The learning sciences focus on the processes of learning and the factors that shape successful learning. Contributing to the learning sciences are a) cognitive sciences -- the study of learning, understanding, and thinking; b) sociocultural theories -- learning as a social activity and the influence of cultural knowledge and societal factors on learners; c) cognitive neuroscience -- how the brain embodies and supports learning, understanding, and thinking; and d) organizational theories of learning - examining organizational structures and practices that motivate and enable learning at scale. Learning science has a practical focus as well; it is intimately connected to work on educational technology, instructional design, and setting the policies of educational institutions and other learning opportunities. These settings provide an important context for developing knowledge and testing theories.

The Distinction will incorporate three key components: 1) Coursework in the learning sciences, including a pro-seminar centered on learning sciences research, 2) Research or analogous experience, and 3) Capstone presentation.

Coursework

Learning Sciences course outside of the student's major. Students will select one elective outside of their discipline, that carries the Learning Sciences/Research attribute from across Pitt (3 credits). This class will be drawn from courses offered by LRDC faculty in the Dietrich School, the School of Computing and Information, and the School of Education. They also include courses identified outside of LRDC, in collaboration with undergraduate advisors across the university. Where appropriate, undergraduate students further along in their program of study may also petition to have a master's level course count towards the distinction.

The Learning Sciences Attribute will be assigned by a committee drawn from across disciplines. Initially, the committee will be comprised of the faculty presenting this proposal, but over time, faculty members will be added as needed to assure disciplinary breadth. Course syllabi will be used to determine whether at least 30% of the course content addresses core Learning Sciences material. Instructors will be contacted if there are questions as to topic relevance to the learning sciences.

Learning Sciences Pro-Seminar Course: Students will participate in a pro-seminar (3 credits) developed and taught by faculty at LRDC. The pro-seminar will provide students with the opportunity to learn about different facets of the learning sciences, including different research paradigms and methodologies, as well as practical issues related to learning sciences research. The course will also include elements that will vary year to year to

take advantage of unique opportunities that present. Potential examples of the latter include a brief practical experience that exposes students to a key insight from a learning sciences field; a technology session where students learn about how a particular piece of equipment works (e.g., MRI or eyetracker); a field visit to a school or other context to see the learning sciences in action; and other impactful activities to help students understand the learning sciences, either from a research perspective, an applied perspective, or a career perspective. While we expect that the proseminar will be initially listed as a course in the School of Arts and Sciences, our longterm goal is for the course to be cross-listed in multiple schools.

LRDC Research Project

The co-curricular component of the Learning Sciences distinction would consist of participation in LRDC research for at least 2 semesters. Research participation may be for pay on funded research projects (e.g., work-study positions) or for credit. Students' time can be distributed across various projects or devoted to a single project. Under faculty supervision, advanced graduate students or post-docs in the LRDC also could potentially work with students on their research projects. This would serve the twin goals of expanding potential mentors for undergraduate students (range of research opportunities) as well as providing graduate students/post docs with mentoring experience. For all students, additional learning opportunities will be identified in the semester where the pro-seminar is not offered to enhance the undergraduate learning community. Examples may include:

- Peer presentations; discussion of journal articles; lab tours
- Learning about career opportunities via structured conversations and/or observations with individuals employed in fields related to the learning sciences (e.g., academia, industry, education, medicine)

Capstone

The distinction will culminate in a **capstone project** through which students will have the opportunity to communicate about their research experience with external audiences. During the soft launch for the distinction, the deliverable for this will be the following:

- Poster summarizing involvement in a research project (what they did, what they found, why it matters). All students will submit their project for consideration to the Pitt Undergraduate Research Fair organized by the Office of the Provost.
- Students will also be encouraged to present their work as it unfolds at other local conferences. Options for the latter include:
 - Laurel Highlands Conference at Pitt Johnstown
 - 48th Western Pennsylvania Undergraduate Psychology Conference
 - Pitt BRAIN Day
 - Statistical Analysis of Neuronal Data (SAND) workshop

As an alternative to presenting in the Pitt Undergraduate Research Fair, the distinction will accept as deliverable for the capstone project, a paper accepted in the Pitt Undergraduate Review.

- If extenuating circumstances prevent a student from presenting in the Undergraduate Research Fair, the student may petition the Learning Sciences Distinction committee for approval of an alternative synthetic project via the administrative contact for the distinction.

At a later date, and in consultation with the Vice Provost for Undergraduate Programs, the LRDC may explore hosting an in-house poster event for the required capstone, perhaps in collaboration with the Undergraduate Research Fair.

Special Academic Opportunities

The University of Pittsburgh makes many special academic opportunities available to all of the University's undergraduate students. These opportunities provide students with ways to augment their education and experience with expanded study programs both on campus and off campus, in both University and professional settings.

Area of Concentration (Sub-Plan)

An area of concentration is an approved educational experience that results in concentrated training in or knowledge of a particular area within the discipline of a degree program. For more information about specific areas of concentration, see individual school sections.

Certificate Programs

Students may broaden their educational experience by electing to take an academic interdisciplinary certificate program in the areas listed below. The certificate may partially fulfill the degree requirements of the student's school. The requirements for each certificate vary, and students should contact the certificate program director. For more information about these certificate programs, see their individual listings in the school or center section identified in parentheses.

- Accounting (CGS)
- African Studies (UCIS)
- American Sign Language (A&S)
- Asian Studies (UCIS)
- Assistive Technology in Rehabilitation (SHRS)
- Children's Literature (A&S)
- Civil Engineering and Architectural Studies (ENGR)
- Communications (CGS)
- Community Health Assessment (CGS)
- Conceptual Foundations of Medicine (A&S)
- Corporate/Community Relations (CGS)
- Dental Hygiene (DEN)
- Digital Media (CGS)
- Emergency Medicine in Rehabilitation (SHRS)
- English Writing (CGS)
- European Union Studies (UCIS)
- Gender, Sexuality, and Women's Studies (A&S) (CGS)
- Geographic Information Systems (A&S)
- German Language (A&S)
- Global Studies (UCIS)
- Historic Preservation (A&S)
- History and Philosophy of Science (A&S)
- Information System Design (CGS)
- International Business (CBA)
- International Engineering Studies (ENGR)
- Jewish Studies (A&S)
- Latin American Studies (UCIS)
- Leadership (A&S)

- Leadership and Ethics (CBA)
- Managing Health Services Programs and Projects (CGS)
- Medieval and Renaissance Studies (A&S)
- National Preparedness and Homeland Security (CGS)
- Nonprofit Management (CGS)
- Nuclear Engineering (ENGR)
- Pathokinesiology in Rehabilitation (SHRS)
- Photonics (A&S)
- Psycho-Social Issues in Rehabilitation (SHRS)
- Public and Professional Writing (A&S)
- Russian and East European Studies (UCIS)
- West European Studies (UCIS)
- Writing for the Professions (CGS)

Abbreviations are as follows:

A&S = Arts and Sciences
 CBA = College of Business Administration
 DEN = School of Dental Medicine
 CGS = College of General Studies
 ENGR = Swanson School of Engineering
 UCIS = University Center for International Studies

Cooperative Programs

The University has established some arrangements with industry that permit students to rotate four-month terms between the workplace and the classroom. These programs are administered by the Swanson School of Engineering and available to engineering, computer science, and engineering technology students. The experience normally starts in the sophomore or junior year. Call 412-624-9826 for more information or see www.engineering.pitt.edu/coop.

Cross Registration

Cross-college and cross-university registration is a program designed to provide enriched educational opportunities for undergraduates in any of the following participating Pittsburgh-area institutions: Carlow University, Carnegie Mellon University, Chatham University, Community College of Allegheny County, Duquesne University, La Roche College, Pittsburgh Theological Seminary, Point Park University, Robert Morris University, and the University of Pittsburgh. For requirements and limitations, see the Cross-Registration section of this catalog or visit www.pchepa.org.

Double And Joint Degrees

Students may simultaneously pursue more than one undergraduate degree (e.g., a BA and a BS within Arts and Sciences, or an undergraduate degree in the Swanson School of Engineering and in Arts and Sciences). Students must be admitted to both schools offering the degrees and fulfill the degree requirements of both schools. For the double degree (whether within or between schools), the student must complete not only the requirements for both degrees, but also a minimum of 30 credits beyond what is normally required for the primary degree (e.g., a student earning two A&S degrees would need at least 150 credits, rather than the usual 120; a student earning an A&S degree as the primary degree and a degree from another University of Pittsburgh school as the secondary degree would need at least 150 credits). Students must maintain a 2.00 GPA in all courses. Check with the individual school for other specific requirements that apply.

Graduate And Professional School Opportunities

Graduate school provides students with the opportunity to enhance their knowledge and qualifications in areas of academic and professional interest. All students can take advantage of being at a major research and graduate institution by exploring the many possibilities for graduate study that exist at the University. For information about specific programs, see the Graduate and Professional Studies Catalog.

University of Pittsburgh undergraduate students with sufficient preparation are permitted to enroll in certain graduate courses at the University following procedures determined by each school. The graduate credits earned may be counted toward the undergraduate degree if approved by the student's school. These may not be counted as credits toward a graduate degree except as noted below.

Undergraduate students who need fewer than 15 credits to complete requirements for the baccalaureate degree and who intend to continue study toward an advanced degree may be permitted during their final term to register for graduate courses that will later apply toward a graduate degree. See the *Graduate Catalog - Academic Regulations* section "Enrollment in Graduate Courses as an Undergraduate".

Some schools offer accelerated admission into certain graduate and professional schools through a combined program leading to both a bachelor's and graduate or professional degree. The participating undergraduate schools and their early admissions graduate school partners are listed below:

- Arts and Sciences (A&S)-Communication Science Program (speech, pathology, and audiology) within the School of Health and Rehabilitation Sciences (SHRS)
- A&S-Physical Therapy Program within SHRS
- A&S-School of Dental Medicine
- BS in Computer Science and MA or MS in Computer Science, both from Arts and Sciences
- BS in Statistics and MA or MS in Statistics, both from Arts and Sciences
- BA from Arts and Sciences and JD from Law
- BA or BS (unspecified major, but prerequisites required) from Pitt and MS or MPH in Environmental and Occupational Health, MS or MPH in Infectious Diseases and Microbiology, MS in Human Genetics, MS or MPH in Biostatistics, or BCHS or MHPE in Health services Administration from School of Public Health
- School of Nursing-RN-Option Program (RN-MSN option)
- SHRS-Health Information Management Program
- BA in Legal Studies from the College of General Studies and Masters of Law from Law
- BSBA from College of Business Administration and JD from Law

Honors College And Honors Courses

The David C. Frederick Honors College (FHC) seeks to meet the special academic and cocurricular needs of the University's most able and motivated undergraduate students. The David C. Frederick Honors College offers a variety of carefully designed courses from the humanities, social sciences, and natural sciences, along with special advising opportunities for an academic community of motivated students, and a special baccalaureate degree in any undergraduate school of the University. See the David C. Frederick Honors College section of this catalog for more information. In addition, some schools and departments offer an honors major. Students should see their school for more information on this opportunity.

Internships

Some schools provide internship experiences appropriate to the student's academic discipline. An internship is a supervised, work-related experience, either on a volunteer or compensated basis. It is intended to be a new experience, not an existing position in which the student is already working. Students will only get internship credit for a current employment situation that has been pre-approved as an internship by the relevant school or department.

Minors (Plans)

A minor provides an option for a student obtaining a degree in a particular discipline to attain knowledge of another discipline. Students may earn minors in schools other than the school in which they are enrolled. After the student lists the official minor on his or her graduation application, the minor appears on the student's academic record and official transcript when the degree is awarded. (See the Academic Programs section of this catalog for available minors.)

Reserve Officer Training Corps (ROTC)

ROTC is an educational program designed to provide full-time students an opportunity to become military officers while completing a Bachelor's or a graduate degree. Students may elect to participate in either the Air Force or Army ROTC program at the University of Pittsburgh or the Naval ROTC program at Carnegie Mellon University. Students in the Air Force program have the option of completing a two or a four-year program. Students in the Army ROTC Program and Naval ROTC programs have the option of completing a two, three, or four-year program. Completion of the Air Force ROTC program leads to a commission as a Second Lieutenant in the U.S. Air Force. Completion of the Army ROTC program leads to a commission as a Second Lieutenant in the U.S. Army, the Army National Guard, or the U.S. Army Reserve. Completion of the Navy ROTC program leads to a commission as an Officer in the Navy or Marine Corps. All three programs offer monthly stipends, a book allowance and tuition scholarships. Call 412-624-6396 or see <http://www.afrotc.pitt.edu/> for more information on the Air Force ROTC program, 412-624-6197 or see www.rotc.pitt.edu for more information on the Army ROTC program, and 412-268-5109 or <http://www.cmu.edu/nrotc> for more information on the Navy ROTC program.

Study Abroad

Students are encouraged to add an international dimension to their undergraduate education through study abroad. Programs of study exist in almost every corner of the world and will fulfill requirements for almost any field of study. Second language proficiency is not a requirement, as most programs offer courses taught in English. Financial aid and scholarships are available. Interested students should come to the Study Abroad Office in 802 William Pitt Union to discover their many options. Call 412-648-7413 to schedule an Essentials of Study Abroad Session or explore www.abroad.pitt.edu. The Engineering Study Abroad Office is in B-80G Benedum, and the College of Business Administration Study Abroad Office is in 2514 Sennott Square.

Summer Sessions

The University offers a large selection of courses in a variety of compressed sessions throughout the summer. Current students can register through their school. Several summer sessions are offered, see the Academic Calendar.

During the summer term and summer sessions, most students are charged tuition on a per-credit basis regardless of the number of credits taken. See Financial Information. Additional information is available through the Office of University Summer Sessions at 412-383-8600 or www.summer.pitt.edu.

[Summer Edge](#)

The University offers intensive summer programs that provide academic and experiential studies delivered in a small cohort. In summer 2017, these programs are the Edge in Public and Global Health and the Edge in Wyoming. All University of Pittsburgh undergraduate students are eligible to apply. A transcript notation stating completion of the specific program will appear on the student's transcript. For more information including program costs, see <http://www.summeredge.pitt.edu/>.

In the Edge in Public and Global Health (11-12 credits), students learn to analyze and tackle critical world health problems through the integrated application of biological, social, and quantitative sciences. Working individually or in pairs with Public Health faculty, students will have opportunities to experience laboratory, quantitative, policy, or social science research, or field work with community organizations or health agencies. The program is administered through the School of Public Health and is offered over the 12-week summer session.

In the Edge in Wyoming (6 credits), students explore the history and politics of the American West, including issues related to environmental policy. While at the University of Wyoming, students will experience the West and its culture by interacting with local guest speakers and visiting relevant, regional sites. The program is administered through the Dietrich School of Arts and Sciences and is offered during 4-week-2 summer session at the University of Wyoming.

Course Information

Please note, when searching courses by Catalog Number, an asterisk () can be used to return mass results. For instance a Catalog Number search of " 1* " can be entered, returning all 1000-level courses.*

Accounting

BUSACC 0030 - FINANCIAL ACCOUNTING

Minimum Credits: 3

Maximum Credits: 3

Helps students become informed users of firms' external financial accounting reports. The basic structure and contents of such reports and the process by which they are prepared will be studied. Discussion will involve what items are included in financial accounting reports, how such items are measured, and how various economic events affect the reports. An understanding of what can be inferred from the reports about the past performance, present position, and future prospects of the firm will be developed.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ECON 0100 or 0102 or 0103 or 0105 or 0110 or 0115; PROG: College of Business Administration

BUSACC 0040 - MANAGERIAL ACCOUNTING

Minimum Credits: 3

Maximum Credits: 3

Introduces students to the basic terminology and concepts of cost accounting, including product costing, budgetary control, responsibility accounting, and the use of cost information in resource allocation and other managerial decisions. Textbook material and various applications in actual organizations are used to engage students in applying the concepts and methods that have been developed.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: BUSACC 0030 or BUSERV 1920 or CDACCT 6030 or MGMT 0022 or ACCT 0115 or ACCT 0201; PROG: College of Business Administration

BUSACC 1204 - INTERMEDIATE FINANCIAL REPORTING 1

Minimum Credits: 3

Maximum Credits: 3

Covers the conceptual framework of financial accounting and its influence on Generally Accepted Accounting Principles (GAAP), with special emphasis on the valuation of assets and measurement of income.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ:(BUSACC 0030or BUSERV 1920or CDACCT 6030or MGMT 0022or ACCT 0115or ACCT 0201)andCREQ: (BUSACC 0040 or BUSERV 1925 or CDACCT 6040 or MGMT 0023 or ACCT 1100 or ACCT 0202) MINGRADE 'C' For Listed Courses;PROG: UCBA;PLAN:NOT CASBUS-UNKorBUSNB-MN

BUSACC 1205 - INTERMEDIATE FINANCIAL REPORTING 2

Minimum Credits: 3

Maximum Credits: 3

Topics covered include valuation of liabilities, owners' equity, cash flow statements, and disclosure outside the primary financial statements. Like intermediate financial reporting 1, this course also engages students as active participants in the learning process. Required for all accounting majors.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: BUSACC 1204 or CDACCT 6204; PROG: UCBA; PLAN: NOT CASBUS-UNK or BUSNB-MN

BUSACC 1210 - FINANCIAL STATEMENT ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

Financial statement analysis focuses on the evaluation of publicly traded company financial statements and related note disclosures as well as the correlation of this historic financial performance to the company's stock prices. This course will assist students' development of a systematic approach to analyzing reported financial data and understanding the underlying risks and possible inconsistencies among comparative companies. Requirements of the course include interim exams and written and oral presentations of analysis.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: BUSACC 1205 or CDACCT 6205; PROG: UCBA; PLAN: NOT CASBUS-UNK or BUSNB-MN

BUSACC 1216 - ADVANCED FINANCIAL ACCOUNTING

Minimum Credits: 3

Maximum Credits: 3

Covers topics that are of particular interest to financial report preparers and auditors. Special emphasis placed on accounting for business combinations and consolidated financial reporting. Other topics include international accounting, accounting for partnerships, and accounting by fiduciaries. Required for all accounting majors pursuing the CPA track.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: BUSACC 1205 or CDACCT 6205; PROG: UCBA; PLAN: NOT CASBUS-UNK or BUSNB-MN

BUSACC 1221 - STRATEGIC COST MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

Topics covered include how product cost measurement affects resource allocation decisions; how to design modern cost systems; the strategic role of cost information and the relationship between process improvement and cost reduction; performance measurement and organizational transformation for value creation.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (BUSACC 0030 or BUSERV 1920 or CDACCT 6030 or MGMT 0022 or ACCT 0115

or ACCT 0201)and (BUSACC 0040 or BUSERV 1925 or CDACCT 6040 or MGMT 0023 or ACCT 1100 or ACCT 0202) MINGRADE 'C' For Listed Courses;PROG:UCBA;PLAN:NOT CASBUS-UNKorBUSNB-MN

BUSACC 1236 - ACCOUNTING INFORMATION SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

Focuses on the design and implementation of accounting information systems and their ability to: collect data on the activities of an organization, accumulate and summarize the data, and make the information available to managers for analysis, decision-making and control.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (BUSACC 0030or BUSERV 1920or CDACCT 6030or MGMT 0022or ACCT 0115or ACCT 0201)and(BUSACC 0040 orBUSERV 1925 orCDACCT 6040 orMGMT 0023 or ACCT 1110 or ACCT 0202 or ACCT 1303) MINGRADE 'C' For Listed Courses;PROG: UCBA;PLAN: NOT CASBUS-UNK or BUSNB-MN

BUSACC 1238 - AUDITING

Minimum Credits: 3

Maximum Credits: 3

Introduces auditing process and profession. Main topics include nature and purpose of auditing, auditing standards, professional conduct, auditor legal liability and approaches in auditing financial statements. Emphasizes a risk-based approach to selecting appropriate auditing techniques. Examines auditor's decision process relating to internal control assessment, audit decision process relating to internal control assessment, audit sampling and obtaining audit evidence about financial accounts. Examines extent of auditor's responsibility to uncover fraud.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (BUSACC 1205 or CDACCT 6205) and CREQ: (BUSACC 1236 or CDACCT 6236); PROG: UCBA; PLAN: NOT CASBUS-UNK or BUSNB-MN

BUSACC 1242 - TAXES AND DECISION MAKING

Minimum Credits: 3

Maximum Credits: 3

This course provides students with a comprehensive foundation of Federal Income Tax policy and an understanding of how it applies to Individuals, sole proprietorships, partnerships, S-Corps, C-Corps, and property transactions. The course uses a textbook, tax return simulations, chapter examples, and class assignments to help students learn the most important features of the Internal Revenue Code. Students also identify and evaluate the tax issues associated with a variety of business and personal transactions, the tax implications for different taxable entities, and how to calculate the regular federal tax and additional taxes and tax credits associated with these transactions.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: BUSACC 1205 or CDACCT 6205; PROG: UCBA; PLAN: NOT CASBUS-UNK or BUSNB-MN

BUSACC 1245 - VOLUNTEER INCOME TAX ASSISTANCE PROGRAM

Minimum Credits: 3

Maximum Credits: 3

The Volunteer Income Tax Assistance (VITA) program exposes undergraduate and graduate students to the preparation of federal, state, and local tax returns for individuals and families in lower socio-economic circumstances. The course provides training to students related to basic tax return preparation and more complex issues facing this client population, including the availability of government assistance and refundable tax credits.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Satisfactory/No Credit

BUSACC 1250 - SURVEY OF INTERNATIONAL ACCOUNTING ISSUES AND THE IASB

Minimum Credits: 3

Maximum Credits: 3

This financial accounting elective focuses on exposing students to the international accounting standards setting process and the study of the application of international accounting issues in business. Learning will take place through a mix of classroom time as well as experienced based learning opportunities, with each weekly class focused on an accounting issues and a related site visit experience with a company working on the accounting issue. Participation requires a good understanding of the accounting process and an interest in the global business environment.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

BUSACC 1251 - SURVEY OF INTERNATIONAL BUSINESS ISSUES AND THE CITY OF LONDON

Minimum Credits: 3

Maximum Credits: 3

This international business elective focuses on exposing students to challenging business issues in the City of London. Learning will take place through a mix of classroom time as well as experienced-based learning opportunities, with each weekly class focused on a business issue and a related site visit with a company. Participation requires a good understanding of core business concepts and an interest in the global business environment.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

BUSACC 1296 - ACCOUNTING INTERNSHIP

Minimum Credits: 3

Maximum Credits: 3

The accounting internship provides business credits for project assignments that augment a professional accounting work experience.

Academic Career: Undergraduate

Course Component: Internship

Grade Component: Satisfactory/No Credit

Course Requirements: PREQ: BUSACC 1205; PLAN: Accounting, Finance, General Management, Global Management, Marketing, Business Information Systems, Human Resources Management, Supply Chain Management, Undeclared

BUSACC 1298 - ACCOUNTING INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 3

An independent study course for students desiring to pursue in greater depth a specific set of accounting issues or problems to which they have been introduced in other accounting courses. The course involves directed reading and research under the guidance of a full-time faculty member.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Letter Grade

Course Requirements: PREQ: BUSACC 1205; PLAN: Accounting, Finance, General Management, Global Management, Marketing, Business Information Systems, Human Resources Management, Supply Chain Management, Undeclared

Administration of Justice

ADMJ 1210 - JUVENILE DELINQUENCY

Minimum Credits: 3

Maximum Credits: 3

Provides an overview of the field of juvenile delinquency. Topics covered include theories and research on causes of juvenile delinquency; law enforcement practices encountered in attempts to control delinquency; juvenile treatment under law; correctional philosophy and practices in juvenile justice; and impacts of juvenile criminality upon the rest of society. Students emerge from the course with knowledge of causes, prevention, treatment, and control of juvenile delinquency and should be prepared to move into more detailed study of this subject.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Urban Studies

ADMJ 1246 - FINANCING TERRORISM

Minimum Credits: 3

Maximum Credits: 3

The purpose of this course is to provide the student with an understanding of how terrorists and insurgents fund their activities and finance their operations. The course analyzes the relationship between states and non-state actors, U.S. And international responses to terrorist financing, and anti-terror strategies. Selected topics include the political economy of terrorism financing, the 'HAWALA' system, various mechanisms and policy dilemmas associated with terrorism financing, warning indicators, and terrorist organizations' vulnerabilities and inefficiencies.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Aero-Space Studies

AFROTC 0001 - HERITAGE AND VALUES OF UNITED STATES AIR FORCE 1

Minimum Credits: 1

Maximum Credits: 1

AS 100, "Heritage and Values of the United States Air Force," is a survey course designed to introduce students to the United States Air Force and provides an overview of the basic characteristics, missions, and organization of the air force.

Academic Career: Undergraduate

Course Component: Lecture
Grade Component: Letter Grade

AFROTC 0002 - HERITAGE AND VALUE OF US AIR FORCE 2

Minimum Credits: 1

Maximum Credits: 1

This course is the second of a two semester sequence dealing with the U.S. Air force in the contemporary world. The sequence focuses on the basic characteristics of air doctrine; strategic offensive and defense, general purpose, and aerospace support forces; and officer ship.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: LVL: Fr or So

AFROTC 0003 - EVOLUTION OF AIR AND SPACE POWER

Minimum Credits: 1

Maximum Credits: 1

As200 course designed to examine general aspects of air & space power, through historical perspective. Course covers time period from the first balloons & dirigibles to space age global positioning systems of the Persian Gulf War. Historical examples provided to extrapolate development of a capabilities & missions to demonstrate evolution of what has become today's USAF Air & Space Power. Course provides cadets with knowledge level understanding of air & space power from an institutional doctrinal & historical perspective. LLAB mandatory for AFROTC Cadets & complements course.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

AFROTC 0004 - TEAM AND LEADERSHIP 2

Minimum Credits: 1

Maximum Credits: 1

This course is the second of a two semester sequence which surveys the history of air power from balloons and dirigibles through the jet age. It focuses on factors contributing to change in the nature of military conflict; the development of air power and the evolution of air power doctrine and concepts; and the role of technology in the growth of air power.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: LVL: So

AFROTC 0005 - FRESHMAN LEADERSHIP LAB

Minimum Credits: 0

Maximum Credits: 0

The as100 and as200 leadership laboratory courses (LLABS) include a study of air force customs and courtesies, drills and ceremonies, and military commands. The LLAB also includes studying the environment of an air force officer and learning about areas of opportunity available to commissioned officers.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: H/S/U Basis

Course Requirements: LVL: Fr

AFROTC 0006 - SOPHOMORE LEADERSHIP LAB

Minimum Credits: 0

Maximum Credits: 0

The as100 and as200 leadership laboratory courses (LLAB) include a study of air force customs and courtesies, drill and ceremonies, and military commands. The LLAB also includes studying the environment of an air force officer and learning about areas of opportunity available to commissioned officers.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: H/S/U Basis

Course Requirements: LVL: So

AFROTC 0007 - TEAM AND LEADERSHIP 1

Minimum Credits: 1

Maximum Credits: 1

Focuses on laying the foundation for teams and leadership. The topics include skills that will allow cadets to improve their leadership on a personal level and within a team. The courses will prepare cadets for their field training experience where they will be able to put the concepts learned into practice. The purpose is to instill a leadership mindset and to motivate sophomore students to transition from AFROTC cadet to AFROTC officer candidate.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

AFROTC 1005 - JUNIOR LEADERSHIP LAB

Minimum Credits: 0

Maximum Credits: 0

The as300 and as400 LLABS consist of activities classified as leadership and management experiences. They involve the planning and controlling of military activities of the cadet corps, and the preparation of briefings and other oral and written communications. LLABS also include interviews, guidance, and information which will increase the understanding, motivation, and performance of other cadets.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: H/S/U Basis

Course Requirements: LVL: Jr

AFROTC 1006 - SENIOR LEADERSHIP LAB

Minimum Credits: 0

Maximum Credits: 0

The as300 and as400 LLABS consist of activities classified as leadership and management experiences. They involve the planning and controlling of military activities of the cadet corps, and the preparation of briefings and other oral and written communications. LLABS also include interviews, guidance, and information which will increase the understanding, motivation, and performance of other cadets.

Academic Career: Undergraduate

Course Requirements: LVL: Sr

AFROTC 1013 - LEADING PEOPLE AND EFFECTIVE COMMUNICATION 1

Minimum Credits: 3

Maximum Credits: 3

AS 300, "LEADING PEOPLE AND EFFECTIVE COMMUNICATION," teaches cadets advanced skills and knowledge in management and leadership. Special emphasis is placed on enhancing leadership skills and communication. Cadets have an opportunity to try out these leadership and management techniques in a supervised environment as juniors and seniors.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

AFROTC 1014 - LEADING AND COMMUNICATIONS 2

Minimum Credits: 3

Maximum Credits: 3

This is the second of a two-semester integrated management course emphasizing the concepts and skills required by the successful manager and leader. It also includes instruction on communication skills and military ethics. The curriculum encompasses individual motivational and behavioral processes, leadership, communication, and group dynamics within the context of a military organization.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: LVL: Jr

AFROTC 1015 - NATIONAL SECURITY AFFAIRS/PREPARATION FOR ACTIVE DUTY

Minimum Credits: 3

Maximum Credits: 3

AS 400, "NATIONAL SECURITY AFFAIRS/PREPARATION FOR ACTIVE DUTY," is designed for college seniors and gives them the foundation to understand their role as military officers in American society. It is an overview of the complex social and political issues facing the military profession and requires a measure of sophistication commensurate with the senior college level. The final semester provides information that will prepare the cadets for active duty.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

AFROTC 1016 - NATIONAL SECURITY FORCES

Minimum Credits: 3

Maximum Credits: 3

This course is the second of two semester sequence surveying key issues of U.S. National security. The second semester focuses on the soviet union and major regional issues of importance to U.S. National interests. It also includes instruction on the military as a profession, Officership, and the military justice system.

Africana Studies

AFRCNA 0031 - INTRODUCTION TO AFRICANA STUDIES

Minimum Credits: 3

Maximum Credits: 3

This is a survey course for Africana studies. An Afrocentric approach will be used to review the eight basic subject areas of the multidisciplinary focus; black history, black religion, black creative productions, black politics, black economics, black social organizations, black psychology and black education. Two alternative views will be pursued; a theoretical review of the literature and a summation of the practical experiences of black life.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

AFRCNA 0220 - THE BLACK POWER MOVEMENT IN THE U.S. AND BEYOND

Minimum Credits: 3

Maximum Credits: 3

Students in this course will engage in the study of the Black Power Movement in the 1960's and 1970's, within the narrative of Black political and cultural liberation. We will examine the historical roots, major themes, strategies, outcomes, significant Pan-African figures, and the COINTELPRO efforts used by the U.S. government determined to destroy the Black Power Movement. Students will also grapple with the international events that influenced the movement's politics of revolution, which includes the anti-colonial movement in Afrika. This course will shape students understanding of the Black Power vision of liberation and gauge its lasting impact on the Black diaspora today.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

AFRCNA 0242 - AFRICANA URBAN WOMAN

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to literature by African American, Caribbean, and African women writers. Published within the last two decades, the novels in the course detail the lives of female protagonists who learn to adjust to family, educational, economic, and other social changes while navigating urban spaces. Using critical perspectives within Africana Studies, the course teaches students to examine and understand the cultural, historical and theoretical contexts surrounding the literary works. Students will also become more skilled in conducting detailed analyses of literary features, such as voice, language, structure and style, to better comprehend the characters quest for self-fulfillment. In addition to closely reading the texts and providing thorough critiques, students will identify and assess the use of a wide range of real-life themes in the narratives, including structural inequality, immigration, motherhood, gender, identity, crime and violence, to further explore the insight that the readings offer on urban environments and lifestyles.

Academic Career: Undergraduate

AFRCNA 0400 - COVID-19, RACISM AND PUBLIC HEALTH

Minimum Credits: 1

Maximum Credits: 1

This 1- credit course, offered through the Global Studies Center and co-sponsored by the Department of Africana Studies, offers an opportunity for students to learn about the compounding effects of multiple forms of inequality or disadvantage and how they impact COVID-19 exposure, cases, and deaths. The obstacles that inequalities create may not be easily discernible or understood by looking at or thinking about racism, health and now the impact of COVID-19, among African Americans, in a conventional way. You cannot change outcomes without understanding the causes or how they come about. The pandemic has exposed systemic racial inequalities in the U.S. health delivery system.

Why are African American and other minority communities being hit hard by COVID-19? In this class, we will read pertinent literature and discuss racially sensitive issues including what it means to be a minority in the U.S. during a pandemic. We will focus on pre-existing conditions, essential workers, structural inequities, and how social determinants of health are influenced by implicit bias and racial discrimination.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Satisfactory/No Credit

AFRCNA 0434 - PSYCHOLOGICAL EXPERIENCE AFRICAN AMERICAN FEMALE

Minimum Credits: 3

Maximum Credits: 3

The course examines black female behavior from both psych historical and contemporary perspectives. The model for classroom interaction consists of lecture and group discussions by presenting relevant information and/or conducting specific exercises.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Diversity General Ed. Requirement, DSAS Social Science General Ed. Requirement, SCI Polymathic Contexts: Soc/Behav. GE. Req.

AFRCNA 0454 - MAN/WOMAN LITERATURE

Minimum Credits: 3

Maximum Credits: 3

Through prose and poetic works one will note how black men are viewed and characterized by female writers as well as how black women are treated by male writers. The basis for the difference lies in racial and sexual stereotyping in Afro-American literature.

Academic Career: Undergraduate

AFRONA 0586 - EARLY AFRICAN CIVILIZATIONS

Minimum Credits: 3

Maximum Credits: 3

The course surveys the emergence and growth of early African civilization from the beginnings of the evolution of the human race to the eve of the European colonization of the continent. It introduces students to the multiple disciplines contributing to knowledge about early Africa, and shows the centrality of Africa and Africans for humanity in general. Among the principal themes that the readings and discussions focus on are: pre-history of Africa and the genesis of humankind; the complexity of migration, and state formation; and African and European earlier contact. A fundamental approach will be to look at Africa from the inside out and to analyze African societies from the perspective of their internal development and reaction to external influences. Its basic goal is to promote, first, an appreciation of Africa's contributions to world civilization.

AFRCNA 0808 - BLACK LIFE ONSCREEN

Minimum Credits: 3

Maximum Credits: 3

What is a Black film? What is its function? In this course we will examine films made by and/or about Black Americans over the last one hundred years as we attempt to determine the potential applications of style, narrative trope, and production method that could distinguish these works as a specifically marked and marketed body of cinema. As we approach these films, we will site them for critique of the ways Blackness and Americanness are represented in the public imagination. We will address some of the challenges and apparent disparities that float between image culture and economic culture, between aesthetic culture and political culture, as Black American writers, directors, and actors variously render resistance to and acquiescence to sometimes restrictive conventions of race, class, gender, sexuality, and nationality. Moving from D. W. Griffith's *The Birth of a Nation* through to Jordan Peele's *Get Out*, we will conduct a mostly chronological survey of feature-length films and incorporate a range of critical work that directly and indirectly speaks to the central texts. Through a series of conversations and essay projects we will theorize Black

film and investigate whether this designation is useful to certain efforts. We will sound out some ideas about what African American cinema indicates with regard to the agency of production and representation for otherwise marginalized people. And we will consider the increasing significance of this discussion in an era of newer technologies and contemporary policy shifts that inform the modes through which varied Blacknesses are constructed and commodified on a very big screen.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

AFRCNA 0885 - SENEGAL: INTERSECTIONS OF CULTURE, HISTORY, RELIGION & DANCE

Minimum Credits: 3

Maximum Credits: 3

This course will explore the society, customs and cultures of Senegal. Students explore Senegal through Section, cultural immersion, and research. This course will introduce topics such as: family structures, rural and urban realities, religions and beliefs, health, dance and drumming, etc. In addition to Sections, students will have the opportunity to use written documentation as well as films and to take part in field trips and discussion to get a general view on various themes related to Senegalese culture and society.

AFRCNA 1039 - HISTORY OF CARIBBEAN SLAVERY

Minimum Credits: 3

Maximum Credits: 3

Today's sounds and tastes of the Caribbean from reggae and salsa music to dishes like mofongo and jerk chicken have deep historical roots in slavery. The Atlantic slave trade transported over four million Africans to the Caribbean ' eight times the number that arrived in the United States. How did Africans and their descendants persevere under the colonial slave system? How does the legacy of slavery present itself in the 21st century? This course explores these questions by examining the Caribbean from the perspectives of enslaved women and men from the 17th through the 19th centuries, particularly in Cuba, Haiti, and Jamaica, and their contemporary manifestations in films, policies, and national identities

AFRCNA 1201 - GLOBAL DIASPORAS: CONTEMPORARY AFRICAN AND CARIBBEAN MIGRATION

Minimum Credits: 3

Maximum Credits: 3

What do Akon and Rihanna have in common? They are both part of recent diasporas from Africa and the Caribbean. This course focuses on the issues and experiences of people of African descent in contemporary (20th and 21st centuries) migratory diasporas from both Africa and the Caribbean. The course draws on extensive literature on migration, transnationalism, racial and ethnic identity formation, health, and other topics to illuminate the causes for migration and the experiences that migrants have in different host countries. What experiences do migrants from Africa and the Caribbean share? How do their experiences differ? How do migrants define themselves in new host countries? How do they stay connected to their homelands?

AFRCNA 1245 - STUDIO IN AFRICAN AMERICAN POETRY AND POETICS

Minimum Credits: 3

Maximum Credits: 3

Studio in African American Poetry and Poetics is a course in interdisciplinary creating. In this class, we will read, think, and work across genres, mediums, and disciplines, and collapse the walls between presenter and audience, creator and critic, as we work individually and collaboratively toward new modes of making. Dawn Lundy Martin, Co-Director of the Center for African American Poetry and Poetics (CAAPP), has said that "like innovators in tech, we want to be open and inclusive as we generate new ideas about what it means to work in the fields of African American poetry and poetics. This seems especially important in these trying and divisive times." To this end, we are working toward a practice-based poetics, where creating is a way of working through questions to arrive at new ideas. Collaboration, then, the process of creating in partnership, in community, is an expression of the practice of poetics at its most dynamic. In this spirit of collaboration, the Studio will provide students with opportunities to engage with CAAPP's visiting poets and artists in the intimate space of the classroom and to work on CAAPP events.

AFRCNA 1402 - LEARNING PARADIGMS AFRICAN AMERICAN CHILD DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

To examine systemic factors which affect the cultural, social, emotional, and cognitive development of black children.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Diversity General Ed. Requirement

AFRCNA 1410 - TRADITIONAL MEDICINE: HEALTH AND HEALING

Minimum Credits: 3

Maximum Credits: 3

Traditional African Medicine (TAM) is defined as one of the holistic healthcare systems comprised of three levels of

specializations namely divination, spiritualism, and herbalism. Often considered, evil, primitive, witchcraft or sorcery, traditional medicine is still practiced in large parts of the world and is a trusted source of healthcare in those societies. Despite its detractors, traditional medicine is slowly gaining the respect of conventional medical practitioners as its methods and medicines are studied more fully. This course critically examines the topic of Traditional Medicine, the socio- cultural role of healers, the efficacy of healing practices, variation in medical beliefs, changes in beliefs and practices over time and space, and the concept of medical pluralism. This course seeks to demonstrate how Traditional Medicine and Healing is influenced by socio-cultural contexts, and how issues of medical pluralism and cultural change are influenced by social, economic, and political processes.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

AFRCNA 1415 - RELIGION AND RACE

Minimum Credits: 3

Maximum Credits: 3

This course examines the intersections of religion, race, and racism. Recently, scholars of religion have demonstrated that religious identities are often racialized as well. In this course, we will discover that religion and race are both modern categories rooted in post-enlightenment ideas about what it means to be human. We will see how the establishment of these religious and racial categories led to new hierarchies and inequalities. We will discuss how post-enlightenment thinkers linked religion and race, and how their ideas played a role in European imperialism. We will also investigate how the discipline of religious studies has developed its analytical tools with a racialized understanding of religion. The course will examine case studies in which religion has been racialized, and consider the political ramifications of these examples. In particular, we will think about the impact of white supremacy on black religion in the united states, the complicated relationship between antisemitism and Islamophobia, and contemporary Islamophobia in the US. Finally, we will explore the possibilities of anti-racism through faith-based scholarship and activism.

AFRCNA 1418 - FROM VODOU TO SANTERIA: RELIGIONS OF THE WEST AFRICAN DIASPORA

Minimum Credits: 3

Maximum Credits: 3

This course is an introduction to the study of West African Diaspora religions in the Americas. We define "diaspora" as the spread and dispersal of people of African descent both forced and voluntary through the slave trade, imperial and colonial displacements, and postcolonial migrations. In what form do African religious expressions exist in the African Diaspora communities? This course exposes students to the indigenous African foundations of the religious beliefs and religious practices of African communities living in the Diaspora. Students will receive historical, ethnographical, and anthropological approaches to grasp the essence of these non-doctrinaire and non-textual religions focused on a rich memory of African deities, rituals, morality and practices that have been passed from generation to generation.

AFRCNA 1450 - AFRICANA CULTURAL MEMORY

Minimum Credits: 3

Maximum Credits: 3

This course is an interdisciplinary and comparative study of the historiography of Africana cultural memory (manifested through indicators of remembrance, commemoration, cultural identity, and transgenerational goals) and the ways people of African descent conceptualize, manage, interpret, broker, and transmit memory through literary genres (e.g., any stylized and creative product that begins as a text, such as fiction, essay, the short story, drama, poetry, film, and even music). Black cultural mythology translates what society intends when it addresses "memory" more as a collective sense of survivalist "mythology." The complexities of how a culture behaves toward the past, which also influences the present and future, are even more enhanced when a group has survived an era of global oppression. In Africana Studies, the primary critical framework for Africana cultural memory studies is Black cultural mythology, which is a theorization and philosophical consideration of the variables of legendary survival elevated to cyclical remembrance through storytelling and narrative.

Grade Component: Grad LG/SNC Basis

AFRCNA 2990 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 12

Graduate students who are preparing for required exams, such as the comprehensive examination, or who want to pursue an independent program of study, research, or reading with a faculty member may register for AFRCNA 2990. Students must see the Department of Africana Studies for special permission

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad LG/SNC Basis

American Sign Language

ASL 0101 - AMERICAN SIGN LANGUAGE 1

Minimum Credits: 4

Maximum Credits: 4

In this course, students are taught American sign language (ASL) vocabulary and grammatical structures. Students will also learn and ASL fingerspelling system, the use of gestural devices and how to appropriately use the signing space in ASL. Further, students will learn about deaf culture in the United States. Out-of-class participation in deaf community events is required.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

ASL 0102 - AMERICAN SIGN LANGUAGE 2

Minimum Credits: 4

Maximum Credits: 4

Students will learn more difficult vocabulary (signs) and how to use them in one-to-one, small group, and large group communication. Students will also be exposed to classifier constructions. This course is a continuation of ASL I (LING 0471) and it utilizes a similar curriculum.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: LING 0471 or ASL 0101; MIN GRADE: 'C'

Course Attributes: DSAS Second Language General Ed. Requirement

ASL 0103 - AMERICAN SIGN LANGUAGE 3

Minimum Credits: 3

Maximum Credits: 3

This course continues the study of ASL. The students will work on developing intermediate communication skills and will concentrate on production skills. Linguistic and cultural features will be presented in the context of the language learning experiences. This level will also examine and discuss its use and effect on and in the deaf culture.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: LING 0472 or ASL 0102; MIN GRADE: 'C'

Course Attributes: DSAS Second Language General Ed. Requirement

ASL 0104 - AMERICAN SIGN LANGUAGE 4

Minimum Credits: 3

Maximum Credits: 3

This advanced course of ASL concentrates on developing more precise skills and competencies by using appropriate variations of ASL (regional, racial/ethnic, stylistic and age related) vocabulary. Students will also be given the opportunity to use ASL by volunteering in the deaf community.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: LING 0473 or ASL 0103; MIN GRADE: 'C'

Course Attributes: DSAS Second Language General Ed. Requirement

ASL 0105 - AMERICAN SIGN LANGUAGE 5

Minimum Credits: 3

Maximum Credits: 3

This course provides an opportunity for students to formally pursue work on an individual basis. This course also applies knowledge of American Sign Language (ASL) grammar and vocabulary to the description of increasingly complex constructs, processes and situations. Students will: incorporate multiple character role shifting into medium-length stories, narratives and the discussion of hypothetical issues; identify and discuss various controversial issues via debate and presentation; continue to analyze multiple meaning English words and English idioms to express concepts in ASL; have the opportunity to gain knowledge about the Deaf Community as a part of the human diversity including people of color, genders, LGBTQ people, people with disabilities, etc.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: LING 0474 or ASL 0104; MIN GRADE 'C' FOR ALL LISTED COURSES

ASL 0111 - INTRODUCTION TO BRITISH SIGN LANGUAGE

Minimum Credits: 3

Maximum Credits: 3

Students will get a basic introduction to British Sign Language (BSL).

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

ASL 1615 - DEAF CULTURE

Minimum Credits: 3

Maximum Credits: 3

Many deaf people in the U.S. Are united by a language (ASL) that differs from English and a culture with

characteristics that differ from those of the larger hearing society. This culture is known as deaf culture, and students in this course will be introduced to various facets of American deaf culture through readings, videos, and discussions. Students will also explore other deaf cultures throughout the world. Among the course foci are: issues of accessibility, perspectives of deaf versus hearing individuals, and various examples of deaf literature.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: LING 0472 or ASL 0102 (MIN GRADE 'B'); CREQ: LING 0473 or ASL 0103 (MIN GRADE 'B'); PLAN: American Sign Language (ASL-CS1); LEVEL: Junior or Senior

Course Attributes: SCI Polymathic Contexts: Global&Cross Cul GE. Req.

ASL 1625 - THE DEAF AND SOCIETY

Minimum Credits: 3

Maximum Credits: 3

The culture of deaf Americans is distinct from that of mainstream American society. The primary focus of this course is to expose students to the culture of the deaf in the United States and around the world. In addition to teaching students how to interact with the deaf in a culturally appropriate way, the course will help them understand deaf culture as part of human diversity. Among the course foci are: issues of accessibility, perspectives of deaf versus hearing individuals, and various examples of deaf literature.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: SCI Polymathic Contexts: Global&Cross Cul GE. Req.

ASL 1635 - ANALYSES OF ASL LITERATURE

Minimum Credits: 3

Maximum Credits: 3

This course is designed for students to explore and analyze American sign language and American deaf culture through ASL literature. Studying ASL literature is a way to examine the linguistic complexity of ASL as well as explore the deaf community's values and traditions as a minority group and a group to which visual depiction of ideas is highly valued. This course is conducted in ASL.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: LING 0473 or ASL 0103 (MIN GRADE 'B'); CREQ: LING 0474 or ASL 0104 (MIN GRADE 'B') and (LING 1722 or ASL 1615) (MIN GRADE 'B') PLAN: American Sign Language

Course Attributes: DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

ASL 1700 - ASL-BSL COMPARATIVE ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

Students will experience another culture by visiting a country where a different sign language is used. Students will use both their receptive and expressive signing skills to learn about another sign language. Students will learn some BSL, though should not expect to achieve a working fluency. Students will embrace another culture through observation and participation. Students will experience signing with members of the British Deaf community within an educational setting or community setting. Students will learn about differences and similarities between ASL and BSL as well as American Deaf culture and British Deaf culture. Students will improve their signing ability through intensive practice. Students will be voice off during the trip and will demonstrate the ability to behave appropriately within a Deaf culture.

Academic Career: Undergraduate

Course Component: Lecture
Grade Component: Letter Grade
Course Attributes: DSAS Geographic Region General Ed. Requirement

ASL 1705 - STRUCTURE OF SIGN LANGUAGES

Minimum Credits: 3

Maximum Credits: 3

This course will focus on the linguistic structure of sign languages, drawing examples principally, though not exclusively, from American sign language (ASL). It will also highlight similarities and differences between sign languages and spoken languages. In addition to structural features, the course will cover mechanisms unique to visual/spatial languages, the use of the face and body for grammatical signals, language variation, and acquisition of sign languages.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: LING 1000 or CSD 1020

ASL 1715 - STRUCTURE OF ASL AND ENGLISH

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: LING 0473 or ASL 0103 (MIN GRADE 'B') and (LING 1000 or CSD 1020); CREQ: LING 0474 (MIN GRADE: 'B'); PLAN: American Sign Language

ASL 1725 - SOCIOLINGUISTICS OF SIGN LANGUAGE

Minimum Credits: 3

Maximum Credits: 3

There are various sociolinguistic topics that one must consider with respect to signed languages of the deaf. Regarding language contact, ambient languages-either signed or spoken-influence a signed language. Less than 10% of deaf people are exposed to signed language from birth, which results in unique phenomena. Additionally, signed languages exhibit variation based on a myriad of social and geographical factors. These topics, in addition to language planning and language policy, will be addressed in this course.

Anthropology

ANTH 0112 - TOURISM

Minimum Credits: 3

Maximum Credits: 3

This is a course designed to introduce the students to the many facets of the world's largest industry, tourism. The approach is multidisciplinary focusing on such issues as work and leisure, tradition and modernity, growth and pollution, security and terrorism, privilege and servitude.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

ANTH 0501 - ARCHEOLOGY: AN OVERVIEW

Minimum Credits: 3

Maximum Credits: 3

Designed for non-majors, this course presents a broad introduction to the goals and techniques of today's archeology through readings, videos, and short exercises. The course reviews global human prehistory from the earliest appearances of human ancestors some 4 million years ago through the development of the Ancient Egyptian, Mayan, Chinese, and Inca Civilizations.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Social Science General Ed. Requirement, SCI Polymathic Contexts: Soc/Behav. GE. Req.

ANTH 0534 - PREHISTORIC FOUNDATIONS OF EUROPEAN CIVILIZATION

Minimum Credits: 3

Maximum Credits: 3

Neanderthals, ice-age art, Indo-European languages, Stonehenge, megaliths, Celts, and more; the major archeological discoveries, from the first traces of human occupation of European soil up to the early middle ages, will be covered through illustrated lectures, films, and perhaps museum visits. Course also offers a basic introduction to the discipline of archeology, thus serving as preparation for other courses in the subject; it also serves as a useful foundation for studies in history, ethnic history, art history, and classics.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Geographic Region General Ed. Requirement, DSAS Historical Analysis General Ed. ANTH 0536 - MESOAMERICA BEFORE CORTEZ

Minimum Credits: 3

Maximum Credits: 3

When Cortez and his Spanish soldiers arrived in Mexico, they found Indians living in large cities with impressive temples raised on tall pyramids, lavish palaces for rulers, elaborate markets, and skilled craftsmen working in gold, copper, feathers, stone, pottery, and other materials. They were astonished at a civilization so like their own and yet so different (so "barbaric" to European eyes). This course explores the development of this civilization back to its roots several thousand years ago, by reconstructing earlier cultures known only from archeological evidence.

