academic integrity in CGS classes. An electronic copy of this publication, which lists the obligations, procedures, penalties, and remedies for maintaining such integrity, is available on the College of General Studies Web site.

Graduation Requirements

- Students are required to make a graduation appointment with their advisor when registering for classes for their final term. During this appointment, students and their advisor review all the requirements and plan for their last term, as well as share details concerning commencement and graduation ceremonies at the University. Learn more at www.cgs.pitt.edu/advising
- Students must apply for graduation from CGS in the semester prior to their final term. Students must have minimum of 120 credits in order to graduate.
- Students receive a BA or BS degree depending upon the CGS major. The final undergraduate transcript will specify the major completed in CGS.
The GPA for graduation from CGS will be calculated solely on the earned Pitt credits on the undergraduate transcript. The graduate program courses appear on the graduate transcript and the undergraduate transcript is noted: Baccalaureate degree awarded in conjunction with graduate degree.

In order for CGS students to graduate with honors from the University, they must have at least 60 letter-graded University of Pittsburgh credits at the undergraduate level. Courses at the graduate level and undergraduate courses graded S or H are not included in this 60 credit requirement.

The Bachelor of Arts or Bachelor of Science degree will be awarded upon the fulfillment of the following conditions:

- Completion of at least 120 credits of University work in one of the prescribed curricular courses, by advanced standing, or by examinations.
- Completion of at least one-half of the major or 15 credits, whichever is greater, at the University of Pittsburgh, Pittsburgh campus.
- Completion of the senior year (30 credits) in the College of General Studies.
- Attainment of at least a cumulative grade point average of 2.00 in courses taken at the University of Pittsburgh.
- Satisfactory completion of all required CGS and major courses.

**Grading Policy**

There are two grading options available to students registering for courses offered by the College of General Studies: the letter grade option and the satisfactory/no-credit (S/NC) option (formerly the S/N option).

Core requirement courses in the student's major must be taken for the letter grade. Students can apply "S" grades only to internship, study abroad, experiential learning, and elective courses in the major. Students can take a maximum of six credits with the S/NC grade and have those credits applied to CGS major requirements.

Under the S/NC option, a student who does satisfactory work (a grade of C or better) in a course receives the grade of "S." If the student's work is not satisfactory (a grade of C- or lower), the grade of "NC" (for no credit) is given. Courses for which "S" grades are earned are counted toward graduation but are not computed in the GPA. Courses for which "NC" grades are earned are not counted toward graduation because the "NC" designates that no credit was earned. These courses cannot be applied toward university requirements.

For most courses, students who wish to take a course with the S/NC Grade Option will need to complete the S/NC Grade Option/Audit Request form (Registrar's Office) and the CGS Grade Option Waiver form by the end of the fourth full week of classes during a term (second full week of classes during summer sessions 1 and 2). If the student does not fill out a Grade Option/Audit Request form for a course in which more than one grade option is available, the default option (generally a letter grade) will automatically be selected. There are some formal limitations to a student's choice of grading systems (see below); Students should consult with their academic advisor before deciding to take a course S/NC. See also the CGS Advising page for details.

Limitations to the choice of the satisfactory/no-credit (S/NC) grade option in the College of General Studies:

1. Students can take a maximum of 6 credits with the S/NC grade and have those credits applied to CGS major requirements. There is one exception to this policy: Students who study abroad and take courses that will be applied as S grades through transfer credit can apply up to nine credits to their major requirements. Students can only apply "S" grades to internship, experiential learning, and elective courses in the major. Core requirement courses must be taken for the letter grade.
2. Under certain circumstances, departments may declare a course available only for a letter grade or as satisfactory/no-credit. In such courses, students will not have a choice for the other grade option.

**G Grade**

At the discretion of an instructor, a G grade may be awarded when students who have been attending a course and making regular progress are prevented from completing the course due to extenuating personal circumstances. Students who are assigned a G grade are required to complete course requirements no later than one year after the term or session in which the course was taken, including the summer term, or by an earlier deadline established by the instructor. After that year, the grade will automatically change to NG; an NG grade cannot be changed, and the credits will no longer appear as "in progress." The student will be required to re-register for the course if it is needed to fulfill requirements for graduation. The College of General Studies encourages students with G grades to work with their instructors to complete the requirements for the course as soon as possible. G and NG cannot be applied to graduation requirements.
At the time of requesting a G grade, the student should arrange with the instructor a plan and schedule for completing the course work. The instructor and student must also fill out the CGS G-grade Contract form. For additional information, visit www.cgs.pitt.edu/faculty-resources.

**Academic Standing**

The College of General Studies is committed to the success of its students and has guidelines in place to connect students with the appropriate resources at the earliest sign of academic difficulty. A student's academic standing is comprised of three factors: term GPA, cumulative GPA, and progress toward a degree. Students in the College of General Studies are expected to maintain a cumulative GPA and term GPA of 2.00 or above for each term of enrollment. In addition, full-time students are expected to successfully complete a minimum of 12 credits during each term of enrollment. Part-time students are expected to successfully complete a minimum of 3 credits during each term of enrollment.

**Academic Alert** is a marker designed to notify students who show signs, early on and throughout their academic career, of jeopardizing successful progress toward the completion of their undergraduate degree. This may be due to their inability to maintain a satisfactory GPA and/or failing to fulfill the algebra or composition requirement within the first two terms of full-time enrollment. Students who receive two consecutive Academic Alerts will be placed on Academic Probation.

Students are placed on Academic Probation after earning a GPA between a 1.50 and a 1.99 over two consecutive terms or have one semester at or below a 1.49 cumulative GPA. Students may also be placed on Academic Probation if they fail to make progress toward their degree (e.g. failing to earn any academic credits).

Students currently on Academic Probation who earn a term GPA below a 2.00 or fail to make progress toward their degree will be subject to Academic Suspension. After being suspended, students are not eligible to re-enroll for one calendar year. Following suspension, students are required to apply for reinstatement at the Undergraduate Dean's Office. Students returning from academic suspension are reinstated on academic probation and are required to develop an academic success plan upon their return. These reinstated students' records are reviewed after each subsequent term of enrollment.

Students who have been reinstated from Academic Suspension must earn at least a 2.00 GPA for each term that they enroll until they have achieved a cumulative GPA of 2.0 or above. If a student fails to earn a 2.00 term GPA, they are subject to Academic Dismissal from the University. Dismissed students are not eligible for reinstatement.

**Dean's List**

Following the fall and spring terms, full-time College of General Studies students whose grades in the preceding term indicate outstanding academic achievement are recognized on the Dean's List. To be placed on the Dean's List, a student must have earned at least 12 credits (not including courses taken on the Satisfactory/No-Credit option) with a term GPA of at least 3.50. Part-time students will be recognized following each spring term.

**Degrees Conferred**

The baccalaureate degree, in addition to providing certain skills and broad exposure to the major bodies of knowledge, also allows the opportunity to specialize in a particular field, providing depth of experience essential for vocational competence or further graduate study. An outline of each major is available on the CGS Web site, www.cgs.pitt.edu.

Students admitted to CGS can choose from the following majors. Many majors are available by combining on-campus and online courses.

**Bachelor of Arts:**

- Administration of Justice - this major cannot be declared after fall 2021
- Health Services
- Law, Criminal Justice, and Society
- Legal Studies this major cannot be declared after fall 2021
- Media and Professional Communications
- Public Service

**Bachelor of Science:**
Students who want a major in an arts and sciences field can begin in CGS and transfer to the Dietrich School of Arts and Sciences after completing 12 credits including the algebra and seminar in composition requirements. Admission is determined by the Dietrich School of Arts and Sciences.

Second Degree

Students who are interested in pursuing a second degree must complete all CGS degree and major requirements. These may be completed by combining CGS courses with transfer credits from previous academic course work.

For the second degree, students must complete a minimum of 30 credits in CGS, including at least half of the credits required for the new major (15-18 credits depending on the major).

Double and Triple Majors and Credit Overlap

Students can declare a double or triple major, but will usually earn only one degree. If one major leads to the BA degree and another to the BS degree, students must decide when applying for graduation which degree they wish to receive.

Double Degrees

College of General Studies students may choose to pursue more than one undergraduate degree simultaneously, either within CGS (i.e., both a BA and a BS) or in another undergraduate school of the University. In general, earning two degrees requires a minimum of 150 credits and the completion of the curriculum requirements of both schools.

- The College of General Studies (CGS) and the College of Business Administration (CBA) offer a Double Degree program in which students earn both the BA in Health Services through CGS and the BS in Business Administration (BSBA) through CBA. The double degree program is designed for students who are interested in the intersection of health care management and business administration.

Overlapping Courses Between Majors, Certificates, and Minors

This policy is effective for students who declare their CGS program(s)/plan(s) for Spring 2019 and beyond.

Overlapping Credits between CGS programs and programs in other schools

A maximum of two courses can overlap between a CGS major or certificate and any additional major in another school. No course overlaps are allowed between a CGS certificate and a certificate in another school. No course overlaps are allowed between a CGS minor and another minor, certificate, or major outside of CGS.

Overlapping Credits between majors, certificates and minors within CGS

Courses used for a minor cannot overlap with courses used for a major, minor, or a certificate. Students can overlap a maximum of six (6) credits between a CGS certificate and a CGS major and/or CGS certificate. The following exceptions apply:

* Students cannot receive a certificate in a program in which they are pursuing their major and/or area of concentration. These programs include: Public Service BA (all three tracks and corresponding certificates), Health Services BA (all two tracks and corresponding certificates), Media and Professional Communications BA (all three tracks and corresponding certificates). Note: Media and Professional Communications majors CAN pursue a certificate outside their area of concentration (major track), in which case they are only allowed to overlap core requirements between their major and a certificate.

Program and Course Offerings
Certificate

Accounting Certificate

Develop a practical and theoretical foundation in accounting while earning a certificate. Offered by the College of General Studies and the College of Business Administration, the 24-credit part-time evening program enables students to take the same subjects required for accounting majors in the Bachelor of Science in Business Administration program offered by the College of Business Administration.

Participants benefit from the academic instruction of the College of Business Administration and the nontraditional student services available through the College of General Studies. Credits earned may be counted toward certain state licensure requirements.

Who should participate:

Professionals who already have earned a bachelor's degree in any field and wish to develop careers in accounting or another business field in which substantial knowledge of accounting is an asset.

Upon completion of this certificate, participants will be able to:

- Apply substantial knowledge of accounting
- Enhance their careers in the business field
- Meet many of the requirements to sit for the certified public accountant (CPA) examination in Pennsylvania.

This certificate is applicable to fields such as public accounting, auditing, taxation, corporate accounting, governmental accounting, and other careers in business that require a substantial knowledge of financial and/or managerial accounting.

CPA preparation

Becoming a CPA in the state of Pennsylvania will require 150 credit hours of coursework, 36 credits of which must be in accounting, auditing, finance, tax, and business law. At that time, completing the certificate program will no longer be sufficient preparation to sit for the CPA exam. To learn about becoming a CPA in Pennsylvania, visit the Pennsylvania Institute of Certified Public Accountants Web site at www.picpa.org. You can also contact the Pennsylvania State Board of Accountancy for more information at 717-783-1404 or by E-mail at st-accountancy@pa.gov.

Admission Requirements

A bachelor's degree and a 2.75 or higher cumulative grade point average are required for admission to the program. A certificate application must be completed online. For an application and additional information on admissions guidelines, see the CGS Admissions webpage. Credits earned at other accredited educational institutions will be evaluated for transfer. However, a minimum of 15 credits must be earned at the University of Pittsburgh. Students must earn a grade of C or better in all University accounting courses.

Obtaining the Certificate

To receive the certificate, you must fill out an application with CGS prior to completing your last term in the program. Check with your CGS academic advisor for the application filing form and deadline, and be sure all requirements for the certificate have been met. To avoid a late fee, you should complete this process when registering for the term.

Curriculum (24 credits)

Students must complete their required courses and a minimum of one elective course for a total of 24 credits. A grade of C or better is required for all courses in the program. Students must follow the approved prerequisites for each course. All courses are three credits, and all courses are offered in the evenings.

Required Courses

- CDACCT 6030 - FINANCIAL ACCOUNTING
- CDACCT 6040 - MANAGERIAL ACCOUNTING
- CDACCT 6204 - INTERMEDIATE FINANCIAL REPORTING 1
Electives

Take a minimum of one course.

- CDACCT 6205 - INTERMEDIATE FINANCIAL REPORTING 2
- CDACCT 6236 - ACCOUNTING INFORMATION SYSTEMS
- CDACCT 6238 - AUDITING
- CDACCT 6242 - INDIVIDUAL TAX ACCOUNTING AND PLANNING

Additional Information

Requirements subject to change. Check with an academic advisor before registering.

Gainful Employment Information

Communication Certificate

The Certificate in Communication is a 24-credit program designed to train students to be more effective communicators. Courses, taught by faculty of the Department of Communication, include a range of specialized communication topics. Participants may elect to concentrate their studies in such areas as nonverbal, small group, interpersonal, organizational, or mass communication; persuasion in political settings; or the construction, analysis, and delivery of public speech.

Who should participate:

- Business and professional people whose success may be enhanced by improved communication skills and further understanding of the communication process
- Those who wish to increase their personal knowledge of communication for use in their careers
- Citizens involved in community and public positions in which persuasive delivery and analysis are vital
- Persons seeking a better understanding of the impact of interpersonal, organizational, public, and mass communication in the contemporary world
- Students already enrolled in the College of General Studies or other University programs who want to concentrate on communications skills

Upon completion of this certificate, participants will be able to:

- Understand the makeup of a persuasive presentation
- Polish and refine their communication skills
- Apply concentrated knowledge of a specialized communication topics

This certificate is applicable to fields such as education, writing, broadcasting, public relations, sales, communication training, personnel, promotions, advertising, market research, lobbying, politics, communications, and related fields.

Admission Requirements:

Students must meet requirements for admission to the College of General Studies. A certificate application form must be completed and submitted online to the College of General Studies.
Obtaining the Certificate

To receive the certificate, you must fill out an application with CGS prior to completing your last term in the program. Check with a CGS academic advisor for the application form and filing deadline and be sure all requirements for the certificate have been met. To avoid a late fee, you should complete this process when registering for the term.

Curriculum (24 credits)

- The Communication certificate requires 24 credits, including nine (9) credits of core classes and 15 elective credits.
- Students must achieve a minimum grade of C (2.0) or better for all courses required for the program.
- Up to nine credits earned at other accredited educational institutions may be transferred with approval. A minimum of five courses (15 credits) must be completed at the University of Pittsburgh.

Required Courses (9 credits)

Choose three of the following courses. All courses are 3 credits, unless otherwise noted.

- COMMRC 0500 - ARGUMENT
- COMMRC 0520 - PUBLIC SPEAKING
- COMMRC 0530 - INTERPERSONAL COMMUNICATION
- COMMRC 0540 - DISCUSSION
- COMMRC 0550 - SPEECH COMPOSITION

Electives (15 credits)

Choose five COMMRC courses. All courses are 3 credits, unless otherwise noted. Prerequisite courses are in parentheses; English Composition 0200 is required for all 1000-level courses. Included below is a sampling of courses that can be used to fulfill the certificate requirements:

- COMMRC 0300 - COMMUNICATION AND SOCIETY
- COMMRC 0310 - RHETORIC & SOCIETY
- COMMRC 0320 - MASS COMMUNICATION AND SOCIETY
- COMMRC 1101 - EVIDENCE
- COMMRC 1102 - ORGANIZATIONAL COMMUNICATION (0300)
- COMMRC 1103 - RHETORIC AND CULTURE (0310 or 0320)
- COMMRC 1104 - POLITICAL COMMUNICATION (0310 or 0320)
- COMMRC 1105 - TELEVISION AND SOCIETY (0320)
- COMMRC 1106 - SMALL GROUP COMMUNICATION (0300)
- COMMRC 1109 - NONVERBAL COMMUNICATION (0300)
- COMMRC 1110 - THEORIES OF INTERPERSONAL COMMUNICATION (0300)
- COMMRC 1111 - THEORIES OF PERSUASION (0520 and 0310 or 0320)
- COMMRC 1112 - THEORIES OF RHETORIC (0310 or 0520)
- COMMRC 1114 - FREEDOM OF SPEECH AND PRESS (0310 or 0320)
- COMMRC 1117 - 21ST CENTURY PUBLIC ARGUMENT (0310 or 0320)
- COMMRC 1119 - PRESIDENTIAL RHETORIC 2 (0310 or 0320)
- COMMRC 1121 - HISTORY OF MASS MEDIA (0320)
- COMMRC 1122 - MEDIA CRITICISM (0320)
- COMMRC 1730 - SPECIAL TOPICS IN COMMUNICATION
- COMMRC 1900 - COMMUNICATION INTERNSHIP or CGS 1900 - CHOOSING YOUR PATH: INTERNSHIP SEMINAR

Notes
Requirements are subject to change. Check with an academic advisor before registering.

**Community Health Assessment Certificate**

Earning a certificate in community health assessment from the College of General Studies will provide a foundation in theory as well as an understanding of the diverse populations you may serve. This flexible program is perfect for social services or community health employees, nonprofit professionals interested in healthcare advocacy, and for those looking to advance into leadership positions.

Students who successfully complete this certificate may apply the credits to an undergraduate degree in the University of Pittsburgh College of General Studies (CGS), such as our bachelor of arts in health services.

**Graduates of the program will be able to:**

- communicate and interact effectively and professionally with people from diverse backgrounds;
- understand how social, cultural, legal, and environmental factors may impact the behaviors of both patients and health care workers and apply this knowledge to their careers;
- identify behaviors that tend to promote or compromise health;
- apply administrative and managerial skills to nonprofits and community health organizations; and
- identify, recognize, gather, and analyze data that are pertinent to the health services field.

**Admission Requirements**

Students must meet requirements for admission to the College of General Studies. A certificate application form must be completed and returned to the CGS.

**Obtaining the Certificate**

To receive the certificate, you must fill out an application with CGS prior to completing your last term in the program. Check with a CGS academic advisor for the application form and filing deadline and be sure all requirements for the certificate have been met. To avoid a late fee, you should complete this process when registering for the term.

**Program Requirements**

- The community health assessment certificate requires 18 credits.
- Students must achieve a minimum grade of C (2.0) or better for all courses required for the program.
- Credits earned at other accredited educational institutions may be eligible for transfer. However, a minimum of nine (9) credits must be earned at the University of Pittsburgh.

**Curriculum (18 credits)**

**Required courses**

- COMMRC 1730 - SPECIAL TOPICS IN COMMUNICATION Health Communication
- HRS 1017 - INTRODUCTION TO EPIDEMIOLOGY
- NUR 1765 - RISK FACTORS AND HEALTH
- NUR 1829 - CONTEM ISSUES CROSS CULTL HEALTH
- PUBSRV 1305 - HEALTH, LAW AND ETHICS

Choose one of the following:

- PUBSRV 1200 - PRACTICES OF NON-PROFIT MANAGEMENT
- SOC 0477 - MEDICAL SOCIOLOGY
Corporate/Community Relations Certificate

The Certificate in Corporate and Community Relations is an interdisciplinary course of study that helps students to develop the skills they need to effectively communicate a business or organization's mission and achievements to the outside community. It also teaches them how to effectively communicate organizational news and policies internally to fellow employees. Students learn to develop messages and communications strategies that engage the community and promote an organization's image in a positive way.

The certificate is available as a stand-alone option or can be pursued as part of a degree.

Who should enroll:

- Individuals charged with communicating company and organizational news, policies, benefits, and messages to fellow employees
- Individuals charged with communicating and disseminating company and organizational news to an external audience, thereby improving public perception of the organization
- Individuals interested in advancing the causes of community, civic, or volunteer organizations
- Recent graduates or current students who wish to pursue a career incorporating or community communications

Upon completion of this program, students will be able to:

- apply a theoretical understanding of mass media process, history, and ethics to communications-related careers in broadcasting, journalism, legal professions, government, nonprofits, and other fields;
- identify and analyze audience traits, perspectives, and motivators and develop messages appropriate to each audience;
- manage and navigate professional relationships with a wide range of constituents;
- develop and write clear messages that support specific organizational goals and enhance the image of a professional organization in the public's mind; and
- create professional and effective communication strategies as well as persuasive written materials, customized to the needs of a specific profession, such as business proposals, speeches, marketing plans, and news stories.

This certificate is applicable to such fields as corporate communications, nonprofit management, advocacy, public relations, broadcasting, sales, communication training, promotions, advertising, lobbying and politics, human resources and relations, and training and development.

Admission Requirements

Students must meet requirements for admission to the College of General Studies. A certificate application must be completed and returned to the College of General Studies.

Obtaining the Certificate

To receive the certificate, you must fill out an application with CGS prior to completing your last term in the program. Check with a CGS academic advisor for the application form and filing deadline and be sure all requirements for the certificate have been met. To avoid a late fee, you should complete this process when registering for the term.

Curriculum (18 credits)

- The Corporate and Community Relations certificate requires 18 credits, including six (6) credits of core classes, six (6) elective credits, and six (6) specialization credits.
- Students must achieve a minimum grade of C (2.0) or better for all courses required for the program.
- Credits earned at other accredited educational institutions may be eligible for transfer. However, a minimum of nine (9) credits must be earned at the University of Pittsburgh.

Required Courses (6 credits)

- COMMRC 0320 - MASS COMMUNICATION AND SOCIETY
- ENGWRT 0610 - INTRODUCTION TO JOURNALISM AND NONFICTION
Electives (6 credits)

Choose two courses from the following:

- BUSERV 1940 - MARKETING FUNDAMENTALS
- COMMRC 1111 - THEORIES OF PERSUASION
- COMMRC 1732 - SPECIAL TOPICS IN MASS COMMUNICATION: Public and Media Relations
- PUBSRV 1455 - LAW, ETHICS AND PUBLIC POLICY IN THE MASS MEDIA

Note

CBA students: BUSERV 1940 Marketing Fundamentals may be substituted with BUSMKT 1040 Intro to Marketing.

Specializations (6 credits)

- COMMRC 1102 - ORGANIZATIONAL COMMUNICATION
- COMMRC 1125 - MEDIA THEORY
- COMMRC 1730 - SPECIAL TOPICS IN COMMUNICATION: Health Communication
- COMMRC 1732 - SPECIAL TOPICS IN MASS COMMUNICATION: Communication and New Media Technologies
- ENGCMP 0410 - WRITING IN THE LEGAL PROFESSIONS
- ENGCMP 0420 - WRITING FOR THE PUBLIC
- ENGCMP 0515 - PERSUASIVE WRITING IN ADVERTISING
- ENGCMP 0520 - INTEGRATING WRITING AND DESIGN
- ENGCMP 0550 - TOPICS IN PUBLIC/PROFESSIONAL WRITING
- ENGCMP 0560 - WRITING ARGUMENTS
- ENGCMP 0600 - INTRODUCTION TO TECHNICAL WRITING
- ENGCMP 0610 - COMPOSING DIGITAL MEDIA
- ENGCMP 0641 - WRITING FOR CHANGE
- ENGCMP 1103 - PUBLIC RELATIONS WRITING
- ENGCMP 1104 - CORPORATE STORYTELLING
- ENGCMP 1112 - PROFESSIONAL USES OF SOCIAL MEDIA
- ENGCMP 1120 - HISTORY AND ETHICS OF ADVERTISING AND PUBLIC RELATIONS
- ENGCMP 1270 - PROJECTS IN BLACK RHETORIC
- ENGCMP 1400 - GRANT WRITING FOR NONPROFITS
- ENGCMP 1401 - WRITING FOR FUNDRAISING AND DEVELOPMENT
- ENGCMP 1420 - WRITING PROPOSALS FOR BUSINESS
- ENGWR 0710 - INTRO TO AUDIO STORYTELLING
- ENGWR 1330 - INTERMEDIATE NONFICTION: SCENE AND POINT-OF-VIEW
- ENGWR 1403 - TOPICS IN NON-FICTION: ELECTRONIC MEDIA
- PSY 1635 - ORGANIZATIONAL PSYCHOLOGY
- PUBSRV 1200 - PRACTICES OF NON-PROFIT MANAGEMENT
- PUBSRV 1310 - DIVERSITY ISSUES IN PUBLIC SERVICE
- SOC 0490 - MASS MEDIA

Digital Media Certificate

Businesses and media organizations today must create, produce, and manage content for multiple platforms, from print and broadcast to online. Whether you're an emerging media professional or work in the marketing or communications department of a business or nonprofit organization, you can benefit from training in digital media.
The 18-credit interdisciplinary Digital Media certificate program offered by CGS introduces you to the power of multimedia content-written, audio, and visual-and how it can be used to communicate with and persuade audiences. You'll choose from a variety of courses in communications, arts, English, film studies, psychology, and political science.

This certificate can be completed as a stand-alone program or in conjunction with another degree at the University of Pittsburgh.

Who should participate:

- Professionals operating in multimedia environments
- Individuals responsible for e-commerce efforts
- People interested in producing content for online publications and sites, films, documentaries, etc.
- Entrepreneurs
- Educators

Upon completion of this certificate, participants will be able to:

- Understand how concepts, design, and technology work together to communicate with mass audiences
- Design, create, and manipulate digital communication vehicles
- Understand the importance of visual and textual communication in maintaining organizational success
- Produce engaging interactive programs, such as for training or sales purposes

This certificate is applicable to such fields as interactive online training; electronic catalogs; DVDs for sales, marketing, or training purposes; multimedia businesses; and general e-commerce.

Admission Requirements

Students must meet requirements for admission to the College of General Studies. A certificate application form must be completed and submitted online to the College of General Studies.

Obtaining the Certificate

To receive the certificate, you must fill out an application with CGS prior to completing your last term in the program. Check with a CGS academic advisor for the application form and filing deadline and be sure all requirements for the certificate have been met. To avoid a late fee, you should complete this process when registering for the term.

Curriculum (18 credits)

- The digital media certificate requires 18 credits, including nine (9) credits of core classes and nine (9) elective credits.
- Students must achieve a minimum grade of C (2.0) or better for all courses required for the program.
- Credits earned at other accredited educational institutions may be eligible for transfer. However, a minimum of nine (9) credits must be earned at the University of Pittsburgh.

Required Courses (9 credits)

- COMMRC 0320 - MASS COMMUNICATION AND SOCIETY
- COMMRC 1122 - MEDIA CRITICISM
- ENGFLM 0355 - VISUAL LITERACY or ENGFLM 0401 - INTRODUCTION TO VISUAL CULTURE

Electives (9 credits)

Choose three of the courses listed below.

- CGS 1900 - CHOOSING YOUR PATH: INTERNSHIP SEMINAR
Notes

Requirements subject to change. Check with an academic advisor before registering.

Gender, Sexuality, and Women Studies Certificate

The undergraduate Certificate in Gender, Sexuality, and Women's Studies is an interdisciplinary academic program providing students with the opportunity to broaden their understanding of the changing role that gender plays, both in the United States and around the world. The GSWS Certificate is housed in the College of General Studies and offered in partnership with the Gender, Sexuality, and Women's Studies program. Participants benefit from the academic instruction of GSWS faculty and the nontraditional student services available through the College of General Studies.
Students who want to explore the intersection of gender with race, class, ethnicity, ability, and sexual orientation will find courses of interest, as will students who want to know more about the role of women in history, literature and the arts, media, and science. Students who are planning careers in medicine, the creative arts, social work, education, counseling, law, therapy, and business often find that a background in women's studies enhances their professional activities.

The certificate is available as a stand-alone option or can be pursued as part of a degree.

**Admission Requirements**

Students must meet requirements for admission to the College of General Studies. A certificate application form must be completed and submitted online to the College of General Studies.

**Obtaining the Certificate**

To receive the certificate, you must fill out an application with CGS prior to completing your last term in the program. Check with a CGS academic advisor for the application form and filing deadline and be sure all requirements for the certificate have been met. To avoid a late fee, you should complete this process when registering for the term.

**Certificate Requirements (18 credits)**

The gender, sexuality, and women's studies (GSWS) certificate requires 18 credits, including six credits of core classes, nine elective credits (which must be taken from two academic departments), and one advanced GSWS course.

- Transfer courses will be accepted on a case-by-case basis up to a maximum of two courses.
- A cumulative grade point average of 2.0 or higher is required in courses being applied to the certificate.
- A minimum of 12 credits must be earned at the University of Pittsburgh.
- The GSWS Certificate may not be pursued concurrently with the B.A. in Gender, Sexuality, and Women's Studies or with the GSWS minor.
- All certificate students are expected to meet at least once per year with the GSWS undergraduate advisor to update their files and discuss what courses are needed to fulfill certificate requirements.

**Core Courses (6 credits)**

A minimum of two courses (six credits) are required (preferably to be completed early in the student's academic program).

- GWSW 0100 - INTRODUCTION TO GENDER, SEXUALITY, AND WOMEN'S STUDIES
- GWSW 0150 - GENDER IN THE PROFESSIONS (available as of Spring 2021) or
- GWSW 0500 - INTRODUCTION TO FEMINIST THEORY or
- GWSW 0550 - SEX AND SEXUALITIES

Students are advised to take all four core courses to cover the key areas represented by the program (in which case two of these courses will count towards the program electives).

**Electives (9 credits)**

Three elective courses must be taken from at least two different academic departments (GSWS can count as one of these 2 departments). Courses must be approved for GSWS credit (consult Pitt's Course Catalog for current listings). Some approved courses are:

- LCJS 1550 - GENDER, RACE, CLASS AND CRIMINAL JUSTICE
- AFRCNA 0454 - MAN/WOMAN LITERATURE
- ANTH 0768 - HUMAN SEXUALITY IN CROSS CULTURE
- ENGCMP 0203 - SEMINAR IN COMPOSITION: GENDER STUDIES
- ENGLIT 0610 - WOMEN AND LITERATURE
- ENGLIT 0630 - SEXUALITY AND REPRESENTATION
FR 0012 - FRENCH KISS: LOVE, SEX, FRANCE
GSWS 0200 - SEX, RACE, AND POPULAR CULTURE
GSWS 0600 - GLOBAL LGBTQ LITERATURE
LCJS 0200 - RACE, CLASS, GENDER, & THE LAW
LCJS 1583 - SEX, LAW AND MARRIAGE
PSY 0184 - PSYCHOLOGY OF GENDER
SOC 0446 - SOCIOLOGY OF GENDER
SOC 1448 - WORKING WOMEN
Either GSWS 1900 - INTERNSHIP or GSWS 1901 - INDEPENDENT STUDY may be used to meet an elective requirement, but in this case, the two other courses must each be in different departments. Consult with the GSWS advisor. Special permission from the GSWS advisor required.

Interdisciplinary Course (3 credits)

Choose one upper-level advanced GSWS course (three credits); GSWS 0100 and GSWS 0500 (or GSWS 0550) are prerequisites for some of these courses. Below is a sample list of approved courses:

- GSWS 1140 - SPECIAL TOPICS
- GSWS 1150 - TRANSNATIONAL FEMINISMS
- GSWS 1170 - QUEER THEORY
- GSWS 1180 - POLITICS OF GENDER AND FOOD
- GSWS 1190 - MASCULINITIES
- GSWS 1210 - GENDER AND THE DIGITAL
- GSWS 1300 - WANDERLUST: SEX & GENDER IN GLOBAL TOURISM
- GSWS 1450 - GENDER AND SUSTAINABILITY

Notes

Requirements subject to change. Check with an academic advisor before registering.

Information System Design Certificate

This innovative 18-credit program responds to the increasing industry demand for information system professionals. Offered in partnership with the School of Computing and Information (SCI), this multifaceted undergraduate certificate can be completed as a stand-alone continuing education program or serve as preparation for a bachelor's, master's, or doctoral degree.

Who should participate:

- Professionals in another field who wish to enter the information management field
- Individuals working in the technology field who want or need more formal training to progress in their careers
- People wanting to prepare for a master's degree in information sciences

Upon completion of this certificate, participants will be able to:

- Use scientific programming language to introduce information structures such as linked lists, stacks, and queues
- Develop program modules using a current programming language
- Utilize the theories of data structures and programming language design

These competencies may be applied to positions such as system designer, database developer, database manager, interactive system designer, expert system designer, information retrieval specialist, network designer, database marketer, or administrator who advises and implements technology purchases and upgrades.

This certificate is applicable to fields such as banking, healthcare, library science, judicial systems, communication, education, agriculture, private industry, and government.
Admission requirements

Students must meet requirements for admission to the College of General Studies. A certificate application form must be completed and submitted online to the College of General Studies.

Program Prerequisites

Before applying to this program, students should have completed 1) a college algebra class, and 2) an introductory information systems course or a programming course, earning a C or better in both.

- Recommended programming courses: INFSCI 0010 INTRODUCTION TO INFORMATION, SYSTEMS AND SOCIETY, CS 0007 INTRODUCTION TO COMPUTER PROGRAMMING, CS 0008 INTRODUCTION TO COMPUTER PROGRAMMING WITH PYTHON, or CS 0004 INTRODUCTION TO COMPUTER PROGRAMMING-BASIC.

Obtaining the Certificate

To receive the certificate, you must fill out an application with CGS prior to completing your last term in the program. Check with a CGS academic advisor for the application form and filing deadline and be sure all requirements for the certificate have been met. To avoid a late fee, you should complete this process when registering for the term.

Curriculum (18 credits)

Students must complete a total of 18 credits as follows. All courses must be completed with a C or better grade.

- INFSCI 0017 - FUNDAMENTALS OF OBJECT-ORIENTED PROGRAMMING Computer Science students may use CS 0401 in lieu of INFSCI 0017 (effective Fall 2020: CMPINF 0401 INTERMEDIATE PROGRAMMING)
- INFSCI 1022 - DATABASE MANAGEMENT SYSTEMS (effective Fall 2020: INFSCI 1500 DATABASE MANAGEMENT CONCEPTS AND APPLICATIONS)
- INFSCI 1024 - ANALYSIS OF INFORMATION SYSTEMS (effective Fall 2020: INFSCI 1400 ANALYSIS OF INFORMATION SYSTEMS)
- INFSCI 1044 - HUMAN FACTORS IN SYSTEM DESIGN (effective Fall 2020: INFSCI 0410 HUMAN-CENTERED SYSTEMS)
- INFSCI 1070 - INTRODUCTION TO TELECOMMUNICATIONS AND NETWORKS (effective Fall 2020: INFSCI 0610 NETWORKS AND INFORMATION)
  Choose one elective from the following:
  - INFSCI 1014 - GRAPHICS
  - INFSCI 1025 - DESIGN OF INFORMATION SYSTEMS
  - INFSCI 1027 - IT PROJECT MANAGEMENT (effective Fall 2020: INFSCI 1460 IT PROJECT MANAGEMENT)
  - INFSCI 1031 - GOING DIGITAL: TRANSFORMATIONAL CHANGE
  - INFSCI 1052 - USER CENTERED DESIGN (effective Fall 2020: INFSCI 1420 USER-CENTERED DESIGN)
  - INFSCI 1059 - WEB PROGRAMMING
  - INFSCI 1068 - GEOSPATIAL INFORMATION SYSTEMS (GIS) (effective Fall 2020: INFSCI 1550 SPATIAL INFORMATION)
  - INFSCI 1074 - COMPUTER SECURITY (effective Fall 2020: INFSCI 1620 ADVANCED SECURITY AND PRIVACY)
  - INFSCI 1075 - NETWORK SECURITY (effective Fall 2020: INFSCI 1600 SECURITY AND PRIVACY)

Notes

Requirements subject to change. Check with an academic advisor before registering.

Leadership Certificate
The Certificate in Leadership provides a structured framework of courses and experiences for acquiring the basic practical and analytical skills required of successful public and private sector leaders. Offered by the University of Pittsburgh College of General Studies, this program uses the skills and knowledge of students to help advance their careers further, and take their organizations to the next level.

This 18-credit program is designed for students looking to become a more attractive candidate for a managerial or leadership position in their chosen field, or for those students looking to enter into the business, nonprofit, government, or corporate world.

Who should participate:

The Certificate in Leadership is open to any University of Pittsburgh degree-seeking student, regardless of current school or college, who anticipates moving into a leadership role in business, nonprofit, or other organization.

Upon completion of this certificate, participants will be able to:

- Demonstrate knowledge of leadership theories and models, such as situational, participative, transformational, and servant leadership
- Identify and evaluate the effectiveness of different communicative styles, and communicate clearly and effectively themselves
- Analyze an organization in its cultural, social, historical, developmental, geographic, and/or competitive aspects, and decide which type of leadership style would be most effective in that situation
- Determine one's fit to the leadership-related challenges of an organization and what one would need to be more effective as a leader in that situation.

Admission Requirements

Students must meet requirements for admission to the College of General Studies. A certificate application form must be completed and submitted online to the College of General Studies.

Obtaining the Certificate

To receive the certificate, you must fill out an application with CGS prior to completing your last term in the program. Check with a CGS academic advisor for the application form and filing deadline and be sure all requirements for the certificate have been met. To avoid a late fee, you should complete this process when registering for the term.

Pre-Requisite Requirements

Students seeking a leadership certificate must be in good academic standing and should have already completed two basic courses in communication, one each in oral and written, with a grade of C or better.

Recommended Pre-Requisite Courses

- COMMRC 0520 - PUBLIC SPEAKING
  BUSORC 1101 and COMMRC 0500 can be substituted for COMMRC 0520
- ENGCMP 0400 - WRITTEN PROFESSIONAL COMMUNICATION
  ENGCMP 0420, ENGCMP 0440, and ENGCMP 0450 or ENGWRT 0550 and ENGWRT 0610 can be substituted for ENGCMP 0400.
  Alternatively, refer to the following thematic course clusters and select a lower-level professional writing course that best fits your academic interests and needs.

Note

Applicants without this coursework may be admitted provisionally but must complete the prerequisites prior to taking the LDRSHP 1200 Seminar course.

Co-Curricular Requirement: Emerging Leaders Program
This certificate has a co-curricular requirement: completion of Pitt's Panther Leadership Academy, a 20-week non-credit program run by the Office of Student Affairs. In the course of this program, participants gain exposure to leadership-related issues through workshops and sessions on communications, conflict management, power, influence, diversity, ethics, and personal development plans.

Note: Students must send proof of completion of Pitt's Panther Leadership Academy program to CGS Advising at cgsadv@pitt.edu.

You may request to use an alternative, comparable leadership experience (e.g., ROTC Leadership Training, president of student government, or VIH program participant, etc.). This request should be made to a CGS academic advisor and include a detailed rationale explaining how this leadership experience supports the goals of the certificate and your course of study.

Curriculum (18 credits)

The leadership certificate requires 18 credits of core and elective courses.

a. A required two-course sequence for a total of six credits, covering leadership theories and how to have situational effectiveness as a leader.

b. Four elective courses (12 credits) from the areas of Leadership and Ethics, Interpersonal Relations, and Situational Analysis. Students may petition for a non-listed course (of personal interest or from their discipline) to fulfill the fourth elective requirement or choose a course from the list of approved electives. At least half of the courses must be at the 1000-level.

- Achieve a minimum grade of C (2.0) or better for all courses required for the program.
- Credits earned at other accredited educational institutions may be eligible for transfer. However, a minimum of nine credits must be earned at the University of Pittsburgh.

Required Courses (6 credits)

Students must complete LDRSHP 1100 and the program pre-requisite requirements listed above prior to registering for LDRSHP 1200. The co-curricular requirement can be completed prior or concurrently with the Leadership Seminar.

- LDRSHP 1100 - THEORIES OF LEADERSHIP
- LDRSHP 1200 - LEADERSHIP SEMINAR

Electives (12 credits)

Complete at least one course from each of the three designated areas, four courses in all (a minimum of 12 credits). At least half of the courses must be at the 1000-level.

Area One: Leadership and Ethics

Select a course from Philosophy and elsewhere on ethical reasoning and decision-making.

- COMMRC 1161 - COMMUNICATION ETHICS
- PHIL 0300 - INTRODUCTION TO ETHICS
- PHIL 0350 - PHILOSOPHY AND PUBLIC ISSUES
- PHIL 1300 - ETHICAL THEORY
- PHIL 1380 - BUSINESS ETHICS
- PUBSRV 0050 - ETHICS AND ACCOUNTABILITY
- PUBSRV 1305 - HEALTH, LAW AND ETHICS
- PUBSRV 1340 - STRATEGIC PLANNING PUBLIC SECTOR
  These may be used as leadership electives for qualified students.
- AFROTC 1014 - LEADING AND COMMUNICATIONS 2
- MILS 0021 - LEADERSHIP & DECISION MAKING
- NUR 1085 - ETHICS IN NURSING AND HEALTH CARE
- PS 1910 - INSTITUTE OF POLITICS INTERNSHIP/SEMINAR (cross-listed with PUBSRV 1910)
Area Two: Interpersonal Relations

Choose from courses in Psychology, Communications, English Composition, and elsewhere on advanced interpersonal communications, including negotiation, persuasion, dispute resolution, and small group behavior.

- AFRCNA 1535 - DIMENSIONS OF RACISM
- ANTH 1760 - ANTHROPOLOGY OF LAW
- COMMRC 0300 - COMMUNICATION AND SOCIETY
- COMMRC 0530 - INTERPERSONAL COMMUNICATION
- COMMRC 1102 - ORGANIZATIONAL COMMUNICATION
- COMMRC 1106 - SMALL GROUP COMMUNICATION
- COMMRC 1109 - NONVERBAL COMMUNICATION
- COMMRC 1111 - THEORIES OF PERSUASION
- ECON 0200 - GAME THEORY PRINCIPLES
- ENGCMP 1100 - LANGUAGE OF BUSINESS AND INDUSTRY
- ENGCMP 1103 - PUBLIC RELATIONS WRITING
- ENGCMP 1400 - GRANT WRITING FOR NONPROFITS
- PSY 0010 - INTRODUCTION TO PSYCHOLOGY
- PSY 0105 - INTRODUCTION TO SOCIAL PSYCHOLOGY
- PSY 0405 - LEARNING AND MOTIVATION
- PSY 1135 - SOCIAL PERCEPTION AND COGNITION
- PSY 1635 - ORGANIZATIONAL PSYCHOLOGY
- SOC 0431 - BUREAUCRACIES

Area Three: Situational Analysis

Take a course from Anthropology, Sociology, and elsewhere and gain insight into a broader dimension or aspect of an organization of interest, or the population with which it interacts.

- ANTH 0701 - CULTURAL ANTHROPOLOGY: OVERVIEW
- ANTH 0780 - INTRODUCTION TO CULTURAL ANTHROPOLOGY
- ANTH 1737 - SPECIAL TOPICS IN CULTURAL ANTHROPOLOGY Semiotic Anthropology
- ANTH 1738 - GENDER PERSPECTIVES IN ANTHROPOLOGY
- ANTH 1755 - URBAN ANTHROPOLOGY
- ECON 0150 - ECONOMIC DATA ANALYSIS
- ECON 0800 - INTRODUCTION TO ECONOMICS Students with a grade of C or better in ECON 0100 and ECON 0110 can substitute for ECON 0800. Use one for the requirement.
- HIST 0050 - SOCIAL CHANGE (cross-listed with SOC 0351)
- LING 1235 - LANGUAGE, GENDER AND SEXUALITY (cross-listed with GSWS 1235)
- PS 1241 - PUBLIC ADMINISTRATION AND POLITICAL SYSTEM
- SOC 0010 - INTRODUCTION TO SOCIOLOGY
- SOC 0150 - SOCIAL THEORY
- SOC 0432 - WEALTH AND POWER
- SOC 0444 - URBAN SOCIOLOGY
- SOC 1448 - WORKING WOMEN
- URBNST 0114 - URBAN SUSTAINABILITY

Note
Students may not use more than one of each of the courses in these groups: 1) ANTH 0701 and 0780; 2) ANTH 1755, SOC 0444 and URBNST 1614.

Note

Requirements subject to change. Check with an academic advisor before registering.

Managing Health Services Programs and Projects Certificate

Improve your administrative and business skills and earn a Certificate in Managing Health Services Programs and Projects. This 18-credit, interdisciplinary program emphasizes grant and research project management, and is designed to educate health service workers in the areas of sociology, communications, public administration, and management.

The program is applicable to positions such as health project manager, health administration director, health program director, and medical office manager. Students who successfully complete this certificate may apply the credits earned to an undergraduate degree at the University of Pittsburgh College of General Studies (CGS).

Upon completion of this certificate, students will be able to:

- manage health services research projects, grants, contracts, and finances;
- demonstrate the skills necessary to assume an administrative or managerial role in a health care organization;
- apply organizational theory and concepts to health care facilities; and
- analyze how physical, social, and cultural factors may help or hinder communication about health care needs.

Who should enroll:

- Health care workers who have been charged with, or would like to take on, management of grants and research projects
- Public and community health workers who seek an understanding of how physical, social, and cultural factors may help or hinder communication about health care needs
- Health care employees looking to take on leadership roles in the workplace

Admission Requirements

Students must meet requirements for admission to the College of General Studies. A certificate application form must be completed and submitted online to the College of General Studies.

Obtaining the Certificate

To receive the certificate, you must fill out an application with CGS prior to completing your last term in the program. Check with a CGS academic advisor for the application form and filing deadline and be sure all requirements for the certificate have been met. To avoid a late fee, you should complete this process when registering for the term.

Program Requirements

- The Managing Health Services Programs and Projects certificate requires 18 credits, including five (5) required courses and at least one (1) elective.
- Credits earned at other accredited educational institutions may be eligible for transfer. However, a minimum of 9 credits must be earned at the University of Pittsburgh.
- Students must achieve a minimum grade of C (2.0) or better for all courses required for the certificate.

Required Courses (15 credits)
Complete all five courses.

- BUSERV 1915 - INTRODUCTION TO MANAGEMENT
- COMMRC 1730 - SPECIAL TOPICS IN COMMUNICATION: Health
- HRS 1017 - INTRODUCTION TO EPIDEMIOLOGY
- NUR 1829 - CONTEM ISSUES CROSS CULTL HEALTH
- PUBSRV 0040 - PUBLIC SERVICE TECHNOLOGIES

Electives (3 credits)

Take a minimum of one course.

- HRS 1009 - ORGANIZATIONAL THEORY & BEHAVIOR or BUSORG 1020 - ORGANIZATIONAL BEHAVIOR or COMMRC 1102 - ORGANIZATIONAL COMMUNICATION
- ENGCMP 1400 - GRANT WRITING FOR NONPROFITS
- PUBSRV 1110 - FINANCIAL MANAGEMENT IN THE PUBLIC SECTOR
- PUBSRV 1315 - MANAGING PROJECTS AND CONTRACTS

National Preparedness and Homeland Security Certificate

The Certificate in National Preparedness and Homeland Security (NPHS) is designed to teach current and future emergency professionals to analyze information and make decisions in dynamic and complex crisis environments using new and powerful analytic tools. Through experience-based learning activities, certificate students will develop the skills they need to thrive in homeland security and emergency preparedness careers.

This unique 18-credit certificate incorporates hands-on learning methods. The program features dynamic modeling tools developed at the University of Pittsburgh to plan for and respond to disasters; exercises and simulations that follow protocols established by the U.S. Department of Homeland Security; and tools that use virtual reality, visualization, and Geographic Information Systems (GIS) software to integrate information for crisis decision making.

Who should participate:

- Employees of local, state, and federal entities engaged in emergency preparedness, homeland security, and related fields
- Business people who are charged with risk management and are interested in applying industry tested analytics to developing emergency management and continuity of operations (COOP) plans
- Professionals in organizations with first-responders and first receivers, and those looking to step into such leadership positions
- Veterans interested in building on their expertise in decision-making and crisis leadership
- Career changers and current degree seekers looking to enter a growing and important field that uses a data-driven approach to preparedness activities involving both planning and implementation.

Upon completion of this certificate, participants will be able to:

- Develop and implement organizational risk profiles, COOP plans, business recovery plans, and other risk management activities
- Use knowledge of federal, state, and local agency responsibilities to effectively plan and execute emergency response plans
- Apply incident command protocols and consensus building approaches
- Communicate effectively in a crisis, orally and in writing, and transfer information effectively to obtain positive outcomes
- Plan prevention and preparedness operations and measures that help communities handle efforts related to damage limitation, emergency response, and recovery

Admission Requirements

Students must meet requirements for admission to the College of General Studies. A certificate application form must be completed and submitted online to the College of General Studies.

Obtaining the Certificate
To receive the certificate, you must fill out an application with CGS prior to completing your last term in the program. Check with a CGS academic advisor for the application form and filing deadline and be sure all requirements for the certificate have been met. To avoid a late fee, you should complete this process when registering for the term.

**Curriculum (18 credits)**

The certificate is composed of twelve credits of required core courses, and six credits of elective courses. Core courses cover foundational content and procedures central to national preparedness and emergency response, in addition to analytical tools and approaches. They include a capstone experience in which students will plan, role-play, and report on a complete disaster scenario involving critical infrastructure sectors such as energy, government, transportation, health, and telecommunications. Elective courses allow students to gain further knowledge or experience relevant to their current or intended career paths in such fields as health, information security, and business continuity. All courses are 3 credits, unless otherwise noted.

- No course with a grade below C will be accepted for certificate credit
- To earn the certificate, students must maintain at least a 2.0 grade point average
- All four required core courses must be completed at the University of Pittsburgh to earn the certificate
- A maximum of six credits may be accepted from other institutions for elective courses
- Students should consult with their advisor and/or core course faculty early in their program to identify elective courses appropriate for their career and/or academic interests

**Required Courses (12 credits)**

Students must have successfully completed at least one other core course prior to registering for the capstone course. The capstone course may be taken concurrently with another core course.

- NPHS 1510 - FEDERAL AND INTERNATIONAL FRAMEWORK FOR EMERGENCY PREPAREDNESS
- NPHS 1520 - STATE AND LOCAL FRAMEWORK FOR EMERGENCY PREPAREDNESS
- NPHS 1530 - ANALYSIS, INTELLIGENCE AND DECISION TOOLS FOR EMERGENCY PREPAREDNESS
- NPHS 1540 - CAPSTONE COURSE IN EMERGENCY PREPAREDNESS

**Electives (6 credits)**

The following list shows a sample of courses already approved as electives:

- LCJS 1520 - CYBERCRIME
- LCJS 1521 - CYBER SECURITY, LAW, AND MONEY LAUNDERING
- LCJS 1571 - TERRORISM
- LCJS 1570 - PRINCIPLES OF HOMELAND SECURITY (cross-listed with PUBSRV 1425 - PRINCIPLES OF HOMELAND SECURITY)
- CS 1655 - SECURE DATA MANAGEMENT AND WEB APPLICATIONS
- CS 1675 - INTRODUCTION TO MACHINE LEARNING
- CS 1699 - SPECIAL TOPICS IN COMPUTER SCIENCE Privacy in Electronic Society
- ECON 0150 - ECONOMIC DATA ANALYSIS
- GEOL 0820 - NATURAL DISASTERS
- INFSCI 1068 - GEOSPATIAL INFORMATION SYSTEMS (GIS) (effective Fall 2020: INFSCI 1550 SPATIAL INFORMATION) or IE 1015 - GEOGRAPHIC INFORMATION SYSTEMS
- INFSCI 1070 - INTRODUCTION TO TELECOMMUNICATIONS AND NETWORKS (effective Fall 2020: INFSCI 0610 NETWORKS AND INFORMATION)
- INFSCI 1074 - COMPUTER SECURITY (effective Fall 2020: INFSCI 1620 INFSCI 1620 - ADVANCED SECURITY AND PRIVACY)
- NPHS 1900 - INTERNSHIP
- NPHS 1901 - INDEPENDENT STUDY
• NUR 1061 - INDEPENDENT STUDY
• PS 1503 - INTERNATIONAL ORGANIZATION
• PS 1509 - CONFLICT AND WAR THEORY
• PS 1583 - TOPICS IN INTERNATIONAL RELATIONS European and Global Security
• PUBSRV 1320 - GEOGRAPHIC INFORMATION SYSTEMS IN THE PUBLIC SERVICE

Notes

Students must meet all relevant course prerequisites. NPHS Internship and NPHS Independent Study courses may be repeated for credit with permission.

Note: With the approval of the NPHS advisor, students enrolled in the SHRS Emergency Medicine (EM) program may apply up to six (6) credits of EM courses toward the NPHS certificate electives.

Requirements subject to change. Check with an academic advisor before registering.

Center for National Preparedness

The Center for National Preparedness (www.cnp.pitt.edu) is an interdisciplinary collaboration of experts and departments at the University of Pittsburgh. It provides research, education, and service aimed at advancing the science, policy and implementation of effective federal, state, and local preparedness efforts across the public and private sectors. The Center possesses expertise in business continuity, information technology, engineering, medical research, national security policy, and public health.

Nonprofit Management Certificate

Nonprofit agencies of all kinds are being established to fulfill needs in our communities, while existing community benefit organizations are expanding to meet increasing demand for services. This growth means new opportunities in the rewarding nonprofit sector.

The 18-credit nonprofit management certificate is offered by the College of General Studies in partnership with Pitt's Graduate School of Public and International Affairs. The program provides a solid foundation for those looking to enter the field of public service, to enhance their current roles, or to assume leadership positions. Coursework covers topics including management, fundraising, human resources, and more.

This certificate can be pursued as a standalone program or in conjunction with the completion of another degree at Pitt. The credits you earn while completing this certificate may also be transferred to a bachelor's degree program at CGS, such as our BA in public service.

Who should enroll:

• Professionals with public relations experience
• Professionals with an interest in fundraising
• Professionals with a background in program development
• Professionals with knowledge of marketing and advertising
• Recent graduates or current students who wish to pursue a career in the nonprofit field
• Undergraduate degree-seeking students who wish to have an intermediate credential
• Technology workers
• Entrepreneurs who wish to start a nonprofit

Upon completion of this certificate, participants will be able to:

• organize, manage, or supervise a nonprofit organization;
• hire and train an efficient staff;
• understand the structural and financial issues unique to nonprofits;
• effectively raise revenue through fundraising; and
• write grant proposals.
This certificate is applicable to positions such as grant writers, fundraisers, development officers, accountants, information technology workers, and office managers.

**Admission Requirements**

Students must meet requirements for admission to the College of General Studies. A certificate application form must be completed and submitted online to the College of General Studies.

**Obtaining the Certificate**

To receive the certificate, you must fill out an application with CGS prior to completing your last term in the program. Check with a CGS academic advisor for the application form and filing deadline and be sure all requirements for the certificate have been met. To avoid a late fee, you should complete this process when registering for the term.

**Credit Requirements**

- The Nonprofit Management certificate requires 18 credits of core courses, including a three-credit internship.
- Students must achieve a minimum grade of C (2.0) or better for all courses required for the program.
- Credits earned at other accredited educational institutions may be eligible for transfer. However, a minimum of nine credits must be earned at the University of Pittsburgh.

**Curriculum (18 credits)**

Complete all six required courses.

- PUBSRV 0020 - INTRODUCTION TO PUBLIC SERVICE
- PUBSRV 1200 - PRACTICES OF NON-PROFIT MANAGEMENT
- PUBSRV 1210 - FINANCIAL MANAGEMENT OF NON-PROFIT ORGANIZATIONS
- PUBSRV 1220 - HUMAN RESOURCE MANAGEMENT OF NON-PROFIT ORGANIZATIONS
- PUBSRV 1230 - FUNDRAISING FOR NON-PROFIT ORGANIZATIONS
- PUBSRV 1900 - INTERNSHIP SEMINAR

Note: PUBSRV 1910 Institute of Politics Internship/Seminar (4 cr.) may be used in place of PUBSRV 1900 Internship Seminar. Check with your CGS advisor prior to registering.

**Notes**

Although courses for the certificate can be taken in any order, we strongly recommend that students consider completing PUBSRV 0020 *Introduction to Public Service* first in order to gain exposure to main theories and practices in the field. Normally the internship would be completed last; however, students should start planning their internship early and review their options with a CGS advisor.

- The internship requires 120 hours at the internship site along with registration for the PUBSRV 1900 course. Visit our Internships page for details.
- PUBSRV 1900 is a 3-credit course and may not be divided over two semesters. However, the student could work with their internship instructor to see if the 120 hours could be divided over two terms.
- Students who work at the University should consult with the PUBSRV internship instructor as to whether they need to complete internship hours outside of Pitt or in a different department on campus.

**Gainful Employment Information**

*Requirements are subject to change. Check with an academic advisor before registering.*

**Writing Certificate**
The Certificate in Writing is a 21-credit program designed for those who desire to improve their writing skills. In today's world, the skillful use of the written word is fundamental. This program consists of academic courses taught by faculty of the Department of English. Participants may choose electives to focus on a particular style of writing or to obtain an overview of several writing styles. The program also offers internships with local media, including newspapers, magazines, and television.

Who should participate:

- Students already enrolled in a degree program in the College of General Studies who wish to concentrate on the development of writing skills
- Those who already have a degree, but who wish to develop their writing skills for personal or professional advancement
- People seeking to embark upon writing as a profession

Upon completion of this certificate, participants will be able to:

- Write clearly and accurately
- Apply writing skills to both fiction and nonfiction works
- Understand different forms and techniques used in various types of writing

This certificate is applicable to fields such as media, industrial organizations, governmental agencies, community groups, service providers, and businesses. Skilled writers may work in any organization or field.

Admission Requirements

Students must meet requirements for admission to the College of General Studies. A certificate application form must be completed and submitted online to the College of General Studies.

Obtaining the Certificate

To receive the certificate, you must fill out an application with CGS prior to completing your last term in the program. Check with a CGS academic advisor for the application form and filing deadline and be sure all requirements for the certificate have been met. To avoid a late fee, you should complete this process when registering for the term.

Curriculum (21 credits)

In addition to Seminar in Composition, students must complete seven courses (21 credits). These classes should include two English writing courses (6 credits) and five English writing electives (15 credits).

- A minimum of five of the required seven courses must be completed at the University of Pittsburgh.
- No course will be accepted for certificate credit with a grade below C, and no course will be accepted as a prerequisite for a higher-level course if the grade earned is lower than a C

Required Courses (6 credits)

All courses are 3 credits.

- ENGWR 0520 - INTRODUCTION TO FICTION WRITING
- ENGWR 0610 - INTRODUCTION TO JOURNALISM AND NONFICTION

Electives (15 credits)

All courses are 3 credits.

Courses offered vary by term. Choose five additional courses from any combinations of poetry, fiction, and nonfiction. A sampling of courses that can be used to fulfill the certificate requirements include:
Poetry

- ENGWRT 0530 - INTRODUCTION TO POETRY WRITING
- ENGWRT 1210 - POETRY WORKSHOP

Fiction

- ENGWRT 1010 - INTERMEDIATE FICTION
- ENGWRT 1090 - MASTERING POINT OF VIEW
- ENGWRT 1091 - AUTOBIOGRAPHY AND CREATIVE IMPULSE
- ENGWRT 1092 - WRITER'S JOURNALS
- ENGWRT 1094 - READINGS IN CONTEMPORARY FICTION
- ENGWRT 1095 - TOPICS IN FICTION
- ENGWRT 1710 - SENIOR SEMINAR IN FICTION

Nonfiction

- ENGCMP 1103 - PUBLIC RELATIONS WRITING
- ENGCMP 1104 - CORPORATE STORYTELLING
- ENGWRT 1330 - INTERMEDIATE NONFICTION: SCENE AND POINT-OF-VIEW
- ENGWRT 1377 - MEDIA LITERACY: WRITING AND READING YOUR WAY THROUGH THE DIGITAL LANDSCAPE
- ENGWRT 1390 - READINGS IN CONTEMPORARY NON-FICTION
- ENGWRT 1391 - WRITING THE REVIEW
- ENGWRT 1393 - SPORTS WRITING
- ENGWRT 1394 - SCIENCE WRITING
- ENGWRT 1399 - TOPICS IN NON-FICTION: NEWSPAPER
- ENGWRT 1403 - TOPICS IN NON-FICTION: ELECTRONIC MEDIA
- ENGWRT 1900 - INTERNSHIP: WRITING

Notes

Requirements subject to change. Check with an academic advisor before registering.

Writing for the Professions Certificate

In today's business climate, employees have discovered that the ability to research, organize, and write various kinds of documents is a critical component of many positions, including those that are primarily technical in nature. Organizations expect employees to communicate clearly and effectively with both colleagues and non-expert stakeholders.

This 18-credit certificate provides participants with a strong foundation for developing these vital writing skills. You will learn techniques that are critical for producing clearly written documents-critiquing, analyzing, and researching-as well as the practical applications that build on this groundwork.

Who should participate:

Individuals for whom writing will be a major component of their job responsibilities, e.g., broadcasters, legal professionals, or reporters.

Upon completion of this certificate, participants will be able to:

- Identify and analyze audience traits and perspectives
- Determine a specific goal and/or purpose of a document, then organize and develop clearly written prose in support of that purpose
- Apply concentrated knowledge of a specialized communication topic
This certificate is applicable to such fields as print and online writing professions, health professions, and nonprofit organizations.

Admission Requirements

Students must meet requirements for admission to the College of General Studies. A certificate application form must be completed and submitted online to the College of General Studies..

Obtaining the Certificate

To receive the certificate, you must fill out an application with CGS prior to completing your last term in the program. Check with a CGS academic advisor for the application form and filing deadline and be sure all requirements for the certificate have been met. To avoid a late fee, you should complete this process when registering for the term.

Curriculum (18 credits)

- The Writing for the Professions certificate requires 18 credits, including 9 credits of core classes and 9 elective credits.
- Students must achieve a minimum grade of C (2.0) or better for all courses required for the program.
- Credits earned at other accredited institutions may be eligible for transfer. However, a minimum of 9 credits must be earned at the University of Pittsburgh.

Required Courses (9 credits)

- ENGWRT 0610 - INTRODUCTION TO JOURNALISM AND NONFICTION
- ENGCMP 0400 - WRITTEN PROFESSIONAL COMMUNICATION
  And choose one of the following courses:
- COMMRC 0320 - MASS COMMUNICATION AND SOCIETY
- ENGWRT 1330 - INTERMEDIATE NONFICTION: SCENE AND POINT-OF-VIEW

Electives (9 credits)

Choose three courses from the following:

- COMMRC 1730 - SPECIAL TOPICS IN COMMUNICATION: Health Communication
- COMMRC 1732 - SPECIAL TOPICS IN MASS COMMUNICATION: Media Relations or Communication and New Media Technologies
- ENGCMP 0410 - WRITING IN THE LEGAL PROFESSIONS
- ENGCMP 0420 - WRITING FOR THE PUBLIC
- ENGCMP 0515 - PERSUASIVE WRITING IN ADVERTISING
- ENGCMP 0520 - INTEGRATING WRITING AND DESIGN
- ENGCMP 0550 - TOPICS IN PUBLIC/PROFESSIONAL WRITING
- ENGCMP 0560 - WRITING ARGUMENTS
- ENGCMP 0600 - INTRODUCTION TO TECHNICAL WRITING
- ENGCMP 0610 - COMPOSING DIGITAL MEDIA
- ENGCMP 1103 - PUBLIC RELATIONS WRITING
- ENGCMP 1111 - PROFESSIONAL WRITING IN GLOBAL CONTEXTS
- ENGCMP 1112 - PROFESSIONAL USES OF SOCIAL MEDIA
- ENGCMP 1400 - GRANT WRITING FOR NONPROFITS
- ENGCMP 1401 - WRITING FOR FUNDRAISING AND DEVELOPMENT
- ENGCMP 1420 - WRITING PROPOSALS FOR BUSINESS
- ENGWRT 0550 - FUNDAMENTALS OF NEWS REPORTING
- ENGWRT 1370 - JOURNALISM BOOT CAMP: WRITE NOW
- ENGWRT 1377 - MEDIA LITERACY: WRITING AND READING YOUR WAY THROUGH THE DIGITAL LANDSCAPE
Notes

Requirements subject to change. Check with an academic advisor before registering.

Major

Administration of Justice, BA

In Spring 2021, the Administration of Justice, BA was officially terminated. The last semester students will be permitted to declare the existing Administration of Justice and Legal Studies majors will be Fall 2021. This will provide current students who were intending to declare the major the opportunity to do so. The majors will be inactivated at the end of August 2028 in which all current active and inactive students enrolled in these programs will have until August 2028 to complete their degree.

In American society, the justice system is a central social institution. Its effects on individuals and social groups give it a pivotal role in a changing society. The administration of justice program is an upper-division undergraduate course of interdisciplinary study in the liberal arts and sciences that leads to a Bachelor of Arts degree. The goal of this baccalaureate program is to develop an understanding of the evolution, theory, structure, functioning, and processes of change in the total system of criminal justice in our society.

Administration of justice majors develop competence in one of four specialized areas:

- Adult and juvenile corrections
- Law enforcement practice
- Forensics
- Cybercrime

Major Requirements

Students must complete a minimum of 120 credits (approximately 40 courses) for the Bachelor of Arts degree with a major in administration of justice. Of this total, 30 credits (10 courses) make up the major, which is satisfied by taking courses to complete the core requirements, area of concentration, and major electives. The remaining credits required for the degree are outlined in the General Education Requirements section on this page.

An outline of the Administration of Justice major requirements follows:

Core Requirements: 12 credits (four courses)

Administration of Justice

- LCJS 1400 - THE SYSTEM OF CRIMINAL JUSTICE
• LCJS 1200 - CRIMINAL LAW
• LCJS 1590 - SPECIAL TOPICS IN LAW AND CRIMINAL JUSTICE
• LCJS 1900 - PRESERVICE INTERNSHIP

Area of Concentration: 9 credits (three courses)

Choose one of the four areas of specialization. All courses listed under a given area are required.

Adult and Juvenile Corrections

• LCJS 1310 - LAW AND DEVIANCE
• LCJS 1420 - CORRECTIONS
• PSY 0205 - PSYCHOPATHOLOGY

Law Enforcement Practice

• LCJS 1410 - LAW ENFORCEMENT AND POLICING
• LCJS 1110 - CRIMINOLOGICAL THEORY or LCJS 1100 CRIMINOLOGY
• LCJS 1210 - CRIMINAL PROCEDURE

Forensics

• LCJS 1440 - CRIMINAL INVESTIGATION
• LCJS 1500 - CRIMINALISTICS
• LCJS 1510 - PSYCHOLOGY AND LAW

Cybercrime

• LCJS 1520 - CYBERCRIME

Choose two of these four concentration courses

• LCJS 1531 - INTERNATIONAL ORGANIZED CRIME
• LCJS 1521 - CYBER SECURITY, LAW, AND MONEY LAUNDERING
• ADMJ 1246 - FINANCING TERRORISM
• LCJS 1570 - PRINCIPLES OF HOMELAND SECURITY

Major Electives: 9 credits (three courses)

• LCJS 0100 - INTRODUCTION TO LAW, CRIMINAL JUSTICE, & SOCIETY (formerly: Society and the Law, title change effective Fall 2021)
• LCJS 1100 - CRIMINOLOGY
• LCJS 1440 - CRIMINAL INVESTIGATION
• LCJS 1500 - CRIMINALISTICS
• LCJS 1501 - CRIMINALISTICS LAB
• LCJS 1410 - LAW ENFORCEMENT AND POLICING
• LCJS 1572 - INTRODUCTION POLICE MANAGEMENT
• ADMJ 1210 - JUVENILE DELINQUENCY
• LCJS 1310 - LAW AND DEVIANCE
• LCJS 1430 - THE JUVENILE JUSTICE PROCESS
- LCJS 1540 - WHITE COLLAR CRIME
- LCJS 1520 - CYBERCRIME
- LCJS 1530 - ORGANIZED CRIME
- LCJS 1531 - INTERNATIONAL ORGANIZED CRIME
- LCJS 1521 - CYBER SECURITY, LAW, AND MONEY LAUNDERING
- LCJS 1550 - GENDER, RACE, CLASS AND CRIMINAL JUSTICE
- LCJS 1571 - TERRORISM
- ADMJ 1246 - FINANCING TERRORISM
- LCJS 1110 - CRIMINOLOGICAL THEORY
- LCJS 1420 - CORRECTIONS
- LCJS 1560 - PROBATION AND PAROLE
- LCJS 1210 - CRIMINAL PROCEDURE (also offered as LEGLST 1141)
- LCJS 1570 - PRINCIPLES OF HOMELAND SECURITY (also offered as PUBSRV 1425)
- ADMJ 1495 Criminal Justice Study Abroad (UPitt-Bradford)
- LCJS 1599 - INDEPENDENT STUDY
- LCJS 1510 - PSYCHOLOGY AND LAW
- URBNST 0140 - CRIME, PUNISHMENT, JUSTICE, REINTEGRATION
- any Pitt Prison Education Project (PPEP) course (codes vary)

Note:

This major requires that you complete an internship at a facility outside the University, and that facility may require a criminal background check, Act 33/34 clearance, and perhaps drug screening to determine whether you are qualified to participate in the internship. Additionally, in order to become licensed or employed, many states will inquire as to whether the applicant has been convicted of a misdemeanor, a felony, or a felonious or illegal act associated with alcohol and/or substance abuse.

**Transfer Credit Agreement**

A transfer credit agreement has been established between the criminal justice program at Butler County Community College and the administration of justice program at Pitt. The agreement gives a course-by-course outline of the associate's degree program and the equivalent course or requirement fulfilled for CGS. Courses transfer if graded C or better. For a copy of the transfer agreement for a specific community college, contact CGS.

**Police Academy Certification**

Students may receive up to 15 transfer credits for completion of Pennsylvania Municipal Police Academy Act 120 or state police cadet training. Certification course work is equivalent to LCJS 1400, LCJS 1200, LCJS 1210, and two ADMJ elective courses.

**General Education Requirements**

To earn a Bachelor of Arts or a Bachelor of Science degree in the College of General Studies, you must satisfactorily complete a minimum of 120 credits (approximately 40 courses), at least 30 credits of which must be in upper-division (1000-level) courses (or 24 credits if pursuing the Natural Sciences major). These 1000-level courses may come from any of the requirements for the degree listed below.

General Education Requirements (GERs) provide you with an opportunity to discover interests you never knew you had, all while earning credits toward graduation. And, no matter what your future holds, be it a career or grad school, GERs prepare you by emphasizing skills employers want (like critical thinking, problem solving, written and oral communication) and giving you the opportunity to become more aware of our increasingly diverse and interconnected world.

The College of General Studies provides a liberal arts and pre-professional education for undergraduate students that is grounded in scholarly excellence. Pitt offers you the knowledge, understanding, analytical tools, and communication skills you need to become perceptive, reflective, and intellectually self-conscious citizens within a diverse and rapidly changing world. GERs are at the core of our education.
Our General Education Requirements changed for students entering as of Fall 2018 (2191) term. See the CGS General Education Requirements for Fall 2018 and afterward here or visit the CGS General Education Requirements website.

Writing (9 credits)

Written communication is central to almost all disciplines and professions. Developing written proficiency is a lifelong process, and it is especially important that undergraduate education accelerates and directs that process toward the achievement of writing skills that will provide a base appropriate for professional or graduate education or for professional employment.

Introductory Composition Course (3 credits)

Students are required to take the college-level introductory composition course ENGCMP 0200 Seminar in Composition (SC). Students are exempted from this course if they earned a 660 on the SAT Evidence-Based Reading and Writing Section and a 5 on the Advanced Placement Exam. Given the importance of establishing a sound foundation for a student's writing, all students are required to pass SC with a grade of C- or better by the time they have completed 24 credits in enrollment. (Students who do not have a 560 on the SAT or a 24 or above on the ACT might also be required to take the skill-development course ENGCMP 0150 Workshop in Composition before enrolling in SC.)

Note for students transferring from the School of Engineering into CGS: successful completion of ENGR 0012 Intro to Engineering Computing may be used in place of ENGCMP 0200 Seminar in Composition.

Two Writing Intensive Courses (6 credits if not overlapped with other General Education requirements)

Writing intensive courses (W-Courses) are designed to teach writing within a discipline through writing assignments that are distributed across the entire term. In these courses, students will produce at least 20 - 24 pages of written work. A significant portion of this work should be substantially revised in response to instructor feedback and class discussion. All students must complete two courses that are designated as 'W-Courses', or one W-Course and a second English composition course. Students should satisfy one of these requirements by taking a W-Course in their major if it is available. Students may not transfer credits in to satisfy this requirement. W-courses can be overlapped with other General Education courses, except for Professional Communication.

Math/Algebra (3 credits)

Mastering college-level algebra is required for all students. These skills are foundational for student success in other general education courses.

Students are exempt from having to take Algebra with a 620 SAT Math or 27 ACT Math. Students who do not meet these criteria must earn a C- or higher in MATH 0020, MATH 0025, MATH 0031, CS 0004, or CS 0007. Given the importance of establishing a sound foundation in mathematics, all students are required to satisfy the Algebra requirement by the time they have completed 30 credits in enrollment.

Quantitative and Formal Reasoning (3 credits)

All students are required to take and pass with a grade of C- or better at least one course in university-level mathematics (other than trigonometry) for which algebra is a prerequisite, or an approved course in statistics or mathematical or formal logic.

A C- or better is needed in a course that satisfies this requirement. Students who qualify for placement in an upper-level course in mathematics on a proficiency placement test are exempt.

Diversity (3 credits)

Diversity courses focus centrally and intensively on issues of diversity, and do so in a manner that promotes understanding of difference. They provide students with analytical skills with which to understand structural inequities and the knowledge to be able to participate more effectively in our increasingly diverse and multicultural society. The courses may address, though not be limited to, such issues as race, gender, ethnicity, sexuality, religious difference, and/or economic disparity.
All students must complete one course that is designated as a Diversity course but may take this course within their major field of study, if available. Diversity courses may also be courses that fulfill other General Education Requirements. (3 credits if not overlapped with another General Education course)

**Language/Communication (6-10 credits)**

All students are required to take a sequence of two courses that provide them with advanced study of a second language other than English, or the ability to develop their skills in oral and professional communication. Students choose one of the following options below:

**Option 1: A Sequence of Two Courses in a Second Language (6-10 credits)**

Students complete with a grade of C- or better two terms of university-level study in a second language other than English. Exemptions will be granted to students who can demonstrate elementary proficiency in a second language through one of the following:

1. Having completed three years of high school study of a second language with a grade of B or better in each course;
2. Passing a special proficiency examination;
3. Transferring credits for two terms or more of approved university-level instruction in a second language with grades of C or better;
4. Having a native language other than English.

**Option 2: A Sequence of Two Courses in Oral and Professional Communication (6 credits)**

These classes advance the skills of the student to perform effectively in workplace environments or the public by communicating ideas and concepts and/or introduce students to theories that analyze and explain effective communication in these settings. Students must complete one of the following with a grade of C- or better: COMMRC 0520 or COMMRC 0500. Students select a second class from a list of approved courses.

**Humanities and Arts, Social Sciences, and Natural Sciences (27 credits)**

Each student is required to take nine courses in the humanities, social sciences, and natural sciences as distributed below. Such courses allow students to pursue their own interests while they explore diverse views of a broad range of human cultures, modes of thought, and bodies of knowledge. The courses that fulfill these requirements are truly courses in the disciplines that draw on the unique resources of a research university.

**One course in Literature (3 credits)**

By studying a range of literary and other texts in this course, students will be introduced to the techniques and methods of textual analysis and will develop critical perspectives on a variety of forms of cultural expression.

**One course in the Arts (3 credits)**

This course introduces students to modes of analysis appropriate to music, theater, or the visual and plastic arts. It may take the form of a survey, the study of a genre or period, or may focus on a particular artist.

**One course in Creative Work (3 credits)**

In this course, students are expected to produce some form of creative work, and they will also be trained in the techniques and modes of its production. The course could be situated in theater, studio arts, writing, visual arts (including photography, film), music, and dance; or it may be a course that engages in innovative or original work in relation to written, oral, or visual material, new media, social media, and other contemporary forms of communication and representation.

**One course in Philosophical Thinking or Ethics (3 credits)**

This course will emphasize close and critical reading of theories about knowledge, reality, humanity, and values. Courses could focus on human nature; scientific reasoning; theories of cognition and consciousness; human/social rights; competing systems of belief; morality; concepts of freedom; theories of justice; social obligations/constraints; or ethics, including applied or professional ethics.

**One course in Social Sciences (3 credits)**

A course that treats topics considered of significant importance in the social or behavioral sciences (including social psychology). Courses will introduce students to the subject matter and methodology of a particular discipline and will involve them in the modes of investigation, analysis, and judgment characteristically applied by practitioners.
One course in Historical Analysis (3 credits)

In this course, students will develop skills and methods by which to understand significant cultural, social, economic, or political accounts of the past. The course may focus on pivotal moments of change, or important transitions over longer periods of time. Courses could explore developments in science, technology, literature, or art, and the ideas around them, or examine critical historical shifts by analyzing various data or cultural forms.

Three courses in the Natural Sciences (9 credits)

These will be courses that introduce students to scientific principles and concepts rather than offering a simple codification of facts in a discipline or a history of a discipline. The courses may be interdisciplinary, and no more than two courses may have the same primary departmental sponsor.

Global Awareness and Cultural Understanding (9 credits)

Each student must complete three courses as distributed below:

One course in Global Issues (3 credits)

This course will examine significant issues that are global in scale. Courses could address, for example: globalization; the global and cultural impact of climate change/sustainability; the effects of and resistances to colonialism; or worldwide issues related to health, gender, ethnicity, race, technology, labor, law or the economy.

One course in a Specific Geographic Region (3 credits)

This course will be an in depth study and analysis of a particular region or locality outside the United States.

One course in Cross-Cultural Awareness (3 credits)

This course, through cross-cultural perspective, will promote knowledge of and reflection upon the cultures of Asia, the Middle East, Africa, Latin America, the Caribbean, or the indigenous peoples of the world past and present. Students will develop an understanding of cultures, traditions, and societies that differ substantially from those that prevail in North America and Europe.

Overlapping of General Education Courses

- Courses taken for general education requirements can also be applied to major requirements, when applicable.
- Diversity courses are allowed to overlap with other general education requirements.
- Writing ('W') courses are allowed to overlap with other general education requirements except for the Professional Communication requirement.
- Students may overlap the second course in their language sequence, taken at the college level, with the Geographic Region requirement, except for American Sign Language. This does not apply to students who satisfy the Language requirement through high school study, a proficiency examination, or native proficiency.

Specialized Study (the Major) (30-36 credits)

The baccalaureate degree, in addition to providing certain skills and broad exposure to the major bodies of knowledge, also allows the opportunity to specialize in a particular field, providing depth of experience essential for vocational competence or further graduate study. An outline of each major is available on the CGS Web site, www.cgs.pitt.edu.

Students admitted to CGS can choose from the following majors. Many majors offer a combination of face-to-face and online courses.

- Administration of justice
- Dental hygiene (for licensed dental hygienists)
- Health services (BA and BS)
- Humanities
- Legal studies
- Media and professional communications
- Natural sciences
Students who want a major in an arts and sciences field can begin in CGS and transfer to the Dietrich School of Arts and Sciences after completing 12 credits including the mathematics and seminar in composition requirements. Admission is determined by the Dietrich School.

Electives

Any credits not used specifically to satisfy the previous requirements are considered electives. Electives can be taken in a wide variety of subjects to complement, reinforce, or add further breadth to the chosen program of study or to help meet the requirements of a minor or certificate program.

Dental Hygiene, BS

Opportunities for health care professionals are becoming available as a result of the changes in health care delivery formats. To prepare dental hygiene graduates for employment opportunities created by these changes, the University of Pittsburgh's College of General Studies and the School of Dental Medicine have developed a course of study that leads to a Bachelor of Science in dental hygiene. This degree is intended for those students who have graduated from accredited dental hygiene programs with a certificate or associate's degree. (See School of Dental Medicine listings in this bulletin for information about the Associate of Science in Dental Hygiene program.) The Bachelor of Science degree enhances the already completed professional training and provides important exposure to the liberal arts. The combination of basic sciences, clinical experiences, and liberal arts strengthens the career opportunities for dental hygienists in business, sales, dental hygiene education, and research.

A distinct advantage of the Bachelor of Science degree is that hygienists can practice their profession following receipt of their certificate in dental hygiene and be employed while completing the requirements for the bachelor's degree. Class schedules can be tailored to work schedules. Classes are available in the evening, during the day, on Saturday, and through CGS Online. Attendance can be on a full-time or part-time basis.

Program Requirements

The following program requirements must be met to receive the Bachelor of Science degree:

- Students must earn a minimum of 131 credits to complete the Bachelor of Science degree. 15 credits should be completed using 1000-level course work. These credits, when combined with the 15 credits for DENHYG 1544, 1545, 1547, 1549, and 1689 completed in the dental hygiene program, meet the CGS requirement for 30 credits of 1000-level course work. The courses must be completed within five years of enrolling in the program.

- Students who are transferring from certificate/associate degree hygiene programs to the CGS dental hygiene Bachelor of Science degree program complete up to 40 credits of CGS general education, dental hygiene track, and elective course work.

- At least 30 of the required credits must be completed at the University of Pittsburgh in order to fulfill the CGS residency requirement. Contact CGS Advising for information about credits that transfer from other institutions or if you completed your dental hygiene certificate at Pitt before 1995.

Required Courses

The required courses are listed below.

CGS General Education Courses

Our General Education Requirements changed for students entering as of Fall 2018 (2191) term.

_Listed below are the revised CGS General Education Requirements for dental hygiene students for Fall 2018 and afterward._ (If you were admitted to the CGS Dental Hygiene Program prior to Fall 2018, your general education requirements are listed here.)

_Note:_ 9-15 credits in courses below must be at the 1000-level depending on the student's area of concentration in the major. One of the courses taken below must also satisfy a 'Diversity' General Education requirement.
Writing (6 credits)

- Two "W" courses

Mathematics (3 credits)

- Algebra or CS course

Humanities and Arts, Social Sciences, and Natural Sciences (15 credits)

- 6 credits in 2 courses that satisfy 2 of the 3 following general education requirements: *The Arts, Creative Work, Philosophical Thinking or Ethics.*
- 3 credits in a course that satisfies the Social Science general education requirement.
- 3 credits in a course that satisfies the Literature general education requirement.
- 3 credits in a course that satisfies the Historical Analysis general education requirement.

Global Awareness and Cultural Understanding (9 credits)

- 3 credits in a course that satisfies the Global Issues general education requirement.
- 3 credits in a course that satisfies the Specific Geographic Region general education requirement.
- 3 credits in a course that satisfies the Cross-Cultural Awareness general education requirement.

Dental Hygiene Tracks

Students must choose a concentration in health management, education, or research.

Health Management

- DENHYG 1921 - HEALTH MANAGEMENT SEMINAR
- DENHYG 1922 - HEALTH MANAGEMENT PRACTICUM

Education

- DENHYG 1901 - ALLIED HEALTH EDUCATION
- DENHYG 1902 - ALLIED HEALTH EDUCATION PRACTICUM

Research

- NUR 0067 - NURSING RESEARCH: AN INTRODUCTION TO CRITICAL APPRAISAL AND EVIDENCE-BASED PRACTICE or
- PSY 0036 - RESEARCH METHODS LECTURE and
- PSY 0037 - RESEARCH METHODS LABORATORY
  Formerly: PSY 0035
- SOC 0230 - SOCIAL RESEARCH METHODS
- Elective - Topic and subject will vary. See Dental Hygiene program website for a list of recommended electives.

Health Services, BA

The health services major is an interdisciplinary course of study designed to prepare students to work in health care. The program analyzes the structure of the health care industry; identifies cultural, legal, and environmental factors that impact health; and provides students with communication and management skills.

Students choose one of two fields:

- Managing health services programs and projects gives students key administrative and business skills, with an emphasis on grant and research project management.
- Community health assessment provides skills to assess the physical, social, and environmental factors influencing health behaviors.
Major Requirements

A minimum total of 120 credits is required for the Bachelor of Arts degree with a major in health services. Of this total, the major consists of 3 credits of prerequisite courses and 33 credits of core and specialization courses. The remaining credits for the degree are outlined on the General Education Requirements section on this page.

Prerequisite: Computer Competency

Choose one of the following courses to fulfill the 3-credit prerequisite coursework. Check with an advisor for information about other options.

- CS 0004 - INTRODUCTION TO COMPUTER PROGRAMMING-BASIC
- CS 0007 - INTRODUCTION TO COMPUTER PROGRAMMING
- CS 0008 - INTRODUCTION TO COMPUTER PROGRAMMING WITH PYTHON
- INFSCI 0010 - INTRODUCTION TO INFORMATION, SYSTEMS AND SOCIETY
- PUBSRV 0040 - PUBLIC SERVICE TECHNOLOGIES

Health Field Core (15 credits)

- COMMRC 1730 - SPECIAL TOPICS IN COMMUNICATION Health Communication
- HRS 1017 - INTRODUCTION TO EPIDEMIOLOGY
- NUR 1829 - CONTEM ISSUES CROSS CULTL HEALTH
- PUBSRV 1305 - HEALTH, LAW AND ETHICS
- SOC 0477 - MEDICAL SOCIOLOGY

Specialization Tracks (18 credits)

Students take a total of two required courses and four elective courses. Check with an academic advisor for course availability and additional elective options.

Track 1: Managing Health Services Programs and Projects

Required, choose two:

- BUSERV 1915 - INTRODUCTION TO MANAGEMENT
- HRS 1009 - ORGANIZATIONAL THEORY & BEHAVIOR or
- BUSORG 1020 - ORGANIZATIONAL BEHAVIOR or
- COMMRC 1102 - ORGANIZATIONAL COMMUNICATION or
- PSY 1635 - ORGANIZATIONAL PSYCHOLOGY
- PUBSRV 1315 - MANAGING PROJECTS AND CONTRACTS

Note

If two organizational courses are taken, one will count as an MHSPP elective.

Electives, choose four:

- AFRCNA 1710 - AFRICAN AMERICAN HEALTH ISSUES
- ANTH 1722 - CULTURE AND POLITICS OF MENTAL HEALTH
- ANTH 1726 - GLOBAL PHARMACEUTICALS
- ANTH 1761 - PATIENTS AND HEALERS: MEDICAL ANTHROPOLOGY 1
Track 2: Community Health Assessment

Required, choose two:

- NUR 1765 - RISK FACTORS AND HEALTH
- SOC 1450 - HEALTH AND ILLNESS
- PUBSRV 1310 - DIVERSITY ISSUES IN PUBLIC SERVICE

Electives, choose four:

- AFRCNA 1710 - AFRICAN AMERICAN HEALTH ISSUES
- ANTH 1722 - CULTURE AND POLITICS OF MENTAL HEALTH
- ANTH 1726 - GLOBAL PHARMACEUTICALS
- ANTH 1727 - HEALTH AND ENVIRONMENT IN PITTSBURGH
- CGS 1900 - CHOOSING YOUR PATH: INTERNSHIP SEMINAR or PUBSRV 1900 - INTERNSHIP SEMINAR
- COMMRC 0530 - INTERPERSONAL COMMUNICATION
- ECON 0220 - INTRO TO HEALTH ECONOMICS
- HIST 0709 - HISTORY OF GLOBAL HEALTH
- HIST 1090 - HISTORY OF MEDICINE AND HEALTH CARE
- HIST 1706 - DRUGS IN GLOBAL HISTORY
- HPS 0613 - MORALITY AND MEDICINE
- HRS 1006 - INTRO TO HUMAN NUTRITION
- NROSCI 0081 - DRUGS AND BEHAVIOR
- NUR 1634 - HEALTH CARE DELIVERY IN OMAN
- PSY 1210 - INTRODUCTION TO CLINICAL PSYCHOLOGY
- PSY 1215 - HEALTH PSYCHOLOGY
- PSY 1230 - PSYCHOLOGY OF DEATH AND DYING
- PSY 1235 - ALCOHOL USE AND ABUSE
- PSY 1635 - ORGANIZATIONAL PSYCHOLOGY
- PUBHLT 1001 - INTRODUCTION TO GLOBAL HEALTH
- PUBHLT 1002 - SPECIAL TOPICS IN GLOBAL HEALTH
- PUBSRV 1100 - PRACTICES IN PUBLIC ADMINISTRATION
- PUBSRV 1200 - PRACTICES OF NON-PROFIT MANAGEMENT
- REHSCI 1018 - SURVEY OF HEALTH AND REHABILITATION PROFESSIONS
- REHSCI 1290 - PRACTICAL ISSUES IN DISABILITY
- SOC 0473 - SOCIOLOGY OF GLOBALIZATION AND HEALTH

Notes

Requirements subject to change. Check with an academic advisor before registering.

An internship is available through the College of General Studies. Please see your advisor for additional information.

**Pitt Business-Health Services Double Degree**

The College of General Studies (CGS) and the College of Business Administration (CBA) offer a double degree program in which students earn both the BA in Health Services through CGS and the BS in Business Administration (BSBA) through CBA. The double degree program is designed for students who are interested in the intersection of health care management and business administration. Learn more.

**General Education Requirements**

*To earn a Bachelor of Arts or a Bachelor of Science degree in the College of General Studies, you must satisfactorily complete a minimum of 120 credits (approximately 40 courses), at least 30 credits of which must be in upper-division (1000-level) courses (or 24 credits if pursuing the Natural Sciences major). These 1000-level courses may come from any of the requirements for the degree listed below.*

General Education Requirements (GERs) provide you with an opportunity to discover interests you never knew you had, all while earning credits toward graduation. And, no matter what your future holds, be it a career or grad school, GERs prepare you by emphasizing skills employers want (like critical thinking, problem solving, written and oral communication) and giving you the opportunity to become more aware of our increasingly diverse and interconnected world.

The College of General Studies provides a liberal arts and pre-professional education for undergraduate students that is grounded in scholarly excellence. Pitt offers you the knowledge, understanding, analytical tools, and communication skills you need to become perceptive, reflective, and intellectually self-conscious citizens within a diverse and rapidly changing world. GERs are at the core of our education.

*Our General Education Requirements changed for students entering as of Fall 2018 (2191) term. See the CGS General Education Requirements for Fall 2018 and afterward here or visit the CGS General Education Requirements website.*

**Writing (9 credits)**

Written communication is central to almost all disciplines and professions. Developing written proficiency is a lifelong process, and it is especially important that undergraduate education accelerates and directs that process toward the achievement of writing skills that will provide a base appropriate for professional or graduate education or for professional employment.

**Introductory Composition Course (3 credits)**

Students are required to take the college-level introductory composition course ENGCMP 0200 Seminar in Composition (SC). Students are exempted from this course if they earned a 660 on the SAT Evidence-Based Reading and Writing Section and a 5 on the Advanced Placement Exam. Given the importance of establishing a sound foundation for a student's writing, all students are required to pass SC with a grade of C- or better by the time they have completed 24 credits in enrollment. (Students who do not have a 560 on the SAT or a 24 or above on the ACT might also be required to take the skill-development course ENGCMP 0150 Workshop in Composition before enrolling in SC.)

*Note for students transferring from the School of Engineering into CGS: successful completion of ENGR 0012 Intro to Engineering Computing may be used in place of ENGCMP 0200 Seminar in Composition.*

Two Writing Intensive Courses (6 credits if not overlapped with other General Education requirements)
Writing intensive courses (W-Courses) are designed to teach writing within a discipline through writing assignments that are distributed across the entire term. In these courses, students will produce at least 20 - 24 pages of written work. A significant portion of this work should be substantially revised in response to instructor feedback and class discussion. All students must complete two courses that are designated as ‘W-Courses’, or one W-Course and a second English composition course. Students should satisfy one of these requirements by taking a W-Course in their major if it is available. **Students may not transfer credits in to satisfy this requirement. W-courses can be overlapped with other General Education courses, except for Professional Communication.**

**Math/Algebra (3 credits)**

Mastering college-level algebra is required for all students. These skills are foundational for student success in other general education courses. Students are exempt from having to take Algebra with a 620 SAT Math or 27 ACT Math. Students who do not meet these criteria must earn a C- or higher in MATH 0020, MATH 0025, MATH 0031, CS 0004, or CS 0007. Given the importance of establishing a sound foundation in mathematics, all students are required to satisfy the Algebra requirement by the time they have completed 30 credits in enrollment.

**Quantitative and Formal Reasoning (3 credits)**

All students are required to take and pass with a grade of C- or better at least one course in university-level mathematics (other than trigonometry) for which algebra is a prerequisite, or an approved course in statistics or mathematical or formal logic. A C- or better is needed in a course that satisfies this requirement. Students who qualify for placement in an upper-level course in mathematics on a proficiency placement test are exempt.

**Diversity (3 credits)**

Diversity courses focus centrally and intensively on issues of diversity, and do so in a manner that promotes understanding of difference. They provide students with analytical skills with which to understand structural inequities and the knowledge to be able to participate more effectively in our increasingly diverse and multicultural society. The courses may address, though not be limited to, such issues as race, gender, ethnicity, sexuality, religious difference, and/or economic disparity. All students must complete one course that is designated as a Diversity course but may take this course within their major field of study, if available. Diversity courses may also be courses that fulfill other General Education Requirements. (3 credits if not overlapped with another General Education course)

**Language/Communication (6-10 credits)**

All students are required to take a sequence of two courses that provide them with advanced study of a second language other than English, or the ability to develop their skills in oral and professional communication. Students choose one of the following options below:

**Option 1: A Sequence of Two Courses in a Second Language (6-10 credits)**

Students complete with a grade of C- or better two terms of university-level study in a second language other than English. Exemptions will be granted to students who can demonstrate elementary proficiency in a second language through one of the following:

1. Having completed three years of high school study of a second language with a grade of B or better in each course;
2. Passing a special proficiency examination;
3. Transferring credits for two terms or more of approved university-level instruction in a second language with grades of C or better;
4. Having a native language other than English.

**Option 2: A Sequence of Two Courses in Oral and Professional Communication (6 credits)**

These classes advance the skills of the student to perform effectively in workplace environments or the public by communicating ideas and concepts and/or introduce students to theories that analyze and explain effective communication in these settings. Students must complete one of the following with a grade of C- or better: COMMRC 0520 or COMMRC 0500. Students select a second class from a list of approved courses.

**Humanities and Arts, Social Sciences, and Natural Sciences (27 credits)**
Each student is required to take nine courses in the humanities, social sciences, and natural sciences as distributed below. Such courses allow students to pursue their own interests while they explore diverse views of a broad range of human cultures, modes of thought, and bodies of knowledge. The courses that fulfill these requirements are truly courses in the disciplines that draw on the unique resources of a research university.

**One course in Literature (3 credits)**

By studying a range of literary and other texts in this course, students will be introduced to the techniques and methods of textual analysis and will develop critical perspectives on a variety of forms of cultural expression.

**One course in the Arts (3 credits)**

This course introduces students to modes of analysis appropriate to music, theater, or the visual and plastic arts. It may take the form of a survey, the study of a genre or period, or may focus on a particular artist.

**One course in Creative Work (3 credits)**

In this course, students are expected to produce some form of creative work, and they will also be trained in the techniques and modes of its production. The course could be situated in theater, studio arts, writing, visual arts (including photography, film), music, and dance; or it may be a course that engages in innovative or original work in relation to written, oral, or visual material, new media, social media, and other contemporary forms of communication and representation.

**One course in Philosophical Thinking or Ethics (3 credits)**

This course will emphasize close and critical reading of theories about knowledge, reality, humanity, and values. Courses could focus on human nature; scientific reasoning; theories of cognition and consciousness; human/social rights; competing systems of belief; morality; concepts of freedom; theories of justice; social obligations/constraints; or ethics, including applied or professional ethics.

**One course in Social Sciences (3 credits)**

A course that treats topics considered of significant importance in the social or behavioral sciences (including social psychology). Courses will introduce students to the subject matter and methodology of a particular discipline and will involve them in the modes of investigation, analysis, and judgment characteristically applied by practitioners.

**One course in Historical Analysis (3 credits)**

In this course, students will develop skills and methods by which to understand significant cultural, social, economic, or political accounts of the past. The course may focus on pivotal moments of change, or important transitions over longer periods of time. Courses could explore developments in science, technology, literature, or art, and the ideas around them, or examine critical historical shifts by analyzing various data or cultural forms.

**Three courses in the Natural Sciences (9 credits)**

These will be courses that introduce students to scientific principles and concepts rather than offering a simple codification of facts in a discipline or a history of a discipline. The courses may be interdisciplinary, and no more than two courses may have the same primary departmental sponsor.

**Global Awareness and Cultural Understanding (9 credits)**

Each student must complete three courses as distributed below:

**One course in Global Issues (3 credits)**

This course will examine significant issues that are global in scale. Courses could address, for example: globalization; the global and cultural impact of climate change/sustainability; the effects of and resistances to colonialism; or worldwide issues related to health, gender, ethnicity, race, technology, labor, law or the economy.

**One course in a Specific Geographic Region (3 credits)**

This course will be an in depth study and analysis of a particular region or locality outside the United States.

**One course in Cross-Cultural Awareness (3 credits)**
This course, through cross-cultural perspective, will promote knowledge of and reflection upon the cultures of Asia, the Middle East, Africa, Latin America, the Caribbean, or the indigenous peoples of the world past and present. Students will develop an understanding of cultures, traditions, and societies that differ substantially from those that prevail in North America and Europe.

Overlapping of General Education Courses

- Courses taken for general education requirements can also be applied to major requirements, when applicable.
- Diversity courses are allowed to overlap with other general education requirements.
- Writing (‘W’) courses are allowed to overlap with other general education requirements except for the Professional Communication requirement.
- Students may overlap the second course in their language sequence, taken at the college level, with the Geographic Region requirement, except for American Sign Language. This does not apply to students who satisfy the Language requirement through high school study, a proficiency examination, or native proficiency.

Specialized Study (the Major) (30-36 credits)

The baccalaureate degree, in addition to providing certain skills and broad exposure to the major bodies of knowledge, also allows the opportunity to specialize in a particular field, providing depth of experience essential for vocational competence or further graduate study. An outline of each major is available on the CGS Web site, www.cgs.pitt.edu.

Students admitted to CGS can choose from the following majors. Many majors offer a combination of face-to-face and online courses.

- Administration of justice
- Dental hygiene (for licensed dental hygienists)
- Health services (BA and BS)
- Humanities
- Legal studies
- Media and professional communications
- Natural sciences
- Public service
- Social sciences

Students who want a major in an arts and sciences field can begin in CGS and transfer to the Dietrich School of Arts and Sciences after completing 12 credits including the mathematics and seminar in composition requirements. Admission is determined by the Dietrich School.

Electives

Any credits not used specifically to satisfy the previous requirements are considered electives. Electives can be taken in a wide variety of subjects to complement, reinforce, or add further breadth to the chosen program of study or to help meet the requirements of a minor or certificate program.

Health Services, BS

The Bachelor of Science in Health Services is an interdisciplinary degree completion program designed for allied health professionals who have already received their technical education and licensure in diagnostic medical sonography, radiological technology or respiratory therapy and for community college graduates who have already completed a designated allied health profession associate degree. The core of this flexible program provides students with communication and management skills as well as broadening students’ understanding of health-related issues.

Requirements

Students must earn a minimum of 120 credits to complete the Bachelor of Science degree with a major in health services. Of this total, the degree consists of 12 credits of required health services courses and up to 24 credits of professional courses, with the remainder consisting of general education courses and electives.
Note: Licensed diagnostic medical sonographers, radiological technologists, and respiratory therapists, or those who've earned an associate's degree in an approved allied health profession, will be awarded 24 professional education credits. Credits earned at other colleges or universities will be evaluated for transfer. Please check with an academic advisor for specifics related to your associate's degree program.

Health Service Courses: 12 credits

A minimum of 12 credits, or four courses, are required as follows:

A. Health Field: 6 credits

Students choose two courses from the following list:

- NUR 1765 - RISK FACTORS AND HEALTH
- PHIL 1360 - BIOMEDICAL ETHICS
- PSY 1215 - HEALTH PSYCHOLOGY
- SOC 0477 - MEDICAL SOCIOLOGY
- SOC 1450 - HEALTH AND ILLNESS

B. Administration/Management Field: 3 Credits

Students choose one course from the following list:

- BUSERV 1915 - INTRODUCTION TO MANAGEMENT
- HRS 1009 - ORGANIZATIONAL THEORY & BEHAVIOR or BUSORG 1020 - ORGANIZATIONAL BEHAVIOR or COMMRC 1102 - ORGANIZATIONAL COMMUNICATION or PSY 1635 ORGANIZATIONAL PSYCHOLOGY
- PUBSRV 1100 - PRACTICES IN PUBLIC ADMINISTRATION
- PUBSRV 1120 - HUMAN RESOURCES MANAGEMENT IN THE PUBLIC SECTOR
- PUBSRV 1200 - PRACTICES OF NON-PROFIT MANAGEMENT
- PUBSRV 1315 - MANAGING PROJECTS AND CONTRACTS

C. Related Field: 3 credits

Students choose one additional course from the Health Field or Administration/Management Field lists above or else from the list below:

- ANTH 1726 - GLOBAL PHARMACEUTICALS
- CGS 1900 - CHOOSING YOUR PATH: INTERNSHIP SEMINAR or PUBSRV 1900 - INTERNSHIP SEMINAR
- COMMRC 0530 - INTERPERSONAL COMMUNICATION
- COMMRC 1730 - SPECIAL TOPICS IN COMMUNICATION
- HIST 1706 - DRUGS IN GLOBAL HISTORY
- HRS 1006 - INTRO TO HUMAN NUTRITION
- PSY 1255 - PRINCIPLES OF BEHAVIOR MODIFICATION
- PSYED 1001 - INTRO EDUCATIONAL PSYCHOLOGY

Notes

Requirements are subject to change. Many courses are available in an online format. Check with an academic advisor for course availability and additional elective options before registering.

General Education Requirements
To earn a Bachelor of Arts or a Bachelor of Science degree in the College of General Studies, you must satisfactorily complete a minimum of 120 credits (approximately 40 courses), at least 30 credits of which must be in upper-division (1000-level) courses (or 24 credits if pursuing the Natural Sciences major). These 1000-level courses may come from any of the requirements for the degree listed below.

General Education Requirements (GERs) provide you with an opportunity to discover interests you never knew you had, all while earning credits toward graduation. And, no matter what your future holds, be it a career or grad school, GERs prepare you by emphasizing skills employers want (like critical thinking, problem solving, written and oral communication) and giving you the opportunity to become more aware of our increasingly diverse and interconnected world.

The College of General Studies provides a liberal arts and pre-professional education for undergraduate students that is grounded in scholarly excellence. Pitt offers you the knowledge, understanding, analytical tools, and communication skills you need to become perceptive, reflective, and intellectually self-conscious citizens within a diverse and rapidly changing world. GERs are at the core of our education.

Our General Education Requirements changed for students entering as of Fall 2018 (2191) term. See the CGS General Education Requirements for Fall 2018 and afterward here or visit the CGS General Education Requirements website.

Writing (9 credits)

Written communication is central to almost all disciplines and professions. Developing written proficiency is a lifelong process, and it is especially important that undergraduate education accelerates and directs that process toward the achievement of writing skills that will provide a base appropriate for professional or graduate education or for professional employment.

Introductory Composition Course (3 credits)

Students are required to take the college-level introductory composition course ENGCMP 0200 Seminar in Composition (SC). Students are exempted from this course if they earned a 660 on the SAT Evidence-Based Reading and Writing Section and a 5 on the Advanced Placement Exam. Given the importance of establishing a sound foundation for a student's writing, all students are required to pass SC with a grade of C- or better by the time they have completed 24 credits in enrollment. (Students who do not have a 560 on the SAT or a 24 or above on the ACT might also be required to take the skill-development course ENGCMP 0150 Workshop in Composition before enrolling in SC.)

Note for students transferring from the School of Engineering into CGS: successful completion of ENGR 0012 Intro to Engineering Computing may be used in place of ENGCMP 0200 Seminar in Composition.

Two Writing Intensive Courses (6 credits if not overlapped with other General Education requirements)

Writing intensive courses (W-Courses) are designed to teach writing within a discipline through writing assignments that are distributed across the entire term. In these courses, students will produce at least 20 - 24 pages of written work. A significant portion of this work should be substantially revised in response to instructor feedback and class discussion. All students must complete two courses that are designated as 'W-Courses', or one W-Course and a second English composition course. Students should satisfy one of these requirements by taking a W-Course in their major if it is available. Students may not transfer credits in to satisfy this requirement. W-courses can be overlapped with other General Education courses, except for Professional Communication.

Math/Algebra (3 credits)

Mastering college-level algebra is required for all students. These skills are foundational for student success in other general education courses.

Students are exempt from having to take Algebra with a 620 SAT Math or 27 ACT Math. Students who do not meet these criteria must earn a C- or higher in MATH 0020, MATH 0025, MATH 0031, CS 0004, or CS 0007. Given the importance of establishing a sound foundation in mathematics, all students are required to satisfy the Algebra requirement by the time they have completed 30 credits in enrollment.

Quantitative and Formal Reasoning (3 credits)

All students are required to take and pass with a grade of C- or better at least one course in university-level mathematics (other than trigonometry) for which algebra is a prerequisite, or an approved course in statistics or mathematical or formal logic.
A C- or better is needed in a course that satisfies this requirement. Students who qualify for placement in an upper-level course in mathematics on a proficiency placement test are exempt.

Diversity (3 credits)

Diversity courses focus centrally and intensively on issues of diversity, and do so in a manner that promotes understanding of difference. They provide students with analytical skills with which to understand structural inequities and the knowledge to be able to participate more effectively in our increasingly diverse and multicultural society. The courses may address, though not be limited to, such issues as race, gender, ethnicity, sexuality, religious difference, and/or economic disparity.

All students must complete one course that is designated as a Diversity course but may take this course within their major field of study, if available. Diversity courses may also be courses that fulfill other General Education Requirements. (3 credits if not overlapped with another General Education course)

Language/Communication (6-10 credits)

All students are required to take a sequence of two courses that provide them with advanced study of a second language other than English, or the ability to develop their skills in oral and professional communication. Students choose one of the following options below:

Option 1: A Sequence of Two Courses in a Second Language (6-10 credits)

Students complete with a grade of C- or better two terms of university-level study in a second language other than English. Exemptions will be granted to students who can demonstrate elementary proficiency in a second language through one of the following:

1. Having completed three years of high school study of a second language with a grade of B or better in each course;
2. Passing a special proficiency examination;
3. Transferring credits for two terms or more of approved university-level instruction in a second language with grades of C or better;
4. Having a native language other than English.

Option 2: A Sequence of Two Courses in Oral and Professional Communication (6 credits)

These classes advance the skills of the student to perform effectively in workplace environments or the public by communicating ideas and concepts and/or introduce students to theories that analyze and explain effective communication in these settings. Students must complete one of the following with a grade of C- or better: COMMRC 0520 or COMMRC 0500. Students select a second class from a list of approved courses.

Humanities and Arts, Social Sciences, and Natural Sciences (27 credits)

Each student is required to take nine courses in the humanities, social sciences, and natural sciences as distributed below. Such courses allow students to pursue their own interests while they explore diverse views of a broad range of human cultures, modes of thought, and bodies of knowledge. The courses that fulfill these requirements are truly courses in the disciplines that draw on the unique resources of a research university.

One course in Literature (3 credits)

By studying a range of literary and other texts in this course, students will be introduced to the techniques and methods of textual analysis and will develop critical perspectives on a variety of forms of cultural expression.

One course in the Arts (3 credits)

This course introduces students to modes of analysis appropriate to music, theater, or the visual and plastic arts. It may take the form of a survey, the study of a genre or period, or may focus on a particular artist.

One course in Creative Work (3 credits)

In this course, students are expected to produce some form of creative work, and they will also be trained in the techniques and modes of its production. The course could be situated in theater, studio arts, writing, visual arts (including photography, film), music, and dance; or it may be a course that engages in innovative or original work in relation to written, oral, or visual material, new media, social media, and other contemporary forms of communication and representation.

One course in Philosophical Thinking or Ethics (3 credits)
This course will emphasize close and critical reading of theories about knowledge, reality, humanity, and values. Courses could focus on human nature; scientific reasoning; theories of cognition and consciousness; human/social rights; competing systems of belief; morality; concepts of freedom; theories of justice; social obligations/constraints; or ethics, including applied or professional ethics.

**One course in Social Sciences (3 credits)**

A course that treats topics considered of significant importance in the social or behavioral sciences (including social psychology). Courses will introduce students to the subject matter and methodology of a particular discipline and will involve them in the modes of investigation, analysis, and judgment characteristically applied by practitioners.

**One course in Historical Analysis (3 credits)**

In this course, students will develop skills and methods by which to understand significant cultural, social, economic, or political accounts of the past. The course may focus on pivotal moments of change, or important transitions over longer periods of time. Courses could explore developments in science, technology, literature, or art, and the ideas around them, or examine critical historical shifts by analyzing various data or cultural forms.

**Three courses in the Natural Sciences (9 credits)**

These will be courses that introduce students to scientific principles and concepts rather than offering a simple codification of facts in a discipline or a history of a discipline. The courses may be interdisciplinary, and no more than two courses may have the same primary departmental sponsor.

**Global Awareness and Cultural Understanding (9 credits)**

Each student must complete three courses as distributed below:

**One course in Global Issues (3 credits)**

This course will examine significant issues that are global in scale. Courses could address, for example: globalization; the global and cultural impact of climate change/sustainability; the effects of and resistances to colonialism; or worldwide issues related to health, gender, ethnicity, race, technology, labor, law or the economy.

**One course in a Specific Geographic Region (3 credits)**

This course will be an in depth study and analysis of a particular region or locality outside the United States.

**One course in Cross-Cultural Awareness (3 credits)**

This course, through cross-cultural perspective, will promote knowledge of and reflection upon the cultures of Asia, the Middle East, Africa, Latin America, the Caribbean, or the indigenous peoples of the world past and present. Students will develop an understanding of cultures, traditions, and societies that differ substantially from those that prevail in North America and Europe.

**Overlapping of General Education Courses**

- Courses taken for general education requirements can also be applied to major requirements, when applicable.
- Diversity courses are allowed to overlap with other general education requirements.
- Writing ('W') courses are allowed to overlap with other general education requirements except for the Professional Communication requirement.
- Students may overlap the second course in their language sequence, taken at the college level, with the Geographic Region requirement, except for American Sign Language. This does not apply to students who satisfy the Language requirement through high school study, a proficiency examination, or native proficiency.

**Specialized Study (the Major) (30-36 credits)**

The baccalaureate degree, in addition to providing certain skills and broad exposure to the major bodies of knowledge, also allows the opportunity to specialize in a particular field, providing depth of experience essential for vocational competence or further graduate study. An outline of each major is available on the CGS Web site, www.cgs.pitt.edu.

Students admitted to CGS can choose from the following majors. Many majors offer a combination of face-to-face and online courses.
Students who want a major in an arts and sciences field can begin in CGS and transfer to the Dietrich School of Arts and Sciences after completing 12 credits including the mathematics and seminar in composition requirements. Admission is determined by the Dietrich School.

Electives

Any credits not used specifically to satisfy the previous requirements are considered electives. Electives can be taken in a wide variety of subjects to complement, reinforce, or add further breadth to the chosen program of study or to help meet the requirements of a minor or certificate program.

Humanities, BA

The CGS Humanities BA was phased out beginning Fall 2020 and is no longer accepting new students. Inactive students will be able to re-enroll in this major no later than Spring 2023. All students enrolled in the program must complete their degrees by Fall 2028.

Humanities is a liberal arts major with a focus on courses from three humanities departments. This major can be customized to meet your interests and personal or career goals. You will choose to concentrate in three areas from the list below and have the opportunity to take a variety of courses within those areas of study.

Humanities degree graduates have a variety of skills that make them attractive to prospective employers. Career fields pursued by humanities graduates include the following:

- Acting and drama
- College administration
- Event planning
- Human resources
- Politics
- Teaching
- Publishing
- Journalism
- Marketing and advertising
- Public relations
- Insurance
- Real estate
- Social work
- Occupational therapy
- Travel and tourism

Requirements

Students must earn a minimum of 120 credits for the Bachelor of Arts degree with a major in humanities. Of this total, students must take a minimum of 36 credits (approximately 12 courses) according to the specifications below. The remaining credits required for the degree are outlined in the General Education Requirements section on this page.

Standard Option
Choose a minimum of 36 credits (approximately 12 courses) from any three departments/programs below. All courses taken must be humanities related.

- Africana Studies (courses must be humanities related)
- Classics
- Communication
- English Composition (0300 and above)
- Film Studies
- English Literature
- English Writing
- Foreign language departments (literature and culture courses)
- History of Art and Architecture
- Music
- Philosophy
- Religious Studies (courses must be humanities related)
- Studio Arts
- Theatre Arts

Notes

- At least five courses must be taken from one department, and at least three courses must be taken from each of the two other departments.
- At least half of the courses taken for the major must be upper-division (1000-level) courses.
- All courses selected for the humanities major must be approved by an academic advisor.

Requirements are subject to change. Check with an academic advisor before registering.

An internship program is available through the College of General Studies. Please see an advisor for additional information.

Pre-Education Option

The College of General Studies and the Pitt School of Education have collaborated on a curriculum within the humanities major that incorporates all of the prerequisite course work needed for admission into the certificate program in comprehensive English education. This option may be used by students interested in the Master of Arts in Teaching (MAT) or Professional Year (PY) programs offered in the School of Education. Completion of the prerequisites for the School of Education does not guarantee acceptance to its programs.

Students pursuing this track take a wide variety of English courses in literature, writing/composition, and literary/film/media theory, in addition to a required foundations course in special education, for a total of 36 credits (approximately 12 courses). At least half of these courses must be at the 1000 level.

Students are also encouraged to participate in an internship during their degree program and may fulfill some CGS general education and major requirements by completing a study abroad program. See a CGS advisor for more information.

General Education Requirements

To earn a Bachelor of Arts or a Bachelor of Science degree in the College of General Studies, you must satisfactorily complete a minimum of 120 credits (approximately 40 courses), at least 30 credits of which must be in upper-division (1000-level) courses (or 24 credits if pursuing the Natural Sciences major). These 1000-level courses may come from any of the requirements for the degree listed below.

General Education Requirements (GERs) provide you with an opportunity to discover interests you never knew you had, all while earning credits toward graduation. And, no matter what your future holds, be it a career or grad school, GERs prepare you by emphasizing skills employers want (like critical thinking, problem solving, written and oral communication) and giving you the opportunity to become more aware of our increasingly diverse and interconnected world.

The College of General Studies provides a liberal arts and pre-professional education for undergraduate students that is grounded in scholarly excellence. Pitt offers you the knowledge, understanding, analytical tools, and communication skills you need to become perceptive, reflective, and intellectually self-conscious citizens within a diverse and rapidly changing world. GERs are at the core of our education.
Our General Education Requirements changed for students entering as of Fall 2018 (2191) term. See the CGS General Education Requirements for Fall 2018 and afterward here or visit the CGS General Education Requirements website.

Writing (9 credits)

Written communication is central to almost all disciplines and professions. Developing written proficiency is a lifelong process, and it is especially important that undergraduate education accelerates and directs that process toward the achievement of writing skills that will provide a base appropriate for professional or graduate education or for professional employment.

Introductory Composition Course (3 credits)

Students are required to take the college-level introductory composition course ENGCMP 0200 Seminar in Composition (SC). Students are exempted from this course if they earned a 660 on the SAT Evidence-Based Reading and Writing Section and a 5 on the Advanced Placement Exam. Given the importance of establishing a sound foundation for a student's writing, all students are required to pass SC with a grade of C- or better by the time they have completed 24 credits in enrollment. (Students who do not have a 560 on the SAT or a 24 or above on the ACT might also be required to take the skill-development course ENGCMP 0150 Workshop in Composition before enrolling in SC.)

Note for students transferring from the School of Engineering into CGS: successful completion of ENGR 0012 Intro to Engineering Computing may be used in place of ENGCMP 0200 Seminar in Composition.

Two Writing Intensive Courses (6 credits if not overlapped with other General Education requirements)

Writing intensive courses (W-Courses) are designed to teach writing within a discipline through writing assignments that are distributed across the entire term. In these courses, students will produce at least 20 - 24 pages of written work. A significant portion of this work should be substantially revised in response to instructor feedback and class discussion. All students must complete two courses that are designated as 'W-Courses', or one W-Course and a second English composition course. Students should satisfy one of these requirements by taking a W-Course in their major if it is available. Students may not transfer credits in to satisfy this requirement. W-courses can be overlapped with other General Education courses, except for Professional Communication.

Math/Algebra (3 credits)

Mastering college-level algebra is required for all students. These skills are foundational for student success in other general education courses.

Students are exempt from having to take Algebra with a 620 SAT Math or 27 ACT Math. Students who do not meet these criteria must earn a C- or higher in MATH 0020, MATH 0025, MATH 0031, CS 0004, or CS 0007. Given the importance of establishing a sound foundation in mathematics, all students are required to satisfy the Algebra requirement by the time they have completed 30 credits in enrollment.

Quantitative and Formal Reasoning (3 credits)

All students are required to take and pass with a grade of C- or better at least one course in university-level mathematics (other than trigonometry) for which algebra is a prerequisite, or an approved course in statistics or mathematical or formal logic.

A C- or better is needed in a course that satisfies this requirement. Students who qualify for placement in an upper-level course in mathematics on a proficiency placement test are exempt.

Diversity (3 credits)

Diversity courses focus centrally and intensively on issues of diversity, and do so in a manner that promotes understanding of difference. They provide students with analytical skills with which to understand structural inequities and the knowledge to be able to participate more effectively in our increasingly diverse and multicultural society. The courses may address, though not be limited to, such issues as race, gender, ethnicity, sexuality, religious difference, and/or economic disparity.
All students must complete one course that is designated as a Diversity course but may take this course within their major field of study, if available. Diversity courses may also be courses that fulfill other General Education Requirements. (3 credits if not overlapped with another General Education course)

Language/Communication (6-10 credits)

All students are required to take a sequence of two courses that provide them with advanced study of a second language other than English, or the ability to develop their skills in oral and professional communication. Students choose one of the following options below:

Option 1: A Sequence of Two Courses in a Second Language (6-10 credits)

Students complete with a grade of C- or better two terms of university-level study in a second language other than English. Exemptions will be granted to students who can demonstrate elementary proficiency in a second language through one of the following:

1. Having completed three years of high school study of a second language with a grade of B or better in each course;
2. Passing a special proficiency examination;
3. Transferring credits for two terms or more of approved university-level instruction in a second language with grades of C or better;
4. Having a native language other than English.

Option 2: A Sequence of Two Courses in Oral and Professional Communication (6 credits)

These classes advance the skills of the student to perform effectively in workplace environments or the public by communicating ideas and concepts and/or introduce students to theories that analyze and explain effective communication in these settings. Students must complete one of the following with a grade of C- or better: COMMRC 0520 or COMMRC 0500. Students select a second class from a list of approved courses.

Humanities and Arts, Social Sciences, and Natural Sciences (27 credits)

Each student is required to take nine courses in the humanities, social sciences, and natural sciences as distributed below. Such courses allow students to pursue their own interests while they explore diverse views of a broad range of human cultures, modes of thought, and bodies of knowledge. The courses that fulfill these requirements are truly courses in the disciplines that draw on the unique resources of a research university.

One course in Literature (3 credits)

By studying a range of literary and other texts in this course, students will be introduced to the techniques and methods of textual analysis and will develop critical perspectives on a variety of forms of cultural expression.

One course in the Arts (3 credits)

This course introduces students to modes of analysis appropriate to music, theater, or the visual and plastic arts. It may take the form of a survey, the study of a genre or period, or may focus on a particular artist.

One course in Creative Work (3 credits)

In this course, students are expected to produce some form of creative work, and they will also be trained in the techniques and modes of its production. The course could be situated in theater, studio arts, writing, visual arts (including photography, film), music, and dance; or it may be a course that engages in innovative or original work in relation to written, oral, or visual material, new media, social media, and other contemporary forms of communication and representation.

One course in Philosophical Thinking or Ethics (3 credits)

This course will emphasize close and critical reading of theories about knowledge, reality, humanity, and values. Courses could focus on human nature; scientific reasoning; theories of cognition and consciousness; human/social rights; competing systems of belief; morality; concepts of freedom; theories of justice; social obligations/constraints; or ethics, including applied or professional ethics.

One course in Social Sciences (3 credits)

A course that treats topics considered of significant importance in the social or behavioral sciences (including social psychology). Courses will introduce students to the subject matter and methodology of a particular discipline and will involve them in the modes of investigation, analysis, and judgment characteristically applied by practitioners.
One course in Historical Analysis (3 credits)

In this course, students will develop skills and methods by which to understand significant cultural, social, economic, or political accounts of the past. The course may focus on pivotal moments of change, or important transitions over longer periods of time. Courses could explore developments in science, technology, literature, or art, and the ideas around them, or examine critical historical shifts by analyzing various data or cultural forms.

Three courses in the Natural Sciences (9 credits)

These will be courses that introduce students to scientific principles and concepts rather than offering a simple codification of facts in a discipline or a history of a discipline. The courses may be interdisciplinary, and no more than two courses may have the same primary departmental sponsor.

Global Awareness and Cultural Understanding (9 credits)

Each student must complete three courses as distributed below:

One course in Global Issues (3 credits)

This course will examine significant issues that are global in scale. Courses could address, for example: globalization; the global and cultural impact of climate change/sustainability; the effects of and resistances to colonialism; or worldwide issues related to health, gender, ethnicity, race, technology, labor, law or the economy.

One course in a Specific Geographic Region (3 credits)

This course will be an in depth study and analysis of a particular region or locality outside the United States.

One course in Cross-Cultural Awareness (3 credits)

This course, through cross-cultural perspective, will promote knowledge of and reflection upon the cultures of Asia, the Middle East, Africa, Latin America, the Caribbean, or the indigenous peoples of the world past and present. Students will develop an understanding of cultures, traditions, and societies that differ substantially from those that prevail in North America and Europe.

Overlapping of General Education Courses

- Courses taken for general education requirements can also be applied to major requirements, when applicable.
- Diversity courses are allowed to overlap with other general education requirements.
- Writing ('W') courses are allowed to overlap with other general education requirements except for the Professional Communication requirement.
- Students may overlap the second course in their language sequence, taken at the college level, with the Geographic Region requirement, except for American Sign Language. This does not apply to students who satisfy the Language requirement through high school study, a proficiency examination, or native proficiency.

Specialized Study (the Major) (30-36 credits)

The baccalaureate degree, in addition to providing certain skills and broad exposure to the major bodies of knowledge, also allows the opportunity to specialize in a particular field, providing depth of experience essential for vocational competence or further graduate study. An outline of each major is available on the CGS Web site, www.cgs.pitt.edu.

Students admitted to CGS can choose from the following majors. Many majors offer a combination of face-to-face and online courses.

- Administration of justice
- Dental hygiene (for licensed dental hygienists)
- Health services (BA and BS)
- Humanities
- Legal studies
- Media and professional communications
- Natural sciences
Students who want a major in an arts and sciences field can begin in CGS and transfer to the Dietrich School of Arts and Sciences after completing 12 credits including the mathematics and seminar in composition requirements. Admission is determined by the Dietrich School.

Electives

Any credits not used specifically to satisfy the previous requirements are considered electives. Electives can be taken in a wide variety of subjects to complement, reinforce, or add further breadth to the chosen program of study or to help meet the requirements of a minor or certificate program.

Law, Criminal Justice, and Society, BA

Law, Criminal Justice, and Society

Are you considering law school or graduate study in the social sciences after Pitt? Are you interested in pursuing a career in one of the many criminal justice professions or advocacy organizations? The Law, Criminal Justice, and Society (LCJS) major examines the workings of the criminal justice system in the broader context of society and the legal system. A core curriculum fosters comprehension and critical analysis of the legal system, criminological theory, criminal justice institutions, criminal law, and social inequality. Students also will complete six credits of professional skills and a capstone course on ethics in criminal justice. The LCJS major equips students with the knowledge and skills they need to pursue advanced degrees in law and social science, and to succeed as professionals and advocates in the justice-oriented professions and organizations that serve American society's diverse and dynamic communities. This major is offered jointly between the Dietrich School and the College of General Studies.

Students completing this major will:

- examine the major institutions of the criminal justice system, and situate the workings of these institutions in a broader legal, social, and historical context;
- develop knowledge and legal reasoning skills in criminal law;
- examine the law's conflicting role in securing social order and security, on the one hand, and in creating and reinforcing social inequality on the other; and,
- develop basic professional knowledge and demonstrate ethical reasoning in preparation for being positive and successful contributors to law and justice-oriented career fields as professionals and/or public policy advocates.

This major requires 36 credits for completion, which are distributed as follows.

- Foundations - 6 credits
- Core areas - 15 credits
- Electives - 6 credits
- Professional skills - 6 credits
- Capstone - 3 credits

Except as noted, all courses are 3-credit courses.

Foundations

Both of the following courses are required.

- LCJS 0100 - INTRODUCTION TO LAW, CRIMINAL JUSTICE, & SOCIETY
- LCJS 0200 - RACE, CLASS, GENDER, & THE LAW

Core

Select courses according to the guidelines stated. Course selections must comprise a total of at least 15 credits.

Theories of Crime
Choose one of the following courses.

- LCJS 1100 - CRIMINOLOGY
- LCJS 1110 - CRIMINOLOGICAL THEORY

Criminal Law

Select one of the following courses.

- LCJS 1200 - CRIMINAL LAW or
- LEGLST 1140 - INTRODUCTION TO CRIMINAL LAW

- LCJS 1210 - CRIMINAL PROCEDURE or
- LEGLST 1141 - INTRODUCTION TO CRIMINAL PROCEDURE

Power, Inequality, and Social Change

Select two of the following courses.

- LCJS 1300 - Law and Politics or
- LCJS 1300 - LAW AND POLITICS or
- PS 1213 - LAW AND POLITICS

- LCJS 1310 - LAW AND DEVIANCE or
- ADMJ 1220 - Law and Deviance or
- SOC 0471 - DEVIANCE AND SOCIAL CONTROL

- LCJS 1320 - CIVIL RIGHTS LAW or
- LEGLST 1340 - Civil Rights or
- PS 1201 - CONSTITUTION AND CIVIL LIBERTIES

- LCJS 1330 - EMERGING ISSUES IN LEGAL AND SOCIAL POLICY or
- LEGLST 1355 - Emerging Issues in Legal and Social Policy

- LCJS 1340 - LAW AND SOCIAL CHANGE
- LEGLST 1155 - Law and Social Change

- AFRCNA 1522 - SEX AND RACISM
- AFRCNA 1535 - DIMENSIONS OF RACISM
- HIST 0671 - AFRICAN AMERICAN HISTORY SINCE 1865
- HIST 1632 - THE HISTORY OF THE CIVIL RIGHTS MOVEMENT
- SOC 0432 - WEALTH AND POWER
- SOC 0434 - POLITICAL SOCIOLOGY
- URBNST 0112 Social Justice and the City

Criminal Justice Institutions

Select one of the following courses.

- LCJS 1400 - THE SYSTEM OF CRIMINAL JUSTICE

- LCJS 1430 - THE JUVENILE JUSTICE PROCESS or
- ADMJ 1225 - The Juvenile Justice Process
Elective courses

Select two courses from list A or one course from each list A and list B. Please keep in mind that course selections must comprise a total of at least 6 credits.

List A

- LCJS 1500 - CRIMINALISTICS
- LCJS 1501 - CRIMINALISTICS LAB
- LCJS 1510 - PSYCHOLOGY AND LAW
- LCJS 1520 - CYBERCRIME
- LCJS 1521 - CYBER SECURITY, LAW, AND MONEY LAUNDERING
- LCJS 1530 - ORGANIZED CRIME
- LCJS 1531 - INTERNATIONAL ORGANIZED CRIME
- LCJS 1540 - WHITE COLLAR CRIME
- LCJS 1550 - GENDER, RACE, CLASS AND CRIMINAL JUSTICE
- LCJS 1560 - PROBATION AND PAROLE
- LCJS 1570 - Principles of Homeland Security
- LCJS 1571 - TERRORISM
- LCJS 1572 - INTRODUCTION POLICE MANAGEMENT
- LCJS 1580 - THE LEGAL SYSTEM
- LCJS 1581 - INTERNATIONAL LAW
- LCJS 1582 - PUBLIC LAW AND MORAL REASONING
- LCJS 1583 - SEX, LAW AND MARRIAGE
- LCJS 1584 - Legal Issues in Public Service
- LCJS 1586 - CONSUMER LAW
- LCJS 1590 - SPECIAL TOPICS IN LAW AND CRIMINAL JUSTICE
- LCSJ 1599 - Independent Study
- Any LCJS course not used to fulfill any other major requirement.
  - Any Pitt Prison Education Project (PPEP) course; offerings will vary.

List B

- ENGLIT 0365 - IMAGINING SOCIAL JUSTICE
- HIST 0600 - UNITED STATES TO 1877
- HIST 0601 - UNITED STATES 1865-PRESENT
- HIST 0663 - 20THC AFRICAN AMERICAN WOMEN'S HISTORY
- HIST 0670 - AFRICAN AMERICAN HISTORY TO 1877
- HIST 1062 - HUMAN RIGHTS IN WORLD HISTORY
- HIST 1640 - AMERICA CHILDHOODS: RACE, GENDER, AND CITIZENSHIP, 1865-PRESENT
- HIST 1669 - HISTORY OF BLACK PITTSBURGH
- PS 1261 - AMERICAN PUBLIC POLICY
- PS 1675 - POLITICS OF HUMAN RIGHTS
- PSY 0205 - PSYCHOPATHOLOGY
- PUBSRV 1305 - HEALTH, LAW AND ETHICS
- PUBSRV 1455 - LAW, ETHICS AND PUBLIC POLICY IN THE MASS MEDIA
- URBNST 0010 - INTRODUCTION TO URBAN STUDIES
- Any non-LCJS course not used to fulfill any other major requirement.

Professional Skills

Select at least one course from each category. Course selections must comprise a total of at least 6 credits.

Research or Practical Skills

- ENGCMP 0450 - RESEARCH WRITING
- LCJS 1600 - Pre-Service Internship * * This course can be taken for up to six credits; credits four through six can be applied to the Elective List A requirement.
- LCJS 1610 - Data Analysis in Criminal Justice
- LCJS 1620 - INTRODUCTION TO LEGAL RESEARCH
- PS 0700 - RESEARCH METHODS IN POLITICAL SCIENCE
- PSY 0036 - RESEARCH METHODS LECTURE
- SOC 0230 - SOCIAL RESEARCH METHODS
- URBNST 0030 - INTRODUCTION TO GIS
- URBNST 0130 - APPLIED GIS

Professional or Public-Oriented Writing

- ENGCMP 0401 - WRITTEN PROFESSIONAL COMMUNICATION: TOPICS IN DIVERSITY
- ENGCMP 0410 - WRITING IN THE LEGAL PROFESSIONS
- ENGCMP 0420 - WRITING FOR THE PUBLIC
- ENGCMP 0521 - WRITING WITH DATA
- ENGCMP 0560 - WRITING ARGUMENTS
- ENGCMP 0641 - WRITING FOR CHANGE
- ENGCMP 1099 - THE LANGUAGE OF POLICY AND POWER: TOPICS IN DIVERSITY
- ENGCMP 1400 - GRANT WRITING FOR NONPROFITS

Capstone

- LCJS 1700 - ETHICS IN CRIMINAL JUSTICE

Writing course

Students must complete at least one W-course in the major. LCJS 1700 - ETHICS IN CRIMINAL JUSTICE will fulfill this requirement.

Additional information

**Grade Requirements**
A minimum GPA of 2.0 in courses for the LCJS major is required for graduation.

**Satisfactory/No Credit option**

Students may apply up to six credits of coursework taken on an S/NC basis to the LCJS major. Student may apply up to nine credits if three of those credits are earned as part of a Study Abroad course that applies toward the major.

**Transfer credits for Police Academy Certification**

Students may receive up to 15 transfer credits for completion of Pennsylvania Municipal Police Academy Act 120 or state police cadet training. Certification course work is equivalent to the Core Area requirements for Criminal Law (3 credits) and Criminal Justice Institutions (3 credits); two major electives (6 credits); and LCJS 1600 Pre-Service internship, which fulfills the Research/Practical Skills Course (3 credits) requirement in the Professional Skills area.

**Legal Studies, BA**

In Spring 2021, the Legal Studies, BA was officially terminated. The last semester students will be permitted to declare the existing Administration of Justice and Legal Studies majors will be Fall 2021. This will provide current students who were intending to declare the major the opportunity to do so. The majors will be inactivated at the end of August 2028 in which all current active and inactive students enrolled in these programs will have until August 2028 to complete their degree.

The Legal Studies major is an interdisciplinary course of study that combines the theories and methods of several social science disciplines and law. While not designed as a prelaw program, the major seeks to develop an understanding of the nature, content, and operation of American law and legal institutions.

**Career Opportunities**

Courses in legal studies provide a background for graduate work in administration of justice, business, legal studies, and law as well as work in law-related fields like insurance, social security, and social services. The courses help prepare students for careers in the following settings:

- banking
- children's rights
- civil liberties organizations
- collective bargaining/labor relations
- corporate sales divisions
- credit-related agencies
- judicial administration
- legal research
- human resources
- planning commissions
- privacy protection
- public government aid/legislation
Major Requirements

Students must earn a minimum of 120 credits for the Bachelor of Arts degree with a major in legal studies. Of this total, 30 credits make up the major, which is satisfied by taking courses to complete the core requirements, legal studies electives, and outside electives. Below is an outline of these major course requirements. The remaining credits required for the degree are outlined in the General Education Requirements section on this page. Some legal studies courses fulfill the College of General Studies social sciences curriculum requirements. See the current time schedule of classes for specific information.

Core Requirements: 6 credits (two courses)

- LCJS 1580 - THE LEGAL SYSTEM
  Choose one of the following:
  - LCJS 1300 - LAW AND POLITICS or
  - PS 1213 - LAW AND POLITICS (Political Science)

Legal Studies Electives: 18 credits (choose six courses)

- LCJS 1430 - THE JUVENILE JUSTICE PROCESS
- LCJS 1900 - PRESERVICE INTERNSHIP
- LCJS 1582 - PUBLIC LAW AND MORAL REASONING
- LCJS 0200 - RACE, CLASS, GENDER, & THE LAW
- LEGLST 1140 - INTRODUCTION TO CRIMINAL LAW
- LEGLST 1141 - INTRODUCTION TO CRIMINAL PROCEDURE
- LEGLST 1150 - LAWYERS AND LEGAL PROFESSION
- LCJS 1584 - LEGAL ISSUES IN PUBLIC SERVICE
- LCJS 1340 - LAW AND SOCIAL CHANGE
- LCJS 1510 - PSYCHOLOGY AND LAW
- LEGLST 1260 - LAW, LITERATURE, AND CINEMA
- LCJS 1583 - SEX, LAW AND MARRIAGE
- LEGLST 1318 - SEPARATION, DIVORCE AND CUSTODY
- LEGLST 1320 - LAW AND ENVIRONMENT
- LCJS 1586 - CONSUMER LAW
- LCJS 1581 - INTERNATIONAL LAW
- LCJS 1320 - CIVIL RIGHTS LAW
- LCJS 1330 - EMERGING ISSUES IN LEGAL AND SOCIAL POLICY
- LCJS 1620 - INTRODUCTION TO LEGAL RESEARCH
- LEGLST 1901 - INDEPENDENT STUDY

Outside Electives: 6 credits (choose two courses)

The final degree requirement is completion of 6 credits (two courses) from a list of approved electives outside legal studies. The following represents approved elective courses from various disciplines:

Administration of Justice

- LCJS 0100 - INTRODUCTION TO LAW, CRIMINAL JUSTICE, & SOCIETY
- LCJS 1400 - THE SYSTEM OF CRIMINAL JUSTICE
- LCJS 1310 - LAW AND DEVIANCE
- LCJS 1521 - CYBER SECURITY, LAW, AND MONEY LAUNDERING
- LCJS 1590 - SPECIAL TOPICS IN LAW AND CRIMINAL JUSTICE

Communication

- COMMRC 1114 - FREEDOM OF SPEECH AND PRESS

English Composition

- ENGCMP 0410 - WRITING IN THE LEGAL PROFESSIONS

History

- HIST 1062 - HUMAN RIGHTS IN WORLD HISTORY
- HIST 1190 - MEDIEVAL GOVERNMENT AND SOCIETY
- HIST 1191 - ENGLISH ORIGINS OF AMERICAN LAW

Political Science

- PS 1201 - CONSTITUTION AND CIVIL LIBERTIES
- PS 1202 - AMERICAN CONSTITUTIONAL LAW
- PS 1211 - LEGISLATIVE PROCESS
- PS 1261 - AMERICAN PUBLIC POLICY
- PS 1614 - THEORIES OF JUSTICE (Honors)
- PS 1675 - POLITICS OF HUMAN RIGHTS

Psychology

- PSY 0182 - LAW AND SOCIAL PSYCHOLOGY

Public Service

- PUBSRV 1305 - HEALTH, LAW AND ETHICS
- PUBSRV 1455 - LAW, ETHICS AND PUBLIC POLICY IN THE MASS MEDIA

Sociology

- SOC 0471 - DEVIANCE AND SOCIAL CONTROL

Urban Studies

- URBNST 0140 - CRIME, PUNISHMENT, JUSTICE, REINTEGRATION
- URBNST 0112 - SOCIAL JUSTICE AND THE CITY

Pitt Prison Education Project Courses

- Any Pitt Prison Education Project (PEEP) course (codes vary)
Notes

Students interested in a minor, rather than a major, in legal studies should check with their academic advisor.

Requirements are subject to change. Check with an academic advisor before registering.

General Education Requirements

To earn a Bachelor of Arts or a Bachelor of Science degree in the College of General Studies, you must satisfactorily complete a minimum of 120 credits (approximately 40 courses), at least 30 credits of which must be in upper-division (1000-level) courses (or 24 credits if pursuing the Natural Sciences major). These 1000-level courses may come from any of the requirements for the degree listed below.

General Education Requirements (GERs) provide you with an opportunity to discover interests you never knew you had, all while earning credits toward graduation. And, no matter what your future holds, be it a career or grad school, GERs prepare you by emphasizing skills employers want (like critical thinking, problem solving, written and oral communication) and giving you the opportunity to become more aware of our increasingly diverse and interconnected world.

The College of General Studies provides a liberal arts and pre-professional education for undergraduate students that is grounded in scholarly excellence. Pitt offers you the knowledge, understanding, analytical tools, and communication skills you need to become perceptive, reflective, and intellectually self-conscious citizens within a diverse and rapidly changing world. GERs are at the core of our education.

Our General Education Requirements changed for students entering as of Fall 2018 (2191) term. See the CGS General Education Requirements for Fall 2018 and afterward here or visit the CGS General Education Requirements website.

Writing (9 credits)

Written communication is central to almost all disciplines and professions. Developing written proficiency is a lifelong process, and it is especially important that undergraduate education accelerates and directs that process toward the achievement of writing skills that will provide a base appropriate for professional or graduate education or for professional employment.

Introductory Composition Course (3 credits)

Students are required to take the college-level introductory composition course ENGCMP 0200 Seminar in Composition (SC). Students are exempted from this course if they earned a 660 on the SAT Evidence-Based Reading and Writing Section and a 5 on the Advanced Placement Exam. Given the importance of establishing a sound foundation for a student's writing, all students are required to pass SC with a grade of C- or better by the time they have completed 24 credits in enrollment. (Students who do not have a 560 on the SAT or a 24 or above on the ACT might also be required to take the skill-development course ENGCMP 0150 Workshop in Composition before enrolling in SC.)

Note for students transferring from the School of Engineering into CGS: successful completion of ENGR 0012 Intro to Engineering Computing may be used in place of ENGCMP 0200 Seminar in Composition.

Two Writing Intensive Courses (6 credits if not overlapped with other General Education requirements)

Writing intensive courses (W-Courses) are designed to teach writing within a discipline through writing assignments that are distributed across the entire term. In these courses, students will produce at least 20 - 24 pages of written work. A significant portion of this work should be substantially revised in response to instructor feedback and class discussion. All students must complete two courses that are designated as 'W-Courses', or one W-Course and a second English composition course. Students should satisfy one of these requirements by taking a W-Course in their major if it is available. Students may not transfer credits in to satisfy this requirement. W-courses can be overlapped with other General Education courses, except for Professional Communication.

Math/Algebra (3 credits)

Mastering college-level algebra is required for all students. These skills are foundational for student success in other general education courses.
Students are exempt from having to take Algebra with a 620 SAT Math or 27 ACT Math. Students who do not meet these criteria must earn a C- or higher in MATH 0020, MATH 0025, MATH 0031, CS 0004, or CS 0007. Given the importance of establishing a sound foundation in mathematics, all students are required to satisfy the Algebra requirement by the time they have completed 30 credits in enrollment.

Quantitative and Formal Reasoning (3 credits)

All students are required to take and pass with a grade of C- or better at least one course in university-level mathematics (other than trigonometry) for which algebra is a prerequisite, or an approved course in statistics or mathematical or formal logic.

A C- or better is needed in a course that satisfies this requirement. Students who qualify for placement in an upper-level course in mathematics on a proficiency placement test are exempt.

Diversity (3 credits)

Diversity courses focus centrally and intensively on issues of diversity, and do so in a manner that promotes understanding of difference. They provide students with analytical skills with which to understand structural inequities and the knowledge to be able to participate more effectively in our increasingly diverse and multicultural society. The courses may address, though not be limited to, such issues as race, gender, ethnicity, sexuality, religious difference, and/or economic disparity.

All students must complete one course that is designated as a Diversity course but may take this course within their major field of study, if available. Diversity courses may also be courses that fulfill other General Education Requirements. (3 credits if not overlapped with another General Education course)

Language/Communication (6-10 credits)

All students are required to take a sequence of two courses that provide them with advanced study of a second language other than English, or the ability to develop their skills in oral and professional communication. Students choose one of the following options below:

Option 1: A Sequence of Two Courses in a Second Language (6-10 credits)

Students complete with a grade of C- or better two terms of university-level study in a second language other than English. Exemptions will be granted to students who can demonstrate elementary proficiency in a second language through one of the following:

1. Having completed three years of high school study of a second language with a grade of B or better in each course;
2. Passing a special proficiency examination;
3. Transferring credits for two terms or more of approved university-level instruction in a second language with grades of C or better;
4. Having a native language other than English.

Option 2: A Sequence of Two Courses in Oral and Professional Communication (6 credits)

These classes advance the skills of the student to perform effectively in workplace environments or the public by communicating ideas and concepts and/or introduce students to theories that analyze and explain effective communication in these settings. Students must complete one of the following with a grade of C- or better: COMMRC 0520 or COMMRC 0500. Students select a second class from a list of approved courses.

Humanities and Arts, Social Sciences, and Natural Sciences (27 credits)

Each student is required to take nine courses in the humanities, social sciences, and natural sciences as distributed below. Such courses allow students to pursue their own interests while they explore diverse views of a broad range of human cultures, modes of thought, and bodies of knowledge. The courses that fulfill these requirements are truly courses in the disciplines that draw on the unique resources of a research university.

One course in Literature (3 credits)

By studying a range of literary and other texts in this course, students will be introduced to the techniques and methods of textual analysis and will develop critical perspectives on a variety of forms of cultural expression.

One course in the Arts (3 credits)
This course introduces students to modes of analysis appropriate to music, theater, or the visual and plastic arts. It may take the form of a survey, the study of a genre or period, or may focus on a particular artist.

**One course in Creative Work (3 credits)**

In this course, students are expected to produce some form of creative work, and they will also be trained in the techniques and modes of its production. The course could be situated in theater, studio arts, writing, visual arts (including photography, film), music, and dance; or it may be a course that engages in innovative or original work in relation to written, oral, or visual material, new media, social media, and other contemporary forms of communication and representation.

**One course in Philosophical Thinking or Ethics (3 credits)**

This course will emphasize close and critical reading of theories about knowledge, reality, humanity, and values. Courses could focus on human nature; scientific reasoning; theories of cognition and consciousness; human/social rights; competing systems of belief; morality; concepts of freedom; theories of justice; social obligations/constraints; or ethics, including applied or professional ethics.

**One course in Social Sciences (3 credits)**

A course that treats topics considered of significant importance in the social or behavioral sciences (including social psychology). Courses will introduce students to the subject matter and methodology of a particular discipline and will involve them in the modes of investigation, analysis, and judgment characteristically applied by practitioners.

**One course in Historical Analysis (3 credits)**

In this course, students will develop skills and methods by which to understand significant cultural, social, economic, or political accounts of the past. The course may focus on pivotal moments of change, or important transitions over longer periods of time. Courses could explore developments in science, technology, literature, or art, and the ideas around them, or examine critical historical shifts by analyzing various data or cultural forms.

**Three courses in the Natural Sciences (9 credits)**

These will be courses that introduce students to scientific principles and concepts rather than offering a simple codification of facts in a discipline or a history of a discipline. The courses may be interdisciplinary, and no more than two courses may have the same primary departmental sponsor.

**Global Awareness and Cultural Understanding (9 credits)**

Each student must complete three courses as distributed below:

**One course in Global Issues (3 credits)**

This course will examine significant issues that are global in scale. Courses could address, for example: globalization; the global and cultural impact of climate change/sustainability; the effects of and resistances to colonialism; or worldwide issues related to health, gender, ethnicity, race, technology, labor, law or the economy.

**One course in a Specific Geographic Region (3 credits)**

This course will be an in depth study and analysis of a particular region or locality outside the United States.

**One course in Cross-Cultural Awareness (3 credits)**

This course, through cross-cultural perspective, will promote knowledge of and reflection upon the cultures of Asia, the Middle East, Africa, Latin America, the Caribbean, or the indigenous peoples of the world past and present. Students will develop an understanding of cultures, traditions, and societies that differ substantially from those that prevail in North America and Europe.

**Overlapping of General Education Courses**

- Courses taken for general education requirements can also be applied to major requirements, when applicable.
- Diversity courses are allowed to overlap with other general education requirements.
- Writing (W) courses are allowed to overlap with other general education requirements except for the Professional Communication requirement.
• Students may overlap the second course in their language sequence, taken at the college level, with the Geographic Region requirement, except for American Sign Language. This does not apply to students who satisfy the Language requirement through high school study, a proficiency examination, or native proficiency.

Specialized Study (the Major) (30-36 credits)

The baccalaureate degree, in addition to providing certain skills and broad exposure to the major bodies of knowledge, also allows the opportunity to specialize in a particular field, providing depth of experience essential for vocational competence or further graduate study. An outline of each major is available on the CGS Web site, www.cgs.pitt.edu.

Students admitted to CGS can choose from the following majors. Many majors offer a combination of face-to-face and online courses.

- Administration of justice
- Dental hygiene (for licensed dental hygienists)
- Health services (BA and BS)
- Humanities
- Legal studies
- Media and professional communications
- Natural sciences
- Public service
- Social sciences

Students who want a major in an arts and sciences field can begin in CGS and transfer to the Dietrich School of Arts and Sciences after completing 12 credits including the mathematics and seminar in composition requirements. Admission is determined by the Dietrich School.

Electives

Any credits not used specifically to satisfy the previous requirements are considered electives. Electives can be taken in a wide variety of subjects to complement, reinforce, or add further breadth to the chosen program of study or to help meet the requirements of a minor or certificate program.

Media and Professional Communications, BA

This major provides students with a rigorous education in the theories of mass media process, history, and ethics as well as the opportunity to specialize in one of three professional practice areas: corporate and community relations, writing for the professions, or digital media.

The three tracks are designed to strengthen both the knowledge base and proficiencies of students pursuing careers in communication fields, such as print, television, radio, film, new media, and corporate and organizational communications. This program also will benefit students pursuing careers in a variety of industries in which communication with internal and external audiences is critical. Learn more about our featured internship opportunity with Pitt Panther TV, and other internship opportunities, today.

Major Requirements

Students must earn a minimum of 120 credits for the Bachelor of Arts degree with a major in media and professional communications. Of this total, the major consists of 12 credits of required core courses and 24 credits of specialization courses. The remaining credits for the degree are outlined in the General Education Requirements section on this page.

Note: English composition (ENGCMP) courses and writing-intensive courses (officially designated as W courses in the catalog) that are taken for the major must be passed with a grade of C or higher (grades of C- or lower are not acceptable).

Core Courses (12 credits)

The following four courses are required for all three tracks. Some courses serve as prerequisites to more advanced courses in the MPCOMM major. Please review individual catalog descriptions and plan your schedule accordingly.
Specializations (24 credits)

Choose one of the specialization tracks that follow.

TRACK 1: Corporate/Community Relations

Required Courses (9 credits)

- COMMRC 1111 - THEORIES OF PERSUASION
- COMMRC 1732 - SPECIAL TOPICS IN MASS COMMUNICATION Public and Media Relations
- BUSERV 1940 - MARKETING FUNDAMENTALS

Note

BUSERV 1940 Marketing Fundamentals may be substituted with BUSMKT 1040 Intro to Marketing.

Electives, choose four (12 credits)

- COMMRC 1102 - ORGANIZATIONAL COMMUNICATION
- COMMRC 1125 - MEDIA THEORY
- COMMRC 1730 - SPECIAL TOPICS IN COMMUNICATION Health Communication
- COMMRC 1732 - SPECIAL TOPICS IN MASS COMMUNICATION Communication and New Media Technologies
- ENGCMP 0410 - WRITING IN THE LEGAL PROFESSIONS
- ENGCMP 0420 - WRITING FOR THE PUBLIC
- ENGCMP 0515 - PERSUASIVE WRITING IN ADVERTISING
- ENGCMP 0520 - INTEGRATING WRITING AND DESIGN
- ENGCMP 0550 - TOPICS IN PUBLIC/PROFESSIONAL WRITING
- ENGCMP 0560 - WRITING ARGUMENTS
- ENGCMP 0600 - INTRODUCTION TO TECHNICAL WRITING
- ENGCMP 0610 - COMPOSING DIGITAL MEDIA
- ENGCMP 0641 - WRITING FOR CHANGE
- ENGCMP 1103 - PUBLIC RELATIONS WRITING
- ENGCMP 1104 - CORPORATE STORYTELLING
- ENGCMP 1112 - PROFESSIONAL USES OF SOCIAL MEDIA
- ENGCMP 1120 - HISTORY AND ETHICS OF ADVERTISING AND PUBLIC RELATIONS
- ENGCMP 1270 - PROJECTS IN BLACK RHETORIC
- ENGCMP 1400 - GRANT WRITING FOR NONPROFITS
- ENGCMP 1401 - WRITING FOR FUNDRAISING AND DEVELOPMENT
- ENGCMP 1420 - WRITING PROPOSALS FOR BUSINESS
- ENGWRT 0550 - FUNDAMENTALS OF NEWS REPORTING
- ENGWRT 0710 - INTRO TO AUDIO STORYTELLING
- ENGWRT 1330 - INTERMEDIATE NONFICTION: SCENE AND POINT-OF-VIEW
- ENGWRT 1403 - TOPICS IN NON-FICTION: ELECTRONIC MEDIA
- PSY 0105 - INTRODUCTION TO SOCIAL PSYCHOLOGY
- PSY 1635 - ORGANIZATIONAL PSYCHOLOGY
- PUBSRV 1200 - PRACTICES OF NON-PROFIT MANAGEMENT
- PUBSRV 1310 - DIVERSITY ISSUES IN PUBLIC SERVICE
- SOC 0490 - MASS MEDIA

Internship, choose one (3 credits)
- CGS 1900 - CHOOSING YOUR PATH: INTERNSHIP SEMINAR
- THEA 1484 - DIRECTED PROJECT BUSINESS MGT

Track 2: Writing for the Professions

Required Courses (6 credits)
- COMMRC 1114 - FREEDOM OF SPEECH AND PRESS
  and choose one of the following courses:
- ENGCMP 0400 - WRITTEN PROFESSIONAL COMMUNICATION or
- ENGWRT 1330 - INTERMEDIATE NONFICTION: SCENE AND POINT-OF-VIEW

Note
COMMRC 1114 may be substituted with either COMMRC 1161 Communication Ethics (3cr.) or, if not used as an elective, ENGCMP 1103 Public Relations Writing (3cr.).

Electives, choose five (15 credits)
- COMMRC 1732 - SPECIAL TOPICS IN MASS COMMUNICATION
- Public and Media Relations or Communication and New Media Technologies
- ENGCMP 0410 - WRITING IN THE LEGAL PROFESSIONS
- ENGCMP 0420 - WRITING FOR THE PUBLIC
- ENGCMP 0515 - PERSUASIVE WRITING IN ADVERTISING
- ENGCMP 0520 - INTEGRATING WRITING AND DESIGN
- ENGCMP 0550 - TOPICS IN PUBLIC/PROFESSIONAL WRITING
- ENGCMP 0560 - WRITING ARGUMENTS
- ENGCMP 0600 - INTRODUCTION TO TECHNICAL WRITING
- ENGCMP 0610 - COMPOSING DIGITAL MEDIA
- ENGCMP 1103 - PUBLIC RELATIONS WRITING
- ENGCMP 1111 - PROFESSIONAL WRITING IN GLOBAL CONTEXTS
- ENGCMP 1112 - PROFESSIONAL USES OF SOCIAL MEDIA
- ENGCMP 1400 - GRANT WRITING FOR NONPROFITS
- ENGCMP 1401 - WRITING FOR FUNDRAISING AND DEVELOPMENT
- ENGCMP 1420 - WRITING PROPOSALS FOR BUSINESS
- ENGWRT 0550 - FUNDAMENTALS OF NEWS REPORTING
- ENGWRT 1377 - MEDIA LITERACY: WRITING AND READING YOUR WAY THROUGH THE DIGITAL LANDSCAPE
- ENGWRT 1391 - WRITING THE REVIEW
- ENGWRT 1393 - SPORTS WRITING
- ENGWRT 1399 - TOPICS IN NON-FICTION: NEWSPAPER
- ENGWRT 1403 - TOPICS IN NON-FICTION: ELECTRONIC MEDIA

Internship, choose one (3 credits)
- CGS 1900 - CHOOSING YOUR PATH: INTERNSHIP SEMINAR (section 7710)
- ENGWRT 1370 - JOURNALISM BOOT CAMP: WRITE NOW

**Track 3: Digital Media**

**Required Courses (9 credits)**

- COMMRC 1122 - MEDIA CRITICISM
- ENGFLM 0355 - VISUAL LITERACY or ENGFLM 0401 - INTRODUCTION TO VISUAL CULTURE
- FILMST 0001 - FILMMAKING 1: FUNDAMENTALS (cross-listed with FMST 0800)

**Electives, choose four (12 credits)**

- COMMRC 1105 - TELEVISION AND SOCIETY
- COMMRC 1125 - MEDIA THEORY
- COMMRC 1126 - MEDIA AND CONSUMER CULTURE
- CS 0134 - WEB SITE DESIGN AND DEVELOPMENT
- ENGCMP 0425 - DIGITAL HUMANITY (cross-listed with HAA 0425)
- ENGCMP 0520 - INTEGRATING WRITING AND DESIGN
- ENGCMP 0610 - COMPOSING DIGITAL MEDIA
- ENGCMP 1112 - PROFESSIONAL USES OF SOCIAL MEDIA
- ENGCMP 1130 - PROJECTS IN DIGITAL COMPOSITION
- ENGCMP 1201 - DIGITAL NARRATIVE AND INTERACTIVE DESIGN
- ENGFLM 0400 - INTRODUCTION TO FILM
- ENGFLM 1390 - CONTEMPORARY FILM
- ENGFLM 1485 - FILM AND POLITICS
- ENGFLM 1683 - DOCUMENTARY FILM
- ENGFLM 1695 - HORROR FILM
- ENGLIT 0354 - WORDS AND IMAGES
- ENGLIT 0550 - INTRODUCTION TO POPULAR CULTURE
- ENGWRT 0650 - READINGS IN JOURNALISM
- ENGWRT 1377 - MEDIA LITERACY: WRITING AND READING YOUR WAY THROUGH THE DIGITAL LANDSCAPE
- FILMST 0120 - PHOTOGRAPHY 1
- FILMST 0121 - ANIMATION 1
- FILMST 0250 - BUSINESS OF PHOTOGRAPHY AND MULTIMEDIA
- FILMST 0400 - POST-PRODUCTION
- FILMST 0430 - AUDIO PRODUCTION
- FILMST 0601 - FILMMAKING 2: SIGHT AND SOUND
- FILMST 0610 - DIGITAL EFFECTS 1
- FILMST 1001 - BROADCASTING
- FILMST 1132 - ELEMENTS OF SCREENWRITING
- FILMST 1600 - FILMMAKING 3: STORY TO SCREEN
- HAA 0090 - INTRODUCTION TO CONTEMPORARY ART
- HAA 0470 - PHOTOGRAPHY AND ART
- PS 1836 - POLITICS THROUGH FILM
- PSY 1080 - PSYCHOLOGY AND THE MEDIA
- SA 0110 - VISUAL THINKING
- SA 0130 - DRAWING STUDIO 1
- SA 0180 - DIGITAL STUDIO: PHOTOGRAPHY 1
- SA 1270 - DIGITAL STUDIO: IMAGING
Internship (3 credits)

- CGS 1900 - CHOOSING YOUR PATH: INTERNSHIP SEMINAR (section: 7710)

General Education Requirements

To earn a Bachelor of Arts or a Bachelor of Science degree in the College of General Studies, you must satisfactorily complete a minimum of 120 credits (approximately 40 courses), at least 30 credits of which must be in upper-division (1000-level) courses (or 24 credits if pursuing the Natural Sciences major). These 1000-level courses may come from any of the requirements for the degree listed below.

General Education Requirements (GERs) provide you with an opportunity to discover interests you never knew you had, all while earning credits toward graduation. And, no matter what your future holds, be it a career or grad school, GERs prepare you by emphasizing skills employers want (like critical thinking, problem solving, written and oral communication) and giving you the opportunity to become more aware of our increasingly diverse and interconnected world.

The College of General Studies provides a liberal arts and pre-professional education for undergraduate students that is grounded in scholarly excellence. Pitt offers you the knowledge, understanding, analytical tools, and communication skills you need to become perceptive, reflective, and intellectually self-conscious citizens within a diverse and rapidly changing world. GERs are at the core of our education.

Our General Education Requirements changed for students entering as of Fall 2018 (2191) term. See the CGS General Education Requirements for Fall 2018 and afterward here or visit the CGS General Education Requirements website.

Writing (9 credits)

Written communication is central to almost all disciplines and professions. Developing written proficiency is a lifelong process, and it is especially important that undergraduate education accelerates and directs that process toward the achievement of writing skills that will provide a base appropriate for professional or graduate education or for professional employment.

Introductory Composition Course (3 credits)

Students are required to take the college-level introductory composition course ENGCMP 0200 Seminar in Composition (SC). Students are exempted from this course if they earned a 660 on the SAT Evidence-Based Reading and Writing Section and a 5 on the Advanced Placement Exam. Given the importance of establishing a sound foundation for a student's writing, all students are required to pass SC with a grade of C- or better by the time they have completed 24 credits in enrollment. (Students who do not have a 560 on the SAT or a 24 or above on the ACT might also be required to take the skill-development course ENGCMP 0150 Workshop in Composition before enrolling in SC.)

Note for students transferring from the School of Engineering into CGS: successful completion of ENGR 0012 Intro to Engineering Computing may be used in place of ENGCMP 0200 Seminar in Composition.

Two Writing Intensive Courses (6 credits if not overlapped with other General Education requirements)

Writing intensive courses (W-Courses) are designed to teach writing within a discipline through writing assignments that are distributed across the entire term. In these courses, students will produce at least 20 - 24 pages of written work. A significant portion of this work should be substantially revised in response to instructor feedback and class discussion. All students must complete two courses that are designated as 'W-Courses', or one W-Course and a second English composition course. Students should satisfy one of these requirements by taking a W-Course in their major if it is available. Students may not transfer credits in to satisfy this requirement. W-courses can be overlapped with other General Education courses, except for Professional Communication.

Math/Algebra (3 credits)

Mastering college-level algebra is required for all students. These skills are foundational for student success in other general education courses.
Students are exempt from having to take Algebra with a 620 SAT Math or 27 ACT Math. Students who do not meet these criteria must earn a C- or higher in MATH 0020, MATH 0025, MATH 0031, CS 0004, or CS 0007. Given the importance of establishing a sound foundation in mathematics, all students are required to satisfy the Algebra requirement by the time they have completed 30 credits in enrollment.

Quantitative and Formal Reasoning (3 credits)

All students are required to take and pass with a grade of C- or better at least one course in university-level mathematics (other than trigonometry) for which algebra is a prerequisite, or an approved course in statistics or mathematical or formal logic.