Academic Career: Undergraduate

Course Attributes: DSAS Geographic Region General Ed. Requirement, DSAS Historical Analysis General Ed. Requirement, DSAS Social Science General Ed. Requirement, Latin American Studies, Medieval & Renaissance Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Contexts: Soc/Behav. GE. Req.

ANTH 0538 - THE ARCHEOLOGIST LOOKS AT DEATH

Minimum Credits: 3

Maximum Credits: 3

Pyramids, tombs, burial mounds, graves, skeletons, mummies; the stuff of gothic romance. But the way people disposed of their dead also tells us an amazing amount about life in the past. We will look at the wide range of burial practices in the world, including the "American way of death", and then concentrate on the physical remains themselves. What do burial practices indicate as to beliefs, rituals, religion and society?

Academic Career: Undergraduate

Grade Component: LG/SNC Elective Basis

Course Attributes: Asian Studies, DSAS Geographic Region General Ed. Requirement, DSAS Social Science General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Contexts: Soc/Behav. GE. Req.

ANTH 0582 - INTRODUCTION TO ARCHEOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course serves as an introduction to the discipline and methods of contemporary archaeology, interwoven with a brief survey of some of the most important turning points in the long human past. Lectures address archaeological methods for field and lab research, and cover selected theoretical questions in modern archaeology. Specific examples from sites around the world are used to illustrate these topics.

Course Attributes: DSAS Cross-Cult. Awareness General Ed. Requirement, DSAS Historical Analysis General Ed. Requirement, DSAS Social Science General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Contexts: Soc/Behav. GE. Req.

ANTH 0601 - PHYSICAL ANTHROPOLOGY: OVERVIEW

Minimum Credits: 3

Maximum Credits: 3

Designed for undergraduate non-majors, this course will provide a basic introduction to the issues, theories, and methods of physical anthropology. Beginning with a consideration of evolutionary, genetic and geologic principles, the course goes on to consider the diversity of fossil and extant primates, including humans. Issues in anatomy, paleontology and behavior will all be addressed.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

ANTH 0620 - BIOCULTURAL ANTHROPOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course considers what it means to be human by examining the relationships between biology, culture and environment in both present and past human populations. Topics of discussion are grounded in the human adaptability paradigm, which examines human populations' behavioral, physiological, developmental, epigenetic, and genetic adaptations to environmental stressors. Topics include human diet, ecology, life course, adaptations to extreme environments, health and medicine, sport, natural/supernatural, and postmortem interventions. An understanding and appreciation of human biological and cultural variation are stressed.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Social Science General Ed. Requirement, Global Studies, SCI Polymathic Contexts: Soc/Behav. GE. Req.

ANTH 0630 - FORENSIC ANTHROPOLOGY: AN INTRODUCTION

Minimum Credits: 3

Maximum Credits: 3

Forensic anthropology is a specialized subfield of biological anthropology that applies anthropological method and theory to recover and identify humans within a medicolegal context. In this class we begin with the bare bones of forensic anthropology to acquire a foundational knowledge of human osteology and analytical methods required to develop an osteobiographical profile. We will examine unique identification markers, trauma patterns and common pathological conditions visible on skeletal remains that aid in an individual's identification. Current methods of recovery, excavation, processing and unique specializations will be introduced.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req.

ANTH 0680 - INTRODUCTION TO BIOLOGICAL ANTHROPOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course is designed to introduce the undergraduate to the issues, theories and methods of biological anthropology. Beginning with a consideration of evolutionary, genetic and geologic principles, the course goes on to consider, the diversity of fossil and extant primates, including humans. Issues in anatomy, paleontology and behavior will all be addressed.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req.

ANTH 0681 - INTRODUCTION TO HUMAN EVOLUTION

Minimum Credits: 3

Maximum Credits: 3

This is an introduction to human evolution and, in general, the evolution of the larger group to which we belong, the order primates. We will survey first the development of evolutionary ideas and modern developments in biology and geology and then review the diversity of living and fossil primates, dwelling especially on the discoveries and controversies surrounding our own evolutionary past.

Course Attributes: DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req.

ANTH 0700 - CLIMATE CHANGE AND CONSERVATION: LESSONS FROM THE GLOBAL SOUTH

Minimum Credits: 3

Maximum Credits: 3

Focused on examples of environmental problems, conservation projects, and development schemes in Asia, Africa and Latin America, this course is designed to prepare students for an intensive summer study abroad program From the Himalaya to the Andes. This course has no prerequisites and is open to all students. Students enrolled in this class will be given priority admission to the summer program, but enrollment in the summer program is not a requirement for taking this class. Anthropogenic changes to the environment that have accelerated rapidly following 19th century

industrialization, the colonial extraction of raw materials for infrastructure and energy production - iron, coal, oil - and intensive investments in modernization worldwide during the 20th century are directly linked to climate change, extinction, and pollution on a global scale. Formerly colonized regions of the world have been most severely affected. At the same time, some of the most important lessons for understanding the value of biodiversity, sustainable development, frugal innovation and the equitable distribution of increasingly scarce resources can be learned by studying experiments, policies and investments in conservation from Asia, Africa, and Latin America. The goal of this course is to learn from the success and failures of these efforts in order to understand the "nature" of the Anthropocene as a global problem with local solutions that involve people making radical changes that extend from their way of thinking to the social and cultural institutions they create and control. The course is innovatively interdisciplinary, reflecting contemporary anthropological methods and theory. It is creatively structured around a series of public guest lectures given by leading, internationally recognized scholars representing a spectrum of disciplines. The class will meet twice a week, once for a lecture and once for a seminar discussion focused on reading assignments chosen to highlight anthropological problems, questions and analytical perspectives that relate to the weekly guest lecture. The course will be offered every spring term with funding for the guest lectures provided by the Asian Studies Center.

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

ANTH 0701 - CULTURAL ANTHROPOLOGY: OVERVIEW

Minimum Credits: 3

Maximum Credits: 3

Designed for undergraduate non-majors, this course will provide a broad introduction to cultural anthropology. This course examines the behavior and customs of peoples throughout the world and considers what it means to be human. We will consider patterns of marriage, family organization, gender, political behavior, economic systems, rituals, etc., of other peoples and compare these with American social patterns.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

ANTH 0710 - SPECIAL TOPICS IN CULTURAL ANTHROPOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course will be on a topic in the area of specialization of a visiting scholar yet to be determined.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Asian Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

ANTH 0711 - THE INTRODUCTION TO THE ANTHROPOLOGY OF SPORT

Minimum Credits: 3

Maximum Credits: 3

Sport captures the minds and money of billions of people everyday, the Olympics, World Cup Soccer, American College Football, and Little League World Series. Television, radio, cell phones, internet keep us updated on the latest scores, highlights and goings on of our favorite and least favorite athletic personalities. Yet despite its overwhelming significance in everyday life it goes largely ignored in Anthropological discussions. This course serves to introduce students to the significance and centrality of sport in understanding and interpreting social life. Sport will be critically examined through major anthropological categories of race, class, ethnicity, gender and power. We will be using sport as the focal point with which to examine varying attitudes, institutions and social dynamics. This will not be a history of sport nor will it be a cross-cultural comparison of different kinds of sport from around the world but rather this

course will seek to demonstrate to you how sport figures into the shaping of our worldview and structuring of social institutions.

Academic Career: Undergraduate

Course Component: Lecture

ANTH 0714 - ASIA NOW LANGUAGE TRAILER

Minimum Credits: 1

Maximum Credits: 1

This is a one-credit language trailer course connected to ANTH 0713 Asia Now. Asia Now is a hybrid lecture series/seminar course, with a series of weekly public guest lectures every Monday followed by weekly seminar discussion on Wednesday. The additional language trailer course meets once a week for one hour to provide instruction in a target Asian language (Japanese, Korean or Chinese). Students with intermediate and advanced aptitude in the target language meet for one hour to improve their language competency by discussing topics covered in lectures and reading assignments in 0713.

Academic Career: Undergraduate

Grade Component: LG/SNC Elective Basis

ANTH 0715 - ANTHROPOLOGY OF LATIN AMERICA

Minimum Credits: 3

Maximum Credits: 3

The purpose of this course is to offer students a basic yet comprehensive survey of the anthropology (including history, archeology and geography) of Latin America. This survey course will emphasize the development of Latin American societies and cultures since the European conquest, and focus on key issues/themes that have consistently surfaced in Latin American cultural anthropology and that have continuing priority, relevance and interest up to the present. This course is especially tailored to freshmen students with little or no knowledge of Latin America.

Academic Career: Undergraduate

Course Attributes: DSAS Cross-Cult. Awareness General Ed. Requirement, DSAS Social Science General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Contexts: Soc/Behav. GE. Req.

ANTH 0718 - PEOPLES AND CULTURES OF THE CARIBBEAN

Minimum Credits: 3

Maximum Credits: 3

The Caribbean region is one of the most diverse regions in the world. It has historically been a center of modernity and cultural exchange and is now at the forefront of climate change and disaster. The region has thus been an essential area for anthropological study, offering valuable insights into cultural diversity, human adaptation, and social change at a local and global level. This introductory anthropology course centers on the Caribbean, examining its colonial and post-colonial periods. It delves into the impact of Indigenous dispossession, trans-Atlantic chattel slavery, and the plantation system on the development of Caribbean societies. The course also explores Caribbean resistance to European colonialism and imperialism, emphasizing marronage and the Haitian Revolution. Throughout the course, we will analyze contemporary Caribbean cultural expressions such as music, dance, religion, and Carnival using various ethnographic sources. Furthermore, we will investigate how climate change and disaster affect the futures of the Caribbean region. Ultimately, the course aims to demonstrate how the Caribbean informs anthropological theory and how anthropology shapes our understanding of the region.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Letter Grade

ANTH 0730 - HIMALAYAN GEOGRAPHY

Minimum Credits: 3

Maximum Credits: 3

The Himalayan region is characterized by a tremendous range of social and cultural diversity that corresponds to climatic, ecological and geographical variation, as well as local and regional geopolitical factors. Historical change from the emergence of early forms of social complexity centered on chiefs and their forts ' from which the regional designation of 'Garhwali' takes its name ' through the development of kingdoms and larger polities shows the intimate link between geography, environment and socio-political transformation. Similarly, local language patterns, regional religious practices, musical styles, mythology, food culture, sartorial fashion, architectural design, agricultural and transportation technologies and engineering and trade networks have all been shaped by the structure of Mountain barriers, bounded valley communities and bracketed lines of communication that follow river systems. Whereas the political economy of the Himalayas has been structured around agricultural production, and the development of elaborate field terrace systems, there have also been subsidiary economies centered on trans-Himalayan trade and pilgrimage as well as pastoral nomadism and transhumance. Since the colonial period, the Himalayas have increasingly become a place for rest, relaxation, tourism and adventure, and this ' along with further political transformations since Indian independence ' has led to the rapid development of urban areas. This course will provide a survey of Himalayan history, society and culture with a focus on the relationship among nature, the environment and geography.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Geographic Region General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

ANTH 0768 - ANTHROPOLOGY OF GENDER AND SEXUALITY

Minimum Credits: 3

Maximum Credits: 3

This course surveys current trends in the anthropology of gender and sexuality. Across a diversity of cultural settings, we will read and watch documentary films about how gender and sexuality are harnessed for projects of self-determination, economic advancement, or survival, belonging, or exclusion. We will discuss topics such as the role of gender and sexuality in conceptualizing and practicing kinship, reproduction, and marriage; the struggles of sexual minorities (e.g., hijras in India, transgender sex workers in Chicago, BDSM practitioners in San Francisco, and Filipino gay men in the diaspora) to question and reconfigure normative conceptions of gender and sexuality. In covering topics, such as reproduction, marriage, surrogacy, and sex work, we will critically assess the hegemony of the male/female binarism and examine how it serves capitalist growth strategies.

Academic Career: Undergraduate

Course Component: Seminar

ANTH 1335 - GLOBALIZATION

Minimum Credits: 3

Maximum Credits: 3

This course provides an overview of the economic, social, technological, environmental, and ideological impacts of globalization on national communities, with an emphasis on the cultural and political dynamics of the process. Student research and oral presentation skills are emphasized.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

ANTH 1441 - FIELD METHODS IN LINGUISTICS

Minimum Credits: 3

Maximum Credits: 4

This course is meant to simulate the experience of linguistic field work, and raise awareness about the effectiveness of specific interview techniques for acquiring linguistic data. The course will give instruction and experience in eliciting

data from a speaker of non (indo) European language. Students will undertake the investigation of the phonology, some aspect of grammar, and the ethnosemantic study of a taxonomically structured semantic field such as plants or animals. Students will make detailed elicitation plans in advance of their administration.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: LG/SNC Elective Basis

Course Requirements: CREQ: LING 1578 and 1773 and 1777; LVL: Sr

ANTH 1447 - LANGUAGE, CULTURE, AND SOCIETY

Minimum Credits: 3

Maximum Credits: 3

How does our speech impact who we are? How does who we are influence how we speak? What, in other words, is the relationship between language, culture, and society? This course explores these questions starting from the assumption that language use is cultural practice and social action. Issues explored through the lens of language include power and identity; race, class, and gender; semiotics; ideologies of monolingualism and multilingualism; socialization; and many others. Linguistic anthropology offers powerful methodological and analytical tools to explain emergent social realities, exposing underlying processes and ideologies that organize society and culture.

Course Attributes: DSAS Social Science General Ed. Requirement, MCSI - Sustainability Focused, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

ANTH 1501 - ARCHAEOBOTANY LAB METHODS

Minimum Credits: 3

Maximum Credits: 3

This class introduces you to the objectives, methodologies, and applications of archaeobotany and provides you with hands-on experience working with plant remains found in archaeological sites. Archaeobotanists study plant remains to understand how ancient people interacted with their surroundings, sustained themselves, and used food to express social and political relationships. This course is designed as a practical laboratory experience, where each week, you will participate in seminars and laboratory sessions to develop the necessary skills for independent archaeobotanical research. We will analyze macrobotanical remains such as seeds, nuts, wood, and other tissues, which are often visible under low-powered microscopes. Students will learn basic identification skills, create a comparative collection, and analyze archaeobotanical samples from an archaeological site. In addition to sorting the samples, we will analyze the data, prepare interpretive reports, and discuss the results of our analyses.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

ANTH 1505 - ENVIRONMENTAL ARCHAEOLOGY

Minimum Credits: 3

Maximum Credits: 3

This class is a survey of the fast-developing field of Environmental Archaeology, which integrates a wide array of earth, biological, and social sciences. Environmental archaeologists apply techniques and insights obtained from all these fields to address questions about how human societies interacted with their environments in the past, and vice versa. The overall goal of the course is to promote understanding of the vital interplay between human societies, with their diverse systems of belief and cultural practices, and the natural environment. Throughout the course, students will engage with theoretical approaches to address these issues, and will also learn to apply an array of methods to collect environmental data to address research questions about human-environmental interactions. Key topics for discussion include human responses to climate change, agricultural systems, resilience and collapse, and epidemics and disease, among others. This course also focuses on developing skills to communicate the results of Environmental Archaeological research to both archaeological and public audiences.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

ANTH 1511 - PALEOKITCHEN

Minimum Credits: 3

Maximum Credits: 3

Animals feed. People eat. For all humans, eating is a profoundly cultural experience, everywhere expressive of sociality and worldview and linked to complex and deeply ingrained notions of the appropriate. But when and how did eating become so? This course examines foodways from the earliest hominids of 2 million years ago through the cuisines of some of the great civilizations of the ancient world. Taking a social perspective, we explore broad questions central to understanding eating: (1) What is the basis for human food choices, now and in the past? (2) How did broad shifts in the past, such as the development of agriculture or social inequality, shape foodways? (3) How have social roles, dynamics, and worldviews found expression in the food practices of past cultures? To address these issues, we will explore the human foodways from various evolutionary, physiological, and cultural viewpoints, highlighted by information from the best archaeological case studies. Topics that will be covered include current debates over hominid diet; the nature of the first cooking; what is great about beer; archaeological techniques for reconstructing subsistence and cooking patterns; the development of food preparation spaces (kitchens); gender roles in foodways; meaning in commensality and feasting; and will compare the nature of ancient cuisines (including those of the civilizations of the ancient Middle East, South America, Africa, and South Asia, and China. Ultimately, we will see how the subject of ancient eating can provide important insights into some of the most fundamental issues in anthropology: nature vs. culture, causal forces in evolution, the relationship between social organization, daily activities and ideology, the expressions of choices in everyday life, and the manner in which people become enculturated, form identities, and relate to one another, to nature, and to the cosmos.

Academic Career: Undergraduate

ANTH 1514 - ALCOHOL IN THE ANCIENT WORLD

Minimum Credits: 3

Maximum Credits: 3

From the earliest experiments with fermentation during the Neolithic, to the elaborate drinking cultures of East Asia, Mesoamerica, and the Classical world, alcohol has infused social life for thousands of years. This seminar introduces the production and consumption of beer, wine, and other fermented beverages across the ancient world an exceptionally potent form of material culture that was embedded within complex webs of social, political, economic, and ritual activity. Using alcohol as a comparative framework, we will explore a wide range of source material - artifactual remains, artistic representations, written evidence, ethnographic accounts, and experimental archaeology - to piece

together evidence for the places where alcoholic beverages were made, as well as the technologies and techniques employed in their production. As far as possible, we will consider the beverages themselves - their tastes, textures, and alcohol content - and their effects on imbibers. We will also examine the broader context of consumption including the places, events, and symbolically loaded occasions where beer, wine, and other beverages were consumed.

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

ANTH 1515 - LITHIC ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

For roughly 3 million years before the use of metals, human populations relied on making and using stone tools to survive-and thrive- in environments all over the world. Stone tools both compose a huge percentage of the archaeological record and serve as a direct reflection of human activities, making their analysis fundamental to studying the past. This course engages students with the methods archaeologists use to identify stone tools and to extract behavioral information from them. We will examine knapping mechanics, raw material economy, mobility, technological strategies, tool use, and discard behavior. Students learn how to identify the stone tools that characterize major prehistoric periods and discuss controversies about stone tools' role in human evolution, behavioral complexity, origins of agriculture, and craft specialization. By combining hands-on replication experiments, lab analysis, and discussion, students will learn everything necessary to carry out stone tool analysis.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

ANTH 1516 - SPECIAL TOPICS IN ARCHAEOLOGY GEOPHYSICS

Minimum Credits: 1

Maximum Credits: 1

This course provides a general introduction to common methods of geophysical prospection being used within archaeology. Classroom lectures will be provided on: (i) integration of geophysics as a tool within broader research programs, (ii) background theory on the methods and their use in field research (fluxgate gradiometry, earth resistance, gpr, magnetic susceptibility, electrical conductivity), and (iii) opportunity to process and interpret actual geophysics datasets. Hands-on training in geophysics survey also will be provided through practical field sessions including: fluxgate gradiometry, earth resistance, and magnetic susceptibility.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: Satisfactory/No Credit

ANTH 1524 - CHINESE ARCHAEOLOGY

Minimum Credits: 3

Maximum Credits: 3

An introduction to Chinese Archeology from the earliest known beginnings through the Han Civilization of the second century A.D. Attention will be given to innovations of people in this part of the world -- the agricultural beginnings, the first cities and states, the formation of an empire. Emphasis will be placed on such topics as the role of archeology in the study of history and art as well as in understanding china today.

Maximum Credits: 3

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

ANTH 1528 - SOUTH AMERICAN ARCHAEOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course deals with cultural development in South America from 20,000 B.C. To Spanish contact. Emphasis will be placed on the earliest evidence for man, maritime adaptations, and origins of agriculture, rise of the state in the Central Andes and the rise of complex societies in the tropical forest. Stress will be placed on the evolution of Andean states including the origins and spread of the Chavin, Moche, Nasca, Tiahuanco, Chimu and Inca Empires.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

ANTH 1529 - AFRICAN ARCHAEOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course engages with the diverse experiences that shaped the African continent and its people from our earliest ancestors to the colonial era. We will use foundational studies, new discoveries, and innovative theoretical approaches to critically examine models and assumptions about food systems, routes to complexity and empire, hierarchy, climate resilience and colonial encounters across Africa. Insights from the past are applied to discussions of modern issues across the continent that intersect with archaeology, heritage management, and decolonization efforts.

ANTH 1534 - ARCHEOLOGICAL DATA ANALYSIS 1

Minimum Credits: 4

Maximum Credits: 4

An introduction to quantitative data analysis in archeology, this course covers basic principles of statistics, including exploratory analysis of batches, sampling, significance, t tests, analysis of variance, regression, chi-square, and estimating universe means and proportions from samples. The approach is practical, concentrating on understanding these principles so as to put them to work effectively in analyzing archeological data. Much of the statistical work is done by computer.

ANTH 1544 - ANCIENT CIVILIZATIONS

Minimum Credits: 3

Maximum Credits: 3

This course examines the rise and fall of several ancient civilizations. It covers the archaeology and earliest history of regions recognized as significant independent centers for the development of early civilization: Mesopotamia, Egypt, Indus Valley, China, South East Asia, MesoAmerica, and Andean South America. Central themes concern: why and how civilizations first emerge and then collapse; relationships among economic, political, social, and ideological factors in early civilizations; generic versus unique qualities of different early civilizations.

Grade Component: LG/SNC Elective Basis

ANTH 1548 - AMAZONIAN ARTS: MAKING AND MEANING

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to the arts of the Amazonian region in the context of their function and meaning. The course will be taught as a combination of lecture and hands-on experience working with native potters from the Bobonaza river. Students will learn to make pottery in the Kichwa (Quichua) tradition, and to understand the role of pottery and material culture in the daily lives of people in this region. On a number of occasions, students will accompany the native potters on journeys into the adjacent forest to gather materials and to study the patterns in nature that inspire them. Here students will observe related arts such as face paint patterns, beaded ornaments, ritual singing and storytelling. Carefully selected readings and lectures will use these arts as a window for exploring Amazonian thinking about the natural world behind the designs, and the ways in which the designs can be used to understand patterns of social interaction. Interviews with potters will aid in understanding these arts in the context of daily and ceremonial life. In the process, the arts become a doorway allowing the student to explore Amazonian culture and environment first hand. Comparative material from several other world regions will also be discussed.

Academic Career: Undergraduate

Grade Component: Letter Grade

ANTH 1549 - WARFARE IN ARCHAEOLOGY AND ETHNOGRAPHY

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: Writing Intensive Course (WRIT)

ANTH 1550 - ETHNOGRAPHY OF SPORT

Minimum Credits: 3

Maximum Credits: 3

This course will equip students with the fundamentals of qualitative research practices applied in the social spaces associated with Sport. Students will learn and appreciate the social complexity of sporting worlds as sites for ethnographic research but also anthropological theorizing on the human experience. Sport offers a lot to anthropological discourse because it is both part of the mundane but also highly ritualized. In this course students will have an opportunity to research the global and cross-cultural impact of sport and its impact on local social life, institutions and processes. Following the work of activist anthropology this course will teach students that "critical engagement brought about by activist research is both necessary and productive. [An activist research practice] allows us to merge cultural critique with political action to produce knowledge that is empirically grounded, theoretically valuable, and ethically viable." (Speed 2006). Students will explore sporting worlds in terms of relationships of power, political and social inequity and social action. This course will explore major conceptual work on the role and ethical responsibility of anthropological research and social justice issues. Students will be required to participate in methodological exercises that will require engagement on site during the program. This course will be taught as part of the Pitt at the Women's World Cup Summer Study Abroad Program in Australia.

Academic Career: Undergraduate

Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1551 - GIS IN ARCHAEOLOGY

Minimum Credits: 3

Maximum Credits: 3

This is a "lab" class in GIS (Geographic Information Systems), specifically designed for students interested in archaeology. The course covers the basic background and skills necessary to manage and analyze spatial datasets in archaeology using GIS. We will cover all the basics that any introductory GIS class would cover (and more); however, we will especially emphasize the techniques that are most useful to archaeologists, such as field data acquisition, spatial queries, georeferencing, working with distance, working with DEMs (Digital Elevation Models), and cost-distance and visibility analysis. Over the semester, students will get substantial hands-on practice applying these skills to manage real archaeological data and investigate past social processes in space, especially at the regional scale.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: LG/SNC Elective Basis

ANTH 1552 - A HISTORY OF ANTHROPOLOGICAL THOUGHT

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Attributes: DSAS Social Science General Ed. Requirement

ANTH 1556 - ZOOARCHAEOLOGY

Minimum Credits: 4

Maximum Credits: 4

Animal remains are often some of the most frequently encountered material remains recovered from archaeological sites and therefore provide crucial information relating to subsistence strategies, animal husbandry patterns, paleoenvironments and a wide range of other human behaviors. This course provides an introduction to the main elements of Zooarchaeology research and will focus on the recovery, identification and contextual analysis of animal remains. The course will provide both laboratory training as well as seminar discussions in order to evaluate the significance of Zooarchaeology within archaeological research. Participants will therefore have the opportunity to gain practical laboratory skills in identification and analysis and to learn how this information can be applied to the study of complex societies in both the Old and New World.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req., Undergraduate Research

ANTH 1557 - ARCHAEOLOGY OF RUSSIA, CENTRAL ASIA, AND MONGOLIA

Minimum Credits: 3

Maximum Credits: 3

This course provides an overview of key prehistoric and early historic developments that occurred in Northern Eurasia within the territories formerly controlled by the Soviet Union. The aim of the course is not to provide an exhaustive culture history of this vast region but instead to focus on several themes that are important both regionally and within

world prehistory. This will include the early peopling of Eurasia, early evidence of animal and plant domestication in the Neolithic, the emergence of Indo-European languages, innovations in metallurgy and the rise of complex societies in the Bronze and Iron Age periods, and the impact of early nomadic states and empires. The course will cover a vast period, stretching from the Paleolithic to the Mongol Empire of the 13th century AD. The primary focus of the course will be on evaluating the main lines of archaeological evidence in order to interpret and understand key cultural, economic, technological and ideological developments noted above. The course also will examine the substantial role that the discipline of archaeology and interpretations of the past played within larger social and political discourse during the Soviet Period and since its collapse in 1991. This course will appeal to students interested in comparative studies of Old World archaeology as well as cultural and historical studies of Russia, Central Asia and Mongolia.

Academic Career: Undergraduate

ANTH 1560 - POLITICS IN PREHISTORY

Minimum Credits: 3

Maximum Credits: 3

This course covers some of the ways that anthropological archaeologists have thought about and investigated power, politics, competition and prestige in the human past. It is designed as an upper-level writing-intensive seminar (W-course) that is especially appropriate for Anthropology majors. Central themes include equality and inequality in the deep past; the origins of unequal power relationships and early "complex societies"; political negotiations between men and women, rulers and subjects, colonizers and colonized, and different factions; and the role of legitimacy, religion, wealth, and coercion. We will also touch briefly on the relevance of archaeology to the Western tradition of political thought, and the contemporary politics of archaeology. Course readings include a variety of ethnographic and archaeological case studies as well as programmatic writing in archaeology.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

ANTH 1565 - ARCHAEOLOGY OF FOODWAYS

Minimum Credits: 3

Maximum Credits: 3

What counts as food? Food is a universal requirement for humans to survive. Although universal, different cultures across the globe have developed cuisines that are diverse in forms, tastes, and meanings. Beyond production and sustenance, the acts of cooking, eating, and drinking bind people together through symbolism, shared experiences, and status. Through both inclusionary and exclusionary strategies, food and drink serve to define identity, strengthen social bonds, and enact memory. In this course, we will learn about the origins of cooking over 1 million years ago, the 'real' Paleodiet, how early states used beer to cement social alliances, and how Columbus's discovery of the Americas spurred global-scale shifts in food and agriculture. The course begins with an overview of how anthropologists and archaeologists study food and then moves through time, beginning with our early hominid ancestors and ending with colonialism.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

ANTH 1570 - MOLECULAR ARCHAEOLOGY

Minimum Credits: 3

Maximum Credits: 3

A. An array of methodological and theoretical developments within anthropology and isotope geochemistry have promoted the use of stable isotope analysis in archaeology and biological anthropology. Isotopic analyses have brought to light new ways of seeing the past, over-turned old theories, and reopened debates that were once thought to be settled. This course will introduce you to a variety data collection and analytical methods in archaeological geochemistry, both in theory and practice. Throughout the semester, hands-on workshops will cultivate your ability to apply these techniques to a range of topics about chronology, paleodietary reconstruction, movement and migration, and trace element characterization of material culture, among others. Class meetings will also focus on discussions about the advantages and limitations of different methodological applications, and we will engage in debates so you can critically evaluate the strengths and weaknesses of particular case studies. By the end of the seminar, you will have a good idea of how you can creatively apply different isotopic or elemental methods to answer your own research questions.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ANTH 0582

ANTH 1575 - UNRAVELING THE ANTHROPOCENE

Minimum Credits: 3

Maximum Credits: 3

Our current moment in planetary history is one in which Earth's environmental systems are dominated by humans. Scientific consensus is that this period - called the Anthropocene - can (and should) be distinguished from what went before and what will come after. Still debated, however, are questions about the timing, nature, and outcomes of the Anthropocene. This course offers a critical introduction the Anthropocene, and explores the ways that archaeology offers insights into interactions between human societies and their environments. We will cover the underlying theoretical issues, survey the methodologies employed, and critically examine cross-cultural narratives about past human-environment interactions that archaeologists produce. Drawing on these conceptual tools, we will examine debates about the origins and antiquity of the Anthropocene, its identification in the archaeological record, and the uses of the concept by in the present. Finally, we will use our discussions about the Anthropocene to answer important question facing humanity today: How sustainable are the current ecologies of this planet? What kinds of changes can we expect in our own lifetimes?

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

ANTH 1576 - ARCHAEOLOGY OF ANCIENT EGYPT

Minimum Credits: 3

Maximum Credits: 3

This course surveys the contributions of archaeology and archaeological sciences to our understanding of the history of Ancient Egypt. We will assess how the interplay of climate and environmental change, food production, political and religious institutions, trade, and warfare shaped cultural and economic change from earliest archaeology of the region through the Medieval period. Together, we will address archaeological discoveries and innovative analyses that have led to new insights into the lives of the most famous rulers, commoners, workers, and marginalized communities under Egyptian rule. Monumental architecture, artistic achievements, and charismatic "treasures" that define popular conceptions of Egypt will be placed in their cultural context, emphasizing the dynamic nature of political and social relations through Egyptian history. Finally, we will examine colonial influence through the history of Egyptology, cultural heritage issues, debates over artifact repatriation, and the impacts of pseudoscience.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

ANTH 1590 - ARCHAEOLOGY OF ISRAEL-PALESTINE

Minimum Credits: 3

Maximum Credits: 3

Is archaeology in a place like Israel-Palestine an objective science? In this course, we explore how past and present are linked as nation-states and religious communities utilize the archaeological record to mold identities and to forward certain narratives. Our focus will be on the major archaeological sites of Israel-Palestine, particularly in Jerusalem and its environs. We will explore the political and religious issues that have emerged from or surround their excavation. Archaeology in the Holy Land has long been driven by a desire to shed light on - or even authenticate - the Bible, while the "exotic Orient" was explored in the 19th and early 20th centuries through western expeditions and excavations that served to further colonial interests. These religious and political motivations persist even if their manifestations have shifted with time. Through site tours, museum visits, student-led discussions, talks with local experts, and even a day participating in an archaeological excavation, students will gain direct experience with the places that have aroused controversy because of their problematic relationship to biblical and other ancient texts and/or because of their location in politically contested space.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Asian Studies, DSAS Geographic Region General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

ANTH 1600 - HUMAN BIOLOGICAL VARIATION

Minimum Credits: 3

Maximum Credits: 3

This course focuses on human biological diversity from an anthropological perspective. The course explores the role of evolutionary processes in biological variation within and between human populations. This includes an understanding of the diversity of human biologies as the product of complex interactions between environment, culture, and biology. This course explores the adaptive repertoire of the human species to environmental and social stressors. This includes physiological, epigenetic and genetic responses.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

ANTH 1601 - STRUCTURE AND FUNCTION

Minimum Credits: 3

Maximum Credits: 3

Students will explore the literature of human biology and develop questions and hypotheses regarding undocumented concepts. Each student's goal will be to design a laboratory study which tests the hypothesis he/she has formulated. Areas which might be investigated include locomotion, feeding adaptations, and adaption to various environmental conditions. Students will learn techniques of experimental surgery used to investigate the relationships between structure and function.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req., Undergraduate Research

ANTH 1602 - HUMAN SKELETAL ANALYSIS

Minimum Credits: 4

Maximum Credits: 4

Make no bones about it--the human skeleton provides a range of information about the individual, such as their biological sex, activity level and health. The extraction of this information rests on the identification of each skeletal element. This methods course traces the development and growth of the human skeleton until it is fully mature.

Participants will learn how to: identify and side complete and partial adult bones and their features, and distinguish between animal and human bones. Additional topics may include feature analysis to estimate the individual's profile (age at death, biological sex and stature); tooth development and identification; variation; and the identification of muscle insertion points. This course is for students considering anthropological careers in forensic anthropology, bioarchaeology and paleontology, as well as students pursuing careers in health sciences, biomechanics and biology. The course features lectures and required lab time.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req., Undergraduate Research

ANTH 1603 - HUMAN ORIGINS

Minimum Credits: 3

Maximum Credits: 3

This will be an in-depth look at the history of study of human evolution and the current theories and controversies surrounding the interpretation of our relatedness to the various apes as well as of the fossils representing our evolutionary past.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

ANTH 1605 - PRIMATE ANATOMY

Minimum Credits: 4

Maximum Credits: 4

This course offers a detailed consideration of the anatomy of the primates. It will follow an integrated regional approach (i.e., The back, the upper extremities, the hand, etc.), However, the major focus will be on the musculoskeletal system. Students will dissect human material (cadavers) but emphasis will be on the comparative aspects within the order whenever possible. Other non-human primate skeletal material will also be used.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req.

ANTH 1609 - ADVANCED SKELETAL ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

This course provides the student with an in-depth understanding of the skeletal features used to develop the osteobiographic profile (e.g., age, sex, stature, ancestry, handedness, etc.) Of an individual. This analysis is essential for forensic identification and forms the foundation for the reconstruction of ancient individuals and their life-ways. Each student will select some aspect of skeletal analysis and present an overview of the bone biology, the history of the analytical methods, the problems and advantages of each method, modifications that others have made to address these issues, and the current state of knowledge. In the past, some students have proposed new methods of analysis. This will

be complemented by a lab exercise designed by the student that will provide data for interobserver analysis of various techniques. The results of this lab will be presented as posters which will be posted on CW at the end of the term. Prior osteological experience is required.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ANTH 0630 or 1602

ANTH 1611 - EVOLUTIONARY THEORY

Minimum Credits: 3

Maximum Credits: 3

Intended as a sequel to ANTH 0011, this course explores modern evolutionary theory in detail. Some coverage is given to the history of debates, but more emphasis is placed on their current status. Both phylogenetic and adaptive components of the evolutionary process are discussed.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

ANTH 1613 - PRIMATE BIOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course is a survey of the major groups of living primates (including humans) and of the various hard and soft tissue, as well as physiological and biochemical, systems that distinguish the group as primates and further distinguish the diverse lot of primate subgroups.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ANTH 0770

ANTH 1617 - PALEOPATHOLOGY

Minimum Credits: 3

Maximum Credits: 3

Paleopathology is the study of disease and its process among ancient peoples using primary evidence from Human Skeletal remains. Additional lines of inquiry draw on archaeological, ethnographical, clinical and documentary sources to aid in our interpretation. In this course you will learn how to recognize abnormal bone, differentiate between disease processes, describe abnormal bone changes, evaluate recording methods and investigate the epidemiological history of various disease processes. The impact of disease upon the individual and ancient societies will be considered throughout the course and in student research. The combined lecture, seminar and laboratory format provides a comprehensive foundation of skeletal pathology, experience with recording methods and an understanding of the relationship between disease, environment, the individual and their community.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Undergraduate Research

ANTH 1619 - SPECIAL TOPICS IN PHYSICAL ANTHROPOLOGY

Minimum Credits: 3

Maximum Credits: 3

Examines current topics and controversies in physical anthropology. Special problem areas vary from year to year.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

ANTH 1620 - WOMB TO TOMB

Minimum Credits: 3

Maximum Credits: 3

This course will address basic theories and principles pertaining to the human lifecycle from both a biological and cultural point of view. It will also discuss evolutionary changes in human growth patterns and assess environmental and genetic influences on human populations both past and present.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

ANTH 1650 - BLACK FEMINIST ETHNOGRAPHY

Minimum Credits: 3

Maximum Credits: 3

Anthropology has long benefited from the theoretical and methodological contributions of socially marginalized scholars. For instance, Black feminist scholars have been pivotal in formulating pathbreaking theories like intersectionality and standpoint theory and in forwarding critical ethnographic methods such as autoethnography, oral history, community-based research, dance ethnography, and ethnographic film. Yet, the contributions of Black feminist anthropologists to the discipline often go uncited or underrecognized. In an intentional embrace of inclusivity, this seminar centers on the scholarly innovations of self-identified Black feminist anthropologists-scholars who have helped push the discipline toward decoloniality, antiracism, and antisexism. The seminar finds grounding in Black feminist praxis, which calls for integrating theory and practice toward dismantling intersecting systems of oppression. Specifically, Black feminist praxis seeks to "illuminate the experiences of [Black] women and theorize from the materiality of their lives to broader issues of political economy, family, representation, and transformation" (Mullings 1997, xi). Throughout the course, students will read ethnographies and watch ethnographic films by Black feminist anthropologists, as well as "try on" the methods outlined in these written and visual texts. The seminar will also show students how to employ Black feminist ethnography in their own research. This course will fulfill the methods requirement for anthropology majors.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Letter Grade

ANTH 1660 - PEOPLE AND OTHER ANIMALS

Minimum Credits: 3

Maximum Credits: 3

What can anthropology tell us about nonhuman life forms? This class examines the interconnections between humans and other life forms, looking at how human cultural, political, and economic activities are shaped by the animal, plant, and microbial forms that surround us and likewise how these life forms are shaped by human activities. Topics addressed will include the interactions of humans and other beings in agriculture, domestication, hunting, scientific research, medicine, petkeeping, and conservation. We will consider the subjectivity and agency of the nonhuman, our moral and ethical obligations to other life forms, and critically examine divisions between culture and nature.

Academic Career: Undergraduate

ANTH 1665 - LANGUAGE, ETHNICITY AND NATIONALISM

Minimum Credits: 3

Maximum Credits: 3

This course explores how people use language to construct ethnicity, and the role that language plays in theories and ideologies of nationalism. Using cross-cultural examples from Africa, Asia, Europe, Latin America, and the U.S., We consider issues such as language standardization and planning, the challenges facing multilingual nation-states, ethnolinguistic revitalization movements, the linguistic aspects of colonialism, including pidgins and creoles, and the linguistic and cultural aspects of the spread of English as a global language.

ANTH 1670 - ASIAN AMERICA-RECKONING

Minimum Credits: 3

Maximum Credits: 3

How do we define what it means to be Asian American? One thing we can understand about Asian America is difference. The contours of the Asian American identity have been carved out through both historical, social, and political factors. Though it may seem the Asian American identity is locked into a specific racial and social categorization in America, when dissected, it unravels the complexity of its heterogenous construction. **OBJECTIVE:** This course is a deep analysis of the historical and cultural elements of the Asian American experience. We will interrogate crucial elements in the identity-construction of heterogenous groups to better understand the greater project we call America. Throughout this course the issue of systemic racism and white supremacy serve as the backdrop to the construction of Asian America. Most importantly, however, is the legacy to empowerment and self-determination. If anything, this course is a crucial tool to understand resiliency and liberation.

ANTH 1690 - ORAL HISTORY/ORAL TRADITION IN ANTHROPOLOGY

Minimum Credits: 3

Maximum Credits: 3

The collection and analysis of life histories, oral tradition and significance of orality has been a major part of Anthropological methodology and theorizing. This course will introduce students to the practice of collection oral histories and life histories and situating those narratives within larger anthropological discourses. Designed as a methodology course, students will be "doing" the work of anthropology. Students will engage with such questions as: What role does oral history have in data collection? What are the ethical/moral/social responsibility of anthropologists in collection/sharing/dissemination/protection of oral traditions/life histories? How are oral traditions/life histories of our interlocutors protected from differential power relationship? Who has ownership of oral traditions/oral histories? The examination and discussion of life histories, oral traditions and oral histories will not be engaged with a-politically but rather how can we come to understand important anthropological and societal concerns through these discourses. Concerns such as power, racism, sexism, inequity, injustice and structural violence. Following the work of activist anthropology this course will teach students that "critical engagement brought about by activist research is both necessary and productive. Such research can contribute to transforming the discipline by addressing knowledge production and working to decolonize our research process. Rather than seeking to avoid or resolve the tensions inherent in anthropological research on human rights, activist research draws them to the fore, making them a

productive part of the process." (Speed 2006). This course will teach students both the importance and value of conducting research that moves outside of the "ivory tower" of academia. Students may be asked to participate in methodological exercises that will require engagement in the Pittsburgh community. While simultaneously learning as a student one will also be producing tangible resources for under-represented, marginalized and underserved communities.

ANTH 1700 - YOGA IN THE HIMALAYAS

Minimum Credits: 6

Maximum Credits: 6

This six-credit intensive course in anthropology and religious studies provides a critical perspective on yoga in the Himalaya. Students travel to the Hanifl Center and Jaberkeht Nature Reserve in the town of Mussoorie, India, to study about and engage in yoga for health and environmental activism. From the Hanifl Center students travel on a series of expeditions. Six days are spent in Rishikesh at Parmarth Niketan Ashram and at Sivananda Ashram. One week is spent on a trek to Gangotri, the source of the Ganga. For seven days student travel to Banaras, and Vrindavan before return to the Hanifl Center and Jaberkeht Nature Reserve. The Ashrams in Rishikesh combine Karma Yoga and Hatha Yoga to effect health reform and develop strategies for engaged ecological activism. Gangotri is iconic in the sacred geography of Hinduism and closely associated with the search for enlightenment that structures yoga in practice. Banaras provides an important context for understanding the historical development of yoga in general. Vrindavan is a city that reflects the institutionalization of Bhakti Yoga as manifest in the adoration of Lord Krishna and provides a context within which to understand the teaching of the Bhagavad Gita. Yoga has become a global phenomenon that enables individuals to engage in forms of practice that improve health and enhance self-awareness (Hatha Yoga), develop holistic, analytical thinking (Jnana Yoga), embody a spiritual disposition (Bhakti Yoga) and sustain the environment through social activism focused on conservation (Karma Yoga). As a multi-dimensional philosophy, yoga is best understood as an ethical system that brings the body, mind, and environment together into a holistic framework that is intended to improve the human condition in terms that are at once cosmological and ecological. This six-week course is designed to provide students with an intellectual and intensively experiential understanding of how the four traditions of yoga in practice are manifest in the mountains of northern India.

Grade Component: LG/SNC Elective Basis

ANTH 1701 - RELIGION AND RACE

Minimum Credits: 3

Maximum Credits: 3

This course examines the intersections of religion, race, and racism. Recently, scholars of religion have demonstrated that religious identities are often racialized as well. In this course, we will discover that religion and race are both modern categories rooted in post-enlightenment ideas about what it means to be human. We will see how the establishment of these religious and racial categories led to new hierarchies and inequalities. We will discuss how post-enlightenment thinkers linked religion and race, and how their ideas played a role in European imperialism. We will also investigate how the discipline of religious studies has developed its analytical tools with a racialized understanding of religion. The course will examine case studies in which religion has been racialized, and consider the political ramifications of these examples. In particular, we will think about the impact of white supremacy on black religion in the United States, the complicated relationship between antisemitism and Islamophobia, and contemporary Islamophobia in the US. Finally, we will explore the possibilities of anti-racism through faith-based scholarship and activism.

Grade Component: LG/SNC Elective Basis

ANTH 1702 - MUSLIM POLITICS IN REAL TIME

Minimum Credits: 3

Maximum Credits: 3

Media representations and news stories about the 'muslim world' often project a troubling ahistorical and sensationalist narrative about a region torn by violence, fanaticism and corruption. This information literacy-driven course will teach you how to place current events in the muslim world or involving people of muslim background in their historical context. It will also teach you to discern what constitutes a valid news source and how to find sources you can trust. We'll develop the skills necessary to make sense out of a news landscape that presents conflicting accounts of the same story and that fails to cover some stories altogether. You'll leave this course with a command over how to find news, how to read news, and then how to make sense of it through rigorous historical and social scientific analysis. To that end, you'll learn how to locate and evaluate scholarly sources with the same rigor as you do news sources. You'll be provided with a number of key aspects and developments in the history of the 'muslim world', so that even if you have no prior knowledge of islamic history you will be familiar with the key terms and themes. You will be introduced to the long history of problematic media portrayals of muslims and the muslim world and efforts to both critique and change these representations. We will work intensively with a librarian to master a set of basic information literacy skills at the start of the semester that we will grow and refine as the class progresses. The remainder of the class syllabus will be determined by the current news cycle, which will generate topics to be considered for further historical analysis.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

ANTH 1703 - THE HISTORY OF GOD

Minimum Credits: 3

Maximum Credits: 3

God has a history. In the earliest days of that history, God was worshiped as one of a plethora of deities controlling various spheres of cosmic activity or the human world. Students in this course will learn about this ancient pantheon - how gods functioned in society and how their presence was experienced by those devoted to them. They will then trace the evolution of the God of Israel from a mountaintop deity of the southern Levant in the late second millennium BCE to a supreme deity worshiped by a small group of absolute monotheists based in Jerusalem in the mid-first millennium BCE. Students will become more sophisticated readers of biblical texts in the process. The sources of the Hebrew Bible reflect not a homogeneous monotheism, but rather a diverse set of belief systems tending toward henotheism or even polytheism. By appropriating and reinterpreting the religious myths of their neighbors, the Israelites arrived at a character of the divine that has proven problematic to many contemporary theologians, particularly on issues of LGBT rights, women's rights, and the environment.

ANTH 1704 - RITUAL: THEORIES AND CASES

Minimum Credits: 3

Maximum Credits: 3

This course deals rigorously with historical and contemporary topics in the study of ritual and its intersections with religion, politics, medicine, disaster studies, and the study of social relations in general. From being considered peripheral to social science, ritual has re-emerged as a fundamental category of human behavior, relevant across a wide span of domains of actions. While there is a close connection between ritual and religion, ritual action is important outside of the sphere of religion and is now considered fundamental to the workings of society. Students in this course will understand how ritual practices vary cross-culturally while serving basic functions. The course provides case studies from different areas and shows how theory applies to these cases. Instruction methods include lectures and

discussion; student work includes presentations, essays, and exams.

Academic Career: Undergraduate

ANTH 1709 - ACTIVIST ANTHROPOLOGY

Minimum Credits: 3

Maximum Credits: 3

Following the work of activist anthropology this course will teach students that "critical engagement brought about by activist research is both necessary and productive. Such research can contribute to transforming the discipline by addressing knowledge production and working to decolonize our research process. Rather than seeking to avoid or resolve the tensions inherent in anthropological research on human rights, activist research draws them to the fore, making them a productive part of the process. Finally, activist research allows us to merge cultural critique with political action to produce knowledge that is empirically grounded, theoretically valuable, and ethically viable." (Speed 2006). This course will teach students both the importance and value of conducting research that moves outside of the "ivory tower" of academia. "[A]ctivist scholars work in dialogue, collaboration, alliance with people who are struggling to better their lives; activist scholarship embodies a responsibility for results that these "allies" can recognize as their own, value in their own terms, and use as they see fit." (Hale 2008) This course will explore major conceptual work on the role and ethical responsibility of anthropological research and social justice issues. Students will be required to participate in methodological exercises that will require engagement in the Pittsburgh community. While simultaneously learning as a student one will also be producing tangible resources for under-represented, marginalized and underserved communities.

ANTH 1711 - ETHNOBIOLOGY: AMAZONIAN RELIGION AND NATURE

Minimum Credits: 3

Maximum Credits: 3

The course explores Amazonian cultural knowledge of plant and animal species, comparing it to scientific knowledge, to uncover underlying assumptions that constitute a systematic, if implicit, Amazonian philosophy of nature. It also teaches students how to ask key questions and to carry out qualitative research on ethnobiology. Over generations of

hunting and gathering Amazonian cultures gained an intimate knowledge of their rainforest environment, the most bio-diverse on earth. Now, more than ever, preservation of that environment depends on improving understanding and cooperation between environmentalists and the native peoples who live there; and upon integrating traditional Amazonian and scientific knowledge of the natural world. The course addresses key ethnobiological questions such as: how do native Amazonian people classify plant and animal species? How do they understand the extinction or the emergence of new species? How do they understand plant and animal behavior? How is plant and animal ecology believed to serve as a model for understanding human society and vice versa? How should human emotions be regulated so as to better work with nature? What aesthetic, emotional or religious practices were developed to create bonds of empathy or communication between human beings and other species? What are the practical implications of the answers to these questions for collaborative environmental work with indigenous communities?

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

ANTH 1712 - AMAZONIAN ETHNOBOTANY

Minimum Credits: 3

Maximum Credits: 3

This course examines the cultural understanding and uses of plants in the Ecuadorian amazon. How do Amazonian people understand what plants are? How did they originate? How are they classified? How are they similar or different from humans? How are plant foods and medicines believed to work on the human body? How should they be harvested and prepared? What sorts of human moods or attitudes are necessary to work with plants? What ritual techniques are used to achieve empathy required to work successfully with plants?

Academic Career: Undergraduate

Course Component: Lecture

ANTH 1718 - GENDER AND WORK IN CROSS CULTURAL PERSPECTIVE

Minimum Credits: 3

Maximum Credits: 3

This class takes a cross-cultural perspective to inquire why we find it difficult to abandon deep-seated beliefs that men and women are not equally suited to pursue certain professions. We question whether women belong in the army, the cockpits of airplanes and space shuttles, or whether men make good nurses and babysitters. In this course, we will read scholarly texts and watch documentary films to analyze the relationship between gender and work in various social contexts. We will ask how the realm of work operates as a site where gender differences and hierarchies are reinforced. We will examine how our beliefs about gender-appropriate occupational identities are culturally conditioned and how employers perpetuate gender biases in their hiring practices as they prioritize growth and profit over ideals of gender equity. We will read about flight attendants who were able to negotiate less sexist weight standards only in 1991, women in factories who are hired for their nimble fingers, sex workers, hostesses, hosts, and exotic dancers who are expected to perform gender at work.

ANTH 1719 - ANTHROPOLOGY OF RACE AND SCIENCE

Minimum Credits: 3

Maximum Credits: 3

One of Anthropology's major contributions to the world was the concept of "Race". But after the 1940s it was abandoned and "Culture" became Anthropology's trademark. This course examines why this happened and how our understandings of culture and race are connected. This course takes a critical look at the narratives and discourses in and around race and its relationship to Anthropological and scientific thought. We will examine how these discourses essentialize and naturalize bodies as well as our understandings of them. We will explore narratives which use the tool and authoritative voice of Anthropology, science, scientific method and genetics. In addition, we will look at some of the historical and contemporary narratives of the biological underpinnings of race discourse and its incorporation into everyday imaginings of social identities. This course will seek to engage both the social and biological framings of race and attempt to demonstrate where these discourses converge and where they divert away from one another. In addition to academic readings we will look at blogs, internet posts and media to view and critique the ways in which science logic becomes racialized logic in everyday discourse.

ANTH 1723 - BLACK MASCULINITY

Minimum Credits: 3

Maximum Credits: 3

This course explores the role and significance of Black Males and Black Masculinity in the Black Diaspora. The main focus will examine Black Masculinity in a North American context with supporting examples and comparisons from other parts of the Diaspora. Examining the varied social roles Black males have occupied in both literal and symbolic systems students will gain an understanding of the interrelatedness of race, gender and masculinity and its impact on social, political and legal institutions. As a course in Anthropology the centrality of symbols and the meanings people attribute to symbols will help shape and direct both course readings and class discussion. However, the impact symbols have on everyday life and the relationships of power, kinship and desire will serve to demonstrate the important ways in which an understanding of Blackness and Masculinity gives understandings to other knowledge. This course will be heavily grounded in Black Diaspora Theory, Black Feminist and Black Queer Theory, and the Anthropology of Gender and Sexuality.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

ANTH 1724 - THE ANTHROPOLOGY OF SCIENCE: GLOBAL PERSPECTIVES

Minimum Credits: 3

Maximum Credits: 3

Science and technology are integral to contemporary societies. Understanding how science is produced and how it shapes daily life is a crucial challenge for anthropologists, who have studied the production of scientific knowledge in labs, hospitals, field sites, and elsewhere. While early studies of science as a cultural practice focused primarily on the U.S. and Europe, science and technology are produced and consumed globally. Through analyses of case studies of biotechnology, medicine, genetics, conservation, agriculture, energy, climate science, and computing around the world, this class will investigate the global dynamics of science and technology. Juxtaposing readings on different scientific fields from around the globe, we will look for recurring themes that connect these studies. What happens when science and technology travel, and how do new places emerge as centers of knowledge production? How are culture, identity, technology, and science linked?

ANTH 1726 - GLOBAL PHARMACEUTICALS

Minimum Credits: 3

Maximum Credits: 3

This course examines pharmaceuticals as cultural and social phenomena, following their development, production, marketing, and use around the globe. We will investigate a number of issues, including the growing number of drugs prescribed to Americans each year, the lack of access some populations have to essential medicines, the increasingly global nature of clinical trials, and the role of pharmaceutical companies in the opioid crisis. We will use the study of drugs and medicines to analyze the production of medical knowledge, changing perceptions of health and illness, and the role of the state and the market in the development and distribution of therapeutics. Pharmaceuticals bring together science, clinical practice, marketing, and consumerism, and this course will draw on anthropological research to trace the role they play in global flows of knowledge, capital, commodities, and people.

ANTH 1727 - HEALTH AND ENVIRONMENT IN PITTSBURGH

Minimum Credits: 3

Maximum Credits: 3

This course examines the relationship between environment and health, with a special focus on the city of Pittsburgh and the surrounding environs as a case study. We will use medical anthropology to systematically investigate the effect of the environment on health and the interplay of natural and human systems. Drawing on research in political ecology, this class will consider the social, political, and economic systems that shaped Pittsburgh and its inhabitants. We will pay particular attention to the way changing industrial and environmental conditions changed incidence of disease, and how exposure to risk and disease are shaped by race, gender, and class. We will examine issues like the histories of air pollution and resource extraction including coal mining, oil and gas drilling and their impacts on the environment and health. The course will examine how knowledge about health is produced and the development of new forms of citizen science that enlist local residents in projects to monitor issues like air quality.

ANTH 1728 - GENDER AND GLOBALIZATION

Minimum Credits: 3

Maximum Credits: 3

Gender is a key structuring principle of difference and inequality in society, while globalization is a condition characterized by time-space compression and ever-expanding connections across national boundaries. Globalization emerged out of such (and often violent) practices of contact as capitalism, colonialism, socialism, the Cold War, and neoliberalism. This course will explore the intersection of gender and globalization asking how gender shapes processes of globalization and how the role of gender is shifting as national/cultural regulatory systems are no longer able to maintain control over what is recognized as "normative" in the context of gender roles and gendered practices. This course will examine various facets of the interface between gender and globalization in such contexts as cross-border marriages, international adoption, sex and colonialism, gender and state violence, women in socialist welfare states, labor migration, the global sex industry, queer identities and activism, as well as gender and technology (especially, the intersection of gender inequality and the idea of technological enabled empowerment). The particular historical contexts in which we will discuss these themes include colonialism, the Cold War Era, post-socialism, and neoliberalism.

ANTH 1729 - BRAZIL

Minimum Credits: 3

Maximum Credits: 3

The course begins with an overview of Brazilian culture and of the country's enormous resource base. Cultural change is traced through the pre-Columbian, colonial, imperial, and republican periods. A major theme throughout is the evolution of a Portuguese heritage into today's distinctive Brazilian national culture. The country is then divided into five regions as a means of understanding its internal diversity. Popular American ideas about subjects like carnival, the

amazon rainforest, coffee, Copacabana Beach, and the huge foreign debt are also dealt with.

ANTH 1740 - GENDER, SEXUALITY, AND CHILDHOOD IN A GLOBAL CONTEXT

Minimum Credits: 3

Maximum Credits: 3

"Although childhood is often conflated with a biological category based on an immature body, in reality it is much more. Instead, this course examines the ways in which childhood is a discursive and continuously shifting category, one that changes across time and place. This course will introduce students to the study of children and childhood in a cross-cultural context and will pay particular attention to the ways in which notions of childhood, and the experience of being a child, draw from and reproduce understandings of gender and sexuality as they intersect with race, class, ethnicity, etc. Through readings, lectures, and films, we will also consider the meaning of gendered childhoods in light of contemporary forms of conception, children's culture (media, toys and artifacts, stories), child labor and play, and ritual and coming of age ceremonies. An analysis of these contemporary phenomenon highlight local and regional notions of childhood and their intersection with broader global patterns."

ANTH 1744 - ANTHROPOLOGY OF THE OLYMPICS

Minimum Credits: 3

Maximum Credits: 3

The modern Olympic games have existed for more than 100 years. In that time it has become both a local and global spectacle incorporating now well established traditions and rituals from the lighting of the eternal flame to the medal ceremony. But what do these rituals and traditions mean to athletes, organizers and spectators? The Olympics are often described as an event that brings the people of the world together under the auspices of sports' altruism. However, the Olympics are also known to increase sex trafficking, gentrification of neighborhoods, and incarceration of targeted populations. Do the Olympics mean the same thing to everyone who are directly impacted by it? This course explores the role of ritual and tradition as public spectacle and the contested meanings derived from different parts of communities impacted by the Olympics. Since the Olympics involves the participation of world leaders, global dignitaries, multi-national corporations with their financial and political sponsorship of the Games and the athletes how do global politics and global economies come into play for local people, their economies, and their social life. This course will explore the local impact that hosting the Olympic games has on local populations as well as the ways communities react and respond to the Games. This course will be taught as part of the Pitt at the Olympics summer intensive study abroad program.

ANTH 1746 - THE OLYMPICS & IDENTITY - RACE, GENDER, ETHNICITY & THE NATION STATE

Minimum Credits: 3

Maximum Credits: 3

The Olympic Games are and have been more than a sporting event that has captured the imagination and dedication of a global audience for over 100 years. This course explores the ways in which the Olympic games have become a venue to not only showcase sport but to teach, inform and establish norms around some of society's core concepts. This course will demonstrate the ways in which our everyday understanding of gender, race, ethnicity, biology, and citizenship have been directly shaped due to the Olympic games. The Olympic games have been a steady partner with the development of nationalism, globalization, modernity and science. Topics such as gender verification testing, biological racism and citizenship will be discussed as part of the Olympic program. This course will be taught as part of the Pitt at the Olympics Summer Intensive Study Abroad Program.

ANTH 1747 - WRITING CULTURE

Minimum Credits: 3

Maximum Credits: 3

This class will introduce students to different anthropological and ethnographic writing styles and theoretical approaches while encouraging them to think about what anthropology can contribute to our understanding and appreciation of human diversity in the world today. Students will "try on" different writing styles and theoretical approaches. Throughout the class they will examine the poetics (writing style) and politics (forms of power) associated with different approaches and types of ethnographic writing. Class readings include different types of anthropological writing. This includes empirical writings (e.g., structural-functional ethnographic realist writing) that characterized much anthropological work through the 1960s; interpretive works, influenced by Clifford Geertz; a range of experimental, reflexive, and critical writings of and since the "experimental moment" of the late 1980s; and feminist ethnography and fictional ethnography (or ethnographic fiction). Additional readings provide wider context and writing/study tips.

ANTH 1750 - UNDERGRADUATE SEMINAR

Minimum Credits: 3

Maximum Credits: 3

This seminar brings together all undergraduate majors in anthropology for a seminar on the methods by which cultures around the world change over time. Defining such methods occupies much of any anthropologist's time, be he or she an ethnographer, archaeologist, physical anthropologist or linguist. The seminar therefore examines this central problem from many perspectives and affords the student ample opportunity for personal expression as well as rewarding discussion and research in a peer group environment.

ANTH 1755 - URBAN ANTHROPOLOGY

Minimum Credits: 3

Maximum Credits: 3

How do different people make lives in urban environments? What social, cultural, and political phenomena are unique to cities? What can city life teach us about what it means to be human in all its extraordinary diversity? This course takes an interdisciplinary approach to studying urban life, exploring themes such as migration; informal settlements and economies; infrastructures; violence; race and social stratification; social networks; and artistic production. A special focus is put on cities from the Global South.

Academic Career: Undergraduate

ANTH 1768 - CULTURES AND SOCIETIES OF EASTERN EUROPE

Minimum Credits: 3

Maximum Credits: 3

This course is an introduction to the socialist countries of eastern Europe apart from the soviet union. It is particularly concerned with how the region has developed under socialism and with how the new, socialist societies have affected the different indigenous cultures. Topics include industrialization and transformation of agriculture, kinship and family, among others.

Academic Career: Undergraduate

ANTH 1771 - RELIGION AND CULTURE

Minimum Credits: 3

Maximum Credits: 3

Religion is thought, felt, and acted out in social and cultural contexts. The relationship between religion and culture is the focus of the course. The objectives are to understand religion wherever and whenever found, and to understand the anthropological approach in the cross cultural study of religion. Religious belief, ritual, myth, dogma and religious specialists in industrial and non-industrial societies are compared.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Asian Studies, Global Studies, Russian & East European Studies

ANTH 1774 - PERSPECTIVES ON RELIGION

Minimum Credits: 3

Maximum Credits: 3

A serious introduction to the study of religion is undertaken by reviewing the efforts and insights of the principal scholars in the field in the modern period.

Academic Career: Undergraduate

ANTH 1778 - CULTURES OF AFRICA

Minimum Credits: 3

Maximum Credits: 3

This course explores the traditional cultures and societies of Africa from prehistoric to modern times. Emphasis is on the conditions prior to contemporary changes but some attention is given to modern developments. Concern is with the variety of cultures on the continent, how people make a living, what family life is like, how disputes are settled, and religion. Through lectures, films, and readings, the student gets a feeling for life in this fascinating part of the world.

Academic Career: Undergraduate

Course Component: Lecture

ANTH 1784 - JAPANESE SOCIETY

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to cultural practices and social institutions in postwar and contemporary Japan. It will give students a range of different exposures-using scholarly books, essays, and film-to look at various conditions and aspects of Japanese culture and everyday life: economic high growth, middle class society, recession, social precarity, gender relations, education, consumer culture, and popular culture. We will examine discourses on the uniqueness and homogeneity of Japanese culture and ask what compels and shapes these ideas and how they are confirmed or contested in contemporary Japan. The special focus of this course is media culture (anime, otaku subculture, and Internet culture). We will discuss media culture in Japan and examine the reasons for its popularity abroad.

Academic Career: Undergraduate

ANTH 1785 - COMPARATIVE HEALTHCARE SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

Health care systems are having to respond to the number of competing challenges. The pressures of globalization, aging populations, increasing patient demands, and the rising costs of research and medical treatments are forcing us to look more critically at how healthcare is delivered to devise changes for the future. Changes made to health systems are often based on economic and political rationale and with many countries currently experiencing significant changes to

the way in which health care systems have historically been funded and delivered. Students will explore a range of key concepts and themes in comparative healthcare from a multidisciplinary perspective. They will develop critical appraisal skills to assess the quality of evidence used to support developments in healthcare policy and practice and help students to look critically at the role that governmental and non-governmental organizations play in healthcare. This course will provide students with a firm grounding in key concepts and themes in comparative healthcare. It adopts a multidisciplinary approach to look at key principles in epidemiology, the way in which healthcare systems are funded and delivered, and health inequality and the social determinants of healthcare. Direct comparisons will be made between the USA and UK to allow students to relate their learning on this course to their own educational and healthcare settings. While this course is designed as part of a Study Abroad program for students in health-related fields: Nursing, pre-Medicine, Public Health, Global Health, Health Administration, etc., it does not have any prerequisites. Any student interested in this topic may enroll.

ANTH 1793 - ASIAN MEDICAL SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

Using scholarly texts, ethnographic studies and historical documents, this seminar will focus on the medical systems of India, China, Japan, and South East Asia. The primary objective of the course is to understand various Asian medical systems on their own terms, both in theory and in contemporary practice. Primary attention will be given to Ayurveda, Unani and traditional Chinese medicine. We will look at how so-called traditional medicine in Asia is being modernized in response to political, economic, social, and cultural transformations.

Course Attributes: Asian Studies, Writing Intensive Course (WRIT)

ANTH 1797 - MOUNTAINS AND MEDICAL SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

India is a social, political and economic environment in which a broad range of South Asian medical systems have grown and developed over the course of several years. In the past 150 years these systems have been institutionalized and professionalized within the framework of colonial and national medical and public health policy. Many of these systems are intimately connected to the environment, and to the conceptualization, categorization, production and consumption of natural resources. This course focuses on non-biomedical systems of medicine: Ayurveda, Unani, Siddha, Tibetan medicine, yoga and nature cure and homeopathy, as each one of these is supported and regulated by the government of India. The purpose of the course is not to evaluate the effectiveness or medical value of these systems; it is to understand how these medical systems fit into a range of social, political, ecological, botanical and economic contexts. Given that a number of these medical systems are intimately linked to Himalayan botanical and environmental knowledge, the course will focus on the relationship between South Asian medical systems and mountain ecology.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

ANTH 1798 - RELIGION AND ECOLOGY

Minimum Credits: 3

Maximum Credits: 3

The Himalayas have inspired more religious thought, given rise to more forms of religious practice and are more distinctively featured in a spectrum of epic religious literature, than almost any other geographic region in the world, with the possible 'but unlikely' exception of a small parcel of relatively dry hilly ground between Jerusalem and Mecca. In any case, Siddhartha Gautama was born and taught in the shadow of the lower Himalayas, where Buddhism emerged in the 4th century BCE. Many specific mountains, lakes and rivers, as well as the broader geography of the Himalayas 'most notably sacred rivers' define the landscape of Hindu mythology, pilgrimage and ritual. The practice of yoga as a metaphysical philosophy is intimately linked to the idea of mystical Himalayan masters. The Western watershed of the Punjab, including the eponymous five rivers 'Indus, Jhelum, Chenab, Ravi and Sutlej' is the heartland of Sikh cultural and religious identity. In addition to being a center of medieval Hindu literary learning, Kashmir and the Western Himalayas, extending through the Hindu Kush, have defined routes of exchange, communication, conversion and confrontation between Greeks, Persians, Buddhist monks, and Mongol armies. More recently 'in terms of centuries' Tibetan Buddhism has emerged out of a history of development in Lhasa 'relocated to McLeod Ganj in the early 1960s' - that combines elements of tantra from the southeastern Brahmaputra region with transmutations of Buddhism that have taken shape in greater China. Although not inspired by the Himalayas per se,

Islam in South Asia has been shaped by geography and the environment in specific ways, and the development of a particular interpretation of the Koran in a small center of learning in the town of Deobandi ' close to where the epic battle of the Bhargava Gita is said to have been waged in Kurukshetra ' implicates the geography and geopolitics of the Himalayas in the emergence of reform oriented, Orthodox Islam.

ANTH 1799 - HIMALAYAN POLITICAL ECOLOGY

Minimum Credits: 3

Maximum Credits: 3

The Himalayan region is characterized by dramatic climatic and geological variation, a tremendous range of biodiversity and a complex ecology. Within the region there is also profound cultural variation. This course seeks to provide a critical perspective on the ecology and environment of the Himalayas by examining how different groups at the village, state, national and international level are implicated in the political ecology of the mountains. We will look at the way in which village farming communities use natural resources, what kind of pressure is put on resources as a result of development and population growth, how the mountain environment shapes the politics and resource distribution at the level of the state and, finally, how environmental and energy issues shape national policy and international relations.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

ANTH 1801 - HIMALAYAN BIODIVERSITY

Minimum Credits: 3

Maximum Credits: 3

Ranging in altitude from several hundred meters above sea level to over seven thousand, from subtropical forests to high altitude meadows and deserts, and from areas with little or no rainfall to regions that are among the wettest in the world, the Himalayas define a geographical region of enormous geological variation and biodiversity. The goal of this course is to gain an understanding of this diversity, with a focus on ecology. More specifically we will examine ecology and ecosystems in terms of biosemiotics ' how and why organisms within an ecological niche communicate with one another, and how these patterns and structures of communication define different kinds of interdependence. Within the framework of standard classificatory schemes ' mammals, birds, reptiles, insects ' we will focus on particular species and specific niche systems for more detailed biosemiotic/behavioral analysis.

ANTH 1803 - HEALTH ISSUES IN WEST AFRICA

Minimum Credits: 3

Maximum Credits: 3

Health as per the World Health Organization is viewed from a bio-psychosocial perspective. This course, which concerns itself with health issues in Africa with special reference to Ghana focuses largely on the social aspects of

health. It uses sociological lenses to examine mental disorder. It introduces the student to the major health issues and discourses in Africa with particular emphasis on Ghana. It introduces the student to the ways social theories inform our understanding of health. The course examines how socio-cultural factors contribute to the development of health and ill-health in Ghana and Africa as a whole. This course is suitable for students in Pre-Med, Public Health, Social Work and students in International Development.

Academic Career: Undergraduate

ANTH 1804 - RACISM AND CIVIL RIGHTS IN THE UNITED STATES

Minimum Credits: 3

Maximum Credits: 3

To introduce students to the legacy of racism and the social response of the Civil Rights Movement in the United States. Students will be given the opportunity to explore through an eight-day trip to key sites of the freedom struggle, as well as hear personal narratives of foot-soldiers and scholars of this crucial period in our nation's history. This course will be ideally suited for any majors but will be of interest to students in many disciplines in Arts and Sciences but also in other schools and colleges at the university with interest in these topics. Students in anthropology, history, sociology, urban studies, majors in the College of General Studies will also find applicable theories and knowledge for their majors. This course will serve as an elective in the Anthropology major but will also be submitted to satisfy various General Education requirements for all students at the university. To introduce students to the legacy of racism and the social response of the Civil Rights Movement in the United States. Students will be given the opportunity to explore through an eight-day trip to key sites of the freedom struggle, as well as hear personal narratives of foot-soldiers and scholars of this crucial period in our nation's history. The course will be divided into two main parts. The first part will be a seven-week academic curriculum with guest lectures and readings on the era and connected social issues around racism, law and politics. The second part will consist of an eight-day trip visiting sites and hearing from former leaders and current scholars specializing on connected topic. This course is designed to give students a highly experiential in-person experience on the role and impact of racism and its structuring effect on policies, institutions and individuals. The course will also give students the opportunity to connect current issues and concerns about racism with the Civil Rights era. Enrollment in the course is required for participation in the Study Away program.

Grade Component: LG/SNC Elective Basis

ANTH 1805 - BIOARCHAEOLOGY

Minimum Credits: 3

Maximum Credits: 3

The human skeleton provides the most direct and unchallenged evidence for an individual's past behavior as the skeleton is plastic in its response to stress, much the same as a society responds to social and environmental stress. While the artifacts, architecture and features recovered from an excavation leave a cultural imprint on the landscape, so too does culture and behavior leave an impression on the deceased. The individual is not just a biological shell to be cleaved from its cultural context, but rather forms a social package contingent upon culture during life and in death. We will examine social change and behavior from the perspective of the deceased within geographically diverse funerary contexts. We will evaluate factors that may influence the funerary context, such as differential burial practices and preservation. We will examine traditional labels to explore the topics of gender, biological vs. chronological age, and life course thresholds. Lectures will be supplemented with a practical component as well as writing exercises.

ANTH 1806 - AFRICA AND THE WORLD

Minimum Credits: 3

Maximum Credits: 3

This is an interdisciplinary seminar about the diverse histories and cultures of Africa and the Atlantic diaspora. The course is organized around thematic and methodological approaches in the historical archaeology of Africa and the African diaspora. We will examine the economic, political, and ideological factors that facilitated the Atlantic Slave Trade, the "legitimate trade," and the emergence of unequal global economies while highlighting the struggles and resilience of enslaved Africans and their descendants. Finally, we will discuss how the histories of the slave trade, race, and gender shape the lived experiences of Africans and people of African descent and develop critical historical perspectives on African politics, gender, race, identity, culture, and science. This course is open to students interested in African archaeology, African and African diaspora studies, slavery, and race. Lectures may be supplemented with documentaries and other multimedia sources.

ANTH 1807 - COMMUNITY ARCHAEOLOGY AND PUBLIC ENGAGEMENTS

Minimum Credits: 3

Maximum Credits: 3

Why and for whom do we study the past? Is community archaeology the new "New Archaeology"? Archaeology is performed in a variety of political and economic settings and for a range of reasons. In this class, we will examine the multiple stakeholders involved in the archaeological enterprise, and the often-conflicting demands they place on archaeologists as academics and citizens, with the goal of developing strategies that can improve diversity in the subfield and communication to non-academic groups. At a basic level, this class explores two interrelated questions: What "should" be the ultimate goals of archaeology? To what degree do we need to change what archaeology does to accomplish what it "should"? To address these concerns, we'll examine major criticisms of how archaeologists have interacted with communities and publics, but much of our time will focus on correctives that seek to overcome these limitations. In particular, we will consider calls for diverse "archaeologies" which incorporate alternate models and experiences of the past but sometimes challenge our basic notions about the field. We will also discuss the responsibilities that archaeologists have to communities and how we might envision future collaborative community archaeologies, even when the past is a painful topic.

ANTH 1808 - FROM THE HIMALAYAS TO ANDES THE CONSERVATION OF MOUNTAINS, ANIMALS, AND RIVERS

Minimum Credits: 9

Maximum Credits: 9

This course will focus on human ecology, conservation and biodiversity in the mountains of North India and Peru. Field study at different altitudes in the world's two most extensive and diverse mountain ranges will provide students with a detailed understanding of the complex interdependence of living systems in and across ecological zones ranging from the ocean to mountains upward of four thousand meters above sea level. As post-colonial nations in the Global South, both India and Peru are confronted by economic and environmental challenges closely linked to the conservation and use of water, land, and forest resources. The study of conservation policy and biodiversity in the Indian Himalayas and the Peruvian Andes will provide students with critical insights and comparative perspectives on complex, global problems in two important, fragile ecological zones.

Grade Component: LG/SNC Elective Basis

ANTH 1810 - ENVIRONMENTAL JUSTICE IN ANTHROPOLOGICAL PERSPECTIVE

Minimum Credits: 3

Maximum Credits: 3

Toxic exposure is increasingly a fact of life for many on the Planet. In this course, students will learn about the history of environmental justice (EJ) around the world, focusing especially on the ways that already marginalized communities have often been the "frontline" communities in these struggles. This historical and transnational perspective then serves as the context for engaging with contemporary EJ campaigns around air and water quality and community health in Southwestern Pennsylvania, and Baltimore, MD. The course will include a field trip, and students will have opportunities to hear from community activists, learn about citizen science, and engage with other students at Towson University studying similar topics. The course will end by imagining how and in what ways can we build more just, sustainable, and healthy communities. Prior coursework in anthropology is encouraged but not required. Students from environmental studies, pre-health fields, and other related disciplines are welcome.

Grade Component: Letter Grade

ANTH 1900 - INTERNSHIP IN ANTHROPOLOGY

Minimum Credits: 1

Maximum Credits: 6

Working in consultation with faculty, advanced students wishing to pursue careers in anthropology have the opportunity to extend academic training to a practical work experience in a particular subfield of Anthropology. Students will be required to submit a preliminary proposal to a faculty sponsor preferably sometime during the prior term, or should respond to faculty listings of specific internship projects that will be posted. Examples of projects are: physical anthropology research at the Pittsburgh Zoo; analysis of archeological artifacts; local ethnographic or folklore research.

Academic Career: Undergraduate

Course Component: Internship

Grade Component: Satisfactory/No Credit

ANTH 1901 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 3

This course allows qualified students to develop highly personalized research projects in conjunction with a faculty sponsor. The student will have to develop a bibliography, outline an approach to the project, and devise a methodology. The project work products are agreed to by the student and the faculty sponsor. Typical products may be a report, paper, or other tangible result of the student's efforts.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: LG/SNC Elective Basis

ANTH 1902 - INDEPENDENT STUDY

Maximum Credits: 12

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: LG/SNC Elective Basis

ANTH 1903 - DIRECTED RESEARCH-READINGS

Minimum Credits: 1

Maximum Credits: 3

Not all topics in anthropology can be adequately addressed in formal courses. The reading course allows qualified students to develop a bibliography for a specific topic not covered by other courses in the department. The work is done in conjunction with a faculty sponsor, and the student and faculty sponsor jointly determine the work products for the course, a research paper or annotated bibliography based upon the readings is typical, but other products may be substituted.

Course Component: Directed Studies

Grade Component: LG/SNC Elective Basis

ANTH 2553 - ARCHAEOLOGICAL CERAMICS

Minimum Credits: 3

Maximum Credits: 3

This course is designed to provide you with a broad introduction to archaeological ceramics. We will cover a number of topics during the course so that you will be conversant in the archaeological literature on pottery and will have a greater understanding of the types of research problems that are most readily investigated through the analysis of archaeological ceramics. You will also gain experience in handbuilding pottery vessels so you have an understanding of pottery from the perspective of the potter and will know how the limitations and possibilities within this medium affect both the manufacture and processes used in creating pottery. We also discuss a variety of archaeological analyses of pottery. Readings drawn from archaeological, ethnoarchaeological, and material culture literature are an important component of this course.

ARABIC 1615 - ARABIC LIFE AND THOUGHT

Minimum Credits: 3

Maximum Credits: 3

The primary objective of the course is to introduce students to the cultures of the Arab world in order for them to understand the Arab character apart from stereotypes. The course will also examine the wide variety of ethnicities that are summarily defined as Arab. The main foci of the course will be the understanding of the contemporary Arab mind, the experiences that shaped it, and how Arabs convey it.

ARABIC 1635 - INTRODUCTION TO MODERN ARABIC LITERATURE

Minimum Credits: 3

Maximum Credits: 3

This course is recommended for students who have literary interests, are interested in Arabic culture, and could write academic papers. It is offered in English, so knowledge of Arabic is not required. INTRODUCTION TO MODERN

ARABIC LITERATURE fulfills the general education requirements of Geographic Region, Cross-Cultural Awareness and Literature. This course also counts as the culture or elective requirement for the Arabic Certificate. Course Objectives: Shed light on the modern Arab experience and how it is reflected in modern Arabic literature. Help you to understand people who live in a different region of the world. Introduce you to a new form of literary production, different in its themes and its techniques. Improve your critical thinking, academic writing, and oral presentation of ideas.

ARC 0110 - APPROACHES TO THE BUILT ENVIRONMENT

Minimum Credits: 3
Maximum Credits: 3
This foundational course for architectural studies majors seeks to acquaint students with contemporary ideas that affect our understanding of the built environment across the globe through a series of units dealing with different architectural issues and building types. The course engages in intensive reading of canonical texts in the field and current studies of issues shaping the built environment today.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ARC 0112 - GLOBAL ARCHITECTURE 1

Minimum Credits: 3
Maximum Credits: 3
This course offers a global view of architectural and urban history from antiquity (c. 3500 BCE) to the early modern period (c. 1750 CE). The class is organized around three types of historical characters: travelers, believers, and makers and chronicles the built environments that they created or imagined. Each class session will be based around case studies that ask how a certain type of person--a craftsman, a queen, or a monk---might have constructed and used their physical environments. Through the semester we will also address the concept of global as an environmental response by individuals and communities to connect with people and places that were different from themselves. Sometimes this happened through travel and migration or through trade or conquest. Other times persons remained stationary yet imagined and created worlds that connected the living and dead, the profane and the spiritual, or the mundane and the philosophical. Yet other times people were forced to move--as enslaved persons or as nomad--these persons too made their worlds with the resources that were available to them. Studying the built environments of

people who thought, lived, and comported themselves differently from "us" will prepare you to live, work, and play in a world increasingly marked by difference rather than homogeneity.

ARC 0114 - ART AND ARCHITECTURE OF THE MUSLIM WORLD

Minimum Credits: 3

Maximum Credits: 3

This course examines the art and architecture of the Muslim world as it developed through centuries of adoption, adaptation, and innovation which emerged as Islam spread throughout Eurasia, and Muslim communities came into contact with other Muslim and non-Muslim societies. Focusing on a number of prominent sites, buildings, and art objects, this course introduces students to the plurality of traditions and artistic practices labeled as Islamic Art and Architecture. Furthermore, students will learn about various sources of influence that came from the center and peripheries of the Muslim world. Exploring these concepts will take the class on a journey through time and space: starting in the 7th-century from the birthplace of Islam in the Arabian Desert, we will move through a vast territory that expands from southern Spain to China, with a final stop in 21st-century Dubai. All along the way, buildings and art objects will serve as snapshots that open a window into the social, cultural, economic, and political life of these Muslim societies.

ARC 0116 - GLOBAL ARCHITECTURE 2: MODERN

Minimum Credits: 3

Maximum Credits: 3

Major social, political and cultural changes are reflected in ways humans build and shape their environments. Since the Industrial Revolution, the rapid transformation of regimes, the remaking of social classes, the development of new technologies and the emergence of new methods of production have marked a distinctive era of accelerating modernization that ushered in new ways of interacting in and with the world. In this course we will examine buildings and landscapes from about 1750 CE to the present, including the development of infrastructures for transportation, communication and energy production that transformed the ways people live and work, the ways products are made and distributed, the ways territories are planned and resources exploited. The emergence of modern nation-states in the 19th-century and decolonization in the 20th were accompanied by concepts of citizenship, human rights and political ideologies that required new types of buildings, cities and borders. Global organizations including colonial empires, world's fairs, sports associations, and the United Nations required buildings that project and shape identities while accommodating new publics. Countering the effects of relentless modernization, the development of museums, historic preservation and world heritage redefine sites and monuments and how we relate to past and remote cultures. The scale and violence of global wars and on-going regional conflicts necessitate temporary and improvised construction and redefined the idea and purpose of commemorative monuments. Through the lens of the built environment, the priorities, potentials, failures and novelties of the modern world emerge in all their awesome, terrible complexity.

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS The Arts General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

ARC 0153 - MEDIEVAL ARCHITECTURE

Minimum Credits: 3

Maximum Credits: 3

This course will examine the development of architecture in Europe and the Mediterranean from about 300 to 1500 CE, with a focus on the medieval reception and transformation of design elements inherited from the ancient world. It will focus primarily upon buildings designed for Christian rituals, especially churches, cathedrals, and monasteries, but there will also be some attention given to Jewish and Islamic structures, as well as the surviving evidence for secular buildings such as castles and town halls; at the end of the semester we will also devote some time to thinking about the reception of medieval architecture in famous Pittsburgh buildings such as Allegheny Courthouse, Heinz Chapel, and the Cathedral of Learning. Lectures will focus on the social and political background of these structures as well as their ritual and aesthetic purposes; we will also delve into questions about the contemporary care and upkeep of medieval buildings, particularly regarding the ethical management of places that serve as "museums" in some sense and are also active sites of worship.

ARC 0180 - WORLD CITIES

Minimum Credits: 3

Maximum Credits: 3

Cities have existed all over the world for millennia, and their inhabitants have used these urban conglomerations to connect themselves, their ideas, and their goods to a much wider audience - often well beyond their geographic and political boundaries. Cities have also been sites of dramatic demographic changes throughout human history, leading to productive contact as well as structural inequalities between diverse peoples. In this course, students will explore how cities all over the world and through time have grappled with the potentials and problems of a growing, diversifying, and increasingly interconnected world. We will pay particular attention to the cities' heterogeneous inhabitants, their built and natural environments, their interconnectivity, and their different and changing identities as "world cities." Designed around guest lectures by faculty from the Department of History of Art and Architecture, this course will introduce students to a wide array of world cities. Weekly lectures will explore examples of cities across time and space, including Timbuktu, Mexico City, Beijing, Chicago, Istanbul, Cairo, Paris, and other sites; and through a variety of visual media, including architecture, public sculpture, photography, and film. Class sessions will be specifically devoted to comparing the ideas that formed these cities and how their identities and built environments have changed over time.

ARC 0182 - THE CITY OF ROME AND ITS ARCHITECTURE: FROM AENEAS TO ZAHA HADID

Minimum Credits: 3

Maximum Credits: 3

In this course we will have the absolute pleasure of studying the city of Rome through time and space. We will start with the city's mythical and legendary founding by Aeneas nearly three millennia ago and work our way through contemporary Rome. Focal points will include: the Augustan principate during the Roman Empire, the building and urban planning of the Baroque popes, Mussolini's "Third Rome," and the contemporary city of Renzo Piano and Zaha Hadid. It is important to note that this course aims to present a fuller and richer examination of the lived experience in the city of Rome through time. Recent archaeological work has shed tremendous light on the living and working conditions within city from antiquity to the present day.

ARC 0300 - INTRODUCTION TO HISTORIC PRESERVATION

Minimum Credits: 3

Maximum Credits: 3

This course explores the goals, methods, and practice of historic preservation in the United States through a variety of historical, theoretical, and practical points of view. Through intensive reading, class discussion, field trips, case studies, and guest speakers representing various sectors of the preservation community in Pittsburgh, the course investigates such topics as: (1) the influence of historic preservation in the built environment; (2) philosophies and politics of preservation; (3) 'reading' buildings and landscapes for their cultural meanings; (4) protecting historic places and documenting their significance.*

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: School of Arts and Sciences (ARTSC)

ARC 0401 - BUILDING STRUCTURES 1

Minimum Credits: 3

Maximum Credits: 3

This course introduces architecture students to the language (lingua franca), mathematics and engineering behind the field of structural engineering. Using building structures as a foundation, students will engage in fundamental analysis (statics and simple structural analysis), materials selection and performance (mechanics and materials science), and the selection of both gravity and lateral-force resisting systems (engineering design). The course content will focus on 'hand methods' of calculation suitable for preliminary design and so-called 'back of the envelope calculations'.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ARC 0402 - BUILDING SYSTEMS 1

Minimum Credits: 3

Maximum Credits: 3

This course introduces architectural design responses for energy conservation and natural conditioning, human comfort, and the site-specific dynamics of climate. In the first section of this course, students will be introduced to building energy conservation and passive heating and cooling technologies. Students will gain an understanding of the basic laws of comfort and heat flow with the variables of local climate to create energy design guidelines for their own work. This course will illustrate overview of world energy consumption in buildings and energy design standards on building energy conservation successes, and emerging demands for a broader definition of sustainability. The course will end with a focus on the design integration of natural conditioning systems and the potentially dynamic interface of mechanical systems in small- and large-scale buildings. Students will leave with technical knowledge about established and emerging systems, technologies and assemblies of building construction, and methods to assess those technologies. The core product of this course is a set of full design specifications and calculations for a residential-scale building. This project stresses the significance of architectural design decision-making on energy consumption and comfort. Students will compile a professional energy consultant's report, designing the most viable energy conservation retrofit measures for their client from siting, massing, organization, enclosure detailing, opening control, to passive system integration and management. The U.S. is facing an energy crisis. This nation uses more energy per capita than every other industrialized nation. At the same time, the rising cost of energy is a source of poverty and inequity. Low-income households are burdened with rising energy costs. Our commitment to designing net zero energy and carbon positive buildings and communities is critical to environment equity and the UN Sustainable Development Goals.

ARC 1136 - EARLY AMERICAN ARCHITECTURE

Minimum Credits: 3

Maximum Credits: 3

Architecture often serves as a prime document and indicator of America's past and future. The theme of this course is the search for identity in American architecture in the centuries from the colonial settlements to the Civil War. The course studies both the recorded history of American architecture and the unrecorded millennium before that, to show its surprising cohesion in the face of great cultural and territorial diversity.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

ARC 1137 - AMERICAN ARCHITECTURE SINCE INDUSTRIALIZATION

Minimum Credits: 3

Maximum Credits: 3

By 1880 traditional American architectural values had broken down under a barrage of ornament and imported European styles. But at the same moment a new American architecture was taking shape to express the new wealth of post-Civil War America and its new social order. The next hundred years would see a succession of brilliant architects in Sullivan, Wright, Mies, Johnson and the pluralists of today. These individual successes only partially mask some major problems; both constitute the underlying themes of this course.

Minimum Credits: 3

Maximum Credits: 3

This course offers a critical history of the Black labor, creativity, craftsmanship, engineering, and activism that built the United States of America. It is undeniable that Black Americans and African Americans have been brutally marginalized by the instruments of systemic racism including segregation, redlining, eviction, and more recently gentrification. In this class, however, that very real and continuing history of oppression is studied as the fuel for the creative agency of Black individuals and communities. Appropriating, intervening, and shaping the built environment became one of the many forms of Black resistance to racism and systemic injustices. In doing so, Black hands and Black minds shaped the very fabric of America's landscape. Our class begins and ends in Washington DC, posing important questions about the hidden and overt symbols of Black heritage in the nation's capital.

ARC 1152 - ROMAN ARCHITECTURE

Minimum Credits: 3

Maximum Credits: 3

The course will examine the development of Roman architecture from its origins in Etruria and Central Italy to the Middle Empire (ca. 150 AD). Special attention will be given to the relationship of architectural forms, types and functions to changes in Roman politics and society and the significance of materials and outside influences on the development of local Italian traditions and forms. The interaction between Roman architectural forms and local traditions in the provinces to create a Roman imperial "Koine" will be treated only in passing.

ARC 1153 - EARLY CHRISTIAN AND BYZANTINE ARCHITECTURE

Minimum Credits: 3

Maximum Credits: 3

This course on early Christian and Byzantine architecture balances modern scholarship on the origins and development of church-building with a conceptual study of what worship is and how it has been housed. Individual topics of study vary from Rome and Constantinople, to "underground" churches, to the splendor of the basilicas built for Constantine and Justinian. Field trips to analyze a church and synagogue service complement the lectures and readings.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

ARC 1154 - CONSTRUCTING THE GOTHIC

Minimum Credits: 3

Maximum Credits: 3

Treats the development of gothic architecture from the beginning, in 1140, to the death of St. Louis, in 1270, with emphasis on Northern France. Focuses on liturgical requirements, structural rationale, stylistic formulation, and decorative programs. Includes analysis of major documents.

Academic Career: Undergraduate

Course Attributes: West European Studies

ARC 1156 - HIGH RENAISSANCE ARCHITECTURE

Minimum Credits: 3

Maximum Credits: 3

The architecture of the high Renaissance and mannerism (from about 1500 to about 1580 in Rome and other centers of Italy) changed forever the face of architecture. This course focuses on the Roman projects of Bramante, Raphael, Michelangelo and Leonardo da Vinci. It then follows the mutation of high Renaissance ideals into mannerism and the spread of both styles in Northern Italy, particularly in town planning and in the villas and churches of Andrea Palladio around Venice.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

ARC 1158 - ARCHITECTURE AND ENLIGHTENMENT

Minimum Credits: 3

Maximum Credits: 3

This course will examine architecture, city planning, interior design, and gardening in eighteenth-century Europe as the product of social, industrial, administrative, and intellectual transformations that began to radically challenge traditional spatial configurations and conventional approaches to building. In cosmopolitan centers like London and Paris, an unprecedented explosion of print media, rapid rises in literacy, and the development of a public sphere outside official power structures opened debate in the arts to previously marginal figures. A range of new voices thus emerged that impacted policy decisions in the urban realm and proffered advice and guidance in thinking about aesthetics and artistic production. The rise of science held out the possibility that cities and institutions could be reshaped to improve human welfare through better hygiene and the expansion of commerce. Influential new classes defined by wealth or specialized knowledge generated the creation of building types for a range of new activities. Elite domestic space in particular reflects a wholesale transformation of social priorities motivated by the novel concept of privacy. Narrowly defined Renaissance discourses on the arts founded exclusively on the model of ancient Rome collapsed under an avalanche of data gathered in remote sites around the Mediterranean and through contact with more far-flung civilizations around the world. New intellectual paradigms reconfigured the relationship between individual and nature, between modern present and historical past. Consequently, the purpose of architecture mutated in the course of the eighteenth century as a bewildering range of new possibilities for shaping building and reshaping social relations were explored. Well before political revolution rocked European governments and toppled traditional hierarchies, the built environment served as a laboratory for experimentation and as a forum for reimagining society.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

ARC 1160 - ARCHITECTURE: IMAGE, TEXT, THEORY

Minimum Credits: 3

Maximum Credits: 3

This course treats the historical development of aesthetic theories employed in the conception of architectural design through the course of Western civilization. It focuses on Vitruvius in antiquity, the re-writings of Vitruvius in the renaissance, and the key theorists - both moralists and rationalists - of the modern era (including Ruskin, Viollet le-Duc, Le Corbusier).

Course Attributes: Global Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req., West European Studies, Writing Intensive Course (WRIT)

ARC 1161 - MODERNITY, MODERNISM AND HOUSING

Minimum Credits: 3

Maximum Credits: 3

This course offers multiple perspectives on architectural modernism and modernity through the perspective of dwelling. We will consider examples of modern architecture from the Americas, Europe, Africa, the middle East and Asia from the late 19th century (starting with the debates regarding tenements in this country and working-class housing in England) and end with the demolition of the Pruitt-Igoe housing projects in St. Louis in 1972. The lens of housing will allow us to consider modernism in different geographic contexts (East and West); under different political conditions (in the colonial periphery, in the heart of empire, as part of state-sponsored redevelopment projects, and as part of the nation-building process in the developing world) and through a range of theoretical vectors (i.e. The modernist house as a manifesto for a new way of living; the attention received by vernacular building traditions and various schemes to replicate them as part of the modern project; the role of post-war technology in prefabricated

housing; and the role of museums, such as the MOMA and other institutions such as the United Nations in calcifying modernism in various locales around the world). This course is designed to give students a strong foundation in the theoretical, aesthetic and historical expressions of architectural modernism. It is also designed to expand the range of architectural modernism beyond the traditional Euro-Ameri-centric canon to include alternative modernisms across global geographies.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

ARC 1162 - CAMPUS-COMMUNITY WORKSHOP

Minimum Credits: 3

Maximum Credits: 3

Architects and designers have a vital role to play as thinkers and advocates who work with organizations and communities to help imagine ways to reshape the environments in which we live and interact. Over the course of the term, students will investigate the Pitt campus and surrounding Oakland neighborhoods, conduct original research using primary and secondary sources, and think critically and creatively about ways the environment can be shaped to make positive change. Each student will develop an original, written proposal for either [1] an intervention that responds to a need, enhances the experience of being at the university, or improves the quality of life on campus or in an adjacent neighborhood; or [2] a research project that could be continued in a subsequent term for independent study credit.

Academic Career: Undergraduate

Course Component: Workshop

Grade Component: Letter Grade

Course Requirements: PREQ: ARC 1201 AND ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006) LVL: Junior or Senior

ARC 1180 - WORLD CITIES

Minimum Credits: 3

Maximum Credits: 3

This course establishes a set of issues and a chronological context through which to understand the main patterns of city development. Thus the pairing of St. Petersburg and Brasilia, London and Los Angeles, Amsterdam and Chicago, points out similarities and differences in their shape and social context. Student reports on individual cities are an integral element of the course, and influence the choice of cities to be studied in detail.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Architectural Studies, Global Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req., West European Studies

ARC 1181 - PITTSBURGH ARCHITECTURE/URBANISM

Minimum Credits: 3

Maximum Credits: 3

The course studies the physical environment of Pittsburgh; the topography, early settlement, the expansion of its industrial center, the post-war renewal, and the current shift from production to a service-based economy. A parallel study in the architectural history of Pittsburgh focuses on images of individual buildings from Fort Pitt to the new skyscrapers. Student papers either expand research in building categories (industrial, domestic, etc.) Or integrate the physical development of the region with its political and social history.

Academic Career: Undergraduate

Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ARC 1182 - PITTSBURGH NEIGHBORHOODS

Minimum Credits: 3

Maximum Credits: 3

Pittsburgh Neighborhoods is a course where students learn about people, culture, history, and current issues that confront under-represented communities and neighborhoods in Pittsburgh. Throughout the semester, with direction from the instructor, students learn about and employ ways to see, document, and interpret a neighborhood by engaging the built environment, historical documents, and community members in storytelling. They approach the built environment as a cultural product, explore place as a fusion of material culture and human perceptions and practices, and frame questions of power around the politics of the built environment. In this class, we will employ methods that help us transcend the realm of the visual and explore the experiential and ephemeral. We will learn to observe with all our senses, listen to community members, and document life when in the field, and excavate and explore visual and textual records when in the archive. In doing so, we will adopt theories and methodologies from multiple fields, including urban/architectural history, cultural geography, anthropology, public history, and material culture studies.

Academic Career: Undergraduate

ARC 1201 - ARCHITECTURE DESIGN STUDIO 1

Minimum Credits: 6

Maximum Credits: 6

At the core of every nationally accredited school of architecture is the design studio. The design studio integrates skills learned in other architecture courses in the production of a design project. This course prepares students for the rigor of the architectural design process and exposes them to the unique pedagogical experience of a design studio. This course is designed to give students who are majoring in architectural studies and who intend to pursue a professional degree in architecture at the graduate level exposure to a sophisticated conceptual framework for thinking about three-dimensional composition and architectural problem solving. The course is also intended to emphasize the necessity of excellent graphic skills and technical skills in model-making to communicating design ideas. This course is meant to serve as an intermediary step between the /architectural studies seminar/ (HAA 1913) and the studio arts requirements for the architectural studies major, and the more advanced architectural design work in HAA 1917.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

Course Requirements: PREQ: ARC 0201; PLAN: Architectural Studies(BA) or Architecture(BS) or Architecture - Design(MN)

ARC 1202 - ARCHITECTURE DESIGN STUDIO 2

Minimum Credits: 6

Maximum Credits: 6

This course is designed to give students who are majoring in architectural studies and who intend to pursue a professional degree in architecture at the graduate level exposure to a sophisticated conceptual framework for thinking about three-dimensional composition and architectural problem solving known as /system-based design/. The course is also intended to emphasize the necessity of excellent graphic skills and technical skills in model-making to communicating design ideas. This course is meant to serve as a capstone for the architectural studies major.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

Course Requirements: PREQ: ARC 1201

ARC 1203 - DESIGN STUDIO 3

Minimum Credits: 6

Maximum Credits: 6

This course is designed to give students who are majoring in architectural studies and who intend to pursue a professional degree in architecture at the graduate level exposure to a sophisticated conceptual framework for thinking about three-dimensional composition and architectural problem solving known as /system-based design/. The course is also intended to emphasize the necessity of excellent graphic skills and technical skills in model-making to communicating design ideas. This course is meant to serve as a capstone for the architectural studies major.

Course Requirements: PREQ: ARC 1203

ARC 1210 - FALLINGWATER STUDIO

Minimum Credits: 6

Maximum Credits: 6

As an extension to the Architectural Studies studio sequence, ARC 1210, Fallingwater Studio, will offer further exploration in site-specific design, form-making, and materials. In this studio, students will be introduced to conceptual ideas about the synergy between the building site and architectural form. In this sense, site will be more than just the groundplane on which designs are projected and will include the specific possibilities informed by a conceptual understanding of the culture and nature that defines a place. The resultant architectural products in this studio should be understood as interventions that become part of the site and that are similarly affected by culture, nature, and time.

Academic Career: Undergraduate

Course Component: Credit Laboratory

ARC 1310 - PRESERVATION - TEXTS AND THEORY

Minimum Credits: 3

Maximum Credits: 3

This course is the capstone writing seminar for architectural studies majors pursuing the track in preservation planning.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: Writing Intensive Course (WRIT)

ARC 1320 - DOCUMENTATION AND CONSERVATION STUDIO

Minimum Credits: 6

Maximum Credits: 6

This course is intended to provide an intensive foundation in the proper techniques of working in the field of architectural conservation. Primary emphasis is on learning directly from specific buildings and sites, with secondary emphasis on placing these findings within a practical preservation planning context. Background knowledge for analysis and for developing preservation recommendations will come from intensive reading, guest speakers, case studies, class discussions, field trips and exercises in building materials conservation. Concurrent with the development of approaches to conservation, students will also acquire or sharpen a variety of academic skills such as the ability to conduct historical research; graphic representation techniques; and professional writing and public presentation skills.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

ARC 1330 - GLOBAL PRESERVATION

Minimum Credits: 3

Maximum Credits: 3

The late-nineteenth and early-twentieth century debates regarding the role of the architectural monument as a signifier of the past, as a container of memory and more importantly authenticity, were the definitive moment in the institutionalization and professionalization of architectural preservation around the world. In a 1903 essay titled 'The Modern Cult of Monuments,' art historian Alois Reigl claimed that while the creation of monuments (i.e. structures built to memorialize certain events or persons) had a long history that predates modernity, the 'cult of the monument' (i.e. the allocation of the monument as a unique and original object in a pre-ordained historical narrative of social and cultural evolution) came about as recently as the nineteenth-century. It is this coupling of the advent as well as the progress of modernity along with the formalization of systems of historic preservation that this course seeks to explore.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SU3 Elective Basis

ARC 1340 - HERITAGE SITES

Minimum Credits: 3

Maximum Credits: 3

According to the United Nations Educational, Scientific and Cultural Organization (UNESCO), heritage sites encompass sites of "outstanding universal value from the historical, aesthetic, ethnological or anthropological point of view." This course will develop the fundamental themes, ideas, and case studies required to analyze, understand and critically engage with heritage sites in a comparative and global perspective. We will begin charting the European origins of the western understandings of heritage and exploring the development of national and international heritage legislation, charters and organizations. The course will then explore emerging trends that challenge Eurocentric notions of heritage: from critical heritage studies to approaches that specifically focus on minorities, women, and indigenous groups, and the broader issues of human rights and development. Starting from the second third of the semester, case studies from different geographic areas, time periods and themes will be discussed: heritage sites and national identity; heritage sites and tourism; heritage sites and sustainable development; threats to heritage; negative and difficult heritage; heritage and human rights; heritage futures. Finally, we will discuss the increasing interest in bottom-up initiatives that focus on grassroots, people-centered approaches to foster community engagement and participation in the management, programming and interpretation of heritage.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

ARC 1901 - UNDERGRADUATE TEACHING ASSISTANTSHIP

Minimum Credits: 1

Maximum Credits: 3

This course enables advanced majors to partner with a faculty member as a teaching assistant in a pre-existing departmental course. This collaborative project will result in the enrichment of the course and improve the teaching-learning enterprise for all parties (faculty, Undergraduate teaching assistants, and students enrolled in the course).