A C- or better is needed in a course that satisfies this requirement. Students who qualify for placement in an upper-level course in mathematics on a proficiency placement test are exempt.

Diversity (3 credits)

Diversity courses focus centrally and intensively on issues of diversity, and do so in a manner that promotes understanding of difference. They provide students with analytical skills with which to understand structural inequities and the knowledge to be able to participate more effectively in our increasingly diverse and multicultural society. The courses may address, though not be limited to, such issues as race, gender, ethnicity, sexuality, religious difference, and/or economic disparity.

All students must complete one course that is designated as a Diversity course but may take this course within their major field of study, if available. Diversity courses may also be courses that fulfill other General Education Requirements. (3 credits if not overlapped with another General Education course)

Language/Communication (6-10 credits)

All students are required to take a sequence of two courses that provide them with advanced study of a second language other than English, or the ability to develop their skills in oral and professional communication. Students choose one of the following options below:

Option 1: A Sequence of Two Courses in a Second Language (6-10 credits)

Students complete with a grade of C- or better two terms of university-level study in a second language other than English. Exemptions will be granted to students who can demonstrate elementary proficiency in a second language through one of the following:

1. Having completed three years of high school study of a second language with a grade of B or better in each course;
2. Passing a special proficiency examination;
3. Transferring credits for two terms or more of approved university-level instruction in a second language with grades of C or better;
4. Having a native language other than English.

Option 2: A Sequence of Two Courses in Oral and Professional Communication (6 credits)

These classes advance the skills of the student to perform effectively in workplace environments or the public by communicating ideas and concepts and/or introduce students to theories that analyze and explain effective communication in these settings. Students must complete one of the following with a grade of C- or better: COMMRC 0520 or COMMRC 0500. Students select a second class from a list of approved courses.

Humanities and Arts, Social Sciences, and Natural Sciences (27 credits)

Each student is required to take nine courses in the humanities, social sciences, and natural sciences as distributed below. Such courses allow students to pursue their own interests while they explore diverse views of a broad range of human cultures, modes of thought, and bodies of knowledge. The courses that fulfill these requirements are truly courses in the disciplines that draw on the unique resources of a research university.

One course in Literature (3 credits)

By studying a range of literary and other texts in this course, students will be introduced to the techniques and methods of textual analysis and will develop critical perspectives on a variety of forms of cultural expression.

One course in the Arts (3 credits)
This course introduces students to modes of analysis appropriate to music, theater, or the visual and plastic arts. It may take the form of a survey, the study of a genre or period, or may focus on a particular artist.

**One course in Creative Work (3 credits)**

In this course, students are expected to produce some form of creative work, and they will also be trained in the techniques and modes of its production. The course could be situated in theater, studio arts, writing, visual arts (including photography, film), music, and dance; or it may be a course that engages in innovative or original work in relation to written, oral, or visual material, new media, social media, and other contemporary forms of communication and representation.

**One course in Philosophical Thinking or Ethics (3 credits)**

This course will emphasize close and critical reading of theories about knowledge, reality, humanity, and values. Courses could focus on human nature; scientific reasoning; theories of cognition and consciousness; human/social rights; competing systems of belief; morality; concepts of freedom; theories of justice; social obligations/constraints; or ethics, including applied or professional ethics.

**One course in Social Sciences (3 credits)**

A course that treats topics considered of significant importance in the social or behavioral sciences (including social psychology). Courses will introduce students to the subject matter and methodology of a particular discipline and will involve them in the modes of investigation, analysis, and judgment characteristically applied by practitioners.

**One course in Historical Analysis (3 credits)**

In this course, students will develop skills and methods by which to understand significant cultural, social, economic, or political accounts of the past. The course may focus on pivotal moments of change, or important transitions over longer periods of time. Courses could explore developments in science, technology, literature, or art, and the ideas around them, or examine critical historical shifts by analyzing various data or cultural forms.

**Three courses in the Natural Sciences (9 credits)**

These will be courses that introduce students to scientific principles and concepts rather than offering a simple codification of facts in a discipline or a history of a discipline. The courses may be interdisciplinary, and no more than two courses may have the same primary departmental sponsor.

**Global Awareness and Cultural Understanding (9 credits)**

Each student must complete three courses as distributed below:

**One course in Global Issues (3 credits)**

This course will examine significant issues that are global in scale. Courses could address, for example: globalization; the global and cultural impact of climate change/sustainability; the effects of and resistances to colonialism; or worldwide issues related to health, gender, ethnicity, race, technology, labor, law or the economy.

**One course in a Specific Geographic Region (3 credits)**

This course will be an in depth study and analysis of a particular region or locality outside the United States.

**One course in Cross-Cultural Awareness (3 credits)**

This course, through cross-cultural perspective, will promote knowledge of and reflection upon the cultures of Asia, the Middle East, Africa, Latin America, the Caribbean, or the indigenous peoples of the world past and present. Students will develop an understanding of cultures, traditions, and societies that differ substantially from those that prevail in North America and Europe.

**Overlapping of General Education Courses**

- Courses taken for general education requirements can also be applied to major requirements, when applicable.
- Diversity courses are allowed to overlap with other general education requirements.
- Writing (‘W’) courses are allowed to overlap with other general education requirements except for the Professional Communication requirement.
• Students may overlap the second course in their language sequence, taken at the college level, with the Geographic Region requirement, except for American Sign Language. This does not apply to students who satisfy the Language requirement through high school study, a proficiency examination, or native proficiency.

Specialized Study (the Major) (30-36 credits)

The baccalaureate degree, in addition to providing certain skills and broad exposure to the major bodies of knowledge, also allows the opportunity to specialize in a particular field, providing depth of experience essential for vocational competence or further graduate study. An outline of each major is available on the CGS Web site, www.cgs.pitt.edu.

Students admitted to CGS can choose from the following majors. Many majors offer a combination of face-to-face and online courses.

• Administration of justice
• Dental hygiene (for licensed dental hygienists)
• Health services (BA and BS)
• Humanities
• Legal studies
• Media and professional communications
• Natural sciences
• Public service
• Social sciences

Students who want a major in an arts and sciences field can begin in CGS and transfer to the Dietrich School of Arts and Sciences after completing 12 credits including the mathematics and seminar in composition requirements. Admission is determined by the Dietrich School.

Electives

Any credits not used specifically to satisfy the previous requirements are considered electives. Electives can be taken in a wide variety of subjects to complement, reinforce, or add further breadth to the chosen program of study or to help meet the requirements of a minor or certificate program.

Natural Sciences, BS

The natural sciences major is a liberal arts major with a focus on courses from multiple natural sciences departments. Students customize this major to meet their interests and personal or career goals, choosing from a variety of courses with a concentration in areas, such as anthropology, biological sciences, chemistry, computer science, geology and planetary science, history and philosophy of science, mathematics, neuroscience, physics, psychology, and statistics.

Also available are a pre-medicine option (for those preparing for medical school or another health professional school); a pre-physician assistant option (for those preparing to apply to Physician Assistant education programs), and two pre-education options (for those preparing for teaching careers).

Important: New eligibility requirements are now in place for students applying to the CGS Natural Sciences major (Standard/Multidisciplinary and Pre-Education tracks) for the Spring 2020 term and beyond.

Starting with the Spring 2020 term (January 1, 2020), all new students declaring the Standard/Multidisciplinary and Pre-Education tracks in the Natural Sciences major will need to have an overall GPA minimum of 3.25 to be eligible for admission. This 3.25 overall GPA minimum is required at the time of application to the program.

In Spring 2018, CGS implemented a minimum overall GPA requirement of 3.50 for students at time of application in the Pre-Medicine and Pre-Physician Assistant tracks. These minimums are still in effect.

Natural Sciences Standard (Multi-Disciplinary) Major (36 credits)

Choose a minimum of 36 credits (approximately 11-12 courses, not including labs) from two to four departments below. All courses taken must be related to natural sciences and selected in consultation with your CGS advisor. At least five courses must be taken from one department, which
provides a disciplinary base. The other courses should be selected based on your professional and academic goals and approved by your academic advisor.

- Anthropology (natural sciences-related course)
- Astronomy
- Biological Sciences
- Chemistry
- Computer science (only courses numbered 0401 and above)
- Geology and planetary science
- History and philosophy of science (natural sciences-related course)
- Mathematics (only courses numbered 0220 and above)
- Neuroscience
- Physics
- Psychology
- Statistics (0200 or 1000, and courses numbered above 1000)

*Students admitted under the new eligibility requirements for Spring 2020 must have an overall 3.25 GPA at time of admission into this track.*

Pre-Medicine Option (39 credits)

This natural sciences concentration incorporates the course work needed for admission to most medical and dental programs. Completion of this concentration does not guarantee acceptance into graduate study. Students pursuing this option can take advantage of the resources of the University of Pittsburgh's Interprofessional Center for Health Careers (PIC Health Careers) Night sections of biology, chemistry, and physics courses are available, with seats reserved specifically for CGS students.

*Students must have a 3.50 GPA to be admitted into the Pre-Medicine(Pre-PA) track in the Natural Sciences major.*

- BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1
- BIOSC 0050 - FOUNDATIONS OF BIOLOGY LABORATORY 1 (effective for Fall 2019: BIOSC 0057 FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 1 or BIOSC 0058 - FOUNDATIONS OF BIOLOGY SEA-PHAGES LABORATORY 1)
- BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2
- BIOSC 0067 - FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 2 or
- BIOSC 1000 - BIOCHEMISTRY
- CHEM 0110 - GENERAL CHEMISTRY 1
- CHEM 0120 - GENERAL CHEMISTRY 2
- CHEM 0310 - ORGANIC CHEMISTRY 1
- CHEM 0320 - ORGANIC CHEMISTRY 2
- CHEM 0345 - ORGANIC LABORATORY
- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1 or STAT 1000 - APPLIED STATISTICAL METHODS
- PHYS 0110 - INTRODUCTION TO PHYSICS 1
- PHYS 0111 - INTRODUCTION TO PHYSICS 2
- PHYS 0212 - INTRODUCTION TO LABORATORY PHYSICS

Additional recommended courses for premedicine option:
- *MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1 or STAT 1000 - APPLIED STATISTICAL METHODS (choose the course that you did not take as part of your requirements)*
- BIOSC 1850 - MICROBIOLOGY
- MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2
- NROSCI 1000 - INTRO TO NEUROSCIENCE
- NROSCI 1250 - HUMAN PHYSIOLOGY

Notes
Requirements can vary from school to school. To ensure meeting eligibility criteria, one year of English (writing intensive) and one half year of Psychology and/or Sociology are also recommended. Consult the websites of the medical schools to which you plan to apply for their specific requirements.

Pre-Physician Assistant Option (min. 40 credits)

The pre-PA curriculum is designed for students who are interested in the Physician Assistant Studies Program at the University of Pittsburgh School of Health & Rehabilitation Sciences (SHRS). The pre-PA option incorporates the prerequisite course work necessary for the application. Completion of the pre-PA plan does not guarantee admission. For a full list of admission requirements, visit the School of Health and Rehabilitation Sciences PA program website. Note: Requirements for other PA programs from schools other than the University of Pittsburgh may differ. Please consult their respective websites for specific admission requirements.

Students must have a 3.50 GPA to be admitted into the Pre-Medicine/(Pre-PA) track in the Natural Sciences major.

- BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1
- BIOSC 0050 - FOUNDATIONS OF BIOLOGY LABORATORY 1 (effective Fall 2019: BIOSC 0057 FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 1 or BIOSC 0058 - FOUNDATIONS OF BIOLOGY SEA-PHAGES LABORATORY 1 )
- BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2
- BIOSC 0067 - FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 2 or BIOSC 0068 - FOUNDATIONS OF BIOLOGY SEA-PHAGES LABORATORY 2
- BIOSC 1850 - MICROBIOLOGY
- BIOSC 1855 - INTRODUCTION TO MICROBIOLOGY LABORATORY
- CHEM 0110 - GENERAL CHEMISTRY 1
- CHEM 0120 - GENERAL CHEMISTRY 2
- CHEM 0310 - ORGANIC CHEMISTRY 1 or CHEM 0350 - PRINCIPLES OF ORGANIC CHEMISTRY
- CHEM 0330 - ORGANIC CHEMISTRY LABORATORY 1 or CHEM 0345 - ORGANIC LABORATORY
- NUR 0012 - HUMAN ANATOMY AND PHYSIOLOGY 1
- NUR 0002 - NURSING ANATOMY AND PHYSIOLOGY LABORATORY 1
- NUR 0013 - HUMAN ANATOMY AND PHYSIOLOGY 2
- NUR 0003 - NURSING ANATOMY AND PHYSIOLOGY LABORATORY 2
- PSY 0010 - INTRODUCTION TO PSYCHOLOGY
- PSY Upper-Level Elective Course
- STAT 0200 - BASIC APPLIED STATISTICS or STAT 1000 - APPLIED STATISTICAL METHODS or PSY 0310 - DEVELOPMENTAL PSYCHOLOGY
- Outside Major: Other Requirements
- REHSCI 1235 - MEDICAL TERMINOLOGY
- HRS 1006 - INTRO TO HUMAN NUTRITION

Notes

If you are seeking to apply to the University of Pittsburgh's SHRS program, the school will accept NUR 0031 Microbiology and NUR 0032 (Lab) in place of BIOSC 1850 Microbiology and BIOSC 1855 (Lab). You will also need a statistics course and a medical terminology course. See additional requirements outside the major.

Pre-Education Options

The College of General Studies and the Pitt School of Education have collaborated on two concentrations in the natural sciences major that incorporate the prerequisite science course work needed for admission into the certificate programs in earth and space science and general science. These options may be used by students interested in Science Education - Master of Arts in Teaching offered in the School of Education. Completion of the prerequisite requirements does not guarantee admission. Note: The School of Education also recommends at least a 3.0 cumulative undergraduate GPA for all of their teacher certificate programs. Please consult their Admissions page for program-specific requirements.
Students must have a 3.25 GPA to be admitted under the new eligibility requirements for this track beginning in Spring 2020.

Earth and Space Science Concentration (45 credits)

- ASTRON 0089 - STARS, GALAXIES AND THE COSMOS
- CHEM 0110 - GENERAL CHEMISTRY 1
- CHEM 0120 - GENERAL CHEMISTRY 2
- GEOL 1030 - THE ATMOSPHERE, OCEANS AND CLIMATE or GEOL 0890 - OCEANOGRAPHY
- GEOL 0055 - GEOLOGY LABORATORY
- GEOL 0060 - HISTORY OF THE EARTH or GEOL 1020 - SEDIMENTOLOGY AND STRATIGRAPHY
- GEOL 0800 - GEOLOGY
- GEOL 0840 - ENVIRONMENTAL SCIENCE
- GEOL 0860 - ENVIRONMENTAL GEOLOGY
- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
- PHYS 0110 - INTRODUCTION TO PHYSICS 1
- TLL 1580 - FOUNDATIONS OF SPECIAL EDUC
- Science Electives

General Science Concentration (46 credits)

- ASTRON 0089 - STARS, GALAXIES AND THE COSMOS
- BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1
- BIOSC 0050 - FOUNDATIONS OF BIOLOGY LABORATORY 1 (new course number and title effective Fall 2019: BIOSC 0057 FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 1 or BIOSC 0058 - FOUNDATIONS OF BIOLOGY SEA-PHAGES LABORATORY 1)
- BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2
- BIOSC 0067 - FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 2
  or BIOSC 0068 FOUNDATIONS OF BIOLOGY SEA-PHAGES LABORATORY 2
- BIOSC 0370 - ECOLOGY
- BIOSC 1000 - BIOCHEMISTRY or BIOSC 1850 - MICROBIOLOGY
  Note that CHEM 0310 is a prerequisite course for BIOSC 1000.
- CHEM 0110 - GENERAL CHEMISTRY 1
- CHEM 0120 - GENERAL CHEMISTRY 2
- CHEM 0310 - ORGANIC CHEMISTRY 1
- GEOL 0800 - GEOLOGY or GEOL 0860 - ENVIRONMENTAL GEOLOGY
- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
- PHYS 0110 - INTRODUCTION TO PHYSICS 1
- PHYS 0111 - INTRODUCTION TO PHYSICS 2
- PHYS 0212 - INTRODUCTION TO LABORATORY PHYSICS
- TLL 1580 - FOUNDATIONS OF SPECIAL EDUC

Notes

Requirements are subject to change. Check with an academic advisor before registering.

An internship program is available through the College of General Studies. Please see your advisor for additional information.

General Education Requirements
To earn a Bachelor of Arts or a Bachelor of Science degree in the College of General Studies, you must satisfactorily complete a minimum of 120 credits (approximately 40 courses), at least 30 credits of which must be in upper-division (1000-level) courses (or 24 credits if pursuing the Natural Sciences major). These 1000-level courses may come from any of the requirements for the degree listed below.

General Education Requirements (GERs) provide you with an opportunity to discover interests you never knew you had, all while earning credits toward graduation. And, no matter what your future holds, be it a career or grad school, GERs prepare you by emphasizing skills employers want (like critical thinking, problem solving, written and oral communication) and giving you the opportunity to become more aware of our increasingly diverse and interconnected world.

The College of General Studies provides a liberal arts and pre-professional education for undergraduate students that is grounded in scholarly excellence. Pitt offers you the knowledge, understanding, analytical tools, and communication skills you need to become perceptive, reflective, and intellectually self-conscious citizens within a diverse and rapidly changing world. GERs are at the core of our education.

Our General Education Requirements changed for students entering as of Fall 2018 (2191) term. See the CGS General Education Requirements for Fall 2018 and afterward here or visit the CGS General Education Requirements website.

Writing (9 credits)

Written communication is central to almost all disciplines and professions. Developing written proficiency is a lifelong process, and it is especially important that undergraduate education accelerates and directs that process toward the achievement of writing skills that will provide a base appropriate for professional or graduate education or for professional employment.

Introductory Composition Course (3 credits)

Students are required to take the college-level introductory composition course ENGCMP 0200 Seminar in Composition (SC). Students are exempted from this course if they earned a 660 on the SAT Evidence-Based Reading and Writing Section and a 5 on the Advanced Placement Exam. Given the importance of establishing a sound foundation for a student's writing, all students are required to pass SC with a grade of C- or better by the time they have completed 24 credits in enrollment. (Students who do not have a 560 on the SAT or a 24 or above on the ACT might also be required to take the skill-development course ENGCMP 0150 Workshop in Composition before enrolling in SC.)

Note for students transferring from the School of Engineering into CGS: successful completion of ENGR 0012 Intro to Engineering Computing may be used in place of ENGCMP 0200 Seminar in Composition.

Two Writing Intensive Courses (6 credits if not overlapped with other General Education requirements)

Writing intensive courses (W-Courses) are designed to teach writing within a discipline through writing assignments that are distributed across the entire term. In these courses, students will produce at least 20 - 24 pages of written work. A significant portion of this work should be substantially revised in response to instructor feedback and class discussion. All students must complete two courses that are designated as 'W-Courses', or one W-Course and a second English composition course. Students should satisfy one of these requirements by taking a W-Course in their major if it is available. Students may not transfer credits in to satisfy this requirement. W-courses can be overlapped with other General Education courses, except for Professional Communication.

Math/Algebra (3 credits)

Mastering college-level algebra is required for all students. These skills are foundational for student success in other general education courses.

Students are exempt from having to take Algebra with a 620 SAT Math or 27 ACT Math. Students who do not meet these criteria must earn a C- or higher in MATH 0020, MATH 0025, MATH 0031, CS 0004, or CS 0007. Given the importance of establishing a sound foundation in mathematics, all students are required to satisfy the Algebra requirement by the time they have completed 30 credits in enrollment.

Quantitative and Formal Reasoning (3 credits)

All students are required to take and pass with a grade of C- or better at least one course in university-level mathematics (other than trigonometry) for which algebra is a prerequisite, or an approved course in statistics or mathematical or formal logic.
A C- or better is needed in a course that satisfies this requirement. Students who qualify for placement in an upper-level course in mathematics on a proficiency placement test are exempt.

Diversity (3 credits)

Diversity courses focus centrally and intensively on issues of diversity, and do so in a manner that promotes understanding of difference. They provide students with analytical skills with which to understand structural inequities and the knowledge to be able to participate more effectively in our increasingly diverse and multicultural society. The courses may address, though not be limited to, such issues as race, gender, ethnicity, sexuality, religious difference, and/or economic disparity.

All students must complete one course that is designated as a Diversity course but may take this course within their major field of study, if available. Diversity courses may also be courses that fulfill other General Education Requirements. (3 credits if not overlapped with another General Education course)

Language/Communication (6-10 credits)

All students are required to take a sequence of two courses that provide them with advanced study of a second language other than English, or the ability to develop their skills in oral and professional communication. Students choose one of the following options below:

Option 1: A Sequence of Two Courses in a Second Language (6-10 credits)

Students complete with a grade of C- or better two terms of university-level study in a second language other than English. Exemptions will be granted to students who can demonstrate elementary proficiency in a second language through one of the following:

1. Having completed three years of high school study of a second language with a grade of B or better in each course;
2. Passing a special proficiency examination;
3. Transferring credits for two terms or more of approved university-level instruction in a second language with grades of C or better;
4. Having a native language other than English.

Option 2: A Sequence of Two Courses in Oral and Professional Communication (6 credits)

These classes advance the skills of the student to perform effectively in workplace environments or the public by communicating ideas and concepts and/or introduce students to theories that analyze and explain effective communication in these settings. Students must complete one of the following with a grade of C- or better: COMMRC 0520 or COMMRC 0500. Students select a second class from a list of approved courses.

Humanities and Arts, Social Sciences, and Natural Sciences (27 credits)

Each student is required to take nine courses in the humanities, social sciences, and natural sciences as distributed below. Such courses allow students to pursue their own interests while they explore diverse views of a broad range of human cultures, modes of thought, and bodies of knowledge. The courses that fulfill these requirements are truly courses in the disciplines that draw on the unique resources of a research university.

One course in Literature (3 credits)

By studying a range of literary and other texts in this course, students will be introduced to the techniques and methods of textual analysis and will develop critical perspectives on a variety of forms of cultural expression.

One course in the Arts (3 credits)

This course introduces students to modes of analysis appropriate to music, theater, or the visual and plastic arts. It may take the form of a survey, the study of a genre or period, or may focus on a particular artist.

One course in Creative Work (3 credits)

In this course, students are expected to produce some form of creative work, and they will also be trained in the techniques and modes of its production. The course could be situated in theater, studio arts, writing, visual arts (including photography, film), music, and dance; or it may be a course that engages in innovative or original work in relation to written, oral, or visual material, new media, social media, and other contemporary forms of communication and representation.

One course in Philosophical Thinking or Ethics (3 credits)
This course will emphasize close and critical reading of theories about knowledge, reality, humanity, and values. Courses could focus on human nature; scientific reasoning; theories of cognition and consciousness; human/social rights; competing systems of belief; morality; concepts of freedom; theories of justice; social obligations/constraints; or ethics, including applied or professional ethics.

One course in Social Sciences (3 credits)

A course that treats topics considered of significant importance in the social or behavioral sciences (including social psychology). Courses will introduce students to the subject matter and methodology of a particular discipline and will involve them in the modes of investigation, analysis, and judgment characteristically applied by practitioners.

One course in Historical Analysis (3 credits)

In this course, students will develop skills and methods by which to understand significant cultural, social, economic, or political accounts of the past. The course may focus on pivotal moments of change, or important transitions over longer periods of time. Courses could explore developments in science, technology, literature, or art, and the ideas around them, or examine critical historical shifts by analyzing various data or cultural forms.

Three courses in the Natural Sciences (9 credits)

These will be courses that introduce students to scientific principles and concepts rather than offering a simple codification of facts in a discipline or a history of a discipline. The courses may be interdisciplinary, and no more than two courses may have the same primary departmental sponsor.

Global Awareness and Cultural Understanding (9 credits)

Each student must complete three courses as distributed below:

One course in Global Issues (3 credits)

This course will examine significant issues that are global in scale. Courses could address, for example: globalization; the global and cultural impact of climate change/sustainability; the effects of and resistances to colonialism; or worldwide issues related to health, gender, ethnicity, race, technology, labor, law or the economy.

One course in a Specific Geographic Region (3 credits)

This course will be an in depth study and analysis of a particular region or locality outside the United States.

One course in Cross-Cultural Awareness (3 credits)

This course, through cross-cultural perspective, will promote knowledge of and reflection upon the cultures of Asia, the Middle East, Africa, Latin America, the Caribbean, or the indigenous peoples of the world past and present. Students will develop an understanding of cultures, traditions, and societies that differ substantially from those that prevail in North America and Europe.

Overlapping of General Education Courses

- Courses taken for general education requirements can also be applied to major requirements, when applicable.
- Diversity courses are allowed to overlap with other general education requirements.
- Writing ('W') courses are allowed to overlap with other general education requirements except for the Professional Communication requirement.
- Students may overlap the second course in their language sequence, taken at the college level, with the Geographic Region requirement, except for American Sign Language. This does not apply to students who satisfy the Language requirement through high school study, a proficiency examination, or native proficiency.

Specialized Study (the Major) (30-36 credits)

The baccalaureate degree, in addition to providing certain skills and broad exposure to the major bodies of knowledge, also allows the opportunity to specialize in a particular field, providing depth of experience essential for vocational competence or further graduate study. An outline of each major is available on the CGS Web site, www.cgs.pitt.edu.

Students admitted to CGS can choose from the following majors. Many majors offer a combination of face-to-face and online courses.
Students who want a major in an arts and sciences field can begin in CGS and transfer to the Dietrich School of Arts and Sciences after completing 12 credits including the mathematics and seminar in composition requirements. Admission is determined by the Dietrich School.

Electives

Any credits not used specifically to satisfy the previous requirements are considered electives. Electives can be taken in a wide variety of subjects to complement, reinforce, or add further breadth to the chosen program of study or to help meet the requirements of a minor or certificate program.

Public Service, BA

The undergraduate major in public service is offered in partnership with the Pitt Graduate School of Public and International Affairs. It is designed to prepare students for a broad range of careers that are focused on the resolution of public problems or the delivery of public services. These careers range from those in the local government and community arena to the metropolitan region and state arena to national and international settings. Potential employers include local, state, and federal governments; nonprofit and nongovernmental organizations at the local, regional, national, and international level; private firms engaged in working with governments; and private corporations with an active public service culture.

The major serves students who are interested in public issues as concerned and interested citizens and prepares them for a wide range of graduate programs related to public policy and management.

Major Requirements

Students must complete a minimum of 120 credits for the Bachelor of Arts degree with a major in public service. Of this total, students must take:

- 33 credits (11 courses) in public service;
- one (1) course in statistics (STAT 0200 - BASIC APPLIED STATISTICS, STAT 0800 or STAT 1000); and
- six (6) credits (two courses) in a related field such as political science, economics, psychology, sociology, or another field approved by an academic advisor. The remaining credits required for the degree are outlined in the General Education Requirements section on this page.

Core Courses (15 credits)

- PUBSRV 0020 - INTRODUCTION TO PUBLIC SERVICE
- PUBSRV 0030 - PUBLIC POLICY PROCESS
- PUBSRV 0040 - PUBLIC SERVICE TECHNOLOGIES
- PUBSRV 0050 - ETHICS AND ACCOUNTABILITY
- PUBSRV 1900 - INTERNSHIP SEMINAR

Concentration Areas (18 credits)

Choose one of the three concentration areas below:

Public Administration Concentration
Nonprofit Management Concentration

- PUBSRV 1200 - PRACTICES OF NON-PROFIT MANAGEMENT
- PUBSRV 1210 - FINANCIAL MANAGEMENT OF NON-PROFIT ORGANIZATIONS
- PUBSRV 1220 - HUMAN RESOURCE MANAGEMENT OF NON-PROFIT ORGANIZATIONS
- PUBSRV 1230 - FUNDRAISING FOR NON-PROFIT ORGANIZATIONS
- PUBSRV - Electives (choose two additional public service courses)

Note

The following courses may substitute for each other in the event of course scheduling conflicts or unavailability: PUBSRV 1110 and PUBSRV 1210 | PUBSRV 1120 and PUBSRV 1220

Self-Designed Concentration

Courses that meet the special program needs of the student may be selected from the courses offered in public service or in a related area or department. A written plan for completing the self-designed concentration must be approved by the College of General Studies Academic Affairs Committee. The proposed plan of studies should be unique and not offered at Pitt in another facet such as another major, certificate or minor.

Public Service Electives

Public administration concentration students may use the 1200-numbered courses as electives; nonprofit management concentration students may use 1100-numbered courses. Courses designated (UHC) are offered in conjunction with the University Honors College.

- PUBSRV 1300 - LEGAL ISSUES IN PUBLIC SERVICE
- PUBSRV 1305 - HEALTH, LAW AND ETHICS
- PUBSRV 1310 - DIVERSITY ISSUES IN PUBLIC SERVICE
- PUBSRV 1315 - MANAGING PROJECTS AND CONTRACTS
- PUBSRV 1320 - GEOGRAPHIC INFORMATION SYSTEMS IN THE PUBLIC SERVICE
- PUBSRV 1340 - STRATEGIC PLANNING PUBLIC SECTOR
- PUBSRV 1390 - THEORIES OF LEADERSHIP
- PUBSRV 1425 - PRINCIPLES OF HOMELAND SECURITY
- PUBSRV 1430 - TRIAL ADVOCACY 1 (honors)
- PUBSRV 1435 - TRIAL ADVOCACY 2 (honors)
- PUBSRV 1455 - LAW, ETHICS AND PUBLIC POLICY IN THE MASS MEDIA
- PUBSRV 1901 - INDEPENDENT STUDY
- PUBSRV 1910 - INSTITUTE OF POLITICS INTERNSHIP/SEMINAR PUBSRV 1910 may be used in place of PUBSRV 1900. Check with an academic advisor before registering

Notes

Five-year accelerated program for Pitt undergraduates

High-achieving University of Pittsburgh juniors (and in some cases, first-term seniors) in the College of General Studies may apply early to the Graduate School of Public and International Affairs (GSPIA). If admitted, they may enroll at GSPIA in what normally would have been their senior
year, allowing them to complete both a bachelor's and a master's degree in a total of five years. Special eligibility requirements apply. Pitt undergraduates interested in this program should contact GSPIA at 412-648-7640.

Please note:

This major requires that you complete an internship at a facility external to the University, and this facility may or will require a criminal background check, an Act 33/34 clearance, and perhaps a drug screen to determine whether you are qualified to participate in the internship. Additionally, in order to become licensed or employed, many states will inquire as to whether the applicant has been convicted of a misdemeanor, a felony, or a felonious or illegal act associated with alcohol and/or substance abuse.

Students interested in a minor, rather than a major, in public service should check with their academic advisor.

Requirements subject to change. Check with an academic advisor before registering.

General Education Requirements

To earn a Bachelor of Arts or a Bachelor of Science degree in the College of General Studies, you must satisfactorily complete a minimum of 120 credits (approximately 40 courses), at least 30 credits of which must be in upper-division (1000-level) courses (or 24 credits if pursuing the Natural Sciences major). These 1000-level courses may come from any of the requirements for the degree listed below.

General Education Requirements (GERs) provide you with an opportunity to discover interests you never knew you had, all while earning credits toward graduation. And, no matter what your future holds, be it a career or grad school, GERs prepare you by emphasizing skills employers want (like critical thinking, problem solving, written and oral communication) and giving you the opportunity to become more aware of our increasingly diverse and interconnected world.

The College of General Studies provides a liberal arts and pre-professional education for undergraduate students that is grounded in scholarly excellence. Pitt offers you the knowledge, understanding, analytical tools, and communication skills you need to become perceptive, reflective, and intellectually self-conscious citizens within a diverse and rapidly changing world. GERs are at the core of our education.

Our General Education Requirements changed for students entering as of Fall 2018 (2191) term. See the CGS General Education Requirements for Fall 2018 and afterward here or visit the CGS General Education Requirements website.

Writing (9 credits)

Written communication is central to almost all disciplines and professions. Developing written proficiency is a lifelong process, and it is especially important that undergraduate education accelerates and directs that process toward the achievement of writing skills that will provide a base appropriate for professional or graduate education or for professional employment.

Introductory Composition Course (3 credits)

Students are required to take the college-level introductory composition course ENGCMP 0200 Seminar in Composition (SC). Students are exempted from this course if they earned a 660 on the SAT Evidence-Based Reading and Writing Section and a 5 on the Advanced Placement Exam. Given the importance of establishing a sound foundation for a student's writing, all students are required to pass SC with a grade of C- or better by the time they have completed 24 credits in enrollment. (Students who do not have a 560 on the SAT or a 24 or above on the ACT might also be required to take the skill-development course ENGCMP 0150 Workshop in Composition before enrolling in SC.)

Note for students transferring from the School of Engineering into CGS: successful completion of ENGR 0012 Intro to Engineering Computing may be used in place of ENGCMP 0200 Seminar in Composition.

Two Writing Intensive Courses (6 credits if not overlapped with other General Education requirements)

Writing intensive courses (W-Courses) are designed to teach writing within a discipline through writing assignments that are distributed across the entire term. In these courses, students will produce at least 20 - 24 pages of written work. A significant portion of this work should be substantially revised in response to instructor feedback and class discussion. All students must complete two courses that are designated as 'W-Courses', or one W-Course and a second English composition course. Students should satisfy one of these requirements by taking a W-Course in their major if it is
available. Students may not transfer credits in to satisfy this requirement. W-courses can be overlapped with other General Education courses, except for Professional Communication.

Math/Algebra (3 credits)

Mastering college-level algebra is required for all students. These skills are foundational for student success in other general education courses.

Students are exempt from having to take Algebra with a 620 SAT Math or 27 ACT Math. Students who do not meet these criteria must earn a C- or higher in MATH 0020, MATH 0025, MATH 0031, CS 0004, or CS 0007. Given the importance of establishing a sound foundation in mathematics, all students are required to satisfy the Algebra requirement by the time they have completed 30 credits in enrollment.

Quantitative and Formal Reasoning (3 credits)

All students are required to take and pass with a grade of C- or better at least one course in university-level mathematics (other than trigonometry) for which algebra is a prerequisite, or an approved course in statistics or mathematical or formal logic.

A C- or better is needed in a course that satisfies this requirement. Students who qualify for placement in an upper-level course in mathematics on a proficiency placement test are exempt.

Diversity (3 credits)

Diversity courses focus centrally and intensively on issues of diversity, and do so in a manner that promotes understanding of difference. They provide students with analytical skills with which to understand structural inequities and the knowledge to be able to participate more effectively in our increasingly diverse and multicultural society. The courses may address, though not be limited to, such issues as race, gender, ethnicity, sexuality, religious difference, and/or economic disparity.

All students must complete one course that is designated as a Diversity course but may take this course within their major field of study, if available. Diversity courses may also be courses that fulfill other General Education Requirements. (3 credits if not overlapped with another General Education course)

Language/Communication (6-10 credits)

All students are required to take a sequence of two courses that provide them with advanced study of a second language other than English, or the ability to develop their skills in oral and professional communication. Students choose one of the following options below:

Option 1: A Sequence of Two Courses in a Second Language (6-10 credits)

Students complete with a grade of C- or better two terms of university-level study in a second language other than English. Exemptions will be granted to students who can demonstrate elementary proficiency in a second language through one of the following:

1. Having completed three years of high school study of a second language with a grade of B or better in each course;
2. Passing a special proficiency examination;
3. Transferring credits for two terms or more of approved university-level instruction in a second language with grades of C or better;
4. Having a native language other than English.

Option 2: A Sequence of Two Courses in Oral and Professional Communication (6 credits)

These classes advance the skills of the student to perform effectively in workplace environments or the public by communicating ideas and concepts and/or introduce students to theories that analyze and explain effective communication in these settings. Students must complete one of the following with a grade of C- or better: COMMRC 0520 or COMMRC 0500. Students select a second class from a list of approved courses.

Humanities and Arts, Social Sciences, and Natural Sciences (27 credits)

Each student is required to take nine courses in the humanities, social sciences, and natural sciences as distributed below. Such courses allow students to pursue their own interests while they explore diverse views of a broad range of human cultures, modes of thought, and bodies of knowledge. The courses that fulfill these requirements are truly courses in the disciplines that draw on the unique resources of a research university.
One course in Literature (3 credits)

By studying a range of literary and other texts in this course, students will be introduced to the techniques and methods of textual analysis and will develop critical perspectives on a variety of forms of cultural expression.

One course in the Arts (3 credits)

This course introduces students to modes of analysis appropriate to music, theater, or the visual and plastic arts. It may take the form of a survey, the study of a genre or period, or may focus on a particular artist.

One course in Creative Work (3 credits)

In this course, students are expected to produce some form of creative work, and they will also be trained in the techniques and modes of its production. The course could be situated in theater, studio arts, writing, visual arts (including photography, film), music, and dance; or it may be a course that engages in innovative or original work in relation to written, oral, or visual material, new media, social media, and other contemporary forms of communication and representation.

One course in Philosophical Thinking or Ethics (3 credits)

This course will emphasize close and critical reading of theories about knowledge, reality, humanity, and values. Courses could focus on human nature; scientific reasoning; theories of cognition and consciousness; human/social rights; competing systems of belief; morality; concepts of freedom; theories of justice; social obligations/constraints; or ethics, including applied or professional ethics.

One course in Social Sciences (3 credits)

A course that treats topics considered of significant importance in the social or behavioral sciences (including social psychology). Courses will introduce students to the subject matter and methodology of a particular discipline and will involve them in the modes of investigation, analysis, and judgment characteristically applied by practitioners.

One course in Historical Analysis (3 credits)

In this course, students will develop skills and methods by which to understand significant cultural, social, economic, or political accounts of the past. The course may focus on pivotal moments of change, or important transitions over longer periods of time. Courses could explore developments in science, technology, literature, or art, and the ideas around them, or examine critical historical shifts by analyzing various data or cultural forms.

Three courses in the Natural Sciences (9 credits)

These will be courses that introduce students to scientific principles and concepts rather than offering a simple codification of facts in a discipline or a history of a discipline. The courses may be interdisciplinary, and no more than two courses may have the same primary departmental sponsor.

Global Awareness and Cultural Understanding (9 credits)

Each student must complete three courses as distributed below:

One course in Global Issues (3 credits)

This course will examine significant issues that are global in scale. Courses could address, for example: globalization; the global and cultural impact of climate change/sustainability; the effects of and resistances to colonialism; or worldwide issues related to health, gender, ethnicity, race, technology, labor, law or the economy.

One course in a Specific Geographic Region (3 credits)

This course will be an in depth study and analysis of a particular region or locality outside the United States.

One course in Cross-Cultural Awareness (3 credits)

This course, through cross-cultural perspective, will promote knowledge of and reflection upon the cultures of Asia, the Middle East, Africa, Latin America, the Caribbean, or the indigenous peoples of the world past and present. Students will develop an understanding of cultures, traditions, and societies that differ substantially from those that prevail in North America and Europe.
Overlapping of General Education Courses

- Courses taken for general education requirements can also be applied to major requirements, when applicable.
- Diversity courses are allowed to overlap with other general education requirements.
- Writing (‘W’) courses are allowed to overlap with other general education requirements except for the Professional Communication requirement.
- Students may overlap the second course in their language sequence, taken at the college level, with the Geographic Region requirement, except for American Sign Language. This does not apply to students who satisfy the Language requirement through high school study, a proficiency examination, or native proficiency.

Specialized Study (the Major) (30-36 credits)

The baccalaureate degree, in addition to providing certain skills and broad exposure to the major bodies of knowledge, also allows the opportunity to specialize in a particular field, providing depth of experience essential for vocational competence or further graduate study. An outline of each major is available on the CGS Web site, www.cgs.pitt.edu.

Students admitted to CGS can choose from the following majors. Many majors offer a combination of face-to-face and online courses.

- Administration of justice
- Dental hygiene (for licensed dental hygienists)
- Health services (BA and BS)
- Humanities
- Legal studies
- Media and professional communications
- Natural sciences
- Public service
- Social sciences

Students who want a major in an arts and sciences field can begin in CGS and transfer to the Dietrich School of Arts and Sciences after completing 12 credits including the mathematics and seminar in composition requirements. Admission is determined by the Dietrich School.

Electives

Any credits not used specifically to satisfy the previous requirements are considered electives. Electives can be taken in a wide variety of subjects to complement, reinforce, or add further breadth to the chosen program of study or to help meet the requirements of a minor or certificate program.

Social Sciences, BA

The CGS Social Sciences major was phased out beginning Fall 2020 and is no longer accepting new students. Inactive students will be able to re-enroll in this major no later than Spring 2023. All students enrolled in the program must complete their degrees by Fall 2028.

Social sciences is a liberal arts major with a focus on courses from three social sciences departments. This major can be customized to meet your interests and personal or career goals. You will choose to concentrate in three areas from the list below and have the opportunity to take a variety of courses within those areas of study.

Also available is a pre-education option for those preparing for a teaching career.

Social Sciences Standard Major (36 credits)
Of the minimum total of 120 credits required for the Bachelor of Arts degree with a major in social sciences area, 36 credits (approximately 12 courses) must come in courses that satisfy the major requirements. To satisfy those requirements, students choose social sciences related courses from three of the following departments and programs:

- Africana studies (social sciences-related courses)
- Anthropology (social sciences-related courses)
- Economics
- Gender, Sexuality, and Women's Studies
- History
- Jewish Studies
- Legal Studies
- Political Science
- Psychology (social sciences-related courses)
- Religious Studies (social sciences-related courses)
- Sociology
- Urban Studies

Notes

Students must adhere to the following requirements as they take courses for the social sciences standard major:

- At least five courses must be taken from one department/program listed above and at least three courses from the other two departments/programs.
- At least one half of the major courses must be at the 1000-level.
- All courses selected for the social sciences area major must be approved by an academic advisor.

Pre-Education Option (36 credits)

The College of General Studies and the Pitt School of Education have collaborated on a concentration in the social sciences major that incorporates the prerequisite science course work needed for admission into the certificate program in Social Studies Education. This option may be used by students interested in the Master of Arts in Teaching (MAT) program and Professional Year (PY) Program offered in the School of Education. Completion of the prerequisites for the School of Education does not guarantee acceptance to its programs.

Students must complete a minimum of 120 credits (approximately 40 courses) for a Bachelor of Science degree with a major in social sciences. Of this total, students must take a minimum of 36 credits (approximately 12 courses) according to the specifications. At least 18-credit hours must be at the 1000-level. The remaining credits required for the degree are outlined in the General Education Requirements section on this page.

Area 1: History, Geography, Culture (15-18 credits)

Recommended courses: choose one per category.

U.S. History

- HIST 0600 - UNITED STATES TO 1877
- HIST 0601 - UNITED STATES 1865-PRESENT
- HIST 0670 - AFRICAN AMERICAN HISTORY TO 1877
- HIST 0671 - AFRICAN AMERICAN HISTORY SINCE 1865
- HIST 1610 - UNITED STATES COLONIAL
- HIST 1611 - AMERICAN REVOLUTION 1763-1791
- HIST 1619 - UNITED STATES SINCE 1945

Western European History
• HIST 0100 - WESTERN CIVILIZATION 1
• HIST 0101 - WESTERN CIVILIZATION 2

World History (Non-Western)

• HIST 0700 - WORLD HISTORY

Ancient History

• CLASS 0020 - ROMAN CIVILIZATION
• HIST 0400 - EAST ASIAN CIVILIZATION TO 1800
• HIST 1775 - ORIGINS OF CHRISTIANITY
• HIST 1781 - ROMAN HISTORY
• HIST 1783 - GREEK HISTORY

Geography

• AFRCNA 0385 - CARIBBEAN HISTORY
• HIST 0401 - MODERN EAST ASIAN CIVILIZATION
• HIST 0501 - MODERN LATIN AMERICA
• HIST 1164 - SMALL COUNTRIES AND THE EUROPEAN UNION

World Cultures

• ANTH 0780 - INTRODUCTION TO CULTURAL ANTHROPOLOGY
• HIST 0501 - MODERN LATIN AMERICA
• HIST 1423 - MODERN CHINA
• HIST 1433 - MODERN JAPAN
• HIST 1796 - HISTORY OF AFRICA SINCE 1800

Area 2: Civics (3 credits)

Recommended courses.

• HIST 1641 - MODERN AMERICAN POLITICS
• PS 0200 - AMERICAN POLITICS
• PS 1231 - POLITICAL PARTIES AND ELECTIONS
• PS 1234 - ELECTORAL BEHAVIORS AND DEMOCRATIC PROCESS
• PS 1252 - STATE GOVERNMENT
• PS 1378 - BUILDING DEMOCRACY AROUND THE WORLD

Area 3: Economics (3 credits)

Recommended courses.

• ECON 0100 - INTRODUCTION TO MICROECONOMIC THEORY
• ECON 0110 - INTRODUCTION TO MACROECONOMIC THEORY
• ECON 0800 - INTRODUCTION TO ECONOMICS

Area 4: Sociology and Social Foundations (3 credits)
Recommended courses.

- EFOP 1001 - SOCIAL FOUNDATIONS OF EDUCATION
- SOC 0005 - SOCIETIES
- SOC 0010 - INTRODUCTION TO SOCIOLOGY
- SOC 1107 - CULTURAL SOCIOLOGY

Area 5: Foundations of Special Education (3 credits)

Required course.

- TLL 1580 - FOUNDATIONS OF SPECIAL EDUC

Upper Level Electives (6 credits)

Recommended courses.

- GSWS 1180 - POLITICS OF GENDER AND FOOD
- LCJS 1584 - LEGAL ISSUES IN PUBLIC SERVICE
- LCJS 1300 - LAW AND POLITICS
- LEGLST 1320 - LAW AND ENVIRONMENT
- PS 1536 - HUMAN SECURITY
- PS 1542 - GLOBAL ENVIRONMENTAL POLITICS
- SOC 1119 - GLOBAL PERSPECTIVES ON POPULAR CULTURE
- SOC 1445 - SOCIETY AND ENVIRONMENT
- SOC 1448 - WORKING WOMEN

Notes

- All courses selected for the social studies pre-education track must be approved by an academic advisor.
- At least half of these courses must be upper-division (1000-level) courses.
- Students are also encouraged to participate in an internship during their degree program and may fulfill some CGS general education and major requirements by completing a study abroad program.

Requirements are subject to change. Check with an academic advisor before registering.

An internship program is available through the College of General Studies. Please see your advisor for additional information.

General Education Requirements

To earn a Bachelor of Arts or a Bachelor of Science degree in the College of General Studies, you must satisfactorily complete a minimum of 120 credits (approximately 40 courses), at least 30 credits of which must be in upper-division (1000-level) courses (or 24 credits if pursuing the Natural Sciences major). These 1000-level courses may come from any of the requirements for the degree listed below.

General Education Requirements (GERs) provide you with an opportunity to discover interests you never knew you had, all while earning credits toward graduation. And, no matter what your future holds, be it a career or grad school, GERs prepare you by emphasizing skills employers want (like critical thinking, problem solving, written and oral communication) and giving you the opportunity to become more aware of our increasingly diverse and interconnected world.

The College of General Studies provides a liberal arts and pre-professional education for undergraduate students that is grounded in scholarly excellence. Pitt offers you the knowledge, understanding, analytical tools, and communication skills you need to become perceptive, reflective, and intellectually self-conscious citizens within a diverse and rapidly changing world. GERs are at the core of our education.
Our General Education Requirements changed for students entering as of Fall 2018 (2191) term. See the CGS General Education Requirements for Fall 2018 and afterward here or visit the CGS General Education Requirements website.

Writing (9 credits)

Written communication is central to almost all disciplines and professions. Developing written proficiency is a lifelong process, and it is especially important that undergraduate education accelerates and directs that process toward the achievement of writing skills that will provide a base appropriate for professional or graduate education or for professional employment.

Introductory Composition Course (3 credits)

Students are required to take the college-level introductory composition course ENGCMP 0200 Seminar in Composition (SC). Students are exempted from this course if they earned a 660 on the SAT Evidence-Based Reading and Writing Section and a 5 on the Advanced Placement Exam. Given the importance of establishing a sound foundation for a student's writing, all students are required to pass SC with a grade of C- or better by the time they have completed 24 credits in enrollment. (Students who do not have a 560 on the SAT or a 24 or above on the ACT might also be required to take the skill-development course ENGCMP 0150 Workshop in Composition before enrolling in SC.)

Note for students transferring from the School of Engineering into CGS: successful completion of ENGR 0012 Intro to Engineering Computing may be used in place of ENGCMP 0200 Seminar in Composition.

Two Writing Intensive Courses (6 credits if not overlapped with other General Education requirements)

Writing intensive courses (W-Courses) are designed to teach writing within a discipline through writing assignments that are distributed across the entire term. In these courses, students will produce at least 20 - 24 pages of written work. A significant portion of this work should be substantially revised in response to instructor feedback and class discussion. All students must complete two courses that are designated as 'W-Courses', or one W-Course and a second English composition course. Students should satisfy one of these requirements by taking a W-Course in their major if it is available. Students may not transfer credits in to satisfy this requirement. W-courses can be overlapped with other General Education courses, except for Professional Communication.

Math/Algebra (3 credits)

Mastering college-level algebra is required for all students. These skills are foundational for student success in other general education courses.

Students are exempt from having to take Algebra with a 620 SAT Math or 27 ACT Math. Students who do not meet these criteria must earn a C- or higher in MATH 0020, MATH 0025, MATH 0031, CS 0004, or CS 0007. Given the importance of establishing a sound foundation in mathematics, all students are required to satisfy the Algebra requirement by the time they have completed 30 credits in enrollment.

Quantitative and Formal Reasoning (3 credits)

All students are required to take and pass with a grade of C- or better at least one course in university-level mathematics (other than trigonometry) for which algebra is a prerequisite, or an approved course in statistics or mathematical or formal logic.

A C- or better is needed in a course that satisfies this requirement. Students who qualify for placement in an upper-level course in mathematics on a proficiency placement test are exempt.

Diversity (3 credits)

Diversity courses focus centrally and intensively on issues of diversity, and do so in a manner that promotes understanding of difference. They provide students with analytical skills with which to understand structural inequities and the knowledge to be able to participate more effectively in our increasingly diverse and multicultural society. The courses may address, though not be limited to, such issues as race, gender, ethnicity, sexuality, religious difference, and/or economic disparity.
All students must complete one course that is designated as a Diversity course but may take this course within their major field of study, if available. Diversity courses may also be courses that fulfill other General Education Requirements. (3 credits if not overlapped with another General Education course)

Language/Communication (6-10 credits)

All students are required to take a sequence of two courses that provide them with advanced study of a second language other than English, or the ability to develop their skills in oral and professional communication. Students choose one of the following options below:

Option 1: A Sequence of Two Courses in a Second Language (6-10 credits)

Students complete with a grade of C- or better two terms of university-level study in a second language other than English. Exemptions will be granted to students who can demonstrate elementary proficiency in a second language through one of the following:

1. Having completed three years of high school study of a second language with a grade of B or better in each course;
2. Passing a special proficiency examination;
3. Transferring credits for two terms or more of approved university-level instruction in a second language with grades of C or better;
4. Having a native language other than English.

Option 2: A Sequence of Two Courses in Oral and Professional Communication (6 credits)

These classes advance the skills of the student to perform effectively in workplace environments or the public by communicating ideas and concepts and/or introduce students to theories that analyze and explain effective communication in these settings. Students must complete one of the following with a grade of C- or better: COMMRC 0520 or COMMRC 0500. Students select a second class from a list of approved courses.

Humanities and Arts, Social Sciences, and Natural Sciences (27 credits)

Each student is required to take nine courses in the humanities, social sciences, and natural sciences as distributed below. Such courses allow students to pursue their own interests while they explore diverse views of a broad range of human cultures, modes of thought, and bodies of knowledge. The courses that fulfill these requirements are truly courses in the disciplines that draw on the unique resources of a research university.

One course in Literature (3 credits)

By studying a range of literary and other texts in this course, students will be introduced to the techniques and methods of textual analysis and will develop critical perspectives on a variety of forms of cultural expression.

One course in the Arts (3 credits)

This course introduces students to modes of analysis appropriate to music, theater, or the visual and plastic arts. It may take the form of a survey, the study of a genre or period, or may focus on a particular artist.

One course in Creative Work (3 credits)

In this course, students are expected to produce some form of creative work, and they will also be trained in the techniques and modes of its production. The course could be situated in theater, studio arts, writing, visual arts (including photography, film), music, and dance; or it may be a course that engages in innovative or original work in relation to written, oral, or visual material, new media, social media, and other contemporary forms of communication and representation.

One course in Philosophical Thinking or Ethics (3 credits)

This course will emphasize close and critical reading of theories about knowledge, reality, humanity, and values. Courses could focus on human nature; scientific reasoning; theories of cognition and consciousness; human/social rights; competing systems of belief; morality; concepts of freedom; theories of justice; social obligations/constraints; or ethics, including applied or professional ethics.

One course in Social Sciences (3 credits)

A course that treats topics considered of significant importance in the social or behavioral sciences (including social psychology). Courses will introduce students to the subject matter and methodology of a particular discipline and will involve them in the modes of investigation, analysis, and judgment characteristically applied by practitioners.
One course in Historical Analysis (3 credits)

In this course, students will develop skills and methods by which to understand significant cultural, social, economic, or political accounts of the past. The course may focus on pivotal moments of change, or important transitions over longer periods of time. Courses could explore developments in science, technology, literature, or art, and the ideas around them, or examine critical historical shifts by analyzing various data or cultural forms.

Three courses in the Natural Sciences (9 credits)

These will be courses that introduce students to scientific principles and concepts rather than offering a simple codification of facts in a discipline or a history of a discipline. The courses may be interdisciplinary, and no more than two courses may have the same primary departmental sponsor.

Global Awareness and Cultural Understanding (9 credits)

Each student must complete three courses as distributed below:

One course in Global Issues (3 credits)

This course will examine significant issues that are global in scale. Courses could address, for example: globalization; the global and cultural impact of climate change/sustainability; the effects of and resistances to colonialism; or worldwide issues related to health, gender, ethnicity, race, technology, labor, law or the economy.

One course in a Specific Geographic Region (3 credits)

This course will be an in depth study and analysis of a particular region or locality outside the United States.

One course in Cross-Cultural Awareness (3 credits)

This course, through cross-cultural perspective, will promote knowledge of and reflection upon the cultures of Asia, the Middle East, Africa, Latin America, the Caribbean, or the indigenous peoples of the world past and present. Students will develop an understanding of cultures, traditions, and societies that differ substantially from those that prevail in North America and Europe.

Overlapping of General Education Courses

- Courses taken for general education requirements can also be applied to major requirements, when applicable.
- Diversity courses are allowed to overlap with other general education requirements.
- Writing ('W') courses are allowed to overlap with other general education requirements except for the Professional Communication requirement.
- Students may overlap the second course in their language sequence, taken at the college level, with the Geographic Region requirement, except for American Sign Language. This does not apply to students who satisfy the Language requirement through high school study, a proficiency examination, or native proficiency.

Specialized Study (the Major) (30-36 credits)

The baccalaureate degree, in addition to providing certain skills and broad exposure to the major bodies of knowledge, also allows the opportunity to specialize in a particular field, providing depth of experience essential for vocational competence or further graduate study. An outline of each major is available on the CGS Web site, www.cgs.pitt.edu.

Students admitted to CGS can choose from the following majors. Many majors offer a combination of face-to-face and online courses.

- Administration of justice
- Dental hygiene (for licensed dental hygienists)
- Health services (BA and BS)
- Humanities
- Legal studies
- Media and professional communications
- Natural sciences
Public service
Social sciences

Students who want a major in an arts and sciences field can begin in CGS and transfer to the Dietrich School of Arts and Sciences after completing 12 credits including the mathematics and seminar in composition requirements. Admission is determined by the Dietrich School.

Electives

Any credits not used specifically to satisfy the previous requirements are considered electives. Electives can be taken in a wide variety of subjects to complement, reinforce, or add further breadth to the chosen program of study or to help meet the requirements of a minor or certificate program.

Minor

Administration of Justice Minor

Current Pitt students interested in a CGS minor, rather than a major, in administration of justice should declare the minor by completing the CGS minor/certificate declaration form online. If you are a CGS student interested in adding this minor, please contact your CGS advisor.

Minor Requirements (15 credits)

Students must complete five courses (15 credits) with at least three courses from the University of Pittsburgh. A 2.0 average is required in the minor.

Required Courses

- LCJS 1400 - THE SYSTEM OF CRIMINAL JUSTICE
- LCJS 1200 - CRIMINAL LAW
- ADMJ Electives
  See Administration of Justice Major for current list of electives.

Legal Studies Minor

Current Pitt students interested in a CGS minor, rather than a major, in legal studies should declare the minor by completing the CGS minor/certificate declaration form online. If you are a CGS student interested in adding this minor, please contact your CGS advisor.

Minor requirements:

For the minor, students must complete five courses (15 credits) with at least three courses from the University of Pittsburgh. A 2.0 average is required in the minor.

Required Courses

- LCJS 1580 - THE LEGAL SYSTEM

LEGLST Elective Courses

See the Legal Studies minor page for a list of approved electives.

Public Service Minor

Current Pitt students interested in a CGS minor, rather than a major, in public service should declare the minor by completing the CGS minor/certificate declaration form online. If you are a CGS student interested in adding this minor, please contact your CGS advisor.
Minor Requirements

For the minor, students must complete five courses (15 credits) with at least three courses from the University of Pittsburgh. A 2.0 average is required in the minor.

Required courses:

- PUBSRV 0020 - INTRODUCTION TO PUBLIC SERVICE
- PUBSRV 0030 - PUBLIC POLICY PROCESS
- PUBSRV 0050 - ETHICS AND ACCOUNTABILITY
- PUBSRV Elective Courses
  See the Public Service minor page for a list of approved electives.

Note:

Requirements are subject to change. Check with an academic advisor before registering.
Kenneth P. Dietrich School of Arts and Sciences

The Kenneth P. Dietrich School of Arts and Sciences is the oldest and largest academic unit within the University of Pittsburgh, with more than 11,000 students and over 1,000 faculty from around the world. The Dietrich School offers a competitive liberal arts education within the setting of a comprehensive research university and a dynamic urban setting.

The Dietrich School instructional programs provide a liberal arts curriculum designed to prepare students for the world of work, research, professional schools, and graduate programs. This education helps students cultivate the skills and knowledge that provide a foundation for lifelong learning, and educates students so that they can become perceptive, reflective, and intellectually self-conscious citizens of the world. The main elements of the Dietrich School general education are: an acquaintance with great works of art, literature, and philosophy; an understanding of social institutions and processes; a sense of history and familiarity with the richness and variety of human cultural achievements; an awareness of the main ideas of contemporary natural science and mathematics; and engagement with languages and cultures other than one's own.

Dietrich School Undergraduate Web site

Please visit www.asundergrad.pitt.edu for detailed information on:

- Dietrich School majors, minors, and certificates
- Dietrich School general education requirements
- Academic resources, services, and opportunities
- Additional policies and procedures for current Dietrich School students

Dietrich School Undergraduate Calendar

www.asundergrad.pitt.edu/academic-calendar

Admission through the Office of Admissions and Financial Aid

The following students are admitted to Dietrich School by the Office of Admissions and Financial Aid. Please visit https://admissions.pitt.edu for more information.

- First-year students (see Pittsburgh campus First-Year Student Admissions for general admissions information).
- Transfer students who have previously enrolled at a college or university other than the University of Pittsburgh. These include former University of Pittsburgh students who have since earned college credits at another institution and now wish to return to the Dietrich School.
- Continuing education students: Adults who wish to begin or continue to work toward an undergraduate degree by taking a full- or part-time course load should apply as new or transfer students through the Office of Admissions and Financial Aid.
- Students who have previously earned a bachelor's degree from an institution other than the University of Pittsburgh and now wish to earn a second undergraduate degree.
- International students should refer to admission guidelines on the Office of Admissions and Financial Aid Web site.
Transfer Students/Transfer Credits

Previous course work for transfer students is evaluated by the Dietrich School Office of Student Records with respect to general education requirements. Before initial registration, transfer students receive an Undergraduate Degree Requirement Evaluation indicating which requirements they have satisfied and which ones must be completed in order to complete their degree in the Dietrich School.

Courses from other colleges and universities are evaluated according to the following guidelines:

- Courses must be passed with a grade of C or better and must be earned at an institution accredited by the appropriate regional accrediting association. Courses that have reasonable counterparts at the University are eligible for transfer. When requested, students are responsible for supplying descriptions for courses taken elsewhere.
- A maximum of 60 credits can be accepted from accredited community colleges and two-year junior colleges. A maximum of 90 credits can be accepted from accredited four-year institutions. All students must earn their final 30 credits toward a Dietrich School degree and at least half of the credits for their majors, minors, and/or certificates while enrolled as a Dietrich School student.
- The number of transfer credits granted for a given course cannot exceed the number awarded on the transcript of the original school or the number earned for the corresponding course in the Dietrich School. Credits earned on the quarter system will be converted into semester credits. A quarter credit is equal to two-thirds of a semester credit (e.g., five quarter-system credits equal three semester credits, and three quarter-system credits equal two semester credits).
- The Dietrich School accepts credits, but not grades, for transfer. Consequently, any courses that are accepted for transfer will be used as credit toward graduation, but will not be calculated into the student's GPA at the University of Pittsburgh.
- Transfer credits do not apply towards University honors.

Please contact the Dietrich School Office of Student Records at 412-624-6480 for information about transfer credit evaluation. Please note: All transfer credits may be subject to re-evaluation when a student transfers from one school to another within the University of Pittsburgh.

Admission through the Dietrich School of Arts and Sciences

The following students must apply directly to the Dietrich School for admission.

Transfers from Other University of Pittsburgh Schools at the Pittsburgh campus

To transfer to the Dietrich School from another school at the Pittsburgh campus, students should request that the other Pittsburgh campus school send their records to the Dietrich School. The Dietrich School will review the student records and send letters of acceptance to students who are eligible to transfer into the Dietrich School. To qualify, students must have a minimum overall GPA of 2.0 and have completed their basic skills requirements in composition and algebra according to Dietrich School guidelines. In addition, students enrolled in the College of General Studies (CGS) must earn at least 12 credits through CGS before applying for transfer to the Dietrich School.

Upon acceptance into the Dietrich School, students will receive evaluations of their previous course work, acknowledging the courses that have fulfilled Dietrich School skills and general education requirements. To graduate with a degree from the Dietrich School, students are required to earn their last 30 credits while enrolled in the Dietrich School and to earn at least half of the credits for their majors, minors, and certificates while enrolled in the Dietrich School.

Relocation from University of Pittsburgh Regional Campuses

1. For students seeking guaranteed relocation who have earned credits only from one of the regional campuses, the normal requirement is for completion of 45 credits at the specific regional campus, with a minimum GPA of 3.0.
2. For students seeking guaranteed relocation who have earned 30 or more credits at the specific regional campus and a total of 45 credits overall, a minimum GPA of 3.0 in all courses is required.
3. For students seeking relocation who have between 15 and 30 credits at the specific regional campus and a total of 45 credits overall, a minimum GPA of 3.0 is required in all courses, and the normal requirements of the Dietrich School of Arts and Sciences for external transfer students must be met. For these students, relocation is not guaranteed. Students must complete at least 15 credits at the regional campus to transfer to the Pittsburgh campus.
4. All students must complete the Algebra and Composition skills requirements before relocating from a regional campus.

**Students Seeking a Second University of Pittsburgh Degree**

Students who have earned a bachelor's degree in any University of Pittsburgh school or campus and wish to earn a second undergraduate degree in the Dietrich School should apply directly to the Dietrich School. Applicants should note the following:

- Course work for the second degree will continue to be recorded on the original University of Pittsburgh undergraduate transcript.
- All appropriate course work from the first degree will apply to the second degree.
- Students must earn a minimum of 30 new credits. No coursework repeated from the first degree will count toward the second degree.
- At least half of the credits for the second major toward the second degree must be earned while enrolled in the Dietrich School.
- The cumulative GPA and credit total will be based on all credits from the first degree and all new course work taken that applies to the second degree.

**Students Seeking Reinstatement**

The following students must apply for reinstatement through the Dietrich School of Arts and Sciences.

- Dietrich School students who have not enrolled for three consecutive terms (one calendar year);
- Dietrich School students who have completed their suspension periods and wish to continue their studies; and
- Students who last attended another school at the Pittsburgh campus but have not enrolled in classes for three consecutive terms (one calendar year), have not attended another institution, and wish to be admitted to the Dietrich School.

Students who are returning after completing their suspension period will be reinstated on probation.

The deadline for reinstatement is August 15 for the fall term, December 15 for the spring term, and one week before the beginning of classes in the summer term or summer session. Students who last attended another University of Pittsburgh school on the Pittsburgh campus or who attended a regional campus must meet the admissions requirements for transfer to the Dietrich School. Students' academic standing upon reinstatement will continue to be that attained at the end of their last term in residence.

Students who are reinstated for a particular term but do not enroll for that term must apply for reinstatement again if they wish to attend for a later term. Students who have been away from the University for two or more years will be subject to the requirements of the school and of their major at the time of their reinstatement, rather than those in place at the time of their last attendance.

**Post-baccalaureate Students**

Students who have completed an undergraduate degree and wish to take additional undergraduate courses on a non degree-seeking basis may apply directly to the College of General Studies.

**Academic Integrity**

As members of the University of Pittsburgh community, Dietrich School students are expected to meet their obligation to exhibit honesty and to respect the ethical standards of the University community and of their chosen field of study in carrying out academic assignments. Dietrich School students are therefore expected to familiarize themselves with the published rules and regulations governing academic integrity. For specific information, see the Academic Integrity Code.

The Dietrich School maintains an Academic Integrity Board, consisting of both faculty and students, for adjudication of grievances from faculty about student behavior and from students about faculty behavior.

**Grading Policies**
**Letter Grade Option**

The Dietrich School adheres to the following University letter grade system without exception.

<table>
<thead>
<tr>
<th>Grade</th>
<th>GPA</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+</td>
<td>4.00</td>
</tr>
<tr>
<td>A</td>
<td>4.00</td>
</tr>
<tr>
<td>A-</td>
<td>3.75</td>
</tr>
<tr>
<td>B+</td>
<td>3.25</td>
</tr>
<tr>
<td>B</td>
<td>3.00</td>
</tr>
<tr>
<td>B-</td>
<td>2.75</td>
</tr>
<tr>
<td>C+</td>
<td>2.25</td>
</tr>
<tr>
<td>C</td>
<td>2.00</td>

<tr>
<td>F</td>
<td>0.00</td>
</tr>
</tbody>
</table>

**S/NC Grade Option**

The Dietrich School offers both a standard letter-grade option and the Satisfactory/No-Credit (S/NC) option for students enrolled in most Dietrich School courses. Under the S/NC option, a student who does satisfactory work (a grade of C or better) in a course receives the grade of S. If the student's work is not satisfactory (a grade of C- or lower), the grade of NC (no credit) is given. Courses for which an S is earned are counted toward graduation but are not computed in the GPA. Courses for which an NC is earned are not counted toward graduation or the GPA, since the NC designates that no credit has been earned.

Students can select the S/NC grade option when enrolling for a course. After the end of the add/drop period, a student must complete a Grade Option/Audit Request form and submit it to the Office of Student Records by the Grade Option deadline noted each term on the Dietrich School undergraduate calendar.

Note: There are some formal limitations to a student's choice of grading systems; he or she should check with an academic advisor before deciding to take a course S/NC.

**Audit (N Grade)**

To audit a course, a student must register for and pay tuition for the course. A Grade Option/Audit Request form must be submitted for undergraduate courses by the grade option change deadline noted each term on the Dietrich School undergraduate calendar. The instructor for the course must sign the Grade Option/Audit Request form before the form can be processed. Completed forms must be submitted to the Office of Student Records. Students who audit a course are given an N grade, which means that the course is counted neither towards graduation nor the GPA. A student typically chooses to audit a course for personal enrichment.
G Grades

At the discretion of an instructor, a G grade may be awarded when students who have been attending a course and making regular progress are prevented from completing the course due to extenuating personal circumstances. Students who are assigned a G grade are required to complete course requirements no later than one year after the term or session in which the course was taken, or by an earlier deadline established by the instructor. After that year, the grade will automatically change to NG; an NG grade cannot be changed, and the credits will no longer appear as "in progress." The student will be required to re-register for the course if it is needed to fulfill requirements for graduation. The Dietrich School encourages students with G grades to work with their instructors to complete the requirements for the course as soon as possible.

Academic Honors

Outstanding students in the Dietrich School are recognized for their academic achievement in several ways.

Dean's List

After grades are posted for the fall and spring term, Dietrich School students whose academic performance indicate outstanding achievement are recognized on the Dean's List. To be placed on the Dean's List, a student must have earned at least 12 letter grade credits (not including courses taken on the Satisfactory/No-Credit option) with a term GPA of at least 3.50 and no grade lower than a C.

University Honors

Those members of a Dietrich School graduating class who have attained an outstanding scholastic record and have completed at least 60 letter-graded credits at the University of Pittsburgh are graduated with honors. All coursework completed at the University for a letter grade is calculated in the grade point average. University honors are awarded in the following levels of distinction according to grade point average at graduation:

- Summa Cum Laude: 3.75
- Magna Cum Laude: 3.50
- Cum Laude: 3.25

Departmental Honors

Many departments offer an honors major. Successful completion of the honors major, as well as normal graduation requirements, lead to the awarding of the bachelor's degree with departmental honors. For detailed information, contact the departmental advisor or visit the department's Web site.

Academic Standing

The Dietrich School is committed to the success of its students and has guidelines in place to connect students with the appropriate resources at the earliest sign of academic difficulty. A student's academic standing is comprised of three factors: term GPA, cumulative GPA, and progress toward a degree. Students in the Dietrich School are expected to maintain a cumulative GPA and term GPA of 2.00 or above for each term of enrollment. In addition, full-time students are expected to successfully complete a minimum of 12 credits during each term of enrollment. Part-time students are expected to successfully complete a minimum of 3 credits during each term of enrollment.

Academic Alert is a marker designed to notify students who show signs, early on and throughout their academic career, of jeopardizing successful progress toward the completion of their undergraduate degree. This may be due to their inability to maintain a satisfactory GPA and/or failing to fulfill the algebra or composition requirement within the first two terms of full-time enrollment. Students who receive two consecutive Academic Alerts will be placed on Academic Probation.
Students are placed on Academic Probation after earning a GPA between a 1.50 and a 1.99 over two consecutive terms or have one semester at or below a 1.49 cumulative GPA. Students may also be placed on Academic Probation if they fail to make progress toward their degree (e.g. failing to earn any academic credits).

Students currently on Academic Probation who earn a term GPA below a 2.00 or fail to make progress toward their degree will be subject to Academic Suspension. After being suspended, students are not eligible to re-enroll for one calendar year. Following suspension, students are required to apply for reinstatement at the Dietrich School Undergraduate Dean's Office. Students returning from academic suspension are reinstated on academic probation and are required to develop an academic success plan upon their return. These reinstated students' records are reviewed after each subsequent term of enrollment.

Students who have been reinstated from Academic Suspension must earn at least a 2.00 GPA for each term that they enroll until they have achieved a cumulative GPA of a 2.0 or above. If a student fails to earn a 2.00 term GPA, they are subject to Academic Dismissal from the University. Dismissed students are not eligible for reinstatement.

Probation and Eligibility for Financial Aid

The Office of Admissions and Financial Aid (OFA) monitors financial aid eligibility. Students on probation should contact OFA at 412-624-7488 for more information.

Credit Policies

The following section details the Dietrich School's rules regarding allowable credits and courses for students earning a degree in the Dietrich School.

Advanced Placement (AP) Credits

See the AP credit section of the Office of Admissions and Financial Aid Web site.

Summer Courses Taken Elsewhere

Dietrich School students in good academic standing (cumulative GPA of at least 2.00) may attend a summer or special session of another accredited institution in order to supplement their program, provided they receive prior approval from the Dietrich School Office of Student Records. Students must submit a completed summer course approval form (available on the Student Records Web site), as well as the relevant course descriptions to the Office of Student Records. Students may not repeat any course taken at the University of Pittsburgh (passed or failed) at another institution. A maximum of two courses (no more than 8 credits) may be taken in a single period of enrollment elsewhere.

Credit by Examination

In rare circumstances, credit by examination may be offered. Contact the Office of Students Records (studentrecords@as.pitt.edu or 412-624-6480) with questions.

Departmental Credits

No more than 60 credits may be taken in one department, and normally no more than 40 in a single department are considered desirable in a well-balanced program.

Repeating a Course/Duplication of Course Content

If a student repeats a course, they must complete a course repeat form and submit it to the Office of Student Records. Please note the following.
• The original grade remains on the transcript, but is not counted in the calculation of the GPA.
• Any grade earned in the repeated course will be factored into the GPA, even if it is lower than the original grade.
• The repeated course does not increase the number of credits counted toward meeting degree requirements unless an F is replaced by a passing grade.
• W, R, N, or NC grades reported for the repeated course will not be identified as a course repeat, thus the original grade earned will continue to be counted in the GPA. Incomplete (G) grades will not be identified as repeated courses until the course work is completed.
• No sequential course may be repeated for credit after a higher numbered course in that sequence has been passed with a C or higher grade.
• No course can be repeated at any other institution.
• Students may repeat a course no more than two times.

Students may not earn duplicate credit for courses that substantially duplicate the content of courses taken previously. For example, duplicate credit cannot be earned for the following:

• Both a regular version of a course and an honors version of that course.
• Courses that are cross listed with a course the student has already taken.
• Courses taken under a newly assigned course number if already taken under an old course number.
• Certain specific courses that duplicate material.

Students with questions about repeating courses or duplicating course content should consult with their academic advisors.

**English Language Institute Courses**

LING 0007, LING 0008, and LING 0009 courses count toward the degree but are not counted toward a linguistics major.

**Enrollment in Graduate Courses**

Undergraduate Dietrich School students who demonstrate exemplary competencies and proficiencies may take advantage of the rich variety of graduate courses offered by the Dietrich School. Credits earned in graduate courses may count toward the degree. Students should consult with both their academic advisor and instructor of a course before registering.

**Independent Study, Undergraduate Research, Internships, and Undergraduate Teaching**

Dietrich School students may earn up to 24 credits of independent study, undergraduate research, internships, and undergraduate teaching as part of the 120 credits required for a degree. Ordinarily, no more than six credits may be earned in any term in a single undergraduate research experience or internship. Under certain conditions, students in good standing may register for a block of 15 credits of independent study. These credits are to be earned for work done within one academic term. A student may register for a 15-credit independent study term only once during his or her college career. This needs to be approved by an assistant dean prior to registration.

Learning Agreement forms for independent study, undergraduate research, and internships, as well as specific information about eligibility, procedures, and guidelines, are available from the academic department through which the activity will be conducted.

**International Baccalaureate**

The Dietrich School recognizes the International Baccalaureate (IB) Higher-Level Examinations and may grant advanced standing and/or credit for various fields for scores on the Higher-Level Examinations, which range from five to seven. Advanced standing is determined individually by subject according to departmental policy. Students should send the results of their IB examinations directly to the Office of Student Records. No credit will be given for Subsidiary-Level Examinations.

**Lower-Level or Sequential Courses**
Credit cannot be earned for courses taken after more advanced course work in the same field has been successfully passed with a C or higher. For example, credit cannot be earned for an algebra course taken after the successful completion of a calculus course.

**Normal Credit Load**

A normal credit load is 12 to 18 credits per academic term (e.g. fall and spring). Students should complete a minimum of 15 credits per term in order to graduate within four years.

Any term in excess of 18 credits requires the recommendation of the student's academic advisor and approval from an assistant dean. Call 412-624-6480 to make an appointment with an assistant dean. Students who enroll for more than 18 credits in a term will be charged additional tuition per credit.

**Physical Education**

Students are not required to take any courses in physical education (PEDC), but they may do so. Up to four credits of courses offered by the School of Education's Department of Health, Physical, and Recreation Education may be counted toward a Dietrich School degree.

**Reserve Officer Training Corps (ROTC)**

Credits earned in aerospace science (Air Force ROTC), military science (Army ROTC), or naval science (Navy ROTC through cross registration at Carnegie Mellon University [CMU]) are not accepted toward a Dietrich School degree. The Dietrich School will grant up to four credits toward graduation for the following military science courses in lieu of physical education and recreation courses: AFROTC 0001, AFROTC 0002, AFROTC 0003, and AFROTC 0004; MILS 0011, MILS 0021, MILS 0022, MILS 1031, MILS 1032, MILS 1041, and MILS 1042. Any four credits of Navy ROTC courses from CMU will count in lieu of physical education and recreation courses.

**Statute of Limitations**

All of the credits required for a degree, whether earned in residence or transferred from another institution, must have been earned within 12 years prior to the date on which the degree is awarded. However, when given evidence that the previous courses still provide adequate preparation for courses yet to be taken and still represent a reasonable part of the total academic program, this limitation may be waived. In such cases, the waiver is for a specific period during which the program must be completed.

**Online Courses**

Students may count a maximum of 24 credits of online coursework completed at Pitt toward their degree. First-year students may not take online courses in their first term. For students who begin in the summer or fall, they may not take online courses until the spring. For students who begin in the spring, they may not take online courses until the summer.

**Adding and Dropping Courses**

Generally, students enrolled in the Dietrich School are not required to have their academic advisor's approval before adding or dropping a course. However, Student Support Services (SSS) students and student athletes must see their academic advisor before processing an add/drop. Additionally, all first-year students are strongly urged to consult their academic advisor before adding or dropping a course.

**Withdrawing from Courses**

First-year students are required to see their academic advisor before withdrawing from any course. In addition, any student considering withdrawing from a course that fulfills either the composition or the algebra requirement must first see an assistant dean (please call 412-624-6480 to schedule an
appointment). Withdrawing from one or more courses may impact a student's financial aid status. Withdrawal from a course must be done by the withdrawal deadline, which is posted in the Dietrich School undergraduate calendar and on the Office of the University Registrar's Web site.

**Bachelor Degree Requirements**

The following sections describe the general requirements for all majors offered by the Dietrich School.

**Graduation Requirements**

To graduate from the Dietrich School, students must earn at least 120 degree credits with a minimum 2.00 GPA. In addition, students must achieve a 2.00 GPA both in the major and in the minor or certificate. Within the 120 credits, students must fulfill the Dietrich School's curriculum requirements, which include General Education Requirements and requirements for a major, minor, or certificate (see General Education Requirements, and Requirements for Major sections below). Furthermore, students must earn at least half of the credits for their major(s), minor(s), and certificates(s) and the final 30 credits toward the Dietrich School degree while enrolled as a Dietrich School student.

**Graduation Application**

Students must file an application for graduation with the Office of Students Records by a specified deadline prior to the term during which they expect to complete all requirements (i.e., a student who expects to graduate at the end of the spring term must apply before the end of the immediately preceding fall term; see the Dietrich School undergraduate calendar each term for application deadlines). This permits Student Records to make a complete appraisal of the student's record before the student begins the coursework of the final term. Any deficiency discovered during the evaluation will be communicated to the student by email, and should be promptly corrected either in conference with the departmental advisor at registration or during the add/drop period in the final term. The caps, gowns, and hoods for the commencement ceremony are purchased through the University Store on Fifth. Diplomas are mailed through the Registrar's Office.

**General Education Requirements**

The Dietrich School of Arts and Sciences is committed to providing the best possible education for its undergraduate students. This education is best served through a clear and innovative curriculum that provides students with the knowledge, analytical skills, disciplinary understanding, intellectual curiosity, and creative opportunities that will allow them to engage and adapt in an increasingly diverse and rapidly changing world. Diversity and inclusion are part of the core mission of our school and the university and are key matters for our students and society. Of allied importance is the understanding of complex global issues and different cultures.

All students graduating from the Dietrich School must satisfy general education requirements detailed below. Students select from a range of approved courses to meet these requirements.

**A. Writing**

Written communication is central to almost all disciplines and professions. Developing writing proficiency is a lifelong process, and it is especially important that undergraduate education accelerates and directs that process toward the achievement of writing skills that will provide a base appropriate for professional or graduate education or for professional employment. The school requires that all students complete the following writing courses during their undergraduate career.

**1. Composition**

Students must complete the composition requirement, ENGCMP 0200 Seminar in Composition or its equivalent, with a minimum grade of C- by the end of their first year of study. Part-time students should complete the requirement within their first 30 credits. Transfer students must complete this requirement within their first 15 credits.
Based on placement, students may be required to complete ENGCMP 0150 Workshop in Composition (or its equivalent) prior to enrolling in ENGCMP 0200. Students may be exempt from the composition requirement with a 660 or above Evidence-Based Reading and Writing SAT score or an ACT English score of 27 and a 5 on the AP English: Language and Composition or AP English: Literature and Composition.

2. Two Writing-Intensive Courses

Writing intensive courses (W-Courses) are designed to teach writing within a discipline through writing assignments that are distributed across the entire term. In these courses, students will produce at least 20-24 pages of written work. A significant portion of this work should be substantially revised in response to instructor feedback and class discussion.

All students must complete two courses that are designated as W-Courses. Students must satisfy one element of this requirement within their major field of study. W-Courses may also be courses that fulfill other General Education Requirements.

B. Algebra and Quantitative and Formal Reasoning

1. Algebra

Students must complete the algebra requirement, MATH 0031 College Algebra or its equivalent, with a minimum grade of C- by the end of their first year of study. Part-time students should complete the requirement within their first 30 credits. Transfer students must complete this requirement within their first 15 credits. Students will be exempt from the algebra requirement with a 620 or above Math SAT score or a 27 or above Math ACT score.

2. Quantitative and Formal Reasoning

All students are required to take and pass with a minimum grade of C- at least one course in university-level mathematics (other than trigonometry) for which algebra is a prerequisite, or an approved course in statistics or mathematical or formal logic in a department of the Dietrich School of Arts and Sciences.

C. Language

A Sequence of Two Courses in a Second Language

All students are required to complete with a minimum grade of C- two terms of university-level study in a second language other than English. Exemptions will be granted to students who can demonstrate elementary proficiency in a second language through one of the following:

1. Having completed three years of high school study of a second language with a grade of B or better in each course;
2. Passing a special proficiency examination;
3. Transferring credits for two terms or more of approved university-level instruction in a second language with grades of C or better;
4. Having a native language other than English.

D. Diversity

Diversity courses focus centrally and intensively on issues of diversity, and do so in a manner that promotes understanding of difference. They provide students with analytical skills with which to understand structural inequities and the knowledge to be able to participate more effectively in our increasingly diverse and multicultural society. The courses may address, though not be limited to, such issues as race, gender, ethnicity, sexuality, religious difference, ability difference, and/or economic disparity.

All students must complete one course that is designated as a Diversity course but may take this course within their major field of study. Diversity courses may also be courses that fulfill other General Education Requirements.
E. Division Requirements in the Humanities and Arts, Social Sciences, Natural Sciences

Each student is required to take nine courses in the humanities, social sciences, and natural sciences distributed as below. Such courses allow students to pursue their own interests while they explore diverse views of a broad range of human cultures, modes of thought, and bodies of knowledge. The courses that fulfill these requirements are truly courses in the disciplines that draw on the unique resources of a research university.

1. A Course in Literature

By studying a range of literary and other texts in this course, students will be introduced to the techniques and methods of textual analysis and will develop critical perspectives on a variety of forms of cultural expression.

2. A Course in the Arts

This course introduces students to modes of analysis appropriate to music, theatre, or the visual and plastic arts. It may take the form of a survey, the study of a genre or period, or may focus on a particular artist.

3. A Course in Creative Work

In this course students are expected to produce some form of creative work, and they will also be trained in the techniques and modes of its production. The course could be situated in theatre, studio arts, writing, visual arts (including photography, film), music, and dance; or it may be a course that engages in innovative or original work in relation to written, oral, or visual material, new media, social media, and other contemporary forms of communication and representation.

4. A Course in Philosophical Thinking or Ethics

This course will emphasize close and critical reading of theories about knowledge, reality, humanity, and values. Courses could focus on human nature; scientific reasoning; theories of cognition and consciousness; human/social rights; competing systems of belief; morality; concepts of freedom; theories of justice; social obligations/constraints; or ethics, including applied or professional ethics.

5. A Social Science Course

A course that treats topics considered of significant importance in the social or behavioral sciences (including social psychology). Courses will introduce students to the subject matter and methodology of a particular discipline and will involve them in the modes of investigation, analysis, and judgment characteristically applied by practitioners.

6. A Course in Historical Analysis

In this course, students will develop skills and methods by which to understand significant cultural, social, economic, or political accounts of the past. The course may focus on pivotal moments of change, or important transitions over longer periods of time. Courses could explore developments in science, technology, literature, or art, and the ideas around them, or examine critical historical shifts by analyzing various data or cultural forms.

7. Three Courses in the Natural Sciences

These will be courses that introduce students to scientific principles and concepts rather than offering a simple codification of facts in a discipline or a history of a discipline. The courses may be interdisciplinary, and no more than two courses may have the same primary departmental sponsor.
F. Global Awareness and Cultural Understanding

Each student must complete three courses in global awareness and cultural understanding distributed as below.

1. A Course in Global Issues

This course will examine significant issues that are global in scale. Courses could address, for example: globalization; the global and cultural impact of climate change/sustainability; the effects of and resistances to colonialism; or worldwide issues related to health, gender, ethnicity, race, technology, labor, law, or the economy.

2. A Course in a Specific Geographic Region

This course will be an in-depth study and analysis of a particular region or locality outside of the United States.

3. A Course in Cross-Cultural Awareness

This course, through cross-cultural perspective, will promote knowledge of and reflection upon the cultures of Asia, the Middle East, Africa, Latin America, the Caribbean, or the indigenous peoples of the world past and present. Students will develop an understanding of cultures, traditions, and societies that differ substantially from those that prevail in North America and Europe.

Overlapping Credit Within the Dietrich School

Up to eight credits may be overlapped between any two majors, two certificates, and/or a major and certificate. Up to eight credits may be overlapped between a major and minor and/or certificate and minor. Up to four credits may be overlapped between two minors.

<table>
<thead>
<tr>
<th>Allowable credit overlap</th>
<th>Major</th>
<th>Certificate</th>
<th>Minor</th>
</tr>
</thead>
<tbody>
<tr>
<td>Major</td>
<td>8 credits</td>
<td>8 credits</td>
<td>8 credits</td>
</tr>
<tr>
<td>Certificate</td>
<td>8 credits</td>
<td>8 credits</td>
<td>8 credits</td>
</tr>
<tr>
<td>Minor</td>
<td>8 credits</td>
<td>8 credits</td>
<td>4 credits</td>
</tr>
</tbody>
</table>

The academic advisement report (AAR) will not be able to catch excessive overlap; advisors and students will need to continue to monitor overlapping credits.

Requirements for the Major

All students are required to complete a major of their choice, in addition to general education requirements, in order to graduate from the Dietrich School. The Dietrich School offers over 55 majors in 30 departments. Some departments offer more than one major. Each department specifies the particular courses needed to fulfill its major(s).

Students must complete the major with a 2.00 GPA, and half of the credits earned for the major must be earned at the University of Pittsburgh main campus.

Students declare their major by filling out an Academic Plan Change Form. Students normally declare their major during their fourth term of full-time study.

Note: Transfer students receive an evaluation of their previous course work indicating the equivalent University of Pittsburgh courses for which transfer credits have been awarded. Equivalent Dietrich School courses will meet requirements for the major where appropriate. Students who
believe that a previous course not equivalent to a Dietrich School course should meet a requirement for a major may petition the department to review that course.

**Minors and Certificates**

Minors and certificates are earned in addition to a major. Students must complete minors and certificates with a 2.00 GPA, and half of the credits earned for the minor or certificate must be earned at the University of Pittsburgh main campus. Students may overlap courses to fulfill requirements between a major, a minor, and/or a certificate in the following manner. Students who complete an approved minor or certificate will have it listed on their transcript, provided that the minor or certificate is indicated on the application for graduation.

**Special Academic Opportunities**

Dietrich School students may choose to pursue a variety of academic programs leading to multiple majors, majors within more than one department, or majors that either prepare students for or offer advanced admission to graduate or professional programs at the University of Pittsburgh.

**Double and Triple Majors**

Students can declare a double or triple major, but will usually earn only one degree. If one major leads to the BA degree and another to the BS degree, students must decide when applying for graduation which degree they wish to receive.

**Dietrich School of Arts and Sciences/Business Dual Major**

Qualified students may apply for admission to a Dietrich School of Arts and Sciences/ Business dual major. The dual major allows students to complement a Dietrich School major with a solid foundation in business. Students may apply to the program after their first year at the University of Pittsburgh.

**Double Degrees**

Dietrich School students may choose to simultaneously pursue more than one undergraduate degree, either within the Dietrich School (i.e., both a BA and a BS) or in another undergraduate school of the University. In general, earning two degrees requires a minimum of 150 credits and the completion of the curriculum requirements of both schools.

**Combined Degree Options**

These intensive programs give Dietrich School students the opportunity to complete their undergraduate degree while beginning their first year of a graduate or professional program. To qualify, students must:

- Complete 96 or more Dietrich School credits,
- Satisfy all of the general education requirements, and
- Be accepted into a graduate or professional school at the University of Pittsburgh.

**Preparation for Professional Programs of Study**

Students interested in spending their junior and senior years in the University of Pittsburgh's professional schools of Social Work, Health and Rehabilitation Sciences, or Pharmacy normally spend two years in the Dietrich School taking necessary prerequisite courses and electives in preparation for professional study. Although first-year students are accepted directly into the schools of Engineering, Nursing, Computing and Information, and the College of Business Administration (CBA), it is possible for students who begin in the Dietrich School to transfer into those schools after one or two years.
Preparation for Graduate Professional Studies

Although the Dietrich School does not offer specific majors in pre-law, pre-medicine, pre-dental medicine, or education, it is possible for students in the Dietrich School to complete all the necessary prerequisites for entry into these graduate professional schools while fulfilling their Dietrich School degree requirements.

Accelerated Law Admissions Program (ALAP)

The Accelerated Law Admissions Program (ALAP), open to any student enrolled in the Dietrich School, grants admission to the University of Pittsburgh's School of Law to those students who meet the ALAP's requirements. Students who enter the program complete their undergraduate major in three years, applying for admission to the School of Law during their junior year, and then go on to law school for another three years.

Students interested in the program are encouraged to declare a major early at the end of the first year in order to allow them to complete their undergraduate Dietrich School major(s) by the end of their third year. Also, interested students are encouraged to take summer classes during their second year in order to reduce the credits to be completed in their third year. The requirements for the ALAP are as follows:

- Students must complete 102 credits by the end of their junior year.
- Students must take three writing-designated courses (rather than two) beyond the freshman writing requirement.
- Students must take the Law School Admissions Test (LSAT) by the fall of their junior year. This would include the June, October, or December test.

Acceptance into the program is competitive, and only those students with above-average grades and competitive LSAT scores should apply.

Five-Year Program

- BS in statistics and an MA or MS in applied statistics: This program is intended to give outstanding students interested in statistics the opportunity to progress quickly toward their educational objectives. Contact the Department of Statistics for details.

Study Abroad

Dietrich School students are encouraged to add an international dimension to their undergraduate education through study abroad. Credit may be earned toward the Dietrich School degree through participation in one of several University of Pittsburgh programs or consortia-sponsored programs. Students may study in virtually any part of the world in these programs or others sponsored by most American or international institutions.

Visit the Study Abroad Web site at www.abroad.pitt.edu for more information.

Programs and Course Offerings

Certificate

Children's Literature Certificate

Books written for children are among the best-loved and best-remembered of all works of literature. They also provide some of the most important early learning experiences. In recent years, books written for children have attracted increasing interest from scholars and students as well as parents, educators, publishers, and journalists. What kinds of stories do we consider appropriate for children, and why? How have our opinions about this
topic changed over time and across different cultures? And how is literacy changing, now that children are exposed not only to books, films, and television, but also to video games and the world wide web?

The interdisciplinary Certificate in Children's Literature offers undergraduates the opportunity to bring together studies across a broad range of subjects as they contemplate these and other questions pertaining to youth literature and culture. Founded in 1981, the program is designed to meet the individual student's interests and strengths and fulfills the Arts and Sciences requirement for a related area. The Children's Literature Certificate provides a useful background for many areas of professional work and study. Many of our students pursue careers in elementary, secondary, and special education, or in information science, child care, or social work. Others students have gone to graduate school in the humanities (English, History, Film Studies) or social sciences (Sociology, Psychology, Anthropology). Recent graduates of our new "Writing Youth Literature" course have gone to internships at Sesame Street Productions and the Harvey Klinger Literary Agency in New York City. For more information on the study of children's literature at the University, see www.childrenslit.pitt.edu.

Course Requirements

The certificate is a planned interdisciplinary sequence of at least 18 credits. The program director must also be consulted about the design of the student's individual course of study. The three required core courses for the certificate are listed below.

Students are encouraged to take all four of the below courses, since either ENGLIT 0562 or ENGLIT 0655 may be taken as a Category 1 elective. Of these two courses, the course not taken as an elective must be taken as a core course.

In addition to the three core courses, students should design their own course of study to complete the remaining credits, in consultation with the program director. Courses must be selected from an approved list of courses, available from the program director.

- ENGLIT 0560 - CHILDREN AND CULTURE
- ENGLIT 0562 - CHILDHOOD'S BOOKS or
- ENGLIT 0655 - REPRESENTING ADOLESCENCE
- ENGLIT 1645 - CRITL APPRCH TO CHILDREN'S LIT *

Note:

* ENGLIT 1645 - CRITL APPRCH TO CHILDREN'S LIT is the capstone course for the Children's Literature program and must be taken last.

Other requirements

- A minimum GPA of 2.0 is required in each course that counts toward the certificate.
- There is no limit to the number of courses that can be taken on the S/NC basis for this certificate.

Nanoscience and Engineering Undergraduate Certificate

Advances in nanoscience and nanotechnology (the ability to predict, create, and design with nanoscale materials and systems) are expected to reveal new physical phenomena and to enable the creation of highly desirable products and devices, in addition to revolutionary changes in industrial practice. Strength in nanoscience and nanotechnology has been identified as the nation's future competitiveness and prosperity, and strategic plans have been developed to accelerate nanoscience research and development, encourage knowledge transfer to spur economic growth, and expand educational programs and workforce training - all in a socially and environmentally responsible and sustainable manner.

Nanoscience and nanotechnology also has had a large and rapidly growing local impact. The Pittsburgh region is home to a number of corporations, including many smaller start-up companies, with major nanotechnology components to their businesses. The continued success of companies such as PPG, Seagate, Bayer, Alcoa, Plextronics, Westinghouse, Bettis, and II-VI will depend on their ability to recruit local engineering talent with the required background in nanoscience and nanotechnology. The continued development of nanotechnology-based entrepreneurial start-ups will depend in large part on a vibrant pool of young engineers and scientists with appropriate educational experience in nanoscience and nanotechnology.
This joint certificate, housed in both the Swanson School of Engineering (SSOE) and the Dietrich School of Arts and Sciences (Dietrich School) enables BS students from both schools to complement their education by completing a fivecourse sequence. The certificate is designed to be combined with coursework in any SSOE degree-granting program, or with chemistry and physics in the Dietrich School.

The course requirements for this certificate follow.

Required courses

This course has prerequisites.

- ENGR 0240 - NANOTECHNOLOGY AND NANO-ENGINEERING
- PHYS 1375 - FOUNDATIONS OF NANOSCIENCE
- PHYS 1903 - DIRECTED RESEARCH

Elective courses

Select two courses from the following list.

- CHEM 1410 - PHYSICAL CHEMISTRY 1 or
- CHEM 1420 - PHYSICAL CHEMISTRY 2
- CHEM 1480 - INTERMEDIATE PHYSICAL CHEMISTRY
- CHEM 1600 - SYNTHESIS & CHARCTRZTN POLYMERS
- CHEM 1620 - ATOMS, MOLECULES AND MATERIALS
- ECE 0257 - ANALYSIS AND DESIGN OF ELECTRONIC CIRCUITS
- ECE 1247 - SEMICONDUCTOR DEVICE THEORY
- ECE 2295 - SPECIAL TOPICS: ELECTRONICS
- ENGR 0241 - FABRICATION AND DESIGN IN NANOTECHNOLOGY
- IE 1012 - MANUFACTURE OF STRUCTURAL NANOMATERIALS or
- IE 2012 - MANUFACTURE OF STRUCTURAL NANOMATERIALS
- MEMS 1057 - MICRO/NANO MANUFACTURING
- PHYS 0520 - MODERN PHYSICS MEASUREMENTS
- PHYS 1361 - WAVE MOTION AND OPTICS
- PHYS 1370 - INTRODUCTION TO QUANTUM MECHANICS 1
- PHYS 1371 - INTRODUCTION TO QUANTUM MECHANICS 2
- PHYS 1374 - SOLID STATE PHYSICS

Additional information

Non-Dietrich School course credit

Students may apply up to 18 credits of non-Dietrich School coursework to their undergraduate degrees.

Credit overlap

No more than six credits of coursework may overlap between the requirements for this certificate and a major in Physics and Astronomy or in Chemistry.
Grade Requirements

A minimum GPA of 2.0 is required in each course that counts toward the certificate.

Satisfactory/No Credit Option

No course that counts toward this certificate may be taken on the S/NC basis.

For more information

Contact the departmental advisor for the Physics and Astronomy major, Russell Clark (RUC2@Pitt.edu).

Photonics Certificate

Photonics is one of the fastest growing high-tech industries in the world today. It includes optical communications (e.g., fiber optics, lasers, and infrared links), optical imaging (e.g., spy and weather satellites, night vision, holography, flat screen display, and CCD video cameras), optical data storage (e.g., CDs and CD-ROMs), optical detectors (e.g., supermarket scanners, medical optics, and nondestructive evaluation of materials), lasers (e.g., welding lasers, laser surgery, laser shows, and laser rangefinders), spectroscopy (e.g., chemical analysis and detection), and quantum optics (e.g., quantum cryptography, quantum computing, and single-photon detection).

Although the photonics industry is growing rapidly, photonics companies have a hard time finding qualified people because the interdisciplinary field crosses physics, physical chemistry, and electrical engineering. The photonics certificate program at the University of Pittsburgh will give this kind of cross-cutting experience and allow students to move directly into the photonics industry. The Certificate in Photonics will also serve as good preparation for graduate school in solid state physics, physical chemistry, or electrical engineering with optoelectronics emphasis.

Students in the certificate program will have opportunities for laboratory research with professors at the University of Pittsburgh and will also receive special job placement referrals.

Requirements

The certificate is designed to fit easily with a physics, chemistry, or electrical engineering major, but students with other majors can also earn the certificate.

To receive the certificate, students must have taken

- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
- MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2
- MATH 0240 - ANALYTIC GEOMETRY AND CALCULUS 3
- MATH 0250 - MATRIX THEORY & DIFFT EQUATIONS

One of the following pairs

- PHYS 0174 - BASIC PHYSICS, SCIENCE AND ENGINEERING 1 (INTEGRATED) and
- PHYS 0175 - BASIC PHYSICS, SCIENCE AND ENGINEERING 2 (INTEGRATED)
- PHYS 0475 - INTRODUCTION TO PHYSICS, SCIENCE AND ENGINEERING 1 and
- PHYS 0476 - INTRODUCTION TO PHYSICS, SCIENCE AND ENGINEERING 2

One of the following pairs
- CHEM 0110 - GENERAL CHEMISTRY 1 and
- CHEM 0120 - GENERAL CHEMISTRY 2
  or
- CHEM 0710 - UHC GENERAL CHEMISTRY 1 and
- CHEM 0720 - UHC GENERAL CHEMISTRY 2
  or
- CHEM 0960 - GENERAL CHEM FOR ENGINEERS 1 and
- CHEM 0970 - GENERAL CHEM FOR ENGINEERS 2

Required laboratory courses:

One of the following

- PHYS 0219 - BASIC LABORATORY PHYSICS SCIENCE AND ENGINEERING
- CHEM 0250 - INTRODUCTION TO ANALYTICAL CHEMISTRY and
  CHEM 0260 - INTRODUCTION TO ANALYTICAL CHEMISTRY LAB
- ECE 0501 - DIGITAL SYSTEMS LABORATORY

One of the following

- PHYS 0525 - ANALOG AND DIGITAL ELECTRONICS
- ECE 1201 - ELECTRONIC MEASUREMENTS & CRCTS LAB and
  ECE 1212 - ELECTRONIC CIRCUIT DESIGN LAB
- CHEM 1430 - PHYSICAL CHEMISTRY LABORATORY 1 and
  CHEM 1255 - INSTRUMENTAL ANALYSIS LAB

In addition

The following courses are required for the certificate.

- PHYS 1361 - WAVE MOTION AND OPTICS
- ECE 1247 - SEMICONDUCTOR DEVICE THEORY
- ECE 1232 - INTRO LASERS & OPTIC ELECTRONICS
- Junior Photonics Seminar (two semesters, each 1 credit) (cross listed as PHYS 0177, CHEM 1750, or ECE 1248)
- Photonics Theory 1 (3 credits) (cross listed as PHYS 1363, CHEM 1470/CHEM 1472, or ECE 1240/1240)
- Photonics Theory 2 (3 credits) (cross listed as PHYS 1364, CHEM 1470/CHEM 1472, or ECE 1240/ECE 1241)
- Photonics Laboratory (1 credit) (PHYS 1365, to be cross listed in EE and CHEM)

One of the following

- CHEM 1410 - PHYSICAL CHEMISTRY 1
- PHYS 1370 - INTRODUCTION TO QUANTUM MECHANICS 1 and
- PHYS 1371 - INTRODUCTION TO QUANTUM MECHANICS 2

Two of the following courses or sequences
One of the following

- PHYS 1351 - INTERMEDIATE ELECTRICITY AND MAGNETISM
- ECE 1259 - ELECTROMAGNETICS and
- ECE 1266 - APPLICATIONS OF FIELDS AND WAVES

Note:

For more information, see www.phyast.pitt.edu/~snoke/photonics.

Public and Professional Writing Certificate

Writing plays a crucial role in the lives of people after they leave college, as students go on to work, volunteer, attend professional schools, and advocate for themselves and others. The PPW certificate focuses on writing that serves professional goals and/or the public interest. We invite students from across the University to focus on writing as a way to develop the critical writing, learning, and thinking skills necessary to all sectors of American professional life-private, nonprofit, and government.

Students who know that they will write extensively as professionals in law, medicine, the sciences, social work, public policy, international relations, business, or other fields are good candidates for the PPW certificate, as are students who are interested in advocacy and activism. Students contemplating graduate work should also find the course of study leading to the PPW certificate useful. The courses will allow students to work on significant writing projects in a range of venues. Students who have finished the certificate should have a compelling portfolio of work that they can show to prospective employers.

The certificate requires 18 credits, described below.

Writing course

Select one of the following writing-intensive courses.

- ENGCMP 0400 - WRITTEN PROFESSIONAL COMMUNICATION
- ENGCMP 0410 - WRITING IN THE LEGAL PROFESSIONS
- ENGCMP 0420 - WRITING FOR THE PUBLIC

Elective courses

Select at five courses from the following list. At least two courses must be at the 1000-level. The remaining courses may be at any level from the list.

- ENGCMP 0510 - NARRATIVES OF THE WORKPLACE
- ENGCMP 0515 - PERSUASIVE WRITING IN ADVERTISING
- ENGCMP 0520 - INTEGRATING WRITING AND DESIGN
- ENGCMP 0530 - WRITING FOR THE SCIENCES
- ENGCMP 0535 - WRITING IN THE HEALTH SCIENCE PROFESSIONS
- ENGCMP 0550 - TOPICS IN PUBLIC/PROFESSIONAL WRITING
- ENGCMP 0560 - WRITING ARGUMENTS
- ENGCMP 0600 - INTRODUCTION TO TECHNICAL WRITING
- ENGCMP 0610 - COMPOSING DIGITAL MEDIA
- ENGCMP 0641 - WRITING FOR CHANGE
- ENGCMP 1100 - LANGUAGE OF BUSINESS AND INDUSTRY
Additional information

Grade Requirements

A minimum GPA of 2.0 is required in each course that counts toward the certificate.

Satisfactory/No Credit Option

There is no limit to the number of courses that can be taken on the S/NC basis for this certificate.

For more information

Visit the certificate's Web page at www.Composition.Pitt.edu/Undergraduate/Public-And-Professional-Writing for more details. Questions about the certificate can be addressed to the director, Jean Grace (JGrace@pitt.edu).

Undergraduate Certificate in Sustainability

Environmental and sustainability programs study coupled human-natural systems using interdisciplinary approaches and knowledge. Such programs work at the science-engineering, science-policy, and policy management interfaces and aim to prepare sustainability-oriented problem solvers through interdisciplinary research, scholarship, and practice. This certificate addresses the need for education and research to strengthen our understanding of the links between human behavior and natural processes by integrating the behavioral and social sciences, earth sciences, physical sciences, engineering, and information sciences.

Completion of the certificate in the Dietrich School requires 18 credits. The following requirements are for Dietrich School students who pursue this certificate. Be advised that Swanson School of Engineering students may have different requirements.

Required Courses

- ENGR 1905 - CURRENT ISSUES IN SUSTAINABILITY
- ENGR 1907 - SUSTAINABILITY CAPSTONE
- GEOL 1030 - THE ATMOSPHERE, OCEANS AND CLIMATE
Elective Courses

Select three of the following courses. Only one course may be in the student's major department.

- ARC 0110 - APPROACHES TO THE BUILT ENVIRONMENT
- BIOSC 0740 - YELLOWSTONE FIELD COURSE (UHC, off-campus in Wyoming)
- BIOSC 1160 - FOREST ECOLOGY (off-campus at Pymatuning Laboratory of Ecology)
- BIOSC 1220 - ECOLOGICAL FIELD STUDIES (off-campus at Pymatuning Laboratory of Ecology)
- BIOSC 1310 - WETLAND ECOLOGY AND MANAGEMENT (off-campus at Pymatuning Laboratory of Ecology)
- BIOSC 1610 - CONSERVATION BIOLOGY (off-campus at Pymatuning Laboratory of Ecology)
- CEE 1217 - GREEN BUILDING DESIGN AND CONSTRUCTION
- CEE 1218 - DESIGN FOR THE ENVIRONMENT
- CEE 1503 - INTRO TO ENVIRONMENTAL ENGRNG
- CS 0090 - SUSTAINABILITY AND COMPUTING
- ECE 1769 - POWER SYSTEM ANALYSIS 1
- ECON 0360 - INTRODUCTION TO ENVIRONMENT AND RESOURCE ECONOMICS
- ECON 0530 - INTRODUCTION TO DEVELOPMENT ECONOMICS
- ECON 1360 - ENVIRONMENTAL ECONOMICS
- ENGLIT 0710 - CONTEMPORARY ENVIRONMENTAL LITERATURE
- ENGLIT 1005 - LITERATURE AND THE ENVIRONMENT
- ENGR 1060 - SOCIAL ENTREPRENEURSHIP- ENGINEERING FOR HUMANITY
- GEOL 0860 - ENVIRONMENTAL GEOLOGY
- GEOL 1051 - GROUNDWATER GEOLOGY
- GEOL 1060 - GEOMORPHOLOGY
- GEOL 1333 - SUSTAINABILITY
- GEOL 1445 - GIS, GPS, AND COMPUTER METHODS
- GEOL 1515 - ENVIRONMENTAL GEOCHEMISTRY
- GEOL 1904 - DIRECTED READING
- GSWS 1450 - GENDER AND SUSTAINABILITY
- HIST 1019 - CITIES IN HISTORICAL PERSPECTIVE
- HIST 1695 - ENVIRONMENTAL HISTORY
- HONORS 1544 - READING THE EARTH: WYOMING FIELD STUDIES IN ECOLOGY AND PALEONTOLOGY (UHC, off campus in Wyoming)
- MEMS 1065 - THERMAL SYSTEMS DESIGN
- PIA 2231 - CONTEMPORARY US ENERGY POLICY
- PS 1542 - GLOBAL ENVIRONMENTAL POLITICS
- SA 1340 - SCULPTURE STUDIO: PROJECTS
- SOC 1445 - SOCIETY AND ENVIRONMENT
- URBNST 0010 - INTRODUCTION TO URBAN STUDIES
- URBNST 0114 - URBAN SUSTAINABILITY

Additional information and requirements

- A minimum GPA of 2.0 is required in each course that counts toward the certificate.
- No course that counts toward this certificate may be taken on the S/NC basis.

Joint Major

A&S/Business, BA
A&S/Business Dual Major

The A&S/business dual major is offered jointly by Dietrich School of Arts and Sciences and the College of Business Administration (CBA). To satisfy the requirements, students must combine the business major with any Dietrich School major. The Dietrich School major will be listed first on the transcript as the degree-determining major (BS or BA), and the business major will be listed second. Students will be required to fulfill all Dietrich School curriculum requirements. Students are admitted by a faculty committee that considers the cumulative GPA, specific courses taken and grades earned, SAT scores, and other relevant credentials. Students who have completed at least one full year of course work are eligible to apply to the program. Students interested in the program should seek assistance from their Dietrich School advisors regarding the application process. For more information about the program, see http://www.business.pitt.edu/cba/academics/.

Major Requirements

To graduate with an A&S/business dual major, students must complete the following:

Four dual major prerequisites:

- ECON 0100 - INTRODUCTION TO MICROECONOMIC THEORY
- ECON 0110 - INTRODUCTION TO MACROECONOMIC THEORY
- MATH 0120 - BUSINESS CALCULUS or
- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
- STAT 1100 - STATISTICS AND PROBABILITY FOR BUSINESS MANAGEMENT

Note:

*Competency in Microsoft Excel (spreadsheet software) is required.*

Twelve required business courses:

- BUSACC 0030 - FINANCIAL ACCOUNTING
- BUSACC 0040 - MANAGERIAL ACCOUNTING
- BUSQOM 0050 - QUANTITATIVE METHODS
- BUSENV 0060 - MANAGERIAL ETHICS AND STAKEHOLDER MANAGEMENT
- BUSECN 1010 - MANAGERIAL ECONOMICS
- BUSORG 1020 - ORGANIZATIONAL BEHAVIOR
- BUSFIN 1030 - INTRODUCTION TO FINANCE
- BUSMKT 1040 - INTRODUCTION TO MARKETING
- BUSHRM 1050 - HUMAN RESOURCES MANAGEMENT
- BUSQOM 1070 - OPERATIONS MANAGEMENT
- BUSSPP 1080 - STRATEGIC MANAGEMENT

Note:

All of the above listed courses must be completed with an average GPA of 2.00. All courses for the business major must be taken on a letter-grade basis.

A&S/Business, BS

A&S/Business Dual Major
The A&S/business dual major is offered jointly by Dietrich School of Arts and Sciences and the College of Business Administration (CBA). To satisfy the requirements, students must combine the business major with any Dietrich School major. The Dietrich School major will be listed first on the transcript as the degree-determining major (BS or BA), and the business major will be listed second. Students will be required to fulfill all Dietrich School curriculum requirements. Students are admitted by a faculty committee that considers the cumulative GPA, specific courses taken and grades earned, SAT scores, and other relevant credentials. Students who have completed at least one full year of course work are eligible to apply to the program. Students interested in the program should seek assistance from their Dietrich School advisors regarding the application process. For more information about the program, see http://www.business.pitt.edu/cba/academics/.

Major Requirements

To graduate with an A&S/business dual major, students must complete the following:

Four dual major prerequisites:

- ECON 0100 - INTRODUCTION TO MICROECONOMIC THEORY
- ECON 0110 - INTRODUCTION TO MACROECONOMIC THEORY
- MATH 0120 - BUSINESS CALCULUS or
- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
- STAT 1100 - STATISTICS AND PROBABILITY FOR BUSINESS MANAGEMENT

Note:

*Competency in Microsoft Excel (spreadsheet software) is required.*

Twelve required business courses:

- BUSACC 0030 - FINANCIAL ACCOUNTING
- BUSACC 0040 - MANAGERIAL ACCOUNTING
- BUSQOM 0050 - QUANTITATIVE METHODS
- BUSENV 0060 - MANAGERIAL ETHICS AND STAKEHOLDER MANAGEMENT
- BUSECN 1010 - MANAGERIAL ECONOMICS
- BUSORG 1020 - ORGANIZATIONAL BEHAVIOR
- BUSFIN 1030 - INTRODUCTION TO FINANCE
- BUSMKT 1040 - INTRODUCTION TO MARKETING
- BUSHRM 1050 - HUMAN RESOURCES MANAGEMENT
- BUSQOM 1070 - OPERATIONS MANAGEMENT
- BUSSPP 1080 - STRATEGIC MANAGEMENT

Note:

All of the above listed courses must be completed with an average GPA of 2.00. All courses for the business major must be taken on a letter-grade basis.

Major

Interdisciplinary Studies, BA

The Interdisciplinary Studies major is an alternative to the traditional majors in the Dietrich School of Arts and Sciences. It provides a coherent course of study with the breadth and depth appropriate to a Dietrich School major, while offering a pathway to degree completion.
Interdisciplinary Studies Major

Regulations

1. Each Interdisciplinary Studies major should consist of at least 42 credits of work earned in courses from at least two Dietrich School departments. The major should aim for integrated and cumulative learning. To this end, each major must have the following characteristics:
   1. At least 21 credits must be earned from courses numbered 1000 or above;
   2. Courses must be arranged in at least two clusters or thematic groupings;
   3. Each cluster must contain a minimum of 15 credits;
   4. A writing (W) course approved by an assistant dean must be completed as part of the major.
2. Up to six credits of independent study, directed reading, directed research, undergraduate teaching, and internships may be counted toward the major.
3. A student wishing to pursue an Interdisciplinary Studies major must work with an assistant dean, who will serve as the student's academic advisor. The assistant dean's responsibilities include:
   1. Approving the student's Interdisciplinary Studies major proposal;
   2. Approving changes to the proposal;
   3. Providing academic advising to the student at least once per term.
4. The following additional requirements apply:
   1. Students are eligible to declare the Interdisciplinary Studies major after successful completion of 75 credits;
   2. A minimum 2.0 GPA must be maintained for all Interdisciplinary Studies coursework; Only grades of C- or above may be counted toward the major;
   3. Students may achieve honors in Interdisciplinary Studies by earning a minimum GPA of 3.5 in the courses for the major and a 3.5 cumulative GPA;
   4. All regular Dietrich School degree requirements must be satisfied (e.g. minimum 120 credits, General Education Requirements, 2.0 overall GPA, at least half of the credits used to fulfill the major must be completed at the Pittsburgh campus).
   5. Students may not double major when pursuing the Interdisciplinary Studies major.
   6. Students wishing to earn a Bachelor of Science degree must complete 21 credits of upper-level science coursework (certified by the assistant dean) and MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1 or STAT 1000 - APPLIED STATISTICAL METHODS.

Procedures

1. A student wishing to declare an Interdisciplinary Studies major should meet with an assistant dean from the Office of the Associate Dean for Undergraduate Studies, 140 Thackeray Hall. Please call 412-624-6480 to make an appointment.
2. The student should draft a proposal to explain the proposed course of study. The proposal should include:
   1. Learning outcomes and a rationale for the course of study
   2. A list of courses used toward the major
   3. A discussion of the career options that may be pursued utilizing this combination of courses
3. The proposal must be approved by an assistant dean and submitted to the Associate Dean for Undergraduate Studies for final approval.

Interdisciplinary Studies, BS

The Interdisciplinary Studies major is an alternative to the traditional majors in the Dietrich School of Arts and Sciences. It provides a coherent course of study with the breadth and depth appropriate to a Dietrich School major, while offering a pathway to degree completion.

Interdisciplinary Studies Major

Regulations

1. Each Interdisciplinary Studies major should consist of at least 42 credits of work earned in courses from at least two Dietrich School departments. The major should aim for integrated and cumulative learning. To this end, each major must have the following characteristics:

1. A student wishing to declare an Interdisciplinary Studies major should meet with an assistant dean from the Office of the Associate Dean for Undergraduate Studies, 140 Thackeray Hall. Please call 412-624-6480 to make an appointment.
2. The student should draft a proposal to explain the proposed course of study. The proposal should include:
   1. Learning outcomes and a rationale for the course of study
   2. A list of courses used toward the major
   3. A discussion of the career options that may be pursued utilizing this combination of courses
3. The proposal must be approved by an assistant dean and submitted to the Associate Dean for Undergraduate Studies for final approval.

International and Area Studies, BPHIL

The University Honors College (UHC) and University Center for International Studies (UCIS) have created the Bachelor of Philosophy in International and Area Studies (BPhil IAS), a research-based undergraduate major that will help students meet the demands of today's world. The BPhil IAS degree is awarded jointly by the student's home school and the University Honors College and is the first undergraduate degree in international studies at Pitt.

The goal of the BPhil IAS degree is to enable students to think critically about their global world and to gain "global competence," which involves working effectively in different international settings, an awareness of the major currents of global change and the resulting issues raised, the capacity for effective communication across cultural and linguistic boundaries, and personal adaptability to diverse cultures.

Students seeking the BPhil IAS degree must have a minimum GPA of 3.50/4.00; complete an approved program of study involving coursework, second language, and study abroad; and write and publicly defend their research thesis before a faculty examining board that includes a visiting faculty member from outside the University. The BPhil IAS is not a freestanding major, as it requires the student to combine the BPhil IAS with a major in the student's home school of admission (A&S, CBA, Engineering, etc.); students must combine the BPhil IAS requirements with all curriculum requirements for a degree in their home school of admission.

Students seeking the BPhil in IAS must:

- have a minimum grade point average of 3.50/4.00; and
- complete eight approved courses (24 credits); and
- complete one methods course specific to their second major or to their BPhil thesis research topic; and
- complete one directed study course related to their BPhil thesis research topic; and
- complete three years of college-level language study or equivalent proficiency in a language relevant to their BPhil thesis research topic; and
- write and publicly defend their research thesis (the BPhil thesis) before a faculty examining board that includes a visiting faculty member from outside the University; and
- complete a second major in another academic discipline (note that only two courses from this major can overlap with the approved courses for the IAS major).

Students interested in the BPhil in IAS may complete one of the following tracks in UCIS: Asian Studies, European Union Studies, Global Studies, Latin American Studies, or Russian and East European Studies

**Law, Criminal Justice, and Society, BA**

**Law, Criminal Justice, and Society**

Are you considering law school or graduate study in the social sciences after Pitt? Are you interested in pursuing a career in one of the many criminal justice professions or advocacy organizations? The Law, Criminal Justice, and Society (LCJS) major examines the workings of the criminal justice system in the broader context of society and the legal system. A core curriculum fosters comprehension and critical analysis of the legal system, criminological theory, criminal justice institutions, criminal law, and social inequality. Students also will complete six credits of professional skills and a capstone course on ethics in criminal justice. The LCJS major equips students with the knowledge and skills they need to pursue advanced degrees in law and social science, and to succeed as professionals and advocates in the justice-oriented professions and organizations that serve American society's diverse and dynamic communities. This major is offered jointly between the Dietrich School and the College of General Studies.

Students completing this major will:

- examine the major institutions of the criminal justice system, and situate the workings of these institutions in a broader legal, social, and historical context;
- develop knowledge and legal reasoning skills in criminal law;
- examine the law's conflicting role in securing social order and security, on the one hand, and in creating and reinforcing social inequality on the other; and,
- develop basic professional knowledge and demonstrate ethical reasoning in preparation for being positive and successful contributors to law and justice-oriented career fields as professionals and/or public policy advocates.

This major requires 36 credits for completion, which are distributed as follows.

- Foundations - 6 credits
- Core areas - 15 credits
- Electives - 6 credits
- Professional skills - 6 credits
- Capstone - 3 credits

Except as noted, all courses are 3-credit courses.

**Foundations**

Both of the following courses are required.

- LCJS 0100 - INTRODUCTION TO LAW, CRIMINAL JUSTICE, & SOCIETY
- LCJS 0200 - RACE, CLASS, GENDER, & THE LAW

**Core**

Select courses according to the guidelines stated. Course selections must comprise a total of at least 15 credits.

**Theories of Crime**

Choose one of the following courses.

- LCJS 1100 - CRIMINOLOGY
- LCJS 1110 - CRIMINOLOGICAL THEORY

**Criminal Law**

Select one of the following courses.

- LCJS 1200 - CRIMINAL LAW or
- LEGLST 1140 - INTRODUCTION TO CRIMINAL LAW

- LCJS 1210 - CRIMINAL PROCEDURE or
- LEGLST 1141 - INTRODUCTION TO CRIMINAL PROCEDURE

**Power, Inequality, and Social Change**

Select two of the following courses.

- LCJS 1300 - Law and Politics or
- LCJS 1300 - LAW AND POLITICS or
- PS 1213 - LAW AND POLITICS

- LCJS 1310 - LAW AND DEVIANCE or
- ADMJ 1220 - Law and Deviance or
- SOC 0471 - DEVIANCE AND SOCIAL CONTROL

- LCJS 1320 - CIVIL RIGHTS LAW or
- LEGLST 1340 - Civil Rights or
- PS 1201 - CONSTITUTION AND CIVIL LIBERTIES

- LCJS 1330 - EMERGING ISSUES IN LEGAL AND SOCIAL POLICY or
- LEGLST 1355 - Emerging Issues in Legal and Social Policy

- LCJS 1340 - LAW AND SOCIAL CHANGE
- LEGLST 1155 - Law and Social Change

- AFRCNA 1522 - SEX AND RACISM
- AFRCNA 1535 - DIMENSIONS OF RACISM
- HIST 0671 - AFRICAN AMERICAN HISTORY SINCE 1865
- HIST 1632 - THE HISTORY OF THE CIVIL RIGHTS MOVEMENT
- SOC 0432 - WEALTH AND POWER
- SOC 0434 - POLITICAL SOCIOLOGY
- URBNST 0112 Social Justice and the City

**Criminal Justice Institutions**

Select one of the following courses.

- LCJS 1400 - THE SYSTEM OF CRIMINAL JUSTICE

- LCJS 1430 - THE JUVENILE JUSTICE PROCESS or
- ADMJ 1225 - The Juvenile Justice Process

- LCJS 1410 - LAW ENFORCEMENT AND POLICING or
- ADMJ 1200 - Law Enforcement and Policing
• LCJS 1420 - CORRECTIONS or
• ADMJ 1300 - Corrections

• LCJS 1440 - CRIMINAL INVESTIGATION or
• ADMJ 1100 - Criminal Investigation

• URBNST 0140 - CRIME, PUNISHMENT, JUSTICE, REINTEGRATION

Elective courses

Select two courses from list A or one course from each list A and list B. Please keep in mind that course selections must comprise a total of at least 6 credits.

List A

• LCJS 1500 - CRIMINALISTICS
• LCJS 1501 - CRIMINALISTICS LAB
• LCJS 1510 - PSYCHOLOGY AND LAW
• LCJS 1520 - CYBERCRIME
• LCJS 1521 - CYBER SECURITY, LAW, AND MONEY LAUNDERING
• LCJS 1530 - ORGANIZED CRIME
• LCJS 1531 - INTERNATIONAL ORGANIZED CRIME
• LCJS 1540 - WHITE COLLAR CRIME
• LCJS 1550 - GENDER, RACE, CLASS AND CRIMINAL JUSTICE
• LCJS 1560 - PROBATION AND PAROLE
• LCJS 1570 - Principles of Homeland Security
• LCJS 1571 - TERRORISM
• LCJS 1572 - INTRODUCTION POLICE MANAGEMENT
• LCJS 1570 - THE LEGAL SYSTEM
• LCJS 1580 - INTERNATIONAL LAW
• LCJS 1582 - PUBLIC LAW AND MORAL REASONING
• LCJS 1583 - SEX, LAW AND MARRIAGE
• LCJS 1584 - Legal Issues in Public Service
• LCJS 1586 - CONSUMER LAW
• LCJS 1590 - SPECIAL TOPICS IN LAW AND CRIMINAL JUSTICE
• LCSJ 1599 - Independent Study
• Any LCJS course not used to fulfill any other major requirement.
  • Any Pitt Prison Education Project (PPEP) course; offerings will vary.

List B

• ENGLIT 0365 - IMAGINING SOCIAL JUSTICE
• HIST 0600 - UNITED STATES TO 1877
• HIST 0601 - UNITED STATES 1865-PRESENT
• HIST 0663 - 20THC AFRICAN AMERICAN WOMEN'S HISTORY
• HIST 0670 - AFRICAN AMERICAN HISTORY TO 1877
• HIST 1062 - HUMAN RIGHTS IN WORLD HISTORY
• HIST 1640 - AMERICA CHILDHOODS: RACE, GENDER, AND CITIZENSHIP, 1865-PRESENT
• HIST 1669 - HISTORY OF BLACK PITTSBURGH
• PS 1261 - AMERICAN PUBLIC POLICY
- PS 1675 - POLITICS OF HUMAN RIGHTS
- PSY 0205 - PSYCHOPATHOLOGY
- PUBSRV 1305 - HEALTH, LAW AND ETHICS
- PUBSRV 1455 - LAW, ETHICS AND PUBLIC POLICY IN THE MASS MEDIA
- URBNST 0010 - INTRODUCTION TO URBAN STUDIES
- Any non-LCJS course not used to fulfill any other major requirement.

Professional Skills

Select at least one course from each category. Course selections must comprise a total of at least 6 credits.

Research or Practical Skills

- ENGCMP 0450 - RESEARCH WRITING
- LCJS 1600 - Pre-Service Internship * * This course can be taken for up to six credits; credits four through six can be applied to the Elective List A requirement.
- LCJS 1610 - Data Analysis in Criminal Justice
- LCJS 1620 - INTRODUCTION TO LEGAL RESEARCH
- PS 0700 - RESEARCH METHODS IN POLITICAL SCIENCE
- PSY 0036 - RESEARCH METHODS LECTURE
- SOC 0230 - SOCIAL RESEARCH METHODS
- URBNST 0030 - INTRODUCTION TO GIS
- URBNST 0130 - APPLIED GIS

Professional or Public-Oriented Writing

- ENGCMP 0401 - WRITTEN PROFESSIONAL COMMUNICATION: TOPICS IN DIVERSITY
- ENGCMP 0410 - WRITING IN THE LEGAL PROFESSIONS
- ENGCMP 0420 - WRITING FOR THE PUBLIC
- ENGCMP 0521 - WRITING WITH DATA
- ENGCMP 0560 - WRITING ARGUMENTS
- ENGCMP 0641 - WRITING FOR CHANGE
- ENGCMP 1099 - THE LANGUAGE OF POLICY AND POWER: TOPICS IN DIVERSITY
- ENGCMP 1400 - GRANT WRITING FOR NONPROFITS

Capstone

- LCJS 1700 - ETHICS IN CRIMINAL JUSTICE

Writing course

Students must complete at least one W-course in the major. LCJS 1700 - ETHICS IN CRIMINAL JUSTICE will fulfill this requirement.

Additional information

Grade Requirements

A minimum GPA of 2.0 in courses for the LCJS major is required for graduation.
Satisfactory/No Credit option

Students may apply up to six credits of coursework taken on an S/NC basis to the LCJS major. Student may apply up to nine credits if three of those credits are earned as part of a Study Abroad course that applies toward the major.

Transfer credits for Police Academy Certification

Students may receive up to 15 transfer credits for completion of Pennsylvania Municipal Police Academy Act 120 or state police cadet training. Certification course work is equivalent to the Core Area requirements for Criminal Law (3 credits) and Criminal Justice Institutions (3 credits); two major electives (6 credits); and LCJS 1600 Pre-Service internship, which fulfills the Research/Practical Skills Course (3 credits) requirement in the Professional Skills area.

Department of Africana Studies

Africana studies is the study, research, interpretation, and dissemination of knowledge concerning African American, African, and Caribbean affairs and culture. Using the tools of the social sciences and humanities, Africana studies examines the structure, organization, problems, and perspectives of Blacks in Africa and the African Diaspora. Africana studies also stresses analytical interpretations and policy prescriptions for social change in African American communities and in various African and Caribbean nations. The term Africana incorporates the three-tier interdisciplinary thrust of the department: African, African American, and Caribbean social sciences and humanities.

Africana studies prepares social science majors for advanced graduate studies in international affairs, education, social work, social policy studies, and legal and professional training. In the humanities, preparation in the creative arts and literature gears students to practical development in such fields as communication, teaching, theater, and dance. Africana studies occupies a central role in understanding modern American life and African and Caribbean linkages. As an interdisciplinary major, Africana studies offers intellectual paradigms for the multicultural approach to historical, political, and economic reality. It is also critical and corrective of the inadequacies, omissions, and distortions of mainstream American education leading into the 21st century. Africana studies is committed to producing liberally educated women and men with a lifetime dedication to working on African American, African, and Caribbean affairs. For more information on the major and the Department of Africana Studies, see the department's Web site at www.africanastudies.pitt.edu.

Joint Major

Africana Studies - English, BA

The joint major offers an especially coherent experience in interdisciplinary learning by bringing together Africana Studies and English in two interrelated ways. Students get a rich and rigorous exposure to African and African Diaspora literature written in English through literature produced in the United States, Africa, Canada, Great Britain, and the Caribbean. Additionally, students examine some of the significant relationships between African and African Diaspora works and a range of English-language literary traditions.

The major is designed to expose students to important questions and traditions in literary interpretation and to offer them political, social, and cultural contexts for the literature they will be reading. Like most liberal arts majors, it helps students learn to think analytically and to make and assess arguments, skills that are important in many jobs and courses of graduate study. The major is also useful for prospective teachers who would be interested in developing and teaching curricula that include African Diaspora literature within other English-language traditions. Students who complete the joint major will have fulfilled most of the School of Education's undergraduate requirements for secondary education certification in English.

The Africana Studies-English joint major requires 45 credits distributed as follows: four core courses, four literature courses from the Department of Africana Studies, three literature courses from the Department of English, and four electives, one of which must be a history course in the Department of Africana Studies. No more than two upper-division courses can count toward the major before a student has completed the introductory courses, and three of the required courses in each department excluding the core courses must be taken before a student enrolls in the senior seminar.
Joint Major Requirements

Core courses

All of the following courses.

- AFRCNA 0031 - INTRODUCTION TO AFRICANA STUDIES
- ENGLIT 0500 - INTRODUCTION TO CRITICAL READING
- ENGLIT 1900 - PROJECT SEMINAR
- ENGLIT 1910 - SENIOR SEMINAR

Africana Studies courses

Choose four of the following courses.

- AFRCNA 0150 - AFRICAN AMERICAN LITERATURE
- AFRCNA 0316 - INTRODUCTION AFRICAN AMERICAN THEATER
- AFRCNA 0522 - INTRODUCTION TO AFRICAN LITERATURE
- AFRCNA 1306 - WORLD LITERATURE IN ENGLISH
- AFRCNA 1349 - CONTEMPORARY CARIBBEAN LITERATURE
- AFRCNA 1704 - AFRICANA WORLD LITERATURE

English Literature courses

Choose three of the following courses.

- ENGLIT 1125 - MASTERPIECES OF RENAISSANCE LITERATURE
- ENGLIT 1150 - ENLIGHTENMENT TO REVOLUTION
- ENGLIT 1175 - 19TH CENTURY BRITISH LITERATURE
- ENGLIT 1200 - AMERICAN LITERATURE TO 1860
- ENGLIT 1220 - CIVIL WAR TO WORLD WAR 1 IN AMERICAN LITERATURE
- ENGLIT 1325 - MODERNISM
- ENGLIT 1380 - WORLD LITERATURE IN ENGLISH

Elective courses

Students must choose four elective courses from offerings in the departments of Africana Studies and English. One of these electives must be a history course offered by the Department of Africana Studies. Students might also use electives to pursue more extensive work in particular areas of study, such as African, African-American, British, Caribbean, or U.S. literature.

In light of the interdisciplinary and international character of the joint major, it would be appropriate for students to petition to have a closely related course taught in a foreign language (for example, a course on Francophone-Caribbean literature in the Department of French and Italian Languages and Literatures) count as one of the electives toward the joint major.

Students interested in careers in education should pay particular attention to courses required by various School of Education certification programs.

Major

Africana Studies, BA
Africana Studies is the study, research, interpretation, and dissemination of knowledge concerning African American, African, and Caribbean affairs and culture. Using the tools of the social sciences and humanities, Africana Studies examines the structure, organization, problems, and perspectives of Blacks in Africa and the African Diaspora. Africana Studies also stresses analytical interpretations and policy prescriptions for social change in African American communities and in various African and Caribbean nations. The term Africana incorporates the three-tier interdisciplinary thrust of the department: African, African American, and Caribbean social sciences and humanities.

Africana Studies prepares social science majors for advanced graduate studies in international affairs, education, social work, social policy studies, and legal and professional training. In the humanities, preparation in the creative arts and literature gears students to practical development in such fields as communication, teaching, theater, and dance. Africana Studies occupies a central role in understanding modern American life and African and Caribbean linkages. As an interdisciplinary major, Africana Studies offers intellectual paradigms for the multicultural approach to historical, political, and economic reality. It is also critical and corrective of the inadequacies, omissions, and distortions of mainstream American education leading into the 21st century. Africana Studies is committed to producing liberally educated women and men with a lifetime dedication to working on African American, African, and Caribbean affairs. For more information on the major and the Department of Africana Studies, see the department's Web site at www.africanastudies.pitt.edu.

**Major Requirements**

Students are urged to meet with the departmental advisor no later than the beginning of the junior year to confirm a plan of study. The Africana studies major requires:

A total of 30 credits with a focused area of study in either humanities or social science. A 2.0 grade point average in all Africana Studies courses is required for graduation. The department does not permit courses for the major to be taken on an S/NC basis.

All majors, regardless of concentration, are required to take the following three core courses.

- AFRCNA 0031 - INTRODUCTION TO AFRICANA STUDIES
- AFRCNA 1768 - AFRICANA SENIOR RESEARCH SEMINAR
- AFRCNA 1900 - INTERNSHIP

**Humanities Concentration**

Seven courses as follows; see the lists below for specific courses.

- Two lower level AFRCNA humanities courses
- Three upper level AFRCNA humanities courses
- One lower level AFRCNA social science course
- One upper level AFRCNA social science course

**Social Sciences Concentration**

Seven courses as follows; see the lists below for specific courses.

- Two lower level AFRCNA social science courses
- Three upper level AFRCNA social science courses
- One lower level AFRCNA humanities course
- One upper level AFRCNA humanities course

**Lower-level courses**

**Humanities courses**

- AFRCNA 0150 - AFRICAN AMERICAN LITERATURE
- AFRCNA 0212 - WEST AFRICAN DANCE
- AFRCNA 0242 - AFRICANA URBAN WOMAN
- AFRCNA 0316 - INTRODUCTION AFRICAN AMERICAN THEATER
- AFRCNA 0352 - AFRICAN AMERICAN DANCE
- AFRCNA 0454 - MAN/WOMAN LITERATURE
- AFRCNA 0517 - INTRODUCTION TO AFRICAN AMERICAN POETRY
- AFRCNA 0522 - INTRODUCTION TO AFRICAN LITERATURE
- AFRCNA 0523 - SWAHILI 1
- AFRCNA 0524 - SWAHILI 2
- AFRCNA 0639 - HISTORY OF JAZZ

Social Science courses

- AFRCNA 0120 - AFRICAN AMERICAN EXPERIENCE SPORTS
- AFRCNA 0127 - INTRODUCTION TO AFRICA
- AFRCNA 0311 - INTRODUCTION TO THE AFRICAN AMERICAN FAMILY
- AFRCNA 0313 - THE BLACK CHURCH
- AFRCNA 0318 - HISTORY OF AFRICA BEFORE 1800
- AFRCNA 0385 - CARIBBEAN HISTORY
- AFRCNA 0434 - PSYCHOLOGICAL EXPERIENCE AFRICAN AMERICAN FEMALE
- AFRCNA 0454 - MAN/WOMAN LITERATURE
- AFRCNA 0536 - 20TH CENTURY AFRICAN AMERICAN WOMAN HISTORY
- AFRCNA 0586 - EARLY AFRICAN CIVILIZATIONS
- AFRCNA 0628 - AFRO-LATIN AMERICA
- AFRCNA 0629 - AFRICAN AMERICAN HISTORY 1877
- AFRCNA 0630 - AFRO-AMERICAN HISTORY 2
- AFRCNA 0787 - BLACK CONSCIOUSNESS

Upper-level courses

Humanities courses

- AFRCNA 1033 - AFRICAN AMERICANS AND MASS MEDIA
- AFRCNA 1145 - AFRICAN AMERICAN RHETORIC
- AFRCNA 1150 - CONTEMPORARY AFRICAN AMERICAN WRITING
- AFRCNA 1240 - AFRICAN LITERATURE AND SOCIETY
- AFRCNA 1306 - WORLD LITERATURE IN ENGLISH
- AFRCNA 1334 - MUSIC IN AFRICA
- AFRCNA 1335 - AFRICAN-AMERICAN MUSIC IN THE UNITED STATES
- AFRCNA 1347 - FRANCOPHONE AFRICANA LITERATURE
- AFRCNA 1349 - CONTEMPORARY CARIBBEAN LITERATURE
- AFRCNA 1353 - COMPARATIVE DANCE EXPRESSION
- AFRCNA 1555 - AFRO CARIBBEAN DANCE
- AFRCNA 1616 - AFRICAN AMERICAN WOMEN WRITERS
- AFRCNA 1704 - AFRICANA WORLD LITERATURE

Social Science courses

- AFRCNA 1012 - EARLY 20TH CENTURY BLACK SOCIAL MOVEMENT
- AFRCNA 1021 - HISTORY OF THE AFRICAN DIASPORA
Additional requirements

Students must complete one of their required writing-intensive (W) course in the major.

Minor

**Africana Studies Minor**

*The Africana Studies minor currently requires 15 credits, including 1 core course (AFRCNA 0031 - INTRODUCTION TO AFRICANA STUDIES) and two lower-level and two upper-level courses in Africana Studies. Students choose 1 of 2 possible tracks:

**African Culture and Society**

**African-American and African Diaspora Culture and Society**

Students can choose their electives for the minor from the following list of courses in Africana Studies. Any courses cross-listed with the Department of Africana Studies can be used as electives for the minor. Any courses from outside of the Department of Africana Studies that are not cross-listed will have to be approved by the Director of Undergraduate Studies before they can be used as electives for the minor. New courses in Africana Studies not currently listed can be approved by the voting faculty of the Department of Africana Studies to serve as electives for the minor.

*On 9/15/2021 the following information was approved to be updated in the published catalog. In an effort to provide accurate information the update was made on 9/15/2021.*

**African Culture and Society**

The minor on African Culture and Society allows students to obtain an extensive knowledge and contextual understanding into history, politics, culture, and contemporary life and realities existing in Africa.

- AFRCNA 0031 - INTRODUCTION TO AFRICANA STUDIES
- AFRCNA 0127 - INTRODUCTION TO AFRICA
- AFRCNA 0212 - WEST AFRICAN DANCE
- AFRCNA 0242 - AFRICANA URBAN WOMAN
- AFRCNA 0318 - HISTORY OF AFRICA BEFORE 1800
- AFRCNA 0508 - SWAHILI LANGUAGE AND CULTURE IMMERSION
- AFRCNA 0522 - INTRODUCTION TO AFRICAN LITERATURE
- AFRCNA 0586 - EARLY AFRICAN CIVILIZATIONS
- AFRCNA 0787 - BLACK CONSCIOUSNESS
- AFRCNA 0805 - BLACK PERFORMANCE AESTHETICS
- AFRCNA 1021 - HISTORY OF THE AFRICAN DIASPORA
African-American and African Diaspora Culture and Society

- AFRCNA 0031 - INTRODUCTION TO AFRICANA STUDIES
- AFRCNA 0120 - AFRICAN AMERICAN EXPERIENCE SPORTS
- AFRCNA 0150 - AFRICAN AMERICAN LITERATURE
- AFRCNA 0242 - AFRICANA URBAN WOMAN
- AFRCNA 0311 - INTRODUCTION TO THE AFRICAN AMERICAN FAMILY
- AFRCNA 0313 - THE BLACK CHURCH
- AFRCNA 0316 - INTRODUCTION AFRICAN AMERICAN THEATER
- AFRCNA 0352 - AFRICAN AMERICAN DANCE
- AFRCNA 0385 - CARIBBEAN HISTORY
- AFRCNA 0400 - COVID-19, RACISM AND PUBLIC HEALTH
- AFRCNA 0434 - PSYCHOLOGICAL EXPERIENCE AFRICAN AMERICAN FEMALE
- AFRCNA 0454 - MAN/WOMAN LITERATURE
- AFRCNA 0517 - INTRODUCTION TO AFRICAN AMERICAN POETRY
- AFRCNA 0536 - 20TH CENTURY AFRICAN AMERICAN WOMAN HISTORY
- AFRCNA 0628 - AFRO-LATIN AMERICA
• HIST 0671 - AFRICAN AMERICAN HISTORY SINCE 1865
• HIST 1669 - HISTORY OF BLACK PITTSBURGH
• MUSIC 0711 - HISTORY OF JAZZ
• MUSIC 1326 - AFRICAN-AMERICAN MUSIC IN U.S.
• MUSIC 1397 - MUSIC AND RACE
• RELGST 0417 - THE BLACK CHURCH
• RELGST 1415 - RACE AND RELIGION IN AMERICA
• RELGST 1418 - FROM VODOU TO SANTERIA: RELIGIONS OF THE WEST AFRICAN DIASPORA
• SPAN 1707 - AFRCN PRESEN LAT AMERN LIT/CULT

Department of Anthropology

Anthropology is concerned with how humans and human societies evolve, with the differences and similarities among human cultures, and with the cultural and biological basis for human behavior. Anthropology integrates a wide range of perspectives on human behavior, culture, and society. Students become familiar with the basic concerns of four subgroups of anthropology:

• Archaeology offers courses covering many geographic regions (Latin America, North America, and China), techniques of analysis, and issues in prehistory. Museum collections, internships in cultural resource management, and a summer field school provide opportunities for student involvement in archaeological work.
• Physical anthropology offers classes on evolutionary theory; human genetics; osteoarchaeology; and human and nonhuman primate evolution, anatomy, morphology, and behavior.
• Cultural anthropology offers a wide variety of courses on cultural areas including the Pacific, Latin America, China, Japan, South Asia, Eastern Europe, and the United States. Classes provide cross-cultural studies of topics such as medical anthropology, food, social and political organization, gender roles, kinship, ethnicity and nationalism, folklore, religion, and conflict and violence.
• Anthropological linguistics offers courses on the nature of languages around the world, focusing on the relationship of language to other aspects of culture and society. Among the courses offered are Gypsy Language and Culture and Writing Systems of Ancient Mesoamerica.

For more information on the major and the Department of Anthropology, visit www.anthropology.pitt.edu.

Major

Anthropology, BA

Anthropology is concerned with how humans and human societies evolve, with the differences and similarities among human cultures, and with the cultural and biological basis for human behavior. It integrates a wide range of perspectives on human behavior, culture, and society. Students will become familiar with the basic concerns of four sub-fields of anthropology: archaeology, physical anthropology, cultural anthropology, and anthropological linguistics.

The archaeology program offers courses covering many geographic regions (Latin America, North America, China, and Europe, among others), techniques of analysis, and issues in prehistory. Opportunities for student involvement in archaeological work are provided through museum collections, participation in research with faculty and graduate students, and a periodic summer field school.

The physical anthropology program offers classes on evolutionary theory, human genetics, osteoarchaeology, forensic anthropology, and human and nonhuman primate evolution, anatomy and morphology.

Cultural anthropology is represented by a wide variety of courses on culture areas including the Pacific, Latin America, China, Japan and South Asia, Eastern Europe and the United States. Classes provide cross-cultural studies of topics such as medical anthropology, food, social and political organization, sex roles, kinship, ethnicity and nationalism, folklore, religion, and conflict and violence.

Linguistic Anthropology examines language, and other semiotic systems, as forms of practice through which social relations, cultural forms, and beliefs are constituted. Courses are offered on language and the emotions; ritual performance; language shifts and code-switching; connections between language, ethnicity, cognition, nationalism, and political systems; orality and literacy; and analysis of changing media forms. Courses examine dominant, minority, and endangered languages with particular regional reference to Asia, The Pacific, and Europe.

Students pursuing the Anthropology major must complete 33 credits or coursework as described below.
Core courses

Students must complete two of the three primary introductory courses in Anthropology (ANTH 0582, ANTH 0680, and ANTH 0780) with a grade of C or better prior to declaring this major.

- ANTH 0582 - INTRODUCTION TO ARCHEOLOGY
- ANTH 0680 - INTRODUCTION TO PHYSICAL ANTHROPOLOGY
- ANTH 0780 - INTRODUCTION TO CULTURAL ANTHROPOLOGY

History of Anthropology course

- ANTH 1552 - A HISTORY OF ANTHROPOLOGICAL THOUGHT

Methods course

The Department of Anthropology offers a course in each sub-discipline. Students must complete one course as appropriate for their field of study.

- ANTH 1534 - ARCHEOLOGICAL DATA ANALYSIS 1
- ANTH 1537 - BASIC LABORATORY ANALYSIS
- ANTH 1556 - ZOOARCHAEOLOGY
- ANTH 1601 - STRUCTURE AND FUNCTION
- ANTH 1602 - HUMAN SKELETAL ANALYSIS
- ANTH 1605 - PRIMATE ANATOMY
- ANTH 1609 - ADVANCED SKELETAL ANALYSIS
- ANTH 1617 - PALEOPATHOLOGY
- ANTH 1763 - FIELD METHODS

Undergraduate Seminar

Students must complete one undergraduate seminar. ANTH 1750 - UNDERGRADUATE SEMINAR is one option; students should consult with the major advisor for other courses that meet this requirement.

Electives

Students must complete a minimum of elective five courses in Anthropology. At least three of the elective courses must be at the 1000-level.

Other requirements

**Grade requirements:** A minimum GPA of 2.0 in departmental courses is required for graduation.

**Satisfactory/No Credit option:** No course that counts toward the major can be taken on an S/NC basis.

**Writing (W) requirement:** Students must complete at least one W course in the major.

**Honors major requirements:** Students with a minimum overall GPA of 3.25 and a minimum GPA of 3.5 in their Anthropology courses will be graduated from the department with honors, pending the submission and acceptance of a paper representing substantial student research. The honors paper may be the expanded version of a paper from a current or previous course, or may result from independent research.

**Additional information:**

The department strongly recommends a field school course for undergraduate majors.
The Undergraduate Anthropology Club offers workshops, hosts informal discussions, shows films, and organizes field trips for Anthropology majors and those interested in Anthropology. Additional information is available via the Anthropology Club mailbox in WWPH 3302.

Architectural Studies Program

Learning to think about architecture as both the product of a creative process and as an historical phenomenon are the principal goals of the University of Pittsburgh's bachelor programs in Architectural Studies (BA) and Architecture (BS). The programs endeavor to create a rigorous curriculum and a supportive learning environment, allowing students to build skills and knowledge while developing close working relationships with peers and faculty. Students will gain a broad understanding of the complexity of architecture as a profession and as an academic discipline and will be well-positioned by their senior year to apply to accredited, graduate programs in architecture or historic preservation at universities in the United States and Canada. Students considering careers in architecture and historic preservation are encouraged to declare either major by the end of their freshman year at Pitt.

The programs' curriculum draws primarily on courses offered in the Department of History of Art and Architecture and the Department of Studio Arts. Students are encouraged to explore related interests through course work in other departments, through off-campus study, and through a range of undergraduate teaching and research opportunities available through Pitt's University Honors College and the Dietrich School of Arts and Sciences.

As pre-professional courses of study, the programs offer students the opportunity to explore their professional interests while acquiring a liberal arts education. Such preparation instills an intellectual maturity and a breadth of cultural experience that serve students to their advantage during professional career training. Students should be aware that a degree in architectural studies or in architecture does not constitute professional or technical training.

For more information about the Architectural Studies Program, visit www.arch.pitt.edu.

Certificate

Civil Engineering Certificate

Note: This certificate is available only to Architecture (BS) and Architectural Studies (BA) majors.

A certificate in elementary structural engineering for architectural studies majors is available under the auspices of the Swanson School of Engineering's Department of Civil and Environmental Engineering. It offers a technical, professional component to the major. The certificate consists of a minimum of 27 credits and includes courses in statics and particle dynamics, mechanics of materials, structural analysis, computer methods, concrete structures, and metal structures. Students must go to the Department of Civil and Environmental Engineering in 742 Benedum Hall to declare the Civil Engineering Certificate.

Prerequisite courses

- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1

One of the following courses

- CS 0007 - INTRODUCTION TO COMPUTER PROGRAMMING
- CS 0401 - INTERMEDIATE PROGRAMMING USING JAVA

One of the following courses

- MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2
- MATH 0235 - HONORS 1 - VARIABLE CALCULUS
One of the following courses

- PHYS 0174 - BASIC PHYSICS, SCIENCE AND ENGINEERING 1 (INTEGRATED)
- PHYS 0475 - INTRODUCTION TO PHYSICS, SCIENCE AND ENGINEERING 1 (Honors)

One of the following courses

- PHYS 0175 - BASIC PHYSICS, SCIENCE AND ENGINEERING 2 (INTEGRATED)
- PHYS 0476 - INTRODUCTION TO PHYSICS, SCIENCE AND ENGINEERING 2 (Honors)

Required courses

- MATH 0240 - ANALYTIC GEOMETRY AND CALCULUS 3
- MATH 0290 - DIFFERENTIAL EQUATIONS
- ENGR 0131 - STATICS FOR CIVIL AND ENVIRONMENTAL ENGINEERS
- ENGR 0141 - MECHANICS OF MATERIALS CIVIL AND ENVIRONMENTAL ENGINEERS
- CEE 1105 - MATERIALS OF CONSTRUCTION
- CEE 1330 - INTRODUCTION TO STRUCTURAL ANALYSIS

At least two of the following courses*

* Prerequisites apply

- CEE 1340 - CONCRETE STRUCTURES 1
- CEE 1341 - DESIGN OF STEEL STRUCTURES
- CEE 2340 - CONCRETE STRUCTURES 2
- CEE 2341 - STEEL STRUCTURES 2
- CEE 2343 - PRESTRESSED CONCRETE

Major

Architecture, BS

The Architectural Studies Program's website is an invaluable resource for detailed information about current activities and projects, the curriculum in each track, and resources for students seeking to pursue careers in architectural professions. Please visit www.arch.pitt.edu.

Required courses for the major

The Architecture major requires the completion of 74 credits, distributed as follows.

Architectural Studies courses

- ARC 0110 - APPROACHES TO THE BUILT ENVIRONMENT
- ARC 1160 - ARCHITECTURE: IMAGE, TEXT, THEORY
- ARC 1990 - ARCHITECTURAL STUDIES INTERNSHIP
- ARC 1911 - ARCHITECTURE AND DIGITAL MEDIA 1
- ARC 0201 - FOUNDATIONS STUDIO 1
- ARC 1912 - ARCHITECTURE AND DIGITAL MEDIA 2
- ARC 1201 - ARCHITECTURE DESIGN STUDIO 1
• ARC 1202 - ARCHITECTURE DESIGN STUDIO 2
• ARC 1203 - DESIGN STUDIO 3
• ARC 1204 - DESIGN STUDIO 4

History of Art and Architecture courses

• HAA 0040 - INTRODUCTION TO WESTERN ARCHITECTURE
• ARC 0116 - GLOBAL ARCHITECTURE 2: MODERN
  • Two Additional HAA Courses from the approved list of electives.

Approved elective courses

• ARC 0153 - MEDIEVAL ARCHITECTURE
• HAA 0460 - ART IN PUBLIC: INCLUSION, IDENTITY, AND ACTIVISM
• HAA 0510 - PITTSBURGH ARCHITECT/URBANISM
• HAA 0900 - SPECIAL TOPICS-ARCHITECTURAL STUDIES
• ARC 1152 - ROMAN ARCHITECTURE
• HAA 1305 - EARLY RENAISSANCE ARCHITECTURE
• ARC 1156 - HIGH RENAISSANCE ARCHITECTURE
• ARC 1158 - ARCHITECTURE AND ENLIGHTENMENT
• ARC 1161 - MODERNITY, MODERNISM AND HOUSING
• ARC 1118 - ARCHITECTURE SINCE 1945
• ARC 1181 - PITTSBURGH ARCHITECTURE/URBANISM
• ARC 1136 - EARLY AMERICAN ARCHITECTURE
• ARC 1137 - AMERICAN ARCHITECTURE SINCE INDUSTRIALIZATION
• HAA 1630 - CHINA: VILLAGE & URBAN ARCHITECTURAL SPACE
• HAA 1656 - JAPAN: ARCHITECTURE AS PERFORMATIVE SPACE
• HAA 1680 - JAPAN: ARTIST AND CITY
• ARC 1191 - ARCHITECTURE AND THE CITY IN CENTRAL EUROPE: 19TH AND 20TH CENTURIES
• ARC 0210 - SPECIAL TOPICS-ARCHITECTURE
• ARC 0300 - INTRODUCTION TO HISTORIC PRESERVATION
• ARC 1330 - GLOBAL PRESERVATION

Proseminar courses

• ARC 0901 - ARCHITECTURAL STUDIES PROSEMINAR 1
• ARC 0902 - ARCHITECTURAL STUDIES PROSEMINAR

Studio Arts courses

• SA 0130 - DRAWING STUDIO 1
• SA 0140 - SCULPTURE STUDIO 1

Physics courses

Choose one of the following courses.

• PHYS 0110 - INTRODUCTION TO PHYSICS 1
• PHYS 0174 - BASIC PHYSICS, SCIENCE AND ENGINEERING 1 (INTEGRATED)
  • CMU 48-116 Building Physics
Carnegie Mellon University courses in Building Science

Choose two of the following courses offered by Carnegie Mellon University.

- CMU 48-215 Materials & Assembly
- CMU 48-351 Human Factors
- CMU 48-324 Statics & Structures
- CMU 48-315 Environment 1

Note

Proficiency in calculus is required for students seeking a career in architecture. It is highly recommended that students successfully complete at least one semester of college-level calculus (MATH 0220) before they graduate.

Required Related Area

Every preservation track major must select either the History of Urban American or the Public Service Related area.

Grade requirements

A minimum GPA of 2.0 is required in those courses that count toward the major. A minimum GPA of 2.75 is required for the internship and a 3.00 for a recommendation to graduate school (although students wishing to apply to graduate school should maintain a minimum GPA of 3.25.)

Satisfactory/No Credit option

Only the experiential learning courses ARC 1990, HAA 1901, ARC 1901, HAA 1905 and HAA 1909 may be taken on an S/NC basis. None of these courses can be applied toward the architectural history course requirement.

Writing requirement

Students must complete at least one W-course in the major. Each track has a w-course in its requirements - ARC 1160 for the Design track and ARC 1310 for the Preservation track.

Advising

It is imperative that students who intend to pursue the architectural studies major contact the departmental advisor as soon as possible to discuss the recommended course sequence for each track, course availability and entry into restricted classes.

Maria D'Anniballe
Undergraduate Advisor
FKART 118B
412-648-2101
mdaw@pitt.edu

To set up an appointment, go to https://haadepartmentadvising.acuityscheduling.com

Minor

Architecture-Design Minor
The Architecture-Design minor consists of 18 credits, distributed as follows.

Requirements for the minor

The minor in Architecture - Design provides an option for students majoring in fields such as Civil Engineering, Environmental Studies, History, Studio Arts, Urban Studies and for whom course work in architectural design and history will provide additional breadth in their studies of the built environment. The minor requires that students complete 18 credits, 12 of which are studio-based design courses and six of which will provide historical and theoretical background for thinking about architecture and the built environment.

Foundational course in architecture

- ARC 0110 - APPROACHES TO THE BUILT ENVIRONMENT

Two courses in architectural design

Students must earn a letter grade of C or higher in ARC 0201 - FOUNDATIONS STUDIO 1 to enroll in ARC 1201 - ARCHITECTURE DESIGN STUDIO 1.

- ARC 0201 - FOUNDATIONS STUDIO 1
- ARC 1201 - ARCHITECTURE DESIGN STUDIO 1

One course in architectural history

- HAA 0040 - INTRODUCTION TO WESTERN ARCHITECTURE
- ARC 0153 - MEDIEVAL ARCHITECTURE
- HAA 0460 - ART IN PUBLIC: INCLUSION, IDENTITY, AND ACTIVISM
- ARC 0116 - GLOBAL ARCHITECTURE 2: MODERN
- HAA 0510 - PITTSBURGH ARCHITECT/URBANISM
- HAA 0900 - SPECIAL TOPICS-ARCHITECTURAL STUDIES
- ARC 1152 - ROMAN ARCHITECTURE
- ARC 1154 - CONSTRUCTING THE GOTHIC
- HAA 1305 - EARLY RENAISSANCE ARCHITECTURE
- ARC 1156 - HIGH RENAISSANCE ARCHITECTURE
- ARC 1158 - ARCHITECTURE AND ENLIGHTENMENT
- ARC 1161 - MODERNITY, MODERNISM AND HOUSING
- ARC 1118 - ARCHITECTURE SINCE 1945
- ARC 1181 - PITTSBURGH ARCHITECTURE/URBANISM
- ARC 1136 - EARLY AMERICAN ARCHITECTURE
- ARC 1137 - AMERICAN ARCHITECTURE SINCE INDUSTRIALIZATION
- HAA 1630 - CHINA: VILLAGE & URBAN ARCHITECTURAL SPACE
- HAA 1656 - JAPAN: ARCHITECTURE AS PERFORMATIVE SPACE
- HAA 1680 - JAPAN: ARTIST AND CITY
- ARC 1191 - ARCHITECTURE AND THE CITY IN CENTRAL EUROPE: 19TH AND 20TH CENTURIES
- ARC 0210 - SPECIAL TOPICS-ARCHITECTURE
- ARC 0300 - INTRODUCTION TO HISTORIC PRESERVATION
- ARC 1330 - GLOBAL PRESERVATION

Two co-requisites
ARC 1911 ARC 1911 - ARCHITECTURE AND DIGITAL MEDIA 1 may be waived for students who have taken a course in AutoCAD in high school or the equivalent course in the Department of Civil Engineering in the Swanson School of Engineering - CEE 0109 CEE 0109 - COMPUTER METH IN CIVIL ENGRG 1.

SA 0130 SA 0130 - DRAWING STUDIO 1 may be waived for students who have taken art courses in high school.

- ARC 1911 - ARCHITECTURE AND DIGITAL MEDIA 1
- SA 0130 - DRAWING STUDIO 1

**Historic Preservation Minor**

The minor in Historic Preservation is for students who are interested in a specialized focus on the preservation and documentation of historic architecture and the built environment.

Students pursuing the Historic Preservation minor must complete the following coursework, which comprises 18 credits.

**Requirements for the minor**

- ANTH 1541 - CULTURAL RESOURCE MANAGEMENT
- ARC 0300 - INTRODUCTION TO HISTORIC PRESERVATION
- ARC 1990 - ARCHITECTURAL STUDIES INTERNSHIP
  
  The internship must be conducted with an organization that pertains to the field of historic preservation and be approved by the director of the Architectural Studies program.

**Three additional courses**

Students pursuing this minor must complete three courses from the following list, for a total of at least nine credits.

- ARC 0110 - APPROACHES TO THE BUILT ENVIRONMENT
- HAA 0510 - PITTSBURGH ARCHITECT/URBANISM or
- ARC 1181 - PITTSBURGH ARCHITECTURE/URBANISM
- ARC 1136 - EARLY AMERICAN ARCHITECTURE
- ARC 1137 - AMERICAN ARCHITECTURE SINCE INDUSTRIALIZATION
- ARC 0201 - FOUNDATIONS STUDIO 1
- ARC 1320 - DOCUMENTATION AND CONSERVATION STUDIO The Architectural Studies program strongly recommends that students choose this course as one of the three from the list.
- ARC 1310 - PRESERVATION - TEXTS AND THEORY
- ARC 1330 - GLOBAL PRESERVATION

**Architectural Studies, BA**

This program was modified on October 20, 2021.

**Design Track**

The Design track requires completion of 48 credits with an additional 9 credits in a Studio Arts concentration.

**Requirements**
The Design track requires completion of 48 credits with an additional 9 credits in a Studio Arts concentration.