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Satisfactory/No Credit

ARC 1911 - ARCHITECTURE AND DIGITAL MEDIA 1

Minimum Credits: 3

Maximum Credits: 3

An introduction to the graphic communication of architectural documents utilizing computer aided drafting (CAD) techniques. This introductory cad course is designed to give students a working knowledge of the AutoCAD drafting

system. The course has been designed to better acquaint students with concepts, processes and skills required by professionals in the field to create and modify computer-generated drawings. Students will learn the commands and functions necessary to input, process and output two dimensional working drawings in the form of plans, elevations and sections. Three-dimensional visualization will also be covered as a means to explore massing and proportion. In addition to the fundamental design methods and practices for the creation of architectural drawings, exercises will focus on fundamental concepts such as scaling, dimensioning, annotating as well as maintenance of CAD drawing files through the use of operating system commands.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

ARC 1912 - ARCHITECTURE AND DIGITAL MEDIA 2

Minimum Credits: 3

Maximum Credits: 3

The architecture, engineering, construction and operations industry has well documented inefficiencies stemming primarily from fragmentation in the project delivery process. At the same time, the industry faces significant challenges such as the demand to deliver projects more economically, the desire for more environmentally responsible projects, and the expectation of more predictability in performance -- all of which call for more integration and collaboration throughout a project's lifecycle. New technologies such as building information modeling (BIM) are revolutionizing architecture and construction, providing a platform that allows project information to be captured, structured and analyzed throughout the entire lifecycle of a project, enabling a more integrated, collaborative process that supports more informed decision making and higher levels of efficiency. In this course, students will learn the principles of BIM using Revit software.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: PLAN: ARCHST-BA, ARCH-BS, or ARCDDES-MN

ARC 1990 - ARCHITECTURAL STUDIES INTERNSHIP

Minimum Credits: 3

Maximum Credits: 3

Academic credit is awarded for practical professional experience gained through a directed internship. The internship is arranged by the student through the university internship office in consultation with the director of architectural studies.

Academic Career: Undergraduate

Course Component: Internship

Grade Component: Satisfactory/No Credit

Course Requirements: PLAN: Architectural Studies (BA and BS)

Course Attributes: Architectural Studies, Undergraduate Internship

ARC 1999 - SENIOR THESIS

Minimum Credits: 3

Maximum Credits: 3

In this course a senior major in the history of art will research and write a research paper and present it as if for publication. The area and topic will be decided upon in consultation with a specific faculty member.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Letter Grade

Arts and Sciences

ARTSC 0010 - BEING HUMAN IN THE AGE OF COVID-19

Minimum Credits: 1

Maximum Credits: 1

This 1-credit course, sponsored by the Humanities Center, offers an opportunity for students to work closely with a team of faculty mentors to engage the COVID-19 crisis from a deeply humanistic perspective. Students will join a community of professors from a range of humanistic fields in a semester of discussions about our current pandemic moment. They will work closely with faculty members who bring research expertise in public health and the African diaspora; speculative fiction and imagining apocalypse; modern US History, the history of science, and the history of activism; the history of art as it has been shaped by plagues and epidemics; and the history of pandemic literature. We will read, talk and think deeply together about what it means to be human in this time of pandemic, and faculty will help students realize how historical, humanistic research methods can respond to the challenges of the present.

ARTSC 0020 - LATIN AMERICA AND CARIBBEAN

Minimum Credits: 3

Maximum Credits: 3

The purpose of this course is to provide students with substantial knowledge concerning the geography, history, and culture of Latin America and the Caribbean and to introduce them to how issues related to the region are studied from a variety of disciplinary perspectives.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Latin American Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

ARTSC 0092 - UNIVERSITY SEMINAR

Minimum Credits: 1

Maximum Credits: 1

University Seminar (ARTSC 0092) provides new and/or transfer students with the skills necessary to maximize their potential for academic success at the University of Pittsburgh. During this course students will be exposed to various University resources; explore educational and career planning; gain academic confidence; and will become familiar with and utilize cognitive science research-based skills necessary for college success.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Satisfactory/No Credit

ARTSC 0101 - FIRST APPROACHES TO RESEARCH

Minimum Credits: 1

Maximum Credits: 1

First Approaches to Research is designed to teach students how to connect to research and creative projects across disciplines, interests, and methodologies. Driven by their own curiosities and the search for answers, students will learn

the tools needed to launch meaningful undergraduate research careers.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Satisfactory/No Credit

ARTSC 0111 - RIGHT START 1

Minimum Credits: 1

Maximum Credits: 1

This course is designed to enhance the academic skills of new students participating in the student support services project (SSS). The course will use collaborative learning strategies to address such topics as note-taking, problem-solving, time-management, test-taking, and goal-setting. This course is very interactive and will use multiple methods of communication and technology to apprise students of course activities along with upcoming SSS events.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Letter Grade

ARTSC 0112 - RIGHT START TO COLLEGE 2

Minimum Credits: 1

Maximum Credits: 1

You must be a part of the trio student support services (SSS) program to take this course. This course is designed to enhance the level of career awareness of students in the student support services (SSS) program. The course will focus on the following topics: academic majors, resume-writing, interview techniques, professional communication, and career investigation. This course is interactive and will use multiple methods of communication and technology to apprise students of course activities along with upcoming SSS events.

ARTSC 0500 - INTRODUCTION TO STUDY ABROAD

Minimum Credits: 1

Maximum Credits: 1

This course explores the study abroad experience. It also addresses the issues of cultural diversity, international understanding and the role of the individual in the global community. The course will inform students of the ways in which study abroad complements and augments their academic program, career goals, and overall personal development.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Satisfactory/No Credit

ARTSC 0550 - HUMANITIES PROSEMINAR 1

Minimum Credits: 3

Maximum Credits: 3

This course serves as an introduction to humanities research for undergraduate students. The professor will help students to formulate a question and find an archive or set of primary sources that allows them to explore that question. Each student will be connected with a faculty mentor with expertise in the field of inquiry they are exploring. In collaboration with both this mentor and the proseminar professor, each student will then develop a research proposal that includes a plan for using their Humanities Center Undergraduate Fellowship over the summer to undertake a humanities research project.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Satisfactory/No Credit

ARTSC 0551 - HUMANITIES PROSEMINAR 2

Minimum Credits: 3

Maximum Credits: 3

In this course, students reconvene following Humanities Proseminar 1 and after their summer Humanities Center Undergraduate Fellowships. Students will share the results of their summer research, explore the answers (and the new questions) that emerged in the course of their work, and make a plan for communicating that research more broadly. Building on a semester of intensive writing, discussion, and focused mentorship, students will ultimately present their research in a public session of the Humanities Center colloquium.

Academic Career: Undergraduate

Minimum Credits: 1

Maximum Credits: 1

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Satisfactory/No Credit

Course Attributes: Study Abroad

ARTSC 1400 - STUDY ABROAD: MULTI-COUNTRY

Minimum Credits: 1

Maximum Credits: 18

This course is for students who enroll in a Study Abroad program that takes place in multiple countries throughout the academic term.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Satisfactory/No Credit

ARTSC 1401 - ELECTIVE AT VERITAS UNIVERSITY

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SU3 Elective Basis

ARTSC 1402 - ELECTIVE AT VERITAS UNIVERSITY 2

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SU3 Elective Basis

ARTSC 1403 - ELECTIVE IN CHINA

Minimum Credits: 3

Maximum Credits: 15

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Satisfactory/No Credit

ARTSC 1404 - GLOBAL CITIES VIRTUAL INTERNSHIP

Minimum Credits: 1

Maximum Credits: 3

This course is for an online Global Experiences program.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Satisfactory/No Credit

ARTSC 1405 - GLOBAL CONSULTING PROJECTS

Minimum Credits: 1

Maximum Credits: 3

This course is for an online Global Experiences program.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Satisfactory/No Credit

ARTSC 1406 - ONLINE GLOBAL CITIES, HALF SEMESTER

Minimum Credits: 1

Maximum Credits: 3

This course is for an online Global Experiences program.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Satisfactory/No Credit

ARTSC 1407 - ONLINE GLOBAL CITIES, WHOLE SEMESTER

Minimum Credits: 1

Maximum Credits: 6

This course is for an online Global Experiences program.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Satisfactory/No Credit

ARTSC 1408 - VIRTUAL PITT IN SPAIN, HALF SEMESTER

Minimum Credits: 1

Maximum Credits: 3

This course is for a virtual Global Experiences program.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Satisfactory/No Credit

ARTSC 1409 - VIRTUAL PITT IN SPAIN, WHOLE SEMESTER

Minimum Credits: 1

Maximum Credits: 6

This course is for a virtual Global Experiences program.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Satisfactory/No Credit

ARTSC 1410 - VIRTUAL STUDY ABROAD PROVIDER PROGRAM

Minimum Credits: 3

Maximum Credits: 15

This course is for a virtual Global Experiences program.

Academic Career: Undergraduate

Course Component: Independent Study
Grade Component: Satisfactory/No Credit

Minimum Credits: 1
Maximum Credits: 3
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: Satisfactory/No Credit
Course Attributes: Study Abroad

ARTSC 1455 - YELLOWSTONE FIELD STUDIES

Minimum Credits: 0
Maximum Credits: 0
This course is part of the Study Abroad program.
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: No Grade Required

ARTSC 1460 - WYOMING FIELD STUDIES

Minimum Credits: 0
Maximum Credits: 0
This course is part of the Study Abroad program.
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: No Grade Required

ARTSC 1461 - WYOMING STUDIO ARTS

Minimum Credits: 0
Maximum Credits: 0
This course is part of the Study Abroad program.
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: Non-Graded Component

ARTSC 1462 - VIENNA THEN AND NOW

Minimum Credits: 1
Maximum Credits: 3
This course is part of a Study Abroad program.
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: LG/SNC Elective Basis
Course Attributes: Study Abroad

ARTSC 1499 - STUDY ABROAD: LATIN AMERICA

Minimum Credits: 3
Maximum Credits: 15
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: Satisfactory/No Credit

ARTSC 1500 - STUDY ABROAD: EL SALVADOR

Minimum Credits: 1
Maximum Credits: 15
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: Satisfactory/No Credit
Course Attributes: Non-Pitt Class, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

ARTSC 1503 - STUDY ABROAD: CAMEROON

Minimum Credits: 1
Maximum Credits: 15
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: Satisfactory/No Credit
Course Attributes: Non-Pitt Class

ARTSC 1505 - STUDY ABROAD: ARGENTINA

Minimum Credits: 1
Maximum Credits: 15
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: Satisfactory/No Credit
Course Attributes: Latin American Studies, Non-Pitt Class, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

ARTSC 1506 - STUDY ABROAD: AUSTRALIA

Minimum Credits: 1
Maximum Credits: 15
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: Satisfactory/No Credit
Course Attributes: Non-Pitt Class, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

ARTSC 1507 - STUDY ABROAD: AUSTRIA

Minimum Credits: 1
Maximum Credits: 15
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: Satisfactory/No Credit
Course Attributes: Non-Pitt Class, SCI Polymathic Contexts: Global&Cross Cul GE. Req., West European Studies

ARTSC 1508 - STUDY ABROAD: BRAZIL

Minimum Credits: 1

Maximum Credits: 15

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Satisfactory/No Credit

Course Attributes: Latin American Studies, Non-Pitt Class, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

ARTSC 1509 - STUDY ABROAD: BELGIUM

Minimum Credits: 1

Maximum Credits: 15

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Satisfactory/No Credit

Course Attributes: Non-Pitt Class, SCI Polymathic Contexts: Global&Cross Cul GE. Req., West European Studies

ARTSC 1510 - STUDY ABROAD: CANADA

Minimum Credits: 1

Maximum Credits: 15

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Satisfactory/No Credit

Course Attributes: Non-Pitt Class, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

ARTSC 1511 - STUDY ABROAD: BOLIVIA

Minimum Credits: 1

Maximum Credits: 15

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Satisfactory/No Credit

Course Attributes: Latin American Studies, Non-Pitt Class, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

ARTSC 1512 - STUDY ABROAD: CHILE

Minimum Credits: 1

Maximum Credits: 15

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Satisfactory/No Credit

Course Attributes: Latin American Studies, Non-Pitt Class, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

ARTSC 1514 - STUDY ABROAD: CYPRUS

Minimum Credits: 1

Maximum Credits: 15

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Satisfactory/No Credit

Course Attributes: Non-Pitt Class, Russian & East European Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req., West European Studies

ARTSC 1515 - STUDY ABROAD: CHINA

Minimum Credits: 1

Maximum Credits: 15

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Satisfactory/No Credit

Course Attributes: Non-Pitt Class, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

ARTSC 1517 - STUDY ABROAD: COLOMBIA

Minimum Credits: 1

Maximum Credits: 15

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Satisfactory/No Credit

Course Attributes: Latin American Studies, Non-Pitt Class, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

ARTSC 1518 - STUDY ABROAD: COSTA RICA

Minimum Credits: 1

Maximum Credits: 15

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Satisfactory/No Credit

Course Attributes: Latin American Studies, Non-Pitt Class, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

ARTSC 1519 - STUDY ABROAD: CZECH REPUBLIC

Minimum Credits: 1

Maximum Credits: 15

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Satisfactory/No Credit

Course Attributes: Non-Pitt Class, Russian & East European Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req., West European Studies

ARTSC 1520 - STUDY ABROAD: SLOVAKIA

Minimum Credits: 1

Maximum Credits: 15

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Satisfactory/No Credit

Course Attributes: Non-Pitt Class, Russian & East European Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req., West European Studies

ARTSC 1521 - STUDY ABROAD: DOMINICAN REPUBLIC

Minimum Credits: 1

Maximum Credits: 15

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Satisfactory/No Credit

Course Attributes: Latin American Studies, Non-Pitt Class, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

ARTSC 1522 - STUDY ABROAD: DENMARK

Minimum Credits: 1

Maximum Credits: 15

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Satisfactory/No Credit

Course Attributes: Non-Pitt Class, SCI Polymathic Contexts: Global&Cross Cul GE. Req., West European Studies

ARTSC 1524 - STUDY ABROAD: ECUADOR

Minimum Credits: 1

Maximum Credits: 15

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Satisfactory/No Credit

Course Attributes: Latin American Studies, Non-Pitt Class, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

ARTSC 1525 - STUDY ABROAD: ENGLAND

Minimum Credits: 1

Maximum Credits: 15

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Satisfactory/No Credit

Course Attributes: Non-Pitt Class, SCI Polymathic Contexts: Global&Cross Cul GE. Req., West European Studies

ARTSC 1527 - STUDY ABROAD: FRANCE

Minimum Credits: 1

Maximum Credits: 18

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Satisfactory/No Credit

ARTSC 1529 - STUDY ABROAD: GERMANY

Minimum Credits: 1

Maximum Credits: 18

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Satisfactory/No Credit

Course Attributes: Non-Pitt Class, SCI Polymathic Contexts: Global&Cross Cul GE. Req., West European Studies

ARTSC 1530 - STUDY ABROAD: FINLAND

Minimum Credits: 3

Maximum Credits: 15

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Satisfactory/No Credit

Course Attributes: Non-Pitt Class, SCI Polymathic Contexts: Global&Cross Cul GE. Req., West European Studies

ARTSC 1531 - STUDY ABROAD: GREECE

Minimum Credits: 1

Maximum Credits: 15

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Satisfactory/No Credit

Course Attributes: Non-Pitt Class, Russian & East European Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req., West European Studies

ARTSC 1532 - STUDY ABROAD: GUATEMALA

Minimum Credits: 1

Maximum Credits: 15

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Satisfactory/No Credit

Course Attributes: Latin American Studies, Non-Pitt Class, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

ARTSC 1533 - STUDY ABROAD: HUNGARY

Minimum Credits: 1

Maximum Credits: 15

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Satisfactory/No Credit

Course Attributes: Non-Pitt Class, Russian & East European Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req., West European Studies

ARTSC 1534 - STUDY ABROAD: HONG KONG

Minimum Credits: 3

Maximum Credits: 15

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Satisfactory/No Credit

Course Attributes: Non-Pitt Class, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

ARTSC 1535 - STUDY ABROAD: IRELAND

Minimum Credits: 1

Maximum Credits: 15

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Satisfactory/No Credit

Course Attributes: Non-Pitt Class, SCI Polymathic Contexts: Global&Cross Cul GE. Req., West European Studies

ARTSC 1537 - STUDY ABROAD: HONDURAS

Minimum Credits: 1

Maximum Credits: 15

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Satisfactory/No Credit

Course Attributes: Non-Pitt Class

ARTSC 1538 - STUDY ABROAD: ISRAEL

Minimum Credits: 1

Maximum Credits: 15

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Satisfactory/No Credit

Course Attributes: Non-Pitt Class, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

ARTSC 1539 - STUDY ABROAD: NORTHERN IRELAND

Minimum Credits: 3

Maximum Credits: 15

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Satisfactory/No Credit

ARTSC 1540 - STUDY ABROAD: ITALY

Minimum Credits: 1

Maximum Credits: 15

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Satisfactory/No Credit

Course Attributes: Non-Pitt Class, SCI Polymathic Contexts: Global&Cross Cul GE. Req., West European Studies

ARTSC 1541 - STUDY ABROAD: JAMAICA

Minimum Credits: 3

Maximum Credits: 15

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Satisfactory/No Credit

Course Attributes: Non-Pitt Class, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

ARTSC 1542 - STUDY ABROAD: JAPAN

Minimum Credits: 1

Maximum Credits: 18

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Satisfactory/No Credit

Course Attributes: Non-Pitt Class, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

ARTSC 1544 - STUDY ABROAD: JORDAN

Minimum Credits: 1

Maximum Credits: 18

This course is for students studying in Jordan as part of a Study Abroad/Pitt Global Experience program.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Satisfactory/No Credit

Course Attributes: Non-Pitt Class, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

Minimum Credits: 1

Maximum Credits: 12

Academic Career: Undergraduate

Course Component: Internship

Grade Component: Satisfactory/No Credit

ARTSC 1900 - ARTSC ACADEMIC INTERNSHIP

Minimum Credits: 1

Maximum Credits: 3

An academic internship offers students a unique learning opportunity to connect classroom knowledge with real-world settings as they explore careers and gain valuable experience. Students may earn from 1-3 credits for an experience that can be related to an academic field of study. The experience must be pre-professional in nature and must be approved by the Dietrich School Office of Undergraduate Research. Students must seek out and apply for their own internship. Internship can be found through Career Development and Placement Assistance, or students can contact the Office of Undergraduate Research. Students who are earning credit for ARTSC 1900 internships may not receive pay. Students must work at least 120 hours over the course of the term to be eligible for the maximum of 3 credits. In order to earn credit, the student must have a Dietrich School faculty sponsor (full-time only) who will assign related academic work. Internships are graded as S/NC.

Academic Career: Undergraduate

Course Component: Internship

Grade Component: Satisfactory/No Credit

ARTSC 1901 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 3

Independent study entails an independent program of study, research, or creative activity with some guidance from a sponsoring faculty member.

Maximum Credits: 3
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ARTSC 1903 - INTERNSHIP IN LONDON

Minimum Credits: 3
Maximum Credits: 6
An internship is a special type of independent study in which the student works in a non-academic setting. The internship should be directly related to an academic discipline, and the student's learning is evaluated and graded by a faculty member. Internships under this course listing are conducted in London, England, as part of Pitt's London study abroad program.

ARTSC 1920 - REMOTE GLOBAL INTERNSHIP

Minimum Credits: 1

Maximum Credits: 3

This Study Abroad course offers students global internships while they remain at home.

Academic Career: Undergraduate

Course Component: Internship

Grade Component: Satisfactory/No Credit

ARTSC 1930 - STUDY ABROAD: ESTONIA

Minimum Credits: 1

Maximum Credits: 15

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Satisfactory/No Credit

Course Attributes: Russian & East European Studies, West European Studies

ARTSC 1950 - STUDY LAB: CRLA LEVEL 1 PEER TUTOR SEMINAR

Minimum Credits: 1

Maximum Credits: 1

This course is a seminar for peer tutors who work with fellow students on behalf of the Study Labs.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Satisfactory/No Credit

ARTSC 1987 - CLAS POP UP

Minimum Credits: 1

Maximum Credits: 1

This course is for Pop Ups sponsored by the Center for Latin American Studies.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Satisfactory/No Credit

ARTSC 1988 - CENTER FOR LATIN AMERICAN STUDIES INTERNSHIP

Minimum Credits: 1

Maximum Credits: 3

This course is for internships within the Center for Latin American Studies unit.

Academic Career: Undergraduate

Course Component: Internship

Grade Component: Satisfactory/No Credit

ARTSC 1989 - CENTER FOR LATIN AMERICAN STUDIES COMMUNITY INTERNSHIP

Minimum Credits: 1

Maximum Credits: 3

The Center for Latin American Studies will use this course to offer local internships to students. Arrangements for the

internship must be made through that office.

Academic Career: Undergraduate

Course Component: Internship

Grade Component: Satisfactory/No Credit

Astronomy

ASTRON 0086 - OBSERVATIONAL ASTRONOMY

Minimum Credits: 3

Maximum Credits: 3

This course is for students who have a desire to become familiar with the nature and motions of celestial objects in the night sky and techniques to observe them. The course will be given at a level suitable for both science and non-science majors who want to learn how to use a telescope and enjoy observational and practical astronomy.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req.

ASTRON 0087 - BASICS OF SPACE FLIGHT

Minimum Credits: 3

Maximum Credits: 3

Intended for non-science majors, this course focuses on identifying and understanding the general concepts associated with space flight.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req.

ASTRON 0088 - STONEHENGE TO HUBBLE

Minimum Credits: 3

Maximum Credits: 3

This course gives a historical perspective on the development of Astronomy, beginning with the 4500 year old monolithic monument, Stonehenge, to the recent spectacular discoveries by the Hubble and James Webb space telescopes. The ancient Greeks' many contributions to astronomy will be presented, along with the advancements made by stalwarts Copernicus, Newton, Kepler, Galileo, Einstein, and others. Phenomena that can be readily observed with the unaided eye or a small telescope are also discussed.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req.

ASTRON 0089 - STARS, GALAXIES AND THE COSMOS

Minimum Credits: 3

Maximum Credits: 3

This is a self-contained course for students not majoring in the physical sciences. The Universe in which we live is an unimaginably vast and rich place that is understandable through the same physical laws that govern our existence here on Earth. By exploring topics from our nearest neighboring stars to the farthest galaxies newly formed after the Big Bang, this course will engage your mind to better understand our Universe and your everyday world. Through active and engaged participatory lectures, we will observe the cosmos and learn about the birth, life, and death of stars and their mysterious remnants: pulsars and black holes. From studying stars and our own Milky Way Galaxy, we will expand our vision to cosmology and investigate the origin and ultimate fate of the Universe.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req.

ASTRON 0113 - INTRODUCTION TO ASTROPHYSICS

Minimum Credits: 3

Maximum Credits: 3

An introduction to the physics of the solar system, stars, galaxies, extragalactic objects and the Universe at large. Topics include: size scales of the Universe, some review of basic physics, telescopes, the evolution and deaths of stars, the interstellar medium, star clusters, our Milky Way galaxy, external galaxy formation and evolution, active galactic nuclei and quasars, dark matter, dark energy, and cosmology. This course is intended for students majoring in the natural sciences. Although calculus is not used in this course, algebra and trigonometry are used extensively. Students who are not majoring in the natural sciences and/or who are not comfortable with algebra and trigonometry-based problem solving are advised to take ASTRON 0089. Although there are no formal physics prerequisites for ASTRON 0113, experience with at least high school physics is recommended.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: MATH 0020 or any MATH greater than or equal to MATH 0031 (Min Grade 'C') or MATH PLACEMENT SCORE (61 or greater)

Course Attributes: DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req.

ASTRON 0413 - HONORS INTRODUCTION TO ASTRONOMY

Minimum Credits: 4

Maximum Credits: 4

This course will be an introduction to astronomy and astrophysics. The 4-credit honors course will consist of all aspects of the 3-credit course, including lectures and homework with additional problems tailored for this course. ASTRON 0413 includes an additional 50-minute class session each week. In these extra sessions, basic topics will be covered in more detail than in ASTRON 0113. These extra sessions will also involve significant problem solving and discussions of the derivations of fundamental results in astronomy and astrophysics. Students considering a major in physics, astronomy, or physics and astronomy are strongly encouraged to take ASTRON 0413 instead of ASTRON 0113.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (MATH 0230 or 0235) and (PHYS 0110 or 0174 or 0475)

Course Attributes: DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req.

ASTRON 1120 - STARS; STELLAR STRUCTURE AND EVOLUTION

Minimum Credits: 3

Maximum Credits: 3

Topics covered include: stellar properties (mass, radius, luminosity, temperature); deductions from binary stars; the sun; the HR diagram; stellar atmospheres and interiors; stars in hydrostatic and thermal equilibrium; equations of state for a perfect gas and for degenerate matter; energy generation and nuclear fusion reactions; opacities; life histories of stars according to mass; star formation; main sequence stars; red giants; white dwarfs; red supergiants; supernovae; neutron stars (pulsars); black holes; evolution of binary systems; results from clusters.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (ASTRON 0113 or 0413) and MATH 0240 and (MATH 1270 or MATH 0290 or MATH 0250); CREQ: PHYS 0477 or 0479

ASTRON 1121 - GALAXIES AND COSMOLOGY

Minimum Credits: 3

Maximum Credits: 3

Topics covered include: the milky way galaxy and its properties; external galaxies and their properties; evolution of galaxies; the expansion of the universe (Hubble Law) and the Extragalactic Distance Scale; Clustering of Galaxies; Dark Matter; Active Galaxies and Quasars (models with supermassive black holes); General Relativity, Cosmology, and the Big Bang Model; the Age and fate of the Universe; the History of the Early Universe (Inflation, Nucleosynthesis of Light Elements, 3 degree background radiation; the IgM and Galaxy Formation.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (ASTRON 0113 or 0413) and MATH 0240 and (MATH 1270 or 0290 or 0250); CREQ: PHYS 0477 or 0479

ASTRON 1122 - THE SOLAR SYSTEM AND EXTRASOLAR PLANETS

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (ASTRON 0113 or 0413) and (MATH 0240 or 0245) and (MATH 0290 or 1270) and (PHYS 0175 or 0476)

ASTRON 1263 - TECHNIQUES OF ASTRONOMY

Minimum Credits: 3

Maximum Credits: 3

The course will roughly be divided into three parts: (1) telescopes, instrumentation, and detectors for radio, IR/optical/UV, X-Ray, and gamma-ray astronomy. (2) Theoretical foundations of observational techniques, (astronomical coordinates, data acquisition, and sources of noise), data processing, analysis techniques, statistics, and model fitting. (3) Practical problems in making observations, data processing, and data analysis, with special attention paid to understanding errors and uncertainties in results.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (ASTRON 0113 or 0413) and (PHYS 0175 or 0476) and (PHYS 0219 or 0520)

ASTRON 1900 - INTERNSHIP

Minimum Credits: 1

Maximum Credits: 9

This course places the student in an "on-the-job" setting in which they receive practical experience in a supervised training environment.

Academic Career: Undergraduate

Course Component: Internship

Grade Component: LG/SNC Elective Basis

ASTRON 1901 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 9

This course gives students the opportunity to design and carry out an individual project not covered by any course offerings.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: LG/SNC Elective Basis

ASTRON 1902 - DIRECTED READING

Minimum Credits: 1

Maximum Credits: 9

This course is designed to give students the opportunity to design a plan of reading to be agreed upon by the student and a supervising faculty member.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SNC Elective Basis

ASTRON 1903 - DIRECTED RESEARCH

Minimum Credits: 1

Maximum Credits: 9

This course is designed to give students the opportunity to design and carry out a research project to be agreed upon by the student and a supervising faculty member.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SNC Elective Basis

Athletic Training

ATHLTR 1800 - PRINCIPLES OF RESEARCH METHODOLOGY

Minimum Credits: 3

Maximum Credits: 3

The study of the nature of research and the applications of the scientific approach in the research procedures. The course focuses on concepts, design techniques and interpretations, as well as limiting factors and ethical considerations.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Pre-Athletic Training (BSPATH-SP)

ATHLTR 1805 - EXERCISE PHYSIOLOGY

Minimum Credits: 2

Maximum Credits: 2

This course focuses on the effects of exercise in preventing and treating disability, in optimizing the rehabilitation process, and in maintaining the health of those with disabilities. The course emphasizes the effects of exercise on the various body systems, including the cardiovascular, neuromuscular, and musculoskeletal, in individuals with disabilities.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN REHSCI (BS, BS-H, BPH); SUBPLAN: BSPATH

ATHLTR 1806 - EXERCISE PHYSIOLOGY LAB

Minimum Credits: 1

Maximum Credits: 1

Required lab component for REHSCI 1215 Exercise Physiology: This course focuses on the effects of exercise in preventing and treating disability, in optimizing the rehabilitation process, and in maintaining the health of those with disabilities. The course emphasizes the effects of exercise on the various body systems, including the cardiovascular, neuromuscular, and musculoskeletal, in individuals with disabilities.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

Course Requirements: PLAN REHSCI (BS, BS-H, BPH); SUBPLAN: BSPATH

ATHLTR 1811 - BASIC ATHLETIC TRAINING

Minimum Credits: 3

Maximum Credits: 3

This course is designed to provide the student with an introduction to the athletic training profession. Topics to include medical terminology, mechanisms of injury, and recognition and treatment of common athletic injuries to major body parts.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

ATHLTR 1812 - BASIC ATHLETIC TRAINING LAB

Minimum Credits: 1

Maximum Credits: 1

An introduction to basic taping techniques and injury evaluation techniques used in the profession of athletic training. Basic supportive strappings and padding for immediate care and competition are presented as well as basic joint evaluation procedures, assessment of vital signs, and crutch fitting.

Academic Career: Undergraduate

Course Component: Clinical

Grade Component: Letter Grade

Course Requirements: CREQ: ATHLTR 1811

ATHLTR 1813 - INTRODUCTION TO CLINICAL ATHLETIC TRAINING 1

Minimum Credits: 1

Maximum Credits: 1

This course is designed to help prepare students for the demands associated with experiential learning and future clinical placements in the Athletic Training Education Program (ATP). The course will have a combined in-person meetings and associated class assignments that will include field observations at approved clinical education sites through the University of Pittsburgh. This course is a prerequisite for the Practicum I-IV Courses in the ATP.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: H/S/U Basis

Course Requirements: SUBPLAN: Pre-Athletic Training (BSPATH-SP)

ATHLTR 1814 - INTRODUCTION TO CLINICAL ATHLETIC TRAINING 2

Minimum Credits: 1

Maximum Credits: 1

This course is designed to help prepare students for the demands associated with experiential learning and future clinical placements in the Athletic Training Education Program (ATP). The course will have a combined in-person meetings and associated class assignments that will include field observations at approved clinical education sites through the University of Pittsburgh. This course is a prerequisite for the Practicum I-IV Courses in the ATP

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: H/S/U Basis

Course Requirements: PLAN: Athletic Training (BS, BS-H, BPH) or BSPATH-SP

ATHLTR 1815 - FOUNDATIONS IN EVALUATION AND TREATMENT

Minimum Credits: 1

Maximum Credits: 1

The objective of this course is to introduce and develop fundamental understanding of the component for evaluation and acute care. Specific objectives are to introduce the student to concepts related to patient interaction in regards to the evaluation process; the components and general principals of the evaluation process (patient observation, history, range of motion, strength, neurovascular, special tests, palpation, and diagnostics); a basic understanding and ability to perform range of motion and strength assessments and apply the appropriate grading tools. This course is a prerequisite for Therapeutic Interventions I-II courses in the Athletic Training Program.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Athletic Training (AT-MS) or SUBPLAN: Pre-Athletic Training (BSPATH-SP)

ATHLTR 1816 - MEDICAL ETHICS

Minimum Credits: 2

Maximum Credits: 2

This course addresses legal and ethical issues encountered by athletic trainers and other healthcare professionals who are part of the Sports Medicine team. Strong emphasis is placed on legal and ethical issues that occur within the realm of direct patient care. Additionally, the course will expose students with legal and institutional positions and examine relevant case studies. Students will also practice developing concrete logical arguments in support of a chosen ethical stance.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: SUBPLAN: Pre-Athletic Training (BSPATH-SP)

ATHLTR 1821 - INJURY EVALUATION AND TREATMENT 1

Minimum Credits: 3

Maximum Credits: 3

The course includes anatomy, recognition, and commonly accepted techniques and procedures for clinical evaluation of common athletic injuries to the foot, ankle, leg, thigh, hip, pelvis and lumbar spine.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Athletic Training (BS, BS-H, BPH)

ATHLTR 1823 - ADMINISTRATIVE ASPECTS OF ATHLETIC TRAINING

Minimum Credits: 2

Maximum Credits: 2

This course presents current administrative issues in athletic training including training room facility and design, record keeping procedures, personnel management and recruitment, medico-legal considerations and budgetary principles.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Athletic Training (BS, BS-H, BPH)

ATHLTR 1824 - ATHLETIC TRAINING PRACTICUM 1

Minimum Credits: 3

Maximum Credits: 3

Designed to supplement first clinical experience presented in seminar fashion to address clinical proficiencies published in the 3rd edition of the NATA athletic training educational competencies introduced in the second semester academic courses. Presented by faculty of the AT program then evaluated in clinical setting in live situations when possible or under simulated conditions when narrated. Specific emphasis placed on those proficiencies that can be grouped into modules and which do not receive broad coverage in an academic course.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: Letter Grade

Course Requirements: PLAN: Athletic Training (BS, BS-H, BPH)

ATHLTR 1831 - THERAPEUTIC MODALITIES AND LAB

Minimum Credits: 4

Maximum Credits: 4

The course presents the theoretical basis for use of superficial heat and cold, ultrasound, electrical muscle stimulation, tens, and other current modalities. Laboratory experiences are included in the use of these modalities.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Athletic Training (BS, BS-H, BPH)

ATHLTR 1833 - STRENGTH AND CONDITIONING

Minimum Credits: 2

Maximum Credits: 2

Instruction is provided describing the physiological basis for development of pre-season, in-season and off-season strength and conditioning programs. Laboratory experiences will include the theory and technique of operating contemporary isotonic, isokinetic and isometric strength training equipment.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: USHRS PLAN: REHSCI-BS SUBPLAN: BSPATH-SP

ATHLTR 1834 - SPECIAL TOPICS IN ATHLETIC TRAINING

Minimum Credits: 2

Maximum Credits: 2

The course includes common orthopedic problems encountered by the athletic trainer and orthopedic surgeon. Students are exposed to commonly used techniques of primary and re constructive surgery through lecture, operating room, clinic, and orthopedic rounds experiences.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Athletic Training (BS, BS-H, BPH)

ATHLTR 1835 - ATHLETIC TRAINING PRACTICUM 2

Minimum Credits: 3

Maximum Credits: 3

Designed to supplement second clinical experience presented in seminar fashion to address clinical proficiencies published in the 3rd edition of the NATA athletic training educational competencies introduced in the second semester academic courses. Presented by faculty of the AT program then evaluated in clinical setting in live situations when possible or under simulated conditions when narrated. Specific emphasis placed on those proficiencies that can be grouped into modules and which do not receive broad coverage in an academic course.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: Letter Grade

Course Requirements: PLAN: Athletic Training (BS, BS-H, BPH)

ATHLTR 1841 - ATHLETIC TRAINING PRACTICUM 3

Minimum Credits: 3

Maximum Credits: 3

Designed to supplement third clinical experience presented in seminar fashion to address clinical proficiencies published in the 3rd edition of the NATA athletic training educational competencies introduced in the second semester academic courses. Presented by faculty of the AT program then evaluated in clinical setting in live situations when possible or under simulated conditions when narrated. Specific emphasis placed on those proficiencies that can be grouped into modules and which do not receive broad coverage in an academic course.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: Letter Grade

Course Requirements: PLAN: Athletic Training (BS, BS-H, BPH)

ATHLTR 1842 - ATHLETIC TRAINING PRACTICUM 4

Minimum Credits: 3

Maximum Credits: 3

Designed to supplement fourth clinical experience presented in seminar fashion to address clinical proficiencies published in the 3rd edition of the NATA athletic training educational competencies introduced in the second semester academic courses. Presented by faculty of the AT program then evaluated in clinical setting in live situations when possible or under simulated conditions when narrated. Specific emphasis placed on these proficiencies that can be grouped into modules and which do not receive broad coverage in an academic course.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: Letter Grade

Course Requirements: PLAN: Athletic Training (BS, BS-H, BPH)

Course Attributes: Capstone Course

ATHLTR 1843 - ADVANCED ORTHOPEDIC ASSESSMENT

Minimum Credits: 2

Maximum Credits: 2

This course will consist of advanced study in the assessment of orthopedic and other sports related injuries to the extremities and spine to include pathophysiology of skeletal and soft tissue insult, proprioception and neuromuscular control and an evidence-based approach to musculoskeletal evaluation, treatment and rehabilitation of sport-related injuries. The content of this course will be presented by practicing clinicians from various disciplines who are also alumni of the Athletic Training Education Program.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Athletic Training(BS, BPH, or BS-H)

ATHLTR 1866 - PSYCHOLOGY OF SPORT

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Athletic Training (BS, BS-H, BPH)

ATHLTR 1885 - INTRODUCTION TO EVIDENCE BASED REHABILITATION

Minimum Credits: 3

Maximum Credits: 3

Provides basic skills in reading, reviewing, and critiquing the research literature in the rehab sciences. These skills will be applied to the relevant literature in diagnosis, prognosis and intervention strategies within the spectrum of rehab science. Students learn to generate relevant research questions, utilize an evidenced based medicine approach, appraisal and synthesis of current articles within the fore mentioned areas. Will culminate in an individual review project aimed at the development and resolution of one research question, using the best, current available literature

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Athletic Training (BS)

ATHLTR 1899 - INDEPENDENT STUDY FOR ATHLETIC TRAINING STUDENTS

Minimum Credits: 1

Maximum Credits: 3

Provides advanced athletic training students an opportunity to explore in depth an area of particular interest to them. It is the student's responsibility to find a faculty member willing to undertake such a tutorial. An individual contract will be required for each student that outlines objectives and means of achieving stated objectives in order to earn a passing grade. ATHLTR 1899 Independent study can only be taken on a Pass/Fail basis

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: H/S/U Basis

Course Requirements: School of Health and Rehabilitation Sciences students only.

ATHLTR 2803 - CLINICAL PRACTICUM 3

Minimum Credits: 3

Maximum Credits: 3

CLINICAL PRACTICUM 3

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

ATHLTR 2809 - FUNCTIONAL HUMAN ANATOMY

Minimum Credits: 2

Maximum Credits: 2

This 2-credit course utilizes the basic structural knowledge provided in Human Anatomy and concepts learned in Kinesiology and Biomechanics to develop an understanding of the functional significance of the structures of the musculoskeletal system, within a movement setting (covering mechanical properties and functional characteristics). In addition to normal function, mechanisms of and adaptations to, common injuries, disease and rehabilitation is discussed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad HSU Basis

Course Requirements: PLAN: Athletic Training (AT-MS) or SUBPLAN: Pre-Athletic Training (BSPATH-SP)

ATHLTR 28804 - CLINICAL PRACTICUM 4 - CLINICALLY IMMERSIVE SEMESTER

Minimum Credits: 5

Maximum Credits: 5

CLINICAL PRACTICUM 4 - CLINICALLY IMMERSIVE SEMESTER

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

Bioengineering

BIOENG 0050 - WORKSHOP IN BIOENGINEERING DESIGN

Minimum Credits: 1

Maximum Credits: 1

Students are introduced to Bioengineering design use of the SolidWorks software suite. SolidWorks is one of several computer aided engineering software packages (AutoCAD and ProEngineer are other examples) that is widely used in industry and academia. Skills learned (1) will help with Bioengineering design projects, and (2) are easily translated to other computer engineering packages such as AutoCAD or ProEngineer. The workshop consists of weekly SolidWorks-based practice assignments (tutorials) that must be completed to receive a grade in the course.

Academic Career: Undergraduate

Course Component: Workshop

Grade Component: Letter Grade

Course Requirements: PLAN: Bioengineering

BIOENG 0051 - WORKSHOP IN MEDICAL DEVICES- THE BASICS

Minimum Credits: 1

Maximum Credits: 1

"Reverse engineering" of medical devices is used to introduce students to basic terminology in the medical device field, the coupling of design with function, and the processes involved in moving from device conception to product. The course (1) emphasizes the significance of curiosity and information seeking in device development, (2) will help with Bioengineering design projects, and (3) will expand knowledge of devices in general, along with needs assessment. Multiple medical specialties will be covered, along with basic function of devices (diagnostics, treatment, monitoring, etc). The workshop will use "hands on" learning experiences, focusing on devices that can be taken apart. After discussion of device purpose and function, students will be challenged to identify potential design improvements. Students are expected to be active participants in the seminar. Course Objectives: Upon completing the course, the student should be conversant with medical device terminology, be able to state the basic elements involved in needs assessment, and be able to identify hurdles in medical device development.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Satisfactory/No Credit

Course Requirements: PLAN: Bioengineering

BIOENG 0052 - WORKSHOP IN OPENSIM

Minimum Credits: 1

Maximum Credits: 1

Computational models and simulations are tremendously useful tools for understanding human movement control. It is not always straightforward to identify cause-and-effect relationships through experiments alone and computational modeling and simulation techniques can complement experimental approaches - e.g., models can provide estimates of important variables such as muscle forces that are difficult to measure experimentally. OpenSim is an open-source software package that enables users to build, exchange, and analyze computer models of the musculoskeletal system and dynamic simulations of movement (Delp et al., 2007). The purpose of this course is to introduce students to OpenSim by demonstrating the utility of graphics-based modeling and simulation. Specifically, students will learn how to use OpenSim tools, through both the graphical user interface (GUI) and Application Programming Interface (API) that uses Matlab scripting, to analyze and simulate models and motions. Course Objectives: Upon completing the course, the student should be able to use OpenSim to analyze and develop forward dynamic simulations of movement. The course consists of weekly practice assignments that must be completed to receive a satisfactory (S) grade.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: H/S/U Basis

Course Requirements: PLAN: Bioengineering

BIOENG 0053 - WORKSHOP IN STATISTICAL DESIGN

Minimum Credits: 1

Maximum Credits: 1

Engineers use experiments for a variety of reasons, some of which are: determine whether one treatment is better than an alternative; determine parameters in a descriptive model; and determine accurate physical properties of a material. Simply put, experiments take time and can be expensive. Statistical design of experiments (DOE) is a tool to maximize the amount of relevant information gained while minimizing the amount of experimentation required to obtain that information. After discussion of general experimental design principles, Design-Ease® software is used to introduce students to DOE through a series of workshops that highlight the importance of DOE in engineering practice. The course consists of weekly practice assignments that must be completed to receive a satisfactory (S) grade. Course Objectives: Upon completing the course, the student should be able to design an experiment using statistical design of experiment principles to maximize knowledge gained from the experiment.

Academic Career: Undergraduate

Course Component: Workshop

Grade Component: Satisfactory/No Credit

Course Requirements: PREQ: ENGR 0020 or BIOENG 1000; PLAN: Bioengineering

BIOENG 0054 - WORKSHOP IN DESIGN FOR MANUFACTURABILITY

Minimum Credits: 1

Maximum Credits: 1

Design for Manufacturability (DFM) provides a systematic methodology that can be used to analyze product design for improvements in assembly and manufacturing. Students will use DFM to redesign current products for changes in manufacture that lead to reduction in production cost and improved operability/customer satisfaction. Students will employ modern software tools that accurately model parts for specific manufacturing operations, model part costs, simplify products, find specific avenues to reduce manufacturing and assembly costs, benchmark products, and quantify improvements. Course Objectives : Students will gain hands-on experience incorporating the DFM concepts in a project. Upon completing the course, the students should be able to describe the utility of DFM in product development and early manufacturing design, be able to quantitatively evaluate the impact of design choices on manufacturing cost, and be able to use modern quality control concepts and approaches.

Academic Career: Undergraduate

Course Component: Workshop

Grade Component: Satisfactory/No Credit

Course Requirements: PREQ: (BIOENG 0050 and BIOENG 1024) or MEMS 0024; PLAN: Bioengineering

BIOENG 1000 - STATISTICS FOR BIOENGINEERING

Minimum Credits: 4

Maximum Credits: 4

Bioengineering statistics will present the basic statistical methods that are relevant to engineering and clinical applications. Specifically, students will learn to consider the assumptions inherent to statistical analyses; calculate statistical parameters; automate statistical methods using software; interpret the meaning of statistical parameters; and design experiments conducive to proper statistics. Biological and medical examples will be used to reinforce concepts of the course.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: MATH 0230 or 0235, PLAN: Bioengineering

BIOENG 1002 - INTRAMURAL INTERNSHIP

Minimum Credits: 3

Maximum Credits: 3

Students employ practical experience, gained from mentored research in an academic environment, which includes project planning, design of experiments, and analysis of results to develop professional quality oral presentation skills. Emphasis is placed on critical analysis of research projects, development of technical abstract writing skills, and development of professional quality visual aids that accompany oral presentations. The course culminates with an oral presentation at a technical symposium. Upon completing the course, the student should be able to prepare a professional quality abstract documenting background, methodology, and results from a research project and make a professional quality oral presentation describing the research.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Letter Grade

Course Requirements: PREQ: ENGR 0020 or BIOENG 1000; PLAN: Bioengineering

BIOENG 1005 - RADIOFREQUENCY MEDICAL DEVICES

Minimum Credits: 3

Maximum Credits: 3

The course will cover topics related to the applications of electromagnetics and RF in medicine and in other devices that can cause thermal safety hazards. Topics such as Maxwell Equations, Wave Equations, Transmission Lines, Electromagnetic Theorems, Introduction to Antennas, and Introduction to Computational Electromagnetics will be presented. The class will include analyses of several RF devices used in medical applications and/or have electromagnetic safety implications such as magnetic resonance imaging (MRI), biological sensors (brain machine interface), RF ablation, and cell phones. Upon completing the course, the student should be able to describe how to apply fundamental electromagnetic principles to set up and solve problems in RF devices used in medical applications.

Academic Career: Undergraduate

Grade Component: Letter Grade

Course Requirements: PREQ: BIOENG 1310; CREQ: BIOENG 1320; PLAN: Bioengineering

BIOENG 1024 - MEDICAL PRODUCT DESIGN

Minimum Credits: 3

Maximum Credits: 3

This hands-on course presents a spectrum of techniques used in medical product design and prototyping. Techniques that are covered include sketching, foam core-based prototyping, metrology, laser cutting, CNC routing, sewing, molding, vacuum forming, and basic manual machining. The student will learn these techniques in a design studio setting and subsequently apply them to analyze, document, and ultimately fabricate a model of medical product such as a blood pressure monitor.

Academic Career: Undergraduate

Grade Component: Letter Grade

Course Requirements: PREQ: ENGR 0011 or ENGR 0015 or ENGR 0711 or ET 0011; PLAN: Bioengineering

BIOENG 1050 - ARTIFICIAL ORGANS

Minimum Credits: 3

Maximum Credits: 3

Artificial organs is the first of a three course sequence that explores design, development, and clinical use of artificial organ technology. Each course in the series is stand-alone and, as such, is not a prerequisite for any other course in the series. Students may take one, two, or all three courses. Artificial organs is directed toward artificial heart and vascular prostheses. The basic physiology of each system (heart and vascular) is reviewed with emphasis on identifying the bioengineering design requirements for appropriate organ replacement systems. Commercially available systems are analyzed from the point of view (where applicable) of mass transfer efficiency; biomechanics and hemodynamic

similarity to the host; and size and efficiency of the device. Students will be required to design an artificial organ consistent with the above-mentioned considerations. Upon completing the course, the student should be able to describe the fundamental engineering principles related to heart and vascular physiology and apply the fundamental principles to design improvements and/or new designs for artificial heart and vascular prostheses.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: BIOENG 1220; PLAN: Bioengineering

BIOENG 1051 - ARTIFICIAL ORGANS 2

Minimum Credits: 3

Maximum Credits: 3

Artificial organs 2 is the second of a three course sequence that explores design, development, and clinical use of artificial organ technology. Each course in the series is stand-alone and, as such, is not a prerequisite for any other course in the series. Students may take one, two, or all three courses. Artificial organs 2 is focused on artificial blood and artificial lung. The basic physiology of each system (blood and the lungs) is reviewed with emphasis on identifying the bioengineering design requirements for appropriate organ replacement systems. Commercially available systems are analyzed from the point of view (where applicable) of mass transfer efficiency; biomechanics and hemodynamic similarity to the host; and size and efficiency of the device. Students will be required to design an artificial organ consistent with the above-mentioned considerations. Upon completing the course, the student should be able to describe the fundamental engineering principles related to blood and lung physiology and apply the fundamental principles to design improvements and/or new designs for artificial blood substitutes and artificial lung devices.

Academic Career: Undergraduate

Course Component: Lecture

Course Requirements: PREQ: BIOENG 1220; PLAN: Bioengineering

BIOENG 1052 - ARTIFICIAL ORGANS 3

Minimum Credits: 3

Maximum Credits: 3

Artificial organs 3 is the third of a three course sequence that explores design, development, and clinical use of artificial organ technology. Each course in the series is stand-alone and, as such, is not a prerequisite for any other course in the series. Students may take one, two, or all three courses. Artificial organs 3 is focused upon artificial kidney and artificial liver. The basic physiology of each system (kidney and liver) is reviewed with emphasis on identifying the bioengineering design requirements for appropriate organ replacement systems. Commercially available systems are analyzed from the point of view (where applicable) of mass transfer efficiency; biomechanics and hemodynamic similarity to the host; and size and efficiency of the device. Students will be required to design an artificial organ consistent with the above-mentioned considerations. Upon completing the course, the student should be able to describe the fundamental engineering principles related to kidney and liver physiology and apply the fundamental principles to design improvements and/or new designs for artificial kidney and artificial liver.