Architectural Studies courses

- ARC 0110 - APPROACHES TO THE BUILT ENVIRONMENT
- ARC 0201 - FOUNDATIONS STUDIO 1
- ARC 0901 - ARCHITECTURAL STUDIES PROSEMINAR 1
- ARC 0902 - ARCHITECTURAL STUDIES PROSEMINAR
- ARC 1160 - ARCHITECTURE: IMAGE, TEXT, THEORY
- ARC 1201 - ARCHITECTURE DESIGN STUDIO 1
- ARC 1202 - ARCHITECTURE DESIGN STUDIO 2
- ARC 1911 - ARCHITECTURE AND DIGITAL MEDIA 1
- ARC 1912 - ARCHITECTURE AND DIGITAL MEDIA 2

Note

A grade of C or better is required in ARC 0201 to enroll in ARC 1201.

Physics course

- PHYS 0110 - INTRODUCTION TO PHYSICS 1

History of Art and Architecture courses

- HAA 0040 - INTRODUCTION TO WESTERN ARCHITECTURE
- ARC 0116 - GLOBAL ARCHITECTURE 2: MODERN
- Two additional HAA courses in architectural history

Required Studio Arts Concentration

- SA 0130 - DRAWING STUDIO 1
- SA 0140 - SCULPTURE STUDIO 1
- SA 1430 - DRAWING STUDIO: PERSPECTIVE

Preservation Track

The Preservation track requires completion of 39 credits with an additional 12 credits in a proscribed related area in either the History of Urban America or Public Service.

History of Art and Architecture courses

The following courses as indicated.

- HAA 0040 - INTRODUCTION TO WESTERN ARCHITECTURE
- Two additional HAA courses in architectural history
  One of the following courses.
  - ARC 1136 - EARLY AMERICAN ARCHITECTURE
  - ARC 1137 - AMERICAN ARCHITECTURE SINCE INDUSTRIALIZATION

Architectural Studies courses
All of the following courses.

- ARC 0110 - APPROACHES TO THE BUILT ENVIRONMENT
- ARC 0201 - FOUNDATIONS STUDIO 1
- ARC 0901 - ARCHITECTURAL STUDIES PROSEMINAR 1
- ARC 0902 - ARCHITECTURAL STUDIES PROSEMINAR
- ARC 1911 - ARCHITECTURE AND DIGITAL MEDIA 1
- ARC 1990 - ARCHITECTURAL STUDIES INTERNSHIP

Preservation courses

All of the following courses.

- ARC 1310 - PRESERVATION - TEXTS AND THEORY
- ARC 1320 - DOCUMENTATION AND CONSERVATION STUDIO
- ARC 0300 - INTRODUCTION TO HISTORIC PRESERVATION

Architectural Studies Major other requirements and recommendations

- A GPA of at least 2.00 in all department courses is required for graduation with a major in Architectural Studies. A minimum GPA of 2.75 is required for an internship, and a minimum of 3.0 is required for those seeking a recommendation for graduate school. Students who plan to apply to graduate school should maintain a minimum GPA of 3.25.
- Only the experiential learning courses ARC 1990, HAA 1901, ARC 1901, HAA 1905, and HAA 1909 may be taken on an S/NC basis. None of these courses can be applied toward the architectural history requirement.
- Students must complete at least one writing-intensive course (W-course) in the major. Each track has a W-course in its requirements - ARC 1160 for the Design track, and ARC 1310 for the Preservation track.
- Students who plan to major in Architectural Studies should contact the departmental advisor as early in their college career as possible to discuss the recommended course sequence for each track, course availability, and entry into restricted classes.
- Proficiency in calculus is required for students seeking a career in architecture. It is highly recommended that students successfully complete at least one semester of college-level calculus (MATH 0220) before they graduate.

Department of Biological Sciences

Biological Sciences

The biological sciences major is intended for the biology student who wishes to develop an individualized combination of courses at the advanced level. The student is free to plan a curriculum of great breadth or to choose an area of specialization not offered as a major by the department. Most of the undergraduates in our department choose the biological sciences major. This major is suitable for those planning a career in which general familiarity with biological topics is desirable, such as jobs in scientific journalism, biological and pharmaceutical supply industries, biological or medical research, scientific libraries and museums, or in any industry where the products or by-products have potential biological impact. Completing the biological sciences major fulfills the basic science requirements for admission to medical, dental, and other health professional schools and to graduate biology programs.

Bioinformatics

This major is closed for enrollment as of fall 2019. Students enrolled in the program prior to fall 2019 have the option to complete this major or to transfer to the Computational Biology major. Students who choose to complete the Bioinformatics major must do so by the end of summer 2023.

Bioinformatics is the theory, application and development of computing tools to solve problems and create hypotheses in all areas of biological sciences. Biology in the post-genome world has been and continues to be transformed from a largely laboratory-based science to one that integrates experimental and information science. Bioinformatics has contributed to advances in biology by providing tools that handle datasets too large and/or
complex for manual analysis. Examples of some of these tools include assembly of DNA sequences of entire genomes, gene finding algorithms, microarray expression analysis, molecular system modeling, and biomarker discovery from mass spectra. Computational tools are central to the organization, analysis, and harvesting of biological data at the level of macromolecules, cells, and systems. Consequently, there is a growing need for trained professionals who understand the languages of biology and computer science. Biologists trained in more traditional programs may not have a working knowledge of statistics and algorithms, whereas computer scientists trained in more traditional programs may not have a working knowledge of the chemistry and biology required in the field.

**Computational Biology**

Computational biology is a growing field of study in the life sciences. This major, which is administered by the Department of Biological Sciences in the Dietrich School and the Department of Computer Science in the School of Computing and Information, trains students in the computer programming, laboratory techniques, and other skills they will need to succeed in graduate school and in the workforce.

**Ecology and Evolution**

The field of ecology explores the interactive web of organisms and the environment. Studies in evolution consider the processes by which modern organisms have developed from ancestral ones. The ecology and evolution major is a good choice for students interested in the fundamental questions of the evolutionary origins of organisms and how they survive, or don't survive, in their changing habitats. Within this major, students have the opportunity for in-depth study of the morphological and physiological adaptations of a variety of animals, plants, and microorganisms to a changing world; the ecological relationship of organisms from the individual to the global scale; and the mechanisms that drive evolutionary change.

Employment opportunities in the ecological sciences have increased greatly in recent years. There continues to be a demand for well-trained professionals at all levels (BS, MS, and PhD). Government environmental agencies, commercial consulting and testing firms, waste management industries, research laboratories, and natural history and science museums are just a few of the career opportunities. Graduate departments of ecology, evolution, environmental sciences, genetics, botany, public policy, and public health are actively seeking well-qualified students. The required chemistry, physics, and mathematics courses incorporate the requirements for admission to medical, dental, and other health professional schools. An ecology and evolution major could also serve as a springboard to a career in law.

**Microbiology**

Microbiology is the study of the biology of microscopic organisms: bacteria, viruses, algae, fungi, and protozoa. The methods used to study and manipulate these minute and mostly unicellular organisms differ from those used in most other biological investigations. Recombinant DNA technology uses microorganisms, particularly bacteria and viruses, to amplify DNA sequences and generate the encoded products. Moving genes from one microorganism to another permits application of microbial skills to solve medical and environmental problems. Many microorganisms are unique among living things in their ability to use gaseous nitrogen from the air or to degrade complex and resistant macromolecules in such materials as wood. By rearranging the genes that control these and other processes, scientists seek to engineer microorganisms that will process wastes, fertilize agricultural land, produce desirable biomolecules, and solve other problems inexpensively and safely.

Microbiologists pursue careers in many fields, including agricultural, environmental, food, and industrial microbiology; public health; resource management; basic research; education; and pharmaceuticals. Jobs in all these fields are available at the BS level as well as the MS and PhD levels. The microbiology major also incorporates the requirements expected for admission to medical, dental, and other health professional schools and to graduate schools in microbiology, molecular biology, biochemistry, and related disciplines.

**Molecular Biology**

Molecular biology emphasizes the study of molecules that make up an organism and the forces operating among these molecules. Increasingly, molecular biologists can also explore the genetic control of these molecules and thus define the developmental, cellular, and subcellular changes that occur during the dynamic processes of life. Virtually every question, whether in biochemistry, cell biology, developmental biology, or some other biological discipline, applies molecular biology, often as the prime approach, in its solution. Biochemical and molecular developments have revolutionized biological research, fueling the explosive growth in the biotechnology industry and rapid increase of molecular medicine.

The molecular biology major, with its two tracks (biochemistry or cell and developmental biology) provides a strong background for many science careers. Both tracks incorporate the requirements expected for admission to medical, dental, and other health professional schools and to graduate
schools in biochemistry, cell and molecular biology, and related disciplines. Positions for molecular biologists at the BS, MS, and PhD levels are available in the biotechnology industries as well as in universities, medical schools, hospitals, government laboratories, research institutes, and public health institutions.

For more information on the Department of Biological Sciences and the majors it offers, see www.biology.pitt.edu.

Certificate

Life Sciences Research Certificate

The goals of this certificate program are to enable students to: understand and apply key concepts in designing and performing authentic experimental research; learn and practice good science communication, ethics and responsible conduct in research; develop research practices and critical thinking skills needed for a career in research; and compile evidence of rigorous training in research for applicants to jobs and graduate programs. Students must complete four terms of inquiry-based research in lab or field settings under faculty mentorship, overseen by Research Certificate Oversight Committee, two courses about research methods, three courses focusing on quantitative skills, one course in history and philosophy of science, and written and oral presentations of their research.

Application Requirements

Prerequisites

1. Introductory Biology. Completed two terms of introductory biology, with a grade of C [not C-] or above. Transfers or students with AP/IB credit may be exempt from part of this requirement.
2. Completed 2 credits of mentored research in a Certificate-approved faculty laboratory (one term; min. 140 hrs.; BIOSC 1903/BIOSC 1904 or NROSCI 1901/NROSCI 1961 or equivalent) and have a letter of support from the faculty sponsor.
3. GPA. If students have a cumulative GPA of 2.75 or lower after completing the initial term of research, the faculty sponsor must comment in their letter of support on whether the student is likely to meet the rigorous demands of the Certificate.

Bio 1: Choose one (each totals 4 cr.)

- BIOSC 0050 - FOUNDATIONS OF BIOLOGY LABORATORY 1 or
- BIOSC 0057 - FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 1
- BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1 or
- BIOSC 0715 - UHC FOUNDATIONS OF BIOLOGY 1

Bio 2: Choose one (each totals 4 cr.)

- BIOSC 0060 - FOUNDATIONS OF BIOLOGY LABORATORY 2 or
- BIOSC 0067 - FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 2
- BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2 or
- BIOSC 0716 - UHC FOUNDATIONS OF BIOLOGY 2

Requirements to Complete the Certificate

Mentored Research in Life Sciences
Components of mentored research projects: Formulation of hypotheses, experimental design, data collection, data interpretation, drawing conclusions supported by the data. Presentation of research findings, understanding the pertinent scientific literature, developing new knowledge, and development of a path towards research independence.

Research credit requirements: Three additional terms (each term; min. 140 hours.; BIOSC 1903/BIOSC 1904 or NROSCI 1901/NROSCI 1961 or equivalent.) of research for a total of at least 8 credits or credit equivalents. BIOSC 1903/BIOSC 1904 and NROSCI 1901 /NROSCI 1961 must be approved and credits awarded according to departmental procedures. The final 2 terms of research must be with the same faculty mentor. Research equivalents must be approved by the RCOC.

Pre-planning and Reporting for each Term: Pre-planning and Reporting: In the last week of classes before the next term of research (see B above), students must submit a 1-2 page report and prospectus summarizing accomplishments and aims for the next term. RCOC determines whether the research can count towards the Certificate before the end of the add/drop period. Oversight: Reporting documents must be co-signed by the faculty sponsor (and co-sponsor if any).

Choice of Research Faculty: Research-active faculty in the Departments of Biological Sciences or Neuroscience may sponsor students for research in their labs. Faculty sponsors in other A&S departments or other University of Pittsburgh schools must be approved by RCOC.

Optional Off-campus Research Term: One term of off-campus research may be approved (e.g. summer fellowship or study abroad). Submit in advance a 1-page description to RCOC of the project and the research environment plus a letter from the research advisor confirming commitment to the ≥140 hours of research activity.

Quantitative Skills Courses - Statistics and Mathematics

Complete three courses from this list (9 credits).

- BIOSC 1545 - THE MATHEMATICS OF BIOLOGY
- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
- MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2
- MATH 0280 - INTRO TO MATRICES & LINEAR ALG
- MATH 0290 - DIFFERENTIAL EQUATIONS
- MATH 1380 - MATH BIOLOGY
- STAT 1000 - APPLIED STATISTICAL METHODS
- STAT 1221 - APPLIED REGRESSION
- STAT 1211 - APPLIED CATEGORICAL DATA ANALYSIS
- STAT 1251 - STATISTICAL QUALITY CONTROL
- STAT 1241 - APPLIED SAMPLING
- STAT 1311 - APPLIED MULTIVARIATE ANALYSIS
- STAT 1321 - APPLIED TIME SERIES

Graduate level options for the certificate:

- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS 1
- BIOST 2011 - PRINCIPLES OF STATISTICAL REASONING
- BIOST 2012 - BAYESIAN & EMPIRICAL BAYES STAT

History and Philosophy of Science Courses

Complete one course from this list (3 credits).

- HPS 0427 - MYTH AND SCIENCE
- HPS 0437 - DARWINISM AND ITS CRITICS
- HPS 0430 - GALILEO AND CREATION OF MODERN SCIENCE
- HPS 0515 - MAGIC, MEDICINE AND SCIENCE or
- HIST 0089 - MAGIC, MEDICINE AND SCIENCE
Research Methods Courses

- Complete two Research Methods courses, one in research communication and one in research mechanics. It is recommended that the research courses be in the student's major department.
- Be enrolled in the Certificate and performing research in a Certificate-approved lab during the same term as enrolled in these courses. Courses may be taken in any order. Substitution of other Research Methods courses must be pre-approved by RCOC.
- BIOSC 1906 - RESEARCH COMMUNICATION: COMMUNICATION IN LIFE SCIENCES RESEARCH
- BIOSC 1907 - RESEARCH DECONSTRUCTION: UNDER THE HOOD OF LIFE SCIENCES RESEARCH
- NROSCI 2014 - SPEAKING OF SCIENCE

Presenting Research

The student must present their research at two scientific meetings or symposia, at least one venue must be outside of major and research Departments. Ex.: Honors College Research Fair, Science20xx, Duquesne Summer Undergraduate Research Symposium, regional or national scientific meeting. Presentation and abstract must be designed and delivered by the student and approved by the research faculty advisor and RCOC. The research abstract and a copy of poster or talk must be submitted to RCOC.

Research paper

The student will submit a manuscript describing the research completed in the final research experience spanning at least two consecutive terms. This will be in the form of a research manuscript. The paper must be submitted to the faculty sponsor and the RCOC by the last week of classes before finals week. The paper must be approved by the faculty sponsor and RCOC. The same final research paper may be considered for satisfying both Departmental Honors and the Research Certificate, provided it fulfills other requirements of the Department.

Portfolio Documentation

Upon registration for the Certificate, students must start (and regularly update) their electronic Portfolio, documenting their progress towards Certificate completion. Each proposal, presentation, research report, and other Certificate-related materials must be collated in the Portfolio. The Portfolio allows students, faculty, and advisors to review progress towards the Certificate, and provides coherent documentation of research proficiency when applying for employment or graduate school admission.

GPA Requirements

The student must remain in good academic standing (minimum cumulative GPA 2.00); if students have a cumulative GPA of 2.75 or lower after completing the initial term of research, the faculty sponsor for that research must comment in writing their letter of support on whether the student is likely to meet the rigorous demands of the Certificate.

Advising

Majors in the Departments of Biological Sciences or Neuroscience will be advised through their departments. Students outside of these majors will be assigned an advisor within one of these majors.
Students conducting research with a faculty member who does not work in the Departments of Biological Sciences or Neuroscience must have their research faculty sponsor complete a Faculty Mentor Application unless they are a CNUP faculty member. Students must submit the faculty mentor application with their application for the certificate.

**Joint Major**

**Computational Biology, BS**

**Computational Biology Requirements**

Computational biology is a growing field of study in the life sciences. This major, which is administered by the Department of Biological Sciences in the Dietrich School and the Department of Computer Science in the School of Computing and Information, trains students in the computer programming, laboratory techniques, and other skills they will need to succeed in graduate school and in the workforce. This major requires completion of 64 credits of coursework, detailed as follows.

Students may declare a major in Computational Biology after completing the following courses or their equivalents with a letter grade of C or higher.

- BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1
- BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2
- CHEM 0110 - GENERAL CHEMISTRY 1
- CHEM 0120 - GENERAL CHEMISTRY 2
- CS 0011 - INTRODUCTION TO COMPUTING FOR SCIENTISTS

Transfer students who have finished these requirements prior to admission to the University of Pittsburgh are asked to complete one term of course work, including at least one BIOSC course that counts toward the major, before declaring within the Dietrich School. Transfer students applying to the School of Computing and Information who have finished these requirements prior to admission to the University of Pittsburgh may be admitted directly into the major - note, transfer application requirements for SCI are outlined in the Catalog under "Admission Requirements and Procedures ."

**Biological Sciences courses**

All of the following courses are required for the major.

- BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1 or
- BIOSC 0155 - HONORS FOUNDATIONS OF BIOLOGY 1
- BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2 or
- BIOSC 0165 - HONORS FOUNDATIONS OF BIOLOGY 2
- BIOSC 0350 - GENETICS
- BIOSC 1000 - BIOCHEMISTRY
*Students may alternately choose BIOSC 1810 MACROMOLECULAR STRUCTURE AND FUNCTION and BIOSC 1820 METABOLIC PATHWAYS AND REGULATION in lieu of BIOSC 1000. In this case, BIOSC 1820 becomes the elective course.

**Computer Science courses**

All of the following courses are required for the major.

- CS 0011 - INTRODUCTION TO COMPUTING FOR SCIENTISTS
- CS 0401 - INTERMEDIATE PROGRAMMING USING JAVA
- CS 0441 - DISCRETE STRUCTURES FOR CS
- CS 0445 - ALGORITHMS AND DATA STRUCTURES 1
- CS 1501 - ALGORITHMS AND DATA STRUCTURES 2
Computational Biology courses

All of the following courses are required for the major.

- BIOSC 1540 - COMPUTATIONAL BIOLOGY
- BIOSC 1542 - COMPUTATIONAL GENOMICS or
- BIOSC 1544 - SIMULATION AND MODELING
- BIOSC 1630 - COMPUTATIONAL BIOLOGY SEMINAR

Capstone course

Students must choose one of the following capstone courses.

- BIOSC 1640 - COMPUTATIONAL BIOLOGY RESEARCH
- CS 1640 - BIOINFORMATICS SOFTWARE DESIGN

Co-requisite Chemistry courses

All of the following courses are required for the major.

- CHEM 0110 - GENERAL CHEMISTRY 1 or
- CHEM 0710 - UHC GENERAL CHEMISTRY 1
- CHEM 0120 - GENERAL CHEMISTRY 2 or
- CHEM 0720 - UHC GENERAL CHEMISTRY 2
- CHEM 0310 - ORGANIC CHEMISTRY 1 or
- CHEM 0730 - UHC ORGANIC CHEMISTRY 1

Co-requisite Mathematics and Statistics courses

Both of the following courses are required for the major.

- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
- STAT 1000 - APPLIED STATISTICAL METHODS

Elective courses

Students must select one course from the following list.

- BIOSC 0351 - GENETICS LABORATORY
- BIOSC 0370 - ECOLOGY
- BIOSC 1005 - INTRODUCTION TO BIOCHEMISTRY LAB
- BIOSC 1130 - EVOLUTION
- BIOSC 1285 - GENOMICS LABORATORY
- BIOSC 1320 - POPULATION BIOLOGY
- BIOSC 1500 - CELL BIOLOGY
- BIOSC 1520 - DEVELOPMENTAL BIOLOGY
- BIOSC 1760 - IMMUNOLOGY
- BIOSC 1820 - METABOLIC PATHWAYS AND REGULATION
  * This course must be taken in conjunction with BIOSC 1810 MACROMOLECULAR STRUCTURE AND FUNCTION; the pair of courses are taken in lieu of BIOSC 1000 BIOCHEMISTRY.
- BIOSC 1850 - MICROBIOLOGY
- BIOSC 1940 - MOLECULAR BIOLOGY
- CHEM 0250 - INTRODUCTION TO ANALYTICAL CHEMISTRY
- CHEM 0320 - ORGANIC CHEMISTRY 2
- CHEM 1460 - INTRO MODERN COMPUTATIONAL SCI
- CHEM 1830 - SYNTHETIC BIOLOGY
- CS 1502 - FORMAL METHODS IN COMPUTER SCIENCE
- CS 1520 - PROGRAMMING LANGUAGE FOR WEB APPLICATIONS
- CS 1555 - DATABASE MANAGEMENT SYSTEMS
- CS 1566 - INTRODUCTION COMPUTER GRAPHICS
- CS 1675 - INTRODUCTION TO MACHINE LEARNING
- MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2
- MATH 0280 - INTRO TO MATRICES & LINEAR ALG
- NROSCI 1000 - INTRO TO NEUROSCIENCE
- PHYS 0174 - BASIC PHYSICS, SCIENCE AND ENGINEERING 1 (INTEGRATED)
- STAT 1221 - APPLIED REGRESSION

### Additional Requirements

**Writing (W) requirement**

Dietrich School students must complete at least one W-course in the major. BIOSC 1630 - COMPUTATIONAL BIOLOGY SEMINAR meets this requirement.

**Grade requirements**

All courses offered by the departments of Biological Sciences and Computer Science must be completed with a letter grade of C or better.

**Co-Requisite courses**

Students must complete co-requisite courses in the departments of Mathematics, Statistics, and Chemistry with an overall average of C or better, with the exceptions of CHEM 0110 GENERAL CHEMISTRY 1 and CHEM 0120 GENERAL CHEMISTRY 2. Students must earn letter grades of C or better in each of these classes.

**Honors**

A Dietrich School student may achieve honors in the Department of Biological Sciences by meeting these requirements:

1. Maintain a minimum GPA of 3.25;
2. Complete a faculty-supported research project; and

A School of Computing and Information student may achieve honors in the Department of Computer Science by meeting these requirements:

1. Maintain a minimum overall GPA of 3.25; and
2. Maintain a major GPA (CS and Biological Science courses) of 3.5; and
3. Complete an additional major elective course with a grade of A.

**Satisfactory/No Credit option**
One core course required for the major may be taken on an S/NC basis. Co-requisite courses may be taken on an S/NC basis subject to School limitations. Please check with your School for specific information on S/NC grades.

Restrictions

- All BIOSC courses at the 0800-level are designed for non-majors and therefore do not count toward the major.
- Independent study and independent research credits do not count toward the major. The Department of Biological Sciences encourages students to seek out these experiences in order to enhance their education.

Major

Bioinformatics, BS

In the Fall of 2019, the Bioinformatics, BS was inactive for students to enroll in. Students who were enrolled prior to the Fall 2019 term have the option to remain in the major or transfer to the Computational Biology major. Students who choose to complete the program under Bioinformatics must do so by Summer 2023 term.

Biological Sciences Requirements

Students in all five majors within the Department of Biological Sciences must follow general rules and fulfill certain general requirements in addition to those in their specific major:

- A total of 32 credits in biology must be taken (see specific course requirements for each major below). All biology courses taken for the major must be completed with a C or better. If a C- or lower is earned in a biology elective course that is not repeated, the course will be used in calculating the overall GPA in the major but will not be counted as part of the 32 credits required for the major.
- Co-requisite courses must be taken in chemistry, physics, and mathematics and/or statistics, as follows.
  - CHEM 0110 - GENERAL CHEMISTRY 1 and CHEM 0120 - GENERAL CHEMISTRY 2, including the labs;
  - CHEM 0310 - ORGANIC CHEMISTRY 1, CHEM 0320 - ORGANIC CHEMISTRY 2, and CHEM 0345 - ORGANIC LABORATORY lectures and labs;
  - MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1;
  - Either MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2 or STAT 1000 - APPLIED STATISTICAL METHODS;
  - Either the algebra-based physics courses PHYS 0110 - INTRODUCTION TO PHYSICS 1 and PHYS 0111 - INTRODUCTION TO PHYSICS 2, or the calculus-based physics courses PHYS 0174 - BASIC PHYSICS, SCIENCE AND ENGINEERING 1 (INTEGRATED) and PHYS 0175 - BASIC PHYSICS, SCIENCE AND ENGINEERING 2 (INTEGRATED).
- A minimum GPA of 2.00 must be maintained in all biology courses and in the combined co-requisite courses. The Satisfactory/No Credit (S/NC) option may be used for only one biology course and for any of the co-requisite courses.
- Departmental writing (W) courses may be selected once the major is declared and count towards the 32 biology credits for the major.
- Opportunities for faculty-sponsored directed research and internship experiences are available and strongly encouraged. Academic credit awarded from the departmental W, directed research, and internship courses count as credit toward graduation, but not in determining the 32 biology credits required for the major. Students interested in departmental honors should contact department advisors for information.
- University Honors College equivalents for any of the above courses are accepted. Credit by examination is available only through appropriate AP scores for equivalents to BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1, BIOSC 0057 - FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 1, BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2, and BIOSC 0067 - FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 2 lectures and labs.

Updated information about the department, major requirements, and course offerings is available on the department's Web site, www.biology.pitt.edu.
Corequisite courses

Corequisite courses must be taken in chemistry, physics, and mathematics and/or statistics, including

- CHEM 0110 - GENERAL CHEMISTRY 1 which includes the lab
- CHEM 0120 - GENERAL CHEMISTRY 2 which includes the lab
- CHEM 0310 - ORGANIC CHEMISTRY 1
- CHEM 0330 - ORGANIC CHEMISTRY LABORATORY 1
- CHEM 0320 - ORGANIC CHEMISTRY 2
- CHEM 0340 - ORGANIC CHEMISTRY LABORATORY 2
- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1

- MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2 or
- STAT 1000 - APPLIED STATISTICAL METHODS

- PHYS 0110 - INTRODUCTION TO PHYSICS 1 and
- PHYS 0111 - INTRODUCTION TO PHYSICS 2
  or
- PHYS 0174 - BASIC PHYSICS, SCIENCE AND ENGINEERING 1 (INTEGRATED) and
- PHYS 0175 - BASIC PHYSICS, SCIENCE AND ENGINEERING 2 (INTEGRATED)

Note:

Updated information about the department, major requirements, and course offerings is available on the department's Web site, www.biology.pitt.edu.

Requirements

The undergraduate bioinformatics degree program at the University of Pittsburgh is operated jointly by the departments of biological sciences (www.biology.pitt.edu) and computer science (www.cs.pitt.edu). This program offers training that builds a solid foundation in chemistry, biology, computer science, mathematics, and statistics. The training will enable students to communicate fluently with experts across these disciplines and to have the skills necessary to apply computing tools to address contemporary problems in biology and medicine. It will enhance the professional opportunities for undergraduates to pursue careers in pure or applied research in academia, government, pharmaceutical, medical, or biotechnology sectors.

Advising for Bioinformatics majors is housed in both the Department of Biology and the Department of Computer Science. For information, contact one of the advisors.

Core courses (42 credits)

- BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1
- BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2
- BIOSC 0350 - GENETICS
- BIOSC 1810 - MACROMOLECULAR STRUCTURE AND FUNCTION
- CHEM 0310 - ORGANIC CHEMISTRY 1 *
- CHEM 0320 - ORGANIC CHEMISTRY 2
- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
- STAT 1000 - APPLIED STATISTICAL METHODS
- STAT 1221 - APPLIED REGRESSION
- CS 0401 - INTERMEDIATE PROGRAMMING USING JAVA **
- CS 0445 - ALGORITHMS AND DATA STRUCTURES 1
- CS 0441 - DISCRETE STRUCTURES FOR CS
• CS 1501 - ALGORITHMS AND DATA STRUCTURES 2

Note:

* CHEM 0110 - GENERAL CHEMISTRY 1 and CHEM 0120 - GENERAL CHEMISTRY 2 are pre-requisites to taking CHEM 0310.

** Students without a background in programming will be encouraged to take CS 0007 - INTRODUCTION TO COMPUTER PROGRAMMING prior to taking CS 0401.

Upper Level Courses (22 credits)

• BIOSC 1540 - COMPUTATIONAL BIOLOGY

• BIOSC 1640 - COMPUTATIONAL BIOLOGY RESEARCH or

• CS 1640 - BIOINFORMATICS SOFTWARE DESIGN

• BIOSC 1901 - INDEPENDENT STUDY (total of four credits)* or

• CS 1950 - DIRECTED RESEARCH (total of four credits)*

Electives (12 credits)

Electives (12 credits) to be chosen from an approved list of courses in Statistics, Chemistry, Biological Sciences and/or Computer Science. With the approval of the Bioinformatics Program Committee, the student may take electives in other departments.

Note:

* Undergraduate Research is taken over multiple terms for variable credit. Four credits of undergraduate research are required for the major. Research can begin as early as the sophomore year and must be approved by Kirk Pruhs in the Department of Computer Science, or Paula Grabowski in the Department of Biological Sciences.

Capstone experience

BIOSC 1640 and CS 1640 satisfy the bioinformatics major capstone experience requirement. Capstone request must be made to Kirk Pruhs in the Department of Computer Science.

Additional requirements and restrictions

• Bioinformatics majors who have completed CS 0401 may not enroll in CS 0004 or CS 0007.

• BIOSC 1000 cannot be substituted for BIOSC 1810.

• CHEM 1810 can only be substituted for BIOSC 1810 if it is not possible for the student to schedule BIOSC 1810

• Students must complete at least one W-course in the major

• A grade of C or better is required in each of the core and upper level courses that are to count toward the major.

• This requirement also satisfies the Dietrich School requirement of a minimum GPA of 2.0 in major courses

• Elective courses for the major must be completed with a grade of C or better. If a C-or lower is earned in an elective course for the major and is not repeated, the course will be used to calculate the overall GPA but will not be counted toward the 32 credits required for the major.

• Students must earn a minimum GPA of 2.0 in the required chemistry and mathematics courses.

• No Bioinformatics majors courses may be taken on an S/NC basis.

Honors major requirements
Honors in Bioinformatics is granted if, in addition to fulfilling all requirements for the major, the student:

- completes three semesters (3 x 2 credits) or the equivalent (summer counts as a semester equivalent) of undergraduate research together with a written honors thesis presented in the last semester of the senior year;
- maintains a GPA of 3.5 or above in all Bioinformatics major courses; and
- maintains an overall GPA of 3.25 or above.

Approved elective course list

Biological Sciences

- BIOSC 1500 - CELL BIOLOGY
- BIOSC 1545 - THE MATHEMATICS OF BIOLOGY
- BIOSC 1820 - METABOLIC PATHWAYS AND REGULATION
- BIOSC 1830 - BIOCHEMISTRY LABORATORY
- BIOSC 1940 - MOLECULAR BIOLOGY
- BIOSC 1950 - MOLECULAR GENETICS LABORATORY

Computer Science

- CS 1510 - ALGORITHM DESIGN
- CS 1520 - PROGRAMMING LANGUAGE FOR WEB APPLICATIONS
- CS 1555 - DATABASE MANAGEMENT SYSTEMS
- CS 1566 - INTRODUCTION COMPUTER GRAPHICS
- CS 1571 - INTRODUCTION TO ARTIFICIAL INTELLIGENCE
- CS 1645 - INTRODUCTION TO HIGH PERFORMANCE COMPUTING SYSTEMS

Chemistry

- CHEM 0250 - INTRODUCTION TO ANALYTICAL CHEMISTRY
- CHEM 1410 - PHYSICAL CHEMISTRY 1
- CHEM 1420 - PHYSICAL CHEMISTRY 2

Statistics

- STAT 1301 - STATISTICAL PACKAGES
- STAT 1311 - APPLIED MULTIVARIATE ANALYSIS
- STAT 1321 - APPLIED TIME SERIES

Biological Sciences, BS

Biological Sciences Requirements

Students in all five majors within the Department of Biological Sciences must follow general rules and fulfill certain general requirements in addition to those in their specific major:

- A total of 32 credits in biology must be taken (see specific course requirements for each major below). All biology courses taken for the major must be completed with a C or better. If a C- or lower is earned in a biology elective course that is not repeated, the course will be used in calculating the overall GPA in the major but will not be counted as part of the 32 credits required for the major.
- Co-requisite courses must be taken in chemistry, physics, and mathematics and/or statistics, as follows.
Corequisite courses

Corequisite courses must be taken in chemistry, physics, and mathematics and/or statistics, including:

- CHEM 0110 - GENERAL CHEMISTRY 1 which includes the lab
- CHEM 0120 - GENERAL CHEMISTRY 2 which includes the lab
- CHEM 0310 - ORGANIC CHEMISTRY 1
- CHEM 0320 - ORGANIC CHEMISTRY 2
- CHEM 0330 - ORGANIC CHEMISTRY LABORATORY 1
- CHEM 0340 - ORGANIC CHEMISTRY LABORATORY 2
- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
- MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2 or
- STAT 1000 - APPLIED STATISTICAL METHODS
- PHYS 0110 - INTRODUCTION TO PHYSICS 1 and
- PHYS 0111 - INTRODUCTION TO PHYSICS 2 or
- PHYS 0174 - BASIC PHYSICS, SCIENCE AND ENGINEERING 1 (INTEGRATED)
- PHYS 0175 - BASIC PHYSICS, SCIENCE AND ENGINEERING 2 (INTEGRATED)

Note:

Updated information about the department, major requirements, and course offerings is available on the department's Web site, www.biology.pitt.edu.

Biology Course Requirements

Completion of the biological sciences major requires a total of 32 credits in biology, including:

17 credits of required courses
A minimum of 13 credits of upper-division courses

A minimum of 13 credits of upper-division courses, which must include two labs or one lab and one field course or one lab and BIOSC 1545 - THE MATHEMATICS OF BIOLOGY. Students may begin to take elective courses when they have completed the appropriate prerequisite courses; for example, some upper-division courses have only 0150 and 0160 as prerequisites whereas others have additional requirements. As part of these electives, students who declare a major in Biological Sciences on or after September 14, 2009 must complete one higher-level 3-credit BIOSC lecture class, defined as a course with prerequisites beyond BIOSC 0150 and BIOSC 0160.

Ecology and Evolution, BS

The field of ecology explores the interactive web of organisms and the environment. Studies in evolution consider the processes by which modern organisms have developed from ancestral ones. The Ecology and Evolution major is a good choice for students interested in the fundamental questions of the evolutionary origins of organisms and how they survive, or don't survive, in their changing habitats. Within this major, students have the opportunity for in-depth study of the morphological and physiological adaptations of a variety of animals, plants, and microorganisms to a changing world, the ecological relationships of organisms from the individual to the global scale, and the mechanisms that drive evolutionary change.

Employment opportunities in Ecology and Evolutionary Biology have increased greatly in recent years. There continues to be a demand for well-trained professionals at all levels (BS, MS, and PhD). Government environmental agencies, commercial consulting and testing firms, waste management industries, research laboratories, and natural history and science museums are just a few of the career opportunities. Graduate departments of ecology, evolution, environmental sciences, genetics, botany, public policy, and public health are actively seeking well-qualified students. The required chemistry, physics, and mathematics courses incorporate the requirements for admission to medical, dental, and other health-professional schools. An Ecology and Evolution major could also serve as a springboard to a career in law.

Requirements for the Ecology and Evolution major are described below.

Biological Sciences courses

Majors must complete 32 credits of Biological Sciences coursework as described below.

- BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1
- One of the following lab courses
- BIOSC 0050 - FOUNDATIONS OF BIOLOGY LABORATORY 1
- BIOSC 0057 - FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 1
- BIOSC 0058 - FOUNDATIONS OF BIOLOGY SEA-PHAGES LABORATORY 1
- BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2
- One of the following laboratory courses.
- BIOSC 0060 - FOUNDATIONS OF BIOLOGY LABORATORY 2
- BIOSC 0067 - FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 2
- BIOSC 0068 - FOUNDATIONS OF BIOLOGY SEA-PHAGES LABORATORY 2
- BIOSC 0350 - GENETICS or
- BIOSC 0355 - UHC GENETICS
- BIOSC 0370 - ECOLOGY or
- BIOSC 1130 - EVOLUTION
- BIOSC 1000 - BIOCHEMISTRY *
• BIOSC 0355 - UHC GENETICS
• BIOSC 0370 - ECOLOGY
• BIOSC 0390 - ECOLOGY LABORATORY
• BIOSC 1120 - BIOSTATISTICS
• BIOSC 1130 - EVOLUTION
• BIOSC 1131 - EVOLUTION LABORATORY
• BIOSC 1550 - ECOLOGY AND EVOLUTION SEMINAR
• BIOSC 0391 - ECOLOGY LABORATORY WRITING PRACTICUM
• BIOSC 1551 - ECOLOGY AND EVOLUTION SEMINAR WRITING PRACTICUM

Elective courses

Majors must complete nine credits of elective courses, including at least one field course, from the following lists.

Field course electives

Students must choose at least one field courses offered at the Pymatuning Laboratory of Ecology (PLE) (3 credits) or the Oakland campus (BIOSC 1221 - 1 credit) or an equivalent course approved by the Director of Undergraduate Studies. If the field course is less than 3 credits, additional credits must be added from the approved electives list to reach 9 credits total. PLE course offerings change annually; check the course schedule to see which courses are offered.

• BIOSC 1140 - BEHAVIORAL ECOLOGY
• BIOSC 1160 - FOREST ECOLOGY
• BIOSC 1170 - FRESHWATER ECOLOGY
• BIOSC 1180 - ECOLOGY OF AMPHIBIANS AND REPTILES
• BIOSC 1190 - AQUATIC ENTOMOLOGY
• BIOSC 1220 - ECOLOGICAL FIELD STUDIES
• BIOSC 1221 - URBAN ECOLOGICAL FIELD STUDIES
• BIOSC 1230 - ORNITHOLOGY
• BIOSC 1270 - ECOLOGY OF FISH
• BIOSC 1310 - WETLAND ECOLOGY AND MANAGEMENT
• BIOSC 1330 - POPULATION BIOLOGY
• BIOSC 1340 - FIELD ENTOMOLOGY
• BIOSC 1360 - ECOLOGY OF FUNGI
• BIOSC 1370 - FIELD TECHNIQUES IN ECOLOGY AND CONSERVATION
• BIOSC 1400 - DISEASE ECOLOGY
• BIOSC 1420 - WILDLIFE MANAGEMENT
• BIOSC 1610 - CONSERVATION BIOLOGY

Lecture course electives

• ANTH 1601 - STRUCTURE AND FUNCTION
• ANTH 1603 - HUMAN ORIGINS
• ANTH 1605 - PRIMATE ANATOMY
• BIOSC 1000 - BIOCHEMISTRY
• BIOSC 1200 - VERTEBRATE MORPHOLOGY
• BIOSC 1275 - GENOMICS
• BIOSC 1320 - POPULATION BIOLOGY
• BIOSC 1350 - PLANT BIOLOGY
• BIOSC 1375 - TROPICAL BIOLOGY
Co-requisite courses

Students choose one track for co-requisite courses:

Track 1: Chemophysical

- CHEM 0110 - GENERAL CHEMISTRY 1
- CHEM 0120 - GENERAL CHEMISTRY 2
- CHEM 0310 - ORGANIC CHEMISTRY 1
- CHEM 0320 - ORGANIC CHEMISTRY 2
- CHEM 0345 - ORGANIC LABORATORY
- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
- STAT 1000 - APPLIED STATISTICAL METHODS
  Either the algebra-based physics courses or the calculus-based physics courses.
- Algebra-based courses:
  - PHYS 0110 - INTRODUCTION TO PHYSICS 1
  - PHYS 0111 - INTRODUCTION TO PHYSICS 2
- Physics-based courses:
  - PHYS 0174 - BASIC PHYSICS, SCIENCE AND ENGINEERING 1 (INTEGRATED)
  - PHYS 0175 - BASIC PHYSICS, SCIENCE AND ENGINEERING 2 (INTEGRATED)

Track 2: Quantitative

- CHEM 0110 - GENERAL CHEMISTRY 1
- CHEM 0120 - GENERAL CHEMISTRY 2
- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
- MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2
- STAT 1000 - APPLIED STATISTICAL METHODS
- STAT 1211 - APPLIED REGRESSION
- STAT 1261 - PRINCIPLES OF DATA SCIENCE
- STAT 1301 - STATISTICAL PACKAGES

Track 3: Environmental

- CHEM 0110 - GENERAL CHEMISTRY 1
- CHEM 0120 - GENERAL CHEMISTRY 2
- GEOL 0055 - GEOLOGY LABORATORY
- GEOL 0820 - NATURAL DISASTERS
- GEOL 0840 - ENVIRONMENTAL SCIENCE
- GEOL 1030 - THE ATMOSPHERE, OCEANS AND CLIMATE
- GEOL 1445 - GIS, GPS, AND COMPUTER METHODS
- GEOL 1515 - ENVIRONMENTAL GEOCHEMISTRY
- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
- STAT 1000 - APPLIED STATISTICAL METHODS
Grade requirements

- Each required BIOSC course for the major must be completed with a grade of C or better.
- The elective courses for the major must also be completed with a grade of C or better.
- A minimum GPA of 2.0 in all departmental courses taken is required for graduation. If a C- or lower is earned in an elective course for the major but is not repeated, the course will be used to calculate the departmental GPA but will not be counted toward the 32 credits required for the major.
- Students must also earn a minimum GPA of 2.0 in the co-requisite Chemistry, Geology, Mathematics, Physics, and Statistics courses. A passing grade of C- or lower in a co-requisite course can be accepted, except for CHEM 0110 and CHEM 0120, if balanced by a higher grade in another co-requisite course so that the co-requisite GPA is 2.0 or higher. Students must pass CHEM 0110 and CHEM 0120 with a grade of C (not C-) or better for the major.
- Only one BIOSC course may be taken on a Satisfactory/No Credit (S/NC) basis.

University Honors College equivalent courses may be substituted for required or elective courses.

Microbiology, BS

Microbiology is the study of microscopic organisms, including viruses, bacteria, archaea, fungi, and protists. Microorganisms are important for both the good that they do (nutrient cycling, production of antibiotics, bioremediation, food production) and the bad (food poisoning, infectious diseases, epidemics). Our program provides intensive training in modern microbiology, including cutting-edge research in genomics and genetic engineering.

Microbiologists pursue careers in many fields, including agricultural, environmental, food, and industrial microbiology; public health; resource management; basic research; education; and pharmaceuticals. Jobs in all of these fields are available at the BS level as well as the MS and PhD levels. The microbiology major also incorporates the requirements expected for admission to medical, dental, and other health professional schools, and to graduate schools in microbiology, molecular biology, biochemistry, and related disciplines.

Requirements for the Microbiology Major are described below.

Biological Sciences courses

Majors must complete a minimum of 32 credits of Biological Sciences coursework as described below.

Required courses

- BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1
  One of the following lab courses
- BIOSC 0050 - FOUNDATIONS OF BIOLOGY LABORATORY 1
- BIOSC 0057 - FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 1
- BIOSC 0058 - FOUNDATIONS OF BIOLOGY SEA-PHAGES LABORATORY 1
NULL
- BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2
  One of the following lab courses
- BIOSC 0060 - FOUNDATIONS OF BIOLOGY LABORATORY 2
- BIOSC 0067 - FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 2
- BIOSC 0068 - FOUNDATIONS OF BIOLOGY SEA-PHAGES LABORATORY 2
NULL
- BIOSC 0350 - GENETICS
NULL
- BIOSC 1000 - BIOCHEMISTRY
  or
- BIOSC 1810 - MACROMOLECULAR STRUCTURE AND FUNCTION
- BIOSC 1820 - METABOLIC PATHWAYS AND REGULATION
NULL
- BIOSC 1280 - MICROBIAL GENETICS
• BIOSC 1570 - MICROBIOLOGY SEMINAR
• BIOSC 1850 - MICROBIOLOGY
• BIOSC 1860 - MICROBIOLOGY LABORATORY
• BIOSC 1865 - MICROBIAL PHYSIOLOGY

Writing-intensive course

Choose one of the following courses.

• BIOSC 1291 - EXPERIMENTAL GENETIC ENGINEERING WRITNG PRACTICUM
• BIOSC 1571 - MICROBIOLOGY SEMINAR WRITING PRACTICUM
• BIOSC 1741 - VIROLOGY LABORATORY WRITING PRACTICUM
• BIOSC 1861 - MICROBIOLOGY LABORATORY WRITING PRACTICUM

Microbiology elective courses

Choose six to seven credits of courses from the following lists. At least one of the selected courses must be a lab or field course.

Lecture courses

• BIOSC 0370 - ECOLOGY
• BIOSC 1120 - BIOSTATISTICS
• BIOSC 1130 - EVOLUTION
• BIOSC 1275 - GENOMICS
• BIOSC 1500 - CELL BIOLOGY
• BIOSC 1540 - COMPUTATIONAL BIOLOGY
• BIOSC 1545 - THE MATHEMATICS OF BIOLOGY
• BIOSC 1730 - VIROLOGY
• BIOSC 1760 - IMMUNOLOGY
• BIOSC 1820 - METABOLIC PATHWAYS AND REGULATION
  * This course must be taken in conjunction with BIOSC 1810 MACROMOLECULAR STRUCTURE AND FUNCTION; the pair of courses are taken in lieu of BIOSC 1000 BIOCHEMISTRY.CHEM 1810 - CHEMICAL BIOLOGY
• BIOSC 1940 - MOLECULAR BIOLOGY
• BIOSC 1999 - MEDICAL MICROBIOLOGY
• CHEM 1830 - SYNTHETIC BIOLOGY

Lab courses

• BIOSC 0352 - INTRODUCTION TO MOLECULAR GENETICS LABORATORY
• BIOSC 0390 - ECOLOGY LABORATORY
• BIOSC 1005 - INTRODUCTION TO BIOCHEMISTRY LAB
• BIOSC 1285 - GENOMICS LABORATORY
• BIOSC 1290 - EXPERIMENTAL GENETIC ENGINEERING LABORATORY
• BIOSC 1510 - CELL BIOLOGY LABORATORY
• BIOSC 1740 - VIROLOGY LABORATORY

Field courses

• BIOSC 1360 - ECOLOGY OF FUNGI
• BIOSC 1400 - DISEASE ECOLOGY
Co-requisite courses

- CHEM 0110 - GENERAL CHEMISTRY 1
- CHEM 0120 - GENERAL CHEMISTRY 2
- CHEM 0310 - ORGANIC CHEMISTRY 1
- CHEM 0320 - ORGANIC CHEMISTRY 2
- CHEM 0345 - ORGANIC LABORATORY
- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
  Choose either MATH 0230 or STAT 1000.
- MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2
  or
- STAT 1000 - APPLIED STATISTICAL METHODS
  Either the algebra-based physics courses or the calculus-based physics courses.
- PHYS 0110 - INTRODUCTION TO PHYSICS 1 and
- PHYS 0111 - INTRODUCTION TO PHYSICS 2
  or
- PHYS 0174 - BASIC PHYSICS, SCIENCE AND ENGINEERING 1 (INTEGRATED) and
- PHYS 0175 - BASIC PHYSICS, SCIENCE AND ENGINEERING 2 (INTEGRATED)

Grade requirements

- Each required BIOSC course for the major must be completed with a grade of C or better.
- The elective courses for the major must also be completed with a grade of C or better.
- A minimum GPA of 2.0 in all departmental courses taken is required for graduation. If a C- or lower is earned in an elective course for the major but is not repeated, the course will be used to calculate the departmental GPA but will not be counted toward the 32 credits required for the major.
- Students must also earn a minimum GPA of 2.0 in the co-requisite courses. A passing grade of C- or lower in a co-requisite course can be accepted if balanced by a higher grade in another co-requisite course so that the co-requisite GPA is 2.0 or higher. Exceptions: CHEM 0110 and CHEM 0120 have to be C or better to declare the major; PHYS 0110/0174 has to be C or better to enroll in PHYS 0111/0175; MATH 0220 has to be C or better to enroll in MATH 0230.
- Only one BIOSC course may be taken on a Satisfactory/No Credit (S/NC) basis. University Honors College equivalent courses may be substituted for required or elective courses.

Molecular Biology, BS

Molecular biology emphasizes the study of molecules that make up an organism, how they interact, and how they are controlled. With the development of the field of genomics, biologists also study one class of molecules (DNA) at the whole genome level. Molecular biology and genomics are applied within all biological disciplines, including biochemistry, cell biology, and developmental biology. Molecular biology and genomics developments have revolutionized biological research, fueling the explosive growth in the biotechnology industry and rapid increase of molecular medicine.

The Molecular Biology and Genomics major provides a strong background for many science careers, incorporating the requirements expected for admission to medical, dental, and other health professional schools and to graduate schools in cell and molecular biology, biochemistry, and related disciplines. Positions for molecular biologists at the BS, MS, and PhD levels are available in the biotechnology industries as well as in universities, medical schools, hospitals, government laboratories, research institutes, and public health institutions.

Requirements for the Molecular Biology and Genomics Major are described below.

Biological Sciences courses

Majors must complete a minimum of 32 credits of Biological Sciences coursework as described below.
Required courses

- BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1
  One of the following lab courses
- BIOSC 0050 - FOUNDATIONS OF BIOLOGY LABORATORY 1
- BIOSC 0057 - FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 1
- BIOSC 0058 - FOUNDATIONS OF BIOLOGY SEA-PHAGES LABORATORY 1
  NULL
- BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2
  One of the following lab courses
- BIOSC 0060 - FOUNDATIONS OF BIOLOGY LABORATORY 2
- BIOSC 0067 - FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 2
- BIOSC 0068 - FOUNDATIONS OF BIOLOGY SEA-PHAGES LABORATORY 2
  NULL
- BIOSC 0350 - GENETICS
  NULL
- BIOSC 1000 - BIOCHEMISTRY
  or
- BIOSC 1810 - MACROMOLECULAR STRUCTURE AND FUNCTION and
- BIOSC 1820 - METABOLIC PATHWAYS AND REGULATION
  NULL
- BIOSC 1275 - GENOMICS
- BIOSC 1562 MOLECULAR BIOLOGY AND GENOMICS SEMINAR
- BIOSC 1940 - MOLECULAR BIOLOGY
- BIOSC 1945 ADVANCED MOLECULAR BIOLOGY
- BIOSC 1950 - MOLECULAR GENETICS LABORATORY

Writing-intensive course

Choose one of the following courses.

- BIOSC 1563 - MOLECULAR BIOLOGY AND GENOMICS SEMINAR WRITING PRACTICUM
- BIOSC 1951 - MOLECULAR GENETICS LABORATORY WRITING PRACTICUM

Molecular Biology and Genomics elective courses

Choose two lecture courses and one lab course from the following lists.

Lecture courses

- BIOSC 1120 - BIOSTATISTICS
- BIOSC 1130 - EVOLUTION
- BIOSC 1250 - HUMAN PHYSIOLOGY
- BIOSC 1280 - MICROBIAL GENETICS
- BIOSC 1455 - HUMAN ENDOCRINOLOGY
- BIOSC 1470 - BIOPHYSICAL CHEMISTRY
- BIOSC 1500 - CELL BIOLOGY
- BIOSC 1520 - DEVELOPMENTAL BIOLOGY
- BIOSC 1540 - COMPUTATIONAL BIOLOGY
- BIOSC 1542 - COMPUTATIONAL GENOMICS
- BIOSC 1760 - IMMUNOLOGY
• BIOSC 1820 - METABOLIC PATHWAYS AND REGULATION
• (This course must be taken in conjunction with BIOSC 1810 MACROMOLECULAR STRUCTURE AND FUNCTION; the pair of courses are taken in lieu of BIOSC 1000 BIOCHEMISTRY)
• BIOSC 1850 - MICROBIOLOGY
• CHEM 1830 - SYNTHETIC BIOLOGY

Lab courses

• BIOSC 0351 - GENETICS LABORATORY
• BIOSC 1005 - INTRODUCTION TO BIOCHEMISTRY LAB
• BIOSC 1285 - GENOMICS LABORATORY
• BIOSC 1510 - CELL BIOLOGY LABORATORY
• BIOSC 1530 - DEVELOPMENTAL BIOLOGY LABORATORY
• BIOSC 1740 - VIROLOGY LABORATORY
• BIOSC 1855 - INTRODUCTION TO MICROBIOLOGY LABORATORY

Co-requisite courses

• CHEM 0110 - GENERAL CHEMISTRY 1
• CHEM 0120 - GENERAL CHEMISTRY 2
• CHEM 0310 - ORGANIC CHEMISTRY 1
• CHEM 0320 - ORGANIC CHEMISTRY 2
• CHEM 0345 - ORGANIC LABORATORY
• MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
• STAT 1000 - APPLIED STATISTICAL METHODS
  Either the algebra-based physics courses or the calculus-based physics courses.
• PHYS 0110 - INTRODUCTION TO PHYSICS 1 and
• PHYS 0111 - INTRODUCTION TO PHYSICS 2
  or
• PHYS 0174 - BASIC PHYSICS, SCIENCE AND ENGINEERING 1 (INTEGRATED) and
• PHYS 0175 - BASIC PHYSICS, SCIENCE AND ENGINEERING 2 (INTEGRATED)

Grade requirements

• Each required BIOSC course for the major must be completed with a grade of C or better.
• The elective courses for the major must also be completed with a grade of C or better.
• A minimum GPA of 2.0 in all departmental courses taken is required for graduation. If a C- or lower is earned in an elective course for the major but is not repeated, the course will be used to calculate the departmental GPA but will not be counted toward the 32 credits required for the major.
• Students must also earn a minimum GPA of 2.0 in the co-requisite courses. A passing grade of C- or lower in a co-requisite course can be accepted if balanced by a higher grade in another co-requisite course so that the co-requisite GPA is 2.0 or higher. Exceptions: CHEM 0110 and CHEM 0120 have to be C or better to declare the major; PHYS 0110/0174 has to be C or better to enroll in PHYS 0111/0175; MATH 0220 has to be C or better to enroll in MATH 0230.
• Only one BIOSC course may be taken on a Satisfactory/No Credit (S/NC) basis.

University Honors College equivalent courses may be substituted for required or elective courses.

Department of Chemistry

Chemistry, as a central science, is involved in natural processes occurring in living things, the earth, the oceans, and the atmosphere. The chemical industry provides materials to feed, clothe, and house mankind; drugs to combat disease; and processes to provide energy. Chemistry plays a role in high technology fields such as molecular biology, microelectronics, drug design, and ceramics.
The American Chemical Society (ACS)-certified chemistry degree includes core chemistry courses and electives. Special options are available for students with specific interests in combining chemistry with other subjects, such as bioscience, business, communication, computer science, education, and polymer science. These options allow students to take additional courses that provide an in-depth introduction to the subject of choice and are directly relevant to individual career goals.

The Bachelor of Science degree in chemistry prepares students for a career in business or industry or for advanced study in chemistry. Combined with core biology courses, the chemistry major is frequently selected as the preferred major for admission to the graduate health professions, including medical and dental school. In combination with an education option, the chemistry major prepares students for a certification program leading to a career in secondary science teaching. Chemists at all levels of training have a wide variety of industrial and corporate career opportunities in agricultural chemistry, food chemistry, environmental science, petrochemicals, pharmaceuticals, semiconductors and electronics, and fine chemicals, as well as in basic research. Many opportunities are available for chemistry majors with skills in business (sales, technical marketing, management), communications (technical writing, journalism), and computer science (programming, database management, information science). For more information on the ACS-certified degree and degree options as well as the Department of Chemistry, see www.chem.pitt.edu.

Major

Chemistry, BS

Major Requirements

The requirements for the ACS-certified major in chemistry are as follows.

Required Chemistry courses

- CHEM 0110 - GENERAL CHEMISTRY 1 and
- CHEM 0120 - GENERAL CHEMISTRY 2
  or
- CHEM 0710 - UHC GENERAL CHEMISTRY 1 and
- CHEM 0720 - UHC GENERAL CHEMISTRY 2

- CHEM 0250 - INTRODUCTION TO ANALYTICAL CHEMISTRY
- CHEM 0260 - INTRODUCTION TO ANALYTICAL CHEMISTRY LAB

- CHEM 0310 - ORGANIC CHEMISTRY 1 and
- CHEM 0320 - ORGANIC CHEMISTRY 2
  or
- CHEM 0730 - UHC ORGANIC CHEMISTRY 1 and
- CHEM 0740 - UHC ORGANIC CHEMISTRY 2

- CHEM 0345 - ORGANIC LABORATORY
- CHEM 1000 - MATHEMATICS FOR CHEMISTRY
  This course may be replaced by MATH 0240.
- CHEM 1130 - INORGANIC CHEMISTRY
- CHEM 1140 - ADVANCED INORGANIC LABORATORY
- CHEM 1250 - INSTRUMENTAL ANALYSIS
- CHEM 1255 - INSTRUMENTAL ANALYSIS LAB
- CHEM 1410 - PHYSICAL CHEMISTRY 1
- CHEM 1420 - PHYSICAL CHEMISTRY 2
- CHEM 1430 - PHYSICAL CHEMISTRY LABORATORY 1
- CHEM 1440 - PHYSICAL CHEMISTRY LABORATORY 2

Required co-requisite courses in Math and Physics
Electives

At least two credits must be completed in the following list of approved chemistry or science courses.

For American Chemical Society (ACS) certification, students must complete their electives in a biochemistry course - BIOSC 1000 - BIOCHEMISTRY or BIOSC 1810 - MACROMOLECULAR STRUCTURE AND FUNCTION.

Approved elective courses

- BIOSC 0350 - GENETICS
- BIOSC 0355 - UHC GENETICS
- BIOSC 0370 - ECOLOGY
- BIOSC 1000 - BIOCHEMISTRY
- BIOSC 1500 - CELL BIOLOGY
- BIOSC 1810 - MACROMOLECULAR STRUCTURE AND FUNCTION
- BIOSC 1820 - METABOLIC PATHWAYS AND REGULATION
- BIOSC 1830 - BIOCHEMISTRY LABORATORY
- BIOSC 1850 - MICROBIOLOGY
- BIOSC 1940 - MOLECULAR BIOLOGY
- CHEM 1260 - INTERMEDIATE ANALYTICAL CHEMISTRY
- CHEM 1310 - SYNTHETIC ORGANIC CHEMISTRY
- CHEM 1380 - TECHNIQUES OF ORGANIC RESEARCH
- CHEM 1460 - INTRO MODERN COMPUTATIONAL SCI
- CHEM 1600 - SYNTHESIS & CHARCTRZTN POLYMERS
- CHEM 1605 - SYNTH & CHARCTRZTN POLYMERS LAB
- CHEM 1620 - ATOMS, MOLECULES AND MATERIALS
- CHEM 1700 - UNDERGRADUATE RESEARCH SEMINAR
- CHEM 1710 - UNDERGRADUATE RESEARCH
- CHEM 1720 - UNDERGRAD TEACHING EXPERIENCE
- CHEM 1810 - CHEMICAL BIOLOGY
- Any CHEM course at the 2000-level or higher except CHEM 2700.
- CS 0441 - DISCRETE STRUCTURES FOR CS
- CS 0445 - ALGORITHMS AND DATA STRUCTURES 1
- GEOL 1001 - MINERALOGY
- MATH 0250 - MATRIX THEORY & DIFFT EQUATIONS
- STAT 1000 - APPLIED STATISTICAL METHODS

GPA requirement

The chemistry major must earn a 2.00 GPA in all departmental courses. Chemistry majors may use the S/NC option in all required physics and mathematics courses and in CHEM 0110 - GENERAL CHEMISTRY 1 and CHEM 0120 - GENERAL CHEMISTRY 2.

Notes
To graduate with departmental honors, the student must have an overall GPA of at least 3.00, have a GPA of at least 3.25 in required chemistry courses, earn 2 credits in CHEM 1710 - UNDERGRADUATE RESEARCH, and earn 1 credit in CHEM 1711 - UNDGR RESEARCH WRITING PRACTICUM.

The chemistry department offers options in bioscience, business, communications, photonics, education, and material science. Each chemistry option allows for a waiver of CHEM 1440 - PHYSICAL CHEMISTRY LABORATORY 2, CHEM 1140 - ADVANCED INORGANIC LABORATORY, and the 2-credit science elective required for the ACS-certified degree. Specific information on the options program is available from the department.

**Minor**

**Chemistry Minor**

**Requirements**

Due to the integral role that chemistry plays in many other majors (including life sciences, physical sciences, and engineering), students wishing to receive formal recognition of their work in chemistry may choose to pursue the official minor as outlined below:

**18-19 Credits**

- CHEM 0110 - GENERAL CHEMISTRY 1
- CHEM 0120 - GENERAL CHEMISTRY 2
  or
- CHEM 0710 - UHC GENERAL CHEMISTRY 1
- CHEM 0720 - UHC GENERAL CHEMISTRY 2
  or
- CHEM 0760 - UHC GENERAL CHEMISTRY FOR ENGINEERS 1
- CHEM 0960 - GENERAL CHEM FOR ENGINEERS 1
- CHEM 0970 - GENERAL CHEM FOR ENGINEERS 2

**Three of the following LECTURE courses:**

- CHEM 0250 - INTRODUCTION TO ANALYTICAL CHEMISTRY
- CHEM 0310 - ORGANIC CHEMISTRY 1
- CHEM 0320 - ORGANIC CHEMISTRY 2
- CHEM 1130 - INORGANIC CHEMISTRY
- CHEM 1250 - INSTRUMENTAL ANALYSIS
- CHEM 1410 - PHYSICAL CHEMISTRY 1
- CHEM 1420 - PHYSICAL CHEMISTRY 2
  
- BIOSC 1000 - BIOCHEMISTRY or
- BIOSC 1810 - MACROMOLECULAR STRUCTURE AND FUNCTION

**Two credits of the following LABORATORY courses:**

- CHEM 0260 - INTRODUCTION TO ANALYTICAL CHEMISTRY LAB
- CHEM 0345 - ORGANIC LABORATORY
- CHEM 1140 - ADVANCED INORGANIC LABORATORY
- CHEM 1255 - INSTRUMENTAL ANALYSIS LAB
- CHEM 1430 - PHYSICAL CHEMISTRY LABORATORY 1
- CHEM 1440 - PHYSICAL CHEMISTRY LABORATORY 2
Department of Classics

Classics is an interdisciplinary program devoted to the study of the ancient Greek and Roman civilizations. Students may focus on the classics language track or the classical civilization track. Besides the sequences in the Greek, Latin, and Sanskrit languages, the department offers courses in Greek and Roman literature (including comparative literature), mythology, linguistics, history, culture, and philosophy.

The classics language track requires study of texts in the original languages, while the classical civilization track makes use of these same texts in English translations. Both classics tracks qualify graduates for appropriate careers in teaching, but can also be used as preparation for nonclassical academic and professional disciplines such as business, law, and medicine. The study of classics provides a background for the study of Romance and other languages, assists in the proper use of English, and underlies any understanding of Western civilization. For more information on the major and the Department of Classics, see http://www.classics.pitt.edu/.

Minor

Ancient Greek Minor

Students pursuing this minor must complete at least 15 credits of coursework as follows.

Language courses

Students must complete following courses.

- GREEK 0011 - BEGINNING ANCIENT GREEK 1
- GREEK 0021 - BEGINNING ANCIENT GREEK 2
- GREEK 0210 - INTERMEDIATE GREEK: PROSE
- GREEK 0220 - INTERMEDIATE GREEK: VERSE

Advanced course

After completing the intermediate course sequence, students must select one of the following courses.

- GREEK 1300 - GREEK AUTHORS 1
- GREEK 1301 - GREEK AUTHORS 1-WRITING PRACTICUM
- GREEK 1302 - GREEK AUTHORS 2
- GREEK 1303 - GREEK AUTHORS 2-WRITING PRACTICUM
- GREEK 1400 - ADVANCED READINGS IN GREEK EPIC
- GREEK 1402 - ADVANCED READINGS IN GREEK TRAGEDY
- GREEK 1416 - ADVANCED READINGS IN GREEK HISTORIANS
- GREEK 1420 - ADVANCED READINGS IN GREEK PHILOSOPHY
- GREEK 1700 - GREEK PROSE COMPOSITION

Classical Civilization Minor

Students must complete at least 15 credits of coursework as follows.

Survey course in Greek civilization or history

One of the following courses.

- CLASS 0010 - GREEK CIVILIZATION
Survey course in Roman civilization or history

One of the following courses.

- CLASS 1210 - GREEK HISTORY
- HIST 1783 - GREEK HISTORY
- CLASS 0020 - ROMAN CIVILIZATION
- CLASS 1220 - ROMAN HISTORY
- HIST 1781 - ROMAN HISTORY

Literary or textual course

Any Classics, Greek, or Latin course with a literary or textual basis.

Electives

Any two courses in Classics, Greek, or Latin.

Classics Minor - Classical Civilization Track (minimal languages)

Effective Spring 2019 this program will no longer be active. Students currently enrolled in the Classics Minor will have the option to remain in the minor or declare one of the new minors (Ancient Greek, Latin or Classical Civilization). Students who choose to complete the Classics Minor must do so by Spring 2019.

Classics Minor Requirements

The department offers two types of minor tracks, one in classics (Greek and/or Latin), and one in classical civilization. The classics minor consists exclusively of courses in Greek and/or Latin. For the classical civilization minor, no language courses are required, although language courses may be counted if the student wishes.

For advice on alternative plans, please consult with the undergraduate advisor.

Classical Civilization Track (minimal languages)

Fifteen credits in classics, Greek, or Latin courses, including at least one survey course in Greek civilization or history (3 credits), one survey course in Roman civilization or history (3 credits), and one course with a literary or textual component (3 credits). Any Greek or Latin course may count toward the literary/textual requirement.

Classics Minor - Classics Track
Effective Spring 2019 this program will no longer be active. Students currently enrolled in the Classics Minor will have the option to remain in the minor or declare one of the new minors (Ancient Greek, Latin or Classical Civilization). Students who choose to complete the Classics Minor must do so by Spring 2019.

Classics Minor Requirements

The department offers two types of minor tracks, one in classics (Greek and/or Latin), and one in classical civilization. The classics minor consists exclusively of courses in Greek and/or Latin. For the classical civilization minor, no language courses are required, although language courses may be counted if the student wishes.

For advice on alternative plans, please consult with the undergraduate advisor.

Classics Track

- LATIN 0011 - BEGINNING LATIN 1
- LATIN 0021 - BEGINNING LATIN 2
- LATIN 0210 - INTERMEDIATE LATIN: PROSE
- LATIN 0220 - INTERMEDIATE LATIN: VERSE
  or
- GREEK 0011 - BEGINNING ANCIENT GREEK 1
- GREEK 0021 - BEGINNING ANCIENT GREEK 2
- GREEK 0210 - INTERMEDIATE GREEK: PROSE
- GREEK 0220 - INTERMEDIATE GREEK: VERSE

Latin Minor

Students pursuing this minor must complete at least 15 credits of coursework as follows.

Language courses

Students must complete the following courses.

- LATIN 0011 - BEGINNING LATIN 1
- LATIN 0021 - BEGINNING LATIN 2
- LATIN 0210 - INTERMEDIATE LATIN: PROSE
- LATIN 0220 - INTERMEDIATE LATIN: VERSE

Advanced course

After completing the intermediate course sequence, students must select one of the following courses.

- LATIN 1300 - LATIN AUTHORS 1
- LATIN 1301 - LATIN AUTHORS 1: WRITING PRACTICUM
- LATIN 1302 - LATIN AUTHORS 2
- LATIN 1303 - LATIN AUTHORS 2: WRITING PRACTICUM
Mediterranean Art and Archaeology Minor

The minor in Mediterranean Art and Archaeology offers an attractive preparation for undergraduates who are interested in graduate and professional schools in Classics and Classical Studies, Mediterranean Archaeology, Art and Architectural History, Museum Studies, Cultural Heritage Management, and Antiquities Law. Additionally, it prepares them for careers in archaeological fieldwork, museums, international policymaking, and nonprofit and non-governmental organizations engaged in the preservation and management of world historic sites. The Mediterranean Art and Archaeology minor requires 15 credits for completion, detailed as follows.

Core course

- CLASS 0600 - INTRODUCTION TO MEDITERRANEAN ARCHAEOLOGY

Civilization and History Courses

Students must choose at least one of the following courses.

- CLASS 0010 - GREEK CIVILIZATION
- CLASS 0020 - ROMAN CIVILIZATION
- CLASS 1210 - GREEK HISTORY
- CLASS 1220 - ROMAN HISTORY

Art and Architecture courses

Students must choose at least two of the following courses.

- CLASS 0500 - ANCIENT ART or
- HAA 0150 - ANCIENT ART
- CLASS 1510 - GREEK ART or
- HAA 1110 - GREEK ART
- CLASS 1520 - ROMAN ART or
- HAA 1130 - ROMAN ART
- CLASS 1524 - ROMAN ARCHITECTURE or
- ARC 1152 - ROMAN ARCHITECTURE
- CLASS 1610 - GREEK ARCHAEOLOGY
- HAA 0105 - ART AND EMPIRE
- HAA 0965 - THE CITY OF ROME AND ITS ARCHITECTURE: FROM AENEAS TO ZAHA HADID

Elective courses

Students must choose at least one of the following courses.
Classics, BA

Classics is an interdisciplinary program devoted to the study of the ancient Greek and Roman civilizations. Students may focus on the classics language track or the classical civilization track. Besides the sequences in the Greek, Latin, and Sanskrit languages, the department offers courses in Greek and Roman archaeology, art, history, linguistics, literature (including comparative literature), mythology, philosophy, and social history.

The Classics Language track requires study of texts in the original languages while the Classics Civilization track makes use of these same texts in English translations. Both classics tracks qualify graduates for appropriate careers in teaching and library work but can also be used as preparation for non-classical academic and professional disciplines such as business, law, and medicine. The study of classics underlies any understanding of Western civilization. The field includes important literary and philosophical figures such as Homer, Plato, and Vergil. It also provides a background for the study of romance and other languages and assists in the proper use of English.

The Classics major requires the completion of a minimum of 30 credits in one of the following tracks, distributed as described.

Greek Language track

Required courses

All of the following courses are required.

- GREEK 0011 - BEGINNING ANCIENT GREEK 1
- GREEK 0021 - BEGINNING ANCIENT GREEK 2
- GREEK 0210 - INTERMEDIATE GREEK: PROSE
- GREEK 0220 - INTERMEDIATE GREEK: VERSE
- GREEK 1700 - GREEK PROSE COMPOSITION

Greek literature courses

Choose two of the following courses.

- GREEK 1300 - GREEK AUTHORS 1
Latin languages courses

Choose two of the following courses.

- LATIN 0011 - BEGINNING LATIN 1
- LATIN 0021 - BEGINNING LATIN 2
- LATIN 0210 - INTERMEDIATE LATIN: PROSE
- LATIN 0220 - INTERMEDIATE LATIN: VERSE

Latin Language track

Required courses

All of the following courses are required.

- LATIN 0011 - BEGINNING LATIN 1
- LATIN 0021 - BEGINNING LATIN 2
- LATIN 0210 - INTERMEDIATE LATIN: PROSE
- LATIN 0220 - INTERMEDIATE LATIN: VERSE

Latin literature courses

Choose two of the following courses.

- LATIN 1300 - LATIN AUTHORS 1
- LATIN 1302 - LATIN AUTHORS 2
- LATIN 1400 - ADVANCED READINGS IN LATIN EPIC
- LATIN 1902 - DIRECTED STUDY FOR UNDERGRADS

Greek language courses

Choose two of the following courses.

- GREEK 0011 - BEGINNING ANCIENT GREEK 1
- GREEK 0021 - BEGINNING ANCIENT GREEK 2
- GREEK 0210 - INTERMEDIATE GREEK: PROSE
- GREEK 0220 - INTERMEDIATE GREEK: VERSE

Classical Civilization track

Required courses

- CLASS 0010 - GREEK CIVILIZATION
- CLASS 0020 - ROMAN CIVILIZATION
Two of the following courses

- GREEK 0011 - BEGINNING ANCIENT GREEK 1
- GREEK 0021 - BEGINNING ANCIENT GREEK 2
- GREEK 0210 - INTERMEDIATE GREEK: PROSE
- GREEK 0220 - INTERMEDIATE GREEK: VERSE
- LATIN 0011 - BEGINNING LATIN 1
- LATIN 0021 - BEGINNING LATIN 2
- LATIN 0210 - INTERMEDIATE LATIN: PROSE
- LATIN 0220 - INTERMEDIATE LATIN: VERSE

Courses in the area of concentration

Students must complete three CLASS courses in the area of concentration they have chosen. These courses should be selected in consultation with the major advisor.

Electives

Students must complete one elective course in three of the following areas.

- Ancient Archeology
- Art
- Culture
- History
- Language
- Literature
- Philosophy
- Science

Additional information

**Grade requirements**

A minimum GPA of 2.0 in courses that count toward the major is required for graduation.

**Satisfactory/No Credit option**

- Greek Language or Latin Language track: two courses that count toward the major can be taken on an S/NC basis.
- Civilization track: two courses that count toward the major can be taken on an S/NC basis.

**Writing (W) requirement**

Students must complete at least one writing-intensive (W) course in the major.

**Honors major requirements**
To earn an honors major in Classics, the student must fulfill all requirements for the major, and:

- attain a GPA of 3.50 or above in departmental courses by the end of their junior year; and
- write an honors essay in conjunction with a senior level course deemed acceptable by the department.

Department of Communication

The study of communication is one of the oldest but still most contemporary of disciplines. The field examines important questions about society, communication, and persuasion in a way that combines the best of the ancient liberal arts tradition with the critical attention to the newest media technologies. In courses such as persuasion, argument, interpersonal communication, political rhetoric, rhetoric of science, nonverbal communication, history of media, media criticism, and television and society, our faculty offer diverse views on the roles of communication, media, and rhetoric in our lives.

A degree in communication is not vocational in design, although many of the Department of Communication's graduates hold important positions in industry, education, the media, government, law, and various other professions. An understanding of communication as a human activity, as defined above, makes the department's graduates attractive candidates when seeking employment or obtaining admission to graduate programs. For more information on the major or the Department of Communication, see www.comm.pitt.edu.

Major

Communication, BA

Major Requirements

The Communication: Rhetoric and Communication major requires the completion of 33 credits, detailed as follows. Courses that count toward the major must be completed with a letter grade of C or better.

Required courses

Communications majors must take all three of the following courses. These courses meet prerequisites for upper-level courses.

- COMMRC 0300 - COMMUNICATION AND SOCIETY
- COMMRC 0310 - RHETORIC & SOCIETY
- COMMRC 0320 - MASS COMMUNICATION AND SOCIETY

Two skills courses

Students must take two skills courses from the following list. One of the courses must be COMMRC 0520 - PUBLIC SPEAKING.

- COMMRC 0500 - ARGUMENT
- COMMRC 0510 - DEBATE
- COMMRC 0520 - PUBLIC SPEAKING (Required)
- COMMRC 0530 - INTERPERSONAL COMMUNICATION
- COMMRC 0540 - DISCUSSION
- COMMRC 0550 - SPEECH COMPOSITION
- COMMRC 0575 - INTRODUCTION TO RADIO PRODUCTION

Six upper-level courses
These courses focus on specific topics or contexts of communication. Students in these courses will conduct substantive research and do significant writing; therefore, the completion of the composition requirement is a prerequisite.

- COMMRC 1101 - EVIDENCE
- COMMRC 1102 - ORGANIZATIONAL COMMUNICATION
- COMMRC 1103 - RHETORIC AND CULTURE
- COMMRC 1104 - POLITICAL COMMUNICATION
- COMMRC 1105 - TELEVISION AND SOCIETY
- COMMRC 1106 - SMALL GROUP COMMUNICATION
- COMMRC 1109 - NONVERBAL COMMUNICATION
- COMMRC 1110 - THEORIES OF INTERPERSONAL COMMUNICATION
- COMMRC 1111 - THEORIES OF PERSUASION
- COMMRC 1112 - THEORIES OF RHETORIC
- COMMRC 1113 - FREEDOM OF SPEECH AND PRESS
- COMMRC 1115 - AFRICAN AMERICAN RHETORIC
- COMMRC 1116 - RHETORIC OF THE AMERICAN COUNCIL CULTURE
- COMMRC 1117 - 21ST CENTURY PUBLIC ARGUMENT
- COMMRC 1119 - PRESIDENTIAL RHETORIC 2
- COMMRC 1120 - RHETORIC OF COLD WAR
- COMMRC 1121 - HISTORY OF MASS MEDIA
- COMMRC 1122 - MEDIA CRITICISM
- COMMRC 1123 - RHETORICAL CRITICISM
- COMMRC 1125 - MEDIA THEORY
- COMMRC 1126 - MEDIA AND CONSUMER CULTURE
- COMMRC 1143 - KNOWLEDGE, POWER, AND DESIRE
- COMMRC 1147 - THE RHETORIC OF SCIENCE
- COMMRC 1148 - RHETORIC AND HUMAN RIGHTS
- COMMRC 1730 - SPECIAL TOPICS IN COMMUNICATION
- COMMRC 1731 - SPECIAL TOPICS IN RHETORIC
- COMMRC 1732 - SPECIAL TOPICS IN MASS COMMUNICATION
- LING 1000 - INTRODUCTION TO LINGUISTICS
- LING 1263 - CROSS-CULTURAL COMMUNICATION
- CSD 1020 - NATURE OF LANGUAGE * This course is offered by the School of Health and Rehabilitation Science

Notes

The Department of Communication offers three special project courses, which are not required.

- COMMRC 1710 - SENIOR THESIS IN COMMUNICATION requires a GPA of 3.00 for enrollment and can be counted toward the major.
- COMMRC 1900 - COMMUNICATION INTERNSHIP requires a GPA of 2.75; this course cannot be counted toward the major.
- COMMRC 1901 - INDEPENDENT STUDY requires a GPA of 3.00; this course cannot be counted toward the major.

Students who plan to do graduate work in communication are advised to do additional work in a second language.

Department of East Asian Languages and Literatures
The Department of East Asian Languages and Literatures offers courses in the language, literature, film, linguistics, and culture of China, Japan, and Korea. An undergraduate major is available in either Chinese or Japanese. There is a multiyear sequence of courses in the modern standard languages of China, Japan, and Korea, plus a wide variety of offerings (ranging from introductory to specialized) designed to illuminate various facets of these Asian civilizations. Students whose interests range broadly across the civilization of East Asia may alternatively develop an interdisciplinary studies major or take advantage of the Asian Studies Certificate program. The departmental curriculum is composed of three main categories:

- courses designed to develop competence in the four skills (speaking, listening, reading, writing) of the Chinese, Japanese, or Korean language, plus courses for advanced study in Chinese and Japanese;
- courses taught in English and focused on the mainstream of Chinese, Japanese, and Korean culture as reflected in literature, drama, and film; and
- courses for the advanced study of literature and linguistic analysis.

For more information on the Chinese and Japanese majors, courses in Korean language, or on the Department of East Asian Languages and Literatures, visit the Web site www.deall.pitt.edu/.

**Major**

**Chinese, BA**

**Chinese and Japanese major requirements**

Chinese or Japanese majors may take first-year language courses on an Satisfactory/No Credit (S/NC) basis. Second-year language courses must be taken on a letter grade basis. In the third and fourth years, majors have the option of taking two additional courses S/NC, one of which may be an advanced language course.

**Course Requirements**

The Chinese major requires 55 credits for completion.

**Language**

All of the following first, second, and third year language courses are required.

- CHIN 0001 - FIRST YEAR CHINESE 1
- CHIN 0002 - FIRST YEAR CHINESE 2
- CHIN 0003 - SECOND YEAR CHINESE 1
- CHIN 0004 - SECOND YEAR CHINESE 2
- CHIN 1020 - THIRD YEAR CHINESE 1
- CHIN 1021 - THIRD YEAR CHINESE 2

**Advanced language courses**

Choose one of the following advanced language courses.

- CHIN 1040 - LITERARY CHINESE 1 CLASSICAL
- CHIN 1050 - FOURTH YEAR CHINESE 1
- CHIN 1051 - FOURTH YEAR CHINESE 2

**Literature, linguistics, culture, and film**

Choose one of the following traditional period courses
• CHIN 1041 - LITERARY CHINESE 2 CLASSICAL
• CHIN 1047 - CHINESE AND WESTERN POETRY
• CHIN 1083 - MASTERPIECES OF CHINESE LITERATURE: PREMODERN
• CHIN 1090 - GREAT MINDS OF CHINA

Choose one of the following modern period courses

• CHIN 0085 - REVOLUTION, INVOLUTION, AND IDENTITY IN MODERN CHINESE CULTURE
• CHIN 1025 - ASPECTS OF THE CHINESE LANGUAGE
• CHIN 1059 - ADAPTED FOR THE SCREEN: CHINESE LITERATURE AND FILM
• CHIN 1084 - MASTERPIECES OF CHINESE LITERATURE: MODERN
• CHIN 1088 - NEW CHINESE CINEMA

Choose two of the following courses

• CHIN 0007 - INTRODUCTION TO CHINESE CIVILIZATION AND CULTURE
• CHIN 0081 - EAST ASIA IN THE WORLD *
• CHIN 0085 - REVOLUTION, INVOLUTION, AND IDENTITY IN MODERN CHINESE CULTURE *
• CHIN 1025 - ASPECTS OF THE CHINESE LANGUAGE
• CHIN 1027 - CHINESE AS A SECOND LANGUAGE AND BILINGUALISM
• CHIN 1041 - LITERARY CHINESE 2 CLASSICAL
• CHIN 1047 - CHINESE AND WESTERN POETRY *
• CHIN 1059 - ADAPTED FOR THE SCREEN: CHINESE LITERATURE AND FILM *
• CHIN 1083 - MASTERPIECES OF CHINESE LITERATURE: PREMODERN *
• CHIN 1084 - MASTERPIECES OF CHINESE LITERATURE: MODERN *
• CHIN 1086 - LOVE IN CHIN AND WESTERN LITERATURE
• CHIN 1089 - THE WORLD OF CHINA
• CHIN 1088 - NEW CHINESE CINEMA *
• CHIN 1090 - GREAT MINDS OF CHINA *
• CHIN 1700 - TRANSLATION THEORY AND PRACTICE

Writing-intensive course

Students must complete the 1-credit CHIN 1908 - DIRECTED WRITING FOR MAJORS in conjunction with a course from the Literature, linguistics, culture, and film requirement. Eligible courses are indicated with an asterisk (*).

Senior Project

CHIN 1999 - SENIOR PROJECT should be completed in the student's final academic term.

Non-departmental course requirements

Choose two courses with at least 50% China-related content and offered by a department other than East Asian Languages and Literatures. A sample list of courses follows.

• ECON 1630 - ECONOMIC DEVELOPMENT OF CHINA
• HAA 0620 - ART OF CHINA
• HAA 1640 - 20TH CENTURY CHINESE ART
Japanese, BA

The Department of East Asian Languages and Literatures offers courses in the language, literature, film, linguistics, and culture of China and Japan; the department offers both a major and a minor in Japanese. A full sequence of courses in the modern standard language of Japan and a variety of offerings, ranging from introductory to specialized, illuminate various facets of Japanese civilization. Students whose interests range broadly across the civilization of East Asia may want to take advantage of the Asian Studies certificate program. The departmental curriculum for the Japanese major is composed of three main categories as follows.

- Courses designed to develop competence in the four skills of the Japanese language, plus courses for advanced study.
- Courses taught in English and focused on the mainstream of Japanese culture as reflected in literature, drama, and film.
- Courses for the advanced study of literature and linguistic analysis.

Requirements

The Japanese major requires completion of 54 credits and a minimum GPA of 2.0 in departmental courses. This program includes elements from four categories: courses designed to develop competence in the four skills of the Japanese language; courses taught in English and focused on the mainstream of Japanese culture as reflected in literature, drama, film, and linguistics; courses related to Japan offered in other departments of the Dietrich School; and a capstone experience for graduating seniors.

Language

- JPNSE 0001 - FIRST YEAR JAPANESE 1
- JPNSE 0002 - FIRST YEAR JAPANESE 2
- Note: JPNSE 1061 - INTENSIVE JAPANESE 1 may replace both JPNSE 0001 and JPNSE 0002
- JPNSE 0003 - SECOND YEAR JAPANESE 1
- JPNSE 0004 - SECOND YEAR JAPANESE 2
- Note: JPNSE 1062 - INTENSIVE JAPANESE 2 may replace both JPNSE 0003 and JPNSE 0004
- JPNSE 1020 - THIRD YEAR JAPANESE 1
- JPNSE 1021 - THIRD YEAR JAPANESE 2

Advanced courses

- JPNSE 1040 - INTRODUCTION TO CLASSICAL JAPANESE 1
- JPNSE 1050 - FOURTH YEAR JAPANESE 1

Culture, Literature, and Linguistics

Complete the following course.

- JPNSE 0083 - INTRODUCTION TO JAPANESE LITERATURE
Choose one of the following courses.

- JPNSE 1023 - ASPECTS OF THE JAPANESE LANGUAGE
- JPNSE 1035 - PRAGMATICS OF JAPANESE

Choose two of the following elective courses.

- JPNSE 0007 - JAPANESE CULTURE AND CIVILIZATION
- JPNSE 0081 - EAST ASIA IN THE WORLD
- JPNSE 0085 - JAPANESE TALES OF THE SUPERNATURAL
- JPNSE 1057 - JAPANESE CULTURE AND SOCIETY THROUGH CINEMA
- JPNSE 1058 - WESTERNS AND SAMURAI FILMS
- JPNSE 1065 - DETECTIVE AND MYSTERY FICTION IN JAPAN
- JPNSE 1070 - WORLD OF JAPAN
- JPNSE 1071 - THE WORLD OF JAPAN
- JPNSE 1080 - GHOSTS, MASKS AND ACTORS
- JPNSE 1081 - FORMS OF JAPANESE THEATRE
- JPNSE 1700 - INTRODUCTION TO THEORY AND PRACTICE OF TRANSLATION

Related Field

Complete three Japan-related courses offered by other departments (not EALL) in the Dietrich School of Arts and Sciences.

Two courses at least 50% Japan-related

Complete two Japan-related courses with at least 50% Japan-related content offered by other departments (not EALL) in the Dietrich School of Arts and Sciences.

- ANTH 1784 - JAPANESE SOCIETY
- FMST 1230 - GLOBAL ANIME
- HAA 0640 - ART OF JAPAN
- HAA 1652 - JAPAN: BUDDHIST ART & RITUAL
- HAA 1656 - JAPAN: ARCHITECTURE AS PERFORMATIVE SPACE
- HIST 0430 - JAPAN AND THE WEST, 1600 - PRESENT
- HIST 1433 - MODERN JAPAN
- HIST 1434 - TEA, MONSTERS, MANGA, AND ANIME: A CULTURAL HISTORY OF JAPAN
- HIST 1477 - RELIGION IN JAPAN
- HIST 1741 - POPULAR RELIGION IN CHANGING JAPAN
- PS 1333 - GOVERNMENT AND POLITICS OF JAPAN
- RELGST 1570 - RELIGION IN JAPAN
- RELGST 1572 - POPULAR RELIGION IN CHANGING JAPAN

One Japan-related course

Complete one Japan-related course offered by other departments (not EALL) in the Dietrich School of Arts and Sciences.

- ANTH 1734 - GENDER IN EAST ASIA
- ANTH 1784 - JAPANESE SOCIETY
- ENGFLM 1420 - TRANSNATIONAL EAST ASIAN CINEMAS
- FMST 1200 - INTRODUCTION TO EAST ASIAN CINEMA
- FMST 1225 - TRANSNATIONAL EAST ASIAN CINEMAS
- FMST 1230 - GLOBAL ANIME
- HAA 0020 - INTRODUCTION TO ASIAN ART
- HAA 0640 - ART OF JAPAN
- HAA 1652 - JAPAN: BUDDHIST ART & RITUAL
- HAA 1656 - JAPAN: ARCHITECTURE AS PERFORMATIVE SPACE
- HIST 0400 - EAST ASIAN CIVILIZATION TO 1800
- HIST 0401 - MODERN EAST ASIAN CIVILIZATION
- HIST 0430 - JAPAN AND THE WEST, 1600 - PRESENT
- HIST 0475 - RELIGION AND CULTURE IN EAST ASIA
- HIST 0487 - WORLD WAR II IN ASIA
- HIST 0755 - RELIGION IN ASIA
- HIST 1433 - MODERN JAPAN
- HIST 1434 - TEA, MONSTERS, MANGA, AND ANIME: A CULTURAL HISTORY OF JAPAN
- HIST 1446 - EAST ASIAN POLITICAL ECONOMY, 1950-PRESENT
- HIST 1475 - EAST ASIAN BUDDHISM
- HIST 1477 - RELIGION IN JAPAN
- HIST 1741 - POPULAR RELIGION IN CHANGING JAPAN
- PS 1326 - EAST ASIAN POLITICAL ECONOMY 1950-PRESENT
- PS 1333 - GOVERNMENT AND POLITICS OF JAPAN
- RELGST 0505 - RELIGION IN ASIA
- RELGST 0525 - RELIGION AND CULTURE IN EAST ASIA
- RELGST 1550 - EAST ASIAN BUDDHISM
- RELGST 1554 - DEATH AND BEYOND IN BUDDHIST CULTURES
- RELGST 1558 - BUDDHISM AND PSYCHOLOGY
- RELGST 1570 - RELIGION IN JAPAN
- RELGST 1572 - POPULAR RELIGION IN CHANGING JAPAN

Capstone

- JPNSE 1999 - CAPSTONE PROJECT

Writing course

Japanese majors must complete JPNSE 1908 - DIRECTED WRITING FOR MAJORS in conjunction with one of the courses marked with an asterisk (*) in the culture, literature, and linguistics section.

Minor

Korean Minor

Choose one of the following options to complete this minor.

Korean option
This option is intended for students who have little or no previous experience with the Korean language and requires 17 to 19 credits to complete.

Students must take:

- four Korean language courses from the Language course list, totaling 14 to 16 credits; and
- one additional course from the Culture, Film, Linguistics, or Literature course list.

Korean for Heritage Learners option

This option is designed for heritage learners and requires 12 to 14 credits to complete.

Students must take:

- two second-, third-, or fourth-year language courses from the Language course list, totaling six to eight credits; and
- two courses from the Culture, Film, Linguistics, or Literature course list.

Korean Minor - Language and Film, Linguistics, and Literature lists

Language courses

- KOREAN 0001 - FIRST YEAR KOREAN 1
- KOREAN 0002 - FIRST YEAR KOREAN 2
- KOREAN 0003 - SECOND YEAR KOREAN 1
- KOREAN 0004 - SECOND YEAR KOREAN 2
- KOREAN 0005 - THIRD YEAR KOREAN 1
- KOREAN 0006 - THIRD YEAR KOREAN 2
- KOREAN 1050 - FOURTH YEAR KOREAN
- KOREAN 1051 - FOURTH YEAR KOREAN 2

Culture, Film, Linguistics, and Literature courses

These courses are taught in English.

- KOREAN 0007 - INTRODUCTION TO KOREAN CULTURE AND CIVILIZATION
- KOREAN 0023 - KOREAN LANGUAGE: THEN AND NOW
- KOREAN 0070 - WORLD OF KOREA: PAST AND PRESENT
- KOREAN 0075 - INTRODUCTION TO KOREA THROUGH FILMS
- KOREAN 0084 - INTRODUCTION TO MODERN KOREAN LITERATURE
- KOREAN 1023 - ASPECTS OF THE KOREAN LANGUAGE
- KOREAN 1060 - LANGUAGE AND SOCIETY IN KOREA
- KOREAN 1080 - CONTEMPORARY KOREAN CULTURE

Additional information

Grade Requirements

A minimum GPA of 2.0 is required for the minor.
Satisfactory/No Credit Option

There is no limit to the number of courses that can be taken on the Satisfactory/No Credit (S/NC) basis for this certificate.

Chinese Minor

Students must choose one of the tracks - Chinese Language, Chinese Language and Culture, or Chinese Culture, and follow the requirements as described.

Chinese Language option

Chinese language courses

All of the following courses are required.

- CHIN 0001 - FIRST YEAR CHINESE 1
- CHIN 0002 - FIRST YEAR CHINESE 2
- CHIN 0003 - SECOND YEAR CHINESE 1
- CHIN 0004 - SECOND YEAR CHINESE 2

Chinese literature or culture course

Choose one course from the following list.

- CHIN 0007 - INTRODUCTION TO CHINESE CIVILIZATION AND CULTURE
- CHIN 0080 - CITY LIFE AND EAST ASIAN CULTURE
- CHIN 0081 - EAST ASIA IN THE WORLD
- CHIN 0085 - REVOLUTION, INVOLUTION, AND IDENTITY IN MODERN CHINESE CULTURE
- CHIN 1025 - ASPECTS OF THE CHINESE LANGUAGE
- CHIN 1027 - CHINESE AS A SECOND LANGUAGE AND BILINGUALISM
- CHIN 1047 - CHINESE AND WESTERN POETRY
- CHIN 1059 - ADAPTED FOR THE SCREEN: CHINESE LITERATURE AND FILM
- CHIN 1083 - MASTERPIECES OF CHINESE LITERATURE: PREMODERN
- CHIN 1084 - MASTERPIECES OF CHINESE LITERATURE: MODERN
- CHIN 1088 - NEW CHINESE CINEMA
- CHIN 1090 - GREAT MINDS OF CHINA

Chinese Language and Culture option

Chinese language courses

All of the following courses are required.

- CHIN 0001 - FIRST YEAR CHINESE 1
- CHIN 0002 - FIRST YEAR CHINESE 2

Chinese literature course
Choose one of the following courses.

- CHIN 1040 - LITERARY CHINESE 1 CLASSICAL
- CHIN 1041 - LITERARY CHINESE 2 CLASSICAL
- CHIN 1047 - CHINESE AND WESTERN POETRY
- CHIN 1083 - MASTERPIECES OF CHINESE LITERATURE: PREMODERN
- CHIN 1090 - GREAT MINDS OF CHINA

Chinese culture courses

Choose two of the following courses.

- CHIN 0007 - INTRODUCTION TO CHINESE CIVILIZATION AND CULTURE
- CHIN 0080 - CITY LIFE AND EAST ASIAN CULTURE
- CHIN 0081 - EAST ASIA IN THE WORLD
- CHIN 0085 - REVOLUTION, INVOLUTION, AND IDENTITY IN MODERN CHINESE CULTURE
- CHIN 1025 - ASPECTS OF THE CHINESE LANGUAGE
- CHIN 1059 - ADAPTED FOR THE SCREEN: CHINESE LITERATURE AND FILM
- CHIN 1084 - MASTERPIECES OF CHINESE LITERATURE: MODERN
- CHIN 1085 - INTRODUCTION TO EAST ASIAN CINEMA
- CHIN 1088 - NEW CHINESE CINEMA
- CHIN 1089 - THE WORLD OF CHINA

Chinese Culture Option

Chinese culture courses

Choose four of the following courses.

- CHIN 0007 - INTRODUCTION TO CHINESE CIVILIZATION AND CULTURE
- CHIN 0080 - CITY LIFE AND EAST ASIAN CULTURE
- CHIN 0081 - EAST ASIA IN THE WORLD
- CHIN 0085 - REVOLUTION, INVOLUTION, AND IDENTITY IN MODERN CHINESE CULTURE
- CHIN 1025 - ASPECTS OF THE CHINESE LANGUAGE
- CHIN 1040 - LITERARY CHINESE 1 CLASSICAL
- CHIN 1041 - LITERARY CHINESE 2 CLASSICAL
- CHIN 1047 - CHINESE AND WESTERN POETRY
- CHIN 1059 - ADAPTED FOR THE SCREEN: CHINESE LITERATURE AND FILM
- CHIN 1083 - MASTERPIECES OF CHINESE LITERATURE: PREMODERN
- CHIN 1084 - MASTERPIECES OF CHINESE LITERATURE: MODERN
- CHIN 1085 - INTRODUCTION TO EAST ASIAN CINEMA
- CHIN 1088 - NEW CHINESE CINEMA
- CHIN 1089 - THE WORLD OF CHINA
- CHIN 1090 - GREAT MINDS OF CHINA

China-related courses

Choose two of the following China-related courses offered by other departments.
- ECON 1630 - ECONOMIC DEVELOPMENT OF CHINA
- HAA 0620 - ART OF CHINA
- HAA 1640 - 20TH CENTURY CHINESE ART
- HIST 0401 - MODERN EAST ASIAN CIVILIZATION
- HIST 0755 - RELIGION IN ASIA
- HIST 1422 - LATE IMPERIAL CHINA
- PS 1523 - EAST ASIA IN WORLD POLITICS
- Other course(s) with at least 50% China-related content, offered by a department other than East Asian Languages and Literatures.

**Japanese Minor**

Students must choose one of the tracks - Japanese Language, Japanese Language and Culture, or Japanese Culture, and follow the requirements as described.

**Japanese Language option**

This option requires completion of 23 credits, described as follows.

**Japanese language courses**

Choose either the four first- and second-year language courses or the two intensive language courses.

- JPNSE 0001 - FIRST YEAR JAPANESE 1 and
- JPNSE 0002 - FIRST YEAR JAPANESE 2 and
- JPNSE 0003 - SECOND YEAR JAPANESE 1 and
- JPNSE 0004 - SECOND YEAR JAPANESE 2
  - or
- JPNSE 1061 - INTENSIVE JAPANESE 1 and
- JPNSE 1062 - INTENSIVE JAPANESE 2

**Japanese culture course**

Students must take another JPNSE course, taught in English and listed as a culture, film, linguistics, literature, or theatre course.

**Japanese Language and Culture option**

This option requires completion of 19 credits, described as follows.

**Japanese language course(s)**

Choose either the two first-year language courses or the single, intensive language course.

- JPNSE 0001 - FIRST YEAR JAPANESE 1 and
- JPNSE 0002 - FIRST YEAR JAPANESE 2
  - or
- JPNSE 1061 - INTENSIVE JAPANESE 1

**Japanese culture courses**
Choose three of the following courses.

- JPNSE 0080 - CITY LIFE AND EAST ASIAN CULTURE
- JPNSE 0081 - EAST ASIA IN THE WORLD
- JPNSE 0083 - INTRODUCTION TO JAPANESE LITERATURE
- JPNSE 0085 - JAPANESE TALES OF THE SUPERNATURAL
- JPNSE 1023 - ASPECTS OF THE JAPANESE LANGUAGE
- JPNSE 1035 - PRAGMATICS OF JAPANESE
- JPNSE 1056 - JAPANESE LITERATURE AND THE WEST
- JPNSE 1057 - JAPANESE CULTURE AND SOCIETY THROUGH CINEMA
- JPNSE 1058 - WESTERNS AND SAMURAI FILMS
- JPNSE 1059 - JAPANESE LITERATURE ON SCREEN
- JPNSE 1070 - WORLD OF JAPAN
- JPNSE 1071 - THE WORLD OF JAPAN
- JPNSE 1080 - GHOSTS, MASKS AND ACTORS
- JPNSE 1081 - FORMS OF JAPANESE THEATRE
- JPNSE 1085 - INTRODUCTION TO EAST ASIAN CINEMA
- JPNSE 1700 - INTRODUCTION TO THEORY AND PRACTICE OF TRANSLATION

Japanese Culture option

This option requires completion of 15 credits, described as follows.

Japanese culture courses

Choose five of the following courses.

- JPNSE 0007 - JAPANESE CULTURE AND CIVILIZATION
- JPNSE 0080 - CITY LIFE AND EAST ASIAN CULTURE
- JPNSE 0081 - EAST ASIA IN THE WORLD
- JPNSE 0083 - INTRODUCTION TO JAPANESE LITERATURE
- JPNSE 0085 - JAPANESE TALES OF THE SUPERNATURAL
- JPNSE 1023 - ASPECTS OF THE JAPANESE LANGUAGE
- JPNSE 1035 - PRAGMATICS OF JAPANESE
- JPNSE 1056 - JAPANESE LITERATURE AND THE WEST
- JPNSE 1057 - JAPANESE CULTURE AND SOCIETY THROUGH CINEMA
- JPNSE 1058 - WESTERNS AND SAMURAI FILMS
- JPNSE 1059 - JAPANESE LITERATURE ON SCREEN
- JPNSE 1070 - WORLD OF JAPAN
- JPNSE 1071 - THE WORLD OF JAPAN
- JPNSE 1080 - GHOSTS, MASKS AND ACTORS
- JPNSE 1081 - FORMS OF JAPANESE THEATRE
- JPNSE 1085 - INTRODUCTION TO EAST ASIAN CINEMA
- JPNSE 1700 - INTRODUCTION TO THEORY AND PRACTICE OF TRANSLATION

Department of Economics
A major in economics can be designed to serve a variety of purposes in the general liberal arts and can provide a background for postgraduate study in a number of professional schools. In addition, economics is frequently taken as a dual major with business at the undergraduate level. Among the graduate-level options which can be pursued by economics majors are law, business, professional-level training in economics, public administration, professional health management, hospital administration, urban affairs, and transportation studies. Because the range of interests among economics majors is quite broad, students are encouraged to work out a plan of studies fitting their individual needs with a departmental advisor. For more information on the major, the minor, and the Department of Economics, see www.econ.pitt.edu.

**Joint Major**

**Economics-Statistics, BS**

The economics-statistics joint major is intended for students who are interested in economics and enjoy modeling and analyzing data. Although the number of such students is not large, there are usually a few each year who express an interest in pursuing both economics and statistics in a depth suitable for a major. More often than not, these students are prime candidates for graduate school, and want to keep their options open as to which field to enter later. Short of completing two bachelor's degrees, their only option now is to major in one subject and minor in the other. If they later decide to attend graduate school in their minor subject, they are likely to be less competitive for admission to the best departments than if they had majored in that subject.

A joint major provides a useful compromise to keep their options open. Additionally, a joint major in economics and statistics can be an excellent training ground for the more quantitative areas of business (such as forecasting, investment management, actuarial planning, and accounting), health management, and public health, without losing the breadth provided by a liberal arts program. Graduates of the joint major who are interested in these areas will have the requisite skills for further training or for immediate entrance into the job market. The curriculum for the joint major consists of eight economics courses and eight statistics courses, along with a statistics writing practicum and three mathematics courses, for a total of 62 credits.

**Course Requirements**

**Economics courses**

- ECON 0100 - INTRODUCTION TO MICROECONOMIC THEORY
- ECON 0110 - INTRODUCTION TO MACROECONOMIC THEORY
- ECON 1100 - INTERMEDIATE MICROECONOMICS
- ECON 1110 - INTERMEDIATE MACROECONOMICS
- ECON 1150 - APPLIED ECONOMETRICS 1
- ECON 1200 - GAME THEORY
- One Economics elective course
- Two ECON 1000-level courses

**Statistics courses**

- STAT 1000 - APPLIED STATISTICAL METHODS
- STAT 1151 - INTRODUCTION TO PROBABILITY
- STAT 1152 - INTRODUCTION TO MATHEMATICAL STATISTICS
- STAT 1221 - APPLIED REGRESSION
- STAT 1223 - APPLIED REGRESSION WRITING COMPONENT
• Four elective STAT courses, chosen from the 1200 level or above: one of these electives must be from the 1600 level or above, excluding internships and directed study courses.

Note

Students who plan to study statistics at the graduate level are encouraged to take STAT 1631 - INTERMEDIATE PROBABILITY and STAT 1632 - INTERMEDIATE MATHEMATICAL STATISTICAL.

Mathematics courses

• MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
• MATH 0240 - ANALYTIC GEOMETRY AND CALCULUS 3

One of the following

• MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2 or
• MATH 0235 - HONORS 1 - VARIABLE CALCULUS

Note

Students are strongly encouraged to take a course in linear algebra, such as MATH 0280 - INTRO TO MATRICES & LINEAR ALG or MATH 1180 - LINEAR ALGEBRA 1 or MATH 1185 - HONORS LINEAR ALGEBRA

Additional Requirements

Grade requirements: A grade of C or better is required in each course that counts toward the major. A minimum GPA of 2.0 in departmental courses is required for graduation.

Satisfactory/No Credit option: No course required for the major may be taken on an S/NC basis.

Writing (W) requirement: Students must complete at least one W-course in the major. STAT 1223 fulfills this requirement.

Honors major requirements: Honors in the Economics-Statistics joint major is granted if the student maintains a GPA of 3.5 or above in all required courses and completes STAT 1631 - INTERMEDIATE PROBABILITY and STAT 1632 - INTERMEDIATE MATHEMATICAL STATISTICAL.

Major

Economics, BA

Economics Major Requirements

Majors may earn either a Bachelor of Science or a Bachelor of Arts in economics. The general rules and requirements as they apply to both degrees are as follows:

• A minimum overall 2.00 GPA is required in all economics courses for graduation with an economics major.
• A minimum grade of C is required in ECON 0100 - INTRODUCTION TO MICROECONOMIC THEORY, ECON 0110 - INTRODUCTION TO MACROECONOMIC THEORY, ECON 1100 - INTERMEDIATE MICROECONOMICS, ECON 1110 - INTERMEDIATE MACROECONOMICS, MATH 0120 and MATH 0220.
• No ECON course that counts toward the major may be taken on an S/NC basis.
• Students must complete at least one writing-intensive (W) course in the major.
• Credit by exam is usually not accepted, but students should check with the departmental advisor about the possibility.
• Majors may choose to complete a double major. Frequently chosen double majors include economics with computer science, history, and philosophy. Less frequently chosen are the sciences (notably biology), which could lead to graduate-level options in public health fields. Interested students have the option of completing a joint major with the mathematics department that will prepare students for a quantitatively oriented job in industry or for entering graduate school in applied mathematics, statistics, economics, business, or a related field (see mathematics major). A structured program leading to a joint Dietrich School/business major is available for students interested in combining economics with business (see Nondepartmental Dietrich School Majors for details).
• ECON 0800 - INTRODUCTION TO ECONOMICS is designed for non-majors are therefore do not count toward the major.
• Internship credits do not count toward the major. Students are encouraged to do internships.
• Only three credits of ECON 1901 through ECON 1903 may be applied toward the credits required for the major.
• Honors in economics is granted if, in addition to fulfilling all requirements for the economics major, the student meets the following criteria:
  • Maintenance of a GPA of 3.5 in all economics courses
  • Maintenance of an overall GPA of 3.5 or better
  • Completion of at least 3 credits in the economics proseminar series (ECON 1700-ECON 1730)

Requirements

Students seeking a BA in economics must earn at least 27 credits in economics courses including the following:

• ECON 0100 - INTRODUCTION TO MICROECONOMIC THEORY
• ECON 0110 - INTRODUCTION TO MACROECONOMIC THEORY
• ECON 1100 - INTERMEDIATE MICROECONOMICS
• ECON 1110 - INTERMEDIATE MACROECONOMICS
• Two Economics elective courses*
• Two ECON 1000-level elective courses which require ECON 1100 or ECON 1110 as prerequisites
• One ECON 1000-level elective course
• ECON 0900 - PROFESSIONAL DEVELOPMENT FOR ECONOMISTS

ECON 0800

* ECON 0800 does not count as an ECON elective course.

Students seeking the BA must also take the following corequisite courses

One of the following

• MATH 0125 - CALCULUS FOR BUSINESS 1 and
• MATH 0126 - CALCULUS FOR BUSINESS 2
• MATH 0120 - BUSINESS CALCULUS
MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1

One of the following

- STAT 0200 - BASIC APPLIED STATISTICS
- STAT 1000 - APPLIED STATISTICAL METHODS
- STAT 1100 - STATISTICS AND PROBABILITY FOR BUSINESS MANAGEMENT *

Note:

* STAT 1000 or STAT 1100 is required for students pursuing the Economics/Business Dual major. Students pursuing this major are exempted from taking BUSECN 1010 since its equivalent is ECON 1100.

Economics, BS

Economics Major Requirements

Majors may earn either a Bachelor of Science or a Bachelor of Arts in economics. The general rules and requirements as they apply to both degrees are as follows:

- A minimum overall 2.00 GPA is required in all economics courses for graduation with an economics major.
- A minimum grade of C is required in ECON 0100 - INTRODUCTION TO MICROECONOMIC THEORY, ECON 0110 - INTRODUCTION TO MACROECONOMIC THEORY, ECON 1100 - INTERMEDIATE MICROECONOMICS, ECON 1110 - INTERMEDIATE MACROECONOMICS, MATH 0120 and MATH 0220.
- No ECON course that counts toward the major may be taken on an S/NC basis.
- Students must complete at least one writing-intensive (W) course in the major.
- Credit by exam is usually not accepted, but students should check with the departmental advisor about the possibility.
- Majors may choose to complete a double major. Frequently chosen double majors include economics with computer science, history, and philosophy. Less frequently chosen are the sciences (notably biology), which could lead to graduate-level options in public health fields. Interested students have the option of completing a joint major with the mathematics department that will prepare students for a quantitatively oriented job in industry or for entering graduate school in applied mathematics, statistics, economics, business, or a related field (see mathematics major). A structured program leading to a joint Dietrich School /business major is available for students interested in combining economics with business (see Nondepartmental Dietrich School Majors for details).
- ECON 0800 - INTRODUCTION TO ECONOMICS is designed for non-majors are therefore do not count toward the major.
- Internship credits do not count toward the major. Students are encouraged to do internships.
- Only three credits of ECON 1901 through ECON 1903 may be applied toward the credits required for the major.
- Honors in economics is granted if, in addition to fulfilling all requirements for the economics major, the student meets the following criteria:
  - Maintenance of a GPA of 3.5 in all economics courses
  - Maintenance of an overall GPA of 3.5 or better
  - Completion of at least 3 credits in the economics proseminar series (ECON 1700-ECON 1730)

Requirements
Students seeking a BS in economics must earn at least 24 credits in economics courses including the following:

- ECON 0100 - INTRODUCTION TO MICROECONOMIC THEORY
- ECON 1100 - INTERMEDIATE MICROECONOMICS
- ECON 0110 - INTRODUCTION TO MACROECONOMIC THEORY
- ECON 1110 - INTERMEDIATE MACROECONOMICS
- Two economics elective courses
- Two ECON 1000-level courses that require ECON 1100 or ECON 1110 or their equivalents as prerequisites
- ECON 0900 - PROFESSIONAL DEVELOPMENT FOR ECONOMISTS

One of the following

- ECON 1150 - APPLIED ECONOMETRICS 1
- ECON 1180 - MATHEMATICAL ECONOMICS

Note:

*ECON 0800 does not count as an ECON elective course

Students seeking the BS must also take the following corequisite courses:

- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1

One of the following

- MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2
- STAT 1000 - APPLIED STATISTICAL METHODS

**Minor**

**Economics Minor**

**Requirements**

The set of courses required for the minor in economics provides an introduction to the core theory in economics and explores some of the issues that economists study. The four core theory courses are taught each term, along with a broad range of applied economics courses. The required courses (totaling 15 credits) are as follows:

- ECON 0100 - INTRODUCTION TO MICROECONOMIC THEORY
- ECON 0110 - INTRODUCTION TO MACROECONOMIC THEORY
- ECON 1100 - INTERMEDIATE MICROECONOMICS or
- ECON 1110 - INTERMEDIATE MACROECONOMICS

- Two additional ECON courses

Note:
Courses in the 0800 series do not count toward the 15 credits required for the minor in economics, and only 3 credits of ECON 1901 - ECON 1903, directed studies, may be applied toward minor requirements. Other than these restrictions, the two additional courses mentioned above may be any of the courses offered by the department.

**Department of English**

The Department of English at the University of Pittsburgh offers two different major programs, English literature and English writing. Both majors are responsive to many of the traditional goals of a liberal arts education: they seek to develop a broad critical and historical understanding of influential cultural traditions and to foster a range of reading and writing strategies as well as skills of critical analysis. The majors prepare students fairly directly for careers in teaching or writing. But the skills and knowledge the majors impart are useful in numerous business and professional settings. For example, an English major is highly regarded as a pre-professional major for further training in law, medicine, or business. The director of academic affairs for the Association of American Medical Colleges has said (1986) that English majors have a higher rate of acceptance at medical schools than students who have majored in the biological and physical sciences.

**Certificate**

**Public Communication of Science and Technology**

Writing plays a crucial role in the lives of people after they leave college as they work, volunteer, attend professional schools, and advocate for themselves and others. The Public Communication of Science and Technology (PCST) Certificate is designed for science- and technology-oriented students in any major who understand the value of being able to communicate their research outside their own narrow field, who know that they will need to convince others to support their research, and who anticipate that they will need to communicate the implications of their research to the public. It will also serve students who want to pursue a career as a writer in science and technical fields.

Students will use the knowledge and abilities taught in this certificate in a variety of fields: to convey the significance of research to the public, grantors, institutions, and colleagues; to educate as part of the mission for public service institutions, such as museums and science centers; to craft messages to enhance patient education and care in medical contexts; to educate policy makers on the most effective solutions to problems; to communicate theory and studies in scientific and technological contexts; as editors and writers for journals that publish research findings; as journalists working science beats; and as artists working with themes, images, materials, and ideas from scientific research.

The certificate program requires 18 credits, described as follows.

**Core Course**

- **ENGCMP 0430 - PUBLIC COMMUNICATION OF SCIENCE AND TECHNOLOGY**

**Using Information Technology**

Select one of the following courses.

- **ENGCMP 0520 - INTEGRATING WRITING AND DESIGN**
- **ENGCMP 0610 - COMPOSING DIGITAL MEDIA**
- **ENGCMP 1130 - PROJECTS IN DIGITAL COMPOSITION**

**Elective Courses for the Certificate**

Select three of the following courses.

- **ENGCMP 0401 - WRITTEN PROFESSIONAL COMMUNICATION: TOPICS IN DIVERSITY**
- **ENGCMP 0412 - ENGINEERING COMMUNICATION IN A PROFESSIONAL CONTEXT**
- **ENGCMP 0432 - WRITING FOR ENVIRONMENTAL ADVOCACY**
Students who have declared a major in the Department of Geology and Environmental Science may use either or both of the following courses as elective options.

- **GEOL 1313 - COM ENVIRONMENTAL PROFESSIONALS**
- **GEOL 1315 - COMMUNICATION IN GEOSCIENCES/WRIT REQUIREMENT**

**Capstone Course**

Select one of the following courses.

- **ENGCMP 1910 - BRIDGE SEMINAR**
- **ENGCMP - PCST Capstone**

**Additional information**

**Grade Requirements**

Students are expected to achieve a minimum grade of C, or a Satisfactory (S) grade if taken on a Satisfactory/No Credit (S/NC) grade option, in each course required for this certificate.

**Satisfactory/No Credit Option**

There is no limit to the number of courses that can be taken on the S/NC basis for this certificate.
Joint Major

Digital Narrative and Interactive Design, BA/BS

Digital Narrative and Interactive Design Requirements

The Digital Narrative and Interactive Design major (DNID) harnesses the narrative, world-building, and media studies strengths of the English department and the coding, software development, and human computer interface strengths of the School of Computing and Information. It draws upon existing initiatives in game design at SCI and critical game studies, making, and media production within the English department. Students will learn how to build interactive narrative systems such as games, interactive literature, virtual reality environments and other interactive media experiences in a variety of fields. They will learn to creatively combine design with narrative, code with story. This uniquely positions majors in today's workforce: game and interactive media design is booming in nearly every field and sector. What these positions require, and what is currently in short supply, are individuals capable of both understanding the intricacies of narrative and implementing that knowledge in the form of computational media (coded interactive systems).

The DNID major is managed jointly by the Dietrich School of Arts and Sciences and the School of Computing and Information. This program offers training that builds a solid foundation in English (Writing, Composition, Film and Media Studies, and Literature), Computer Science, and Information Science.

Core and Upper Level Courses

Gateway course

Choose one of the following courses.

- ENGLIT 0512 - NARRATIVE AND TECHNOLOGY
- ENGCMP 0425 - DIGITAL HUMANITY
- HAA 0425 - DIGITAL HUMANITY

Composition courses

Complete either:

- ENGCMP 0610 - COMPOSING DIGITAL MEDIA
- ENGCMP 1201 - DIGITAL NARRATIVE AND INTERACTIVE DESIGN
- ENGLIT 1201 - DIGITAL NARRATIVE AND INTERACTIVE DESIGN
- CMPINF 1201 - DIGITAL NARRATIVE AND INTERACTIVE DESIGN

Programming Basics courses

Choose one of the following courses.

- CS 0010 - INTRODUCTION TO COMPUTING FOR SYSTEMS ENGINEERS
- CS 0011 - INTRODUCTION TO COMPUTING FOR SCIENTISTS
- CS 0012 - INTRODUCTION TO COMPUTING FOR THE HUMANITIES
- INFSCI 0510 - DATA ANALYSIS

Intermediate Programming course
• CMPINF 0401 - INTERMEDIATE PROGRAMMING

Interaction and Narrative course

Choose one of the following courses. Students who take ENGLIT 0512 for their Gateway course may not use it to fulfill this requirement.

• ENGLIT 0512 - NARRATIVE AND TECHNOLOGY
• ENGLIT 0702 - INTRODUCTION TO GAME STUDIES
• ENGLIT 1001 - INTERACTIVE LITERATURE
• ENGLIT 1002 - GAME, STORY, PLAY

Media Literacy course

Choose one of the following courses.

• ENGFLM 0355 - VISUAL LITERACY
• ENGFLM 0570 - INTRODUCTION TO NEW MEDIA
• ENGFLM 1680 - ANIMATION STUDIES
• FMST 0100 - VISUAL LITERACY
• FMST 0505 - INTRODUCTION TO NEW MEDIA
• FMST 1510 - ANIMATION STUDIES

Data Literacy course

Choose one of the following courses.

• CS 0445 - ALGORITHMS AND DATA STRUCTURES 1
• INFSCI 1022 - DATABASE MANAGEMENT SYSTEMS

Elective courses

Students must complete two elective courses from the School of Computing and Information and two elective courses from the Dietrich School of Arts and Sciences. Courses offering a depth of knowledge in pre-identified areas of interest are clustered together to provide a guide for students; Students are not required to follow nor declare a specific track.

Online Media track

School of Computing and Information courses

Choose two of the following courses.

• CS 0590 - SOCIAL IMPLICATIONS OF COMPUTING TECHNOLOGY
• CS 1520 - PROGRAMMING LANGUAGE FOR WEB APPLICATIONS
• INFSCI 1024 - ANALYSIS OF INFORMATION SYSTEMS
• INFSCI 1044 - HUMAN FACTORS IN SYSTEM DESIGN
• INFSCI 1052 - USER CENTERED DESIGN
• INFSCI 1068 - GEOSPATIAL INFORMATION SYSTEMS (GIS)

Dietrich School of Arts and Sciences courses
Choose two of the following courses.

- ENGCMP 0520 - INTEGRATING WRITING AND DESIGN
- ENGCMP 1112 - PROFESSIONAL USES OF SOCIAL MEDIA
- ENGCMP 1130 - PROJECTS IN DIGITAL COMPOSITION
- ENFLM 0570 - INTRODUCTION TO NEW MEDIA
- ENFLM 0812 - MEDIA/ECOLOGY
- ENGLIT 0812 - MEDIA/ECOLOGY
- ENGLIT 1001 - INTERACTIVE LITERATURE
- ENGLIT 1412 - SECRET PITTSBURGH
- ENGWRT 1403 - TOPICS IN NON-FICTION: ELECTRONIC MEDIA
- ENGWRT 1501 - TOPICS IN CREATIVE WRITING
- GSWS 1210 - GENDER AND THE DIGITAL
- ENGWRT 1377 - MEDIA LITERACY: WRITING AND READING YOUR WAY THROUGH THE DIGITAL LANDSCAPE
- ENGCMP 1430 - USABILITY TESTING IN TECHNICAL WRITING

Game Design track

School of Computing and Information courses

Choose two of the following courses.

- CS 1566 - INTRODUCTION COMPUTER GRAPHICS
- CS 1666 - PRINCIPLES OF COMPUTER GAME DESIGN AND IMPLEMENTATION
- CS 1674 - INTRODUCTION TO COMPUTER VISION
- INFSCI 1014 - GRAPHICS
- INFSCI 1044 - HUMAN FACTORS IN SYSTEM DESIGN
- INFSCI 1060 - GAME DESIGN
- INFSCI 1061 - GAME IMPLEMENTATION

Dietrich School of Arts and Sciences courses

Choose two of the following courses.

- ENGCMP 1130 - PROJECTS IN DIGITAL COMPOSITION
- ENFLM 0570 - INTRODUCTION TO NEW MEDIA
- ENFLM 0812 - MEDIA/ECOLOGY
- ENGLIT 0702 - INTRODUCTION TO GAME STUDIES
- ENGLIT 0812 - MEDIA/ECOLOGY
- ENGLIT 1001 - INTERACTIVE LITERATURE
- ENGLIT 1002 - GAME, STORY, PLAY
- ENGLIT 1355 - VIRTUAL REALITY
- ENGWRT 0520 - INTRODUCTION TO FICTION WRITING

Critical Making track

School of Computing and Information courses

Choose two of the following courses.
Dietrich School of Arts and Sciences courses

Choose two of the following courses.

- ENGCMP 0520 - INTEGRATING WRITING AND DESIGN
- ENGCMP 0712 - CRITICAL MAKING
- ENGCMP 1200 - ADVANCED TOPICS IN COMPOSITION
- ENGFLM 0590 - FILMMAKING: PRODUCTION AND CRITICISM
- ENGFLM 0712 - CRITICAL MAKING
- ENGFLM 0812 - MEDIA/ECOLOGY
- ENGLIT 0521 - SCAN CULTURE: SURVEILLANCE AND THE DIGITAL
- ENGLIT 0712 - CRITICAL MAKING
- ENGLIT 0812 - MEDIA/ECOLOGY
- ENGLIT 1355 - VIRTUAL REALITY
- ENGWRT 1501 - TOPICS IN CREATIVE WRITING
- ENGCMP 1430 - USABILITY TESTING IN TECHNICAL WRITING

Capstone sequence

The Capstone sequence allows students to design and implement a signature project to complete the major. Students start with the design project (Project 1) and complete the sequence with the implementation project (Project 2) in consultation with their advisors. Students seeking Independent Study or Directed Study options for the capstone sequence should work with their advisors to ensure that the work done in these courses will complete the sequence.

Project 1

Choose one of the following courses.

- ENGCMP 1910 - BRIDGE SEMINAR
- ENGLIT 1900 - PROJECT SEMINAR
- ENGLIT 1901 - INDEPENDENT STUDY

Project 2

- CMPINF 1981 - PROJECT STUDIO
- CS 1902 - DIRECTED STUDY

Additional Information

Writing (W) requirement: Dietrich School students must complete at least one W-course in the major. ENGCMP 0610 fulfills this requirement.

Grade requirements: A letter grade of C or better is required in each of the core and upper level courses that are to count toward the major. The elective courses for the major must also be completed with a grade of C or better. A minimum GPA of 2.0 in all departmental courses taken is
required for graduation. If a D+ or lower is earned in an elective course for the major but is not repeated, the course will be used to calculate the overall GPA but will not be counted toward the 40 credits required for the major.

**Satisfactory/No Credit option:** No courses that count toward the major may be taken on an S/NC basis.

**Advising:** Digital Narrative and Interactive Design is a joint undergraduate degree between the Dietrich School of Arts and Sciences and the School of Computing and Information. Students enrolled in each school are advised by advisors within that school.

**Major**

**English Literature, BA**

The English literature major is designed to develop a critical understanding of literary and cultural traditions in English that is at once informed, skeptical, and appreciative. Some of the distinctive features of the literature curriculum at the University of Pittsburgh are the recurrent concerns from the introductory to the most advanced undergraduate courses with the following: questions of how and why we read and write and participate in cultural activities; the contexts in which a range of literary texts and films are produced, understood, evaluated, and used; and the changing role of art and culture in the contemporary world. The major offers students opportunities to study canonical works of British and American literature from medieval times to the present; often, these texts will be studied in conjunction with historical or philosophical works, with other national literatures in English, and/or with films or works of popular culture. In many courses, students' own writing will be an important object of study.

**Major Requirements**

The English literature major requires the completion of 36 credits distributed as follows.

- ENGLIT 0505 - HOW TO DO THINGS WITH LITERATURE 1
- ENGLIT 0506 - LITERARY FIELD STUDIES

**Two period courses chosen from a listing of approved courses**

www.englishlit.pitt.edu/undergraduate/major-requirements

**Advanced courses**

- ENGLIT 1900 - PROJECT SEMINAR
- ENGLIT 1910 - SENIOR SEMINAR

**Six elective courses**

- At least four of these courses should fall within the designated area of concentration selected by the student. Students may apply for special approval with the director of the Literature program to count an elective not previously listed in a given area of concentration.
- At least three of these courses must be from the 1000-level or above.
- Students may take up to two courses from other programs in the Department of English (Composition, Film, Writing) designated within their area of concentration. Students may apply for special approval with the director of the Literature program to count an additional elective from another English program.
- At least one of these courses should also fulfill a breadth of study requirement. Students should ask instructors or advisors whether a particular course or section fulfills this requirement.
- Independent study, directed study, teaching assistantships, and internships may count toward any concentration depending upon the nature of the student's work.
Additional information and requirements

- There is no limit on the number of courses English majors may take on an S/NC basis, either inside or outside the department.
- English majors automatically fulfill Dietrich School requirements for W courses.
- Students who contemplate graduate study in English should remember that many schools do require second language competence, sometimes in more than one language.
- The English department confers honors on those graduates who maintain a 3.25 overall GPA with a GPA of 3.50 or better in English departmental courses. The GPA is based on all English departmental courses, not just those that fulfill major requirements.

**English Writing, BA**

The University of Pittsburgh's Writing Program is the oldest and one of the largest in the United States, offering tracks in fiction, poetry, nonfiction, and journalism. There is a wide variety of classes, and the maximum size is 22. The Writing Program has a full-time faculty of widely published writers, several visiting writers each year, and a number of part-time faculty who are senior reporters or editors at Pittsburgh newspapers and magazines. Graduates of the writing program include editors at major daily newspapers and publishing houses and winners of the Pulitzer Prize and other major awards.

Visit the Department of English Academic Programs page for more information on its majors.

**Major Requirements**

A minimum of 33 credits is required: 21 credits in English writing courses and 12 in English literature courses.

Majors must choose one of three tracks: fiction, nonfiction, or poetry. In most cases, students will take other writing courses as well. Each track consists of three levels of courses. The introductory courses (0500s) offer a broad introduction to the skills required of writers in a particular area and generally should be taken no later than the first term of the junior year. The intermediate courses (1000s for fiction, 1200s for poetry, 1300s for nonfiction) refine and develop those skills. The senior seminars (1700s) provide a capstone experience for the student writer. Students should check prerequisites carefully before registration.

**English Writing prerequisite**

Students must complete one of the following prerequisite courses before declaring the major.

- ENGCMP 0200 - SEMINAR IN COMPOSITION
- ENGCMP 0203 - SEMINAR IN COMPOSITION: GENDER STUDIES
- ENGCMP 0205 - SEMINAR IN COMPOSITION: FILM
- ENGCMP 0207 - SEMINAR IN COMPOSITION: EDUCATION
- ENGCMP 0208 - SEMINAR IN COMPOSITION: SERVICE-LEARNING
- ENGCMP 0210 - SEMINAR IN COMPOSITION: ENGINEERING
- ENGCMP 0212 - SEMINAR IN COMPOSITION: TOPICS IN DIVERSITY
- ENGCMP 0213 - SEMINAR IN COMPOSITION: DISABILITY STUDIES
- FP 0003 - FIRST-YEAR SEMINAR
- FP 0006 - FIRST-YEAR SEMINAR

**Fiction track**

**Writing courses**
• ENGWRT 0520 - INTRODUCTION TO FICTION WRITING
• ENGWRT 1010 - INTERMEDIATE FICTION
• ENGWRT 1094 - READINGS IN CONTEMPORARY FICTION
• ENGWRT 1710 - SENIOR SEMINAR IN FICTION
• Three additional ENGWRT elective courses

Literature courses

• ENGLIT 0325 - THE SHORT STORY
• Two ENGLIT electives from the list below
• One additional ENGLIT elective at the 1000-level from the list below

Nonfiction track

Writing courses

• ENGWRT 0610 - INTRODUCTION TO JOURNALISM AND NONFICTION
• ENGWRT 1330 - INTERMEDIATE NONFICTION: SCENE AND POINT-OF-VIEW
• ENGWRT 1390 - READINGS IN CONTEMPORARY NON-FICTION
• ENGWRT 1750 - SENIOR SEMINAR IN NONFICTION
• Three additional ENGWRT elective courses

Literature courses

• ENGLIT 0321 - ESSAYS AND MEMOIRS
• Two ENGLIT electives from the list below
• One additional ENGLIT elective at the 1000-level from the list below

Poetry track

Writing courses

• ENGWRT 0530 - INTRODUCTION TO POETRY WRITING
• ENGWRT 1210 - POETRY WORKSHOP
• ENGWRT 1290 - READINGS IN CONTEMPORARY POETRY
• ENGWRT 1730 - SENIOR SEMINAR IN POETRY
• Three additional ENGWRT elective courses

Literature courses

• ENGLIT 0315 - READING POETRY
• Two ENGLIT electives from the list below
• One additional ENGLIT elective at the 1000-level from the list below

English Writing elective course info
Elective courses may be taken in another track if the student wishes.

English Literature approved courses

- ENGLIT 0500 - INTRODUCTION TO CRITICAL READING
- ENGLIT 0505 - HOW TO DO THINGS WITH LITERATURE 1
- ENGLIT 0560 - CHILDREN AND CULTURE
- ENGLIT 0562 - CHILDHOOD'S BOOKS
- ENGLIT 0570 - AMERICAN LITERATURE
- ENGLIT 0573 - LITERATURE OF THE AMERICAS
- ENGLIT 0580 - INTRODUCTION TO SHAKESPEARE
- ENGLIT 0590 - FORMATIVE MASTERPIECES
- ENGLIT 0597 - BIBLE AS LITERATURE
- ENGLIT 0610 - WOMEN AND LITERATURE
- ENGLIT 0616 - EXILES, NOMADS, AND MIGRANTS
- ENGLIT 0625 - DETECTIVE FICTION
- ENGLIT 0626 - SCIENCE FICTION
- ENGLIT 0628 - WORKING CLASS LITERATURE
- ENGLIT 0629 - THE WILD WEST
- ENGLIT 0630 - SEXUALITY AND REPRESENTATION
- ENGLIT 0636 - THE GOTHIC IMAGINATION
- ENGLIT 0640 - ALLEGORY
- ENGLIT 0642 - COMEDY
- ENGLIT 0643 - SATIRE
- ENGLIT 0644 - MYTH AND FOLKTALE
- ENGLIT 0645 - FANTASY
- ENGLIT 0655 - REPRESENTING ADOLESCENCE
- ENGLIT 1020 - HISTORY OF LITERARY CRITICISM
- ENGLIT 1028 - LITERATURE AND PSYCHOANALYSIS
- ENGLIT 1100 - MEDIEVAL IMAGINATION
- ENGLIT 1115 - CHAUCER
- ENGLIT 1125 - MASTERPIECES OF RENAISSANCE LITERATURE
- ENGLIT 1135 - LITERATURE, MEDIA, AND SCIENCE IN THE AGE OF SHAKESPEARE
- ENGLIT 1126 - ADVANCED SHAKESPEARE
- ENGLIT 1127 - SHAKESPEARE ON FILM
- ENGLIT 1128 - SHAKESPEARE'S SEXUALITIES
- ENGLIT 1150 - ENLIGHTENMENT TO REVOLUTION
- ENGLIT 1170 - ROMANTIC NATURE
- ENGLIT 1175 - 19TH CENTURY BRITISH LITERATURE
- ENGLIT 1180 - HUMANS, ANIMALS, MACHINES IN VICTORIAN LITERATURE
- ENGLIT 1181 - VICTORIAN NOVEL
- ENGLIT 1200 - AMERICAN LITERATURE TO 1860
- ENGLIT 1220 - CIVIL WAR TO WORLD WAR 1 IN AMERICAN LITERATURE
- ENGLIT 1272 - THE ROARING 20'S: FROM FARMERS TO FACTORY WORKERS, FROM FLAPPERS TO FINANCIERS
- ENGLIT 1325 - MODERNISM
- ENGLIT 1360 - TOPICS IN 20TH CENTURY LIT
- ENGLIT 1380 - WORLD LITERATURE IN ENGLISH
English Writing additional information and requirements

- A minimum grade of C or better (not C-) is required in a 0500-level writing course to advance to the first 1000-level course in that track. Students who earn less than a C in their first 1000-level course may not advance to other courses in that track. Moreover, students must earn a C or better (not C-) grade in their senior seminar or internship course.
- Students are encouraged to take additional writing and literature courses beyond the required minimum. Courses in film studies, women's studies, business, and technical writing are particularly useful for English writing majors.
- Completion of at least one composition course is required for enrollment in a writing program course. ENGWR 0400 - INTRODUCTION TO CREATIVE WRITING and ENGWR 0411 - INTRODUCTION TO CREATIVE NONFICTION are optional introductory courses and may be taken during the second year by students who have recently declared a major in writing, are seriously considering writing as a major, or are taking their first 0500-level course. ENGWR 0400 can only count as an elective towards the Writing degree if taken before ENGWR 0520 or ENGWR 0530. Likewise, ENGWR 0411 may be taken as an elective before ENGWR 1330 - INTERMEDIATE NONFICTION: SCENE AND POINT-OF-VIEW.
- There is no limit on the number of courses English majors may take on an S/NC basis, either inside or outside the department.
- English writing majors automatically fulfill Dietrich School requirements for W courses. Students pursuing a second major are required to complete an additional W course for that major.
- Students who contemplate graduate study in English should remember that many schools do require second language competence, sometimes in more than one language.

The English department confers honors on those graduates who maintain a 3.25 overall GPA with a GPA of 3.50 or better in English department courses. The GPA is based on all English department courses, not just those that fulfill major requirements.

Public and Professional Writing

The Public and Professional Writing (PPW) major in the Department of English allows students to undertake rigorous intellectual work that will deepen their engagement with writing as a form of social action and professional exchange that has consequences in the world. Students in the major can expect to address critical questions in public and professional writing; learn how to use the forms and genres of particular professions or fields; learn how to compose effectively on behalf of an organization or campaign; learn how to create engaging documents and carry out inquiry projects for a particular audience; compose using appropriate modalities and technology; compose with awareness of textual forms and conventions; conduct responsible and ethical research; explore the history and politics of writing in specific contexts; engage with public debates over language, globalization, education, and writing; and compose as a creative and disciplined form of critical inquiry. PPW majors can expect to find jobs in the nonprofit sector, government, or the commercial sector.

Required courses for the major

The Public and Professional Writing BA requires the completion of 33 credits, distributed as follows.

Students may choose to follow clusters of courses that will lead to in-depth study in specific areas or for specific career paths: Writing to Support Scientific Research, Preparing for Law School, Writing for Nonprofits, Writing for Business, Teaching and Composition Studies, Advertising and PR Writing, Composing Digital Media, Editing and Publishing, Preparing for Graduate School, Public Engagement, and others. See the list of possible clusters that apply to this major.
Prerequisites

The Seminar in Composition requirement must be completed prior to enrollment in any ENGCMP courses at or above the 0400-level. A Seminar in Composition course can be selected from the following list.

- ENGCMP 0200 - SEMINAR IN COMPOSITION
- ENGCMP 0203 - SEMINAR IN COMPOSITION: GENDER STUDIES
- ENGCMP 0205 - SEMINAR IN COMPOSITION: FILM
- ENGCMP 0207 - SEMINAR IN COMPOSITION: EDUCATION
- ENGCMP 0208 - SEMINAR IN COMPOSITION: SERVICE-LEARNING
- ENGCMP 0210 - SEMINAR IN COMPOSITION: ENGINEERING
- FP 0003 - FIRST-YEAR SEMINAR
- FP 0006 - FIRST-YEAR SEMINAR

Core courses

- ENGCMP 0420 - WRITING FOR THE PUBLIC
- ENGCMP 0560 - WRITING ARGUMENTS
- ENGCMP 1551 - HISTORY AND POLITICS OF THE ENGLISH LANGUAGE

- ENGCMP 1900 - INTERNSHIP: PUBLIC/PROFESSIONAL WRITING or
- ENGCMP 1901 - UTA IN TEACHING AND TUTORING WRITING *

- ENGCMP 1910 - BRIDGE SEMINAR

Three 1000-level courses

Students must complete three ENGCMP courses at the 1000-level or above.

Three elective courses

Students must complete three courses at the 0400-level or above.

Grade requirements:

A minimum grade of C or better is required in any 0400- or 0500-level ENGCMP course to advance to the first 1000-level course.

Satisfactory/No Credit option:

There is no limit to the number of courses that may be taken on the S/NC basis for this major.

Writing (W) requirement:

Most ENGCMP courses satisfy the W requirement. Students pursuing a second major are required to complete an additional W-course for the major in that department.

Advising:
ENGCMP courses that fulfill requirements for the major

- ENGCMP 0400 - WRITTEN PROFESSIONAL COMMUNICATION
- ENGCMP 0410 - WRITING IN THE LEGAL PROFESSIONS
- ENGCMP 0420 - WRITING FOR THE PUBLIC
- ENGCMP 0425 - DIGITAL HUMANITY
- ENGCMP 0440 - CRITICAL WRITING
- ENGCMP 0450 - RESEARCH WRITING
- ENGCMP 0500 - TOPICS IN COMPOSITION
- ENGCMP 0510 - NARRATIVES OF THE WORKPLACE
- ENGCMP 0515 - PERSUASIVE WRITING IN ADVERTISING
- ENGCMP 0520 - INTEGRATING WRITING AND DESIGN
- ENGCMP 0530 - WRITING FOR THE SCIENCES
- ENGCMP 0535 - WRITING IN THE HEALTH SCIENCE PROFESSIONS
- ENGCMP 0550 - TOPICS IN PUBLIC/PROFESSIONAL WRITING
- ENGCMP 0560 - WRITING ARGUMENTS
- ENGCMP 0600 - INTRODUCTION TO TECHNICAL WRITING
- ENGCMP 0610 - COMPOSING DIGITAL MEDIA
- ENGCMP 0620 - THEORIES OF WRITING AND TEACHING
- ENGCMP 0641 - WRITING FOR CHANGE
- ENGCMP 1100 - LANGUAGE OF BUSINESS AND INDUSTRY
- ENGCMP 1101 - LANGUAGE OF SCIENCE AND TECHNOLOGY
- ENGCMP 1102 - LANGUAGE OF MEDICINE
- ENGCMP 1103 - PUBLIC RELATIONS WRITING
- ENGCMP 1104 - CORPORATE STORYTELLING
- ENGCMP 1111 - PROFESSIONAL WRITING IN GLOBAL CONTEXTS
- ENGCMP 1112 - PROFESSIONAL USES OF SOCIAL MEDIA
- ENGCMP 1151 - PROFESSIONAL EDITING IN CONTEXT
- ENGCMP 1200 - ADVANCED TOPICS IN COMPOSITION
- ENGCMP 1210 - TUTORING PEER WRITERS
- ENGCMP 1220 - THE ART OF THE ESSAY
- ENGCMP 1250 - ADVANCED TOPICS PUBLIC/PROFESSIONAL WRITING
- ENGCMP 1400 - GRANT WRITING FOR NONPROFITS
- ENGCMP 1410 - ADVANCED RESEARCH/DOCUMENTARY WRITING
- ENGCMP 1510 - WRITING WITH STYLE
Minor

Creative Writing Minor

As one of the oldest writing programs in the United States, the Writing Program at the University of Pittsburgh has an excellent record of not only producing talented creative writers but also developing the writing skills of undergraduates who go on to work in a variety of professions, including journalism, education, law, and publishing. The minor in Creative Writing fulfills a need that is different from the Certificate in Professional Writing, with its particular focus on writing in business, non-profit, and legal environments, and the Writing Major, which requires a more substantial commitment of time and study.

Before declaring the minor in Creative Writing, students must complete an English Composition course (ENGCMP 0200, ENGCMP 0203, ENGCMP 0205, ENGCMP 0207, or ENGCMP 0208) to develop the skills necessary for effectively reading and writing at the college level. Students must take ENGWRT 0400 - INTRODUCTION TO CREATIVE WRITING.

This minor requires students to complete 18 credits of coursework as follows.

One of the following groups of courses.

Fiction

- ENGWRT 0520 - INTRODUCTION TO FICTION WRITING
- ENGWRT 1010 - INTERMEDIATE FICTION
- ENGWRT 1094 - READINGS IN CONTEMPORARY FICTION

Poetry

- ENGWRT 0530 - INTRODUCTION TO POETRY WRITING
- ENGWRT 1210 - POETRY WORKSHOP
- ENGWRT 1290 - READINGS IN CONTEMPORARY POETRY

Nonfiction

- ENGWRT 0610 - INTRODUCTION TO JOURNALISM AND NONFICTION
- ENGWRT 1330 - INTERMEDIATE NONFICTION: SCENE AND POINT-OF-VIEW
- ENGWRT 1390 - READINGS IN CONTEMPORARY NON-FICTION

Two of the following courses.

- ENGWRT 0520 - INTRODUCTION TO FICTION WRITING
- ENGWRT 0530 - INTRODUCTION TO POETRY WRITING
English Literature Minor

An undergraduate minor in English literature would help students in a variety of majors to represent significant expertise they have accrued in this field on their transcripts. The structure of the minor will also help direct students with a significant interest in English literature to sequences and sets of courses that are designed to develop their interest; they can take a mini-curriculum rather than just a smattering of electives. A minor in English literature is a desirable supplement to many degrees across the Dietrich School because it provides insights into cultural traditions and practices, develops students' abilities to write analytic arguments, and promotes critical thinking.

The minor consists of 18 credits and comprises the following courses.

- ENGLIT 0505 - HOW TO DO THINGS WITH LITERATURE 1
- ENGLIT 0506 - LITERARY FIELD STUDIES
- Two elective courses at the 0500-level or above
- Two elective courses at the 1000-level or above
- ENGLIT 1900 - PROJECT SEMINAR is recommended but not required.

Film and Media Studies Program

While film studies is not a department, it is an interdisciplinary program and an administrative unit offering both a major and a minor in film studies. Film is one of the major cultural forms of the 20th century, and its study has become an important part of a modern humanities education. At the University of Pittsburgh, the Film and Media Studies Program provides a series of interdisciplinary courses concerning the history, aesthetics, theory, and production of cinema. The program provides courses in critical studies, film, photography, and video production. A major in Film and Media Studies helps students to understand and appreciate the cinematic medium and to be aware of its impact as a cultural and artistic force. It is also appropriate for students who wish to pursue careers in film teaching, film journalism, film museum curatorial work, film library and archival work, and film and television production. As part of the Film and Media Studies Program, internships are made available to students in many of these fields. In the past, students have done internships at the Carnegie Museum of Art, the Pittsburgh Film Office, Pittsburgh Filmmakers, and various television stations.

Various options are available to students interested in Film and Media Studies. For those students who wish to make film studies the primary focus of their undergraduate program, it is possible to pursue an interdisciplinary major in Film and Media Studies. For those students who wish to major in another area but desire a focus in film studies, a minor in Film and Media Studies is available. In addition, many students choose to take elective courses in film studies as part of their undergraduate curriculum.

For more information on the film studies major, see www.filmstudies.pitt.edu/.

Certificate

Television and Broadcast Arts Certificate
The Television and Broadcast Arts Certificate will allow students to professionalize and credential themselves in a visible way by developing broad competencies in broadcast along with an understanding of critical issues in broadcast/television. In addition, students may cluster their courses in a variety of ways to allow critical and practical development in specific areas, whether in front of, behind or in support of the camera.

Students will complete the course of study to attain competency in key broadcast areas as well as the application of critical concepts to their broadcast practices in the area in which they have self-selected to concentrate. Students will have an opportunity to display their work in the spring term and participate in professional workshops, including interactive sessions with industry professionals. These materials will constitute part of an online résumé or reel highlighting a students' experiences, skills, and interests while developing professional credentials.

The certificate program requires 18 credits, described as follows. At least nine of the credits must be taken at the 1000-level or above.

**Required courses**

All of the following courses are required for the certificate.

- COMMRC 0320 - MASS COMMUNICATION AND SOCIETY
- ENGFLM 1752 - TELEVISION ANALYSIS or FMST 1508 - TELEVISION ANALYSIS
- FMST 1885 - BROADCASTING

**Electives**

Select three courses from the following list. No more than two elective courses may be from the same department.

- COMMRC 0520 - PUBLIC SPEAKING
- COMMRC 0575 - INTRODUCTION TO RADIO PRODUCTION
- COMMRC 1105 - TELEVISION AND SOCIETY
- COMMRC 1121 - HISTORY OF MASS MEDIA
- COMMRC 1122 - MEDIA CRITICISM
- COMMRC 1126 - MEDIA AND CONSUMER CULTURE
- ENGCMP 0420 - WRITING FOR THE PUBLIC
- ENGCMP 1401 - WRITING FOR FUNDRAISING AND DEVELOPMENT
- ENGFLM 0355 - VISUAL LITERACY /FMST 0100 - VISUAL LITERACY
- OR
- ENGFLM 0401 - INTRODUCTION TO VISUAL CULTURE /FMST 0130 - INTRODUCTION TO VISUAL CULTURE
- ENGFILM 0585 - TECHNOLOGIES OF THE BODY /FMST 0790 - TECHNOLOGIES OF THE BODY
- ENGFILM 1683 - DOCUMENTARY FILM /FMST 1540 - DOCUMENTARY FILM
- ENGWRT 0610 - INTRODUCTION TO JOURNALISM AND NONFICTION
- ENGWRT 0710 - INTERRO TO AUDIO STORYTELLING
- ENGWRT 1330 - INTERMEDIATE NONFICTION: SCENE AND POINT-OF-VIEW
- ENGWRT 1360 - THE ART OF THE INTERVIEW
- ENGWRT 1393 - SPORTS WRITING
- ENGWRT 1490 - LISTENING TO NARRATIVE AUDIO
- ENGWRT 1750 - SENIOR SEMINAR IN NONFICTION
- FMST 0800 - FILMMAKING 1: FUNDAMENTALS
- FMST 0835 - ELEMENTS OF AUDIO PRODUCTION
- FMST 1740 - MAKING THE DOCUMENTARY
The study of film and media is an important part of a contemporary humanities education. At the University of Pittsburgh, the Film and Media Studies Program offers interdisciplinary courses concerning the history, aesthetics, and theory of cinema and time-based media and courses in film and video production.

A major in film and media studies helps students to understand and appreciate the cinematic medium and to be aware of its impact as a cultural and artistic force. It is appropriate for those students who wish to pursue careers in film teaching, film exhibition, film journalism, film museum curatorial work, film library and archive work, and film and television production. As part of the Film and Media Studies Program, internships are available to students in many of these fields at locations including local television stations, Pitt Studios, Pittsburgh-based film festivals, casting agencies, and museums. Critical Studies and Film and Media Production tracks alike provide liberal arts educations with professional outcomes.

The Film and Media Studies major requires the completion of 36 credits distributed as follows. The Media and Production track requires 36 credits for completion distributed as follows.

Critical Studies track requirements

Critical Studies courses

- ENGFLM 0530 - FILM ANALYSIS
- ENGFLM 0540 - WORLD FILM HISTORY
- ENGFLM 1920 - ADVANCED SEMINAR IN FILM STUDIES

Production course

Students must take one of the following production courses.

- FMST 0800 - FILMMAKING 1: FUNDAMENTALS
- ENGCMP 0610 - COMPOSING DIGITAL MEDIA
Two National Cinemas or Film courses

Students must take two courses from the National Cinemas or Film course category listed below.

Two Themes, Genres, or Theory courses

Students must take two courses from the Themes, Genres, or Theory category listed below.

Four elective courses

Students must select four courses from the three categories below.

- National Cinemas or Film
- Themes, Genres, or Theory
- Production

Production track requirements

Foundational course

- FMST 0800 - FILMMAKING 1: FUNDAMENTALS

Screenwriting course*

*On October 19th, 2021 the program was updated in order to maintain accuracy.

- FMST 1860 - ELEMENTS OF SCREENWRITING

Production Course*

Select one of the following courses.

- FMST 0845 - FILMMAKING 2: SIGHT AND SOUND
- SA 1380 - DIGITAL STUDIO: VIDEO

Capstone Course*

- FMST 1921 - FILMMAKING 4: CAPSTONE

Technical elective course

Select two of the following courses.

- FMST 0826 - POST-PRODUCTION
- FMST 0827 - ADVANCED EDITING
- FMST 0835 - ELEMENTS OF AUDIO PRODUCTION
- FMST 0850 - DIGITAL EFFECTS 1
Topical elective courses

Select two of the following courses.

- FMST 0700 - SCREENWRITING AND NARRATIVE
- FMST 0710 - FILMMAKING: PRODUCTION AND CRITICISM
- FMST 0760 - CRITICAL MAKING
- FMST 0790 - TECHNOLOGIES OF THE BODY
- FMST 0833 - PRODUCING: FILM, TELEVISION AND OTHER MEDIA
- FMST 1196 - DIGITAL MEDIA PRACTICE
- FMST 1508 - TELEVISION ANALYSIS
- FMST 1549 - INDUSTRIES AND FESTIVALS: FILM AND MEDIA
- FMST 1715 - MOCKUMENTARY: PRODUCTION AND CRITICISM
- FMST 1720 - VISITING FILMMAKER: PRODUCTION AND CRITICISM
- FMST 1740 - MAKING THE DOCUMENTARY
- FMST 1750 - CREATIVE PRODUCTION WORKSHOP
- FMST 1765 - VIRTUAL REALITY
- FMST 1781 - LISTENING TO NARRATIVE AUDIO
- FMST 1883 - EXPERIMENTAL CAMERA
- FMST 1885 - BROADCASTING
- FMST 1890 - THE BUSINESS OF BROADCASTING
- FMST 1893 - HUMAN INTEREST STORIES FOR BROADCAST
- FMST 1900 - INTERNSHIP IN FILM AND MEDIA STUDIES

Two category courses

Students must take two courses from either the National Cinemas or Film or the Themes, Genres, or Theory category listed below.

Critical Studies courses

Both of the following courses are required.

- ENGFILM 0530 - FILM ANALYSIS
- ENGFLM 0540 - WORLD FILM HISTORY

National Cinemas or Film courses

- CHIN 1059 - ADAPTED FOR THE SCREEN: CHINESE LITERATURE AND FILM
- CHIN 1084 - MASTERPIECES OF CHINESE LITERATURE: MODERN
- CHIN 1085 - INTRODUCTION TO EAST ASIAN CINEMA
- CHIN 1088 - NEW CHINESE CINEMA
- CHIN 1089 - THE WORLD OF CHINA
- ENGFLM 1190 - BRITISH FILM
- ENGFLM 1192 - IRISH FILM
- ENGFLM 1226 - EASTERN EUROPEAN COMMUNISM AT THE MOVIES
- ENGFLM 1290 - AMERICAN FILM 1
- ENGFLM 1291 - AMERICAN FILM 2
- ENGFLM 1390 - CONTEMPORARY FILM
- ENGFLM 1410 - BOLLYWOOD AND INDIAN CINEMA
- ENGFLM 1420 - TRANSNATIONAL EAST ASIAN CINEMAS
- ENGFLM 1470 - FILM DIRECTORS
- ENGFLM 1471 - ORSON WELLES
- ENGFLM 1472 - HITCHCOCK'S FILMS
- ENGFLM 1473 - SPIKE LEE
- ENGFLM 1476 - THE FILMS OF STANLEY KUBRICK
- ENGFLM 1670 - GLOBAL ANIME
- FMST 0301 - HISTORY OF ITALIAN CINEMA
- FMST 0303 - ITALIAN CINEMA ICONS
- FMST 1331 - JEWS AND THE AMERICAN CINEMA
- HAA 1805 - EARLY FRENCH FILM
- HAA 1806 - AMERICAN INDEPENDENT FILM
- HIST 1226 - EASTERN EUROPEAN COMMUNISM AT THE MOVIES
- ITAL 0086 - ITALIAN CINEMA
- ITAL 0088 - ITALIAN AMERICA ON SCREEN
- ITAL 1089 - SPECIAL TOPICS
- JPNSE 1057 - JAPANESE CULTURE AND SOCIETY THROUGH CINEMA
- POLISH 0870 - CONTEMPORARY POLISH CINEMA: LITERATURE ON FILM
- RUSS 0870 - RUSSIAN FILM: EISENSTEIN AND COMPANY
- RUSS 0871 - RUSSIAN FILM STALIN TO PUTIN
- SLOVAK 0890 - SLOVAK, CZECH, AND CENTRAL EUROPEAN FILM
- SPAN 1404 - LATIN AMERICAN TOPICS
- SPAN 1407 - U.S. LATINO FILM
- SPAN 1603 - PENINSULAR TOPICS

Themes, Genres, or Theory

- ENGFLM 0400 - INTRODUCTION TO FILM or
- ENGFLM 0401 - INTRODUCTION TO VISUAL CULTURE
- ENGFLM 0520 - FILM THEORY
- ENGFLM 0532 - INTRODUCTION TO FILM GENRES
• ENGFLM 0540 - WORLD FILM HISTORY
• ENGFLM 0570 - INTRODUCTION TO NEW MEDIA
• ENGFLM 0812 - MEDIA/ECOLOGY
• ENGFLM 1391 - TOPICS IN CONTEMPORARY CINEMA
• ENGFLM 1479 - CHILDREN AND MEDIA
• ENGFLM 1480 - TOPICS IN FILM
• ENGFLM 1481 - TEEN FILM
• ENGFLM 1482 - THE STAR SYSTEM AND THE MOVIES
• ENGFLM 1483 - FILM SOUND
• ENGFLM 1485 - FILM AND POLITICS
• ENGFLM 1487 - FILM CENSORSHIP AND AMERICAN CULTURE
• ENGFLM 1489 - CULT FILM
• ENGFLM 1610 - TOPICS IN GENRE
• ENGFLM 1613 - TOPICS IN FILM GENRE AND THEME
• ENGFLM 1615 - THE WAR FILM
• ENGFLM 1680 - ANIMATION STUDIES
• ENGFLM 1681 - FILM COMEDY
• ENGFLM 1683 - DOCUMENTARY FILM
• ENGFLM 1685 - FILM MUSICAL
• ENGFLM 1688 - FILM WESTERN
• ENGFLM 1695 - HORROR FILM
• ENGFLM 1696 - FILM NOIR
• ENGFLM 1699 - SCIENCE FICTION FILM
• ENGFLM 1703 - GENDER AND FILM
• ENGFLM 1752 - TELEVISION ANALYSIS
• ENGFLM 1760 - CINEMA AND VIDEO GAMES
• ENGFLM 1790 - CINEMA AND LITERATURE
• ENGFLM 1920 - ADVANCED SEMINAR IN FILM STUDIES
• FMST 1417 - Queer Cinemas
• FMST 1545 - The American Film and Television Industry
• FMST 1549 - Industries and Festivals: Film and Media
• HAA 0470 - PHOTOGRAPHY AND ART
• HAA 0810 - EXPERIMENTAL CINEMA
• HAA 1806 - AMERICAN INDEPENDENT FILM
• HAA 1820 - DOCUMENTARY FILM
• JPNSE 1058 - WESTERNS AND SAMURAI FILMS
• JPNSE 1059 - JAPANESE LITERATURE ON SCREEN

Production

• ENGFLM 0585 - TECHNOLOGIES OF THE BODY
• ENGFLM 0712 - CRITICAL MAKING
• ENGFLM 1671 - MAKING THE DOCUMENTARY
• ENGFLM 1672 - VISITING FILMMAKER: PRODUCTION AND CRITICISM
• ENGFLM 1684 - MOCKUMENTARY: PRODUCTION AND CRITICISM
• ENGFLM 1750 - CREATIVE PRODUCTION WORKSHOP
• ENGFLM 1930 - INTERNSHIP IN FILM
• ENGWRT 0560 - SCREENWRITING AND NARRATIVE
• FILMST 0121 - ANIMATION 1
• FILMST 0225 - STUDIO LIGHTING
• FILMST 0400 - POST-PRODUCTION
• FILMST 0601 - FILMMAKING 2: SIGHT AND SOUND
• FILMST 1130 - DIRECTING MOTION PICTURES
• FILMST 1132 - ELEMENTS OF SCREENWRITING
• FILMST 1133 - INTERMEDIATE SCREENWRITING
• FILMST 1140 - ACTING FOR THE CAMERA
• FILMST 1145 - SOUND FOR MOTION PICTURES
• FILMST 1157 - LIGHTING FOR MOTION PICTURES
• FILMST 1580 - DIGITAL CINEMATOGRAPHY
• FILMST 1600 - FILMMAKING 3: STORY TO SCREEN
• FILMST 1901 - INDEPENDENT STUDY
• FILMST 1921 - FILMMAKING 4: CAPSTONE
• FMST 1533 - DISABILITY IN FILM AND TELEVISION
• FMST 0780 - INTRODUCTION TO AUDIO STORYTELLING
• FMST 0800 - FILMMAKING 1: FUNDAMENTALS
• FMST 0826 - POST-PRODUCTION
• FMST 0827 - ADVANCED EDITING
• FMST 0833 - PRODUCING: FILM, TELEVISION AND OTHER MEDIA
• FMST 0835 - ELEMENTS OF AUDIO PRODUCTION
• FMST 0845 - FILMMAKING 2: SIGHT AND SOUND
• FMST 0855 - TOPICS IN PRODUCTION
• FMST 1775 - DIGITAL STUDIO: VIDEO
• FMST 1777 - DIGITAL STUDIO: ANIMATION
• FMST 1781 - LISTENING TO NARRATIVE AUDIO
• FMST 1817 - LIGHTING FOR MOTION PICTURES

• FMST 1921 - FILMMAKING 4: CAPSTONE
• SA 0180 - DIGITAL STUDIO: PHOTOGRAPHY 1

Additional Rules and Requirements
ENGFLM 0530 and ENGFLM 0540

The Film and Media Studies program recommends that students complete ENGFLM 0530 - FILM ANALYSIS and ENGFLM 0540 - WORLD FILM HISTORY or their equivalents prior to taking any 1000-level film courses.

Production courses

No more than five production courses may be counted toward the major (Standard track). Additional production courses may be taken to meet the minimum credit requirement for graduation.

Grade requirements

A minimum GPA of 2.0 in departmental courses is required for graduation.

Satisfactory/No Credit option

No more than three courses that count toward the major can be taken on an S/NC basis.

Internship

Only one 3-credit film internship can be counted toward the major.

Writing requirement

Students must complete at least one W-course in the major.

Minor

Film and Media Studies Minor

In the spring of 2018, the Film Studies minor was renamed to Film and Media Studies minor. Students who were enrolled prior to the Spring 2018 term have the option to stay Film Studies minor or change to the Film and Media Studies minor. They will have until the end of the Fall 2017 term to choose to complete the program under the current name. Students who choose to complete their program under the current name must do so by Summer 2020 term. There are no program requirement changes.

Required Courses

Two Critical Studies Courses

- ENGFLM 0530 - FILM ANALYSIS
- ENGFLM 0540 - WORLD FILM HISTORY

Four Elective Courses

Elective courses must be taken from at least two of the three categories:
• National Cinemas or Film
• Themes, Genres, or Theory
• Production

No more than two courses can be taken from the Production category.

National Cinemas or Film courses

• CHIN 1059 - ADAPTED FOR THE SCREEN: CHINESE LITERATURE AND FILM
• CHIN 1084 - MASTERPIECES OF CHINESE LITERATURE: MODERN
• CHIN 1085 - INTRODUCTION TO EAST ASIAN CINEMA
• CHIN 1088 - NEW CHINESE CINEMA
• CHIN 1089 - THE WORLD OF CHINA
• ENGFLM 1190 - BRITISH FILM
• ENGFLM 1192 - IRISH FILM
• ENGFLM 1226 - EASTERN EUROPEAN COMMUNISM AT THE MOVIES
• ENGFLM 1290 - AMERICAN FILM 1
• ENGFLM 1291 - AMERICAN FILM 2
• ENGFLM 1390 - CONTEMPORARY FILM
• ENGFLM 1410 - BOLLYWOOD AND INDIAN CINEMA
• ENGFLM 1420 - TRANSNATIONAL EAST ASIAN CINEMAS
• ENGFLM 1470 - FILM DIRECTORS
• ENGFLM 1471 - ORSON WELLES
• ENGFLM 1472 - HITCHCOCK'S FILMS
• ENGFLM 1473 - SPIKE LEE
• ENGFLM 1476 - THE FILMS OF STANLEY KUBRICK
• ENGFLM 1670 - GLOBAL ANIME
• FMST 0301 - HISTORY OF ITALIAN CINEMA
• FMST 0303 - ITALIAN CINEMA ICONS
• FMST 1331 - JEWS AND THE AMERICAN CINEMA
• HAA 1805 - EARLY FRENCH FILM
• HAA 1806 - AMERICAN INDEPENDENT FILM
• HIST 1226 - EASTERN EUROPEAN COMMUNISM AT THE MOVIES
• ITAL 0086 - ITALIAN CINEMA
• ITAL 0088 - ITALIAN AMERICA ON SCREEN
• ITAL 1089 - SPECIAL TOPICS
• JPNSE 1057 - JAPANESE CULTURE AND SOCIETY THROUGH CINEMA
• POLISH 0870 - CONTEMPORARY POLISH CINEMA: LITERATURE ON FILM
• RUSS 0870 - RUSSIAN FILM: EISENSTEIN AND COMPANY
• RUSS 0871 - RUSSIAN FILM STALIN TO PUTIN
• SLOVAK 0890 - SLOVAK, CZECH, AND CENTRAL EUROPEAN FILM
• SPAN 1404 - LATIN AMERICAN TOPICS
• SPAN 1407 - U.S. LATINO FILM
• SPAN 1603 - PENINSULAR TOPICS

Themes, Genres, or Theory

• ENGFLM 0400 - INTRODUCTION TO FILM or
• ENGFLM 0401 - INTRODUCTION TO VISUAL CULTURE
• ENGFLM 0520 - FILM THEORY
• ENGFLM 0532 - INTRODUCTION TO FILM GENRES
• ENGFLM 0540 - WORLD FILM HISTORY
• ENGFLM 0570 - INTRODUCTION TO NEW MEDIA
• ENGFLM 0812 - MEDIA/ECOLOGY
• ENGFLM 1391 - TOPICS IN CONTEMPORARY CINEMA
• ENGFLM 1479 - CHILDREN AND MEDIA
• ENGFLM 1480 - TOPICS IN FILM
• ENGFLM 1481 - TEEN FILM
• ENGFLM 1482 - THE STAR SYSTEM AND THE MOVIES
• ENGFLM 1483 - FILM SOUND
• ENGFLM 1485 - FILM AND POLITICS
• ENGFLM 1487 - FILM CENSORSHIP AND AMERICAN CULTURE
• ENGFLM 1489 - CULT FILM
• ENGFLM 1610 - TOPICS IN GENRE
• ENGFLM 1613 - TOPICS IN FILM GENRE AND THEME
• ENGFLM 1615 - THE WAR FILM
• ENGFLM 1680 - ANIMATION STUDIES
• ENGFLM 1681 - FILM COMEDY
• ENGFLM 1683 - DOCUMENTARY FILM
• ENGFLM 1685 - FILM MUSICAL
• ENGFLM 1688 - FILM WESTERN
• ENGFLM 1695 - HORROR FILM

Note:

Only one elective course for the minor can be taken on an S/NC basis. Half of the courses for the minor must be taken at Pitt. Students pursuing the minor must meet with the film studies advisors to check their progress. Courses taken at other schools must be approved.

Department of French and Italian

A major in French and/or Italian gives students at the University of Pittsburgh the opportunity to study a second language in detail and to acquire an education in a literary and cultural tradition central to the humanities. Studying French and/or Italian language and literature prepares students for graduate study in law and international affairs; advanced work in the humanities; and careers in business, governmental service, and teaching. The University is committed to international study, and students are encouraged to take advantage of the numerous opportunities to study abroad. Students can also combine a major in French and/or Italian with a second major in a field such as political science, history, biology, or economics. Students who choose to study the grammar, linguistics, rhetoric, literature, and film of Italy and/or the Francophone world will acquire an invaluable technical resource and an in-depth knowledge of a diverse and foundational intellectual tradition. Students may also minor in French and/or Italian. For more information on the Department of French and Italian Languages and Literatures, see our Web site at www.frenchanditalian.pitt.edu.

Certificate

Medieval and Renaissance Studies Certificate

In spite of change through the centuries and variations of a regional and national character, the millennium preceding the deaths of Shakespeare and Cervantes in 1616 is marked by a coherence sufficient to justify considering it as a cultural entity, worthy of study for its humanistic qualities and for its importance in preparing the modern world. Some of the principal aims of the Medieval and Renaissance Studies Program are:

- to identify and explore aspects of medieval and Renaissance cultures that are an important part of our own cultural heritage;
- to promote an understanding of our medieval and Renaissance ancestors through the investigation of the ways they faced the issues of their day, asked questions of their institutions, and were conscious of themselves and the world around them;
- to help students understand historical relativity by showing them how different periods and individuals have understood the Middle Ages and Renaissance in very different ways; and
- to provide the basis for an open-minded attitude toward any culture that is different from our own.

In consultation with a program advisor (who may be a member of the Executive Committee, one of the departmental representatives, or another faculty member specializing in the area), the candidate will define an area of interest and organize a program of courses in relation to it. In designing a certificate program, students are urged to keep in mind the aims of the program as described above. For more information, see http://www.medren.pitt.edu/.

Requirements

The certificate requires 15 credits. At least nine credits will be earned in 1000-level courses.

- One of the five courses must be focused on the medieval period; see the list of qualifying courses at www.medren.pitt.edu/undergraduate-certificates/overview.php
- One of the five courses must be focused on the Renaissance period; see the list of qualifying courses at www.medren.pitt.edu/undergraduate-certificates/overview.php

The student must take at least two courses from each category. Courses should not be chosen at random but should follow a pattern of interrelated studies worked out with a Program Advisor from one of the cooperating Departments or with the Director of Medieval and Renaissance Studies. The categories are:

- language and literature, the visual arts, and music; and
• social, intellectual, economic, and ideological history (including philosophy, religious studies, the history of science and the study of institutions).
A strong recommendation, beyond these requirements, is that certificate candidates acquire a reading knowledge of a modern European language as early as possible. In addition, Latin is suggested for those who plan to do graduate work in the field.

Major

French, BA

A major in French gives students the opportunity to study in detail a foreign language and to acquire an education in a literary and cultural tradition central to the humanities. Studying French language and literature prepares students for graduate study in law and international affairs, advanced work in the humanities, and careers in business, government service, and teaching. Students are encouraged to take advantage of the numerous opportunities to study abroad. They can combine a major in French with a second major in a field such as political science, history, biology, or economics. Students who choose to study the grammar, linguistics, rhetoric, literature, and film of the Francophone world will acquire an invaluable technical resource and an in-depth knowledge of a diverse and foundational intellectual tradition.

Requirements

Majors in French must have completed two years of college work or the equivalent before beginning core courses. The French major consists of at least 31 credits above the intermediate level. Elementary French language courses (FR 0101 and FR 0102) do not count toward the major. Required credits follow.

- FR 0220 - FRANCE IN THE 21ST CENTURY
- FR 0221 - READING FRENCH: LITERATURE, MEDIA, CULTURE
- FR 0227 - THE FRENCH ATLANTIC
- FR 0255 - SPEAKING FRENCH: ATELIER D'EXPRESSION ORALE
- FR 0256 - WRITING FRENCH: ATELIER D'EXPRESSION ECRITE
- FR 0258 - ADVANCED FRENCH CONVERSATION

Note

Majors are expected to take one credit of FR 0258 - ADVANCED FRENCH CONVERSATION, but they may take two additional credits of the course as a nonmajor elective.

Additional requirements

In addition to the basic requirements, the following criteria must be met by French majors:

• Once the basic requirements are met, students will, in consultation with their advisor, design a program that corresponds to their needs, but they must take an additional 15 credits at the 1000 level. Twelve credits must be in courses taught in French. Intermediate language courses (FR 0003 and FR 0004) may be used to fulfill this requirement.
• French majors may take one course above 0004, in addition to 0058, on an S/NC option.
• Although study abroad is not a requirement for the major in French, students are strongly encouraged to consider participating in a study-abroad program in a French-speaking country during their undergraduate career.
• Students must complete at least one W course within the major.

The Dietrich School requires 12 credits in a related area to be chosen in consultation with the program advisor. This requirement can also be met by completing an official minor in another area.
French and Italian Major Requirements

The following requirements apply to French, Italian, and Italian Studies majors:

- Students are required to maintain at least a 2.00 GPA in major courses.
- Reading competency in at least one other language is recommended for students interested in graduate school.
- To earn departmental honors, students must major in French, Italian, or Italian Studies; demonstrate superior performance in departmental courses; and be enrolled in 1000-level French/Italian courses no later than the first term of the junior year. Selection of honors candidates takes place only in the second term of the junior year. During the senior year, two appropriate sequential courses are chosen in consultation with the major advisor, and a research paper must be completed. The paper must be defended before a faculty committee. Honors will be determined by the quality of the paper and the defense, as well as the cumulative grades in all departmental courses counting toward the major.

Italian Studies, BA

French and Italian Major Requirements

The following requirements apply to French, Italian, and Italian Studies majors:

- Students are required to maintain at least a 2.00 GPA in major courses.
- Reading competency in at least one other language is recommended for students interested in graduate school.
- To earn departmental honors, students must major in French, Italian, or Italian Studies; demonstrate superior performance in departmental courses; and be enrolled in 1000-level French/Italian courses no later than the first term of the junior year. Selection of honors candidates takes place only in the second term of the junior year. During the senior year, two appropriate sequential courses are chosen in consultation with the major advisor, and a research paper must be completed. The paper must be defended before a faculty committee. Honors will be determined by the quality of the paper and the defense, as well as the cumulative grades in all departmental courses counting toward the major.

Requirements

The Italian Studies major promotes the cross-discipline exploration of a variety of areas relating to Italian and Italian American culture: language, literature, theatre, cinema, art and architecture, music, history, social and immigration history, politics and political theory. Students can combine a major in Italian Studies with a second major in a field such as political science, history, anthropology, history of art and architecture, music, English, business, linguistics or another foreign language.

After one term of college instruction in the Italian language (ITAL 0101 - ITALIAN LANGUAGE AND CULTURE 1 or equivalent as determined by placement testing), students may enroll in ITAL 0102 - ITALIAN LANGUAGE AND CULTURE 2 for credit toward the major.

This major requires 36 credits for completion. ITAL 0101 does not count toward the major.

Core courses

- ITAL 0081 - MADE IN ITALY:INGENUITY, SINGULARITY, STYLE
- ITAL 0102 - ITALIAN LANGUAGE AND CULTURE 2
- ITAL 0103 - ITALIAN LANGUAGE AND CULTURE 3
- ITAL 0115 - PERFORMING ITALIAN
• ITAL 0117 - ITALIES

Note

Because ITAL 0081 is taught in English and has no prerequisites, the department recommends that students interested in majoring in Italian take this course as early in their studies as possible.

Additional Requirements

Students must complete five courses in addition to the core courses listed above. At least three of these additional courses must be at the 1000-level, and at least two of these courses must be offered by the Italian program. The remaining courses can be selected from a list of approved offerings in other departments, chosen in consultation with the major advisor. Italian Studies majors are encouraged to continue their study of the Italian language to the greatest extent possible.

At least one of the 1000-level courses must be a writing-intensive course taught in Italian. The following courses meet this requirement.

- ITAL 1032 - INTRODUCTION TO ITALIAN LINGUISTICS
- ITAL 1041 - ITALIAN THEATRICAL WORKSHOP
- ITAL 1065 - SONGS OF THE ITALIAN SELF: ITALIAN LYRIC POETRY
- ITAL 1080 - MASTERPIECES OF ITALIAN PROSE
- ITAL 1083 - MODERN ITALIAN LITERATURE

Capstone course

Students must complete a 1-credit capstone course. The details of the capstone experience should be determined in consultation with the major advisor.

Italian, BA

French and Italian Major Requirements

The following requirements apply to French, Italian, and Italian Studies majors:

• Students are required to maintain at least a 2.00 GPA in major courses.
• Reading competency in at least one other language is recommended for students interested in graduate school.
• To earn departmental honors, students must major in French, Italian, or Italian Studies; demonstrate superior performance in departmental courses; and be enrolled in 1000-level French/Italian courses no later than the first term of the junior year. Selection of honors candidates takes place only in the second term of the junior year. During the senior year, two appropriate sequential courses are chosen in consultation with the major advisor, and a research paper must be completed. The paper must be defended before a faculty committee. Honors will be determined by the quality of the paper and the defense, as well as the cumulative grades in all departmental courses counting toward the major.

Requirements

After one term of college instruction in the Italian language (ITAL 0101 - ITALIAN LANGUAGE AND CULTURE 1 or equivalent, as determined by placement test results), students may enroll in ITAL 0102 - ITALIAN LANGUAGE AND CULTURE 2 for credit toward the Italian major.

This major requires 36 credits for completion. ITAL 0101 does not count toward the major.
ITAL 0081 - MADE IN ITALY: INGENUITY, SINGULARITY, STYLE
ITAL 0102 - ITALIAN LANGUAGE AND CULTURE 2
ITAL 0103 - ITALIAN LANGUAGE AND CULTURE 3
ITAL 0115 - PERFORMING ITALIAN
ITAL 0117 - ITALIES

Note
Because ITAL 0081 is taught in English and has no prerequisites, the department recommends that students interested in majoring in Italian take this course as early in their studies as possible.

Additional Requirements
Students must complete five courses in addition to the core courses listed above. At least three of these additional courses must be at the 1000-level and be taught in Italian.

Courses in the ITAL 1030 to ITAL 1068 range are taught in Italian regularly.
Some lower-level courses and upper-level courses in the ITAL 1070 to ITAL 1092 range are taught in English regularly.
At least one of the 1000-level courses must be a writing-intensive course taught in Italian. The following courses meet this requirement.

- ITAL 1032 - INTRODUCTION TO ITALIAN LINGUISTICS
- ITAL 1041 - ITALIAN THEATRICAL WORKSHOP
- ITAL 1065 - SONGS OF THE ITALIAN SELF: ITALIAN LYRIC POETRY
- ITAL 1080 - MASTERPIECES OF ITALIAN PROSE
- ITAL 1083 - MODERN ITALIAN LITERATURE

Capstone course
Students must complete a 1-credit capstone course. The details of the capstone experience should be determined in consultation with the major advisor.

Minor
Italian Minor
Students may take any combination of five Italian (ITAL) courses to complete this minor. Each course must be at least three credits and must be taught on the Pittsburgh campus or through a Pitt in Italy program. Students minoring in Italian are encouraged to study the target language to the greatest extent allowed by their majors.

French and Italian minor requirements
The Department of French and Italian Languages and Literatures offers three tracks within its minor offerings: French Language and Literature; French Studies; and Italian. Students must apply for any official minor they will complete or have completed by the time they apply for graduation.

Students pursuing a minor offered by the Department of French and Italian Languages and Literatures may not take any courses on the Satisfactory/No Credit (S/NC) basis.

French Minor
Students pursuing this minor must choose either the French Language and Literature track or the French Studies track.
French and Italian minor requirements

The Department of French and Italian Languages and Literatures offers three tracks within its minor offerings: French Language and Literature; French Studies; and Italian. Students must apply for any official minor they will complete or have completed by the time they apply for graduation.

Students pursuing a minor offered by the Department of French and Italian Languages and Literatures may not take any courses on the Satisfactory/No Credit (S/NC) basis.

French Language and Literature track

Students can complete the French Language and Literature track by completing five courses chosen from the following list. Only one of the courses may be taught in English. Students whose programs will include two or more courses taught in English should follow the French Studies minor requirements.

In addition to the listed courses, students may also take courses on literary, cultural, or linguistic topics taught in French. These courses include FR 1001 through FR 1076.

- FR 0006 - SPECIAL TOPICS IN CONVERSATION AND CULTURE
- FR 0012 - FRENCH KISS: LOVE, SEX, FRANCE
- FR 0014 - INTRODUCTION TO FRENCH-SPEAKING CANADA
- FR 0016 - HISTORY OF FRENCH CINEMA
- FR 0080 - MODERN FRENCH NOVEL
- FR 0103 - INTERMEDIATE FRENCH 1
- FR 0104 - INTERMEDIATE FRENCH 2: FRENCH IN A GLOBAL CONTEXT
- FR 0220 - FRANCE IN THE 21ST CENTURY
- FR 0221 - READING FRENCH: LITERATURE, MEDIA, CULTURE
- FR 0227 - THE FRENCH ATLANTIC
- FR 0255 - SPEAKING FRENCH: ATELIER D'EXPRESSION ORALE
- FR 0256 - WRITING FRENCH: ATELIER D'EXPRESSION ECRITE
- FR 1085 - WOMEN'S VOICES IN FRENCH LITERATURE
- FR 1088 - SPECIAL TOPICS

French Studies track

Students can complete the French Studies track in the French minor with five courses chosen from the following list.

In addition to the listed courses, students may also take courses on literary, cultural, or linguistic topics taught in English or French. These courses include FR 1001 through FR 1090.

- FR 0006 - SPECIAL TOPICS IN CONVERSATION AND CULTURE
- FR 0012 - FRENCH KISS: LOVE, SEX, FRANCE
- FR 0014 - INTRODUCTION TO FRENCH-SPEAKING CANADA
- FR 0103 - INTERMEDIATE FRENCH 1
- FR 0104 - INTERMEDIATE FRENCH 2: FRENCH IN A GLOBAL CONTEXT
- FR 0220 - FRANCE IN THE 21ST CENTURY
- FR 0221 - READING FRENCH: LITERATURE, MEDIA, CULTURE
- FR 0227 - THE FRENCH ATLANTIC
- FR 0255 - SPEAKING FRENCH: ATELIER D'EXPRESSION ORALE

Gender, Sexuality, and Women's Studies Program
The Gender, Sexuality, and Women's Studies program at the University of Pittsburgh is an interdisciplinary academic program that is committed to promoting feminist and LGBTQIA activism, pedagogy, and scholarship that engage with the larger local, national, and global communities. Program offerings provide opportunities for students and faculty to explore the historical development, cultural variations, and changing representations of gender and sexuality as they organize identities, interactions, and institutions and intersect in complex ways with sex, race, class, ethnicity, ability, age, religion, and nation.

**Bachelor Degree in Gender, Sexuality, and Women's Studies**

The goals of this major are: to educate undergraduate students in the analysis and understanding of gender as a knowledge base and critical lens through which to read critically; to write and conduct research in disciplinary and interdisciplinary contexts; to begin to connect academic work with broader community interests; and to prepare students for graduate school and professional lives. The interdisciplinary nature of this major makes it ideal for students who wish to add breadth and depth to their studies in other disciplines.

**Certificate in Gender, Sexuality, and Women's Studies**

Students who pursue this certificate are those who plan careers in medicine, the creative arts, social work, education, counseling, law, therapy, academia, and business find that this program's courses enhance their professional activities. Still others report that the confidence and insight that they acquire in such courses enriches their lives regardless of their particular career goals. For more information, please visit the Gender, Sexuality, and Women's Studies Program in 401 Cathedral of Learning or online at www.gsws.pitt.edu.

**Certificate**

**Gender, Sexuality, and Women's Studies Certificate (Suspended)**

This program is no longer active and accepting student applications, effective Fall 2016. Students currently enrolled in the certificate will either transfer to the new minor or complete the certificate by the end of Spring 2023.

The Gender, Sexuality, and Women's Studies program is an interdisciplinary academic program focusing on gender, sexuality, and women. Gender, Sexuality, and Women's Studies (GSWS) courses and cross-listed courses in various departments across the university provide opportunities for all students to broaden their understandings of the changing role of gender in the United States and globally. Students who want to explore the intersection of gender with race, class, ethnicity, nation, religion, ability, age, sex and sexuality will find courses of interest, as will students who want to know more about the role of women in history, in literature and the arts, in media and science. Students who plan careers in medicine, the creative arts, social work, education, counseling, law, therapy, academia, and business find that this program's courses enhance their professional activities. Still others report that the confidence and insight that they acquire in such courses enriches their lives regardless of their particular career goals. For more information, please visit the Gender, Sexuality, and Women's Studies Program in 401 Cathedral of Learning or online at www.gsws.pitt.edu.

**Requirements**

Please consult the Gender, Sexuality and Women's Studies Undergraduate Advisor to plan your program of study.

A minimum of 18-credits, completed with an overall GPA of 2.00 is required, as follows:

- GSWS 0100 - INTRODUCTION TO GENDER, SEXUALITY, AND WOMEN'S STUDIES
- One of the following, though students are encouraged to take both courses
- GSWS 0500 - INTRODUCTION TO FEMINIST THEORY
• GSWS 0550 - SEX AND SEXUALITIES
• Three elective courses from at least two different academic departments. GSWS may count as one of these programs. Courses must be approved for GSWS credit; consult the Course Descriptions Web site, www.courses.as.pitt.edu, for current listings
• At least one 1000-level course with a GSWS subject; a cross-listed course will not fulfill this requirement.

Major

Gender, Sexuality, and Women's Studies, BA

Major Requirements

The goals of this major are: to educate undergraduate students in the analysis and understanding of gender as a knowledge base and critical lens through which to read critically; to write and conduct research in disciplinary and interdisciplinary contexts; to begin to connect academic work with broader community interests; and to prepare students for graduate school and professional lives. The interdisciplinary nature of this major makes it ideal for students who wish to add breadth and depth to their studies in other disciplines. This major requires 30 credits, distributed as follows.

Core courses

• GSWS 0100 - INTRODUCTION TO GENDER, SEXUALITY, AND WOMEN'S STUDIES
• GSWS 0500 - INTRODUCTION TO FEMINIST THEORY
• GSWS 0550 - SEX AND SEXUALITIES

Two elective courses

choose one from each of the following groups

Group A

• GSWS 0200 - SEX, RACE, AND POPULAR CULTURE
• GSWS 0210 - WIRED WOMEN
• GSWS 0220 - CONTEMPORARY ISSUES AND ARGUMENTS

Group B

• AFRCNA 0454 - MAN/WOMAN LITERATURE
• ANTH 0768 - HUMAN SEXUALITY IN CROSS CULTURE
• ENGCMP 0203 - SEMINAR IN COMPOSITION: GENDER STUDIES
• ENGLIT 0610 - WOMEN AND LITERATURE
• ENGLIT 0630 - SEXUALITY AND REPRESENTATION
• FR 0012 - FRENCH KISS: LOVE, SEX, FRANCE
• GSWS 1140 - SPECIAL TOPICS
  - Pitt in China, Pitt in London, etc.
• GSWS 1900 - INTERNSHIP (junior or senior only)
• PSY 0184 - PSYCHOLOGY OF GENDER
• SOC 0436 - SOCIAL ASPECTS OF SEXUALITY
• SOC 0446 - SOCIOLOGY OF GENDER
• Any course officially cross-listed with GSWS (check course offerings each semester for options)

Four upper-level courses

choose two from each group

Group A

• GSWS 1140 - SPECIAL TOPICS
• GSWS 1150 - TRANSNATIONAL FEMINISMS
• GSWS 1170 - QUEER THEORY
• GSWS 1180 - POLITICS OF GENDER AND FOOD
• GSWS 1190 - MASCULINITIES
• GSWS 1450 - GENDER AND SUSTAINABILITY

Group B

• LCJS 1550 - GENDER, RACE, CLASS AND CRIMINAL JUSTICE
• AFRBNZ 1309 - WOMEN OF AFRICAN AND AFRICAN DIASPORA
• ANTH 1738 - GENDER PERSPECTIVES IN ANTHROPOLOGY
• COMMRC 1148 - RHETORIC AND HUMAN RIGHTS
• COMMRC 1160 - VISUAL RHETORIC
• ENGLIT 1704 - WOMEN NOVELISTS
• FR 1085 - WOMEN'S VOICES IN FRENCH LITERATURE
• HIST 1560 - WOMEN IN LATIN AMERICAN HISTORY
• LCJS 1583 - SEX, LAW AND MARRIAGE
• MUSIC 1398 - WOMEN & MUSIC CROSS-CULTL PERSP
• PS 1622 - FEMINIST POLITICAL THOUGHT
• PSY 1110 - PSYCHOLOGICAL ASPECTS OF HUMAN SEXUALITY
• SOC 1413 - MARRIAGE
• SOC 1448 - WORKING WOMEN
• Any 1000-level course officially cross-listed with GSWS (check course offerings each semester for options)

Capstone

• GSWS 1910 - CAPSTONE

Grade requirements

A minimum GPA of 2.0 is required in those courses that count toward the major. Students must also have a minimum GPA of 2.0 in all GSWS courses. Students may have no more than six credits overlap with another major or certificate.

Writing (W) requirement

Students must complete at least one writing-intensive (W) course with the GSWS subject designation. Check the Course Descriptions Web site (www.courses.as.pitt.edu) each term for writing-intensive course options.
Minor

Gender, Sexuality, and Women's Studies Minor

The Gender, Sexuality, and Women's Studies program at the University of Pittsburgh is committed to promoting feminist and LGBTQIA activism, pedagogy, and scholarship that engage with the larger local, national, and global communities. Program offerings provide opportunities for students to explore the historical development, cultural variations, and changing representations of gender and sexuality as they organize identities, interactions, and institutions and intersect in complex ways with sex, race, class, ethnicity, ability, age, religion, and nation.

The goals of this major are: to educate undergraduate students in the analysis and understanding of gender as a knowledge base and critical lens through which to read critically; to write and conduct research in disciplinary and interdisciplinary contexts; to begin to connect academic work with broader community interests; and to prepare students for graduate school and professional lives. The interdisciplinary nature of this major makes it ideal for students who wish to add breadth and depth to their studies in other disciplines.

Core courses

- GSWS 0100 - INTRODUCTION TO GENDER, SEXUALITY, AND WOMEN'S STUDIES
- GSWS 0500 - INTRODUCTION TO FEMINIST THEORY
- GSWS 0550 - SEX AND SEXUALITIES

Two elective courses from the following list

- AFRCNA 0454 - MAN/WOMAN LITERATURE
- ANTH 0768 - HUMAN SEXUALITY IN CROSS CULTURE
- COMMRC 1148 - RHETORIC AND HUMAN RIGHTS
- COMMRC 1160 - VISUAL RHETORIC
- ENGCMP 0203 - SEMINAR IN COMPOSITION: GENDER STUDIES
- ENGFLM 1703 - GENDER AND FILM
- ENGLIT 0610 - WOMEN AND LITERATURE
- ENGLIT 0630 - SEXUALITY AND REPRESENTATION
- ENGLIT 1704 - WOMEN NOVELISTS
- FR 0012 - FRENCH KISS: LOVE, SEX, FRANCE
- FR 1085 - WOMEN'S VOICES IN FRENCH LITERATURE
- GSWS 0200 - SEX, RACE, AND POPULAR CULTURE
- GSWS 0220 - CONTEMPORARY ISSUES AND ARGUMENTS
- GSWS 0300 - SPECIAL TOPICS
- GSWS 1140 - SPECIAL TOPICS *
- GSWS 1900 - INTERNSHIP
- MUSIC 1398 - WOMEN & MUSIC CROSS-CULTL PERSP
- PS 1622 - FEMINIST POLITICAL THOUGHT
- PSY 0184 - PSYCHOLOGY OF GENDER
- PSY 1110 - PSYCHOLOGICAL ASPECTS OF HUMAN SEXUALITY
- SOC 0436 - SOCIAL ASPECTS OF SEXUALITY
- SOC 0446 - SOCIOLOGY OF GENDER
- SOC 1413 - MARRIAGE
- SOC 1448 - WORKING WOMEN *

* This course cannot count toward both the elective and upper-level course requirement.
One upper-level course from the following list

- GSWS 1140 - SPECIAL TOPICS *
- GSWS 1150 - TRANSNATIONAL FEMINISMS
- GSWS 1170 - QUEER THEORY
- GSWS 1180 - POLITICS OF GENDER AND FOOD
- GSWS 1190 - MASCULINITIES
- GSWS 1210 - GENDER AND THE DIGITAL
- GSWS 1300 - WANDERLUST: SEX & GENDER IN GLOBAL TOURISM
- GSWS 1450 - GENDER AND SUSTAINABILITY
- GSWS 1910 - CAPSTONE

Note:

Students must apply for any official minor they will complete or have completed at the time they apply for graduation. They should declare their minor as soon as possible with the Office of the Associate Dean for Undergraduate Studies, Dietrich School of Arts and Sciences, 140 Thackeray Hall.

LGBTQ and Critical Sexuality Studies Minor

The minor in LGBTQ and Critical Sexuality Studies builds students' knowledge of theory and an understanding of sexuality and its history, tracing the movement of sexual regulation through different domains (religious, legal, medical, social, and political). This minor requires 18 credits of coursework for completion, detailed as follows.

Core courses

Both of the following courses are required for the major.

- GSWS 0230 - INTRODUCTION TO LGBTQ STUDIES
- GSWS 0550 - SEX AND SEXUALITIES

Upper level courses

Students must choose one of the following courses. They may take the remaining two as electives, with the addition elective credits chosen from the elective course list.

- GSWS 1140 - SPECIAL TOPICS
- GSWS 1170 - QUEER THEORY
- GSWS 1280 - TRANSNATIONAL SEXUAL POLITICS

Elective courses

Students must choose three of the following courses.

- ANTH 0768 - HUMAN SEXUALITY IN CROSS CULTURE
- COMMRC 1143 - KNOWLEDGE, POWER, AND DESIRE
- ENGLIT 0630 - SEXUALITY AND REPRESENTATION
- ENGLIT 0670 - QUEER AND TRANSGENDER LITERATURE
- FR 0012 - FRENCH KISS: LOVE, SEX, FRANCE

SPAN 1423 - SEXUAL DIVERSITY IN LATIN AMERICAN LITERATURE AND CULTURE

Department of Geology and Environmental Science

The Department of Geology and Planetary Science studies the Earth and how it works. The earth is a fascinating natural system that supports many interactions between the solid earth, oceans, atmosphere, life, and various solar system objects. The primary goal of our geology and environmental geology majors (both BS programs) is a scientific understanding of these natural systems and their significant and sometimes surprising variations over geologic time. In addition, these students often seek a solid scientific grounding in earth resources and environmental problems. Our popular environmental studies major (a BA program) focuses on the economic, political, and legal issues that conspire to either cause or prevent the solution of environmental problems. Our programs are popular with people who love nature, who want to understand how the earth works, and who want to understand the many dimensions of modern environmental issues. For more information on our programs, please visit www.geology.pitt.edu.

Certificate

Geographic Information Systems Certificate

The Geology and Planetary Science Department offers a Certificate in Geographic Information Systems (GIS). GIS is a computer-based system that accommodates virtually any type of information about features that are referenced by geographical location. For example, a GIS database may include both location and attribute data, providing a spatial visualization capability for analyzing descriptive characteristics about geographical features, both natural and manmade. One of the most important benefits of GIS analysis is the ability to spatially interrelate multiple types of information stemming from a range of sources. Such computational manipulation of geographic data has become increasingly important in many areas of science, government, and industry. Students who demonstrate experience with computers in general, and GIS/image processing in particular, are at a distinct advantage when looking for jobs in geology, environmental science, city and regional planning, and engineering. This certificate is designed to provide students with the knowledge and skills needed for immediate success in GIS-related jobs.

Requirements

The program is open to any University of Pittsburgh student, including post-baccalaureate students (professionals seeking to expand their job-related computer skills). Approximately four terms (two academic years) will be required to complete this certificate program. It is therefore suggested that undergraduates begin no later than their junior year. A grade of C or better is required in all courses for successful completion of the certificate. GIS topics covered include the nature of geographic data, map projections, raster images, the basic elements of a GIS database, sources of data, and training in the Arc/Info software package. Students also have the option of focusing on remote sensing theory and applications. Remote sensing (RS) topics include image analysis and processing; field validation of satellite and airborne datasets; GPS training; and the use of software packages such as ENVI, Erdas Imagine, ERMapper, and Trimble's Pathfinder Office.

Required core courses
GEOL 1445 - GIS, GPS, AND COMPUTER METHODS or
GEOL 2449 - GIS, GPS, AND COMPUTER METHODS

GEOL 1460 - INTRODUCTION TO REMOTE SENSING

Note

Two elective courses may be chosen that have special relevance to the student's major or employment goals. Appropriate courses will be available from many different departments. Courses not on the following list may be selected contingent on approval by the certificate advisor.

Suggested elective courses

- GEOL 0820 - NATURAL DISASTERS
- GEOL 1030 - THE ATMOSPHERE, OCEANS AND CLIMATE
- GEOL 1060 - GEOMORPHOLOGY
- GEOL 1446 - ADVANCED GEOGRAPHICAL INFORMATION SYSTEM
- GEOL 1960 - FIELD CAMP
- GEOL 2460 - APPLIED REMOTE SENSING AND GPS TECHNIQUES
- GEOL 2640 Advanced Geohazards and Risk Management
- BIOSC 1390 - FIELD TECHNIQUES IN ECOLOGY AND CONSERVATION
- INFSCI 1022 - DATABASE MANAGEMENT SYSTEMS

Independent Study

Students should work with faculty in their primary area of interest to define and develop the capstone project. It must use GIS and/or RS as a major tool and result in a published report, map, or media that describes the results of the research.

- GEOL 1901 - INDEPENDENT STUDY

Additional information and requirements

- A minimum grade of C is required in each course required for this certificate.
- No course that counts toward the certificate can be taken on an S/NC basis unless the student receives special permission from the certificate advisor.

Major

Environmental Science, BS

Environmental science is a multidisciplinary field that focuses on documenting the impacts that people have on our environment, on reducing the harmful effects of these impacts, and on restoring aspects of the environment to benefit both nature and people. Our program focuses on air, water, and the Earth's solid surface, and it includes an emphasis on their interactions with life.

The environmental science degree is a multidisciplinary program that combines physics, chemistry, math, biology, and geology to give you the skills and know-how needed to understand environmental impacts. Careers range from the assessment, remediation, and protection of air and water resources to the restoration of disturbed landscapes to helping to ensure that major industries comply with environmental regulations. In addition, the environmental science program provides fine intellectual training in the tradition of a liberal arts education, which means that you will be exceptionally well-qualified to compete for they diverse jobs on offer at Pitt's career fairs.

The Environmental Science major requires completion of at least 63 credits, as follows.
Core courses required for the major

Core courses

The following two courses should be taken in the same academic term.

- GEOL 0055 - GEOLOGY LABORATORY
- GEOL 0840 - ENVIRONMENTAL SCIENCE

All of the following courses

- GEOL 1015 - GEOLOGY COLLOQUIUM
- GEOL 1030 - THE ATMOSPHERE, OCEANS AND CLIMATE
- GEOL 1445 - GIS, GPS, AND COMPUTER METHODS
- GEOL 1641 - ECOSYSTEM ECOLOGY

One of the following Geochemistry courses

- GEOL 1515 - ENVIRONMENTAL GEOCHEMISTRY
- GEOL 1516 - ENVIRONMENTAL GEOCHEMISTRY WITH LAB

One of the following Water/Hydrology courses

- GEOL 1050 - SURFACE WATER HYDROLOGY
- GEOL 1051 - GROUNDWATER GEOLOGY

One of the following Geomorphology courses

- GEOL 1060 - GEOMORPHOLOGY
- GEOL 1062 - GEOMORPHOLOGY: DYNAMIC EVOLUTION OF EARTH'S SURFACE

One of the following capstone courses

- GEOL 1900 - INTERNSHIP
- GEOL 1903 - UNDERGRADUATE RESEARCH
- GEOL 1910 - UNDERGRADUATE THESIS
- GEOL 1960 - FIELD CAMP

Co-requirements for the major

All of the following courses

- CHEM 0110 - GENERAL CHEMISTRY 1
- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
- PHYS 0174 - BASIC PHYSICS, SCIENCE AND ENGINEERING 1 (INTEGRATED)

Three of the following courses
• BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1
  And one of these associated lab courses:

• BIOSC 0050 - FOUNDATIONS OF BIOLOGY LABORATORY 1
• BIOSC 0057 - FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 1
• BIOSC 0058 - FOUNDATIONS OF BIOLOGY SEA-PHAGES LABORATORY 1
• BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2
  And one of these associated lab courses:

• BIOSC 0060 - FOUNDATIONS OF BIOLOGY LABORATORY 2
• BIOSC 0067 - FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 2
• BIOSC 0068 - FOUNDATIONS OF BIOLOGY SEA-PHAGES LABORATORY 2
• CHEM 0120 - GENERAL CHEMISTRY 2
• MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2
• PHYS 0175 - BASIC PHYSICS, SCIENCE AND ENGINEERING 2 (INTEGRATED)
• STAT 1000 - APPLIED STATISTICAL METHODS

Geology electives

Students must complete nine credits of GEOL at the 1000 level or above. A list of eligible courses follows. Courses indicated by an asterisk (*) are recommended for Environmental Science majors.

• GEOL 0060 - HISTORY OF THE EARTH *
• GEOL 1001 - MINERALOGY *
• GEOL 1003 - IGNEOUS & METAMORPHIC PETROLOGY
• GEOL 1020 - SEDIMENTOLOGY AND STRATIGRAPHY
• GEOL 1045 - STATISTICS FOR EARTH SCIENCE
• GEOL 1050 - SURFACE WATER HYDROLOGY *
• GEOL 1051 - GROUNDWATER GEOLOGY *
• GEOL 1052 - PALEOClimAtOLOGY *
• GEOL 1055 - ENVIRONMENTAL ETHICS
• GEOL 1100 - STRUCTURAL GEOLOGY
• GEOL 1240 - VERTEBRATE PALEONTOLOGY *
• GEOL 1310 Communication in the Geosciences (W)
• GEOL 1312 - ENVIRONMENTAL LAW AND POLICY
• GEOL 1313 - COM ENVIRONMENTAL PROFESSIONALS
• GEOL 1331 - HEALTH AND SAFETY (HAZWOPER)
• GEOL 1333 - SUSTAINABILITY
• GEOL 1336 - ENVIRONMENTAL ISSUES: AIR QUALITY (W)
• GEOL 1338 - ENVIRONMENTAL ISSUES: WATER QUALITY (W)
• GEOL 1340 - ENVIRONMENTAL ISSUES: MINING AND GAS DRILLING ISSUES (W)
• GEOL 1342 - ENVIRONMENTAL ISSUES
• GEOL 1410 - EXPLORATION GEOPHYSICS
• GEOL 1446 - ADVANCED GEOGRAPHICAL INFORMATION SYSTEM *
• GEOL 1460 - INTRODUCTION TO REMOTE SENSING *
• GEOL 1510 - AQUATIC AND SEDIMENTARY GEOCHEMI *
• GEOL 1701 - GEOLOGY OF THE PLANETS
• GEOL 1900 - INTERNSHIP
• GEOL 1901 - INDEPENDENT STUDY
• GEOL 1903 - UNDERGRADUATE RESEARCH
• GEOL 1XXX Other upper-level class in GEOL, approved by the major advisor
• GEOL 2XXX Graduate level GEOL class, instructor permission required

Geology additional requirements

**Grades:** Students must maintain a minimum GPA of 2.0 in departmental courses to graduate with a BS degree in Environmental Science

**Satisfactory/No Credit:** No GEOL course that counts toward the major can be taken on an S/NC basis. No more than two of the non-geological science courses that count toward the major may be taken on an S/NC basis.

**Writing requirement:** Students must complete at least one writing-intensive (W) course in the major.

Environmental Studies, BA

Rapid growth in human population and development has led to complex environmental problems on local and global scales. The way in which we address these issues will have a profound effect on our society and planet in the coming century. Enlightened solutions require a strong component of scientific knowledge and an awareness of the relevant societal issues. A major in environmental studies will equip students with an understanding of earth systems and the environment, including the role of geologic processes on human activity and the impact of humans on the biosphere, atmosphere, hydrosphere, and global climate. Courses in the natural and social sciences supplement a traditional liberal arts curriculum to provide a comprehensive, interdisciplinary background in the scientific, economic, political, and social aspects of human interaction with the environment.

The environmental studies major provides a strong background for students who seek careers in fields such as resource development and management, environmental policy and regulation, risk assessment, land use planning, public policy, and education. Potential employers include local, state, or federal government organizations; consulting firms; or companies that are affected by environmental issues or regulations. Graduates of the Environmental Studies Program can also pursue postgraduate study in fields such as business, law, medicine, public policy, education, international relations, urban and regional planning, environmental management, and public health.

Major Requirements

The major consists of core courses, co-requirements, and electives. The core courses provide a fundamental understanding of environmental processes, issues, and policy and culminate in an environmental science field course and an interdisciplinary capstone course on science and public policy. The co-requirements provide the necessary background for advanced study. Majors are encouraged to undertake an independent research project, internship, or senior thesis.

**Core Geology courses**

• GEOL 0055 - GEOLOGY LABORATORY
• GEOL 0840 - ENVIRONMENTAL SCIENCE
• GEOL 1030 - THE ATMOSPHERE, OCEANS AND CLIMATE
• GEOL 1313 - COM ENVIRONMENTAL PROFESSIONALS (writing course)
• GEOL 1333 - SUSTAINABILITY
• GEOL 1445 - GIS, GPS, AND COMPUTER METHODS

**Legal Studies course**

One of the following courses.

• GEOL 1312 - ENVIRONMENTAL LAW AND POLICY
• LEGLST 1320 - LAW AND ENVIRONMENT

**One of the following Economics courses**
ECON 0100 - INTRODUCTION TO MICROECONOMIC THEORY
ECON 0110 - INTRODUCTION TO MACROECONOMIC THEORY
ECON 0800 - INTRODUCTION TO ECONOMICS

One of the following Reasoning courses

- HPS 0611 - PRINCIPLES OF SCIENTIFIC REASONING
  or
  EOH 2180 Introduction to Risk Sciences and EOH 2181 Risk Assessment Practicum

One of the following Public Policy courses

- GEOL 1055 - ENVIRONMENTAL ETHICS
- GEOL 1056 - UHC ENVIRONMENTAL ETHICS, SCIENCE AND PUBLIC POLICY

Environmental field coursework

At least two credits in the following courses.

- GEOL 1930 - YELLOWSTONE FIELD CLASS
- GEOL 1950 - WYOMING FIELD STUDIES IN ECOLOGY AND PALEONTOLOGY
- BIOSC 1140 - BEHAVIORAL ECOLOGY
- BIOSC 1170 - FRESHWATER ECOLOGY
- BIOSC 1180 - ECOLOGY OF AMPHIBIANS AND REPTILES
- BIOSC 1190 - AQUATIC ENTOMOLOGY
- BIOSC 1230 - ORNITHOLOGY
- BIOSC 1330 - FIELD BOTANY
- BIOSC 1390 - FIELD TECHNIQUES IN ECOLOGY AND CONSERVATION
- BIOSC 1400 - DISEASE ECOLOGY
- BIOSC 1420 - WILDLIFE MANAGEMENT
- BIOSC 1610 - CONSERVATION BIOLOGY

Field course note

This requirement can be satisfied by taking any BIOSC course offered at the Pymatuning Ecology Laboratory or an approved environmental science field course offered through an outside institution. In either case, the substituted course must have a credit value of not less than two credits.

Environmental Internship course

- GEOL 1900 - INTERNSHIP

Co-requirements

- CHEM 0110 - GENERAL CHEMISTRY 1

One of the following Mathematics courses

- MATH 0125 - CALCULUS FOR BUSINESS 1 and
• MATH 0126 - CALCULUS FOR BUSINESS 2
• MATH 0120 - BUSINESS CALCULUS
• MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
• PUBSRV 1110 - FINANCIAL MANAGEMENT IN THE PUBLIC SECTOR
• PUBSRV 1210 - FINANCIAL MANAGEMENT OF NON-PROFIT ORGANIZATIONS

One of the following Statistics courses

• STAT 0200 - BASIC APPLIED STATISTICS
• STAT 1000 - APPLIED STATISTICAL METHODS
• STAT 1100 - STATISTICS AND PROBABILITY FOR BUSINESS MANAGEMENT

Twelve credits of electives in Social Science and Humanities

Students must complete 12 credits in social science and/or humanities courses from the following lists.

Anthropology courses

• ANTH 0582 - INTRODUCTION TO ARCHEOLOGY
• ANTH 0601 - PHYSICAL ANTHROPOLOGY: OVERVIEW
• ANTH 0680 - INTRODUCTION TO PHYSICAL ANTHROPOLOGY
• ANTH 0681 - INTRODUCTION TO HUMAN EVOLUTION
• ANTH 0780 - INTRODUCTION TO CULTURAL ANTHROPOLOGY
• ANTH 1524 - CHINESE ARCHAEOLOGY
• ANTH 1528 - SOUTH AMERICAN ARCHAEOLOGY
• ANTH 1541 - CULTURAL RESOURCE MANAGEMENT
• ANTH 1762 - HUMAN ECOLOGY
• ANTH 1763 - FIELD METHODS

Communication courses

• COMMRC 1149 - ENVIRONMENTAL RHETORIC

Economics courses

• ECON 0360 - INTRODUCTION TO ENVIRONMENT AND RESOURCE ECONOMICS
• ECON 0500 - INTRODUCTION TO INTERNATIONAL ECONOMICS
• ECON 0530 - INTRODUCTION TO DEVELOPMENT ECONOMICS
• ECON 1360 - ENVIRONMENTAL ECONOMICS

English Literature courses

• ENGLIT 0710 - CONTEMPORARY ENVIRONMENTAL LITERATURE
• ENGLIT 0812 - MEDIA/ECOLOGY
• ENGLIT 1005 - LITERATURE AND THE ENVIRONMENT

History courses
- HIST 0700 - WORLD HISTORY
- HIST 1668 - HISTORY OF PITTSBURGH
- HIST 1669 - HISTORY OF BLACK PITTSBURGH
- HIST 1695 - ENVIRONMENTAL HISTORY

History and Philosophy of Science courses

- HPS 0608 - PHILOSOPHY AND SCIENCE
- HPS 0610 - CAUSAL REASONING
- HPS 0620 - SCIENCE AND RELIGION
- HPS 0621 - PROBLEM SOLVING: HOW SCIENCE WORKS
- HPS 1653 - INTRO TO PHILOSOPHY OF SCIENCE

History of Art and Architecture courses

- ARC 0110 - APPROACHES TO THE BUILT ENVIRONMENT

Political Science courses

- PS 1232 - POLITICAL ATTITDE & PUBLIC OPIN
- PS 1235 - MEDIA AND POLITICS
- PS 1261 - AMERICAN PUBLIC POLICY
- PS 1374 - POLITICS OF GLOBAL INEQUALITY
- PS 1538 - THE POLITICS OF OIL AND NATURAL RESOURCES
- PS 1542 - GLOBAL ENVIRONMENTAL POLITICS
- PS 1543 - GLOBALIZATION AND INTERNATIONAL POLITICS

Religious Studies courses

- RELGST 1518 - RELIGION AND ECOLOGY
- RELGST 1519 - RELIGION, NATURE AND ENVIRONMENT
- RELGST 0770 - SCIENCE AND RELIGION

Sociology courses

- SOC 0230 - SOCIAL RESEARCH METHODS
- SOC 0312 - SCIENCE IN SOCIETY
- SOC 1440 - EXPERIENCING GLOBALIZATION
- SOC 1445 - SOCIETY AND ENVIRONMENT

Urban Studies courses

- URBNST 0010 - INTRODUCTION TO URBAN STUDIES
- URBNST 0030 - INTRODUCTION TO GIS
- URBNST 0130 - APPLIED GIS
- URBNST 0050 - INTRODUCTION TO URBAN RESEARCH
- URBNST 0114 - URBAN SUSTAINABILITY
• URBNST 0360 - INTERNATIONAL URBANISM SEMINAR

Business Administration courses

• BUSENV 1701 - ETHICAL LEADERSHIP FUNDAMENTALS
• BUSENV 1765 - LEADERSHIP IN THE SOCIAL ENVIRONMENT

Public and International Affairs courses

• PIA 2115 - ENVIRONMENTAL ECONOMICS
• PIA 2140 - FINANCIAL PRACTICES FOR ECONOMICS AND ENVIRONMENTAL SUSTAINABILITY
• PIA 2164 - NATURAL RESOURCES GOVERNANCE AND MANAGEMENT
• PIA 2388 - INTERNATIONAL LAW AND POLICY
• PIA 2502 - GLOBAL ENVIRONMENTAL POLICY
• PIA 2510 - ECONOMICS OF DEVELOPMENT
• PIA 2520 - FOOD SECURITY: AGRICULTURE & RURAL DEVELOPMENT
• PIA 2522 - GLOBAL ENERGY
• PIA 2715 - GIS FOR PUBLIC POLICY

Public Service courses

• PUBSRV 1230 - FUNDRAISING FOR NON-PROFIT ORGANIZATIONS
• PUBSRV 1300 - LEGAL ISSUES IN PUBLIC SERVICE
• PUBSRV 1310 - DIVERSITY ISSUES IN PUBLIC SERVICE
• PUBSRV 1320 - GEOGRAPHIC INFORMATION SYSTEMS IN THE PUBLIC SERVICE
• PUBSRV 1455 - LAW, ETHICS AND PUBLIC POLICY IN THE MASS MEDIA

Twelve credits of electives in the Natural Sciences and Engineering

Students must complete 12 credits in natural science and/or engineering courses from the following lists.

Students are encouraged to take BIOSC 0150 and BIOSC 0160 because they are prerequisites for the Pymatuning field courses. Students are further encouraged to take the GEOL 1300-level electives.

Biological Sciences courses

• BIOSC 0050 - FOUNDATIONS OF BIOLOGY LABORATORY 1 or
• BIOSC 0057 - FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 1
• BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1
• BIOSC 0067 - FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 2
• BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2
• BIOSC 0350 - GENETICS
• BIOSC 0370 - ECOLOGY
• BIOSC 0390 - ECOLOGY LABORATORY

Chemistry courses

• CHEM 0120 - GENERAL CHEMISTRY 2
• CHEM 0250 - INTRODUCTION TO ANALYTICAL CHEMISTRY
• CHEM 0310 - ORGANIC CHEMISTRY 1
• CHEM 0350 - PRINCIPLES OF ORGANIC CHEMISTRY

Computer Science courses

• CS 0090 - SUSTAINABILITY AND COMPUTING
• CS 0134 - WEB SITE DESIGN AND DEVELOPMENT
• CS 0334 - INTERMEDIATE WEB SITE DESIGN AND DEVELOPMENT
• CS 0590 - SOCIAL IMPLICATIONS OF COMPUTING TECHNOLOGY

Geology and Environmental Science courses

The Department of Geology and Environmental Science strongly encourages students to take listed GEOL courses in the 1300 series and GEOL 1641.

• GEOL 0060 - HISTORY OF THE EARTH
• GEOL 1001 - MINERALOGY
• GEOL 1015 - GEOLOGY COLLOQUIUM
• GEOL 1020 - SEDIMENTOLOGY AND STRATIGRAPHY
• GEOL 1051 - GROUNDWATER GEOLOGY
• GEOL 1052 - PALEOCLIMATOLOGY
• GEOL 1060 - GEOMORPHOLOGY
• GEOL 1100 - STRUCTURAL GEOLOGY
• GEOL 1330 - SUSTAINABILITY FLASH LAB
• GEOL 1331 - HEALTH AND SAFETY (HAZWOPER)
• GEOL 1332 - ENVIRONMENTAL ADVOCACY AND ACTION
• GEOL 1335 - ENVIRONMENTAL ISSUES: AIR QUALITY
• GEOL 1336 - ENVIRONMENTAL ISSUES: AIR QUALITY (W)
• GEOL 1337 - ENVIRONMENTAL ISSUES: WATER QUALITY
• GEOL 1338 - ENVIRONMENTAL ISSUES: WATER QUALITY (W)
• GEOL 1339 - ENVIRONMENTAL ISSUES: MINING AND GAS DRILLING ISSUES
• GEOL 1340 - ENVIRONMENTAL ISSUES: MINING AND GAS DRILLING ISSUES (W)
• GEOL 1341 - ENVIRONMENTAL ISSUES: PARKS AND FORESTS
• GEOL 1342 - ENVIRONMENTAL ISSUES
• GEOL 1410 - EXPLORATION GEOPHYSICS
• GEOL 1446 - ADVANCED GEOGRAPHICAL INFORMATION SYSTEM
• GEOL 1460 - INTRODUCTION TO REMOTE SENSING
• GEOL 1510 - AQUATIC AND SEDIMENTARY GEOCHEMISTRY
• GEOL 1515 - ENVIRONMENTAL GEOCHEMISTRY
• GEOL 1641 - ECOSYSTEM ECOLOGY
• GEOL 1701 - GEOLOGY OF THE PLANETS

Physics courses

• PHYS 0087 - PHYSICS AND SOCIETY
• PHYS 0089 - PHYSICS AND SCIENCE FICTION
• PHYS 0091 - CONCEPTUAL PHYSICS
PHYS 0110 - INTRODUCTION TO PHYSICS 1
PHYS 0174 - BASIC PHYSICS, SCIENCE AND ENGINEERING 1 (INTEGRATED)

Civil and Environmental Engineering courses

• CEE 1210 - ENGR AND SUSTAINABLE DEVELOPMENT
• CEE 1503 - INTRO TO ENVIRONMENTAL ENGRNG
• CEE 1513 - ENVIRONMENTAL ENGRNG PROCESSES
• CEE 1514 - ENVIRONMENTAL IMPACT ASSESSMENT

Other requirements

Grade requirements: A minimum GPA of 2.0 is required in those courses that count toward the major. All core courses, co-requirements, and electives must be passed with a grade of C- or better.

Satisfactory/No Credit option: There is no limit on the number of courses in the major that can be taken on an S/NC basis.

Writing (W) requirement: GEOL 1313 satisfies this requirement for Environmental Studies majors.

Geology, BS

The Geology major requires completion of 67 credits of coursework, distributed as follows.

Major Course Requirements

One of the following

• GEOL 0800 - GEOLOGY
• GEOL 0820 - NATURAL DISASTERS
• GEOL 0860 - ENVIRONMENTAL GEOLOGY

All of the following courses

• GEOL 0055 - GEOLOGY LABORATORY
• GEOL 0060 - HISTORY OF THE EARTH
• GEOL 1001 - MINERALOGY
• GEOL 1003 - IGNEOUS & METAMORPHIC PETROLOGY
• GEOL 1015 - GEOLOGY COLLOQUIUM
• GEOL 1020 - SEDIMENTOLOGY AND STRATIGRAPHY
• GEOL 1100 - STRUCTURAL GEOLOGY
• GEOL 1960 - FIELD CAMP

Geology elective courses

Students must complete three courses (nine credits) of GEOL courses at the 1000 level or above.

Corequirements
CHEM 0110 - GENERAL CHEMISTRY 1
CHEM 0120 - GENERAL CHEMISTRY 2
MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1

MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2 or
MATH 0235 - HONORS 1 - VARIABLE CALCULUS

PHYS 0174 - BASIC PHYSICS, SCIENCE AND ENGINEERING 1 (INTEGRATED)
PHYS 0175 - BASIC PHYSICS, SCIENCE AND ENGINEERING 2 (INTEGRATED)

One of the following

GEOL 1045 - STATISTICS FOR EARTH SCIENCE
MATH 0240 - ANALYTIC GEOMETRY AND CALCULUS 3
MATH 0250 - MATRIX THEORY & DIFFT EQUATIONS
STAT 1000 - APPLIED STATISTICAL METHODS

Geology additional requirements

Grades: Students must maintain a minimum GPA of 2.0 in departmental courses to graduate with a BS degree in Environmental Science.

Satisfactory/No Credit: No GEOL course that counts toward the major can be taken on an S/NC basis. No more than two of the non-geological science courses that count toward the major may be taken on an S/NC basis.

Writing requirement: Students must complete at least one writing-intensive (W) course in the major.

Department of German

The study of second language and culture is a cornerstone of education in today's international world. It teaches intercultural competence by increasing students' understanding of their own backgrounds and their sensitivity for other traditions and values. Knowledge of a second language and culture brings obvious competitive advantages in careers with an international dimension. As a liberal arts discipline, the study of language improves analytic-conceptual and communication skills necessary for all professional careers. Enhanced with appropriate additional course work, a major in German serves as a foundation for professional training in such subjects as business, law, politics, and medicine, as well as the media and communication industry. Students with a BA in German compete well in nontechnical fields for jobs requiring a bachelor's degree. For more information on the major, the minor, the certificate, and the Department of Germanic Languages and Literatures, see www.german.pitt.edu.

Major

German Language and Cultural Studies, BA

Prerequisites

Students must complete the following introductory language courses.

GER 0101 - BEGINNING GERMAN 1
GER 0102 - BEGINNING GERMAN 2

Requirements
The German Language and Cultural Studies major requires completion of 33 to 35 credits distributed as follows. If necessary to fulfill credit requirements, higher-level language courses can be substituted for GER 0201 through GER 0204.

Required language courses

Choose one of the following pairs of courses.

- GER 0201 - INTERMEDIATE GERMAN 1
- GER 0202 - INTERMEDIATE GERMAN 2
- GER 0203 - INTENSIVE INTERMEDIATE GERMAN 1
- GER 0204 - INTENSIVE INTERMEDIATE GERMAN 2

Required writing-intensive course

Students must complete one of the following writing-intensive courses.

- GER 1001 - GERMAN WRITING
- GER 1003 - PROFESSIONAL GERMAN

1000-level course

Students must complete one course at the 1000-level.

Literary analysis course

- GER 1105 - LITERARY ANALYSIS

1100-level courses

Students must complete two courses at the 1100-level.

1200- to 1400-level course

Students must complete one seminar in German at the 1200- to 1400-level.

Additional coursework

Students must complete two additional courses in any of the following groups.

- Any seminar in German at the 1200- to 1400-level.
- A 1500-level course in the Department of German, with some work in German to be arranged with the instructor
- German studies courses in other departments that include a 1-credit trailer in German

Capstone course

Students should take the capstone seminar in the fall term of their senior year.

- GER 1399 - SENIOR CAPSTONE SEMINAR
Additional requirements

**Grade requirements**: A 2.00 GPA is required in each course that counts toward the major.

**Satisfactory/No Credit option**: No course that counts toward the major can be taken on an S/NC basis unless the student receives special permission from the major advisor.

**Writing requirement**: GER 1001 - GERMAN WRITING and GER 1003 - PROFESSIONAL GERMAN fulfill the requirement for a writing course in the major.

**Honors requirements**: To earn departmental honors in German, students must demonstrate superior performance in departmental courses by:

- earning an average GPA of at least 3.5 in their major courses;
- demonstrating a high level of proficiency in speaking and writing German; and
- completing a three-credit senior honors project (in addition to the credits required for the major), which has been accepted by the departmental faculty. Senior honors projects may include:
  - a semester-long, independent research project, as an extension of the senior thesis written during the capstone seminar;
  - taking an exam on a comprehensive reading list derived by the student in consultation with the faculty; or
  - enrolling in a graduate seminar and completing a graduate paper.

Students are encouraged to study and reside in a German-speaking country as a component of the German major. Numerous possibilities exist for such study, and financial aid is often available.

**Interdisciplinary German Studies, BA**

The study of foreign language and culture is a cornerstone of education in today's world. It teaches intercultural competence by increasing students' understanding of their own background and their sensitivity for other traditions and values. Knowledge of foreign language and culture brings obvious competitive advantages in careers with an international dimension. As a liberal arts discipline, it improves analytic-conceptual and communication skills necessary for professional careers. Enhanced with appropriate course work, a major in German serves as a foundation for professional training in such subjects as business, law, politics, and medicine, as well as the media and communication industry. Students with a bachelor's degree in German will compete well in non-technical fields for jobs requiring an undergraduate degree.

**Required language courses**

Students must take a minimum of four language courses and finish Intermediate German 2 as described. Equivalency of other courses will be determined by the department.

- GER 0101 - BEGINNING GERMAN 1
- GER 0102 - BEGINNING GERMAN 2

And one of the following groups of language courses.

- GER 0103 - BEGINNING GERMAN 3
- GER 0201 - INTERMEDIATE GERMAN 1
- GER 0202 - INTERMEDIATE GERMAN 2

- GER 0203 - INTENSIVE INTERMEDIATE GERMAN 1
- GER 0204 - INTENSIVE INTERMEDIATE GERMAN 2

**Required writing-intensive course**

Select one of the following writing-intensive courses.
• GER 1001 - GERMAN WRITING
• GER 1003 - PROFESSIONAL GERMAN

1000-level course

Students must complete one course at the 1000-level in the Department of German.

Literary analysis course

• GER 1105 - LITERARY ANALYSIS

1100- to 1400-level courses

Students must complete three courses at the 1100- to 1400-level in the Department of German.

1500-level courses

Students must complete four courses at the 1500-level in the Department of German. Courses with significant German Studies content offered by other departments may also satisfy this requirement. Check with the undergraduate advisor for information on non-departmental courses that qualify.

Capstone course

• GER 1990 - SENIOR THESIS

Other requirements

Grade requirements: A minimum GPA of 2.0 is required in each course that counts toward the major.

Satisfactory/No Credit option: No course that counts toward the major can be taken on an S/NC basis unless the student receives special permission from the major advisor.

Writing (W) requirement: Students must complete at least one W-course in the major. GER 1001 and GER 1003 fulfill this requirement.

Honors major requirements: To earn departmental honors in German, students must demonstrate superior performance in departmental courses by:

• earning at least a 3.5 GPA average in their major courses;
• demonstrating a high level of proficiency in speaking and writing German; and
• completing a three-credit senior honors project (in addition to 31 credits of the major) that has been accepted by the departmental faculty. Senior honors projects may include:
  • a semester-long, independent research project, as an extension of the senior thesis written during the capstone project; or
  • taking an exam on a comprehensive reading list derived by the student in consultation with the faculty; or
  • enrolling in a graduate seminar and completing a graduate paper.

Minor

German Minor
The German minor requires 15 credits of coursework to complete. Students interested in the minor may tailor their course selection according to their interest in German language, literature, and film studies, but must complete at least two 3-credit courses taught in German.

Required Courses

Students pursuing this minor will take two courses that instruct them in the vocabulary and proper use of the German language. These courses will be taught in German.

Additionally, students will take three courses that focus on German language and culture. Courses in this group may be taught in German or in English.

- GER 0101 - BEGINNING GERMAN 1
- GER 0102 - BEGINNING GERMAN 2
- GER 0103 - BEGINNING GERMAN 3
- GER 0201 - INTERMEDIATE GERMAN 1
- GER 0202 - INTERMEDIATE GERMAN 2
- GER 0203 - INTENSIVE INTERMEDIATE GERMAN 1
- GER 0204 - INTENSIVE INTERMEDIATE GERMAN 2
- GER 0205 - CONVERSATION 1
- GER 0206 - CONVERSATION 2
- GER 1000 - READING LITERARY TEXTS
- GER 1001 - GERMAN WRITING
- GER 1003 - PROFESSIONAL GERMAN
- GER 1004 - THE GERMAN BUSINESS (ECO)SYSTEM
- GER 1005 - GERMAN MEDIA
- GER 1051 - INTRODUCTION TO LITERARY ANALYSIS
- GER 1101 - GERMAN MEDIA 2
- GER 1102 - THE GERMAN-SPEAKING WORLD TODAY
- GER 1103 - ADVANCED GERMAN 2: CREDIT LABORATORY
- GER 1104 - GERMAN FOR SOCIAL SCIENTISTS 1
- GER 1105 - LITERARY ANALYSIS
- GER 1106 - GERMAN CULTURAL HISTORY
- GER 1108 - GREEN GERMANY
- GER 1204 - GERMAN FOR SOCIAL SCIENTISTS 2
- GER 1220 - LITERATURE AND CULTURE 1750-1830
- GER 1234 - LITERATURE AND CULTURE 1890-1918
- GER 1252 - CURRENT LITERATURE AND CULTURE
- GER 1324 - SPECIAL TOPICS IN GERMAN PROSE
- GER 1350 - GERMAN DRAMA
- GER 1390 - MINORITIES IN POST-WAR GERMANY
- GER 1399 - SENIOR CAPSTONE SEMINAR
- GER 1409 - EUROPEAN INTELLECTUAL HIST 2 1870-1940
- GER 1410 - KAFKA AND THE MODERN WORLD
- GER 1500 - GERMANIC MYTHS, LEGENDS AND SAGAS
- GER 1502 - INDO-EUROPEAN FOLKTALES
- GER 1503 - INDO-EUROPEAN FOLKTALES WRITING PRACTICUM
- GER 1504 - EUROPEAN IDENTITY BETWEEN HISTORY AND EUROPEAN UNION CULTURAL POLICY
- GER 1510 - KAFKA AND THE MODERN WORLD
- GER 1512 - GERMAN LITERATURE AND EUROPEAN PHILOSOPHY: GOETHE'S FAUST
German Language Certificate

The German Language certificate demonstrates proficiency in German above the level of the German minor. It prepares students for international careers, internationally recognized proficiency exams (Zertifikat Deutsch als Fremdsprache and Zertifikat Deutsch fur den Beruf), and internship programs in German-speaking countries.

The certificate offers two tracks - one in the liberal arts and one for professional purposes. In both tracks, students must earn 18 credits in German beyond GER 0002 - ELEMENTARY GERMAN 2. Nine credits may be transferred from study abroad programs in German-speaking countries to count toward the 18 total credits.

The courses that apply to the certificate should be taken in sequence as listed.

German for the Liberal Arts

Students in this track should take the following courses in the order indicated below.

- GER 0003 - INTERMEDIATE GERMAN 1
- GER 0004 - INTERMEDIATE GERMAN 2 with a minimum grade of B- before taking any course in the GER 1000-level experience

Two 1000-level courses

Students pursuing this track will take two 1000-level courses in the Department of German. Students may take GER 1001 - GERMAN WRITING or GER 1003 - PROFESSIONAL GERMAN as one of these courses, but they may not take both courses to count toward the certificate.

- GER 1000 - READING LITERARY TEXTS
- GER 1001 - GERMAN WRITING
One 1100-level course

Students pursuing this track will take any 1100-level course in the Department of German.

- GER 1101 - GERMAN MEDIA 2
- GER 1102 - THE GERMAN-SPEAKING WORLD TODAY

One 1200- to 1400-level course

Students pursuing this track will take one course at the 1200-level to 1400-level in the Department of German.

German for Professional Purposes

Required courses

- GER 0003 - INTERMEDIATE GERMAN 1
- GER 0004 - INTERMEDIATE GERMAN 2
- GER 1003 - PROFESSIONAL GERMAN
- GER 1004 - THE GERMAN BUSINESS (ECO)SYSTEM

Two 1000-level or 1100-level courses

Students pursuing this track must complete two additional courses at the 1000-level or 1100-level in the Department of German. GER 1001, GER 1003, GER 1004, and GER 1103 do not fulfill this requirement.

German Certificate note

Nine credits may be transferred from study abroad programs in German-speaking countries in accordance with the credit transfer policy of the University of Pittsburgh. These credits have to be pre-approved by the director of undergraduate studies.

A minimum GPA of 2.0 is required in each course that counts toward the certificate. No course that counts toward the certificate can be taken on an S/NC basis unless the student received special permission from the Director of Undergraduate Studies.

For more information, visit www.german.pitt.edu/undergraduate/certificate.php

Department of Hispanic Languages and Literatures

The study of a second language, literature, and culture like Spanish traditionally has been one of the central components of an undergraduate education in the humanities. Today there is an added practical dimension to this. With economic and cultural globalization, our links as a nation with Spain and Latin America, including Brazil, have become much closer. At the same time, Spanish is not only a second language for us; it has become much like French in Canada, a de facto second language in the United States, which now has a Spanish-speaking population of more than 30 million. As a result, there is a growing demand for persons trained in Spanish (and also Portuguese) in many fields, especially education, where there is a shortage of new teachers of Spanish language and culture.

The undergraduate major in Spanish at the University of Pittsburgh offers a balanced combination of courses designed to strengthen oral and written language skills, and courses that introduce students to the study of Spanish and Latin American literatures and cultures. Majors also have the opportunity to enroll in the minor in Portuguese Language and Luso-Brazilian cultures, thereby opening channels of communication with millions of people around the world, including Brazil, Latin America's largest and most heavily populated country. Students with a more general interest in Latin American languages and cultures can choose to minor in Hispanic Languages and Literatures.

In all cases, we encourage students to include at least a semester of study abroad in a Spanish- or Portuguese-speaking country and we offer study-abroad programs. Students interested in going on to graduate school should strongly consider the honors major; those who want to teach Spanish can
obtain teacher certification through the School of Education. The department also offers courses taught in English for non-majors interested in Hispanic, Latin American, Luso-Brazilian, or U.S. Latino cultures. Students can also take advantage of the non-curricular activities organized by the department, which include conversation clubs and films series.

**Departmental Honors requirements**

Especially for students interested in graduate work, the department offers honors in the major, which requires:

- a 3.5 average in departmental courses and 3.0 overall
- a senior thesis of 25-30 pages, written under the supervision of a faculty member close to the field of the thesis
- at least a semester of study abroad is strongly recommended but not required

Students should declare their intention to pursue the honors major no later than at the beginning of their senior year. The thesis will be evaluated by the advisor and two other faculty members in the department. Students may take an independent study with their supervisor that will fulfill the requirement of one upper level course. For further information, consult with the director of undergraduate studies.

**Teacher Certification**

Students who plan to teach Spanish after completing the major should consult with their advisor or the director of undergraduate studies in the department, as well as with the advisors for Pennsylvania Teaching Certification and Masters of Arts in Teaching Programs in the School of Education (Maggie Sikors, mjs 169@pitt.edu, 5504 Posvar Hall, 412-648-7413).

**Study Abroad Options for Majors in the Hispanic Languages and Literatures Department**

Students are strongly encouraged to add an international dimension to their undergraduate education through studying abroad. By participating in a study abroad program, students earn credits toward their degree. The department offers four programs that are matched directly with major and minor requirements. Information on some of the programs follow.

Study abroad is strongly encouraged. The department offers four programs that are matched directly with major and minor requirements. Information on some of the programs follow.

- Study abroad in Alcalá de Henares, Spain (30 minutes from Madrid) runs every odd-numbered year; for more information, send an e-mail to alcala@pitt.edu.
- Study abroad in Santiago de Chile runs every even-numbered years; for more information, send an e-mail to chile@pitt.edu.
- Study abroad in Porto Alegre, Brazil runs every year; for more information, send an e-mail to brazilsa@pitt.edu.
- Study abroad in Havana, Cuba runs every year; for more information, contact the Study Abroad Office (www.abroad.pitt.edu) via e-mail abroad@pitt.edu or by phone at 412-648-7419.

**Major**

**Spanish, BA**

The undergraduate program in Hispanic Languages and Literatures at the University of Pittsburgh is designed to be flexible and diverse in order to meet the needs of students with varying interests and career goals. The major offers a balanced combination of courses designed to strengthen oral and written Spanish language skills and courses that introduce students to the study of Spanish and Latin American literatures and cultures. Majors also have the opportunity to enroll in the minor in Portuguese Language and Luso-Brazilian Culture, thereby opening channels of communication with millions of people around the world, including Brazil, Latin America's largest and most heavily populated country. Students with an interest in
Latin American languages and cultures can chose to minor in Spanish. In all cases, we encourage students to include at least one semester of study abroad in a Spanish- or Portuguese-speaking country. Students interested in going to graduate school should consider the honors major; those who want to teach Spanish can obtain a teacher certification through the School of Education. The department offers courses taught in English for non-majors interested in Hispanic, Latin American, Luso-Brazilian, or U.S. Latino cultures. Finally, students can take advantage of the non-curricular activities organized by the department, which include conversation clubs and films series.

Major requirements

Prerequisites

Before declaring the major, students must complete four Spanish language courses in order to gain the indispensable skills to effectively read, write and discuss in a second language. Students with any previous knowledge of Spanish must take a placement test. Please note that a grade of B+ or higher in SPAN 0104 is required to declare the major. The Spanish major requires students to complete 38 credits of coursework as detailed below.

Required Courses

Basic Level

- SPAN 0120 - CONVERSATION
- Either SPAN 0125 - GRAMMAR AND COMPOSITION or SPAN 0126 - SPANISH ADVANCED GRAMMAR AND COMPOSITION FOR HERITAGE SPEAKERS
- Either PORT 0101 - ELEMENTARY PORTUGUESE 1 or PORT 1010 - PORTUGUESE FOR SPANISH SPEAKERS

Mid Level

All of the following courses are required. SPAN 1055 meets the writing requirement. PORT 0101 cannot be used to meet requirements for the Spanish major and the Portuguese and Luso-Brazilian minor.

- Either SPAN 1055 - INTRODUCTION HISPANIC LITERATURE 1 or SPAN 1056 - READING, WRITING, & HEALTH IN SPANISH
- SPAN 1250 - HISPANIC CIVILIZATIONS
- Either SPAN 1260 - OVERVIEW OF SPANISH LITERATURE or SPAN 1280 - OVERVIEW OF LATIN AMERICAN LIT
- SPAN 1300-level course
- One additional SPAN course at the 1200-level or 1300-level

Upper Level

- SPAN 1806 - CAPSTONE SEMINAR

Three electives

Students must complete three upper-level elective courses from the 1400, 1600, and/or 1700 series. These courses address topics such as colonial literatures and cultures; the Latin American novel; U.S.-Latino literature and film; the African presence in Hispanic literature and culture; Queer Mexico; the Incas.

PORT 0102 - ELEMENTARY PORTUGUESE 2 may be used to meet this requirement only if the student is pursuing the Portuguese and Luso-Brazilian minor.
Additional information and requirements

- **W requirement**: Spanish majors must complete one writing-intensive (W) course in the major. The following courses satisfy this requirement.
  - SPAN 1055 - INTRODUCTION HISPANIC LITERATURE 1
  - SPAN 1056 - READING, WRITING, & HEALTH IN SPANISH
- **Grade requirements**: Students must maintain an average GPA of 2.0 or above in all department courses. No courses with a grade of C- or lower will count toward the major.
- **Satisfactory/No-Credit option**: Majors may take one required course on an S/NC basis.
- **Language of instruction**: Spanish majors can take up to one course offered by the department that is taught in English. In order to have it count toward minor requirements, written assignments must be submitted in Spanish.
- **Study Abroad**: At least one term of study abroad is recommended.
- **Credits in residence**: To complete the Spanish major, students are required to take at least half of the credits required for the major while in residence in the Dietrich School.
- **Placement into language courses**: For the Spanish placement test, please contact the Spanish Language Coordinator, Dolores Lima, dlima@pitt.edu. For the Portuguese placement test, please contact the Portuguese Language Coordinator, Ana Paula Carvalho, apcst11@pitt.edu.
- **Credit by examination**: Students may receive credit by examination for some Spanish language courses. Similar credits may be earned in Portuguese.

Double majors, dual degrees and CLAS certificates

Students who have declared an additional major or pursue a dual degree need to take only three of the four upper-level courses. The same rule applies to students taking the CLAS Field Trip to Latin America. Only one course reduction applies if a student meets more than one of these criteria.

Minor

**Hispanic Language and Culture Minor**

The Hispanic Language and Culture minor will prepare students for graduate studies, professional studies, and work, it will prepare students to take Hispanic linguistics and advanced cultural and social courses that apply to the region. It requires fewer literary courses than the traditional Spanish minor while helping students to sharpen their communication skills and cultural understanding.

This minor requires 18 credits for completion. At least half of the credits for the minor, including no fewer than one upper-level course, must be taken on the Pittsburgh campus.

Core courses

- SPAN 0120 - CONVERSATION
- Either  SPAN 0125 - GRAMMAR AND COMPOSITION or  SPAN 0126 - SPANISH ADVANCED GRAMMAR AND COMPOSITION FOR HERITAGE SPEAKERS
- SPAN 1250 - HISPANIC CIVILIZATIONS
- SPAN 1312 - OVERVIEW OF SPANISH LINGUISTICS

Upper-level required course

One course from the following list.
• SPAN 1056 - READING, WRITING, & HEALTH IN SPANISH
• Any 1300-level SPAN course

Upper level elective course

Students must complete one additional upper-level course from the 1400-, 1600-, or 1700-series. The department prefers that students choose courses identified as having a focus on culture or cultural studies rather than a literary emphasis.

Additional requirements and information

Language of Instruction

Students pursuing the Hispanic Language and Culture minor can take up to one course offered by the department that is taught in English. In order to have it count toward minor requirements, however, written assignments must be submitted in Spanish.

Credits in Residence

To complete the Hispanic Language and Culture minor, students are required to take in residence at the University of Pittsburgh a minimum of nine credits of the 18 required for the minor. One upper level elective must be included in these nine credits.

Grade Requirements

Students must maintain an average grade of C or higher in all department courses. No course with a grade below C will count toward minor requirements.

Satisfactory/No Credit Grade Option

No course that counts toward this minor may be taken on the Satisfactory/No Credit (S/NC) grade basis.

Portuguese and Luso-Brazilian Culture Minor

Students interested in studying the Portuguese language and the cultures of Brazil and other Portuguese-speaking countries can enroll in the minor in Portuguese Language and Luso-Brazilian cultures. This course of study opens channels of communication with millions of people around the world, including Brazil, Latin America's largest and most heavily populated country. The department encourages students to include at least one semester of study abroad in a Portuguese-speaking country. The department offers courses taught in English for students interested in Hispanic, Latin American, Luso-Brazilian, or U.S. Latino cultures.

Students must complete at least 15 credits of coursework, described as follows, to complete the minor.

Required courses

• Either PORT 0101 - ELEMENTARY PORTUGUESE 1 or
• PORT 1010 - PORTUGUESE FOR SPANISH SPEAKERS 1
• PORT 0102 - ELEMENTARY PORTUGUESE 2
• PORT 0103 - INTERMEDIATE PORTUGUESE 3
• PORT 0104 - INTERMEDIATE PORTUGUESE 4
• PORT 0120 - CONVERSATION
• PORT 0125 - GRAMMAR AND COMPOSITION
• PORT 1052 - LUSO-BRAZILIAN LITERATURE
• PORT 1053 - LUSO-BRAZILIAN TOPICS
• PORT 1061 - SURVEY OF BRAZILIAN LITERATURE
PORT 1458 - CULTURES OF THE PORTUGUESE SPEAKING WORLD

Additional Requirements

Declaring the minor

Students must apply for any official minor they will complete or have completed at the time they apply for graduation. Students must complete at least half of the credits toward these minors while enrolled in the Dietrich School of Arts and Sciences at the University of Pittsburgh.

Grade requirements

Students must maintain a minimum GPA of 2.0 or higher in departmental courses. No course with a grade below C will count toward the major requirements.

Placement

If a student places out of a required course for the minor, the student will need to take the equivalent number of credits in additional mid- or upper-level Spanish courses in order to meet minimum credit requirements.

Additional Information

Study Abroad

The department offers programs in Buenos Aires, Argentina; Alcalâ de Henares, Spain; Havana, Cuba; and Lisbon, Portugal. For more information please visit the Study Abroad Office website at http://www.abroad.pitt.edu/ or by phone 412-624-7413.

Spanish writing center

This center provides free, individual help to students enrolled in language, grammar and literature courses. Students may also stop by to practice their conversational skills. The Spanish Writing Center, located in CL 1302-B, is staffed by TAs and/or TFs from the department. The center will be open from September to May; schedules are announced at the beginning of each fall and spring term.

Spanish and Portuguese clubs

These two clubs will offer activities throughout the academic year. Check the department's Web site for details about Mesas de conversación, Movie Nights, and Brazil Nuts events.

Spanish Minor

Before declaring the Spanish minor, students must complete four Spanish language courses in order to gain indispensable skills to effectively read, write, and discuss in a foreign language. Students with previous Spanish experience are encouraged to take a placement exam. Students must earn a grade of B+ or higher in SPAN 0004 to declare this minor.

Prerequisite courses

- SPAN 0001 - ELEMENTARY SPANISH 1
- SPAN 0002 - ELEMENTARY SPANISH 2
- SPAN 0003 - INTERMEDIATE SPANISH 3
- SPAN 0004 - INTERMEDIATE SPANISH 4

Required courses
SPAN 0120 - CONVERSATION

Either SPAN 0125 - GRAMMAR AND COMPOSITION or

SPAN 0126 - SPANISH ADVANCED GRAMMAR AND COMPOSITION FOR HERITAGE SPEAKERS

SPAN 1250 - HISPANIC CIVILIZATIONS

And one of the following courses.

SPAN 1055 - INTRODUCTION HISPANIC LITERATURE 1

SPAN 1056 - READING, WRITING, & HEALTH IN SPANISH

SPAN 1260 - OVERVIEW OF SPANISH LITERATURE

SPAN 1280 - OVERVIEW OF LATIN AMERICAN LIT

Two of the following courses

• Any SPAN 1400-level course
• Any SPAN 1600-level course
• Any SPAN 1700-level course

Department of History

Historians use methods, techniques, and ideas from a wide range of humanistic and social scientific fields to teach students how materials from many fields are integrated to describe or explain a particular historical time period or topic. History is an open-ended discipline, and the department welcomes students, as well as ideas and techniques, from other subjects. History also gives a student many options for a future career. Many history majors have become lawyers, journalists, civil servants, and business executives. The future of a history major is not limited to college or school teaching, although these are also available career choices. Expanding opportunities are to be found in public and private agencies, in businesses, archives, historical societies, museums, and government offices. History courses may help students to develop a balanced program that will further their career and intellectual goals. Courses in economics and history could lead to an understanding of economic development and aid a business or civil service career; a combination of language, literature, and history would give a student background that could lead to a career in foreign service or teaching; a mixture of communication and writing with history might prepare one for a career in journalism. In short, students in practically any field can investigate questions that are intellectually exciting and personally helpful by taking history courses related to their programs and ambitions.

For more information on the major, the minor, or the Department of History, visit http://www.history.pitt.edu/.

Certificate

Sport Studies Certificate

The Sport Studies Certificate offers Pitt students the opportunity to engage, learn, and think critically about sport as part of the human experience from multidisciplinary approaches. Students will learn how sport shapes economies, politics, world history, health, science and social life. In a city that often tells its story to the world through sport, and at a university that has been center stage in the nation's sporting history, many students seek to forge careers in sport. This certificate will enhance their understanding of sport-its evolution, complexities, and potential-so that their eyes are wide open if sport is part of their future. Some students will work on the business side of sport or in its collegiate, scholastic, and amateur infrastructure, or as lawyers, journalists, producers, physical therapists, medical clinicians, athletic department staff, and researchers. Others will enter the burgeoning arena of sport for development and peace or take this knowledge back to their communities. Still more are fascinated by sport and study its history, literature, economics, kinesiology, and the like for the sake of that knowledge. This certificate will better prepare students for working in a sport-related field, help them stand out in seeking such employment, and deepen their understanding of something that matters to them.

The certificate program requires at least 18 credits, described as follows.

Gateway Course

Select one course from the following list. These courses offer an expansive, multi-disciplinary overview of sport.

• ANTH 0710 - SPECIAL TOPICS IN CULTURAL ANTHROPOLOGY
• HIST 1082 - WOMEN, GENDER AND SPORT
• HIST 1083 - HISTORY OF SPORTS

Foundational Course

Select one course from the following list.

• ANTH 0780 - INTRODUCTION TO CULTURAL ANTHROPOLOGY
• GSWS 0100 - INTRODUCTION TO GENDER, SEXUALITY, AND WOMEN'S STUDIES
• HIST 0601 - UNITED STATES 1865-PRESENT
• HIST 1645 - AMERICAN ECONOMIC HISTORY
• HIST 1661 - GENDER AND SEXUALITY IN THE US SINCE 1865
• HIST 1685 - U.S. POPULAR CULTURE
• SOC 0005 - SOCIETIES
• SOC 0460 - RACE AND ETHNICITY

Elective Sport-Related Courses

Select four courses from the following list. After one Gateway course is taken, other Gateway courses can be taken to meet the Elective requirement. After the Foundational course is taken, other Foundational courses may not be counted toward the elective requirement. Gateway courses are indicated by an asterisk (*).

• AFRCNA 0120 - AFRICAN AMERICAN EXPERIENCE SPORTS
• ANTH 0711 - THE INTRODUCTION TO THE ANTHROPOLOGY OF SPORT *
• ANTH 1744 - ANTHROPOLOGY OF THE OLYMPICS
• ANTH 1746 - THE OLYMPICS & IDENTITY - RACE, GENDER, ETHNICITY & THE NATION STATE

• CLASS 0032 - ATHLETICS OF THE ANCIENT WORLD or
• HIST 1746 - ATHLETICS OF THE ANCIENT WORLD

• ECON 0460 - SPORTS ECONOMICS

• ENGFLM 0585 - TECHNOLOGIES OF THE BODY or
• FMST 0790 - TECHNOLOGIES OF THE BODY

• ENGWRT 1393 - SPORTS WRITING
• FMST 1885 - BROADCASTING
• GSWS 0200 - SEX, RACE, AND POPULAR CULTURE
• GSWS 1130 - GENDERED BODIES
• HIST 1082 - WOMEN, GENDER AND SPORT *
• HIST 1083 - HISTORY OF SPORTS *
• HIST 1095 - SPORT AND GLOBAL CAPITALISM
• PHIL 1319 - ETHICS AND SPORT
• PS 1220 - SPORTS AND AMERICAN POLITICS
• RELGST 1428 - RELIGION AND SPORTS
• SOC 0465 - SOCIOLOGY OF SPORTS

Additional information
Internship credit

One three-credit internship may take the place of one elective course, pending approval by certificate oversight committee.

Grade Requirements

A minimum GPA of 2.0 is required for all courses that count toward the certificate.

Satisfactory/No Credit Option

Any number of courses that count toward this certificate may be taken on the S/NC basis.

For more information

If you have questions about the certificate or would like more information, email SportStudies@Pitt.edu.

Major

History, BA

Major Requirements

The History major requires completion of 36 credits, 18 of which must be at the 1000-level, distributed as follows.

Pre-1800 history course

Complete one course in pre-1800 history. A partial list of eligible courses follows.

- HIST 0089 - MAGIC, MEDICINE AND SCIENCE
- HIST 0100 - WESTERN CIVILIZATION 1
- HIST 0400 - EAST ASIAN CIVILIZATION TO 1800
- HIST 0500 - COLONIAL LATIN AMERICA
- HIST 0751 - ANCIENT WORLDS
- HIST 0755 - RELIGION IN ASIA
- HIST 0756 - INTRODUCTION TO ISLAMIC CIVILIZATION
- HIST 0788 - WOMEN AND MEN IN ANCIENT MEDITERRANEAN SOCIETY
- HIST 0795 - HISTORY OF AFRICA BEFORE 1800
- HIST 1110 - MEDIEVAL HISTORY 1
- HIST 1111 - MEDIEVAL HISTORY 2
- HIST 1115 - THE WEST AND THE WORLD
- HIST 1121 - TUDOR ENGLAND
- HIST 1190 - MEDIEVAL GOVERNMENT AND SOCIETY
- HIST 1191 - ENGLISH ORIGINS OF AMERICAN LAW
- HIST 1420 - ANCIENT CHINA
- HIST 1422 - LATE IMPERIAL CHINA
• HIST 1475 - EAST ASIAN BUDDHISM
• HIST 1476 - RELIGION AND HEALING IN CHINA
• HIST 1477 - RELIGION IN JAPAN
• HIST 1610 - UNITED STATES COLONIAL
• HIST 1611 - AMERICAN REVOLUTION 1763-1791
• HIST 1740 - BUDDHIST MEDITATIVE TRADITIONS
• HIST 1757 - RELIGION IN INDIA
• HIST 1765 - ISRAEL IN THE BIBLICAL AGE
• HIST 1775 - ORIGINS OF CHRISTIANITY
• HIST 1776 - VARIETIES OF EARLY CHRISTIANITY
• HIST 1781 - ROMAN HISTORY
• HIST 1783 - GREEK HISTORY

U.S. History survey course

Choose one of the following courses.

• HIST 0600 - UNITED STATES TO 1877
• HIST 0601 - UNITED STATES 1865-PRESENT
• HIST 0670 - AFRICAN AMERICAN HISTORY TO 1877
• HIST 0671 - AFRICAN AMERICAN HISTORY SINCE 1865

Global Understanding

Complete one course each in four of the following six categories.

• Africa
• Asia
• Europe
• Latin America
• Middle East
• World/Comparative

Concentration

Three additional courses are to be selected by the student with the help of a faculty member or the undergraduate advisor to form a chronological, geographic, or thematic concentration, which should normally be decided upon by the junior year.

Skills

Each student must take the following sequence of two courses.

An upper-level writing-intensive (W) course may be substituted for HIST 1001. The alternate course should be taken as soon as practicable. HIST 1001 must be taken before enrolling in HIST 1000.

• HIST 1001 - INTRODUCTORY SEMINAR
• HIST 1000 - CAPSTONE SEMINAR

Elective History course
Complete any course offered by the Department of History.

Notes

The following rules and requirements apply for history majors.

- Students must earn at least a 2.00 overall GPA in history courses.
- Majors may take a total of nine credits for the major on an S/NC basis. HIST 1000 - CAPSTONE SEMINAR or HIST 1001 - INTRODUCTORY SEMINAR may not be taken S/NC.
- History majors are strongly encouraged to add an international dimension to their undergraduate education by studying abroad.
- Students interested in graduate study in history should be aware that all graduate departments of history require proficiency in at least one second language and that many require competence in two languages for a PhD.
- The honors program consists of the regular major plus six extra credits. Honors students must take the following courses.
  - One University Honors College course in History, which may count toward another requirement for the major (e.g. Global Understanding or the Concentration).
  - HIST 1902 - WRITING: HISTORY HONORS SEMINAR (instead of HIST 1000; this course is offered only in the fall term)
  - HIST 1901 - INDEPENDENT STUDY
  - HIST 1903 - HONORS THESIS/MAJORS; students in this course write a paper of 25 to 50 pages

Students may apply for the honors program in their sophomore year and upon completion of at least 12 credits in history. To apply, students must have a minimum 3.5 GPA in history courses, an overall GPA of at least 3.35, and submit a writing sample for approval by the Undergraduate Committee. The minimum letter grade requirement for honors students is B.

**Internships for History Credit**

History majors may do an internship for 3 credits (HIST 1900) in a local museum in either the fall or spring semesters. Contact the history academic advisor for information.

**Study Abroad**

Each year the department offers a scholarship for study abroad. Applications for the A. J. Schneider Award are due by February each year. Contact the history undergraduate advisor for more information.

**Minor**

**History Minor**

This minor requires 15 credits to complete, as detailed below. At least three of the required courses must be taken on the Pittsburgh campus.

**Minor Requirements**

Students pursuing the History minor should select one of the options described below. The department recommends selecting courses in consultation with the departmental advisors.

**Option 1: Regional**
Lower-level courses

Complete any two HIST survey courses in the 0000- through 0900-series.

Upper-level courses

Complete three upper-level courses on a regional area covered in one of the two lower-level courses. These courses will be chosen in consultation with the departmental advisor.

Option 2: Global

Lower-level courses

Complete any two HIST survey courses in the 0000- through 0900-series.

Upper-level courses

Complete three upper-level courses from three of the categories listed in Global Understanding described in the History major. These courses will be chosen in consultation with the departmental advisor.

Option 3: Thematic

Lower-level courses

Complete any two HIST survey courses in the 0000- through 0900-series.

Upper-level courses

Complete three upper-level courses that constitute a thematic concentration. These courses will be chosen in consultation with the departmental advisor.

Department of History of Art and Architecture

Art, like science or language, is an intrinsically human way of organizing our experience of the world. Because it appeals to a fundamental sense of order, art can speak to us with immediacy even without knowledge of the purposes for which it was created and the particular principles or order adhered to by the artists of a given culture. Still deeper understanding may follow, however, from an awareness of these purposes and principles, and courses in art history are concerned with the study of art and architecture as cultural documents of the values and ideals of various cultures. Art history offers an opportunity to consider objects and environments that have been created in response to some of humanity's loftiest and most basic aims. The requirement that these visual expressions be analyzed and evaluated in the medium of words makes art history a rewarding area of humanistic study. The major in the history of art and architecture offered by the HAA department helps prepare individuals for careers calling for skills in writing, where description and analysis play important roles, as well as for careers more immediately related to art, such as those of critic, teacher, librarian, art administrator, or museum or gallery staff member.

The architectural studies major, also administered by the HAA department, offers a curriculum devoted to the study of human-made environments. The major components include history of architecture, studio arts, and a core curriculum that includes a survey of the history of architecture, the history of architecture theory, a professional internship, and a portfolio. The degree is suitable for a wide variety of careers and professions including the design and construction of the built environment, such as landscape architecture, interior design, restoration, historic preservation, real estate development, and contracting. These interests can be categorized in two groups:
• The preprofessional studies category prepares students for graduate professional training in any of the environmental design fields (architecture, interior design, landscape design, urban planning, and preservation). Students are able to explore a professional interest while acquiring a liberal arts education.

• The nonprofessional studies category is for students not interested in becoming professional architects. This program offers a rigorous curriculum that assists students in exploring their interest in environmental arts and criticism and provides an understanding of the environment's integral relationship with society and culture. Students of both categories should be fully aware that this degree in architectural studies does not in itself constitute professional or technical training. Students seeking recommendations to graduate professional programs in architecture must complete a number of natural science courses in addition to those focused on architecture and design. Proficiency in calculus is required for students seeking a career in architecture. The department strongly recommends that students successfully complete at least one term of college level calculus (MATH 0220 or equivalent) before graduation.

For more information on these majors and the History of Art Architecture department, see www.haa.pitt.edu.

Architectural Studies Major

This major offers students two options - the Design track and the Preservation Track.

Certificate

Digital Studies and Methods Certificate

The DSAM undergraduate certificate is designed to guide students through the process of gaining their own, deeply engaged, understanding of the ways in which digital technologies affect their lives on a daily basis. It also offers an approach to learning how to take these tools up—mindfully and intentionally—into the students’ broader academic and career-focused practices.

Program Requirements

• ARC 1183 - DIGITAL ROMAN AFRICA: VISUALIZING ARCHITECTURE AND URBANISM IN ROMAN NORTH AFRICA
• CLASS 1050 - COMPUTER METHODS IN THE HUMANITIES
• CMPINF 0010 - BIG IDEAS IN COMPUTING AND INFORMATION
• ENGCMP 0425 - DIGITAL HUMANITY
• ENGCMP 0610 - COMPOSING DIGITAL MEDIA
• ENGCMP 0712 - CRITICAL MAKING
• ENGFLM 0570 - INTRODUCTION TO NEW MEDIA
• ENGFLM 0712 - CRITICAL MAKING
• ENGLIT 0512 - NARRATIVE AND TECHNOLOGY
• ENGLIT 0702 - INTRODUCTION TO GAME STUDIES
• ENGLIT 0712 - CRITICAL MAKING
• ENGLIT 1002 - GAME, STORY, PLAY
• ENGLIT 1355 - VIRTUAL REALITY
• ENGLIT 1600 - COMPUTATIONAL METHODS IN THE HUMANITIES
• ENGWRT 0710 - INTRO TO AUDIO STORYTELLING
• ENGWRT 1451 - MULTIMEDIA ESSAY
• GER 1550 - COMPUTATIONAL METHODS IN HUMANITIES
• HAA 0425 - DIGITAL HUMANITY
• HIST 1030 - COMPUTATIONAL METHODS IN HUMANITIES
• INFSCI 0410 - HUMAN-CENTERED SYSTEMS
• INFSCI 1420 - USER-CENTERED DESIGN
Major

History of Art and Architecture, BA

The HAA major requires the completion of 29 credits. An intensive major option that requires 38 credits also exists; this option is highly recommended for students whose only major is HAA and/or who seek to embark on arts-related careers.

Core Courses

- HAA 0010 - INTRODUCTION TO WORLD ART
- HAA 0101 - FOUNDATIONS OF ART HISTORY
- HAA 0102 - PROSEMINAR FOR UNDERGRADUATE MAJORS
  Students must take this 1-credit course twice. Those who are pursuing a second major should consult with the departmental advisor if completing this course twice might impede their academic progress.

One of the following courses

- HAA 1010 - APPROACHES TO ART HISTORY
- ARC 1160 - ARCHITECTURE: IMAGE, TEXT, THEORY

Nine additional courses, as follows

Beyond the core curriculum, students must take an additional six courses according to the following requirements. Student pursuing the intensive track must take an additional nine courses according to the following requirements.
Breadth Requirements

Students must take at least one class from each of the following areas.

- Ancient art across the globe
- Asian art
- European art before 1750
- Modern or Contemporary art

Additionally, students must complete at least two courses at the 1000-level that address Comparative or World art. Students pursuing the intensive option should take four courses at the 1000-level in these categories.

Studio Arts

Students may elect to take one of the following courses toward completion of their HAA major.

- SA 0110 - VISUAL THINKING
- SA 0120 - PAINTING STUDIO 1
- SA 0130 - DRAWING STUDIO 1
- SA 0140 - SCULPTURE STUDIO 1
- SA 0180 - DIGITAL STUDIO: PHOTOGRAPHY 1

Honors requirements

Honors in the history of art and architecture is granted if the student satisfies all requirements for the intensive major, and:

- maintains a GPA of 3.5 or above in HAA courses;
- maintains an overall GPA of 3.25 or above;
- completes HAA 1950 - SENIOR THESIS with a minimum grade of A-, and;
- completes HAA 1951 - HONORS RESEARCH SEMINAR.

HAA 1950 can be applied toward the 1000-level requirement for the major.

Other requirements

Grade requirements: A minimum GPA of 2.0 in departmental courses is required for graduation.

Satisfactory/No Credit option: No course required for the major can be taken on an S/NC basis except HAA 1901, HAA 1903, ARC 1901, HAA 1905, and HAA 1909. These experiential learning courses do not count toward the 1000-level requirements.

Writing (W) requirement: Students must complete at least one W-course in the major. HAA 1010 is the W course for the HAA major.

Museum Studies, BA

The newly proposed major will expand upon the strengths of the existing minor, pairing professional methods, skill-building, and mentorship in practicum courses with those that center on historical contexts, critical and theoretical approaches, and ethical questions. Below we outline the existing minor requirements alongside those for the new major. We have also provided an annotated curricular map that charts how students will move from pre-disciplinary questions and skill-building, to foundational disciplinary work and the acquisition of content knowledge, to an intensive engagement with museum history and practice. For the capstone experience, students will have the option of completing an intensive internship or completing an independent project. The proposed new major is 30 credits.

Students will gain and deploy their knowledge regarding the approaches, histories and theories of museums, cultural property and curatorial practice. The central disciplinary-specific learning objectives for the new major include the following.
Students will:

- Participate in debates about how and why particular objects are deemed to be "significant" by their inclusion in archives, collections and museums
- Chart the movement of culturally relevant objects, understand why this matters, and relate this mobility to legal and ethical debates concerning cultural property
- Learn the key issues central to the social problems and possibilities engaged by the museum as an institution
- Learn how museum practices and policies intersect with issues of inclusion, access and engagement
- Examine how museums can serve as contexts for community participation, agency and social change
- Connect techniques of display to the socio-political dimensions inherent in the encounter between exhibitions and their audiences
- Deploy research skills to interpret and contextualize objects in ways that engage diverse audiences
- Communicate historical and cultural narratives through images, objects and spaces
- Use a range of investigative tools and approaches with which to analyze the theory and practice of museums through an interdisciplinary approach that is inherent in museum work
- Apply key concepts in museological theory and ethics to the critical analysis of museum practice, including collecting and display
- Engage in professional-driven hands-on learning experiences to expand their knowledge of museum professions and gain career-focused mentoring through internships, collaborative practice courses, and developmental cohorts
- Gain an understanding of the range of practical skills and knowledge required for succeeding in the museum professions including administration, collections management, exhibition development, education, community engagement, development and fundraising

In addition to the disciplinary-specific learning objectives outlined above, in crafting this curriculum we were also cognizant of the need to focus on the dispositional skill development of our students. We believe it is important to outline the broader professional competencies our students will attain that could be leveraged toward career-advancement in other industries and fields. We define these as core competencies and have distributed them across the curriculum. While some of these will be more centrally emphasized in some classes (for example, collaboration, project management and organization, problem solving, and identifying resources and challenges are integral to HAA 1019, 1020 and 1021; and close and slow looking, historical analysis and global understanding are privileged in HAA 0010 and HAA 0101), pedagogical approaches in all classes will touch on many of these.

The broad educational principles outlined below, and the curriculum we have built to nurture them, articulate why this major is particularly relevant in today's world which increasingly requires agile thinking, creative problem solving, curiosity, a cognizance of the importance of learning, and adaptability.

Building Empathy: Ethics and Citizenship

- Historical Analysis
- Global Understanding
- Cultural Critique
- Collaboration

Reflective and Mindful practice

Analysis and Communication

- Close and slow looking, visual literacy
- Critical analysis of texts, material objects, artifacts, images, sites, and built environments
- Design and spatial thinking, visual intelligence

In addition to the disciplinary-specific learning objectives outlined above, in crafting this curriculum we were also cognizant of the need to focus on the dispositional skill development of our students. We believe it is important to outline the broader professional competencies our students will attain that could be leveraged toward career-advancement in other industries and fields. We define these as core competencies and have distributed them across the curriculum. While some of these will be more centrally emphasized in some classes (for example, collaboration, project management and organization, problem solving, and identifying resources and challenges are integral to HAA 1019, 1020 and 1021; and close and slow looking, historical analysis and global understanding are privileged in HAA 0010 and HAA 0101), pedagogical approaches in all classes will touch on many of these.

The broad educational principles outlined below, and the curriculum we have built to nurture them, articulate why this major is particularly relevant in today's world which increasingly requires agile thinking, creative problem solving, curiosity, a cognizance of the importance of learning, and adaptability.

The broad educational principles outlined below, and the curriculum we have built to nurture them, articulate why this major is particularly relevant in today's world which increasingly requires agile thinking, creative problem solving, curiosity, a cognizance of the importance of learning, and adaptability.

Building Empathy: Ethics and Citizenship

- Historical Analysis
- Global Understanding
- Cultural Critique
- Collaboration

Reflective and Mindful practice

Analysis and Communication

- Close and slow looking, visual literacy
- Critical analysis of texts, material objects, artifacts, images, sites, and built environments
- Design and spatial thinking, visual intelligence
• Successful argumentation
• Communication - written, oral and multi-modal for scholarly, professional and public audiences
• Creative Inquiry (curiosity and research)

Adaptability, Organization and Productivity

• Project organization and management
• Problem solving
• Identifying resources and challenges
• Strategic thinking: recognizing choices, taking purposeful action

In conclusion, we are purposefully seeking to balance and interweave content knowledge acquisition, curiosity and engagement, and dispositional and metacognitive skill development more purposefully.

Expanding the Minor Curriculum into a Major

The curriculum outlined in the charts accompanying this proposal (see supporting documents) is designed as a scaffolded structure that is strong and established, yet also malleable, able to adapt as the program and field develops.

Launching the Major. As an introduction to the major, students are required to take a series of courses that introduce them to the field of Museum Studies and art historical approaches to interpreting images, material objects, artifacts and built environments. These courses include Introduction to World Art (HAA 0010), and a new course, Museums: Society and Inclusion? (HAA 0125). Intro to World is a large enrollment course offered every fall and spring to 200 students and consists of lecture and lab sections. We will launch Museums: Society and Inclusion? in the fall of 2020 as a medium enrollment course (40) but can convert this into an auditorium class for larger enrollments if demand necessitates it. These courses will meet Dietrich School General Education requirements, and begin by engaging students in the content at a pre-disciplinary level - Why Museums? Why Art? What are these? What roles do they play or needs do they serve? What skills can you learn here that are universally purposeful? These courses are principally centered on issues of diversity and inclusion - where have we been, who are we, and where are we going? What histories, collections and stories should museums be documenting, collecting, displaying and commemorating in the future?

NEW: Museums: Society and Inclusion? will prompt students to contemplate the role of the museum in a democratic society by focusing intensively and purposefully on the dependency between the modern institution and forces of colonialism and imperialism, on contested claims of ownership (cultural property), and ethical questions that contemporary museums face (access and inclusion). This strategy is inspired by the work that has been produced in a series of workshops designed by the Collecting Knowledge Pittsburgh partnership, supported by the Mellon grant, all of which provided opportunities to address important social justice issues through collections and archives within the city:

2016: Race-ing the Museum - race, diversity challenges, inclusion
2017: Consuming Nature - sustainability and the environment
2018: Making Advances - gender, sexuality, and sexual identity
2019: Work Forces - labor and production means

Importantly, the course will address the function of the museum in relationship to its collecting practices and its publics in the past, present, and future. Thus students will not only learn that museums were shaped by and in turn shaped uneven power relationships and inequity-but will also consider ways in which museums can serve and speak with diverse communities more productively in the future. The syllabus for this course is provided as a supplementary document.

Breadth and Disciplinary Foundations. Students will be required to take HAA 0101: Foundations of Art History which compels them to engage with an object in the Carnegie Museums of Pittsburgh, develop early research skills, and become more fluent in the critical and methodological approaches employed by the discipline. This course is a small seminar, and will be proposed to meet the writing (“w”) requirement for the Dietrich School. In addition, students will extend their content knowledge by taking a series of courses in our department or others that focus particularly on art, material culture, architecture and urban planning in institutional contexts, how these shape power relationships in society, and how these contextual relationships and meanings shift through history. See below for a listing of "Art and Its Publics" courses that meet this requirement.

Skill Development. Students take two 1-credit workshops that are designed to interweave with the content-based curriculum that is the primary focus of the breadth courses. Students will be compelled to think holistically about their academic major(s), coursework and learning experiences; their
goals; personal and professional interests; the skills and knowledge they are gaining outside our department; and practices in which they engage outside of school. Taken together, these distinctive workshops both advance professional goals and practices while helping students gain metacognitive abilities to become learners for the sake of learning. These classes focus on dispositional skills and are centrally focused on preparing students more effectively for the capstone. These workshops will be complemented by a course students are required to take beyond the HAA department that will extend a student's professional competencies, preparing them to carry-out public facing humanities work. See below for a listing of "Skill and Competency" courses that will meet this requirement.

Advanced Coursework. The major's foundational sequence builds competencies required to support the student's engagement in the program's intensive coursework in history and practice. The advanced seminars prepare students to undertake work in a professional museum context or at the graduate level. Students will take a minimum of 6 credits (a course in Museum History, and one in Museum Practice).

Museum History. Students will select either "The History and Ethics of Collecting" course, described above, or a new course, "The Global Politics of Display," which engages with histories and theories of display by surveying a range of important exhibits of art, visual and material culture from the nineteenth century to the present. In the former, students engage in a provenance research project that considers issues of cultural property and ethics of ownership, while students in the "Display" course undertake a research project that uses a local exhibition as a case study to consider techniques of display as well as the socio-political dimensions inherent in the encounter between exhibitions and their audiences.

Museum Practice. The core courses in Museum Practice, previously discussed, already exist as they were designed for the minor:

- Curatorial Development
- Exhibition Development
- Inside the Carnegie Museums

These courses are project-based initiatives that prioritize active learning. The focus is on collaborative inquiry and knowledge generation as well as public accountability. Museum Practice courses will be limited to 19 students each.

Capstone: Culminating Internship or Independent Project. We already work with students to develop tailored internship projects based on their goals and professional interests. We will continue this practice with the new major. We will also give students the opportunity to complete an intensive independent project, an option that exists for our current HAA and Architectural Studies majors. We are adding a 1-credit Pre-Internship workshop which will enable students to think more strategically about the work they seek to do, the institution with which they wish to partner, and how to best prepare for an optimal internship experience. In both the internship and independent project options, students will gain professional experience and generate a purposeful self-authored project in collaboration with a given institution and/or mentor.

Modes of Work:

Throughout the major, students may opt to engage in traditional scholarly research and write papers, but other options will be available: oral history projects; journaling and blogging; creating installations or mini-exhibitions (in digital or real-space); creating a documentary, video or digital media project; designing a public workshop; organizing or participating in symposia; developing a new special-topics course; generating a pod-cast; developing a public interview or panel discussion.

ART AND ITS PUBLICS COURSES:

Students are required to take two courses (6 credits) taught in the History of Art and Architecture and other departments that focus particularly on art, architecture and urban planning in institutional contexts and how these shape power relationships in society. These courses should devote at least 60% of content to material artifacts, objects, images, built environments, architecture or sites with a consideration of their shifting contexts through history.

Any Museum History course not taken toward the core requirement can be taken to satisfy this nexus.

- HAA 0020 - INTRODUCTION TO ASIAN ART
- HAA 0030 - INTRODUCTION TO MODERN ART
- HAA 0070 - ART OF EUROPE
- HAA 0090 - INTRODUCTION TO CONTEMPORARY ART
- HAA 0105 - ART AND EMPIRE
- HAA 0160 - ANCIENT EMPIRES
- HAA 0302 - RENAISSANCE ART
- HAA 0380 - ART OF THE SPANISH WORLD: RELIGION, IDENTITY & THE ART OF ACCOMMODATION
- HAA 0460 - ART IN PUBLIC: INCLUSION, IDENTITY, AND ACTIVISM
- HAA 0520 - ART AND POLITICS IN MODERN LATIN AMERICA
- HAA 0620 - ART OF CHINA
- HAA 1050 - WORLD ART: CONTACT AND CONFLICT
- HAA 1130 - ROMAN ART
- HAA 1304 - LEONARDO, MICHELANGELO AND RAPHAEL: PAINTING IN 16TH-C ITALY
- HAA 1450 - ART AND POLITICS IN THE WEIMAR REPUBLIC
- HAA 1455 - ART IN THE THIRD REICH AND MEMORIALIZATIONS OF THE HOLOCAUST
- ARC 0110 - APPROACHES TO THE BUILT ENVIRONMENT
- ARC 0112 - GLOBAL ARCHITECTURE 1: PREMODERN
- ARC 0114 - ART AND ARCHITECTURE OF THE MUSLIM WORLD
- ARC 0116 - GLOBAL ARCHITECTURE 2: MODERN
- ARC 0153 - MIDEVAL ARCHITECTURE
- ARC 0182 - THE CITY OF ROME AND ITS ARCHITECTURE: FROM AENEAS TO ZAHA HADID
- ARC 1183 - DIGITAL ROMAN AFRICA: VISUALIZING ARCHITECTURE AND URBANISM IN ROMAN NORTH AFRICA
- ARC 1330 - GLOBAL PRESERVATION
- ANTH 0538 - THE ARCHEOLOGIST LOOKS AT DEATH
- ANTH 0582 - INTRODUCTION TO ARCHEOLOGY
- ANTH 0780 - INTRODUCTION TO CULTURAL ANTHROPOLOGY
- CLASS 0600 - INTRODUCTION TO MEDITERRANEAN ARCHAEOLOGY
- CLASS 0650 - ARCHAEOLOGY OF THE BODY
- CLASS 1630 - MARGINALITY IN THE ANCIENT GREEK WORLD
- COMMRC 1160 - VISUAL RHETORIC
- COMMRC 1103 - RHETORIC AND CULTURE
- ENFLM 1549 - INDUSTRIES AND FESTIVALS
- ENGLIT 1412 - SECRET PITTSBURGH
- ENGLIT 1413 - HUMANITIES IN THE CITY
- ENGLIT 1635 - CHILDREN IN PITTSBURGH
- RELGST 1148 - RELIGIONS OF ANCIENT EGYPT
- RELGST 1160 - JERUSALEM: HISTORY AND IMAGINATION
- RELGST 1170 - ARCHAEOLOGY OF ISRAEL-PALESTINE
- RELGST 1240 - JEWS AND THE CITY
- RELGST 1452 - HYMNS & HIPHOP: SOUNDS OF ISLAM
- RELGST 1520 - BUDDHISM ALONG THE SILK ROAD
- RELGST 1802 - RELIGYINZ: RESEARCHING RELIGION IN PITTSBURGH

**SKILL AND COMPETENCY REQUIREMENT COURSES:**

Students must take one of the following courses that will advance professional skills and/or competencies:

- ANTH 1541 - CULTURAL RESOURCE MANAGEMENT
- ANTH 1516 - SPECIAL TOPICS IN ARCHAEOLOGY GEOPHYSICS
- COMMRC 0300 - COMMUNICATION AND SOCIETY
- COMMRC 0520 - PUBLIC SPEAKING
- COMMRC 1102 - ORGANIZATIONAL COMMUNICATION
- COMMRC 1162 - INVENTION: WHERE DO GOOD IDEAS COME FROM?
- COMMRC 1170 - CROSS CULTURAL COMMUNICATION
- ENGCMP 0420 - WRITING FOR THE PUBLIC
- ENGCMP 0520 - INTEGRATING WRITING AND DESIGN
- ENGCMP 0610 - COMPOSING DIGITAL MEDIA
- ENGCMP 0641 - WRITING FOR CHANGE
- ENGCMP 1103 - PUBLIC RELATIONS WRITING
- ENGCMP 1112 - PROFESSIONAL USES OF SOCIAL MEDIA
- ENGCMP 1400 - GRANT WRITING FOR NONPROFITS
- ENGCMP 1401 - WRITING FOR FUNDRAISING AND DEVELOPMENT
- ENGCMP 1410 - ADVANCED RESEARCH/DOCUMENTARY WRITING
- ENGCMP 1420 - WRITING PROPOSALS FOR BUSINESS
- ENGFLM 0401 - INTRODUCTION TO VISUAL CULTURE
- FMST 0130 - INTRODUCTION TO VISUAL CULTURE
- HIST 0760 - INTRODUCTION TO PUBLIC HISTORY
- INFSCI 0010 - INTRODUCTION TO INFORMATION, SYSTEMS AND SOCIETY
- PUBSRV 0050 - ETHICS AND ACCOUNTABILITY
- PUBSRV 1200 - PRACTICES OF NON-PROFIT MANAGEMENT
- PUBSRV 1210 - FINANCIAL MANAGEMENT OF NON-PROFIT ORGANIZATIONS
- PUBSRV 1230 - FUNDRAISING FOR NON-PROFIT ORGANIZATIONS
- PUBSRV 1390 - THEORIES OF LEADERSHIP

Required Courses

- HAA 0010 - INTRODUCTION TO WORLD ART
- HAA 0101 - FOUNDATIONS OF ART HISTORY
- HAA 0102 - PROSEMINAR FOR UNDERGRADUATE MAJORS
- HAA 0125 - MUSEUMS: SOCIETY AND INCLUSION?
- HAA 1019 - CURATORIAL DEVELOPMENT
- HAA 1020 - EXHIBITION DEVELOPMENT
- HAA 1021 - INSIDE THE MUSEUM
- HAA 1025 - HISTORY AND ETHICS OF COLLECTING
- HAA 1030 - SPECIAL TOPICS- MUSEUM HISTORIES
- HAA 1905 - MUSEUMS STUDIES INTERNSHIP
- HAA 1951 - HONORS RESEARCH SEMINAR

Minor

Museum Studies Minor

This minor is grounded in the department's historic strengths - to offer students a critically informed understanding of how cultural artifacts have been, are, and can be collected and curated. At its core, the goal of the Museum Studies Minor is to introduce students to the approaches, history, and theories of museum and collection practices.

Students pursuing the Museum Studies minor must complete the following coursework, which comprises 15 credits.
Two Foundation Courses

- HAA 0125 - MUSEUMS: SOCIETY AND INCLUSION?
- Any 'Art and its Publics' Course

Two Core Courses

Museum Histories

Select one of the following courses.

- HAA 1025 - HISTORY AND ETHICS OF COLLECTING
- HAA 1026 - EXHIBITIONS: FROM WORLD'S FAIRS TO GLOBAL BIENNIALS
- HAA 1027 - HERITAGE SITES
- HAA 1030 - SPECIAL TOPICS-MUSEUM HISTORIES

Museum Practices

Select one of the following courses.

- HAA 1019 - CURATORIAL DEVELOPMENT
- HAA 1021 - INSIDE THE MUSEUM
- HAA 1022 - EXHIBITION PRESENTATION
- HAA 1031 - SPECIAL TOPICS-MUSEUM PRACTICES
- HAA 1905 - MUSEUMS STUDIES INTERNSHIP *

Note

* HAA 1905 has a prerequisite of , which will add one additional credit to the minor for students who pursue the internship option. The Academic Curator of the Department of History of Art and Architecture will work with Museum Studies minors to place them into appropriate internship positions.

Elective Course

Students take one additional course from the 'Art and Its Publics' list, a course from the 'Competency Course' list, or any of the above courses not previously applied to the minor.

Department of History and Philosophy of Science

Certificate

Conceptual Foundations of Medicine Certificate

This certificate requires completion of at least 18 credits. Students enrolled in the program are expected to achieve at least a letter grade of C in each required course. Those interested in pursuing this certificate must apply to the program as early as possible. Applications are available on the certificate's Web page, www.hps.pitt.edu/undergraduate/certificate.php.

Core courses
• HPS 0612 - MIND AND MEDICINE
• HPS 0613 - MORALITY AND MEDICINE

Biological Sciences courses

A two-term, college level course sequence in biology, such as BIOSC 0150 BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1 and BIOSC 0160 BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2 are required for this certificate.

Additional coursework

Two additional approved courses in two different departments dealing with social and conceptual issues in the biomedical sciences are required for this certificate. A list of such approved courses is available in the Department of History of Philosophy and Science prior to each term. Courses are approved on a term-by-term basis.

Other requirements

Grade Requirements: Students are expected to achieve a minimum grade of C in each course required for this certificate. A minimum overall GPA of 2.25 is required in courses required for this certificate.

Satisfactory/No Credit Option: No course that fulfills a requirement for this certificate may be taken on an S/NC basis.

Major

History and Philosophy of Science, BA

The study of the history and philosophy of science affords a broad appreciation of science, its nature and fundamentals, its origins and its place in modern politics, culture, and society. In the history of science, traditional historical methods are used to develop an understanding of how the sciences originated, how they were practiced, how they developed, and how they are related to their intellectual and social contexts. In philosophy of science, the sciences themselves are brought under philosophical scrutiny. We investigate the nature of science in general; what distinguishes scientific activity; how theories explain; how they are confirmed; whether they should be read literally; and the moral dilemmas raised by the sciences. We also investigate the fundamental content of individual sciences, and how it bears on the ancient philosophical questions: what is the nature of space, time, and matter; what is life; and what is thought. History and philosophy of science is distinctive in integrating history, philosophy, and science, with investigations in each that are often closely interwoven.

The Department of History and Philosophy of Science (HPS) at Pitt is a world leader in its field. Historians and philosophers of science worldwide come to Pitt for study and research. The undergraduate courses reflect the conviction that science and technology pervade every aspect of our lives, and have played a central role in cultural, religious, and philosophical development of our society.

A major in HPS is an excellent choice for students who wish to combine course work in the sciences with work in more humanistically inclined disciplines. Because HPS majors are expected to complete 15 hours of science credits, a double major in HPS and one of the sciences is especially attractive.

Required courses for the History and Philosophy of Science major

This major requires the completion of 12 courses distributed as follows.

One of the following Logic courses

• HPS 0611 - PRINCIPLES OF SCIENTIFIC REASONING
• PHIL 0500 - INTRODUCTION TO LOGIC
Both of the following

- HPS 1653 - INTRO TO PHILOSOPHY OF SCIENCE *
- HPS 1702 - JR/SR SEMINAR FOR HPS MAJORS

* The Logic requirement must be completed before taking HPS 1653.

HPS electives

Students must complete four HPS elective courses, one of which must be at the 1000-level. At least one course must be a history of science course.

Natural and/or Social Science electives

Students are required to complete at least four courses in the natural sciences, social sciences, or a combination of both. Majors must pursue at least one science course at an advanced (non-introductory) level. Students are strongly encouraged to choose these courses in consultation with the major advisor.

Grade requirements

A minimum GPA of 2.0 in courses that count toward the major is required for graduation.

Satisfactory/No Credit option

No course that counts toward the major can be taken on an S/NC basis.

Writing (W) requirement

Students must complete HPS 1703 - WRITING WORKSHOP FOR HPS MAJORS for HPS Majors in conjunction with HPS 1702 - JR/SR SEMINAR FOR HPS MAJORS.

Declaring the major

Before students officially declare the History and Philosophy of Science major, they must have completed two HPS courses with a grade of B- or better and have permission from the major advisor.

Advising

Jewish Studies Program

The Jewish Studies Program, an interdisciplinary program in the School of Arts and Sciences, offers courses and academic programs devoted to the exploration of Jewish history, culture, religion, thought, and literary and artistic expression. Faculty is drawn from the departments of Religious Studies, Anthropology, English, French and Italian Languages and Literatures, German, History, and Political Science.

Certificate
Jewish Studies Certificate

The Jewish Studies Program is open to all students interested in the Hebrew language and the history and culture of the Jewish people and their contributions to Western civilization. In the historical courses, emphasis is on the interaction of the Jewish people with their neighbors, as well as the development of distinctive cultural and religious values. A certificate program is offered, and interdisciplinary studies options can be arranged to include courses in this program. Information is also available on opportunities for intensive study in Israel. The program in Jewish studies offers undergraduates the opportunity to supplement work in their own department or major with an interdisciplinary course of study in the area of Jewish studies. Completion of the certificate program fulfills the Arts and Sciences requirement for a related area (although students should check with their major departments) and will be indicated on the transcript.

Requirements

The certificate requires 18 credits. A maximum of nine credits may be transferred from another institution, subject to the Dietrich School of Arts and Sciences policy. Credits are to be distributed as follows.

Elementary Hebrew courses are optional.

- JS 0013 - ELEMENTARY HEBREW 1
- JS 0014 - ELEMENTARY HEBREW 2

Required Hebrew course

- JS 0025 - INTERMEDIATE HEBREW 3

Upper-level Jewish Studies courses

Students must complete six credits in Jewish Studies Program courses at the 1000-level.

Jewish Studies elective courses

Students may take up to nine credits in any other Jewish Studies Program courses.

Comparative Religious Studies course

Students must take at least one course in the Department of Religious Studies that treats a religious tradition other than Judaism.

Independent Study

- JS 1901 - INDEPENDENT STUDY

Department of Linguistics

Linguistics is concerned with the study of language as a core property of human cognition and interaction. It is a broad field that straddles the humanities, social sciences, and natural sciences. Major areas of study in linguistics include the following fields:

- Applied linguistics: second-language learning theory, literacy, bilingual education
- Computational linguistics: natural language generation, knowledge representation and artificial intelligence, recognition of systems
• Theoretical linguistics: development of psychologically plausible models of language sound systems, word structure, sentence and discourse structure, meaning
• Historical and comparative linguistics: study of language history, both language change and relationships among languages
• Descriptive-anthropological linguistics: documentation and analysis of languages, especially little-known languages through field work
• Psycholinguistics: research on such topics as sentence processing, problems in reading, how children acquire their first language (childhood language acquisition)
• Sociolinguistics: study of language use and socially controlled variation in form, conversation and narrative discourse, social trends reflected in language use, political aspects of language use

Careers in linguistics include teaching English as a second language and other languages including American Sign Language; computational linguistic research in industry and public agencies; field research on endangered languages and cultures; research and teaching at the university level; careers in publishing and advertising; speech pathology and rehabilitation; translation and interpreting; law; and governmental consulting on language policies. Most careers in linguistics require graduate training.

Many, but certainly not all, people come to linguistics through a love of languages. However, love of languages itself is not sufficient to ensure success and happiness as a linguistics major. The student must also enjoy analytical thought, as linguists employ analytical tools in the study of human languages. Students considering a major in linguistics should take the introductory linguistics course (LING 1950 - INTRODUCTION TO LINGUISTICS) at their earliest opportunity to help gauge if the major is right for them. The linguistics major gives students a solid foundation in the central areas of linguistic theory and analysis. The structure of human language (its sounds, word structures, and syntax) is the focus of the linguistics courses required for the major. In addition, the major's language requirement is designed to make sure students acquire a perspective on linguistic structures besides those of their native language and at least some exposure to one language that is structurally very unlike English. For more information on the major or the Department of Linguistics, see www.linguistics.pitt.edu.

Certificate

American Sign Language Certificate

The Department of Linguistics offers an undergraduate Certificate in American Sign Language (ASL). This certificate program should lead students to: a high degree of proficiency in ASL; an understanding of the structure of ASL as a visual/gestural language; and an understanding of important issues in deaf culture and education.

This certificate program could conveniently accompany various undergraduate majors including, but not limited to, linguistics, communication science, and various undergraduate disciplines that serve as the basis for graduate-level degrees and certificates in the University of Pittsburgh School of Education. The program draws on the academic strengths and resources of the Department of Linguistics in the Faculty of Arts and Sciences and the Department of Instruction and Learning in the School of Education.

Currently, there is a limit of 20 students per academic year who can enroll in the ASL certificate program. For this reason, each applicant will be required to go through an evaluation process. Applications are accepted early during the spring term of each academic year, and students will be notified of their acceptance or non-acceptance into the program before registering for fall classes. Please contact the Less-Commonly-Taught Languages Center, CL G-47, for application packets or more information (lctl@pitt.edu, 412-624-5512).

Requirements

Prerequisites

Students must pass the prerequisite courses with a letter grade of B or higher.

• ASL 0101 - AMERICAN SIGN LANGUAGE 1
• ASL 0102 - AMERICAN SIGN LANGUAGE 2

Required courses (18 credits)
Category 1

- ASL 0103 - AMERICAN SIGN LANGUAGE 3
- ASL 0104 - AMERICAN SIGN LANGUAGE 4

Category 2

- ASL 1615 - DEAF CULTURE

Category 3

Students must complete one of the following courses.

- LING 1000 - INTRODUCTION TO LINGUISTICS
- CSD 1020 - NATURE OF LANGUAGE

Category 4

Students must complete one of the following courses.

- ASL 1705 - STRUCTURE OF SIGN LANGUAGES
- ASL 1715 - STRUCTURE OF ASL AND ENGLISH

Category 5

Students must complete one of the following courses.

- ASL 1635 - ANALYSES OF ASL LITERATURE
- ASL 1725 - SOCIOLINGUISTICS OF SIGN LANGUAGE
- ASL 1800 - INTRODUCTION TO ASL-ENGLISH INTERPRETING
- ASL 1909 - TOPICS IN SIGN LANGUAGE STUDIES

Other requirements

**Grade Requirements:** A minimum GPA of 2.0 is required in each course that counts toward the certificate.

**Satisfactory/No Credit Option:** There is no limit to the number of courses that can be taken on the S/NC basis for this certificate. The two prerequisite courses must be taken for a letter grade.

**Arabic Language and Linguistics Certificate**

The Department of Linguistics offers an undergraduate certificate in Arabic Language and Linguistics. This certificate program should lead students to:

- an intermediate to advanced proficiency in Modern Standard Arabic (formal Arabic) and at least one Arabic dialect;
- an understanding of the linguistic structure of Arabic;
- an understanding of important issues in Arabic literature and culture; and
- exposure to authentic Arabic reading and listening materials, and discussion of general topics of interest in the Arab world in Arabic.
The certificate program could conveniently accompany several undergraduate majors including, but not limited to, linguistics, political science, communication science, and various undergraduate disciplines that serve as the basis for graduate-level degrees and certificates in the schools of education, law, and others.

Students who are interested in the Arabic Language and Linguistics Certificate can apply for the program after they complete the prerequisites for the certificate which is the completion of two semesters of the language with an average B grade or higher. However, students could also apply for the certificate any time before their graduation if they complete the requirements by then. Contact the Arabic coordinator, Amani Attia (ama66@pitt.edu) for advice on course planning, and to submit the application packet, which consists of three forms to be filled out by candidates. This certificate requires 32-34 credits for completion.

**Prerequisite dialect courses**

Students must complete two semesters of Modern Standard Arabic in one dialect - Egyptian or Levantine, with a letter grade of B or higher to declare the certificate. In addition to the prerequisite courses, the certificate requires 22-23 credits of course work as described.

Choose one of the following pairs of courses.

**Egyptian**

- ARABIC 0101 - MODERN STANDARD ARABIC 1/EGYPTIAN 1
- ARABIC 0102 - MODERN STANDARD ARABIC 2/EGYPTIAN 2

**Levantine**

- ARABIC 0121 - MODERN STANDARD ARABIC 1/LEVANTINE 1
- ARABIC 0122 - MODERN STANDARD ARABIC 2/LEVANTINE 2

**Required Courses:**

**Two additional courses in the same dialect**

In some cases, students could change from one dialect track to the other, based on study abroad needs, schedule conflicts, or other factors. The student must show a certain level of proficiency in the target dialect. Contact Arabic coordinator (ama66@pitt.edu) for advice on this issue.

**Egyptian**

- ARABIC 0103 - MODERN STANDARD ARABIC 3/EGYPTIAN 3
- ARABIC 0104 - MODERN STANDARD ARABIC 4/EGYPTIAN 4

**Levantine**

- ARABIC 0123 - MODERN STANDARD ARABIC 3/LEVANTINE 3
- ARABIC 0124 - MODERN STANDARD ARABIC 4/LEVANTINE 4

**Introductory linguistics courses**

- ARABIC 1705 - INTRODUCTION TO ARABIC LINGUISTICS
- LING 1000 - INTRODUCTION TO LINGUISTICS
Arabic culture course

Students must complete one of the following courses.

- ARABIC 1615 - ARABIC LIFE AND THOUGHT
- ARABIC 1635 - INTRODUCTION TO MODERN ARABIC LITERATURE

Arabic related elective

Students must complete one of the following courses. Dialect courses must follow previous coursework.

- ARABIC 0105 - MODERN STANDARD ARABIC 5/EGYPTIAN 5
- ARABIC 0106 - MODERN STANDARD ARABIC 6/EGYPTIAN 6
- ARABIC 0125 - MODERN STANDARD ARABIC 5/LEVANTINE 5
- ARABIC 0126 - MODERN STANDARD ARABIC 6/LEVANTINE 6
- ARABIC 1615 - ARABIC LIFE AND THOUGHT
- ARABIC 1635 - INTRODUCTION TO MODERN ARABIC LITERATURE
- ARABIC 1909 - SPECIAL TOPICS IN ARABIC
- ECON 0640 - ECONOMIC DEVELOPMENT OF THE MIDDLE EAST AND NORTH AFRICA (MENA) REGION
- HIST 0756 - INTRODUCTION TO ISLAMIC CIVILIZATION or
- RELGST 0455 - INTRODUCTION TO ISLAMIC CIVILIZATION
- PS 1351 - GOVERNMENT AND POLITICS OF THE MIDDLE EAST

Major

Linguistics, BA

The Department of Linguistics is known internationally for its strength in the areas of second language acquisition, applied linguistics, TESOL, and American Indian languages. Like many linguistics programs in the United States, the department is centrally concerned with core areas of linguistic theory. It also emphasizes the importance of the applied and descriptive endeavors. The areas of expertise of the faculty are theoretical and descriptive linguistics, Hispanic linguistics, sociolinguistics, psycholinguistics, and second language acquisition. The department prides itself on its collegial atmosphere and close cooperation between faculty and students.

A major in linguistics gives students a solid foundation in the central areas of linguistic theory and analysis. The structure of human language (its sounds, word structures, and syntax) is the focus of the linguistics courses required for the major. Additionally, the major's language requirement ensures that students acquire a perspective on linguistic structures outside of their native language, and that they receive some exposure to at least one language that is structurally unlike English. Students considering a major in linguistics should take LING 1000 - INTRODUCTION TO LINGUISTICS at their earliest opportunity to gauge if the major is right for them.

In addition to formal instruction provided by the department, students are encouraged to take courses in related departments such as anthropology and psychology. Students who wish to combine their work in linguistics with training in a specific cultural area may simultaneously earn a certificate in Asian, Latin American, Russian and East European, West European, or European Union Studies through the University Center for International Studies (UCIS). The department is also home to the English Language Institute, the Robert Henderson Language Media Center, and the Less-Commonly-Taught Languages Center.

Careers in linguistics include teaching English as a second language and teaching other languages including American Sign Language; computational linguistics research in industry and public agencies; field research on endangered languages and cultures; research and teaching at the university level; careers in publishing and advertising; speech pathology and rehabilitation; translation and interpreting; law; and governmental consulting on language policies. Most careers in linguistics require graduate training.

The major in Linguistics requires 30 credits of coursework, distributed as follows.
Core courses

Complete all of the following courses.

- LING 1000 - INTRODUCTION TO LINGUISTICS
- LING 1578 - PHONETICS AND PHONEMICS
- LING 1579 - PHONOLOGY
- LING 1773 - MORPHOLOGY
- LING 1777 - SYNTACTIC THEORY

Language, Linguistics, or Semantics

Complete one of the following courses.

- LING 1267 - ASPECTS OF SOCIOLINGUISTICS
- LING 1580 - LANGUAGE AND THE MIND
- LING 1682 - INTRODUCTION TO SEMANTIC THEORY
- LING 1860 - INTRO TO HISTORICAL LINGUISTICS

Research or Field Methods

Complete one of the following courses.

- LING 1441 - FIELD METHODS IN LINGUISTICS
- LING 2144 - RESEARCH METHODS IN APPLIED LINGUISTICS

Capstone course

Complete one of the following courses.

- LING 1903 - DIRECTED RESEARCH
- LING 1930 - APPLICATIONS OF LINGUISTICS

Elective courses

Students are required to complete two LING 1000-level elective courses.

Language courses

Students are required to complete one semester of language study that is not Romance (including Latin), Germanic, Balto-Slavic, or Greek. This requirement is in addition to the two terms of language study required of students who are not exempt from the second language requirement for the Dietrich School of Arts and Sciences.

Other requirements and conditions

Grade requirements: A minimum GPA of 2.0 in departmental courses is required for graduation.

Satisfactory/No Credit option: No more than two LING courses that count toward the major can be taken on an S/NC basis.

Writing (W) requirement: Students must complete at least one W-course in the major.
Minor

Hindi Minor

This minor requires 17 credits of coursework to complete.

Language courses

- HINDI 0101 - HINDI 1
- HINDI 0102 - HINDI 2
- HINDI 0103 - HINDI 3
- HINDI 0104 - HINDI 4

Electives

Choose one course from the following list. Other courses that focus at least 25% effort on Hindi or South Asia may fulfill this requirement with approval from the Less-Commonly-Taught Languages Center.

- HINDI 0105 Hindi 5
- HINDI 0106 Hindi 6
- HINDI 1909 - SPECIAL TOPICS IN HINDI
- LING 1263 - CROSS-CULTURAL COMMUNICATION
- LING 1951 - LANGUAGES OF THE WORLD
- ANTH 0730 - HIMALAYAN GEOGRAPHY
- ANTH 1764 - CULTURES AND SOCIETIES OF INDIA
- ANTH 1801 - HIMALAYAN BIODIVERSITY
- ENGFLM 1410 - BOLLYWOOD AND INDIAN CINEMA
- HIST 0755 - RELIGION IN ASIA
- HIST 1707 - GENDER IN GLOBAL HISTORY
- HIST 1757 - RELIGION IN INDIA
- HIST 1758 - HINDU MYTHOLOGY
- RELGST 0505 - RELIGION IN ASIA
- RELGST 1500 - RELIGION IN INDIA
- RELGST 1510 - HINDU MYTHOLOGY

Hungarian Minor

The Hungarian minor requires 17 credits for completion, described as follows.

Students taking Hungarian learn to speak, listen, read and write in the language, just as students in other language courses do. In addition, students of Hungarian stand out as individuals with a rare skill, which may put them at an advantage for future job opportunities. Students pursuing this minor may also be interested in the Russian and Eastern Europe or the European Union Studies certificates offered by the University Center for International Studies.

Required courses

Students must complete the following language courses.
Elective course

Students must complete one of the following courses. Optionally, a student may seek approval from the Less-Commonly-Taught Languages Center to substitute a course in another department that has at least a 25% focus on Hungary or Hungarian culture.

- LING 1263 - CROSS-CULTURAL COMMUNICATION
- LING 1951 - LANGUAGES OF THE WORLD
- ENGLIT 0380 - SLOVAK TRANSATLANTIC CULTURES
- ENGFLM 1226 - EASTERN EUROPEAN COMMUNISM AT THE MOVIES
- HIST 0200 - BETWEEN KAFKA AND HITLER: HOW CENTRAL EUROPE SHAPED THE MODERN WORLD
- HIST 1226 - EASTERN EUROPEAN COMMUNISM AT THE MOVIES
- MUSIC 1360 - ROMANI / GYPSY MUSIC
- PS 1521 - EASTERN EUROPE IN WORLD POLITICS
- SLAV 1865 - THE YEAR COMMUNISM CRUMBLED
- SLOVAK 0380 - SLOVAK TRANSATLANTIC CULTURES

Irish Minor

This minor requires 17 credits of coursework to complete.

Language courses

Electives

Choose one course from the following list. Other courses that focus at least 25% effort on Irish or Ireland may fulfill this requirement with approval from the Less-Commonly-Taught Languages Center.

- IRISH 0105 - IRISH (GAEILGE) 5
- IRISH 0106 - IRISH (GAEILGE) 6
- IRISH 1615 - IRISH CULTURE AND TRADITIONS
- IRISH 1909 - SPECIAL TOPICS IN IRISH
- LING 1263 - CROSS-CULTURAL COMMUNICATION
- LING 1951 - LANGUAGES OF THE WORLD
- ENGFLM 1192 - IRISH FILM
- ENGLIT 0815 - IRISH LITERATURE
- HIST 0150 - HISTORY OF MODERN IRELAND
- HIST 1016 - THE IRISH IN AMERICA

Linguistics Minor

An minor in linguistics would be particularly useful for students majoring in English, second languages, philosophy, anthropology, psychology, sociology, communications, speech science, neuroscience, computer science, and information science, as well as for students with an interest in teaching English as a second language, going to law school, or otherwise choosing a profession in which language plays a crucial part.

Academic Requirements

The minor consists of 15 credits and comprises the following courses:
Modern Greek Minor

This minor requires 17 credits of coursework to complete.

Language courses

- GREEKM 0101 - GREEK (MODERN) 1
- GREEKM 0102 - GREEK (MODERN) 2
- GREEKM 0103 - GREEK (MODERN) 3
- GREEKM 0104 - GREEK (MODERN) 4

Electives

Choose one course from the following list. Other courses that focus at least 25% effort on Modern Greek, Greece, or Cyprus may fulfill this requirement with approval from the Less-Commonly-Taught Languages Center.

- GREEKM 0105 - GREEK (MODERN) 5
- GREEKM 0106 - GREEK (MODERN) 6
- GREEKM 1615 - THE GREEKS: JOURNEY THROUGH CULTURE
- GREEKM 1909 - SPECIAL TOPICS IN MODERN GREEK
- LING 1263 - CROSS-CULTURAL COMMUNICATION
- LING 1951 - LANGUAGES OF THE WORLD
- CLASS 0010 - GREEK CIVILIZATION
- CLASS 0030 - MYTHOLOGY IN THE ANCIENT WORLD
- CLASS 0032 - ATHLETICS OF THE ANCIENT WORLD
- CLASS 1130 - CLASSICAL MYTHOLOGY AND LITERATURE
- CLASS 1210 - GREEK HISTORY
- CLASS 1510 - GREEK ART
- CLASS 1630 - MARGINALITY IN THE ANCIENT GREEK WORLD
- ECON 1680 - ECONOMICS OF THE EUROPEAN UNION
- HAA 1110 - GREEK ART
- HIST 1164 - SMALL COUNTRIES AND THE EUROPEAN UNION
- HIST 1783 - GREEK HISTORY
- RELGST 0083 - MYTHOLOGY IN THE ANCIENT WORLD
- RELGST 1135 - ORTHODOX CHRISTIANITY

Persian/Farsi Minor

This minor requires 17 credits of coursework to complete.

Language courses
Electives

Choose one course from the following list. Other courses that focus at least 25% effort on Persian, Farsi, or Iran may fulfill this requirement with approval from the Less-Commonly-Taught Languages Center.

- PERS 0105 - PERSIAN (FARSI) 5
- PERS 0106 - PERSIAN (FARSI) 6
- PERS 0107 - PERSIAN (FARSI) 7
- PERS 0108 - PERSIAN (FARSI) 8
- PERS 1905 - UNDERGRADUATE TEACHING ASSISTANT IN PERSIAN (FARSI)
- LING 1263 - CROSS-CULTURAL COMMUNICATION
- LING 1951 - LANGUAGES OF THE WORLD
- HIST 0752 - EMPIRES OF THE STEPPE: EURASIA FROM THE MONGOLS TO THE SOVIET UNION
- HIST 0756 - INTRODUCTION TO ISLAMIC CIVILIZATION
- RELGST 0455 - INTRODUCTION TO ISLAMIC CIVILIZATION

Quechua Minor

This minor requires 17 credits of coursework to complete.

Language courses

- QUECH 0101 - QUECHUA 1
- QUECH 0102 - QUECHUA 2
- QUECH 0103 - QUECHUA 3
- QUECH 0104 - QUECHUA 4

Electives

Choose one course from the following list. Other courses that focus at least 25% effort on Quechua or the Andes may fulfill this requirement with approval from the Less-Commonly-Taught Languages Center.

- QUECH 0105 Quechua 5
- QUECH 0106 Quechua 6
- QUECH 1909 - SPECIAL TOPICS IN QUECHUA
- LING 1263 - CROSS-CULTURAL COMMUNICATION
- LING 1951 - LANGUAGES OF THE WORLD
- ANTH 1528 - SOUTH AMERICAN ARCHAEOLOGY
- ANTH 1543 - ANCIENT STATES IN THE NEW WORLD
- HIST 0500 - COLONIAL LATIN AMERICA
- HIST 0501 - MODERN LATIN AMERICA
- HIST 1511 - VIOLENCE & MEMORY IN LATIN AMERICA
Swahili Minor

This minor requires 17 credits of coursework to complete.

Language courses

- SWAHIL 0101 - SWAHILI 1
- SWAHIL 0102 - SWAHILI 2
- SWAHIL 0103 - SWAHILI 3
- SWAHIL 0104 - SWAHILI 4

Electives

Choose one course from the following list. Other courses that focus at least 25% effort on Swahili or East Africa may fulfill this requirement with approval from the Less-Commonly-Taught Languages Center.

- SWAHIL 0105 - SWAHILI 5
- SWAHIL 0106 - SWAHILI 6
- SWAHIL 0107 - SWAHILI 7
- SWAHIL 0108 - SWAHILI 8
- SWAHIL 0111 - INTRODUCTION TO SWAHILI LANGUAGE ABROAD
- SWAHIL 1615 Swahili Coastal Culture: Gateway to Africa
- SWAHIL 1909 - SPECIAL TOPICS IN SWAHILI
- LING 1263 - CROSS-CULTURAL COMMUNICATION
- LING 1951 - LANGUAGES OF THE WORLD
- AFRCNA 0127 - INTRODUCTION TO AFRICA
- AFRCNA 1725 - SOCIAL AND HEALTH ISSUES IN EAST AFRICA
- ANTH 1725 - SOCIAL AND HEALTH ISSUES IN EAST AFRICA
- HIST 1727 East African History 1500-Present

Swedish Minor

This minor requires 17 credits of coursework to complete.

Language courses

- SWE 0101 - SWEDISH 1
- SWE 0102 - SWEDISH 2
- SWE 0103 - SWEDISH 3
- SWE 0104 - SWEDISH 4

Electives

Choose one course from the following list. Other courses that focus at least 25% effort on Swedish or Sweden may fulfill this requirement with approval from the Less-Commonly-Taught Languages Center.

- SWE 0105 - SWEDISH 5
Turkish Minor

This minor requires 17 credits of coursework to complete.

Language courses

- TURKSH 0101 - TURKISH 1
- TURKSH 0102 - TURKISH 2
- TURKSH 0103 - TURKISH 3
- TURKSH 0104 - TURKISH 4

Electives

Choose one course from the following list. Other courses that focus at least 25% effort on Turkish or Turkey may fulfill this requirement with approval from the Less-Commonly-Taught Languages Center.

- TURKSH 0105 - TURKISH 5
- TURKSH 0106 - TURKISH 6
- TURKSH 0107 - TURKISH 7
- TURKSH 0108 - TURKISH 8
- TURKSH 1615 - TURKISH CULTURE AND SOCIETY
- TURKSH 1909 - SPECIAL TOPICS IN TURKISH
- LING 1263 - CROSS-CULTURAL COMMUNICATION
- LING 1951 - LANGUAGES OF THE WORLD
- HIST 0752 - EMPIRES OF THE STEPPE: EURASIA FROM THE MONGOLS TO THE SOVIET UNION
- HIST 0756 - INTRODUCTION TO ISLAMIC CIVILIZATION
- HIST 1175 - XENOPHOBIA IN MODERN EUROPE
- HIST 1753 - THE OTTOMAN EMPIRE (1300-1923)
- RELGST 0455 - INTRODUCTION TO ISLAMIC CIVILIZATION
- PS 1348 - XENOPHOBIA IN MODERN EUROPE

Vietnamese Minor

This minor requires 17 credits of coursework to complete.

Language courses

- VIET 0101 - VIETNAMESE 1
- VIET 0102 - VIETNAMESE 2
Electives

Choose one course from the following list. Other courses that focus at least 25% effort on Vietnamese or Vietnam may fulfill this requirement with approval from the Less-Commonly-Taught Languages Center.

- VIET 0105 Vietnamese 5
- VIET 0106 Vietnamese 6
- VIET 1909 - SPECIAL TOPICS IN VIETNAMESE
- LING 1263 - CROSS-CULTURAL COMMUNICATION
- LING 1951 - LANGUAGES OF THE WORLD
- HIST 0403 - HISTORY OF MODERN SOUTHEAST ASIA: COLONIAL ERA TO PRESENT

Department of Mathematics

The Department of Mathematics offers course work leading to a Bachelor of Science degree in mathematics as well as various courses for non-majors. Students concentrating in mathematics may pursue majors in mathematics, applied mathematics, actuarial mathematics, or mathematical biology, or they may pursue a joint major in mathematics and economics. Each of the department's majors has its own philosophy and its own formal requirements, so students should consult with a major advisor. For more information on these majors and the Department of Mathematics, see www.mathematics.pitt.edu.

Joint Major

Mathematics - Economics, BS

This major was designed for students who may be interested in the quantitative aspects of economic analysis and mathematics. Graduates will be well prepared to pursue a career in business or industry (such as forecasting, analysis, or research). However, many students completing this degree will choose to enter graduate school in economics, business, applied mathematics, or a related field. The curriculum for the joint major consists of nine economics courses, including the core theory courses and some quantitative field courses, seven mathematics courses, and two courses in statistics.

Requirements

Students seeking a mathematics and economics joint major must adhere to the following rules and requirements:

- Completion of at least 58 credits in mathematics and economics courses (see below for detail).
- Earn at least a 2.00 in all courses required for the major. The S/NC option is permitted for MATH 0500 or ECON 0900 only. All other courses must be taken for a letter grade.
- Students should check with the departmental advisors in mathematics and economics about the required W course.
- Students planning to do graduate study should keep in mind that many graduate programs require reading knowledge of one or two second languages.

The joint major provides not only a set of requirements but also suggested course sequences of mathematics and economics courses that are compatible with each other and that prepare students for various specialties. The courses follow.

Required Courses in Mathematics
- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
- MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2
- MATH 0240 - ANALYTIC GEOMETRY AND CALCULUS 3
- MATH 0413 - INTRO THEORETICAL MATHEMATICS
- MATH 0420 - INTRO THEORY 1-VARIABLE CALCULUS
- MATH 1270 - ORDINARY DIFFERENTL EQUATIONS 1

**Professional Development**

Choose one of the following courses.

- MATH 0500 - PROFESSIONAL DEVELOPMENT
- ECON 0900 - PROFESSIONAL DEVELOPMENT FOR ECONOMISTS

**Linear Algebra**

One of the following courses.

- MATH 1180 - LINEAR ALGEBRA 1
- MATH 1185 - HONORS LINEAR ALGEBRA

**Statistics courses**

Both of the following courses

- STAT 1151 - INTRODUCTION TO PROBABILITY
- STAT 1152 - INTRODUCTION TO MATHEMATICAL STATISTICS

**Economics courses**

- ECON 0100 - INTRODUCTION TO MICROECONOMIC THEORY
- ECON 0110 - INTRODUCTION TO MACROECONOMIC THEORY
- ECON 1100 - INTERMEDIATE MICROECONOMICS
- ECON 1110 - INTERMEDIATE MACROECONOMICS
- ECON 1150 - APPLIED ECONOMETRICS 1
- ECON 1200 - GAME THEORY
- One ECON non-0800 series elective course
- Two ECON 1000-level courses that require either ECON 1100 or ECON 1110 as a prerequisite

**Additional Math course**

Students are encouraged to take at least one field course in mathematics from the following list.

- MATH 1100 - LINEAR PROGRAMMING
- MATH 1110 - INDUSTRIAL MATHEMATICS
- MATH 1280 - ORDINARY DIFFERNTL EQUATIONS 2
- MATH 1470 - PARTIAL DIFFERENTIAL EQUATIONS 1
- MATH 1530 - ADVANCED CALCULUS 1
- MATH 1540 - ADVANCED CALCULUS 2
• MATH 1550 - VECTOR ANALYSIS AND APPLICATIONS  
• MATH 1700 - INTRODUCTION TO TOPOLOGY  
• STAT 1221 - APPLIED REGRESSION  
• STAT 1311 - APPLIED MULTIVARIATE ANALYSIS  
• STAT 1321 - APPLIED TIME SERIES  
• STAT 1631 - INTERMEDIATE PROBABILITY  
• STAT 1632 - INTERMEDIATE MATHEMATICAL STATISTICAL

Note

To qualify for departmental honors in the mathematics and economics joint major, students must meet the following requirements:

• Complete the required economics courses with the added stipulation that ECON 1180 - MATHEMATICAL ECONOMICS and a proseminar be one of the field courses chosen.
• Maintain a GPA of at least 3.00 in mathematics courses, at least 3.25 in economics courses, and at least 3.25 overall.
• Complete the following courses in lieu of those normally taken:
  • MATH 0235 - HONORS 1 - VARIABLE CALCULUS  
  • MATH 0240 - ANALYTIC GEOMETRY AND CALCULUS 3  
  • MATH 0450 - INTRODUCTION TO ANALYSIS  
  • MATH 1185 - HONORS LINEAR ALGEBRA  
  • MATH 1530 - ADVANCED CALCULUS 1  
  • STAT 1151 - INTRODUCTION TO PROBABILITY  
  • STAT 1152 - INTRODUCTION TO MATHEMATICAL STATISTICS

Major

Actuarial Mathematics, BS

Students wishing to pursue a major in Actuarial Mathematics must complete both MATH 0220 and MATH 0230 or their equivalents with a letter grade of C or better before declaring actuarial mathematics as their major. Students will be required to take 63 credits, of which 46 will be in Mathematics and Statistics. Specific requirements are:

Prerequisites

Complete both of the following courses.

• MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1  
• MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2

Basic Calculus

Choose one of the following courses.

• MATH 0240 - ANALYTIC GEOMETRY AND CALCULUS 3

Analysis
Choose one of the following courses.

- MATH 0413 - INTRO THEORETICAL MATHEMATICS
- MATH 0450 - INTRODUCTION TO ANALYSIS

Professional Development

- MATH 0500 - PROFESSIONAL DEVELOPMENT

Linear algebra

Choose one of the following courses.

- MATH 1180 - LINEAR ALGEBRA 1
- MATH 1185 - HONORS LINEAR ALGEBRA

Differential Equations

Choose one of the following courses.

- MATH 1270 - ORDINARY DIFFERENTIAL EQUATIONS 1
- MATH 1275 - HONORS ORDINARY DIFFERENTIAL EQUATIONS 1

Actuarial Mathematics

Complete all of the following courses.

- MATH 0470 - ACTUARIAL MATHEMATICS 1
- MATH 1119 - APPLIED PROBABILITY FOR ACTUARIAL MATHEMATICS
- MATH 1121 - ACTUARIAL MATHEMATICS 2
- MATH 1126 - PREDICTIVE ANALYTICS 1

Applied Mathematics

Choose one of the following pairs of courses.

- MATH 1122 - ACTUARIAL MATHEMATICS 3
- MATH 1123 - ACTUARIAL MATHEMATICS 4
  or
- MATH 1128 - ACTUARIAL MATHEMATICS 5
- MATH 1129 - ACTUARIAL MATHEMATICS 6

Numerical Methods

Choose one of the following courses.

- MATH 1070 - NUMERICAL MATHEMATICAL ANALYSIS
- MATH 1080 - NUMERICAL MATH: LINEAR ALGEBRA
- MATH 1127 - PREDICTIVE ANALYTICS 2
Economics

- ECON 0100 - INTRODUCTION TO MICROECONOMIC THEORY
- ECON 0110 - INTRODUCTION TO MACROECONOMIC THEORY

Computer Programming

Choose one of the following courses.

- CS 0007 - INTRODUCTION TO COMPUTER PROGRAMMING
- CS 0008 - INTRODUCTION TO COMPUTER PROGRAMMING WITH PYTHON
- CS 0010 - INTRODUCTION TO COMPUTING FOR SYSTEMS ENGINEERS
- CS 0011 - INTRODUCTION TO COMPUTING FOR SCIENTISTS
- CS 0012 - INTRODUCTION TO COMPUTING FOR THE HUMANITIES
- CS 0401 - INTERMEDIATE PROGRAMMING USING JAVA
- STAT 1301 - STATISTICAL PACKAGES
- BUSBIS 1060 - INTRODUCTION TO INFORMATION SYSTEMS
- ENGR 0012 - INTRO TO ENGINEERING COMPUTING

Statistics

- STAT 1152 - INTRODUCTION TO MATHEMATICAL STATISTICS

Finance

Choose one of the following courses.

- BUSERV 1920 - FINANCIAL ACCOUNTING
  And one of the following courses.
- BUSFIN 1311 - CORPORATE FINANCE
- ECON 1440 - ECONOMICS OF CORPORATION FINANCE

Additional Requirements

- **Declaring the major:** Before declaring this major, students must complete MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2 or MATH 0235 - HONORS 1 - VARIABLE CALCULUS, or their equivalents, with a letter grade of C or better. Additionally, Students must complete MATH 0470 - ACTUARIAL MATHEMATICS 1 with a letter grade of B or better to declare this major.
- **Grade requirements:** A letter grade of C or higher is necessary in all courses required for the major.
- **Satisfactory/No Credit option:** No course that counts toward the major can be taken on the Satisfactory/No Credit (S/NC) basis.
- **Writing (W) requirement:** Students must complete at least one writing-intensive course (W-course) in the major. MATH 1110 - INDUSTRIAL MATHEMATICS is a W-course option for this major.

**Applied Mathematics, BS**

Students majoring in Applied Mathematics must complete 40 credits in mathematics, distributed as follows. Since different program emphases are possible, students should consult the advisor as early as possible in regards to selection of courses:
Calculus

- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
- MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2
- MATH 0240 - ANALYTIC GEOMETRY AND CALCULUS 3

Professional Development

- MATH 0500 - PROFESSIONAL DEVELOPMENT

Introductory theoretical course

- MATH 0413 - INTRO THEORETICAL MATHEMATICS
- MATH 0420 - INTRO THEORY 1-VARIABLE CALCULUS

Upper-level required courses

One of the following courses

- MATH 1180 - LINEAR ALGEBRA 1
- MATH 1185 - HONORS LINEAR ALGEBRA

One of the following courses

- MATH 1270 - ORDINARY DIFFERENTIAL EQUATIONS 1
- MATH 1275 - HONORS ORDINARY DIFFERENTIAL EQUATIONS 1

Numerical Mathematics:

choose one of the following courses

- MATH 1070 - NUMERICAL MATHEMATICAL ANALYSIS
- MATH 1080 - NUMERICAL MATH: LINEAR ALGEBRA
- MATH 1100 - LINEAR PROGRAMMING
- MATH 1101 - AN INTRODUCTION TO OPTIMIZATION
- MATH 1110 - INDUSTRIAL MATHEMATICS

Applied Analysis:

choose one of the following courses

- MATH 1550 - VECTOR ANALYSIS AND APPLICATIONS
- MATH 1560 - COMPLEX VARIABLES & APPLICATIONS
- MATH 1570 - INTRODUCTION TO FOURIER ANALYSIS

Differential Equations:
choose one of the following courses

- MATH 1280 - ORDINARY DIFFERENTIAL EQUATIONS 2
- MATH 1470 - PARTIAL DIFFERENTIAL EQUATIONS 1

One of the following courses

- MATH 1110 - INDUSTRIAL MATHEMATICS
- MATH 1360 - MODELING IN APPLIED MATH 1
- MATH 1370 - INTRODUCTION TO COMPUTATIONAL NEUROSCIENCE
- MATH 1380 - MATH BIOLOGY

Physics courses

- PHYS 0174 - BASIC PHYSICS, SCIENCE AND ENGINEERING 1 (INTEGRATED)
- PHYS 0175 - BASIC PHYSICS, SCIENCE AND ENGINEERING 2 (INTEGRATED)

Computer Science:

choose one of the following courses

- CS 0007 - INTRODUCTION TO COMPUTER PROGRAMMING
- CS 0008 - INTRODUCTION TO COMPUTER PROGRAMMING WITH PYTHON
- CS 0010 - INTRODUCTION TO COMPUTING FOR SYSTEMS ENGINEERS
- CS 0011 - INTRODUCTION TO COMPUTING FOR SCIENTISTS
- CS 0012 - INTRODUCTION TO COMPUTING FOR THE HUMANITIES
- CS 0401 - INTERMEDIATE PROGRAMMING USING JAVA

Statistics:

choose one of the following courses

- MATH 1510 - MATHEMATICAL THEORY OF PROBABILITY
- STAT 1000 - APPLIED STATISTICAL METHODS
- STAT 1100 - STATISTICS AND PROBABILTY FOR BUSINESS MANAGEMENT
- STAT 1151 - INTRODUCTION TO PROBABILITY

Other Requirements and Recommendations

- Students interested in graduate study are strongly advised to take MATH 1530 - ADVANCED CALCULUS 1 and MATH 1540 - ADVANCED CALCULUS 2. These two courses may be substituted for the Applied Analysis and the Differential Equations courses, respectively.
- Students interested in pursuing secondary education certification should take the following courses in addition to the courses required for the major.
- MATH 0430 - INTRO ABSTRACT ALGEBRAIC SYSTEMS
- MATH 1020 - APPLIED ELEMENTARY NUMBER THEORY
- MATH 1230 - THE BIG IDEAS OF MATHEMATICS
- MATH 1290 - TOPICS IN GEOMETRY
• A grade of C or higher is necessary in all courses required for the major. A minimum GPA of 2.0 in departmental courses is required for graduation.
• Students must complete at least one writing-intensive course (W-course) in the major.
• No course that counts toward the major may be taken on the S/NC basis.
• Eligible courses are listed on the right side of this sheet and should be chosen in consultation with the major advisor.
• Students must complete a minimum of 12 credits of related coursework within the major; subjects include chemistry, computer science, economics, physics, statistics, and certain areas of engineering. These courses should be chosen in consultation with the major advisor.
• Honors in Applied Mathematics is granted if the student:
  • Completes all requirements for the major
  • Completes the following courses with a letter grade of B or higher:
    • MATH 1470 - PARTIAL DIFFERENTIAL EQUATIONS 1
    • MATH 1530 - ADVANCED CALCULUS 1
    • MATH 1540 - ADVANCED CALCULUS 2
  • A 2000-level course in lieu of a 1000-level elective
  • Completes an honors thesis under the direction of a member of the Department of Mathematics faculty, or completes a 2000-level course in lieu of the honors thesis.
• The statistics requirement is waived for students seeking honors in Applied Mathematics.

Mathematical Biology, BS

Mathematics has assumed a significant role in the study of biological systems, in the development of biotechnology, and in advances in medicine. The construction and analysis of mathematical models of biological systems allows for the precise formulation of theoretical ideas, the testing of assumptions that may not be easily accessible experimentally, and the generation of novel predictions that can guide future research. The University of Pittsburgh is known for its excellence in biomedical research, and the Department of Mathematics at Pitt includes prominent faculty with strong records of teaching and research in mathematical biology.

The major in Mathematical Biology will help students develop an expertise in thinking mathematically about biological systems. Students will acquire fundamental skills in mathematical analysis and simulation, specialized experience in mathematical modeling in biology and neuroscience, and knowledge of particular areas of biology. These tools will prepare students to participate in undergraduate research and to go on to use quantitative methods in biotechnology, medicine, and other fields.

Requirements

The Mathematical Biology major will require the completion of 43 credits in mathematics.

Calculus courses

All three of the following courses are required.

• MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
• MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2
• MATH 0240 - ANALYTIC GEOMETRY AND CALCULUS 3

Introductory theoretical courses

Both of the following courses are required. Qualified students may substitute MATH 0450 - INTRODUCTION TO ANALYSIS for MATH 0413 and MATH 0420.
- MATH 0413 - INTRO THEORETICAL MATHEMATICS
- MATH 0420 - INTRO THEORY 1-VARIABLE CALCULUS

Professional Development

- MATH 0500 - PROFESSIONAL DEVELOPMENT

Linear Algebra

Choose one of the following courses.

- MATH 1180 - LINEAR ALGEBRA 1
- MATH 1185 - HONORS LINEAR ALGEBRA

Differential Equations

Choose one of the following courses.

- MATH 1270 - ORDINARY DIFFERENTL EQUATIONS 1
- MATH 1275 - HONORS ORDINARY DIFFERENTIAL EQUATIONS 1

Mathematical biology courses

Both of the following courses are required.

- MATH 1370 - INTRODUCTION TO COMPUTATIONAL NEUROSCIENCE
- MATH 1380 - MATH BIOLOGY

Numerical mathematics courses

Both of the following courses are required.

- MATH 1070 - NUMERICAL MATHEMATICAL ANALYSIS
- MATH 1080 - NUMERICAL MATH: LINEAR ALGEBRA

Applied analysis courses

Choose two courses from the following list.

- MATH 1280 - ORDINARY DIFFERNTL EQUATIONS 2
- MATH 1470 - PARTIAL DIFFERENTIAL EQUATIONS 1
- MATH 1530 - ADVANCED CALCULUS 1
- MATH 1550 - VECTOR ANALYSIS AND APPLICATIONS
- MATH 1560 - COMPLEX VARIABLES & APPLICATIONS

Introductory biology courses

Both of the following courses are required.

- BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1
Biology or Neuroscience courses

Choose two of the following courses. At least one of the chosen courses must be at the 1000 level.

- BIOSC 0350 - GENETICS or
- BIOSC 0355 - UHC GENETICS
- BIOSC 0370 - ECOLOGY
- BIOSC 1000 - BIOCHEMISTRY
- BIOSC 1070 - HUMAN PHYSIOLOGY-UHC or
- BIOSC 1250 - HUMAN PHYSIOLOGY or
- BIOSC 1870 - ANIMAL PHYSIOLOGY
- BIOSC 1130 - EVOLUTION
- BIOSC 1320 - POPULATION BIOLOGY
- BIOSC 1470 - BIOPHYSICAL CHEMISTRY
- BIOSC 1500 - CELL BIOLOGY
- BIOSC 1520 - DEVELOPMENTAL BIOLOGY
- BIOSC 1540 - COMPUTATIONAL BIOLOGY
- BIOSC 1760 - IMMUNOLOGY
- NROSCI 1000 - INTRO TO NEUROSCIENCE or
- NROSCI 1003 - UHC INTRODUCTION TO NEUROSCIENCE
- NROSCI 1011 - FUNCTIONAL NEUROANATOMY
- NROSCI 1012 - NEUROPHYSIOLOGY
- NROSCI 1017 - SYNAPTIC TRANSMISSION
- NROSCI 1034 - NEURAL BASIS OF COGNITION

Probability or Statistics course

Choose one of the following courses.

- MATH 1510 - MATHEMATICAL THEORY OF PROBABILITY
- STAT 1000 - APPLIED STATISTICAL METHODS
- STAT 1100 - STATISTICS AND PROBABILITY FOR BUSINESS MANAGEMENT

Other Requirements and Recommendations

Students pursuing the Mathematical Biology major are encouraged to take CHEM 0110 - GENERAL CHEMISTRY 1 and CHEM 0120 - GENERAL CHEMISTRY 2, as these courses will satisfy the Dietrich School of Arts and Sciences breadth requirement in natural science and will expand their biology and neuroscience course options. Several of the BIOSC courses that fulfill requirements for this major have prerequisites, but some do not have prerequisites. PHYS 0174 - BASIC PHYSICS, SCIENCE AND ENGINEERING 1 (INTEGRATED) and PHYS 0175 - BASIC PHYSICS, SCIENCE AND ENGINEERING 2 (INTEGRATED) also carry a high degree of relevance for Mathematical Biology majors.

- Mathematical Biology students who plan to continue in graduate studies are advised to take advanced calculus, MATH 1530 - ADVANCED CALCULUS 1 and MATH 1540 - ADVANCED CALCULUS 2.
1370 - INTRODUCTION TO COMPUTATIONAL NEUROSCIENCE and MATH 1380 - MATH BIOLOGY introduce students to techniques for independent research; students in these courses are encouraged to pursue research opportunities in Mathematical Biology that are available locally and nationally.

- A grade of C or higher is necessary in all courses required for the major. A minimum GPA of 2.0 in departmental courses is required for graduation.
- No course that counts toward the major may be taken on the S/NC basis.
- Students must complete at least one writing-intensive course (W-course) in the major. Either MATH 0413 or MATH 0450 will satisfy this requirement.
- Students seeking honors in Mathematical Biology will earn departmental honors if they meet the following requirements.
  - Fulfill all requirements for the major.
  - Complete the following courses with a letter grade of A- or better.
  - MATH 1370 - INTRODUCTION TO COMPUTATIONAL NEUROSCIENCE
  - MATH 1380 - MATH BIOLOGY
  - Complete the following courses with a letter grade of B or higher.
  - MATH 1530 - ADVANCED CALCULUS 1
  - One 2000-level mathematics course in lieu of an upper level elective
  - Complete one of the following conditions.
    - An honors thesis under the direction of a faculty member in the Department of Mathematics; for students seeking a BPhil from the University Honors College, this requirement could be satisfied by the Honors College thesis
    - A 2000-level mathematics course with a letter grade of B or higher, in addition to the course use for the third item, above.
- Although not required, the department strongly recommends that honors degree candidates take the intermediate honors courses MATH 1185 and MATH 0450 during their freshman or sophomore year.

Mathematics, BS

Requirements

Calculus courses

- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
- MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2
- MATH 0240 - ANALYTIC GEOMETRY AND CALCULUS 3

Introductory theoretical courses

- MATH 0413 - INTRO THEORETICAL MATHEMATICS
- MATH 0420 - INTRO THEORY 1-VARIABLE CALCULUS
- MATH 0430 - INTRO ABSTRACT ALGEBRAIC SYSTEMS

Professional Development

- MATH 0500 - PROFESSIONAL DEVELOPMENT

Upper-level required courses
Required course

- MATH 1270 - ORDINARY DIFFERENTIAL EQUATIONS 1

One of the following courses

- MATH 1180 - LINEAR ALGEBRA 1
- MATH 1185 - HONORS LINEAR ALGEBRA

One of the following courses

- MATH 1020 - APPLIED ELEMENTARY NUMBER THEORY
- MATH 1025 - INTRODUCTION TO MATHEMATICAL CRYPTOGRAPHY
- MATH 1050 - COMBINATORIAL MATHEMATICS
- MATH 1250 - ABSTRACT ALGEBRA
- MATH 1310 - GRAPH THEORY

Upper-level elective courses

Three of the following courses

- MATH 1020 - APPLIED ELEMENTARY NUMBER THEORY
- MATH 1025 - INTRODUCTION TO MATHEMATICAL CRYPTOGRAPHY
- MATH 1050 - COMBINATORIAL MATHEMATICS
- MATH 1070 - NUMERICAL MATHEMATICAL ANALYSIS
- MATH 1080 - NUMERICAL MATH: LINEAR ALGEBRA
- MATH 1100 - LINEAR PROGRAMMING
- MATH 1101 - AN INTRODUCTION TO OPTIMIZATION
- MATH 1110 - INDUSTRIAL MATHEMATICS
- MATH 1250 - ABSTRACT ALGEBRA
- MATH 1280 - ORDINARY DIFFERENTIAL EQUATIONS 2
- MATH 1290 - TOPICS IN GEOMETRY
- MATH 1310 - GRAPH THEORY
- MATH 1350 - INTRODUCTION TO DIFFERENTIAL GEOMETRY
- MATH 1360 - MODELING IN APPLIED MATH 1
- MATH 1370 - INTRODUCTION TO COMPUTATIONAL NEUROSCIENCE
- MATH 1380 - MATH BIOLOGY
- MATH 1410 - INTRODUCTION FOUNDATIONS OF MATHEMATICS
- MATH 1470 - PARTIAL DIFFERENTIAL EQUATIONS 1
- MATH 1510 - MATHEMATICAL THEORY OF PROBABILITY
- MATH 1530 - ADVANCED CALCULUS 1
- MATH 1540 - ADVANCED CALCULUS 2
- MATH 1550 - VECTOR ANALYSIS AND APPLICATIONS
- MATH 1560 - COMPLEX VARIABLES & APPLICATIONS
- MATH 1570 - INTRODUCTION TO FOURIER ANALYSIS
- MATH 1700 - INTRODUCTION TO TOPOLOGY
- MATH 1800 - ADVANCED TOPICS IN MATHEMATICS
• MATH 2XXX, 3XXX 3-credit graduate level course
• STAT 1631 - INTERMEDIATE PROBABILITY
• STAT 1632 - INTERMEDIATE MATHEMATICAL STATISTICAL

Physics course

• PHYS 0174 - BASIC PHYSICS, SCIENCE AND ENGINEERING 1 (INTEGRATED)

Programming course

Choose one

• CS 0007 - INTRODUCTION TO COMPUTER PROGRAMMING
• CS 0008 - INTRODUCTION TO COMPUTER PROGRAMMING WITH PYTHON
• CS 0010 - INTRODUCTION TO COMPUTING FOR SYSTEMS ENGINEERS
• CS 0011 - INTRODUCTION TO COMPUTING FOR SCIENTISTS
• CS 0012 - INTRODUCTION TO COMPUTING FOR THE HUMANITIES
• CS 0401 - INTERMEDIATE PROGRAMMING USING JAVA

Other Requirements and Recommendations

• Majors must complete 40 credits (see below for curriculum details on each major) with a grade of C or higher in each course for the major and at least a 2.00 GPA overall in mathematics courses. The S/NC grade option is not permitted.
• MATH 0413 - INTRO THEORETICAL MATHEMATICS meets the departmental W requirement.
• Credit by examination is usually available only through the placement testing offered for incoming students.
• Students considering graduate work in mathematics should be aware that many programs require a reading knowledge of one or two second languages from among French, German, and Russian.
• To graduate with honors in mathematics or applied mathematics, students must meet the following requirements in addition to the other requirements for the major.
• Completion of all mathematics requirements
• Completion of each of the following courses with a grade of B or better:
  • MATH 1250 - ABSTRACT ALGEBRA
  • MATH 1530 - ADVANCED CALCULUS 1
  • MATH 1540 - ADVANCED CALCULUS 2
• A graduate level mathematics course
• Completion of an honors thesis under the direction of a member of the mathematics faculty or completion of a second graduate level mathematics course in lieu of the honors thesis
• Students interested in graduate study in mathematics are advised to take MATH 1530 and MATH 1540. Those interested in pursuing secondary education certification in mathematics are required to take MATH 1020, MATH 1230, and MATH 1290. MATH 1230 does not count toward the major.
The statistics requirement is waived for mathematics majors graduating with honors. Although not required, it is recommended that honors candidates take the intermediate honors courses MATH 0450 - INTRODUCTION TO ANALYSIS and MATH 1185 - HONORS LINEAR ALGEBRA during their freshman and sophomore years.

Minor

Mathematics Minor
Prerequisites

- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
- MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2
- MATH 0240 - ANALYTIC GEOMETRY AND CALCULUS 3

Lower-level Mathematics courses

Students must complete at least three courses (nine credits) of coursework at or above MATH 0250 - MATRIX THEORY & DIFFERENTIAL EQUATIONS.

Upper-level Mathematics courses

Students must complete at least two courses (six credits) of MATH courses at the 1000-level.

Additional information and requirements

- Students may not count MATH 0400 - FINITE MATHEMATICS toward the minor.
- Students may not count both MATH 0280 - INTRO TO MATRICES & LINEAR ALG and MATH 1180 - LINEAR ALGEBRA 1 toward the minor.
- Students may not count both MATH 0290 - DIFFERENTIAL EQUATIONS and MATH 1270 - ORDINARY DIFFERENTIAL EQUATIONS 1 toward the minor.
- A letter grade of C or higher is required in each course for completion of this minor.
- Students may not take any course for the minor on the S/NC basis.

Department of Music

The Department of Music makes music through composition, improvisation, and performance and explores music's meaning in the structure of individual works, the relations between them, and their place in the cultures that produce them. One of the most exciting things about music is that it brings together different types of thought and action. The most sensory and practical things and the most theoretical and abstract ones cannot be separated in the musician's world. Thus, music enjoys a special place in the endeavor to understand ourselves. The program for majors is designed to introduce students to all the above ideas and activities, and students throughout the University are invited to join in any of them. In support of this multifaceted program, the department has assembled a diverse faculty, including experts in composition, performance, theory, history, jazz, and ethnomusicology and is committed to the principle of conducting its activities within an atmosphere that encourages communication and cooperation within that diversity. The department also welcomes double majors from all colleges within the University. For more information on the major, the minor, and the Department of Music, see http://www.music.pitt.edu/.

Note: Students considering declaring a music major or minor should take the Music Theory Placement test, available at the Dietrich School of Arts and Sciences Advising Center. A sufficient score will exempt them from the required MUSIC 0100 - FUNDAMENTALS OF WESTERN MUSIC class. This exam takes about 60 minutes to complete.

Major

Music, BA

The Department of Music offers an innovative undergraduate program that confers a bachelor's degree and a minor in music. The Department's dynamic faculty offer strong support for undergraduate research and creative expression. Undergraduates also engage with the Department's renowned graduate programs and are encouraged to actively participate in all aspects of the Department's research and performance culture.
Undergraduates choose a course of study from among five tracks: Composition, Global & Popular Music, Jazz, Music & Cultural History, and Performance. The tracks offer students a broad foundation in music scholarship while tailoring specific elements of music study to the student's individual talents and interests.

To declare this major, students must complete MUSIC 0100 - FUNDAMENTALS OF WESTERN MUSIC with a letter grade of B- or better, or achieve a sufficient score to on the Music placement exam to receive credit for this course.

Prerequisite theory course

Students may test out of this prerequisite by completing the Music Theory placement exam with a sufficient score. Students who take this course must earn a letter grade of B- or better to declare the Music major.

- MUSIC 0100 - FUNDAMENTALS OF WESTERN MUSIC

BA Requirements

Required courses for all tracks

The following courses are required for all tracks in the Music major. Additional requirements specific to each track are listed later in the program description.

- MUSIC 0222 - HISTORY OF WESTERN MUSIC TO 1750
- MUSIC 0411 - THEORY 1
- MUSIC 0412 - MUSICIANSHIP 1
- MUSIC 0416 - MUSICIANSHIP 2
- MUSIC 1310 - GLOBAL AND POPULAR MUSIC
- MUSIC 1903 - SPECIAL TOPICS-DIRECTED RESEARCH
- MUSIC 1904 - SENIOR SEMINAR

Choose one of the following courses

- MUSIC 0711 - HISTORY OF JAZZ
- MUSIC 1326 - AFRICAN-AMERICAN MUSIC IN U.S.

Composition Track

The Composition track is intended for students interested primarily in creating music-of any genre, acoustic or electroacoustic. Students pursuing this track must take MUSIC 0222 - HISTORY OF WESTERN MUSIC TO 1750, indicated in the core course list.

Theory courses

All of the following courses are required for the Composition track.

- MUSIC 0224 - HISTORY OF WEST MUSIC SINCE 1750
- MUSIC 0415 - THEORY 2
- MUSIC 0417 - THEORY 3
- MUSIC 0419 - THEORY 4

Composition courses
Choose two of the following composition courses.

- MUSIC 1421 - COMPOSITION 1
- MUSIC 1422 - COMPOSITION 2
- MUSIC 1431 - INSTRUMENTATION & ORCHESTRATION
- MUSIC 1441 - ELECTRONIC AND COMPUTER MUSIC 1
- MUSIC 1442 - ELECTRONIC AND COMPUTER MUSIC 2
- Any MUSIC course at the 1200- to 1400-level

Jazz Track

The Jazz track provides opportunities for each student to develop their individual interests and strengths in jazz performance, composition, and scholarship.

Choose one of the following courses

Of these two courses, students must take the one that was not taken as a core course.

- MUSIC 0711 - HISTORY OF JAZZ
- MUSIC 1326 - AFRICAN-AMERICAN MUSIC IN U.S.

Required Jazz focused courses

All of the following courses are required for the Jazz track.

- MUSIC 1450 - MUSIC PRODUCTION AND RECORDING
- MUSIC 1741 - JAZZ IMPROVISATION 1
- MUSIC 1742 - JAZZ IMPROVISATION 2
- Six MUSIC performance courses, at 1 credit each, to include at least one term of participation in MUSIC 0640 - JAZZ ENSEMBLE

Choose one of the following courses

- MUSIC 1731 - JAZZ COMPOSITION AND ARRANGING 1
- MUSIC 1732 - JAZZ COMPOSITION AND ARRANGING 2

Global and Popular Music Track

The Global and Popular Music track offers students an interdisciplinary grounding in the study of diverse musical expressions in contemporary and historical perspective.

- MUSIC 0415 - THEORY 2
- ANTH 0780 - INTRODUCTION TO CULTURAL ANTHROPOLOGY
- One upper-level popular music course
- Three upper-level ethno music courses

Music and Cultural History Track

The Music and Cultural History track provides students with a background in the history, culture, and practice of music in the Western imagination.
Music History courses

- MUSIC 0224 - HISTORY OF WEST MUSIC SINCE 1750
- MUSIC 0415 - THEORY 2
- Two MUSIC courses at the 1200-level
- Two MUSIC courses at the 1200- to 1400-level
- Three MUSIC performance courses, at 1 credit each

Choose one of the following courses

- MUSIC 0711 - HISTORY OF JAZZ
- MUSIC 1326 - AFRICAN-AMERICAN MUSIC IN U.S.

Performance Track

The Performance track is intended for students who want to explore and improve their skills as performers in a wide range of genres.

All of the following courses

- MUSIC 0224 - HISTORY OF WEST MUSIC SINCE 1750
- MUSIC 0415 - THEORY 2
- MUSIC 0417 - THEORY 3
- MUSIC 0419 - THEORY 4

Choose one of the following courses

Of these two courses, students must take the one that was not taken as a core course.

- MUSIC 0711 - HISTORY OF JAZZ
- MUSIC 1326 - AFRICAN-AMERICAN MUSIC IN U.S.

One composition course

- MUSIC 1421 - COMPOSITION 1
- MUSIC 1422 - COMPOSITION 2
- MUSIC 1431 - INSTRUMENTATION & ORCHESTRATION
- MUSIC 1441 - ELECTRONIC AND COMPUTER MUSIC 1
- MUSIC 1442 - ELECTRONIC AND COMPUTER MUSIC 2

Six performance courses

Six MUSIC performance courses, at 1 credit each

One of the following composition courses

- MUSIC 1421 - COMPOSITION 1
- MUSIC 1422 - COMPOSITION 2
Other requirements

- Students may test out of MUSIC 0100 MUSIC 0100 - FUNDAMENTALS OF WESTERN MUSIC by passing the Music Theory placement exam, which is administered in the Dietrich School Advising Center, 201 Thackeray Hall.
- A minimum GPA of 2.0 in departmental courses is required for graduation.
- No course that counts toward the major can be taken on an S/NC basis.
- Students must complete at least one W-course in the major.
- All students interested in taking private lessons must complete a Request for Private Lessons form, available in 110 Music Building. Music majors have first priority in scheduling private lessons, which cost an additional $395 per term.
- To graduate with departmental honors, a student must earn a minimum 3.25 GPA overall, a minimum 3.50 GPA in the music courses with no grade lower than a B-.

Minor

Music Minor

The music minor offers a coherent sequence of courses that will provide students with a reasonably broad introduction to the historical, theoretical, and practical branches of music. Required courses, totaling 19 credits, are as follows.

Prerequisite theory course

- MUSIC 0100 - FUNDAMENTALS OF WESTERN MUSIC

Required courses

- MUSIC 0222 - HISTORY OF WESTERN MUSIC TO 1750
  or
- MUSIC 0224 - HISTORY OF WEST MUSIC SINCE 1750
- MUSIC 0411 - THEORY 1
- MUSIC 0412 - MUSICIANSHIP 1
- MUSIC 0416 - MUSICIANSHIP 2
- MUSIC 0711 - HISTORY OF JAZZ
  or
- MUSIC 1326 - AFRICAN-AMERICAN MUSIC IN U.S.
- MUSIC 1310 - GLOBAL AND POPULAR MUSIC
  One course from the 1200- to 1400-level
  Three performance courses, at 1 credit each

Note

Performance includes private lessons and/or ensemble participation. It must include at least one term of participation in a world music ensemble.
Department of Neuroscience

Neuroscience is the study of the biology and function of the central nervous system, with a special focus on the brain. The field has emerged during the past two decades as part of the explosive growth of research and interest in the neural sciences. An autonomous major in neuroscience was developed at the University of Pittsburgh in 1983, and it is among the largest undergraduate programs in neuroscience in the country, with nearly 300 students as majors.

The Bachelor of Science degree in neuroscience prepares students for the following:

- Advanced study in health-related fields, such as medicine, dentistry, pharmacy, public health, physical therapy, physician assistant, and exercise physiology;
- Graduate training in neuroscience and related fields in the biological sciences, and for a future career in a university, research institute, pharmaceutical company, or hospital;
- Research assistant positions in pharmaceutical, hospital, and university settings; and
- Public and private high school teaching following the completion of the teacher certification program in the School of Education.

The neuroscience major is designed to provide a broad and challenging sequence of courses in biological sciences, chemistry, mathematics, and physics, in addition to introductory and advanced courses in neuroscience. Students also may receive credit for original research projects they conduct in collaboration with faculty members. The relatively small size of the upper-level courses, the excellence of teaching, and the opportunity for research have been found to be especially attractive features of the major. A minor in neuroscience is also available. For more information on the major, the minor, and the Department of Neuroscience, see www.neuroscience.pitt.edu.

Major

Neuroscience, BS

Major requirements

Neuroscience majors must complete a minimum of 59 credits, detailed as follows.

Required courses

- NROSCI 1000 - INTRO TO NEUROSCIENCE or
- NROSCI 1003 - UHC INTRODUCTION TO NEUROSCIENCE

- NROSCI 1011 - FUNCTIONAL NEUROANATOMY or
- NROSCI 1013 - FUNCTIONAL NEUROANATOMY (UHC)

- NROSCI 1012 - NEUROPHYSIOLOGY
- NROSCI 1017 - SYNAPTIC TRANSMISSION
- NROSCI 1049 - RESEARCH TOPICS IN NEUROSCIENCE

Writing-intensive course

Choose one of the following writing-intensive courses.

- NROSCI 1800 - NEUROSCIENCE/WRITING PRACTICUM
- NROSCI 1801 - NEUROSCIENCE/WRITING PRACTICUM
- NROSCI 1962 - THESIS RESEARCH/WRITING
Advanced elective courses

Choose two courses from the following list.

- NROSCI 1014 - SPEAKING OF SCIENCE
- NROSCI 1026 - FOUNDATIONS OF CLINICAL NEUROPHYSIOLOGY
- NROSCI 1030 - PSYCHTRC DISORDERS AND BRAIN FUNCTION
- NROSCI 1032 - FUNCTIONAL ORGANIZATION OF THE HUMAN NERVOUS SYSTEM
- NROSCI 1033 - NEURAL BASIS OF VISION
- NROSCI 1034 - NEURAL BASIS OF COGNITION
- NROSCI 1036 - NEUROBIOLOGY OF AGING
- NROSCI 1038 - NEUROBIOLOGY OF AGING
- NROSCI 1039 - NEURAL PLASTICITY
- NROSCI 1140 - BIO BASIS OF LEARNING AND MEMORY-UHC

Capstone course

Choose one of the following courses.

- NROSCI 1027 - NEUROSCIENCE PROSEMINAR
- NROSCI 1901 - INDEPENDENT STUDY

Note

Course descriptions and current syllabi can be found by clicking on the Teaching Faculty link on the right of the Neuroscience Undergraduate home page at www.neuroscience.pitt.edu/programs/undergraduate.

Co-requisite courses

It is recommended that students complete introductory biology, chemistry, and physics courses during freshman and sophomore years. Premed students should also take PHYS 0212 - INTRODUCTION TO LABORATORY PHYSICS or PHYS 0219 - BASIC LABORATORY PHYSICS SCIENCE AND ENGINEERING and a statistics course to meet medical school requirements.

Students must complete BIOSC 0150, BIOSC 0160, CHEM 0110, and CHEM 0120 with a letter grade of C or better to declare the major.

- BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1
- BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2
- BIOSC 1000 - BIOCHEMISTRY

- BIOSC 1250 - HUMAN PHYSIOLOGY or
- NROSCI 1250 - HUMAN PHYSIOLOGY

- CHEM 0110 - GENERAL CHEMISTRY 1
- CHEM 0120 - GENERAL CHEMISTRY 2
- CHEM 0310 - ORGANIC CHEMISTRY 1
- CHEM 0320 - ORGANIC CHEMISTRY 2
- CHEM 0345 - ORGANIC LABORATORY
- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
Required laboratory courses

Choose one course from each of the following two groups.

- BIOSC 0050 - FOUNDATIONS OF BIOLOGY LABORATORY 1
- BIOSC 0057 - FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 1
- BIOSC 0058 - FOUNDATIONS OF BIOLOGY SEA-PHAGES LABORATORY 1

- BIOSC 0060 - FOUNDATIONS OF BIOLOGY LABORATORY 2
- BIOSC 0067 - FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 2
- BIOSC 0068 - FOUNDATIONS OF BIOLOGY SEA-PHAGES LABORATORY 2

Grade requirements for the major

- Students majoring in neuroscience must take all required courses for a letter grade.
- NROSCI 1000 - INTRO TO NEUROSCIENCE or NROSCI 1003 - UHC INTRODUCTION TO NEUROSCIENCE must be passed with a B- or better. Grades in the remaining core courses and two advanced electives are averaged. All of these courses must be passed, and the average GPA must be 2.00 or better.
- In the co-requisites, a passing grade below C may be accepted only if it is balanced with higher grades, so that the total GPA in co-requisite courses is 2.0 or better. This requirement applies collectively to corequisite courses taught in the Department of Neuroscience (e.g., NROSCI 1070 - HUMAN PHYSIOLOGY-UHC) and those taught in other departments.
- Majors must have a grade of B- in NROSCI 1000 - INTRO TO NEUROSCIENCE or NROSCI 1003 - UHC INTRODUCTION TO NEUROSCIENCE as a prerequisite to taking any other departmental core or advanced elective courses.
- The co-requisite courses in biology and chemistry satisfy the related area requirement for this major.

Department Honors and Undergraduate Research

- To qualify for departmental honors, students need to maintain a minimum overall GPA of 3.25 as well as a GPA of 3.25 in the neuroscience major. In addition, students must complete a substantial amount of experimental neuroscience research on an approved research project and give a public presentation of the work. The full faculty of the department approves departmental honors after consideration of all eligible students.
- The Department of Neuroscience encourages interested undergraduate majors to gain research experience within an active neuroscience laboratory. The department is a world-class research department committed to high quality research and sharing the excitement of scientific exploration with trainees. Majors are encouraged to take advantage of the opportunity to do meaningful neuroscience research while still undergraduates. It is not unusual for majors to report their research at scientific meetings and to be published. While research experience itself has strong benefits, it is also useful for interacting more closely with professors and enhancing preparation for graduate or medical school. Most undergraduates who enroll in research for credit are interested in completing an independent project that results in an undergraduate thesis.

Minor

Neuroscience Minor
Minor Requirements

A minimum of 14 credits is required for a neuroscience minor. The minor includes the following:

- NROSCI 1000 - INTRO TO NEUROSCIENCE or NROSCI 1003 - UHC INTRODUCTION TO NEUROSCIENCE with a grade of C or better

- Three core courses:
  - NROSCI 1011 - FUNCTIONAL NEUROANATOMY
  - NROSCI 1012 - NEUROPHYSIOLOGY
  - NROSCI 1017 - SYNAPTIC TRANSMISSION

- As an alternative to the three core courses, students may take two of the core courses and at least one advanced elective from the following list.
  - NROSCI 1030 - PSYCHTRC DISORDERS AND BRAIN FUNCTION
  - NROSCI 1032 - FUNCTIONAL ORGANIZATION OF THE HUMAN NERVOUS SYSTEM
  - NROSCI 1034 - NEURAL BASIS OF COGNITION
  - NROSCI 1035 - CONTROL OF MOVEMENT
  - NROSCI 1036 - NEUROBIOLOGY OF AGING
  - NROSCI 1040 - BIOLOGICAL BASIS OF LEARNING AND MEMORY
  - NROSCI 1041 - DEVELOPMENTAL NEUROSCIENCE
  - NROSCI 1042 - NEUROCHEMICAL BASIS OF BEHAVIOR

Department of Philosophy

The University of Pittsburgh has one of the best philosophy departments in the country, one with a long tradition of fine teaching. A major in philosophy provides excellent preparation for such professions as law, medicine, and business. The conceptual sophistication imparted by training in philosophy is invaluable in virtually any field of learning or any serious profession. For example, students who are majoring in biology, psychology, history, or computer science would do well to pick up a second major in philosophy, something the Department of Philosophy encourages by offering a standard major track along with its more time-consuming intensive major track. A minor in philosophy is also available. While the department encourages students to major in philosophy, either alone or as a second major, only rarely does it encourage students to pursue philosophy in graduate school as preparation for a scholarly career. Students who do especially well in either the standard or intensive major program are graduated with honors in philosophy. Because of the national reputation of the philosophy department, a major in philosophy or honors in philosophy should materially help University of Pittsburgh graduates get into good graduate schools or professional schools. For more information on the program and the Department of Philosophy, see www.philosophy.pitt.edu.

Minor

Philosophy Minor

Minor Requirements

The philosophy minor requires six 3-credit courses (18 credits total) to be distributed as follows:

- PHIL 0500 - INTRODUCTION TO LOGIC or
- One 1500 level course (Logic group)

- PHIL 0200 - HISTORY OF ANCIENT PHILOSOPHY or
- PHIL 1020 - PLATO

- PHIL 0210 - HISTORY OF MODERN PHILOSOPHY or
PHIL 1100 - RATIONALISM OR
PHIL 1140 - EMPIRICISM

- Any course in the 1300s Value Theory, Social and Political Philosophy
- Two additional 1000-level courses must be completed.

Any course in moral, social, or political philosophy

PHIL 0300 - INTRODUCTION TO ETHICS is preferred, but any of the following is acceptable:

- PHIL 0320 - SOCIAL PHILOSOPHY
- PHIL 0330 - POLITICAL PHILOSOPHY
- PHIL 0350 - PHILOSOPHY AND PUBLIC ISSUES
- PHIL 0360 - INTRODUCTION TO BIOMEDICAL ETHICS

Note:

At least one of the above four courses (numbers one-four) must be taken at the 1000 level.

Philosophy, BA

Students pursuing the Philosophy major should choose either the Standard track or the Intensive track. The requirements for each of these tracks is described below.

Standard track

Required courses

Select one course from each of the four following groups. At least one of these four courses must be taken at the 1000-level.

Ancient Philosophy

- PHIL 0200 - HISTORY OF ANCIENT PHILOSOPHY
- PHIL 0202 - HISTORY ANCIENT PHILOSOPHY/Writing Practicum
- PHIL 1020 - PLATO
- PHIL 1040 - ARISTOTLE
- PHIL 1070 - TOPICS IN ANCIENT PHILOSOPHY

Modern Philosophy

- PHIL 0210 - HISTORY OF MODERN PHILOSOPHY
- PHIL 0212 - HISTORY OF MODERN PHILOSOPHY/Writing Practicum
- PHIL 1110 - RATIONALISM
- PHIL 1140 - EMPIRICISM
- PHIL 1170 - KANT

Ethics
• PHIL 0300 - INTRODUCTION TO ETHICS
• PHIL 0302 - INTRODUCTION TO ETHICS/WRITING PRACTICUM
• PHIL 0320 - SOCIAL PHILOSOPHY
• PHIL 0322 - SOCIAL PHILOSOPHY/WRITING PRACTICUM
• PHIL 0330 - POLITICAL PHILOSOPHY
• PHIL 0332 - POLITICAL PHILOSOPHY/WRITING PRACTICUM
• PHIL 0380 - WOMEN AND PHILOSOPHY
• Any PHIL course at the 1300-level

Logic

• PHIL 0500 - INTRODUCTION TO LOGIC
• PHIL 1500 - SYMBOLIC LOGIC

Elective courses

Select four 1000-level electives beyond any chosen in the previous groups.

Intensive track

Philosophy courses

Select one course from each of the following three groups. At least one of these three courses must be taken at the 1000-level.

Ancient Philosophy

• PHIL 0200 - HISTORY OF ANCIENT PHILOSOPHY
• PHIL 0202 - HISTORY ANCIENT PHILOSOPHY/WRITING PRACTICUM
• PHIL 1020 - PLATO
• PHIL 1040 - ARISTOTLE
• PHIL 1070 - TOPICS IN ANCIENT PHILOSOPHY

Modern Philosophy

• PHIL 0210 - HISTORY OF MODERN PHILOSOPHY
• PHIL 0212 - HISTORY OF MODERN PHIOSOPHYL/WRITING PRACTICUM
• PHIL 1110 - RATIONALISM
• PHIL 1140 - EMPIRICISM
• PHIL 1170 - KANT

Logic

• PHIL 0500 - INTRODUCTION TO LOGIC
• PHIL 1500 - SYMBOLIC LOGIC

Elective courses
Group 1

Select five 1000-level courses from the following list. Courses taken to fulfill the Philosophy course requirement cannot be counted toward this elective course requirement.

- History of Philosophy: PHIL 1020 - PLATO through
- Value Theory: PHIL 1300 - ETHICAL THEORY through PHIL 1390 - PHILOSOPHY OF LAW
- Metaphysics and Epistemology: PHIL 1420 - PHILOSOPHY OF LANGUAGE through PHIL 1490 - TOPICS IN SYSTEMATIC PHILOSOPHY
- Logic and Philosophy of Science: PHIL 1500 - SYMBOLIC LOGIC through PHIL 1690 - TOPICS IN PHILOSOPHY OF SCIENCE
- Any 1000-level PHIL course except PHIL 1904 or PHIL 1941

Group 2

Select four courses from the following list. Courses taken to fulfill the Philosophy course requirement cannot be counted toward this elective course requirement.

- PHIL 1940 - HONORS THESIS/MAJORS
- PHIL 1941 - HONORS THESIS 2/MAJORS
- Any PHIL course not taken to fulfill a previous requirement

Other requirements

Other requirements for the intensive Philosophy major:

- **Grade requirements:** Students must earn at least a C in each course that is to count toward the major.
- **Writing (W) requirement:** Students must complete at least one W-course in the major.
- **Satisfactory/No Credit option:** There is no limit to the number of courses that can be taken on an S/NC basis.
- **Honors major requirements:** Students who complete the standard major, intensive major, or joint major will graduate with honors in philosophy if they have earned a grade of A- or better in at least six 1000-level PHIL courses, exclusive of PHIL 1902 and PHIL 1903.
- **Joint majors with philosophy:** Joint majors are not double majors but are multidisciplinary majors offered by two or more departments. The Department of Philosophy offers a joint major in Politics and Philosophy with the Department of Political Science, which is administered by the Department of Political Science. Consult the Department of Political Science for additional information.

**Department of Physics and Astronomy**

The Department of Physics and Astronomy offers three major degree options: a BS in physics, a BS in physics and astronomy, and a BA in astronomy. The BS degrees are intended for students who wish to prepare for graduate school in a scientific or technical discipline or who are interested in professional careers in which a background in physics or astronomy is appropriate. The BA degree is designed primarily for students who wish to develop a general scientific background appropriate for many careers including health-related professions or MBA programs. The Certificate in Photonics may be added by students in the bachelor of science physics program.

Students planning to pursue a degree within the department are urged to consult a departmental advisor at any time during the freshman year and should obtain a copy of the department's brochure for undergraduates in 100 Allen Hall.

*The department offers the physics minor, best suited for students from other schools. The department wishes to emphasize that its 0080s courses, in both physics and astronomy, use little mathematics and are especially designed for liberal arts students.*
Major

Astronomy, BA

The University of Pittsburgh's internationally recognized Department of Physics and Astronomy has been an important leader at the frontier of science and, with 500 PhD alumni, has launched many distinguished careers. Now, at the onset of the 21st Century, the department is maintaining its traditions of excellence and innovation while leading the field in breakthroughs that promise an ever-deeper understanding of the universe. From sub-nuclear particles to the unimaginably large, from the birth of the universe to the edge of technology - and at the intersection of quantum and classical physics - our faculty and students explore the fundamental laws of nature. Students may expect to pursue research that influences many fields, including biology, mathematics, medicine, chemistry, engineering, and computer science.

The BA in astronomy requires the completion of 39 credits in physics and astronomy and six credits in communication and history and philosophy of science, distributed as follows.

Introductory Physics courses

Select one of the following pairs of courses.

- PHYS 0174 - BASIC PHYSICS, SCIENCE AND ENGINEERING 1 (INTEGRATED)
- PHYS 0175 - BASIC PHYSICS, SCIENCE AND ENGINEERING 2 (INTEGRATED)
- PHYS 0475 - INTRODUCTION TO PHYSICS, SCIENCE AND ENGINEERING 1
- PHYS 0476 - INTRODUCTION TO PHYSICS, SCIENCE AND ENGINEERING 2

Introductory Astronomy course

The following course is required.

- ASTRON 0113 - INTRODUCTION TO ASTROPHYSICS

Intermediate and Advanced Physics courses

All of the following courses are required.

- PHYS 0477 - INTRODUCTION TO THERMAL PHYSICS, RELATIVITY AND QUANTUM MECHANICS
- PHYS 0481 - PRINCIPLES OF MODERN PHYSICS 2
- PHYS 1310 - UNDERGRADUATE SEMINAR
- PHYS 1331 - MECHANICS

Laboratory courses

Both of the following courses are required.

- PHYS 0219 - BASIC LABORATORY PHYSICS SCIENCE AND ENGINEERING or
- PHYS 0520 - MODERN PHYSICS MEASUREMENTS

- ASTRON 1263 - TECHNIQUES OF ASTRONOMY

Intermediate and Advanced Astronomy courses
Select at least two courses from the following list, for a total of at least six credits.

- ASTRON 1120 - STARS; STELLAR STRUCTURE AND EVOLUTION
- ASTRON 1121 - GALAXIES AND COSMOLOGY
- ASTRON 1122 - THE SOLAR SYSTEM AND EXTRASOLAR PLANETS

Mathematics courses

All of the following courses are required.

- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
- MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2
- MATH 0240 - ANALYTIC GEOMETRY AND CALCULUS 3
- MATH 0290 - DIFFERENTIAL EQUATIONS or
- MATH 1270 - ORDINARY DIFFERENTIAL EQUATIONS 1

Science electives

Select at least two of the following courses, for a total of at least six credits.

- Some courses on this list have pre-requisites. Be sure to check the course enrollment requirements.
- If GEOL 1701 - GEOLOGY OF THE PLANETS is used to meet the Science Elective requirement, it cannot also be used to meet the Intermediate and Advanced Astronomy requirement.
- BIOC 0150 - FOUNDATIONS OF BIOLOGY 1
- BIOC 0160 - FOUNDATIONS OF BIOLOGY 2
- CHEM 0110 - GENERAL CHEMISTRY 1
- CHEM 0110 - UHC GENERAL CHEMISTRY 1
- CHEM 0120 - GENERAL CHEMISTRY 2
- CHEM 0120 - UHC GENERAL CHEMISTRY 2
- CHEM 0310 - ORGANIC CHEMISTRY 1
- CHEM 0310 - UHC ORGANIC CHEMISTRY 1
- CHEM 0320 - ORGANIC CHEMISTRY 2
- CHEM 0320 - UHC ORGANIC CHEMISTRY 2
- CHEM 1410 - PHYSICAL CHEMISTRY 1
- CHEM 1420 - PHYSICAL CHEMISTRY 2
- CS 0401 - INTERMEDIATE PROGRAMMING USING JAVA
- CS 0445 - ALGORITHMS AND DATA STRUCTURES 1
- GEOL 1410 - EXPLORATION GEOPHYSICS
- GEOL 1701 - GEOLOGY OF THE PLANETS
- MATH 0280 - INTRO TO MATRICES & LINEAR ALG
- MATH 1180 - LINEAR ALGEBRA 1
- MATH 1185 - HONORS LINEAR ALGEBRA
- MATH 1470 - PARTIAL DIFFERENTIAL EQUATIONS 1
- MATH 1550 - VECTOR ANALYSIS AND APPLICATIONS
- MATH 1560 - COMPLEX VARIABLES & APPLICATIONS
- PHYS 1321 - COMPUTATIONAL METHODS IN PHYSICS
- PHYS 1341 - THERMODYNAMICS AND STATISTICAL MECHANICS
- PHYS 1351 - INTERMEDIATE ELECTRICITY AND MAGNETISM
- PHYS 1370 - INTRODUCTION TO QUANTUM MECHANICS 1
- PHYS 1378 - INTRODUCTION TO NUCLEAR AND PARTICLE PHYSICS
- STAT 1151 - INTRODUCTION TO PROBABILITY
- STAT 1152 - INTRODUCTION TO MATHEMATICAL STATISTICS

History and Philosophy of Science or science policy and management courses

Select at least one of the following courses, for a total of at least three credits.

- PHYS 0087 - PHYSICS AND SOCIETY
- BUSERV 1915 - INTRODUCTION TO MANAGEMENT
- PUBSRV 1315 - MANAGING PROJECTS AND CONTRACTS
- Any course in the Department of History and Philosophy of Science

Writing and Communication courses

Select at least one of the following courses, for a total of at least three credits.

- COMMRC 0320 - MASS COMMUNICATION AND SOCIETY
- COMMRC 0520 - PUBLIC SPEAKING
- COMMRC 1105 - TELEVISION AND SOCIETY
- ENGCMP 0400 - WRITTEN PROFESSIONAL COMMUNICATION
- ENGCMP 1101 - LANGUAGE OF SCIENCE AND TECHNOLOGY
- ENGCMP 1400 - GRANT WRITING FOR NONPROFITS
- ENGWRT 1330 - INTERMEDIATE NONFICTION: SCENE AND POINT-OF-VIEW
- ENGWRT 1394 - SCIENCE WRITING
- LING 1000 - INTRODUCTION TO LINGUISTICS

Science Communication concentration

This concentration replaces the three-credit writing or communication course with a three-credit writing course and 12 credits of communication courses. Students pursuing this concentration may replace the six credits of science electives with the communication course requirements.

Required writing course

The following course is the required writing-intensive (W) course for this concentration in the major.

- ENGCMP 0400 - WRITTEN PROFESSIONAL COMMUNICATION

Communication courses

Select at least four of the following courses, for a total of at least 12 credits.

- COMMRC 0320 - MASS COMMUNICATION AND SOCIETY
- COMMRC 0520 - PUBLIC SPEAKING
- COMMRC 1105 - TELEVISION AND SOCIETY
- ENGCMP 1101 - LANGUAGE OF SCIENCE AND TECHNOLOGY
- ENGCMP 1400 - GRANT WRITING FOR NONPROFITS
Science Breadth concentration

This concentration provides broader exposure to other sciences in comparison to the standard Astronomy BA, while going into greater depth in physics and astronomy than a more generic Natural Sciences major. With proper selection of courses, this concentration provides the necessary requirements to apply for admission to medical school while roughly matching the credit requirements of the Astronomy BA.

Reduced Physics requirement

The following course is the required Physics course for this concentration in the major. It may also be used to fulfill a requirement in the Physics minor.

- PHYS 0481 - PRINCIPLES OF MODERN PHYSICS 2

Reduced writing requirement

The three-credit writing or communication requirement is waived for students pursuing this concentration.

Added science requirements

Select two of the three following groups of courses, for a total of at least 16 credits.

- BIOSC 0057 - FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 1
- BIOSC 0067 - FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 2
  And one of the following pairs of courses
- BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1
- BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2
  or
- BIOENG 1070 - INTRODUCTORY CELL BIOLOGY 1
- BIOENG 1071 - INTRODUCTION TO CELL BIOLOGY 2

- CHEM 0110 - GENERAL CHEMISTRY 1 or
- CHEM 0710 - UHC GENERAL CHEMISTRY 1
  and
- CHEM 0120 - GENERAL CHEMISTRY 2 or
- CHEM 0720 - UHC GENERAL CHEMISTRY 2

- GEOL 0890 - OCEANOGRAPHY

Added science electives

Select one of the three following groups, for a total of at least six credits.

- CHEM 0310 - ORGANIC CHEMISTRY 1 or
- CHEM 0730 - UHC ORGANIC CHEMISTRY 1
- CHEM 0320 - ORGANIC CHEMISTRY 2 or
Additional information

Grade requirements

A minimum GPA of 2.0 in departmental courses is required for graduation.

Satisfactory/No Credit option

No PHYS or ASTRON courses beyond the introductory level may be taken on an S/NC basis.

Writing (W) requirement

Students must complete at least one writing-intensive (W) course in the major.

Honors major requirements

Honors in astronomy is granted if in addition to fulfilling all requirements for the major, the student maintains a GPA of 3.2 or higher in the major, a cumulative GPA of 3.0 or higher, completes ASTRON 1903 or PHYS 1903 Directed Research, submits a paper detailing the research within the department, and presents the research in a public forum (i.e. at the University's Science Symposium, the undergraduate poster fair hosted by the University Honors College).

Physics and Astronomy, BS

Physics and Astronomy, BS

Physics and Astronomy Major Requirements

The BS in physics and astronomy requires the completion of 50 credits in physics and astronomy distributed as follows.

Introductory Physics courses:

(select one group)

- PHYS 0174 - BASIC PHYSICS, SCIENCE AND ENGINEERING 1 (INTEGRATED) and
- PHYS 0175 - BASIC PHYSICS, SCIENCE AND ENGINEERING 2 (INTEGRATED)
- PHYS 0475 - INTRODUCTION TO PHYSICS, SCIENCE AND ENGINEERING 1 and
• PHYS 0476 - INTRODUCTION TO PHYSICS, SCIENCE AND ENGINEERING 2

Introductory Astronomy course

• ASTRON 0113 - INTRODUCTION TO ASTROPHYSICS

Intermediate and advanced Physics courses

• PHYS 0477 - INTRODUCTION TO THERMAL PHYSICS, RELATIVITY AND QUANTUM MECHANICS
• PHYS 1310 - UNDERGRADUATE SEMINAR
• PHYS 1321 - COMPUTATIONAL METHODS IN PHYSICS
• PHYS 1331 - MECHANICS
• PHYS 1341 - THERMODYNAMICS AND STATISTICAL MECHANICS
• PHYS 1351 - INTERMEDIATE ELECTRICITY AND MAGNETISM
• PHYS 1370 - INTRODUCTION TO QUANTUM MECHANICS 1

Laboratory courses

Choose at least seven credits

Required courses

• PHYS 0219 - BASIC LABORATORY PHYSICS SCIENCE AND ENGINEERING or
• PHYS 0520 - MODERN PHYSICS MEASUREMENTS
• ASTRON 1263 - TECHNIQUES OF ASTRONOMY

Additional courses

• PHYS 0525 - ANALOG AND DIGITAL ELECTRONICS
• PHYS 1361 - WAVE MOTION AND OPTICS
• PHYS 1426 - MODERN PHYSICS LABORATORY

Intermediate and advanced Astronomy courses

• ASTRON 1120 - STARS; STELLAR STRUCTURE AND EVOLUTION
• ASTRON 1121 - GALAXIES AND COSMOLOGY
• ASTRON 1122 - THE SOLAR SYSTEM AND EXTRASOLAR PLANETS *

Note:

* GEOL 1701 - GEOLOGY OF THE PLANETS may be substituted for this course.

Science elective

Choose at least three credits *

• CHEM 0110 - GENERAL CHEMISTRY 1 or
CHEM 0710 - UHC GENERAL CHEMISTRY 1

CHEM 0120 - GENERAL CHEMISTRY 2 or
CHEM 0720 - UHC GENERAL CHEMISTRY 2

CHEM 1410 - PHYSICAL CHEMISTRY 1
CS 0401 - INTERMEDIATE PROGRAMMING USING JAVA
CS 0445 - ALGORITHMS AND DATA STRUCTURES 1
GEOL 1410 - EXPLORATION GEOPHYSICS
GEOL 1701 - GEOLOGY OF THE PLANETS **
MATH 1470 - PARTIAL DIFFERENTIAL EQUATIONS 1
MATH 1550 - VECTOR ANALYSIS AND APPLICATIONS
MATH 1560 - COMPLEX VARIABLES & APPLICATIONS
PHYS 0481 - PRINCIPLES OF MODERN PHYSICS 2
PHYS 1371 - INTRODUCTION TO QUANTUM MECHANICS 2
PHYS 1372 - ELECTROMAGNETIC THEORY
PHYS 1373 - MATHEMATICAL METHODS IN PHYSICS
PHYS 1378 - INTRODUCTION TO NUCLEAR AND PARTICLE PHYSICS
STAT 1151 - INTRODUCTION TO PROBABILITY
STAT 1152 - INTRODUCTION TO MATHEMATICAL STATISTICS

Note:

* Some of these courses have prerequisites

** If this course is taken as a science elective, it cannot be used to satisfy the requirement for the nine credits of intermediate and advanced courses.

Prerequisite Mathematics courses

- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
- MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2
- MATH 0240 - ANALYTIC GEOMETRY AND CALCULUS 3
- MATH 0280 - INTRO TO MATRICES & LINEAR ALG or
- MATH 1180 - LINEAR ALGEBRA 1 or
- MATH 1185 - HONORS LINEAR ALGEBRA
- MATH 0290 - DIFFERENTIAL EQUATIONS or
- MATH 1270 - ORDINARY DIFFERENTL EQUATIONS 1

Honors major requirements

Honors in physics and astronomy is granted if in addition to fulfilling all requirements for the major, the student meets the following requirements.

- Maintains a GPA of 3.2 or higher in the major
- Maintains a cumulative GPA of 3.0 or higher
- Completes ASTRON 1903 - DIRECTED RESEARCH or PHYS 1903 - DIRECTED RESEARCH
• Submits a paper detailing the research within the department and presents the research in a public forum (i.e. at the University's Science Symposium or the Undergraduate Poster Fair hosted by the University Honors College).

Education concentration

This concentration removed nine credits from the standard Physics and Astronomy major requirements if one of the courses listed below is taken as a science elective.

Additional education related courses

• PSYED 1001 - INTRO EDUCATIONAL PSYCHOLOGY
• TLL 1580 - FOUNDATIONS OF SPECIAL EDUC

Physics courses removed

• PHYS 1321 - COMPUTATIONAL METHODS IN PHYSICS
• PHYS 1341 - THERMODYNAMICS AND STATISTICAL MECHANICS
• PHYS 1370 - INTRODUCTION TO QUANTUM MECHANICS 1

Required laboratory courses

Choose at least eight credits

• PHYS 0219 - BASIC LABORATORY PHYSICS SCIENCE AND ENGINEERING
• PHYS 0520 - MODERN PHYSICS MEASUREMENTS
• PHYS 1361 - WAVE MOTION AND OPTICS
• ASTRON 1263 - TECHNIQUES OF ASTRONOMY

Required selection of science electives

• CHEM 0110 - GENERAL CHEMISTRY 1
• CHEM 0120 - GENERAL CHEMISTRY 2
• PHYS 0481 - PRINCIPLES OF MODERN PHYSICS 2

Graduate School Preparation concentration

This concentration adds six credits to the standard Physics and Astronomy major requirements if one of the courses listed below is taken as a science elective.

Additional intermediate and advanced Physics courses

• PHYS 1371 - INTRODUCTION TO QUANTUM MECHANICS 2
• PHYS 1372 - ELECTROMAGNETIC THEORY
• PHYS 1373 - MATHEMATICAL METHODS IN PHYSICS

Physics, BS
Physics Major Requirements

- A minimum GPA of 2.0 in departmental courses is required for graduation. Honors majors must attain a minimum GPA of 3.2 in physics courses, a cumulative GPA of 3.09 or higher, completes PHYS 1903 Directed Research, submits a paper detailing the research within the department and presents the research in a public forum (i.e. at the University's Science Symposium or the Undergraduate Poster Fair hosted by UHC).
- No PHYS courses beyond the introductory level may be taken on an S/NC basis.
- Students must complete at least one W-course in the major; students should consult with their department advisor about this requirement.

Physics major, BS

The physics major requires the completion of 47 credits in physics distributed as follows.

Note:

While not required, the introductory level honors courses, PHYS 0475, PHYS 0476, and PHYS 0520 are appropriate particularly for students seeking degrees in physics.

Introductory Physics courses:

(select one group)

- PHYS 0174 - BASIC PHYSICS, SCIENCE AND ENGINEERING 1 (INTEGRATED) and
- PHYS 0175 - BASIC PHYSICS, SCIENCE AND ENGINEERING 2 (INTEGRATED)

- PHYS 0475 - INTRODUCTION TO PHYSICS, SCIENCE AND ENGINEERING 1 and
- PHYS 0476 - INTRODUCTION TO PHYSICS, SCIENCE AND ENGINEERING 2

Intermediate and advanced Physics courses

- PHYS 0477 - INTRODUCTION TO THERMAL PHYSICS, RELATIVITY AND QUANTUM MECHANICS
- PHYS 1310 - UNDERGRADUATE SEMINAR
- PHYS 1321 - COMPUTATIONAL METHODS IN PHYSICS
- PHYS 1331 - MECHANICS
- PHYS 1341 - THERMODYNAMICS AND STATISTICAL MECHANICS
- PHYS 1351 - INTERMEDIATE ELECTRICITY AND MAGNETISM
- PHYS 1370 - INTRODUCTION TO QUANTUM MECHANICS 1

Laboratory courses

Choose at least 10 credits

- PHYS 0219 - BASIC LABORATORY PHYSICS SCIENCE AND ENGINEERING or
- PHYS 0520 - MODERN PHYSICS MEASUREMENTS

- PHYS 0525 - ANALOG AND DIGITAL ELECTRONICS
Science electives

Choose at least nine credits from groups A and B. At least three credits must come from a course in group B.

Group A

- BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1
- BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2
- BIOENG 1070 - INTRODUCTORY CELL BIOLOGY 1
- BIOENG 1071 - INTRODUCTION TO CELL BIOLOGY 2
- CHEM 0110 - GENERAL CHEMISTRY 1 or
- CHEM 0710 - UHC GENERAL CHEMISTRY 1
- CHEM 0120 - GENERAL CHEMISTRY 2 or
- CHEM 0720 - UHC GENERAL CHEMISTRY 2
- CHEM 0310 - ORGANIC CHEMISTRY 1 or
- CHEM 0730 - UHC ORGANIC CHEMISTRY 1
- CHEM 0320 - ORGANIC CHEMISTRY 2 or
- CHEM 0740 - UHC ORGANIC CHEMISTRY 2
- CS 0401 - INTERMEDIATE PROGRAMMING USING JAVA
- CS 0445 - ALGORITHMS AND DATA STRUCTURES 1
- ENGR 0240 - NANOTECHNOLOGY AND NANO-ENGINEERING
- STAT 1151 - INTRODUCTION TO PROBABILITY
- STAT 1152 - INTRODUCTION TO MATHEMATICAL STATISTICS

Group B

- ASTRON 1120 - STARS; STELLAR STRUCTURE AND EVOLUTION
- ASTRON 1121 - GALAXIES AND COSMOLOGY
- CHEM 1410 - PHYSICAL CHEMISTRY 1
- CHEM 1420 - PHYSICAL CHEMISTRY 2
- CHEM 1620 - ATOMS, MOLECULES AND MATERIALS
- ECE 1232 - INTRO LASERS & OPTICL ELECTNC
- ECE 1247 - SEMICONDUCTOR DEVICE THEORY
- GEOL 1410 - EXPLORATION GEOPHYSICS
- MATH 1470 - PARTIAL DIFFERENTIAL EQUATIONS 1
- MATH 1550 - VECTOR ANALYSIS AND APPLICATIONS
- MATH 1560 - COMPLEX VARIABLES & APPLICATIONS
- PHYS 0481 - PRINCIPLES OF MODERN PHYSICS 2
- PHYS 1374 - SOLID STATE PHYSICS
• PHYS 1375 - FOUNDATIONS OF NANOSCIENCE
• PHYS 1376 - INTRODUCTION TO BIOLOGICAL PHYSICS
• PHYS 1378 - INTRODUCTION TO NUCLEAR AND PARTICLE PHYSICS

Prerequisite Mathematics courses

• MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
• MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2
• MATH 0240 - ANALYTIC GEOMETRY AND CALCULUS 3

• MATH 0280 - INTRO TO MATRICES & LINEAR ALG or
• MATH 1180 - LINEAR ALGEBRA 1 or
• MATH 1185 - HONORS LINEAR ALGEBRA

• MATH 0290 - DIFFERENTIAL EQUATIONS or
• MATH 1270 - ORDINARY DIFFERENTL EQUATIONS 1

Departmental honors requirements

Honors in physics is granted if in addition to fulfilling all requirements for the major, the student maintains a GPA of 3.2 or higher in courses required for the major, maintains a cumulative GPA of 3.0 or higher, completes MATH 1903 Directed Research, submits a paper detailing the research within the department, and presents the research in a public forum (i.e. at the University's Science Symposium, or the Undergraduate Poster Fair hosted by UHC).

Education concentration

This concentration removes up to 10 credits of physics courses from the standard Physics major requirements. This concentration requires seven credits of lab courses instead of the standard 10 credits.

Additional education-related courses

• PSYED 1001 - INTRO EDUCATIONAL PSYCHOLOGY
• TLL 1580 - FOUNDATIONS OF SPECIAL EDUC

Courses that emphasize the broader impact of science

Select at least three credits.

• PHYS 0087 - PHYSICS AND SOCIETY

Required Science electives

Select one of the pairs from Group A, and take the indicated course in Group B.

• CHEM 0710 - UHC GENERAL CHEMISTRY 1
• CHEM 0720 - UHC GENERAL CHEMISTRY 2
• CHEM 0110 - GENERAL CHEMISTRY 1
• CHEM 0120 - GENERAL CHEMISTRY 2
• PHYS 0481 - PRINCIPLES OF MODERN PHYSICS 2
Physics courses removed

The following physics courses are not required for this concentration.

- PHYS 1321 - COMPUTATIONAL METHODS IN PHYSICS
- PHYS 1341 - THERMODYNAMICS AND STATISTICAL MECHANICS
- PHYS 1370 - INTRODUCTION TO QUANTUM MECHANICS 1

Graduate School Preparation concentration

This concentration adds at least six credits of Physics courses to the standard Physics major requirements. This concentration requires seven credits of lab courses instead of the standard 10 credits.

Additional intermediate and advanced Physics courses

- PHYS 1371 - INTRODUCTION TO QUANTUM MECHANICS 2
- PHYS 1372 - ELECTROMAGNETIC THEORY
- PHYS 1373 - MATHEMATICAL METHODS IN PHYSICS

Minor

Physics Minor

First level Physics course

Select one of the following courses.

- PHYS 0174 - BASIC PHYSICS, SCIENCE AND ENGINEERING 1 (INTEGRATED)
- PHYS 0475 - INTRODUCTION TO PHYSICS, SCIENCE AND ENGINEERING 1

Second level Physics course

Select one of the following courses.

- PHYS 0175 - BASIC PHYSICS, SCIENCE AND ENGINEERING 2 (INTEGRATED)
- PHYS 0476 - INTRODUCTION TO PHYSICS, SCIENCE AND ENGINEERING 2

Physics lab course

Select one of the following courses.

- PHYS 0219 - BASIC LABORATORY PHYSICS SCIENCE AND ENGINEERING
- PHYS 0520 - MODERN PHYSICS MEASUREMENTS

Principles of Physics course

Select one of the following courses.
• PHYS 0477 - INTRODUCTION TO THERMAL PHYSICS, RELATIVITY AND QUANTUM MECHANICS

Additional Physics course

Select one of the following courses.

• PHYS 0481 - PRINCIPLES OF MODERN PHYSICS 2
• PHYS 1374 - SOLID STATE PHYSICS
• PHYS 1375 - FOUNDATIONS OF NANOSCIENCE
• PHYS 1376 - INTRODUCTION TO BIOLOGICAL PHYSICS
• PHYS 1378 - INTRODUCTION TO NUCLEAR AND PARTICLE PHYSICS

Department of Political Science

A major in political science is designed to help students understand the complexity of political developments in the United States and throughout the world. The major also provides students with a broad education that will help them to prepare for a wide variety of careers in various levels of government service, law, education, journalism, business, and the nonprofit sector. Those interested in government service careers may wish to complement their study of political science with courses in public service offered through the College of General Studies and the Graduate School of Public and International Affairs.

The political science department offers many courses that meet the international/foreign cultures requirements of the core curriculum of the Dietrich School of Arts and Sciences, as well as requirements for the wide range of certificate programs sponsored by the University Center for International Studies (African Studies, Asian Studies, European Union Studies, Global Studies, Latin American Studies, Russian and East European Studies, West European Studies, Global Service Center).

Joint Major

Computational Social Science, BS

Computational Social Science

Degree Requirements

The major will comprise of the following for a total of 52/53 credits (explained in detail below):

• MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1

Foundations of Computational Social Science

The first set of courses will introduce students to enduring puzzles in social science research, emerging themes of computational social science as well as the approaches that social scientists, and information & network scientists use to solve problems. Courses in this section provide foundations of subject matter knowledge, basic computational tools that are relevant to social scientific theories and empirics (8 courses required as denoted below):

One Introduction to Social Science Class

• PS 0200 - AMERICAN POLITICS
• PS 0500 - INTERNATIONAL RELATIONS
• PS 0300 - COMPARATIVE POLITICS
Four Required Introductions to Computational Approaches and Basic Tools

Select one of the following courses.
- CS 0010 - INTRODUCTION TO COMPUTING FOR SYSTEMS ENGINEERS
- CS 0011 - INTRODUCTION TO COMPUTING FOR SCIENTISTS
- CS 0012 - INTRODUCTION TO COMPUTING FOR THE HUMANITIES

Required course
- CMPINF 0401 - INTERMEDIATE PROGRAMMING

Select two of the following courses.
- INFSCI 1500 - DATABASE MANAGEMENT CONCEPTS AND APPLICATIONS
- INFSCI 0410 - HUMAN-CENTERED SYSTEMS
- INFSCI 0610 - NETWORKS AND INFORMATION

One Social Science Research Design

- PS 0700 - RESEARCH METHODS IN POLITICAL SCIENCE

One Modeling Social Interactions and Motivations

- PS 1250 - GAMES, POLITICS, AND STRATEGY
- PS 1514 - POLITICAL STRATEGY INTERNATIONAL RELATIONS

Ethics and Computational Social Science

This section of the major will expose students to important debates on the ethics of governance, computing, and technological change. Issues covered will include tradeoffs between privacy/security and censorship/freedom, as well topics related to surveillance, propaganda, cyber-security and regulation. The goal is for students to not only be exposed to the moral and social consequences of technology at a conceptual level, but also the specific technical implementations that cause potential social problems (e.g., packet-sniffing) and could potentially expand the space for solutions (e.g. differential privacy) (2 courses).

Select two of the following courses.
- CMPINF 1205 - COMPARATIVE DIGITAL PRIVACIES
- CS 0590 - SOCIAL IMPLICATIONS OF COMPUTING TECHNOLOGY
- INFSCI 1600 - SECURITY AND PRIVACY
- PS 1693 - POLITICAL THEORY & THE FUTURE-ANALYSIS

Intermediate Techniques Applied to Social Science Content

The third set of courses will empower students to use computational tools to explore enduring social science puzzles and theories at scale. These paths are not meant to be formal areas of concentration, but options to gain competence in more focused areas. For example, some students might be interested in applying data mining techniques to problems in campaigns in American politics. Other students might want to focus in cyber-security and international relations. Both the tools and domains are organized to allow a set of choices that broaden interest in the major. Together, these courses allow our majors to have an evolved understanding of how computing and digital tools can be used in government, businesses, and NGOs. There are three sub-sets of classes in this section:

Computational Skills

Select two of the following courses.
Upper-level content courses

Students will delve deeper into their domain specialization with two classes. One class should be within a domain theme (such as international relations), another substantive class can be outside that theme (such as in comparative politics).

- American Politics list of 1000-level courses
- Comparative Politics list of 1000-level courses
- International Relations list of 1000-level courses.

Integrated Analytics

Students must complete one analytics-intensive course in the PS 1290X, PS 1390X, or PS 1590X series, or PS 1702.

Application Development Capstone

Select one of the following courses.

- INFSCI 1700 - DATA-DRIVEN COMMUNICATION
- INFSCI 1710 - DIRECTED RESEARCH
- INFSCI 1730 - INDEPENDENT STUDY
- INFSCI 1740 - TEAM-BASED CAPSTONE PROJECT
- PS 1782 - Application in Computational Social Science

Additional information

Grade requirements

All courses for the major must be completed with a C or better, and must be taken as a letter grade.

Writing requirement

Students must complete at least one writing-intensive (W) course in the major.

Calculus requirement

Completion of MATH 0220 with a C or better serves as a de facto pre-requisite of the major due to later appearance in requirements, and this requirement will be noted to students in advising materials.

Double majoring
There will be specific provisions for double majors on the A&S side, but it is expected that students can double major this with another social science major or a major in SCI (see page 11)

**Declaration**

Students can declare the major in the Spring of their first year, as normal. Students are strongly encouraged to be taking PS 0100 and have completed MATH 0220 prior to declaring.

**Honors**

To get honors designation within the major upon graduation, a 3.7 overall GPA is required across all major classes (with a 3.5 GPA overall).

**Major**

**Political Science, BA**

**Political Science Major Requirements**

The major requires the completion of 33 credits.

The political science department offers a large number of courses in four substantive fields: American Politics, Comparative Politics, International Relations, and Political Theory. Core courses provide a survey of each field and with the methods employed in the contemporary study of politics. The field courses, at 1000-level, provide students with advanced coursework in each of these areas of specialization. The combination of core and field courses provides students with a comprehensive overview of political science as a discipline while permitting students to concentrate in a particular field or fields.

**Core Courses**

Students take all five of the core courses, which provide first and second year students with a survey of each of these fields and with the methods employed in the contemporary study of politics.

- **PS 0200 American Political Process:** An introduction to the institutions and political processes in the United States. The course surveys the presidency, Congress, and the judicial system as well as political behavior, public opinion, political attitudes, and the party system.
- **PS 0300 Comparative Politics:** An introduction to political systems outside the United States. The course surveys a variety of theoretical approaches to the comparison of political systems and an examination of the political processes, institutions, and current political developments in a variety of political systems in all of the major regions of the world.
- **PS 0500 World Politics:** An introduction to the study of foreign policy, covering the international political environment in which nation-states and other actors operate, as well as the specific policies adopted by particular states.
- **PS 0600 Political Theory and Analysis:** An introduction to the history of Western political ideas, including the thought of Plato, Aristotle, Machiavelli, Locke, Mill, and Marx.
- **PS 0700 Research Methods in Political Science:** An introduction to the methods used in political science research, covering the logic of social scientific inquiry, the basics of research design, and the quantitative and qualitative methods that are commonly used by political scientists to investigate important questions about the political world.

**Field Courses**
At the 1000 level, students must take a total of six courses (18 credits), distributed across a major field (three courses), a minor field (two courses) and one course in an elective field. In the major field, one of the courses must be a capstone seminar.

In each of the four substantive undergraduate fields of political science, a wide variety of advanced (1000-level) courses is offered on a regular basis. Some courses are offered annually, while others are offered less frequently. For details on course offerings and content, see the Undergraduate Course Descriptions.

American Politics

- PS 1201 - CONSTITUTION AND CIVIL LIBERTIES
- PS 1202 - AMERICAN CONSTITUTIONAL LAW
- PS 1203 - JUDICIAL POLITICS
- PS 1204 - WOMEN IN POLITICS
- PS 1211 - LEGISLATIVE PROCESS
- PS 1212 - AMERICAN PRESIDENCY
- PS 1213 - LAW AND POLITICS
- PS 1230 - INTEREST GROUP POLITICS
- PS 1231 - POLITICAL PARTIES AND ELECTIONS
- PS 1233 - POLITICAL PSYCHOLOGY
- PS 1234 - ELECTORAL BEHAVIORS AND DEMOCRATIC PROCESS
- PS 1235 - MEDIA AND POLITICS
- PS 1240 - THE POLITICS OF DIVERSITY
- PS 1250 - GAMES, POLITICS, AND STRATEGY
- PS 1252 - STATE GOVERNMENT
- PS 1261 - AMERICAN PUBLIC POLICY
- PS 1275 - RELIGION AND AMERICAN POLITICS
- PS 1281 - CAPSTONE SEMINAR IN AMERICAN POLITICS

Comparative Politics

- PS 1302 - POLITICAL DEVELOPMENT
- PS 1311 - WESTERN EUROPEAN GOVERNMENT AND POLITICS
- PS 1317 - POLITICS OF THE EUROPEAN UNION
- PS 1321 - LATIN AMERICAN POLITICS
- PS 1324 - US-LATIN AMERICAN RELATIONS
- PS 1328 - AUTHORITARIAN STATECRAFT AND THE ARTS OF RESISTANCE
- PS 1330 - EUROPEAN UNION SEMINAR
- PS 1332 - GOVERNMENT AND POLITICS IN CONTEMPORARY CHINA
- PS 1333 - GOVERNMENT AND POLITICS OF JAPAN
- PS 1336 - BUSINESS AND POLITICAL ECONOMY IN MODERN CHINA
- PS 1341 - GOVERNMENT AND POLITICS USSR/RUSSIAN FEDERATION
- PS 1348 - XENOPHOBIA IN MODERN EUROPE
- PS 1351 - GOVERNMENT AND POLITICS OF THE MIDDLE EAST
- PS 1352 - INTRODUCTION TO AFRICAN POLITICS
- PS 1357 - THE POLITICS OF FOOD, LAND, AND SUSTAINABILITY
- PS 1361 - COMPARATIVE POLITICAL PARTY SYSTEMS
- PS 1381 - CAPSTONE SEMINAR IN COMPARATIVE POLITICS
International Relations

- PS 1501 - THEORY OF INTERNATIONAL RELATIONS
- PS 1503 - INTERNATIONAL ORGANIZATION
- PS 1504 - NATIONALISM
- PS 1509 - CONFLICT AND WAR THEORY
- PS 1510 - COLDWAR: SOVIET UNION AND WEST 1917-91
- PS 1511 - AMERICAN FOREIGN POLICY
- PS 1536 - HUMAN SECURITY
- PS 1537 - PEACEKEEPING
- PS 1538 - THE POLITICS OF OIL AND NATURAL RESOURCES
- PS 1542 - GLOBAL ENVIRONMENTAL POLITICS
- PS 1543 - GLOBALIZATION AND INTERNATIONAL POLITICS
- PS 1581 - CAPSTONE SEMINAR IN INTERNATIONAL RELATIONS

Political Theory and Analysis

- PS 1601 - ANCIENT AND MEDIEVAL POLITICAL THOUGHT
- PS 1602 - EARLY MODERN AND ENLIGHTENMENT POLITICAL THOUGHT
- PS 1603 - MODERN AND CONTEMPORARY POLITICAL THOUGHT
- PS 1607 - AMERICAN POLITICAL THOUGHT
- PS 1612 - MARXISM
- PS 1614 - THEORIES OF JUSTICE
- PS 1619 - DEMOCRATIC THEORY
- PS 1622 - FEMINIST POLITICAL THOUGHT
- PS 1675 - POLITICS OF HUMAN RIGHTS
- PS 1681 - CAPSTONE SEMINAR IN POLITICAL THEORY

Additional Offerings

- PS 1702 - VISUALIZING AND UNDERSTANDING SOCIAL DATA
- PS 1900 - INTERNSHIP
- PS 1901 - INDEPENDENT STUDY
- PS 1902 - DIRECTED READING
- PS 1903 - DIRECTED RESEARCH
- PS 1910 - INSTITUTE OF POLITICS INTERNSHIP/SEMINAR

Capstone seminar

The University of Pittsburgh requires students to complete one writing-intensive course in their major. The Capstone Seminar, which is taken in the major field, fulfills the university-wide requirement of an intensive writing course (W-course) in the major and allows students to undertake advanced work under the direction of faculty in a smaller seminar setting.

Departmental honors requirements

Departmental honors are conferred upon students who maintain an overall GPA of 3.5 and achieve a GPA of 3.7 or better in political science.
Grade requirements

A minimum GPA of 2.0 in departmental courses is required for graduation. In addition, a student must earn a grade of at least C- for a course to satisfy a PS requirement.

Satisfactory/No Credit option

No course to be counted toward the major can be taken on an S/NC basis.

Political Science, BPHIL

Political Science Major Requirements

The major requires the completion of 33 credits.

The political science department offers a large number of courses in four substantive fields: American Politics, Comparative Politics, International Relations, and Political Theory. Core courses provide a survey of each field and with the methods employed in the contemporary study of politics. The field courses, at 1000-level, provide students with advanced coursework in each of these areas of specialization. The combination of core and field courses provides students with a comprehensive overview of political science as a discipline while permitting students to concentrate in a particular field or fields.

Political Science BS and BPhil

Outstanding and motivated students seeking an even more challenging academic experience, especially those who are considering graduate school, should consult with an advisor about the option of a BS or BPhil in Political Science. The BS degree requires the departmental minor field to be Methods and Models in Political Science (PS 1702 and PS 1710), as well as 12 credits of additional coursework in cognate fields and an original paper of high quality. The BPhil degree, which is offered through the University Honors College (UHC), requires a plan of cognate fieldwork and a thesis approved by the department and UHC. For more information on the BPhil, see www.honorscollege.pitt.edu/bphil-degree.

Second Language

None required beyond the requirements of Arts and Sciences. Study of a second language is highly recommended for students with an interest in politics outside of the United States and for all those considering graduate work in comparative politics or a career in government agencies concerned with international affairs.

Statistics

Not required for majors, but highly recommended for all those interested in graduate education in political science, business, or public policy.

Independent Study

Students who have completed the field course may explore a particular subject in greater depth in a tutorial with the appropriate faculty member. Permission of the instructor is required.

Political Science, BS

Political Science Major Requirements

The major requires the completion of 33 credits.
The political science department offers a large number of courses in four substantive fields: American Politics, Comparative Politics, International Relations, and Political Theory. Statistics

Not required for majors, but highly recommended for all those interested in graduate education in political science, business, or public policy.

Independent Study

Students who have completed the field course may explore a particular subject in greater depth in a tutorial with the appropriate faculty member. Permission of the instructor is required.

Minor

Political Science Minor

A minor in political science is composed of one core course and four field courses in one of the four fields of political science.

Internships

A wide range of internships related to the study of politics at the local, national, and international levels are available in both the public and private sectors in Pittsburgh, Washington D.C., and other major cities. Students must work closely with a faculty advisor to assure full academic credit.

Study Abroad

Majors in political science receive full academic credit for participation in all study abroad programs. The University of Pittsburgh is a participant in a wide range of programs of international study.

Honors Society

Students who have achieved a GPA of 3.0 in political science are encouraged to join Pi Sigma Alpha, the national honors society in political science. This society sponsors many extracurricular activities linked to the study of politics.
Advising

Questions about courses, departmental requirements, and extracurricular opportunities should be addressed to the undergraduate advisors.

Department of Psychology

The psychology major is part of the liberal arts program in the Dietrich School. As such, it provides students with the skills needed to succeed in a job and in graduate school, to think critically and communicate effectively about human behavior and related topics. The Department of Psychology also functions from the perspective that psychology is a natural science. The emphasis it places on research is evident in the foundation courses required to declare the psychology major (e.g., statistics, research methods), as well as in the focus on the scientific methods throughout the content of all other psychology courses. To complement their arts and sciences training, the department also encourages students to participate in directed research and/or supervised field placement opportunities. For more information on the psychology department and its programs, please visit www.psychology.pitt.edu

Psychology majors can participate in one of two major options:

Major

Psychology, BS

The psychology major is part of the liberal arts program in the Dietrich School. As such, it provides students with the skills needed to succeed in a job and in graduate school, to think critically and communicate effectively about human behavior and related topics. The Department of Psychology also functions from the perspective that psychology is a natural science. The emphasis it places on research is evident in the foundation courses required to declare the psychology major (e.g., statistics, research methods), as well as in the focus on the scientific methods throughout the content of all other psychology courses. To complement their arts and sciences training, the department also encourages students to participate in directed research and/or supervised field placement opportunities. For more information on the psychology department and its programs, please visit the Department of Psychology Web site.

Psychology majors can participate in one of two major options: General major in Psychology, and Honors in Psychology. Students who declare the Psychology major are automatically enrolled in the general major track. This track provides students with a broad background in psychology and a firm understanding of the scientific method. The majority of students remain in this track.

In addition to Dietrich School skills and General Education Requirements, psychology majors must complete 33 to 34 credits in psychology, four credits in statistics, and nine to 10 credits of co-requirements as described below. The honors track offers students a challenging and unique opportunity: to conduct their own, independent research study under the guidance of a faculty member. Additional course and GPA requirements apply. Students interested in pursuing the honors track should speak with an advisor in the Psychology Advising Office.

The following requirements apply to students who declare the Psychology major in spring 2020 term or later. Students who declared the major before spring 2020 should consult with the Psychology Advising Office.

One course in Statistics

The required course in statistics should be taken as early as possible; the contents of the course is relevant to many required psychology courses. The statistics course must be taken before a student can enroll in PSY 0036 - RESEARCH METHODS LECTURE and PSY 0037 - RESEARCH METHODS LAB.

Choose one of the following courses.

- STAT 0200 - BASIC APPLIED STATISTICS
- STAT 1000 - APPLIED STATISTICAL METHODS
- STAT 1100 - STATISTICS AND PROBABILITY FOR BUSINESS MANAGEMENT
Foundation courses

Three courses are required to declare the major; students must earn a C or better in all three foundation courses if they wish to graduate with a psychology major.

- PSY 0010 - INTRODUCTION TO PSYCHOLOGY
- PSY 0036 - RESEARCH METHODS LECTURE
- PSY 0037 - RESEARCH METHODS LAB

Core courses

Choose four courses from the following list.

- PSY 0105 - INTRODUCTION TO SOCIAL PSYCHOLOGY
- PSY 0205 - PSYCHOPATHOLOGY
- PSY 0310 - DEVELOPMENTAL PSYCHOLOGY
- PSY 0422 - COGNITIVE PSYCHOLOGY
- PSY 0505 - INTRODUCTION TO BIOPSYCHOLOGY or
- NROSCI 1000 - INTRO TO NEUROSCIENCE

Upper level

Choose two 1000-level courses, not to include the following courses

- PSY 1900 - SUPERVISED FIELD PLACEMENT
- PSY 1902 - DIRECTED INDIVIDUAL READING
- PSY 1903 - DIRECTED INDIVIDUAL RESEARCH S/NC
- PSY 1950 - PSYCHOLOGY SENIOR SEMINAR
- PSY 1970 - UNDERGRADUATE TEACHING ASSISTANT EXPERIENCE
- PSY 1973 - HONORS DIRECTED RESEARCH
- PSY 1975 - HONORS THESIS/MAJORS

Electives

Choose a course from any of the following levels.

- PSY 0100-level
- PSY 0300-level
- PSY 0400-level
- PSY 0500-level
- PSY 1000-level

The elective course cannot include any course used to fulfill a core requirement, any 1000-level requirement, or lab methods requirement. Experiential learning courses - PSY 1900, PSY 1902, and PSY 1903 may be used to fulfill this requirement. PSY 1950, PSY 1970, PSY 1973, and PSY 1975 may not be used to fulfill this requirement.

Laboratory

Choose one of the following courses.

- PSY 0405 - LEARNING AND MOTIVATION
Co-requirements

The Department of Psychology requires that students further develop their scientific skills through certain approved courses in math, biological sciences, and social sciences. A list of these approved courses is available in the Psychology Advising Office. The co-requirements may be used to fulfill Dietrich School General Education Requirements, where appropriate, or can be taken as separate courses.

Psychology majors must also follow these rules and requirements:

- Students who wish to declare a major in psychology must first complete PSY 0010 and the statistics course with a letter grade of C or better. After completing these courses, students must be enrolled in PSY 0036 and PSY 0037.
- New majors must complete an online orientation prior to scheduling an appointment with their assigned psychology advisors. Students will receive an e-mail with instructions and dates approximately the fourth week of each fall and spring term.
- Psychology majors must maintain at least a 2.0 GPA in their departmental courses.
- All psychology and statistics courses used to fulfill requirements for the major must be taken for a letter grade.
- Majors must take one of the writing-intensive courses (W-courses) offered within the department. PSY 0037 is offered every term and is a W-course. Other W-courses offered in the department are PSY 1112 and PSY 1305.

Department of Religious Studies

Religion is one of the creative expressions of the human spirit. As such, it has shaped and, in turn, been shaped by virtually all historical traditions as well as by many other forms of human activity such as the arts, literature, political thinking, and social behavior. Therefore, the academic study of religion should be carried out through diverse scholarly methodologies, and it should treat experiences in a variety of cultural contexts in different periods. Students who wish to understand the manner in which religion, in its broadest terms, has contributed to the shaping of the human experience are encouraged to pursue a course of study that will expand their methodological skills as well as give them a firm command of a particular cultural or historical context. Courses in the study of religion tend to emphasize the human search for meaning and value in history; the manner in which particular religious traditions, practices, thoughts, and orientations have evolved over time; and the degree to which religious views have interacted creatively with other systems of thought and other meaningful expressions of human activity. In addition to courses in the Department of Religious Studies, other departments, such as anthropology, classics, history, philosophy, and sociology, offer related courses. For more information on the Department or Religious Studies and its programs, visit www.religiousstudies.pitt.edu.

Major

Religious Studies, BA

Major Requirements

Students pursuing a major in Religious Studies are required to complete 30 credits, detailed as follows.
Introductory courses

- RELGST 0105 - RELIGIONS OF THE WEST
- RELGST 0505 - RELIGION IN ASIA

Survey course

Select one of the following courses.

- RELGST 0025 - MAJOR BIBLICAL THEMES
- RELGST 0405 - WITCHES TO WALDEN POND
- RELGST 0415 - RELIGION IN MODERN AMERICA
- RELGST 0455 - INTRODUCTION TO ISLAMIC CIVILIZATION
- RELGST 0715 - PHILOSOPHY OF RELIGION
- RELGST 1120 - ORIGINS OF CHRISTIANITY
- RELGST 1130 - VARIETIES OF EARLY CHRISTIANITY
- RELGST 1135 - ORTHODOX CHRISTIANITY
- RELGST 1210 - JEWS AND JUDAISM IN THE ANCIENT WORLD
- RELGST 1220 - JEWS AND JUDAISM IN THE MEDIEVAL WORLD
- RELGST 1250 - JEWS AND JUDAISM IN THE MODERN WORLD
- RELGST 1500 - RELIGION IN INDIA
- RELGST 1550 - EAST ASIAN BUDDHISM
- RELGST 1560 - RELIGION AND HEALING IN CHINA
- RELGST 1570 - RELIGION IN JAPAN

Thematic courses

Select three courses in one thematic cluster listed below.

Religion, Medicine, and the Body

- RELGST 1143 - DEATH IN THE NAME OF GOD
- RELGST 1151 - DEATH IN THE MEDITERRANEAN WORLD
- RELGST 1405 - RELIGION AND SEXUALITY
- RELGST 1554 - DEATH AND BEYOND IN BUDDHIST CULTURES
- RELGST 1558 - BUDDHISM AND PSYCHOLOGY
- RELGST 1725 - DEATH AND HEALTHCARE PROFESSIONS

Spirituality and Rationality

- RELGST 0090 - MYTH IN THE ANCIENT NEAR EAST
- RELGST 1100 - ISRAEL IN THE BIBLICAL AGE
- RELGST 1142 - THE CONSTRUCTION OF EVIL IN WESTERN RELIGIOUS TRADITIONS
- RELGST 1145 - GRECO-ROMAN RELIGIONS
- RELGST 1540 - SAINTS EAST AND WEST
- RELGST 1545 - MYSTICISM IN ASIA
- RELGST 1552 - BUDDHIST MEDITATIVE TRADITIONS
- RELGST 1610 - MYTH, SYMBOL AND RITUAL
Religion, Culture, and Creative Expression

- RELGST 0435 - RELIGION, FILM AND LITERATURE
- RELGST 0525 - RELIGION AND CULTURE IN EAST ASIA
- RELGST 1148 - RELIGIONS OF ANCIENT EGYPT
- RELGST 1160 - JERUSALEM: HISTORY AND IMAGINATION
- RELGST 1425 - POPULAR RELIGION IN AMERICA
- RELGST 1452 - HYMNS & HIPHOP: SOUNDS OF ISLAM
- RELGST 1510 - HINDU MYTHOLOGY
- RELGST 1572 - POPULAR RELIGION IN CHANGING JAPAN

Religion, Identity, and Global Problems

- RELGST 1240 - JEWS AND THE CITY
- RELGST 1241 - GENDER AND JEWISH HISTORY
- RELGST 1252 - HOLOCAUST HISTORY AND MEMORY
- RELGST 1372 - CATHOLICISM IN THE NEW WORLD
- RELGST 1438 - RELIGION AND POLITICS
- RELGST 1450 - ISLAM, LAW, AND POLITICS
- RELGST 1518 - RELIGION AND ECOLOGY
- RELGST 1520 - BUDDHISM ALONG THE SILK ROAD
- RELGST 1620 - WOMEN IN RELIGION
- RELGST 1642 - CHRISTIAN-MUSLIM RELATIONS
- RELGST 1644 - CHRISTIAN MUSLIMS JEWS IN THE MIDDLE AGES: CONNECTION & CONFLICT
- RELGST 1680 - HISTORY AND MEMORY IN THE JEWISH TRADITION
- RELGST 1681 - INVENTING ISRAEL: ZIONISM, ANTI-ZIONISM, AND POST-ZIONISM

Elective courses

Students must take three elective courses. One of these courses must be a 1000-level RELGST course of their choice. The other two courses may include an internship, an undergraduate teaching assistantship, or a directed study course. Students must complete a minimum of nine credits in elective courses.

Capstone course

The capstone seminar has a prerequisite of any six RELGST courses.

- RELGST 1903 - DIRECTED RESEARCH-UNDERGRADUATE

Distribution courses

Students must take at least one course from each of the following groups. The same course may not fulfill more than one distribution requirement.

Religion in Asia
• RELGST 0525 - RELIGION AND CULTURE IN EAST ASIA
• RELGST 1500 - RELIGION IN INDIA
• RELGST 1510 - HINDU MYTHOLOGY
• RELGST 1520 - BUDDHISM ALONG THE SILK ROAD
• RELGST 1540 - SAINTS EAST AND WEST
• RELGST 1545 - MYSTICISM IN ASIA
• RELGST 1550 - EAST ASIAN BUDDHISM
• RELGST 1552 - BUDDHIST MEDITATIVE TRADITIONS
• RELGST 1554 - DEATH AND BEYOND IN BUDDHIST CULTURES
• RELGST 1558 - BUDDHISM AND PSYCHOLOGY
• RELGST 1560 - RELIGION AND HEALING IN CHINA
• RELGST 1570 - RELIGION IN JAPAN
• RELGST 1572 - POPULAR RELIGION IN CHANGING JAPAN

Ancient or Classical Religion in the Middle East and/or Europe

• RELGST 0025 - MAJOR BIBLICAL THEMES
• RELGST 0090 - MYTH IN THE ANCIENT NEAR EAST
• RELGST 1100 - ISRAEL IN THE BIBLICAL AGE
• RELGST 1120 - ORIGINS OF CHRISTIANITY
• RELGST 1130 - VARIETIES OF EARLY CHRISTIANITY
• RELGST 1135 - ORTHODOX CHRISTIANITY
• RELGST 1142 - THE CONSTRUCTION OF EVIL IN WESTERN RELIGIOUS TRADITIONS
• RELGST 1143 - DEATH IN THE NAME OF GOD
• RELGST 1145 - GRECO-ROMAN RELIGIONS
• RELGST 1148 - RELIGIONS OF ANCIENT EGYPT
• RELGST 1151 - DEATH IN THE MEDITERRANEAN WORLD
• RELGST 1160 - JERUSALEM: HISTORY AND IMAGINATION
• RELGST 1210 - JEWS AND JUDAISM IN THE ANCIENT WORLD
• RELGST 1220 - JEWS AND JUDAISM IN THE MEDIEVAL WORLD
• RELGST 1240 - JEWS AND THE CITY
• RELGST 1241 - GENDER AND JEWISH HISTORY

Modern or Contemporary Religion in the Middle East, Europe, or the Americas

• RELGST 0405 - WITCHES TO WALDEN POND
• RELGST 0415 - RELIGION IN MODERN AMERICA
• RELGST 0435 - RELIGION, FILM AND LITERATURE
• RELGST 0455 - INTRODUCTION TO ISLAMIC CIVILIZATION
• RELGST 0715 - PHILOSOPHY OF RELIGION
• RELGST 1240 - JEWS AND THE CITY
• RELGST 1241 - GENDER AND JEWISH HISTORY
Other requirements

**Grade requirements**: All courses counted toward the major must be taken for a letter grade and completed with a C grade or above. At least five courses and the capstone seminar must be completed on the Oakland campus. Students transferring from other colleges or universities need to consult with the director of undergraduate studies about transferring courses and credits to be applied to the major.

**Satisfactory/No Credit option**: No more than six credits that count toward the major can be taken on an S/NC basis.

**Writing (W) requirement**: The capstone seminar fulfills the W-course requirement for this major.

**Honors major requirements**: Department honors require a GPA of 3.25 or higher in the major and a B+ or above in the capstone seminar.

**Minor**

**Religious Studies Minor**

Students pursuing a minor in Religious Studies are required to take complete 15 credits of coursework as follows.

**Introductory courses**

Students must take two courses from the following list.

- RELGST 0025 - MAJOR BIBLICAL THEMES
- RELGST 0090 - MYTH IN THE ANCIENT NEAR EAST
- RELGST 0105 - RELIGIONS OF THE WEST
- RELGST 0305 - CLASSICS OF CHRISTIAN THOUGHT
- RELGST 0405 - WITCHES TO WALDEN POND
- RELGST 0415 - RELIGION IN MODERN AMERICA
- RELGST 0435 - RELIGION, FILM AND LITERATURE
- RELGST 0455 - INTRODUCTION TO ISLAMIC CIVILIZATION
- RELGST 0505 - RELIGION IN ASIA
- RELGST 0525 - RELIGION AND CULTURE IN EAST ASIA
- RELGST 0715 - PHILOSOPHY OF RELIGION
Religion in the East

Students must take one course from the following list.

- RELGST 1500 - RELIGION IN INDIA
- RELGST 1510 - HINDU MYTHOLOGY
- RELGST 1520 - BUDDHISM ALONG THE SILK ROAD
- RELGST 1540 - SAINTS EAST AND WEST
- RELGST 1545 - MYSTICISM IN ASIA
- RELGST 1550 - EAST ASIAN BUDDHISM
- RELGST 1552 - BUDDHIST MEDITATIVE TRADITIONS
- RELGST 1554 - DEATH AND BEYOND IN BUDDHIST CULTURES
- RELGST 1558 - BUDDHISM AND PSYCHOLOGY
- RELGST 1560 - RELIGION AND HEALING IN CHINA
- RELGST 1570 - RELIGION IN JAPAN
- RELGST 1572 - POPULAR RELIGION IN CHANGING JAPAN

Religion in the West

Students must take one of the following courses.

- RELGST 1100 - ISRAEL IN THE BIBLICAL AGE
- RELGST 1120 - ORIGINS OF CHRISTIANITY
- RELGST 1130 - VARIETIES OF EARLY CHRISTIANITY
- RELGST 1135 - ORTHODOX CHRISTIANITY
- RELGST 1142 - THE CONSTRUCTION OF EVIL IN WESTERN RELIGIOUS TRADITIONS
- RELGST 1143 - DEATH IN THE NAME OF GOD
- RELGST 1145 - GRECO-ROMAN RELIGIONS
- RELGST 1151 - DEATH IN THE MEDITERRANEAN WORLD
- RELGST 1160 - JERUSALEM: HISTORY AND IMAGINATION
- RELGST 1210 - JEWS AND JUDAISM IN THE ANCIENT WORLD
- RELGST 1220 - JEWS AND JUDAISM IN THE MEDIEVAL WORLD
- RELGST 1240 - JEWS AND THE CITY
- RELGST 1241 - GENDER AND JEWISH HISTORY
- RELGST 1250 - JEWS AND JUDAISM IN THE MODERN WORLD
- RELGST 1252 - HOLOCAUST HISTORY AND MEMORY
- RELGST 1372 - CATHOLICISM IN THE NEW WORLD
- RELGST 1405 - RELIGION AND SEXUALITY
- RELGST 1425 - POPULAR RELIGION IN AMERICA
- RELGST 1427 - RELIGION AND LAW
- RELGST 1438 - RELIGION AND POLITICS
- RELGST 1450 - ISLAM, LAW, AND POLITICS
- RELGST 1452 - HYMNS & HIPHOP: SOUNDS OF ISLAM
- RELGST 1540 - SAINTS EAST AND WEST
- RELGST 1545 - MYSTICISM IN ASIA
- RELGST 1610 - MYTH, SYMBOL AND RITUAL
- RELGST 1642 - CHRISTIAN-MUSLIM RELATIONS
- RELGST 1644 - CHRISTIAN MUSLIMS JEWS IN THE MIDDLE AGES: CONNECTION & CONFLICT
Upper level elective

Students must take one RELGST course at the 1000-level.

Department of Slavic Languages and Literatures

The Department of Slavic Languages and Literatures offers majors in Russian and Slavic Studies. These majors provide students with the opportunity to study the languages, literatures, and cultures of Russia and of the Slavic-speaking Eastern European countries, including Poland, Ukraine, Slovakia, Serbia, and Croatia.

Students in the Department of Slavic Languages and Literature include those whose primary interest is languages and/or literature, those who wish to enhance their career opportunities in a special way, those who have an interest in the politics and culture of Russia and the Slavic speaking Eastern European countries, and those who have a desire to explore their ethnic heritage. Many majors continue their studies in graduate or professional school and then go on to careers in business, government, teaching, law, medicine, social work, other health-related professions as well as the CIA, FBI and various NGOs and public policy institutions. Knowledge of a Slavic language has been valuable in working in local Western Pennsylvania institutions, politics, business, health-related professions, and the media because of the large population of those ethnicities in this region. Students are advised to begin language study early in order to gain as complete a command of the language as possible. For more information on the Department of Slavic Languages and Literatures and its programs, see www.slavic.pitt.edu.

During the fall and spring terms, the department offers language courses in Russian, Polish, Slovak and Ukrainian, with Serbian and Croatian available through the Language Acquisition Institute. Any student with prior experience in Russian or Ukrainian (including heritage speakers and those who studied a language in high school or abroad) are required to consult with the instructor before being admitted to any language courses in the department. Placement tests are offered to test suitability.

Summer term intensive courses in Russian, Polish, Slovak, Serbian, Croatian, Bulgarian, Macedonian, Ukrainian as well as Romanian and Hungarian are offered through the Slavic Department's Summer Language Institute [SLI]. Summer language courses are intensive and cover an entire year of study. First through fourth year level courses may be offered. These courses afford students the opportunity to make rapid progress through the language in order to qualify for advanced courses and for various study abroad opportunities. Summer study in the SLI now offers the opportunity to study for the first half of the course in Pittsburgh and the second part in the target country, with excursions to major cities and monuments. Scholarships are available for the SLI programs.

Deserving of special mention is the department's program in Slovak language, literature and culture-the only such program in the United States, and one that additionally offers the opportunity for several students each year to study abroad in Slovakia.

Major

Russian, BA

Major Requirements

The Russian major requires at least 33 distributed as follows.

Prerequisite courses

These courses do not count toward the 33 credits required for the major.

- RUSS 0101 - ELEMENTARY RUSSIAN 1
Language courses

- RUSS 0102 - ELEMENTARY RUSSIAN 2
- RUSS 0103 - INTERMEDIATE RUSSIAN 1
- RUSS 0104 - INTERMEDIATE RUSSIAN 2

Literature and culture courses

- RUSS 0400 - ADVANCED RUSSIAN 1
- RUSS 0410 - ADVANCED RUSSIAN 2
- RUSS 1420 - FOURTH-YEAR RUSSIAN 1
- RUSS 1430 - FOURTH-YEAR RUSSIAN 2

One 1000-level Russian elective course

Note:

Additional courses at the 1000 level in Russian literature are strongly recommended. Prospective majors are encouraged to take RUSS 0800 - MASTERPIECES 19TH CENTURY RUSSIAN LITERATURE and RUSS 0810 - MASTERPIECES 20TH CENTURY RUSSIAN LITERATURE as early as possible as an introduction to Russian literature.

The following rules and requirements apply to Russian majors.

- Advanced placement assessment and credit by examination may be arranged through consent of the instructor and the department chair.
- RUSS 0800 - MASTERPIECES 19TH CENTURY RUSSIAN LITERATURE and RUSS 0810 - MASTERPIECES 20TH CENTURY RUSSIAN LITERATURE are offered regularly as W courses and will satisfy the departmental W-course requirement.
- A grade of C or better is required in each course that counts toward the major. A grade of B- or better in language courses is required to advance to the next level. A minimum GPA of 2.0 in departmental courses is required for graduation.
- No course that counts toward the major may be taken on an S/NC basis.

Honors in the major

Honors in Russian is granted if, in addition to fulfilling all requirements for the major, the student meets the following conditions.

- Maintain a GPA of 3.75 or higher in RUSS courses.
- Maintain an overall GPA of 3.25 or higher.
- Complete at least one additional RUSS 1000-level course.
- Complete a 20-page paper involving Russian primary-source research and a two-page summary in Russian, under the supervision of an appointed faculty committee.
- Consulted with the undergraduate advisor in their junior year.

Study abroad
Students are encouraged to participate in an approved study-abroad program for a semester or the summer term. The department will adjust the course requirements in individual cases to accommodate this participation without delaying the student's graduation. Majors often apply for Nationality Rooms Program Scholarships for summer study abroad. The Summer Language Institute (SLI) offers generous scholarships as well. The following represents a partial list of study abroad opportunities available to students.

- **Summer study in Moscow**: The Department of Slavic Languages and Literatures currently sponsors a ten-credit summer-study program as part of the SLI in Pittsburgh (5 weeks) and Moscow (5 weeks) at the Moscow State University. Students may study first through fourth year Russian, covering one full year language study in ten weeks. Similar programs exist for study in Poland and Bulgaria. The Slavic department can be reached at 412-624-5096 or via e-mail at slavic@pitt.edu.
- **The University of Pittsburgh** is affiliated with a number of organizations holding both summer and semester, or year-long study in Russia. The Study Abroad Office, located in 802 William Pitt Union, can be reached at 412-647-7413.
- **The Center for Russian, East European, and Eurasian Studies (REEES)** regularly organizes summer study abroad programs in languages and social sciences in locations from the Czech Republic to Slovakia. REEES makes scholarships available for many of these programs. Trevor Erlacher, the REES undergraduate advisor, can be reached at 412-648-7403 or TFE3@Pitt.edu.
- **The Nationality Rooms Program** offers a wide variety of competitive scholarships for summer study abroad in many parts of the world, including Central and Eastern Europe. Applications are due in January. The NRP, located in 1209 CL, can be reached at 412-624-6510.
  
  For more information, see [www.slavic.pitt.edu](http://www.slavic.pitt.edu).

**Slavic Studies - Option 1, BA**

**Effective Spring 2018, this program will no longer accept students and will not be active. Students can declare the Slavic Studies major until Fall 2017. The necessary instruction will be available through Summer 2022 for these students to complete the program.**

Slavic Studies Major Requirements

Academic requirements for the Slavic Studies major may be fulfilled through one of two options.

**Option 1**

Three to four courses (two years) of a Slavic language above the intermediate level

- RUSS 0400 - ADVANCED RUSSIAN 1
- RUSS 0410 - ADVANCED RUSSIAN 2
- POLISH 0400 - ADVANCED POLISH THROUGH FILM
- POLISH 0410 - ADVANCED POLISH 2
- POLISH 1901 - INDEPENDENT STUDY
  
or

- SLOVAK 0400 - ADVANCED SLOVAK 1
- SLOVAK 0410 - ADVANCED SLOVAK 2
- SLOVAK 1901 - INDEPENDENT STUDY
  
or
Note:

Eighteen credits of designated Slavic department courses in literature, film, and culture. Students must take three literature courses, one film course, and two courses in Slavic culture. One of the above must be a W-course. Six credits of Dietrich School courses with a strong Slavic component (courses found in the Russian and East European studies listings) may be substituted, with the advisor's approval. Six credits of Study Abroad or designated Slavic courses in any of the categories above. If students choose a language course, the number of credits may be six to ten.

Slavic Studies note

The first two years of language study do not count as credits toward the major, unless the first-year language course is taken as part of Option 2.

Slavic Studies - Option 2, BA

Effective Spring 2018, this program will no longer accept students and will not be active. Students can declare the Slavic Studies major until Fall 2017. The necessary instruction will be available through Summer 2022 for these students to complete the program.

Slavic Studies Major Requirements

Academic requirements for the Slavic Studies major may be fulfilled through one of two options.

Option 2

- One year of primary Slavic language above the intermediate level. The language may be Russian, Polish, Slovak, or Bosnian/Serbian/Croatian.
- One year of a second Slavic language at any level. The language can be Russian, Polish, Slovak, Bosnian/Serbian/Croatian, Ukranian, Bulgarian, Macedonian, or Czech.
- Eighteen credits of designated Slavic department courses in literature, film, and culture. Students must take three literature courses, one film course, and two courses in Slavic culture. One of the above must be a W-course. Six credits of Dietrich School courses with a strong Slavic component (courses found in the Russian and East European studies listings) may be substituted, with the advisor's approval.
- Six credits of Study Abroad or designated Slavic courses in any of the categories above. If students choose a language course, the number of credits may be six to ten.

Slavic Studies note

The first two years of language study do not count as credits toward the major, unless the first-year language course is taken as part of Option 2.

Minor
Bosnian-Croatian-Serbian Minor

Students may complete this 15-credit minor during the regular academic year or through summer study of the Bosnia-Croatian-Serbian language. SLAV 1865 may not be used to fulfill a requirement for more than one academic program.

Option 1: Academic year

- SERCRO 0030 - INTERMEDIATE BOSNIAN/CROATIAN/MONTENEGRIN/SERBIAN 3
- SERCRO 0040 - INTERMEDIATE BOSNIAN/CROATIAN/MONTENEGRIN/SERBIAN 4
- SERCRO 0400 - ADVANCED BOSNIAN/CROATIAN/MONTENEGRIN/SERBIAN 5
- SERCRO 0410 - ADVANCED BOSNIAN/CROATIAN/MONTENEGRIN/SERBIAN 6
- SLAV 1865 - THE YEAR COMMUNISM CRUMBLED

Option 2: Summer study

Choose one course from each of the following pairs:

- SERCRO 0220 - INTERMEDIATE INTENSIVE SERBIAN
- SERCRO 0223 - INTERMEDIATE INTENSIVE SERBIAN PITT-MONTENEGRO
- SERCRO 0230 - ADVANCED INTENSIVE SERBIAN/CROATIAN
- SERCRO 0231 - ADVANCED INTENSIVE SERBIAN PITT-MONTENEGRO

Polish Minor

Students may complete this 15-credit minor during the regular academic year or through summer study of the Bosnia-Croatian-Serbian language. SLAV 1865 may not be used to fulfill a requirement for more than one academic program.

Option 1: Academic year

- POLISH 0030 - INTERMEDIATE POLISH 3
- POLISH 0040 - INTERMEDIATE POLISH 4
- POLISH 0400 - ADVANCED POLISH THROUGH FILM
- POLISH 0410 - ADVANCED POLISH 2
- POLISH 0325 - THE SHORT STORY or
- POLISH 0870 - CONTEMPORARY POLISH CINEMA:LITERATURE ON FILM or
- POLISH 1260 - SURVEY OF POLISH LITERATURE AND CULTURE
- SLAV 1865 - THE YEAR COMMUNISM CRUMBLED

Option 2: Summer study

Choose one course from each of the following pairs:

- POLISH 0220 - INTENSIVE INTERMEDIATE POLISH
- POLISH 0221 - INTERMEDIATE INTENSIVE POLISH PITT/Poland
Slovak Studies Minor

Slovak Studies minor

An undergraduate minor in Slovak studies motivates students to continue with their language and culture studies in a meaningful way. This program would be particularly useful for students majoring in anthropology, political science, and history, many of whom focus their work on Slovakia or Central Europe and see Slovak language and culture as a gateway to the study of the area. Several of the graduates with considerable work in Slovak at Pitt have been offered jobs at the Pentagon, international nonprofit and nongovernmental organizations (NGOs), Radio Free Europe, and the U.S. Department of State.

Students who are interested in the minor may tailor their course selections according to the focus of their interest in the Slovak language or in Slovak culture.

Culture option

The Slovak Culture option requires 15 credits of coursework, distributed as follows.

Required courses

Both of the following courses are required for the Culture option.

- SLOVAK 0010 - ELEMENTARY SLOVAK 1
- SLOVAK 0020 - ELEMENTARY SLOVAK 2

Elective courses

Select three of the following courses.

- SLOVAK 0030 - INTERMEDIATE SLOVAK 3
- SLOVAK 0380 - SLOVAK TRANSATLANTIC CULTURES
- SLOVAK 0890 - SLOVAK, CZECH, AND CENTRAL EUROPEAN FILM
- SLAV 1865 - THE YEAR COMMUNISM CRUMBLED

Language option

The Slovak Language option requires 15 credits of coursework in the Slovak language, distributed as follows.

Slovak language courses

All of the following courses are required.

- SLOVAK 0010 - ELEMENTARY SLOVAK 1
- SLOVAK 0020 - ELEMENTARY SLOVAK 2
- SLOVAK 0030 - INTERMEDIATE SLOVAK 3
- SLOVAK 0040 - INTERMEDIATE SLOVAK 4
Department of Sociology

This is an exciting time of dramatic social change, both nationally and internationally. Global processes are integrating the world and creating the "global village." At the same time, old hostilities based on ethnic solidarity are re-emerging and tearing the social fabric of various parts of the world. The U.S. economy is undergoing structural change, which, in turn, is altering the occupational structure; the United States is becoming more multicultural, and the meanings of "community" are shifting. In these changes there are huge benefits for some and heavy costs for others. "Social problems" (e.g., health care availability, poverty, crime, or threats to the environment) are not marginal to societies but integral to them.

Sociologists try to understand these phenomena. For some, this means informing public policy; for others, the social world is simply one of the most interesting things to study. Sociologists study social organization. For some, this means examining societies-how they are structured, how they work, and how they change. Other sociologists study how small social groups work and how they change. This includes the social networks that people form as part of their social life. Issues of race, class, and gender affect the opportunities and constraints faced by different groups in society. Sociologists study how people belong to families, groups, and organizations-how people develop identities and how their social organizations become real. Sociologists also focus on broad patterns of social organization socialization, education, welfare, health care, etc. In short, the social world is endlessly fascinating.

For more information on the sociology major, the sociology minor, and the Department of Sociology, see www.sociology.pitt.edu.

Major

Sociology, BA

Major Requirements

A total of 27 credits in sociology and four credits in statistics, distributed as follows, are required for completion of the major.

Introductory course

Choose one of the following courses.

- SOC 0002 - SOCIOLOGY OF EVERYDAY LIFE
- SOC 0005 - SOCIETIES
- SOC 0010 - INTRODUCTION TO SOCIOLOGY

Theory and Research courses

Complete both of the following courses.

- SOC 0230 - SOCIAL RESEARCH METHODS
- SOC 0150 - SOCIAL THEORY

Statistics course

Choose one of the following courses.

- STAT 0200 - BASIC APPLIED STATISTICS
- STAT 1000 - APPLIED STATISTICAL METHODS
Research Practicum

Students must complete the introductory, theory and research, and statistics courses before enrolling in the required research practicum.

- SOC 1500 - CAPSTONE RESEARCH PRACTICUM FOR MAJORS

Elective courses

Students are required to complete a minimum of 15 elective credits in SOC, six of which must be at the 1000 level. Internships and directed research do not count toward the six 1000-level elective credits.

Additional information

Grade requirements: A minimum GPA of 2.0 or higher in departmental courses is required for graduation.

Satisfactory/No Credit option: No more than six credits in SOC can be taken on an S/NC basis. After declaring the major, SOC 0150 and SOC 0230 may not be taken on an S/NC basis.

Writing (W) requirement: Students must complete at least one W-course in the major.

Honors major requirement: Honors in sociology is granted if in addition to fulfilling all requirements for the major, the student:

- maintained a GPA of 3.5 or above in SOC courses;
- maintained an overall GPA of 3.25 or above;
- completed SOC 0150 and SOC 0230 prior to completing a three-credit SOC 1002 honors seminar; and
- completed a three-credit SOC honors thesis, written under the direction of a faculty mentor.

The honors seminar, which is offered every fall term, and the honors thesis, which is offered every spring term, may replace six of the 15 required elective credits. Students pursuing the honors major are required to complete the same number of credits that are required for the standard major. For additional details, students are encouraged to consult with the undergraduate advisor.

Thematic cluster certificate: For sociology majors wishing to pursue specific themes within the discipline, the Department of Sociology currently offers five thematic clusters. Upon graduation, students who have completed three approved courses in one of these clusters will be awarded a certificate of achievement by the Department of Sociology.

- Global and Area Studies
- Social Movements / Inequality
- Race, Gender, and Sexuality
- The Helping Professions
- Health, Environment, and Technology

Internships: The Department of Sociology at the University of Pittsburgh is strongly committed to the career development of its students and sponsors a wide variety of strategic internships. Numerous local internship opportunities exist, involving childhood counseling and education, hospitals and healthcare, psychological and substance abuse counseling, criminal justice, business, law, and politics.

Courses for special programs

The Department of Sociology offers courses that are particularly suitable for the following special programs.

Pre-Law

- SOC 0471 - DEVIANCE AND SOCIAL CONTROL
- SOC 0472 - INTRODUCTION TO CRIMINOLOGY
- SOC 0474 - SOCIETY AND THE LAW
Pre-Social Work

- SOC 0424 - SMALL GROUPS
- SOC 0438 - SOCIOLOGY OF THE FAMILY
- SOC 0460 - RACE AND ETHNICITY
- SOC 0471 - DEVIANCE AND SOCIAL CONTROL
- SOC 0477 - MEDICAL SOCIOLOGY
- SOC 1413 - MARRIAGE
- SOC 1450 - HEALTH AND ILLNESS

Pre-Medical

- SOC 0312 - SCIENCE IN SOCIETY
- SOC 0475 - SOCIOLOGY OF AGING
- SOC 0477 - MEDICAL SOCIOLOGY
- SOC 1370 - GENDER AND HEALTH WORLDWIDE
- SOC 1450 - HEALTH AND ILLNESS
- SOC 1467 - TOPICS MENTAL HEALTH AND ILLNESS
- SOC 1488 - HISTORY MEDICINE AND HEALTH CARE

Gender, Sexuality, and Women's Studies

- SOC 0436 - SOCIAL ASPECTS OF SEXUALITY
- SOC 0446 - SOCIOLOGY OF GENDER
- SOC 1333 - COMPARATIVE PERSPECTIVES ON WOMEN
- SOC 1365 - RACE, CLASS, AND GENDER
- SOC 1448 - WORKING WOMEN

Minor

Sociology Minor

Minor Requirements

A minor in sociology requires the following distribution of courses for a total of 15 credits:

- SOC 0150 - SOCIAL THEORY
- SOC 0230 - SOCIAL RESEARCH METHODS
- An elective in sociology
- One elective upper-level sociology course (1000-2000)

One of the Following Courses

- SOC 0002 - SOCIOLOGY OF EVERYDAY LIFE
- SOC 0005 - SOCIETIES
- SOC 0010 - INTRODUCTION TO SOCIOLOGY

Department of Statistics
The field of statistics is concerned with ways of understanding variability in measurements. It is the science and art of making informed decisions in the face of uncertainty. Statistical reasoning is fundamental to research in many scientific fields. For example, probabilistic models of learning are used in education and psychology, and time series and regression models guide research in engineering, chemistry, economics, biology, and medicine. Recent high-profile court cases have shown the importance of the use of probability and statistics in law, especially in the fields of forensic medicine and DNA fingerprinting. Statisticians have also been instrumental in developing methods by which observations are obtained in many disciplines. Examples include randomized clinical trials in medicine and complex sampling surveys in social and political science. Probability and statistics are basic to the actuarial sciences. When lists are compiled of the most important scientific theories and discoveries of the last century, a substantial number of these developments are seen to be inherently statistical in nature.

The Department of Statistics offers course work leading to a Bachelor of Science degree in statistics, a minor in applied statistics, and a combined five-year bachelor and master's degree in statistics. The department also offers a wide array of introductory service courses for general undergraduate audiences that deal with statistical methods in applications (and which require only high school mathematics). A joint major in economics and statistics is also available. Interested students should consult the requirements listed under Economics. Students considering majoring in statistics should consult with a department advisor early in their studies, preferably during their freshman year. For more information on the major, other programs, and the Department of Statistics, visit www.stat.pitt.edu.

**Joint Major**

**Statistics, BS/MA**

**Requirements for a Combined Five-Year Bachelor's and Master's Degree in Statistics**

Admission to the program requires the approval of both the undergraduate and graduate directors. The minimum requirements for admission are:

- Two letters of recommendation,
- minimum high school GPA of 3.25 or top 10 percent of class, and
- an SAT score of at least 1270 with a math score of at least 650.

**Requirements for a Combined BS and MA in Statistics**

1. Introductory Mathematics Courses:

   - MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
   - MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2
   - MATH 0240 - ANALYTIC GEOMETRY AND CALCULUS 3
   - MATH 0280 - INTRO TO MATRICES & LINEAR ALG or
   - MATH 1180 - LINEAR ALGEBRA 1

2.

   - STAT 1000 - APPLIED STATISTICAL METHODS
   - STAT 1221 - APPLIED REGRESSION
   - STAT 1223 - APPLIED REGRESSION WRITING COMPONENT where STAT 1223 is a W (writing) course

3. Three Introductory Applied Statistics Courses from the Following List:

   - STAT 1201 - APPLIED NONPARAMETRIC STATISTICS
4. One Intermediate Applied Statistics Course from the Following List:

- STAT 1301 - STATISTICAL PACKAGES
- STAT 1311 - APPLIED MULTIVARIATE ANALYSIS
- STAT 1321 - APPLIED TIME SERIES

5.

- STAT 1151 - INTRODUCTION TO PROBABILITY
- STAT 1152 - INTRODUCTION TO MATHEMATICAL STATISTICS

6.

- STAT 1631 - INTERMEDIATE PROBABILITY
- STAT 1632 - INTERMEDIATE MATHEMATICAL STATISTICAL

7.

- STAT 2131 - APPLIED STATISTICAL METHODS 1
- STAT 2132 - APPLIED STATISTICAL METHODS 2

8.

- STAT 2381 - SUPERVISED STATISTICAL CONSULTING

9. Electives in Statistics:

Three additional courses, at least two of which must be graduate-level courses. STAT 2711 and 2712 are excluded, and courses at the 3000 level must be approved by the student's advisor

10.

One graduate-level course from outside of the department, chosen in consultation with the graduate advisor

11.

Master's pass on Preliminary Examination
Requirements for a Combined BS and MS in Statistics

Requirements one through 11 as above, except that requirement nine is reduced to one undergraduate or graduate course. In addition, the student must write and successfully defend a master's thesis.

- Grade requirement: Students in the program must earn at least a B grade in each required course as well as maintain a 3.25 GPA.

Typical Schedule

First Year:

- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
- STAT 1000 - APPLIED STATISTICAL METHODS
- MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2
- STAT 1221 - APPLIED REGRESSION
- STAT 1223 - APPLIED REGRESSION WRITING COMPONENT

Second Year:

- MATH 0240 - ANALYTIC GEOMETRY AND CALCULUS 3
- STAT 1200-level course
- MATH 0280 - INTRO TO MATRICES & LINEAR ALG
- STAT 1200-level course

Third Year:

- STAT 1151 - INTRODUCTION TO PROBABILITY
- STAT 1200-level course
- STAT 1152 - INTRODUCTION TO MATHEMATICAL STATISTICS
- STAT 1300-level course

Fourth Year:

- STAT 1631 - INTERMEDIATE PROBABILITY
- STAT 2131 - APPLIED STATISTICAL METHODS 1
- STAT 1632 - INTERMEDIATE MATHEMATICAL STATISTICAL
- STAT 2000-level course
- STAT 2132 - APPLIED STATISTICAL METHODS 2

Fifth Year:

- Take Comprehensive Exam
- STAT 2381 - SUPERVISED STATISTICAL CONSULTING
- Two STAT electives or master's thesis
- One outside graduate-level course
Comparison of Programs

Separately, the Bachelor of Science in statistics requires 50 credits, and the Master of science in applied statistics requires 33 credits, of which 21 must be graduate level. The combined program requires 69 credits, of which 18 must be graduate level.

Major

Data Science, BS

Data Science

Program Requirements (61 Credits)

Students are required to complete the following courses

Foundational Skills - 31 credits

The foundational courses provide students with fundamental knowledge across four "literacies": data, algorithmic, mathematical, and statistical. Courses in this area will help students develop baseline computational capabilities, will teach students to think about data in a statistical framework, and will introduce students to fundamental mathematical concepts arising in data analysis. These courses are drawn from three main disciplines (CS/IS, Math, and Statistics) and include an introductory course in the fundamental skills of working with data (Python/R programming, exploratory data analysis, data visualization):

- STAT 1061 - DATA SCIENCE FOUNDATIONS
- CS 0401 - INTERMEDIATE PROGRAMMING USING JAVA
- CS 0445 - ALGORITHMS AND DATA STRUCTURES 1
- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
- MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2
- MATH 0280 - INTRO TO MATRICES & LINEAR ALG /MATH 1180 - LINEAR ALGEBRA 1
- MATH 0480 - APPLIED DISCRETE MATHEMATICS /CS 0441 - DISCRETE STRUCTURES FOR CS
- STAT 1151 - INTRODUCTION TO PROBABILITY /STAT 1631 - INTERMEDIATE PROBABILITY
- STAT 1152 - INTRODUCTION TO MATHEMATICAL STATISTICS /STAT 1632

Notes:
Mathematically oriented students should take MATH 1180 rather than MATH 0280.
Mathematically advanced students may replace STAT 1151/STAT 1152 with STAT 1631/STAT 1632, in consultation with their advisor.
Students wishing to pursue graduate studies or mathematical directions related to data science are advised to also take MATH 0240

Expertise - 18 credits

This is where students become data scientists, integrating skills from the foundational areas to develop expertise in the realm of data. Skills will be developed in the description and analysis of data in terms of sources of variability and key relationships, the development of algorithms and data handling skills to extract and interpret information from complex data sets, as well as in the visualization and communication of results. The critical issue of the ethical use of data will also be addressed in the context of data science.

- STAT 1261 - PRINCIPLES OF DATA SCIENCE
- STAT 1361 - STATISTICAL LEARNING AND DATA SCIENCE
  OR
- CS 1675 - INTRODUCTION TO MACHINE LEARNING
Specialization - 9 credits

Students within the data science major will have the opportunity to pursue an area of specialization through the selection of elective courses in a targeted direction relating to data analytics, computer systems, modeling, or data science in context. While selecting all 3 courses from the same category is advised for students seeking a focus, students may also choose courses across categories to suit their interests, if they prefer that approach. The specialization course groupings are as follows.

- **Data Analytics**: Students pursuing a data analytics specialization will enhance their ability to make sound inferences and decisions using the science and art of learning from data: specifically, the design, collection, analysis, and interpretation of data in an uncertain world, and the communication of findings.
- **Modeling**: Students pursuing a modeling specialization will enhance their ability to develop and harness theoretical tools to characterize structure within data and to represent and analyze processes that may underlie this structure.
- **Computer Systems**: Students pursuing this specialization will gain depth of knowledge in the development, deployment, and analysis of the complex computer and information systems necessary for tackling large-scale data science problems.
- **Data Science in Context**: Students pursuing this specialization will gain depth of knowledge in both the technical and organizational aspects of the management, curation, description, preservation, and application of digital datasets of varying sizes in specific business, professional, or scientific contexts. We expect the collection of courses within the specialization to expand as more domain-specific data science courses begin to be offered across campus.

**Data Analytics**

- INFSCI 1068 - GEOSPATIAL INFORMATION SYSTEMS (GIS)
- MATH 1080 - NUMERICAL MATH: LINEAR ALGEBRA
- STAT 1201 - APPLIED NONPARAMETRIC STATISTICS
- STAT 1211 - APPLIED CATEGORICAL DATA ANALYSIS
- STAT 1231
- STAT 1311 - APPLIED MULTIVARIATE ANALYSIS
- STAT 1321 - APPLIED TIME SERIES
- CS 1671 - HUMAN LANGUAGE TECHNOLOGIES
- CS 1674 - INTRODUCTION TO COMPUTER VISION
- INFSCI 1520 - INFORMATION VISUALIZATION
- INFSCI 1530 - DATA MINING
- INFSCI 1560 - INFORMATION STORAGE AND RETRIEVAL

**Modeling**

- MATH 1025 - INTRODUCTION TO MATHEMATICAL CRYPTOGRAPHY
- MATH 1070 - NUMERICAL MATHEMATICAL ANALYSIS
- MATH 1080 - NUMERICAL MATH: LINEAR ALGEBRA
- STAT 1211 - APPLIED CATEGORICAL DATA ANALYSIS
- MATH 1310 - GRAPH THEORY
• MATH 1360 - MODELING IN APPLIED MATH 1
• STAT 1321 - APPLIED TIME SERIES
• MATH 1510 - MATHEMATICAL THEORY OF PROBABILITY
• CS 1538 - INTRODUCTION TO SIMULATION
• STAT 1731 - STOCHASTIC PROCESSES
• STAT 1741 - APPLIED PROBABILITY THEORY

Computer Systems

• CS 0449 - INTRODUCTION TO SYSTEMS SOFTWARE
• CS 1550 - INTRODUCTION TO OPERATING SYSTEMS

• CS 1555 - DATABASE MANAGEMENT SYSTEMS
  OR
• INFSCI 1022 - DATABASE MANAGEMENT SYSTEMS

• CS 1635 - INTERFACE DESIGN METHODOLOGY
  OR
• INFSCI 2415 - INFORMATION VISUALIZATION

• CS 1645 - INTRODUCTION TO HIGH PERFORMANCE COMPUTING SYSTEMS
• INFSCI 2125 - NETWORK SCIENCE & ANALYSIS
• CS 2450

Data Science in Context

• LIS 2407 - METADATA
• LIS 2676 - RESEARCH DATA MANAGEMENT
• LIS 2679

Capstone - 3 credits

Data science is a hands-on field. Comprehensive training in data science requires substantive experience working on a problem outside of the realm of usual classroom experiences, with the complications of messy data, ambiguity, and lack of clear structure that characterize "real-world" scenarios. This experience should include work with others with diverse skill sets as well as communication with non-specialists. The capstone course will provide students with such an experience. In the short term, the capstone course requirements can be fulfilled through completion of CMPINF 1981 - PROJECT STUDIO, MATH 1103 - MATHEMATICAL PROBLEMS IN BUSINESS, INDUSTRY, AND GOVERNMENT, or STAT 1961 (Statistical Data Science in Action). In this case, students will be advised to select a capstone course based on their specializations but ultimately will be able to choose from among the full list of capstone options. In addition, the capstone requirement may be satisfied via a faculty-guided research project that is relevant to data science, subject to approval by the Data Science program director(s). After we have more experience in integrating and coordinating our courses across the three units, we will consider a unified cross-listed capstone course if that is deemed more desirable.

Writing requirement

The writing requirement for Dietrich School Students will be fulfilled by enrollment in a W section of CS 0590 - SOCIAL IMPLICATIONS OF COMPUTING TECHNOLOGY.

Statistics, BS
Requirements for a BS in Statistics

The statistics major requires a minimum of 50 credits, including the following required courses:

Required Course

- STAT 1000 - APPLIED STATISTICAL METHODS *

Note:

* With approval of the major advisor, students may substitute STAT 1000 under the following conditions.

- Complete STAT 0200 with a grade of B- or better; or
- Receive advanced placement for STAT 0200; or
- Complete STAT 1100 if the student is a Statistics-Business dual major.

All of the Following Courses

- STAT 1221 - APPLIED REGRESSION
- STAT 1223 - APPLIED REGRESSION WRITING COMPONENT
- STAT 1151 - INTRODUCTION TO PROBABILITY
- STAT 1152 - INTRODUCTION TO MATHEMATICAL STATISTICS

Two of the Following Introductory Applied Statistics Courses

- STAT 1201 - APPLIED NONPARAMETRIC STATISTICS
- STAT 1211 - APPLIED CATEGORICAL DATA ANALYSIS
- STAT 1251 - STATISTICAL QUALITY CONTROL
- STAT 1241 - APPLIED SAMPLING
- STAT 1251 - STATISTICAL QUALITY CONTROL

One Intermediate Applied Statistics Course from the Following List:

- STAT 1301 - STATISTICAL PACKAGES
- STAT 1311 - APPLIED MULTIVARIATE ANALYSIS
- STAT 1321 - APPLIED TIME SERIES

Both of the Following Courses

- STAT 1631 - INTERMEDIATE PROBABILITY
- STAT 1632 - INTERMEDIATE MATHEMATICAL STATISTICAL

One Statistics Course from the Following List

- STAT 1651 - INTRODUCTION TO BAYESIAN STATISTICS
- STAT 1661 - LINEAR REGRESSION
- STAT 1731 - STOCHASTIC PROCESSES
• STAT 1741 - APPLIED PROBABILITY THEORY

Mathematics Courses:

Choose one group.

Group 1

• MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
• MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2
• MATH 0240 - ANALYTIC GEOMETRY AND CALCULUS 3

Group 2

• MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
• MATH 0235 - HONORS 1 - VARIABLE CALCULUS
• MATH 0240 - ANALYTIC GEOMETRY AND CALCULUS 3

One of the Following Courses

• MATH 0280 - INTRO TO MATRICES & LINEAR ALG
• MATH 1180 - LINEAR ALGEBRA 1
• MATH 1185 - HONORS LINEAR ALGEBRA

Elective Courses

Because professional statisticians collaborate with other scientists, students are encouraged to take elective courses from the behavioral, natural, physical, and social sciences.

Additional Requirements

• Grade requirements: Students must earn at least a C grade in each course required for the major.
• Satisfactory/No Credit: Students may not take required courses on the S/NC option.
• Writing requirement: Courses in technical writing and public speaking are recommended.
• Graduate study recommendations: Students planning to continue their studies in a graduate program are strongly encouraged to take MATH 0413 - INTRO THEORETICAL MATHEMATICS, MATH 0420 - INTRO THEORY 1-VARIABLE CALCULUS, MATH 1180 - LINEAR ALGEBRA 1, and as many additional mathematics courses in advanced calculus, numerical analysis, and computer sciences as possible.
• Departmental honors: In order to qualify for departmental honors at graduation, students must:
  • have a GPA of at least 3.50 in all mathematics and statistics courses taken;
  • have a GPA of at least 3.70 in all 1000-level courses taken within the department; and
  • complete all other requirements for the statistics major.

Minor

Applied Statistics Minor
Requirements for a Minor in Applied Statistics

Professionals in many fields use statistical procedures regularly. Decisions based on numerical information or data, if the data are collected and analyzed properly, are typically better decisions. The minor in applied statistics was designed to give students additional statistical tools and a better understanding of statistical reasoning.

The minor in applied statistics requires 16 credits, consisting of the following courses

- STAT 1000 - APPLIED STATISTICAL METHODS
- STAT 1221 - APPLIED REGRESSION
- Three additional STAT courses at the 1200-level or higher

Note

- Acceptable substitutes for STAT 1000 - APPLIED STATISTICAL METHODS include STAT 1100 - STATISTICS AND PROBABILITY FOR BUSINESS MANAGEMENT, ENGR 0020 - PROBABILITY AND STATISTICS FOR ENGINEERS 1, and STAT 0200 - BASIC APPLIED STATISTICS.
- STAT 1223 - APPLIED REGRESSION WRITING COMPONENT does not count toward the minor.

Department of Studio Arts

The practice of art is among the oldest and most fundamental forms of human expression. The Department of Studio Arts provides the opportunity for students to explore the visual arts through foundation courses and through upper-level courses in painting, sculpture, drawing, printmaking, and graphic design. Studio activities are designed to intensify students' visual perception of the formal and expressive means of art, to develop understanding of a variety of technical processes, and to encourage insight into the significance of making art today. Course offerings of the department address the following goals:

- Provide a degree program for art majors who desire a liberal education and want to prepare for graduate art school or pursue a career in an art-related field;
- Provide a related area in studio arts for majors in other departments by taking the four foundation courses or by completing 12 credits in a specified studio area;
- Facilitate development of art-making skills and concepts through the foundation courses for all undergraduate students, while satisfying the Dietrich School creative expression requirement; and
- Provide a 15-credit minor in studio arts.

The Department of Studio Arts sponsors an annual student exhibition and a biannual faculty exhibition in the University of Pittsburgh Art Gallery. The University's Frick Fine Arts Library is one of the finest available. Also in close proximity is The Carnegie, with its museum and library providing access for research and study. For more information on the major, the minor, and the Department of Studio Arts, see http://www.studioarts.pitt.edu/.

Major

Studio Arts, BA

Major Requirements

The studio arts major requires the completion of 52 credits - 46 credits in studio arts, and six credits in art history, distributed as described.

Foundation Courses
Upper-Level Required Courses

- SA 1220 - PAINTING STUDIO 2
- SA 1230 - DRAWING STUDIO 2
- SA 1240 - SCULPTURE STUDIO 2
- SA 1260 - PRINT STUDIO: INTAGLIO
- SA 1270 - DIGITAL STUDIO: IMAGING
- SA 1370 - PREPARATION AND PRACTICE IN THE VISUAL ARTS
- SA 1600 - SENIOR SEMINAR
- SA 1604 - SENIOR EXHIBITION

Upper-Level Elective Courses

Students must take three courses from the following list, for a total of nine credits.

Directed study, internships, and undergraduate teaching assistantships are by permission only. Students must have completed at least 30 credits in Studio Arts courses. Students may apply up to three credits of internship or undergraduate teaching assistantship toward their major requirements.

- SA 1320 - PAINTING STUDIO: PROJECTS
- SA 1330 - DRAWING STUDIO: PROJECTS
- SA 1340 - SCULPTURE STUDIO: PROJECTS
- SA 1345 - SCULPTURE STUDIO: INSTALLATION
- SA 1365 - PRINT STUDIO: SCREENPRINT
- SA 1380 - DIGITAL STUDIO: VIDEO
- SA 1430 - DRAWING STUDIO: PERSPECTIVE
- SA 1450 - PAINTING STUDIO: FIGURE
- SA 1504 - DIRECTED STUDY: STUDIO
- SA 1900 - INTERNSHIP
- SA 1904 - UNDERGRADUATE TEACHING ASSISTANTSHIP
- HONORS 1542 - HONORS FIELD STUDIES IN WYOMING - STUDIO ARTS

History of Art and Architecture Required Courses

- HAA 0010 - INTRODUCTION TO WORLD ART

History of Art and Architecture Additional Courses

Students must take one of the two following HAA courses.

- HAA 0030 - INTRODUCTION TO MODERN ART
- HAA 0090 - INTRODUCTION TO CONTEMPORARY ART

Writing course requirement
Students must complete an HAA course with a W practicum or stand-alone HAA W-course to satisfy this requirement.

Additional Requirements

• **Grade requirement**: Students must attain at least a 2.00 GPA in the major.
• **Satisfactory/No Credit option**: No department course that counts toward the major may be taken on the S/NC basis. Credit by exam is generally not available.
• **Departmental honors**: Students who earn a 3.50 GPA in the major and an overall 3.25 GPA receive departmental honors.
• **Senior art exhibition**: Seniors are expected to exhibit their work in the Annual Student Exhibition at the University of Pittsburgh Art Gallery.

### Additional opportunities
- In addition to required courses, focus in a particular medium is possible through directed study. Internships are also available in art-related fields.
- Majors may take special workshops and courses when offered, but only if they have fulfilled the prerequisites, or by departmental permission. The department recommends that a student take no more than two studio arts courses in one term.

### Courses for Non-Studio Arts Majors

All level-one core courses are open to non-art majors. Non-art majors may take level-two courses but must complete the prerequisites for the specific courses. Non majors may take special workshops and advanced courses when offered, but only if they have fulfilled the prerequisites, or by departmental permission.

### Minor

#### Studio Arts Minor

Studio Arts Minor

### Core requirements

The following requirements and restrictions apply to both options in the Studio Arts minor.

- All courses that count toward the minor must be taken for a letter grade.
- Only six of the 15 credits required for the minor may be transfer credits.
- The number of upper-level course sections offered per term is limited, as is the frequency of 1300-level and 1400-level courses. Course enrollment is based on availability as well as the completion of prerequisites.
- The Department of Studio Arts recommends that students complete SA 0110 - VISUAL THINKING and SA 0130 - DRAWING STUDIO 1 before enrolling in SA 0120 - PAINTING STUDIO 1.

Both of the following courses are required for options 1 and 2 in the minor.

- **SA 0110 - VISUAL THINKING**
- **SA 0130 - DRAWING STUDIO 1**

### Option 1

This option requires completion of 15 credits of coursework. Students must take both required courses and any three courses on the Studio Arts Minor Electives list.
Option 2

This option requires completion of 15 credits of coursework. Students must take both required courses, any two courses on the Studio Arts Minor Electives list, and a History of Art and Architecture course on any topic and at any level.

Studio Arts Minor Electives

- SA 0120 - PAINTING STUDIO 1
- SA 0140 - SCULPTURE STUDIO 1
- SA 0180 - DIGITAL STUDIO: PHOTOGRAPHY 1
- SA 1220 - PAINTING STUDIO 2
- SA 1230 - DRAWING STUDIO 2
- SA 1240 - SCULPTURE STUDIO 2
- SA 1260 - PRINT STUDIO: INTAGLIO
- SA 1270 - DIGITAL STUDIO: IMAGING
- SA 1320 - PAINTING STUDIO: PROJECTS
- SA 1330 - DRAWING STUDIO: PROJECTS
- SA 1340 - SCULPTURE STUDIO: PROJECTS
- SA 1345 - SCULPTURE STUDIO: INSTALLATION
- SA 1365 - PRINT STUDIO: SCREENPRINT
- SA 1380 - DIGITAL STUDIO: VIDEO
- SA 1430 - DRAWING STUDIO: PERSPECTIVE
- SA 1450 - PAINTING STUDIO: FIGURE

Department of Theatre Arts

The Department of Theatre Arts offers training in both the practical and academic aspects of theatre. Undergraduates may specialize in acting, directing, design and technical theatre, theatre history and criticism, or any combination of these.

While the department is not a professional school, the presence of strong graduate programs creates the atmosphere of professional training. Instead of the protected environment of a conservatory, undergraduate theatre training at Pitt takes place within the context of the liberal-arts experience at a large, urban university.

The department recommends that students declare this major as early as possible. For more information, please contact the Director of Undergraduate Studies, Don Mangone at dmangone@pitt.edu.

Major

Theatre Arts, BA

The Department of Theatre Arts offers training in both the practical and academic aspects of theatre. Undergraduates may specialize in acting, directing, design and technical theatre, theatre history and criticism, or any combination of these areas. While the department is not a professional school, the presence of strong graduate programs creates the atmosphere of professional training. Instead of the protected environment of a conservatory, undergraduate theatre training at Pitt takes place within the context of the liberal-arts experience at a large, urban university. The department recommends that students declare this major as early as possible. For more information, please contact the department's Director of Undergraduate Studies.

This major requires 42 credits of course work as follows.

Introductory course
• THEA 0810 - INTRODUCTION TO DRAMATIC ART

Performance courses

Choose three of the following courses.

• THEA 0804 - THEATRE AND COLLABORATION
• THEA 0830 - INTRODUCTION TO PERFORMANCE
• THEA 1100 - VOICE AND MOVEMENT 1
• THEA 1101 - VOICE AND MOVEMENT 2
• THEA 1102 - ACTING 1
• THEA 1103 - ACTING 2
• THEA 1104 - ACTING 3
• THEA 1110 - DIRECTING 1
• THEA 1111 - DIRECTING 2
• THEA 1229 - STAGE MANAGEMENT 1
• THEA 1338 - MUSICAL THEATRE PERFORMANCE
• THEA 1392 - SPECIAL TOPICS IN PERFORMANCE

Design/Technical courses

• THEA 0842 - INTRODUCTION TO STAGECRAFT
• THEA 0880 - THEATRICAL PRODUCTION
  Students will take this course three times: once as Construction; and twice as Run Crew.
• THEA 1240 - COSTUME PRODUCTION AND TECHNOLOGY

Choose one of the following courses

• THEA 0840 - INTRODUCTION TO THEATRE DESIGN
• THEA 1230 - STAGE LIGHTING 1
• THEA 1235 - SCENE DESIGN 1
• THEA 1246 - COSTUME DESIGN 1

Playwriting, History, and Criticism

Choose two of the following courses

• THEA 1341 - WORLD THEATRE: 500 BCE TO 1640
• THEA 1342 - WORLD THEATRE: 1640 TO 1890
• THEA 1343 - WORLD THEATRE: 1890-Present

The following writing-intensive course is required.

• THEA 1903 - SEMINAR IN THEATRE ARTS

Choose one elective from the Playwriting, History, and Criticism category
• THEA 0505 - ENJOY PERFORMANCES
• THEA 0825 - CONTEMPORARY GLOBAL STAGES
• THEA 1341 - WORLD THEATRE: 500 BCE TO 1640
• THEA 1342 - WORLD THEATRE: 1640 TO 1890
• THEA 1343 - WORLD THEATRE: 1890-Present
• THEA 1365 - PLAYWRITING 1 (writing-intensive)
• THEA 1366 - PLAYWRITING 2 (writing-intensive)
• THEA 1390 - NEW PLAY PRACTICUM

Elective course

Students must take one course selected from offerings in Performance, Design / Tech, or Playwriting / History / Criticism. Directed study (THEA 1480 - THEA 1485) and independent study (THEA 1900) courses cannot be used to satisfy this requirement.

Additional Requirements

• Declaring the major: Students are encouraged to declare this major early and register with the departmental advisor.
• Grade requirement: A minimum cumulative average of a C (2.0) or better in all departmental courses and any individual class required of the major must be at least a C- (1.75) or better.
• Satisfactory/No Credit option: Students must check with the program advisor to determine the appropriateness of using the Satisfactory/No Credit (S/NC) grade option in departmental courses. No more than two courses in the major may be taken on an S/NC basis.

For more information on the major and the Department of Theatre Arts, visit their Web site.

Minor

Theatre Arts Minor

Minor Requirements

Required Courses for the Minor

• THEA 0880 - THEATRICAL PRODUCTION : Run Crew

Choose two of the following courses

These courses cannot count for both the required course and the nine credits of theatre electives.

• THEA 0505 - ENJOY PERFORMANCES
• THEA 0804 - THEATRE AND COLLABORATION
• THEA 0810 - INTRODUCTION TO DRAMATIC ART

Choose three courses from any remaining theatre courses listed.
Urban Studies Program

While urban studies is not a department, it is an administrative unit offering a major in urban studies for students who have an interest in unraveling the complexities of the urban world. The major is interdisciplinary, meaning that students learn about cities as historical, social, cultural, economic, and political phenomena. The major is "real world" in the sense that students apply what they learn to the world beyond the classroom. Finally, the major is career oriented in that, after graduation, students attempt to find roles for themselves in the urban environment. To accomplish all of these
goals, the urban studies curriculum integrates "knowing" with "doing." The major combines courses offered by the program with courses offered through other social science departments. For more information, see www.urbanstudies.pitt.edu.

**Major**

**Urban Studies, BA**

The Urban Studies Program offers a major for students who have an interest in unraveling the complexities of the urban world. The major is interdisciplinary, meaning that students learn about cities as historical, social, cultural, economic, and political phenomena. The major is real world, meaning that students take this learning with them and apply it to the world beyond the classroom. Finally, the major is career-oriented, meaning that students attempt to find a role for themselves in the urban environment. To accomplish all of these goals, the Urban Studies Program has designed a curriculum which integrates knowing with doing. The urban studies major combines courses offered by the program itself with courses offered through other social science departments. Students are encouraged to take URBNST 0010 Introduction to Urban Studies as early as possible, ideally in the fall or spring of the freshman year, and to develop a broad background in the social sciences among lower-level social science courses.

The Urban Studies major requires the completion of 36 credits distributed as follows.

**Major Requirements**

**Core courses**

All of the following courses; these courses should be completed early in the student's academic program

- URBNST 0010 Introduction to Urban Studies
- URBNST 0030 Introduction to GIS
- URBNST 0050 Introduction to Urban Research
- URBNST 0070 Urban Social Theory

**Intermediate Electives**

Students must take at least four courses according to the following guidelines.

**Urban Studies courses**

At least two of the following Urban Studies courses.

- URBNST 0100 World Urban Patterns
- URBNST 0108 Urban Economic Geography
- URBNST 0112 Social Justice and the City
- URBNST 0114 Urban Sustainability
- URBNST 0120 Urban Geography
- URBNST 0130 Applied GIS
- URBNST 0140 Crime and Punishment
- URBNST 0150 GIS & Community Data
- URBNST 0160 Data Visualization

Other electives

At least one of the following courses
• URBNST 0200 Internship
• URBNST 0400 'Global City' Study Abroad Courses
• URBNST 0413 Sustainable Cities 1
• URBNST 0415 Sustainable Cities 2
• URBNST 0600 Independent Research
• URBNST 0810 Field Analysis of Global Urbanism
• URBNST 0820 Advanced International Field Placement
• ARC 0110 Approaches to the Built Environment
• COMMRC 1103 Rhetoric and Culture
• ECON 0230 Introduction to Public Economics
• ENGLIT 0628 Working Class Literature
• FR 0017 Paris: Urbanism Past and Present
• HIST 1019 Cities in Historical Perspective
• PUBSRV 0030 Public Policy Process
• SOC 0444 Urban Sociology

Advanced Electives

Advanced elective courses

Students must take three courses according to the following guidelines.

Urban Studies courses

Advanced Urban Studies courses; choose two courses

• URBNST 0300 Remaking Cities
• URBNST 0320 US Housing & Property
• URBNST 0340 Urban Ethnography
• URBNST 0360 International Urbanism
• URBNST 0380 Field Research Seminar
• URBNST 0710 Urban Culture: Special Topics
• URBNST 0750 Urban Methods: Special Topics
• URBNST 0770 Urban Theory: Special Topics

Other electives

Advanced courses from another discipline; choose one course.

• ANTH 1530 Origins of Cities
• ARC 0300 Intro to Historic Preservation
• ARC 1180 World Cities
• ARC 1181 Pittsburgh Arch. & Urbanism
• HIST 1135 Berlin: History of a European Metropolis
• JS 1160 Jerusalem: History and Imagination
• PS 1251 Urban Government and Politics
• PUBSRV 1100 Practices in Public Administration
• SOC 1286 Race and the City
• SOCWRK 1000 Introduction to Social Work
• SOC 1476 Urban Policy and Planning

Capstone course

• URBNST 0900 Urban Studies Research Seminar

Additional Requirements

Grade requirements: A minimum GPA of 2.0 in departmental and concentration courses is required for graduation.

Satisfactory/No Credit option: There is no limit to the number of courses in the major that can be taken on an S/NC basis.

Writing requirement: Students must complete one W-course in the major. URBNST 0900 Urban Studies Research Seminar fulfills this requirement.

Study abroad: It would be desirable for students to add an international dimension to their undergraduate education through their participation in a study abroad program.

Urban Students Association: The Urban Students Association (U.S.A.) is an official student organization formed by students in the Urban Studies Program. Through U.S.A., students have been actively involved in issues related to the major throughout the Pittsburgh region. U.S.A. has invited guest speakers to appear on campus, organized field trips, and participated in numerous community projects.

The University of Pittsburgh's School of Computing and Information (SCI) opened on July 1, 2017, building upon the traditions of excellence embodied by the Department of Computer Science and School of Information Sciences. SCI aims to position the University as a leader in preparing students for this increasingly-interconnected world by providing students with excellent disciplinary foundations and training to support our mission to make the world a better place through polymathic education and the science of interacting systems. Our degree programs address the holistic spectrum of computing and information, from producers to users and from science-oriented exploration to human-centric applications. We foresee a future with increased opportunities to expose our students to a multidisciplinary approach to knowledge creation, information management, and computing; expanded experiential learning opportunities; and extended career networks.

SCI represents the confluence of computing and information along with diverse academic disciplines, serving as a valuable resource to researchers, students, and organizations across the University and around the world. SCI is a new school for a new era of research and learning, one in which the power of information and computing will accelerate knowledge discovery and creativity.

The School-level regulations set forth in the following document apply to students who were admitted to the University of Pittsburgh during the 2020-21 Academic Year.

Students admitted prior to this academic year should refer to the Archived Catalogs for the regulations governing their undergraduate studies. The following is a guide for navigating the archived catalogs for degree requirements.

Undergraduate students may opt into a newer set of School-level policies and degree requirements and newer major-level requirements. Note that, students electing into a new set of requirements may only opt into School and major requirements of the same year. In order to elect into new requirements, the student must meet with their advisor to discuss this process. The decision to opt into newer requirements is final and may not be reverted.

University of Pittsburgh

School of Computing and Information
Admission Requirements and Deadlines

SCI is a four-year undergraduate school, admitting its first-year students through the Office of Admissions and Financial Aid (OAFA) website. Applicants interested in beginning their studies at SCI as a first-year, non-transfer student should refer to the OAFA website for application prep checklists, access to the application, deadlines, etc.

To be considered for admission, transfer* or a second Pitt bachelor's degree, applicants must:

- Complete at least 24 credits with a GPA of at least 2.75 (Pittsburgh campus) or 3.00 (Regional campuses, second Pitt bachelor's, and external transfers)
- Finish the equivalent of the First-year SCI Curriculum with grades of "C" or better in each course. The first-year SCI curriculum must minimally include the SCI quantitative mathematics and statistics requirements, programming, and introductory composition. Completion of CMPINF 0010: Big Ideas in Computing and Information course is strongly recommended for Pittsburgh campus internal transfer applicants.
- Sample courses of study within SCI can be found within the catalog pages for individual majors offered within the school.

Please note that these GPA requirements are for consideration only. Individual undergraduate programs reserve the right to close admission to a major once capacity has been reached. Preference will be given to students ready to declare a major; (major eligibility requirements).

*Pittsburgh and regional campus (i.e., internal) transfer applicants should note that the criteria listed above applies only to students admitted to the University of Pittsburgh in Fall 2019 or later. Internal transfer applicants admitted prior to Fall 2019 must be admissible directly to a major (major eligibility requirements) and meet the admissions criteria outlined in the Catalog published in their University admit term in order to be considered for admission to SCI (see the Archived Catalogs).

To determine the category of applicant you fall under and to find the related application procedures, please refer to the Applicant Types and Related Policies section of the SCI Catalog.

Application Deadlines

Applications must be received by SCI by the deadlines listed on SCI's Undergraduate Admissions webpage. Applications received after the deadlines will not be reviewed.

Review Timeline and Admissions Notifications

Applications for internal transfer are reviewed by an admissions committee during specific review periods. Where applicants have completed the minimum required credits and have earned a grade in each of the first-year SCI courses by the admissions deadlines, decisions are made prior to the enrollment period for the upcoming admit term in order to accommodate advising and enrollment in SCI. Note, for the fall term, the early deadline is reserved for applicants who completed all required credits and courses before March. Meeting the early deadline for the fall will result in students receiving an admissions decision prior to the fall term enrollment period; the final deadline and admissions review period take place during the fall open enrollment period. The fall term final deadline accommodates applicants who are completing required credits and courses in the spring term.

Applicants' grades must be posted for the courses required for admission in order for the application to be considered complete.
Incomplete applications, where grades are not posted for admissions pre-requisite classes by the stated final deadline, in-progress courses, and other courses lacking grades as they appear in the application materials, will be sent application rejection notices during the standard notification timeframe.

Applicants should receive a decision within one to two weeks after the published review period above.

Admissions decisions are communicated by SCI Academic Records to the applicants' University email address. Applicants should monitor their email, including spam/quarantined messages, regularly during the notification periods mentioned above. Admitted students must accept their offer of admission via the Pitt PSMobile application by the last day of the add/drop period of their admissions term.

Admission to SCI is term-specific. If admitted students do not accept their offer by the deadline for their admit term, they must reapply and are not guaranteed admission at a later date. Additionally, admitted students are not able to enroll as an SCI student prior to their admit term.

All applications for external transfer (second-degree, non-Pitt; first-degree transfer; and readmission), including the associated evaluation of course work taken at other colleges and universities, will be reviewed by SCI Academic Records in conjunction with departmental faculty and the Office of Admissions and Financial Aid. Decisions are made in accordance with the timelines noted above and notifications will be made by the Office of Admissions and Financial Aid. Students will later receive an evaluation of transfer credits and a welcome letter from the School.

**Applicant Types and Related Policies**

The following types of applicants must adhere to the stated admission criteria but should also be aware of policies and procedures specific to their situation.

**Admission of Students from Other Countries**

Applicants are required to submit original (or certified) official secondary school records; literal translations of your records if they are not in English; and an official credential evaluation of all international documents (transcripts, marksheets, certificates, examination results, etc.) from an approved evaluator. See details on the OAFA webpage for International Transcript Evaluation. The application process should be started 9 to 12 months in advance of the intended enrollment date.

An applicant whose native language is not English must take the Test of English as a Foreign Language (TOEFL) and submit official test results.

For more information on international student applications, including TOEFL requirements and exceptions, refer to OAFA's international student admissions webpage.

**Second-degree Pitt**

Students who have already earned an undergraduate degree at the University of Pittsburgh with a minimum GPA of 2.75 and who are returning to complete a second degree in a major offered through SCI will be considered for admission.

Students who fall into this category should apply directly to the School of Computing and Information. Applicants should note the following:

- Course work for the second degree will continue to be recorded on the original University of Pittsburgh undergraduate transcript.
- All appropriate coursework from the first degree will apply to the second degree.
- The cumulative GPA and credit total will be based on all credits from the first degree and any new course work completed that applies to the second degree. Courses repeated from the student's first Pitt degree will not be removed from the student's cumulative GPA nor their credits.
- Students must earn a minimum of 30 new credits, including at least half of the major credits.

**Second-degree, non-Pitt**

Students who completed a degree at another institution submit a Transfer Application and supporting materials to the Office of Admissions and Financial Aid.
Post-baccalaureate and Guest Students

Students who have completed an undergraduate degree and wish to take additional undergraduate courses on a non-degree-seeking basis (post-baccalaureate) or students who are students enrolled in an undergraduate degree program at another university who plan to take courses for credit at the University of Pittsburgh with the intention of transferring those courses back to their home institution (guest students) should apply directly to the College of General Studies (CGS). Eligibility and application instructions are available on the CGS website.

Non-degree-seeking status at CGS is not encouraged for students interested in later applying for internal transfer to SCI. Instead, these students should apply directly to SCI as first-year students through the OAFA website.

Pittsburgh and Regional Campus (Internal) Transfer

Students in Pitt's undergraduate schools or regional campuses at the University should initiate the process of transferring into an SCI program by submitting an Undergraduate Academic Program / Plan Add / Change form with their current campus's Records Office or other administrative center. Students currently on inactive status in the school of last registration must first be reinstated in that school before the transfer process can be completed.

Note: All credits and previously approved exemptions to academic requirements will be re-evaluated by SCI. In some instances, this may mean that not all transfer credits or previously approved exemptions or waivers will be accepted or applied toward a student's SCI career. All credits will be subject to the transfer credit policies listed in this Catalog.

First-degree Transfer from External Institutions

Students at other institutions who wish to apply for admission as transfer students to the School of Computing and Information should submit a Transfer Application and supporting materials to the Office of Admissions and Financial Aid.

Readmission

Students who previously attended the University of Pittsburgh before attending another institution and who wish to return to the University are considered transfer students and must reapply following the guidelines for transfer students. Such students should submit a Transfer Application and supporting materials to the University's Office of Admissions and Financial Aid.

For more details regarding the different definitions and regulations for readmitted and reinstated students, see the Readmission and Reinstatement section of the SCI Catalog page.

Reinstatement

Students who have left the School of Computing and Information for one calendar year or more (whether of their own volition or as a result of a suspension), who did not complete work at another institution, and who wish to continue their studies must apply for reinstatement.

For more details regarding the different definitions and regulations for readmitted and reinstated students, see the Readmission and Reinstatement section of the SCI Catalog.

Evaluation of Transfer Credits

Previous course work for transfer students is evaluated by SCI Academic Records with respect to general education requirements. As well, SCI Academic Records liaises with departments and programs to ascertain transfer credit for major-specific course requirements. Before initial registration, all students who have accepted their offer of admission will have access to an Academic Advisement Report that illustrates the requirements that they have satisfied, and which requirements remain to be satisfied in order to complete their degree.
After receiving SCI evaluation of transfer credits, a student may petition for a re-evaluation of courses within the first two terms after matriculation into the School. A student must submit all petitions to transfer or substitute courses taken prior to enrollment at the same time. SCI Academic Records will confer with faculty to evaluate the merit of these petitions.

Transfer credits are subject to the following conditions:

- Courses that have a reasonable counterpart in the curricula of the various Schools/Departments of the University of Pittsburgh are eligible for transfer. Courses must be passed with a satisfactory grade (minimum of C or equivalent). Courses taken on a satisfactory/no credit (or similar nomenclature) grading system will only be transferred if the passing grade is equivalent to a C or better. Transfer course grades are recorded as T grades and are not used in computing a student's GPA, determining probationary status, or determining eligibility for graduation honors. Transfer credits must be earned at an institution accredited by the appropriate regional accrediting association and may not be a repetition of any course previously taken (passed or failed) at the University of Pittsburgh.
- An official transcript of all courses taken at other institutions must be submitted at the time of application, whether or not it is intended that such courses be counted toward the degree. For all students who are requesting transfer credit for approved summer or special session coursework, they must submit an official transcript as soon as the course grade is available. No transfer credits will be posted to a University of Pittsburgh transcript without an official transcript from the originating institution.
- No more than 90 credits may be transferred from a four-year institution, and no more than 60 credits may be transferred from a two-year institution with a combined total of no more than 90 transfer credits posted to a student's transcript. No transfer credits will be transferred to a student's record during or after the term in which they achieve a total of 90 earned credits.
- The number of credits granted for a course cannot exceed the number on the transcript from the institution where they were earned nor exceed the number to be earned in the corresponding course at the University of Pittsburgh. Credits earned on the quarter system will be converted into semester credits. A quarter credit is equal to two-thirds of a semester credit (e.g., five quarter-system credits equal three semester credits, and three quarter-system credits equal two semester credits). Converted credits are rounded down to the nearest half.
- If a course is repeated for which advanced standing credit (AP test credit or other) has been granted, the advanced standing credit is canceled. This is monitored once per academic year and it is the student's responsibility to discuss course repeats- including those equivalent to advanced standing credit- with their advisor.
- Current students may also transfer in summer or special session credits from another institution with documented approval from SCI's Office of the Dean. These credits must follow the aforementioned regulations.

**Transfer Guides / Articulation Agreements**

The School of Computing and Information utilizes the transfer guides and articulation agreements published by the Office of Admissions and Office of the Provost when evaluating transfer credits. These resources include but are not limited to "Pitt Connection Guides" and the Pitt Transfer Tool. Students considering a transfer to the School may find these resources useful.

**Advanced Standing**

In addition to the aforementioned transfer credit options, the School of Computing and Information may accept the following forms of advanced standing, referred to as "test credits."

**Advanced Placement (AP) Credits**

See the AP credit section of the Office of Admissions and Financial Aid Web site.
International Baccalaureate (IB) Higher-Level Examinations

See the IB Examination section of the Office of Admissions and Financial Aid Web site.

College Level Examination Program (CLEP) Testing

SCI does not accept CLEP general examination credits.

Transferring Out

Students who wish to transfer out of SCI to another School at the University must submit the Academic Program (Transfer Out/Double Degree) Change form available on SCI's Student Resources site.

Note: All transfer credits and authorized exemptions or waivers are subject to re-evaluation when a student transfers from one School to another within the University of Pittsburgh.

Academic Regulations and Standards

University Registration Policies

Policies on full-time/part-time status, adding and dropping courses, cross-registration, grading systems, etc. are governed by the University at large. Students should refer to the Academic Regulations for general information and contact SCI Academic Records for more details on applying these policies in practice.

Highlighted are frequent topics of inquiry: Registration Status and Process, Withdrawing and Resigning, Grading Options and Calculations

Grading Policies

University Grading and Records

More information regarding grades—definitions of, grade change, and viewing grade reports—can be found in the Academic Regulations.

Satisfactory/No-Credit Grade Option Policy

The School of Computing and Information uses both the University's letter grade and Satisfactory/No-Credit (S/NC) grade options (formerly the S/N option; see Grading and Records for more information). In addition to the general University rules governing those grading systems, there are a few formal limitations to the student's freedom of choice regarding grading systems. The student should check with their academic advisor before deciding to take a course S/NC.

Note, students choose a grading option (letter grade or S/NC) during enrollment from those listed within the University's Student enrollment system. If no election is made, the grading option will default to Letter Grade except in cases where a class is not offered for Letter Grade. Any decision to change the grading option after a class has been added to the student's enrollment must be processed (via the Grade Option/Audit Form, see the SCI Student Resources > School Forms webpage) no later than four weeks after the start of term. This decision may not be changed, nor may a grade of one kind received for a course be changed to a grade of the other kind (e.g., from an S/NC grade to a letter grade).

Students enrolled in the School of Computing and Information may take at most 30 credits of course work using the Satisfactory/No-Credit (S/NC) system. Aside from this overall limitation on the number of S/NC credits, individual degree programs may place additional requirements upon the use of this grading option within the degree program.
Evaluation of a student's ability and achievement in a course is not eliminated by the Satisfactory/No-Credit (S/NC) system. Recitations, tests, and papers may all be required and assessed by instructors who will convey to the student their judgments of the worth of the student's work. Because the publicly recorded evaluation is minimal, students should use the instructor's comments in the most helpful way possible: as a guide to their own future course of study and for assessment of their own potential.

Since it is difficult to evaluate transcripts containing very few letter grades, students seriously considering transferring to the School of Computing and Information or considering graduate study should keep this in mind. The student may wish to ask instructors from whom they have taken courses on the Satisfactory/No-Credit (S/NC) system to write letters of recommendation for them immediately at the end of the course.

Credit and Enrollment Policies

Residency Requirement

All students must earn a minimum of 30 new credits in residency at the School of Computing and Information, including at least 15 credits within the major program. At least half of the major program credits must be earned at the University of Pittsburgh.

Normal Full-Time Credit Load

A normal full-time credit load ranges from 12 to 18 credits per term, with a minimum of 24 credits in an academic year. Any term credit load in excess of 18 credits requires the approval of the Director of Advising and approval of the Office of the Dean. Students must initiate a petition for a credit overload with their advisor. A credit overload will result in additional tuition charges.

Summer or Special Session Course Work

Students in good academic standing may attend a summer or special session at another accredited institution in order to supplement their program. Students must provide a transfer credit request form, course description, and syllabus to initiate a review of potential or completed external courses. The Transfer Credit Request form can be found on the SCI Student Resources > School Forms webpage.

All summer or special session coursework must comply with the transfer credit evaluation guidelines noted under the Evaluation of Transfer Credits section of this Catalog. Transfer credit requests submitted after the completion of an external course are not guaranteed for approval or transfer. For this reason, students should discuss potential studies at external institutions with their advisor and submit the Transfer Credit Request form PRIOR to enrolling in external courses.

Sequential Courses

Credit cannot be earned for courses taken after more advanced course work in the same field has been successfully passed with a C or higher. For example, credit cannot be earned for an algebra course taken after the successful completion of a calculus course.