BIOENG 1070 - INTRODUCTORY CELL BIOLOGY 1

Minimum Credits: 3

Maximum Credits: 3

Principles of cell biology in higher organisms: structure, function, biosynthesis, and macromolecular organization with

a focus on macromolecular organization and function from a quantitative systems perspective. Upon completing the two course sequence, BIOENG 1070 and BIOENG 1071, students should be able to (1) demonstrate understanding of the principles of cell structure and function, (2) describe the experimental tools used to understand cellular function such as molecular genetic techniques, biochemical analysis, and microscopy, and (3) use systems approaches to understand how cellular processes are integrated.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: (PREQ: ENGR 0012 and CHEM 0120 and PHYS 0175) (CREQ: ENGR 0016); PLAN: Bioengineering

Course Attributes: Hourly Final

BIOENG 1071 - INTRODUCTION TO CELL BIOLOGY 2

Minimum Credits: 3

Maximum Credits: 3

Continuation of BIOENG 1071. Principles of cell biology in higher organisms: structure, function, biosynthesis, and macromolecular organization with a focus on macromolecular organization and function from a quantitative systems perspective. Upon completing the two course sequence, BIOENG 1070 and BIOENG 1071, students should be able to (1) demonstrate understanding of the principles of cell structure and function, (2) describe the experimental tools used to understand cellular function such as molecular genetic techniques, biochemical analysis, and microscopy, and (3) use systems approaches to understand how cellular processes are integrated.

Course Requirements: PREQ: BIOENG 1070; PROG: Swanson School of Engineering

BIOENG 1072 - HONORS INTRODUCTORY CELL BIOLOGY 2

Minimum Credits: 3

Maximum Credits: 3

Principles of cell biology in higher organisms: structure, function, biosynthesis, and macromolecular organization with a focus on macromolecular organization and function from a quantitative systems perspective. This course is accompanied by a weekly one hour seminar in which original research articles pertinent to cell biology are presented and discussed.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: BIOENG 1070; PROG: Swanson School of Engineering

Course Attributes: University Honors Course

BIOENG 1075 - INTRODUCTION TO CELL AND MOLECULAR BIOLOGY LABORATORY TECHNIQUES

Minimum Credits: 3

Maximum Credits: 3

An undergraduate laboratory course designed to complement theoretical knowledge learned in BIOENG 1070 & 1071 that covers practical aspects of fundamental cell biology, cell culture, visualization of cellular components, protein biochemistry (isolation, purification, and analysis), molecular biology. Upon completing the course, the student should have acquired 'hands-on' skills in basic techniques in cell biology, biochemistry and molecular biology and be able to apply them in practice. Biology techniques, and functional measurements in cells.

Academic Career: Undergraduate

Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: BIOENG 1070; PLAN: Bioengineering

BIOENG 1085 - INTRO TO BIOENGINEERING: SEMINAR

Minimum Credits: 0

Maximum Credits: 0

Seminar is designed to acquaint students with aspects of bioengineering that are not normally encountered in the classroom or extracurricular activity settings. As such, seminar is a vehicle to provide important information and communicate materials that students need to know to maximize their educational experience and develop post-graduation plans. Emphasis is placed on career planning and development and options available in the undergraduate program that will help realize post-graduation goals. Student awareness of opportunities that are available and knowledge about how to utilize the opportunities for their benefit.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: H/S/U Basis

Course Requirements: PLAN: Bioengineering

BIOENG 1086 - BIOENGINEERING SEM FOR MINORS

Minimum Credits: 0

Maximum Credits: 0

One hour lecture format by members of the bioengineering community of both the university of Pittsburgh and other institutions.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: H/S/U Basis

Course Requirements: PROG: Swanson School of Engineering

BIOENG 1095 - SPECIAL PROJECTS

Minimum Credits: 1

Maximum Credits: 6

: Special Projects provides an opportunity for students to develop an individual research project under the guidance of a faculty member/mentor. Projects can involve laboratory research, engineering design, or instructional development.

While the project must be related to bioengineering, the mentor can be a faculty member in any department or hospital affiliated with the University of Pittsburgh. A written report documenting the project and project outcomes is required. Typical report format (abstract, introduction, methods, results, discussion, and references) is expected. The length of the report should reflect the number of credits received. The report must be submitted to both the Undergraduate Coordinator, Department of Bioengineering, and the mentor. The mentor will evaluate the quality of the project and report and submit a letter grade recommendation to the Undergraduate Coordinator.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Letter Grade

Course Requirements: PROG: Swanson School of Engineering

BIOENG 1096 - UNDERGRADUATE TEACHING EXPERIENCE

Minimum Credits: 1

Maximum Credits: 2

Undergraduate Teaching Experience provides students an opportunity to volunteer as an Undergraduate Teaching

Assistant (TA) or Grader. Undergraduates can participate in helping develop and deliver lecture content, managing recitations or laboratories, developing and/or grading quizzes, evaluating homeworks, and general review of course materials.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: Satisfactory/No Credit

Course Requirements: PROG: Swanson School of Engineering

BIOENG 1150 - BIOENG METHODS AND APPLICATIONS

Minimum Credits: 3

Maximum Credits: 3

Bioengineering methods and applications uses laboratory experiences to illustrate principles taught in several bioengineering core classes. In addition to being exposed to particular laboratory skills for each of the experimental modules in the course, students are expected to practice previously developed skills in technical writing, creating tables and graphs, data analysis, and statistics to create professional quality laboratory reports that document each module. Upon completing the course, the student should be able to state and describe the basic components of a laboratory report and create well-written archival documents that reflect professional quality work.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: CREQ:(BIOENG 1071 or BIOENG 1072) and BIOENG 1220 and BIOENG 1310 and BIOENG 1630; Plan: Bioengineering

BIOENG 1160 - BIOENGINEERING DESIGN 1

Minimum Credits: 3

Maximum Credits: 3

The two course sequence, bioengineering design 1 & 2, is a mentored opportunity for the student to synthesize and extend skills and knowledge acquired during the undergraduate education experience in design (or redesign) of a biomedical product or equivalent. Students are exposed to key facets of the medical product design process and the unique regulatory requirements for biomedical products. Student teams select a design project, conduct a market/reimbursement analysis, apply design process methodology, maintain a design history file, and create a prototype product. Students will be able to apply appropriate product design-related procedures and tools, maintain design history files, conduct preliminary market/reimbursement studies, and address regulatory affairs in developing a prototype biomedical product or equivalent.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: LEVEL: Senior; PLAN: Bioengineering

Course Attributes: Capstone Course

BIOENG 1161 - BIOENGINEERING DESIGN 2

Minimum Credits: 3

Maximum Credits: 3

Course Attributes: Capstone Course

BIOENG 1210 - BIOENGINEERING THERMODYNAMICS

Minimum Credits: 3

Maximum Credits: 3

Bio thermodynamics uses an interactive framework in the joint (student and instructor) exploration of thermodynamics as it applies on the biological cellular and systems level. At this most fundamental level, thermodynamics studies the flow of energy, interconversion of energy, maintenance of cellular function and information, and the processes necessary to sustain life itself. Upon completing the course, the student should be able to describe how the three laws of thermodynamics and entropy impact biological systems, and be able to apply fundamental thermodynamics principles to set up and solve problems in physiological systems.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

BIOENG 1218 - EMERGING BIOMEDICAL TECHNOLOGIES

Minimum Credits: 3

Maximum Credits: 3

Emerging Biomedical Technologies is offered by Rehabilitation Science and cross-listed with Bioengineering. The purpose of this course is to provide the students with an understanding of stem cell biology, tissue engineering, and related applications involved in rehabilitation sciences and regenerative medicine. The course material is designed to aid students considering a future as researchers in biomedical sciences laboratories or biotechnology research and development. It will provide digests of the latest research technologies and clinical applications in these fields. Students will be encouraged to synthesize concepts aimed to test solutions and therapies to improve human health by use of modern biomedical technologies. The lecture and discussion format gives students a broad background and the opportunity to apply critical thinking skills to recent published findings. Students who satisfactorily complete the course should be able to: Describe the emergent life science technologies covered in the course, Describe the biology of stem cells, their unique characteristics, and uses as therapies for disease and injury, Describe different approaches used in gene and cell therapeutic strategies, Describe the complexity of ethical and legal issues involved in this line of biomedical research, Describe the process of moving research into the translational phase with sufficient knowledge of the processes of FDA approval of therapies, Demonstrate an ability to effectively search for, analyze and critique current scientific publications on stem cell biology, cell and gene therapy and tissue engineering, Synthesize concepts

aimed to test solutions and therapies to improve human health by use of modern biotechnologies discussed in class

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Bioengineering; PREQ: BIOENG 1210

BIOENG 1220 - BIOTRANSPORT PHENOMENA

Minimum Credits: 3

Maximum Credits: 3

Transport of nutrients and fluid flow is critical for the function of organisms. This course covers transport of momentum (fluid flow) and mass in biological, physiological, pathophysiological and medical device applications. The fundamental principles of momentum and mass transfer are developed in the microscopic (differential) and macroscopic (integral) form. These principles are applied to solve transport problems in the biological, biomedical and medical device context.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: MATH 0240 and (BIOENG 1210 or BIOENG 1211); PLAN: Bioengineering

BIOENG 1241 - SOCIETAL, POLITICAL AND ETHICAL ISSUES IN BIOENGINEERING

Minimum Credits: 3

Maximum Credits: 3

Engineering, as a profession, has ethical obligations to society that go beyond the simple application of technology as learned in science and technology courses. Bioethics seeks to supplement technological aspects of bioengineering by engaging students in an analysis of the effects of bioengineering developments on society, focusing on safety of the public as a primary ethical concern. Students are educated on a variety of ethical tools that enable them to analyze fictional, yet realistic, cases. Students are evaluated individually, as well as in groups, with a particular focus on the ethical issues related to their senior design projects (BIOENG 1160 & 1161). Upon completion of the course, students will be able to recognize, articulate, and resolve ethical issues within the arena of bioengineering.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: CREQ: BIOENG 1160; PLAN: Bioengineering; LEVEL: Juniors

BIOENG 1255 - DYNAMIC SYSTEMS: PHYSIOLOGICAL PERSPECTIVE

Minimum Credits: 4

Maximum Credits: 4

A foundation of basic systems concepts is built through combining modeling of dynamic systems with physiological examples. Mathematical models of physiological systems are developed using a combination of systems understanding (analogous thinking, engineering synthesis and analysis, and integrative system approaches in solving problems) and bioengineering design (recognizing the potential applications of both engineering principles to biology and biological principles to engineering). These models are then used to address biological/clinical questions. Upon completing the course, the student should be able to: demonstrate skill and competence in methods of dynamic systems modeling through (a) building dynamic models of bioelectrical, biomechanical, biochemical, and physiological systems, (b) solving systems of equations representing dynamic models including analytical, numerical, and graphical software methods, (c) validating models including descriptive, predictive, and explanative validation, and (d) applying models to scientific and engineering applications including analysis and synthesis relative to identification and simulation.

Describe physiological processes in dynamic system terms.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

BIOENG 1310 - LINEAR SYSTEMS AND ELECTRONICS 1

Minimum Credits: 3

Maximum Credits: 3

Bioinstrumentation covers electronic circuit theory and the practical aspects of building electronic prototypes. The mathematics of complex exponentials and complex impedance are also covered. A series of projects are built by each student individually, using a system of student-owned electronics components and tools called the pittkit. The kit includes a special apparatus, the breadboard laboratory interface processor (blip) which each student constructs, and which acts as a logging voltmeter, a frequency meter, a logic analyzer, a waveform generator, and a pulse duration meter. The blip interfaces to any computer via a USB port, without requiring any special software to be installed on the computer. After completing the course, the student should be able to design and construct prototypes of useful, simple circuits, such as preamplifiers and signal conditioners for sensors, as well as use off-the-shelf modules to construct laboratory instrumentation. They should be able to describe applications to other linear systems such as those found in physiological systems with greater clarity from having worked with circuits.

Academic Career: Undergraduate

Course Component: Lecture

Course Requirements: PREQ: MATH 0240 and (PHYS 0175 or PHYS 0476); PLAN: Bioengineering

BIOENG 1320 - BIOLOGICAL SIGNALS AND SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

The theory and application of linear time-invariant (LTI) systems is explored, with emphasis on an appreciation of the description and analysis of biomedical signals and systems via LTI methods. After completing the course, the student should be able to state the properties of LTI systems; be able to test whether a system is LTI; know how to obtain, and interpret, the frequency response, impulse response, step response, and transfer function of a system. The student should also be able to demonstrate mastery of the mathematical skills of convolution and integral transform techniques

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: BIOENG 1310 and MATH 0240 and MATH 0290; PLAN: Bioengineering

Course Attributes: Hourly Final

BIOENG 1330 - BIOMEDICAL IMAGING

Minimum Credits: 3

Maximum Credits: 3

Biomedical imaging introduces the major imaging modalities (x-ray, cat-scan, MRI, ultrasound) used in clinical medicine and biomedical research, as well as the fundamentals of images, from a signals and systems standpoint. After completing the course, the student should be able to use imaging modalities to determine anatomical or physiological function and apply physics and signal processing in medical imaging for particular research applications.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: BIOENG 1320; PLAN: Bioengineering

BIOENG 1340 - INTRODUCTION TO MEDICAL IMAGING AND IMAGE ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

Introduction to Medical Imaging and Image Analysis presents the physics of image formation as well as methods for tomographic image reconstruction for major medical imaging modalities, including X-ray Computed Tomography (CT) and Magnetic Resonance Imaging (MRI). Also introduced are fundamentals of digital image processing, with particular emphasis on medical applications, including basic techniques to enhance image quality, image de-noising, methods for extracting, classifying, and tracking features of and objects in images, etc. Students will learn how to implement these techniques in MATLAB (The MathWorks Inc., Natick, MA) to solve practical image processing problems. MATLAB exercises will demonstrate to students how filtering operations applied in the image domain or the Fourier domain affect medical images. In addition to these fundamentals, more advanced algorithmic approaches for image segmentation and image as well as point-cloud registration techniques will also be reviewed.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: BIOENG 1320 and MATH 0240 and MATH 0290; PLAN: Bioengineering

BIOENG 1351 - BIOSIGNAL ACQUISITION AND ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

The objective of this course is to develop data acquisition interfaces that include software and hardware to interact with and sample real world phenomena with bioengineering applications. Students will be expected to have basic MATLAB programming experience before joining this course; basic circuits knowledge is also advantageous. Students will build circuits, and will learn to work with several toolboxes and advanced features in Matlab to build graphical user interfaces (GUIs), communicate with data acquisition systems (DAQs) for measuring signals with sensors and/or controlling actuators to interact with the physical world, and perform signal processing and analysis functions to extract meaningful information from electrical and/or biological measurements. Practical applications may include measuring and analyzing bioelectric phenomena related to heart rate or tissue impedance, processing and analyzing neural signals collected from implanted electrodes in the brain, etc. Students will be able to create solutions for real world engineering problems after completing this course successfully.

Course Requirements: PREQ: (CS 0441 or ENGR 0012) and BIOENG 1310; PLAN: Bioengineering

BIOENG 1355 - MEDICAL PRODUCT REGULATION AND REIMBURSEMENT

Minimum Credits: 3

Maximum Credits: 3

This course has been created as an introduction to the medical product development requirements of the Food and Drug Agency (FDA). Also included is an overview of medical product reimbursement of the Centers for Medicare and Medicaid Services (CMS). The educational objectives for this course include: 1. How the history of the FDA affects the Agency's perspective and regulatory activities; 2. An introduction to quality systems with a focus on FDA's Quality System Regulation (QSR); 3. An overview of the key elements of the Design Controls subsection of the FDA QSR; 4. How the regulatory requirements in Europe contrast with those of the FDA; 5. How FDA regulatory requirements differ from reimbursement policies of the CMS. A series of case studies will be used to reinforce key lecture topics and prepare you to utilize this knowledge in the future whether that be clinical medicine, research, or industry. A secondary goal of this course is to prepare you to implement some of these practices during Senior Design.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Bioengineering - Sophomore or Junior PLAN: non-Bioengineering - Senior

BIOENG 1370 - COMPUTATIONAL SIMULATION IN MEDICAL DEVICE DESIGN

Minimum Credits: 3

Maximum Credits: 3

Computational simulation is increasingly utilized as a method to assess the performance of medical devices. The course provides students with a hands on learning experience on how to use computational simulation in the modeling and design of medical devices. The course details the important steps in computational simulations from preprocessing to solution to post-processing and data presentation. Commercially available software programs are introduced and used to simulate a variety of physical phenomena (solid, fluid, transport) pertinent to medical device design. Upon completing the course, the student should be able to simulate the solid, fluid, and transport phenomena that are useful in medical device design. Particular attention will be placed on avoiding common mistakes in the preprocessing and interpretation of computational results. Topics covered: geometry creation; discretization; appropriate assignment of material properties; solver management; error mitigation and debugging; postprocessing and data presentation; data interpretation; introduction to design optimization.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: BIOENG 1630; PLAN: Bioengineering

BIOENG 1383 - BIOMEDICAL OPTICAL MICROSCOPY

Minimum Credits: 3

Maximum Credits: 3

Optical imaging microscopy techniques have become essential tools to investigate biological processes and diagnose diseases at unprecedented cellular and molecular levels. Biomedical researchers have an increasingly important need both to understand the advantages and limitations of the various types of optical microscopy and to apply the appropriate microscopy technique to solve specific biomedical problems. Biomedical optical microscopy is a comprehensive exploration of the basic principles of optical microscopy and imaging techniques commonly used in biomedical research. Upon completion of the course, the student should be conversant in the basic principles of common optical imaging microscopy techniques, able to apply an optical microscopy technique to address biological questions, and able to perform basic quantitative image analysis.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

BIOENG 1533 - CONTROLLED DRUG DELIVERY

Minimum Credits: 3

Maximum Credits: 3

Controlled drug delivery explores the physics, chemistry, and material science rationale behind the engineering of controlled drug delivery systems, which stands as a 114 billion dollar industry. To this end, the course focuses on topics at the interface between chemical engineering and medicine, such as polymer chemistry, biomaterials, pharmacokinetics, and transport phenomena. Pertinent pharmaceutical examples that are discussed include: transdermal, aerosol, oral, gene, and targeted cellular delivery, with emphasis placed on fabrication considerations and the relevant physiological environment. Upon completing the course, the student should be able to state the constraints on material properties posed by the physiological environment; use the fundamentals of polymers, diffusion, degradation, modeling and pharmacokinetics to solve problems specific to controlled drug delivery; and demonstrate

ability to search and summarize primary research literature, write a review article, and deliver a cohesive oral presentation.

Academic Career: Undergraduate

BIOENG 1580 - BIOMEDICAL APPLICATION FOR SIGNAL PROCESSING

Minimum Credits: 4

Maximum Credits: 4

The fundamentals of digital signal processing of time series are developed, via applied exercises and projects with a focus on medical and biological signal analysis and interpretation. Depending on data availability, biomedical applications are selected from a variety of areas, such as biomechanics (gait and balance), neural and electrophysiological signals, and animal vocalizations, among others. Upon completion of this course, students should be able to properly acquire data in digital form; perform conventional methods of spectral analysis, for both stationary and non-stationary (or time-varying) signals; implement and apply linear time-invariant discrete-time filters; and demonstrate basic skills in digital signal processing.

Academic Career: Undergraduate

Course Component: Lecture

BIOENG 1586 - QUANTITATIVE SYSTEMS NEUROSCIENCE

Minimum Credits: 3

Maximum Credits: 3

Systems neuroscience is the field that attempts to relate the activity of networks of neurons to perception, cognition, and behavior. This HONORS course examines major scientific results in systems neuroscience, and the computational principles of brain function they illustrate. Neuroscience topics include sensory transduction, visual processing, motor control, and neural prosthetics. Students learn to apply techniques from signals and systems, statistics, machine learning, information theory, and control theory to problems in neuroscience. Course format consists of interactive lectures, student-led discussions of important publications in neuroscience, guided analysis of neuroscience data, and designing an original set of experiments. Course Objectives: Upon completing the course, students will be able to: Describe organizing principles of brain function, from biological and theoretical perspectives; Apply statistics, signal processing, and machine learning techniques to the analysis of biological data sets; Design novel experiments, analyses, and data interpretation; Demonstrate critical evaluation of scientific and technical literature.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (BIOENG 1071 or BIOENG 1072) and BIOENG 1320; PLAN: Bioengineering (BSE or BEH)

BIOENG 1615 - INTRODUCTION TO NEURAL ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

This is an introductory neural engineering course for upper level undergraduate and graduate students interested in implantable cortical neural interface technology and research. The course covers two main topics; 1) basic neuroscience principles that govern neural interface engineering (ion channel biophysics, overview of different neuronal and non-

neuronal cell types and how they interact with implantable microelectrodes, the basics of cortical organization, simple signal propagation through these neuronal networks, and how these signals can be extracted with implantable microelectrodes). 2) Overview of biological and engineering technologies and methodologies used in neural engineering research as well as their capabilities and limitations. Students will be provided raw neural recording and histology datasets, and will learn to assemble MATLAB based tools for basic signal processing and analysis.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Bioengineering

BIOENG 1620 - INTRODUCTION TO TISSUE ENGINEERING AND REGENERATIVE MEDICINE

Minimum Credits: 3

Maximum Credits: 3

Tissue engineering (TE) is defined as the development and manipulation of laboratory-grown molecules, cells, tissues, or organs to replace and/or support the function of injured body parts. TE is highly interdisciplinary and therefore crosses numerous engineering and medical specialties. The course introduces students to the fundamentals of TE and the biomaterials, cells and growth factors used in TE through consideration of cell and tissue biology, biomaterials, drug delivery, engineering methods and design, and clinical implementation. Specific applications include skin, nerve, bone, and soft tissue regeneration. Throughout the course ties are made between the topic of study and clinically relevant situations. Upon completing this course, students should be able to: describe basic principles behind human cell and tissue biology and cell; describe the general types of biomaterials used in tissue engineering; describe techniques utilized to design, fabricate, and functionally assess tissue engineering systems; and, apply the combined knowledge of tissue organization and tissue engineering strategies to design a unique, reasonable tissue engineering solution.

BIOENG 1630 - BIOMECHANICS 1-MECHANICAL PRINCIPLES BIOLOGICAL SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

Biomechanics 1 is a first course in undergraduate biomechanics that applies and builds on the concepts of statics, dynamics, and mechanics of materials as applied to human activities and tissues. After briefly reviewing equilibrium concepts and free body diagrams as applied to the human body, principles from kinetics are used to develop dynamic descriptions of human motion. Finally, engineering concepts employed in description of the fundamental strength of materials are applied to biological tissues. After completion of the course, students should be able to describe the general characteristics and material properties for tissue and organs studied in the course, analyze the forces at a skeletal joint for various static and dynamic human activities, state and use the concepts of balance and stability in describing human motion, and compute the stresses and strains in biological tissues, given loading conditions and material properties.

Academic Career: Undergraduate

Course Component: Lecture

Course Requirements: PREQ: ENGR 0135; PLAN: Bioengineering

BIOENG 1631 - BIOMECHANICS 2: INTRODUCTION TO BIODYNAMICS AND BIOSOLID MECHANICS

Minimum Credits: 3

Maximum Credits: 3

Modern biomechanics is an increasingly diverse field that encompasses the mechanics of the whole body, all the way down to the cellular and molecular levels. Students are introduced to fundamental concepts and techniques of biodynamics and bio solid mechanics which provide the basis for biomechanics 3 and 4. General approaches used in mechanics are introduced throughout the semester and applied in several laboratories. Upon completing the course, the student should be able to demonstrate recall of functional anatomy of musculoskeletal system perform inverse dynamic analyses describe the principles of basic muscle biomechanics perform analyses of deformable bodies (including viscoelastic materials) describe general experimental techniques for rigid and deformable body analyses.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: BIOENG 1630; PROG: Swanson School of Engineering

BIOENG 1632 - BIOMECHANICS 3: BIODYNAMICS OF MOVEMENT

Minimum Credits: 3

Maximum Credits: 3

Biodynamics, the area of focus in biomechanics 3, is the study of large-scale movements in biologic systems. As such, the course focuses on the analysis of human movement, which is used in clinical and research settings to understand how various pathologies impact movement and how interventions can be implemented to aid those affected by movement disorders. We cover the fundamentals of biomechanics of human movement using mechanical modeling techniques. The major focus is kinematic analyses in three dimensions using matrix techniques. Some fundamentals of kinetics are covered as well, 2d and 3d inverse dynamics. Upon completing the course, the student should be able to describe basic methods of kinematic/kinetic analysis used in multi-link systems and be able to implement the methods in the analysis of human movement. Students should also be able to apply the methods to study common human movements, e.g. gait analyses, eye movement analyses, etc. Finally, students should be able to use the computer programming language, mat lab, to perform computations on kinematic data.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: BIOENG 1631 and MATH 0280 and (ENGR 0012 or ENGR 0712 or ENGR 0716); PLAN: Bioengineering

BIOENG 1633 - BIOMECHANICS 4 - BIOMECHANICS OF ORGANS, TISSUES, AND CELLS

Minimum Credits: 3

Maximum Credits: 3

Modern biomechanics is an increasingly diverse field that encompasses the mechanics of the whole human body, including all the way down to the cellular and molecular levels. Biomechanics 4 builds upon biomechanics fundamentals learned in BIOENG 1630 and BIOENG 1631 in building a comprehensive application of bio solid mechanics to describe the mechanical behavior of soft and hard biological tissues. The course provides fundamental concepts in the development and application of constitutive models, as well as a foundation for more advanced topics that are covered in graduate school. Mathematica (Wolfram Research, Inc.) Is used both in class and for assignments. Upon completing the course, the student should be able to formulate biomechanics constitutive models that describe soft and hard tissues and use Mathematica as a framework for exploring the impact of model parameters in the model description.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: BIOENG 1631 and MATH 0280; PLAN: Bioengineering

BIOENG 1680 - BIOMEDICAL APPLICATIONS OF CONTROL

Minimum Credits: 4

Maximum Credits: 4

The effect of feedback control on analysis and design is explored, with an emphasis on biological and physiological systems. Course Objectives : Upon completing this course, students should be able to: Construct mathematical models of physiological systems; Analyze temporal dynamics of a physiological system using linear systems concepts; Characterize the effects of feedback and controller on system performance; Design linear controllers to meet desired system specifications

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: BIOENG 1320; PLAN: Bioengineering

BIOENG 1810 - BIOMATERIALS AND BIOCOMPATIBILITY

Minimum Credits: 3

Maximum Credits: 3

Undergraduate students are introduced to an advanced understanding of biomaterials and the use of biomaterial in areas such as tissue engineering, artificial organs, and implantable devices. Throughout the course, ties are made between the topic of study and clinically relevant biomaterial performance. The course introduces various biomaterials, such as polymers, metals, and ceramics, with the focus on biomaterial synthesis, characterization, structure-property relationship and surface modification. Biocompatibility issues of biomaterials will be discussed from different aspects such as protein adsorption, foreign body reaction, immune and inflammatory response, and sterilization. Finally, examples of clinical applications are discussed. Upon completing the course, the student should be able to: state the basic principles behind human tissue response to artificial surface implantation, describe the general types of materials used in soft and hard tissue replacements, drug delivery devices, and extracorporeal devices, describe techniques utilized to control the physiologic response to artificial surfaces, and identify various design strategies and clinical applications of biomaterials

Academic Career: Undergraduate

Course Component: Lecture

Course Requirements: PREQ: CHEM 0320 and (BIOSC 1000 or BIOSC 1810 or CHEM 1810 or CHE 1530); PLAN: Bioengineering

BIOENG 2150 - MEDICAL PRODUCT IDEATION

Minimum Credits: 3

Maximum Credits: 3

A didactic class that explores the principles and use of "ethnography" as a tool to observe and document clinical activity in order to draft a clear statement of a clinical problem in need of solution and methods for concept generation to identify potential solutions. Students will be able to describe and use ethnographical techniques in identifying workplace problems and be able to describe and use concept generation methods to develop potential solutions. Topics covered: ethnography in the workplace; group brainstorming; brain-writing; affinitization; morphological analysis; basic human factors design.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Letter GRD

Course Requirements: PROG: Swanson School of Engineering

BIOENG 2151 - MEDICAL PRODUCT DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

A didactic course that uses principles of system engineering, the stage-gate process for medical product development and engineering and business analysis principles to evaluate the commercial potential proposed medical devices to further develop feasible solutions to a clinical problem identified in BIOENG 2150. Students will demonstrate use of systems engineering techniques to prioritize a set of feasible device and/or system solutions and ability to use intellectual property (IP) tools to determine suitability for further development. Students will demonstrate use of course principles in development of a commercialization plan for a proposed medical product. Design controls required by FDA and international bodies; systems engineering methodologies; intellectual property (IP) and IP search tools; brief market analysis; size by region, growth, competition, barriers to entry, sustainable advantage; reimbursement issues for proposed medical device/system; basic financial analysis ' students will construct spreadsheets typically presented to senior business management. This will include estimates of costs, margins, break-even analysis, NPV, hurdle rates, ROI, IRR; codes, standards, and regulatory processes (FDA, IEC & ISO, UL, ministry of health (Japan), NRC, BRH, notified bodies, obtaining broad indications for use); safety, reliability, product liability considerations, manufacturability considerations (DFM ' design for manufacture, workflows)

Academic Career: Graduate

Grade Component: Letter GRD

Course Requirements: PREQ: BIOENG 2150; PROG: Swanson School of Engineering

BIOENG 2351 - BIOSIGNAL ACQUISITION AND ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

The objective of this course is to develop data acquisition interfaces that include software and hardware to interact with and sample real world phenomena with bioengineering applications. Students will be expected to have basic MATLAB programming experience before joining this course; basic circuits knowledge is also advantageous. Students will build circuits, and will learn to work with several toolboxes and advanced features in Matlab to build graphical user interfaces (GUIs), communicate with data acquisition systems (DAQs) for measuring signals with sensors and/or controlling actuators to interact with the physical world, and perform signal processing and analysis functions to extract meaningful information from electrical and/or biological measurements. Practical applications may include measuring and analyzing bioelectric phenomena related to heart rate or tissue impedance, processing and analyzing neural signals collected from implanted electrodes in the brain, etc. Students will be able to create solutions for real world engineering problems after completing this course successfully.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Bioengineering (MBE, PHD)

BIOENG 2390 - ARTIFICIAL INTELLIGENCE APPLICATIONS IN BIOENGINEERING

Minimum Credits: 3

Maximum Credits: 3

Artificial Intelligence Applications in Bioengineering is a hands-on exploration of linear to non-linear modeling paradigms for biomedical data. In this course students will learn about aspects of information processing including data pre-processing, visualization, regression, dimensionality reduction (PCA, ICA), feature selection, classification (logistic regression, SVM, neural networks, etc.) and their usage for decision support in the context of healthcare. The course will provide an overview of the basics of scientific computing on local and cloud-based resources (i.e. relevant DevOps and MLOps) and scientific programming fundamentals, in addition to covering machine learning techniques for classification as well as regression modeling from biomedical datasets in tabular forms, including time series data. Students will additionally learn how to address classification and regression modeling tasks starting with 2D/3D medical imaging data. The course is designed to be practical with computer based tutorials and assignments on machine

learning in general including popular kernelized models and deep neural networks.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

BIOENG 2525 - APPLIED BIOSTATISTICS

Minimum Credits: 3

Maximum Credits: 3

This course is designed to provide an understanding of basic statistics through application. Descriptive and inferential statistics, encompassing both parametric and non-parametric methods will be taught.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ENGR 2811 - INNOVATING FOR PUBLIC IMPACT

Minimum Credits: 3

Maximum Credits: 3

This course will teach students how to build products and services using lean methods. This will be done by solving real-world military and intelligence community problems. The course uses the lean launchpad platform for entrepreneurship. This is a highly customer-centered hypothesis-test approach to developing a mission modes, and is particularly well-suited for technology startups. It incorporates customer needs and user testing to build a minimum viable prototype. At the conclusion of the course, students will be able to understand the problems/needs of searching for product-market fit; understand all the stakeholders, deployment issues, costs, resources, and ultimate mission value; deliver minimum viable products that match customer needs in an extremely short time; produce a repeatable model that can be used to launch other potential technology solutions.

Academic Career: Graduate

Grade Component: Letter GRD

Bioethics

BIOETH 1001 - ETHICS AND AGING

Minimum Credits: 3

Maximum Credits: 3

This course offers an overview of ethical issues in aging. Early sessions will explore the ethical implications of stereotypes and myths regarding aging. Turning to the context of healthcare, students will identify and analyze moral dilemmas that arise in the long-term and end-of-life care of older adults. Concepts and topics to be critically examined include: autonomy, dependency, elder abuse, and just resource allocation.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SU3 Elective Basis

BIOETH 1660 - PHILOSOPHY OF MEDICINE

Minimum Credits: 3

Maximum Credits: 3

Issues in Philosophy of Medicine, with reference to American health care, including concepts of health and disease,

normativity, causation, error, clinical diagnosis, prevention, and epidemiological risk.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SU3 Elective Basis

BIOETH 1664 - BIOETHICS

Minimum Credits: 3

Maximum Credits: 3

Survey of major topics in bioethics, including informed consent, treatment refusal, transplantation, resource allocation, genetics, and public health.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SU3 Elective Basis

BIOETH 1668 - SUSTAINABILITY IN LATIN AMERICA

Minimum Credits: 3

Maximum Credits: 3

Latin America hosts some of the most biologically diverse and productive ecosystems on Earth, yet economic and social development are frequently at odds with efforts to conserve and use these ecosystems sustainably. This upper-level seminar focuses on the issues surrounding environmental sustainability in Latin America from a holistic, interdisciplinary perspective. The course will start with a general introduction to the three legs of sustainability and sustainable development theory, as well as the ecology and evolution of Neotropical biodiversity. We will use published primary literature to explore the particular complexities of Latin American sustainable development, and analyze case studies of moments through history in which environmental issues were either championed or de-emphasized. The course will feature several guest lectures, optional seminars for extra credit, and discussions of current sustainability news. Students will be responsible for a final research project and presentation.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Attributes: MCSI - Sustainability Focused

BIOETH 1669 - DIRECTED READINGS IN BIOETHICS

Minimum Credits: 1

Maximum Credits: 3

Students discuss with instructor a set of readings in bioethics. Topics and readings may vary.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SU3 Elective Basis

BIOETH 2001 - ETHICS AND AGING

Minimum Credits: 3

Maximum Credits: 3

Biological Sciences

BIOSC 0001 - BIOLOGICAL SCIENCES TRANSFER SEMINAR

Minimum Credits: 1

Maximum Credits: 1

This course for transfer students intending to major in biology will include topics such as study skills for biology courses, reading of primary literature, literature searches and citation managers, communicating with faculty, resources on campus, campus engagement, experiential learning opportunities, and career opportunities in biology.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Satisfactory/No Credit

BIOSC 0041 - ANATOMY FOR THE HEALTH PROFESSIONS

Minimum Credits: 3

Maximum Credits: 3

This lecture course is designed to meet anatomy pre-requisites for students who are applying for admission to health profession programs but does not count towards any of the majors in biological sciences. Students will explore human functional and clinical gross anatomy organized by body region. Imaging techniques, disease pathologies, and case studies are utilized to enhance and apply lecture information. Co-enrollment with BIOSC 0042 is required.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: CREQ: BIOSC 0042 (Min Grade 'C')

BIOSC 0042 - ANATOMY FOR THE HEALTH PROFESSIONS LABORATORY

Minimum Credits: 1

Maximum Credits: 1

This laboratory course is designed to meet anatomy pre-requisites for students who are applying for admission to health profession programs but does not count towards any of the majors in biological sciences. This laboratory provides a visual opportunity to learn human anatomy through various tools, including skeletons, organ models, pathology specimens, virtual dissection, and histology slides. Lab modules are organized by body region. Co-enrollment with BIOSC 0041 is required.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: CREQ: BIOSC 0041

BIOSC 0050 - FOUNDATIONS OF BIOLOGY LABORATORY 1

Minimum Credits: 1

Maximum Credits: 1

This is the first course in a two-course sequence on the study of organisms in the laboratory and the field. We will work with techniques that are important in biology and apply these techniques to illustrate basic biological principles, with an emphasis on living organisms. The laboratory exercises focus on cell structure and function, basic cellular processes, plant structure and function, and basic animal anatomy and physiology.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: BIOSC 0150 or 0715 or 0170 or 0190 or BIOL 0101 or 0110 (MIN GRADE: 'C' for all courses listed) or CREQ: BIOENG 1070

BIOSC 0057 - FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 1

Minimum Credits: 1

Maximum Credits: 1

This research-focused first-semester introductory biology lab uses real research projects to introduce biology as an experimental science. Students learn current laboratory techniques through an inquiry-based project or set of projects throughout the semester. Experiments can focus on genetics, molecular biology, evolution, and ecology. Topic for each section is listed under Meeting Information.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: BIOSC 0150 or 0155 or 0715 or 0170 or 0190 or BIOL 0101 or 0110 (MIN GRADE: 'C' for all courses listed) or CREQ: BIOENG 1070

Course Attributes: Undergraduate Research

BIOSC 0058 - FOUNDATIONS OF BIOLOGY SEA-PHAGES LABORATORY 1

Minimum Credits: 1

Maximum Credits: 1

This is the first half of a two-part introductory biology lab that uses bacteriophage discovery to introduce biology as an experimental science. Students learn current laboratory techniques through discovery, isolation, and characterization of their own novel virus. Students will be introduced to concepts in microbiology, evolution, and molecular biology through hands-on experiments driven by results obtained during class. Students are expected to continue to the second half of the lab in BIOSC 0068.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Attributes: Undergraduate Research

BIOSC 0060 - FOUNDATIONS OF BIOLOGY LABORATORY 2

Minimum Credits: 1

Maximum Credits: 1

This one-credit laboratory course is the second in a two-course sequence designed to be an introduction to scientific inquiry in the biological sciences for majors in biology and related fields. You will use genetics, biochemistry, and molecular biology to undertake authentic research exploring the evolution of metabolic pathways in different species.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (BIOSC 0050 or 0057 or 0058 or 0070 or 0190 or BIOL 0101 or 0111) and (BIOSC 0160 or 0716 or 0180 or BIOL 0102 or 0120); Min Grade 'C'

BIOSC 0067 - FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 2

Minimum Credits: 1

Maximum Credits: 1

This research-focused second-semester introductory biology lab uses real research projects to introduce biology as an experimental science. Students learn current laboratory techniques through an inquiry-based project or set of projects throughout the semester. Experiments can focus on genetics, molecular biology, evolution, and ecology. Topic for each section is listed under Meeting Information.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (BIOSC 0050 or 0057 or 0058 or 0070 or 0190 or BIOL 0101 or 0111) and PREQ: (BIOSC 0160 or 0180 or 0165 or 0716 or BIOL 0102 or 0120) or CREQ: (BIOENG 1071 or 1072). Min Grade 'C'

Course Attributes: Undergraduate Research

BIOSC 0068 - FOUNDATIONS OF BIOLOGY SEA-PHAGES LABORATORY 2

Minimum Credits: 1

Maximum Credits: 1

This is the second half of a two-part introductory biology lab that uses bacteriophage discovery to introduce biology as an experimental science. Students learn current computational biological techniques through annotation and characterization of novel viral genomes and current lab techniques through advanced phage biology experiments. Students will be introduced to concepts in bioinformatics, microbiology, evolution, and molecular biology through hands-on experiments driven by results obtained during class.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (BIOSC 0050 or 0057 or 0058 or 0070 or 0190 or BIOL 0101 or 0111) and CREQ: (BIOSC 0160 or 0180 or 0165 or 0716 or BIOL 0102 or 0120) or (BIOENG 1071 or 1072). Min Grade C

Course Attributes: Undergraduate Research

BIOSC 0100 - PREPARATION FOR BIOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course is intended for students who have not had high school biology in the past five years to prepare them for

taking Foundations of Biology 1 (BIOSC 0150) and 2 (BIOSC 0160). The lecture will cover a subset of topics from Foundations of Biology 1 and 2, including a discussion of basic chemistry used in biology, cell biology including mitosis and meiosis, an introduction to genetics and molecular biology. The weekly recitations will explore topics covered in lecture in more depth and integrate problem solving and study skills. Some laboratory exercises may also be included in the recitation period to re-enforce the lecture topics by giving students the opportunity to investigate the experimental aspect of biology. The laboratory exercises and assignments will focus on data analysis, problem-solving and writing skills.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req.

BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1

Minimum Credits: 3

Maximum Credits: 3

This introductory course in biology is divided into two parts. The first part covers the cellular basis of life including a discussion of simple chemistry; cells as units of structure and function; and energy transformations. The second part includes an examination of those functions common to all organisms such as nutrition, gas and fluid transport, and hormonal and neuronal control. Throughout, the emphasis is on the mechanisms used to accomplish these basic functions.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req., SCI Polymathic Contexts: Science Seq.GE. Req.

BIOSC 0155 - HONORS FOUNDATIONS OF BIOLOGY 1

Minimum Credits: 4

Maximum Credits: 4

This course covers biological phenomena at the cellular level: macromolecules, cell structure, photosynthesis, cell respiration, homeostasis, signaling and genetics. The experimental basis supporting our understanding of these processes will be introduced.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: Advanced Placement Biology Test Score equal/greater 4 or International Baccalaureate Biology Score equal/greater 5

Course Attributes: David C. Frederick Honors College Course

BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2

Minimum Credits: 3

Maximum Credits: 3

This introductory course covers the basic principles of genetics, evolution, and ecology. Emphasis will be placed on the experimental and observational basis for our knowledge of these subjects.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (BIOSC 0150 or 0155 or 0715 or 0170 or 0190) or (BIOL 0101 or 0110); Min Grade

'C'

Course Attributes: DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req., SCI Polymathic Contexts: Science Seq.GE. Req.

BIOSC 0165 - HONORS FOUNDATIONS OF BIOLOGY 2

Minimum Credits: 4

Maximum Credits: 4

This course will cover the cell cycle, DNA replication, transcription, translation, molecular biology, biotechnology, genomics and bioinformatics, plant development, and animal development. The experimental basis supporting our understanding of these processes will be introduced.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: BIOSC 0155 (MIN GRADE: 'C') or Advanced Placement Biology Test Score equal/greater 5 or International Baccalaureate Biology Score equal/greater 7

Course Attributes: DSAS Natural Science General Ed. Requirement, David C. Frederick Honors College Course

BIOSC 0350 - GENETICS

Minimum Credits: 3

Maximum Credits: 3

This course is designed to examine the gene in the following dimensions: the gene as a unit of transmission, a unit of function, and a unit of mutation. In addition, the distribution and activity of genes in populations will be considered in the context of current theories of evolution.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (BIOSC 0160 or 0165 or 0716 or 0191 or 0180) or (BIOENG 1071 or 1072) or (BIOL 0102 or 0120) and (CHEM 0120 or 0102 or 0112 or 0151 or 0420 or 0720 or 0770 or 0780 or 0970); Min Grade 'C'

BIOSC 0351 - GENETICS LABORATORY

Minimum Credits: 1

Maximum Credits: 1

Laboratory exercises designed to illustrate the major principles of genetics.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (BIOSC 0060 or 0067 or 0068 or 0191 or 0080 or BIOL 0102 or 0121); Min Grade 'C'; CREQ: (BIOSC 0350 or 0355 or BIOL 0350 or 0203 or 0352); Min Grade 'C'; LEVEL: Junior or Senior

Course Attributes: Undergraduate Research

BIOSC 0352 - INTRODUCTION TO MOLECULAR GENETICS LABORATORY

Minimum Credits: 1

Maximum Credits: 1

Molecular genetics uses precise genome engineering to address increasingly sophisticated biological questions. In this course students will participate in an authentic research project, for example creating new mutations using current recombinant techniques and testing the biological consequences.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (BIOSC 0060 or 0067 or 0068 or 0191 or 0080 or BIOL 0102 or 0121) and (BIOSC 0350 or 0355 or BIOL 0203 or 0350 or 0352); Min Grade "C"; LEVEL: Junior or Senior

Course Attributes: Undergraduate Research

BIOSC 0370 - ECOLOGY

Minimum Credits: 3

Maximum Credits: 3

The objective of the course is to provide a broad introduction to the study of ecology at the undergraduate level, through the presentation of lectures dealing with organismal, population, community, and ecosystem levels of hierarchical organization. The contributions of laboratory and field investigations to the development of ecological knowledge will be considered.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: BIOSC 0160 or 0165 or 0716 or 0191 or 0180 or BIOL 0102 or 0120; Min Grade 'C' for all classes listed.

Course Attributes: Global Studies

BIOSC 0390 - ECOLOGY LABORATORY

Minimum Credits: 1

Maximum Credits: 1

The objective of the laboratory course is to provide students with practical experience in ecological methods and in the design, conduct, and analysis of ecological studies. Laboratory exercises are designed to correspond with major lecture topics presented in BIOSC 0370. Exercises will include laboratory and field studies.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: BIOSC 0060 or 0067 or 0068 or 0080 or 0191 or BIOL 0102 or 0121; CREQ: BIOSC 0370 or 0371 or BIOL 1430 or 1515; Min Grade 'C' for all classes listed. LVL: Junior or Senior

Course Attributes: Undergraduate Research

BIOSC 0391 - ECOLOGY LABORATORY WRITING PRACTICUM

Minimum Credits: 1

Maximum Credits: 1

Course is a writing practicum for ecology laboratory, BIOSC 0390. Students will prepare laboratory reports and write essays based on exercises and assignments for the companion course, BIOSC 0390. The reports and essays will be returned with instructor comments for student revision and resubmission.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006); CREQ: BIOSC 0390; PLAN: Ecology and Evolution (BS)

Course Attributes: Writing Intensive Course (WRIT)

BIOSC 0715 - UHC FOUNDATIONS OF BIOLOGY 1

Minimum Credits: 3

Maximum Credits: 3

This course covers biological phenomena at the cellular level: macromolecules, cell structure, photosynthesis, cell respiration, homeostasis, signaling and genetics. The experimental basis supporting our understanding of these processes will be introduced.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: Advanced Placement Biology Test Score equal/greater 4 or International Baccalaureate Biology Score equal/greater 5

Course Attributes: DSAS Natural Science General Ed. Requirement, University Honors Course

BIOSC 0716 - UHC FOUNDATIONS OF BIOLOGY 2

Minimum Credits: 3

Maximum Credits: 3

This course will cover the cell cycle, DNA replication, transcription, translation, molecular biology, biotechnology, genomics and bioinformatics, plant development, and animal development. The experimental basis supporting our understanding of these processes will be introduced.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: BIOSC 0715 (MIN GRADE: 'C') or Advanced Placement Biology Test Score equal/greater 5 or International Baccalaureate Biology Score equal/greater 7

Course Attributes: DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req., University Honors Course

BIOSC 0740 - YELLOWSTONE FIELD COURSE

Minimum Credits: 4

Maximum Credits: 4

The honors program of the University of Pittsburgh, in conjunction with the Department of BIOSC, has developed a summer field course in ecology which will be held in and adjacent to the yellow stone region of Wyoming and Montana. Field study opportunities will be emphasized and will comprise approximately 50% of the student contact hours.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req., University Honors Course

BIOSC 0805 - THE HUMAN BODY FOR NON-MAJORS

Minimum Credits: 3

Maximum Credits: 3

This is a course in human biology and physiology for students not majoring in biology. The goal is to provide students with an understanding of fundamental principles of life with an emphasis on the human body. The course will cover basic biochemistry and cell biology and then move to the structure and function of human organ systems. An essential part of the course is discussion of current issues, such as infectious, autoimmune and neurodegenerative diseases; asthma and allergy; nutrition and health; stem cells research and cloning; and methods of contraception and reproductive technologies.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: Can't enroll if currently or previously enrolled in BIOSC 0150 or 0155 or 0170 or BIOL 0101 or 0110

Course Attributes: DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req.

BIOSC 0815 - GENES AND DISEASES FOR NON- MAJORS

Minimum Credits: 3

Maximum Credits: 3

This course is designed to give students not majoring in biology the essential background in genetics and evolution to understand human disease. The material covered includes the fundamental principles of genetics, the role of genes and environment in various diseases, genomics, and the role of evolution. An essential part of the course is the discussion of current issues, such as genetic diseases, genetic screening, reproductive cloning, gene therapy, genetic basis of cancer, and emerging and reemerging diseases.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: Enrollment blocked if currently enrolled or previously enrolled in BIOSC 0150 or 0155 or 0170 or BIOL 0101 or 0110

Course Attributes: DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req.

BIOSC 0825 - SPECIAL TOPICS IN BIOLOGY FOR NON-MAJORS

Minimum Credits: 1

Maximum Credits: 3

A major topic in biology will be developed and explored by students.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: LG/SNC Elective Basis

BIOSC 0835 - OUR CHANGING WORLD FOR NON-MAJORS

Minimum Credits: 3

Maximum Credits: 3

This course is an introduction to the evolutionary and ecological forces that change our world. We will consider how organisms change over time (evolution), how they interact with each other and with their environment (ecology), and how they assemble as communities and ecosystems. We will then apply these concepts to understand how human activity is changing the biosphere.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: Enrollment blocked if currently or previously enrolled in BIOSC 0150 or 0155 or 0170 or BIOL 0101 or 0110

Course Attributes: DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req.

BIOSC 1000 - BIOCHEMISTRY

Minimum Credits: 3

Maximum Credits: 3

This course is designed to provide students with a basic understanding of the principles and underlying themes of modern biochemistry. The course includes all the major topics in biochemistry in considerable depth including thermodynamics and enzymology, protein and nucleic acid structure, function, and synthesis, lipids and membranes as well as metabolic pathways. This course will require that you master a new vocabulary including chemical structures, and there is an emphasis throughout on experimental approaches, molecular mechanisms, and problem solving.

Although the same topics will be covered as in the two semester biochemistry series (BIOSC 1810-1820), no one topic in BIOC 1000 will be covered in as much detail.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (BIOSC 0160 or 0165 or 0716 or 0191 or 0180 or BIOENG 1071 or BIOENG 1072 or BIOL 0101 or 0120 and (CHEM 0120 or 0102 or 0112 or 0151 or 0420 or 0720 or 0770 or 0970) (Min Grade 'C') and (CHEM 0310 or 0350 or 0730 or 0206 or 0231); Can't enroll if previously in BIOC 1810

BIOSC 1005 - INTRODUCTION TO BIOCHEMISTRY LAB

Minimum Credits: 1

Maximum Credits: 1

This course will guide students through a common experimental approach that is used in academic and industry research labs. In the first part of the semester, students will clone genes that have been selected because they are new genes of interest to research labs within the department. In the second part of the semester, students will express their cloned genes and purify the encoded proteins. They will use computer analysis to predict possible functions of their proteins and then test their hypotheses using biochemical techniques.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (BIOSC 0060 or 0067 or 0068 or 0080 or 0191) or (BIOL 0102 or 0121); CREQ: BIOC 1000; Min Grade 'C' for all courses listed; LVL: Junior or Senior

Course Attributes: Undergraduate Research

BIOSC 1010 - COMMUNICATING IN THE BIOLOGICAL SCIENCES

Minimum Credits: 2

Maximum Credits: 2

Conventions of scientific communication will be taught in this junior/senior level course as students learn to locate, read, and analyze primary literature in preparation for writing and revising a clear and concise review article. Students also prepare and revise an oral presentation of their review topic. Attention to document design, argument construction, verbal communication, and presenting skills will be taught and practiced. In addition to instructor led workshops, extensive peer review exercises are incorporated to help students develop evaluation skills and learn to incorporate feedback.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (BIOSC 0350 or 0370 or 1000 or 1810 or 1130); Min Grad 'C'; and (ENG 0102 or ENG CMP (0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or FP (0003 or 0006); and >16 BIOC and BIOL credits; LVL: Jr or Sr; PLAN: BIOC-BS

Course Attributes: Capstone Course, Writing Intensive Course (WRIT)

BIOSC 1050 - CELL AND MOLECULAR BIOLOGY OF DISEASE

Minimum Credits: 3

Maximum Credits: 3

Advances in cell biology and human genomics have elucidated the underlying causes of many human diseases and disorders. This course explores the fundamental molecular and cellular principles and processes that define the structural and functional properties of cells and tissues. In addition, this course focuses on how changes in cellular characteristics and behaviors contribute to human pathologies.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (BIOSC 0160 or 0165 or 0716 or 0191 or 0180) or (BIOENG 1071 or 1072) or (BIOL 0101 or 0120) and (CHEM 0120 or 0102 or 0112 or 0151 or 0420 or 0720 or 0770 or 0780 or 0970); Min Grade 'C'; PLAN: BIOSC-BS

BIOSC 1070 - HUMAN PHYSIOLOGY-UHC

Minimum Credits: 4

Maximum Credits: 4

In this course we will examine the signaling, cellular processes, and feedback loops of physiological systems in the human body that maintain homeostasis. Compensatory pathways and mechanisms to maintain homeostatic control will be investigated. Research related to the functioning of these systems will be emphasized throughout the course.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (BIOSC 0160 or 0165 or 0716 or 0191 or 0180) or (BIOENG 1071 or 1072) or (BIOL 0101 or 0120) and (CHEM 0120 or 0102 or 0112 or 0151 or 0420 or 0720 or 0770 or 0780 or 0970); Min Grade 'C' for all courses listed

Course Attributes: David C. Frederick Honors College Course

BIOSC 1120 - BIostatISTICS

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to foundational theory and methods for the analysis of biological data. Specific approaches include basic descriptive statistics and visualization, hypothesis testing, categorical analysis, analysis of variance (ANOVA), simple and advanced regression techniques, and experimental design. Emphasis is placed on using software to apply these methods to real biological data.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (BIOSC 0160 or 0165 or 0716 or 0191 or 0180 or BIOL 0102 or 0120) and (BIOSC 0350 or 0355 or 0370 or 0371 or 1000 or 1810 or BIOL 0203 or 0350 or 1430 or 1515) and STAT 1000; MIN GRADE 'C' for all courses

BIOSC 1130 - EVOLUTION

Minimum Credits: 3

Maximum Credits: 3

This course is an introduction to biological evolution. The theory, process and pattern of evolutionary change are presented. This course will encompass both micro evolutionary and macro evolutionary concepts. Lecture topics will include inheritance and variation, population genetics, natural selection, speciation, adaptation, the fossil record, and phylogenetic.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: BIOSC 0350 or 0355 or BIOL 0203 or 0350 OR 0352; Min Grade 'C' for all courses listed

Course Attributes: MCSI - Sustainability Focused

BIOSC 1131 - EVOLUTION LABORATORY

Minimum Credits: 1

Maximum Credits: 1

This laboratory course is designed to introduce students to the practice of evolutionary biology. Students will design and conduct experiments involving living organisms, as well as perform computer simulations, that demonstrate evolutionary processes.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: BIOSC 0060 or 0067 or 0068 or 0080 or BIOL 0102 or 0121; MIN GRADE 'C' CREQ: BIOSC 1130 or BIOL (1165 or 1435)

BIOSC 1140 - BEHAVIORAL ECOLOGY

Minimum Credits: 3

Maximum Credits: 3

Behavior is studied from an evolutionary perspective. Current models of foraging, mating, and social behavior are evaluated through classroom and field work.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: BIOSC 0160 or 0165 or 0716 or 0191 or 0180 or 0835 or BIOL 0102 or 0120 or GEOL 1641; Min Grade 'C' for all courses listed

Course Attributes: MCSI - Sustainability Focused, Undergraduate Research

BIOSC 1160 - FOREST ECOLOGY

Minimum Credits: 3

Maximum Credits: 3

Study of environmental factors and their influence on reproduction, growth, and development of individual trees and forest stands. Provides the biological basis for forest resources management.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: BIOSC 0160 or 0165 or 0716 or 0191 or 0180 or 0835 or BIOL 0102 or 0120 or GEOL 1641; Min Grade 'C' for all courses listed

Course Attributes: Undergraduate Research

BIOSC 1170 - FRESHWATER ECOLOGY

Minimum Credits: 3

Maximum Credits: 3

A field-oriented study of lakes, reservoirs, and streams as dynamic systems. Emphasis will be placed on the use of quantitative sampling and analytical techniques.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: BIOSC 0160 or 0165 or 0716 or 0191 or 0180 or 0835 or BIOL 0102 or 0120 or GEOL 1641; Min Grade 'C' for all courses listed

Course Attributes: MCSI - Sustainability Focused, Undergraduate Research

BIOSC 1180 - ECOLOGY OF AMPHIBIANS AND REPTILES

Minimum Credits: 3

Maximum Credits: 3

This course will include the ecology, evaluation, identification techniques, habitats, and life histories of amphibians and reptiles. While emphasis will be on the amphibians and reptiles of western Pennsylvania, those species occurring in the bordering states of Ohio, New York, and west Virginia will also be studied.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: BIOSC 0160 or 0165 or 0716 or 0191 or 0180 or 0835 or BIOL 0102 or 0120 or GEOL 1641; Min Grade 'C' for all courses listed

Course Attributes: Undergraduate Research

BIOSC 1190 - AQUATIC ENTOMOLOGY

Minimum Credits: 3

Maximum Credits: 3

An introduction to aquatic insects. Subjects emphasized will include ecology, morphology, evolution, habitats, and identification. Field and laboratory experiences will be supplemented with lectures and selected readings.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: BIOSC 0160 or 0165 or 0716 or 0191 or 0180 or 0835 or BIOL 0102 or 0120 or GEOL 1641; Min Grade 'C' for all courses listed

Course Attributes: Undergraduate Research

BIOSC 1200 - VERTEBRATE MORPHOLOGY

Minimum Credits: 3

Maximum Credits: 3

A study of the gross anatomy, histology, development, and evolution of the vertebrate body. Topics: vertebrate origin, phylogeny, and classification; basic histology; early embryology; evolutionary morphology; integument; skeletal system; muscular system; sense organs; nervous system; endocrine system; body cavity and mesenteries; digestive system; respiratory system; circulatory system; excretory system; reproductive system. Each system is examined in terms of its embryonic development, histology, functional anatomy, and evolutionary history. General principles of evolutionary morphology are emphasized. The purpose of the course is to provide an understanding of the history and functional anatomy of the body. It is designed as a background for studies in embryology, physiology, systematics, and human anatomy and physiology in professional schools.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: BIOSC 0160 or 0165 or 0716 or 0191 or 0180 or BIOL 0102 or 0120; Min Grade 'C' for all courses listed

BIOSC 1205 - VERTEBRATE MORPHOLOGY LAB

Minimum Credits: 1

Maximum Credits: 1

This is a laboratory to accompany BIOSC 1200. Students will dissect a shark and a cat, study various skeletons, and examine histology slides. The purposes of the course are to illustrate the structures discussed in the BIOSC 1200 lectures and to give the student the personal experience of learning animal structure through dissection and observation.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (BIOSC 0060 or 0067 or 0068 or 0080 or 0191) or (BIOL 0102 or 0121); CREQ: BIOSC 1200; Min Grade 'C' for all courses listed; LVL: Junior or Senior

Course Attributes: Undergraduate Research

BIOSC 1220 - ECOLOGICAL FIELD STUDIES

Minimum Credits: 3

Maximum Credits: 3

This course provides extensive field experience for undergraduates and will focus on developing the skills necessary for any practicing ecologist. Students will be involved in all stages of field projects including both individual and group exercises. Using a combination of lecture, extensive readings from the primary literature and hands-on field projects, the instructor will assist the students in gaining a proficiency with the background knowledge, thinking skills and technological tools necessary to conduct empirical ecological investigations.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: BIOSC 0160 or 0165 or 0716 or 0191 or 0180 or BIOL 0102 or 0120; Min Grade 'C' for all courses listed

BIOSC 1221 - URBAN ECOLOGICAL FIELD LAB

Minimum Credits: 1

Maximum Credits: 1

This course provides extensive field experience for undergraduates and will focus on developing the skills necessary for any practicing ecologist. Students will be involved in all stages of field projects including both individual and group exercises. Using a combination of lecture, extensive readings from the primary literature and hands-on field projects, the instructor will assist the students in gaining a proficiency with the background knowledge, thinking skills and technological tools necessary to conduct empirical ecological investigations.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (BIOSC 0060 or 0067 or 0068 or 0080 or 0191 or BIOL 0102 or 0121) and (BIOSC 0370 or 0371 or BIOL1430 or 1515 or GEOL 1641); Min Grade 'C' for all courses listed; LVL: Junior or Senior

Course Attributes: Undergraduate Research

BIOSC 1230 - ORNITHOLOGY

Minimum Credits: 3

Maximum Credits: 3

The study of birds with a field-oriented emphasis revolving around the late spring migrants and the breeding species in a wide variety of habitats. Classroom topics will include study skins, nests, eggs, and the annual cycle.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: BIOSC 0160 or 0165 or 0716 or 0191 or 0180 or 0835 or BIOL 0102 or 0120 or GEOL 1641; Min Grade 'C' for all courses listed
Course Attributes: Undergraduate Research

BIOSC 1250 - HUMAN PHYSIOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course will consider the function of various physiological systems in the human body, such as cardiovascular, respiratory, gastrointestinal, urinary, and reproductive. Each system discussed will be integrated into the larger function of homeostasis in health, disease or during challenges, such as stress and exercise.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (BIOSC 0160 or 0165 or 0716 or 0191 or 0180 or BIOENG 1071 or BIOENG 1072 or BIOL 0102 or 0120) and (CHEM 0120 or 0102 or 0112 or 0151 or 0420 or 0720 or 0770 or 0780 or 0970); Min Grade 'C' for these courses

BIOSC 1255 - PHYSIOLOGY LABORATORY

Minimum Credits: 1

Maximum Credits: 1

This laboratory course complements BIOSC 1250 human physiology. Students will spend the first half of the semester developing their skills by measuring homeostatic parameters of the human body (blood pressure, blood chemistry, muscle response, etc.). They will then use that knowledge to design and perform experiments modeled after conditions of both eustress (exercise) and distress (disease). In addition to weekly assignments, students will be required to present the results of their research projects.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (BIOSC 0060 or 0067 or 0068 or 0191 or 0080) or (BIOL 0102 or 0121); (MIN GRADE 'C' for listed courses); CREQ: (BIOSC 1250 or 1070 or 1080) or (NROSC 1070 or 1250); LEVEL: Junior or Senior

Course Attributes: Undergraduate Research

BIOSC 1270 - ECOLOGY OF FISH

Minimum Credits: 3

Maximum Credits: 3

A field course dealing with the interrelationships of fish and the biotic and abiotic environment. Improvements of aquatic habitat and applied aspects of the ecology of fish and fishery biology will be studied.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: BIOSC 0160 or 0165 or 0716 or 0191 or 0180 or 0835 or BIOL 0102 or 0120 or GEOL 1641; Min Grade 'C' for all courses listed

Course Attributes: MCSI - Sustainability Focused, Undergraduate Research

BIOSC 1275 - GENOMICS

Minimum Credits: 3

Maximum Credits: 3

The sequencing of the human genome has revolutionized the way in which we think about diverse biological topics. This course will explore how advances in our understanding of such subjects have been made possible by innovative sequencing technologies. This course will combine lecture, roundtable discussions and group presentations to explore how such technologies have allowed scientists to analyze genome-wide correlations between species to ultimately provide deeper insight into genome structure and function, the evolution of genomes, and the greater roles of genome analysis and editing in modern medicine.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (BIOSC 0350 or 0355) or (BIOL 0203 or 0350 or 0352); MIN GRADE 'C' for all courses

BIOSC 1280 - MICROBIAL GENETICS

Minimum Credits: 3

Maximum Credits: 3

This course will consist of a series of lectures discussing the molecular genetics of prokaryotic and eukaryotic microbes and ways in which they can be genetically engineered. It includes: (1) the genome structures of microbes, (2) classic methods for genetic exchange, (3) current approaches to genetic engineering, (4) applications of genetic engineering to human disease. Visits to the computer lab will introduce web-based analysis of microbial genome sequences.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: BIOSC 1850 and (BIOSC 0350 or BIOSC 0355 or BIOL 0350 or BIOL 0203 or BIOL 0352); Min Grade 'C' for all courses listed

BIOSC 1285 - GENOMICS LABORATORY

Minimum Credits: 1

Maximum Credits: 1

This course guides students through the design and evaluation of a data-driven research project in the area of genomics and metagenomics. In the first half of the course students apply methods of molecular biology to collect data about the studied system that are used as the starting point for scientific questions and hypotheses. In the second half they analyze the data and test their hypotheses using comparative and functional genomics approaches

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (BIOSC 0060 or 0067 or 0068 or 0191 or 0080 or BIOL 0102 or 0121) and (BIOSC 0350 or 0355 or BIOL 0203 or 0350); PROG: School of Arts and Sciences (UA-S); Min Grade 'C' for all courses listed; LEVEL: Junior or Senior

Course Attributes: Undergraduate Research

BIOSC 1290 - EXPERIMENTAL GENETIC ENGINEERING LABORATORY

Minimum Credits: 1

Maximum Credits: 1

This is a laboratory course focusing on the genetic engineering of prokaryotic and eukaryotic microbes. During this course, students will isolate novel mutants of a specific microbe and employ both traditional genetic approaches and current methods in molecular microbiology to clone, characterize and sequence the mutant alleles.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (BIOSC 1855 or 1860) and (BIOSC 0350 or BIOSC 0355 or BIOL 1315 or BIOL 0350); Min Grade 'C' for all courses listed
Course Attributes: Undergraduate Research

BIOSC 1291 - EXPERIMENTAL GENETIC ENGINEERING WRITNG PRACTICUM

Minimum Credits: 1

Maximum Credits: 1

This course is a writing practicum for experimental genetic engineering. Students will write three short laboratory reports based on work done in the corequisite course BIOSC 1290, and revise these, based on instructor comments, to form a final integrated paper.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006); CREQ: BIOSC 1290 (Min Grade 'C'); PLAN: Microbiology (BS)

Course Attributes: Writing Intensive Course (WRIT)

BIOSC 1310 - WETLAND ECOLOGY AND MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

Wetlands are an important transitional habitat from terrestrial to aquatic systems, and they provide services that are critical to the health and functioning of the ecosystem. In this field-oriented course, we will investigate the different types of wetlands, the properties that define wetlands, the identification of characteristic wetland plants and animals, the benefits that wetlands supply to the ecosystem and society, and the history and present status of wetland management.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (BIOSC 0160 or 0165 or 0180 or 0191 or 0716 or 0835) or (BIOL 0102 or 0120) or GEOL 1641; Min Grade 'C' for all courses listed

Course Attributes: Undergraduate Research

BIOSC 1320 - POPULATION BIOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course focuses on ecological and evolutionary processes at the population level. We will learn how to represent ecological and evolutionary dynamics using increasingly realistic mathematical models. We will first explore population ecology including models of single populations, meta-populations, and interactions between species. We then shift to population and evolutionary genetics studying how the mechanisms of evolution interact with each other. Finally, we will study the explicit interaction between ecological and evolutionary processes that can occur over short timescales.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: BIOSC 0370 or 0371 or BIOL 1430 or 1515; Min Grade 'C' for all courses listed
CREQ: BIOSC 1130 or BIOL (1165 or 1435)

BIOSC 1330 - FIELD BOTANY

Minimum Credits: 3

Maximum Credits: 3

Identification of native herbaceous and woody plants in terrestrial communities and the methods of quantifying their relative numbers, mass, and ecological relationships.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: BIOSC 0160 or 0165 or 0716 or 0191 or 0180 or 0835 or BIOL 0102 or 0120 or GEOL 1641; Min Grade 'C' for all courses listed

Course Attributes: Undergraduate Research

BIOSC 1340 - FIELD ENTOMOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course is offered at the Pymatuning laboratory of ecology field station. An introduction to the amazing taxonomic and ecological diversity of insects and their close relatives in the phylum Arthropoda. Emphasis will be placed on the collection and identification of the adult stages. Field and laboratory exercises will be supplemented with lectures and selected readings.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: BIOSC 0160 or 0165 or 0716 or 0191 or 0180 or 0835 or BIOL 0102 or 0120 or GEOL 1641; Min Grade 'C' for all courses listed

Course Attributes: Undergraduate Research

BIOSC 1350 - PLANT BIOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course will present an in-depth discussion of plant structure, function, and development in an ecological and evolutionary context. In addition, this course will survey the plant kingdom and related taxa with a focus on the evolution of these groups.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: BIOSC 0160 or 0165 or 0716 or 0191 or 0180 or BIOL 0102 or 0120; Min Grade 'C' for all courses listed

BIOSC 1360 - ECOLOGY OF FUNGI

Minimum Credits: 3

Maximum Credits: 3

A survey of the fungi and their interrelationships with abiotic and biotic factors in the environment. Adaptations will be studied in the field of laboratory using both aquatic and terrestrial fungi. Special emphasis will be placed on identification of the larger basidiomycetes (mushrooms).

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: BIOSC 0160 or 0165 or 0716 or 0191 or 0180 or 0835 or BIOL 0102 or 0120 or GEOL 1641; Min Grade 'C' for all courses listed

Course Attributes: MCSI - Sustainability Focused, Undergraduate Research

BIOSC 1375 - TROPICAL BIOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course will provide an introduction to ecological and evolutionary studies of living organisms in the tropics. The course will focus on major themes in ecology and evolution as they play out in the tropics, the most biodiverse region of the globe.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: BIOSC 0160 or 0165 or 0716 or 0180 or 0191 or BIOL 0102 or 0120 (MIN GRADE 'C')

BIOSC 1390 - FIELD TECHNIQUES IN ECOLOGY AND CONSERVATION

Minimum Credits: 3

Maximum Credits: 3

This course uses field demonstrations, hands-on research experience, and field trips to provide training and skill development for students interested in ecology and conservation. Students learn common techniques for surveying aquatic and terrestrial organisms, such as birds, mammals, fish, amphibians, insects, and vegetation. Students also learn experimental design, and how to apply proper field techniques and appropriately compile and analyze data.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (BIOSC 0160 or 0165 or 0180 or 0191 or 0716 or 0835) or (BIOL 0102 or 0120) or GEOL 1641; (MIN GRADE 'C')

Course Attributes: MCSI - Sustainability Focused, Undergraduate Research

BIOSC 1400 - DISEASE ECOLOGY

Minimum Credits: 3

Maximum Credits: 3

This field course will take an ecological approach to the study of infectious diseases. We will explore relationships between parasites (pathogens), their hosts and the environment in which they interact, with the objective of developing an understanding of how parasites (pathogens) spread through, persist in, and impact host populations. The course will include lectures, student-led discussions, field work, and lab-based activities.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: BIOSC 0370 or 0371 or BIOL 1430 or 1515; Min Grade 'C'

Course Attributes: MCSI - Sustainability Focused, Undergraduate Research

BIOSC 1405 - GLOBAL CHANGE BIOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the ecological and evolutionary impacts humans have on the environment, explores the interconnectedness between humans and the natural world, and evaluates options for mitigating environmental problems.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: BIOSC 0370 or 0371 or BIOL 1430 or 1515; Min Grade 'C'

BIOSC 1415 - FIELD MAMMOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course will provide an introduction to the biology, taxonomy, ecology and diversity of mammals. Students will gain knowledge of the characteristics and members of different orders of class Mammalia with a focus on species found in Pennsylvania, teaching students important techniques and skills in the study of mammals, including field sampling and monitoring techniques, appropriate methods for data collection, methods for collection and preparation of study specimens, taxonomy and species identification using both wild animals and their signs/tracks and preserved specimens, and the ecological role(s) that mammals play.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: BIOSC 0160 or 0165 or 0716 or 0191 or 0180 or 0835 or BIOL 0102 or 0120 or GEOL 1641; Min Grade 'C' for all courses listed

BIOSC 1420 - WILDLIFE ECOLOGY AND MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

This field course will address the principles that guide natural resource professionals in management of wildlife, including those used in management of game animals for harvest, in maintenance and restoration of viable populations, and in ecosystem management. The application of principles to actual problems in management and conservation of wildlife populations is emphasized including the techniques used to reduce, maintain, and increase population densities.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: BIOSC 0160 or 0165 or 0716 or 0191 or 0180 or 0835 or BIOL 0102 or 0120 or GEOL 1641; Min Grade 'C'

Course Attributes: MCSI - Sustainability Focused, Undergraduate Research

BIOSC 1430 - ECOPHYSIOLOGY

Minimum Credits: 3

Maximum Credits: 3

The adaptations of animals to deal with specialized environmental situations are studied across a spectrum of biological levels from biochemical to organismal. Topics such as thermal relations, water balance, and bioenergetics are considered. Biosc 1430 and 1435 are considered course repeats with similar material covered as a field course or a lecture course, respectively

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: BIOSC 0160 or 0165 or 0716 or 0191 or 0180 or 0835 or BIOL 0102 or 0120 or GEOL 1641; (Min Grade 'C')

Course Attributes: Undergraduate Research

BIOSC 1435 - ENVIRONMENTAL PHYSIOLOGY OF ANIMALS

Minimum Credits: 3

Maximum Credits: 3

This course in ecophysiology is a physiology course taught from an ecological and evolutionary perspective. The organismal, ecological, and evolutionary significance of physiological function will be emphasized along with molecular and cellular mechanisms. BIOSC 1430 and 1435 are considered course repeats with similar material covered as a field course or a lecture course, respectively.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: BIOSC 0370 or 0371 or BIOL 1430 or 1515: MIN GRADE: C

BIOSC 1440 - ANIMAL BEHAVIOR

Minimum Credits: 3

Maximum Credits: 3

This course examines the diversity of animal behavior from evolutionary and ecological points of view. We will examine how animals decide what to eat, where to live, how to compete with each other, and how to avoid predators. We also will investigate how animals choose who to mate with, when they should offer parental care, the conditions that favor social living, and how to best communicate. The lecture and recitation material is appropriate for more advanced students that have been trained in introductory biology and ecology.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: BIOSC 0370 or 0371 or BIOL 1430 or 1515 (MIN GRADE 'C'); Enrollment blocked if enrolled in, or previously completed BIOSC 1140

BIOSC 1445 - ANIMAL COMMUNICATION

Minimum Credits: 3

Maximum Credits: 3

Communication is a fundamental process in the lives of animals that influences nearly all aspects of their biology, from the developmental coordination of complex sensory organs to choices regarding mating partner identity. This course is explicitly integrative in approach, covering topics ranging from the neurobiology of signal production and reception to game-theoretic understandings of the evolution of communication networks.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: BIOSC 0370 or 0371 or BIOL 1430 or 1515 (MIN GRADE 'C')

BIOSC 1455 - HUMAN ENDOCRINOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course will focus on the physiology and anatomy of the human endocrine system. The molecular mechanisms of the synthesis, distribution, action, and regulation of hormones will be covered. Endocrine disorders including diabetes, Cushing's disease, Addison's disease, and parathyroid and calcium diseases will be studied to provide context. Additionally, we will cover the endocrine milieu of the developing embryo to adulthood and developmental disturbances during reproduction.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: (BIOSC 1250 or 1070 or 1080) or (NROSCI 1070 or 1250) or CABIO 0206 or CHBIO 0302 or PHARM 5115 (ALL MIN GRADE 'C')

BIOSC 1470 - BIOPHYSICAL CHEMISTRY

Minimum Credits: 3

Maximum Credits: 3

This course will deal with fundamental physical chemical principles especially applicable in the study of molecular biology. Topics will include (1) thermodynamics and chemical equilibrium; (2) kinetic theory and transport; and (3) chemical and enzyme kinetics. These subjects will be richly highlighted with numerous examples from biological systems, and techniques for studying these systems will be described. The topics covered will be developed from a physical chemical point of view.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: BIOSC 1000 or 1810; Min Grade 'C' for all courses listed

BIOSC 1500 - CELL BIOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course will be devoted to a discussion of the current state of our understanding of cell structure and function. Eukaryotic cells will be emphasized with particular attention to animal cells. However, prokaryotic cells will be discussed for comparative purposes. Course material will emphasize the experimental basis for our understanding of cell biology and the relationship between structure and function. Most of the techniques to be considered will involve biochemical and molecular biological approaches used in the study of cell function. Thus the course will assume a familiarity with the principles of biochemistry covered in the prerequisites and will not repeat this material. Topics will include membranes, the nucleus, mitochondria and chloroplasts, the cytoskeleton, cell motility, growth and division, endocytosis and exocytosis, and selected topics on the cellular biological aspects of cancer and the immune system.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: BIOSC 1000 or 1810 (MIN GRADE 'C')

BIOSC 1510 - CELL BIOLOGY LABORATORY

Minimum Credits: 1

Maximum Credits: 1

This experimental methods course is designed to give upper division majors and opportunity to learn modern techniques used in cell biology research. Students will master the fundamentals of light microscopy (bright field, phase contrast, and dark field) and explore more advanced techniques such as fluorescence, confocal, video, and differential interference contrast microscopy. Students will isolate plasma membranes, mitochondria, nuclei, brush borders, and flagella and characterize these organelles by microscopy, enzyme assays and antibody labeling.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (BIOSC 0060 or 0067 or 0068 or 0191 or 0080) or (BIOL 0102 or 0121); CREQ: BIOSC 1500 or 1050 (MIN GRADE 'C'); LVL: Junior or Senior

Course Attributes: Undergraduate Research

BIOSC 1511 - CELL BIOLOGY LABORATORY WRITING PRACTICUM

Minimum Credits: 1

Maximum Credits: 1

This course is the writing practicum for cell biology laboratory, BIOSC 1510. Students will prepare laboratory reports based on exercises and assignments for the companion course, BIOSC 1510.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006); CREQ: BIOSC 1510 (MIN GRADE 'C'); PLAN: Molecular Biology (BS)

Course Attributes: Writing Intensive Course (WRIT)

BIOSC 1520 - DEVELOPMENTAL BIOLOGY

Minimum Credits: 3

Maximum Credits: 3

The mechanisms of animal development will be analyzed. The first half of the course will emphasize classic embryological investigations focusing on how the embryonic body plan becomes organized, while the second half will deal primarily with the genetic and molecular regulation of development. The experimental analysis of such processes as fertilization, morphogenetic movements, tissue interactions, pattern formation, and gene expression will be discussed using examples from a variety of animal embryos, and by discussion of the current research literature.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: BIOSC 0350 or 0355 or BIOL 0350 or 0203 or 0352 (MIN GRADE 'C')

BIOSC 1530 - DEVELOPMENTAL BIOLOGY LABORATORY

Minimum Credits: 1

Maximum Credits: 1

This laboratory course is designed to provide students with practical experience in the scientific method of experimental research with regard to animal development. Initial labs will stress observational skills, but the goal of each will be to understand the careful and deliberate process of experimental design, execution, and the interpretation of results. The importance of establishing and interpreting controls in experimental procedure will also be emphasized.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: BIOSC 0060 or 0067 or 0068 or 0191 or 0080 or BIOL 0102 or 0121; CREQ: BIOSC 1520 (ALL MIN GRADE 'C'); LEVEL: Junior or Senior

Course Attributes: Undergraduate Research

BIOSC 1531 - DEVELOPMENTAL BIOLOGY LABORATORY WRITING PRACTICUM

Minimum Credits: 1

Maximum Credits: 1

Course is a writing practicum for developmental biology laboratory, BIOSC 1530. Students will prepare laboratory reports and write essays based on exercises and assignments for the companion course, BIOSC 1530.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENGCOMP 0200 or ENGR 0012 or (ENGCOMP 0203 or 0205 or 0207 or 0208 or 0250 or FP 0003 or 0006 or ENGCOMP 0004 or 0006 or 0020 or ENG 0102); CREQ: BIOSC 1530 (MIN GRADE 'C');

PLAN: Molecular Biology (BS)

Course Attributes: Writing Requirement Course

BIOSC 1540 - COMPUTATIONAL BIOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course is designed to give students a broad understanding of how computational approaches can be used to solve problems in biology. Both the biological and computational underpinnings of the methods will be addressed.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (BIOSC 0160 or 0165 or 0180 or 0191 or 0716) or (BIOL 0102 or 0120) (MIN GRADE 'C')

BIOSC 1542 - COMPUTATIONAL GENOMICS

Minimum Credits: 3

Maximum Credits: 3

This course will explore the use of computer-aided methods to generate and test biological hypotheses at whole-genome scales. Students will gain both a theoretical and practical understanding of working with genomic data typical of high-throughput sequencing technologies.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: BIOSC 1540 and (CS 0008 or 0010 or 0011 or 0012); MIN GRADE 'C'

BIOSC 1544 - SIMULATION AND MODELING

Minimum Credits: 3

Maximum Credits: 3

This course teaches computational structural biology, simulation, and modeling, as seen through the lens of rational, computer-aided drug discovery. Topics will include protein structure and modeling, cheminformatics, virtual small-molecule screening, molecular dynamics simulations, molecular visualization, and online resources for studying proteins and molecules. A class project will allow students to apply the relevant tools and to demonstrate their acquired knowledge.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: BIOSC 1540 and (CS 0008 or 0010 or 0011 or 0012); MIN GRADE 'C'

BIOSC 1545 - THE MATHEMATICS OF BIOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course uses examples from across biology to illustrate how simple mathematical models can increase our understanding of biological systems. We will focus on several foundational modeling approaches, including systems of difference equations, matrix models, probability, and statistical data analysis. Students will discover how these approaches are used, their strengths and limitations, and how they could be extended to more complex problems. Students should be prepared to use both spreadsheet programs and scripts, written in a language such as Python or R, to explore these models.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (BIOSC 0160 or 0716 or 0191 or 0180 or BIOL 0102 or 0120) and (MATH 0220 or 0221); MIN GRADE 'C';

BIOSC 1550 - ECOLOGY AND EVOLUTION SEMINAR

Minimum Credits: 1

Maximum Credits: 1

In this seminar course, a single topic is developed by student presentations of research articles from the original scientific literature as chosen by the instructor. Topics might include, for example, "cladistics controversies", "molecular phylogeny", or "wetlands conservation".

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (BIOSC 0370 or 0371 or BIOL 1430 or 1515) and BIOSC 1130; (ALL MIN GRADE 'C') PLAN: Ecology and Evolution (BS)

Course Attributes: Capstone Course

BIOSC 1551 - ECOLOGY AND EVOLUTION SEMINAR WRITING PRACTICUM

Minimum Credits: 1

Maximum Credits: 1

This course is a writing practicum for the ecology and evolution seminar. Students will write one paper, with several revisions, based on the topic of their oral presentation in the co-requisite course BIOSC 1550. Topics will be chosen by the instructor for BIOSC 1550.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006); CREQ: BIOSC 1550 (MIN GRADE 'C'); PLAN: Ecology and Evolution (BS)

Course Attributes: Capstone Course, Writing Intensive Course (WRIT)

BIOSC 1560 - CELL AND DEVELOPMENTAL BIOLOGY SEMINAR

Minimum Credits: 1

Maximum Credits: 1

In this seminar course, a single topic each term is developed by student presentations of research articles from the original scientific literature, as chosen by the instructor. Possible topics might include genes encoding major developmental switch proteins, the cytoskeletal basis of morphological movements in development, or establishing and subdividing body axes in development.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: BIOSC 1500 (MIN GRADE 'C'); CREQ: BIOSC 1520 (MIN GRADE 'C'); PLAN: Molecular Biology (BS)

BIOSC 1561 - CELL DEVELOPMENTAL BIOLOGY SEMINAR WRITING PRACTICUM

Minimum Credits: 1

Maximum Credits: 1

This course is a writing practicum for the cell and developmental biology seminar. Topics will be chosen by the instructor for BIOSC 1560.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006); CREQ: BIOSC 1560 (MIN GRADE 'C'); PLAN: Molecular Biology (BS)

Course Attributes: Capstone Course, Writing Intensive Course (WRIT)

BIOSC 1562 - MOLECULAR BIOLOGY SEMINAR

Minimum Credits: 1

Maximum Credits: 1

Topics in molecular biology will be explored using primary literature. Students will present and discuss research articles.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: BIOSC 1940 Molecular Biology; CREQ: BIOSC 1945 Advanced Molecular Biology (grade of C or better); PLAN: Molecular Biology (BS)

BIOSC 1563 - MOLECULAR BIOLOGY SEMINAR WRITING PRACTICUM

Minimum Credits: 1

Maximum Credits: 1

Topics in molecular biology will be explored using primary literature. Students will complete a series of writing assignments that will culminate in the production of a literature review paper.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006); CREQ: BIOSC 1562 (MIN GRADE 'C'); PLAN: Molecular Biology (BS)

BIOSC 1570 - MICROBIOLOGY SEMINAR

Minimum Credits: 1

Maximum Credits: 1

In this seminar course, a single topic each term will be chosen in which the instructor is experienced and knowledgeable, and in which a suitable collection of primary research articles is available for student presentation. The papers to be discussed will be drawn primarily from the recent literature, and will reflect current concepts in microbiology.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: BIOSC 1865 (MIN GRADE 'C'); PLAN: Microbiology (BS)

Course Attributes: Capstone Course

BIOSC 1571 - MICROBIOLOGY SEMINAR WRITING PRACTICUM

Minimum Credits: 1

Maximum Credits: 1

This course is a writing practicum for the microbiology seminar. Topics will be chosen by the instructor for BIOSC 1570.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006); CREQ: BIOSC 1570 (MIN GRADE 'C'); PLAN: Microbiology (BS)

Course Attributes: Capstone Course, Writing Intensive Course (WRIT)

BIOSC 1580 - BIOCHEMISTRY SEMINAR

Minimum Credits: 1

Maximum Credits: 1

In this seminar course, a single topic each term is developed by student presentations of research articles from the original scientific literature, as chosen by the instructor. Recent topics have included biosynthesis of peptide hormones, recombinant DNA technology, processing of mRNA precursors, protein folding with emphasis on the molecular biology and biochemistry of chaperonins, and protein translocation within cells.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: BIOSC 1820 (MIN GRADE 'C'); PLAN: Biochemistry (BS) or SUBPLAN: Biochemistry Track (BIOCHEM)

BIOSC 1581 - BIOCHEMISTRY SEMINAR WRITING PRACTICUM

Minimum Credits: 1

Maximum Credits: 1

This course is a writing practicum for the biochemistry seminar. Topics will be chosen by the instructor for BIOSC 1580.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) FP (0003 or 0006); CREQ: BIOSC 1580 (MIN GRADE 'C'); PLAN: Biochemistry (BS) or SUBPLAN: Biochemistry Track (BIOCHEM)

Course Attributes: Capstone Course, Writing Intensive Course (WRIT)

BIOSC 1590 - SPECIAL TOPICS IN BIOLOGICAL SCIENCE

Minimum Credits: 1

Maximum Credits: 3

A single major topic in biology will be developed and explored by students in the form of student presentations of current and/or historical literature.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: BIOSC 0370 or 0371 or BIOL 1430 or 1515 (MIN GRADE 'C')

BIOSC 1610 - CONSERVATION BIOLOGY

Minimum Credits: 3

Maximum Credits: 3

This field course will focus primarily on the applied aspects of conservation biology by examining the degradation and loss of species populations and ecosystems due to human activities and by considering alternatives for avoiding and/or mitigating these impacts. The perspectives of science, management, and policy will be elucidated in the context of historical, current, and future strategies designed to conserve the diversity of life.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: BIOSC 0160 or 0165 or 0716 or 0191 or 0180 or 0835 or BIOL 0102 or 0120 or GEOL 1641; Min Grade 'C'

Course Attributes: Undergraduate Research

BIOSC 1615 - ECOLOGY AND CONSERVATION IN YELLOWSTONE

Minimum Credits: 3

Maximum Credits: 3

Through day trips in the Greater Yellowstone Ecosystem, students will gain in-depth insights into the ecological and evolutionary dynamics of the area. We will focus on flora and fauna and their interactions with one another and their environment in several distinct ecoregions. We will explore sociocultural and political aspects of biological resource use, conservation, and sustainability. Students will gain hands-on experience in a variety of ecological field skills while developing knowledge and appreciation of the diverse natural and sociocultural landscapes that shaped-and continue to shape-the Greater Yellowstone Ecosystem.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

BIOSC 1630 - COMPUTATIONAL BIOLOGY SEMINAR

Minimum Credits: 2

Maximum Credits: 2

Topics in computational biology will be explored using primary literature. Students will present research articles orally, as well as complete a series of writing assignments that will culminate in the production of a literature review paper.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: BIOSC 1540 (minimum grade of 'C') and (ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006); LEVEL: Junior or Senior; PLAN: CBUAS-BS and CBUSCI-BS

Course Attributes: Writing Intensive Course (WRIT)

BIOSC 1640 - COMPUTATIONAL BIOLOGY RESEARCH

Minimum Credits: 3

Maximum Credits: 3

This course will use computational biology methods to address an authentic research question.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: LG/SU3 Elective Basis

Course Requirements: PREQ: BIOSC 1540 and (CS 0008 or 0010 or 0011 or 0012) and CS 0445; MIN GRADE 'C'; PLAN: Bioinformatics and Computational Biology Majors (BINF-BS and CBUAS-BS and CBUSCI-BS).

Course Attributes: Capstone Course, Undergraduate Research

BIOSC 1690 - EXPERIENCE IN UNDERGRADUATE TEACHING

Minimum Credits: 0.5

Maximum Credits: 6

A program to allow qualified undergraduate students to assist in the teaching of one of the BIOSC lecture or laboratory courses that they have successfully completed. Details of the student's responsibility must be worked out with the biological sciences faculty member in whose course the student will be assisting.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: H/S/U Basis

BIOSC 1691 - UNDERGRADUATE TA TRAINING IN THE BIOLOGICAL SCIENCES

Minimum Credits: 1

Maximum Credits: 1

This course trains Undergraduate Teaching Assistants in skills for successful teaching practices. The course may be taken either prior to becoming a UTA or simultaneously with BIOSC 1690 Experience in Undergraduate Teaching.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Satisfactory/No Credit

BIOSC 1730 - VIROLOGY

Minimum Credits: 3

Maximum Credits: 3

This course presents the concepts and methods of modern molecular virology. Principles of bacteriophage and animal virus replication are covered. Particular emphasis is placed on the use of viruses as model systems to approach basic problems in molecular biology. Applications of virological knowledge to medicine and biotechnology will be discussed.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (BIOSC 0350 or 0355 OR BIOL 0203 or 0350 or 0352) and (BIOSC 1000 and 1850) (MIN GRADE 'C')

BIOSC 1740 - VIROLOGY LABORATORY

Minimum Credits: 1

Maximum Credits: 1

This course is designed to give each student practical experience with the methods and techniques used in the study of viruses while conducting original research using bacteriophages.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (BIOSC 1855 or 1860) and (BIOSC 0350 or 0355 or BIOL 0203 or 0350); MIN GRADE 'C' for all courses; LEVEL: Junior or Senior

Course Attributes: Undergraduate Research

BIOSC 1741 - VIROLOGY LABORATORY WRITING PRACTICUM

Minimum Credits: 1

Maximum Credits: 1

Course is a writing practicum for virology laboratory, BIOSC 1740. Students will prepare laboratory reports and write essays based on exercises and assignments for the companion course, BIOSC 1740.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006); CREQ: BIOSC 1740(MIN GRADE 'C')

Course Attributes: Writing Intensive Course (WRIT)

BIOSC 1760 - IMMUNOLOGY

Minimum Credits: 3

Maximum Credits: 3

Course will describe the role of the immune system invertebrates. The molecular and cellular basis of immunity will be emphasized. The roles of antigens, antibodies and immunocompetent cells in pathogenesis and immunity will be covered. The applications of immunology in the design of vaccines, immunotherapeutic, immunodiagnostics, organ transplantation, cancer therapy, and immune system diseases will be discussed, as will the use of immunology in biological research.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: BIOSC 0350 or 0355 or BIOL 0203 or 0350 or 0352 (MIN GRADE 'C')

BIOSC 1810 - MACROMOLECULAR STRUCTURE AND FUNCTION

Minimum Credits: 3

Maximum Credits: 3

This course is concerned primarily with the structure and functions of proteins and nucleic acids. These are large polymers where structure and function are determined by the sequence of monomeric units. Topics will include the physical and chemical properties of the monomer units (amino acids/nucleotides); the determination of the linear sequence of these units; analyses of the three-dimensional structures of the macromolecules; kinetics and mechanisms of enzyme catalyzed reactions, including RNA enzymes; regulation of enzyme activity; molecular recognition; and fidelity of protein synthesis. Emphasis throughout will be on experimental methods, molecular mechanisms and problem solving.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ:(BIOSC 0160 or 0165 or 0716 or 0191 or 0180 or BIOENG 1071 or BIOENG 1072 or BIOL 0102 or 0120)(MIN GRADE 'C')and(CHEM 0320 or 0350 or 0740 or 0208 or 0232) PLAN:BIOSC-BS or ECO-EV-BS or MICRO-BS or MOLBIO-BS or CBUAS-BS or CBUSCI-BS

BIOSC 1820 - METABOLIC PATHWAYS AND REGULATION

Minimum Credits: 3

Maximum Credits: 3

The primary focus of this course will be on the pathways of intermediary metabolism by which all cells and organisms synthesize and degrade carbohydrates, lipids (fats), nitrogenous compounds, and nucleotides. Specifically, we will examine the chemistry of the reactions that constitute these pathways, and discuss how energy is derived from the breakdown of nutrients. A strong emphasis will be placed on how the pathways are regulated by specific molecules and

hormones in living systems. Finally, we will consider how several human diseases arise from defects in metabolic pathways, and will review papers in the current scientific literature on new techniques by which the components of metabolic pathways are characterized in the laboratory.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: BIOSC 1810 (MIN GRADE 'C')

BIOSC 1830 - BIOCHEMISTRY LABORATORY

Minimum Credits: 2

Maximum Credits: 2

Course introduces several basic experimental techniques of biochemistry including spectrophotometry, ion-exchange and gel-permeation chromatography, radio-chemical methods, gel electrophoresis, enzyme isolation, and nucleic acid purification. Lecture will concern the techniques under study.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (BIOSC 0060 or 0067 or 0068 or 0191 or 0080 or BIOL 0102 or 0121) and BIOSC 1810 (MIN GRADE 'C'); CREQ: BIOSC 1820 (MIN GRADE 'C'); PLAN: Molecular Biology Majors (MOLBIO-BS) or Biochemistry (BS)

Course Attributes: Undergraduate Research

BIOSC 1831 - BIOCHEMISTRY LABORATORY WRITING PRACTICUM

Minimum Credits: 1

Maximum Credits: 1

Course is a writing practicum for biochemistry laboratory, BIOSC 1830. Students will prepare laboratory reports and write essays based on exercises and assignments for the companion course, BIOSC 1830.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or FP (0003 or 0006); CREQ: BIOSC 1830 (MIN GRADE 'C'); PLAN: Biochemistry (BS) or SUBPLAN: SUBPLAN: Biochemistry Track (BIOCHEM)

Course Attributes: Writing Intensive Course (WRIT)

BIOSC 1850 - MICROBIOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course will introduce students to the basic biology, diversity in types, and survival strategies of microorganisms. We will study basic topics, including microbial growth, metabolism, nutrition and genetics, as well as the relevance of microorganisms to human disease, biotechnology and environmental science.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (BIOSC 0160 or 0165 or 0716 or 0191 or 0180 or BIOENG 1071 or 1072 or BIOL 0102 or 0120) and (CHEM 0120 or 0102 or 0112 or 0420 or 0720 or 0770 or 0780 or 0970); Min Grade 'C' for these courses

BIOSC 1855 - INTRODUCTION TO MICROBIOLOGY LABORATORY

Minimum Credits: 1

Maximum Credits: 1

Students in this course will culture microorganisms from natural samples such as soil, vegetables, and their own skin, and learn various methods in the process of studying the organisms they have cultured. The topics for the course include (a) survey types of microorganisms, including bacteria, fungi, protozoa, algae, and bacterial viruses, (b) types of methods used to culture and study these microorganisms, (c) some practical applications of microbiology such as microbiological analysis of wastewater, and identification of clinical isolates.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: BIOSC 0060 or 0067 or 0068 or 0191 or 0080 or BIOL 0102 or 0121 (MIN GRADE 'C'); CREQ: BIOSC 1850 (MIN GRADE 'C'); LEVEL: Junior or Senior

Course Attributes: Undergraduate Research

BIOSC 1860 - MICROBIOLOGY LABORATORY

Minimum Credits: 2

Maximum Credits: 2

This laboratory course introduces basic techniques used for isolation of microorganisms in pure culture, identification of groups of microorganisms, and study of microbial physiology, genetics, and ecology. Some topics in applied microbiology that are covered include food microbiology, water and waste water analysis, and identification and antibiotic sensitivity-testing of pathogenic isolates. Viruses, archaebacterial, bacteria, algae, protozoa, and fungi that students isolate from soil, pond water, human skin, and other sources are used to illustrate these methods.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (BIOSC 0060 or 0067 or 0068 or 0191 or 0080 or BIOL 0102 or 0121) (MIN GRADE 'C'); CREQ: BIOSC 1850 (MIN GRADE 'C'); PLAN: Microbiology (BS)

BIOSC 1861 - MICROBIOLOGY LABORATORY WRITING PRACTICUM

Minimum Credits: 1

Maximum Credits: 1

Course is a writing practicum for microbiology laboratory, BIOSC 1860. Students will prepare laboratory reports and write essays based on exercises and assignments for the companion course, BIOSC 1860.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006); CREQ: BIOSC 1860 (MIN GRADE 'C'); PLAN: Microbiology (BS)

Course Attributes: Writing Intensive Course (WRIT)

BIOSC 1865 - MICROBIAL PHYSIOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course examines the diversity of microbial life from a physiological point of view. We will examine the fundamental processes of microbial metabolism in diverse organisms, and develop a framework for understanding how organisms use different approaches to solve specific needs. Lecture material is appropriate for students trained in introductory microbiology and in biochemistry.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: BIOSC 1850 and (BIOSC 1000 or 1810); Minimum Grade 'C'

BIOSC 1900 - BIOLOGICAL SCIENCES PEER ADVISING

Minimum Credits: 1

Maximum Credits: 1

Students in the Department of Biological Sciences will be trained as Peer Advisors who are able to share their experiences and offer appropriate advice on scheduling, studying, and extracurricular activities. Peer Advisors will meet with current and prospective BIOSC majors to help with course requirements, career preparation, and work-life balance while also helping to develop a stronger sense of community within our large department. Students must have permission from the Biological Sciences Advising Office to enroll. This course does not satisfy elective credits towards majors within the Department of Biological Sciences.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Satisfactory/No Credit

BIOSC 1901 - INDEPENDENT STUDY

Minimum Credits: 0.5

Maximum Credits: 6

A program of independent reading with individual tutorials on a topic chosen in consultation with the BIOSC faculty member who will supervise the program.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Satisfactory/No Credit

Course Requirements: PREQ: BIOSC 0160 or 0716 or 0191 or 0180 or BIOL 0102 or 0120

Course Attributes: Capstone Course

BIOSC 1903 - UNDERGRADUATE RESEARCH

Minimum Credits: 0.5

Maximum Credits: 6

A program of independent laboratory research, with supporting library work, on a topic chosen in consultation with the BIOSC faculty member who will supervise the work.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Satisfactory/No Credit

Course Attributes: Capstone Course

BIOSC 1904 - UNDERGRADUATE HONORS RESEARCH

Minimum Credits: 0.5

Maximum Credits: 6

A program of independent laboratory and library research on topic chosen in consultation with the BIOSC faculty member who will supervise the work.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Satisfactory/No Credit

Course Attributes: Capstone Course, Undergraduate Research

BIOSC 1905 - HONORS RESEARCH WRITING PRACTICUM

Minimum Credits: 1

Maximum Credits: 1

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: Writing Intensive Course (WRIT)

BIOSC 1906 - RESEARCH COMMUNICATION: COMMUNICATION IN LIFE SCIENCES RESEARCH

Minimum Credits: 1

Maximum Credits: 1

This course introduces students to a variety of topics associated with the written, oral, and pictorial communication of scientific hypotheses, data, and results, using personal research experiences of students in the course. Students will read scientific literature, discuss how to present data and models, and complete diverse assignments. Techniques to model presentations for different audiences will be emphasized. It is recommended that students work in a research lab while taking the course. The course is for students enrolled in the research certificate in biological and biomedical sciences.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Letter Grade

BIOSC 1907 - RESEARCH DECONSTRUCTION: UNDER THE HOOD OF LIFE SCIENCES RESEARCH

Minimum Credits: 1

Maximum Credits: 1

This course takes an in depth look into how scientific research is done by studying where research is done, who does it, how questions are developed, how approaches and techniques are chosen, and how data is analyzed and presented. Students listen to a research seminar aimed at an expert audience, and then dissect the work throughout the semester. At the end of term, pieces from studying the research project are reassembled, a video of the seminar critiqued, and the course concludes with a Q+A session with the seminar speaker. The course is for students enrolled in the research certificate in biological and biomedical sciences.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Letter Grade

Course Requirements: PREQ: BIOSC 0160 or 0180 or 0191 or 0716 or BIOL 0102 or 0120 (MIN GRADE 'C'); CREQ: BIOSC 1903 or 1904 or NROSCI 1901 or 1961 (MIN GRADE 'C')

BIOSC 1909 - ASBMB DEGREE CERTIFICATION EXAM PREPARATION

Minimum Credits: 1

Maximum Credits: 1

This course is designed for Biochemistry and Molecular Biology majors entering their last spring semester and who are registered for the American Society for Biochemistry and Molecular Biology (ASBMB) Degree Certification Exam. Areas of review will focus on the ASBMB core competencies of Energy & Metabolism, Structure & Function, Information Storage & Transfer, and Scientific Skills.