ELI classes

LING 0007, LING 0008, and LING 0009 courses may be counted towards the 120 credits required for the degree.

Physical Education

Students are not required to take any courses in physical education (PEDC), but may elect to do so. Up to four credits of courses offered by the School of Education's Department of Health, Physical, and Recreation Education may be counted toward an SCI degree.

ROTC
Credits earned in aerospace science (Air Force ROTC), military science (Army ROTC), or naval science (Navy ROTC through cross-registration at Carnegie Mellon University [CMU]) are not accepted toward an SCI degree. In lieu of physical education and recreation courses, the School will grant up to four credits toward graduation for the following military science courses: AFROTC 0001, AFROTC 0002, AFROTC 0003, and AFROTC 0004; MILS 0012 and MILS 0022; Navy ROTC courses from CMU.

**Independent Study, Undergraduate Research, and Internships**

SCI students may earn up to 24 credits of independent study, undergraduate research, and internships as part of the 120 credits required for a degree. Ordinarily, no more than six credits may be earned in any term in a single undergraduate research experience or internship. Under certain conditions, students in good standing may register for a block of 15 credits of independent study. These credits are to be earned for work done within one academic term. A student may register for a 15-credit independent study term only once during their college career. This needs to be approved by the Dean prior to registration.

Learning Agreement forms for independent study and undergraduate research are available from the academic department through which the activity will be conducted. Internship application packets are available through SCI Student Services.

Eligibility, procedures, and guidelines, are governed by the academic department, therefore inquiries should be sent to the student's advisor.

**Directed Research**: The student pursues a defined research project on campus under the guidance of a faculty member.

**Independent Study**: Involves an independent program of study, research, or creative activity designed under specified conditions and is usually conducted off-campus with less immediate direction by the sponsoring faculty member.

**Internships**: A supervised, work-related experience, either volunteer or compensated. It is intended to be a new experience, not an existing position in which the student is already working. Students will only get internship credit for a current employment situation that has been pre-approved as an internship by the relevant School or Department. Participation in the co-operative program falls under this category.

**Cooperative Programs**: To provide an opportunity to apply classroom knowledge within a real-world context, SCI students may participate in the cooperative program run out of the Swanson School of Engineering (SSOE). The Cooperative Education Office within SSOE has established arrangements with industry partners that permit students to rotate four-month terms between the workplace and the classroom. These are paid positions related to the student's field of study. The experience normally starts in the sophomore or junior year. A student may complete a maximum of four rotations, totaling four credits toward their degree.

Any student registering for directed research, independent study, internship for credit, or coop must receive consent. Students should speak to their advisor as other restrictions may apply.

**Study Abroad Credit Policies**

SCI students may pursue as many abroad experiences as allowed by the Study Abroad Office. However, the maximum total of credits that may be applied to an undergraduate degree is bound by SCI's limit S/NC credits. Any credits earned during study abroad programs with the satisfactory/no credit (S/NC) grading option or appearing on the Pitt transcript as such will calculate into the S/NC credit limits listed above.

Before study abroad is undertaken, approval for credit must be obtained. The study abroad advisor provides Program approval while the student's SCI advisor will assist with course selections and verifying Pitt equivalencies with either the SCI Department (if the equivalent is offered within SCI-controlled subject areas) or SCI Academic Records (if the equivalent is offered outside of SCI). After this step is complete, the advisor signs the Study Abroad Office's form; final approval is communicated through SCI Academic Records. Students should have at least a 2.75 GPA before seeking permission from their advisor to study abroad.

Completion of any study abroad experience will fulfill the "Global Awareness and Cross-Cultural Understanding" requirement within the Polymathic Context section of the general education requirements. This is in addition to fulfillment of other requirements (general education or major) as pre-approved by the student's advisor, Department, and/or the Dean's Office.

**Graduate Classes**

Undergraduates with sufficient preparation are encouraged to take advantage of the rich variety of graduate courses offered by the Departments and Schools within the University. Students enrolled in the School of Computing and Information may use credits in graduate courses toward their
undergraduate degree. These may not be counted as credits toward a graduate degree except for students admitted into a BS/MS degree program. To enroll in a graduate course, students must obtain the written consent of the instructor of the course, have a 3.00 cumulative GPA, and have the approval of the Director of the undergraduate program. See the University's allowable credits and course limitations regulations for details.

### Course Repeat Policy

Required courses for a major must be repeated or replaced by a comparable course if a grade does not meet the Program's minimum requirements (see Department page for specifics). If the minimum acceptable grade is not earned after meeting the course repeat limit, the student may have to select a different major within SCI or transfer out of SCI.

Course repetitions are subject to the University's defined limitations:

- A sequenced course may not be repeated for credit if the student passes a higher sequence course with a C or better grade.
- A student may not enroll in the same course at another institution and have that grade replace the original grade earned at the University.
- The original course and grade remain on the transcript; however, the grade and credits originally earned are not counted in the calculation of the GPA.
- The grade earned by repeating a course is used instead of the grade originally earned. W, R, or N grades reported for the repeated course will not be identified as a course repeat, and therefore the original grade earned will continue to be counted in the GPA. Incomplete grades (G) are not identified as repeated courses until the course work is completed.
- Students are only permitted to repeat each course a maximum of twice.

SCI Academic Records automatically submits the Registrar's Course Repeat Form for students who have repeated the exact same course (i.e., repeating INFSCI 0017). However, any student who is replacing a course with a comparable one (i.e., replacing INFSCI 0017 with CMPINF 0401), must submit a Course Repeat Form to their advisor PRIOR to enrollment. The advisor will review course repeat policies with the student and submit the form to Records on behalf of the student at the end of term. This form is available on the School's Student Resources > School Forms webpage.

In all cases, it is the responsibility of the student to ensure their repeat course grades have been updated with the "Repeated - Excluded from GPA" flag on their academic record and that all credits have been calculated correctly. Students should discuss repeat courses with their advisor at the beginning and end of the term of repeated enrollment.

### Statute of Limitations

The School's statute of limitations requires that all of the credits required for the Bachelor of Science degree, whether earned in residence or transferred from another institution, must have been earned within 12 years prior to the date on which the degree is awarded. However, when given evidence that the previous courses still provide adequate preparation for courses yet to be taken and still represent a reasonable part of the total academic program, with the support of their advisor, students may appeal to the Dean's Office to waive this limitation. In such cases, the waiver is for a specific period during which the program must be completed.

### Readmission and Reinstatement

A student record without enrollment for three consecutive terms becomes inactive. Students in inactive status must apply for readmission or reinstatement. By University definitions, readmitted students previously attended the University of Pittsburgh and then enrolled at another external institution. Reinstated students previously attended the University of Pittsburgh and left for one or more calendar years, not attending external institutions in the meantime. These terms are attached to specific application processes and graduation requirements.

Readmitted students follow the School and degree graduation requirements and rules based upon their term of readmission. Their statute of limitations is reset to their term of readmission and their transfer credits, advanced standing, and previously authorized exemptions will be reevaluated at the point of readmission. Students may apply for readmission by submitting the transfer application available on the Office of Admissions and Financial Aid website.
**Reinstated** students follow the School and degree requirements and rules based upon their original term of entry to the School. Their statute of limitations is calculated against their original term of entry to the University and their transfer credits, advanced standing, and previously authorized exemptions will be accepted as previously approved at the point of reinstatement. Students interested in reinstatement should submit the Reinstatement application available on the School's Admissions > Take the Next Step webpage.

NOTE: Students whose break in enrollment extends two years or more from the close of their last term of enrollment to the start of their reinstatement term will be subject to the requirements of the School and of their major and/or certificate Programs at the time of their reinstatement, rather than those in place at the time of their last attendance.

**A note on advising appointments and on returning from a break in continuous enrollment:** Since registration advising meetings are usually held from the seventh to the twelfth week of the preceding term, applications for reinstatement should be received within that period so that the advisor may assist in planning the program and in registering the student. Similarly, students who are returning from inactive status should keep this timeline in mind for setting up an appointment with their advisor.

Regardless of the conditions surrounding a student's leave - an intentional leave of absence, suspension, or an extended lapse in enrollment requiring reinstatement - when a student returns, they return in the standing attached to their record (good, warning, or probation) at the term of their departure.

Any courses that a student takes at another institution during a period of suspension shall not be granted credit by the School after the student has been reinstated.

**Academic Advising**

Academic Advising in SCI supports the SCI Mission by facilitating deep, integrative learning; supporting students through their decision making; and developing holistic, cohesive educational plans.

SCI assigns newly matriculated students an academic advisor with whom they will work until graduation. The academic advising relationship is integral to students' intellectual, personal, and professional growth. Academic advisors will help students to make informed educational choices regarding course selection as well as co-curricular and experiential education opportunities. In addition to their assigned academic advisor, students will have the opportunity to work with faculty mentors who can provide consultation regarding discipline-specific matters.

**Advisor/Advisee Expectations**

In SCI, we envision academic advising as a relationship with shared responsibilities.

**Advisor Responsibilities:**

- Be available for one-on-one in-person, web conference, and phone meetings.
- Provide accurate information about SCI academic requirements, policies, and procedures.
- Be knowledgeable about campus resources and will make appropriate referrals when necessary.
- Help students to make informed educational decisions regarding courses, co-curricular activities, experiential education, and community engagement.
- Help students to understand their unique interests and values.
- Help students to understand the purposes of higher education, the missions of the University and SCI, and the way they inform and influence the curriculum.
- Help students to develop polymathic sensibilities.
- Help students to think about why they are in college, what they want to learn, what problems they want to solve, and how to use their time at Pitt to figure these things out and make progress toward them.

**Student Responsibilities:**

- Schedule at least one appointment with your advisor each semester.
- Prepare for your appointment by reviewing your Academic Advisement Report and other supplementary educational planning documents.
- Be prepared to discuss your strengths, interests, skills, and values, as well as what you are learning in your classes and co-curricular experiences.
• Be prepared to discuss which courses you want to take, why you want to take them, and what you expect to learn from them.
• Read your emails.
• Take ownership of your education.
• Assume final responsibility for the selection of courses, degree progress, and educational planning.
• Learn about the requirements for the degree as well as relevant policies and procedures. Most of the information you need can be found here on SCI's Student Resources site. Follow through on the plan designed with your advisor and keep them apprised of any barriers you encounter.

Tracking Your Degree Progress (AAR)

In order for students to verify that they are making progress toward graduation, they should regularly review their academic advisement report (AAR). This report is used by the School to certify a student's graduation eligibility and by students to track their progress toward degree attainment. The AAR provides detailed course options for fulfilling all requirements for the degree. When using the AAR online, students have quick access to schedule details for approved courses and links to enrollment. It is recommended that students continually monitor their AAR and utilize this tool frequently for enrollment and advisement purposes.

Where questions regarding course substitutions for or waivers of requirements are concerned, the student should contact their academic advisor.

Requirement exceptions must be pre-approved by the Program Director for major requirements; General Education Requirements exceptions are pre-approved by the Dean's Office via SCI Academic Records. Exceptions are approved only in extenuating circumstances, and students should consult with their advisor for guidance on exceptions that are appropriate to request. Approval of an exception will be noted on the student's AAR.

Maintenance of a student's AAR is the responsibility of the student and will expedite the graduation certification process. As well, the AAR provides detailed course options for fulfilling all requirements for the degree. When using the AAR online, students have quick access to schedule details for approved courses and links to enrollment.

It is recommended that students continually monitor their AAR and utilize this tool frequently for enrollment and advisement purposes.

Informational videos and documents related to the AAR can be found on the Registrar's Student Training website.

Other University Regulations

The University has a number of official policies affecting students. For a summary of these policies and links to complete and current text on all University policies, students should thoroughly review the information provided under Academic Regulations .

Highlighted are frequent topics of inquiry: Student Rights and Responsibilities , Family Educational Rights and Privacy Act (FERPA) , Harassment Policies , Student Service Indicators Policy

Academic Integrity

Students have the responsibility to be honest and to conduct themselves in an ethical manner while pursuing academic studies. Students have the right to be treated by faculty in a fair and conscientious manner in accordance with the ethical standards generally recognized within the academic community (as well as those recognized within the profession). Should a student be accused of a breach of academic integrity or have questions regarding faculty responsibilities, procedural safeguards- including provisions of due process-have been designed to protect student rights. These may be found in Guidelines on Academic Integrity: Student and Faculty Obligations and Hearing Procedures.

Academic Honors

Dean's List
Each term, a list is compiled of students whose academic record in the preceding term indicates outstanding academic achievement. To be placed on the School's Dean's List, a student must have earned at least 12 letter grade credits (not including courses taken on the Satisfactory/No-Credit option) with a term GPA of at least 3.50. As well, no grade earned during the term in review may be lower than a C. Both full-time and part-time students are eligible for placement on the Dean's list. For part-time students, grades from the current and preceding two terms (which must total at least 12 letter grade credits) are used to determine eligibility for the Dean's list. If a grade is changed after the Dean's list is generated for the term, it is the student's responsibility to contact SCI Academic Records for an individualized reevaluation of eligibility.

**Honors**

Undergraduate students may be graduated with University Honors. Criteria for University Honors are posted under the University's Academic Regulations.

Program honors may be awarded at the point of graduation. Students should refer to their Department or Program's information page within the SCI catalog.

**Academic Standing**

The School is committed to the success of its students and has guidelines in place to connect students with the appropriate resources at the earliest sign of academic difficulty. Students' academic standing is maintained and monitored each term by the Dean's office. A student's academic standing is comprised of three factors: term GPA, cumulative GPA, and progress toward a degree. In order to be in good academic standing, students in the School of Computing and Information are expected to maintain a cumulative GPA and term GPA of 2.00 or above for each term of enrollment. In addition, full-time students are expected to successfully complete a minimum of 12 credits during each term of enrollment. Part-time students are expected to successfully complete a minimum of 3 credits during each term of enrollment.

Students are placed in the **Academic Warning** status if they earn a term GPA below 2.00 or a cumulative GPA between 2.00 and 2.125.

Students are placed in the **Academic Probation** status after earning a term GPA below 2.00 over two consecutive terms or have one semester below 2.00 cumulative GPA. Students may also be placed on Academic Probation if they fail to make progress toward their degree, as determined by University standards and/or Department or Program requirements. More information on Satisfactory Academic Progress standards can be found at https://oafa.pitt.edu/financialaid/satisfactory-academic-progress.

Students currently on Academic Probation who earn a term GPA below 2.00 or fail to make progress toward their degree will be subject to **Academic Suspension**. After being suspended, students are not eligible to re-enroll for one calendar year. Students on Academic Probation or Suspension are not eligible to earn credits at another institution toward a School of Computing and Information degree. Following suspension, students are required to apply for reinstatement (see details below).

Students who have been reinstated from Academic Suspension must earn a GPA of at least 2.00 for each term that they enroll until they have achieved a cumulative GPA of 2.00 or above. If a student fails to earn 2.00 term GPA, they are subject to **Academic Dismissal**. Dismissal is a final action. Dismissed students are not eligible for reinstatement or readmission in the School of Computing and Information.

Students who are not on academic probation or academic suspension are considered to be in good academic standing. Students will be notified by email if they are no longer in good academic standing.

**Bachelor's Degree Requirements**

Graduation requirements differ among degrees. However, all degrees require a minimum of 120 passing credits with a minimum 2.00 overall GPA, completion of the School's First-Year Courses, General Education Requirements, Major Requirements, Secondary Field of Study, and a Capstone Experience. Furthermore, students must earn at least half of the credits for their major(s), minor(s), and certificates(s) and the final 30 credits toward the School of Computing and Information degree while enrolled as an SCI student.

**General Education Requirements**
All students are required to complete general education requirements (GER). These courses are meant to provide foundational skills and breadth of knowledge, aiming to provide students with a broad exposure outside of their core discipline of study while encouraging a focus on the application of techniques from the classroom to meaningful problems.

Full lists of specific courses that meet the following requirements, referred to as "approved courses" or "course lists," are determined by faculty review and are available to students through the Academic Advisement Report and/or the "Plan by my requirements" tool found in the enrollment system. Additionally, students may use the enrollment systems to "Search by requirements" or filter by class attributes to refine the approved course list for a requirement to those that are being offered in a term. Informational videos and documents related to the AAR and other advisement and enrollment resources can be found on the Registrar's Student Training website.

GER courses cannot overlap within the general education categories (First-Year, Skills, Polymathic Contexts) except where specified. If a course is approved for both a GER and a major requirement, it may satisfy both.

Note: Transfer students receive an evaluation of their previous course work indicating the equivalent University of Pittsburgh courses for which transfer credits have been awarded. Courses will meet requirements for the major where deemed appropriate by the Department. Students who believe that they have an exceptional case for petitioning for a course to meet either a general education or a major requirement should speak with their advisor to submit a petition.

First-Year Courses

Students must complete a gateway course (CMPINF 0010 - BIG IDEAS IN COMPUTING AND INFORMATION) that provides an understanding of the connections between computing and information and other disciplines; the commonalities among and differences between the problems, tools, and methodologies of various computing and information sub-disciplines; and basic technical skills that will serve them as they advance through any computationally-oriented degree program. CMPINF 0010 focuses on ideas and insights that cross-cut computing and information disciplines, as well as underlie problems in other disciplines. Students learn about the complex interconnections between the natural, social, and engineered systems that we interact with every day, and explore how computing and information can be used to model, understand, and reason about the complex problems occurring within this space.

Students must also complete a required first-year seminar (CMPINF 0001 - SCI FIRST-YEAR SEMINAR S/NC) that provides an introduction to SCI and the University of Pittsburgh. This course addresses a range of issues including academic mechanics (e.g., advising, registration, university structure, financial aid, academic and professional communication), academic support services and opportunities (e.g., tutoring centers, study abroad, internships and co-ops, undergraduate research), student support services (e.g., career services, counseling center, student health services), and other student opportunities (e.g., Pitt FYE, campus recreation, Cheap Seats, etc.).

Skills Courses

Skills requirements help ensure that all students attain appropriate levels of competence in writing, communication, and quantitative and formal reasoning. Students may be placed in or exempted from skills requirements based upon certain achievement test scores, University of Pittsburgh placement test scores, or course work completed at other colleges and universities. Skills requirements are outlined below. All skills courses must be completed with a grade of C or higher.

Expression (3 courses): Communication in its various forms is central to all disciplines and professions. The approved courses will assist students in developing the skills to express thoughts and ideas as appropriate for professional or graduate education or for professional employment.

- Introductory Composition
- Technical, Business, or Research Writing
- Communications

Quantitative (2 courses): Quantitative skills are the bedrock of success in the computing and information fields. Approved courses will provide an introduction to university-level mathematics and statistics.

- One course in university-level mathematics for which algebra is a pre-requisite
- An approved course in statistics

Polymathic Context
SCI degree programs address the holistic spectrum of computing and information, from producers to users and from science-oriented exploration to human-centric applications. The following requirements facilitate the development of a multidisciplinary approach to knowledge creation, information management, and computing by immersing students in a variety of intellectual contexts that are crucial to understanding problems at the confluence of natural, social, and engineered systems to which computing and information skills can be brought to bear.

**Scientific Context** (3 courses): These courses introduce students to scientific principles and concepts rather than offering a simple codification of facts in a discipline or a history of a discipline.

- 2 approved sequenced courses in one discipline
- 1 course in a second discipline OR a third course in the sequenced discipline

**Ethical and Policy Context** (1 course): It is crucial for students engaging in computing-and information-related studies to develop an awareness of the interplay between technology, computing, ethics, and societal implications. Approved courses emphasize close and critical reading of theories about knowledge, reality, humanity, and values. Courses could focus on human nature; scientific reasoning; theories of cognition and consciousness; human/social rights; competing systems of belief; morality; concepts of freedom; theories of justice; social obligations/constraints; or ethics, including applied or professional ethics.

At least one course from each of the following three categories (5 courses total)

- **Global Awareness and Cross-Cultural Understanding**: Approved courses examine significant issues that are global in scale. Possible topics include globalization; the global and cultural impact of climate change/sustainability; the effects of and resistances to colonialism; or worldwide issues related to health, gender, ethnicity, race, technology, labor, law, or the economy. Other approved courses will focus on an understanding of cultures, traditions, and societies that differ substantially from those that prevail in North America and Europe. A study abroad experience also satisfies the Global Awareness and Cross-Cultural Understanding requirement.

- **Social and Behavioral Sciences**: Approved courses treat topics considered of significant importance in the social or behavioral sciences (including social psychology). Courses will introduce students to the subject matter and methodology of a particular discipline and will involve them in the modes of investigation, analysis, and judgment characteristically applied by practitioners. Other approved courses focus on significant cultural, social, economic, or political accounts of the past. The courses may focus on pivotal moments of change, or important transitions over longer periods of time. Courses could explore developments in science, technology, literature, or art, and the ideas around them, or examine critical historical shifts by analyzing various data or cultural forms

- **Humanistic Context**: Generally covering courses focusing on literature, the arts, and creative work. This requirement exposes students to courses that introduce the techniques and methods of textual analysis and develop critical perspectives on a variety of forms of cultural expression. Additionally, courses may cover modes of analysis appropriate to music, theatre, or the visual and plastic arts. Finally, some approved courses will result in the production of some form of creative work, training students in the techniques and modes of its production. These courses could be situated in theater, studio arts, writing, visual arts (including photography, film), music, and dance. They may also engage in innovative or original work in relation to written, oral, or visual material, new media, social media, and other contemporary forms of communication and representation

- **Diversity** (1 course): Diversity courses focus centrally and intensively on issues of diversity, and do so in a manner that promotes understanding of differences. They provide students with analytical skills with which to understand structural inequities and the knowledge to be able to participate more effectively in our increasingly diverse and multicultural society. The courses may address, though are not limited to, such issues as race, gender, ethnicity, sexuality, religious difference, ability difference, and/or economic disparity.

Diversity courses may also be courses that fulfill other General Education or Major Requirements.

**Total**: 14 courses

**Secondary Field of Study**

To emphasize the intersections that computing and information have with other disciplines, students will be required to achieve some depth of study within another discipline. This requirement may be satisfied via several mechanisms:
• Completion of a major jointly offered by SCI and another School on campus
• Completion of a minor or second major
• Completion of an approved certificate program
• Completion of an approved 15-credit related area (curated with and approved by the student's advisor)

Requirements for the Major

See the program offerings pages for the major requirements.

Capstone Experience

To provide an opportunity to apply classroom knowledge within a real-world context, all SCI students will complete a capstone experience as part of earning their degree. The mechanisms for satisfying the capstone requirement will be determined and defined by the faculty of the individual degree programs.

Degree programs allow this requirement to be satisfied in a number of ways, including:

• Approved internship or co-op experiences
• Directed research sponsored by a faculty member
• Capstone-designated project courses
The capstone typically requires 2-3 credits to complete.

Declaring a Major

Major Declaration

SCI students may declare a major in the term following the successful completion of all major eligibility requirements. Students declare a major by submitting the Undergraduate Academic Plan Change (Major Declaration) form found on the SCI Student Resources > School Forms webpage.

The Major Declaration form is active each term during the window of two weeks before the term begins through the close of the add/drop period. The general timeframe for submitting the form and processing turnaround is as follows. Students should refer to the Academic Calendar for specific add/drop dates. As a general guide:

• Fall term declaration period is Mid-August to Early September
• Spring term declaration period is Early to Mid-January
• Summer (12-week) term is Early to Mid-May

After students submit the declaration form, they should anticipate up to 10 business days for the major to appear on their student record.

Students who miss the deadline to declare for the upcoming term will be able to declare for the following term, however, all are strongly encouraged to declare their major at the earliest possible point in their career.

Minor Declaration & Secondary Field of Study

Students declaring an SCI minor must complete the Minor/Secondary Field of Study Declaration form. This form is available on SCI's Student Resources site and is active throughout the academic year and processed within one to two weeks.

SCI students fulfilling the Secondary Field of Study requirement with a curated combination of related courses (15-credit related area) must discuss this with their Academic Advisor before submitting the Minor/Secondary Field of Study Declaration form. Students should submit the form after they have successfully completed their Secondary Field of Study. If it is the student's term of graduation, they need only to indicate their Secondary Field of Study on the graduation application.

Students who are completing a second bachelor's degree, a joint degree program, a second major, a minor outside of SCI (e.g., history, studio arts), or a certificate program do not need to submit the Minor/Secondary Field of Study Declaration form.
Graduation

Student Status During Term of Graduation

Students must be in active status during their term of graduation. This means they must have enrolled in a minimum of one credit within the three terms previous to graduation. They must also be in good academic standing.

Application

*Graduation is not an automatic process.* Students must submit the SCI application for graduation by the School's deadlines. The student will first complete an exit survey for their graduation term and then receive a link to the graduation application in the survey's completion notification.

The exit survey and window for submitting graduation applications opens generally two weeks before the start of the student's graduation term. The School's exit survey, graduation application deadlines, and related late fees, are available on its Student Resources > Graduation webpage.

If your graduation is postponed, **you must reapply** by completing another Graduation Application.

Graduation Ceremonies

University Commencement

Candidates for graduation are encouraged to appear in person at the University Commencement Ceremony, usually held the Sunday after the spring term ends. Although degrees are conferred at commencement for all graduation periods, the official certification for April and May graduates occurs several weeks after the ceremony. Neither walking in the Commencement Ceremony nor being named in the Commencement Program is an official indication of graduation. Students will be contacted by the School several weeks after the ceremony regarding their final graduation certification status.

School Ceremony

The School of Computing and Information hosts an event to recognize its graduating students and awardees at the end of each term. The ceremony includes a speech to graduates, an address from Program Representatives, and a reading of individual graduate names.

Certification of degree graduation requirements is processed after the recognition ceremony; reading of a student's name at the Recognition Ceremony is not an indication of the student having met graduation requirements.

Event details, travel tips, and information regarding tickets are hosted on the School's Recognition Ceremony webpage.

Post-Graduation Processing

Certification

Graduation certification is the process run by advisors and staff to ensure students have met all graduation requirements. This process is run after grades are posted for the term in question. Students who are concerned about their graduation eligibility should first review their academic advisement report (AAR) and then meet with their academic advisor.

Documentation (transcripts, diplomas, etc.)
Official documentation of graduation is managed by the University Registrar's Office. Inquiries regarding transcripts and diplomas should be directed to that office's Graduation/Diplomas service area.

All diplomas are mailed to students approximately six to eight weeks after the official certification date for each graduation period. Questions regarding diploma mailing should be directed to the Office of the University Registrar.

**Special Academic Programs/Opportunities**

**Multiple Majors Within SCI**

Students can declare multiple majors within SCI but will earn only one degree.

Students wishing to declare multiple majors within SCI should submit the Academic Plan (Major/Minor) Declaration Form found on the School's Student Resources > School Forms webpage.

**Dual Degrees**

Students in the School of Computing and Information may choose to simultaneously pursue more than one undergraduate degree within the University. Earning two degrees requires a minimum of 150 credits and completion of the curriculum requirements of both schools.

Students wishing to apply for a dual degree with a second School at Pitt, should confer with their academic advisor. When ready to apply for a dual degree, the student will find the Academic Program Change (Transfer Out/Double Degree) form on the School's Student Resources > School Forms webpage.

**College of Business Administration (CBA) and School of Computing and Information (SCI) Inter-Unit Degree Option**

Students interested in pursuing degrees from both CBA and SCI must currently be enrolled in either School to submit an application. They may not apply to both schools concurrently. Students beginning their program of study at the University in an academic unit other than CBA or SCI and who have an interest in pursuing the CBA/SCI inter-unit degree must first seek admission to either CBA or SCI. To do this, the student (in consultation with their academic advisor) completes an "Undergraduate Academic Program Add/Change" form indicating transfer from their current school to either CBA or SCI.

Once enrolled in either CBA or SCI, students can apply for admission to the second school by completing their School's dual degree form.

For students to make timely progress toward graduation, they must be admitted into the inter-unit degree program no later than the term in which they will earn 75 credits. Students are encouraged to apply as soon as they have met admissions requirements for the second school. Students must be aware of application deadlines for each school and plan accordingly.

Students entering CBA or SCI later in their academic careers should consult with their academic advisors, and possibly consider pursuing a single Bachelor's degree in one School with a Master's degree from the other. The best combination of degrees will vary depending upon the student's academic interests and career goals.

Students offered admission to the inter-unit degree must accept this offer through Pitt PSMobile. After accepting the offer and the appropriate changes are made to the student's record, the student will be billed the average tuition rate of the two Schools. Students will also be billed all fees applicable to each School. Students should refer all tuition and fee inquiries to the Student Payment Center.

**Bachelors of Philosophy**

Only a few colleges in the nation offer a prestigious Bachelor of Philosophy (BPhil), which is a model borrowed from Oxford and Cambridge in the UK. The BPhil is a higher distinction that replaces the standard BS degree. The BPhil can be earned in any major and is jointly awarded by the University of Pittsburgh Honors College and the School of Computing and Information.

Completion of a BPhil is a rigorous process that requires a research component and final thesis beyond that of the student's regular course of study. For details regarding the requirements, process, and personalized mentoring for the BPhil degree, visit the University Honors College's BPhil website.
BS/MS or Accelerated Programs

Some degree programs offer an accelerated BS/MS course of study that begins during a student's last two semesters of undergraduate enrollment. Applications are accepted through SCI's online application portal. A student admitted into a BS/MS program begins their graduate courses during their final year of undergraduate studies. They are not officially flagged as a graduate student for enrollment or financial aid purposes until after their undergraduate degree is conferred. See individual program offerings for further details.

SCI and the University Community

SCI encourages students to build a network of peers with similar academic interests from across the University. To facilitate this personal, academic, and professional growth, SCI participates in an Academic Community, hosted by the Dietrich School of Arts and Sciences, and the Living Learning Communities managed through Student Affairs.

Academic Communities (AC) require a commitment of three classes which will be completed in the student's first term with other students of the same AC. The classes focus on a specific area of study representing the theme of the AC. It's an unmatched opportunity to meet like-minded students right away and to explore interests and possible major with others who share similar passions.

Living Learning Communities (LLCs) are specialized living environments that connect students to inside-and outside-the-classroom experiences. Each LLC is unique, but all are centered on a distinctive theme or academic interest area. Students who choose to live in an LLC have a direct connection to their classroom experience, access to intentional events and programs, and dedicated staff members who work to make the community a success. Some LLCs require students to register for specific classes, class sections, or outside of the classroom activities. Please refer to the Student Affairs' LLC webpage for additional requirements and details.

Study Abroad

Students are encouraged to add an international dimension to their undergraduate education through engagement with available study abroad programs. Credits may be earned toward the School's degrees through participation in one of several University of Pittsburgh programs or consortia-sponsored programs.

Please refer to the study abroad credit policies for further regulations pertaining to study abroad credits. For details regarding current opportunities and incorporating study abroad experiences into the SCI curriculum, students should visit the Study Abroad website.

If students wish to learn more about study abroad, they must make an appointment with the Office of Study Abroad as well as discuss academic policies and required course approvals with their advisor.

MSIS Guarantee for Pitt and Regional Campuses

Students who have earned a Bachelor of Science in Information Science (BSIS) on Pitt's Oakland campus are guaranteed admission to the Master of Science in Information Science (MSIS) if they meet the following criteria:

- A separate application is not necessary for consideration. When students submit an application for admission with OAFA, they should select indicate "Information Science" from the Guaranteed Admission Program drop-down box. Only students admitted as first-year students can be considered for the guarantee.
- Achieve a minimum SAT score of 700 (Math) or a minimum score of 30 on the Math section of the ACT.
- Complete the BSIS program and enroll in the MSIS program within five calendar years of being awarded the Information Science guarantee by the Office of Admissions and Financial Aid.
- Maintain a 3.25 QPA while in the BSIS program with no grade (throughout your college career) lower than a C.

*Test optional applicants are eligible for this guarantee.*
School of Computing and Information Faculty

Programs and Course Offerings

Joint Major

Computational Biology, BS

Computational Biology Requirements

Computational biology is a growing field of study in the life sciences. This major, which is administered by the Department of Biological Sciences in the Dietrich School and the Department of Computer Science in the School of Computing and Information, trains students in the computer programming, laboratory techniques, and other skills they will need to succeed in graduate school and in the workforce. This major requires completion of 64 credits of coursework, detailed as follows.

Students may declare a major in Computational Biology after completing the following courses or their equivalents with a letter grade of C or higher.

- BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1
- BIOSC 0155 - HONORS FOUNDATIONS OF BIOLOGY 1
- BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2
- BIOSC 0165 - HONORS FOUNDATIONS OF BIOLOGY 2
- BIOSC 0350 - GENETICS
- BIOSC 1000 - BIOCHEMISTRY

*Students may alternately choose BIOSC 1810 MACROMOLECULAR STRUCTURE AND FUNCTION and BIOSC 1820 METABOLIC PATHWAYS AND REGULATION in lieu of BIOSC 1000. In this case, BIOSC 1820 becomes the elective course.

Computer Science courses
All of the following courses are required for the major.

- CS 0011 - INTRODUCTION TO COMPUTING FOR SCIENTISTS
- CS 0401 - INTERMEDIATE PROGRAMMING USING JAVA
- CS 0441 - DISCRETE STRUCTURES FOR CS
- CS 0445 - ALGORITHMS AND DATA STRUCTURES 1
- CS 1501 - ALGORITHMS AND DATA STRUCTURES 2
- CS 1656 - INTRODUCTION TO DATA SCIENCE

Computational Biology courses

All of the following courses are required for the major.

- BIOSC 1540 - COMPUTATIONAL BIOLOGY
- BIOSC 1542 - COMPUTATIONAL GENOMICS or
- BIOSC 1544 - SIMULATION AND MODELING
- BIOSC 1630 - COMPUTATIONAL BIOLOGY SEMINAR

Capstone course

Students must choose one of the following capstone courses.

- BIOSC 1640 - COMPUTATIONAL BIOLOGY RESEARCH
- CS 1640 - BIOINFORMATICS SOFTWARE DESIGN

Co-requisite Chemistry courses

All of the following courses are required for the major.

- CHEM 0110 - GENERAL CHEMISTRY 1 or
- CHEM 0710 - UHC GENERAL CHEMISTRY 1
- CHEM 0120 - GENERAL CHEMISTRY 2 or
- CHEM 0720 - UHC GENERAL CHEMISTRY 2
- CHEM 0310 - ORGANIC CHEMISTRY 1 or
- CHEM 0730 - UHC ORGANIC CHEMISTRY 1

Co-requisite Mathematics and Statistics courses

Both of the following courses are required for the major.

- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
- STAT 1000 - APPLIED STATISTICAL METHODS

Elective courses

Students must select one course from the following list.
Additional Requirements

Writing (W) requirement

Dietrich School students must complete at least one W-course in the major. BIOSC 1630 - COMPUTATIONAL BIOLOGY SEMINAR meets this requirement.

Grade requirements

All courses offered by the departments of Biological Sciences and Computer Science must be completed with a letter grade of C or better.

Co-Requisite courses

Students must complete co-requisite courses in the departments of Mathematics, Statistics, and Chemistry with an overall average of C or better, with the exceptions of CHEM 0110 GENERAL CHEMISTRY 1 and CHEM 0120 GENERAL CHEMISTRY 2. Students must earn letter grades of C or better in each of these classes.

Honors

A Dietrich School student may achieve honors in the Department of Biological Sciences by meeting these requirements:

Maintain a minimum GPA of 3.25;
Complete a faculty-supported research project; and

A School of Computing and Information student may achieve honors in the Department of Computer Science by meeting these requirements:

- Maintain a minimum overall GPA of 3.25; and
- Maintain a major GPA (CS and Biological Science courses) of 3.5; and
- Complete an additional major elective course with a grade of A.

**Satisfactory/No Credit option**

One core course required for the major may be taken on an S/NC basis. Co-requisite courses may be taken on an S/NC basis subject to School limitations. Please check with your School for specific information on S/NC grades.

**Restrictions**

- All BIOSC courses at the 0800-level are designed for non-majors and therefore do not count toward the major.
- Independent study and independent research credits do not count toward the major. The Department of Biological Sciences encourages students to seek out these experiences in order to enhance their education.

**Data Science, BS**

**Data Science**

**Program Requirements (61 Credits)**

Students are required to complete the following courses

**Foundational Skills - 31 credits**

The foundational courses provide students with fundamental knowledge across four "literacies": data, algorithmic, mathematical, and statistical. Courses in this area will help students develop baseline computational capabilities, will teach students to think about data in a statistical framework, and will introduce students to fundamental mathematical concepts arising in data analysis. These courses are drawn from three main disciplines (CS/IS, Math, and Statistics) and include an introductory course in the fundamental skills of working with data (Python/R programming, exploratory data analysis, data visualization):

- STAT 1061 - DATA SCIENCE FOUNDATIONS
- CS 0401 - INTERMEDIATE PROGRAMMING USING JAVA
- CS 0445 - ALGORITHMS AND DATA STRUCTURES 1
- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
- MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2
- MATH 0280 - INTRO TO MATRICES & LINEAR ALG /MATH 1180 - LINEAR ALGEBRA 1
- MATH 0480 - APPLIED DISCRETE MATHEMATICS /CS 0441 - DISCRETE STRUCTURES FOR CS
- STAT 1151 - INTRODUCTION TO PROBABILITY /STAT 1631 - INTERMEDIATE PROBABILITY
- STAT 1152 - INTRODUCTION TO MATHEMATICAL STATISTICS /STAT 1632

**Notes:**
Mathematically oriented students should take MATH 1180 rather than MATH 0280.
Mathematically advanced students may replace STAT 1151/STAT 1152 with STAT 1631/STAT 1632, in consultation with their advisor.
Students wishing to pursue graduate studies or mathematical directions related to data science are advised to also take MATH 0240

**Expertise - 18 credits**
This is where students become data scientists, integrating skills from the foundational areas to develop expertise in the realm of data. Skills will be developed in the description and analysis of data in terms of sources of variability and key relationships, the development of algorithms and data handling skills to extract and interpret information from complex data sets, as well as in the visualization and communication of results. The critical issue of the ethical use of data will also be addressed in the context of data science.

- STAT 1261 - PRINCIPLES OF DATA SCIENCE

- STAT 1361 - STATISTICAL LEARNING AND DATA SCIENCE
  OR
- CS 1675 - INTRODUCTION TO MACHINE LEARNING

- CS 1501 - ALGORITHMS AND DATA STRUCTURES 2
- CS 1656 - INTRODUCTION TO DATA SCIENCE
- MATH 1101 - AN INTRODUCTION TO OPTIMIZATION
- CS 0590 - SOCIAL IMPLICATIONS OF COMPUTING TECHNOLOGY

Specialization - 9 credits

Students within the data science major will have the opportunity to pursue an area of specialization through the selection of elective courses in a targeted direction relating to data analytics, computer systems, modeling, or data science in context. While selecting all 3 courses from the same category is advised for students seeking a focus, students may also choose courses across categories to suit their interests, if they prefer that approach. The specialization course groupings are as follows.

- **Data Analytics**: Students pursuing a data analytics specialization will enhance their ability to make sound inferences and decisions using the science and art of learning from data: specifically, the design, collection, analysis, and interpretation of data in an uncertain world, and the communication of findings.

- **Modeling**: Students pursuing a modeling specialization will enhance their ability to develop and harness theoretical tools to characterize structure within data and to represent and analyze processes that may underlie this structure.

- **Computer Systems**: Students pursuing this specialization will gain depth of knowledge in the development, deployment, and analysis of the complex computer and information systems necessary for tackling large-scale data science problems.

- **Data Science in Context**: Students pursuing this specialization will gain depth of knowledge in both the technical and organizational aspects of the management, curation, description, preservation, and application of digital datasets of varying sizes in specific business, professional, or scientific contexts. We expect the collection of courses within the specialization to expand as more domain-specific data science courses begin to be offered across campus.

**Data Analytics**

- INFSCI 1068 - GEOSPATIAL INFORMATION SYSTEMS (GIS)
- MATH 1080 - NUMERICAL MATH: LINEAR ALGEBRA
- STAT 1201 - APPLIED NONPARAMETRIC STATISTICS
- STAT 1211 - APPLIED CATEGORICAL DATA ANALYSIS
- STAT 1231
- STAT 1311 - APPLIED MULTIVARIATE ANALYSIS
- STAT 1321 - APPLIED TIME SERIES
- CS 1671 - HUMAN LANGUAGE TECHNOLOGIES
- CS 1674 - INTRODUCTION TO COMPUTER VISION
- INFSCI 1520 - INFORMATION VISUALIZATION
- INFSCI 1530 - DATA MINING
Modeling

- MATH 1025 - INTRODUCTION TO MATHEMATICAL CRYPTOGRAPHY
- MATH 1070 - NUMERICAL MATHEMATICAL ANALYSIS
- MATH 1080 - NUMERICAL MATH: LINEAR ALGEBRA
- STAT 1211 - APPLIED CATEGORICAL DATA ANALYSIS
- MATH 1310 - GRAPH THEORY
- MATH 1360 - MODELING IN APPLIED MATH I
- STAT 1321 - APPLIED TIME SERIES
- MATH 1510 - MATHEMATICAL THEORY OF PROBABILITY
- CS 1538 - INTRODUCTION TO SIMULATION
- STAT 1731 - STOCHASTIC PROCESSES
- STAT 1741 - APPLIED PROBABILITY THEORY

Computer Systems

- CS 0449 - INTRODUCTION TO SYSTEMS SOFTWARE
- CS 1550 - INTRODUCTION TO OPERATING SYSTEMS

- CS 1555 - DATABASE MANAGEMENT SYSTEMS
  OR
- INFSCI 1022 - DATABASE MANAGEMENT SYSTEMS

- CS 1635 - INTERFACE DESIGN METHODOLOGY
  OR
- INFSCI 2415 - INFORMATION VISUALIZATION

- CS 1645 - INTRODUCTION TO HIGH PERFORMANCE COMPUTING SYSTEMS
- INFSCI 2125 - NETWORK SCIENCE & ANALYSIS
- CS 2450

Data Science in Context

- LIS 2407 - METADATA
- LIS 2676 - RESEARCH DATA MANAGEMENT
- LIS 2679

Capstone - 3 credits

Data science is a hands-on field. Comprehensive training in data science requires substantive experience working on a problem outside of the realm of usual classroom experiences, with the complications of messy data, ambiguity, and lack of clear structure that characterize "real-world" scenarios. This experience should include work with others with diverse skill sets as well as communication with non-specialists. The capstone course will provide students with such an experience. In the short term, the capstone course requirements can be fulfilled through completion of CMPINF 1981 - PROJECT STUDIO, MATH 1103 - MATHEMATICAL PROBLEMS IN BUSINESS, INDUSTRY, AND GOVERNMENT, or STAT 1961 (Statistical Data Science in Action). In this case, students will be advised to select a capstone course based on their specializations but ultimately will be able to choose from among the full list of capstone options. In addition, the capstone requirement may be satisfied via a faculty-guided research project that is relevant to data science, subject to approval by the Data Science program director(s). After we have more experience...
in integrating and coordinating our courses across the three units, we will consider a unified cross-listed capstone course if that is deemed more desirable.

Writing requirement

The writing requirement for Dietrich School Students will be fulfilled by enrollment in a W section of CS 0590 - SOCIAL IMPLICATIONS OF COMPUTING TECHNOLOGY.

Digital Narrative and Interactive Design, BA/BS

The Digital Narrative and Interactive Design major (DNID) harnesses the narrative, world-building, and media studies strengths of the English department and the coding, software development, and human computer interface strengths of the School of Computing and Information. It draws upon existing initiatives in game design at SCI and critical game studies, making, and media production within the English department. Students will learn how to build interactive narrative systems such as games, interactive literature, virtual reality environments and other interactive media experiences in a variety of fields. They will learn to creatively combine design with narrative, code with story. This uniquely positions majors in today's workforce: game and interactive media design is booming in nearly every field and sector. What these positions require, and what is currently in short supply, are individuals capable of both understanding the intricacies of narrative and implementing that knowledge in the form of computational media (coded interactive systems).

The DNID major is managed jointly by the Dietrich School of Arts and Sciences and the School of Computing and Information. This program offers training that builds a solid foundation in English (Writing, Composition, Film and Media Studies, and Literature), Computer Science, and Information Science.

The DNID major is managed jointly by the Dietrich School of Arts and Sciences and the School of Computing and Information. This program offers training that builds a solid foundation in English (Writing, Composition, Film and Media Studies, and Literature), Computer Science, and Information Science.

Core and Upper Level Courses

Gateway course

Choose one of the following courses.

- ENGLIT 0512 - NARRATIVE AND TECHNOLOGY
- ENGCMP 0425 - DIGITAL HUMANITY
- HAA 0425 - DIGITAL HUMANITY

Composition courses

Complete either:
• ENGCMP 0610 - COMPOSING DIGITAL MEDIA
• ENGCMP 1201 - DIGITAL NARRATIVE AND INTERACTIVE DESIGN
• ENGLIT 1201 - DIGITAL NARRATIVE AND INTERACTIVE DESIGN
• CMPINF 1201 - DIGITAL NARRATIVE AND INTERACTIVE DESIGN

Programming Basics courses

Choose one of the following courses.

• CS 0010 - INTRODUCTION TO COMPUTING FOR SYSTEMS ENGINEERS
• CS 0011 - INTRODUCTION TO COMPUTING FOR SCIENTISTS
• CS 0012 - INTRODUCTION TO COMPUTING FOR THE HUMANITIES
• INFSCI 0510 - DATA ANALYSIS

Intermediate Programming course

• CMPINF 0401 - INTERMEDIATE PROGRAMMING

Interaction and Narrative course

Choose one of the following courses. Students who take ENGLIT 0512 for their Gateway course may not use it to fulfill this requirement.

• ENGLIT 0512 - NARRATIVE AND TECHNOLOGY
• ENGLIT 0702 - INTRODUCTION TO GAME STUDIES
• ENGLIT 1001 - INTERACTIVE LITERATURE
• ENGLIT 1002 - GAME, STORY, PLAY

Media Literacy course

Choose one of the following courses.

• ENGFLM 0355 - VISUAL LITERACY
• ENGFLM 0570 - INTRODUCTION TO NEW MEDIA
• ENGFLM 1680 - ANIMATION STUDIES
• FMST 0100 - VISUAL LITERACY
• FMST 0505 - INTRODUCTION TO NEW MEDIA
• FMST 1510 - ANIMATION STUDIES

Data Literacy course

Choose one of the following courses.

• CS 0445 - ALGORITHMS AND DATA STRUCTURES 1
• INFSCI 1022 - DATABASE MANAGEMENT SYSTEMS

Elective courses

Students must complete two elective courses from the School of Computing and Information and two elective courses from the Dietrich School of Arts and Sciences. Courses offering a depth of knowledge in pre-identified areas of interest are clustered together to provide a guide for students; Students are not required to follow nor declare a specific track.
Online Media track

School of Computing and Information courses

Choose two of the following courses.

- CS 0590 - SOCIAL IMPLICATIONS OF COMPUTING TECHNOLOGY
- CS 1520 - PROGRAMMING LANGUAGE FOR WEB APPLICATIONS
- INFSCI 1024 - ANALYSIS OF INFORMATION SYSTEMS
- INFSCI 1044 - HUMAN FACTORS IN SYSTEM DESIGN
- INFSCI 1052 - USER CENTERED DESIGN
- INFSCI 1068 - GEOSPATIAL INFORMATION SYSTEMS (GIS)

Dietrich School of Arts and Sciences courses

Choose two of the following courses.

- ENGCMP 0520 - INTEGRATING WRITING AND DESIGN
- ENGCMP 1112 - PROFESSIONAL USES OF SOCIAL MEDIA
- ENGCMP 1130 - PROJECTS IN DIGITAL COMPOSITION
- ENGFLM 0570 - INTRODUCTION TO NEW MEDIA
- ENGFLM 0812 - MEDIA/ECOLOGY
- ENGLIT 0812 - MEDIA/ECOLOGY
- ENGLIT 1001 - INTERACTIVE LITERATURE
- ENGLIT 1412 - SECRET PITTSBURGH
- ENGWRT 1403 - TOPICS IN NON-FICTION: ELECTRONIC MEDIA
- ENGWRT 1501 - TOPICS IN CREATIVE WRITING
- GSWS 1210 - GENDER AND THE DIGITAL
- ENGWRT 1377 - MEDIA LITERACY: WRITING AND READING YOUR WAY THROUGH THE DIGITAL LANDSCAPE
- ENGCMP 1430 - USABILITY TESTING IN TECHNICAL WRITING

Game Design track

School of Computing and Information courses

Choose two of the following courses.

- CS 1566 - INTRODUCTION COMPUTER GRAPHICS
- CS 1666 - PRINCIPLES OF COMPUTER GAME DESIGN AND IMPLEMENTATION
- CS 1674 - INTRODUCTION TO COMPUTER VISION
- INFSCI 1014 - GRAPHICS
- INFSCI 1044 - HUMAN FACTORS IN SYSTEM DESIGN
- INFSCI 1060 - GAME DESIGN
- INFSCI 1061 - GAME IMPLEMENTATION

Dietrich School of Arts and Sciences courses

Choose two of the following courses.
• ENGCMP 1130 - PROJECTS IN DIGITAL COMPOSITION
• ENGLIT 0702 - INTRODUCTION TO GAME STUDIES
• ENGLIT 0812 - MEDIA/ECOLOGY
• ENGLIT 1001 - INTERACTIVE LITERATURE
• ENGLIT 1002 - GAME, STORY, PLAY
• ENGLIT 1355 - VIRTUAL REALITY
• ENGWRT 0520 - INTRODUCTION TO FICTION WRITING

Critical Making track

School of Computing and Information courses

Choose two of the following courses.

• CS 1520 - PROGRAMMING LANGUAGE FOR WEB APPLICATIONS
• CS 1567 - PROGRAMMING SYSTEM DESIGN ON A MOBILE ROBOT PLATFORM
• CS 1571 - INTRODUCTION TO ARTIFICIAL INTELLIGENCE
• INFSCI 1044 - HUMAN FACTORS IN SYSTEM DESIGN
• INFSCI 1059 - WEB PROGRAMMING

Dietrich School of Arts and Sciences courses

Choose two of the following courses.

• ENGCMP 0520 - INTEGRATING WRITING AND DESIGN
• ENGCMP 0712 - CRITICAL MAKING
• ENGCMP 1200 - ADVANCED TOPICS IN COMPOSITION
• ENGLIT 0521 - SCAN CULTURE: SURVEILLANCE AND THE DIGITAL
• ENGLIT 0712 - CRITICAL MAKING
• ENGLIT 0812 - MEDIA/ECOLOGY
• ENGLIT 1355 - VIRTUAL REALITY
• ENGWRT 1501 - TOPICS IN CREATIVE WRITING
• ENGCMP 1430 - USABILITY TESTING IN TECHNICAL WRITING

Capstone sequence

The Capstone sequence allows students to design and implement a signature project to complete the major. Students start with the design project (Project 1) and complete the sequence with the implementation project (Project 2) in consultation with their advisors. Students seeking Independent Study or Directed Study options for the capstone sequence should work with their advisors to ensure that the work done in these courses will complete the sequence.

Project 1

Choose one of the following courses.
Additional Information

Writing (W) requirement: Dietrich School students must complete at least one W-course in the major. ENGCMP 0610 fulfills this requirement.

Grade requirements: A letter grade of C or better is required in each of the core and upper level courses that are to count toward the major. The elective courses for the major must also be completed with a grade of C or better. A minimum GPA of 2.0 in all departmental courses taken is required for graduation. If a D+ or lower is earned in an elective course for the major but is not repeated, the course will be used to calculate the overall GPA but will not be counted toward the 40 credits required for the major.

Satisfactory/No Credit option: No courses that count toward the major may be taken on an S/NC basis.

Advising: Digital Narrative and Interactive Design is a joint undergraduate degree between the Dietrich School of Arts and Sciences and the School of Computing and Information. Students enrolled in each school are advised by advisors within that school.

Department of Computer Science

The Department of Computer Science is part of the School of Computing and Information. It offers a Bachelor of Science in Computer Science degree, a Computer Science minor, and a Bachelor + Master of Science in Computer Science. See programs below for more information.

Major

Computer Science, BS

Note: The requirements outlined in this section represent minimum degree satisfaction. Please consult the School of Computing and Information's Student Resources site for detailed policies, procedures, forms, and advising resources.

The department-level rules set forth in the following document apply to students who declared their CS major during or after the 2019-2020 Academic Year. Students who declared prior to this academic year should refer to the Archived Catalogs for departmental-level rules.

Students who declared the CS major PRIOR to the 2017-2018 Academic Year will find the department-level rules to which they are bound by going to the Archived Catalogs for Arts & Sciences.

Eligibility for Major

To be considered for admission to the CS undergraduate program, students must complete the following CS core courses with a grade of C or better in each course:

- CMPINF 0401 - INTERMEDIATE PROGRAMMING*
- CS 0441 - DISCRETE STRUCTURES FOR CS
- CS 0445 - DATA STRUCTURES
- CS 0447 - COMPUTER ORGANIZATION AND ASSEMBLY LANGUAGE
*Students should have some programming experience (usually acquired in high school) before taking CMPINF 0401. Any high school course that includes the writing of several Python, C++, or Java programs would be sufficient. It is also possible to take one of the department's service courses, such as CS 0007, as preparation. Preparatory classes of this nature do not count toward the student's major requirements.

Grade Policies for CS Majors

Satisfactory/No-Credit (S/NC) Grade Options

Students should check with their academic advisors before deciding to take a course S/NC (formerly the S/N option). Beyond the School's Regulations for students enrolling in courses with the S/NC grade option, the Department of Computer Science imposes the following rules:

- All computer science courses for the major (core and upper-level courses) must be taken for a letter grade.
- Required mathematics courses may be taken with the S/NC option.

Students should be sure, before deciding on the grading system for a course, that their decision will not have an adverse effect on their plans for a major. They must discuss this decision with their advisor PRIOR to enrolling and selecting the S/NC grade option.

Individual Course Grades

All computer science courses for the major (core and upper-level courses) must be completed with a C grade or better to count for the CS major. ANY course taken to satisfy a major requirement, including MATH courses required by the major (MATH 0220, MATH 0230, and either STAT 1000, STAT 1100 or STAT 1151), for which only a C- grade or lower is received, must be repeated. If a grade of C- or lower is earned in a prerequisite course, the course must be repeated before the higher-level course may be taken.

Departmental Honors

Students may graduate with honors if they have also:

- Completed a sixth upper-level elective CS course
- Have a CS GPA of at least 3.5
- Have an overall GPA of at least 3.25

Major Requirements

The computer science major requires 40 credits in computer science courses, an additional 11-12 credits in mathematics and/or statistics, and a capstone experience as detailed below:

Core Courses

A minimum of 16 credits must be satisfactorily completed in the following five core courses:

- CMPINF 0401 - INTERMEDIATE PROGRAMMING*
- CS 0441 - DISCRETE STRUCTURES FOR CS
- CS 0445 - DATA STRUCTURES
- CS 0447 - COMPUTER ORGANIZATION AND ASSEMBLY LANGUAGE
- CS 0449 - INTRODUCTION TO SYSTEMS SOFTWARE

*Students should have some programming experience (usually acquired in high school) before taking CMPINF 0401. Any high school course that includes the writing of several Pascal, C++, or Java programs would be sufficient. It is also possible to take one of the department's service courses, such as CS 0007, as preparation. Preparatory classes of this nature do not count toward the student's major requirements.
Nine credits in these three upper-level courses:

- CS 1501 - ALGORITHM IMPLEMENTATION
- CS 1502 - FORMAL METHODS IN COMPUTER SCIENCE
- CS 1550 - INTRODUCTION TO OPERATING SYSTEMS

Upper-Level Elective Courses

Fifteen additional credits in upper-level elective courses (numbered 1500 or higher) must also be completed.

Internships, directed studies, capstone courses and co-op courses may not be used to satisfy this requirement (see below).

Required Mathematics Courses

A minimum of 11-12 credits in mathematics must be completed as follows:

- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
- MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2
- STAT 1000 - APPLIED STATISTICAL METHODS
- Or -

- STAT 1100 - STATISTICS AND PROBABILITY FOR BUSINESS MANAGEMENT
- Or -

- STAT 1151 - INTRODUCTION TO PROBABILITY

Note: Students should complete their required mathematics courses early. Typically, MATH 0220 would be completed in the freshman year. Strong students may elect also to take MATH 1180 - LINEAR ALGEBRA 1.

Capstone Experience

All Computer Science majors must complete a capstone experience prior to graduation. This experience may be satisfied in several ways including:

- Completion of an approved 3-credit academic internship (CS 1900)
- Completion of an approved 3-credit directed research project (CS 1950)
- Completion of a capstone designated course (ex: CS 1980)
- Completion of at least 2 rotations of an approved co-op (ENGR 1093)

Students are allowed to complete more than one capstone experience but a capstone course may NOT be used in place of a CS Upper-Level Elective course.

Sample Plan of Study

Below is a sample plan for students in the Computer Science Major in the School of Computing and Information. Note that there are many paths through the Computer Science major and any student's path may differ from the one shown. Generally, our advisors will help each student to customize his / her career plan.

Prior to Admission, this plan assumes that a student has:

- An Intro. to Programming course
- Workshop in Composition (ENGCMP 0150) satisfied by SAT score
- Sufficient Math background to take Calculus 1

</table>

**Note 1:** GER = General Education Requirement, UL = Upper-level

**Note 2:** Electives may be used for the SCI requirement of a secondary field of study (ex: minor, certificate, etc).

**Note 3:** One course must satisfy the Diversity Requirement.

**Note 4:** CS UL 6 may be used for CS Department Honors. See the Departmental Honors section of this Catalog for details and requirements.

**Computer Science, BS/MS**
The BS degree in computer science requires 120 credits of course work, including 40 credits in computer science, 11 or 12 credits in mathematics and statistics and a capstone experience. Typically, a student completes this degree in four academic years. Well-prepared students may apply for admission to the combined bachelor's / master's degree program. This accelerated program allows students to begin taking graduate courses in their fourth year and complete the combined BS / MS degree in five years. Please contact the Department of Computer Science for additional information.

Minor

Computer Science Minor

A 16 credit minor in computer science is available. The minor is essentially 5 of the 6 courses that are considered the "core" of the CS major. This is a rigorous minor. This minor is not intended for casual students interested in computer literacy.

The requirements for the CS minor are:

- CMPINF 0401 - INTERMEDIATE PROGRAMMING*
- CS 0445 - ALGORITHMS AND DATA STRUCTURES 1
- CS 0447 - COMPUTER ORGANIZATION AND ASSEMBLY LANGUAGE
- CS 1501 - ALGORITHMS & DATA STRUCTURES 2
- and one of the two courses: CS 0441 - DISCRETE STRUCTURES FOR CS, CS 0449 - INTRODUCTION TO SYSTEMS SOFTWARE**.

*CMPINF 0401 requires programming experience as a prerequisite. A student without any programming background would be advised to take the 3 credit course CS 0007 as preparation for CMPINF 0401.

**The typical minor consists of CMPINF 0401, CS 0441, CS 0445, CS 0447 and CS 1501, is a prerequisite for CS 1501. However, students with very strong math backgrounds (ex: Math majors) may be able to waive the CS 0441 prerequisite for CS 1501 and thus take CS 0449 rather than CS 0441.

Department of Informatics and Networked Systems

The Department of Informatics and Networked Systems is part of the School of Computing and Information. It offers a Bachelor of Science in Information Science. Please select the program below for more information.

Joint Major

Computational Social Science, BS

Computational Social Science

Degree Requirements

The major will comprise of the following for a total of 52/53 credits (explained in detail below):

- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1

Foundations of Computational Social Science

The first set of courses will introduce students to enduring puzzles in social science research, emerging themes of computational social science as well as the approaches that social scientists, and information & network scientists use to solve problems. Courses in this section provide foundations of subject matter knowledge, basic computational tools that are relevant to social scientific theories and empirics (8 courses required as denoted below):
One Introduction to Social Science Class

- PS 0200 - AMERICAN POLITICS
- PS 0500 - INTERNATIONAL RELATIONS
- PS 0300 - COMPARATIVE POLITICS

Four Required Introductions to Computational Approaches and Basic Tools

Select one of the following courses.

- CS 0010 - INTRODUCTION TO COMPUTING FOR SYSTEMS ENGINEERS
- CS 0011 - INTRODUCTION TO COMPUTING FOR SCIENTISTS
- CS 0012 - INTRODUCTION TO COMPUTING FOR THE HUMANITIES

Required course

- CMPINF 0401 - INTERMEDIATE PROGRAMMING

Select two of the following courses.

- INFSCI 1500 - DATABASE MANAGEMENT CONCEPTS AND APPLICATIONS
- INFSCI 0410 - HUMAN-CENTERED SYSTEMS
- INFSCI 0610 - NETWORKS AND INFORMATION

One Social Science Research Design

- PS 0700 - RESEARCH METHODS IN POLITICAL SCIENCE

One Modeling Social Interactions and Motivations

- PS 1250 - GAMES, POLITICS, AND STRATEGY
- PS 1514 - POLITICAL STRATEGY INTERNATIONAL RELATIONS

Ethics and Computational Social Science

This section of the major will expose students to important debates on the ethics of governance, computing, and technological change. Issues covered will include tradeoffs between privacy/security and censorship/freedom, as well topics related to surveillance, propaganda, cyber-security and regulation. The goal is for students to not only be exposed to the moral and social consequences of technology at a conceptual level, but also the specific technical implementations that cause potential social problems (e.g., packet-sniffing) and could potentially expand the space for solutions (e.g. differential privacy) (2 courses).

Select two of the following courses.

- CMPINF 1205 - COMPARATIVE DIGITAL PRIVACIES
- CS 0590 - SOCIAL IMPLICATIONS OF COMPUTING TECHNOLOGY
- INFSCI 1600 - SECURITY AND PRIVACY
- PS 1693 - POLITICAL THEORY & THE FUTURE-ANALYSIS

Intermediate Techniques Applied to Social Science Content

The third set of courses will empower students to use computational tools to explore enduring social science puzzles and theories at scale. These paths are not meant to be formal areas of concentration, but options to gain competence in more focused areas. For example, some students might be interested in applying data mining techniques to problems in campaigns in American politics. Other students might want to focus in cyber-security and international relations. Both the tools and domains are organized to allow a set of choices that broaden interest in the major. Together, these
courses allow our majors to have an evolved understanding of how computing and digital tools can be used in government, businesses, and NGOs. There are three sub-sets of classes in this section:

**Computational Skills**

Select two of the following courses.

- INFSCI 1440 - SOCIAL COMPUTING
- INFSCI 1520 - INFORMATION VISUALIZATION
- INFSCI 1530 - DATA MINING
- INFSCI 1550 - SPATIAL INFORMATION
- INFSCI 1620 - ADVANCED SECURITY AND PRIVACY

**Upper-level content courses**

Students will delve deeper into their domain specialization with two classes. One class should be within a domain theme (such as international relations), another substantive class can be outside that theme (such as in comparative politics).

- American Politics list of 1000-level courses
- Comparative Politics list of 1000-level courses
- International Relations list of 1000-level courses.

**Integrated Analytics**

Students must complete one analytics-intensive course in the PS 1290X, PS 1390X, or PS 1590X series, or PS 1702.

**Application Development Capstone**

Select one of the following courses.

- INFSCI 1700 - DATA-DRIVEN COMMUNICATION
- INFSCI 1710 - DIRECTED RESEARCH
- INFSCI 1730 - INDEPENDENT STUDY
- INFSCI 1740 - TEAM-BASED CAPSTONE PROJECT
- PS 1782 - Application in Computational Social Science

**Additional information**

**Grade requirements**

All courses for the major must be completed with a C or better, and must be taken as a letter grade.

**Writing requirement**

Students must complete at least one writing-intensive (W) course in the major.

**Calculus requirement**
Completion of MATH 0220 with a C or better serves as a de facto pre-requisite of the major due to later appearance in requirements, and this requirement will be noted to students in advising materials.

**Double majoring**

There will be specific provisions for double majors on the A&S side, but it is expected that students can double major this with another social science major or a major in SCI (see page 11)

**Declaration**

Students can declare the major in the Spring of their first year, as normal. Students are strongly encouraged to be taking PS 0100 and have completed MATH 0220 prior to declaring.

**Honors**

To get honors designation within the major upon graduation, a 3.7 overall GPA is required across all major classes (with a 3.5 GPA overall).

**Major**

**Information Science, BS**

The department-level rules set forth in the following document apply to students who admit to the University during the 2021-22 Academic Year. Students who admitted prior to this academic year should refer to the Archived Catalogs for departmental-level rules and major requirements. Students who admitted to the University PRIOR to the 2017-2018 Academic Year will find the department-level rules and major requirements to which they are bound by going to the Archived Catalogs for the School of Information Sciences.

Note: The requirements outlined in this section represent minimum degree satisfaction. Please consult the School of Computing and Information's Current Students Web site for detailed policies, procedures, forms, and advising resources.

We are in a connected world where humans, software applications and data are all linked through intricate networks. Everyday objects like cars, doorbells and coffee machines, specialized equipment for healthcare and even infrastructure like roads, are smart and communicate data. These data become useful to humans and society when they are securely associated with other data, objects, individuals, groups and organizations to make decisions through computation to solve problems. Learn more about the curriculum revisions in 2020.

The Information Science major (BSIS) in the Department of Informatics and Networked Systems has been built to provide:

- A strong **foundation** in the science of how data, human-centered systems and networks work together to solve problems
- A broad **understanding** of systems analysis, data management, network design and security, and how they are integrated and work together to make effective decisions
- **Coursework** that addresses cutting-edge subjects such as user experience, datamining, computer forensics, cloud computing, 5G wireless and information visualization
- **Research** projects with faculty, student peers, and local non-profits
- **Career agility** - every industry needs information science expertise, so you'll find successful career opportunities in healthcare, manufacturing, communications, finance, education, technology, and entertainment.

**Eligibility for Major**

Students can declare the IS major after they have completed CMPINF 0401, INFSCI 0310, and two other courses (from INFSCI 0410, 0510 and 0610) with a grade of C or better in each class.
In addition, students need to have at least a 2.0 overall GPA and be in good academic standing.

Students must declare the major by the School's deadlines.

- CMPINF 0401 - INTERMEDIATE PROGRAMMING
- INFSCI 0410 - HUMAN-CENTERED SYSTEMS
- INFSCI 0510 - DATA ANALYSIS
- INFSCI 0610 - NETWORKS AND INFORMATION

Grade Policies for Information Science Majors

Satisfactory/No-Credit (S/NC) grade options for IS majors

The student should check with his or her academic advisor before deciding to take a course S/NC (formerly the S/N option). Beyond the School's Regulations for students enrolling in courses with the S/NC grade option, the Department of Informatics and Networked Systems (DINS) does not accept S grades for courses required for the completion of the Information Science major except for the Cooperative Program and Internship courses.

Students should be sure, before deciding on the grading system for a course, that their decision will not have an adverse effect on their plans for a major. They must discuss this decision with their advisor PRIOR to enrolling and selecting the S/NC grade option.

Individual Course Grades & GPA Requirement

Students must achieve a 2.0 GPA for each of the classes counted toward the Information Science major, therefore earning a C or better for each course counted towards graduation in the Information Science major. As such, all courses completed for the major (Quantitative Math and Stats, Core, Upper-Level Electives, and Capstone) must be repeated or replaced by a comparable course if a grade of C- or lower is received. If a grade of C- or lower is earned in a prerequisite course, the course must be repeated before the higher-level course may be taken. If a grade of C- or lower is earned in any course taken to satisfy a major requirement, the course must be repeated or replaced. Course repetitions are subject to the School's Course Repeat Policy found in the Credit and Enrollment Policy section of the SCI Catalog.

Departmental Honors

Students may graduate with honors if they have also:

- Completed a sixth upper-level elective IS course (numbered above 1100). The student may not use an independent study or internship to count as this additional upper-level course.
- Have an IS GPA of at least 3.5
- Have an overall GPA of at least 3.25

Major Requirements

Beginning in Fall 2020, students declaring an IS major will be required to complete:

- One approved programming course
- Seven core courses
- Five upper-level electives
- Two approved mathematics courses
- One approved statistics course
- One capstone class

Programming Course
• CMPINF 0401 - INTERMEDIATE PROGRAMMING

Core Courses

• INFSCI 0310 - COMPUTATION IN INFORMATION SCIENCE
• INFSCI 0410 - HUMAN-CENTERED SYSTEMS
• INFSCI 0510 - DATA ANALYSIS
• INFSCI 0610 - NETWORKS AND INFORMATION
• INFSCI 1400 - ANALYSIS OF INFORMATION SYSTEMS
• INFSCI 1500 - DATABASE MANAGEMENT CONCEPTS AND APPLICATIONS
• INFSCI 1600 - SECURITY AND PRIVACY

Upper-level Electives

• INFSCI 1420 - USER-CENTERED DESIGN
• INFSCI 1430 - USER EXPERIENCE ENGINEERING
• INFSCI 1440 - SOCIAL COMPUTING
• INFSCI 1450 - GAME DESIGN
• INFSCI 1460 - IT PROJECT MANAGEMENT
• INFSCI 1470 - IMMERSIVE MEDIA TECHNOLOGIES
• INFSCI 1520 - INFORMATION VISUALIZATION
• INFSCI 1530 - DATA MINING
• INFSCI 1540 - DATA ENGINEERING
• INFSCI 1550 - SPATIAL INFORMATION
• INFSCI 1560 - INFORMATION STORAGE AND RETRIEVAL
• INFSCI 1570 - NETWORK AND WEB DATA TECHNOLOGIES
• INFSCI 1620 - ADVANCED SECURITY AND PRIVACY
• INFSCI 1630 - COMMUNICATION NETWORKS
• INFSCI 1640 - WIRELESS NETWORKS
• INFSCI 1650 - MULTIMEDIA COMMUNICATIONS
• INFSCI 1660 - COMPUTER NETWORKING LABORATORY
• INFSCI 1670 - SECURITY MANAGEMENT AND COMPUTER FORENSICS
• INFSCI 1690 - CLOUD COMPUTING

Required Mathematics and Statistics Courses

Students must complete the following quantitative and statistical skills classes. One class from each section will overlap with the School's General Education Requirements.

• MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
• MATH 0280 - INTRO TO MATRICES & LINEAR ALG
  OR MATH 1180 - LINEAR ALGEBRA 1 OR MATH 1185 - HONORS LINEAR ALGEBRA
• STAT 1000 - APPLIED STATISTICAL METHODS
  OR STAT 1100 - STATISTICS AND PROBABILITY FOR BUSINESS MANAGEMENT

Capstone
Students in the BS in Information Science major are required to successfully complete a capstone experience, learning how to apply what they learned in the classroom to real-world situations. Students can choose from among a selection of experiential learning opportunities including team-based project classes, independent study courses supervised by research faculty in the School, and internships/co-ops with regional or national industries and organizations. The capstone requirement means that students will gain valuable experience that is aligned with their interests and career goals.

- **INFSCI 1082 - INFORMATION SCIENCE COOPERATIVE PROGRAM**  
  (2 rotations and completion of a paper required)
- **INFSCI 1700 - DATA-DRIVEN COMMUNICATION**  
  (3 credits)
- **INFSCI 1710 - DIRECTED RESEARCH**  
  (3 credits required)
- **INFSCI 1720 - INTERNSHIP**  
  (3 credits required)
- **INFSCI 1730 - INDEPENDENT STUDY**  
  (3 credits required)
- **INFSCI 1740 - TEAM-BASED CAPSTONE PROJECT**  
  (3 credits required)

</table>
School of Dental Medicine

The University of Pittsburgh Dental Hygiene Program provides a comprehensive education in both the basic sciences and clinical dental hygiene over the course of a two-year (six consecutive terms) Associate of Science Degree in Dental Hygiene. The University of Pittsburgh Dental Hygiene Program differs from other programs by providing a broader range of experiences in specialty clinics within the School of Dental Medicine, as well as clinical rotations at the University of Pittsburgh Medical Center. The major areas of focus are teaching, research, patient treatment, and community service. Dental hygiene services are rendered to a varied patient population, including pediatric, geriatric, physically and mentally challenged, and immunocompromised individuals. In addition to clinical practice, graduates are prepared for careers in areas such as education, research, and dental public health.

Students who complete the Dental Hygiene Program Associate of Science Degree in Dental Hygiene have the option of completing a Bachelor of Science degree offered through the College of General Studies. The degree completion option includes three areas of study focusing on a student's specific career goals. These areas include dental hygiene education, research, and health management. Graduates can work as licensed dental hygienists while completing their requirements for the bachelor's degree. Classes are tailored to the student's interests and can be arranged around work schedules. The program provides a firm foundation for those desiring to pursue graduate studies. (See the College of General Studies listing for more information on the Bachelor of Science degree completion option.)

Admission Requirements and Deadlines: Associate of Science Degree in Dental Hygiene

(See Dental Hygiene Program listing under the Application for Admission section at the front of this bulletin for requirements and deadlines.)

Academic Standards: Professional/Ethical Conduct Statement for Students

Students will be evaluated on all aspects of professional behavior and ethical conduct. The evaluation will encompass criteria such as the student's interpersonal interaction with faculty, supervisors, staff, patients, and peers, as well as how the student completes all clinical and didactic assignments within scheduled deadlines and in keeping with both the quality and standards established by the Dental Hygiene Program, School of Dental Medicine faculty, and the University of Pittsburgh faculty. Additionally, student compliance with all established policies and procedures will be evaluated when considering student promotion and board eligibility.

Grading

Each dental hygiene course instructor will clearly state his/her policy regarding grades and evaluation at the beginning of the course. A course syllabus will be distributed to all students at the first class meeting. All required courses are graded according to the University's letter grade system (see Grading and Records section of this bulletin). Elective courses beyond the required number may be taken with the permission of the program director. Student advising begins with the faculty responsible for the course. It is the student's responsibility to seek assistance from the faculty in any course in which the student has a grade lower than a C.
Bachelor of Science Degree Completion Program

Students who complete this program also have the option and are encouraged to complete a Bachelor of Science in dental hygiene as offered by the College of General Studies (see College of General Studies listing for information on BS degree completion option and additional dental hygiene courses which must be taken for the BS).

Associate of Science Degree in Dental Hygiene Requirements

For a complete list of the required courses, please refer to the program curriculum. Upon successful completion of the course requirements, the student is eligible to take the Dental Hygiene National Board and the Commission on Dental Competency Assessment Examinations and apply for state licensure.
Program Curriculum

First Term

- DENHYG 1110 - BIOLOGICAL SCIENCES 1
- DENHYG 1112 - INTRODUCTION TO DENTAL HYGIENE
- DENHYG 1113 - INTRODUCTION TO DENTISTRY
- DENHYG 1114 - DENTAL ANATOMY
- DENHYG 1116 - DENTAL HYGIENE PRECLINIC
- DENHYG 1117 - CHEMISTRY, BIOCHEMISTRY AND NUTRITION

Credits: 17

Second Term

- DENHYG 1241 - PRINCIPLES OF MICROBIOLOGY
- NUR 0032 - MICROBIOLOGY LABORATORY
- DENHYG 1242 - BIOLOGICAL SCIENCES 2
- DENHYG 1244 - COMMUNICATIONS
- DENHYG 1245 - DENTAL HYGIENE RADIOLOGY 1
- DENHYG 1247 - DENTAL HYGIENE SEMINAR 1
- DENHYG 1248 - DENTAL MATERIALS
- DENHYG 1249 - DENTAL HYGIENE CLINIC 1

Credits: 17

Third Term

- DENHYG 1370 - INTRODUCTION TO CLINICAL PERIODONTICS
- DENHYG 1372 - GENERAL AND ORAL PATHOLOGY
- DENHYG 1373 - BIOLOGICAL SCIENCES 3
- DENHYG 1375 - ANESTHESIA FOR DENTAL HYGIENIST
- DENHYG 1376 - DENTAL HYGIENE RADIOLOGY 2
- DENHYG 1377 - DENTAL HYGIENE SEMINAR 2
- DENHYG 1379 - DENTAL HYGIENE CLINIC 2

Credits: 16

Fourth Term

- DENHYG 1411 - DENTAL PHARMACOLOGY
- DENHYG 1412 - PUBLIC HEALTH DENTISTRY
- DENHYG 1417 - DENTAL HYGIENE SEMINAR 3
- DENHYG 1419 - DENTAL HYGIENE CLINIC 3
- DENHYG 1420 - ETHICS HEALTH CARE PROFESSIONAL
- DENHYG 1421 - SPECIAL NEEDS DENTISTRY
• DENHYG 1422 - HEALTH PROMOTIONS THROUGH THE LIFE SPAN
  Credits: 17

Fifth Term

• DENHYG 1544 - INTRODUCTION TO RESEARCH ANALYSIS
• DENHYG 1545 - DENTAL HEALTH EDUCATION, METHODS AND PRACTICUM
• DENHYG 1547 - DENTAL HYGIENE SEMINAR 4
• DENHYG 1549 - DENTAL HYGIENE CLINIC 4
  Credits: 13

Sixth Term

• DENHYG 1689 - ADVANCED CLINICAL DENTAL HYGIENE PRACTICE
• ADVANCED DENTAL HYGIENE PRACTICUM - 0 Cr. (Taken within DENHYG 1689)
  Credits: 2

Total: 82

School of Education

Mission/Vision

The following statement is the Mission/Vision of the School Education, adopted January 2019. It encapsulates what we do, what we believe, and who we continually seek to become as members of the School community.

We ignite learning. We strive for well-being for all. We teach. We commit to student, family, and community success. We commit to educational equity. We advocate. We work for justice. We cultivate relationships. We forge engaged partnerships. We collaborate. We learn with and from communities. We innovate and agitate. We pursue and produce knowledge. We research. We disrupt and transform inequitable educational structures. We approach learning as intertwined with health, wellness, and human development. We address how national, global, social, and technological change impacts learning. We shape practice and policy. We teach with and for dignity. We think. We dream. We lead with integrity. We are the School of Education at the University of Pittsburgh.

General Information

The School of Education (www.education.pitt.edu) is organized into four academic departments:

- Department of Administrative and Policy Studies
- Department of Health and Physical Activity
- Department of Instruction and Learning
- Department of Psychology in Education

Undergraduate degree programs are offered in the Department of Health and Physical Activity (HPA) and the Department of Psychology in Education (PSYED). HPA offers the baccalaureate program in health and physical activity with specializations in exercise science and wellness; PSYED offers the baccalaureate program in applied developmental psychology.

Teacher certification programs are offered in the Department of Instruction and Learning at the graduate level only. No teacher certification programs are offered in the other three departments.

Undergraduate students interested in obtaining teacher certification at the University of Pittsburgh after they have earned their baccalaureate degrees are encouraged to contact the pre-admissions advisors in the School of Education early in their undergraduate programs in order to obtain information about the teacher certification programs available and the requirements of those programs. Admission for teacher certification study requires that applicants have completed liberal studies distribution requirements in the humanities, natural sciences, and social sciences, as well as course work in an academic major field or content area. Additionally, applicants to the Professional Year (PY) Program are expected to have completed preprofessional education courses (e.g., courses emphasizing human development and learning, the study of schools and society, and an introduction to the teaching seminar in the intended certification area). The number of credits and specific courses required vary by type and area of certification. Note, however, that all applicants to both the PY Program and the Master of Arts in Teaching (MAT) Program must have at least 6 credits or the equivalent in college-level mathematics, at least 3 credits or the equivalent in college-level English composition, and at least 3 credits or the equivalent in college-level American and/or British literature. For admission to teacher certification programs in the Department of Instruction and Learning, all students must have taken and passed the Praxis I Series of Tests, which includes reading, mathematics, and writing. As a point of general information, most students admitted to the PY and MAT programs have undergraduate grade point averages (GPAs) of at least 3.0. Specific information may be obtained from the Office of Admissions and Enrollment Services, 5500 Wesley W. Posvar Hall, 412-648-2230, soeinfo@pitt.edu.

Admissions

The School of Education does not admit students to its undergraduate programs at the freshman level. Therefore, students must first be admitted to another school at the University of Pittsburgh or to another institution.

If an applicant to a School of Education undergraduate program is currently a University of Pittsburgh student, the applicant should contact the dean's office of the school to which the applicant has been admitted and request an Undergraduate Academic Program Change form. After completion of
this form, all records will be transferred to the School of Education, Office of Admissions and Enrollment Services, 5500 Wesley W. Posvar Hall, for review.

If an applicant to a School of Education undergraduate program is transferring from another institution, the applicant should contact the Office of Admissions and Financial Aid, Alumni Hall, for a Transfer Application. (See Transfer Student Admissions section of this bulletin for more information.)

To be admitted into a Minor program in the School of Education a student must do the following:

- Be enrolled in an undergraduate program at the University of Pittsburgh.
- Complete a School of Education Admissions Application for the selected academic minor.

Advising

Each student admitted to an undergraduate program in the School of Education is assigned a faculty advisor.

Dean's List

Early each term, students whose grades in the previous grading period indicate outstanding achievement are recognized in the Dean's List.

Full-time students (those enrolled in 12 or more credits) who earned 12 credits in the preceding term (not including courses taken on the Satisfactory/Audit option) with a term GPA of at least 3.50 and no grade lower than a C are placed on the Dean's List.

Part-time students (those enrolled in fewer than 12 credits) who have earned 12 credits in the SOE in previous terms (not including courses taken on the Satisfactory/Audit option) with a QPA of at least 3.50 and no grade lower than a C are placed on the Dean's List.

Part-time students are evaluated for Dean's List recognition by determining if 12 credits of letter-graded coursework have been completed since the last Dean's List recognition. If 12 credits have been completed, the GPA for the terms in which the last 12 credits were completed is used to assess the Dean's List eligibility.

Degree Requirements

The undergraduate degree in the School of Education requires the satisfactory completion of a minimum of 120 credits of approved undergraduate study. Undergraduate degrees are conferred only on those students who have completed all courses required for the degree with a GPA of at least 2.50.

Students in the School of Education must complete at least 60 credits in courses offered at the University of Pittsburgh. They must be enrolled in the School of Education during the term the degree is awarded. Students who begin their study at the regional campuses must apply to relocate to the Pittsburgh campus for at least the last 60 credits.

Transfer Credits

With approval of faculty advisor and the Dean's designated administrator, the School of Education recommends transfer credits that meet University policy. The University will grant credit earned at other institutions based on course equivalencies, including expected learning outcomes, with those of the University curriculum and standards. In the School of Education, the maximum number of credits that can be transferred to the Bachelor Science degree is 60 credits. At the undergraduate level, no grade below C- may be transferred. Credits are only transferrable if they meet specific degree requirements. Current School of Education undergraduate students who wish to enroll at another institution with the intention of transferring credits to the University of Pittsburgh must receive prior approval from their advisor. See general Undergraduate Academic Regulations for more information.

Probation and Dismissal
All students enrolled in undergraduate programs in the School of Education are required to maintain a grade point average (GPA) of at least 2.50. The cumulative GPA is based on all course work taken after enrollment at the University of Pittsburgh. A student is automatically placed on academic probation when the cumulative GPA, exclusive of transfer credits, falls below 2.50.

Only letter grades with GPA values will be used to compute and determine academic probation status. While on probation students are limited to registering only for courses in which a letter grade is given. To be removed from probation status, a student must achieve a 3.00 GPA in 9 credits or more. A student can only be placed on academic probation status once during their program of study. Students placed on academic probation status will receive notification in the form of a letter from the School of Education, and they will be recommended to seek guidance from their academic advisor.

Ordinarily, students are required to terminate study after two terms on probation if there is no improvement in the quality of their work. A student placed on academic probation status more than once is also required to terminate study. A student who does not meet the GPA or credit requirements will be dismissed from the School of Education, unless serious extenuating circumstances exist. The request for continuation must include a recommendation made by the Department Chair (or designated faculty member) and the academic advisor, with the recommendation approved by the Dean of the school.

Major

Teacher Education, BS

The proposed undergraduate (UG) teacher education major and certification program will offer UG students six tracks, each aligned with a certification option in Pennsylvania: Secondary (Grades 7-12) English, Foreign Language, Math, Science, or Social Studies (45-credits for major), and PreK-12 Special Education (48-credits for major). Students will follow the general education requirements as outlined by The Dietrich School of Arts and Sciences. (https://www.asundergrad.pitt.edu/academic-experience/general-education-requirements)

Program Requirements

- IL 1509 - APPLIED BEHAVIOR ANALYSIS AND POSITIVE BEHAVIOR SUPPORT
- EDUC - xxxx - Assessment and Instruction of Students with High Incidence Disabilities
- EDUC - xxxx - Content Methods I
- EDUC - xxxx - Content Methods II
- EDUC - xxxx - Culture, Context & Identity I
- EDUC - xxxx - Culture, Context, & Identity II

- IL - 1580 - FOUNDATIONS OF SPECIAL EDUC

Secondary Math Concentration

Secondary Social Studies Concentration

Secondary Science Concentration

Secondary Foreign Language Concentration
Secondary English Education Concentration

PreK-12 Special Education Concentration

Minor

Secondary Education Minor

To help undergraduate students explore the field of education and prepare for graduate work in education, the School of Education offers a flexible 15-credit Secondary Teacher Education minor. These courses allow students who plan to enter a graduate program in Secondary Teacher Education to make progress on the prerequisite education courses required for those programs and to earn an additional credential on their official transcripts.

Completion of the teacher education minor does not guarantee admission into the School of Education graduate programs; nor does it fulfill all necessary prerequisites.

Interested students can apply by completing and submitting the online form for admission. Students can apply for the minor anytime during their undergraduate tenure.

Requirements

The Secondary Education Minor requires 15 undergraduate credits from the School of Education. A minimum of 6 credits must be from the Department of Instruction and Learning (IL).

- TLL 1000 - INTRODUCTION TO TEACHING
- TLL 1257 - TEACHING ENGLISH LANGUAGE LEARNERS (not recommended for future MAT degree students)
- TLL 1505 - AUTISM: CHARACTERISTICS AND INTERVENTIONS
- TLL 1580 - FOUNDATIONS OF SPECIAL EDUC (requires in-school observations)
- TLL 1701 - EARLY FIELD EXPERIENCE-SECONDARY (requires in-school observations)
- TLL 1704 - CURRENT ISSUES IN SECONDARY EDUCATION
- EFOP 1001 - SOCIAL FOUNDATIONS OF EDUCATION
- EDUC 1011 - CULTURALLY RESPONSIVE PEDAGOGY
- PSYED 1001 - INTRO EDUCATIONAL PSYCHOLOGY

Admission Requirements

ADP - Traditional Program

The program in applied developmental psychology uses a rolling admissions procedure which assures that all completed admission applications will be given regular review. Priority for admissions and financial aid decisions, however, will be given to those applications that are sent in by March 15, the recommended deadline for fall term admission.

In reviewing applications for admission, the Admissions Committee considers the following factors:

- Academic skill as evident on the student's transcript. The minimum acceptable GPA is 2.50;
- Documented evidence of experience and ability to work with children (experience may include volunteer work or employment);
- References, preferably from professionals familiar with the student's maturity, work habits, academic ability, and experience with children/youth; and
- Completion of 60 credits before the first term of enrollment in the program, including the following prerequisite courses, all of which should be taken for a letter grade:
  - English composition (3 credits);
  - Developmental psychology or equivalent (3 credits); and
  - Other courses broadly distributed in the humanities, social sciences, and natural sciences.

Credits awarded from the College Level Examination Program (CLEP) by the College of General Studies are acceptable for inclusion in the 60 credits.

The program welcomes applications from junior and community college students and from students at other colleges and universities, including students from other countries. These students should see the Transfer Student Admissions or International Student Admissions sections of this bulletin for further details on applying. Students from other academic backgrounds should consult the program coordinator for evaluation.

ADP - CASE Teacher Certification Program

The program in ADP - CASE Teacher Certification admits student cohorts to begin the program each fall term. Applicants are reviewed in the spring of the term before the program begins. The application deadline is March 15.

In reviewing applications for admission, the Admissions Committee considers the following factors:

- Academic skill as evident on the student's transcript. The minimum acceptable GPA is 3.25;
- Documented evidence of experience and ability to work with children (experience may include volunteer work or employment);
- Three letters of reference, preferably from professionals familiar with the student's maturity, work habits, academic ability, and experience with children/youth; and
- Completion of 61 credits of CASE prerequisites before the first term of enrollment in the program.

Prerequisite courses can be found on the ADP-CASE website.

The program welcomes applications from junior college and community college students and students at other colleges and universities, including students from other countries. These students should see the Transfer Student Admissions or International Student Admissions sections of this bulletin for further details on applying. Students from other academic backgrounds should consult the program coordinator for evaluation of prerequisites.

University of Pittsburgh
School of Education
Department of Health and Human Development
Admissions

Specific requirements for admission to the baccalaureate program in movement science are as follows:

- An application after approximately 45 credits have been completed: these credits should have been taken in courses that meet the general liberal arts and science requirement of the exercise science curriculum;
- A minimum GPA of 2.80 in the natural sciences;
- A demonstration of appropriate health-fitness behaviors as a statement of commitment to the basic philosophy of movement science;
- A statement of career goals and a self-evaluation; and
- Three letters of recommendation and possibly an interview.

Accelerated

Applied Developmental Psychology/Combined Studies in Early Childhood and Special Education (CASE), BS/MEd

The CASE teacher preparation program in the University of Pittsburgh School of Education is a 4+1 accelerated program. Undergraduate students earn a B.S. in Applied Developmental Psychology and the M.Ed. in Early Childhood and Special Education. Students are also prepared to take Pennsylvania Department of Education tests for state certification in PK-4 General Education and PK-8 Special Education.

The B.S. in Applied Developmental Psychology prepares students to teach using developmentally appropriate practices and humanizing pedagogies that respect the individualized learning of all students. The program emphasizes the promotion of positive outcomes in human development for children, youth and families, while at the same time developing strategies for teaching children in Grades PK-8. The M.Ed. in Early Childhood and Special Education completes students' studies in content area and special education teaching strategies and practices.

Students complete a community engagement project in their junior year, then enter into two practicum and two full-time student teaching experiences prior to the end of the graduate year. Field experiences build the foundation of preparation for students in various classroom settings.

On September 29, 2021 the 4+1 Accelerated program was approved. In order to maintain accurate records the program was created on October 19, 2021.

HAA (3 credits)  • Any course
Arts and Sciences Electives (12 credits)  • Any courses
Education Courses (9 credits)  • IL 1041
• EFOP 1001
• Additional Education Course
Total Prerequisite Credits  61 credits in freshman/sophomore years

Semester 5 - Junior Year Fall Term

• HHD 1002 - DEVELOPMENT: CONCEPTION THROUGH EARLY CHILDHOOD
• HHD 1025 - CONTEMPORARY ISSUES IN COMMUNITY
• HHD 1036 - DEVELOPMENTAL MEANING CULTURAL DISTINCTION
• TLL 1580 - FOUNDATIONS OF SPECIAL EDUCATION
• TLL 1907 - COLLABORATIVE PARTNERSHIPS WITH FAMILIES AND THE COMMUNITIES
• TLL 1042 - LANGUAGE AND LITERATURE FOR THE YOUNG CHILD

Semester 6 - Junior Year Spring Term

• HHD 1005 - TEACHING GLOBALLY AND LOCALLY IN A DIVERSE WORLD
• HHD 1016 - DEVELOPMENTAL CURRICULUM AND ACTIVITIES
• TLL 1270 - INTEGRATING ART & MUSIC IN ELEMENTARY CLASSROOM
• TLL 1560 - EARLY EDUCATION OF YOUNG CHILDREN WITH DISABILITIES
• TLL 1047 - INTEGRATED CURRICULUM PRE-K - 4
• HHD 1491 - TEACHING HEALTH AND WELLNESS IN ELEMENTARY SCHOOLS

Semester 7 - Senior Year Fall Term

• TLL 1800 - PRE-STUDENT TEACHING PRE-K
• TLL 1049 - SEMINAR RELATED TO PRE-STUDENT TEACHING PRE-K
• HHD 1004 - ATTENTIONAL TEACHING PRACTICES
• TLL 1208 - READING/WRITING METHODS 1: PRE-KINDERGARTEN - GRADE 1
• TLL 1045 - YOUNG ENGLISH LANGUAGE LEARNERS
• TLL 1268 - SOCIAL STUDIES METHODS PRE-K - 4

Semester 8 - Senior Year Spring Term

• TLL 1850 - LIFE SKILLS PRACTICUM
• TLL 1852 - LIFE SKILLS PRACTICUM SEMINAR
• TLL 2511 - CURR PRG DVLP-LOW INCREDIBLE DISABILITIES
• TLL 1433 - MATH METHODS FOR PRE-K-GRADE 4 STUDENTS
• TLL 1209 - READING/WRITING METHODS 2: GRADES 2-4
• HHD 1050 - SUPERVISION ADMINISTRATION CHILD YOUTH WORK SETTING
Graduate Courses (40 credits)

Summer Session

- TLL 2509 - APPLD BHVR ANAL/POSTV BHVR SUPRT
- TLL 2751 - SPECIAL EDUCATION PROCEDURES AND TRANSITION PROCESSES
- EDUC 2201 - INTRODUCTION TO RESEARCH METHODOLOGY

Fall Term

- TLL 2800 - STUDENT TEACHING-EARLY CHLDHD ED
- TLL 2707 - FIELD SEMINAR IN EARLY CHILDHOOD EDUCATION
- TLL 2434 - SCIENCE METHODS FOR PREK-GRADE 4 STUDENTS
- TLL 2522 - ED STDNT EMOTIONAL DISTURBANCE
- TLL 2513 - INSTRNL METH-HIGH INCIDNC DISABS

Spring Term

- TLL 2853 - STUDENT TEACHING - STUDENTS WITH HIGH INCIDENCE OF DISABILITIES
- TLL 2858 - STUDENT TEACHING SEMINAR - SPECIAL EDUCATION TEACHER PREPARATION
- TLL 2512 - ASSMNT INSTRUC-HIGH INCDNC DISAB
- TLL 2290 - RESEARCH SEMINR FOR MED STUDENTS

Major

Applied Developmental Psychology, BS

The undergraduate major in Applied Developmental Psychology (ADP) develops the skills and knowledge needed for professional work in child and youth care, education and other related human service fields. ADP also prepares students for graduate school in such fields as education, psychology, and social work. Coursework includes developmental theory and research covering birth through early adulthood, professional issues, family dynamics, cultural distinctions, disabilities, psychopathology, curriculum and activity planning, practice skills, and supervision.

The undergraduate major in Applied Developmental Psychology (ADP) includes three distinct areas of concentration that lead to a BS degree:

- ADP Traditional
- ADP Practitioner
- ADP CASE (Combined Accelerated Studies in Education)

ADP- Traditional Program

The undergraduate major in Applied Developmental Psychology (ADP) emphasizes developing the skills necessary for implementing and evaluating effective programs for children, youth, and families. Course work includes the study of professional issues, program design and evaluation, counseling skills, and qualitative research methods. The program allows for a focus on Child Life hospital work, group care, family support and intervention, administration, play intervention and therapy. Successful completion of the program leads to the Bachelor of Science degree.

The ADP Bachelor of Science program is listed as an academic program to prepare Child Life Specialists by the Child Life Council.

The curriculum is organized into four terms of upper-division (junior and senior year) study. Applications for admission should be submitted during the sophomore year.
ADP- CASE Teacher Certification Program

The undergraduate major in Applied Developmental Psychology (ADP) also includes preliminary work in teacher certification. This program emphasizes developing the skills necessary for becoming a highly effective teacher of young children in grades PK-4 General Education and PK-21 Special Education. Course work includes the study of professional issues, program design and evaluation, teaching methodology and best practices in using culturally and linguistically relevant pedagogy. Successful completion of the program leads to the Bachelor of Science degree. CASE students then continue into the graduate year to complete coursework and student teaching that leads to the PK-4 Early Childhood and the PK-21 Special Education teaching certification in Pennsylvania.

The curriculum is organized into four terms of upper-division (junior and senior year) undergraduate study. Three additional terms of graduate study allows students to finish with two degrees and two teacher certifications in five years. Applications for admission should be submitted during the sophomore year.
Exercise Science, BS

The B.S. in Exercise Science is focused on training students to prepare for health-fitness and clinical careers related to exercise science. Specifically, this degree program prepares students for careers in 1) health, fitness, or performance benefits of exercise and physical activity; Health-related careers related to exercise (cardiac rehabilitation, pulmonary rehabilitation, etc; 3) Admission to physical therapist, occupational therapist, physician assistant, or other health-related career programs; 4) Admission to graduate training in exercise science, exercise physiology, public health, or a related field.

General Education Requirements (50-52 Credits)

Communication Skills (9 credits)

- ENGCMP 0200 - SEMINAR IN COMPOSITION
- Public Speaking - 3
- Composition Elective ("W" course) - 3

Quantitative Reasoning (6-7 credits)

- MATH 0031 - ALGEBRA
- Statistics - 3-4

Humanities (9 credits)

- Literature, 3 credits
- Music or Art, 3 credits
- Philosophy/Philosophy of Science, 3 credits

History, Social Science & Public Policy (9 credits)

- History, 3 credits
- Social Sciences, 3 credits
- Public Policy, 3 credits

Introductory Sciences (17-18 credits)

- BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1

- BIOSC 0057 - FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 1
  OR
- BIOSC 0058 - FOUNDATIONS OF BIOLOGY SEA-PHAGES LABORATORY 1
• CHEM 0110 - GENERAL CHEMISTRY 1
  Plus CHEM Lab
• PHYS 0110 - INTRODUCTION TO PHYSICS 1
• PSY 0010 - INTRODUCTION TO PSYCHOLOGY
• ELECTIVE (second course in subjects above) - 3-4

Exercise Science Requirements (70-73 credits)

Biophysical Foundations (19 credits)

• HHD 1011 - APPLIED HUMAN ANATOMY
• HHD 1012 - APPLIED HUMAN ANATOMY LAB
• HHD 1033 - HUMAN PHYSIOLOGY
• HHD 1042 - PHYSIOLOGY OF EXERCISE
• HHD 1044 - BIOMECHANICS
• HHD 1485 - NUTRITION AND HEALTH
• HHD 1487 - CHRONIC DISEASE AND OBESITY

Behavioral & Sociocultural Foundations (3 credits)

• HHD 1486 - BEHAVIOR CHANGE STRATEGIES

Research Methods & Practicum (3-5 credits)

Health & Wellness Foundations (7 credits)

• HHD 0196 - FIRST AID AND CPR
• HHD 0474 - LIFETIME ACTIVITIES 1
• HHD 0475 - LIFETIME ACTIVITIES 2
• HHD 1489 - CONSIDERATIONS FOR HEALTH AND FITNESS PROGRAMMING

Natural Sciences (14-16 credits)

• BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2
• BIOSC 0067 - FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 2
  OR
• BIOSC 0068 - FOUNDATIONS OF BIOLOGY SEA-PHAGES LABORATORY 2
• CHEM 0120 - GENERAL CHEMISTRY 2
  Additional Science Electives (e.g. BIO, CHEM, PHYS, PSY, NEURO, NUTR) 6-9

Exercise Science Foundations (22-23 credits)

• HHD 1035 - EXERCISE SCIENCE SEMINAR 2
• HHD 1169 - HEALTH FITNESS PRACTICUM 1
• HHD 1170 - HEALTH FITNESS PRACTICUM 2
Instructor Courses (2 credits)

Required for Applied Focus students only

- HHD 0497 - WATER SAFETY INSTRUCTOR
- HHD 1172 - GROUP FITNESS INSTRUCTOR
- HHD 1174 - YOGA AND PILATES INSTRUCTOR
- PEDC 0242 - AMER RED CROSS LIFEGUARD INSTRC
- PEDC 0243 - AMER RED CROSS FIRST/CPR INSTRC
- HHD 1175 - CARDIO CONDITIONING INSTRUCTOR

Health and Physical Activity - Exercise Science, BS

In the Summer 2021 the Health and Physical Activity - Exercise Science, BS program was officially terminated. Students currently enrolled will until the end of the Fall 2021 term to meet the degree requirements and graduate with the Health and Physical Activity, BS.

The School of Education will move any active students in the HPA major, not conferring the degree by the end of the Fall 2021 term, into the Exercise Science, BS with no changes to their current degree requirements.

Health and Physical Activity

The baccalaureate program in health and physical activity leads to the BS degree and provides specializations in exercise science and wellness. The exercise science specialization is offered for students interested in the study of human movement, independent of its implications for teaching physical education in traditional elementary and secondary school settings. Students are prepared for careers as health-related physical fitness specialists interested in working with adult populations in community, corporate, and private fitness centers. Also, this specialization provides basic academic and clinical studies for students wishing to pursue graduate work in exercise science.

The wellness specialization is offered for undergraduates interested in corporate wellness, exercise leadership and programming, public health, and coordination of health-fitness and wellness programs. Students are provided the opportunity for professional focus in one of four areas: aquatics, fitness, aerobics, or aerobics/fitness. This specialization provides appropriate mechanisms to meet the criteria for various professional certifications in this fastgrowing and competitive field. The wellness specialization provides basic academic and clinical studies for students wishing to pursue graduate work in physical activity or the public health domain.

Exercise Science Curriculum

All students in exercise science complete 50-52 credits of courses in liberal arts and sciences, distributed as follows:

- Communication skills (9 credits)
- Quantitative reasoning (6-7 credits)
- Humanities (9 credits)
- Sciences (17-18 credits)
- History, social science, and public policy issues (9 credits)

In addition, all students in exercise science complete the following core of 67-75 credits:

- Biophysical foundations (19 credits)
- Behavioral and sociocultural foundations (3 credits)
- Research methods and practicum (3-5 credits)
- Health and wellness foundations (7-9 credits)
- Natural Science Electives (14-16 credits)
- Exercise Science Foundations (22-23 credits)

This degree requires a clinical/field experience and a directed research and/or health and fitness practicum. These requirements are completed under the direct supervision of a faculty member and may occur in a variety of settings (e.g., health clubs and hospitals).

Exercise Science Requirements (70-73 CREDITS)

Biophysical Foundations (19 credits)

- HHD 1033 - HUMAN PHYSIOLOGY
- HHD 1011 - APPLIED HUMAN ANATOMY
- HHD 1012 - APPLIED HUMAN ANATOMY LAB
- HHD 1042 - PHYSIOLOGY OF EXERCISE
- HHD 1485 - NUTRITION AND HEALTH
- HHD 1044 - BIOMECHANICS
- HHD 1487 - CHRONIC DISEASE AND OBESITY

Behavioral & Sociocultural Foundations (3 credits)

- HHD 1486 - BEHAVIOR CHANGE STRATEGIES

Research Methods and Practicum (3-5 credits)

- HHD 1031 - RESEARCH IN SPORTS SCIENCE
- HHD 1045 - DIRECTED RESEARCH PRACTICUM

Health and Wellness Foundations (7 credits)

- HHD 0474 - LIFETIME ACTIVITIES 1
- HHD 0475 - LIFETIME ACTIVITIES 2
- HHD 0196 - FIRST AID AND CPR
- HHD 1489 - CONSIDERATIONS FOR HEALTH AND FITNESS PROGRAMMING

Natural Science Electives (14-16 credits)

- BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2
- BIOSC 0060 - FOUNDATIONS OF BIOLOGY LABORATORY 2
- CHEM 0120 - GENERAL CHEMISTRY 2
• SCIENCE ELECTIVES

Exercise Science Foundations (22-23 credits)

- HHD 1233 - PRINCIPLES OF STRENGTH AND CONDITIONING
- HHD 1224 - FITNESS ASSESSMENT AND EXERCISE PRESCRIPTION
- HHD 1226 - ASSESSMENT AND PRESCRIPTION FOR SPECIAL POPULATIONS
- HHD 1035 - EXERCISE SCIENCE SEMINAR 2
- HHD 1996 - CLINICAL INTERNSHIP
- HHD 1169 - HEALTH FITNESS PRACTICUM 1
- HHD 1170 - HEALTH FITNESS PRACTICUM 2

Instructor Courses (2 credits) (Choose 2)

- HHD 1171 - RESISTANCE TRAINING INSTRUCTOR
- HHD 1172 - GROUP FITNESS INSTRUCTOR
- HHD 1173 - AEROBICS INSTRUCTOR
- HHD 1174 - YOGA AND PILATES INSTRUCTOR
- HHD 0497 - WATER SAFETY INSTRUCTOR
- PEDC 0243 - AMER RED CROSS FIRST/CPR INSTRC
- PEDC 0242 - AMER RED CROSS LIFEGUARD INSTRC

Minor

Applied Fitness Minor

Requirements

Students may minor in applied fitness, aquatics, dance, and exercise science. A minimum of 18 credits is required for each minor, with the exception of the applied fitness minor, for which a minimum of 17 credits is required. Upon completion of all requirements the minor will appear on the final transcript as an awarded Academic Minor. The student is responsible for working closely with their Minor Advisor to ensure that the necessary documentation is provided to allow for this to appear on the final transcript.

Graduates of the exercise science and wellness specializations and any minor programs do not qualify for public school teacher physical education certification.

APPLIED FITNESS REQUIRED COURSES (13 credits)

- HHD 1011 - APPLIED HUMAN ANATOMY
- HHD 1012 - APPLIED HUMAN ANATOMY LAB
- HHD 1033 - HUMAN PHYSIOLOGY
- HHD 1042 - PHYSIOLOGY OF EXERCISE
- HHD 1224 - FITNESS ASSESSMENT AND EXERCISE PRESCRIPTION

APPLIED FITNESS MINOR FOUNDATION COURSES (1 CREDIT) Select 1 of the following:
HHD 0474 - LIFETIME ACTIVITIES 1
HHD 0475 - LIFETIME ACTIVITIES 2

APPLIED FITNESS MINOR INSTRUCTOR COURSES (2 CREDITS) Select 2 of the following:

- HHD 1171 - RESISTANCE TRAINING INSTRUCTOR
- HHD 1172 - GROUP FITNESS INSTRUCTOR
- HHD 1173 - AEROBICS INSTRUCTOR
- HHD 1174 - YOGA AND PILATES INSTRUCTOR

APPLIED FITNESS MINOR PRACTICUM COURSE (1 CREDIT)

- HHD 1170 - HEALTH FITNESS PRACTICUM 2

Aquatics Minor

Requirements

Students may minor in applied fitness, aquatics, dance, and exercise science. A minimum of 18 credits is required for each minor, with the exception of the applied fitness minor, for which a minimum of 17 credits is required. Upon completion of all requirements the minor will appear on the final transcript as an awarded Academic Minor. The student is responsible for working closely with their Minor Advisor to ensure that the necessary documentation is provided to allow for this to appear on the final transcript.

Graduates of the exercise science and wellness specializations and any minor programs do not qualify for public school teacher physical education certification.

AQUATICS REQUIRED COURSES (15 CREDITS)

- HHD 0196 - FIRST AID AND CPR
- HHD 0497 - WATER SAFETY INSTRUCTOR
- HHD 1211 - ATHLETIC INJURY PREVENTION
- HHD 1212 - ATHLETIC INJURY PREVENTION LABORATORY
- HHD 1241 - TEACHING EXPERIENCE 1
- HHD 1242 - TEACHING EXPERIENCE 2
- HHD 1300 - NUTRITION IN EXERCISE AND SPORT
- PEDC 0133 - LIFE GUARDING 1
- PEDC 0242 - AMER RED CROSS LIFEGUARD INSTRC
- PEDC 0246 - POOL OPERATIONS/EVENT MANAGEMENT

Additional Aquatic Courses (3 CREDITS) Select 3 of the following:

- PEDC 0001 - BEGINNING SWIMMING
- PEDC 0002 - INTERMEDIATE SWIMMING
- PEDC 0026 - AQUATIC CONDITIONING
- PEDC 0158 - WEIGHT TRAINING - BEGINNER
Dance Minor

Requirements

Students may minor in applied fitness, aquatics, dance, and exercise science. A minimum of 18 credits is required for each minor, with the exception of the applied fitness minor, for which a minimum of 17 credits is required. Upon completion of all requirements the minor will appear on the final transcript as an awarded Academic Minor. The student is responsible for working closely with their Minor Advisor to ensure that the necessary documentation is provided to allow for this to appear on the final transcript.

Graduates of the exercise science and wellness specializations and any minor programs do not qualify for public school teacher physical education certification.

DANCE COURSES

- HHD 0060 - INTRODUCTION TO DANCE
- HHD 0473 - DANCE PEDAGOGY
- HHD 1241 - TEACHING EXPERIENCE 1
- HHD 1242 - TEACHING EXPERIENCE 2
- HHD 0033 - BALLET 1
- HHD 0041 - JAZZ 1
- HHD 0031 - MODERN DANCE 1
- HHD 0044 - DANCE PRODUCTION
- HHD 0040 - CHOREOGRAPHY
- HHD 0244 - DANCE PRODUCTION 2

Additional Dance Courses (Choose 3.0 credits from the following 4 courses)

- HHD 0196 - FIRST AID AND CPR
- HHD 0032 - MODERN DANCE 2
- HHD 0034 - BALLET 2
- HHD 0042 - JAZZ 2

Exercise Science Minor

Requirements

Students may minor in applied fitness, aquatics, dance, and exercise science. A minimum of 18 credits is required for each minor, with the exception of the applied fitness minor, for which a minimum of 17 credits is required. Upon completion of all requirements the minor will appear on the final transcript as an awarded Academic Minor. The student is responsible for working closely with their Minor Advisor to ensure that the necessary documentation is provided to allow for this to appear on the final transcript.

Graduates of the exercise science and wellness specializations and any minor programs do not qualify for public school teacher physical education certification.
EXERCISE SCIENCE MINOR REQUIRED COURSES (13 CREDITS)

- HHD 1011 - APPLIED HUMAN ANATOMY
- HHD 1012 - APPLIED HUMAN ANATOMY LAB
- HHD 1033 - HUMAN PHYSIOLOGY
- HHD 1042 - PHYSIOLOGY OF EXERCISE
- HHD 1224 - FITNESS ASSESSMENT AND EXERCISE PRESCRIPTION

EXERCISE SCIENCE MINOR ELECTIVE COURSES (5-6 CREDITS) Choose from the following courses:

- HHD 1044 - BIOMECHANICS
- HHD 1233 - PRINCIPLES OF STRENGTH AND CONDITIONING
- HHD 1226 - ASSESSMENT AND PRESCRIPTION FOR SPECIAL POPULATIONS
- HH 1487 - CHRONIC DISEASE AND OBESITY

Swanson School of Engineering

The Swanson School of Engineering's undergraduate programs prepare students for entrance into a diverse spectrum of careers, providing both a strong, fundamental engineering education and a thorough understanding of the broader aspects of society. Students have an opportunity to participate in the highly successful Cooperative Engineering Education Program, an increasing number of study abroad opportunities, joint programs with the University Honors College, and a number of certificate programs. Students also have the option of earning a minor or a dual degree from various Dietrich School of Arts and Sciences programs. Minors may also be earned from the other Swanson School of Engineering undergraduate degree programs. The curricula provide sufficient flexibility to allow graduates to pursue careers in industry, government, or education, including programs in medicine, law, or business.

Full-time Bachelor of Science in Engineering degree programs are offered on the Pittsburgh campus in the following engineering disciplines: bioengineering, chemical, civil, computer, electrical, engineering science, environmental, industrial, materials science, and mechanical. Special interdisciplinary programs can be structured based upon individual student interest and ability through the engineering science program. The Cooperative Engineering Education Program, in which students alternate terms of relevant work experience with course work, is available for students in all undergraduate engineering majors. Approximately half of the graduating seniors complete at least three co-op rotations. There are also certificate programs in nuclear engineering; innovation, product design and entrepreneurship; supply chain management; engineering for humanities; international engineering studies; and engineering simulation in design.

Application Procedures
The Swanson School of Engineering works closely with the University of Pittsburgh's Office of Admissions and Financial Aid (OAFA). Ultimately, all admissions, financial aid and scholarship decisions take place through OAFA following the procedures detailed below:

**First Year Engineering Applicants**

All admissions to the Swanson School of Engineering are determined by the University's Office of Admissions and Financial Aid. (Please see Pittsburgh Campus Freshman Admissions section of this bulletin for details.) Approximately 600 first year students enter the Swanson School of Engineering each fall term.

**Transfer Students from Other Colleges and Universities**

The Swanson School of Engineering admits transfer students from within the University system, and from other U.S. and international programs. Approximately one-third of the students receiving the BSE degree transferred into the school. Transfer applicants are evaluated according to their academic record and potential for completing the particular engineering program, and conditional upon space available in the program of choice. An applicant for transfer to the Swanson School of Engineering from another college or university should apply through the Office of Admissions.

Contact the First-Year Engineering Program at 412-624-9825, ssoetransfer@pitt.edu or see the transfer engineering student Web site for more information on transfer procedures.

A transfer applicant from a four-year college should have a cumulative grade point average (GPA) of at least a 3.0 (for courses that satisfy Swanson School of Engineering's first-year requirements) on a 4.0 scale to be considered for admissions. Applicants from a two-year college should have a minimum GPA of a 3.25 on a 4.0 scale. Students interested in the Bioengineering program from any institution (two-year or four-year) need a minimum of 3.5 GPA. Students must also have completed two semesters of Calculus, Calculus-based Physics and Chemistry for consideration. In general transfer students will only be accepted for the upcoming Fall Term except for special cases of well-prepared applicants.

All transfer applicants are required to provide SAT I critical reading and mathematics scores and high school academic records. Advanced standing credits will be granted for college course work at another accredited institution depending on grades received and on the relevance of the courses to the applicant's proposed program in the Swanson School of Engineering. Only courses in which the applicant received at least a C (2.0 on a 4.0 scale) will be considered for transfer and then only if the courses are applicable to their degree program.

**Transfer Students from another University of Pittsburgh Oakland Campus School**

While most transfer applicants from other Pittsburgh campus units to the Swanson School of Engineering come from either the Dietrich School of Arts and Sciences (DSAS) or the College of General Studies (CGS), students from any of the University's other schools are eligible for transfer if they meet the Swanson School of Engineering's requirements. Students must submit an Academic Program Change Form through their current advising or academic records center for transfer consideration.

An applicant for transfer from an Oakland campus school must have a minimum 3.000 cumulative GPA (3.500 for Bioengineering) and must have completed no fewer than 7 of the 8 First Year Engineering courses (MATH 0220 and 0230 - Analytic Geometry and Calculus 1 and 2; PHYS 0174 and 0175 - Physics for Science and Engineering 1 and 2; CHEM 0110 and 0120 - General Chemistry 1 and 2; and ENGR 0015 and 0016 Introduction to Engineering Analysis and Introduction to Engineering Computing) with a grade of "C" or better to be considered for admission. Completion of all transfer minimum requirements does not guarantee transfer, as space limitations within each degree program will be considered. For additional information, see the transfer engineering student Web site.

The GPA for students transferring into the Swanson School of Engineering from another school or campus within the University will be recalculated in accordance with the Swanson School of Engineering's policy.

**Regional Campus Students**

Request forms for relocation from the Bradford, Greensburg, Johnstown, or Titusville campuses are available at each regional campus. Pre-engineering students who have a grade point average of 3.0 or higher (with the exception of bioengineering, which requires a 3.5 GPA) in the
required first year engineering curricula are eligible to relocate pending departmental approval. Completion of all transfer minimum requirements does not guarantee transfer, as space limitations within each major will be considered. Students from the Bradford campus in Chemical, Civil, Computer, Electrical and Mechanical must complete the first-two years of their degree program before applying to transfer to the Oakland campus.

Consistent with our admissions deadlines with the Office of Admissions, we will not be able to consider Regional Campus transfer students for the Spring semester if required engineering curricula course grades are in process during the applicant's Fall term. Exceptions to this rule must be approved in advance by the Associate Dean for Academic Affairs.

### Advanced Standing / Transfer Credit for Courses Taken Outside the University

Students transferring into the Swanson School of Engineering from other college-level programs will have their academic records officially reviewed for advanced-standing credit only after they have been admitted and pay their tuition deposit. This determination will be made by the responsible academic department or program in accord with Swanson School of Engineering's policy and criteria established by ABET, the engineering accrediting agency. Advanced standing for engineering or engineering science courses will be considered only if the student completed the course and earned a grade of C or better. Courses that are taken on a pass/fail system that includes a D grade as passing will not be approved for advanced standing. Advanced standing for mathematics, science, humanities, and social sciences courses will be awarded to the extent that such courses match specific University of Pittsburgh Dietrich School of Arts and Sciences courses as required by the Swanson School of Engineering. In particular, humanities and social sciences courses must correspond to those on the Swanson School of Engineering's approved list of humanities and social sciences electives. Contact the Swanson School for information on these approved electives. Additionally, Writing Designated courses ("W" Courses) may not be transferred in from another institution.

Additional transfer credit policies are as follows:

- All courses that have equivalent counterparts at Pitt in terms of content and credits in the Swanson School of Engineering curriculum are eligible for transfer.
- No transfer credits can be part of the final 25% of credits required for a degree. These credits must be earned in residence. In interpreting this regulation, credits earned on regional campuses are considered as transferable.
- Transfer credits need to be earned within 12 years of the date when the Swanson School of Engineering degree requirements will be completed. In accordance with University policy, re-evaluation of credits will be done by the admitting school, when necessary, according to applicable University policy and procedure. The policy applies to all previous credits earned, no matter if they were earned at the University of Pittsburgh or another institution.
- No more than 60 credits may be transferred from a two-year college. No more than 90 may be transferred from a four-year college.
- If a course for which advanced standing credit has been granted is repeated, the advanced standing credit is canceled.
- Coursework earned in approved foreign study programs will be awarded on a Satisfactory/No Credit (S/NC) basis, assuming a grade of C or better has been earned.
- One credit taken at a quarter system school is equal to two-thirds a credit at the University of Pittsburgh. This may affect the ability of a course to transfer.
- Engineering courses must be completed at an ABET certified institution with the exception of approved study abroad courses.
- The Swanson School of Engineering does not accept CLEP credit for course credits.
- Credits for students transferring from a college that has an articulation agreement with the Swanson School of Engineering, a community college having an articulation agreement with the Swanson School of Engineering, or a pre-engineering program at a University of Pittsburgh regional campus will be accepted in accord with those agreements, University policy, and available space in the program of interest.

If a student participates in the University of Pittsburgh College in High School Program, grades earned in Pitt CHS courses appear on an official University of Pittsburgh transcript and are part of the student's academic record. The grade(s) will be included in the calculation of the student's grade point average at the University. CHS courses are only eligible to be repeated at the University if the original grade was below C and no more than one year has passed since the original course was taken, per the Swanson School of Engineering Course Repeat policy.

Students enrolled in the Swanson School of Engineering may take courses at other universities to satisfy graduation requirements only if the student's academic advisor or undergraduate coordinator has approved those courses in advance. Students must earn a grade of C or higher for the course to be accepted for transfer credit. Students must arrange for their transcript to be sent to their undergraduate coordinator.

Students may also earn advanced standing credit by taking Advanced Placement or International Baccalaureate classes in their high schools. Students who have their AP or IB scores sent to the University of Pittsburgh will have those scores evaluated by an academic advisor, who will determine their transferability.
For more information on the IB, see the IB Score Information. For more information on the AP, see the AP Score Information.

**Summer/Special Session Courses Taken Elsewhere**

Swanson School students in good academic standing (cumulative GPA of at least 2.000) may attend a summer or special session of another accredited institution in order to supplement their program, provided they receive prior approval from their academic advisor in the Swanson School of Engineering. Swanson School students may not be enrolled for classes at the University of Pittsburgh and another institution concurrently. Students must submit the name of the institution, the course number, and the relevant course descriptions to their advisor. Courses may not be a repeat of any course taken before (passed or failed) unless an exception is made by the undergraduate coordinator. A maximum of two courses (no more than 8 credits) may be taken in a single period of enrollment elsewhere.

Students who wish to take "winter term" (e.g. "wintermester", "January-term") courses at another institution must obtain the approval of the Associate Dean through their Academic Advisor/Undergraduate Coordinator. Math, science, and engineering courses will not be approved winter term courses. The winter term in question may not overlap with Pitt's fall or spring term.

**Interdepartmental Transfers**

A Swanson School of Engineering student whose academic record satisfies the minimum requirements for continued registration may apply for transfer from one engineering department or program to another. To initiate a program change, the student must complete a Program Change form, available at the Swanson School of Engineering Office of Academic Records. It is the prerogative of the department or program to which the student desires to transfer to approve or reject a program change request, based on academic performance and/or space limitations/availability.

**Reinstatement**

An engineering student in good academic standing who has not attended the University of Pittsburgh for three consecutive terms and has attended no other institution in the intervening period will be considered for reinstatement after making application to the department chair or program director. If the student has attended another institution and completed more than 12 credits, the student must reapply through the University's Office of Admissions and Financial Aid in accordance with the procedure for transfer applicants from other colleges or universities.

A student who has withdrawn while on academic probation may be reinstated only by action of the appropriate faculty committee, typically based upon substantial evidence of a positive change in the student's attitude toward academic work. The student must initiate the request for reinstatement with the appropriate department chair or program director/head.

**Grading Policies**

The following section details the Swanson School of Engineering's regulations regarding some of the grades that may appear on a student's transcript. (For a complete discussion of all grades and grading options, see the Grading and Records section of this bulletin.)

**G Grade (Incomplete)**

An instructor may give the G grade when a student is unable to complete the work of a course during the term because of extenuating personal circumstances. When given a "G" grade, you are usually instructed to complete some clearly defined work (e.g. a final examination paper) within the next term of registration or within the time specified by the instructor (no later than one year after the term or session in which the course was taken). Upon completion of the course work, the instructor of the course will complete a Grade Change Authorization form and send it to the Swanson School of Engineering Office of Administration for processing. A student should not request or be given a "G" grade if, in actuality, the student will need to repeat the course. Once the deadline has passed, the "G" grade will automatically change to "NG" and will no longer appear as "in progress" on a student record. The "NG" grade will remain on the record and the student will be required to re-register for the course if it is needed to fulfill requirements for graduation.

Students may not move forward in a course sequence until G grades in previous classes in the same sequences have been changed to a letter grade, indicating that all work has been completed and the previous course requirements have been satisfied. Students who register for subsequent classes
in a course sequence anticipating completion of the previous course are responsible to drop such classes if a G grade is assigned. Students may only enroll in the next class after outstanding work is completed.

**S/NC Option**

With the exception of undergraduate seminar courses, which are only offered satisfactory/no-credit (S/NC), the S/NC option cannot be used for any course that is used to meet graduation requirements. All other Swanson School of Engineering courses are only offered on a letter grade basis. This restriction includes humanities/social science electives and other science/engineering electives. First-Year Students may not elect to take courses under the S/NC option. Upper-class engineering students may elect to take non-engineering courses that will not be used to meet graduation requirements as S/NC. Because S/NC courses are not considered in the calculation of the grade point average, the option is appropriate for students wishing to explore disciplines they might not otherwise pursue because of potential negative impact on the grade point average.

A student who wishes to take a course under the S/NC option should first consult his/her advisor to assure that the S/NC option is permissible. A student must register for and complete at least one course for a letter grade to be eligible for an S/NC option course in any term. To register for more than one S/NC option course per term, and a maximum of two, a student must register for 12 or more credits for letter grades.

**Calculation of the Grade Point Average**

Each credit carried for a letter grade is awarded quality points as noted under the Grading and Records section of this bulletin. A student's term grade point average (term GPA) is the total quality points earned for the term divided by the total credits assigned letter grades. The cumulative grade point average (cumulative GPA) is determined by dividing the total number of quality points by the total number of credits assigned letter grades. Only credits and quality points for courses taken at the University of Pittsburgh and that count toward the requirement for the BSE degree are used in the calculation of the GPA.

**Repeating Courses**

A Swanson School of Engineering student may wish to repeat a course or may be required to repeat a course to fulfill degree requirements.

- A student may only repeat a course twice.
- A student's third attempt must be approved by the undergraduate coordinator.
- A student who fails to successfully complete a required course after three attempts will be dismissed from the Swanson School of Engineering even if the student's GPA is 2.000 or higher.
- If a student wants to repeat a course in which they earned a C or above, the student must receive permission from their undergraduate coordinator.
- No sequence course may be repeated for credit after a more advanced course in that sequence has been passed with a C or higher grade.

Course repeats must be completed at the University of Pittsburgh unless approved by the undergraduate coordinator.

A grade replacement may be possible in some situations; refer to the Grade Replacement section below for more details.

**Grade Replacement for Repeated Courses**

A grade replacement and GPA recalculation occurs for a Swanson School of Engineering student who repeats a course in which they have earned below a C and repeats the course within one year of the original registration.

- No course may be repeated at any other institution and have that grade accepted as a replacement for the original grade earned at the University of Pittsburgh.
- The original course and grade remain on the transcript and/or the academic record; however, the grade and credits originally earned are not counted in the calculation of the QPA (prior to Fall term 2005) or the GPA. All grades earned when repeating a course will be posted and recalculated into the academic transcript, even if the student earns a lower grade than the prior attempt.
The repeated course does not increase the number of credits counted toward meeting the degree requirements unless an F is replaced by a passing grade.

- W, R, N, or NC grades reported for the repeated course will not be identified as a course repeat, thus the original grade earned will continue to be counted in the QPA (prior to Fall term 2005) or GPA. Incomplete (G or I) grades will not be identified as repeated courses until the course work is completed.
- A sequence course cannot have the grade replaced if a succeeding course in that sequence has been taken (e.g., MATH 0220, 0230, and 0240 Analytic Geometry and Calculus 1, 2, and 3; PHYS 0174 and 0175 Basic Physics for Science and Engineering 1 and 2).
- Course number and title must match for the grade replacement to occur unless an exception has been made by the associate dean for academic affairs. Exceptions should be discussed with your advisor or undergraduate coordinator.
- The same course repeat and grade replacement rules will apply to transfer students from other schools within the University of Pittsburgh and the regional campuses.

**Academic Standing**

Every engineering student's academic record is reviewed at the end of each term to certify whether or not the student is in good academic standing. Students will be notified by letter if they are no longer in good academic standing and are on probation, school probation, suspension, or dismissal.

**Good Standing**

To be considered in good academic standing, a student's cumulative grade point average (GPA) must be at least 2.000, AND the student must be making satisfactory progress toward earning an engineering degree. More information on Satisfactory Academic Progress standards can be found at [https://oafa.pitt.edu/financialaid/satisfactory-academic-progress/](https://oafa.pitt.edu/financialaid/satisfactory-academic-progress/).

**Term Warning**

A student who earns a term GPA less than 2.000 but has a cumulative GPA greater than or equal to 2.000 will receive a warning letter from the Swanson School of Engineering. Academic Warning indicates that the student is potentially subject to probation, suspension, or dismissal if academic performance does not improve. The student is still considered to be in good academic standing. A student may only receive one term warning before the possibility of more serious action. (See Academic Probation and Swanson School Probation, below.)

**Academic Probation**

A student with cumulative GPA below 2.000 is not in good academic standing and will be placed on Academic Probation. A student on probation may be subject to suspension or dismissal if his or her cumulative GPA remains below a 2.000 for two consecutive terms (with the exception of first year students, see Dismissal below).

**Swanson School of Engineering Probation (School Probation)**

Engineering students will be placed on School Probation if:

- The student meets two consecutive semesters at full time status where his/her Term GPA is less than 2.000, but his/her Cumulative GPA is still greater than or equal to 2.000 (see Term Warning, above), or.
- The student fails a course for the second time.

Participation in activities such as the Co-op Program or International Programs is at the discretion of the Associate Dean for Academic Affairs for students on School Probation.

**Suspension and Dimension**
A student on probation may be subject to suspension or dismissal if his or her cumulative GPA remains below a 2.000 for two consecutive terms. The standard for first year engineering students is 1.75; see below. Suspension from the Swanson School of Engineering is a one-year action. Dismissal from the Swanson School of Engineering is a permanent action.

The following are additional points related to Suspension and Dismissal:

- Students in the First Year Engineering Program who enter in the fall term may be suspended or dismissed from the Swanson School of Engineering if they do not attain a cumulative GPA of 1.750 or greater by the end of the Spring Term. First term engineering courses should be completed by the end of the first year. Typical first term engineering courses are MATH 0220, PHYS 0174, CHEM 0960, and ENGR 0011 or their equivalents.
- First year engineering students with cumulative GPAs between 1.750 and 1.999 by the end of their first academic year who fail to obtain a cumulative GPA of 2.000 by the end of their third term are subject to suspension or dismissal. A similar timeline will apply to students who begin the First Year Engineering program in the spring term.
- After being suspended, students are not eligible to re-enroll for one calendar year, after which they are required to apply for reinstatement through the Swanson School of Engineering Office of Administration. Students returning from academic suspension are reinstated on academic probation and their academic performance will be reviewed after each subsequent term. You can take up to twelve credits elsewhere during your suspension, but they will not be transferrable to the Swanson School.
- Students may only repeat a course twice. (See Repeating Courses, above). Any student who fails to successfully complete a required course after three attempts will be dismissed from the Swanson School even if his or her cumulative GPA is 2.000 or higher.
- Students dismissed from the Swanson School of Engineering who wish to enroll at another school or college at the University of Pittsburgh are subject to the admission requirements for that school.

Students should also familiarize themselves with the University of Pittsburgh policy on dismissal, suspension, and academic probation found at https://www.policy.pitt.edu/sites/default/files/Policies/Academic/Policy_AC_01.pdf

Honors Lists

At the end of each term, the academic records of all undergraduate degree students in the Swanson School of Engineering are reviewed to determine eligibility for the Term Honor List and the Dean's Honor List. Students who qualify for both honor lists will appear only on the Dean's Honor List.

Term Honor List

To be eligible for the Term Honor List, a student must

- Earn a GPA of at least 3.250,
- Complete a minimum of 15 credits of academic work for letter grades at the University of Pittsburgh, and
- Complete a minimum of 6 credits of work for letter grades in the term of eligibility.

Dean's Honor List

To be eligible for the Dean's Honor List, a student must

- Earn cumulative and term GPA's of 3.250 or higher,
- Complete a minimum of 30 credits of academic work for letter grades at the University of Pittsburgh, and
- Complete a minimum of 6 credits of work for letter grades in the term of eligibility.
Late Withdrawal Policy

Between the end of the University's stated add/drop period (approximately the third week of the fall and spring terms) until the last day of the monitored withdrawal period (approximately the ninth week of the academic term for fall and spring terms), a student may withdraw from any Swanson School of Engineering course for any reason. The academic dean or designate will approve the course withdrawal (the instructor's approval is not required).

After the end of the monitored withdrawal period, students will only be withdrawn from courses with the permission of the associate dean for academic affairs. Withdrawals will be approved only for documented exceptional reasons including medical or personal incidents that preclude the student from continuing with and/or completing his/her studies. In those cases the student must withdraw from all courses. Withdrawals from a specific course outside the Swanson School of Engineering must be arranged through the dean's office of the unit offering the course. Note that a withdrawal cannot be processed after grades have posted and students should seek withdrawals prior to final exams.

Credits

In the Swanson School of Engineering, a credit or credit hour is one of the following:

- One hour of lecture or recitation a week, requiring two hours of outside preparation
- Two hours of laboratory a week, requiring one hour of outside preparation
- Three hours of laboratory a week, requiring no outside preparation

Registration

Each student registers for future terms with the assistance of his or her academic advisor during registration periods specified by the Office of the University Registrar. A student who has registered for a course but has failed to satisfy the prerequisites for that course prior to the beginning of the term may not be permitted to continue attending class and must withdraw from the course if requested to do so. First Year engineering students register for the fall term during the summer advising sessions. All entering students are required to take the ALEKS Math placement exam before registering for their first Math class at the University of Pittsburgh, regardless of advanced standing credit (AP, IB, transfer credit) or prior ALEKS experience.

Maximum Credit Registration

All full-time undergraduate engineering students are expected to register for a normal full term of academic courses (i.e., at least 12 credits). No student shall be allowed to register for more than 18 credits without specific written permission from his/her academic advisor and approval by the Associate Dean for Academic Affairs. Such permission is given only after a review of the student's academic record in order to verify that an overload is academically justifiable. All credits above 18 for undergraduates will be billed over and above the full-time tuition rate at the prevailing per-credit tuition charge.

Registration for Graduate Credit

A Swanson School of Engineering undergraduate student requiring fewer than 15 credits to complete the requirements for the baccalaureate degree and who intends to continue study toward an advanced degree may be permitted during their final term to register for graduate courses that will later apply toward a graduate degree. The student must obtain written permission from the school of proposed graduate study that the courses may count when and if the student is admitted into the graduate program. Although these credits will appear on the undergraduate transcript, they will not count toward fulfilling undergraduate degree requirements. They will be posted as advanced standing credits on the graduate record.

Statute of Limitations
All required academic work for the Bachelor of Science in Engineering degree, including courses for which advanced-standing credit has been granted, must be completed within 12 consecutive calendar years. Under unusual circumstances, a student may, with the approval of the department or program chair, request a waiver of this policy. This policy means that part-time students must progress toward the degree at a minimum rate of 12 credits per calendar year.

Graduation Requirements

In order to graduate with a BSE, a student must have satisfactorily completed all degree requirements and earned the total number of credits required by the department or program in which the student is enrolled. The student must also have obtained a minimum GPA of 2.000 for (a) all required courses completed at the University of Pittsburgh and (b) all program courses.

The work of the senior year (a minimum of 24 credits) should be completed while in residence at the Swanson School of Engineering. Exceptions will be granted for students to take a limited number of credits needed to complete their degree, or through participation in an approved study abroad program. Such requests must be approved in advance by the appropriate undergraduate coordinator, chair or Associate Dean for Academic Affairs.

(See the Graduation section of this catalog for further information on graduation requirements and procedures.)

Academic Integrity and Code of Conduct

The integrity of the academic process requires fair and impartial evaluation on the part of faculty and honest academic conduct on the part of students. Students are expected to conduct themselves with a high level of responsibility in the fulfillment of their course of study and their conduct in and out of the classroom. Violations of the Academic Integrity Policy can impact a student's grade or status with the University as some serious or subsequent violations could lead to suspension or dismissal. Academic Integrity violations can also affect a student's eligibility for scholarships and holding leadership positions in student organizations. A lack of response by the student will result in a blank grade given in the course until the matter is resolved. Further, a student may not drop or withdraw from a course with a pending academic integrity allegation nor after a positive finding, including during the add/drop or monitored withdrawal periods. A hold will be placed on the student's account until the AI allegation is resolved or the monitored withdrawal period has ended. It is the corresponding responsibility of faculty to make clear to students those standards by which they will be evaluated and the resources permissible for use by students during their course of study. The educational process is perceived as a joint faculty-student enterprise that will involve professional judgment by faculty and may involve, without penalty, reasoned exception by students to the data or views offered by faculty. Consistent with these considerations (and without limiting their scope and application in their entirety to the academic programs of the University), faculty and students are directed to observe established University of Pittsburgh and Swanson School of Engineering guidelines on academic integrity and the University Code of Conduct. The Swanson School of Engineering and the University of Pittsburgh Guidelines on Academic Integrity are available to faculty and students at: https://www.engineering.pitt.edu/Academic-Integrity-Guidelines/. The University's student Code of Conduct is available at: https://www.studentaffairs.pitt.edu/wp-content/uploads/2017/08/Code-of-Conduct_10-1-2020.pdf.

Assessment

As part of the Swanson School of Engineering's commitment to student learning and academic achievement, effective teaching, and continuous improvement of our programs, we regularly conduct outcomes assessment activities. To obtain periodic measurements of student perceptions and intellectual growth, students will be expected to participate in surveys, focus groups, interviews, and related activities. While individual input is collected, the data resulting from these assessments will be published only in aggregate form.

Advising

First Year Engineering Student Advising:

All students are assigned an advisor and are expected to meet with their advisor prior to registration. The First Year Engineering Program's professional staff serves as first year advisors. Throughout the freshman year, students are encouraged to meet with their advisor if they need to register for classes, withdraw from classes, add and/or drop classes, seek out resources, find out about their academic progress, discuss problems they are having in a course, or get help deciding on a program. First Year Students are also assigned an Engineering Peer Mentor, who co-facilitates
ENGR 0081 - Freshman Engineering Seminar with a professional staff advisor. First-Year Engineering students admitted to the Honors College will be assigned both an SSOE Academic Advisor and a Scholar Mentor in the Honors College.

Continuing Undeclared Engineering Students will be advised by staff in the First-Year Engineering program (in collaboration with the Engineering programs) until they are department-ready. Students are considered Continuing Undeclared Engineering Students if they meet any of the following criteria:

- have yet to successfully complete more than one First-Year Engineering course
- have a cumulative GPA below 2.000
- have a grade of C- or lower in MATH 0230 (Calculus 2)
- have yet to successfully complete a critical class for their intended major, as follows:
  - Chemical Engineering: CHEM 0970 or CHEM 0120
  - Electrical and Computer Engineering: PHYS 0175

Students are expected to make progress toward completion of First-Year Engineering Program requirements within the first year of enrollment. Students who are unable to declare their major due to incomplete First-Year Program Requirements at the end of the first year have one additional year to complete these requirements and may be limited or restricted from taking departmental classes until first-year requirements are finished. Students should consult with their academic advisor on the most efficient academic path toward First-Year Program completion. Review of a student's academic progress will be made if first-year requirements are not completed by the end of the second year of enrollment.

Transfer Student Advising:

Incoming transfer students are directly admitted into their upper-level engineering program and will have a declared major, unless otherwise noted on their admission letter. For academic advisement, transfer students will be assigned an engineering faculty advisor by their department, which will be found in the student PeopleSoft Student Service. Undergraduate Coordinators/Directors and the Office of Transfer Student Services are also available as support resources during their academic career.

Upperclassmen Engineering Advising:

Undergraduate engineering students who have declared their major and entered an engineering department are assigned a faculty advisor upon entering their department. Undergraduate Coordinators/Directors are also available as faculty resources to undergraduate engineering students in their major. Students may consult their PeopleSoft Student Service Center to see the name of their Academic Advisor.

General Degree Requirements

The degree requirements are established by the individual departments and programs. Depending on the program, between 126 to 135 credits may be required for the individual degree. Each program's requirements include the common freshman year, a mathematics sequence (four or five courses depending on the program), and six approved humanities and social science electives (including the W-course requirement). The specific degree requirements are found in the program descriptions below.

Humanities and Social Science Requirement

An important part of the undergraduate engineering student's education is the humanities and social science component. All Swanson School of Engineering undergraduates must complete at least six humanities and social science elective courses from the school's approved list of Dietrich School of Arts and Sciences (A&S) courses, while meeting the school and ABET requirements for breadth and depth. To meet the depth requirement, a student must complete two or more courses in the same area of study only one of which can be considered an introductory course from the Dietrich School. The depth requirement can also be satisfied by taking two or more courses with a related theme, e.g., courses that focus on a geographic region, historic period, or ideological perspective. For the breadth requirements, it is recommended that the courses include approved offerings from at least three different humanities and social science departments from the Dietrich School of Arts and Sciences. Students may use one study abroad course that might not otherwise be counted toward satisfying this requirement.

No more than two of the required six elective courses can be satisfied via high school Advanced Placement, International Baccalaureate, and/or GCE-A-Level credits.
Students must also complete one Writing Intensive W-designated course; i.e., a course that has a substantial writing component that has been so designated by the Dietrich School of Arts and Sciences (A&S). Depending on the course, it may also count as one of the humanities/social science electives. The Associate Dean for Academic Affairs maintains a list of approved humanities and social science electives. Students are not permitted to use College of General Studies courses including those indicated as either hybrid, self-paced, or online web courses.

Additional information about the Humanities and Social Sciences electives can be found here: Approved Humanities/Social Science Electives and Requirements.

**Writing-Designated Course (W Course) Requirement**

Engineering students must demonstrate an ability to communicate effectively. This includes both written and oral communication and the ability to make professional presentations. Upon admission, some students demonstrating writing deficiencies may be required to take at least one English Composition Course during their first year that will not count toward the Swanson School of Engineering graduation requirements.

All students must take at least one W course as part of their humanities/social science requirements. Students may also satisfy the W requirement by taking a math or science course with a writing component. In addition, each engineering program has substantial communications components throughout the curriculum. Some programs require a specific course in communications. It is important to refer to each program's graduation requirements to identify requisite communication courses.

For students planning on a dual degree from the Swanson School of Engineering and a Dietrich School major, the University of Pittsburgh Composition Program has agreed that the Dietrich School of Arts and Sciences composition requirement is satisfied by ENGCMP 0210.

Writing intensive courses may not be transferred in from another institution.

**Online Courses**

Undergraduate engineering students may take one humanities/social science and one engineering, engineering science, math or science course online subject to the following conditions:

- Student must present a valid reason for taking the course.
- The course must be from a four-year college or university that is accredited by Middle States Association of Colleges and Schools (or equivalent if outside the region).
- In addition, an engineering or engineering science course must be from an ABET accredited program.
- The humanities/social science courses must be from the arts and science unit of the institution and not from a continuing education, or general studies unit. The course must be taught in English.
- The course must be first approved by the undergraduate coordinator and then by the Associate Dean for Academic Affairs.

**Major and Degree Options**

The following majors (described in the Program Descriptions section) within the Swanson School of Engineering offers the Bachelor of Science in Engineering:

- Bioengineering
- Chemical engineering
- Civil engineering (administered through the Department of Civil and Environmental Engineering)
- Computer engineering (administered through the Department of Electrical and Computer Engineering and the Department of Computer Science, A&S)
- Electrical engineering (administered through the Department of Electrical and Computer Engineering)
- Engineering Science (administered through the Department of Mechanical Engineering and Materials Science)
- Environmental Engineering (administered through the Department of Civil Engineering)
- Industrial engineering
• Materials science and engineering (administered through the Department of Mechanical Engineering and Materials Science)
• Mechanical engineering (administered through the Department of Mechanical Engineering and Materials Science)

Minors in Engineering

The Swanson School of Engineering offers a number of minors to its students who wish to expand their field of knowledge in engineering. Engineering students may also pursue a minor from a Dietrich School of Arts and Sciences program (see A&S section of this bulletin for details on the minors offered within A&S). Engineering students are not permitted to minor in the same field in which they are majoring. Students from outside the Swanson School of Engineering may pursue one of these minors with the permission of the administering program. Any student interested in a minor should consult with the given department to determine the eligibility and completion requirements for each minor. The minors offered by the school are as follows:

• Bioengineering
• Chemical engineering
• Civil engineering
• Computer Engineering
• Electrical engineering
• Environmental engineering
• Industrial engineering
• Materials science and engineering
• Mechanical engineering
• Petroleum engineering
• Polymer engineering

Certificates Programs

Swanson School of Engineering undergraduate students are encouraged to broaden their educational experience by electing to take one of the certificate programs currently offered by Arts and Sciences, the University Center for International Studies (UCIS), or the Swanson School of Engineering. These certificate programs may be used by the engineering student to partially fulfill the humanities/social sciences requirement, thereby allowing specialization in an area of interest while pursuing an engineering degree. The requirements for each certificate vary, and students should contact the appropriate certificate program director.

The Swanson School of Engineering offers a number certificates at the undergraduate level:

• Engineering for Humanity Certificate
• Engineering Simulation in Design Certificate
• Health Systems Engineering Certificate
• Innovation, Product Design, and Entrepreneurship Certificate
• International Engineering Studies Certificate
• Nuclear Engineering Certificate
• Supply Chain Management Certificate
• Sustainability

In addition to certificates offered by the Swanson School of Engineering, additional certificates are available from or in conjunction with other schools within the University, such as the following:

• Nanoscience and Engineering Undergraduate Certificate
Special Academic Opportunities/Programs

The Swanson School of Engineering offers numerous special academic opportunities as detailed in the following pages:

Reserve Officers Training Corps (ROTC)

Academic programs within the Swanson School of Engineering may give credit to students enrolled in Reserve Officers Training Corps (ROTC). This credit may be given in one of the following ways:

- Upon commissioning, some departments will award one technical elective for the student's entire ROTC coursework and training; or
- Some programs may review the specific courses and course objectives for individual ROTC courses to see if the individual course or courses may be counted toward program requirements.

Students enrolled in the ROTC program should meet with the undergraduate coordinator for review of how the ROTC program and courses may be counted for a specific major. Students are encouraged to participate in ROTC if this is of interest to them. With this in mind, the Swanson School of Engineering is lenient with those in the Navy program who must travel to Carnegie Mellon University for coursework and typically are permitted to take over 18 credits per term to satisfy the ROTC requirements.

Arts and Sciences-Engineering Dual Degree Program

The Dietrich School of Arts and Sciences (A&S) and the Swanson School of Engineering have developed an undergraduate dual degree program that permits a student to combine a major in arts and sciences with a program in engineering and then receive degrees from both A&S and the Swanson School of Engineering. A student can apply for admission into this program through either A&S or the Swanson School of Engineering and must be admitted into both schools.

While the form of the program is dependent upon the individual student's interests, the first year's curriculum is typically the standard engineering program. During the next three years the student may complete the specific requirements for his or her engineering degree while fulfilling certain A&S major and general education requirements. Typically, the fifth year is then used to complete the A&S requirements. Students must complete a minimum of 90 A&S credits, including all A&S skills and general education requirements and an A&S major (but not a related area). Students must also complete all the degree requirements of their chosen engineering program, usually consisting of 70 or more Swanson School of Engineering credits. Each program should be developed with an advisor in the Dietrich School of Arts and Sciences and an advisor in the Swanson School of Engineering and tailored to the student's special interests. Students in this program have combined engineering with neuroscience, philosophy, economics, music, and a number of the language programs.

Students must satisfy both schools' normal progress requirements and criteria for academic standing as long as they remain in the joint degree program. Students also must apply for graduation from both schools. A&S students earn either a BA or BS degree, depending upon the A&S program of study. The student's GPA for graduation from A&S is calculated based solely upon the credits earned for the A&S degree. For further information, students may contact one of the following: the First Year Engineering Program Office, 152 Benedum Hall; an engineering departmental undergraduate coordinator; the A&S Office, 140 Thackeray Hall; the A&S Advising Center, 252 Thackeray Hall; or the University Honors College engineering advisor, 3600 Cathedral of Learning.

University Honors College Opportunities

Students admitted to the University Honors College (Pitt Honors) and students interested in participating in honors courses have the opportunity to participate in several unique programs. Students admitted to Pitt Honors may elect to pursue the Bachelor of Philosophy degree or the Honors Joint degree in addition to their engineering Bachelor of Science degree. Students who have not been admitted to Pitt Honors prior to the first year may apply for degree candidacy in the University Honors College (UHC) after completing their first year at Pitt. Students admitted to the Honors College will be assigned an Academic Advisor in the Swanson School and also a Scholar Mentor in the Honors College.

Students interested in taking honors courses but who do not wish to pursue the honors degree options may instead choose to challenge themselves in and out of the classroom by electing to pursue Honors Distinction, which involves both honors coursework and participation in the Honors Outside the Classroom Curriculum (OCC). Students interested in the Honors College should contact the Honors College: 3500 Cathedral of Learning, University of Pittsburgh, Pittsburgh, PA 15260, or call 412-624-6880. (See the University Honors College section of this bulletin.)
Architecture Design Minor (Offered by History of Art and Architecture in the Dietrich School of Arts and Sciences)

Those working in many aspects of Civil Engineering, particularly in structural engineering and other building sciences, work intimately with architects. The Minor in Architecture - Design provides an opportunity for students to obtain experience and understanding of various aspects of the architecture profession. Students engage in two studio courses (ARC 0201 and ARC 1201), ARC 0110 - APPROACHES TO THE BUILT ENVIRONMENT, and at least one additional ARC or HAA elective. The requirements of the Minor are used to partially satisfy SSOE humanities requirements and ARC 1201 satisfies one 3 credit CEE elective requirement. Due to the nature of the Architecture - Design Minor, students must generally begin in their first or sophomore years. This Minor is administered through the History of Art and Architecture Department (HAA). For more information visit Department of History of Art and Architecture. However, SSOE students wishing to pursue this Minor are advised to contact Dr. Kent Harries in CEE before applying. Dr. Harries is located in 218B Benedum Hall, email: kharries@pitt.edu.

Cooperative Engineering Education Program

The school's Cooperative Engineering Education Program enhances the student engineer's educational experience through a series of challenging, highly relevant "real world" work sessions. This is accomplished by integrating rotations of school and employment terms that enables the cooperative education student to complement his or her formal classroom training with additional technical knowledge, hands-on experience, and financial remuneration. The co-op graduate possesses the maturity and assurance of a more seasoned employee and the ability to incorporate academic knowledge and theory into practice. During co-op sessions, students earn competitive salaries, which also makes the program financially rewarding.

Through the assistance of the Swanson School of Engineering's Cooperative Education program, formal arrangements are established with industry that permit students to participate in six-month rotations alternating work experience with coursework. At the University of Pittsburgh, this rotation begins primarily during their sophomore year, with the second six-month rotation happening Junior/Senior year. Students working longer at an employer can experience increased job duties as the knowledge and skills of the student engineer progress. The positions can be local, national, or international. This practical work experience has also been found to increase academic motivation and classroom performance.

Rotations can run a Spring/Summer (January-June) or a Summer/Fall (July-December). Students can opt to stay with the same employer, or switch to a different company or industry for their second six-month rotation. Co-op students become aware of business practice and etiquette and possess a mature, responsible attitude. Thus, upon graduation, students who have successfully completed the co-op program are able to handle more challenging initial assignments with confidence and assurance. A high percentage of co-op students also obtain and accept full-time offers from their co-op employers.

Keep in mind that students while on co-op rotations are unable to simultaneously hold employment positions as student workers or federal work study positions during that timeframe. Students earn transcript certification and a total of 3 credits towards departmental graduation requirements upon satisfactory completion of the program requirements. The Co-op program offers resume preparation, interviewing skills, workshops, and job fairs in order to facilitate appropriate placements for students.

Engineering International Programs

As the world around us grows ever more connected, it is evident that engineering students must be prepared to engage in an increasingly globalized world, and, upon graduation, to compete in an international job market. Accordingly, the Swanson School of Engineering has placed a strong emphasis on the development of exciting and academically enriching international programs for its students.
All students in SSOE are encouraged to add a global dimension to their education by pursuing one or more international programs as part of their academic study. At present, SSOE students may elect to participate in study, research, co-op, internship, or service learning abroad. Most of these opportunities are offered on a for-credit basis, and many can be used to satisfy major, minor, technical elective, or other degree requirements. Foreign language study is helpful, but not required, as many courses are on offer in English. Depending on their academic and personal interests, students may elect to participate in dozens of individual international programs. Some of these may last for only a week or two, either during spring break or over the summer term. Others may involve a commitment of a semester or even an entire academic year abroad. Depending on the type of study abroad program, there may be a minimum GPA requirement.

The Swanson Signature Study Abroad Programs are short term opportunities that focus on a relevant engineering topic in detail over the course of 10 to 14 days, to up to five weeks. Recently, Swanson Signature programs have occurred in Sweden, Denmark, Uruguay, Italy, Jamaica, and Germany, studying such diverse topics as renewable energy and sustainability, island nation risk, and global supply networks. Plus3 is another innovative short term program designed for first year SSOE students, and which has gone to such locations as Italy, Germany, Costa Rica, China, Vietnam, and Korea. Meanwhile, students who wish to invest in longer term language or cultural study may decide to participate in an exchange program. This affords them the opportunity to study engineering, social sciences or humanities at a foreign college or university for one or two consecutive academic terms, and for little more than the cost of a regular term in Pittsburgh. Finally, scholarships and other funding opportunities are also available, and financial aid administered by the University of Pittsburgh may apply.

There is a Global Distinction offered to University of Pittsburgh students that formally recognizes broad and meaningful engagement in global learning. The Swanson School of Engineering encourages its students to explore the requirements to obtain this distinction as a complement to their degree program.

Current and prospective SSOE students and their parents are welcome to contact the Office of Engineering International Programs for more information:

University of Pittsburgh
Swanson School of Engineering
Office of Engineering International Programs

Articulation Agreements

The Swanson School of Engineering has developed combined liberal arts/engineering articulation agreements with a number of accredited liberal arts colleges. In these programs, students first complete a three-year structured course of study at the liberal arts college, including that college's general education requirements, specific introductory courses required for the engineering program of interest, and other courses necessary for acceptance into a Swanson School of Engineering program. With the recommendation of the faculty advisor at the liberal arts college, the student applies for transfer to the University of Pittsburgh, Swanson School of Engineering, spending the final two or more years in an engineering program.

Swanson School of Engineering-Diversity Initiatives

The Engineering Office of Diversity exists to create and sustain learning and working environments where differences and similarities are valued and respected, and all students, especially underrepresented students, are included and empowered to excel in engineering education. The office provides
Diversity Programs

The Swanson School of Engineering pre-college and undergraduate diversity programs develop and implement activities that promote and support the academic excellence of high achieving pre-college and undergraduate students from groups historically underrepresented in science, technology, engineering and mathematics (STEM) fields. These initiatives provide a continuous pipeline for students to prepare for, enter and graduate from the University of Pittsburgh as STEM majors.

Pitt EXCEL Program

The Pitt EXCEL Program is a comprehensive undergraduate diversity program committed to the recruitment, retention, development, and graduation of historically underrepresented engineering scholars. Pitt EXCEL scholars strive to advance in the areas of scholarship, professionalism, graduate endeavors, and community engagement. In addition, Pitt EXCEL scholars have access to academic counseling, peer mentoring for first year and upperclassmen scholars, year specific seminars, tutoring, engineering research, graduate school preparation and professional development workshops. Lastly, first year Pitt EXCEL scholars are eligible to participate in our two-week intensive study skills, math and science summer bridge program.

The vision of the Pitt EXCEL Program:

1. Achieve 100% placement in each Pitt EXCEL scholar's desired engineering field of pursuit, inclusive of graduate school, industry, and medical school.

2. Establishing lifelong connections with fellow undergraduate scholars, staff, faculty, alumni, and industry relations.

3. Producing the highest achieving scholars that rank in the top 20% in all engineering disciplines within the Swanson School of Engineering.

Global Engineering Preparedness Scholarship (GEPS) Programs

Educating Engineers in Cultural and Societal Contexts

Thanks to a grant from the National Science Foundation, the University of Pittsburgh Swanson School of Engineering and its Office of Diversity (EOD) have established the Global Engineering Preparedness Scholarship program (GEPS). GEPS helps to support the recruitment, retention and graduation of low-income students from underrepresented minorities and majority populations. GEPS also prepares students for the global marketplace by offering international opportunities that students would not normally be able to participate without additional supporting funds.

Because the engineering career of the 21st century is more globally competitive than ever, GEPS also provides an integrative framework that focuses on access, continuous academic support, development of global competency and leadership experience. International experience is now an integral part of engineering education, and highly sought after by employers across all engineering disciplines. GEPS Scholars will have access to Pitt's exceptional education abroad programs to experience international skills sought by the engineering profession.
All GEPS Scholars who complete the second year of the program with GPA of 3.000 and above are eligible for the GEPS International Study Abroad Scholarship.

For additional information, please contact:

University of Pittsburgh
Swanson School of Engineering
Engineering Office of Diversity
128 Benedum Hall
3700 O'Hara Street
Pittsburgh, PA 15261
eodadmin@pitt.edu

PITT STRIVE Program

The University of Pittsburgh Swanson School of Engineering PITT STRIVE Program (formerly known as the AGEP-TDAE). STRIVE stands for Success, Transition, Representation, Innovation, Vision, and Education. Thanks to a grant from the National Science Foundation, the University of Pittsburgh Swanson School of Engineering and its Office of Diversity (EOD) have established the PITT STRIVE Program to improve the transitions of Underrepresented Minorities (URM), who are US citizens, into doctoral engineering programs at the University of Pittsburgh and to ensure their successful completion by employing evidence-based strategies for student and faculty engagement and fostering an inclusive academic climate for URM doctoral students.

Scholarship Eligibility

PITT STRIVE Scholars will be recruited from members of underrepresented minority group (Black/African American, American Indian, Hispanic/Latino, Alaska Native, and Native Hawaiian or Pacific Islander) meeting US citizenship or permanent residency requirements with an undergraduate GPA of 3.3/4.0.

Other SSOE Diversity Initiatives:

First Year Diversity Workshop

Freshman Diversity Workshop is considered mandatory for all First Year engineering students. It provides the attendees with diversity awareness skills and explains the broad meaning of diversity and what it contributes to the personal, professional, and social improvement.

Diversity Professional Development Workshops

During Fall and Spring semesters, the Engineering Office of Diversity and PITT STRIVE program organize a series of workshops that allow the campus community to meet the leading experts in diversity-related issues and initiatives. The Engineering Office of Diversity and PITT STRIVE program also organize seminars and workshops dedicated to such nationally recognized celebrations as Hispanic Heritage Month, Black History Month, Women History Months, etc.

For additional information, please contact:

http://www.engineering.pitt.edu/diversity/

Office of Retention
The Office of Retention provides academic support programs for Swanson School of Engineering students who want to achieve and maintain academic excellence towards graduation. Students who work with the director and consistently participate in programming improve academic performance as they learn about study skills, the learning process, how to study difficult material, forming study groups, test anxiety and test taking strategies, managing distractions, growth mindset, grit, discipline, organization, productivity, and time management. Peer mentoring, academic coaching and study skills workshops are available.

Swanson School of Engineering Faculty

School of Engineering Faculty

Program and Course Offerings

Students enter one of the specific engineering major programs below at the sophomore level after successfully completing the First-Year Student Engineering Program.

Degree Programs in BS in Engineering

Bioengineering  
Chemical Engineering  
Civil Engineering  
Computer Engineering  
Electrical Engineering  
Engineering Science  
Environmental Engineering  
Industrial Engineering  
Materials Science and Engineering  
 Mechanical Engineering

Certificate Programs

Engineering for Humanity Certificate  
Engineering Simulation in Design Certificate  
Health Systems Engineering Certificate  
Innovation, Product Design, and Entrepreneurship Certificate  
International Engineering Studies Certificate  
Nuclear Engineering Certificate  
Supply Chain Management Certificate  
Sustainability Certificate

Programs
Nanoscience and Engineering Undergraduate Certificate

Advances in nanoscience and nanotechnology (the ability to predict, create, and design with nanoscale materials and systems) are expected to reveal new physical phenomena and to enable the creation of highly desirable products and devices, in addition to revolutionary changes in industrial practice. Strength in nanoscience and nanotechnology has been identified as the nation's future competitiveness and prosperity, and strategic plans have been developed to accelerate nanoscience research and development, encourage knowledge transfer to spur economic growth, and expand educational programs and workforce training - all in a socially and environmentally responsible and sustainable manner.

Nanoscience and nanotechnology also has had a large and rapidly growing local impact. The Pittsburgh region is home to a number of corporations, including many smaller start-up companies, with major nanotechnology components to their businesses. The continued success of companies such as PPG, Seagate, Bayer, Alcoa, Plextronics, Westinghouse, Betts, and II-VI will depend on their ability to recruit local engineering talent with the required background in nanoscience and nanotechnology. The continued development of nanotechnology-based entrepreneurial start-ups will depend in large part on a vibrant pool of young engineers and scientists with appropriate educational experience in nanoscience and nanotechnology.

This joint certificate, housed in both the Swanson School of Engineering (SSOE) and the Dietrich School of Arts and Sciences (Dietrich School) enables BS students from both schools to complement their education by completing a fivecourse sequence. The certificate is designed to be combined with coursework in any SSOE degree-granting program, or with chemistry and physics in the Dietrich School.

The course requirements for this certificate follow.

Required courses

This course has prerequisites.

- ENGR 0240 - NANOTECHNOLOGY AND NANO-ENGINEERING

One of the following courses

These courses have prerequisites.

- PHYS 1375 - FOUNDATIONS OF NANOSCIENCE

One of the following courses

- PHYS 1903 - DIRECTED RESEARCH

Two elective courses from the following list

- CHEM 1600 - SYNTHESIS & CHARCTRZTN POLYMERS
- CHEM 1620 - ATOMS, MOLECULES AND MATERIALS
• ECE 0257 - ANALYSIS AND DESIGN OF ELECTRONIC CIRCUITS
• ECE 1247 - SEMICONDUCTOR DEVICE THEORY
• ECE 2295 - SPECIAL TOPICS: ELECTRONICS
• ENGR 0241 - FABRICATION AND DESIGN IN NANOTECHNOLOGY

• IE 1012 - MANUFACTURE OF STRUCTURAL NANOMATERIALS
• IE 2012 - MANUFACTURE OF STRUCTURAL NANOMATERIALS

• MEMS 1057 - MICRO/NANO MANUFACTURING

• PHYS 1361 - WAVE MOTION AND OPTICS
• PHYS 1374 - SOLID STATE PHYSICS

One of the following courses

• CHEM 1410 - PHYSICAL CHEMISTRY 1
• CHEM 1420 - PHYSICAL CHEMISTRY 2
• CHEM 1480 - INTERMEDIATE PHYSICAL CHEMISTRY

One of the following courses

• PHYS 1370 - INTRODUCTION TO QUANTUM MECHANICS 1
• PHYS 1371 - INTRODUCTION TO QUANTUM MECHANICS 2

Additional information and requirements

• No more than six credits of coursework may overlap between the requirements for this certificate and a major in Physics and Astronomy or in Chemistry.
• A minimum GPA of 2.0 is required in each course that counts toward the certificate.
• No course that counts toward this certificate may be taken on an S/NC basis.
• For more information about this certificate, Dietrich School students should contact the departmental advisor in Physics and Astronomy.