Academic Career: Undergraduate

Course Component: Workshop

Grade Component: Satisfactory/No Credit

Course Requirements: CREQ: BIOSC 1560 or 1562 or 1580; PLAN: BIOCHM-BS or MOLBIO-BS; LVL: Senior

BIOSC 1910 - INTERNSHIP

Minimum Credits: 1

Maximum Credits: 6

Internship in the area of biological sciences.

Academic Career: Undergraduate

Course Component: Internship

Grade Component: Satisfactory/No Credit

Course Attributes: Undergraduate Internship

BIOSC 1940 - MOLECULAR BIOLOGY

Minimum Credits: 3

Maximum Credits: 3

Course will examine the molecular basis of life processes, with a primary emphasis on genes (what they are, what they do, how they determine the properties of an organism). Topics covered will include replication of DNA, transcription of DNA into rna, and translation of RNA into protein. Much of the course will be concerned with how these processes are regulated in response to changes in the environment, and how this regulation relates to the observed properties and behavior of the organism.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (BIOSC 0350 or 0355 or BIOL 0350 or 0203) and (BIOSC 1000 or 1810) (MIN GRADE 'C')

BIOSC 1945 - ADVANCED MOLECULAR BIOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course will provide students with a deeper understanding of molecular biology for a subset of topics introduced first in BIOSC 1940 such as replication, DNA packaging, DNA repair, transcription, RNA processing, translation, and noncoding RNAs. Primary literature will be emphasized.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: BIOSC 1940; Min grade 'C'

BIOSC 1950 - MOLECULAR GENETICS LABORATORY

Minimum Credits: 2

Maximum Credits: 2

This course will discuss the theories and methodologies that have recently emerged as the central theme of modern molecular genetics. Lectures will emphasize descriptions and applications of techniques such as molecular cloning, restriction site mapping, in vitro mutagenesis, the polymerase chain reaction and DNA sequence analysis that have led to the recent explosion in knowledge about chromosome organization, gene structure, and the regulation of gene expression. Laboratory sessions will emphasize polymerase chain reaction, agarose gel electrophoresis, cloning DNA fragments, bacterial transformation, restriction analysis, and the sanger method of sequencing DNA.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: BIOSC 0060 or 0067 or 0068 or 0191 or 0080 or BIOL 0102 or 0121 (MIN GRADE 'C'); CREQ: BIOSC 1940 (MIN GRADE 'C'); PLAN: Molecular Biology Majors (MOLBIO-BS)

BIOSC 1951 - MOLECULAR GENETICS LABORATORY WRITING PRACTICUM

Minimum Credits: 1

Maximum Credits: 1

Course is a writing practicum for molecular genetics laboratory, BIOSC 1950. Students will prepare laboratory reports and write essays based on exercises and assignments for the companion course, BIOSC 1950.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006); CREQ: BIOSC 1950 (MIN GRADE 'C'); PLAN: Molecular Biology (BS)

Course Attributes: Writing Intensive Course (WRIT)

BIOSC 1998 - BENEFICIAL MICROBES, SYMBIOSIS, AND THE MICROBIOME

Minimum Credits: 3

Maximum Credits: 3

This course is focused on the beneficial roles of microorganisms in a range of natural, medical, agricultural, and/or industrial settings. Students will learn about how microbial communities alter human, animal, and plant biology, as well as the challenges in both creating and maintaining beneficial partnerships. Primary literature will be emphasized.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: BIOSC 1850; Min grade 'C'

BIOSC 1999 - MEDICAL MICROBIOLOGY

Minimum Credits: 3

Maximum Credits: 3

This is an advanced level lecture course educating students in the microbial aspects of human infectious diseases. Students will learn about the microbial basis of infection, the host response, and the nature of specific infections within the human body. The course also will present approaches for the diagnosis of infections and strategies for disease control. The topics of medical microbiology will be presented in a system-based rather than an organism-based approach.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: BIOSC 1850 (MIN GRADE 'C')

Biological Statistics

BIOST 2011 - PRINCIPLES OF STATISTICAL REASONING

Minimum Credits: 3

Maximum Credits: 3

Acquaints students with the concepts of statistical reasoning as applied to the study of public health problems. Students

learn the general principles of statistical analysis and acquire the ability to utilize a statistical software package (Minitab) as a tool to facilitate the processing, editing, storing, displaying, analysis and interpretation of health research related data.

Academic Career: GRAD

Course Component: Lecture

Grade Component: GradLG/SU3

Course Requirements: PROG: Graduate School of Public Health; PLAN: Excluded Plans = Biostatistics(DPH, PHD, MPH, MS, MSH)

BIOST 2012 - BAYESIAN & EMPIRICAL BAYES STAT

Minimum Credits: 3

Maximum Credits: 3

THE THEORETICAL FOUNDATIONS OF BAYESIAN AND EMPIRICAL BAYES STATISTICAL METHODS WILL BE PRESENTED. THE USE OF THESE METHODS IN DATA ANALYSIS WILL BE ILLUSTRATED WITH SPECIFIC EXAMPLES AND WITH DISCUSSIONS OF COMMON DATA ANALYSIS ISSUES CONTRASTS AND SIMILARITIES BETWEEN BAYESIAN, EMPIRICAL BAYESIAN, AND CLASSICAL METHODS WILL BE EVALUATED.

Academic Career: GRAD

Course Component: Lecture

Grade Component: Letter Grade

BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS 1

Minimum Credits: 3

Maximum Credits: 3

Discusses techniques for the application of statistical theory to actual data. Topics include probability theory, estimation of parameters, and tests of hypothesis for both the discrete and continuous case.

Academic Career: GRAD

Course Component: Lecture

Grade Component: GradLG/SU3

Bosn-Croat-Mont-Serb

BCMS 0010 - ELEMENTARY BOSNIAN/CROATIAN/MONTENEGRIN/SERBIAN 1

Minimum Credits: 3

Maximum Credits: 3

This is a four-skills (listening, speaking, reading, writing) practical introduction to the Bosnian/Croatian/Montenegrin/Serbian languages.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Russian & East European Studies

BCMS 0020 - ELEMENTARY BOSNIAN/CROATIAN/MONTENEGRIN/SERBIAN 2

Minimum Credits: 3

Maximum Credits: 3

This is a four-skills (listening, speaking, reading, writing) practical introduction to the

Bosnian/Croatian/Montenegrin/Serbian languages, second-semester first-year.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Second Language General Ed. Requirement, Russian & East European Studies

BCMS 0030 - INTERMEDIATE BOSNIAN/CROATIAN/MONTENEGRIN/SERBIAN 3

Minimum Credits: 3

Maximum Credits: 3

This is a four-skills (listening, speaking, reading, writing) practical introduction to the Bosnian/Croatian/Montenegrin/Serbian languages, first-semester, second-year.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

BCMS 0230 - ADVANCED INTENSIVE BOSNIAN/CROATIAN/MONTENEGRIN/SERBIAN

Minimum Credits: 6

Maximum Credits: 6

This is a four-skills intensive course in advanced Bosnian/Croatian/Montenegrin/Serbian language which is to be offered as part of the summer intensive workshops in Slavic languages.

Academic Career: Undergraduate

Course Component: Workshop

Grade Component: Letter Grade

Course Attributes: Russian & East European Studies

BCMS 0231 - ADVANCED INTENSIVE BOSNIAN/CROATIAN/MONTENEGRIN/SERBIAN PITT-MONTENEGRO

Minimum Credits: 10

Maximum Credits: 10

This is an advanced intensive course in Bosnian/Croatian/Montenegrin/Serbian which meets for six weeks during summer term in Pittsburgh, followed by four weeks of study in Montenegro. It is part of the Slavic, East European, and Near Eastern Summer Language Institute.

Academic Career: Undergraduate

Course Component: Workshop

Grade Component: Letter Grade

Course Attributes: Russian & East European Studies

BCMS 0233 - ADVANCED INTENSIVE BOSNIAN/CROATIAN/MONTENEGRIN/SERBIAN IN MONTENEGRO

Minimum Credits: 4

Maximum Credits: 4

This is a four week course in advanced intensive Bosnian/Croatian/Montenegrin/Serbian conducted in Montenegro which follows the six-week Pittsburgh intensive course. Students must complete the prior course or have had at least five semesters of Serbian language, or a prior intermediate-level knowledge of the language to register for this component.

Academic Career: Undergraduate

Course Component: Workshop

Grade Component: LG/SNC Elective Basis

Course Attributes: Russian & East European Studies

BCMS 0240 - FOURTH YEAR BOSNIAN/CROATIAN/MONTENEGRIN/SERBIAN

Minimum Credits: 6

Maximum Credits: 6

This is a fourth-year language course in Bosnian/ Croatian/ Montenegrin/ Serbian open to those with an advanced knowledge and to heritage speakers who wish to improve their written and spoken communicative competence.

Academic Career: Undergraduate

Course Component: Workshop

Grade Component: LG/SNC Elective Basis

Course Attributes: Russian & East European Studies

BCMS 0241 - FOURTH YEAR INTENSIVE BCMS PITT-MONTENEGRO

Minimum Credits: 10

Maximum Credits: 10

This is an intensive course in fourth-year Bosnian/Croatian/Montenegrin/Serbian which meets for six weeks during summer term in Pittsburgh, followed by four weeks study in Montenegro. It is part of the Slavic, East European and Near Eastern Summer Language Institute.

Academic Career: Undergraduate

Course Component: Workshop

Grade Component: Letter Grade

BCMS 0243 - FOURTH-YEAR INTENSIVE BCMS-MONTENEGRO

Minimum Credits: 4

Maximum Credits: 4

This is a four-week intensive course in fourth-year Bosnian/Croatian/Montenegrin/Serbian in Montenegro. Students must complete an upper level BCMS course in Pittsburgh's Summer Language Institute or have prior advanced-level knowledge of the language to register for this component.

Academic Career: Undergraduate

Course Component: Workshop

Grade Component: Letter Grade

BCMS 0400 - ADVANCED BOSNIAN/CROATIAN/MONTENEGRIN/SERBIAN 5

Minimum Credits: 3

Maximum Credits: 3

This course (third-year first-semester Bosnian/Croatian/Montenegrin /Serbian) is a systematic review of grammar and phraseology, which develops the student's vocabulary, grammar and communicative competence.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Russian & East European Studies

BCMS 0410 - ADVANCED BOSNIAN/CROATIAN/MONTENEGRIN/SERBIAN 6

Minimum Credits: 3

Maximum Credits: 3

This course (third-year second-semester Bosnian/Croatian/Montenegrin/Serbian) is a systematic review of grammar and phraseology, which develops the student's vocabulary, grammar and communicative competence.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Russian & East European Studies

BCMS 1901 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 4

This course allows students to work independently on individually designed projects in the Serbian and Croatian languages.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: LG/SNC Elective Basis

Business

BUS 0010 - YOUR ACADEMIC AND CAREER SUCCESS

Minimum Credits: 1

Maximum Credits: 1

In this course, you will: successfully orient yourself to the University of Pittsburgh, and specifically Pitt Business opportunities and expectations; develop an understanding of majors, minors, and certificates along with a process to identify the relationship between your degree options and your career development; explore paths of self-awareness and career opportunity utilizing assessment models including StrengthsFinder; develop networking skills, and relate those skills to establishing your personal and professional network; create a resume that has been reviewed by a representative from Career Development; develop an appreciation for global opportunities, such as Study Abroad and International Internships, learning how a global perspective can enhance your experience and is critical for your professional development; establish a Handshake account, into which you will upload your resume, schedule appointments with Advising, Career Development and the International Programs teams, register for events, and view internship/job opportunities.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Satisfactory/No Credit

Course Requirements: PROG: College of Business Admin

BUS 0020 - YOUR CAREER SUCCESS

Minimum Credits: 1

Maximum Credits: 1

In this course, you will: learn and practice a variety of tools used in the exploration of career paths (e.g., StrengthsFinder, Skill Clusters, informational interviewing, job shadowing, etc.); Explore your skills, abilities, and preferred roles and environments; develop and implement a personal strategy for career goal setting and planning; learn the internship and job search processes; learn and practice communication tools necessary throughout the job application process (e.g., resume, cover letter, social media, networking, interviewing, and accepting job offers).

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Satisfactory/No Credit

Course Requirements: PROG: College of Business Admin

BUS 0600 - CONSULTING FIELD PROJECT

Minimum Credits: 3

Maximum Credits: 3

This course teaches management consulting in a real-world environment. Students are provided a unique opportunity to apply the analytical tools and concepts taught by Katz, and do so in a practical manner. Each project includes three to five students assembled as a team. Each project involves a single "client" organization, which may be a profit, non-profit, or governmental. Each client provides its assigned study team with a project of immediacy and an executive dedicated to working with the team. A faculty advisor is assigned to each team. Students schedule their own time, dovetailing with client schedules and that of their faculty advisor. Students are further supported through Saturday consulting workshops led by consultants from the Pittsburgh office of McKinsey & Company, management consultants. An end-of-term competitive competition is also held, the winner being awarded the McKinsey Cup.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

BUS 1023 - GLOBAL PERSPECTIVES

Minimum Credits: 1

Maximum Credits: 1

This one-credit, one-week international experience is for students who wish to gain valuable experience and exposure to several business sectors and firms within the visited country. The purpose of experience is to focus on four industry-specific business sectors relevant to the historical, cultural, political, and economic background of the country. The sectors will be chosen from the following: healthcare, tourism/hospitality, arts, sports/athletics, human/social services, education, real estate, and banking. As a result of the experience, students will develop a "tool kit" of concepts and information regarding the cultural and business climate of the country in focus, begin developing a working knowledge of how differences in cultural context affect business activities and develop a basis for critical evaluation of a country-specific, cross-sector business analysis.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

BUS 1027 - DOING BUSINESS IN ASIA

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

BUS 1028 - DOING BUSINESS IN JAPAN

Minimum Credits: 3

Maximum Credits: 3

The purpose of this course is to provide a broad introduction to business in Japan. Topics covered include: the Japanese economy, from post-war growth, through the 'bubble' and post-'bubble' years, to today; ongoing demographic, social/cultural, and structural change; human resource and production management; women in the workforce; and working with Japanese in a business setting. By the end of the course, students will be more knowledgeable about Japan and Japanese business, and about the opportunities and challenges facing Japanese firms and individuals working in or with Japanese firms.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

BUS 1392 - PERSONAL FINANCIAL PLANNING

Minimum Credits: 1

Maximum Credits: 1

This course deals with the basics of personal financial planning. Students will create personal financial plans based on projected horizons of 1, 3, and 5 years. The primary focus is on near term planning with emphasis on: initial savings, paying off student debt, judicious use of credit, and investing for short and long term goals. Students will prioritize and codify their plans based on personal, professional, and lifestyle objectives projected over the plans stated horizons.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Satisfactory/No Credit

BUS 1755 - SERVICE LEARNING IN ORGANIZATIONS

Minimum Credits: 3

Maximum Credits: 3

This course is designed around an experiential learning methodology in an international context that uses an international service project for a community organization to enhance student understanding of a particular content area in leadership and ethics. Students will be challenged to immerse themselves in readings, essays, and discussions in a specific content area that will be operationalized and reviewed throughout the duration of the community service project. Students in this course are required to participate in the international service learning component of the program.

BUS 1900 - BUSINESS INTERNSHIP

Minimum Credits: 1

Maximum Credits: 3

The business internship provides an opportunity for students to study in depth a particular area of business management in a work setting. An internship is primarily an academic experience, not a part-time or full-time job, in which students work for a firm or organization under a supervisor and faculty sponsor to achieve specific educational objectives.

Academic Career: Undergraduate

Course Component: Internship

Grade Component: Satisfactory/No Credit

Course Requirements: Restricted for College of Business Administration

BUS 1901 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 3

An independent study course for students desiring to pursue in greater depth a specific set of business problems or functions to which they have been introduced in other business courses. The course involves directed reading and research under guidance of a full-time faculty member.

Academic Career: CBA-DEAN

Course Component: Independent Study

Grade Component: Satisfactory/No Credit

Course Requirements: Restricted for College of Business Administration

BUS 1904 - CBA FULL-TIME CO-OP

Minimum Credits: 1

Maximum Credits: 1

CBA students who participate in a full-time career-developing internship experience as an integral part of their CBA academic program may register for this course. Students must have completed at least 60 credits, be in good academic standing, and plan to return to campus the first spring or fall term immediately following the internship term.

Internships for this course are designated by the offering organization as full-time and lasting the duration of the term.

Internship agreements specifying the academic work to be completed as part of the internship are required.

Academic Career: Undergraduate

Course Component: Internship

Grade Component: Satisfactory/No Credit

Course Requirements: Restricted for College of Business Administration

BUS 1906 - CAREER EXPLORATION INTERNSHIP

Minimum Credits: 1

Maximum Credits: 1

This internship course is designed to help students improve self-awareness of personal preferences with respect to career interests in the context of a work experience. Incorporates readings, self-assessment instruments and exercises, job analysis, journal entries and two performance appraisals. May be used for internships, summer jobs, part time jobs and full-time positions that involve work related to a possible career interest. The internship site may be located anywhere in the world.

Academic Career: Undergraduate

Course Component: Internship

Business Accounting

BACC 3115 - EXPERIMENTAL RESEARCH IN ACCOUNTING 2

Minimum Credits: 1.5

Maximum Credits: 1.5

In this seminar, PhD students will be exposed to research examining financial accounting and auditing questions using experimental methods. The seminar is also a continuation of experimental behavioral decision-making research in accounting, critically evaluating experimental research and generating future research.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SU3 Basis

BACC 3571 - ACCOUNTING RESEARCH

Minimum Credits: 1.5

Maximum Credits: 1.5

The purpose of this course is to provide students with the theory and concepts underlying budgeting practices (i.e., what has existed, is currently in use, and has been proposed for contemporary purposes). It will focus on research related to budgeting and controls, how these topics relate to a firm's strategy, management motivation, performance measures and risk management. Topics will include budgeting in uncertain times, the balanced scorecard, and "beyond budgeting" approaches, as well as others. The pedagogical approach is to address these topics through case studies and to introduce and apply relevant research findings.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Business Administration

BUSADM 3040 - RESEARCH AND THEORY ON DIVERSITY, EQUITY AND INCLUSION

Minimum Credits: 3

Maximum Credits: 3

This seminar focuses on research, theory and applications related to diversity, equity and inclusion (DE&I) within organizations. We will examine DE&I across three levels of analyses - individual, group and organizational. Our primary goal is to better understand the ways in which research and theory has addressed topics, processes and outcomes related to diversity and its impact on key outcomes studied by organizational scholars. To accomplish this, we will review a wide array of research and theory that will provide the necessary lens for you to connect this work to your own fields of study and future research. We will also explore a variety of frameworks, strategies and research tools used to advance our understanding of this dynamic and critically important topic.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SU3 Basis

Business Economics

BUSECN 1010 - MANAGERIAL ECONOMICS

Minimum Credits: 3

Maximum Credits: 3

Primarily an applied microeconomics analysis although some applied macroeconomic analysis of relevance to the business firm may also be treated. Emphasizes the development of economic tools and concepts which can be used in the firm's management decision-making process. Builds upon the standard economic analysis of the firm which integrates a company's revenue, cost, output and pricing decisions. Marginal and incremental reasoning is stressed as an important decision making principle.

BUSENV 0061 - CERTIFICATE PROGRAM IN LEADERSHIP AND ETHICS: MANAGERIAL ETHICS AND STAKEHOLDER MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

Course examines the social, political and legal interfaces between the business institution (especially the corporation) and the environment. Topics typically considered include ethical and value issues in business, the social responsibilities of business, business-government relations, and the management of stakeholder relationships and corporate social policy. This section is reserved for students pursuing the Certificate Program in Leadership and Ethics.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PLAN: Leadership and Ethics (CERT)

BUSENV 1701 - ETHICAL LEADERSHIP FUNDAMENTALS

Minimum Credits: 1

Maximum Credits: 1

In this first integrated seminar of the CPLE sequence, students are introduced to ethics concepts and leadership skills - with a particular emphasis on demonstrating how ethics and leadership are complementary areas of emphasis for an effective leader. Ethics and leadership must be considered together in order to produce leaders who have the foresight to consider issues of responsibility, accountability and the full impact of their actions as well as a skill set that will empower them to implement their vision.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PLAN: Leadership and Ethics (CERT)

BUSENV 1706 - MARKET MANIPULATIONS: CRISES, BUBBLES, ROBBER BARONS AND CORPORATE SAINTS

Minimum Credits: 3

Maximum Credits: 3

Market Manipulations is a course about the forms of market failure and the generalizations we can draw to understand market behavior in the future. The course compares financial panics in U.S. business history: 1792, 1819, 1837, 1857, 1873, 1893/95, 1907, 1929, and 2008. How can we generalize to understand future panics? We look at major forms of market scams, including bubbles (Tulipomania, South Sea Bubble, Dot Con Bubble), Ponzi schemes, and typical behaviors of con artists (e.g., Gregor MacGregor) and generalize their common patterns. We consider the origin of the modern business firm (joint stock trading company) as the solution to the general agency problems of managing risk and providing assurance. We examine how Carnegie, Rockefeller, and Westinghouse built their companies, seeking monopoly, and identify the "monopolist's playlist," generalizations about patterns of monopoly-building. These tactics surprisingly remain as relevant today as they were during what Mark Twain called the "Gilded Age." We shift to the Progressive Era, and pushback. Coxe's Army was the first march on Washington, anticipating the New Deal 40 years later. The "stunt journalists" and "muckrakers," including Nellie Bly, Jacob Riis, Ida Tarbell, Lincoln Steffens, and Ray Stannard Baker, sought to influence repair of market defects via journalistic investigation. We look at the Triangle Shirtwaist Factory Fire of 1911 and the career of Frances Perkins. We review causes of the Crash of 1929/Great

Depression. Thus, this course is highly unusual in using events in business history to generalize about our expectations of business behavior today and in the future.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

BUSENV 1745 - SUSTAINABLE BUSINESS LEADERSHIP

Minimum Credits: 3

Maximum Credits: 3

As business imperatives and the environment in which businesses operate continue to change, the need to address complex challenges of interconnectedness and responsible value creation have never been more pressing than today. With more and more organizations engaging with conversations around sustainability that is today no longer a choice, but a very question of organizational survival, this course offers an opportunity to understand the role of business in society from the lens of responsible leadership and the managerial challenges of leading organizations for sustainability. The course will provide you with an exposure to the debates around sustainability and the purpose of the firm, an understanding of the core principles and ways of conceptualizing sustainability in organizations and the requisite leadership, some tools and techniques to think about measurement and impact, and perspectives to navigate the challenges of leading and managing multiple stakeholders. Through a mix of cases, activities, readings, exposure to underlying theories and principles, and by engaging in a sustainability simulation firsthand, you will become familiar with the sustainability challenges businesses face today and the leadership challenges and approaches required to navigate the current business landscape. In essence, the course will focus on the 'what' and 'how' of leading, strategizing, planning, executing, and monitoring socially responsible and sustainable practices of companies. In learning about sustainable business leadership, you will also have the opportunity to apply your learnings and insights from this course in evaluating the sustainability performance of a company via a team project to uncover the leadership approaches and strategies that yield optimal business results and create societal value. The course is designed to accomplish the following main objectives: To identify and explore the impact of business decisions on a variety of different stakeholders in order to improve the triple bottom line of economic, social and environmental performance of a business. To familiarize oneself with the concepts and principles underpinning the notion of sustainability and responsible leadership. To analyze strategies adopted by businesses to address sustainability-related challenges and identify opportunities for value creation. To be able to critically assess the impact and sustainable performance of business organizations.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

BUSENV 1750 - LEADERSHIP AND ETHICS INTERNSHIP

Minimum Credits: 3

Maximum Credits: 3

Students will complete both social and ethics audits of the organization for which they are working an internship assignment. These exercises are designed to lead students to examine and critique their organization's commitment to ethics and leadership in a critical, yet balanced, manner. The content of the internship course centers around students independently recognizing & identifying how issues related to ethics & leadership are & are not addressed in the organizations that they serve. Students permitted to take any internship approved by CBA's Berg Center for Leadership and Ethics.

Academic Career: Undergraduate

Course Component: Internship

Grade Component: Satisfactory/No Credit

Course Requirements: PLAN: Leadership and Ethics(CERT)

BUSENV 1755 - SERVICE LEARNING IN ORGANIZATIONS

Minimum Credits: 3

Maximum Credits: 3

This course is designed around an experiential learning methodology that uses a service project for a community organization to enhance student understanding of a particular content area in leadership and ethics. Students will be challenged to immerse themselves in readings, essays and discussions in a specific content area that will be operationalized and reviewed throughout the duration of the community service project.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Leadership and Ethics (CERT)

BUSENV 1757 - RACE AND BUSINESS ETHICS

Minimum Credits: 3

Maximum Credits: 3

In what ways are corporations responsible for alleviating racial injustice? The Race and Business Ethics course is designed to give students the confidence and ability to address pressing social issues that are affecting corporate decision-making. Corporate leaders are making heavy investments in training and leadership programming to build a deeper understanding of racial injustice with the hope of bringing about a more fair and equitable society. The pressure on leaders to envision social issues as a part of corporate strategy comes from internal and external stakeholders and is consistent with the rise of important business movements that include sustainability and corporate social responsibility. Topics addressed in the course include African-American entrepreneurship, white racial identity, theories of justice, and structural racism, among others. Course assignments include a formal debate concerning front-page issues, leading a conversation about race via social media networks, and reading-based examinations. Students who take the course will be presented with readings, speeches, films, and other media that take a scholarly approach to the issue of race and the variety of ways it continues to exert its force on culture and commerce.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

BUSENV 1760 - BUSINESS LAW

Minimum Credits: 3

Maximum Credits: 3

Provides students with an exposure to the extensive laws and regulations that affect almost all major aspects of business operations. Topics covered are chosen on the basis of their importance to contemporary business.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: UCBA; PLAN: NOT CASBUS-UNK or BUSNB-MN

BUSENV 1765 - LEADERSHIP IN THE SOCIAL ENVIRONMENT

Minimum Credits: 3

Maximum Credits: 3

This course will give CPLE students exposure to in-depth analysis of leadership concepts and techniques in personal, interpersonal, and group skill areas. Students will complete a number of assessment and skill development exercises in topics such as teamwork, motivation, agenda building, power and influence tactics, problem solving and decision-making. The exercises will be grounded in students' real world experiences in internships, leadership roles and campus and community organizations.

Academic Career: Undergraduate

Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PLAN: Leadership and Ethics (CERT)

BUSENV 1770 - BUSINESS ENVIRONMENT INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 3

An independent study course for students desiring to pursue in greater depth a specific set of business environment issues or problems to which they have been introduced in other business environment courses. The course involves directed reading and research under the guidance of a full-time faculty member.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Letter Grade

BUSENV 1775 - CPLE CAPSTONE SEMINAR

Minimum Credits: 3

Maximum Credits: 3

In this final course of the CPLE sequence, student will take a capstone seminar that is essentially a graduate-level research seminar on specific content areas in ethics and leadership. Based on previous exposure to the research process in the integrated seminars, students in the capstone seminar will be challenged to develop a substantial research project on their primary area of interest and expertise.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Leadership and Ethics (CERT)

BUSENV 1780 - CORPORATE GOVERNANCE

Minimum Credits: 3

Maximum Credits: 3

Corporate governance, the set of policies, process and customs by which an institution is directed, is a topic of increasing importance. How a company is governed influences corporate performance, rights and relationships with its stakeholders. This course aims to provide a deep understanding of the fundamentals of corporate governance from a variety of angles ' the board of directors, senior management, investors, media, regulators and society ' and from an international perspective. After a highlight on the main issues of corporate governance (e.g. the relationships between owners, management, board and institutional environment), relevant theories and corporate governance practices will be analyzed. Students will gain skills required for understanding corporate behavior and will be introduced to issues in business and government relations through lectures, discussion and case/policy studies.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

BUSENV 1785 - SOCIAL ENTREPRENEURSHIP

Minimum Credits: 3

Maximum Credits: 3

The purpose of this course is to introduce students to the complex dynamics of social entrepreneurship. This course covers theory, conceptual frameworks, and tools used to formulate strategies for creating innovative solutions to impact the public good. Topics addressed include defining social entrepreneurship and social initiatives, understanding the differences between traditional and social entrepreneurship, evaluating existing social ventures, and developing a plan

for a new social venture. The course will consist of interactive lectures, readings, case discussions, and original research conducted by students.

BUSENV 1790 - BUSINESS ENVIRONMENT INTERNSHIP FOR CREDIT

Minimum Credits: 3

Maximum Credits: 3

The business environment internship provides business credits for project assignments and work assignments that augment a professional business environment work experience.

Academic Career: Undergraduate

Course Component: Internship

Grade Component: Satisfactory/No Credit

Course Attributes: Undergraduate Internship

BUSENV 1791 - PROJECTS IN ENTREPRENEURSHIP

Minimum Credits: 3

Maximum Credits: 3

This project course will involve an entrepreneurial incubator called the "Blast Furnace" during which you can learn about bringing an idea to the market and what it means to be an entrepreneur. The first part of the class will educate you on what is a good idea and what it means and takes to start a business. The second part of the course provides access to a rich curriculum, mentor and coaches and co-working space to prepare you to create and grow a business.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: UCBA; PLAN: NOT CASBUS-UNK or BUSNB-MN

BUSENV 1795 - BUSINESS AND POLITICS

Minimum Credits: 3

Maximum Credits: 3

Financial crises, the Covid 19 pandemic, and numerous recent events in industries as diverse as children's products, airlines, and citrus fruits have highlighted the increasing interdependence of business and government, as well as the means by which business gains strategic benefits from government regulation. The course begins with extended case studies on the Silicon Valley Bank collapse in 2023 and on the financial crisis that some call "the great recession" (and which someday may be called "The Panic of 2008," parallel to the other major financial panics in U.S. business history). The course compares public and private organizations, describes the regulatory system in the U.S., reviews the administrative procedures and performance of regulatory agencies, considers and assesses traditional as well as modern designs for regulation, and examines both regulatory failure patterns and the means by which firms gain strategic, competitive advantage through shaping government decisions and programs. In examining techniques of lobbying, the course focuses on the U.S. setting and identifies both effective and ineffective methods of lobbying. The course also covers issues management and crisis management. By the end of the course, students should have obtained a good working knowledge of the U.S. regulatory system, major instruments of regulation, and the typical interactive patterns of regulators and regulated parties. The course emphasizes current, real-world cases; it does not use "canned" published cases. Thus, this class both analyzes how the regulatory system works and uses current events in that system to generate deeper understanding of regulatory behavior in the U.S.

Business Information Systems

BUSBIS 0100 - PROGRAMMING ESSENTIALS FOR BUSINESS ANALYTICS

Minimum Credits: 3

Maximum Credits: 3

This course introduces data programming to undergraduate business students and focuses on automation of data collection, data cleaning, and data wrangling tasks. Students will learn to use the Python programming language for completing data preprocessing and exploratory analysis tasks. Through hands-on exercises and projects, students will examine a variety of structured and unstructured business data using a combination of scripts, spreadsheets, and visualization.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: CBA Freshman or CBA First Year Transfer Students

BUSBIS 0105 - DATA VISUALIZATION AND STORYTELLING

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the design of visual representations of data in order to discover patterns, answer analysis questions, gather persuasive evidence, and convey insights. Building on the foundation provided in the Business Analytics foundation courses (i.e., Programming Essentials for Business Analytics, Business Analytics I, and Business Analytics II), the course will provide training in specialized visualization and programming tools for exploratory analysis of data. Students will learn the grammar of graphics and the principles of data visualization for making sense of data, organizing clear evidence for analysis, and making engaging presentations of data-driven insights. Exercises and projects throughout the course will facilitate intensive experience-based learning for students to gain mastery of both exploring and explaining data. The overarching objective of this course is to enable students to understand the connection between the analytics/visualization and the objective of the analyses being performed - i.e., analytics storytelling with a purpose.

BUSBIS 1060 - INTRODUCTION TO INFORMATION SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

IT does not matter it's what you do with IT! Business in the 21st century runs on IT. However, competitive advantage seldom comes from having exclusive or proprietary access to a technology. Rather, IT comes from more effectively utilizing technologies to which everyone - including the competition - has access. The implications of this reality are many. First, it is necessary to understand what technologies are available in the marketplace and their capabilities. Next, and far more challenging, it is necessary to understand how these capabilities may positively (or negatively) interact with business strategy. Business transformation is the alignment of process, people, and technology such that IT can both support and innovate business strategies. Given that technologies evolve and develop at a rapid pace, IT is necessary for managers to understand what technologies can do (both established and new) and how IT can be leveraged to create real value.

Academic Career: Undergraduate

Course Component: Lecture
Grade Component: Letter Grade

BUSBIS 1530 - TECHNICAL FOUNDATIONS OF GENERATIVE AI FOR BUSINESS

Minimum Credits: 3

Maximum Credits: 3

This course is part of the "Artificial Intelligence (AI) and Business" curriculum at Pitt Business. The course is designed to equip business students with technical concepts, skills, and understanding necessary to harness the capabilities of generative AI systems. A key learning objective is to gain proficiency in using cloud-computing platforms, application programming interfaces (APIs), transformer architectures, and large language models. Students will build on the data programming skills learned in the pre-requisite courses and will utilize cloud computing and APIs to access large language models and generative AI interfaces for processing and generating text and multimedia content for business workflows. Throughout the course, students will engage with hands-on labs and projects, enabling them to build and fine-tune generative AI applications. To do well in this course, students must be prepared to engage in intensive out-of-class practice sessions based on the topics, examples, and techniques introduced in class sessions.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

BUSBIS 1535 - DEPLOYING AI IN BUSINESS: STRATEGY, DESIGN, AND EXECUTION

Minimum Credits: 3

Maximum Credits: 3

This course is part of the "Artificial Intelligence (AI) and Business" curriculum at Pitt Business. The course focuses on the strategic planning, design, and deployment of AI systems for businesses. Students will identify business opportunities where AI and generative AI systems can create value, develop strategic roadmaps for integrating AI with business workflows, and learn to assess the potential return on investments from AI projects. The course will dive into the design principles, methodologies, and governance frameworks required to develop and implement effective enterprise AI systems as well as the strategies for stakeholder engagement, performance evaluation, managing change, and fostering a culture of AI-enabled innovation.

Course Component: Lecture

Grade Component: Letter Grade

BUSBIS 1540 - RESPONSIBLE AI FOR BUSINESS

Minimum Credits: 3

Maximum Credits: 3

This course is part of the "Artificial Intelligence (AI) and Business" curriculum at Pitt Business. The course focuses on the significant challenges that accompany the use of AI and generative AI in business and societal settings. Students will learn the implications of "what could go wrong" with AI deployments and learn how to detect and prevent outcomes that could cause significant damage to people, businesses, and society. Students will also build a framework for the responsible use of AI that focuses on purpose of use, ethics, fairness, transparency, and mitigating bias. As a result, students will be able to lead organizational-wide discussions of responsible data science and the potential societal and environmental impacts of using AI in business workflows. The course uses a mixture of lectures, readings, case discussions, and written case analyses.

Course Component: Lecture

Grade Component: Letter Grade

BUSBIS 1600 - TECHNOLOGY-ENABLED BUSINESS TRANSFORMATION

Minimum Credits: 3

Maximum Credits: 3

Business in the 21st century runs on Information Technology (IT). Competitive advantage, however, seldom comes from having exclusive, or proprietary, access to IT. Rather, sustainable advantage comes from more effectively utilizing IT to automate and integrate business processes. The implications of this reality are many. First, it is necessary to understand what technologies are available in the marketplace and what their capabilities are. Next, and far more challenging, it is necessary to understand how those capabilities might positively, or negatively, interact with business strategy. The capabilities of IT can certainly contribute to meeting a strategy, but it is also conceivable that those same capabilities could enable new, unconventional, strategies; in essence transforming the business. Given that rapid development of new technologies, and continuing trends toward outsourcing of IT, organizations need Business Analysts who can work as a liaison between business stakeholders and IT professionals to understand the structure, policies, and operations of an organization, and then recommend solutions that enable the organization to achieve its strategic goals. Successful Business Analysts acquire a broad skill set that covers all phases of the transformation lifecycle: 1. IT Discovery Portfolio 2. IT Project Portfolio 3. IT Asset Portfolio This course begins at a high level with a broad overview of IT systems, transformation strategies, IT portfolio management, and the role of the Business Analyst. The second half of the class narrows its focus to the IT Project Portfolio and Enterprise Resource Planning (ERP) systems for practical application. Using an engaging mix of lectures, experience-based learning case studies, and in-class hands-on labs, students will develop the baseline set of skills necessary to become a successful Business Analyst.

BUSBIS 1630 - PROJECT MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

Planning, organizing, staffing, and controlling projects requires traditional management skills as well as an appreciation of the tools, techniques, and practices unique to project management. This course starts with an overview of project management concepts, and then focuses on project planning, estimating, monitoring, and controlling. It also covers topics related to being an effective project leader and managing project teams. The project management institute (PMI), a professional organization for project managers, has produced a guide to the project management body of knowledge, which documents the knowledge and practices needed by today's project managers. This guide, along with current research and management trends related to project management, provide the framework for material covered in this class.

BUSBIS 1635 - INFORMATION TECHNOLOGY SYSTEMS IN SUPPLY CHAINS

Minimum Credits: 3

Maximum Credits: 3

In managing business today, many companies have implemented Enterprise Resource Planning (ERP) software systems to provide the necessary transactional systems and analytical tools to enable agile business decisions. ERP systems

integrate the supply chain, improving both supplier and customer relationships, as well as optimizing their internal operations and the logistical movement of supplies and finished goods. It is vital for today's managers to understand how information technology systems are utilized within the global supply chain; effectively improving real-time collaboration, knowledge exchange, and advance sourcing business decisions. This course examines the advantages and complexities of ERP software and demonstrates how the system can improve processes and streamline operations as applied towards a global supply chain. ERP systems provide a competitive advantage for a company by allowing the management of different functions and processes in one single corporate information system, providing access to real-time data within the company, enabling greater business agility and strategic decisions. The course will expand outward in the supply chain where students will work within an ERP system during the course, review supply chain industry articles and best practices, gaining greater understanding of the interconnection of data systems across companies through the exchange of information forming a tightly integrated supply. The University of Pittsburgh is an active member of the SAP University Alliance Program. SAP is the world leader in ERP business solutions. The objective for using the SAP University Alliance Program is to provide the student with a hands-on working environment to validate key concepts covered in the course that best represents actual situations in business today. In addition to working within the manufacturing company's SAP modules, the students will understand how master data files are structured and all the various activities that are required to manage the supply chain (from supplier to customer). Finally, the course has been designed to include several Experience-Based Learning (EBL) activities that allow the student to acquire and apply knowledge, skills, and feelings in an immediate and relevant setting. The exercises and simulations provide for a direct encounter with the topic being studied, rather than merely thinking about the subject matter.

BUSBIS 1640 - IT ARCHITECTURE & PLATFORMS

Minimum Credits: 3

Maximum Credits: 3

This course introduces the technology tools and economic principles used by managers of modern platforms such as Facebook, Google, Lyft, Yelp, and others. In the technology module, the course first covers digitization. Specifically, the course looks at how analog information in the physical world is digitized to be stored and processed in systems and how it enables platforms. This digitization is driving the current business trends in Internet of Things (IoT) and Big Data. The course introduces cloud computing on the Google platform and application programming interfaces (API) commonly used by platforms. Cloud labs supplement lectures and provide hands-on experience. In the economics module, the course introduces the concept of multi-sided platforms (MSP) and the important idea of network effects that power modern platforms. The course builds on these MSP foundations to cover platform architecture, launch, monetization (and time permitting, metrics, and strategy). The student will leave the course with a basic understanding of the economic decisions made by platform managers as well as the investment decisions of venture capital and technology investment firms that invest in platforms.

BUSBIS 1645 - INFORMATION SYSTEMS ETHICS

Minimum Credits: 3

Maximum Credits: 3

This course provides an overview of ethics concepts and decision-making as they are related to Information Systems and Computing. Emphasis is placed on the study of ethical situations and responsibilities of IS professionals around current and emerging technologies in a global setting. Research papers, Case studies and discussion of current ethical

events around technology will be used to facilitate discussions in areas including, but not limited to: Cloud Computing, Data protection, Cyber Security, The Digital Divide, Social Media, Intellectual Property, Whistleblowing, Professional Codes of Conduct, Professional liability, Internet freedom in computing and international laws and governance. Invited Subject Matter Experts will conduct informative sessions on key subject matter areas aligned with the course content.

BUSBIS 1650 - IS CONSULTANCY PRACTICES SOLUTION DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

In today's world, businesses rely on Information Systems (IS) to be the key enabler that supports the business processes and decision making. IS catapults businesses to the next level of growth and sustainable competitive advantage. More and more companies are either implementing brand new IS system with cutting edge business tools and technologies, or implementing newer modules like CRM (Customer Relationship Management) or SCM(Supply Chain Management). When businesses undertake a project to implement a new IS solution, they often lack the internal knowledge, expertise and tools necessary to make it succeed. Hence comes the need to look for external expertise from IS Consultancy Firms. MCS or Management Consultancy Services is a line of business that provides consultancy services to their clients for implementation of new IS systems. The tools for business analysis required by a Business Analyst are covered in the course BISBIS 1600 - Technology Enabled Business Transformation. The tools for Project Management are covered in the course BUSBIS 1630 - Project Management. This course has these as preferably prerequisites, else co-requisites and takes the student further to learn the skillsets needed of an IS Consultant. The course begins with a brief recap of fundamental concepts covered in BISBIS 1600 and BUSBIS 1630. It then proceeds to simulate an actual real life, full cycle IS Consultancy Project. The class is divided into groups each of which represent an individual IS Consultancy Firm engaged by a client to implement a full cycle IS solution. The course takes the student through the complete life cycle of an IS Implementation as done by a Consulting Company: 1. Planning 2. Analysis 3. Design 4. Development 5. Testing 6. Deployment The instructor serves as the client and another group as the Development team. Each consulting group works towards the completion of each phase of the Consulting Project and present its deliverables, thereby working towards the final deployment. The student stands to benefit tremendously from the course as it develops all the skillset necessary for a Consultant including hard skills and soft skills. The student becomes tremendously marketable to any company, be it a consulting firm, or a regular company looking to run its own IS project.

BUSBIS 1655 - DESIGN THINKING

Minimum Credits: 3

Maximum Credits: 3

Design thinking refers to a transformation and problem-solving approach that emphasizes strong user orientation and agile iterations with multidisciplinary teams. Aiming to create ideas and solutions that are emotionally meaningful, functional, and economically viable, "design thinking integrates the needs of people, the possibilities of technology, and the requirements for business success ." Design thinking is applicable to both start-ups and mature organizations to design new offerings or re-design existing teams, products, services, business models, or platform ecosystems. Adopting a hands-on and experience-based learning approach, this course introduces design thinking to business undergraduate students. Through lectures and case discussions students will learn about the design thinking process and the applications of design thinking for digital transformation across a variety of industries. Students will also work in teams to participate in a design challenge project.

BUSBIS 1660 - DISRUPTIVE TECHNOLOGIES

Minimum Credits: 3

Maximum Credits: 3

Disruptive technologies refer to technological advancements that overturn established business methods and practices. The diffusion of disruptive technologies in an industry prompts a new competitive race among the firms in the industry, resulting in the rise of new firms, demise of mature firms, and/or a reshuffle of leaders and laggards in the industry. In this course, we'll learn about the business and technological conditions in which disruptive innovation materializes, examine historical advancements in technologies that have disrupted industries, survey emerging technologies, such as cryptocurrencies, distributed ledgers, and robotics enabled by artificial intelligence (AI) technologies, and investigate both the designs and applications of these emerging technologies for creating business value. Through lectures, case discussions, and hands-on projects, students will develop an appreciation of the emerging disruptive technologies and their applications in business. Students will also work in teams to participate in a business plan development exercise that leverages an emerging disruptive technology.

BUSBIS 1665 - IMPROVING THE USER EXPERIENCE

Minimum Credits: 3

Maximum Credits: 3

While many organizations have outsourced the design of production systems, there is still a need to provide high quality specifications for those systems. In addition, the Internet and e-commerce explosion of the late 1990s has created an even wider need to design corporate websites and apps. Designers and developers should take into account what we know about human factors engineering to improve the user experience (UX). This course focuses on how to gather requirements, achieve a usable first draft, and test and improve that draft. A half-dozen course projects include usability critiques, assessments of users' difficulties in understanding systems, and designs of forms, screen layouts, and icons. A running major project in four parts provides a usability critique of a website or app, followed by empirical tests of usability, followed by suggestions for improvement, and finally, empirical tests of prototype screens (using an easy tool) that would implement improvements. A final presentation is a summary of all four stages that is intended to convince management to provide funds to make the changes.

BUSBIS 1670 - DATA WAREHOUSING

Minimum Credits: 3

Maximum Credits: 3

A data warehouse refers to an enterprise-level, centralized repository that stores current and historical data, which is used for managerial reporting and decision making. A data warehouse differs from a relational database used for facilitating transactions both in architecture and use. In this course, students will learn the architectural concepts of data warehouses such as the star schema and the processes involved in utilizing data warehouses for enterprise data management. Such processes include the extract, transform, and load (ETL) steps of populating data warehouses from disparate data sources, and online analytical processing (OLAP) for querying and managerial reporting. This course will emphasize a hands-on approach and the acquisition of the following skills: Dimensional design process for a data warehouse -Executing ETL steps for data management, OLAP for managerial reporting and decision-making The primary mode of learning will be through hands-on exercises and cases. A major component of the course grade stems from the course project that is done individually. Students should expect intensive out-of-class readings and practice sessions to get the most out of this course.

BUSORG 1101 - WORKPLACE COMMUNICATIONS

Minimum Credits: 3

Maximum Credits: 3

Business leaders continue to seek candidates who solve problems with critical thinking, explain solutions to both management and peers, and then face opportunities and challenges with powerfully written documents and confident, convincing presentations. And now there's even more. Today, executives add: "I want to hire someone who can tell a story with data." Effective written, oral, and interpersonal skills are expected of you when you enter the business world. Data confirm this. Annual surveys of corporate recruiters indicate that these business communication skills are among the most sought-after in hiring today. The overriding goal of this course, then, is to make you more successful as a candidate, as an employee, and as a professional. In Workplace Communications, you will continue to develop the kinds of communications skills you'll be expected to use both here at the university and then there, that is, at work for the entirety of your career. You will develop and produce pieces of business writing, practice and deliver oral presentations, learn to lead and follow teammates and give and take constructive criticism. Although you will develop many of these skills independently, you will also get more practice working with others. Early in the term, you will be named to one of six teams that comprise this section of Business Communications. You will work with that team throughout the term. Course Outcomes: To successfully complete the course, you will know and be able to Identify significant forms of current business communication, such as bad news and persuasive and informative messages. Develop greater familiarity with visual and digital communications. Use the conventions of current business etiquette among and between colleagues and clients. Follow directions accurately. Provide and receive a constructive critique of written and presentation work, the foundation of successful interpersonal communications.

BUSORG 1665 - LAW, ENTREPRENEURSHIP, AND INNOVATION

Minimum Credits: 3

Maximum Credits: 3

This hands-on, practical course is intended to expose students to founders of innovation companies and the legal issues they face. The course will take students through the life cycle of a technology start-up company, from concept and formation to exit (IPO or sale), through careful analysis of relevant legal documents and case studies, as well as participation in lectures, workshops and simulations. The course will cover choice of entity and formation, employee hiring and compensation, evaluation and protection of intellectual property and the development of a comprehensive IP strategy, valuation and financing, licensing and sales, multinational operations, and exit strategies. The course will provide students with the legal framework and tools necessary to launch and grow a successful technology start-up.