Department of Bioengineering

Bioengineering is an ABET-accredited undergraduate degree program that combines education in engineering and biological sciences, forming a unique experience to prepare students for today's technical challenges in medicine and biology. Our focus is on developing engineers who can apply an analytic approach to solving problems in living systems. Thus, we provide students with a comprehensive education in both engineering and the life sciences.

Research Areas

Undergraduates are required to participate in research with a faculty mentor. In addition to our primary faculty, our strong connections with the Schools of Medicine, Dental Medicine, and Health and Rehabilitation Sciences provide multiple opportunities for students to engage in research in such areas as:

Cellular Engineering
Our unique laboratory, clinical, and research experiences beyond the classroom are opportunities that few, if any, universities can match.

What Can you Do with a Bioengineering Degree

Graduates of our Bioengineering Program are prepared to obtain employment in industry (about 60%), seek further graduate education (M.S./Ph.D., about 20%), and pursue a career as a health science practitioner (M.D./D.O./P.A./M.P.H., about 20%). Those going to industry have many roles, such as: design of instruments and devices used in healthcare; development of diagnostic tools; assess technology for regulatory compliance with FDA requirements; training clinicians in the use of biomedical technology; research new approaches to providing healthcare; prepare and document procedures and reports; and make recommendation to senior management. Advanced graduate education training can lead to more responsible roles in industry or academic positions in teaching, research, and development. Medical practitioners draw upon skills developed as a bioengineer to help diagnose medical problems and identify new approaches to medical technology.

Curriculum and Electives

The Bioengineering Program undergraduate curriculum requires 29 courses that provide a broad background in mathematics, physics, chemistry, biology, and bioengineering, plus 13 electives. Five of the electives are drawn from a large selection in the Humanities and Social Sciences. The remaining eight electives are selected to meet requirements of one of four tracks (Bioimaging and Signals, Biomechanics, Cellular Engineering, Medical Product Engineering) that provide in depth experience in an area of the student's choice. The curriculum is designed to provide the breadth and depth required for ABET accreditation and to be a competitive engineer in the global marketplace. The curriculum has also been designed to allow students interested in "pre-med" to satisfy medical school requirements within the requirements of any track.

Cooperative Education and International Experience

The Department of Bioengineering encourages all students to enhance the value of their degree through participation in the Cooperative Education (co-op) and International Studies programs offered by the Swanson School of Engineering. Co-op provides students with semester rotations between college and full-time work assignments with corporate partners that relate directly to bioengineering. An international experience offers a global perspective and cross-cultural awareness of engineering practice that enhances post-graduate opportunities.

Major

Bioengineering

Bioengineering
The undergraduate program in Bioengineering combines education in engineering and biological sciences, forming a unique experience to prepare students for today's technical challenges in medicine and biology. Our focus is on developing engineers who can apply an analytic approach to solving problems in living systems. Thus, we provide students with a comprehensive education in both engineering and the life sciences. Students enrolled in the program will be prepared for continued graduate studies or a career in a bioengineering-related industry. The program also provides a solid undergraduate education for further studies in a school of medicine. The bioengineering program is accredited by the Engineering Accreditation Commission of ABET (http://www.abet.org).

In keeping with the two-fold mission of the Department of Bioengineering to

- provide a high quality engineering education to both undergraduate and graduate students; and
- be a leader in research in specific areas encompassed by Bioengineering,

the Bioengineering undergraduate curriculum objective is to prepare students to achieve their post-baccalaureate goal of:

- an industrial career in bioengineering or related field;
- graduate school (MS and PhD programs related to bioengineering); or
- professional school (Medical, Dental, Health Related, Business, and Law).

To achieve the objective, students are:

- provided both a broad knowledge of the technical and social principles of bioengineering as well as a focused education in one track area within bioengineering, and
- prepared through educational experiences beyond the classroom that deepen their understanding of the technical and non-technical issues in bioengineering, process and design.

Bioengineering Undergraduate Curriculum

Sophomore Year

Third Term

- BIOENG 1085 - INTRO TO BIOENGINEERING: SEMINAR
- BIOENG 1070 - INTRODUCTORY CELL BIOLOGY 1
- BIOSC 0057 - FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 1
- ENGR 0135 - STATICS & MECHC OF MATERIALS 1
- MATH 0240 - ANALYTIC GEOMETRY AND CALCULUS 3
- MATH 0290 - DIFFERENTIAL EQUATIONS
- Track Elective

Credits: 17

Fourth Term

- BIOENG 1085 - INTRO TO BIOENGINEERING: SEMINAR
- BIOENG 1071 - INTRODUCTION TO CELL BIOLOGY 2
- BIOENG 1210 - BIOENGINEERING THERMODYNAMICS
- BIOENG 1310 - LINEAR SYSTEMS AND ELECTRONICS 1
- BIOENG 1630 - BIOMECHANICS 1-MECHANICAL PRINCIPLES BIOLOGICAL SYSTEMS
- BIOENG 1000 - STATISTICS FOR BIOENGINEERING

Credits: 16

Junior Year
Fifth Term

- BIOENG 1085 - INTRO TO BIOENGINEERING: SEMINAR
- BIOENG 1002 - INTRAMURAL INTERNSHIP
- BIOENG 1220 - BIOTRANSPORT PHENOMENA
- BIOENG 1320 - BIOLOGICAL SIGNALS AND SYSTEMS
- BIOSC 1250 - HUMAN PHYSIOLOGY
- MATH 0280 - INTRO TO MATRICES & LINEAR ALG
- BIOENG 1241 - SOCIETAL, POLITICAL AND ETHICAL ISSUES IN BIOENGINEERING

Credits: 18

Sixth Term

- BIOENG 1085 - INTRO TO BIOENGINEERING: SEMINAR
- BIOENG 1150 - BIOENGINEERING METHODS AND APPLICATIONS
- Biosignals Application or Track Elective
- Imaging Elective or Track Elective
- Track Elective
- Humanities/Social Science Elective

Credits: 16

Senior Year

Seventh Term

- BIOENG 1085 - INTRO TO BIOENGINEERING: SEMINAR
- BIOENG 1160 - BIOENGINEERING DESIGN 1
- Biosignals Application or Track Elective
- Imaging Elective or Track Elective
- Advanced Engineering/Science/Technical Elective
- Humanities/Social Science Elective

Credits: 15

Eighth Term

- BIOENG 1085 - INTRO TO BIOENGINEERING: SEMINAR
- BIOENG 1161 - BIOENGINEERING DESIGN 2
- Biosignals Application or Track Elective
- Imaging Elective or Track Elective
- Advanced Engineering/Science/Technical Elective
- Humanities/Social Science Elective

Credits: 15

Minor
Bioengineering Minor

Undergraduates in other departments can obtain a Minor in Bioengineering by satisfactorily completing (grade of C or better) one BioE seminar and five courses for a total of 16 credits. Students interested in a Bioengineering Minor are required to submit a completed BioE Minor Checklist to the Bioengineering Undergraduate Administrator for course approvals prior to enrolling in BIOENG courses in order to ensure that the requirements for the minor are fulfilled. Approval to use substitute courses to meet minor requirements must be obtained in advance from the Bioengineering Undergraduate Coordinator.

Requirements for the Bioengineering Minor are:

Bioengineering Seminar - 0 Credits

- BIOENG 1086 - BIOENGINEERING SEM FOR MINORS (Register for and attend a minimum of 6 seminar presentations)

Basic Life Science Course - 3 Credits

Acceptable course options include (others may be used with permission)

- BIOSC 1000 - BIOCHEMISTRY
- BIOENG 1070 - INTRODUCTORY CELL BIOLOGY 1
- BIOENG 1071 - INTRODUCTION TO CELL BIOLOGY 2
- BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1
- BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2
- BIOSC 1250 - HUMAN PHYSIOLOGY
- BIOSC 1810 - MACROMOLECULAR STRUCTURE AND FUNCTION
- CHE 1530 - BIOCHEMISTRY FOR ENGINEERS
- CHEM 1810 - CHEMICAL BIOLOGY
- CHEM 1880 - CHEMICAL BIOLOGY FOR ENGINEERS
- HRS 1023 - HUMAN PHYSIOLOGY

Course in Statistics - 4 Credits

Note: Students who have a major in the Swanson School of Engineering seeking a minor should take ENGR 0020 while students who do not have a major in the Swanson School of Engineering should take STAT 1000.

- ENGR 0020 - PROBABILITY AND STATISTICS FOR ENGINEERS 1
  (SSoE Students)
- STAT 1000 - APPLIED STATISTICAL METHODS
  (non-SSoE Students)

Three BIOENG Elective Courses - 9 Credits

Note: Students must meet prerequisites (or equivalent) to enroll in BIOENG courses.

- BIOENG 1002 - INTRAMURAL INTERNSHIP
- BIOENG 1005 - RADIOFREQUENCY MEDICAL DEVICES
- BIOENG 1024 - MEDICAL PRODUCT DESIGN
- BIOENG 1050 - ARTIFICIAL ORGANS
- BIOENG 1051 - ARTIFICIAL ORGANS 2
- BIOENG 1052 - ARTIFICIAL ORGANS 3
Additional Information

Note: BIOENG 1070 - INTRODUCTORY CELL BIOLOGY 1 and BIOENG 1071 - INTRODUCTION TO CELL BIOLOGY 2 are considered Basic Life Science Courses. Neither can be used to satisfy a BIOENG elective course requirement.

Note: BIOENG 1241 - SOCIETAL, POLITICAL AND ETHICAL ISSUES IN BIOENGINEERING is a humanities/social science course that is restricted to Department of Bioengineering students only. The course cannot be used to satisfy a BIOENG elective course requirement.

Note: BIOENG 1095 - SPECIAL PROJECTS cannot be used to satisfy a BIOENG elective course requirement

Department of Chemical and Petroleum Engineering

Chemical engineering is concerned with processes in which matter and energy undergo change. Despite the historically-inspired name, the material/energy transformations studies by chemical engineers include not only chemical, but also physical and biological changes. The range of concerns, therefore, is so broad that the chemical engineering graduate is prepared for a variety of interesting and challenging employment opportunities. The chemical engineer with his/her strong background in chemical, physical, and biological sciences is found in management, design, operations, and research. The chemical engineer is employed in almost all industries including food, polymers, chemicals, pharmaceuticals, petroleum, medical, materials, and electronics. Since solutions to energy, environmental, medical, and food problems (to name but a few) must surely involve material and/or energy transformations, there will be continued demands for chemical engineers in the future. The chemical engineering program is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org

The major objectives of the chemical engineering program are that
Graduates will gain employment in professional careers (often in positions of technical expertise in chemical engineering, but also including professions such as medicine, law, business, finance, non-profit organizations, government, education, etc.) and/or enroll in graduate studies.

Graduates will be committed to lifelong learning throughout their careers.
Graduates will assume positions of leadership.
Graduates will recognize the importance of utilizing their knowledge, skills, and initiative for the benefit of society and demonstrate that understanding through their interactions within their community, in government, or in society as a whole.

The chemical engineering faculty have strong interests in transport phenomena, process dynamics, biotechnology, biomedical application, nanotechnology, kinetics, catalysis, thermodynamics, polymers, and energy supply and conversion. Petroleum engineering faculty interests are in fluid displacement in porous media and enhanced oil recovery and reservoir modeling. Courses and research opportunities are available in all of these areas for undergraduate students of demonstrated ability. For more information on these programs, please visit http://www.engineering.pitt.edu/chemical

Major

Chemical Engineering

The following areas of concentration are available for Chemical Engineering students:

Petroleum Concentration

Polymers Concentration

Chemical Engineering Undergraduate Curriculum

Undergraduate chemical engineering courses cover thermodynamics; mass and energy balances; energy, mass, and momentum transfer; unit operations; process dynamics and control; process design; plant and product design; professional practice; and chemical reaction engineering. A cumulative QPA of 2.0 must be achieved in all CHE courses for the student to earn a degree in Chemical Engineering and a minimum grade of C- in CHE 0100, CHE 0200, CHE 0300 and CHE 0400.

In addition, the curriculum provides a sequence of technical electives that makes possible specialization in some of the most important areas in today's society. Among these are the biochemical, petroleum, and polymers areas of concentration. Students may select any combination of technical electives. The appropriate selection of electives, however, can lead to a minor or area of concentration. (See Minors in Engineering.)

Requirements

Third Term

- CHEM 0310 - ORGANIC CHEMISTRY 1
- ChE Composition Requirement - 3 credits
- MATH 0240 - ANALYTIC GEOMETRY AND CALCULUS 3
- CHE 0100 - FOUNDATIONS OF CHEMICAL ENGR
- CHE 0101 - FOUNDATIONS OF CHE LABORATORY
- CHE 1085 - DEPARTMENTAL SEMINAR

Credits: 17

Fourth Term
- CHEM 0320 - ORGANIC CHEMISTRY 2
- MATH 0290 - DIFFERENTIAL EQUATIONS or
- CHE 1290 - DIFFERENTIAL EQUATIONS IN CHEMICAL ENGINEERING or
- MATH 1270 - ORDINARY DIFFERENTL EQUATIONS 1
- CHE 0200 - CHEMICAL ENGINEERING THERMODYNAMICS
- CHE 0201 - CHE THERMODYNAMICS LABORATORY
- CHE 0214 - INTRODUCTION TO CHEMICAL PRODUCT DESIGN
- CHE 1085 - DEPARTMENTAL SEMINAR

Credits: 16

Fifth Term

- ENGR 0020 - PROBABILITY AND STATISTICS FOR ENGINEERS 1
- Humanities/Social Science - 3 Credits
- CHE 0300 - TRANSPORT PHENOMENA
- CHE 0301 - TRANSPORT PHENOMENA LABORATORY
- CHE 0314 - TAKING PRODUCTS TO MARKET: THE NEXT STEP IN CHEMICAL PRODUCT DESIGN
- CHE 1085 - DEPARTMENTAL SEMINAR

Credits: 17

Sixth Term

- CHEM 1480 - INTERMEDIATE PHYSICAL CHEMISTRY
- CHE 0400 - REACTIVE PROCESS ENGINEERING
- CHE 0401 - REACTIVE PROCESS ENGINEERING LABORATORY
- Humanities/Social Science - 3 Credits
- CHE 1085 - DEPARTMENTAL SEMINAR

Engineering Elective - 3 Credits

Suggestions:
- ENGR 0022 - MATERIALS STRUCTURE AND PROPERTIES
- ENGR 0135 - STATICS & MECHC OF MATERIALS 1
- ENGR 1700 - INTRODUCTION TO NUCLEAR ENGINEERING
- ENGR 1701 - FUNDAMENTALS OF NUCLEAR REACTORS
- ENGR 1702 - NUCLEAR PLANT TECHNOLOGY
- ENGR 1869 - INTRO ELEC ENGRO FOR NON EE'S

Credits: 15

Seventh Term

- CHE 0500 - SYSTEMS ENGINEERING 1: DYNAMICS AND MODELING
• CHE 0501 - SYSTEMS ENGINEERING 1: DYNAMICS AND MODELING LABORATORY
• Humanities/Social Science - 3 Credits

• CHEM 1810 - CHEMICAL BIOLOGY or
• CHEM 1880 - CHEMICAL BIOLOGY FOR ENGINEERS or
• BIOSC 1000 - BIOCHEMISTRY

• CHE 1085 - DEPARTMENTAL SEMINAR

Advanced Science - 3 Credits

Suggestions:

• CHEM 0250 - INTRODUCTION TO ANALYTICAL CHEMISTRY
• CHEM 1130 - INORGANIC CHEMISTRY
• CHEM 1600 - SYNTHESIS & CHARCTRZTN POLYMERS
• BIOSC 1500 - CELL BIOLOGY
• BIOSC 1940 - MOLECULAR BIOLOGY

Advanced Labs - Total of 2 Credits

Suggestions:

• CHEM 0260 - INTRODUCTION TO ANALYTICAL CHEMISTRY LAB
• CHEM 1430 - PHYSICAL CHEMISTRY LABORATORY 1
• CHEM 1605 - SYNT & CHARCTRZTN POLYMERS LAB
• CHEM 0345 - ORGANIC LABORATORY (This is a 2 credit course)

Credits: 17

Eighth Term

• CHE 0613 - SYSTEM ENGINEERING 2: PROCESS DESIGN
• CHE 0602 - CHEMICAL ENGINEERING SAFETY AND ETHICS
• ChE or PETE Elective - 3 Credits
• Humanities/Social Science - 3 Credits
• Professional Elective - 3 Credits
• CHE 1085 - DEPARTMENTAL SEMINAR

Credits: 16

Total Credits Required: 132

Minor

Chemical Engineering Minor
This minor is available to all students (except Chemical Engineering undergraduates). A cumulative QPA of 2.0 must be achieved for these courses in order for the student to be awarded the Minor in Chemical Engineering. The student must receive a passing grade (C- or higher) in all courses to receive the minor. These courses would have to be completed or taken over and passed prior to the student receiving the minor. Prerequisites include General Chemistry 1 and 2 and MATH 0220 and MATH 0230.

Requirements

For students outside the Swanson School of Engineering, or for Engineering majors that are not required to take a Thermodynamics and Transport Phenomena course in their major, the following three courses and their recitations and labs are required (a total of 21 credits):

- CHE 0100 - FOUNDATIONS OF CHEMICAL ENGR
- CHE 0101 - FOUNDATIONS OF CHE LABORATORY
- CHE 0200 - CHEMICAL ENGINEERING THERMODYNAMICS
- CHE 0201 - CHE THERMODYNAMICS LABORATORY
- CHE 0300 - TRANSPORT PHENOMENA
- CHE 0301 - TRANSPORT PHENOMENA LABORATORY

For students with the Swanson School of Engineering whose major does require that they take both a Thermodynamics and Transport Phenomena course (i.e., BioE and ME majors), the following two courses and their recitations and labs are required (a total of 13 credits).

- CHE 0100
- CHE 0101
- CHE 0400
- CHE 0401

Note, both the Transport Phenomena and Thermodynamics courses must be completed prior to enrolling in CHE 0400.

Petroleum Engineering Minor

This minor is available to all undergraduate engineers.

The successful completion of four PETE courses is required for the minor. A cumulative QPA of 2.0 must be achieved for these courses in order for the student to be awarded the Minor in Petroleum Engineering. The student must receive a passing grade (D- or higher) in all courses to receive the minor. These courses would have to be completed or taken over and passed prior to the student receiving the minor. Prerequisites: MATH 0290 or CHE 1290 or equivalent and CHE 0100 or approval of PETE program director.

Requirements:

Choose four courses from the following list:

- PETE 1160 - PETROLEUM RESERVOIR ENGINEERING
- PETE 1201 - RECOVERY OF OIL BY WATERFLOODING
- PETE 1204 - ENHANCED OIL RECOVERY PROCESSES
- PETE 1205 - PETROLEUM PRODUCTION ENGINEERING
- PETE 1207 - PETROLEUM AND NATURAL GAS PROCESSING
- PETE 1208 - PETROLEUM DRILLING AND WELL COMPLETION
- PETE 1097 - SPECIAL PROJECTS
- PETE 1209 - HYDRAULIC FRACTURING MECHANICS AND APPLICATIONS (Cross-listed as CEE 1809)

** PETE 1097 projects can be conducted with a professor doing petroleum engineering related studies (Enick, Morsi) and may be replaced by two additional 3 credit PETE courses or a combination of PETE 1097 and a single 3 credit PETE course.

Polymer Engineering Minor
This minor is available to all undergraduate engineering students. The successful completion of six of the following courses is required for the minor. A cumulative QPA of 2.0 must be achieved for these courses in order for the student to be awarded the Minor in Polymer Engineering. The student must receive a passing grade (D- or higher) in all courses to receive the minor. These courses would have to be completed or taken over and passed prior to the student receiving the minor. Prerequisites include General Chemistry 1 and 2, and MATH 0220 and 0230.

Core Courses

- CHE 1754 - PRINCIPLES OF POLYMER ENGINEERING
- CHEM 1600 - SYNTHESIS & CHARCTRZTN POLYMERS with lab
- CHEM 1605 - SYNTH & CHARCTRZTN POLYMERS LAB

Required Chemistry Courses

- CHEM 0310 - ORGANIC CHEMISTRY 1
- CHEM 0320 - ORGANIC CHEMISTRY 2

Two Research Projects with Polymer Content (For a Total of 6 Credits)

- CHE 1097 - SPECIAL PROJECT
- CHEM 1710 - UNDERGRADUATE RESEARCH

Students can take CHE 1097 or CHEM 1710 or a combination of both, totaling 6 credits.

Department of Civil and Environmental Engineering

The University of Pittsburgh is proud of its history and tradition in civil and environmental engineering education, reinforced by a faculty who are dedicated to their students. The curriculum prepares students to tackle today's most eminent engineering, environmental and societal challenges.

The department offers a Bachelor of Science in Engineering degree that may be obtained by majoring in civil engineering or environmental engineering. The civil engineering major has been continuously accredited by ABET since its inception in 1936. The environmental engineering major was established in 2015 in response to strong demand from students, industry and government agencies and will seek ABET accreditation in the Fall of 2017. The Department also offers minors in civil engineering and environmental engineering to students majoring in other disciplines.

Civil and environmental engineers are concerned with safeguarding life, health, and property while promoting the general welfare of society. They are the designers of the public and private works that affect large segments of the population. However, because problems of expanding population and increasing human needs that confront our civilization, the responsibility of civil and environmental engineers extends beyond mere physical structures into the social, political, and economic welfare of the United States and other countries. In brief, the work of the civil and environmental engineer has a significant impact on the quality of life in all areas of modern society.

Major

Civil Engineering

The following areas of concentration are available for Civil Engineering students:

- Construction Management
- Environmental Engineering
Geotechnical Engineering

Structural Engineering

Transportation Engineering

Water Resources Engineering

The civil engineer may focus in environmental control and in the development or redevelopment of a geographic area through overall planning, as well as in the design, construction, and operation of structures and facilities for public and private use. Included in the broad field of civil engineering are the following: buildings, bridges, and industrial installations; soil mechanics and foundations; transportation, including highways, traffic, airports, and harbors; hydraulic engineering, including irrigation; water resources, including power plants and dams; water supply; waste disposal; air pollution; hazardous and solid wastes; and environmental sanitation. Modern-day requirements have necessitated involvement in the medical and dental fields, oceanography, polar exploration, energy resources, and the space effort.

The curriculum focuses on the electives available for designing individualized programs suited to the student's career goals. Emphasis is placed on societal needs and ways of meeting those needs. Thus, graduates are prepared to begin work in any of the several branches of civil engineering or to continue their education at the graduate level.

Civil Engineering Undergraduate Curriculum

Third Term

- MATH 0240 - ANALYTIC GEOMETRY AND CALCULUS 3
- ENGR 0131 - STATICS FOR CIVIL AND ENVIRONMENTAL ENGINEERS
- IE 1040 - ENGINEERING ECONOMIC ANALYSIS
- CEE 1503 - INTRO TO ENVIRONMENTAL ENGRNG
- Science Elective - 3 Credits
- CEE 1085 - DEPARTMENTAL SEMINAR

Credits: 16

Fourth Term

- MATH 0290 - DIFFERENTIAL EQUATIONS
- ENGR 0020 - PROBABILITY AND STATISTICS FOR ENGINEERS 1
- ENGR 0141 - MECHANICS OF MATERIALS CIVIL AND ENVIRONMENTAL ENGINEERS
- CEE 0109 - COMPUTER METH IN CIVIL ENGRG 1
- CEE 1105 - MATERIALS OF CONSTRUCTION
- CEE 1085 - DEPARTMENTAL SEMINAR

Credits: 16

Fifth Term

- CEE 1330 - INTRODUCTION TO STRUCTURAL ANALYSIS
- CEE 1402 - FLUID MECHANICS
- CEE 1811 - PRINCIPLES OF SOIL MECHANICS
- Social Science Elective - 3 Credits
- CEE 1703 - TRANSPORTATION ENGINEERING
- CEE 1085 - DEPARTMENTAL SEMINAR
• CEE 1101 - DYNAMICS AND STABILITY
Credits: 18

Sixth Term

• CEE 1200 - CONSTRUCTION MANAGEMENT
• CEE 1609 - LIFE CYCLE ASSESSMENT METHODS AND TOOLS or
• CEE 1610 - ENGINEERING AND SUSTAINABLE DEVELOPMENT or
• CEE 1618 - DESIGN FOR THE ENVIRONMENT

• CEE 1412 - INTRODUCTION TO WATER RESOURCES ENGINEERING
• Social Science Elective - 3 Credits
• CEE Design Elective #1 - 3 Credits*
• CEE 1085 - DEPARTMENTAL SEMINAR

Credits: 15

Seventh Term

• CEE-Design Elective #2 - 3 Credits*
• CEE Elective - 3 Credits*
• CEE Elective - 3 Credits*
• Engineering Elective - 3 Credits
• Humanities/Social Science Elective - 3 Credits
• CEE 1085 - DEPARTMENTAL SEMINAR

Credits: 15

Eighth Term

• Humanities/Social Science Elective - 3 Credits

• CEE 1233 - CONSTRUCTION DESIGN PROJECT or
• CEE 1333 - STRUCTURAL DESIGN PROJECT or
• CEE 1433 - WATER RESOURCES DESIGN PROJECT or
• CEE 1533 - ENVRL ENGR DESIGN PROJECT or
• CEE 1733 - TRANSPORTATION DESIGN PROJECT or
• CEE 1833 - GEOTECHNICAL DESIGN PROJECT

• CEE-Elective - 3 Credits**
• CEE-Elective - 3 Credits**
• CEE-Elective - 3 Credits**
• CEE 1085 - DEPARTMENTAL SEMINAR

Credits: 15
Note:

*Design Electives are: (CEE 1335), (CEE 1410 or CEE 1401), (CEE 1505, CEE 1513 or CEE 1515), (CEE 1714, CEE 1715, CEE 1717, CEE 1718, CEE 1821, or CEE 2814), (CEE 1700 or CEE 1730). One course from each group is required.

**Any non-required CEE undergraduate courses, Mining Engineering Courses with the ENGR classification, 2000 level CEE graduate courses - and any ENGR course offered by the CEE Department are suitable for CEE Electives.

Minimum Grade Requirements

ENGR 0131, ENGR 0141, CEE 1330, CEE 1402, CEE 1503, CEE 1811, and all design electives must be passed with a grade of "C" or higher.

Environmental Engineering

Environmental engineers are concerned with safeguarding life, health, and the environment while promoting society's general welfare. They are the designers of the public and private works that affect all segments of the population. The responsibility of the environmental engineer extends beyond mere physical structures into the social, political, and economic welfare of this and other countries. In brief, the work of the environmental engineer has a significant impact on the quality of life in all areas of modern society.

Environmental engineers deal in environmental control and in the development or redevelopment of a geographic area through overall planning, as well as in the design, construction, and operation of structures and facilities for public and private use (infrastructure). The field includes water supply systems, waste disposal, air and water pollution, and environmental remediation. The environmental engineering program at the University of Pittsburgh is a new program with the first B.S. degree being awarded by the Department in 2017.

The program begins with studies in the humanities, social sciences, physical sciences, and mathematics, and proceeds to the fundamental aspects of environmental engineering. The curriculum focuses on the electives available for designing individualized programs suited to the student's career goals. Emphasis is placed on societal and environmental needs as well as ways of meeting those needs. Thus, the graduate is prepared to begin work in any of the several branches of environmental engineering or to continue his or her education at the graduate level.

Environmental Engineering Undergraduate Curriculum

The environmental engineering major is designed for the students who enter the program at the end of their freshman year. Qualified transfer students (3.000 GPA) are accepted subject to space available. In addition, summer programs are available primarily to assist students who are not taking the structured curriculum on schedule or students participating in the cooperative study program. Students are expected to complete all prerequisite courses before advancing to the next term.

Third Term

- MATH 0240 - ANALYTIC GEOMETRY AND CALCULUS 3
- ENGR 0131 - STATICS FOR CIVIL AND ENVIRONMENTAL ENGINEERS
- IE 1040 - ENGINEERING ECONOMIC ANALYSIS
- CEE 1503 - INTRO TO ENVIRONMENTAL ENGRNG
- Earth Science Elective - 3 credits
- CEE 1085 - DEPARTMENTAL SEMINAR

Total Credits: 16

Fourth Term

- MATH 0290 - DIFFERENTIAL EQUATIONS
- ENGR 0020 - PROBABILITY AND STATISTICS FOR ENGINEERS 1
• CEE 1504 - CHEMISTRY IN ENVIRONMENTAL ENGINEERING or
  • CHEM 0310 - ORGANIC CHEMISTRY 1

• ENGR 0141 - MECHANICS OF MATERIALS CIVIL AND ENVIRONMENTAL ENGINEERS

• CEE 0109 - COMPUTER METH IN CIVIL ENGRG 1 or
• MATH 0280 - INTRO TO MATRICES & LINEAR ALG or
• GEOL 1006 - ENVIRONMENTAL MODELING

• CEE 1085 - DEPARTMENTAL SEMINAR

Total Credits: 16

Fifth Term

• BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1
• CEE 1402 - FLUID MECHANICS
• CEE 1811 - PRINCIPLES OF SOIL MECHANICS
• CEE 1203 - CONSTRUCT PROFSSN DEVELOPMENT
• Social Science Elective - 3 credits
• Social Science Elective - 3 credits
• CEE 1085 - DEPARTMENTAL SEMINAR

Total Credits: 18

Sixth Term

• CEE 1520 - MATERIAL AND ENERGY BALANCES IN ENVIRONMENTAL ENGINEERING

• CEE 1609 - LIFE CYCLE ASSESSMENT METHODS AND TOOLS or
• CEE 1610 - ENGINEERING AND SUSTAINABLE DEVELOPMENT or
• CEE 1618 - DESIGN FOR THE ENVIRONMENT

• CEE 1412 - INTRODUCTION TO WATER RESOURCES ENGINEERING
• CEE 1513 - ENVIRONMENTAL ENGRNG PROCESSES
• CEE 1523 - ENVIRONMENTAL ENGINEERING LAB
• CEE 1085 - DEPARTMENTAL SEMINAR

Total Credits: 15

Seventh Term

• CEE 1505 - WATER TREATMENT AND DISTRIBUTION SYSTEM DESIGN or
• CEE 1515 - WASTEWATER COLLECTION AND TREATMENT PLANT DESIGN

• CEE 1522 - FATE AND TRANSPORT IN ENVIRONMENTAL ENGINEERING
• Environmental Program Elective - 3 credits
• Environmental Program Elective - 3 credits
• Humanities/Social Science Elective - 3 credits
• CEE 1085 - DEPARTMENTAL SEMINAR

Total Credits: 15

Eighth Term

• Humanities/Social Science Elective - 3 credits
• CEE 1533 - ENVRL ENGR DESIGN PROJECT
• Civil Engineering Elective - 3 credits
• CEE 1401 - OPEN CHANNEL HYDRAULICS DESIGN or
• CEE 1410 - WATER RESOURCES ENGINEERING DESIGN

• Civil Engineering Elective - 3 credits
• CEE 1085 - DEPARTMENTAL SEMINAR

Total Credits: 15

Minimum Grade Requirements

• ENGR 0131 and ENGR 0141 must be passed with a grade of "C" or higher.
• CEE 1503, CEE 1504, CEE 1505/CEE 1515 , CEE 1513, CEE 1520, CEE 1522 and CEE 1523 must be passed with a grade of "C" or higher.

Minor

Architecture-Design Minor

The Architecture-Design minor consists of 18 credits, distributed as follows:

Requirements for the minor

The minor in Architecture - Design provides an option for students majoring in fields such as Civil Engineering, Environmental Studies, History, Studio Arts, Urban Studies and for whom course work in architectural design and history will provide additional breadth in their studies of the built environment. The minor requires that students complete 18 credits, 12 of which are studio-based design courses and six of which will provide historical and theoretical background for thinking about architecture and the built environment.

Foundational course in architecture

• ARC 0110 - APPROACHES TO THE BUILT ENVIRONMENT

Two courses in architectural design

• ARC 0201 - FOUNDATIONS STUDIO 1
• ARC 1201 - ARCHITECTURE DESIGN STUDIO 1
Students must earn a letter grade of C or higher in ARC 0201 - FOUNDATIONS STUDIO 1 to enroll in ARC 1201 - ARCHITECTURE DESIGN STUDIO 1.

One course in architectural history

Students in SSOE are encouraged to fill this requirement with ARC 0150.

- ARC 0116 - GLOBAL ARCHITECTURE 2: MODERN
- ARC 0150 - INTRODUCTION TO WESTERN ARCHITECTURE
- ARC 0153 - MEDIEVAL ARCHITECTURE
- ARC 0210 - SPECIAL TOPICS-ARCHITECTURE
- ARC 0300 - INTRODUCTION TO HISTORIC PRESERVATION
- ARC 1118 - ARCHITECTURE SINCE 1945
- ARC 1136 - EARLY AMERICAN ARCHITECTURE
- ARC 1137 - AMERICAN ARCHITECTURE SINCE INDUSTRIALIZATION
- ARC 1156 - HIGH RENAISSANCE ARCHITECTURE
- ARC 1158 - ARCHITECTURE AND ENLIGHTENMENT
- ARC 1160 - ARCHITECTURE: IMAGE, TEXT, THEORY
- ARC 1181 - PITTSBURGH ARCHITECTURE/URBANISM
- ARC 1191 - ARCHITECTURE AND THE CITY IN CENTRAL EUROPE: 19TH AND 20TH CENTURIES
- ARC 1330 - GLOBAL PRESERVATION
- HAA 0460 - ART IN PUBLIC: INCLUSION, IDENTITY, AND ACTIVISM
- HAA 1680 - JAPAN: ARTIST AND CITY

Two co-requisites

- ARC 1911 - ARCHITECTURE AND DIGITAL MEDIA 1
- SA 0130 - DRAWING STUDIO 1

ARC 1911 - ARCHITECTURE AND DIGITAL MEDIA 1 may be waived for students who have taken a course in AutoCAD in high school or an equivalent course in the Department of Civil Engineering in the Swanson School of Engineering. CEE 0109 - COMPUTER METH IN CIVIL ENGRG 1 satisfies this requirement.

SA 0130 - DRAWING STUDIO 1 may be waived for students who have taken material or studio art courses in high school.

Civil Engineering Minor

The Department of Civil and Environmental Engineering offers a Minor in Civil Engineering to B.S. degree students in other engineering or science departments of the University of Pittsburgh. The applicant must have completed the Swanson School of Engineering common Freshman year courses or their equivalent, plus the following courses which are prerequisites for Civil and Environmental Engineering (CEE) courses, each with a grade of "C" or better.

- Prerequisite: Math 240 and Math 290
- ENGR 0131 or ENGR 0135
- ENGR 0141 or ENGR 0145

Students from other engineering departments must be in good standing. Students from outside the Swanson School of Engineering must have a an overall QPA of 2.5 or greater.

The Minor requires the completion of a minimum of 18 credits of course work in civil engineering.

Course Requirements
Three out of the following introductory courses.

- CEE 1200 - CONSTRUCTION MANAGEMENT
- CEE 1330 - INTRODUCTION TO STRUCTURAL ANALYSIS
- CEE 1402 - FLUID MECHANICS
- CEE 1503 - INTRO TO ENVIRONMENTAL ENGRNG
- CEE 1703 - TRANSPORTATION ENGINEERING
- CEE 1811 - PRINCIPLES OF SOIL MECHANICS

Three Electives from the Following Six Categories Related to the Introductory Courses, Must be Taken from the List Below

Construction Management (prerequisites CEE 1200):

- CEE 1203 - CONSTRUCT PROFSSN DEVELOPMENT
- CEE 2201 CONSTRUCTION COST ENGINEERING
- CEE 2202 CONSTRUCTION SCHEDULING
- CEE 2204 CONSTRUCTION LAW & RISK MGMNT
- CEE 2205 CONSTRCT FINANCE & COST CONTRL
- CEE 2206 CONSTRCT & COST OF ELEC SUPPLY
- CEE 2207 CONSTRCT & CST OF MECHL SYSTMS

Structural Engineering (prerequisites CEE 1330):

- CEE 1340 - CONCRETE STRUCTURES I
- CEE 1341 - DESIGN OF STEEL STRUCTURES
- CEE 1370 - INTRODUCTION TO NONDESTRUCTIVE EVALUATION AND STRUCTURAL HEALTH MONITORING
- CEE 2330 ADVANCED STRUCTURAL ANALYSIS

Water Resources Engineering (prerequisite CEE 1402):

- CEE 1410 - WATER RESOURCES ENGINEERING DESIGN
- CEE 1412 - INTRODUCTION TO WATER RESOURCES ENGINEERING
- CEE 1401 - OPEN CHANNEL HYDRAULICS DESIGN

Environmental Engineering (prerequisite CEE 1503):

- CEE 1504 - CHEMISTRY IN ENVIRONMENTAL ENGINEERING
- CEE 1513 - ENVIRONMENTAL ENGRNG PROCESSES
- CEE 1514 - ENVIRONMENTAL IMPACT ASSESSMENT
- CEE 1520 - MATERIAL AND ENERGY BALANCES IN ENVIRONMENTAL ENGINEERING
- CEE 1522 - FATE AND TRANSPORT IN ENVIRONMENTAL ENGINEERING
- CEE 1523 - ENVIRONMENTAL ENGINEERING LAB
- CEE 2500 ENVRNMNTL ENGRG MICROBIOL
- CEE 2501 ENVIRONMENTAL ENGRNG CHEMISTRY
- CEE 2502 PHYSCL-CHMCL PRIN IN ENV ENGRG
Transportation Engineering (prerequisite CEE 1703):

- CEE 1700 - TRAFFIC MANAGEMENT AND OPERATIONS
- CEE 1710 - TRAFFIC CONTROL SYSTEMS
- CEE 1711 - ADVANCED TRANSPORTATION MANAGEMENT STRATEGIES
- CEE 1714 - PAVEMENT DESIGN AND ANALYSIS
- CEE 1715 - PAVEMENT MAINTENANCE AND REHAB
- CEE 1717 - COMPONENTS, PROPERTIES AND DESIGN OF PORTLAND CEMENT CONCRETE
- CEE 1718 - ADVANCED CONSTRUCTION AND BITUMINOUS MATERIALS
- CEE 1720 - URBAN TRANSPORTATION PLANNING
- CEE 1725 - PUBLIC TRANSPORTATION SYSTEMS
- CEE 1730 - HIGHWAY ENGINEERING

Geotechnical Engineering (prerequisite CEE 1811):

- CEE 1800 - ENGINEERING GEOLOGY
- CEE 1821 - FOUNDATION ENGINEERING
- CEE 2801 ADVANCED SOIL MECHANICS
- CEE 2802 COMPTR METH IN GEOTEHNCL ENGR

Notes:

- Environmental Engineering Majors seeking the minor may NOT use CEE 1402, 1503 or 1811 courses to satisfy the requirements.
- Environmental Engineering Majors seeking the minor may NOT use CEE 1203, 14XX, 15XX, 24XX and 25XX courses to satisfy the requirements.

Application:

Early application is advised so that the applicant can be assigned to an advisor in the Department of Civil and Environmental Engineering.

To apply obtain and submit the completed application form with copy of academic record to: Dr. Leonard W. Casson, Undergraduate Coordinator, 742 Benedum Hall, Tel. 412-624-9870; casson@pitt.edu.

Environmental Engineering Minor

The Department of Civil and Environmental Engineering offers a Minor in Environmental Engineering to B.S. degree students in other engineering or science departments within the University of Pittsburgh. The minor requires the completion of a minimum of 15 credits of course work in the environmental area. This minor is not available to Civil Engineering Majors in the Department.

The completion of the Environmental Engineering Minor will provide the student with a significant career advantage. Engineers and scientists from diverse backgrounds are needed in the control and management of our environment

Course Requirements

(Any deviation or substitution must be approved by the CEE Undergraduate Coordinator):

- CEE 1412 - INTRODUCTION TO WATER RESOURCES ENGINEERING
- CEE 1503 - INTRO TO ENVIRONMENTAL ENGRNG
- CEE 1513 - ENVIRONMENTAL ENGRNG PROCESSES
Two of the following courses:

- CEE 1504 - CHEMISTRY IN ENVIRONMENTAL ENGINEERING
- CEE 1505 - WATER TREATMENT AND DISTRIBUTION SYSTEM DESIGN
- CEE 1514 - ENVIRONMENTAL IMPACT ASSESSMENT
- CEE 1515 - WASTEWATER COLLECTION AND TREATMENT PLANT DESIGN
- CEE 1520 - MATERIAL AND ENERGY BALANCES IN ENVIRONMENTAL ENGINEERING
- CEE 1522 - FATE AND TRANSPORT IN ENVIRONMENTAL ENGINEERING
- CEE 1609 - LIFE CYCLE ASSESSMENT METHODS AND TOOLS
- CEE 1610 - ENGINEERING AND SUSTAINABLE DEVELOPMENT
- CEE 1618 - DESIGN FOR THE ENVIRONMENT
- CEE 1996 - SPECIAL PROJECTS

Application:

It is strongly suggested that interested undergraduates contact an environmental engineering faculty member for guidance once they decide they may be interested in the environmental minor. All students should obtain and submit a completed formal application form with copy of academic record to: Dr. Casson, Undergraduate Academic Coordinator, 742 Benedum Hall, Telephone 412-624-9868.

Department of Electrical and Computer Engineering

Computer Engineering

Computer engineers are active in and in demand for all phases of technology research, design and development, testing, manufacturing, sales, and management of computer technologies. In addition, many successful leaders in other professions, such as law, medicine, and business, pursue an undergraduate education in computer engineering as preparation for later professional study. Thus the undergraduate curriculum provides preparation in both mathematics and physical sciences, coupled with coverage of all aspects of computing, software, hardware, design, and application. The program's flexible elective structure offers the student considerable opportunity for professional specialization, area specialization within the computing discipline, or interdisciplinary broadening. The computer engineering program is accredited by the Engineering Accreditation Commission of ABET. http://www.abet.org. For more information about the program, contact coeundergrad@pitt.edu or see http://wwwengineering.pitt.edu/Computer/

Electrical Engineering

Electrical Engineering is the application of math and science to the design, manufacture, use and operation of electrical processes, devices, machines, and systems. Electrical and electronics engineers build circuits and systems that use and/or transform electricity for a practical purpose. Electrical engineering is a very broad discipline that impacts public welfare and safety, as well as health, healthcare, communication, transportation, computing, and leisure.

Major

Computer Engineering

For students who enrolled prior to Fall 2019, please refer to the Archived Catalogs, and select the academic year in which you began to view your program requirements.
Computer Engineering Undergraduate Curriculum

The overall objective of the computer engineering (CoE) program is to prepare individuals to be successful and lead lives of impact in whatever path they choose to pursue in the 21st century global economy. This includes those who move into practice within the computer engineering discipline either through employment in industry or government, entrepreneurship, those who move on to advanced computer study and research in graduate school, or those that move into other professions such as law, business, or management.

Building upon the Swanson School of Engineering freshmen program, a common and comprehensive year of study is delivered to sophomore computer engineering (CoE) and electrical engineering (EE) students. The sophomore year features four tracks, including two-course sequences in analog hardware, digital hardware, software, and applied math. These eight courses prepare students to continue as juniors in their specific program (CoE or EE) with foundational strength.

During the CoE junior year, students complete six core courses unique to CoE (computer architecture, advanced digital design, embedded systems, computer networks, information security, systems and project engineering) and a core course common to both programs (junior design fundamentals). Broad flexibility is provided in the senior year, including four ECE electives, three technical electives, and one general elective, providing many dozens of options.

The CoE program is designed to build on foundational engineering strength developed during the freshman year, extend with broad ECE fundamentals in the sophomore year, further extend and deepen with CoE fundamentals in the junior year, and then diversify for career exploration and specialization in the senior year. Our graduates will be among the best prepared computer engineers in the nation for impactful careers and postgraduate studies in one of the most exciting and thriving professions of STEM.

Third Term

- ECE 0101 - LINEAR CIRCUITS AND SYSTEMS
- ECE 0201 - DIGITAL CIRCUITS AND SYSTEMS
- ECE 0301 - ECE PROBLEM SOLVING WITH C++
- ECE 0401 - ECE ANALYTICAL METHODS
- Communication Skills Elective - 3 credits
- ECE 1885 - DEPARTMENTAL SEMINAR

Credits: 17

Fourth Term

- ECE 0102 - MICROELECTRONIC CIRCUITS
- ECE 0202 - EMBEDDED PROCESSORS AND INTERFACING
- ECE 0302 - DATA STRUCTURES AND ALGORITHMS
- ECE 0402 - SIGNALS, SYSTEMS, & PROBABILITY
- Humanities/Social Science Elective - 3 credits
- ECE 1885 - DEPARTMENTAL SEMINAR

Credits: 17

Fifth Term

- MATH 0480 - APPLIED DISCRETE MATHEMATICS
- ECE 1110 - COMPUTER ORGANIZATION AND ARCHITECTURE
- ECE 1150 - COMPUTER NETWORKS
- ECE 1175 - EMBEDDED SYSTEMS DESIGN
- Humanities/Social Science Elective - 3 credits
ECE 1885 - DEPARTMENTAL SEMINAR

Credits: 16

Sixth Term

- ECE 1140 - SYSTEMS AND PROJECT ENGINEERING
- ECE 1155 - INFORMATION SECURITY
- ECE 1195 - ADVANCED DIGITAL DESIGN
- Humanities/Social Science Elective - 3 credits
- ECE 1885 - DEPARTMENTAL SEMINAR
- ECE 1895 - JUNIOR DESIGN FUNDAMENTALS

Credits: 16

Seventh Term

- ECE Elective - 3 credits
- ECE Elective - 3 credits
- ECE Elective - 3 credits
- Technical Elective - 3 credits
- Humanities/Social Science Elective - 3 credits
- ECE 1885 - DEPARTMENTAL SEMINAR

Credits: 15

Eighth Term

- ECE Elective - 3 credits
- Technical Elective - 3 credits
- Technical Elective - 3 credits
- Open Elective - 3 credits
- ECE 1885 - DEPARTMENTAL SEMINAR
- ECE 1896 - SENIOR DESIGN PROJECT *

Credits: 15

Note:

*Students may take ENGR 1050 - PRODUCT REALIZATION to fulfill the Senior Design Project requirement with approval from the Undergraduate Coordinator.

Electives

ECE Electives

Students must complete at least four ECE Elective courses from the following list:
• ECE 1120 - HARDWARE DESIGN METHODOLOGIES I
• ECE 1145 - SOFTWARE CONSTRUCTION AND EVOLUTION
• ECE 1165 - DEPENDABLE COMPUTER ARCHITECTURE
• ECE 1166 - PARALLEL COMPUTER ARCHITECTURE
• ECE 1170 - SPECIAL TOPICS: COMPUTER
• ECE 1180 - COMPUTATIONAL MODELING AND SIMULATION FOR ENGINEERS
• ECE 1188 - CYBER-PHYSICAL SYSTEMS
• ECE 1192 - INTRODUCTION TO VLSI DESIGN
• ECE 1193 - ADVANCED VLSI DESIGN
• ECE 1212 - ELECTRONIC CIRCUIT DESIGN LAB
• ECE 1215 - ELECTROACOUSTICS AND AUDIOELECTRONICS
• ECE 1232 - INTRO LASERS & OPTCL ELECTNC
• ECE 1238 - DIGITAL ELECTRONICS
• ECE 1247 - SEMICONDUCTOR DEVICE THEORY
• ECE 1250 - NANOTECHNOLOGY & NANO-ENGINEERING
• ECE 1251 - MICRO AND NANO DEVICE FABRICATION LABORATORY
• ECE 1259 - ELECTROMAGNETICS
• ECE 1266 - APPLICATIONS OF FIELDS AND WAVES
• ECE 1270 - SPECIAL TOPICS: ROBOTICS STUDIO
• ECE 1286 - ANAL & DSGN ANLG INTGRTD CRCT
• ECE 1390 - INTRO TO IMAGE PROCESSING
• ECE 1395 - INTRODUCTION TO MACHINE LEARNING
• ECE 1472 - ANALOG COMMUNICATION SYSTEMS
• ECE 1473 - DIGITAL COMMUNICATION SYSTEMS
• ECE 1560 - DIGITAL SIGNAL PROCESSING
• ECE 1562 - DIGITAL AND ANALOG FILTERS
• ECE 1570 - SPECIAL TOPICS
• ECE 1673 - LINEAR CONTROL SYSTEMS
• ECE 1675 - ROBOTIC CONTROL
• ECE 1701 - FUNDAMENTALS OF ELECTRIC POWER ENGINEERING
• ECE 1710 - POWER DISTRIBUTION SYSTEMS ENGINEERING AND SMART GRIDS
• ECE 1750 - POWER ELECTRONICS CONVERSION THEORY
• ECE 1770 - SPECIAL TOPICS: ELECTRONIC MICROPROCESSOR SYSTEMS
• ECE 1771 - ELECTRIC MACHINERY
• ECE 1773 - POWER GENERATION, OPERATION, AND CONTROL
• ECE 1775 - POWER QUALITY
• all 2000/3000 level ECE graduate courses

Communication Skills Electives

Students must complete at least one Communication Skills Elective course from the following list:

• COMMRC 0500 - ARGUMENT
• COMMRC 0510 - DEBATE
• COMMRC 0520 - PUBLIC SPEAKING
• COMMRC 0530 - INTERPERSONAL COMMUNICATION
• COMMRC 0540 - DISCUSSION
• COMMRC 0550 - SPEECH COMPOSITION
• COMMRC 1102 - ORGANIZATIONAL COMMUNICATION
• COMMRC 1106 - SMALL GROUP COMMUNICATION
• COMMRC 1109 - NONVERBAL COMMUNICATION
• COMMRC 1170 - CROSS CULTURAL COMMUNICATION
• COMMRC 1520 - ADVANCED PUBLIC SPEAKING
• ENGCMP 0400 - WRITTEN PROFESSIONAL COMMUNICATION
• ENGCMP 0401 - WRITTEN PROFESSIONAL COMMUNICATION: TOPICS IN DIVERSITY
• ENGCMP 0420 -WRITING FOR THE PUBLIC
• ENGCMP 0440 - CRITICAL WRITING
• ENGCMP 0450 - RESEARCH WRITING
• ENGCMP 0510 - NARRATIVES OF THE WORKPLACE
• ENGCMP 0520 - INTEGRATING WRITING AND DESIGN
• ENGCMP 0521 - WRITING WITH DATA
• ENGCMP 0530 - WRITING FOR THE SCIENCES
• ENGCMP 0560 - WRITING ARGUMENTS
• ENGCMP 0600 - INTRODUCTION TO TECHNICAL WRITING
• ENGCMP 0610 - COMPOSING DIGITAL MEDIA
• ENGCMP 0641 - WRITING FOR CHANGE
• ENGCMP 1099 - THE LANGUAGE OF POLICY AND POWER: TOPICS IN DIVERSITY
• ENGCMP 1100 - LANGUAGE OF BUSINESS AND INDUSTRY
• ENGCMP 1101 - LANGUAGE OF SCIENCE AND TECHNOLOGY
• ENGCMP 1104 - CORPORATE STORYTELLING
• ENGCMP 1111 - PROFESSIONAL WRITING IN GLOBAL CONTEXTS
• ENGCMP 1112 - PROFESSIONAL USES OF SOCIAL MEDIA
• ENGCMP 1250 - ADVANCED TOPICS PUBLIC/PROFESSIONAL WRITING
• ENGCMP 1400 - GRANT WRITING FOR NONPROFITS
• ENGCMP 1401 - WRITING FOR FUNDRAISING AND DEVELOPMENT
• ENGCMP 1420 - WRITING PROPOSALS FOR BUSINESS
• ENGCMP 1510 - WRITING WITH STYLE
• ENGR 1010 - COMMUNICATION SKILLS FOR ENGINEERS

Humanities/Social Science Electives

Students must complete at least four Humanities/Social Science Elective courses from a list of Approved Electives as part of the Computer Engineering curriculum. (Note: students will complete a total of six Humanities/Social Science Elective courses, but two are completed as part of the First-Year Program curriculum, and four are completed as part of the Computer Engineering curriculum.)

Open Electives

Students must complete at least one Open Elective course. Any course that is not of a similar nature to, or lower level than, a required or previously taken course can be used to fulfill this requirement. Three credits of Physical Education, or three credits of Band, ROTC, or Chorus may also be used as an Open Elective. Three credits of Co-op may also be used to fulfill the Open Elective.

Technical Electives

Students must complete at least three Technical Elective courses from the ECE Department's list of approved Technical Electives. Technical Electives can be any ECE elective or any other School of Engineering course, which has not been used to fulfill another requirement or does not substantially duplicate other required course material. Most science and math courses that can be taken by students majoring in those departments can be used as Technical Electives.
Electrical Engineering

For students who enrolled prior to Fall 2019, please refer to the Archived Catalogs, and select the academic year in which you began to view your program requirements.

The following areas of concentration are available for Electrical Engineering students:

Electronics (Circuits and Devices)

Communications and Signal Processing

Digital Systems

Electric Power

Electrical Engineering Undergraduate Curriculum

The overall objective of the electrical engineering (EE) program is to prepare individuals to be successful and lead lives of impact in whatever path they choose to pursue in the 21st century global economy. This includes those who move into practice within the electrical engineering discipline either through employment in industry or government, entrepreneurship, those who move on to advanced computer study and research in graduate school, or those that move into other professions such as law, business, or management.

Building upon the Swanson School of Engineering freshmen program, a common and comprehensive year of study is delivered to sophomore computer engineering (CoE) and electrical engineering (EE) students. The sophomore year features four tracks, including two-course sequences in analog hardware, digital hardware, software, and applied math. These eight courses prepare students to continue as juniors in their specific program (CoE or EE) with foundational strength.

During the EE junior year, students complete six core courses unique to EE (electric power, electromagnetics, linear control systems, digital signal processing, semiconductor devices and advanced analog design) and a core course common to both programs (junior design fundamentals). Broad flexibility is provided in the senior year, including four ECE electives, three technical electives, and one general elective, providing many dozens of options.

The EE program is designed to build on foundational engineering strength developed during the freshman year, extend with broad ECE fundamentals in the sophomore year, further extend and deepen with EE fundamentals in the junior year, and then diversify for career exploration and specialization in the senior year. Our graduates will be among the best prepared computer engineers in the nation for impactful careers and postgraduate studies in one of the most exciting and thriving professions of STEM.

Third Term

- ECE 0101 - LINEAR CIRCUITS AND SYSTEMS
- ECE 0201 - DIGITAL CIRCUITS AND SYSTEMS
- ECE 0301 - ECE PROBLEM SOLVING WITH C++
- ECE 0401 - ECE ANALYTICAL METHODS
- Communications Skills Elective - 3 credits
- ECE 1885 - DEPARTMENTAL SEMINAR

Credits: 17
Fourth Term

- ECE 0102 - MICROELECTRONIC CIRCUITS
- ECE 0202 - EMBEDDED PROCESSORS AND INTERFACING
- ECE 0302 - DATA STRUCTURES AND ALGORITHMS
- ECE 0402 - SIGNALS, SYSTEMS, & PROBABILITY
- Humanities/Social Science Elective - 3 credits
- ECE 1885 - DEPARTMENTAL SEMINAR

Credits: 17

Fifth Term

- MATH 0240 - ANALYTIC GEOMETRY AND CALCULUS 3
- ECE 1212 - ELECTRONIC CIRCUIT DESIGN LAB
- ECE 1560 - DIGITAL SIGNAL PROCESSING
- ECE 1701 - FUNDAMENTALS OF ELECTRIC POWER ENGINEERING
- Humanities/Social Science Elective - 3 credits
- ECE 1885 - DEPARTMENTAL SEMINAR

Credits: 16

Sixth Term

- ECE 1247 - SEMICONDUCTOR DEVICE THEORY

Seventh Term

- ECE Elective - 3 credits
- ECE Elective - 3 credits
- ECE Elective - 3 credits
- Technical Elective - 3 credits
- Humanities/Social Science Elective - 3 credits
- ECE 1885 - DEPARTMENTAL SEMINAR

Credits: 15

Eighth Term

- ECE Elective - 3 credits
• Technical Elective - 3 credits
• Technical Elective - 3 credits
• Open Elective - 3 credits
• ECE 1885 - DEPARTMENTAL SEMINAR
• ECE 1896 - SENIOR DESIGN PROJECT *

Credits: 15

Note:

*Students may take ENGR 1050 - PRODUCT REALIZATION to fulfill the Senior Design Project requirement with approval from the Undergraduate Coordinator.

Electives

ECE Electives

Students must complete at least four ECE Elective courses from the following list:

• ECE 1110 - COMPUTER ORGANIZATION AND ARCHITECTURE
• ECE 1120 - HARDWARE DESIGN METHODOLOGIES 1
• ECE 1140 - SYSTEMS AND PROJECT ENGINEERING
• ECE 1150 - COMPUTER NETWORKS
• ECE 1155 - INFORMATION SECURITY
• ECE 1160 - INTRODUCTION TO EMBEDDED SYSTEM DESIGN
• ECE 1161 - EMBEDDED COMPUTER SYSTEM DESIGN 2
• ECE 1165 - DEPENDABLE COMPUTER ARCHITECTURE
• ECE 1166 - PARALLEL COMPUTER ARCHITECTURE
• ECE 1170 - SPECIAL TOPICS: COMPUTER
• ECE 1180 - COMPUTATIONAL MODELING AND SIMULATION FOR ENGINEERS
• ECE 1188 - CYBER-PHYSICAL SYSTEMS
• ECE 1192 - INTRODUCTION TO VLSI DESIGN
• ECE 1193 - ADVANCED VLSI DESIGN
• ECE 1195 - ADVANCED DIGITAL DESIGN
• ECE 1215 - ELECTROACOUSTICS AND AUDIOELECTRONICS
• ECE 1232 - INTRO LASERS & OPTCL ELECTNC
• ECE 1238 - DIGITAL ELECTRONICS
• ECE 1250 - NANOTECHNOLOGY & NANO-ENGINEERING
• ECE 1251 - MICRO AND NANO DEVICE FABRICATION LABORATORY
• ECE 1266 - APPLICATIONS OF FIELDS AND WAVES
• ECE 1270 - SPECIAL TOPICS: ROBOTICS STUDIO
• ECE 1286 - ANAL & DSGN ANLG INTGRTD CRCT
• ECE 1390 - INTRO TO IMAGE PROCESSING

• ECE 1472 - ANALOG COMMUNICATION SYSTEMS
• ECE 1473 - DIGITAL COMMUNICATION SYSTEMS
• ECE 1562 - DIGITAL AND ANALOG FILTERS
• ECE 1570 - SPECIAL TOPICS
• ECE 1710 - POWER DISTRIBUTION SYSTEMS ENGINEERING AND SMART GRIDS
• ECE 1750 - POWER ELECTRONICS CONVERSION THEORY
• ECE 1769 - POWER SYSTEM ANALYSIS I
• ECE 1770 - SPECIAL TOPICS: ELECTRONIC MICROPROCESSOR SYSTEMS
• ECE 1771 - ELECTRIC MACHINERY
• ECE 1773 - POWER GENERATION, OPERATION, AND CONTROL
• ECE 1775 - POWER QUALITY
• all 2000/3000 level ECE graduate courses

Communication Skills Electives

Students must complete at least one Communication Skills Elective course from the following list:

• COMMRC 0500 - ARGUMENT
• COMMRC 0510 - DEBATE
• COMMRC 0520 - PUBLIC SPEAKING
• COMMRC 0530 - INTERPERSONAL COMMUNICATION
• COMMRC 0540 - DISCUSSION
• COMMRC 0550 - SPEECH COMPOSITION
• COMMRC 1102 - ORGANIZATIONAL COMMUNICATION
• COMMRC 1106 - SMALL GROUP COMMUNICATION
• COMMRC 1109 - NONVERBAL COMMUNICATION
• COMMRC 1170 - CROSS CULTURAL COMMUNICATION
• COMMRC 1520 - ADVANCED PUBLIC SPEAKING
• ENGCMP 0400 - WRITTEN PROFESSIONAL COMMUNICATION
• ENGCMP 0401 - WRITTEN PROFESSIONAL COMMUNICATION: TOPICS IN DIVERSITY
• ENGCMP 0420 - WRITING FOR THE PUBLIC
• ENGCMP 0440 - CRITICAL WRITING
• ENGCMP 0450 - RESEARCH WRITING
• ENGCMP 0510 - NARRATIVES OF THE WORKPLACE
• ENGCMP 0520 - INTEGRATING WRITING AND DESIGN
• ENGCMP 0521 - WRITING WITH DATA
• ENGCMP 0530 - WRITING FOR THE SCIENCES
• ENGCMP 0560 - WRITING ARGUMENTS
• ENGCMP 0600 - INTRODUCTION TO TECHNICAL WRITING
• ENGCMP 0610 - COMPOSING DIGITAL MEDIA
• ENGCMP 0641 - WRITING FOR CHANGE
• ENGCMP 1099 - THE LANGUAGE OF POLICY AND POWER: TOPICS IN DIVERSITY
• ENGCMP 1100 - LANGUAGE OF BUSINESS AND INDUSTRY
• ENGCMP 1101 - LANGUAGE OF SCIENCE AND TECHNOLOGY
• ENGCMP 1104 - CORPORATE STORYTELLING
• ENGCMP 1111 - PROFESSIONAL WRITING IN GLOBAL CONTEXTS
• ENGCMP 1112 - PROFESSIONAL USES OF SOCIAL MEDIA
• ENGCMP 1250 - ADVANCED TOPICS PUBLIC/PROFESSIONAL WRITING
• ENGCMP 1400 - GRANT WRITING FOR NONPROFITS
• ENGCMP 1401 - WRITING FOR FUNDRAISING AND DEVELOPMENT
• ENGCMP 1420 - WRITING PROPOSALS FOR BUSINESS
• ENGCMP 1510 - WRITING WITH STYLE
Humanities/Social Science Electives

Students must complete at least four Humanities/Social Science Elective courses from a list of Approved Electives as part of the Computer Engineering curriculum. (Note: students will complete a total of six Humanities/Social Science Elective courses, but two are completed as part of the First-Year Program curriculum, and four are completed as part of the Computer Engineering curriculum.)

Open Electives

Students must complete at least one Open Elective course. Any course that is not of a similar nature to, or lower level than, a required or previously taken course can be used to fulfill this requirement. Three credits of Physical Education, or three credits of Band, ROTC, or Chorus may also be used as an Open Elective. Three credits of Co-op may also be used to fulfill the Open Elective.

Technical Electives

Students must complete at least three Technical Elective courses from the ECE Department's list of approved Technical Electives. Technical Electives can be any ECE elective or any other School of Engineering course, which has not been used to fulfill another requirement or does not substantially duplicate other required course material. Most science and math courses that can be taken by students majoring in those departments can be used as Technical Electives.

Minor

Computer Engineering Minor

The Computer Engineering (CoE) minor provides students with a strong foundation in the design of computing hardware and software systems. The minor consists of three introductory courses and two advanced courses offered by the Department of Electrical and Computer Engineering. The minor program's required core includes foundational courses on digital electronics, embedded processors, computer programming, data structures and algorithms, and accompanying laboratory experiences. After completing the required core, students can satisfy the remaining CoE minor requirements by choosing two advanced Computer Engineering curriculum courses. Students who complete the CoE minor will be prepared to create exciting new technologies requiring fundamental computer hardware and software knowledge.

Computer Engineering Fundamentals

Completing three sophomore-level courses are required of all CoE minors (ECE 0201, ECE 0202, and ECE 0301). After completing these courses, students will have a solid foundation in computer hardware design and the development of software applications.

- ECE 0201 - DIGITAL CIRCUITS AND SYSTEMS
- ECE 0202 - EMBEDDED PROCESSORS AND INTERFACING
- ECE 0301 - ECE PROBLEM SOLVING WITH C++

Advanced Computer Engineering Topics

Students must complete their choice of two advanced ECE courses from the Computer Engineering curriculum. After completing these courses, students will have a depth of knowledge in one or more areas in Computer Engineering.

- ECE 0302 - DATA STRUCTURES AND ALGORITHMS
- ECE 1110 - COMPUTER ORGANIZATION AND ARCHITECTURE
- ECE 1140 - SYSTEMS AND PROJECT ENGINEERING
- ECE 1150 - COMPUTER NETWORKS
The Department of Electrical and Computer Engineering offers an electrical engineering (EE) minor for engineering students who are not majoring in electrical or computer engineering. The minor will be of interest to undergraduate engineering students who wish to develop expertise in areas such as electronics, instrumentation, control, signal processing, or digital devices. Requirements for engineering physics are slightly different than those for other students because of the extensive overlap between the two programs.

All students interested in declaring a minor in electrical engineering should do so on their application for graduation. Beginning in Fall 2019, students who wish to pursue a minor in electrical engineering should contact the Program Coordinator for additional information.

Required Courses

- ECE 0101 - LINEAR CIRCUITS AND SYSTEMS
- ECE 0102 - MICROELECTRONIC CIRCUITS
- ECE 0402 - SIGNALS, SYSTEMS, & PROBABILITY
- Elective
- Elective
  (Prerequisite can be satisfied by MATH 280 and MATH 290)

Electives

Students select two electives from the list shown below. Students must obtain a QPA average of at least 2.0 in the courses required for the minor, with a passing grade (D- or higher) in all courses. Since most EE courses have specific prerequisites, students should be sure that they have the required courses for the electives they wish to take.

- ECE 0201 - DIGITAL CIRCUITS AND SYSTEMS
- ECE 1212 - ELECTRONIC CIRCUIT DESIGN LAB
- ECE 1247 - SEMICONDUCTOR DEVICE THEORY
- ECE 1259 - ELECTROMAGNETICS
- ECE 1560 - DIGITAL SIGNAL PROCESSING
- ECE 1673 - LINEAR CONTROL SYSTEMS
- ECE 1701 - FUNDAMENTALS OF ELECTRIC POWER ENGINEERING

Department of Industrial Engineering

Industrial Engineering (IE) is all about choices. It is the engineering discipline that offers the most wide-ranging array of opportunities in terms of employment, and it is distinguished by its flexibility. While other engineering disciplines tend to apply skills to specific areas, industrial engineers may be found working everywhere from traditional manufacturing companies to airlines, distribution companies to financial institutions, hospitals to consulting companies, high-tech corporations to luxury retailers. Engineers are educated to design and build things, but IEs are educated to design and improve the productivity and quality of integrated systems of people, material, computers, information, equipment, and other resources. IEs draw upon the specialized knowledge and skills in the mathematical, physical and social sciences together with the principles, methods and modeling tools of engineering analysis to make improvements in business processes. In addition to making significant contributions to corporate profitability, they also make the workplace a more productive and streamlined environment. The Department of Industrial Engineering meets the challenge of the growing complexity of modern industry through an intensive educational program that includes a required international component. Building upon a solid foundation in the basic sciences, engineering, and computers, the curriculum provides the student with a capability for systems analysis and design that crosses traditional disciplinary lines and an awareness of and concern for the demands of today's dynamic social systems. The industrial engineering program is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org.
Certificate

Health Systems Engineering Certificate

The HSE Certificate provides engineering students with the opportunity to apply industrial engineering principles and tools to improve healthcare systems. The Health Systems Engineering program has been designed to let students better understand the dynamics, structure and functions of Healthcare Organizations.

To complete the certificate students must satisfy the following requirements:

- Complete six (6) credits of the required Health Systems Engineering courses- listed below as IE 1106 and IE 1108.
- Complete nine (9) additional approved credits from electives in the healthcare field. These can be from IE, CBA or the Health Related Professions. Approved courses are listed below. With approval of the undergraduate coordinator, other elective courses can be chosen from areas relevant to the student's objectives such as Health Related Professions or Information Sciences.
- Complete their Senior Design Project course in a healthcare related organization.
- Acquire approved work experience with a healthcare organization through internships or the Co-op program. Three of the 9 elective credits can be earned by completing the co-op program within a healthcare organization.

HSE Required Courses

- IE 1106 - OPERATIONS IMPROVEMENT IN HEALTHCARE
- IE 1108 - HEALTH SYSTEMS ENGINEERING: QUANTITATIVE ANALYTICS
- Senior Projects - Focused on Healthcare

Approved Elective Courses for HSE

- IE 1014 - DATA BASE DESIGN
- IE 1102 - LEAN SIX SIGMA I (GREEN BELT)
- IE 1103 - LEAN SIX SIGMA II (BLACK BELT)
- IE 1122 - FUNDAMENTALS OF SYSTEMS ENGINEERING
- IE 1123 - PROJECT MANAGEMENT FOR ENGINEERS
- IE 1185 - STOCHASTIC MODELING AND DATA ANALYTICS IN HEALTHCARE OPERATIONS MANAGEMENT

Supply Chain Management Certificate

The Certificate in Supply Chain Management (CSCM) provides undergraduate engineering students with the opportunity to understand important concepts in supply chain management and develop technical and managerial skills which are highly valued in today's corporate environment. The program also offers an international travel experience for students to gain hands-on exposure to global supply chain organizations.

Supply chain management encompasses not only the design and planning of supply chain activities, but also the execution, control and monitoring that help companies build a competitive infrastructure and create net value. The supply chain covers all areas, not just manufacturing and services, but also includes suppliers, retailers, warehouses, logistics and customer service; all functional areas involved in receiving and filling a customer's order with a repeatable and satisfying experience. This certificate requires 15 credits to complete.

For engineering students (business students should see the requirements listed on the CBA website), the Certificate in Supply Chain Management requires students to take the following five courses:
IE 1080 - SUPPLY CHAIN ANALYSIS - 3 Credits (BUSQOM 1070 is for business students only)
BUSSCM 1730 - MANAGING GLOBAL SUPPLY CHAINS - 3 Credits

CBA Supply Chain Elective Course - 3 Credits - Choose one of the following:
   BUSSCM 1740 - PURCHASING & SUPPLY MANAGEMENT
   BUSSCM 1750 - REVENUE MANAGEMENT

Industrial Engineering Elective Course - 3 Credits - Choose one of the following:
   IE 1055 - FACILITY LAYOUT AND MATERIAL HANDLING (Note that since Industrial Engineering (IE) students are required to take IE 1055, they must take one of the other courses from this list. Prerequisites can be waived for non-IE engineering students on a case-by-case basis.)
   IE 1076 - TOTAL QUALITY MANAGEMENT
   IE 1079 - Logistic and Supply Chain Engineering
   IE 1102 -LEAN SIX SIGMA I (GREEN BELT)
   IE 1203 - WAREHOUSE OPERATIONS

Global Supply Chain Project Elective Course - 3 Credits - Choose one of the following:
   ENGR 1228 - EXCHANGE URUGUAY-UNIVERSITY OF MONTEVIDEO
   ENGR 1625 - ENGINEERING BUSINESS COLLABORATIONS IN INDIA
   ENGR 1600 - INTERNATIONAL TECHNOLOGY: INNOVATION AND LEADERSHIP
   BUSSPP 1740 - GLOBAL STRATEGY AND COMPETITIVE ADVANTAGE (does not require travel)
   Other international project courses may also be considered

In addition, the student must obtain a grade of C or better in each course counted toward the Certificate and a minimum QPA of 2.25 (C+ average) across all courses in the Certificate.

Major

Industrial Engineering

The areas of concentration available for Industrial Engineering students are as follows:

- Engineering Management
- Health Systems Engineering
- Operations Research & Computer Modeling
- Product Development & Manufacturing Systems

Information on all four areas of concentration can be found here.

Undergraduate Curriculum

The objectives of our undergraduate program are for our graduates to be:

- Successful professionals, who adapt to and drive changes in technology and our global society in their desired career path, including industrial engineering based careers, as well as other professional disciplines;
- Lifelong learners and pursuers of advanced knowledge;
- Leaders who serve their profession and/or community.

The IE faculty has committed itself to the broad, multidisciplinary approach needed to solve problems in today's organizations. In addition to core courses in industrial engineering, you will be exposed to the humanities and social sciences with a global focus and have the opportunity to select five technical electives. These technical electives may be chosen from specialized and advanced offerings of the industrial engineering department. In consultation with your advisor, these electives may also be selected from other programs in the University such as other engineering departments, the sciences, mathematics, economics, business, computer science, or information science.

Recognizing that engineering is an increasingly global profession, the undergraduate program is also committed to providing its graduates with the skills they need to compete on an international basis. Such skills will enable Pitt IE graduates to not only have a distinct employment advantage, but will also provide them with a cross-cultural awareness that will enhance their leadership abilities. This commitment is emphasized through an international requirement for all of our undergraduates for which students are expected to complete an international experience, or, in some cases
select an integrated set of humanities and social sciences courses with a global focus. The final term of our undergraduate program includes a capstone senior design course in which you, working in small teams with other students, will complete a semester long project in a corporate setting. These projects are sponsored by local industry through our Sponsor An Industrial Engineering Team (SAINT) program, jointly supervised by an individual from the company and an IE faculty member.

For more information on the industrial engineering program contact ugradie@pitt.edu or www.engineering.pitt.edu/industrial

Third Term

- MATH 0240 - ANALYTIC GEOMETRY AND CALCULUS 3
- IE 1040 - ENGINEERING ECONOMIC ANALYSIS
- IE 1054 - PRODUCTIVITY ANALYSIS
- IE 1070 - PROBABILITY, RANDOM VARIABLES, AND DISTRIBUTIONS
- ENGR Elective
- IE 1085 - DEPARTMENTAL SEMINAR

Credits: 16

Fourth Term

- MATH 0280 - INTRO TO MATRICES & LINEAR ALG
- IE 0015 - INTRODUCTION TO INFORMATION SYSTEMS ENGINEERING
- IE 1052 - MFG PROCESSES AND ANALYSIS
- IE 1071 - STATISTICAL TESTING AND REGRESSION
- Humanities or Social Science Elective 3
- IE 1085 - DEPARTMENTAL SEMINAR

Credits: 15

Fifth Term

- MATH 0290 - DIFFERENTIAL EQUATIONS or
- MATH 0413 - INTRO THEORETICAL MATHEMATICS
- IE 1051 - ENGINEERING PRODUCT DESIGN
- IE 1061 - HUMAN FACTORS ENGINEERING
- IE 1072 - DESIGN OF EXPERIMENTS & QUALITY ASSURANCE
- IE 1081 - OPERATIONS RESEARCH
- IE 1085 - DEPARTMENTAL SEMINAR

Credits: 15

Sixth Term

- IE 1035 - ENGINEERING MANAGEMENT
- IE 1055 - FACILITY LAYOUT AND MATERIAL HANDLING
- IE 1082 - PROBLSTC METH IN OPERATNS RES
- IE 1083 - SIMULATION MODELING
- ENGR Elective
• IE 1085 - DEPARTMENTAL SEMINAR

Credits: 15

Seventh Term

• IE 1080 - SUPPLY CHAIN ANALYSIS
• Technical Elective 1
• Technical Elective 2
• Technical Elective 3
• Humanities/Social Science Elective 4
• IE 1085 - DEPARTMENTAL SEMINAR

Credits: 15

Eighth Term

• IE 1090 - SENIOR PROJECTS
• Humanities/Social Science Elective 5
• Humanities/Social Science Elective 6
• Technical Elective 4
• Technical Elective 5
• IE 1085 - DEPARTMENTAL SEMINAR

Credits: 16

Minor

Industrial Engineering Minor

All other engineering majors can earn a Minor in Industrial Engineering by completing three required courses and two elective courses.

Required Courses

• ENGR 0020 - PROBABILITY AND STATISTICS FOR ENGINEERS 1
• IE 1054 - PRODUCTIVITY ANALYSIS
• IE 1081 - OPERATIONS RESEARCH

Elective Courses

Choose any 3 of the following courses.

• IE 1035 - ENGINEERING MANAGEMENT
• IE 1040 - ENGINEERING ECONOMIC ANALYSIS
• IE 1051 - ENGINEERING PRODUCT DESIGN
• IE 1052 - MFG PROCESSES AND ANALYSIS
• IE 1055 - FACILITY LAYOUT AND MATERIAL HANDLING
Additional Information

The student must earn a GPA of at least 2.0 in the five courses used to complete the requirements for the minor.

Department of Mechanical Engineering and Materials Science and Engineering

Materials Science and Engineering

Materials limitations often impede technological and social progress. The materials engineer applies special knowledge of the structure, behavior, and properties of materials to solve these engineering problems. The engineer may be concerned with developing and improving processes for producing metals and alloys or ceramics; developing new alloys or improving existing alloys; and/or achieving better use of alloys and other materials. New materials must be designed for a variety of functions, including structural, aesthetic, electrical, or magnetic and operating environments. Materials may come in forms so minute that the work is done under a microscope or in forms so large that special handling cranes are required.

Research efforts in the department involve work on the development of new high-strength steels, corrosion and oxidation, structural and electronic ceramics, smart materials, high-temperature materials, plastic deformation, phase transformations, and strengthening mechanisms. A number of graduate students are engaged in thesis research on these topics, and undergraduates are encouraged to work on related senior projects. The materials science and engineering program is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org. For more information on the program, contact undrmems@engr.pitt.edu or see http://www.engineering.pitt.edu/Departments/MEMS/.

Mechanical Engineering

Mechanical engineering is concerned with both energy use and the design of machines and systems in such sectors as transportation, manufacturing, materials handling, power generation, and environmental control. Mechanical engineers are involved in design, development, research, management, and related activities in these fields. The breadth and diversity of the profession requires an undergraduate curriculum that provides a sound foundation in the basic sciences, computational skills including use of computers, and the fundamentals of engineering and engineering design. This curriculum provides a base for future professional growth and is also an excellent background for those who wish to pursue careers in other professions including management, law, or medicine. The mechanical engineering program is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org. For more information on the program, contact undrmems@engr.pitt.edu or see http://www.engineering.pitt.edu/Departments/MEMS/.

Engineering Science

Engineering Science combines a study of an engineering disciple with the study of a basic science. This provides the educational background for the study of multi-disciplinary problems. Engineering Science is divided into four curricula: Engineering Physics, Nano-Physics/Materials Science, Nano-Chemistry/Bioengineering and Engineering Mechanics. These areas allow the study of problems in development of electronic and biologic materials, electronic and optical devices, and fluid and solid mechanics. Engineering science graduates are involved in design, development, research, management, and related activities in these fields. The breadth and diversity of the profession requires an undergraduate curriculum that provides a sound foundation in the basic sciences, computational skills, and the fundamentals of engineering and engineering design. This curriculum provides a base for future professional growth and is also an excellent background for those who wish to pursue careers in other professions including management, law, or medicine. The Engineering Science program is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org. For more information on the program, contact undrmems@engr.pitt.edu or see http://www.engineering.pitt.edu/Departments/MEMS/.
Certificate

Engineering Simulation in Design Certificate

Computational simulation has become an indispensable engineering tool across a broad spectrum of industries and fields of study. Simulation-based approaches provide engineers with the opportunity to extend the boundaries of traditional engineering design processes. However, understanding the role of simulation within the context of an engineering system or process is essential to the successful application of these tools.

The certificate program in Engineering Simulation in Design fosters a simulation-based problem solving approach and encourages students to identify opportunities to enhance engineering analysis and design through simulation. The program adopts a mindset that is a synthesis of computational and traditional approaches. Students will leverage practical simulation skills to explore and study interdisciplinary concepts.

The certificate is designed for undergraduate students and requires 15 credits to complete made up of the following areas:

Core Skills (6 credits)

Students will choose at least two:

- MEMS 1028 - MECHANICAL DESIGN I
- MEMS 1052 - HEAT AND MASS TRANSFER
- MEMS 1047 - FINITE ELEMENT ANALYSIS
- MEMS 1071 - APPLIED FLUID MECHANICS
- MEMS 1014 - DYNAMIC SYSTEMS

Simulation Skills (3 credits)

Students are required to take:

- MEMS 1120 - APPLIED ENGINEERING SIMULATION IN DESIGN

Integrated Skills (3 credits)

Students will choose at least one:

- MEMS 1065 - THERMAL SYSTEMS DESIGN
- MEMS 1043 - SENIOR DESIGN PROJECT
- ENGR 1050 - PRODUCT REALIZATION

Each of the above courses is project based and offers the potential for student exposure to analysis and design of an integrated system. Students enrolled in the Engineering Simulation in Design certificate program must include a simulation component to their adopted project. The program coordinator will evaluate and approve projects.

Practical Skills (3 credit total)

Certificate candidates must enroll in the simulation workshop for three terms. The 1-credit workshop will be offered every term and will meet once per week. The workshop will provide a support forum for students engaged in simulation problems across the certificate program courses.

- MEMS 1121 - APPLIED ENGINEERING SIMULATION IN DESIGN (workshop)

Additional Information
For additional information about the certificate, please contact the following:

David Schmidt
412-624-9755
509 Benedum Hall
david.schmidt@pitt.edu

**Nuclear Engineering Certificate**

The undergraduate certificate in Nuclear Engineering is a five-course sequence, consisting of three nuclear engineering courses and two discipline-specific courses related to nuclear engineering from the various engineering departments. Any undergraduate engineering students in the Swanson School of Engineering can earn the certificate in conjunction with an undergraduate engineering degree. Qualified students in the Dietrich School of Arts and Sciences can pursue the certificate with approval from the Nuclear Engineering program director.

After earning the certificate, students should be able to do the following: apply the concepts of nuclear and reactor physics, reactor kinetics, radiation protection, fuel depletion, and heat transfer to engineering problems; apply engineering skills, knowledge, and expertise to nuclear energy problems; for light water reactors, support engineering projects for the design of the reactor core and the reactor coolant system; assess important social and technical issues related to nuclear science and technology; describe and explain the nuclear fuel cycle from mining to disposal including reprocessing and waste management.

Interested students should visit http://www.engineering.pitt.edu/nuclear/ or contact either the Director or Associate Director of the Nuclear Engineering program; currently, these posts are occupied by Dr. Heng Ban (heng.ban@pitt.edu) and Dr. Tom Congedo (tvc9@pitt.edu), respectively.

**Requirements**

Fifteen (15) credits are required to complete the certificate. A minimum 2.5 GPA is required for students to participate in the certificate. Students must obtain a GPA of at least 2.5 for the courses taken. All undergraduate certificate students are required to complete three (3) courses from the list below as well as two (2) department specific courses:

- ENGR 1700 - INTRODUCTION TO NUCLEAR ENGINEERING
- ENGR 1701 - FUNDAMENTALS OF NUCLEAR REACTORS
- ENGR 1702 - NUCLEAR PLANT TECHNOLOGY

Plus two (2) Degree Specific Courses

Students should select two (2) courses from the list below that are appropriate to their degree of study.

**Bioengineering**

- IE 1061 - HUMAN FACTORS ENGINEERING
- BIOENG 1810 - BIOMATERIALS AND BIOCOMPATIBILITY

**Chemical Engineering**

- CHE 0200 - CHEMICAL ENGINEERING THERMODYNAMICS
- CHE 0300 - TRANSPORT PHENOMENA
- CHE 0400 - REACTIVE PROCESS ENGINEERING
- CHE 0500 - SYSTEMS ENGINEERING 1: DYNAMICS AND MODELING
Civil Engineering

- CEE 1340 - CONCRETE STRUCTURES 1
- CEE 1514 - ENVIRONMENTAL IMPACT ASSESSMENT
- CEE 2340 - CONCRETE STRUCTURES 2
- CEE 2343 - PRESTRESSED CONCRETE

Electrical and Computer Engineering

- ECE 1150 - COMPUTER NETWORKS
- ECE 1160 - INTRODUCTION TO EMBEDDED SYSTEM DESIGN
- ECE 1673 - LINEAR CONTROL SYSTEMS
- ECE 1769 - POWER SYSTEM ANALYSIS 1

Engineering Science

- MEMS 1047 - FINITE ELEMENT ANALYSIS
- MEMS 1052 - HEAT AND MASS TRANSFER
- MEMS 1063 - PHASE TRANSFORMATION AND MICROSTRUCTURE EVOLUTION
- MEMS 1071 - APPLIED FLUID MECHANICS

Industrial Engineering

- ENGR 1500 - ETHICAL DILEMMAS BALANCING COST, RISK, AND SCHEDULING
- IE 1062 - DATA MINING
- IE 1076 - TOTAL QUALITY MANAGEMENT
- IE 1086 - DECISION MODELS
- IE 1089 - ADDITIVE MANUFACTURING

Mechanical Engineering and Materials Science

- MEMS 1030 - MATERIAL SELECTION
- MEMS 1033 - FRACTURE MECHANICS FOR PRODUCT DESIGN AND MANUFACTURING
- MEMS 1045 - AUTOMATIC CONTROLS
- MEMS 1047 - FINITE ELEMENT ANALYSIS
- MEMS 1052 - HEAT AND MASS TRANSFER
- MEMS 1063 - PHASE TRANSFORMATION AND MICROSTRUCTURE EVOLUTION
- MEMS 1065 - THERMAL SYSTEMS DESIGN
- MEMS 1070 - MECHANICAL BEHAVIOR OF MATERIALS
- MEMS 1071 - APPLIED FLUID MECHANICS

Non-engineering Math and Science Majors

To complete the three (3) core Nuclear Engineering courses, provide the Director of the Nuclear Engineering a proposal for two additional courses in the student's major and obtain the Director's signed approval. The proposal must include the following:
• two (2) courses from the student's major
• the catalog description of the two (2) courses
• a short statement on how these two (2) courses complement the three (3) core nuclear courses and/or apply to nuclear engineering.

This proposal will be signed by the Director or Associate Director of the Nuclear Engineering program and kept on record by the MEMS Department.

Major

Engineering Science

The following areas of concentration are available for Engineering Science students:

The Engineering Science Program is designed for students who have a strong interest in science and mathematics as well as a desire to acquire the skills and perspective of engineering. The Engineering Science Program offers flexible curricula in several interdisciplinary areas of concentration. The program is built on sequences of courses from multiple science and engineering programs. All areas of concentration combine in-depth exposure to both science and engineering. All areas of concentration combine in-depth exposure to both science and engineering and include the opportunity for both a team capstone, as well as an individual project experience. The overall goal of the program is to develop each student's ability to think analytically across disciplines and develop a knowledge base well suited to tackle future technical challenges that will require a thorough understanding of a discipline in the physical sciences and/or mathematics combined with engineering. Interested students are encouraged to pursue the Engineering Science degree jointly with the University Honors College (UHC) by completing the requirements for Engineering Science and satisfying the special degree requirements of the UHC. The Engineering Science program is ideal preparation for graduate school in a wide range of disciplines, for rewarding careers in industry, and is an excellent background for those who wish to pursue careers in other professions, such as management, law, education, or medicine.

NOTE: The Engineering Physics curriculum (which had been available as a separate Engineering Physics Program until 2010) is now an area of concentration within Engineering Science.

The program objectives for Engineering Science are to produce engineers who build successful, diverse careers based on:

• an understanding of the physical/life sciences, engineering analysis and design, and interdisciplinary problem solving;
• a commitment to ongoing professional development as exemplified by, for example, graduate study, training, conference participation, and certification;
• advancement and leadership in professional and/or community life.

For more information on the program, contact undrmems@pitt.edu or see http://www.engineering.pitt.edu/Departments/MEMS/_Content/Undergraduate/Engineering-Science/Engineering-Science-Page-Overview.

Engineering Science Undergraduate Curriculum

The Engineering Science Program currently offers the following areas of concentration:

• Engineering Physics Concentration
• Nanotechnology Concentration Physics/Materials Emphasis or Nanotechnology Concentration Chemistry/Bioengineering Emphasis and
• Engineering Mechanics Concentration
Materials Science and Engineering

The following areas of concentration are available for Materials Science and Engineering students:

Ferrous Physical Metallurgy Concentration

Materials Science and Engineering Undergraduate Curriculum

The undergraduate program is designed to give the student a basic understanding of the structure and properties of materials, the principles underlying the processing of materials, and the concepts of engineering design and problem solving. Both theory and practice are emphasized. Laboratory experiences are integrated into the curriculum, and a variety of professional and engineering science electives are available. When desirable, specialized programs can be arranged for the students with well-defined interests and goals. Students are prepared to accept positions in production, research, and management, in both the basic materials and advanced or high-tech materials industries. This versatile education is a strong preparation for graduate work in metallurgy and materials and other related fields.

The major objectives of the materials science and engineering program are to

- Demonstrate successful application of materials science and engineering knowledge and skills for industry, public sector organizations, or their profession.
- Pursue life-long learning through advanced professional degrees, graduate studies in materials science or another engineering discipline, professional training or engineering certification.
- Demonstrate professional and intellectual growth as leaders in their profession and/or community.

Third Term

- MATH 0240 - ANALYTIC GEOMETRY AND CALCULUS 3
- MATH 0280 - INTRO TO MATRICES & LINEAR ALG
- ENGR 0022 - MATERIALS STRUCTURE AND PROPERTIES
- ENGR 0135 - STATICS & MECHC OF MATERIALS 1
- MEMS 0024 - INTRODUCTION TO MECHANICAL ENGINEERING DESIGN
- MEMS 1085 - DEPARTMENTAL SEMINAR

Credits: 16

Fourth Term

- MATH 0290 - DIFFERENTIAL EQUATIONS
- ENGR 0145 - STATICS & MECHC OF MATERIALS 2
- MEMS 0031 - ELECTRICAL CIRCUITS
- MEMS 0040 - MATERIALS AND MANUFACTURING
- MEMS 0048 - THERMODYNAMICS OF MATERIALS
- Communication Skills Elective - 3 Credits
- MEMS 1085 - DEPARTMENTAL SEMINAR

Credits: 18
Fifth Term

- MEMS 1010 - EXPERIMENTAL METHODS IN MATERIALS SCIENCE AND ENGINEERING
- MEMS 1052 - HEAT AND MASS TRANSFER
- MEMS 1053 - STRUCTURE OF CRYSTALS AND DIFFRACTION
- MEMS 1058 - ELECTROMAGNETIC PROPERTIES OF MATERIALS
- MEMS 1059 - PHASE EQUILIBRIA IN MULTI-COMPONENT MATERIALS
- MEMS 1085 - DEPARTMENTAL SEMINAR

Credits: 15

Sixth Term

- MEMS 1011 - STRUCTURE AND PROPERTIES LAB
- MEMS 1028 - MECHANICAL DESIGN I
- MEMS 1063 - PHASE TRANSFORMATION AND MICROSTRUCTURE EVOLUTION
- MEMS 1070 - MECHANICAL BEHAVIOR OF MATERIALS
- MSE Technical Elective - 3 Credits
- MEMS 1085 - DEPARTMENTAL SEMINAR

Credits: 15

Seventh Term

- MEMS 1030 - MATERIAL SELECTION
- MEMS 1079 - SENIOR MATERIALS RESEARCH PROJECT
- MSE Technical Elective - 3 Credits
- Humanities/Social Science Elective - 3 Credits
- Humanities/Social Science Elective - 3 Credits
- MEMS 1085 - DEPARTMENTAL SEMINAR

Credits: 15

Eighth Term

- MEMS 1043 - SENIOR DESIGN PROJECT
- MSE Technical Elective - 3 Credits
- Engineering Elective - 3 Credits
- Humanities/Social Science Elective - 3 Credits
- Humanities/Social Science Elective - 3 Credits
- MEMS 1085 - DEPARTMENTAL SEMINAR

Credits: 15

Mechanical Engineering
The following areas of concentration are available for Mechanical Engineering students:

Ferrous Physical Metallurgy Concentration

Mechanical Engineering Undergraduate Curriculum

In the first two years, the mechanical engineering curriculum concentrates on the fundamentals of sciences, mathematics, and engineering. The last two years provide increased depth in the engineering sciences, including fluid mechanics, heat transfer, and systems analysis and also provide exposure to engineering applications, such as mechanical measurements, manufacturing, mechanical design, and thermal systems. Sufficient technical electives are allowed to permit each student to explore areas of special interest.

Course work in the social sciences and humanities is included for the enhancement of the student's awareness of the importance of social, political, and economic problems in the practice of engineering. Where appropriate, the upper-level courses introduce consideration of human values, social benefits, and constraints to prepare future practicing engineers to be responsive to such concerns.

The major objectives of the program are to:

- Demonstrate successful application of mechanical engineering knowledge and skills for industry, public sector organizations or their profession.
- Pursue life-long learning through advanced professional degrees, graduate studies in engineering, professional training or engineering certification.
- Demonstrate professional and intellectual growth as leaders in their profession and/or community.

Third Term

- MATH 0240 - ANALYTIC GEOMETRY AND CALCULUS 3
- MATH 0280 - INTRO TO MATRICES & LINEAR ALG
- ENGR 0022 - MATERIALS STRUCTURE AND PROPERTIES
- ENGR 0135 - STATICS & MECHC OF MATERIALS 1
- MEMS 0024 - INTRODUCTION TO MECHANICAL ENGINEERING DESIGN
- MEMS 1085 - DEPARTMENTAL SEMINAR

Credits: 16

Fourth Term

- MATH 0290 - DIFFERENTIAL EQUATIONS
- ENGR 0145 - STATICS & MECHC OF MATERIALS 2
- MEMS 0031 - ELECTRICAL CIRCUITS
- MEMS 0051 - INTRODUCTION TO THERMODYNAMICS
- Humanities/Social Science Elective - 3 Credits
- MEMS 1015 - RIGID-BODY DYNAMICS
- MEMS 1085 - DEPARTMENTAL SEMINAR

Credits: 18
Fifth Term

- MEMS 0071 - INTRODUCTION TO FLUID MECHANICS
- MEMS 1014 - DYNAMIC SYSTEMS
- MEMS 1028 - MECHANICAL DESIGN I
- Engineering Elective - 3 Credits
- Humanities/Social Science Elective - 3 Credits
- MEMS 1085 - DEPARTMENTAL SEMINAR

Credits: 15

Sixth Term

- MEMS 0040 - MATERIALS AND MANUFACTURING
- MEMS 1029 - MECHANICAL DESIGN II
- MEMS 1041 - MECHANICAL MEASUREMENTS I
- Open Elective - 3 Credits
- Humanities/Social Science Elective - 3 Credits
- MEMS 1085 - DEPARTMENTAL SEMINAR

Credits: 15

Seventh Term

- MEMS 1042 - MECHANICAL MEASUREMENTS II
- MEMS 1052 - HEAT AND MASS TRANSFER
- ME Technical Elective - 3 Credits
- Dynamic Systems Elective - 3 Credits
- Humanities/Social Science Elective - 3 Credits
- MEMS 1085 - DEPARTMENTAL SEMINAR

Credits: 15

Eighth Term

- MEMS 1043 - SENIOR DESIGN PROJECT
- ME Technical Elective - 3 Credits
- ME Technical Elective - 3 Credits
- ME Technical Elective - 3 Credits
- Humanities/Social Science Elective - 3 Credits
- MEMS 1085 - DEPARTMENTAL SEMINAR

Credits: 15

Minor
Materials Science and Engineering Minor

Requirements

Undergraduate engineering students may earn a Minor in Materials Science Engineering by completing five courses.

- ENGR 0022 - MATERIALS STRUCTURE AND PROPERTIES
- MEMS 0040 - MATERIALS AND MANUFACTURING
- MEMS 1053 - STRUCTURE OF CRYSTALS AND DIFFRACTION
- MEMS 1059 - PHASE EQUILIBRIA IN MULTI-COMPONENT MATERIALS
- MEMS 1063 - PHASE TRANSFORMATION AND MICROSTRUCTURE EVOLUTION

Mechanical Engineering Minor

Undergraduate engineering students can earn a Minor in Mechanical Engineering by completing two required courses and three elective courses in one of four focused option areas.

Required Courses

- MEMS 0024 - INTRODUCTION TO MECHANICAL ENGINEERING DESIGN
- MEMS 1028 - MECHANICAL DESIGN I

Focus Options/Elective Courses

Thermal-Fluids Option

- MEMS 0051 - INTRODUCTION TO THERMODYNAMICS
- MEMS 0071 - INTRODUCTION TO FLUID MECHANICS
  and either
- MEMS 1051 - APPLIED THERMODYNAMICS or
- MEMS 1071 - APPLIED FLUID MECHANICS

Dynamic Systems Option

- MEMS 1014 - DYNAMIC SYSTEMS
- MEMS 1015 - RIGID-BODY DYNAMICS
- MEMS 1045 - AUTOMATIC CONTROLS

Mechanical Design Option

- MEMS 1029 - MECHANICAL DESIGN II
- MEMS 1033 - FRACTURE MECHANICS FOR PRODUCT DESIGN AND MANUFACTURING
- MEMS 1047 - FINITE ELEMENT ANALYSIS

Mechanical Measurements Options

- MEMS 1014 - DYNAMIC SYSTEMS
Additional Information

Depending upon concentration, Bioengineering students have several different possibilities to earn a Mechanical Engineering minor.

- **Bioimaging & Signals concentration** students: none of the courses in any option can be used as a concentration elective. Two courses can be used to satisfy the Bioengineering 2-course, 6-credit advanced engineering/science elective requirement. Two, and possibly three, courses are extra and on your own.
- **Biomechanics concentration** students: MEMS 0024 and MEMS 1028 are concentration electives.
- **Thermal-Fluids Option**
  BIOENG 1210 is a required course for BioE majors. MEMS 1071 is a concentration elective. MEMS 1071 can be used to satisfy the Bioengineering 2-course, 6-credit advanced engineering/science elective requirement.

- **Dynamics Systems Option**
  BIOENG 1255 is a required course for BioE majors. MEMS 1015 is a concentration elective. MEMS 1045 can be used to satisfy the Bioengineering 2-course, 6-credit advanced engineering/science elective requirement.

- **Mechanical Design Option**
  BIOENG 1161 is a required course for BioE majors. MEMS 1033 and MEMS 1047 can be used to satisfy the Bioengineering 2-course, 6-credit advanced engineering/science elective requirement.
- **Mechanical Measurements Option**
  BIOENG 1255 is a required course for majors. MEMS 1041 and MEMS 1042 can be used to satisfy the Bioengineering 2-course, 6-credit advanced engineering/science elective requirement.

- **CE concentration** students: all options can use two of the courses to satisfy the Bioengineering 2-course, 6-credit advanced engineering/science elective requirement. At least one other course is extra and on your own.
- **MPE concentration** students: MEMS 0024 and MEMS 1028 are concentration electives.
- **Thermal-Fluids Option**
  BIOENG 1210 is a required course for BioE majors. MEMS 1071 is a concentration elective. MEMS 0071 can be used to satisfy the Bioengineering 2-course, 6-credit advanced engineering/science requirement.

- **Dynamics Systems Option**
  BIOENG 1255 is a required course for BioE majors. MEMS 1015 and MEMS 1045 can be used to satisfy the Bioengineering 2-course, 6-credit advanced engineering/science elective requirement.

- **Mechanical Design Option**
  BIOENG 1161 is a required course for BioE majors. MEMS 1033 and MEMS 1047 can be used to satisfy the Bioengineering 2-course, 6-credit advanced engineering/science elective requirement.

- **Mechanical Measurements Option**
  BIOENG 1255 is a required course for majors. MEMS 1041 and MEMS 1042 can be used to satisfy the Bioengineering 2-course, 6-credit advanced engineering/science elective requirement.

**School of Engineering Faculty**

School of Health and Rehabilitation Sciences

Established in 1969 as a health sciences school of the University of Pittsburgh, SHRS stands on its solid reputation as an international leader in rehabilitation and disabilities education, research and community service, improving the lives and independence of all people with a focus on people at risk for or having chronic conditions or disabilities and those who have traditionally been underserved and underrepresented.

Our Vision

To be a catalyst for a world free of barriers and disparities that allows all people, regardless of health, to have opportunities to participate in life to the fullest; to be accomplished through education, research, and service.

Our Mission

To advance health, rehabilitation and reintegration service delivery through teaching, research and professional service.

We advance our Mission and pursue our Vision by:

- Providing an unparalleled environment for education and training
- Supporting an inter-professional approach to research to address challenges of people with acute and chronic conditions and disabilities
- Collaborating with local, national and international partners to address and improve integration of rehabilitation services in health care delivery systems, community engagement and models of care

Our Values

- **Advocacy** - for those less fortunate or with limited access seeking greater independence
- **Excellence** - in all endeavors and facets of our work
- **Inclusion** - in student enrollment and faculty and staff composition with a major focus on inclusion of people with disabilities
- **Innovation** - in teaching and educational curricula, research, technology, and product development
- **Integrity** - through uncompromising adherence to ethical principles, truthfulness, dignity and respect in all that we do
- **Service** - to all, including the disabilities community, in regard to rehabilitation and health services with a commitment to social responsibility

Philosophy of Undergraduate Education

The SHRS faculty base their teaching upon research studies, clinical service, and participation in their respective professional associations. Faculty research and service typically occurs through multi-disciplinary collaboration in diverse health care and research environments. Consequently, both entry-level and advanced students are exposed to state-of-the-art curricula, which are continually reviewed from the perspective of new research findings, technological developments, changing public policy and accepted clinical and management practice.

Our students are educated and trained to question the basis of current practice, and to challenge prevailing models and assumptions. The entry-level curricula reflect the importance of effective team participation in an inter-disciplinary and rapidly changing environment. Emphasis is given to the student's development of analytical problem-solving skills and human relations skills required for effective clinical and supervisory practice. The student is confronted with the transition between a professional commitment to providing high quality care and service, while recognizing the effects of competitive pressures and cost constraints upon the health care organization.
The primary objective of our entry-level professional programs is to educate knowledgeable, skilled, and ethically responsible practitioners, committed to their respective professions and to the high standards of health care and rehabilitation services.

The primary objective of our pre-professional programs is to provide students with an excellent preparation for entry-level professional health care educational programs that are offered at the graduate level, either at the University of Pittsburgh or other universities.

Upper-Division Programs and Certificates

SHRS is an upper-division school at the University of Pittsburgh which means students are required to have a minimum of approximately 60 college credits before entering our undergraduate entry programs. Each program has prerequisite courses that students typically take during their first and sophomore years while simultaneously earning general education credits. Students then apply to an SHRS programs during sophomore year, roughly after completing 45 credits. Students may be in the process of completing all required credits and admission requirements when applying to SHRS.

Undergraduate Programs

- Communication Science (BA)
- Emergency Medicine (BS)
- Health Information Management (BS)
- Nutrition Science (BS)
- Rehabilitation Science (BS)

Accelerated Programs

- Athletic Training (BS-MS)
- Dietitian Nutritionist Program (BS-MS)

Certificate programs offered through the undergraduate program in Rehabilitation Science:

- Assistive Technology in Rehabilitation
- Pathokinesiology in Rehabilitation
- Psycho-Social Issues in Rehabilitation and Personal Care

Admission

SHRS is committed to fostering a diverse and inclusive academic environment to create a more equitable health care system by welcoming applicants of all abilities/disabilities, religions, marital statuses, familial statuses, sexes, ages, sexual orientations, veteran statuses, national origins, ancestries, races, colors, genetic information, and gender identities and expressions.
Each upper-division undergraduate and accelerated program at SHRS has specific admission requirements. Please visit the SHRS Program and Course Offerings section of this catalog for detailed information.

Application Procedures

SHRS is moving to a new application platform. Please visit the SHRS website to access information about applying to enter our programs in Fall 2022.

- Students enrolled at the University of Pittsburgh (all campuses) apply to SHRS undergraduate and accelerated programs by completing an internal upper-level application.
- Transfer students must apply to the University of Pittsburgh through the Pitt Admissions Office. Please visit https://admissions.pitt.edu/transfer/ for more information. Transfer students must also submit application materials directly to SHRS.

Admission Status

Full status is granted to those who have met all admission criteria and have been admitted either as full-time or part-time students for study toward the baccalaureate degree. Students enrolled in accelerated programs must maintain a 3.000 minimum GPA to progress from the undergraduate to graduate portion of their program.

Conditional status is granted to those who are in the process of completing prerequisite courses. These students must complete all requirements successfully prior to matriculation. At the discretion of the Department Chair, students may be admitted to an SHRS undergraduate program with a maximum of two courses of prerequisite work remaining to be taken in their designated program. Any outstanding prerequisite work taken while enrolled in an SHRS undergraduate program must be completed by the end of the fall term of the senior year.

Non-Degree status is granted to those who enroll at SHRS to take courses for credit without reference to a degree.

Admission to most SHRS undergraduate programs is on a competitive basis as class sizes are limited. Students are strongly encouraged to complete as many prerequisites as possible prior to applying and to apply by the application deadlines published by the individual departments. Applications will be evaluated, and qualified applicants will be admitted until classes are filled.

Reinstatement

Reinstatement is not guaranteed. Students who have been dismissed from SHRS for academic reasons or who have not enrolled at SHRS for three consecutive terms may apply for reinstatement. To request reinstatement a student must initiate the request via a letter to the department chair. This letter must be submitted at least three months prior to the beginning of the term for which the student is requesting reinstatement. The faculty within the student's academic program will review the request for reinstatement. The review will be conducted with consideration given to the following criteria:

A period of one year must have elapsed from the time the student is dismissed to the time in which he/she is reinstated.

- Demonstration of academic success since leaving the program
- Demonstration of personal and/or professional development since leaving the program
- Space available within the program of study

Financial Information

Tuition and Fee Rates

Tuition and fee rates are available on the Financial Information page, in the University Catalog. The tuition chart is online at Undergraduate Tuition & Mandatory Fees.

Full-time students
Undergraduate students registered for 12 to 18 credits in the Fall and Spring Terms are regarded as full-time students, and are assessed the current undergraduate "flat" tuition rate for their academic center. Undergraduate students registered for fewer than 12 credits are considered part-time, and are billed on a per-credit basis.

Students will be charged per credit for each credit exceeding the maximum full-time credit limit.

**Summer Term**: All students are billed on a per-credit basis.

**Residency/Reduced Tuition**

Students who reside in the Commonwealth of Pennsylvania may be eligible for reduced tuition through state appropriations.

Eligibility is determined by criteria outlined in the University of Pittsburgh Guidelines for Determining Eligibility for Reduced Tuition Rates, available online at http://payments.pitt.edu/pa-tuition-rate-eligibility/

**Additional Fees**

**Lab Fees**: Lab courses may incur an additional fee to cover laboratory expenses. These fees will be charged to the student directly and will appear on the invoice generated by Student Accounts in addition to tuition and other fees each semester.

**Financial Obligation of Students**

The University of Pittsburgh has the right to withhold services if a student defaults on any financial obligation until repayment arrangements have been made that are satisfactory to the office or department to which the debt is owed.

**Scholarships, Grants and Financial Aid**

If you are interested in applying for loans, scholarships, grants, or work study, you should call, write or visit the University of Pittsburgh, Office of Admissions and Financial Aid, Alumni Hall, Pittsburgh, PA 15260, 412-624-PITT, https://oafa.pitt.edu/ See also the SHRS website financial information page.

**SHRS Scholarships and Awards**

General information on scholarship and awards can be found at: SHRS Financial Information Page on our website. Contact individual departments for information on scholarships and awards specific to your area of study.

---

**SHRS Academic Regulations**

**Academic Integrity Policy**

Students have the responsibility to be honest and to conduct themselves in an ethical manner while pursuing academic studies. Students have the right to be treated by faculty in a fair and conscientious manner in accordance with the ethical standards generally recognized within the academic community (as well as those recognized within the profession). Should a student be accused of a breach of academic integrity or have questions regarding faculty responsibilities, procedural safeguards including provisions of due process have been designed to protect student rights. SHRS Guidelines on Academic Integrity: Student and Faculty Obligations and Hearing Procedures.

In addition to the University-wide regulations and standards detailed in the section on General Academic Regulations, each student in SHRS is expected to be familiar with these school-specific regulations and academic Standards:

- It is the student's responsibility to review her/his academic standing, to identify undergraduate program requirements and prerequisites for intended undergraduate program(s) and to monitor their completion.
• All required and prerequisite coursework must be taken for a grade, when letter grade option is available.
• Students must receive a C- or better in each required course and SHRS elective course to earn credit.
• For non-SHRS, non-required coursework, students must earn a grade of D or better (C required for transfer credits).
• All Pitt grades will still appear on the transcript and be calculated into the GPA unless the student repeats the course. However, credits from courses in which student has earned unacceptable grades will not be counted toward graduation.
• Students who receive a grade below a C- in a required course must repeat that course and attain a grade of C- or better.
• Students will not be permitted to register for a course until they attain a C- or better in its prerequisite.
• Failure to receive an acceptable grade after the second repeat of a required course may result in the student being dismissed from the program and SHRS.

SHRS General Education Requirements

SHRS is updating our General Education requirements. Students entering the University of Pittsburgh in Fall 2021 as first-year students, students currently enrolled at the University of Pittsburgh and external transfer students entering the upper-level programs offered at SHRS in Fall 2023, must complete the new general education requirements before graduating. Our General Education Requirements are included in our upper-level program prerequisites and curriculum requirements; therefore, changes will be reflected in prerequisites and curriculum requirements.

</table>
Allowable Credits

Students enter the upper-division undergraduate and accelerated programs at SHRS with approximately 60 credits and are required to take all courses required by their program at SHRS. Up to 30 additional credits of undergraduate coursework completed at a four-year academic institution may be granted up to pending approval of the Program Director. The Program Director must:

- review and approve these additional credits,
- indicate additional classes/credits on the student's Plan of Study, and
- submit to the Director of Student Services, Registrar, a request to accept additional credits.

- all required academic work for a degree in SHRS, including courses for which advanced-standing credit has been granted, must be completed within ten (10) consecutive calendar years. Departments have the discretion to lessen this number for specific coursework deemed integral to the course of study in a particular discipline.

Exception: Paramedics and active-duty military students with equivalent licensure enter the Emergency Medicine (BS) program with 90 credits.

Some SHRS programs may allow students to earn particular course credits by successful completion of the following:

**Advanced Placement (AP) and International Baccalaureate (IB) Credits**

See https://oafa.pitt.edu/apply/ap-ib-credit/ for credits and course equivalencies currently granted by the University of Pittsburgh for Advanced Placement and International Baccalaureate examinations.

**College Level Examination Program (CLEP)**

SHRS does NOT accept CLEP general examination credits.

**Credit by Course Examination**

The following regulations govern this procedure:

- The individual department shall determine specific courses open to examination.
- A student may not earn credit by examination if s/he has previously taken the course.
- Student may obtain the form, Credit by Course Examination, from the Office of Student Services. Enrolled students must apply for examination during the term preceding the term in which the course is scheduled. Newly admitted students may apply and take the examination early in the term in which the course is taught.
- The Credit by Course Examination form and a check or money order for the appropriate fee must be processed in the Cashier's Office, G-7 Thackeray Hall, for validation prior to taking the examination. Upon passing the examination, the department will submit the Credit by Course Examination form to Student Services. Students will receive advanced standing credit for the course, which may be applied towards graduation. If a student fails the exam, neither a failing grade nor credits will be posted on the transcript. An exemption examination may be taken only once per course. The faculty of each Department will determine the number of courses that can be exempted by students enrolled in that academic program.

**Online Courses**
The acceptance of online coursework is at the discretion of the department to which the student is applying. All online coursework must be taken at a regionally accredited institution.

**Reserve Officer Training Corps (ROTC)**

A total of four (4) ROTC credits earned by students will be accepted for purposes of admission and graduation. Grades for ROTC courses will be included in calculating the student's GPA.

**Transfer Credit Policy**

- At the time of application coursework completed outside the University of Pittsburgh is evaluated by the to determine if it meets the University and SHRS policy required for transfer.
- A maximum of 60 credits can be transferred from a two-year degree program; and a maximum of 90 from a four-year college/university.
- Courses must be passed with a grade of C or better and must be earned at an appropriately accredited institution. Courses must have reasonable equivalents at the University of Pittsburgh to be eligible for transfer. When requested, students are responsible for supplying descriptions for courses taken elsewhere.
- The number of credits granted for a given course cannot exceed the number awarded for the course on the transcript of the school where the course was taken, or the number earned for the corresponding course at the University of Pittsburgh.
- Credits earned on the quarter system will be converted into semester credits. A quarter credit is equal to two-thirds of a semester credit (e.g., five quarter-system credits equal three semester credits, and three quarter-system credits equal two semester credits).
- SHRS accepts credits, but not grades, for transfer. Consequently, any courses that are accepted for transfer will be used as credit toward graduation but will not be calculated into the student's GPA at the University of Pittsburgh.
- Contact admissions@shrs.pitt.edu for information about transfer credit evaluation.
- Please note: All transfer credits are subject to re-evaluation when a student transfers from one school to another within the University of Pittsburgh.

**Transfer Students Credit Evaluation**

Upon application, transfer students will receive a formal credit evaluation. Following admission, transfer students will receive formal notification from SHRS indicating which requirements have been satisfied and if any prerequisite coursework or credits are outstanding.

**Current SHRS Students taking courses off campus for transfer credit**

Current SHRS students in good academic standing (cumulative GPA of at least 2.00), including students admitted to SHRS who need to complete prerequisites prior to starting their program, may attend another accredited institution in order to complete their degree requirements, provided they receive prior approval from the SHRS Dean's office. Students will be required to fill out an approval form and provide appropriate course descriptions. Students will not receive credit for courses taken without advance approval. SHRS students may not enroll in courses outside the University of Pittsburgh in the semester they are graduating from SHRS.

**Advising**

Academic and faculty advisors for SHRS undergraduate students are assigned by the Program Directors. Students are notified of the name of their advisor by their Department.

**Change of Advisor**
If either the student or his or her assigned advisor prefers, the student can choose another advisor. The student must obtain a Change of Academic Advisor form, located on the SHRS website under forms, complete the form and secure the required signatures, and return the form to the Office of Student Services. As a general rule, students who have more than 50% of the credits required for graduation should not initiate change of advisor procedures.

More information on Advisor roles and responsibilities can be found in the SHRS Undergraduate Handbook.

Plan of Study

Every student in SHRS must have a Plan of Study on file with their department. Any revisions to the Plan of Study must be approved by the academic/faculty advisor or Department Chair.

To be certified for graduation, students must have successfully completed all courses outlined in their final Plan of Study as well as any other requirements for the degree. A final Plan of Study will be submitted to Student Services, by the department administrator in the graduating term.

Dual Degree Option

- Students may pursue dual degrees within SHRS or between SHRS and another school at the University. SHRS follows the University policy concerning dual degrees.
- The student must complete 150 credits accepted by the University.
- The student must complete all requirements necessary to complete each degree.
- The student must receive both degrees simultaneously.
- The student must be admitted and enrolled in SHRS as his/her primary academic center for half the terms necessary to complete both degrees, typically this is 4-5 semesters.
- Students must contact SHRS Admissions Office to be admitted prior to the midpoint of their studies.

University Honors College

Students enrolled in SHRS programs are eligible for membership in the university Honors College and to participate in earning Honors College recognition. For more information and to learn more about the various levels of engagement, go to the following links for Honors Outside the Classroom Curriculum (OCC) Honors OCC, Honors Distinction, Honors Distinction, and Honors Joint Degree.

Independent Study

The independent study allows the student to pursue independent academic work for credit. The independent study must be supervised by an SHRS approved faculty member. To register for an independent study, the student must:

- identify and develop an independent study project with independent study supervisor to include objectives for the independent study, methods to be used to meet those objectives, and measurable assessment methods for determining degree to which objectives were met. The independent study must have an academic focus, and the academic rigor of the objectives and assessment methods will determine the number of credits to be earned.
- complete the Independent Study form (Found on the SHRS website)
- have Independent Study form approved and signed by the IS supervisor, academic/faculty advisor, and Associate Dean of Undergraduate Studies
copy Independent Study form as necessary
submit an Independent Study form, Enrollment form, and have advisor send Student Services an approval email to receive a permission number
enroll online for the independent study course

Clinical Education and Directed Practice

- all clinical education sites must have current contracts with the University of Pittsburgh
- each program's clinical education coordinator will assign students to their clinical education site
- student must use an Enrollment Form to register for appropriate clinical education and submit other forms as directed by clinical education coordinator and listed below
- student must provide proof of HIPAA certification with registration
- student must provide proof of Blood Borne Pathogen certification with registration
- student is required to carry personal health insurance
- student must provide proof of having undergone a physical exam and blood work as well as proof of vaccinations.
- list of exam and vaccination requirements and required form will be provided by the clinical education coordinator

Some SHRS programs require that students complete clinical education at facilities internal or external to the University and may require completion of: 1) Pennsylvania Department of Human Services Child Abuse History Clearance; 2) Pennsylvania State Police Criminal Record Check; 3) FBI Criminal Record Check to determine whether the student is qualified to participate in clinical education. If these are deemed to be required and the student has not already done so, he/she should immediately start the process of obtaining these three clearances and background checks.

The Commonwealth of Pennsylvania has posted information on how to obtain these clearances and background checks here: http://www.dhs.state.pa.us/findaform/childabusehistoryclearanceforms/S001087.

Additional requirements may also include a drug screen, CPR training, attending orientation sessions, compliance with dress code, and personal transportation. Each program's clinical education coordinator will advise students of additional program or site-specific requirements and instructions on how to submit required documentation to verify completion of all requirements.

Students may be required to travel a distance or to relocate outside the city for their clinical education assignments. All expenses for transportation, housing, food, etc. are the responsibility of the student. Any student who misses clinical education time for any reason must meet with his/her clinical education coordinator to discuss any needed make-up time. See individual program for specific details regarding clinical education.

Health Insurance Portability and Accountability Act (HIPAA)

All SHRS students participating in clinical education or field experience must complete HIPAA certification training prior to beginning at the clinical/field site. No clinical contact in a "covered entity" will be allowed before certification is completed. (Student should see individual department information regarding additional HIPAA certification requirements.)

Procedure for completing HIPAA certification: Go to http://cme.hs.pitt.edu. Look for UPMC HIPAA Security Awareness Training for Physicians (formerly RPF Module 15) and HIPAA Physicians Privacy Awareness Training by UPMC (formerly RPF Module 8). Complete the UPMC HIPAA Security Awareness Training for Physicians and HIPAA Physicians Privacy Awareness Training by UPMC. Complete the quizzes. Print certificates, complete all information, sign them, and turn them in to your department.

Blood Borne Pathogen Training and Certification

All SHRS students who will be going into a clinical setting must complete Blood Borne Pathogen (BBP) training and certification annually. This certification must be completed prior to the beginning of the term in which the clinical setting will begin. No clinical placement will be allowed before certification is completed.
Procedure for completing online BBP training and certification: Go to http://cme.hs.pitt.edu. Look for Blood Borne Pathogen Training (formerly RPF Module 9). Complete Blood Borne Pathogens Training. Complete the quiz. Print certificate, complete all information, sign it, and turn it in to your department.

Enrollment Status

A student must be registered for at least one credit in a twelve (12) month period from the time of admission until the degree is granted in order to maintain active status. Those students who fail to observe this rule will be placed on inactive status and will have to seek formal readmission in order to continue in the program. If active status is not maintained, the student is not permitted to use University facilities or receive counseling or active supervision by a faculty member, advisor, or committee.

Undergraduate students cannot enroll for more than (18) units without the dean's approval. Only an advisor or the University Registrar's Office can enroll you after you receive approval for the additional unit(s).

Undergraduate students registered for 12 to 18 credits in the Fall and Spring Terms are regarded as full-time students.

Students cannot enroll in courses that meet at the same time.

More Information on the enrollment process can be found in the SHRS Undergraduate Handbook.

Enrollment in Graduate Courses

University of Pittsburgh undergraduate students with sufficient preparation are permitted to enroll in certain graduate courses at the University following procedures determined by each school. The graduate credits earned may be counted toward the undergraduate degree if approved by the student's school. These may not be counted as credits toward a graduate degree except as noted below.

Undergraduate students who need fewer than 15 credits to complete requirements for the baccalaureate degree and who intend to continue study toward an advanced degree may be permitted during their final term to register for graduate courses that will later apply toward a graduate degree. The student must obtain written permission from the school of proposed graduate study that the courses may count when and if the student is admitted into the graduate degree program. This privilege should not be granted if the proposed total program exceeds a normal full-time load. Although these credits will appear on the undergraduate transcript, they will not count toward fulfilling undergraduate degree requirements. They will be posted as advanced standing credits on the graduate transcript.

Extended Drop Period

Under special circumstances, undergraduate students may be eligible to drop a course in the third week of the fall or spring semester. Students must meet all of the following criteria to drop a course during the extended drop period:

Students must meet all of the following criteria to drop a course during the extended drop period (Only Fall & Spring term):

• Must be an Undergraduate student and the course you are dropping must be an Undergraduate course.
• Students must remain in full-time status after dropping the course(s).
• Students must review the proposed drop with their academic advisor.
If the student's advisor finds that the student is eligible, the advisor must provide permission to drop via email to the SHRS Student Services Coordinator. Students do not have access to drop classes during the extended period.

• The email request must include all student and course information. (student's name, PeopleSoft ID number, subject, number, section, credits) to process the drop(s).

Monitored Withdrawal
After the add/drop period has ended, students may withdraw from a course that they no longer wish to attend by completing a Monitored Withdrawal Request form in the office of the school offering the course. Students must process the Monitored Withdrawal Request form within the first nine weeks of the term in the fall and spring.

Because summer sessions vary in length, students should check the University's Academic Calendar for those deadlines. Students should check with the school offering the course for the last day to submit a Monitored Withdrawal Request form. The grade W will appear on the student's grade report and transcript. There is no financial adjustment to students' tuition or fee obligations involved in withdrawing from courses, but withdrawing may jeopardize satisfactory academic progress, financial aid, and assistantships or fellowships.

The form must be signed by the instructor of the course and be returned to the Director of Student Services, the Registrar, within the first nine weeks of the term in the fall and spring.

**Late Withdrawal procedure**

**Procedure for an Appeal for Late Withdrawal**

After the Monitored Withdrawal deadline has passed, students may appeal to withdraw from a course by submitting an Appeal for Late Withdrawal. Form can be found on the SHRS website, under current students/forms.

All appeals for late withdrawal must be for non-academic reasons, i.e. medical or family emergencies. If you are trying to withdraw without extenuating circumstances, your appeal will be denied.

- Appeals must be submitted to the Dean's Office of the school offering the course, regardless of the student's home school.
- Appeals for Late Withdrawal from SHRS courses should be submitted to the Registrar, Kellie Beach. The appeal requires information on the class, including class number, catalog/course number, subject, and course title. This information can be found in your Student Center/PeopleSoft.

The signature of the instructor-or an email from the instructor indicating the date of last attendance, grade earned, and acknowledgment of your withdrawal-is required. You must print and attach copies of the emails.

Attach a typed statement explaining the extenuating circumstances which you feel merit consideration of withdrawal beyond the deadline. Please provide relevant documentation, such as certification from a doctor, hospital receipts, an obituary, etc.

- Please address the documentation and the letter to SHRS, Associate Dean for Undergraduate Studies, Dr. Kevin Conley.
- Please include your PeopleSoft ID and your University of Pittsburgh e-mail address on each submitted document.
- Please sign and date each document.

You will be notified of the Associate Dean's decision via your student email account.

Appeals for late withdrawal must be submitted before the end of the 13th week of the semester. After the 13th week, students can only appeal to withdraw from the entire semester.

If your request is approved and you accept the grade of "W" there is no tuition adjustment for withdrawing from the course.

**Repetition of Courses**

Consult your dean's office for the proper procedure of repeating a class and for information on how this will affect your grades and the calculation of your Grade Point Average (GPA). When you repeat a class, you must officially enroll and pay for the class again. University policy prohibits any student from attending a class without being officially enrolled for that class. A repeated course has a notation appearing underneath the previous course taken designating that it is excluded from the GPA. The original course and grade will always remain on your record/transcript.

Students are only permitted to repeat a course twice.
NOTE: Any grade earned in the repeated course will be recorded on the academic transcript, even if it is lower than the original grade.

- A sequence course may not be repeated for credit if the student passes a higher sequence course with a C or better grade.
- A student may not enroll in the same course at another institution and have that grade replace the original grade earned at the University.
- The original course and grade remain on the transcript; however, the grade and credits originally earned are not counted in the calculation of the GPA.
- The grade earned by repeating a course is used instead of the grade originally earned. Withdrawal (W), Repeat (R), and Audit/Non-Credit (N) grades reported for the repeated course will not be identified as a course repeat, and therefore the original grade earned will continue to be counted in the GPA.
- Incomplete grades (G and I) are not identified as repeated courses until the coursework is completed.
- Students seeking to repeat other non-SHRS (prerequisites, electives, etc.) courses will be permitted to do so at the discretion of the program director.

Statute of Limitations on Allowable Coursework

All required academic work for a degree in SHRS, including courses for which advanced-standing credit has been granted, must be completed within ten (10) consecutive calendar years. Departments have the discretion to lessen this number for specific coursework deemed integral to the course of study in a particular discipline.

Resigning from the University for a Specific Term

If students decide to drop all of their courses after the add/drop period has ended and before 60 percent of the term or session has been completed, they must resign from the University for that term. Official resignation from the University requires students to contact the Student Appeals Office. Students have several options. They may resign in person, by mail, or by calling 412-624-7585, where students may leave a message 24 hours a day, including weekends and holidays. An R grade will appear on the student's academic transcript. Tuition is prorated from the date of the student's notification to the Student Appeals Office of the student's desire to resign, unless 60 percent of the term has been completed, in which case there is no refund.

After the 60 percent point of the term or session has passed, students who wish to terminate their registration may process a withdrawal from all classes only with the permission of their academic dean. If the reason for withdrawal is medical or psychological in nature, the academic dean may consult with the director of the Student Health Service prior to making a determination. There is no financial adjustment associated with this procedure, which results in the assignment of W grades for the courses.

Please visit the Student Payment center resignation page on the University of Pittsburgh website for more information.

Leave of Absence

Under special conditions, Undergraduate students may be granted one leave of absence. All requests for a leave of absence need to be put in writing to the Associate Dean of Undergraduate Studies, using the SHRS Request for Leave of Absence from an Undergraduate Program form. The length and rationale for the leave of absence must be approved by the Associate Dean. If approved, the time of the leave shall not count against the total time allowed for the degree (statute of Limitations) being sought by the student.

To request of leave of absence, you must complete the SHRS Request for Leave of Absence form and Undergraduate Program form, which can be found on the SHRS website under current students/forms. This form must be submitted it to Student Services for approval.

Note: If the reason for your leave is medical in nature, a formal note from a Doctor must be included with this form.

Grading Policy
Course Grading

The method of evaluation and grading is the prerogative of the course instructor and is based on the course objectives and expectations. SHRS faculty have the option of issuing "+" or "-" grades. SHRS faculty also have the option of assigning letter grades or HSU evaluations, as printed in the course catalog and determined at student's enrollment. Students will be apprised of the evaluation procedure by the instructor at the beginning of each course. It is the student's responsibility to request clarification of any evaluation or grading policy.

SHRS (G) Grade Policy

The G grade signifies unfinished course work due to extenuating personal circumstances. Students assigned G grades are required to complete course requirements no later than one year after the term or session in which the course was taken.

Once the deadline has passed, the G grade will be changed automatically to a (NG) - No Grade. The NG grade will remain on the record and the student will be required to re-register for the course if it is needed to fulfill requirements for graduation.

Action required by the student and faculty member for a "G" grade:

- The student, instructor and advisor are to fill out a Completion Agreement of G Grade Credits Form (the form and the SHRS G grade Policy and instructions can be found on the SHRS website)
- A copy of this agreement will need to be submitted to Student Services, no later than the end of the add/drop period for the following term. If the following term is the summer term, then the add/drop deadline date is that of the whole summer term.

Satisfactory/No Credit (S/NC) grading option

Prerequisite and required courses must be taken for a letter grade when available, and a student must earn a C- or better (C for transfer credits). Students planning to apply to SHRS are strongly encouraged to consult their advisor whenever considering the S/NC grading option to make certain the course is not required for the degree being sought in SHRS.

Dean's List for SHRS

The SHRS Dean's List is compiled upon completion of each fall and spring term. The criteria used to determine eligibility for the Dean's List is as follows:

- full-time student status for the term
- minimum GPA of 3.500 for the term
- minimum cumulative GPA of 3.000 (total Pitt)

Academic Probation and Dismissal Policy

Students who have completed at least 12 credits and whose cumulative GPA falls below 2.000 will be placed on academic probation and will receive written notification of this status. At this point it is the student's responsibility to meet with his or her advisor.
To be removed from academic probation, the student will need to achieve a cumulative GPA of 2.000 within his or her next two terms of study. Failure to do so may subject the student to recommendation for immediate dismissal from the program by the Department Chair, in collaboration with the Associate Dean of Undergraduate Studies.

Students who fail to demonstrate progress toward meeting graduation requirements in a timely manner may be placed on academic probation or recommended for dismissal from the program by the Department Chair in collaboration with that Associate Dean of Undergraduate Studies. SHRS reserves the right to terminate a student at any time for academic or other reasons.

Dismissal from the program is at the discretion of the SHRS Dean. Notwithstanding the foregoing, in the event it is not mathematically possible for a student to remediate their cumulative program GPA within their next two terms of study the student may be immediately dismissed.

A student may appeal their dismissal with the University of Pittsburgh Provost office.

Graduation Requirements

Graduation Requirements for a Bachelor's Degree from the School of Health and Rehabilitation Sciences are as follows:

- satisfactory completion of a minimum of 120 approved credits (including advanced standing)
- minimum of 30 SHRS credits taken once admitted and enrolled in SHRS department or program
- minimum cumulative GPA 2.000
- the GPA will be calculated as a composite of all courses taken at the University of Pittsburgh and counting toward completion of the degree
- completion of all requirements for the program in which student has enrolled
- no outstanding D, F, or G grades in a required course
- updated and approved Plan of Study on file in Student Services
- student must be considered an "active student" at time of graduation; s/he must have been registered for at least one credit at the University of Pittsburgh within the last three terms or sessions
- students may not enroll in courses outside the University of Pittsburgh in the semester they are graduating
- An application for graduation must be filed in the SHRS Office of Student Services, based on the deadlines determined for that term. Email notification of theses deadlines will be sent to students in the prior term.

A student with outstanding financial obligations to the University is not eligible to receive the diploma, official academic transcripts, or any certification of completion of the academic program.

Graduation with Honors

A baccalaureate degree student attaining an outstanding scholastic record will be graduated with University honors if a minimum of 60 letter-graded credits have been earned at the University of Pittsburgh. The GPA used for the awarding of honors at graduation will be calculated as a composite of courses taken at the University of Pittsburgh and counting toward completion of the degree. The following recognition of academic standing with honors applies:

- Cum Laude 3.250 - 3.499
- Magna Cum Laude 3.500 - 3.749
- Summa Cum Laude 3.750 - 4.000

SHRS Student Organizations
The School of Health and Rehabilitation Sciences has student organizations for undergraduate students. Visit http://www.shrs.pitt.edu/studentgroups/ for more information.

**Ombudsperson**

The Ombudsperson assists students with resolving conflicts and issues that arise in the course of their education and training that they believe have not or cannot be addressed within their academic department. The Ombudsperson can help mediate conflicts and provides information about institutional policies related to the student's issues, including the University's grievance procedures. The Ombudsperson directs students to further resources on campus as appropriate. The Ombudsperson in the School of Health and Rehabilitation Sciences (SHRS) will be a neutral contact person (Non-faculty) for students with whom they can engage in informal discussions.

The Ombudsperson for SHRS is Kellie Beach, Director of Student Services, and Registrar. She can be reached at kbeach@pitt.edu to make an appointment. More information on the role of the Ombudsperson for SHRS can be found on the SHRS website under the Orientation page.

**School of Health and Rehabilitation Sciences Faculty**

SHRS Faculty

**Program and Course Offerings**

**Department of Sports Medicine and Nutrition**

In Pitt's Department of Sports Medicine and Nutrition (SMN), there's a vision for the future. It's a place where scientists, using contemporary, state-of-the-art practices have the potential to extend the careers of elite athletes and weekend warriors, where human performance optimization translates to injury prevention and military operational success, where exercise and diet help to prevent and manage disease and nutrition information impacts the well-being of the community and informs public policy.

It's a place where innovative and multidisciplinary research makes an immediate connection to real-world practices. Proof lies in the Department's growing number of regional, national and international partners as well as the quantity and quality of funding from prestigious organizations such as the National Institutes of Health, U.S. Department of Defense, NASA and others.

Through the use of technology and collaborative science, the Department of Sports Medicine and Nutrition is improving the quality of life and resiliency of people from all walks of life and abilities today, and championing health and wellness for life.

The department aims to meet these objectives by:

- developing cognitive skills, psychomotor mastery and affective values in students through the delivery of a proven formula of sound classroom education, combined with invaluable clinical education experiences, for the promotion of competent entry-level clinicians and enhancing the health and well-being of individuals and diverse populations
- becoming thoughtful leaders by advancing the state of the science through evidenced-based practice, rigorous curricula, interdisciplinary collaboration and innovative technology
- mitigating injury and disease and optimize human performance by conducting innovative, multidisciplinary basic and applied research and contributing to the scientific community in order to enhance clinical decisions and education
Joint Major

Athletic Training, BS-MS

In Spring of 2021, the bachelor of science degree in Athletic Training was approved to transition to the master's level. The BS in Athletic Training degree is currently teaching out its last cohort of students and will be terminated at the end of the Spring semester in 2022. Beginning in the fall of 2021, an Accelerated BS-MS in Athletic Training will be offered for students interested in pursuing a degree in Athletic Training.

The athletic training education degree program earned initial accreditation in 1997 and continuing accreditation in 2004 and 2012 through the Commission on Accreditation of Athletic Training Education (CAATE). Prior to this, the curriculum had been National Athletic Trainers' Association approved since 1978. The athletic training curriculum is defined by the current Board of Certification, Inc. Role Delineation Study/Practice Analysis, which consists of five performance domains to include: (1) Injury and Illness Prevention and Wellness Promotion; (2) Examination, Assessment, and Diagnosis; (3) Immediate and Emergency Care; (4) Therapeutic Intervention; (5) Healthcare Administration and Professional Responsibility. The curriculum is structured to provide both academic and clinical instruction. The academic curriculum includes such courses as anatomy, kinesiology, human and exercise physiology, injury evaluation, medical and pharmacological principles, administrative aspects, among others. This course work provides a foundation for the hands-on clinical experiences provided in the clinical education setting. The students' clinical requirements include direct patient care with athletes and physically active patients and evaluation of skills by preceptors who supervise each student's clinical experience. Students rotate through four on-campus athletic training facilities and several off-site affiliated settings during the clinical education component acquiring valuable skills under the direct supervision of certified athletic training staff, team physicians and other allied health professionals. Upon the successful completion of the program, students are eligible to sit for the BOC, Inc. certification examination. Successful completion of this exam affords the candidate a variety of employment opportunities including athletic training positions at the high school, college, or university level; sports medicine and rehabilitation clinics; and professional athletic teams. Additionally, many students pursue graduate education opportunities in a number of sports medicine-related professions.

Admission Requirements
SHRS is updating our General Education requirements. Students entering the University of Pittsburgh in Fall 2021 as first-year students, and students currently enrolled at the University of Pittsburgh and external transfer students entering the upper-level programs offered at SHRS in Fall 2023, must complete the new general education requirements before graduating. Our General Education Requirements are included in our upper-level program prerequisites and curriculum requirements; therefore, changes will be reflected in prerequisites and curriculum requirements.

Prerequisite Courses

Requirements for students who entered the University of Pittsburgh as first-year students prior to Fall 2021 applying for Fall 2022 admission:

- Foundations of Biology/Lab (BIOSC 0150/0050 or 0057 or 0058), 4 credits
- General Chemistry/Lab (CHEM 0110), 4 credits
- Introduction to Physics (PHYS 0110), 3 credits
- Mathematics (MATH 0031), 3 credits
- Statistics (STAT 0200 or STAT 1000), 3-4 credits
- Psychology (PSY 0010), 3 credits
- Developmental Psychology (PSY 0310) or other upper level Psychology, 3 credits
- English Composition (ENGCMP 0200 minimum), 3 credits
- Writing Intensive Course (ENGCMP 0400 recommended), 3 credits
- Public Speaking (COMMRC 0520), 3 credits
- Basic Athletic Training (ATHLTR 1811), 3 credits
- Basic Athletic Training Lab (ATHLTR 1812), 1 credit
- Humanities and Social Sciences Electives, 6 credits from: Anthropology, Economics, English Literature/Writing, Foreign Languages, History, Music, Performing and Visual Arts, Philosophy, Religion or Sociology

Requirements for students entering the University of Pittsburgh in Fall 2021 as first-year students, and students currently enrolled at the University of Pittsburgh and external transfer students entering the upper-level programs offered at SHRS in Fall 2023:

Required credits for admission: 60 (Applications may be submitted while prerequisite coursework is in progress).

- Grades of C- or better (C for transfer) in all prerequisite coursework with the exception of ATHLTR 1811 and ATHLTR 1812, where a grade of B or better must be earned.
- EMT certification through course for credit or other qualified course leading to EMT credential. Verification of completion of EMT certification must be provided to the program director.
- Minimum cumulative GPA of 2.8 (based on 4.0).
- Submit admissions application including technical standards for admission document.
- Personal interview with athletic training faculty.

The Athletic Training Education Program at the University of Pittsburgh is a rigorous and intense program that places specific requirements and demands on the students enrolled in the program. An objective of this program is to prepare graduates to enter a variety of employment settings and to render care to a wide spectrum of individuals engaged in physical activity. The technical standards set forth by the Athletic Training Education Program establish the essential qualities considered necessary for students admitted to this program to achieve the knowledge, skills, and competencies of an entry-level athletic trainer, as well as meet the expectations of the program's accrediting agency (Commission on Accreditation of Athletic Training Education [CAATE]).

The following abilities and expectations must be met by all students admitted to the Athletic Training Education Program. Candidates for selection to the Athletic Training Education Program must demonstrate:

- The mental capacity to assimilate, analyze, synthesize, integrate concepts, and problem solve to formulate assessment and therapeutic judgments and to be able to distinguish deviations from the norm.
- Sufficient postural and neuromuscular control, sensory function, and coordination to perform appropriate physical examinations using accepted techniques; and accurately, safely, and efficiently use equipment and materials during the assessment and treatment of patients.
- The ability to communicate effectively and sensitively with patients and colleagues, including individuals from different cultural and social backgrounds; this includes, but is not limited to, the ability to establish rapport with patients and communicate judgments and treatment information effectively. Students must be able to understand and speak the English language at a level consistent with competent professional practice.
- The ability to record the physical examination results and a treatment plan clearly and accurately.
- The capacity to maintain composure and continue to function well during periods of high stress.
- The perseverance, diligence, and commitment to complete the athletic training education program as outlined and sequenced.
- Flexibility and the ability to adjust to changing situations and uncertainty in clinical situations.
- Affective skills and appropriate demeanor and rapport that relate to professional education and quality patient care.

Application Procedures:

Application Deadline: March 15
Pitt Students (including regional campuses)

SHRS is moving to a new application platform. Please visit the SHRS website to access information about applying to enter our programs.

Transfer Student Information

Transfer students must apply to the University of Pittsburgh by completing the Office of Admission and Financial Aid's Transfer Application and selecting Athletic Training as their intended field of study. International transfer students click here. Transfer students must also provide application materials directly to SHRS.

All admission criteria applies to transfer students in the same way as students enrolled at the Pittsburgh campus. Students with prior athletic training experience seeking to transfer to the University of Pittsburgh for admission to the Athletic Training Education Program must complete the same prerequisite requirements as all other candidates including the Basic Athletic Training (ATHLTR 1811) and Basic Athletic Training Lab (ATHLTR 1812) courses and all observation hours. If admitted to the program, all students must complete University of Pittsburgh core athletic training courses. In some instances, credit may be given for other coursework taken at another institution and will be evaluated on an individual case basis. International transfer students click here.

Curriculum:

Coursework for the professional BS-MS in Athletic Training program is divided into two phases: Pre-Professional Phase and the Professional Phase. Students applying for the Accelerated BS-MS in Athletic Training program will complete prerequisite coursework during the first two years of their undergraduate degree. At the conclusion of their sophomore year, students will apply to the Accelerated BS-MS in Athletic Training program. Upon successful application and acceptance into the program, students will complete one year (two semesters) of pre-professional curriculum. During their last two years, students will complete the professional (graduate) curriculum.

Pre-professional Phase

During the pre-professional phase students complete prerequisite and general education courses along with specific Athletic Training-related prerequisites.

First Semester (Fall)

- REHSCI 1200 - HUMAN ANATOMY
- REHSCI 1205 - HUMAN PHYSIOLOGY
- REHSCI 1235 - MEDICAL TERMINOLOGY
- HRS 1006 - INTRO TO HUMAN NUTRITION
- ATHLTR 1813 - INTRODUCTION TO CLINICAL ATHLETIC TRAINING 1
- ATHLTR 1815 - FOUNDATIONS IN EVALUATION AND TREATMENT
- ATHLTR 1816 - MEDICAL ETHICS

Total: 16

Second Semester (Spring)

- REHSCI 1000 - PRINCIPLES OF RESEARCH METHODOLOGY
- REHSCI 1220 - KINESIOLOGY AND BIOMECHANICS
- REHSCI 1265 - PHARMACOLOGY IN REHABILITATION
- REHSCI 1215 - EXERCISE PHYSIOLOGY
- ATHLTR 1814 - INTRODUCTION TO CLINICAL ATHLETIC TRAINING 2
- ATHLTR 1833 - STRENGTH AND CONDITIONING

Total: 15
Professional Phase

The following courses are to be completed in four semesters and are graduate-level curriculum.

First Semester (Fall)

- ATHLTR 2801 - Clinical Practicum 1, 3 credits
- ATHLTR 2805 - Injury Evaluation of the Lower Extremity, 4 credits
- ATHLTR 2807 - Therapeutic Interventions 1, 4 credits
- ATHLTR 2809 - Functional Human Anatomy, 2 credits
- ATHLTR 2810 - Evidence Based Practice in Athletic Training, 2 credits

Total: 15

Second Semester (Spring)

- ATHLTR 2802 - Clinical Practicum 2, 3 credits
- ATHLTR 2806 - Injury Evaluation of the Upper Extremity, 4 credits
- ATHLTR 2808 - Therapeutic Interventions, 4 credits
- ATHLTR 2813 - General Medical & Pharmacological Principles, 4 credits

Total: 15

Third Semester (Fall)

- ATHLTR 2803 - Clinical Practicum 3, 5 credits
- ATHLTR 2811 - Graduate Research 1, 3 credits
- ATHLTR 2814 - Advanced Clinical Procedures, 3 credits
- ATHLTR 2816 - Administrative Aspects of Athletic Training, 4 credits

Total: 15

Fourth Semester (Spring)

- ATHLTR 2804 - Clinical Practicum 4, 3 credits
- ATHLTR 2812 - Graduate Research 2, 3 credits
- ATHLTR 2815 - Current Concepts in Sports Medicine, 2 credits
- ATHLTR 2817 - Leadership and Professional Development, 3 credits
- ATHLTR 2818 - BOC Prep, 1 credit
- Elective of choice, 3 credits

Total: 15

Nutrition and Dietetics, BS-MS
Students who choose to pursue Pitt's Dietitian Nutritionist Program degree are ahead of the game! In 2024, all Registered Dietitian/Nutritionists (RDNs) entering the field will be required to have a masters level degree to enter the profession. The program is a competency-based educational program that integrates experiential learning with didactic coursework to enable students to demonstrate the higher level of competence that will be needed for future practice as a Registered Dietitian Nutritionist.

Interested students will apply in the Spring Term of each year to begin the program as juniors or graduate students in Fall Term. For incoming Pitt freshmen, a guaranteed admit will be available to enable students to complete the BS/MS degree in 5-years by following the recommended course schedule.

For more information, please contact:

Deborah A. Hutcheson, DCN, RDN, LDN
Program Director, Dietitian Nutritionist Program
4036 Forbes Tower
412-383-6747
Fax: 412-383-6636
E-mail: dhutches@pitt.edu

About

The Dietitian Nutritionist Program, housed within the Department of Sports Medicine and Nutrition, is an accelerated BS/MS graduate degree program accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) as a Future Education Model Graduate Degree Program. The competency-based educational program that integrates experiential learning with didactic coursework affording graduates a strong foundation in medical nutrition therapy, public health nutrition, and food service. Students may apply for a specialty rotation option that provides an immersive experience in a specialty practice area.

This accelerated program offers points of entry for:

- qualified undergraduates
- post-baccalaureate candidates
- graduates of Didactic Programs in Dietetics (DPD)

Undergraduate students will earn both Bachelor of Science and Master of Science degrees. Students who enter the program with a bachelor's degree will earn a Master of Science. Preparation for a career in dietetics as a Registered Dietitian Nutritionist (RDN) requires the following:

- completion of an ACEND accredited degree-granting program
- completion of an ACEND accredited supervised experiential practice and meeting all required competencies*
- successful performance on the national Registration Examination for Dietitians**

No matter your professional goals in the Dietetics profession, this program offers an entry-level and/or advanced degree option to provide a competitive edge for today's health care environment. Upon successful completion of the master's program graduates are eligible to take the national registration examination for Dietitians. Graduates passing the registration exam are eligible for licensure in Pennsylvania by the Board of Nursing. For licensing information please visit Instructions for Licensed Dietitian-Nutritionist (LDN) Applicants.

*This program provides supervised experiential practice required to become an RDN. The supervised experiential practice sites are randomly assigned and public transportation is not available to all sites. All students should anticipate the necessity of having access to their own transportation for Year 2 and Year 3 of the program. Please review the experiential practice information.

**The credentialing exam requirements are set by the Commission on Dietetic Registration (CDR).

For more information on becoming an RDN, visit www.eatright.org.

Program Requirements

Admission
There are three ways to enter the Dietitian Nutritionist Program. As an undergraduate, a post-baccalaureate, and as a graduate of a Didactic Program in Dietetics (DPD). The application deadline for all entry points is March 15. Application review begins in January. Admission is for the fall term only. Applications can be submitted when course requirements are in progress.

Entry Point for Undergraduate Students to the Accelerated BS-MS Program

Prerequisites must be completed for a letter grade, minimum grade of C- (C for transfer) unless otherwise noted; with the exception of AP/IB credits and/or exemptions awarded by the University of Pittsburgh. Courses listed below are offered at the Pittsburgh Campus, courses taken at the regional Pitt campuses or external institutions must be evaluated as equivalent to satisfy these requirements.

- General Chemistry 1 with lab, CHEM 0110
- General Chemistry 2 with lab, CHEM 0120
- Foundations of Biology 1, BIOSC 0150
- Foundations of Biology 2, BIOSC 0160
- Biology Lab, BIOSC 0057 or BIOSC 0058
- Organic Chemistry, CHEM 0350, or CHEM 0310 and CHEM 0320
- Biochemistry, BIOSC 1000*
- Introduction to Microbiology, BIOSC 1850 or HRS 1025
- College Algebra, MATH 0031 or higher math required. Exemption accepted.
- Statistics, STAT 0200 or STAT 1000
- English Composition, ENGCMP 0200 or equivalent
- English Writing, any "W" or upper-level writing course
- Communications, any COMMRC course
- Business, any Business or Economics course
- Sociology/ Social Science/ Humanities, any
- Psychology, PSY 0010
- Introduction to Nutrition, HRS 1006 or NUTR 1006*
- Introduction to Dietetics, NUTR 1600+
- Food and Culture, NUTR 1600+

*These courses need to have been completed within the past five years.
+These courses can be taken in the first year of the Dietitian Nutritionist Program.

Additional Requirements

- Minimum cumulative and prerequisite GPA of 3.0 (based on 4.0)
- Personal interview with nutrition faculty
- 61-63 credits are required to begin the program

Application Requirements

- Complete the application for admission. SHRS is moving to a new application platform. Please visit the SHRS website to access information about applying;
- Self-evaluation essay, discussing strengths, skills, and experiences that will contribute to success in the program and your professional goals as a registered dietitian;
- Resume demonstrating evidence of adequate exposure to the field of dietetics and an appreciation of the breadth, depth, and scope of practice. This can be accomplished through either volunteer or paid work experience in a nutrition and dietetics related settings; there is no minimum number of hours required;
- Three letters of recommendation: one from a registered dietitian, one from a supervisor in volunteer or work experience and one form a college professor. These letters should address the applicant's academic, professional and personal attributes and potential for meaningful graduate study. At least one letter should speak to your leadership experience and commitment to service;
- Transcripts from all institutions attended. Pitt students do not have to provide transcripts they have already submitted to Pitt.
SHRS is updating our General Education requirements. Students entering the University of Pittsburgh in Fall 2021 as first-year students, and students currently enrolled at the University of Pittsburgh and external transfer students entering the upper-level programs offered at SHRS in Fall 2023, must complete the new general education requirements before graduating. Our General Education Requirements are included in our upper-level program prerequisites and curriculum requirements; therefore, changes will be reflected in prerequisites and curriculum requirements.

**Entry Point for Post Baccalaureate Students to the MS Program**

Prerequisites must be completed for a letter grade, minimum grade of C. Coursework will be evaluated at time of application for equivalency to Pitt courses.

- General Chemistry 1 with lab
- General Chemistry 2 with lab
- Foundations of Biology 1
- Genetics or Foundations of Biology 2
- Biology Lab
- Organic Chemistry 1
- Organic Chemistry 2
- Biochemistry*
- Introduction to Microbiology
- College Algebra or higher math
- Statistics
- English Composition
- English Writing
- Communications
- Business
- Sociology/ Social Science/ Humanities
- Psychology
- Introduction to Nutrition*
- Introduction to Dietetics+
- Food and Culture+

*These courses need to have been completed within the past five years.
+These courses can be taken in the first year of the Dietitian Nutritionist Program.

**Additional Requirements**

- Baccalaureate degree from an accredited institution
- Minimum cumulative and prerequisite GPA of 3.0 (based on 4.0)
- Personal interview with nutrition faculty

**Application Requirements**

- Complete the GradCAS application;
- Self-evaluation essay, discussing strengths, skills, and experiences that will contribute to success in the program and your professional goals as a registered dietitian;
- Resume demonstrating evidence of adequate exposure to the field of dietetics and an appreciation of the breadth, depth, and scope of practice. This can be accomplished through either volunteer or paid work experience in a nutrition and dietetics related settings; there is no minimum number of hours required;
- Three letters of recommendation: one from a registered dietitian, one from a supervisor in volunteer or work experience and one form a college professor. These letters should address the applicant's academic, professional and personal attributes and potential for meaningful graduate study. At least one letter should speak to your leadership experience and commitment to service;
- Transcripts from all institutions attended.
• Additional requirements for international applicants
• Academic Credential Evaluation from World Education Services (WES), Inc. or Educational Credential Evaluators, Inc. A course by course evaluation with GPA conversion is required for baccalaureate degree or higher completed at an institution outside of the United States.
• English Language Proficiency scores. Minimum scores accepted:
  • TOEFL: 100. Submit electronically to institution code 2927.
  • IELTS: 7.0. Scores should be made available electronically to "University of Pittsburgh Health and Rehabilitation Sciences".
  • Duolingo: 120. Scores should be made available electronically to "University of Pittsburgh - Health and Rehabilitation Sciences".

Entry Point for DPD Graduates to the MS Program

Prerequisites must be completed for a letter grade, minimum grade of C. Coursework will be evaluated at time of application for equivalency to Pitt courses.

• Foundations of Biology 1 with Lab, 4 credits
• Genetics or Foundations of Biology 2, 3 credits
• Human Physiology, 4 credits
• Introduction to Microbiology, 3 credits
• General Chemistry 1 with Lab, 4 credits
• General Chemistry 2 with Lab, 4 credits
• †Organic Chemistry 1, 3 credits
• †Organic Chemistry 2, 3 credits
• *Biochemistry, 3 credits
• Communications, 3 credits
• Business or Economics, 3 credits
• Humanities or Social Science, 3 credits
• Introduction to Psychology, 3 credits
• English Composition/Writing, 6 credits
• Algebra, 2-4 credits
• *Introduction to Nutrition, 3 credits
• Introduction to the Profession of Dietetics, 1 credit
• Food and Culture, 3 credits
• Nutrition Assessment, 3 credits
• Nutrition Education, 3 credits
• Nutrient Metabolism, 3-6 credits
• Food Applications with Lab, 4 credits
• Food Service Management, 3 credits
• Life Cycle Nutrition, 3 credits
• Nutrition Therapy, 3 credits

*These courses need to have been completed within the past five years.
†CHEM 0350 (3 cr.) offered each Spring Term will satisfy the Organic Chemistry requirement. Students who do not take CHEM 0350 must take OCHEM 1 & 2 (6 cr.).
+Genetics is preferred; however, a Biology 2 course with a strong genetics component will fulfill the requirements.

Additional Requirements

• Baccalaureate degree from an accredited institution
• Minimum cumulative and prerequisite GPA of 3.0 (based on 4.0)
• Personal interview with nutrition faculty
Application Requirements

- Complete the GradCAS application;
- Submit a self-evaluation essay, discussing strengths, skills and experiences that will contribute to success in the program and your professional goals as a registered dietitian;
- Submit resume demonstrating evidence of adequate exposure to the field of dietetics and an appreciation of the breadth, depth and scope of practice. This can be accomplished through either volunteer or paid work experience in a nutrition and dietetics related settings; there is no minimum number of hours required;
- Submit three letters of recommendation: one from a registered dietitian, one from a supervisor in volunteer or work experience and one form a college professor. These letters should address the applicant's academic, professional and personal attributes and potential for meaningful graduate study. At least one letter should speak to your leadership experience and commitment to service;
- Submit official transcripts from all colleges and universities attended;
- Additional requirements for international applicants
  - Academic Credential Evaluation from World Education Services (WES), Inc. or Educational Credential Evaluators, Inc. A course by course evaluation with GPA conversion is required for baccalaureate degree or higher completed at an institution outside of the United States.
  - English Language Proficiency scores. Minimum scores accepted:
    - Duolingo: 120. Scores should be made available electronically to "University of Pittsburgh - Health and Rehabilitation Sciences".
    - IELTS: 7.0. Scores should be made available electronically to "University of Pittsburgh Health and Rehabilitation Sciences".
    - TOEFL: 100. Submit electronically to institution code 2927.

Essential Program Standards

This information is provided to inform applicants of the non-academic technical performance and expectation standards required to complete the program successfully. Applicants should review the essential program standards to ensure that they are able to meet and maintain the standards of the program. The University fosters a culture of inclusiveness and is committed to providing an accessible environment for its faculty, staff and students. Please note, the Dietitian Nutritionist Program is committed to non-discrimination, including on the basis of disability. Individuals with disabilities are encouraged to apply and reasonable accommodations will be provided as appropriate. The following link provides detailed information on Essential Program Standards.

Please note that this program requires students to complete portions of their education (e.g., supervised experiential practice experiences) at facilities external to the University to meet requirements for graduation. Many of these external facilities require screening measures such as, but not limited to, criminal background check, child abuse clearance, health appraisal, fingerprint-based background check and/or drug test prior to placement at the facility. The results of these requirements may limit and potentially eliminate placement options for the student which can, in turn, result in an inability to meet graduation requirements. Additionally, a conviction of a misdemeanor, felony, or felonious or illegal act abuse may prevent the student from becoming credentialed and/or licensed to practice in the field.

The University of Pittsburgh, as an educational institution and as an employer, values equality of opportunity, human dignity, and racial/ethnic and cultural diversity. Accordingly, the University prohibits and will not engage in discrimination or harassment on the basis of race, color, religion, national origin, ancestry, sex, age, marital status, familial status, sexual orientation, disability, or status as a disabled veteran or a veteran of the Vietnam era. Further, the University will continue to take affirmative steps to support and advance these values consistent with the University's mission. For information on University equal opportunity and affirmative action programs and complaint/grievance procedures, contact the Office of Affirmative Action, 901 William Pitt Union, University of Pittsburgh, Pittsburgh, PA 15260, 412-648-7860.

The Dietitian Nutritionist Program is accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) the accrediting agency for the Academy of Nutrition and Dietetics (A.N.D.), (ACEND@eatright.org), phone (1-800-877-1600 or 1-800-877-1600 x5400), or mail (120 South Riverside Plaza, Suite 2190, Chicago, IL 60606-6995).

Program Mission, Goals and Objectives
The mission of the Dietitian Nutritionist Program is the development of graduates with the competence and advanced skills to practice effectively as entry-level Registered Dietitian Nutritionists (RDN) to enhance the health and wellbeing of individuals and diverse populations. In addition, the vision is to lead among dietetics programs in advancing knowledge, skills, and evidence-based practice of RDNs.

The program goals are:

1. Development of graduates with the competence and advanced skills to practice effectively as entry-level Registered Dietitian Nutritionists (RDN).
2. To prepare entry-level graduates with advanced knowledge and skills that contribute to the evidence-informed practice of RDNs.

Program outcomes are available upon request.

Curriculum

Students entering as a junior will complete 156 credits and students entering with a baccalaureate degree that is not from a Didactic Program in Dietetics (DPD) will complete 93-95 credits during this three-year program. Didactic Program in Dietetics (DPD) graduates will complete Year 2 & Year 3 of the program fulfilling a 60-credit course of study.

First Year

Fall Term

- NUTR 1000 - INTRODUCTION TO RESEARCH
- NUTR 1602 - NUTRITION ASSESSMENT
- NUTR 1620 - NUTRIENT METABOLISM
- NUTR 1622 - LIFE CYCLE NUTRITION
- HRS 1023 - HUMAN PHYSIOLOGY
- NUTR 1600 - INTRODUCTION TO DIETETICS (If not taken previously) Credits / Units: 16-18

Spring Term

- NUTR 1605 - PRINCIPLES OF NUTRITION EDUCATION
- NUTR 1604 - FOOD SERVICE MANAGEMENT WITH LAB
- NUTR 1614 - NUTRITION CRITICAL THINKING
  OR NUTR 1612 - FOOD AND CULTURE (If not taken previously)
- NUTR 1610 - FOOD APPLICATION
- NUTR 1613 - FOOD APPLICATION LAB
- NUTR 1625 - NUTRITION THERAPY

*Students must maintain a 3.0 minimum GPA to matriculate from Year 1 to Year 2 of the program.

Second Year

Didactic Program in Dietetics (DPD) graduates will enter the Dietitian Nutritionist Program here.

Fall Term

- HRS 2004 - PATHOPHYSIOLOGY ACROSS THE LIFE SPAN
- HRS 2650 - EXERCISE PHYSIOLOGY + HRS 2999 Independent Study (with advisor permission)
- HRS 2623 - ADVANCED MEDICAL NUTRITION THERAPY 1
• HRS 2631 - NUTRITION FOCUSED PHYSICAL EXAMINATION
• HRS 2635 - PROFESSIONAL DEVELOPMENT
• Elective, 3 credits - Advisor approved

Spring Term

• HRS 2624 - ADVANCED MEDICAL NUTRITION THERAPY 2
• HRS 2625 - NUTRITION COUNSELING METHODS
• HRS 2646 - FUNCTIONAL NUTRITION
• HRS 2655 - RESEARCH METHODS AND APPLIED STATISTICS
• NUR 2034 - ADVANCED PHARMACOLOGY ACROSS THE LIFESPAN

Undergraduate students will receive a BS in Nutrition Science after successful completion of the Year 2.

Third Year

Fall Term

• HRS 2654 - Practicum in Dietetics
• HRS 2647 - Experiential Practice: Community Nutrition
• HRS 2648 - Experiential Practice 1
• HRS 2649 - QI Research Project Development
• Credits / Units: 15

Spring Term

• HRS 2008 - ENTREPRENEURIAL SKILLS FOR NUTRITION PROFESSIONALS
• HRS 2656 - PRACTICUM IN DIETETICS 2
• HRS 2651 - EXPERIENTIAL PRACTICE 2
• HRS 2652 - EXPERIENTIAL PRACTICE 3
• HRS 2653 - QI RESEARCH PROJECT
• Credits / Units: 15

All students will receive a master's in science and a Verification Statement after the successful completion of Year 3.

*Courses may vary dependent on transfer courses accepted.

**Plan of study may vary following acceptance into a Limited Capacity Specialty Rotation

***Each course is offered only once during the academic year, therefore, any departure from completing a course in its planned sequence (for example: failure, for any reason, to satisfactorily complete a required course; an unresolved "G" or "Incomplete" grade) will result in a one-year delay in completing the course, the remaining program requirements, and the year of graduation.

Major

Nutrition Science, BS
Nutrition Science is the study of how food and nutrients affect health. The program’s focus on nutrition, health and disease, and the biological sciences makes the Nutrition Science program an ideal undergraduate degree for students who are planning to pursue health-related graduate programs such as medicine, physician assistant studies, dental medicine, nursing, physical therapy, occupational therapy, or public health. The program also provides a solid foundation for career opportunities in the food industry, research, public policy, and public health.

This program does not meet the eligibility requirements for Registered Dietitian/Nutritionists (RDNs). For students desiring to become a Registered Dietitian/Nutritionist (RDN) please refer to the Dietitian Nutritionist program.

For more information, please contact:

Lori Cherok, PhD, RDN, LDN
Interim Program Director, Nutrition Science
School of Health and Rehabilitation Sciences
Department of Sports Medicine and Nutrition
4042 Forbes Tower
412-383-6566
E-mail: lcherok@pitt.edu

Admission Requirements:

SHRS is updating our General Education requirements. Students entering the University of Pittsburgh in Fall 2021 as first-year students, and students currently enrolled at the University of Pittsburgh and external transfer students entering the upper-level programs offered at SHRS in Fall 2023, must complete the new general education requirements before graduating. Our General Education Requirements are included in our upper-level program prerequisites and curriculum requirements; therefore, changes will be reflected in prerequisites and curriculum requirements.

- A minimum cumulative GPA of 2.5 (based on 4.0)
- A minimum prerequisite GPA of 2.5
- A minimum grade of C- in all courses designated as prerequisites taken at the University of Pittsburgh. A minimum grade of C or better is required for courses taken elsewhere.

Admission to the Nutrition Science program requires successful completion of a minimum of 60 credits including all prerequisite courses below.

Prerequisite Courses

Requirements for students who entered the University of Pittsburgh as first-year students prior to Fall 2021 applying for Fall 2022 admission:

- Foundations of Biology 1, BIOSC 0150, 3 credits
- Foundations of Biology 2, BIOSC 0160, 3 credits
- Biology Lab: BIOSC 0057 or BIOSC 0058, 1 credit
- Introduction to Microbiology, BIOSC 1850, 3 credits*
- General Chemistry 1 with Lab, CHEM 0110, 4 credits
- General Chemistry 2 with Lab, CHEM 0120, 4 credits
- Organic Chemistry 1, CHEM 0310, 3 credits**
- Organic Chemistry 2, CHEM 0320, 3 credits**
- English Composition, ENGCMP 0200, 3 credits
- Research Writing or Intensive Writing Course, ENGCMP 0450, 3 credits
- Algebra or Higher Math, MATH 0031, 3 credits
- Introduction to Psychology, PSY 0010, 3 credits
- Statistics, STAT 0200 or STAT 1000, 4 credits
- Introduction to Human Nutrition, HRS 1006 or NUTR 1006, 3 credits
- Humanities/Social Sciences, 6 credits
*Students can also take HRS 1025 Introduction to Microbiology instead of BIOSC 1850

**CHEM 0350: Principles of Organic Chemistry, taught at the University of Pittsburgh, may be taken in place of Organic Chemistry 1 and 2; however, students should first investigate organic chemistry requirements of graduate programs specific to their professional goals.

Requirements for students entering the University of Pittsburgh in Fall 2021 as first-year students, and students currently enrolled at the University of Pittsburgh and external transfer students entering the upper-level programs offered at SHRS in Fall 2023:

*CHEM 0350: Principles of Organic Chemistry, taught at the University of Pittsburgh Main Campus, may be taken in place of Organic Chemistry 1 and 2; however, students should first investigate organic chemistry requirements of graduate programs specific to their professional goals.

**SHRS General Education Requirement

The following SHRS General Education Requirements can be taken within the program:

- Writing Intensive course, 3 credits - ENGCMP 0400, ENGCMP 0450, ENGCMP 0530, or ENGCMP 0535 are recommended
- Diversity, 1 course - NUTR 1612 - FOOD AND CULTURE, taken within the Nutrition Science program, will meet this requirement
- Global Awareness and Cultural Understanding, 1 course - NUTR 1612 - FOOD AND CULTURE, taken within the Nutrition Science program, will meet this requirement

Note: Students who complete all program prerequisites and curriculum courses will meet the SHRS General Education requirements.

Application Procedures:
The deadline for submission of an application for admission consideration is March 15th annually.

**Pitt Students (including regional campuses)**

SHRS is moving to a new application platform. Please visit the SHRS website to access information about applying to enter our programs.

**Transfer Student Information:**

Transfer students must apply to the University of Pittsburgh by completing the Office of Admission and Financial Aid's Transfer Application and selecting Nutrition Science as their intended field of study. International transfer students click here. Transfer student must also provide application materials directly to SHRS.

**All applicants must:**

- Submit a personal essay discussing why you are interested in the Nutrition Science program, your professional goals including how and when you became interested in that field, as well as any work or volunteer experience you have that will demonstrate your awareness of the field. Also include other areas of interest, extra-curricular activities and leadership experiences.
- Resumes are strongly recommended.
- Submit one letter of recommendation. A recommendation from a college instructor/professor or recent work or volunteer supervisor is preferred.
- Transcript from all institutions attended. Pitt students do not have to provide transcripts they have already submitted to Pitt.
- Application may be submitted while course requirements are in progress. Please note that admission is competitive. Meeting the minimum admission criteria does not guarantee admission.

**Curriculum:**

The BS degree in Nutrition Science requires the completion of a minimum of 120 credits which includes 60 credits prior to admission and 60 credits of required courses taken within the program. The usual time required to complete the program after admission to the junior year is two years. The program curriculum is as follows:

**Junior Year - Fall Term**

- BIOSC 1000 - BIOCHEMISTRY, 3 credits
- HRS 1023 - HUMAN PHYSIOLOGY, 4 credits
- NUTR 1000 - INTRODUCTION TO RESEARCH, 3 credits
- NUTR 1602 - NUTRITION ASSESSMENT, 3 credits
- NUTR 1620 - NUTRIENT METABOLISM, 3 credits

Credits: 16

**Junior Year - Spring Term**

- NUTR 1610 - FOOD APPLICATION, 3 credits
- REHSCI 1235 - MEDICAL TERMINOLOGY or NUTR 1613 - FOOD APPLICATION LAB, 1 credit
- NUTR 1614 - NUTRITION CRITICAL THINKING, 3 credits
• NUTR 1625 - NUTRITION THERAPY, 4 credits
• ELECTIVE, 3 credits

Credits: 14

Senior Year - Fall Term

• BIOSC 0350 - GENETICS, 3 credits
• BIOSC 1850 - MICROBIOLOGY, 3 credits
• NUTR 1622 - LIFE CYCLE NUTRITION, 3 credits
• NUTR 1626 - PUBLIC HEALTH NUTRITION, 3 credits
• ELECTIVES, 3 credits

Credits: 15

Senior Year - Spring Term

• NUTR 1612 - FOOD AND CULTURE, 3 credits
• NUTR 1628 - PRACTICAL EXPERIENCE, 2 credits
• REHSCI 1250 - PATHOPHYSIOLOGY/HUMAN DISEASE, 4 credits
• Writing Intensive Course, 3 credits - ENGCMP 0400, ENGCMP 0450, ENGCMP 0530, or ENGCMP 0535 are recommended
• ELECTIVE, 3 credits

Credits: 15

Total Program Credits: 60

Total Degree Credits: 120

Department of Communication Science and Disorders (CSD)

The Department of Communication Science and Disorders offers an undergraduate major in Communication Science. The degree program focuses on the anatomical, physiological, and psychological foundations of communication, as well as, the basic structure of language and the process of speech and language development. The degree program is also designed to develop critical thinking skills including the ability to evaluate scientific information.

This major is particularly appropriate for students considering graduate study and a career in Speech-Language Pathology [SLP] or Audiology [AuD]. (A graduate degree is required for clinical practice in both professions.) Speech-Language Pathology and Audiology are among the most attractive and diverse healthcare and educational professions available. Projections from the U.S. Department of Labor indicate job growth in both Speech-Language Pathology and Audiology. The future of the job market is healthy due to increasing public awareness of the need for early diagnosis and intervention for communication disorders. Other factors impacting employment include increased awareness of the educational, social, and vocational benefits of programs for communication disorders and an aging population. The need for speech, language, and hearing scientists is also great; there are many research and academic opportunities for those interested in research in these fields.

The degree program in Communication Science is also excellent preparation for professional or graduate programs in education-related fields (i.e., education of the deaf and hard of hearing, early-childhood, special education) or health-related professions (i.e., rehabilitation counseling, occupational therapy, physical therapy). The necessary prerequisites for these programs can be taken while completing the Communication Science degree.
Interested students should contact the Interim Director of Undergraduate Education in Communication Science and Disorders, Dr. Cheryl Messick at cmessick@pitt.edu.

**Admission Requirements**

Students are eligible for admission to the Communication Science degree program after successful completion of 60 credits. [Note: Applications will be reviewed when approximately 45 credits are completed and 15 credits are in progress.] For admission, an application with all transcripts from universities/colleges attended and a personal essay is required. Resumes are strongly suggested. A letter of recommendation is **NOT** required. A minimum grade point average (GPA) of 2.75 is required.

Prior to applying, students should contact the Interim Director of Undergraduate Education in Communication Science and Disorders, Dr. Cheryl Messick at cmessick@pitt.edu. (Specialized advising is available to students at the freshman and/or sophomore year level.) Students should complete the Prerequisites prior to admission. They should also focus on completing much of the Additional Requirement Coursework prior to admission. [Note: Some of these courses may be completed while enrolled in the program.]

**University of Pittsburgh Freshman Guarantee**

An entering freshman may qualify for a guarantee into the graduate programs in Audiology or Speech-Language Pathology. For consideration for the Freshman Guarantee, indicate an intended field of study as Pre-Communication Science on your application when applying as a freshman (at regional campuses, choose corresponding codes). Qualifying students admitted in the Fall of 2019 will meet the following criteria: SAT scores of 1410 (combined Critical Reading and Math) or an ACT Composite score of 30. Students must also be in the top 10% of their high school graduating class.

The student must have an overall grade point average (GPA) of 3.6 when applying to the Communication Science program at the start of the spring semester of sophomore year level. At the time of application to the graduate program, guaranteed students must have a cumulative GPA of 3.6 or better and a GPA of 3.75 in the core communication science major courses. Additionally, guaranteed students must achieve a GRE ranking in the 50th percentile or higher for the Quantitative and Verbal sections and a 3.5 on the Analytical Writing section. A full application must be submitted on time.

**Early Decision for Graduate Programs**

Students pursuing an undergraduate degree in Communication Science from the University of Pittsburgh are eligible to apply Early Decision to either the graduate program in Audiology or Speech-Language Pathology. Information about the application process and applicant qualifications are available in the CSD Advising Office.

**Major**

**Communication Science, BA**

The Department of Communication Science and Disorders offers an undergraduate major in Communication Science. The degree program focuses on the anatomical, physiological, and psychological foundations of communication, as well as, the basic structure of language and the process of speech and language development. The degree program is also designed to develop critical thinking skills, including the ability to evaluate scientific information.

This major is particularly appropriate for students considering graduate study and a career in Audiology or Speech-Language Pathology. The degree program is also excellent preparation for professional or graduate programs in education-related or health-related fields, as prerequisites can be taken while completing the Communication Science major.

Specialized pre-advising is available to students at the freshman and/or sophomore year level. Interested students should contact the Communication Science advisor, Dave Bodnar at dab308@pitt.edu.

**Admission Requirements**

SHRS is updating our General Education requirements. Students entering the University of Pittsburgh in Fall 2021 as first-year students, and students currently enrolled at the University of Pittsburgh and external transfer students entering the upper-level programs offered at SHRS in Fall 2023, must
complete the new general education requirements before graduating. Our General Education Requirements are included in our upper-level program prerequisites and curriculum requirements.

Requirements for students who entered the University of Pittsburgh as first-year students prior to Fall 2021 applying for Fall 2022 admission:

Applicants must complete the Prerequisite courses and 6 credits of coursework from the Additional Requirements listed below.

Prerequisites (30 credits)

- English Composition (ENG 0200 or higher) - 3 credits.
- Writing Intensive (W) (ENGCMP 0400, 0530, 0535 recommended) 1 - 3 credits
- See PeopleSoft and search High Impact Practices - Writing Intensive Course.
- *May be combined with another requirement (e.g., literature, global issues, philosophical thinking or ethics).
- Oral Communication (preferred COMMRC 0520, will also accept COMMRC 0310, 0500, 0510, or 0530) - 3 credits
- Mathematics (MATH 0031 or higher) - 3 credits
- Statistics (STAT 0200, 1000) - 3 - 4 credits
- Biological Science - a course in human biology (BIOSC 0805, 0815, 0150) or and human anatomy and physiology course.
- Physical Science - Physics (PHYS 0091 recommended; also accepted 0110) or in Chemistry (CHEM 0110 or higher) - 3 credits
- Introduction to Psychology (PSY 0010) - 3 credits
- Open Selection: At least six credits from the list of the additional requirements below.

Additional Requirements

- Lifespan/Human Development (preferred PSYED 0005 or REHSCI 1245; also accept PSY 0310) - 3 credits
- Cognitive/Neurological Foundations (PSY 0405, 0410, 0422, 0505, 0510; NROSCI 0080, 0081, 1000) - 3 credits
- Social Science or Quantitative & Formal Reasoning - (any course coded by Dietrich School of Arts & Sciences in these categories) - 3 credits
- English/American Literature - 3 credits
- Diversity (as coded by Dietrich School of Arts and Sciences; also accept ELL (English Language Learning) courses through School of Education - 3 credits
- Global Issues, Diversity, Cross-Cultural OR Study Abroad courses - as coded by Dietrich School of Arts & Science - 3 credits
- Philosophical Thinking or Ethics - (any course coded by Dietrich School of Arts & Science in this category) - 3 credits
- Courses used in Open Selection prerequisite category as prerequisites count towards these additional requirement credits

Requirements for students entering the University of Pittsburgh in Fall 2021 as first-year students, and students currently enrolled at the University of Pittsburgh and external transfer students entering the upper-level programs offered at SHRS in Fall 2023:

Prerequisites must be completed for a letter grade, minimum grade of C- (C for transfer) unless otherwise noted; with the exception of AP/IB credits and/or exemptions awarded by the University of Pittsburgh. Courses listed below are offered at the Pittsburgh Campus; courses taken at the regional Pitt campuses or external institutions must be evaluated as equivalent to satisfy these requirements.

- Seminar in Composition*, 1 course
- Writing Intensive*, 1 course. ENGCMP 0400, 0450, 0530, 0535 recommended.
- Oral Communication, 1 course. COMMRC 0520 preferred; 0500, 0510, 0530 acceptable.
- College Algebra, 1 course. MATH 0031 or higher math required. Exemption not accepted.
- Statistics, 1 course. STAT 0200 or 1000 preferred.
• Biological Science: Human Biology (BIOSC 0150, 0805, 0815) or any Human Anatomy & Physiology course required.
• Physical Science: Physics (PHYS 0091 or PHYS 0110) or Chemistry (CHEM 0110 or higher) required.
• Introduction to Psychology, PSY 0010.

Other course requirements that may be taken before or during the program:

• Lifespan/Human Development: PSYED 005, REHSCI 1245, or PSY 0310 required.
• Cognitive/Neurological Foundations: PSY 0405, 0410, 0421, 0422, 0505, 0510; or NROSCI 0080, 0081, 1000 required.
• Diversity*, 1 course. SOC 0007, SOC 1450 or HIST 1018 preferred.
• Literature, 1 course. American or English literature required.
• Philosophical Thinking or Ethics*, 1 course
• Social Science* or Quantitative and Formal Reasoning*, 1 course.
• Cross-Cultural Awareness*, Global Issues*, Specific Geographic Region*, 1 course. May also be satisfied through Study Abroad.
*See the Dietrich School of Arts and Sciences General Education Course Catalog.

Additional Requirements

• Complete the application for admission. SHRS is moving to a new application platform. Please visit the SHRS website to access information about applying.
• Minimum cumulative GPA of 2.75 (based on 4.0) is required for admission. Students with a lower GPA may be admitted provisionally.
• 60 credits are required to begin the program.

Application Deadline: March 1. Early applications welcome. Application review begins in January. If spots are available after the deadline applications will be considered on a rolling basis until the class is full.

Application Requirements

• A personal essay addressing the following:
  What you have done to learn about the field of communication science and disorders (both the science and clinical practice) in preparation for majoring in our undergraduate program in communication science? (maximum word count: 200 words); and,
  Communication Science is a challenging major and admission to graduate school for speech-language pathology, audiology or other health-related and science fields is very competitive. Please explain what academic and personal skills you have developed since starting college that will allow you to be successful in this major. What do you feel are the critical skills, practices and attitudes that you must continue to work on as you proceed further in your academic studies? (maximum word count: 500 words);
• Resumes are strongly recommended.
• Applicants enrolled at the University of Pittsburgh are not required to submit a letter of recommendation.
• Transcripts from all institutions attended. Pitt students do not need to provide transcripts if they have already been submitted to the University of Pittsburgh.
• Applications may be submitted while prerequisite coursework is in progress.

University of Pittsburgh Freshman Guarantee

An entering freshman may qualify for a guarantee into the graduate programs in Audiology or Speech-Language Pathology. For consideration for the Freshman Guarantee, indicate an intended field of study as Pre- Communication Science on your application when applying as a freshman (at regional campuses, choose corresponding codes).

The student must have an overall grade point average (GPA) of 3.6 when applying to the Communication Science program at the start of the spring semester of sophomore year level. At the time of application to the graduate program, guaranteed students must have a cumulative GPA of 3.6 or better and a GPA of 3.75 in the core communication science major courses. A full application must be submitted on time to the graduate program.
Early Decision for Graduate Programs

Students pursuing an undergraduate degree in Communication Science from the University of Pittsburgh are eligible to apply Early Decision to either the graduate program in Audiology or Speech-Language Pathology. Information about the application process and applicant qualifications are available from the CSD Program Director or the Academic Advisor of the Communication Science Program.

Communication Science Curriculum

SHRS requires a minimum of 120 credits for graduation.

Freshman and sophomores who are interested in the major should contact the Communication Science advisor, Dave Bodnar at dab308@pitt.edu for specialized advising about the major.

Core Curriculum Requirements (47 credits)

Most of the core courses in Communication Science degree program are taken after admission at the junior year level. Four of the core courses are available at the freshman and sophomore year level or can be completed as part of the Communication Science degree program at the junior year level. Several core courses have prerequisites resulting in a sequence of courses. The course sequence is represented in the example Plan of Study. Interested students should be aware that the core courses or sequence of courses may change.

Core Courses Available to Freshman and Sophomore

The following courses are available to students at the freshman and sophomore year level including students not formally in the Communication Science major:

Open to students of all levels:
- CSD 1232 - INTRODUCTION TO AUDIOLOGY
- CSD 1230 - INTRODUCTION TO SPEECH LANGUAGE PATHOLOGY

Open to sophomores and higher:
- CSD 1020 - NATURE OF LANGUAGE OR LING 1000 - INTRODUCTION TO LINGUISTICS
- CSD 1102 - INTRODUCTION TO PROFESSIONAL AND CLINICAL ISSUES IN COMMUNICATION SCIENCE & DISORDERS

Plan of Study

This plan of study identifies the sequence of core courses offered in the Communication Science degree program. A course schedule for each semester is completed with any remaining Prerequisites Requirements or Additional Requirements, minor or certificate courses, or other elective courses. Students are required to have an individual advising appointment with the Communication Science Academic Advisor every semester.

Junior Fall

If not already completed -
- CSD 1020 - NATURE OF LANGUAGE
- CSD 1232 - INTRODUCTION TO AUDIOLOGY
- CSD 1111 - AURAL REHABILITATION You must have completed CSD 1232 with a C- or better to enroll in this course.

Core Courses Fall Junior Year
- CSD 1023 - ANATOMY AND PHYSIOLOGY OF SPEECH
- CSD 1027 - LAB IN ANAT/PHYSIOLOGY OF SPEECH
- CSD 1233 - INTRODUCTION TO RESEARCH
Junior Spring

If not already completed -

• CSD 1230 - INTRODUCTION TO SPEECH LANGUAGE PATHOLOGY
• CSD 1102 - INTRODUCTION TO PROFESSIONAL AND CLINICAL ISSUES IN COMMUNICATION SCIENCE & DISORDERS

Core Courses Spring Junior Year

• CSD 1021 - LANGUAGE DEVELOPMENT
• CSD 1026 - SPEECH SCIENCE  You must complete CSD 1023 with a C- or better to enroll in this course.
• CSD 1030 - LAB IN SPEECH SCIENCE

Senior Fall

If not already completed -

• CSD 1111 - AURAL REHABILITATION  You must complete CSD 1232 with a C- or better to enroll in this course.

Core Courses Fall Senior Year

• CSD 1024 - ANATOMY AND PHYSIOLOGY OF HEARING
• CSD 1029 - LAB IN ANAT/PHYSIOLGY OF HEARING
• CSD 1022 - TRANSCRIPTION PHONETICS

Optional Course

• CSD 1031 - GUIDED CLINICAL OBSERVATION

Senior Spring

Core Courses Spring Senior Year

• CSD 1025 - HEARING SCIENCE  You must complete CSD 1024 with a C- or better to enroll in this course.
• CSD 1028 - LAB IN HEARING SCIENCE
• CSD 1235 - CLINICAL METHODS IN COMMUNICATION SCIENCE & DISORDERS
• CSD 1234 - WRITTING PRACTICUM FOR CLINICAL METHODS IN COMMUNICATION SCIENCE & DISORDERS
• CSD 1237 - INTRO TO NEUROSCIENCE OF COMMUNICATION

Optional Course

• CSD 1031 - GUIDED CLINICAL OBSERVATION

Related Area / Minors and Certificates / Directed or Independent Studies

No additional related area is required for this undergraduate degree.

Many students are able to complete certificate programs or minors in addition to the major requirements in Communication Science. In recent years, students have attained certificates in Conceptual Foundations of Medicine, Latin American studies, American Sign Language, and Children's Literature and minors in Education, Neuroscience, Linguistics, Social Work and Sociology, among others. These are only a few of the many certificate programs and minors available at the University of Pittsburgh.

In some locations, employment within an educational setting requires additional courses for certification. Students considering work in educational settings should consider enrolling in education courses (i.e., IL 1257 - TEACHING ENGLISH LANGUAGE LEARNERS) as electives. Students can consult with the CSD Advising Office for more information.
Students should consult with Dave Bodnar (dab308@pitt.edu) or the Director of the Communication Science Program about the possibility of pursuing a directed or independent study with a member of the faculty, as a formal approval process is required. Opportunities are also available for students at all levels to volunteer in a research lab with a Communication Science and Disorders faculty member.

Emergency Medicine Program

The Bachelor of Science in Emergency Medicine Program (EM) is designed to meet the growing need for the advanced clinical and leadership skills necessary for positions in the out of hospital profession. Additionally, this program is ideal for students interested in attending medical school, physician assistant programs, nursing school, or other graduate education in the health professions.

Students entering the Program after earning 60 credits are required to complete clinical education at facilities external to the University. These clinical and field sites require a criminal background check, child abuse clearance, and FBI fingerprint review (Act 33/34/73), physical examination, immunization verification, and a drug screen to determine if the student is eligible to participate in clinical education. The cost of these requirements, as well as required classroom and clinical uniforms, are not included as part of the program fee, tuition, or other school/program-sponsored charges. A non-refundable program fee of $1,500, covering the fall and spring terms of the junior year, will appear on the fall tuition invoice. Students are required to maintain independent health insurance throughout the entire clinical year and it is strongly recommended for the senior year.

For more information, please contact the program at 412-647-4547.

Major

Emergency Medicine Program

The Bachelor of Science in Emergency Medicine Program (EM) is designed to meet the growing need for the advanced clinical and leadership skills necessary for positions in the out of hospital profession. Additionally, this program is ideal for students interested in attending medical school, physician assistant programs, nursing school, or other graduate education in the health professions.

Students entering the Program after earning 60 credits are required to complete clinical education at facilities external to the University. These clinical and field sites require a criminal background check, child abuse clearance, and FBI fingerprint review (Act 33/34/73), physical examination, immunization verification, and a drug screen to determine if the student is eligible to participate in clinical education. The cost of these requirements, as well as required classroom and clinical uniforms, are not included as part of the program fee, tuition, or other school/program-sponsored charges. A non-refundable program fee of $1,500, covering the fall and spring terms of the junior year, will appear on the fall tuition invoice. Student tuition rates for the School of Health and Rehabilitation Sciences can be found at Financial Information | University of Pittsburgh School of Health and Rehabilitation Sciences Students are required to maintain health insurance throughout the entire clinical year and it is strongly recommended for the senior year. Additionally, in order to become certified/licensed, many states will inquire as to whether the applicant has been convicted of a misdemeanor or felony.

Students entering the Program as a Senior Transfer or Active-Duty Military must complete 30 credits within the University of Pittsburgh School of Health and Rehabilitation Sciences to obtain an undergraduate degree. These 30 credits may not include prerequisite courses. Additional details are located under Transfer Student Information and Active-Duty Military Student Information areas of the EM catalog section.

For more information, please contact the program at 412-647-4547.

Admission Requirements

SHRS is updating our General Education requirements. Students entering the University of Pittsburgh in Fall 2021 as first-year students, and students currently enrolled at the University of Pittsburgh and external transfer students entering the upper-level programs offered at SHRS in Fall 2023, must complete the new general education requirements before graduating. Our General Education Requirements are included in our upper-level program prerequisites and curriculum requirements; therefore, changes will be reflected in prerequisites and curriculum requirements.

Prerequisite Courses
Requirements for students who entered the University of Pittsburgh as first-year students prior to Fall 2021 applying for Fall 2022 admission:

- Natural Sciences or Psychology, 6 credits
- Humanities or Social Sciences, 6 credits
- Oral or Written Communication*, 6 credits
- Mathematics or Statistics or Computer Science, 4 credits
- Additional credits from above content areas, 8 credits

*Accepted Oral Communications Courses: COMMRC 0300 or higher. Accepted Written Communication Courses: ENGMCP 0200 or higher, or any intensive writing (W) course.

Requirements for students entering the University of Pittsburgh in Fall 2021 as first-year students, and students currently enrolled at the University of Pittsburgh and external transfer students entering the upper-level programs offered at SHRS in Fall 2023:

- Writing/Communication - 3 courses*
- 1 Composition course - Seminar in Composition
- 1 Writing intensive course - ENGCMP 400/450/ 530/535 recommended
- 1 Oral Communication course
- Algebra & Quantitative Reasoning - 2 courses
- 1 Algebra course
- 1 Statistics course - STAT 0200/1000 preferred
- Diversity - 1 Course
- Humanities and Arts, Social Sciences, Natural Sciences - 3 courses
- 1 Course from any of these categories (Literature/Arts/Creative Work/Philosophical Thinking)
- 1 Social Sciences course
- 1 Natural Sciences course
- Global Awareness and Cultural Understanding - 1 course
- 1 Course from any of these categories (Global Issues/Specific Geographic Region/Cross-Cultural Awareness)

- See DSAS Catalog

* Accepted Oral Communications Courses: COMMRC 0520 preferred; 0500, 0510, 0530 acceptable

Accepted Written Communication Courses: ENGCMP 0200 or higher or any intensive writing (W) course.

+ Verification of current Pennsylvania or National Registry EMT certification must be provided. If a non-credit course was taken for this certification, 4 credits may be granted through credit-by-course examination. Junior-year students without Pennsylvania EMT certification will be required to apply for and receive reciprocity from the Pennsylvania Department of Health.

Required credits for admission for Juniors: 60 (Applications may be submitted while prerequisite coursework is in progress.)

For Transfer Senior and Active-Duty Military applicants, proof of current Paramedic certification must be provided to receive the advanced standing of 39 credits (includes four credits of EMT). The awarding of 39 advanced standing credits limits the transfer of college credits to no more than 51 credits (including the required 30 prerequisites and 21 additional coursework credits). College classes taken as requirements for obtaining paramedic certification may not be utilized toward the 51 credits.

Application Procedures:

Applications are due March 15 and interviews will begin in January for all applicants. Applications received after the deadline will be reviewed based upon available space. All applicants are encouraged to apply early, as admission is competitive and limited seats are available.

Applications may be submitted while course requirements are in progress.

Apply online at: Apply | University of Pittsburgh School of Health and Rehabilitation Sciences

Other Admission Criteria:
All students must have a minimum cumulative GPA of 2.5 (based on 4.0)
A minimum grade of C- or better is required for EM prerequisite courses and a grade of D or better for additional coursework taken at Pitt.
A minimum grade of C or better is required for all transfer credits (courses taken outside of Pitt).

Selection Criteria/Process:

Admissions decisions are based on assessment of the applicants overall academic record and application, the letter of recommendation, personal statement and interview.

Applications are reviewed by the Admissions Committee. Applicants who meet the program minimum requirements are granted an interview. Upon completion of the interviews, the admissions committee meets to review the data on all interviewed applicants and admission decisions (admitted, waitlisted, or rejected) are made. The Director of Admissions notifies the selected applicants.

Transfer Student Information:

Students are required to earn 30 credits within the University of Pittsburgh School of Health and Rehabilitation Sciences, and these may not include prerequisite courses. Senior Transfer students are required to have current certification/licensure as a paramedic and have completed 51 college credits, including the required prerequisite courses. Senior Transfer may not use the Nursing A&P courses to meet the 30-credit minimum. All Senior Transfer and Active-Duty Military students will be offered a 3-credit online EM course each semester to fulfill the 30-credit requirement (Beyond the Body will be offered in the fall semester and Organizational Theory will be offered in the spring). Students may take other 3-credit courses within SHRS (which may not be online) each semester to fulfill the 30-credit requirement. Students must complete EM core credits in a traditional format; web-based or distance course delivery format is available only to enrolled Active-Duty Military students. Applications are accepted on a rolling basis; however, it is best to apply by March 15 as admission is limited and competitive.

Active-Duty Military Student Information:

Applicants who have completed the 51 college courses including prerequisite courses, are currently active with the military, and are currently US SOCM ATPs or certified or licensed at the paramedic level (by a state EMS agency or the National Registry of EMT), may be awarded advanced standing and admitted into the Program as Active-Duty Military students. During the senior year, these students will be required to complete 30 credits within the School of Health and Rehabilitation Sciences to be eligible for graduation. Web-based delivery format is provided for all core courses. These 30 credits may not include prerequisite courses. All Active-Duty Military students will be offered a 3-credit EM elective each semester to fulfill the 30-credit requirement (Beyond the Body will be offered in the fall semester, and Organizational Theory will be offered in the spring).

Emergency Medicine Curriculum

SHRS requires a minimum of 120 credits to graduate, 30 of which must be completed through the School. Elective credits must be approved by the Program.

Fall Term - Junior Year

The EM Program Junior year curricula consists of required courses which are offered only once during the academic year. Any deviation from completing the courses in the planned sequence will result in the delay of progressing through the curriculum and the year of graduation.

- EM 1111 - FOUNDATIONS OF EMERGENCY CARE
- EM 1112 - PATHOPHYSIOLOGY
- EM 1114 - MEDICATION ADMINISTRATION
- EM 1115 - INTRODUCTION TO PHYSICAL ASSESSMENT
- EM 1116 - PHYSICAL EXAM LAB
- EM 1122 - CARDIOLOGY AND RESPIRATORY
- EM 1131 - CLINICAL 1

Spring Term - Junior Year
• EM 1113 - PHARMACOLOGY
• EM 1117 - EMS OPERATIONS
• EM 1123 - CARDIOLOGY LAB
• EM 1124 - ADULT MEDICAL EMERGENCIES
• EM 1125 - OB/GYN, NEWBORN, AND PEDIATRIC CARE
• EM 1126 - ASSESSMENT-BASED MANAGEMENT
• EM 1132 - CLINICAL 2

Fall Term - Senior Year Core Content

• EM 1155 - LEGAL ISSUES IN HEALTH CARE
• EM 1166 - SENIOR INTERNSHIP
• EM 1170 - CRITICAL CARE MEDICINE 1

Spring Term - Senior Year Core Content

• EM 1160 - PROFESSIONAL ISSUES
• EM 1171 - CRITICAL CARE MEDICINE 2

Additional Senior - Level Elective Courses

Electives outside of the EM program shall be reviewed by your advisor and approved by the Program.

• EM 1152 - ISSUES IN HEALTH CARE
• EM 1153 - ISSUES IN HEALTH CARE EDUCATION
• EM 1154 - HEALTH CARE RESEARCH
• EM 1158 - FINANCE AND ACCOUNTING FOR HEALTH CARE
• EM 1168 - LEADERSHIP IN HEALTH CARE
• EM 1177 - SENIOR SEMINAR
• EM 1180 - HEALTH CARE MANAGEMENT
• EM 1185 - BEYOND THE BODY - WEB
• EM 1186 - CERTIFIED AMBULANCE CODER - WEB
• EM 1187 - ORGANIZATIONAL THEORY - WEB
• EM 1199 - INDEPENDENT STUDY
• EM 1250 - INTRODUCTION TO COMMUNITY HEALTH
• EM 1251 - MOBILE INTEGRATED HEALTH CARE
• EM 1260 - COGNITIVE PSYCHOLOGY OF DECISION MAKING
• NUR 0012 - HUMAN ANATOMY AND PHYSIOLOGY 1 with Lab NUR 0002 Credits / Units: 4
• NUR 0013 - HUMAN ANATOMY AND PHYSIOLOGY 2 with Lab NUR 0003 Credits / Units: 4
• REHSCI 1200 - HUMAN ANATOMY with Lab REHSCI 1201 Credits / Units: 4
• REHSCI 1205 - HUMAN PHYSIOLOGY with Lab Credits / Units: 4

Active-Duty Military Students

All core coursework for Active-Duty military students is provided in a web-based format.

• EM 1172 - ISSUES IN HEALTH CARE - WEB
• EM 1173 - ISSUES IN HEALTH CARE EDUCATION - WEB
• EM 1174 - HEALTH CARE RESEARCH - WEB
• EM 1175 - LEGAL ISSUES IN HEALTH CARE - WEB
• EM 1176 - SENIOR INTERNSHIP - WEB
• EM 1177 - SENIOR SEMINAR
• EM 1178 - LEADERSHIP IN HEALTH CARE-WEB
Department of Health Information Management

Accurate, reliable patient data is critical to health professionals, and the health information management department is the key health center for medical staff, administrators, other health professionals, and the community. Due to the increased presence of technology as a key component of health care delivery and the need for quality health care data, more HIM professionals are finding career opportunities in data analytics, business intelligence and in the information systems environment, where they analyze and use health care data, develop, market, and implement software; ensure that systems comply with standards and regulations, and work in support of quality, privacy, and security. The Bureau of Labor Statistics cites health information professionals as one of the 20 fastest-growing occupations in the US. On top of strong job prospects, competitive salaries also await HIM graduates. More than half of new HIM graduates with a bachelor's degree start with salaries in the $50-60,000 range. Please visit www.AHIMA.org for more information on career paths. In addition to course work, the HIM program includes clinical education experiences, which provide valuable hands-on learning for the HIM student.

The health information management program is accredited by the Commission on Health Informatics and Information Management Education (CAHIIM). Following satisfactory completion of all course requirements, the graduate will be awarded the degree of Bachelor of Science and students are eligible to sit for the RHIA (http://www.ahima.org/certification/RHIA) credentialing examination administered by the Commission on Certification for Health Informatics and Information Management (CCHIIM) an affiliate of the American Health Information Management Association (AHIMA) during their last semester of study. For more information, see http://www.shrs.pitt.edu/him/. Results from the 2019 outcomes assessment reported to CAHIIM in the 2020 Annual Program Report (APAR) indicate a 93% graduation rate, a 94% employment rate and a 100% retention rate.

Major

Health Informatics, BS

On September 30th, 2021 the Health Information Management, BS was approved to be renamed to Health Informatics, BS. Students enrolled within the existing Health Information Management, BS will be given the choice to
complete the program under the HIM name, and requirements, or transition to the new HI name and requirements.

**Freshman guarantee students will be notified of the name change and if they choose to enroll in the HIM program must do so by fall 2023. In order to maintain accurate records the program was updated on October 11, 2021.**

Accurate, reliable patient data is critical to health professionals, and the health information management department is the key health center for medical staff, administrators, other health professionals, and the community. Due to the increased presence of technology as a key component of health care delivery and the need for quality health care data, more HIM professionals are finding career opportunities in data analytics, business intelligence and in the information systems environment, where they analyze and use health care data, develop, market, and implement software; ensure that systems comply with standards and regulations, and work in support of quality, privacy, and security. The Bureau of Labor Statistics cites health information professionals as one of the 20 fastest-growing occupations in the US. On top of strong job prospects, competitive salaries also await HIM graduates. More than half of new HIM graduates with a bachelor's degree start with salaries in the $50-60,000 range. Please visit www.AHIMA.org for more information on career paths. In addition to course work, the HIM program includes clinical education experiences, which provide valuable hands-on learning for the HIM student.

The health information management program is accredited by the Commission on Health Informatics and Information Management Education (CAHIIM). Following satisfactory completion of all course requirements, the graduate will be awarded the degree of Bachelor of Science and students are eligible to sit for the RHIA (http://www.ahima.org/certification/RHIA) credentialing examination administered by the Commission on Certification for Health Informatics and Information Management (CCHIIM) an affiliate of the American Health Information Management Association (AHIMA) during their last semester of study. **Admission Requirements**

SHRS is updating our General Education requirements. Students entering the University of Pittsburgh in Fall 2021 as first-year students, and students currently enrolled at the University of Pittsburgh and external transfer students entering the upper-level programs offered at SHRS in Fall 2023, must complete the new general education requirements before graduating. Our General Education Requirements are included in our upper-level program prerequisites and curriculum requirements; therefore, changes will be reflected in prerequisites and curriculum requirements.

Students are admitted into the health information management program after successful completion of a minimum of 60 credits, including the following prerequisite courses:

**Prerequisite Courses**

Requirements for students who entered the University of Pittsburgh as first-year students prior to Fall 2021 applying for Fall 2022 admission:
• Natural Science (Any Biology, Chemistry or Physics course) - 3 Credits
• Communication (Public Speaking Preferred) - 3 Credits
• Computer Programming - 3 Credits
• Composition/General Writing, 6 Credits
• Mathematics* - 2-3 Credits
• Psychology (Any) - 3 Credits
• Statistics* - 3-4 Credits
• Humanities/Social Sciences - 6 Credits
* A combination of 6 credits of math and statistics is required.

Requirements for students entering the University of Pittsburgh in Fall 2021 as first-year students, and students currently enrolled at the University of Pittsburgh and external transfer students entering the upper-level programs offered at SHRS in Fall 2023:

• Computer Programming, 1 course
• Seminar in Composition*, 1 course
• Writing Intensive, 1 course.
• Oral Communication, 1 course. COMMRC 0520 preferred; 0500, 0510, 0530 acceptable.
• Six credits of math and statistics are required:
  • College Algebra, 1 course. MATH 0031 or higher math required. Exemption not accepted.
  • Statistics, 1 course. STAT 0200 or STAT 1000 preferred.
• Diversity*, 1 course
• Literature*, The Arts*, Creative Work* or Philosophical Thinking and Ethics*, 1 course
• Introduction to Social Psychology, PSY 0105 or Psychology of Personality, PSY 0160
• Biology, Chemistry or Physics, 1 course
• Cross-Cultural Awareness*, Global Issues*, or Specific Geographic Region*, 1 course
* See the Dietrich School of Arts and Sciences General Education Course Catalog.

Other admission criteria include minimum cumulative GPA of 2.50 (based on 4.00), and minimum of a C- grade in all courses designated as prerequisite (C required for credit transfer from other institutions); volunteer or paid work experience in the field of health information management is recommended.

Pitt Students (including regional campuses)

SHRS is moving to a new application platform. Please visit the SHRS website to access information about applying to enter our programs.

Transfer Students

Transfer students must apply to the University of Pittsburgh by completing the Office of Admission and Financial Aid's Transfer Application and selecting Health Information Management as their intended field of study. International transfer students click here. Transfer students must also submit application materials directly to SHRS.

All applicants must:

• Submit a personal essay-a brief statement discussing why you are interested in the Undergraduate Program in Health Information Management, your professional goals including how and when you became interested in this field of study. You may also include other areas of interest, extracurricular activities and leadership experiences;
• Submit one letter of recommendation. Recommendation from a college instructor/professor, recent supervisor, or academic advisor preferred;
• Submit official transcripts from all colleges and universities attended. Pitt students do not have to provide transcripts they have already provided to Pitt;
• Applications can be submitted when course requirements are in progress.

Applications are reviewed on a rolling basis.
Part-Time Study

Students may pursue this program on a part-time basis. A meeting with the appropriate advisor is recommended.

Progression for the Registered Health Information Technician (RHIT)

Provision for transfer of credits may be made for those students who have satisfactorily completed a junior college health information technology program accredited by the Commission on Health Informatics and Information Management Education (CAHIIM).

Clinical Education

Health Information Management undergraduate students are required to complete a 3 credits internship (minimum of 120 hours) to facilitate a deeper understanding of the professional practice aspects of health information and health informatics. The overall goal of the internship is to provide students with practical experiences to apply their knowledge and skills that they develop as they progress through the HIM curriculum.

The HIM department has affiliation agreements with approximately 120+ clinical sites for student internships. The following list provides a sample of these sites:

- Adelphoi Village (behavioral health)
- Country Meadows Nursing Home
- Geisinger Health System
- goShadow
- Heritage Valley Health Center
- Intermountain Health Care, Salt Lake City, UT
- 3MM*Modal MedAllies
- PA Department of Corrections
- Pitt CTSI
- The Innovation Center of UPMC
- Trinity Health System
- UCLA Medical Center
- University of Pittsburgh Dental Informatics
- University of Pittsburgh Cancer Institute (Hillman Cancer Center)
- UPMC Health Plan
- UPMC Health System
- UPMC Physician Services Division
- Wheeling Hospital

Prerequisites for Internship:

If a student chooses to complete their internship at a site that is under contract with the HIM department (or any other site where a contract is required), the items listed below are required. If a contract is not required, the student must sign a waiver. The student's advisor will provide detailed information and time guidelines for completion of the requirements once the student matriculates into the graduate program.

- Physical examination including proof or completion of specific immunizations
- TB test, 2-step
- Pennsylvania Criminal Record Check
- Pennsylvania Child Abuse Clearance
- Recognizing and Reporting Child Abuse Training
- FBI Background Check (includes fingerprinting)
• HIPAA Training and Certification
• Bloodborne Pathogen Training and Certification
• Students must carry personal health insurance while participating in clinical education
Students must carry professional student liability insurance coverage while participating in an internship at a site where contracts are required. The University provides liability insurance for internships covered by clinical affiliation contracts.

• Some sites may have additional requirements (i.e. drug screen, Covid-19 vaccine, influenza vaccine, or orientation programs specific to their organization).
• Clinical Education sites may not allow a student to participate in an internship at their site if the background check reports that they have been convicted of a misdemeanor; a felony; or a felonious or illegal act associated with alcohol and/or substance abuse.
• Current year Flu Shot

Additional Information:

• Travel to clinical education sites is the responsibility of the student. Students are expected to have a car or to provide their own transportation to all remote sites; no exceptions will be made. Not all sites are accessible by public transportation.
• All expenses for transportation, parking, meals, and costs of prerequisites associated with clinical education are the responsibility of the student.
• The HIM Department utilizes an outside document management vendor, EXXAT, to collect and track student compliance with internship requirements. Cost for creating an Exxat account is $25/student. Approximate cost for clearances is $125 annually, and costs for physical exam and immunization status are dependent on health insurance coverage and provider costs.
• Approximate cost for drug screen is $60.

For more information on the Clinical Internship, email Patti Anania-Firouzan, HIM Clinical Education Coordinator: patti@pitt.edu.

The Pitt Freshman Guarantee

All incoming Pitt freshmen choosing the Pre-Health Information Management major will be granted guaranteed admission for the Master of Science in Health and Rehabilitation Sciences with a concentration in Health Information Management (at regional Pitt campuses, choose corresponding codes).

Program Curriculum

Fall Term-Junior Year

• HRS 1011 - CLINICAL SCIENCES IN HEALTH INFORMATION MANAGEMENT
• HIM 1020 - HEALTH DATA SCIENCE PROGRAMMING USING PYTHON AND R
• HIM 1210 - HEALTH INFORMATION AND THE HEALTH CARE SYSTEM
• HIM 1250 - FOUNDATIONS OF HEALTH INFORMATICS AND INFORMATION MANAGEMENT
• HIM 1430 - LEADERSHIP

Credits: 15

Spring Term-Junior Year

• HIM 1437 - CLASSIFICATION SYSTEMS IN HEALTHCARE
• HIM 1451 - DATABASE DESIGN AND BIG DATA ANALYTICS
• HIM 1452 - DIGITAL HEALTH AND ELECTRONIC HEALTH RECORD SYSTEM
• HIM 1454 - DATA SCIENCE IN HEALTH INFORMATICS
• HIM 1650 - INTRO TO STATISTICS AND RESEARCH DESIGN

Credits: 15

Fall Term-Senior Year
The Undergraduate Program in Rehabilitation Science

The Bachelor of Science Program in Rehabilitation Science offers a dynamic curriculum designed to prepare students for graduate education in occupational therapy, physical therapy, physician assistant studies, prosthetics and orthotics, rehabilitation counseling and assistive technology, as well as for graduate studies in other health care fields. In addition to the coursework offered, the program has the flexibility to allow students to pursue their particular interests and goals. Students are encouraged to explore other areas of academic inquiry through elective courses, minors and certificates throughout the University and abroad; to participate in clinical experiences; to involve themselves in undergraduate research; and to develop their leadership and community building skills through participation in student organizations and community service.

The majority of faculty members who teach in this program are a strong interdisciplinary group of individuals from the School of Health and Rehabilitation Sciences departments, including the departments of Emergency Medicine, Occupational Therapy, Physical Therapy, Physician Assistant Studies, and Rehabilitation Science and Technology. In addition, instructors from other Schools of the Health Sciences (e.g. Nursing, Pharmacy, Public Health) teach within the program along with community leaders, clinicians and researchers with experience in selected areas.

*On September 30, 2021 the total SHRS credits were approved to be changed from 63 to 60. In order to maintain accurate records, the update was made on October 11, 2021.
Certificate

Assistive Technology in Rehabilitation Certificate

Undergraduate Rehabilitation Science Certificates

The Undergraduate Program in Rehabilitation Science offers undergraduate certificates for students planning to continue their education in rehabilitation science programs or those seeking a concentration of courses in a particular rehabilitation science area. These certificates are designed to best prepare students for rehabilitation-related graduate programs; however, the certificates are not a requirement for application.

Completion of the Assistive Technology in Rehabilitation Certificate provides a focused area of study for students interested in careers providing technology to individuals with disabilities. It will prepare students for graduate programs such as prosthetics and orthotics or rehabilitation technology. It will also provide the course work and some of the clinical hours needed to satisfy the requirements for the RESNA (Rehabilitation Engineering and Assistive Technology Society of North America) Assistive Technology Supplier certification.

Requirements

Course requirements are as follows:

- REHSCI 1200 - HUMAN ANATOMY and
- REHSCI 1201 - HUMAN ANATOMY LAB
- REHSCI 1205 - HUMAN PHYSIOLOGY *
  Or other approved Human Physiology course(s), 4 credits
- HRS 1701 - INTRODUCTION TO ORTHOTICS AND PROSTHETICS
- RT 1101 - FUNDAMENTALS OF REHABILITATION & ASSISTIVE TECHNOLOGY APPLICATIONS
- RT 1102 - FUNDAMENTALS OF REHABILITATION & ASSISTIVE TECHNOLOGY DESIGN
- REHSCI 1210 - NEUROSCIENCE or
- NROSCI 0080 - UHC BRAIN AND BEHAVIOR or
- NROSCI 1000 - INTRO TO NEUROSCIENCE or
- PSY 0505 - INTRODUCTION TO BIOPSYCHOLOGY
- REHSCI 1220 - KINESIOLOGY AND BIOMECHANICS and
- REHSCI 1221 - KINESIOLOGY AND BIOMECHANICS LAB
- REHSCI 1275 - INTRO TO OCCUPATION SCIENCE
- REHSCI 1290 - PRACTICAL ISSUES IN DISABILITY or
- HRS 1017 - INTRODUCTION TO EPIDEMIOLOGY or
- HRS 1515 - REHABILITATION PSYCHOLOGY or
- PSY 0515 - REHABILITATION PSYCHOLOGY or
- TLL 1580 - FOUNDATIONS OF SPECIAL EDUC or
- TLL 1560 - EARLY EDUCATION OF YOUNG CHILDREN WITH DISABILITIES or
- HHD 1010 - DEVELOPMENTAL DISABILITIES
• REHSCI 1296 - ASSISTIVE TECHNOLOGY IN REHABILITATION FIELD EXPERIENCE
  3 credits OR (2 credits and RT 1207)

• RT 1207 - CLIENT CENTERED REHABILITATION & ASSISTIVE TECHNOLOGY DESIGN
  Optional, see REHSCI 1296 requirement

Total Certificate Credits: 32-35

*Beginning Fall 2022, REHSCI 1205 & 1206, or other approved course(s), will be required.

Pathokinesiology in Rehabilitation Certificate

Undergraduate Rehabilitation Science Certificates

The Undergraduate Program in Rehabilitation Science offers undergraduate certificates for students planning to continue their education in rehabilitation science programs or those seeking a concentration of courses in a particular rehabilitation science area. These certificates are designed to best prepare students for rehabilitation-related graduate programs; however, the certificates are not a requirement for application.

Completion of the Pathokinesiology in Rehabilitation Certificate provides the student with an excellent background in the sciences related to normal and pathological motion. It complements coursework offered in graduate programs such as physical therapy, occupational therapy, physician assistant studies, exercise science, kinesiology, and sports medicine. With minimal additional coursework (nutrition and fitness instruction), it also prepares students to take examinations for certification as a personal trainer or fitness expert, such as the Certified Strength and Conditioning Specialist (CSCS®) offered by the National Strength and Conditioning Association.

Requirements

Course requirements are as follows:

• REHSCI 1200 - HUMAN ANATOMY and
• REHSCI 1201 - HUMAN ANATOMY LAB

• REHSCI 1205 - HUMAN PHYSIOLOGY *
  *Or other approved Human Physiology courses(s), 4 credits

• REHSCI 1210 - NEUROSCIENCE

• REHSCI 1215 - EXERCISE PHYSIOLOGY and
• REHSCI 1216 - EXERCISE PHYSIOLOGY LAB

• REHSCI 1220 - KINESIOLOGY AND BIOMECHANICS and
• REHSCI 1221 - KINESIOLOGY AND BIOMECHANICS LAB

• REHSCI 1250 - PATHOPHYSIOLOGY/HUMAN DISEASE

• REHSCI 1285 - INTRO TO EVIDENCED-BASED REHAB

Total Certificate Credits: 25

*Beginning Fall 2022, REHSCI 1205 & 1206, or other approved course(s), will be required.
Psycho-Social Issues in Rehabilitation Certificate

Undergraduate Rehabilitation Science Certificates

The Undergraduate Program in Rehabilitation Science offers undergraduate certificates for students planning to continue their education in rehabilitation science programs or those seeking a concentration of courses in a particular rehabilitation science area. These certificates are designed to best prepare students for rehabilitation-related graduate programs; however, the certificates are not a requirement for application.

Completion of the Psycho-Social Issues in Rehabilitation Certificate provides the student with a background in the psychological and social issues involved in disability, rehabilitation, and personal care. It helps prepare students for graduate programs in areas such as occupational therapy, physician assistant studies, rehabilitation counseling, accelerated or direct entry nursing programs, or disability studies.

Requirements

Course requirements are as follows:

- REHSCI 1200 - HUMAN ANATOMY and
- REHSCI 1201 - HUMAN ANATOMY LAB
- REHSCI 1205 - HUMAN PHYSIOLOGY *
  *Or other approved Human Physiology course(s), 4 credits
- REHSCI 1210 - NEUROSCIENCE or
- NROSCI 0080 - BRAIN AND BEHAVIOR or
- NROSCI 0083 - UHC BRAIN AND BEHAVIOR or
- NROSCI 1000 - INTRO TO NEUROSCIENCE or
- NROSCI 1003 - UHC INTRODUCTION TO NEUROSCIENCE or
- PSY 0505 - INTRODUCTION TO BIOPSYCHOLOGY
- REHSCI 1230 - REHABILITATION ETHICS
- REHSCI 1250 - PATHOPHYSIOLOGY/HUMAN DISEASE
- REHSCI 1275 - INTRO TO OCCUPATION SCIENCE
- RT 1101 - FUNDAMENTALS OF REHABILITATION & ASSISTIVE TECHNOLOGY APPLICATIONS
- REHSCI 1290 - PRACTICAL ISSUES IN DISABILITY or
- HRS 1515 - REHABILITATION PSYCHOLOGY or
- PSY 0515 - REHABILITATION PSYCHOLOGY or
- HRS 1017 - INTRODUCTION TO EPIDEMIOLOGY or
- TLL 1580 - FOUNDATIONS OF SPECIAL EDUC or
- TLL 1560 - EARLY EDUCATION OF YOUNG CHILDREN WITH DISABILITIES or
- HHD 1010 - DEVELOPMENTAL DISABILITIES

Total Certificate Credits: 26-27

*Beginning Fall 2022, REHSCI 1205 & 1206, or other approved course(s), will be required.

Major

Rehabilitation Science, BS
The Bachelor of Science Program in Rehabilitation Science (BSRS) offers a dynamic curriculum designed to prepare students for graduate education in occupational therapy, physical therapy, physician assistant studies, prosthetics and orthotics, rehabilitation counseling and assistive technology, in addition to other health care professions. The program has core curriculum requirements with enough flexibility to permit students to pursue their particular interests and goals. Students are encouraged to explore other areas of academic inquiry through elective courses, minors and certificates throughout the University and abroad; to participate in clinical experiences; to involve themselves in undergraduate research; and to develop their leadership skills through participation in student organizations and community service.

Faculty who teach in the BSRS program constitute a strong interdisciplinary group of individuals from the School of Health and Rehabilitation Sciences including representation from the departments of Emergency Medicine, Occupational Therapy, Physical Therapy, Physician Assistant Studies, and Rehabilitation Science and Technology. In addition, instructors from other Schools of the Health Sciences (e.g., Nursing, Pharmacy, Public Health) teach within the program along with community leaders, clinicians and researchers with experience in selected areas.

Admission Requirements

SHRS is updating our General Education requirements. Students entering the University of Pittsburgh in Fall 2021 as first-year students, students currently enrolled at the University of Pittsburgh and external transfer students entering the upper-level programs offered at SHRS in Fall 2023, must complete the new general education requirements before graduating. Our General Education Requirements are included in our upper-level program prerequisites and curriculum requirements; therefore, changes will be reflected in prerequisites and curriculum requirements.

Students are eligible for admission to the Rehabilitation Science Program after successful completion of approximately 60 college credits including the following prerequisite courses, other admission criteria and an application. Applications will be viewed when approximately 45 credits have been completed and 15 credit are in process.

Prerequisite Courses

Requirements for students who entered the University of Pittsburgh as first-year students prior to Fall 2021 applying for Fall 2022 admission:

- General Biology (BIOSC 0150 or BIOSC 0715) and Lab (BIOSC 0050 or BIOSC 0057 or BIOSC 0058) - 4 Credits
- General Chemistry and Lab (CHEM 0110 or CHEM 0710) - 4 Credits
- Physics 1 (PHYS 0110 or PHYS 0174 or PHYS 0475) - 3-4 Credits
- Mathematics (MATH 0031 or higher) - 2-3 Credits
- Students exempt from algebra requirement with a 620 or above Math SAT or a 27 and above Math ACT
- Statistics (STAT 0200, STAT 1000, or higher) - 3-4 Credits
- Introduction to Psychology (PSY 0010) - 3 Credits
- Human Development - 3 Credits

REHSCI 1245 - HUMAN DEVELOPMENT preferred; PSY 0310 - DEVELOPMENTAL PSYCHOLOGY accepted

- English Composition (Minimum ENGCMP 0200 or equivalent) - 3 Credits
- Intensive Writing (W) (ENGCMP 0440 Critical Writing recommended) - 3 Credits
- Social Science/Humanities (ANTH 0780 Cultural Anthropology recommended) - 6 Credits

Total Prerequisite Credits: 34-37

Requirements for students entering the University of Pittsburgh in Fall 2021 as first-year students, and students currently enrolled at the University of Pittsburgh and external transfer students entering the upper-level programs offered at SHRS in Fall 2023:
• General Biology (BIOSC 0150 or BIOSC 0715) and Lab (BIOSC 0050 or BIOSC 0057 or BIOSC 0058) - 4 Credits
• General Chemistry and Lab (CHEM 0110 or CHEM 0710) - 4 Credits
• Physics 1 (PHYS 0110 or PHYS 0174 or PHYS 0475) - 3-4 Credits
• Mathematics (MATH 0031 or higher) - 2-3 Credits. Students exempt from algebra requirement with a 620 or above Math SAT or a 27 or above Math ACT
• Statistics (STAT 0200, STAT 1000, or higher) - 3-4 Credits
• Introduction to Psychology (PSY 0010) - 3 Credits
• Human Development - 3 Credits. REHSCI 1245 - HUMAN DEVELOPMENT preferred; PSY 0310 - DEVELOPMENTAL PSYCHOLOGY accepted
• English Composition (Minimum ENGCMP 0200 or equivalent) - 3 Credits
• Intensive Writing (W) - 3 Credits. Choose one course with Course Attribute "High Impact Practices" and Course Attribute Value "Writing Intensive Course." ENGCMP 0440 Critical Writing recommended
• Oral Communication - 3 Credits. COMMRC 0520 Public Speaking preferred; COMMRC 0500, 0510, 0530 accepted
• Diversity course - 3 Credits. Choose one course with Course Attribute "DSAS General Education Requirement" and Course Attribute Value "Diversity."
• Humanities course - 3 Credits. Choose one course with Course Attribute "DSAS General Education Requirement" and Course Attribute Value "Literature" or "Creative Work" or "Philosophical Thinking or Ethics" or "The Arts." Consider a course in bioethics or one with a disability or health/medicine focus.
• Social Science course - 3 Credits. Choose one course with Course Attribute "DSAS General Education Requirement" and Course Attribute Value "Social Science." Consider a course with a disability or health/medicine focus.
• Global Awareness and Cultural Understanding - 3 Credits. Choose one course with Course Attribute "DSAS General Education Requirement" and Course Attribute Value "Cross-Cultural Awareness" or "Geographic Region" or "Global Issues." ANTH 0780 Cultural Anthropology recommended.

Total Prerequisite Credits: 43-46

Students planning to apply to graduate programs in health sciences are encouraged to complete most of the prerequisite courses for those programs (e.g., Physics 2, Biology 2, Chemistry 2, etc.) prior to admission to the Undergraduate Rehabilitation Science Program. Anatomy and Physiology (prerequisites for many professional health science programs) are included in the Rehabilitation Science curriculum.

Application Procedures

SHRS is moving to a new application platform. Please visit the SHRS website to access information about applying to enter our programs.

Required for admission: an application with all transcripts from colleges attended, a personal statement, one letter of recommendation, and a resume. A minimum cumulative GPA of 2.75 and a minimum math and science prerequisite GPA of 2.5 is required (3.0 or higher GPAs are typical for admission). Please note that admission to the Rehabilitation Science program is competitive. Meeting the minimum admission criteria does not guarantee admission.

Transfer Student Information:

Transfer students must apply to the University of Pittsburgh by completing the Office of Admission and Financial Aid's Transfer Application and selecting Rehabilitation Science as their intended field of study. International transfer students click here. Application deadline: February 15

Rehabilitation Science Curriculum

While enrolled in the Rehabilitation Science program, students must complete the core courses, at least one course from each of the core areas and a minimum of 30 credits from SHRS, inclusive of course requirements. Students must complete 120 cumulative credits to graduate with the BS in Rehabilitation Science degree.

• The 30 required SHRS credits include courses from the following departments: ATHLTR, CSD, EM, HIM, HRS, NUTR, and REHSCI.

Online Course Policy:
Once a student has matriculated into the BSRS Program, up to 6 online credits will be accepted from either the University of Pittsburgh or another four-year institution. An additional one credit may be accepted for an online medical terminology course. No online courses will be accepted from a two-year institution, other than medical terminology.

Students are expected to review their plan of study with the BSRS Academic Advisor before registering for any online course.

Additional online credits may be accepted if taken prior to matriculation into the BSRS Program.

Policy on Taking Courses at Another Institution:

Current BSRS students in good academic standing (cumulative GPA of at least 2.00), including students admitted to BSRS who need to complete prerequisites prior to starting their program, may attend another accredited institution to complete their prerequisites, provided they receive prior approval from the Academic Advisor and SHRS Dean's office. Students who have completed 60 or more credits may not take program-required courses or electives at two-year institutions. However, up to six credits of graduate school prerequisites may be taken at a two-year institution and be applied to the BSRS degree.

Students seeking to take and transfer credits from another institution are required to fill out the SHRS form, Request to Take Courses at Another College or University and submit it along with appropriate course descriptions to their academic advisor. Students will not receive credit for courses taken without advance approval. BSRS students may not enroll in courses outside the University of Pittsburgh in the semester in which they are graduating.

Core Course Requirements

- REHSCI 1200 - HUMAN ANATOMY
- REHSCI 1201 - HUMAN ANATOMY LAB
- REHSCI 1225 - INTRO TO REHABILITATION SCIENCE
- REHSCI 1235 - MEDICAL TERMINOLOGY
- REHSCI 1240 - ISSUES IN HEALTH CARE
- REHSCI 1265 - PHARMACOLOGY IN REHABILITATION
- REHSCI 1280 - PSYCH AND SOCGLY OF DISABILITY

Core Areas

Human Physiology (4 credits):

One of the following:

- REHSCI 1205 - HUMAN PHYSIOLOGY
  Beginning Fall 2022, students must take REHSCI 1206 Human Physiology Lab in addition to REHSCI 1205.
- BIOSC 1070 - HUMAN PHYSIOLOGY-UHC
- BIOSC 1250 - HUMAN PHYSIOLOGY or
- NROSCI 1250 - HUMAN PHYSIOLOGY and
- BIOSC 1255 - PHYSIOLOGY LABORATORY
- NROSCI 1070 - HUMAN PHYSIOLOGY-UHC
  Another approved course

Neuroscience:

One of the following:

- REHSCI 1210 - NEUROSCIENCE
- NROSCI 0080 - BRAIN AND BEHAVIOR
- NROSCI 0083 - UHC BRAIN AND BEHAVIOR
• NROSCI 1000 - INTRO TO NEUROSCIENCE
• NROSCI 1003 - UHC INTRODUCTION TO NEUROSCIENCE
• PSY 0505 - INTRODUCTION TO BIOPSYCHOLOGY

Research Methodology:

One of the following:

• REHSCI 1000 - PRINCIPLES OF RESEARCH METHODOLOGY *strongly recommended*
• PSY 0036 - RESEARCH METHODS LECTURE

Global Citizenship:

One of the following:

• REHSCI 1292 - DIVERSITY AND CULTURAL ISSUES IN HEALTH, DISABILITY AND REHABILITATION
• ANTH 1761 - PATIENTS AND HEALERS: MEDICAL ANTHROPOLOGY 1
• HIST 1090 - HISTORY OF MEDICINE AND HEALTH CARE
• NUR 1829 - CONTEN ISSUES CROSS CULTL HEALTH
• PSY 0186 - CROSS CULTURAL PSYCHOLOGY
• PUBHLT 1001 - INTRODUCTION TO GLOBAL HEALTH
• PUBHLT 1002 - SPECIAL TOPICS IN GLOBAL HEALTH
• SOCWRK 1035 - GLOBAL PERSPECTIVES SOCIAL WORK
• SPAN 1323 - MEDICAL SPANISH

A Study/Internship abroad with a health, rehabilitation, or disability component, and an academic inquiry into culture may fulfill this requirement. Contact department for additional details and requirements.

Health/Science Writing Intensive:

One of the following:

• ENGCMP 0430 - PUBLIC COMMUNICATION OF SCIENCE AND TECHNOLOGY
• ENGCMP 0450 - RESEARCH WRITING
• ENGCMP 0530 - WRITING FOR THE SCIENCES
• ENGCMP 0535 - WRITING IN THE HEALTH SCIENCE PROFESSIONS
• ENGCMP 1101 - LANGUAGE OF SCIENCE AND TECHNOLOGY
• ENGCMP 1102 - LANGUAGE OF MEDICINE
• ENGCMP 1400 - GRANT WRITING FOR NONPROFITS

Total Core Requirements

Total Core Requirement Credits: 31-32

Additional Rehabilitation Science Elective Courses

• REHSCI 1215 - EXERCISE PHYSIOLOGY
• REHSCI 1216 - EXERCISE PHYSIOLOGY LAB
• REHSCI 1220 - KINESIOLOGY AND BIOMECHANICS
• REHSCI 1221 - KINESIOLOGY AND BIOMECHANICS LAB
• REHSCI 1230 - REHABILITATION ETHICS
• REHSCI 1245 - HUMAN DEVELOPMENT
• REHSCI 1250 - PATHOPHYSIOLOGY/HUMAN DISEASE
Example Plan of Study

This plan of study example includes both required and elective courses offered in the Undergraduate Program in Rehabilitation Science. Students are encouraged to design their own plan of study based on their career, academic and personal interests.

Junior Year-Fall Term

- HRS 1701 - INTRODUCTION TO ORTHOTICS AND PROSTHETICS
- REHSCI 1200 - HUMAN ANATOMY
- REHSCI 1201 - HUMAN ANATOMY LAB
- REHSCI 1205 - HUMAN PHYSIOLOGY
- REHSCI 1225 - INTRO TO REHABILITATION SCIENCE
- REHSCI 1235 - MEDICAL TERMINOLOGY
- REHSCI 1240 - ISSUES IN HEALTH CARE

Credits: 15

Junior Year-Spring Term

- Study Abroad - 15 Credits
  or
- REHSCI 1000 - PRINCIPLES OF RESEARCH METHOLOGY
- REHSCI 1220 - KINESIOLOGY AND BIOMECHANICS
- REHSCI 1221 - KINESIOLOGY AND BIOMECHANICS LAB
- REHSCI 1275 - INTRO TO OCCUPATION SCIENCE
- REHSCI 1265 - PHARMACOLOGY IN REHABILITATION
- REHSCI 1292 - DIVERSITY AND CULTURAL ISSUES IN HEALTH, DISABILITY AND REHABILITATION

Credits: 15

Senior Year-Fall Term

- RT 1101 - FUNDAMENTALS OF REHABILITATION & ASSISTIVE TECHNOLOGY APPLICATIONS
- REHSCI 1210 - NEUROSCIENCE
- REHSCI 1215 - EXERCISE PHYSIOLOGY
- REHSCI 1216 - EXERCISE PHYSIOLOGY LAB
- REHSCI 1230 - REHABILITATION ETHICS
- REHSCI 1285 - INTRO TO EVIDENCED-BASED REHAB
Senior Year-Spring Term

- REHSCI 1250 - PATHOPHYSIOLOGY/HUMAN DISEASE
- REHSCI 1280 - PSYCH AND SOCLGY OF DISABILITY
- REHSCI 1295 - FIELD EXPERIENCE
- Electives - 5 Credits

Credits: 15

School of Nursing

The School of Nursing, as an integral part of the University of Pittsburgh, subscribes to the University's commitment to teaching, research, and service. Through these major functions, the school strives to have a positive impact on the quality of health care for all people.

The school offers baccalaureate (BSN), master's (MSN), and doctoral programs in philosophy (PhD) or nursing practice (DNP) that anticipate and reflect health care needs locally, nationally, and internationally. It prepares graduates to function effectively in multifaceted, roles in a variety of settings to promote the health and well-being of people. It strives to instill a spirit of inquiry, encourage academic excellence, and foster lifelong learning in all students. The school seeks to enroll highly qualified students who represent racial, cultural, and geographic diversity and to prepare students for employment in a multicultural society. In keeping with the University's emphasis on excellence in undergraduate education, the school is committed to providing an undergraduate program with a strong clinical focus that builds upon a background in the liberal arts and sciences and provides the foundation for its graduates to become outstanding clinicians.

The knowledge, skill, teaching effectiveness, and diversity of the faculty are important factors in the success of our graduates. The school is committed to fostering excellence in teaching through the faculty's clinical expertise and practice, instructional competency, and development of state-of-the-art knowledge through research. State-of-the-art technology is used to enhance student access and learning. The school supports an environment conducive to research, encourages interdisciplinary collaboration, and seeks to make research an integral part of the learning environment. The success of the school's research agenda continues to determine its national recognition and realm of influence.

The school believes that faculty and students should engage in public, professional, and community services as a way for them to share their knowledge, positively influence patient care delivery, and enhance their own and their peers' professional growth. Such involvement provides leadership for societal change, helps develop effective health care policies, and enhances health care for all people. Service is reflected in leadership and volunteer responsibilities related to the political process, professional organizations, and community service agencies.

Nursing Living Learning Community (LLC)

The Nursing Living Learning Community is an on-campus residency/learning community for nursing students. LLC expresses the School of Nursing's commitment to giving a small campus experience at a large institution. Students are provided with a well-rounded approach to their studies as well as University life, while allowing students to be housed together on one floor, in a group setting. Situated in Lothrop Hall, the LLC is adjacent to the Victoria Building, which houses the School of Nursing. This proximity to the Nursing School provides and added element of convenience for the student. The resident assistant for the LLC is a third or fourth year nursing student who works closely with the faculty and staff in the School of Nursing. One of the goals for the LLC is to provide students with educational experiences that are not normally afforded to incoming first year students. Students who participate in the LLC are given an early opportunity to develop their leadership skills by attending the prestigious Emerging Leaders Program. The LLC also schedules and facilitates study group sessions, nursing presentations, and social gatherings for the nursing residents.

Admission to the LLC is by application only and is limited to students in the traditional undergraduate baccalaureate program.

Admission Information

The School of Nursing will accept applications for the Undergraduate Baccalaureate Program from prospective students who have had the following educational preparation:
High school graduates

Students transferring from the regional campuses and other schools of the University of Pittsburgh

Students transferring from other colleges and universities

Graduates from a baccalaureate program in any field of study (Accelerated 2nd Degree BSN Program)

All students who wish to obtain a Bachelor of Science in Nursing degree must apply and be accepted into the School of Nursing. Admission to other schools within the university, or to regional campuses does not guarantee admission to the School of Nursing. In general, the student's educational background will determine the most appropriate curriculum plan and program track in which to earn a BSN.

Individual State Boards of Nursing may prohibit a person convicted of any felonious act from licensure as a registered nurse (RN). Prospective students in that situation should contact the Board of Nursing in the state where they plan to practice following graduation.

High School Graduates

Applicants may obtain application information from the Office of Admissions and Financial Aid's Web site: http://www.oafa.pitt.edu/freshadm.aspx. Online application is also available on the OAFA web site.

Additional information regarding the application process and eligibility criteria is available on the School of Nursing Web site: http://www.nursing.pitt.edu/degree-programs/undergraduate-bsn-program

All high school applicants must meet the requirements for admission to the University of Pittsburgh as well as those specifically for the School of Nursing. High school courses required of all applicants are:

<table>
<thead>
<tr>
<th>Course</th>
<th>Units*</th>
</tr>
</thead>
<tbody>
<tr>
<td>English</td>
<td>4</td>
</tr>
<tr>
<td>Mathematics</td>
<td>4</td>
</tr>
<tr>
<td>Social Studies</td>
<td>3</td>
</tr>
<tr>
<td>Science with a related laboratory or the equivalent (one unit must be in chemistry)</td>
<td>3</td>
</tr>
<tr>
<td>Academic Electives**</td>
<td>5</td>
</tr>
<tr>
<td>**Total</td>
<td>19</td>
</tr>
</tbody>
</table>

*A unit is equivalent to one year of successful completion of acceptable coursework.

**Two units of second language as an elective are highly recommended.

Each high school applicant is required to submit results of the SAT or ACT. The Admissions Office may request additional information, examinations, or measures for determining eligibility.

Students Applying for Transfer from within the University (Internal Transfer)

Students who wish to transfer from schools within the University (College of Arts and Sciences, College of General Studies, and regional campuses) to the undergraduate program in the School of Nursing must consult with their academic advisor to officially initiate the transfer process. All records must be received by the School of Nursing in order for students to be considered for admission. Admission is offered for the Fall and Spring terms. The School of Nursing makes transfer decisions through a competitive process based upon academic eligibility and seating availability. For more information refer to:

http://www.nursing.pitt.edu/admissions/internal-transfer-applicants
Students Applying for Transfer from Other Universities or Colleges (External Transfer)

Applicants who have completed at least 12 credits or one full-time term of study at any institution of higher education other than the University of Pittsburgh will be considered for transfer into the School of Nursing on a competitive basis. Prospective transfer students are required to complete an online Transfer Application and submit all necessary supporting materials to the Office of Admissions and Financial Aid. For more information refer to: http://www.nursing.pitt.edu/admissions/external-transfer-applicants

Admission to the School of Nursing as a transfer student is contingent upon vacancies in the first year class. Competitive transfer applicants typically have a minimum GPA of 3.5 (on a 4.0 scale) after completion of 24 credits at a college level and B grades or better in science classes and SAT score of 1280 or higher (or an ACT composite score of 27 or higher). However, exceptions may be considered based upon the qualifications of the applicant. Applicants will be evaluated on their academic performance in both high school and a college or university. The following points govern the allowable advanced-standing credits:

- Official transcripts of courses taken at other universities or colleges must be submitted.
- Course descriptions for each course must be submitted to be considered for advanced-standing credits.
- Course content must be comparable to that offered at the University of Pittsburgh.
- The credit transferred for any course can be no greater than the credit given at the University of Pittsburgh.
- Only courses with letter grades of B or better are transferable.
- Credit for service, correspondence, or extension courses is not transferable.
- Science courses must have been completed within the past eight years. The Associate Dean for Student Affairs and Alumni Relations (or designee) must approve any exception to the eight-year guideline.

Readmission

Unless there are special circumstances on record in the school, a student who has attended a different university/college while not attending the University of Pittsburgh is required to reapply through the University Office of Admissions and Financial Aid (OAFA). Readmission will be contingent upon a vacancy in the class to which the student is to be readmitted. The start of the program of studies will be based on courses completed, current curriculum, and placement considerations.

Admission of Students from Other Countries

International applicants for the four-year undergraduate BSN should apply using the International Student Undergraduate Application. For more information go to the International Student Admissions Web site: http://www.oafa.pitt.edu/intladm.aspx.

RN Options and Accelerated 2nd Degree BSN International applicants should apply directly to the School of Nursing: https://app.applyyourself.com/?id=up-nurs

Applicants are required to submit official, original academic credentials in certified English translation. The application process should be started 9 to 12 months in advance of the intended enrollment date.

An applicant whose native language is not English must take the Test of English as a Foreign Language (TOEFL), International English Language Testing System (IELTS), or Duolingo English Test (DET) and submit official test results. Applicants must have a level of English proficiency reflected by a score of at least 213 or greater (computer-based test), or 550 or greater (paper-based test), or 100 or greater (Internet-based test). The school will accept official scores from International English Language Testing Systems (IELTS) for a minimum test band score of 6.5 taking the academic writing and reading modules of the test). Applicants seeking fall term admission must take the TOEFL/IELTS or Duolingo no later than the preceding March. The Institutional code for the University of Pittsburgh is 2927 and the School of Nursing Code is 43. See the International Student Admissions section of this bulletin for more information on the TOEFL/IELTS/or Duolingo. Subject-specific international academic credential evaluation of official college transcript is required. For more information refer to: http://www.oafa.pitt.edu/intladm.aspx.

RN Options Applicants
The University of Pittsburgh RN Options (BSN or early Admission to MSN or DNP) curriculum is designed for registered nurses, who obtained their initial nursing education through either a CCNE, ACICS or ACEN [NLN] accredited diploma or associate degree or diploma program and want to pursue undergraduate education with early admission to graduate nursing program. Courses are taught by nursing leaders who are experts in their field. Faculty serve as educators, role models and mentors for their students. The RN Options curriculum builds upon the individual professional nurse's strengths and experiences to expand professional knowledge and practice skills. Graduates of the University of Pittsburgh School of Nursing possess critical appraisal/thinking skills, sophisticated clinical practice knowledge, and the ability to integrate the latest research findings to provide quality, safe and effective patient care.

Registered nurses who are interested in pursuing a Bachelor's Degree only or Early Admission to the MSN or DNP track applicants should apply online directly to the School of Nursing at: http://app.applyyourself.com/?id=up-nurs

Course offerings are flexible and students may begin coursework in any term (fall/spring/summer).

The RN-BSN and RN-MSN is now offered in an online format with following exception: Neonatal Nurse Practitioner (NP) Area of Concentration (AOC). The DNP program will only be offered in an onsite format.

Application Guidelines

Applications are reviewed on a rolling basis. Applicants must submit evidence of previous education and other required documents as listed below.

For RN-BSN:
- Successful completion of a nursing diploma or associate degree program by submitting official Transcripts from institution.
- Cumulative Grade Point Average (GPA) of 3.0 for previous college and/or coursework, which must be semester credits or the equivalent.
- Copy of current RN license (students may be permitted to take theory courses only until evidence of successful completion of NCLEX is provided)
  (All students must obtain a Pennsylvania license)
- Successful completion of all prerequisite courses
- Brief type written essay
- Current resume
- Three letters of professional recommendation
- Completed online application
- International applicants: consult nursing.pitt.edu & ois.pitt.edu
- Formal interview.

For the RN-MSN or DNP early admission track:
- Successful completion of a nursing diploma or associate degree program by submitting official Transcripts from institution.
- Cumulative Grade Point Average (GPA) of 3.0 for previous college and/or coursework, which must be semester credits or the equivalent.
- Copy of current RN license (All students must obtain a Pennsylvania license) (students may be permitted to take theory courses only until evidence of successful completion of NCLEX is provided)
- Successful completion of all prerequisite courses
- ≥ 3.0 GPA in Associate Degree or nursing diploma (from ACEN (NLN), ACICS, or CCNE accredited program)
- Graduate Record Exam (GRE):
  - MSN track - may be waived if the RN program GPA is 3.5 or higher;
  - or DNP track - no waiver, Verbal & Quantitative sections (competitive score), Analytical Writing (≥ 3)
- Brief type written essay (include DNP project statement as needed)
- Current resume
- Three letters of professional recommendation, one from current manager
- Completed online application
- International applicants: consult nursing.pitt.edu & ois.pitt.edu
- Formal interview*

RN-MSN or RN-DNP option applicants must meet the admission criteria for the BSN Program and simultaneous conditional admission to the preferred graduate program. While in RN-MSN or RN-DNP, students receive a BSN degree and continue with the graduate program. Twenty-four
(24 cr.) Bridge credits are counted in BSN requirement as well as graduate level curriculum. Full and part-time schedules are available. Potential students will meet with the RN Options Coordinator for an interview and must meet with the coordinator of the graduate program.

Accelerated 2nd Degree BSN Program Applicants

The Accelerated 2nd Degree BSN is designed to enable individuals with a Baccalaureate Degree in another discipline the ability to earn a Bachelor's of Science Degree in Nursing (BSN) in three consecutive full-time terms. The Accelerated 2nd Degree BSN requires 122 credits: 31 credits from a previous degree, 36 to 38 prerequisite credits, and 54 curriculum credits. The curriculum is fast-paced and designed to build upon the individual's previous education while providing additional science and nursing content. At the completion, graduates are eligible to take the National Council Licensure Examination (NCLEX) to become Registered Nurses (RN).

Admission to the Accelerated 2nd Degree BSN is competitive and is based upon proven academic achievement and grades earned in prerequisite courses. The school admits three cohorts, Fall, Spring and Summer.

The Accelerated 2nd Degree BSN requires an applicant to complete 36 prerequisite credits. These courses may be taken at any college or university. Courses from other institutions must be evaluated as equivalent to University of Pittsburgh courses. (Coursework taken at the University of Pittsburgh School of Nursing prior to admission may be taken as a non-degree seeking student.)

Required prerequisites include:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>General &amp; Bio-Organic Chemistry*+ (includes a lab)</td>
<td>4</td>
</tr>
<tr>
<td>English Composition (scientific/technical)</td>
<td>3</td>
</tr>
<tr>
<td>Directed Elective</td>
<td>3</td>
</tr>
<tr>
<td>Psychology</td>
<td>3</td>
</tr>
<tr>
<td>Sociology</td>
<td>3</td>
</tr>
<tr>
<td>Statistics (descriptive, probability, &amp; inferential)</td>
<td>3</td>
</tr>
<tr>
<td>Human Anatomy &amp; Physiology *+ (includes a lab)</td>
<td>6-8</td>
</tr>
<tr>
<td>Human Genetics *+</td>
<td>3</td>
</tr>
<tr>
<td>Microbiology *+ (includes a lab)</td>
<td>4</td>
</tr>
<tr>
<td>Pathophysiology*+</td>
<td>4</td>
</tr>
</tbody>
</table>

*Should have been completed within the past ten years

Should have achieved a grade of "B-" or better

Early submission of an application is recommended. New classes begin in the Fall, Spring and Summer term. Accelerated 2nd Degree BSN applications are reviewed, and admission decisions are made on a rolling basis. Preferred application deadlines are Fall Term--February 15; Spring Term--June 1; and Summer Term--October 1. Application information and other materials are located on the web at accelerated 2nd degree admissions. Prospective students must apply online to the School of Nursing at http://app.applyyourself.com/?id=up-nurs.

Application items include:

- Completed online application
- Official transcripts of all course work taken at any university or college
- Two (2) letters of professional recommendation (via online application or mailed in signed, sealed envelopes)
Resume
Personal essay explaining how this program will help achieve professional goals
Application fee (non-refundable and does not apply to payment of tuition)
INTERNATIONAL APPLICANTS: (in addition to above items)
Official graduation certificate verifying degree obtained (English translation)
Subject-specific international academic credential evaluation of official college transcript
Official TOEFL/IELTS or Duolingo score - exempt if native language is English or graduate of a degree program at an accredited institution in the United States
NOTE: All official documentation must be submitted in sealed envelopes from the originating institutions to the School of Nursing (3500 Victoria Street, 240 Victoria Building, Pittsburgh, PA 15261).

Provisional admission may be granted after completion of 6 credits of science prerequisites if all other admission requirements are met. Undergraduate applicants who are within 12-18 credits of graduation will be considered for provisional admission. All prerequisite courses must be completed and official transcripts received by the start of the first term. All admitted students will be required to place a $250 as non-refundable deposit upon acceptance of admission, which will be count towards tuition in the first term of study.

Complete applications will be reviewed without Official GRE scores. If admitted, the school will provide a voucher or reimburse (if taken prior to admission) the fees for the GRE after your deposit is received. The GRE must be completed prior to start of the program.

Academic Standards

Students have the obligation to exhibit honesty and to respect the ethical standards of the nursing profession in carrying out their academic assignments. The academic standards of the school are:

• A student may be placed on probation or dismissed for illegal, unsafe, or unethical professional conduct.
• Students must maintain a cumulative GPA of 2.00 or better throughout the program.
• Students must fulfill the requirements for the baccalaureate degree within a period of eight years.

Students should view the School of Nursing Web site's Student Affairs and Alumni Relations web page http://www.nursing.pitt.edu/resources-students/policies for current policies.

Academic Advising

For students in the traditional BSN undergraduate track, the academic advisement process begins during the University first year orientation program (Online Orientation), at which time students meet with an academic advisor. Students maintain the same advisor throughout the program of study, and continue to meet on a regular basis. This continuity permits advisors to promote academic achievements by guiding students through each level in the program, assisting in career planning and preparation, and by serving as primary educational resource, facilitator and student advocate.

Preclinical Requisites

Clinicals begin in the 2nd year of the program. Before beginning each school year, it is mandatory that students meet the following requirements for clinical experience (the frequency of these requirements vary by clinical site):

• HIPAA module (completed during the Spring Term of the first year for traditional licensure)
• The American Heart Association (AHA)--BLS- Healthcare Provider Course Certification
• Personal health insurance coverage
• ACT 33/34 clearances (child abuse/criminal record check)
• ACT 73 FBI fingerprinting background check
• ACT 168 Pennsylvania Sexual Misconduct/Abuse Disclosure Release (for fourth year students)
• Initial Health and Annual Health forms are uploaded in Project Concert.

School of Nursing Faculty
Program and Course Offerings

Major

Nursing, BSN Curriculum, Class of 2021

(Revised 2017 to reduce clinical hours throughout program - Class of 2021)

TOTAL CREDITS: 124-125

Degree Requirements

To earn the degree of Bachelor of Science in Nursing, the student must demonstrate satisfactory academic achievement in required course work prescribed by the curriculum with an overall academic achievement of a minimum GPA of 2.00. All pre-licensure undergraduate students will be required to successfully complete and pass standardized tests throughout the curriculum in order to progress through and graduate from the program. The degree requires a minimum of 124 credits. (Refer to curriculum design at www.nursing.pitt.edu for specific degree requirements.)

Upon completion of the undergraduate program, nursing students receive a Bachelor of Science in Nursing, which is considered the first professional nursing degree. They are then eligible to take the National Council Licensure Examination (NCLEX) to become Registered Nurses (RN).

Special Academic Opportunities/Programs

Students in the nursing program begin clinical experience during the first semester of the sophomore year and continue to have complex, rigorous, and unique experiences throughout the junior and senior years. During the senior year students identify an area of clinical interest and complete an extensive internship under the direction of a nurse preceptor.

Many opportunities are available for nursing students including independent study with advanced practice nurses and/or nurse researchers, research projects, and volunteer activities. All students are members of the Nursing Student Association (NSA) and are encouraged to participate in local, state, and national activities. Group tutoring and special review sessions for chemistry, microbiology, anatomy, and physiology are available for all nursing students. Students may also pursue a variety of other academic opportunities available throughout the university, such as participation in Honors College and other optional undergraduate activities and programs.

School of Pharmacy

Chartered in 1878, the School of Pharmacy has a tradition of developing leaders and innovators that drive the future of pharmacy. We investigate, discover, and create ways to improve patient health and, through partnerships, change practice and improve efficiency of care. We also use computational and bench research methods to discover and develop drugs and drug delivery systems, and optimize drug therapy. The School of Pharmacy leads the way in education, personalizing education and getting students to expert faster. The School of Pharmacy is among the oldest pharmacy schools in the country. Pitt Pharmacy is in the top tier of schools of pharmacy in US News & World Report rankings and NIH-funded research.

Mission
The School of Pharmacy is committed to improving health through excellence, innovation, and leadership in education of pharmacists and pharmaceutical scientists, in research and scholarship, in care of patients, and in service to our communities.

Vision
To be an outstanding school of pharmacy renowned for excellence in discovery and advancement of science-based use of medicines and other interventions to enhance the vitality and quality of life.

Values
Integrity guides our daily work. We foster:
Passion, commitment, and diligence
Creativity and personal growth
Collaboration and teamwork
A culture of respect for the individual.

Contact Information
University of Pittsburgh
School of Pharmacy
3501 Terrace St
Pittsburgh, PA 15261
Admissions: 412-383-9000
rxschool@pitt.edu
www.pharmacy.pitt.edu

Admissions
The School of Pharmacy admits students to its programs under one of two statuses - guarantee or open. The guarantee admission status is detailed below:

Pharmacy Guarantee First Year Admission

All students should first submit an application to the University of Pittsburgh, Office of Admissions and Financial Aid. The School of Pharmacy does not directly admit first year students to the professional program. Rather, candidates who specify pre-pharmacy on their application, demonstrate academic success in high school, and score 1330 or higher on the SAT I (Math and Critical Reading sections), with a minimum of 660 in the Math section, will be offered a pharmacy guarantee if available. Students who receive the guarantee are expected to perform well in their pre-professional courses. In order to secure a place in the PharmD Program, students must earn:

- a letter grade of a C or better in all preprofessional courses with no repeated courses
- a 3.25 or greater overall GPA in preprofessional courses
- a competitive Math and Science GPA of 3.0

NOTE: Required Math and Science courses must be taken at the University of Pittsburgh (AP credits are acceptable).

Test optional applicants are eligible for this guarantee.
To exercise the Pharmacy guarantee, all applicants must:

- submit a completed PharmCAS application and fee
- participate in a satisfactory interview prior to School of Pharmacy Admission
- submit the Pharmacy College Admissions Test (PCAT) scores (PCAT for Fall 2023 Admissions see below)
- writing assessment

Pharmacy Guarantee students who meet these performance criteria will be admitted into the PharmD Program.

The PCAT is optional for the Fall 2022 Admissions cycle and will be considered in the holistic application review process for applicants who have reported scores. Applicants who are unable to complete an exam or choose not to report exam scores will not be disadvantaged.

All students interested in applying to the pharmacy program should also consult the Application for Admission of the Graduate and Professional Catalog.

Visit the School of Pharmacy Web site at www.pharmacy.pitt.edu.

Program Offerings

Major

Pharmaceutical Sciences, BSPS

The School of Pharmacy offers the opportunity for enrolled PharmD students to obtain a Bachelor of Science in Pharmaceutical Sciences (BSPS) degree after the completion of a minimum of 120 credit hours. Typically, students will have completed the pre-professional component and the first four academic terms (semesters) of the nine term (semester) PharmD program. Students are not enrolled into the BSPS program without admission to the PharmD program.

The school also offers graduate programs leading to an MS and a PhD.

For further information on the professional and graduate programs, see the School of Pharmacy-Graduate and Professional Degrees sections of the Graduate & Professional Studies Catalog.

</table>
The School of Social Work was founded in September 1938 as successor to the Division of Social Work in the Department of Sociology. The Bachelor of Arts in Social Work (BASW) program was accredited in 1973 and has been continuously reaffirmed since that time.

The mission of the School of Social Work is to advance knowledge and to apply that knowledge for the fulfillment of human potential through the prevention and amelioration of social problems. The school is committed to promoting the values of social and economic justice. Recognizing the complexities of contemporary society, the school dedicates itself through its educational, research, and public service activities to advocating for a society that respects the dignity and achievement of all individuals, families, and communities.

In furtherance of its mission, the School of Social Work strives to

- Educate professional social workers with the knowledge, skills, and values needed to engage in culturally competent practice with diverse populations and communities; to critically analyze personal, familial, and environmental factors affecting practice settings and practice techniques; and to advocate for those who confront barriers to maximizing the achievement of their fullest potential.
- Engage in scholarly activities that contribute to professional knowledge about complex social problems and innovative approaches to ameliorate those problems.
- Provide service to local, national, and international communities through the development of and participation in collaborations with social agencies, community-based organizations, government, and foundations.

In concert with the School's mission, the BASW Program, built on a strong liberal arts base, prepares its students to be competent entry-level generalist social work practitioners and for graduate education. Recognizing the profession's values of service, social justice, the dignity and worth of the person, the importance of human relationships, integrity, competence, human rights, and scientific inquiry, the program provides students with the knowledge and skills needed to advance human and community well-being. Utilizing a person-in-environment framework, the program prepares students to enhance the quality of life for all people, locally and globally; to practice with diverse populations; to analyze critically the social, economic, and environmental factors affecting individuals, families, groups, organizations, and communities; and to advocate for those who confront structural barriers; thus, program graduates are prepared for service and leadership. Since 2001, the BASW Program has offered the Child Welfare Education for Baccalaureates (CWEB) program as an educational opportunity for undergraduate social work majors to prepare for employment in one of Pennsylvania's 67 public child welfare agencies.

The BASW Program is offered as an upper-division (i.e., junior and senior years only) academic major, underscoring the program's commitment to a strong liberal arts base. Learn more about degree requirements, full- and part-time enrollment options and class schedule, and field education for BASW students.

The Social Work Minor is open to undergraduate students throughout the university (see minor requirements)

The Goals of BASW Program are to prepare students to competently engage in generalist social work practice.

As such, it is our goal that by completion of the program, students will be prepared to:

- Practice with cultural humility in accordance with the principles, values, and ethics that guide the social work profession.
- Use their liberal arts foundation and their understanding of bio-psycho-social-spiritual-cultural development to engage in evidence-informed generalist social work practice with individuals, families, groups, organizations, and communities within a multicultural society.
- Advocate for human rights and social, economic, and environmental justice.
- Continue formal education either in graduate social work education or in some other graduate discipline.

The BASW Program Faculty have defined "generalist practice" as:

The application of knowledge, values, and skills of the general method of problem-solving, which spans the processes of engagement, data collection, assessment, intervention, evaluation, and termination. Preparation in the general method focuses on the application of the method to client/consumer systems of various sizes (individuals, families, groups, communities, organizations). Key to this problem-solving approach is its applicability to multi-cultural contexts, focusing on the strengths inherent in clients/consumers' and systems. The ethics and values of the social work profession anchor this practice.

The BASW Program has also identified a number of more specific and measurable objectives that allow us to document progress toward attaining our goals. We expect graduates from the BASW Program to practice in a manner consistent with social work traditions, values, and ethics, as expressed in the NASW Code of Ethics.

Contact Information
Special Opportunities

The Child Welfare Education for Baccalaureates (CWEB) Program provides an educational opportunity for students interested in public child welfare services. Qualified students who are enrolled as social work majors may receive substantial financial support in return for a contractual obligation to accept employment in a Pennsylvania public child welfare agency following completion of their social work degree. Students interested in the program should contact Dr. Cynthia Bradley-King, CWEB Coordinator, School of Social Work at ckb11@pitt.edu or 412-624-2830.

The Behavioral Health Case Management Program is a certificate available to Social Work and Psychology majors, that leads to possible employment opportunities in a fast paced behavioral health service sector. To read more about the career opportunities available to graduates who hold this certificate please visit the Allegheny County Department of Human Services (DHS) web page.

More information about the program is available on the web and by contacting the Director of the Bachelor of Arts in Social Work Program, Keith J. Caldwell-Toya Jones, MSW at toyaj@pitt.edu or 412-648-9306.

Admission Requirements

For admission to the Bachelor of Arts in Social Work program (BASW), a student must meet the following requirements:

- Completion of 60 transferable credits from an accredited undergraduate institution and/or completion of an accredited associate degree program.
- A minimum of 2.50 GPA on a 4.00 scale.

The distribution of liberal arts credits should be as follows:

- Humanities-9 credits
- Natural Sciences-9 credits
- Social Sciences-9 credits
- Other courses (preferably a computer skills course and courses in the humanities and behavioral and social sciences)-33 credits

Credits awarded from the College Level Examination Program [CLEP] by the College of General Studies are counted toward the 60 credits. Academic and field education credits are not granted in the BASW program for life, volunteer, or employment experience.

Application Procedures

Students may apply for the fall term or spring term. Students currently enrolled within the University of Pittsburgh system should submit applications and all credentials to the School of Social Work Office of Admissions. Students applying from outside the University of Pittsburgh should send all application materials and credentials directly to the University Office of Admissions and Financial Aid (see Pittsburgh campus Freshman Admissions for address). The Undergraduate program in the School of Social Work has a ROLLING ADMISSIONS POLICY. There is no specific deadline for submitting applications.

- The application fee of $45 (only if applying from another institution; current University of Pittsburgh students do not have to pay this fee).
- A complete transcript from the registrar of each college attended. If course work is still in progress at the time the application is filed, the student should request a supplemental transcript at the end of each term. Although a decision for acceptance may be made while academic work is still in progress, an up-to-date transcript must be received before the applicant can register for course work. Persons seeking a transfer to the University of Pittsburgh from another college or university must also submit a high school transcript or its equivalent.
- A three-part typewritten statement (of no more than eight pages) discussing the following concerns in depth:
  - the influence in the student's life experience that made him/her select social work as a profession,
  - what the student believes social work education can contribute to his/her professional competence, and
• what the student believes to be one of the most important contemporary social issues and why.
• The application supplement sheet, which requests information on the student's employment background, a list of the names and addresses of the people who will be completing reference forms on the applicant's behalf, and academic credit requirement questions.
• Three letters of reference. Required references include college advisors, an instructor at the college level, and the current (or last) employer/volunteer supervisor. Applicants should send the blank reference forms received with the application materials to each of the reference persons. The School of Social Work admissions office will periodically notify the applicant of the status of the application materials, and the applicant will be expected to follow through with each reference to ensure receipt of the letter. Reference persons should mail the completed form directly to the School of Social Work Office of Admissions.

**Other Supporting Application Materials**

The School of Social Work does not require the submission of scores from an examination for admission consideration. However, applicants wishing to submit such exam scores or other materials (publications, major papers, etc.) in support of their application may do so. In no instance will an applicant not submitting these be penalized in determining acceptance for the program.

**Admission Interviews**

Interviews may be initiated by the admissions personnel of the School of Social Work. Applicants who feel they would like to discuss special circumstances surrounding their applications are encouraged to seek admission interviews. The interview, if requested, should be scheduled after all application materials have been received. Usually, decisions on applications for admission are made without an interview.

**Grading Standards Policy for the BASW Program**

This policy covers the following areas in regard to grading:

**Good Academic Standing**

In order to remain in good academic standing and to graduate from the BASW program, all students must

• Obtain a grade of C- or better in all courses required for the major (including Practicum 1 and 2),
• Maintain a minimum 2.50 on a 4.00 scale in their social work major
• Conform to the standards of professional conduct as specified in the NASW Code of Ethics (see below), and
• Maintain a minimum cumulative GPA of 2.50 on a 4.00 scale.

**Honors**

The program honors those students whose academic performance (cumulative GPA) places them in the upper two percent of their graduating class. These students are considered for honors recognition at the annual Honors Convocation conducted by the University in the spring of each year. BASW majors are also eligible for membership in Phi Alpha, the National Social Work Honor Society, if they have completed their social work major with a social work GPA of 3.85 or higher.

**Bachelor of Philosophy Degree**

In the spirit of intellectual curiosity envisioned by the Board of Trustees and the University Honors College when the Bachelor of Philosophy degree (BPhil) was created, the BPhil creates the opportunity for undergraduate students to engage in research and scholarly work toward a more rigorous baccalaureate degree traditionally reserved for the graduate level. In combination with the University Honors College requirements it, "preserves an element of intellectual scope, ever the distinctive feature of American undergraduate education (A. Stewart)." This degree is offered jointly between the University Honors College and the School of Social Work.
BASW majors who meet the University Honors College (UHC) eligibility requirements and who are interested in pursuing a Bachelor of Philosophy degree in social work should make an appointment with the BASW Program Director to review criteria and process for the degree.

The BASW student will be referred to the University Honors College Web site to review the Bachelor of Philosophy degree requirements.

The requirements to participate in the UHC are as follows:

- Maintain a 3.50 GPA or higher in BASW major in the School of Social Work and a 3.50 GPA or higher overall at the University of Pittsburgh.
- Transfer students must have an incoming GPA of 3.50 or higher and maintain a 3.50 GPA in BASW major course work offered through the School of Social Work as well as a 3.50 GPA or higher overall at the University of Pittsburgh.
- In unusual circumstances, a student who shows exceptional promise but does not meet the above requirements may be accepted to BPhil candidacy as recommended by the BASW Program Director to the School of Social Work Associate Dean for Academic Affairs and determined by the UHC advising staff.

Based upon a BASW student's area of interest, a thesis advisor will be assigned by the Associate Dean for Academic Affairs. The BASW Program Director and the student's advisor will meet with the student to draft a program of study/curriculum plan. Assignment of an advisor is contingent upon faculty availability and willingness to serve.

General degree requirements are:

- Fulfill the BASW degree requirements with a minimum 3.50 GPA.
- Complete the social work general education requirements with a minimum 3.50 GPA. This includes 24 credits in the social and behavioral sciences; minimum of 3 credits in Africana studies; minimum of 3 credits in English composition; minimum 3 credits in human biology and a minimum of 3 credits in statistics.
- Enroll in one course in each of the following areas, selecting one as an area of specialization, with a minimum of 12 credits and grades corresponding to a 3.50 GPA or higher: Africana studies; anthropology; economics; global studies; political science; psychology; sociology; urban studies; women's studies.
- In all of the above coursework, a prospective BPhil student is encouraged to enroll in an UHC section of the course, if available. Overall GPA requirements remain the same for these courses.

The prospective BPhil student will complete the BASW degree requirements listed above as well as complete "Special Degree Requirements". These include:

1. Completion of independent research culminating in the production of an original undergraduate thesis.
   - The thesis will be completed under the tutelage of the faculty advisor who will guide the student in designing and implementing the research project as well as in writing the thesis.
   - At least two terms prior to the B.Phil. in Social Work student's expected date of graduation a synopsis of the proposed research (approved by the School of Social Work thesis advisor) will be submitted to the University Honors College.
   - By the last term in residence, the student will: Submit a revised and completed thesis to their Faculty Advisor (for distribution to the Examining Committee) at least five weeks prior to the end of the term.

Defend their thesis to a faculty Examination Committee selected by the faculty advisor.

a. Include a faculty member from outside the University of Pittsburgh as an invited member of the Examination Committee.

b. Consist of a public presentation and discussion of the thesis project followed by a private oral examination conducted by the Examining Committee.

Recommendation from the Faculty Examination Committee for the awarding of the B.Phil. in Social Work degree will be made to the Dean of the Honors College, who, after certifying that all aspects of the BASW degree requirements as well as the B.Phil. Special Degree Requirements have been fulfilled, will make a recommendation to the UHC. The B.Phil. in Social Work degree will be conferred jointly by the School of Social Work and the UHC through the granting of a single Bachelor of Philosophy in Social Work diploma.

If all of the degree requirements are met, a single degree, the Bachelor of Philosophy degree with a major in social work, will be conferred jointly by the School of Social Work and the University Honors College.

For additional details on this degree program, please contact the School of Social Work or the Honors College.
National Association of Social Workers (NASW) Code of Ethics

Professional ethics are at the core of social work. The profession has an obligation to articulate its basic values, ethical principles, and ethical standards. The NASW Code of Ethics sets forth these values, principles, and standards to guide social workers' conduct. The code is relevant to all social workers and social work students, regardless of their professional functions, the settings in which they work, or the populations they serve. The NASW Code of Ethics serves six purposes:

- The code identifies core values on which social work's mission is based.
- The code summarizes broad ethical principles that reflect the profession's core values and establishes a set of specific ethical standards that should be used to guide social work practice.
- The code is designed to help social workers identify relevant considerations when conflicting professional obligations or ethical uncertainties arise.
- The code socializes practitioners new to the field to social work's mission, values, ethical principles, and ethical standards.
- The code articulates standards that the social work profession itself can use to assess whether social workers have engaged in unethical conduct.
- NASW has formal procedures to adjudicate ethics complaints filed against its members. In subscribing to this code, social workers are required to cooperate in its implementation, participate in NASW adjudication proceedings, and abide by any NASW disciplinary rulings or sanctions based on it.

The code offers a set of values, principles, and standards to guide decision making and conduct when ethical issues arise. It does not provide a set of rules that prescribe how social workers should act in all situations. Specific applications of the code must take into account the context in which it is being considered and the possibility of conflicts among the code's values, principles, and standards. Ethical responsibilities flow from all human relationships, from the personal and familial to the social and professional. Social work students are required to comply with the NASW Code of Ethics. Copies can be obtained from the NASW Web page at www.socialworkers.org.

Statute of Limitations

There is a seven-year limitation on the earning of the BASW degree with the seven-year period beginning from the date of entry into the program. Under the following extenuating circumstances, the advisor may recommend an extension of time to the program director and the associate dean:

- Extended illness of the student,
- Involuntary mobilization into a U.S. military unit,
- Death of a close family member,
- Extended personal emergency, or
- Academic probation in the last term of the student's program.

Undergraduate Advising

When admitted, new BASW majors are assigned an advisor by the BASW program director (students completing the social work minor maintain the academic advisor in their current college or school). Incoming BASW majors meet their assigned faculty advisor at the school's orientation, which is held prior to the start of fall semester. Incoming students are then encouraged to make an appointment with their faculty advisor during the first three to four weeks of the term. Each advisor will work with his or her advisee to clarify educational options, answer questions about the BASW Program, and discuss career opportunities. When students enroll for Practicum Seminar I and the concurrent Practicum Seminar and Lab I, the seminar and lab instructor in the section the student chooses becomes his or her faculty advisor for the remainder of their enrollment in the program. Faculty advisors should be the first point of contact for any or all of the following:

- Registration including add/drop, leaves of absence, and withdrawals; Clarification of all academic policies and procedures (i.e., grading policies, graduation requirements, directed study);
- Discussions regarding academic expectations and performance;
- Information about other departments and/or programs in the School of Social Work or the University of Pittsburgh;
- Planning of the student's educational program in accordance with his or her career interests.
Phi Alpha National Honor Society

Mu Omicron Chapter

Phi Alpha Honor Society was created to provide a closer bond between social work students and the profession in order to promote humanitarian goals and ideals. With the motto, "Through knowledge-the challenge to serve," Phi Alpha fosters high standards of education for social workers and invites into membership those who have attained excellence in scholarship and achievement in social work. Founded in 1960, Phi Alpha Honor Society currently has more than 110 chapters nationwide.

Program and Course Offerings

Department of Social Work

Major

Social Work, BASW

Degree Requirements

The School of Social Work requires a minimum of 120 credits for graduation. The courses listed below are required of all students working toward the Bachelor of Arts in Social Work:

Social work courses:

A total of 48 credits in the social work major:

- SOCWRK 1000 - INTRODUCTION TO SOCIAL WORK
  This is a service-learning course and requires 45 hours of volunteer service as part of the course.
- SOCWRK 1005 - FOUNDATIONS OF THE WELFARE STATE
SOCWRK 1006 - POLICY ANALYSIS
This is a service-learning course and requires 45 hours of volunteer service as part of the course.

SOCWRK 1008 - GENERALIST SOCIAL WORK PRACTICE WITH DIVERSE POPULATIONS
SOCWRK 1011 - INTRODUCTION TO GENERALIST METHODS: SOCIAL WORK WITH INDIVIDUALS AND FAMILIES
SOCWRK 1012 - SOCIAL WORK WITH COMMUNITIES AND ORGANIZATIONS
SOCWRK 1013 - SOCIAL WORK WITH GROUPS
SOCWRK 1015 - HUMAN BEHAVR & SOC ENVIRONMENT
SOCWRK 1020 - INTRODUCTION TO SOCIAL WORK RESEARCH
SOCWRK 1024 - PRACTICUM SEMINAR AND LAB 1
SOCWRK 1025 - PRACTICUM 1
SOCWRK 1026 - PRACTICUM SEMINAR AND LAB 2
SOCWRK 1027 - PRACTICUM 2

Social and behavioral sciences requirements: 24 credits **

- Anthropology (3)
- Economics (3)
- Gender, Sexuality, and Women's Studies (3)
- Political Science (3)
- Psychology (3)
- Sociology (3)

Note:

Other course requirements: 12 credits **

- Africana Studies (3)
- English Composition (3)
- Global Studies (3)
- Human Biology (or equivalent course emphasizing the biological determinants of human behavior) (3)
- Religion/Spirituality (3)
- Statistics (3)
- Social Work elective (3)

Note:

* Course of equivalent content may have been taken at another institution.

** These courses/credits (in part or in whole) may have been taken as part of the 60 credits required for admission. Any of these courses/credits not taken prior to admission must be completed prior to graduation.

Minor requirements:

The minor requires successful completion (with a grade of C- or better) of four of the following three-credit courses:

- SOCWRK 1000 - INTRODUCTION TO SOCIAL WORK
  This is a service-learning course and requires 45 hours of volunteer service as part of the course.
- SOCWRK 1005 - FOUNDATIONS OF THE WELFARE STATE
- SOCWRK 1006 - POLICY ANALYSIS
  This is a service-learning course and requires 45 hours of volunteer service as part of the course.
- SOCWRK 1035 - GLOBAL PERSPECTIVES SOCIAL WORK
Note:

* SOCWRK 1000 - INTRODUCTION TO SOCIAL WORK is required for all subsequent courses, with the exception of SOCWRK 1005

Social Work, BPHIL

Minor

Social Work Minor

The Social Work Minor requires successful completion of 15 credits (with a grade of C- or better) from the following courses:

- SOCWRK 1000 Introduction to Social Work** (offered in both Fall and Spring Terms)
- SOCWRK 1005 Foundations of the Welfare State (offered in Fall Term)
- SOCWRK 1006 Policy Analysis (pre-requisites SocWrk 1000 & SocWrk 1005; offered in Spring Term)
- SOCWRK 1035 Global Perspectives on Social Work Practice (offered in Spring Term)
- SOCWRK 1040 Poverty & Income Inequality: Social Responses (offered in Spring Term)
- SOCWRK 1058 Economics and Social Work (offered in Fall Term)
- SOCWRK 1059 Child and Family Advocacy (offered in the Fall Term)
- SOCWRK 1063 African-American Health Issues (offered in Fall Term)
- SOCWRK 1079 Child Welfare Services (offered in both Fall and Spring Terms)
- SOCWRK 1088 Special Topics (not offered every term)

**SOCWRK 1000 Introduction to Social Work is a prerequisite for subsequent courses.

Degree Requirements

The School of Social Work requires a minimum of 120 credits for graduation. The courses listed below are required of all students working toward the Bachelor of Arts in Social Work:

Social work courses:

A total of 48 credits in the social work major:

- SOCWRK 1000 - INTRODUCTION TO SOCIAL WORK
  This is a service-learning course and requires 45 hours of volunteer service as part of the course.
- SOCWRK 1005 - FOUNDATIONS OF THE WELFARE STATE
- SOCWRK 1006 - POLICY ANALYSIS
  This is a service-learning course and requires 45 hours of volunteer service as part of the course.
- SOCWRK 1008 - GENERALIST SOCIAL WORK PRACTICE WITH DIVERSE POPULATIONS
- SOCWRK 1011 - INTRODUCTION TO GENERALIST METHODS: SOCIAL WORK WITH INDIVIDUALS AND FAMILIES
- SOCWRK 1012 - SOCIAL WORK WITH COMMUNITIES AND ORGANIZATIONS
- SOCWRK 1013 - SOCIAL WORK WITH GROUPS
- SOCWRK 1015 - HUMAN BEHAVIOR & SOCIAL ENVIRONMENT
- SOCWRK 1020 - INTRODUCTION TO SOCIAL WORK RESEARCH
- SOCWRK 1024 - PRACTICUM SEMINAR AND LAB 1
- SOCWRK 1025 - PRACTICUM 1
- SOCWRK 1026 - PRACTICUM SEMINAR AND LAB 2
SOCWRK 1027 - PRACTICUM 2

Social and behavioral sciences requirements: 24 credits **

- Anthropology (3)
- Economics (3)
- Gender, Sexuality, and Women's Studies (3)
- Political Science (3)
- Psychology (3)
- Sociology (3)

Note:

Other course requirements: 12 credits **

- Africana Studies (3)
- English Composition (3)
- Global Studies (3)
- Human Biology (or equivalent course emphasizing the biological determinants of human behavior) (3)
- Religion/Spirituality (3)
- Statistics (3)
- Social Work elective (3)

Note:

* Course of equivalent content may have been taken at another institution.

** These courses/credits (in part or in whole) may have been taken as part of the 60 credits required for admission. Any of these courses/credits not taken prior to admission must be completed prior to graduation.

Minor requirements:

The Social Work Minor requires successful completion of 15 credits (with a grade of C- or better) from the following courses (SOCWRK 1000 Introduction to Social Work is a prerequisite for subsequent courses):

- SOCWRK 1000 - INTRODUCTION TO SOCIAL WORK
  This is a service-learning course and requires 45 hours of volunteer service as part of the course.
- SOCWRK 1005 - FOUNDATIONS OF THE WELFARE STATE
- SOCWRK 1006 - POLICY ANALYSIS
  This is a service-learning course and requires 45 hours of volunteer service as part of the course.
- SOCWRK 1035 - GLOBAL PERSPECTIVES SOCIAL WORK
- SOCWRK 1058 - ECONOMICS AND SOCIAL WORK
- SOCWRK 1079 - CHILD WELFARE SERVICES
- SOCWRK 1088 - SPECIAL TOPICS
  This course is not offered every term.
- SOCWRK 1059 - CHILD AND FAMILY ADVOCACY
- SOCWRK 1063 - AFRICAN-AMERICAN HEALTH ISSUES

Note:

* SOCWRK 1000 - INTRODUCTION TO SOCIAL WORK is required for all subsequent courses, with the exception of SOCWRK 1005
University Center for International Studies

The University Center for International Studies (UCIS) is the primary resource for initiating and managing international programs, studies and support services while promoting the University's reputation as a leader in global education. A key goal of UCIS is to cultivate globally capable and engaged students toward lives of impact in their community and beyond. In short, to prepare undergraduate students who are global ready. This is achieved by certificate programs, study abroad, curriculum development, and seminars. UCIS offers 9 certificates and 3 related concentrations, which are academic credentials that attest to acquisition of international knowledge about a particular world region or global issue, cross-cultural understanding, and language proficiency relevant for international careers or for advanced degrees. Certificates are available in:

- African Studies
- Asian Studies
- European Union Studies
- Global Studies
- Latin American Studies
- Mediterranean Studies
- Russian, East European and Eurasian Studies
- Transatlantic Studies
- Transnational Asia Studies
- West European Studies

The certificates are administered through the African Studies Program, Asian Studies Center, European Studies Center, Global Studies Center, Center for Latin American Studies, and the Center for Russian, East European and Eurasian Studies. Four centers--European Studies Center, Global Studies, Latin American Studies, and Russian, East European and Eurasian Studies--are designated by the federal government as National Resource Centers.

UCIS certificates evidence language proficiency, regional knowledge and cultural competency that students find useful for international careers or for advanced degrees with a concentration in a particular world area or global theme.

Admission to Certificate Programs

Formal admission to the UCIS certificate programs is accomplished by completing a simple application form. Interested students are encouraged to apply in their freshman or sophomore year. There are no special requirements for admission. All undergraduate certificate programs in UCIS (with the exception of the certificate programs in Global Studies, European Union Studies and Latin American Studies described below) require 15 credits/five courses in the applicable area, with three or more courses in at least two departments other than the major. Language requirements vary from four to six terms.

Certificate courses can be used simultaneously to fulfill the student's general education and international/foreign culture requirements. Grades generally must be C or better to be accepted for the certificate program. Upon graduation, both the academic degree and the certificate are posted on the student's transcript.

myPittGlobal
This new student platform is your one-stop-shop to integrate the curricular achievements with study abroad, civic & global engagement and professional development opportunities. The online tools will help you access all UCIS academic programs, study abroad, international events and activities, advisors and your peers. For more information, click here.

**Advising**

All UCIS certificate programs provide personalized advising services to students interested or registered in its programs in addition to those routinely offered by the students' major advisors. Center advisors assist in selecting courses, language training, and arranging internships or study abroad to fit the students' academic and personal interests. See the program descriptions below for contact information.

**Special Academic Opportunities**

In addition to the regular certificate programs, UCIS offers the following special academic opportunities:

**Asian Studies Scholarships and Fellowships**

Students enrolled in the Asian Studies certificate program are eligible for a variety of fellowships and scholarships, including the Chinese Summer Language Study Abroad Scholarships, the Japanese Studies Undergraduate Scholarship, the Study-in-Japan Scholarship, and the Japanese Summer Language Study Scholarship. In addition, a new undergraduate scholarship program for students studying Chinese and Japanese languages is available for study abroad in an approved program. For more information on these funding opportunities, please click here.

**European Studies Center Study Abroad Scholarships**

The European Studies Center offers a variety of scholarships to help students defray the cost of studying abroad. Information about available opportunities can be found here.

**Latin American Studies Undergraduate Seminar/Field Trip Program**

The Undergraduate Seminar/Field Program is a unique component of the Latin American studies undergraduate certificate program. The Center for Latin American Studies (CLAS) firmly believes that all undergraduates should have the opportunity to experience Latin American culture firsthand. This objective is met through an annual field trip to a selected Latin American country for which about 10 - 14 students are chosen each year. CLAS subsidizes the majority of the cost of this program via scholarships to place it within the means of most students. Student participants register for a seminar in the spring term (January-April) that prepares them for the field experience through study of the culture, economics, geography, history, and politics of the area to be visited. Students also are introduced to research methodology and are guided through the development of a project which forms the basis for research they conduct while in the field. In the summer session (early May-late June), the students travel to Latin America, where they reside with host families and undertake their field projects under the direction of a CLAS faculty member. (In past years, groups have gone to Argentina, Bolivia, Brazil, Colombia, Costa Rica, the Dominican Republic, Ecuador, Guatemala, Mexico, Uruguay, and Venezuela.)

**Russian and East European Studies Summer Study Abroad and Internship Awards**

The Center for Russian, East European Studies and Eurasian Studies (REEES) believes that study or work abroad is a key component of its certificate program. In an effort to encourage students to travel to the region, REES offers several scholarships each summer to students enrolled in the certificate program. In addition, REES offers several awards to its students annually to fund paid internships in Pittsburgh during the academic year in the field of Russian and East European studies.

The Undergraduate Certificate

Through a wide range of courses and activities, the program allows students opportunities to learn and develop a better grasp of the continent's internal dynamics and its evolving place in the world.

The program sponsors a wide range of learning activities such as lectures, symposia, and conferences that focus on the interconnected issues of development in Africa and the African experience within the wider global context. The program offers opportunities for study abroad in Africa and other forms of field-based experiential learning. Limited scholarships are available and interested students enrolled in the African Studies program are encouraged to stop by our office or visit our website for more information.

Certificate Requirements

To receive the Undergraduate Certificate in African Studies each student must complete the following requirements:

- **African Studies Courses:** Students will complete five courses (15 credits) that must include one core course (3 credits) with 100% Africa-related content, and four electives (12 credits) with at least 25% or more Africa-related content. For a full list of approved courses, click here.

- **Language Proficiency:** Students will complete two years (4 semesters) of language study of either an indigenous African language (Pitt offers Amharic, Swahili, and Arabic) or, a European language (other than English) that is relevant to African studies because of Africa's historical experience. For example, a student with two years or more of French, Portuguese, German or Spanish meets the language proficiency requirement.

- **Digital Portfolio:** Each student will complete a digital portfolio highlighting their learning experience and clearly demonstrating their specific growth in knowledge of Africa related issues within their respective academic discipline and in a broader global context. Students must submit their digital portfolio by the provided deadline before graduation. The digital portfolio may include assignments submitted as part of coursework or on the student's own time, and any other examples showing personal or academic growth.
• **Presentation:** Before graduation, each student will be required to present their African Studies related work through sharing highlights of their experiences in a mini-forum to students, friends and family. The program advisor will communicate with each graduating students requirements for the presentations.

**GPA in African Studies Courses should be 2.5 or higher.**

---

**Academic Opportunities**

**Study Abroad and Internships:** Although Studying abroad in Africa is not required, it is highly encouraged. Students can earn up to 15 credits towards the certificate by studying abroad in an African country. There are also several internship opportunities available to students locally and in Africa. Meet with the academic advisor to learn about these opportunities.

**Professional Development:** The African Studies Program offers academic internships every semester where a student is given full exposure to the field of African Studies and can earn 3 credits for the internship. Students work on skills such as networking, public speaking, communications, media relations, critical thinking, and knowledge of Africa. This internship is a great way for students to build their resume and get real life experience working for a university.

**UCIS International Career Toolkit Series:** The Toolkit Series introduces students to the multitude of careers available by meeting and interacting with professionals in a variety of fields. Many of the guests are Pitt alumni and those that graduated with an International Studies Certificate. By attending one of these panels students will gain insight on career choices, what specific careers entail, how to articulate and prepare for short and long term career goals, and utilize resources at Pitt to make their goals a reality. Each year, students enrolled in the certificate program will have the opportunity to visit Washington, DC to interact with professionals and learn about a variety of opportunities for employment possibilities.

**Other Outside of the Classroom learning activities:** Students can attend lectures and conferences on campus and off campus on a variety of topics that enhance their classroom learning. African studies offers the Let's Talk Africa Series particularly designed for students to share their Africa related learning experiences. In addition the program hosts other forums for knowledge and cultural exchanges including during international week and during Africa Week. Visit our website for more information.

**Asian Studies Certificate**

University of Pittsburgh  
University Center for International Studies  
Asian Studies Center  
Emily Rook-Koepsel, Undergraduate & Graduate Advisor and Assistant Director for Academic Affairs  
4109 Wesley W. Posvar Hall  
Pittsburgh, PA 15260  
Phone: 412-648-7370  
rookkoepsel@pitt.edu  
http://www.ucis.pitt.edu/asc/academics/certificate-program/undergraduate-certificate-program

Engage with Asian cultures, languages, histories, and economies through the interdisciplinary Asian Studies Certificate. Building a personalized learning program based on a thematic or regional interest in Asia, the Asian Studies certificate can be accomplished using general education credits to complement a language or disciplinary major or minor. Undergraduate students from any field or school interested in Asia can supplement and strengthen their major field of study by enrolling in the Asian Studies certificate program. To learn more about the Asian Studies program please contact the Asian Studies Advisor via email (rookkoepsel@pitt.edu) or by making an appointment at  
http://www.ucis.pitt.edu/asc/academics/advising-appointment-scheduler

---

**Certificate Requirements**

• **Asian Area Studies Courses:**
Interdisciplinary understanding of Asia can help build an understanding of broad trends and ideas from many different perspectives. Students earning an Asian Studies Certificate must take a minimum of five courses (15 credits) either designated as an Asian Studies course or which has been approved by the Asian Studies Academic Advisor. You can look at the courses available for the Asian Studies Certificate in any given semester at  
http://www.ucis.pitt.edu/asc/academics/courses. Required courses for the Asian Studies certificate may overlap with Gen. Ed. requirements and with courses taken on study abroad.
Students must take courses in a total of three different departments. At least one course (3 credits) should be in the student's major, unless their major does not include an Asian Studies designated course, in which case a course from a different department can count towards this requirement.

- **Language proficiency**: A minimum of two years (four terms) of Asian language study at the college level or equivalent proficiency is required. The University of Pittsburgh offers Chinese, Japanese, Korean, Hindi, Vietnamese, and Arabic, but any Asian language at intermediate proficiency would count toward fulfilling the Asian Studies Certificate. Students can fulfill the language requirement through taking two years of college language, demonstrating intermediate proficiency through testing, or by being a native speaker of an Asian language. If you have questions about a language Pitt doesn't teach, please see the Asian Studies advisor.

- **Digital Portfolio**: Students will be given a template to create an Asian Studies digital portfolio soon after they have signed up for the program. Students will work with the digital portfolio site throughout their time in the program, completing the digital portfolio during their final semester at the University of Pittsburgh. The portfolio offers a chance for students to reflect on academics, work/internship experience, study abroad observations, and co-curricular activities that highlight their Asian Studies experience. Students should work closely with the Asian Studies advisor on the creation of their portfolio. Information on the digital portfolio can be found at www.ucisportfolios.pitt.edu.

- **GPA requirement** is 2.0 for all courses to be counted towards the Asian Studies Certificate.

**Financial Assistance**

Asian Studies certificate students may be eligible for a variety of scholarships and study abroad awards. For information, visit http://www.ucis.pitt.edu/asc/funding/undergraduate

**European Union Studies Certificate**

University of Pittsburgh  
University Center for International Studies

Pittsburgh, PA 15260  
Phone: 412-648-7422  
slund@pitt.edu  
[Schedule advising appointment](http://www.ucis.pitt.edu/asc/funding/undergraduate)

The European Union (EU) Studies Certificate provides an introduction to the history of European integration, working knowledge of the EU's laws and administrative bodies, economics and the Euro Area, and (depending on the classes chosen) an overview of specific policy areas (defense and security, immigration, economic, international relations, etc.). The certificate provides a multidisciplinary and cross-regional (east-west) perspective, and it is perfect preparation for students who want to pursue careers in both public and private international organizations and to continue the study of Europe and the EU at the graduate level.

The University of Pittsburgh is an internationally recognized center for European Union studies. Selected in 1998, the university is one of 7 European Union Centers of Excellence in the United States (as chosen by the EU itself). The EU certificate has a high visibility that will assist students as they apply to competitive graduate programs in a number of disciplines and to corporations and organizations that interact with the European Union.

**Certificate Requirements**

- **Six EU studies courses**: (18 credits) from at least three different departments are required. These courses will include PS 1317 - Politics of the European Union, PS 1381- Capstone in European Union Studies, one course on the historical foundation of the EU, and three courses on the EU or with significant EU content. Students must earn a C average or better in the classes counting towards the certificate. Approved courses are posted online here.

- **Language proficiency**: Two years of college-level study of an official European Union foreign language (excluding English). Languages currently available include: Spanish, German, French, Italian, Swedish, Modern Greek, Portuguese, Hungarian, Polish and Slovak. Students may request placement tests through the language department.

- **Digital Portfolio**: An online digital portfolio that showcases research, work/internship experiences, study abroad, extra-curricular activities, language acquisition, and coursework to highlight expertise in European Union Studies, and associated professional and academic goals.
Related Concentration in European & Eurasian Studies

The Related Concentration, administered in collaboration with the Russian, East European and Eurasian Studies Center, is designed to let students explore their interests in both the ESC and REEES world areas so that it fits comfortably alongside their majors or minors. It appeals particularly to pre-professional students who wish to broaden their international experience while minimizing language requirements. It is crafted to offer comparative study of your intended professional field - pre-medicine, pre-law, business, engineering, and health and rehab sciences - while capitalizing on your existing European/Eurasian language credits. This individualized, interdisciplinary credential provides a context for studying abroad and complements most academic plans and majors.

Requirements

- A minimum of four (12 credits) content courses is required. The courses must come from at least two different departments and none of the courses can overlap with a student's other credentials. These courses are allowed to overlap, however, with general education requirements. Students must earn a C or better in classes counting towards the certificate.
- Language proficiency: one year (two semesters) of college-level study of an official European (excluding English) or Eurasian language, or demonstration of equivalent proficiency. The same language classes (or AP credits or three years of study from high school) used to fulfill the general education requirement may be used here as well.
- Digital Portfolio: An online digital portfolio that showcases research, work/internship experiences, study abroad, extra-curricular activities, language acquisition, and coursework to highlight expertise in European and Eurasian Studies, and associated professional and academic goals.

Special Academic Opportunities

In addition to the certificate itself, the European Studies Center also offers its students a number of valuable resources, including scholarships for study abroad, directed research opportunities, research assistance, and a full calendar of events and visits from politicians and practitioners from across the US and Europe. The center also sponsors the Euro Club for students interested in Europe related social activities, as well as opportunities to participate in Model EU and Model NATO simulations in both the US and Europe.

Global Health Certificate

University of Pittsburgh
University Center for International Studies
Global Studies Center
Elaine Linn, Assistant Director for Academic Affairs
4100 Wesley W. Posvar Hall
Pittsburgh, PA 15260
Phone: 412-648-2113
eel58@pitt.edu
http://www.ucis.pitt.edu/global/

With the CERTIFICATE IN GLOBAL HEALTH, undergraduates can tailor a program of study to suit their academic, personal, and career interests. There is no additional cost to enroll, and most students will be able to complete the requirements within a standard four-year program of study. There are many options for related study abroad and co-curricular activities.

What You'll Learn

Students who complete the certificate should be able to:

- Understand the global burden of disease, social determinants of health, and treatment disparities from transnational and historical perspectives
- Differentiate among research, programs, strategies, and coordination mechanisms that address these issues in a variety of settings and the organizations that promote them
- Recognize the behavioral and cultural dimensions of health in myriad contexts
- Appreciate how different disciplines approach these issues and apply one or more such approaches to a key question in global health
• Critique different discourses on global health (e.g., medical, policy, anthropological) and communicate effectively about these issues orally and in writing to an interdisciplinary audience.

Program Requirements:

The certificate requires 18 credits of coursework, distributed as follows:

Required Course

- PUBHLT 1001 - INTRODUCTION TO GLOBAL HEALTH
  This course lays the foundation for the Certificate and is required for all students. We strongly recommend taking this course as early as possible.

Core Courses (6 credits):

Students will select any two courses from the following list. We recommend that you consult the advisor for guidance on which courses would best support your course of study and career goals.

- NUR 1829 - CONTEM ISSUES CROSS CULTL HEALTH
- LING 1263 - CROSS-CULTURAL COMMUNICATION
- HIST 1091 - GLOBAL HEALTH HISTORY: HISTORICAL PERSPECTIVE
- HRS 1017 - INTRODUCTION TO EPIDEMIOLOGY
- PS 0550 - INTRODUCTION TO GLOBAL STUDIES
- ECON 0220 - INTRO TO HEALTH ECONOMICS
- ANTH 1761 - PATIENTS AND HEALERS: MEDICAL ANTHROPOLOGY 1
- SOC 0473 - SOCIOLOGY OF GLOBALIZATION AND HEALTH
- STAT 0800 - STATISTICS IN THE MODERN WORLD

Global Health Electives

Students can further personalize their course of study through electives offered by departments and schools across campus (9 credits total), including additional courses from the "core" list. A comprehensive list of courses is available prior to registration each term here. Students may also receive credit through their home department for related field visits, internships, community-based research, and other experiential learning as well as 1-credit "pop up" courses. Students should consult the advisor about these options.

Capstone

Students create a dynamic portfolio that curates and narrates their global health education and co-curricular experiences for external audiences.

Global Studies Certificate

University of Pittsburgh
University Center for International Studies
Global Studies Center
Elaine Linn, Assistant Director for Academic Affairs
4100 Wesley W. Posvar Hall
Pittsburgh, PA 15260
Phone: 412-648-2113
eel58@pitt.edu
http://www.ucis.pitt.edu/global/

Global studies is an exciting - and evolving - interdisciplinary field concerned with transnational structures, processes, and interactions that cross familiar political borders and cultural boundaries and affect our social, economic, cultural, political, and ecological environments.
Global Studies students pursing an undergraduate degree in any school within the University can tailor a unique plan of interdisciplinary study drawn from more than 200 courses across 5 global concentrations, gaining a solid understanding of the academic debates over globalization and their policy implications, learn important critical thinking skills and use them to arrive at their own stances on these issues. Students can double count up to six credits from their major, allowing them to fulfill their general education, major or certificate requirements at the same time and must maintain a 2.50 cumulative GPA.

In addition to the certificate, the Center provides a hub for students wanting to understand and take action on today's pressing issues at home and/or abroad. It offers numerous complementary programs and opportunities that support students' intellectual and personal development: research skills, career exploration and career readiness, experiential education and civic engagement, and a critical understanding of current events. Also, funding is available for travel grants and tuition remission for student ambassador positions.

Certificate Requirements

- **Global Concentrations**: Working with the advisor, students personalize a course of study selecting from one of five global concentrations:
  
  Cultural Dynamics  
  World Ecologies  
  Health and Well-Being  
  Peace, Conflict, and Security  
  Politics and Economy  

- **Introduction to Global Studies (3 credits)**: PS 0550 Introduction to Global Studies examines current global trends and issues in ways that encourage students to think critically about how to analyze, interpret, and respond to global interactions and their consequences for different regions, localities, and groups. It gives particular attention to the concept of globalization, highlighting the controversies surrounding its use and engaging core debates about the impact of global and transnational processes on economic and social relations, politics and governance, cultural interactions and the environment in local and global contexts.

- **Five Global Thematic Courses (15 credits)**: After students select a global concentration, they choose from a comprehensive and dynamic list of courses ensuring three disciplines are represented to provide an interdisciplinary perspective on their chosen global concentration. At least two of the courses must be 1000 level. Students must maintain a 2.50 cumulative G.P.A.

- **Language Proficiency**: Building on Pitt's vast offering of over 30 languages, a minimum of two years of college-level study (four semesters) in a foreign language is required. Students can fulfill this requirement by passing a proficiency exam at the Intermediate low-mid proficiency level.

- **E-Portfolio**: Students create a dynamic portfolio that reflects their scholarly engagement within their global concentration or their understanding of a global issue, highlights how they are informed about, as well as engaged with, a global issue through their various co-curricular experiences at Pitt, and lastly highlights their professional development experiences preparing them for career success.

Special Academic Opportunities

Students enrolled in Global Studies are the first to be informed about funding for research, travel, language study, and study abroad; internships and career development; networking opportunities with dignitaries, academics, and professionals; and interesting events on campus and in the city of Pittsburgh.

Experiential Learning: Student may participate in a wide range of study away, study abroad that will count towards their certificate credits.

**Latin American Studies Certificate and Related Concentration**

University of Pittsburgh  
University Center for International Studies  
Center for Latin American Studies  
Luis G. Van Fossen Bravo, Undergraduate Advisor  
4207 Wesley W. Posvar Hall  
Pittsburgh, PA 15260  
412-648-7396  
bravo@pitt.edu
Any undergraduate student at the University of Pittsburgh may enroll in the Certificate or Related Concentration of the Center for Latin American Studies (CLAS). The earlier you enter the program, the easier it is to incorporate Latin American courses into your plan of study. As a CLAS student, you will become eligible for grants and fellowships awarded by the Center. You also receive information about the many events sponsored by the Center.

Certificate Requirements

- **Seven Latin American courses** (21 credits): two courses in the major department and five courses from at least two departments outside the major. If majoring in a department in which no Latin American courses are offered, the requirement is seven Latin American area courses in at least three different departments. For a list of approved courses, click here.
- **Language proficiency**: three years (six terms) of college-level Spanish, Portuguese, Quechua, or Haitian Creole (or have equivalent competency).
- **Study abroad in Latin America is required**. The study abroad program must be for academic credit and last at least four weeks. The requirement may be fulfilled by participation in the CLAS Undergraduate Seminar and Field Program.
- **Digital Portfolio**: Students will develop a brief digital portfolio where they can reflect on their studies, explain the connection between the classes used to complete the requirements, and present examples of their work. Students may include papers.
- **GPA requirement** is 2.5 for all courses to be counted toward any Latin American Studies Certificate.

Related Concentration Requirements

Like a minor, the related concentration is designed for students who want to learn about the cultures and societies of our neighbors to the south. It is suitable for students considering a career specializing in the Latin American region and has two academic requirements: area studies courses and language proficiency.

- **One course in the major department, and four courses** from at least two departments outside the major (15 credits). If majoring in a department in which no Latin American courses are offered, the requirement is five Latin American area courses in at least three different departments.
- **Language proficiency**: two years of study (four terms) of college-level Spanish, Portuguese, Quechua or Haitian Creole (have equivalent proficiency).
- **Digital Portfolio**: Students will develop a brief digital portfolio where they can reflect on their studies, explain the connection between the classes used to complete the requirements, and present examples of their work. Students may include papers.
- **GPA requirement** is 2.5 for all courses to be counted toward any Latin American Studies Related Concentration.

Special Academic Opportunities

The Center for Latin American Studies (CLAS) offers a variety of funding opportunities for undergraduate students entering or currently enrolled in one of its undergraduate programs. Please visit: https://www.ucis.pitt.edu/clas/ugrad_opportunities.

**Mediterranean Studies Certificate**

The Certificate in Mediterranean Studies provides students with interests in Mediterranean history, culture, politics, and languages to complement their major with a regional specialization, and to explore the interconnectedness of North Africa, the Levant, Anatolia, Southern Europe, and the Balkans. The certificate is self-designed, and students may choose any theme to organize their studies and class choices. Examples of possible themes include immigration, regional politics and security, ancient civilizations, and Mediterranean arts and architecture.

Requirements and Courses

The academic requirements of the new program have three components: language proficiency, content courses and an electronic portfolio.

**Language Courses**: Two years (four semesters), or equivalent, of any Mediterranean language.

**Mediterranean Studies Content Courses**: 

Advising: www.ucis.pitt.edu/clas/advising
www.ucis.pitt.edu/clas
A minimum of five Mediterranean Studies Content Courses (15 credits) is required. These must include the required core course HIST 1790 - Mediterranean World Since 1500. Two of the courses may overlap with the student's majors. The remaining courses must be from at least two departments outside the student's major. Two of the courses must be at the 1000 level and students must earn a C or better in classes counting towards the certificate.

**Electronic Portfolio**: Additionally, for purposes of assessment, students will be required to produce an electronic portfolio upon completion of the certificate. Building on a narrative that explains the connection between the classes used to complete the requirements, students may include papers or projects developed as class assignments, observations from study abroad, and insights gained from pre-professional experiences such as internships and informational interviews.

These requirements match those of numerous other certificate programs offered in UCIS, including the West European Studies, Asian Studies, Transatlantic, and Russian and East European Studies Certificate programs.

**Courses**: A variety of courses will be developed for the new program. One that has already been approved by the History Department, and will serve as the certificate's core course, is being offered for the first time in Fall 2019 (2201): HIST 1790 - Mediterranean World Since 1500. The purpose of this course is to introduce students to the history of the region's politics, economics, religions and cultures, providing a base for additional coursework in which they will focus their regional interests and studies.

Many pre-existing courses also fulfill requirements for the certificate and a sample list is attached to this proposal. Future course offerings will likely be informed by the visiting Italian Fulbright Scholars who are in residence at Pitt every Spring semester.

Internships and research experiences already offered by the ESC, and the university itself, are also applicable to this new program. But, in addition, prospective new internships, with companies like Addev Materials (and their offices in France) might also serve the program. Moreover, new international partnerships with universities in Italy (Rome) and Croatia (Zagreb) are also applicable.

- LCJS 1571 - TERRORISM
- AFRCA 0318 - HISTORY OF AFRICA BEFORE 1800
- ANTH 1530 - ORIGINS OF CITIES
- ARABIC 1615 - ARABIC LIFE AND THOUGHT
- CLASS 1151 - DEATH IN THE MEDITERRANEAN WORLD
- ECON 0640 - ECONOMIC DEVELOPMENT OF THE MIDDLE EAST AND NORTH AFRICA (MENA) REGION
- ENGLIT 1258 - ISRAELI AND PALESTINIAN LITERATURE
- FR 0227 - THE FRENCH ATLANTIC
- GER 1502 - INDO-EUROPEAN FOLKTALES
- HAA 0730 - ART AND ARCHITECTURE OF THE MUSLIM WORLD
- HIST 0687 - US IN THE MIDDLE EAST
- ITAL 0087 - FOOD FOR THOUGHT: ITALIAN FOOD CULTURE
- JS 1100 - ISRAEL IN THE BIBLICAL AGE
- PHIL 0200 - HISTORY OF ANCIENT PHILOSOPHY

- TURKSH 1615 - TURKISH CULTURE AND SOCIETY

**Russian, East European, and Eurasian Studies Certificate**

Center for Russian, East European, and Eurasian Studies
4215 Wesley W. Posvar Hall
Pittsburgh, PA 15260
Phone: 412-648-7403
reesadv@pitt.edu
http://www.ucis.pitt.edu/crees/

Deepen your understanding of a world region that spans Europe and Asia, where shifting identities and political boundaries are complicated by control of energy resources, EU/NATO affiliations, and the Cold War legacy. The Certificate in Russian, East European and Eurasian Studies is an interdisciplinary credential that appears on your transcript and complements your major and minor. The undergraduate Certificate in Russia, East
European, and Eurasian Studies is crafted to allow students in any major - from STEM and professional disciplines to languages and other liberal arts - to enhance their program of study without extra tuition cost and usually with no increase in their overall course load. The certificate integrates language study with the study of the region where the language is spoken.

Certificate Requirements

- **Coursework:** Five Russian, East European, and/or Eurasian area studies (non-language*) courses (15 credits). Courses must be taken in at least three departments, and up to two courses may overlap with the student's major. Students must maintain a minimum 3.0 GPA in REEES-related courses.
- **Language proficiency:** a minimum of two years (four terms) of college-level study of a language of the former Soviet Union or East-Central Europe. Pitt offers Russian, Polish, Slovak, Hungarian, Ukrainian, Modern Greek, Turkish, Persian and Bosnian/Croatian/Serbian. Additionally, Pitt's Summer Language Institute offers Bulgarian and Czech. Heritage speakers must demonstrate intermediate-level proficiency.
- **Digital Portfolio:** An online digital portfolio that showcases research, work/internship experiences, study abroad, extra-curricular activities, language acquisition, and coursework to highlight expertise in Russian, East European, and Eurasian Studies, and associated professional and academic goals.

*Students may apply advanced language coursework as Area Studies coursework in certain circumstances, in consultation with the certificate advisor.*

Related Concentration in European & Eurasian Studies

The Related Concentration in European & Eurasian Studies is crafted to offer comparative study opportunities for students in a pre-professional field - pre-medicine, pre-law, business, engineering, and health and rehab sciences - will while capitalizing on existing European language credits. This individualized, interdisciplinary credential provides a context for studying abroad and complements most academic plans and majors. For the Related Concentration, we define Eurasia as the Russian Federation, Turkey, Mongolia, and the former Soviet republics.

Requirements

- A **minimum of four** (12 credits) **content courses** is required. The courses must come from at least two different departments and none of the courses can overlap with a student's other credentials. These courses are allowed to overlap, however, with general education requirements. Students must earn a C or better in classes counting towards the certificate.
- **Language proficiency:** one year (two semesters) of college-level study of an official European (excluding English) or Eurasian language, or demonstration of equivalent proficiency. The same language classes (or AP credits) used to fulfill the general education requirement may be used here as well.
- **Digital Portfolio:** "An online digital portfolio that showcases research, work/internship experiences, study abroad, extra-curricular activities, language acquisition, and coursework to highlight expertise in European and Eurasian Studies, and associated professional and academic goals."

Special Academic Opportunities

Pitt offers a range of study abroad course that can be used to fulfill certificate requirements. Short-term summer study abroad courses, taught in English and offering 3 to 6 Pitt credits, may include:

- **Czech Republic and Poland:** Economy and Policy (ECON 0905) in Prague, Budapest, and Krakow, May;
- **Romani (Gypsy) Music, Culture, and Human Rights** (MUSIC 1362, URBNST 0600) in Prague and Budapest, 6 credits, May-June;
- **Architecture and the City in Central Europe** (ARC 1191) in Vienna, Zagreb, Ljubljana, and Prague, May;
- **Competing Perspectives on Global Energy** (PS 1301) in Ukraine, Belgium, Pennsylvania, and Washington, DC, 3 credits, May;
- **Monsters, Madmen, and the Modern City** (ENGLIT 0636, ENGLIT 0612) in Prague, 6 credits, July-August.

The intensive Summer Language Institute (SLI) is a great option to study languages of our region. Study abroad options are available for Russian, Bosnian/Croatian/Serbian (BCS), Bulgarian, Czech, Hungarian, Polish, Slovak and Persian (www.sli.pitt.edu).

*For those students interested in pursuing graduate or other advanced regional studies, a Bachelor of Philosophy degree in International and Area Studies/Russian, East European, and Eurasian Studies Track is also available.*

Transatlantic Studies Certificate
The Certificate in Transatlantic Studies allows students to pursue a comparative study of Europe and the United States, as well as countries that touch the Atlantic. Primary areas of study include governance, policy and security issues, the history of colonialism, humanities and culture, and the comparative study of various professional fields such as business and medicine.

Certificate Requirements

- A minimum of five (15 credits) Transatlantic Studies content courses is required. Two of the courses may overlap with the student's major or other credentials. The remaining courses must be from at least two departments outside the student's major. Courses chosen must be thematically relevant to each other, and students may study any aspect of European and American history and culture of interest to them. Examples include film studies, health and science policy, architecture, politics, economics, and immigration. Approved courses can be found here.
- Language proficiency: two years (four semesters) of college-level study of an official European language (excluding English). Languages currently available include: Spanish, German, French, Italian, Swedish, Modern Greek, Irish Gaelic, Portuguese, Hungarian, Polish and Slovak. Students may request placement tests through the language department.
- Digital Portfolio: An online digital portfolio that showcases research, work/internship experiences, study abroad, extra-curricular activities, language acquisition, and coursework to highlight expertise in Transatlantic Studies, and associated professional and academic goals

Special Academic Opportunities

In addition to the certificate itself, the European Studies Center also offers its students a number of valuable resources, including scholarships for study abroad, directed research opportunities, research assistance, and a full calendar of events and visits from politicians and practitioners from across the US and Europe. The center also sponsors the Euro Club for students interested in Europe related social activities, as well as opportunities to participate in Model EU and Model NATO simulations in both the US and Europe.

Transnational Asia Certificate

Asia is at the forefront of many of the world's most pressing issues, leading to many analysts declaring the 21st century to be the Asian Century. Representing 60% of the world's population and 3 out of the 10 largest economies in terms of GDP, Asia plays a critical and ever-expanding role on the global stage. Transnational flows of people, disease, goods, and ideas in and out of Asia have fueled much of the rapid change within the region and its influence abroad. As the world wrestles with issues of global economics, environmental sustainability, public health, and labor migration, Asia's impact defines a large number of research and social questions spanning academic and professional disciplines. Students endeavoring to understand international business, history, and politics need to be intellectually agile and able to make transnational and even transregional connections. The Transnational Asia Certificates that will focus the continent's transnational linkages with the world. This certificate programs will help students prepare for international careers as well as graduate degrees with a global focus. To learn more about the Transnational Asia Certificate
please contact the Asian Studies Advisor via email (rookkoepsel@pitt.edu) or by making an appointment at http://www.ucis.pitt.edu/asc/academics/advising-appointment-scheduler

Requirements and Courses

- **Transnational Asia Studies Courses:**
  Interdisciplinary understanding of transnational Asia can help build an understanding of broad trends and ideas from many different perspectives. When students apply for a Transnational Asia Certificate, they will work together with the Asian Studies Center advisor to choose an appropriate theme and will, over the course of their remaining semesters take a minimum of five courses (15 credits) approved by the Asian Studies Academic Advisor to fit around the theme. Some popular themes include: Asian Diaspora Studies (including Asian American Studies), Asian Public Health, Transnational Asian Popular Culture, Transnational Supply Chains, and many others. Required courses for the Asian Studies certificate may overlap with Gen. Ed. requirements and with courses taken on study abroad.

Students must take courses in a total of three different departments. At least one course (3 credits) should be in the student's major, unless their major does not include a course appropriate to their certificate theme, in which case a course from a different department can count towards this requirement.

- **Language proficiency:** Students must complete one of the three language tracks to earn the Transnational Asia Certificate:
  
  **Track A:** Proficiency in an Asian Language equivalent to two years of college courses, relevant to the certificate theme. This can be fulfilled by 4 semesters of college language courses or proficiency proven via examination.
  
  **Track B:** Proficiency in an Asian Language equivalent to one year of a college courses and proficiency equivalent to one year of college courses in a comparative language relevant to the certificate theme. This requirement can be fulfilled by course work at the college level, university language management, and or proficiency proven via examination.
  
  **Track C:** Proficiency in two different Asian languages, each equivalent to one year of college language courses.

3. **Digital Portfolio:** Students will be given a template to create a Transnational Asia digital portfolio soon after they have signed up for the program. Students will work with the digital portfolio site throughout their time in the program, completing the digital portfolio during their final semester at the University of Pittsburgh. The portfolio offers a chance for students to reflect on academics, work/internship experience, study abroad observations, and co-curricular activities that highlight their Asian Studies experience. Students should work closely with the Asian Studies advisor on the creation of their portfolio. Information on the digital portfolio can be found at www.ucisportfolios.pitt.edu.

4. **GPA requirement** is 2.0 for all courses to be counted towards the Asian Studies Certificate.

schedule advising appointment

The Certificate in Western European Studies provides students with strong interests in predominantly Western European history, culture, politics, and languages to complement their major with a regional specialization. The certificate is self-designed, and students may choose any theme to organize their studies and class choices. Examples of possible themes include country or region specific ones, such as Spanish Studies and British Studies, policy driven ones such as Intelligence & Security or Social Policy, and culture and history-based ones such as Ancient Greece & Rome or European Art & Architecture.
Certificate Requirements

- A minimum of five West European studies courses (15 credits). Courses must be chosen according to a theme to ensure intellectual cohesion.
- Two courses from the major may overlap with the certificate. Remaining courses must be from at least two departments outside the major. Approved courses can be found here.
- Language proficiency: two years of college-level study (four terms) in French, German, Spanish, Portuguese, Italian, Irish Gaelic, Swedish or Modern Greek.
- Digital Portfolio: An online digital portfolio that showcases research, work/internship experiences, study abroad, extra-curricular activities, language acquisition, and coursework to highlight expertise in European and Eurasian Studies, and associated professional and academic goals.

Special Academic Opportunities

In addition to the certificate itself, the European Studies Center also offers its students a number of valuable resources, including scholarships for study abroad, directed research opportunities, research assistance, and a full calendar of events and visits from politicians and practitioners from across the US and Europe. The center also sponsors the Euro Club for students interested in Europe related social activities, as well as opportunities to participate in Model EU and Model NATO simulations in both the US and Europe.

University Honors College

The University Honors College (UHC), through a diverse portfolio of formal and informal programs, cultivates and enhances interdisciplinary research and crosscutting collaborations, supports student engagement, and offers personalized educational experiences locally and globally. All students are welcome to take advantage of the opportunities available through the UHC.

University of Pittsburgh
University Honors College
3600 Cathedral of Learning
Pittsburgh, PA 15260
412-624-6880
www.honorscollege.pitt.edu

Admission Requirements

Although UHC opportunities are open to all students, some may choose to be admitted into one of three programs in order to earn a formal credential from the UHC: the Bachelor of Philosophy (BPhil) Degree, the jointly-conferred Honors Degree, and the Honors Distinction.

Credentials

Students have the option to earn one of these three formal credentials from the UHC:

The Bachelor of Philosophy is a research-based degree, requiring a rigorous curriculum and independent research under the guidance of a faculty mentor culminating in a thesis defense before a committee of faculty members, including an external examiner from another institution. Upon successful completion of the program, students receive a degree/diploma jointly-conferred by the UHC and their primary school/college of admission.

The Honors Degree consists of a structured program of curricular and co-curricular activities that provides an enhanced academic experience which includes opportunities for interdisciplinary study for students at the University of Pittsburgh. Upon successful completion of the program, students receive a degree/diploma jointly-conferred by the UHC and their primary school/college of admission.

The Honors Distinction consists of a structured program of curricular and co-curricular activities that provides an enhanced academic experience which includes opportunities for interdisciplinary study for students at the University of Pittsburgh. The Honors Distinction offers a lighter credit load than the Honors Degree, which may be appealing to transfer students or those in highly structured, credit-intensive programs. Upon successful completion of the program, students receive a notation on their final transcript.

Special Opportunities

Politics and Philosophy Major

Politics and Philosophy, BA is an interdisciplinary major in the Kenneth P. Dietrich School of Arts and Sciences and is advised through the UHC. It provides students with training in the conceptual, empirical, and normative foundations of various fields of public policy. It enhances understanding of the moral and political complexities of public life and offers preparation in both theory and practice to students interested in pursuing careers in social and public affairs, including law.

Research and Creative Fellowships
The UHC offers a range of fellowships available to students in any academic discipline. Students identify a Pitt faculty mentor and develop a project in collaboration with them. Many of the UHC fellowships involve regular meetings of the fellows in which they share their research with other students, creating an interdisciplinary learning environment.

**National Scholarships**

Scholar Mentors in the UHC work closely with students to identify scholarships relevant to their academic and personal goals and explore the steps to become competitive applicants for these awards. National scholarship advising can help students attain a broader perspective and refined understanding of their personal, academic, and professional goals; strengthen their writing skills through the creation and revision of personal statements and grant proposals; and develop the resourcefulness to identify opportunities to conduct meaningful research and/or incorporate service and international experiences into their educational plan.

**Global and Experiential Opportunities**

The UHC strives to instill a global perspective in students through engagement in scholarship as part of study abroad or study away programs. Students may choose to complete short- or long-term global honors programs, which includes a portfolio of abroadSELECT programs for highly motivated students.

**Community Engagement Opportunities**

Through community engagement, the UHC encourages students to use their academic talents to make lasting impacts in the community. Through research, internships, or programs such our Scholar Communities, students investigate vital issues alongside more than 100 local, national, and international partners.

**Honors Housing**

Honors Housing is unique in that it connects highly motivated students from across schools and majors in communities that are shaped by their shared academic, cultural, and personal interests. The UHC offers honors housing for first-year students in Sutherland Hall and upperclass students in the Forbes Craig Apartments and Brackenridge Hall.

**Distinction**

**Honors Distinction**

The Honors Distinction consists of a structured program of curricular and co-curricular activities that provides an enhanced academic experience which includes opportunities for interdisciplinary study for students at the University of Pittsburgh. The Honors Distinction offers a lighter credit load than the Honors Degree, which may be appealing to transfer students or those in highly structured, credit-intensive programs.

The Honors Distinction requires 12 credits to be completed upon graduation. Of these 12 credits, a minimum of 9 credits of University Honors College approved academic credits and a minimum of 3 experiential course are required. The 9 academic credits may include courses with the University Honors College course attribute value (honors courses); courses with the Civic Learning course attribute value; graduate-level courses; courses which are used to fulfill the following (including courses which do not have the University Honors College attribute): Leadership and Ethics Certificate; Conceptual Foundations of Medicine Certificate; Engineering for Humanity Certificate; Engineering Science; Gender, Sexuality, and Women’s Studies Minor; Global Health Certificate; Pitt Business Honors Program; Politics and Philosophy, BA; Public Communication of Science and Technology; Undergraduate Certificate in Sustainability; and any additional course work beyond those used for the 3 credit experiential course work requirement. The 3 experiential credits may include courses with the Civic Learning + Engagement course attribute value, as well as academic research, independent study, study abroad, internships, or co-op programs, all of which require completed credits to appear on the transcript. If the course used to fulfill the experiential course work requirement did not have the High Impact Practices Course Value Attribute of Capstone Course, students must complete this additional requirement by completing an additional course with the High Impact Practices Course attribute value of Capstone Course or a capstone experience through the Honors Outside the Classroom Curriculum. In addition to the curricular requirements, students are required to complete the Honors Outside the Classroom Curriculum that provides non-credit enhanced experiences for honors students. A minimum cumulative GPA of 3.00 upon graduation is required for completion of the Honors Distinction program. Upon successful completion of the program, students receive a notation on their final transcript.
*On October 5th & 28th, 2021 the Honors Distinction was updated.

Admission Requirements

Students with a cumulative GPA of at least 3.000 can declare the Honors Distinction through the Catalog of Opportunities.

Total Credits: 12

Major

Politics and Philosophy, BA

The Politics and Philosophy major, a major in the Kenneth P. Dietrich School of Arts and Sciences, advised through the University Honors College, provides students with interdisciplinary training in the conceptual, empirical, and normative foundations of various fields of public policy. It enhances students' understanding of the moral and political complexities of public life and it offers preparation in both theory and practice to students interested in pursuing careers in social and public affairs, including law.

By combining course work from different disciplines -- political science, philosophy, and economics -- the program's scope is broad, yet the structure of the curriculum also requires depth. The thematic nature of the major allows for flexibility in course selection. In collaboration with the major advisor, students design a cohesive program of study tailored to meet their individual post-graduate/career interests and needs.

The politics and philosophy major is a rigorous, but rewarding, program. Upon graduation, an academic career is certainly a possible pursuit; the major also provides excellent preparation for careers in law, government, community organizations, and social action groups.

The major is comprised of elements from the political science, philosophy, and economics departments and involves a minimum of 51 credits distributed as follows: political science - 21 credits; philosophy - 21 credits; economics - 9 credits. A capstone, which may have associated credits, is also required.

Required Courses

Political Science Courses

Students must complete seven courses in political science. At least four of those courses must be upper level (numbered 1000 or above). One of the courses must be a W-course; the W-course may be either upper- or lower-level.

Philosophy Courses

Students must complete seven courses in philosophy. At least four of those courses must be upper level (numbered 1000 or above). One of the courses must be a W-course; the W-course may be either upper- or lower-level.

Co-Requisite Courses

Economics Courses

- ECON 0100 - INTRODUCTION TO MICROECONOMIC THEORY
- ECON 0110 - INTRODUCTION TO MACROECONOMIC THEORY
- ECON XXXX any course (no course in the 0800 series may count toward this requirement)

Capstone Requirement
In consultation with the major advisor, students complete one of the following requirements:

- complete the Bachelor of Philosophy thesis through the University Honors College (UHC);
- participate in a graduate-level seminar (with permission from the instructor); or
- complete a Directed Research Project, an Independent Study, or an Internship.

Other requirements and conditions

Grade requirements

A minimum GPA of 2.0 is required in those courses that count toward the major.

Satisfactory/No Credit grade option

There is no limit on the number of courses in the major that can be taken on an S/NC basis, but it is suggested that these courses be taken for a letter grade.

Writing (W) requirement

The W courses listed under the political science and philosophy requirements satisfy the W requirement for the major.

Bachelor of Philosophy

The Bachelor of Philosophy (BPhil) Degree is a research-based degree, requiring a rigorous curriculum and independent research under the guidance of a faculty mentor culminating in a thesis defense before a committee of faculty members, including an external examiner from another institution.

The BPhil Degree combines General Degree Requirements for an individually approved Program of Study with Special Degree Requirements for in-depth independent scholarship that culminates in a thesis. Through the BPhil, undergraduate students any time after their first year at Pitt can begin research and scholarly work toward a rigorous baccalaureate degree in a manner usually reserved for the graduate level (the Special Degree Requirements). Simultaneously, the BPhil degree includes an element of intellectual scope in the expectation that students have a challenging academic program in the course work for their majors, minors, and/or certificates (the General Degree Requirements).

General Degree Requirements

The General Degree Requirement is met through an approved Program of Study demonstrating that the student has exceeded the requirements for a standard undergraduate departmental degree. Existing curricular options may fulfill the Program of Study requirements, such as multiple majors or double-degree programs, or the approved Program of Study may be individualized, especially for students in highly structured programs. In general, it is expected that a student's curriculum will reflect the breadth and/or depth. Curricula that are built around an intellectual theme (those that reflect focus) are also acceptable. It is incumbent upon each candidate to demonstrate the scholarly merits of the proposed curriculum as it relates to their own work.

To meet the General Degree Requirement, BPhil Degree candidates must:

- Complete the degree requirements (e.g., major requirements) of their primary school/college of admission (Dietrich School of Arts and Sciences, Swanson School of Engineering, School of Nursing, College of Business Administration, School of Computing and Information, etc.)
- Complete a Program of Study approved by the UHC
- Maintain a 3.50 cumulative GPA

Special Degree Requirements
The Special Degree Requirement is met through the preparation and defense of a thesis. There will be an individualized examination conducted by an Examining Committee no later than during the candidate's last term at the University of Pittsburgh. One member of the Examining Committee must be from outside the University of Pittsburgh.

To meet the Special Degree Requirement, BPhil Degree candidates must:

- Select a thesis advisor from the faculty in their major department of study
- Submit a synopsis of the proposed research, the Thesis Prospectus (which has been accepted by the thesis advisor) to the UHC
- Be evaluated by the Examining Committee; this evaluation consists of a public presentation and discussion of the thesis or project, followed by a private oral examination conducted by the Examining Committee, similar to a master's thesis defense

Upon successful completion of the BPhil Degree program, students receive a degree/diploma jointly-conferred by the UHC and their primary school/college of admission.

Admissions Requirements

Applications for admission to BPhil Degree candidacy are accepted on a rolling basis. Students should apply for BPhil Degree candidacy as soon as they have identified a faculty member willing to serve as the thesis advisor. It is recommended, although not required, to apply for BPhil Degree candidacy prior to conducting the actual research for the thesis. The application requires students to provide a narrative of their Plan of Studies (General Degree Requirement) and Thesis Prospectus (Special Degree Requirement), along with biographical information/resume and Pitt transcript.

Total Credits

The UHC does not require students to complete additional credits for the BPhil Degree, although some departments such as Political Science, BPHIL and International and Area Studies, BPHIL may have additional requirements for BPhil Degree candidates in their programs.

Honors Degree

The Honors Degree program consists of a structured program of curricular and co-curricular activities that provides an enhanced academic experience which includes opportunities for interdisciplinary study for students at the University of Pittsburgh.