BUSERV 1910 - INTRODUCTION TO BUSINESS

Minimum Credits: 3

Maximum Credits: 3

Provides an overview of how American business operates in our economy. Emphasis is given to the study of management, planning, personnel, finance, and marketing, and how these are interrelated within our business system. The activities in each of these functions are discussed, role of the participants analyzed, and underlying theories examined. The student should gain an insight into the primary activities in business and an understanding of their practical applications.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

BUSERV 1915 - INTRODUCTION TO MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

Introduces the basic roles of managers such as planning, organizing, controlling, staffing, and directing. Aspects of leadership, motivation, organization structure, and the interdependence of functional subsystems will also be covered. Emphasis is placed on management practice.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

BUSERV 1920 - FINANCIAL ACCOUNTING

Minimum Credits: 3

Maximum Credits: 3

A study of accounting and financial concepts pertaining to the business enterprise, with emphasis on the understanding and use of accounting and financial data. This course develops the ability to analyze and interpret internal and external financial developments as they relate to a business enterprise and provides an operational knowledge of the accounting cycle.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PROG: Non-CBA Students

BUSERV 1925 - COST ACCOUNTING

Minimum Credits: 3

Maximum Credits: 3

This course has three objectives: (1) to develop an understanding of the broad range of cost accounting concepts underlying cost determination and analysis; (2) to provide familiarity with the controls that are afforded in the application of cost accounting concepts; and (3) to create an awareness of how cost accounting can contribute to decision-making and planning. These objectives are accomplished through analyses of the behavior and economic data within the firm, evaluation of actual and standard cost systems, and the examination of cost measurements.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis
Course Requirements: PREG: BUSERV 1920

BUSERV 1940 - MARKETING FUNDAMENTALS

Minimum Credits: 3

Maximum Credits: 3

Provides an understanding of the roles of marketing in the economy and the firm, and develops a rationale for a marketing perspective as a guide to organizational and individual actions.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

BUSERV 1955 - PRINCIPLES OF SELLING

Minimum Credits: 3

Maximum Credits: 3

Examines aspects of personal selling and the links between the seller and the buyer. The establishment of rapport through the development of interpersonal skills and the translation of company or self-objectives into decisions that motivate the sales force are included. Methods of recruiting and selecting the salesperson, training the salesperson, problems of evaluation, establishing personal credibility, handling objections, closing a sale, establishing one's personal goals, and objectives and procedures for self-management are included.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

BUSERV 1985 - SMALL BUSINESS MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

Introduces basic principles and practices for successful management of a small business. Topics include the economic environment, development of personal and organization objectives, marketing production, finance, credit, accounting, business law, and records management.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Cardiothoracic Surgery

CTSURG 5840 - CARDIOTHORACIC SURGERY RESEARCH

Minimum Credits: 0

Maximum Credits: 0

This elective is available to interested and motivated students. This elective provides opportunities to learn basic research methodology which may include approach to experimental design, protocol development, data analysis and evaluation of results. Student may participate in ongoing research in the lab and on patients.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

Career Development Accounting

CDACCT 6030 - FINANCIAL ACCOUNTING

Minimum Credits: 3

Maximum Credits: 3

Helps students become informed users of firms' external financial reports. The basic structure and contents of such reports and the process by which they are prepared will be studied. Discussion will involve what items are included in the reports, how such items are measured, and how various economic events affect them. An understanding of what can be inferred from the reports about past performance, present position, and future prospects of the firms will be developed.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ECON 0102 or 0103 or 0105 or 0110 or 0115 or 0120; MIN GRADE: 'C' For Listed Courses; PLAN: Accounting (CERT)

CDACCT 6040 - MANAGERIAL ACCOUNTING

Minimum Credits: 3

Maximum Credits: 3

Introduces students to the basic terminology and concepts of cost accounting, and provides an introductory coverage of product costing, cost allocation, budgetary control, responsibility accounting, and the use of cost information in resource allocation and other managerial decisions. Textbook material and real world examples are used to engage students in extensive problem solving.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: BUSACC 0030 or BUSERV 1920 or CDACCT 6030 or MGMT 0022 or BUS 0115 or ACCT 0201; PLAN: Accounting (CERT)

CDACCT 6204 - INTERMEDIATE FINANCIAL REPORTING 1

Minimum Credits: 3

Maximum Credits: 3

Covers the conceptual framework of financial accounting and its influence on generally accepted accounting principles (GAAP), with special emphasis on the valuation of assets, and measurement of income. Requirements include reading the original pronouncements on GAAP, making oral presentations, and writing short position papers on various accounting issues of current interest.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (BUSACC 0030 or BUSERV 1920 or CDACCT 6030 or MGMT 0022 or BUS 0115 or ACCT 0201) and (BUSACC 0040 or BUSERV 1925 or CDACCT 6040 or MGMT 0023 or BUS 1110 or ACCT 0202); MIN GRAD: 'C' For Listed Courses; PLAN: Accounting (CERT)

CDACCT 6205 - INTERMEDIATE FINANCIAL REPORTING 2

Minimum Credits: 3

Maximum Credits: 3

Topics covered include valuation of liabilities, owners equity, cash flow statements, and disclosure outside the primary

financial statements. Like intermediate financial reporting 1, this course also engages students as active participants in the learning process.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: BUSACC 1204 or CDACCT 6204; PLAN: Accounting (CERT)

CDACCT 6210 - FINANCIAL STATEMENT ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

Financial statement analysis focuses on the evaluation of publicly traded company financial statements and related note disclosures as well as the correlation of this historic financial performance to the company's stock prices. This course will assist students' development of a systematic approach to analyzing reported financial data and understanding the underlying risks and possible inconsistencies among comparative companies. Requirements of the course include interim exams and written and oral presentations of analysis.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: BUSACC 1205 or CDACCT 6205; PLAN: Accounting (CERT)

CDACCT 6216 - ADVANCED FINANCIAL ACCOUNTING

Minimum Credits: 3

Maximum Credits: 3

Covers topics that are of particular interest to financial report preparers and auditors. Special emphasis placed on accounting for business combinations and consolidated financial reporting. Other topics include international accounting, accounting for partnerships, and accounting by fiduciaries.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: BUSACC 1205 or CDACCT 6205; PLAN: Accounting (CERT)

CDACCT 6221 - STRATEGIC COST MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

Topics covered include how product cost measurement affects resource allocation decisions; how to design modern cost systems; the strategic role of cost information and the relationship between process improvement and cost reduction; performance measurement and organizational transformation for value creation.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (BUSACC 0030 or BUSERV 1920 or CDACCT 6030 or MGMT 0022 or BUS 0115 or ACCT 0201) and (BUSACC 0040 or BUSERV 1925 or CDACCT 6040 or MGMT 0023 or BUS 1110 or ACCT 0202); MIN GRAD: 'C' For Listed Courses; PLAN: Accounting (CERT)

CDACCT 6236 - ACCOUNTING INFORMATION SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

Deals with the design and implementation of accounting information systems and their ability to collect data on the

activities of the organization, to accumulate and summarize it, and to make the information available to managers for analysis, decision making, and control. Special emphasis is placed on the problems inherent to this effort.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (BUSACC 0030 or BUSERV 1920 or CDACCT 6030 or MGMT 0022 or BUS 0115 or ACCT 0201) and (BUSACC 0040 or BUSERV 1925 or CDACCT 6040 or MGMT 0023 or BUS 1110 or ACCT 0202); MIN GRAD: 'C' For Listed Courses; PLAN: Accounting (CERT)

CDACCT 6238 - AUDITING

Minimum Credits: 3

Maximum Credits: 3

Introduces the auditing process and profession. Main topics include the nature and purpose of auditing, auditing standards, professional conduct, auditor legal liability, and approaches in financial statements. Emphasizes a risk-based approach to selecting appropriate auditing techniques. Examines auditor's decision process relating to internal control assessment, audit decision process relating to internal control assessment, audit sampling, and obtaining audit evidence about financial accounts. Also examines extent of auditor's responsibility to uncover fraud.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: BUSACC1205 or CDACCT 6205; CREQ: BUSACC 1236 or CDACCT 6236; PLAN: Accounting (CERT)

CDACCT 6242 - INDIVIDUAL TAX ACCOUNTING AND PLANNING

Minimum Credits: 3

Maximum Credits: 3

This course focuses on individual tax return preparation and planning. Students will learn how to calculate the taxes associated with a variety of personal, investment, property, and sole-proprietorship transactions. Concepts will be reinforced through the preparation of actual tax returns that reflect different combinations of such transactions. Students will develop tax planning skills by considering how various transactions can be restructured to minimize the current or future tax liability.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: BUSACC 1205 or CDACCT 6205; PLAN: Accounting (CERT)

Chemical Engineering

CHE 0100 - FOUNDATIONS OF CHEMICAL ENGR

Minimum Credits: 6

Maximum Credits: 6

This course combines elements of mass and energy balances, thermodynamics, separations, and product design in order to set the foundation for the remainder of the chemical engineering curriculum. This course introduces chemical engineering problem solving techniques from both a (traditional) process-centric viewpoint as well as a product centric viewpoint. The course will span from theoretical (basic thermodynamics) to applied (separations) allowing a simple route to problem-based learning of difficult theoretical concepts.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (CHEM 0120 or 0420 or 0770 or 0970 or 0102 or 0112 or 0720 or 0780) and (MATH 0230 or 0235 or 0150 or 0231) and (PHYS 0174 or 0475 or 0150 or 0201); CREQ: CHE 0101; PROG: Swanson School of Engineering

CHE 0101 - FOUNDATIONS OF CHE LABORATORY

Minimum Credits: 1

Maximum Credits: 1

The lab course associated with CHE 0100. Experiments and lectures will reinforce the content of CHE 0100.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: Letter Grade

Course Requirements: CREQ: CHE 0100; PROG: Swanson School of Engineering

CHE 0200 - CHEMICAL ENGINEERING THERMODYNAMICS

Minimum Credits: 6

Maximum Credits: 6

This course combines the ideas from both pure and multicomponent thermodynamics. It introduces molecular insight and the tools (including commercial software) for solving both simple and complex problems in phase and chemical equilibria. The course will have a strong focus on multiscale analysis, for example, covering intermolecular potentials (molecular-scale) to aid students in choosing equations of state for novel materials (macro-scale). Advanced topics covered include interfacial behavior, adsorption, and osmotic equilibrium.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: CHE 0100 with min grade of C- and (CHEM 0120 or 0420 or 0970 or 0102 or 0112 or 0780) and (MATH 0230 or 0235 or 0150 or 0231) and (PHYS 0174 or 0475 or 0150 or 0201); CREQ: CHE 0201 and 0214; PLAN: Chemical Engineering (CHE-BSE)

Course Attributes: MCSI - Sustainability Related

CHE 0201 - CHE THERMODYNAMICS LABORATORY

Minimum Credits: 1

Maximum Credits: 1

Laboratory corresponding to CHE 0200.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: Letter Grade

Course Requirements: CREQ: CHE 0200; PLAN: Chemical Engineering (CHE-BSE)

CHE 0214 - INTRODUCTION TO CHEMICAL PRODUCT DESIGN

Minimum Credits: 3

Maximum Credits: 3

Traditionally, chemical product design has focused on a set procedure for product development from conception to development and testing and finally the launching of the product. Unfortunately, this model which does not keep in mind the values or needs of the customer has resulted in a high number of failures for new product launches. What skills are thus needed in order to be entrepreneurial and succeed in the development of new chemical products within industry today? This course examines the initial stages on how to approach chemical product design from an innovation perspective complete with the provision of the necessary technical skills to get the job done while placing an emphasis on the business and entrepreneurial skills required to be successful in the chemical product design business.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (CHEM 0102 or 0112 or 0120 or 0420 or 0770 or 0780 or 0970) and (Math 0150 or 0230 or 0231 or 0235) and (PHYS 0150 or 0174 or 0201 or 0475); CREQ: CHE 0200; Plan: Chemical Engineering (BSE)

CHE 0300 - TRANSPORT PHENOMENA

Minimum Credits: 6

Maximum Credits: 6

Stresses analogies between the three modes of transport phenomena; momentum, mass, and heat transport. Covers from the molecular origins of transport up through continuum descriptions, as well as macroscopic balances. Reynolds and Colburn Analogies in Boundary-Layer Flow as well as direct comparison of linear transport relations, such as fluid drag and mass/heat convection will be a primary focus. Problems ranging from (traditional) packed bed reactors to micro-fluidics or micro-electromechanical systems will also be discussed.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: CHE 0200 with min grade of C- and (PHYS 0175 or 0152 or 0202 or 0476) and (MATH 0290 or 0250 or 1270 or CHE 1290); CREQ: CHE 0301; PROG: Swanson School of Engineering

CHE 0301 - TRANSPORT PHENOMENA LABORATORY

Minimum Credits: 1

Maximum Credits: 1

The lab course associated with CHE 0300. Experiments and lectures will reinforce the content of CHE 0300.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: Letter Grade

Course Requirements: CREQ: CHE 0300; PROG: Swanson School of Engineering

CHE 0314 - TAKING PRODUCTS TO MARKET: THE NEXT STEP IN CHEMICAL PRODUCT DESIGN

Minimum Credits: 3

Maximum Credits: 3

Traditionally, chemical product design has focused on a set procedure for product development from conception to development and testing and finally the launching of the product. Unfortunately, this model which does not keep in mind the values or needs of the customer has resulted in a high number of failures for new product launches. What skills are thus needed in order to be entrepreneurial and succeed in the development of new chemical products within industry today? This course is the next step in the chemical product design sequence and focuses on chemical product design and the development of business plans.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: CHE 0100 and 0214 and (PHYS 0152 or 0175 or 0202 or 0476) and (MATH 0250 or 0290 or 1270 or CHE 1290); CREQ: CHE 0300

CHE 0400 - REACTIVE PROCESS ENGINEERING

Minimum Credits: 5

Maximum Credits: 5

This course integrates reactor design, reaction kinetics, and advanced separation processes to allow the comprehensive study of systems ranging from polymerization reactors to enzyme-catalyzed metabolism to (bio-) artificial organs. Coverage includes integrating multiple topics, such as chemistry, physics, biochemistry/medicine and reactor engineering. Furthermore, it addresses all length scales from the molecular level to the reactor level to the full systems level. Both theory and experiment will be highlighted and detailed simulations will be included.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (CHE 0200 with min grade of C-) and (PHYS 0175 or 0475 or 0202 or 0152) and (CHEM 0310 or 0206 or 0231 or 0730 or 0780) and MATH 0290 or CHE 1290; CREQ: CHE 0401; PLAN: Chemical Engineering (BSE)

CHE 0401 - REACTIVE PROCESS ENGINEERING LABORATORY

Minimum Credits: 1

Maximum Credits: 1

Laboratory corresponding to CHE 0400.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: Letter Grade

Course Requirements: CREQ: CHE 0400; PROG: Swanson School of Engineering

CHE 0414 - PRODUCT PROTOTYPING FOR CHEMICAL ENGINEERS

Minimum Credits: 3

Maximum Credits: 3

In this course, students working in product teams, will learn how to translate their product ideas to tangible prototypes. Included will be modules on design of screening experiments (including equipment), use of software to aid molecular design, and creation of formulations. Ultimately student groups are expected to create a working prototype by semester's end.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: CHE 0314; PLAN: Chemical Engineering (CHE-BSE)

CHE 0500 - SYSTEMS ENGINEERING 1: DYNAMICS AND MODELING

Minimum Credits: 5

Maximum Credits: 5

The dynamics and modeling class is the first of a two-part systems engineering sequence. This course covers dynamical analysis of process systems, process control fundamentals, feedback, basic process modeling, and optimization. The course covers industrial-style examples from a multi-scale perspective by incorporating molecular insight into process variable calculations and large-scale information through process simulation (computer-aided design) software.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: CHE 0300 and 0400 with min grade of C-; CREQ: CHE 0501; PROG: Swanson School of Engineering

Course Attributes: Capstone Course

CHE 0501 - SYSTEMS ENGINEERING 1: DYNAMICS AND MODELING LABORATORY

Minimum Credits: 1

Maximum Credits: 1

Laboratory experience accompanying CHE 0500. Both physical and computational experiments will be performed.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: Letter Grade

Course Requirements: CREQ: CHE 0500; PROG: Swanson School of Engineering

CHE 0602 - CHEMICAL ENGINEERING SAFETY AND ETHICS

Minimum Credits: 2

Maximum Credits: 2

This class will provide the student with a thorough understanding of the fundamentals in workplace health and safety with emphasis on chemical industry applications. This will be accomplished through presentation a discussion of critical issues as well as the application of these principles to the senior design project. This course will also cover ethical situations likely to arise in the chemical plant environment.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: 0400 (Min Grade 'C-') and CHE 0300 (Min Grade 'C-'); CREQ: CHE 0613; PROG: Swanson School of Engineering

CHE 0613 - SYSTEM ENGINEERING 2: PROCESS DESIGN

Minimum Credits: 5

Maximum Credits: 5

This course integrates aspects of previous chemical engineering courses into the design of a complete chemical plant including the use of computer process simulation, pinch technology, and discounted cash flow economic analysis. The detailed design of chemical engineering units/processes is carried out for all aspects of the plant.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: CHE 0300 and 0400(MIN GRADE C-); PROG: Swanson School of Engineering

Course Attributes: Capstone Course

CHE 1016 - GREEN CHEMICAL ENGINEERING AND SUSTAINABILITY

Minimum Credits: 3

Maximum Credits: 3

This course deals with the application of the principles of green chemistry and green engineering to the field of chemical engineering. It is framed under the umbrella of ESG (Environment-Society-Governance) for Sustainability and provides a thorough introduction to "green" strategies for the design of chemicals, manufacturing processes, supply chain, and businesses. The course integrates topics such as Environment, Health, Safety, Bioprocessing, Life Cycle Assessment, Procurement, Energy, Waste, Eco-footprinting, Total Cost Assessment, Industrial Ecology, Circular Economy, and Business ESG Reports.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

CHE 1017 - CHEMICAL ENERGY AND THE NATURE OF THE CHEMICAL BOND

Minimum Credits: 3

Maximum Credits: 3

An overview of energy transformations arising from chemical bonding in chemical catalysis, electrocatalysis, and combustion. Students will be introduced to qualitative quantum chemistry concepts: potential energy and kinetic energy operators, wave functions, electron correlation, and GVB diagrams for analysis of chemical bonds and molecular structures in energy transformations. Students are expected to have completed Undergraduate physical chemistry course on quantum mechanics or equivalent or have prior consent from the instructor.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SU3 Elective Basis

Course Requirements: PROG: Swanson School of Engineering

CHE 1018 - INTRODUCTION TO SURFACE ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

Surface and interface engineering is critical to many important applications, e.g., coating, composite, biomedical device and membrane. With the fast growth of nanotechnology, understanding the surface properties becomes even more important since nano-sized materials, e.g., graphene, have no bulk phase but surfaces. This course combines elements of physical chemistry and materials of surface and interface in order to serve as the introduction to the surface engineering. The course spans from surface tension, capillary, superwettability to lubrication as well as 2D materials, allowing a comprehensive view to both classic surface science and cutting-edge surface technology. By the end of this class, students will understand both the fundamental principles of surface science and engineering approaches on tailor a given solid surface.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: CHE 0200 or BIOENG 1210 or ENGR 0022; PLAN: Swanson School of Engineering

CHE 1085 - DEPARTMENTAL SEMINAR

Minimum Credits: 0

Maximum Credits: 0

The departmental seminars are designed to acquaint the student with aspects of engineering which are normally not encountered in classes.

Academic Career: Undergraduate

Course Component: Colloquium

Grade Component: H/S/U Basis

Course Requirements: PROG: Swanson School of Engineering

CHE 1097 - SPECIAL PROJECT

Minimum Credits: 1

Maximum Credits: 12

Student develops an individual project under supervision of a faculty member. Project may be experimental, design and oriented, or instructional. A written report is prepared.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Letter Grade

CHE 1290 - DIFFERENTIAL EQUATIONS IN CHEMICAL ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

This class will present an introduction to ordinary differential equations, including Chemical Engineering context. Topics will include linear and nonlinear ordinary differential equations, Laplace transformation, and introduction to Fourier series. This course will balance analytical solution methods and the use of numerical solution tools (Matlab) and techniques to address a range of modeling and engineering problems arising in the context of Chemical Engineering.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: MATH 0230 OR 0235; MIN GRADE 'C'; PROG: Swanson School of Engineering

CHE 1533 - CONTROLLED DRUG DELIVERY

Minimum Credits: 3

Maximum Credits: 3

This course will provide students with a basic understanding of the engineering of controlled drug delivery systems, which stands as a 114 billion dollar industry. To this end, we will focus on topics at the interface between engineering and medicine such as biomaterials, pharmacokinetics, polymer chemistry, reaction kinetics, and biological transport phenomena. Design of transdermal, aerosol, oral, bio-mems, gene delivery, and targeted cellular delivery, will be reviewed with emphasis being placed upon us FDA regulatory considerations and the relevant physiological milieu.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: [PREQ: CHE 0300 and 0400 and (1530 or BIOSC 1000 or CHEM 1880); LVL: Sr; PLAN: Chemical Engineering (BSE)] or [BIOENG 1220; LVL: Sr; PLAN: Bioengineering (BSE)]

CHE 1540 - PRACTICAL ELECTROCHEMISTRY

Minimum Credits: 3

Maximum Credits: 3

This graduate-level elective focuses on the practice of electrochemistry in laboratory analysis and in a wide range of technological applications. We will begin with a brief overview of the fundamentals of electrochemistry in terms of thermodynamics, kinetics, and transport processes. We will then dive immediately into practical concepts with a survey of laboratory methods and technological/industrial applications of electrochemistry.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: LEVEL: Junior and Senior; PLAN: Chemical Engineering Recommended courses: Introductory Thermodynamics, Chemical Kinetics, and Electricity/Magnetism

CHE 1754 - PRINCIPLES OF POLYMER ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

This course deals with the elements of polymer science and engineering necessary for entry-level understanding of polymer technology. While the chemistry determines macromolecular microstructure, an understanding of polymer manufacture and processing requires the addition of physical chemistry and transport phenomena. The essential material covered in this class includes the elements of polymers thermodynamics, rheology, mechanical behavior, and equipment design.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: CHE 0200 or BIOENG 1210 or MEMS 1059; PLAN: Chemical Engineering (BSE)

CHE 1822 - ADVANCED TOPICS IN CHEMICAL ENGINEERING

Minimum Credits: 2

Maximum Credits: 2

This course introduces the fundamentals of capillarity via canonical problems in surface tension and wetting phenomena. Topics include static wetting phenomena (e.g. contact angles, shapes of menisci and drops), dynamic phenomena in which viscosity plays a role (e.g. rupture of menisci, coating operations), and thermodynamics (e.g. capillary condensation, nucleation).

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Chemistry

CHEM 0100 - INTRODUCTION TO GENERAL CHEMISTRY

Minimum Credits: 3

Maximum Credits: 3

This non-lab, 3-credit course develops fundamental concepts, basic calculations, and problem-solving skills in General Chemistry. This course is designed for those who seek to gain knowledge and ability as a foundation to subsequently taking General Chemistry 1, or those students desiring to fill a Natural Science GER with a Chemistry experience without plans of taking additional Chemistry courses. Topics typically introduced include Measurement, Matter, Energy, Atoms, Elements, Molecules, Chemical Composition, Chemical Reactions, Stoichiometry, Periodic Properties of the Elements, and Bonding. A background in chemistry is not necessary while a fundamental knowledge of math is required and facility with basic algebraic concepts is recommended. Students concerned about their ultimate success in Chem 0110 are encouraged to talk to their advisor about the benefits of completing the Introduction to Chemistry course prior to enrolling in General Chemistry I.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req.

CHEM 0110 - GENERAL CHEMISTRY 1

Minimum Credits: 4

Maximum Credits: 4

Chemistry 0110 and 0120 comprise a two-term introduction to the fundamental properties of matter. The courses emphasize applications to industrial and environmental chemistry and biochemistry. CHEM 0110 covers stoichiometry, the properties of solids, liquids and gases, thermochemistry and the electronic structure of atoms and molecules.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Natural Science General Ed. Requirement, DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req., SCI Polymathic Contexts: Science NonSeq.GE. Req., SCI Polymathic Contexts: Science Seq.GE. Req., SCI Polymathic Contexts: Science Seq.GE. Req.

CHEM 0111 - GENERAL CHEMISTRY 1

Minimum Credits: 3

Maximum Credits: 3

General chemistry 1 and 2 comprise a two-term introduction to the fundamental properties of matter. General chemistry 1 covers stoichiometry, the properties of solids, liquids and gases. Thermochemistry and the electronic structure of atoms and molecules.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

CHEM 0120 - GENERAL CHEMISTRY 2

Minimum Credits: 4

Maximum Credits: 4

Chemistry 0110 and 0120 comprise a two-term introduction to the fundamental properties of matter. The courses emphasize applications to industrial and environmental chemistry and biochemistry. CHEM 0110 covers stoichiometry, the properties of solids, liquids and gases, thermochemistry and the electronic structure of atoms and molecules.

Academic Career: Undergraduate

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (CHEM 0110 or 0710 or 0760 or 0960 or 0101) or (CHEM 0410 and 0430) or (CHEM 0111 and 0113)

Course Attributes: DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req., SCI Polymathic Contexts: Science Seq.GE. Req.

CHEM 0250 - INTRODUCTION TO ANALYTICAL CHEMISTRY

Minimum Credits: 3

Maximum Credits: 3

This course is concerned with the rigorous treatment of equilibria that are of analytical importance and with an introduction into electroanalytical methods, emission and absorption spectrophotometry, and modern separation methods, particularly chromatography.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: CHEM 0120 or 0720 or 0770 or 0970 or 0102 or (CHEM 0112 and 0114)

CHEM 0260 - INTRODUCTION TO ANALYTICAL CHEMISTRY LAB

Minimum Credits: 1

Maximum Credits: 1

The primary objectives of this course are to introduce the student to current analytical methods and to cultivate sound experimental technique. Laboratory work includes ion exchange separations, complexometric and potentiometric acid-base titrations, and absorption spectrophotometry.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: CREQ: CHEM 0250 or 0201 or 0325

CHEM 0310 - ORGANIC CHEMISTRY 1

Minimum Credits: 3

Maximum Credits: 3

An introduction to theory and practice of organic chemistry through study of structural principles, reaction mechanisms, and synthesis leading toward end of second term, when complex molecules of biological interest are discussed. Basic goals of course are to develop appreciation and skill in methods of molecular analysis which have made organic chemistry such a powerful intellectual discipline. Course will prepare student for work in advanced topics of organic chemistry, biochemistry, chemical engineering and health related sciences.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (CHEM 0120 or 0720 or 0770 or 0970 or 0102 or CHEM 0420) or (CHEM 0112 and 0114)

CHEM 0320 - ORGANIC CHEMISTRY 2

Minimum Credits: 3

Maximum Credits: 3

An introduction to theory and practice of organic chemistry through study of structural principles, reaction mechanisms, and synthesis leading toward end of second term, when complex molecules of biological interest are discussed. Basic goals of course are to develop appreciation and skill in methods of molecular analysis which have made organic chemistry such a powerful intellectual discipline. Course will prepare student for work in advanced topics of organic chemistry, biochemistry, chemical engineering and health related sciences.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: CHEM 0310 or 0730 or 0206 or 0231

CHEM 0330 - ORGANIC CHEMISTRY LABORATORY 1

Minimum Credits: 1

Maximum Credits: 1

Chemistry 0330 is devoted to the purification, characterization, and identification of organic molecules using the techniques of recrystallization, distillation, thin-layer, column and gas-liquid chromatography, melting point determination, and infrared and nuclear magnetic resonance spectroscopy.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: CHEM 0310 or 0350

CHEM 0340 - ORGANIC CHEMISTRY LABORATORY 2

Minimum Credits: 1

Maximum Credits: 1

Chemistry 0340 provides an opportunity to carryout important synthetic reactions discussed in the lecture course along with an introduction to the use of the chemical literature. Reactions are analyzed and products characterized using the skills learned in chemistry 0330.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: CHEM 0330 or 0207 or 0233; CREQ: CHEM 0320 or 0740 or 0208 or 0232

CHEM 0345 - ORGANIC LABORATORY

Minimum Credits: 2

Maximum Credits: 2

This single semester two-credit Organic Laboratory course will provide an introduction to modern organic laboratory techniques used routinely in both industry and academics. The lab will emphasize practical applications of the reactions covered in the Organic 1 and Organic 2 lectures. The goals of the course are to provide students with practical experience in executing and analyzing organic transformations as well as practical experience in modern laboratory techniques.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: CHEM 0310 or 0730 and CREQ: CHEM 0740 or 0320

CHEM 0350 - PRINCIPLES OF ORGANIC CHEMISTRY

Minimum Credits: 3

Maximum Credits: 3

A one-semester course in organic chemistry that will introduce students to fundamental principles including molecular structure, organic reactions, and mechanisms. As rigorous as the traditional two-term organic chemistry course, topics are chosen for their relevance to students entering a biological sciences-oriented career.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: [CHEM 0120 or 0720 or 0770 or 0970 or (0112 and 0114)] and BIOSC 0150

CHEM 0410 - GENERAL CHEMISTRY 1

Minimum Credits: 3

Maximum Credits: 3

See Chemistry 0110 for course description. This course is for students who require a General Chemistry 1 course that does not have a lab component. This course cannot be used to redo Chem 0110 even if your last take of Chem 0110 has a passing lab score. Contact a Chemistry Department advisor for clarification or a permission number to take this course.

Academic Career: Undergraduate

CHEM 0745 - ORGANIC LABORATORY: ANTIBIOTIC DISCOVERY

Minimum Credits: 2

Maximum Credits: 2

This two-credit CURE Organic Chemistry Laboratory Course (CHEM 0745) meets the same requirements as the Organic Chemistry Laboratory Course (CHEM 0345). It also serves as an independent research experience. One major goal of this course is to offer undergraduate students an opportunity to perform authentic scientific research in the laboratory course. This course engages students in learning approaches towards antibiotic discovery in order to address the worlds current antibiotic crisis. Throughout the semester, students develop strategies for antibiotic compounds isolation and purification using chemical separation techniques, and then characterize these unknown antibiotics using spectroscopic techniques commonly used in organic chemistry.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: CHEM 0310 or 0730; CREQ: CHEM 0320 or 0740 or 0208 or 0232

CHEM 0755 - ORGANIC CHEMISTRY LAB: RESEARCH EXPLORATION

Minimum Credits: 2

Maximum Credits: 2

In this course students will work in teams to write original research proposals. They will then design and carry out appropriate experiments, collect and interpret data and ultimately report results in both oral and written formats.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

CHEM 0760 - UHC GENERAL CHEMISTRY FOR ENGINEERS 1

Minimum Credits: 3

Maximum Credits: 3

Chemistry 0760 and 0770 comprise a two-term introduction to the fundamental properties of matter. The courses emphasize the fundamental principles of chemistry as exemplified by applications to industrial and environmental chemistry. Chemistry 0760 covers stoichiometry, electronic structure of atoms and molecules, periodic behavior, theories of bonding, and spectroscopy.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req., University Honors Course

CHEM 0780 - UHC GENERAL CHEMISTRY FOR ENGINEERS 2

Minimum Credits: 3

Maximum Credits: 3

Chemistry 0710 and 0780 comprise a two-term introduction to the fundamental properties of matter. The courses emphasize the fundamental principles of chemistry as exemplified by applications to industrial and environmental chemistry. CHEM 0780 covers the properties of solids, liquids and gases, chemical dynamics and chemical kinetics.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (CHEM 0110 or 0710 or 0760 or 0960 or 0101) or (CHEM 0410 and 0430) or (CHEM 0111 and 0113)

Course Attributes: DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req., University Honors Course

CHEM 0910 - CHEMICAL PRINCPL HEALTH PROFESSN

Minimum Credits: 4

Maximum Credits: 4

This is a one term course covering general and biological chemistry designed primarily for students enrolled in the school of nursing or preparing for health related professions. The course covers aspects of general chemistry including atomic structure and bonding and equilibria. A brief introduction to organic chemistry including physical properties and representative reactions of common functional groups and finally the chemistry of the major classes biomolecules and metabolism.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: School of Nursing students only.

Course Attributes: DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req.

CHEM 0960 - GENERAL CHEM FOR ENGINEERS 1

Minimum Credits: 3

Maximum Credits: 3

Essentially the same as CHEM 0110, but a total of 3 credits only and has no lab. Enrollment limited to school of engineering students.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req.

CHEM 0970 - GENERAL CHEM FOR ENGINEERS 2

Minimum Credits: 3

Maximum Credits: 3

Essentially the same as CHEM 0120, but a total of 3 credits only. Has lab, but only two lectures per week in contrast to CHEM 0120, which has 3. Enrollment limited to school of engineering.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: CHEM 0110 or 0410 or 0710 or 0760 or 0960 or 0101 or (CHEM 0111 and 0113)

Course Attributes: DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req.

CHEM 1000 - MATHEMATICS FOR CHEMISTRY

Minimum Credits: 4

Maximum Credits: 4

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SU3 Elective Basis

Course Requirements: PREQ: MATH 0230

CHEM 1010 - SAFETY IN THE CHEMISTRY LABORATORY

Minimum Credits: 1

Maximum Credits: 1

This course will introduce students to currently accepted best practices in chemistry laboratory safety. It will do this via weekly sessions given by both academic and industrial leaders in the field. Hands on activities and discussions on topics such as hazard recognition, risk assessment, accident analysis and prevention, and emergency responses will be presented. When possible, the chemical basis of safety will be emphasized.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

CHEM 1020 - READING THE CHEMICAL LITERATURE

Minimum Credits: 2

Maximum Credits: 2

This course will provide an introduction to understanding the assembly and function of macromolecules and supramolecular assemblies. The course will emphasize literature readings and team activities that require students to integrate concepts from their core chemistry courses. The goals of this course are to provide practical experience (1) in applying concepts from core chemistry courses to understanding complex supramolecular assemblies and (2) in reading the chemical literature. The Learning Objectives include: (1) Develop the ability to recognize and apply the basic principles learned in physical, organic, and general (inorganic) chemistry to understanding the structural and dynamical properties of macromolecules and supramolecular assemblies. (2) Develop the skills needed to design experimental probes of these processes in complex systems. (3) Learn to leverage the expertise of diverse teams to collectively tackle challenging problems. (4) Learn to construct meaningful hypotheses concerning function in complex systems. (4) Learn to design experiments and computations to test critical hypotheses. (5) Develop intuition about the importance of different molecular timescales and the driving forces for arranging molecules into functional machinery.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

CHEM 1130 - INORGANIC CHEMISTRY

Minimum Credits: 3

Maximum Credits: 3

Modern bonding theories are developed to the level that permits some understanding of the effects of structure and bonding on chemical properties. Periodic relationships are discussed and applied to selected families of elements. Emphasis is placed on those aspects of structure, bonding and periodic relationships that are helpful in unifying a large body of chemical knowledge. Selected topics of current interest in inorganic chemistry are discussed.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: CHEM 1410 or 1301 or 1341

Course Attributes: Capstone Course

CHEM 1140 - ADVANCED INORGANIC LABORATORY

Minimum Credits: 2

Maximum Credits: 2

Introduces practical techniques for the synthesis and characterization of inorganic and organometallic complexes and materials. Special emphasis on the preparation and characterization of air- and water-sensitive compounds.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: CREQ: CHEM 1130 or 1131 or 1401

CHEM 1250 - INSTRUMENTAL ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

The basic principles and instrumentation of important methods and their application to analysis and research problems. The coverage includes spectroscopic and electrochemical methods and chromatography. Equilibrium and dynamic aspects of each are considered.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: CHEM 0250 or 0201 or 0325

CHEM 1255 - INSTRUMENTAL ANALYSIS LAB

Minimum Credits: 1

Maximum Credits: 1

The laboratory component of CHEM 1250. Students will be introduced to state of the art instrumentation being used in contemporary analytical chemistry.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: CHEM 0260; CREQ: CHEM 1250

CHEM 1260 - INTERMEDIATE ANALYTICAL CHEMISTRY

Minimum Credits: 2

Maximum Credits: 2

This course is about becoming a professional. Students read the current scientific literature on a topic of current interest in analytical chemistry or a related area (spectroscopy, separations, electrochemistry, sensors...). They teach the class about a scientific area, and the class will discuss this area. Finally, we will attend public scientific lectures of famous scientists.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: CHEM 1250 or 1305 or 1327

CHEM 1281 - INSTRUMENTAL ANAL WRITING PRACT

Minimum Credits: 1

Maximum Credits: 1

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: Writing Intensive Course (WRIT)

CHEM 1310 - SYNTHETIC ORGANIC CHEMISTRY

Minimum Credits: 2

Maximum Credits: 2

This advanced undergraduate course builds onto sophomore organic I and II courses by applying the learned principles to the synthesis of FDA-approved drug molecules. The emphasis of the course will be on analyzing the molecular structures of drugs in a retrosynthetic fashion, followed by developing suitable synthetic routes to these molecules. The reaction mechanisms of key steps of these syntheses will be discussed in detail. Further discussion will include fundamental functional group interconversions, chemoselectivity, and protecting group use, enantioselective synthesis, and organometallic chemistry. Students will learn about the complexities of modern drug molecules, how their structures can be analyzed, and how they are synthesized.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: CHEM 0320 or 0740 or 0232 or CHEM 0208

CHEM 1380 - TECHNIQUES OF ORGANIC RESEARCH

Minimum Credits: 2

Maximum Credits: 2

A course which serves as a guide to the interpretation of ultraviolet, infrared, nuclear magnetic resonance and mass spectra of organic compounds.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: CHEM 0320 or 0740 or 0208 or 0232

CHEM 1410 - PHYSICAL CHEMISTRY 1

Minimum Credits: 3

Maximum Credits: 3

Basic lecture course dealing with quantum theory, atomic and molecular structure, symmetry, spectroscopy and diffraction methods.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: [CHEM 0120 or 0720 or 0770 or 0970 or (0112 and 0114)] and (PHYS 0175 or 0111 or 0476) and (MATH 0240 or 0201 or 0241 or CHEM 1000)

CHEM 1420 - PHYSICAL CHEMISTRY 2

Minimum Credits: 3

Maximum Credits: 3

Basic lecture course dealing with gases, kinetic theory, chemical thermodynamics, equilibria, and chemical kinetics.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: CHEM 1410 or 1302 or 1342

Course Attributes: Capstone Course

CHEM 1430 - PHYSICAL CHEMISTRY LABORATORY 1

Minimum Credits: 1

Maximum Credits: 1

Approximately 8 experiments are performed during the term. Experiments are selected to illustrate important principles of physical chemistry and to make the student familiar with important experimental methods. The course is intended to make the student think critically about reliability of experimental results and to attempt to interpret them in the light of his previous chemical experience.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: CHEM 1302 or 1342 or 1410 or 1480

CHEM 1431 - TOPICS IN PHYSCL CHEM WRIT PRAC

Minimum Credits: 1

Maximum Credits: 1

This course provides an opportunity for students to explore a current physical chemistry research topic and create a "journal ready" manuscript. The research topic will be chosen during the first two weeks of classes in consultation with the professor. A comprehensive outline and first draft will be prepared then reviewed with the professor. The paper is revised at least once before final submission and is a minimum of 15 pages. Conferences will be by appointment.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: Writing Intensive Course (WRIT)

CHEM 1440 - PHYSICAL CHEMISTRY LABORATORY 2

Minimum Credits: 1

Maximum Credits: 1

This course has one four hour lab each week. Approximately 7 experiments are performed during the term, with an emphasis on the macroscopic properties of matter. The course is designed to expand upon the principles and techniques covered in Chem 1430 as well as to introduce the student to other scientific methods for investigating properties of materials. There is a lab fee.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (CHEM 1420 and 1430) or 1301 or (CHEM 1341 and 1343) or CHEM 1480

CHEM 1460 - INTRO MODERN COMPUTATIONAL SCI

Minimum Credits: 3

Maximum Credits: 3

This course will emphasize the application of microcomputers and numerical methods for solving problems of importance in chemistry. Methods to be studied include solving systems of linear and differential equations, least squares fitting, eigenvalue problems, solution of nonlinear equations.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

CHEM 1480 - INTERMEDIATE PHYSICAL CHEMISTRY

Minimum Credits: 3

Maximum Credits: 3

A lecture course emphasizing application of principles of thermodynamics to solutions of electrolytes and non-electrolytes, electrochemical cells, physical chemistry of surfaces and macromolecules.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (MATH 0240 or 0201 or 0241) and (PHYS 0111 or 0175 or 0476 or 0102 or 0202 or 0152 or 0200) and (CHEM 0120 or 0970 or 0102 or 0112 or 0420)

CHEM 1600 - SYNTHESIS & CHARACTERIZATION POLYMERS

Minimum Credits: 3

Maximum Credits: 3

Synthesis and characterization of polymers is focus of course. Current methods of polymer synthesis will be surveyed, practical implementation of reactions and kinetic consequences of reaction strategies in homopolymer, copolymer and block copolymer synthesis. Techniques for characterization of polymer molecular weight, chemical composition, and stereochemistry (FT-IR, NMR, other spectroscopic and chemical methods) will be discussed. Brief treatment of polymer solution thermodynamics and selected topics in polymer chemistry will be discussed.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (CHEM 0320 or 0740 or 0208 or 0232) and (CHEM 1420 or 1480 or 1302 or 1342)

Course Attributes: Capstone Course

CHEM 1605 - SYNTH & CHARACTERIZATION POLYMERS LAB

Minimum Credits: 1

Maximum Credits: 1

This course is the laboratory component of CHEM 1600. Students will gain practical experience in the synthesis of polymers and the use of modern techniques used in the characterization of the polymers they synthesize.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: CHEM 0320 or 0740 or 0340 or 0750; CREQ: CHEM 1600

CHEM 1620 - ATOMS, MOLECULES AND MATERIALS

Minimum Credits: 3

Maximum Credits: 3

This course will use qualitative molecular orbital theory to understand the design and performance of new materials. A link will be made between "small molecule" intuition and the solid-state perspective on large molecules. Clusters and solids.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: CHEM 0320

CHEM 1700 - UNDERGRADUATE RESEARCH SEMINAR

Minimum Credits: 1

Maximum Credits: 1

Seminar given by faculty on undergraduate research opportunities in chemistry. Open to all students regardless of departmental affiliation, but is designed especially to help those students who may take chemistry 1710 in their selection of a research project.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

CHEM 1701 - UNDERGRAD RES SEMINAR WRIT PRAC

Minimum Credits: 1

Maximum Credits: 1

This course, in conjunction with chemistry 1700, will allow students to write a major research paper based on a seminar given by a departmental faculty member. Extensive library work will be required. At least one revision of the paper will also be expected. This course will fulfill the CAS Departmental Writing requirement.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: Letter Grade

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006); CREQ: CHEM 1700

Course Attributes: Writing Intensive Course (WRIT)

CHEM 1710 - UNDERGRADUATE RESEARCH

Minimum Credits: 1

Maximum Credits: 6

This is an elective course where a research project is carried out under the direction of a member of the chemistry faculty. It is for the serious student who wishes to expand his scholarly interests. Approximately four hours research per

week per credit; usually no more than three credits per term.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: LG/SNC Elective Basis

Course Attributes: Capstone Course

CHEM 1711 - UNDGR RESEARCH WRITING PRACTICUM

Minimum Credits: 1

Maximum Credits: 1

Chem 1711 will require the student to write a report in the form of a major research paper and will include a historical background to the project, an experimental or methods sections and a discussion of the results and their meaning.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: Capstone Course, Writing Intensive Course (WRIT)

CHEM 1720 - UNDERGRAD TEACHING EXPERIENCE

Minimum Credits: 1

Maximum Credits: 4

Students can gain teaching experience by serving as instructors in one of the undergraduate chemistry lab courses.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: LG/SNC Elective Basis

Course Attributes: Capstone Course

CHEM 1810 - CHEMICAL BIOLOGY

Minimum Credits: 3

Maximum Credits: 3

Revolutionary transformations in chemistry and biology have led to the merging of these disciplines where contributions from both fields impact our molecular and quantitative understanding of biology. Rapid growth in this area has been driven in part by students and researchers applying synthesis, quantitative analysis, and theoretical reasoning to the study complex cellular processes. This course focuses on enzyme mechanisms in biological pathways, kinetics and thermodynamics, and chemical tools to probe and screen components of the cell. Some other topics include DNA/RNA processing, macromolecular interactions, chemical signaling, posttranslational modifications, chemical syntheses of biomolecules, and development of assays for high throughput drug screening.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: CHEM 0320 and BIOSC 0160

CHEM 1815 - CHEMICAL BIOLOGY LABORATORY

Minimum Credits: 2

Maximum Credits: 2

This laboratory course will focus on chemical reactions catalyzed by enzymes. Students will learn organic syntheses, DNA mutagenesis and sequencing, protein expression and purification, biochemical assays. Students will be expected to present their findings in a seminar style talk and a poster presentation.

Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: CHEM 0345

CHEM 1830 - SYNTHETIC BIOLOGY

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: CHEM 1810 or BIOSC 1000 or BIOSC 1810

CHEM 1880 - CHEMICAL BIOLOGY FOR ENGINEERS

Minimum Credits: 3
Maximum Credits: 3
PeopleSoft Description: Chemical engineers have made significant contributions towards the development of pharmaceutical research and manufacturing, and there are now also growing opportunities in field of biotechnology. In this course students broadly examine the nomenclature, functions and mechanisms utilized by DNA, RNA and proteins and learn foundation knowledge in order to contribute to these fields. This includes examination of enzyme mechanisms of therapeutic targets and how pathways of enzymes can produce natural products, such as terpenes and polyketides, that are common antibiotic and antifungal agents. Specialized topics will also be considered such as the engineering of proteins with new catalytic functions and metabolic engineering to produce therapeutics and commodity chemicals. Students also learn about the molecular mechanisms involved in the cellular processes of replication, transcription and translation. These topics include recombinant DNA technology and new therapeutic strategies that have emerged in manufacturing such as antisense oligonucleotide technology.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: Pre-req: Chem 0320 ; PLAN: Chemical Engineering

CHEM 1902 - DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 6
Directed study in a specific area of chemistry to enhance preparation for undergraduate research.
Academic Career: Undergraduate
Course Component: Directed Studies
Grade Component: LG/SNC Elective Basis

CHEM 2120 - DESCRIPTIVE INORGANIC AND ORGANOMETALLIC CHEMISTRY

Minimum Credits: 3
Maximum Credits: 3
This course is intended to provide a solid background in modern inorganic chemistry for those doing research in all branches of chemistry. Much of the course material is descriptive, but the objective of the selection and presentation of the material will be to develop an understanding of the principles controlling the structures and reactivity of inorganic materials. Aspects of all areas of inorganic chemistry will be discussed, including main group, transition metal, and organometallic chemistry.
Academic Career: Graduate

Chinese

CHIN 0001 - FIRST YEAR CHINESE 1

Minimum Credits: 5

Maximum Credits: 5

This is the first term of first year chin language course intended for those who have no or little experience in this language. This course helps students to develop basic oral and written proficiency and understand the basics of chin language and culture. Students are expected to be able to converse in limited daily life situations and write short paragraphs on personal topics. Class activities will consist of pair work, group work, and presentations on the course materials and other level appropriate authentic materials.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Asian Studies

CHIN 0002 - FIRST YEAR CHINESE 2

Minimum Credits: 5

Maximum Credits: 5

This is the 2nd term of 1st year chin language course intended for those who have completed chin 1001/0001 or its equivalent. This course continues to help students to develop basic oral and written proficiency and understand the basics of chin language and culture. Students are expected to be able to converse in limited daily life situations and write short paragraphs on personal topics. Class activities consist of pair work, group work, and presentations on the course materials and other level appropriate authentic materials.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: CHIN 0001 (MIN GRADE 'C-') or instructor permission

Course Attributes: Asian Studies, DSAS Second Language General Ed. Requirement

CHIN 0003 - SECOND YEAR CHINESE 1

Minimum Credits: 5

Maximum Credits: 5

The course aims to enhance student's abilities for speaking accurately and appropriately in increasingly challenging situations, reading and understanding narrative and descriptive texts and the relevant cultural aspects, writing short narrative paragraphs with proper discourse connectors, and conversing on a wider range of personal topics with some sophistication. This course includes recognition and production of 350 characters presented in both traditional and simplified versions. Students should have control of a cumulative total of 1,000 characters by the end of the term.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: CHIN 0002 (MIN GRADE 'C-')

Course Attributes: Asian Studies, DSAS Second Language General Ed. Requirement

CHIN 0004 - SECOND YEAR CHINESE 2

Minimum Credits: 5

Maximum Credits: 5

The course aims to enhance student's abilities for speaking accurately and appropriately in increasingly challenging situations, reading and understanding a wider range of narrative and descriptive texts and the relevant cultural aspects, writing longer narrative and descriptive paragraphs with proper discourse connectors and idiomatic expressions, and conversing on personal topics with sophistication and some non-personal topics. This course includes recognition and production of 350 characters presented in both traditional and simplified versions. Students should have control of a cumulative total of 1,400 characters by the end of the term.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: CHIN 0003 (MIN GRADE 'C-')

Course Attributes: Asian Studies

CHIN 0005 - CHINESE FOR HERITAGE SPEAKERS

Minimum Credits: 5

Maximum Credits: 5

CHIN 0005 is a course specifically designed for heritage learners and those whose oral and aural abilities exceed their reading and writing skills. Students with an upbringing or long-term exposure to oral Chinese language use can take this course to develop their literacy skills and to gain a deeper understanding of the Chinese culture. The course also aims to help students further develop their oral and socio-cultural communication skills so that they can conduct communication in all three modes (interpersonal, interpretive, and presentational) at a higher proficiency level. Students will be immersed in Chinese language and culture through integration of cultural content knowledge and language learning. Upon completion of the course students will be able to: -pronounce sounds problematic for a majority of heritage learners -recognize Chinese radicals and use them to guess the meaning of Chinese characters - recognize and write Chinese characters -use reading strategies - make oral presentations in Chinese - write compositions in Chinese

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

CHIN 0006 - CHINESE FOR HERITAGE SPEAKERS

Minimum Credits: 3

Maximum Credits: 3

CHIN0006 is a course designed for students with a Chinese heritage language background and those whose speaking proficiency is at the intermediate level whereas their reading/writing proficiency is at the novice level. Students with an upbringing or long-term exposure to spoken Chinese language use can take this course to develop their literacy skills and to gain a deeper understanding of the Chinese culture. The course also aims to help students further develop their oral and socio-cultural communication skills so that they can conduct communication in all three modes (interpersonal, interpretive, and presentational) at a higher proficiency level. Students will be immersed in Chinese language and culture through the integration of cultural knowledge and language learning.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

CHIN 0007 - INTRODUCTION TO CHINESE CIVILIZATION AND CULTURE

Minimum Credits: 3

Maximum Credits: 3

This course is an interdisciplinary introduction to Chinese society and culture from earliest times to the present. We

will introduce the development of China in material terms as well as in terms of competing beliefs, and the relationship of these to social groups. The first part of the course explores ancient literature, philosophy, religion, art, architecture, customs, and other aspects of china's rich and diverse heritage. The second part will be devoted to china's transition to a modern society, covering such topics as social changes, urban life, popular culture, and the values and ideas that captivate contemporary Chinese people's attention. Cultural traditions of Hong Kong, taiwan, and tibet will also be employed.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Geographic Region General Ed. Requirement, DSAS Historical Analysis General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Contexts: Soc/Behav. GE. Req.

CHIN 0008 - BEGINNER CHINESE FOR PROFESSIONALS

Minimum Credits: 3

Maximum Credits: 3

This introductory Chinese course aims at achieving both linguistic accuracy and conversational competence to thrive in professional domains, including business, law, medicine, and technology. Students will focus on acquiring language proficiency relevant to professional communication, basic exchanges, profession-related inquiries, and patient and client communications. Chinese pronunciation and tones will be emphasized throughout the semester. Students will also be introduced to elements of the Chinese culture in these professional fields. By the end of the course, participants will not only have enhanced their Mandarin proficiency but will also possess an understanding of the cultural nuances within each professional sector, facilitating successful communication and collaboration in business, legal, medical, or technical contexts.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

CHIN 0010 - SPECIAL TOPICS IN EAST ASIAN POP CULTURE

Minimum Credits: 1

Maximum Credits: 1

This 1-credit mini course explores the spread of Asian pop across the world in conjunction with the Asian Studies Center's annual lecture series on Asian pop culture.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

CHIN 0081 - EAST ASIA IN THE WORLD

Minimum Credits: 3

Maximum Credits: 3

To enhance a greater understanding of East Asian cultures; to explore the interactions and relations between the peoples and cultures of East Asia (china and Japan) and the rest of the world, from ancient times to the present. Literary works, memoirs, autobiographies, diaries, historical records and films will be used. Themes involve such topics as the significance of travel in self-understanding, diaspora, immigration, and changing ideas of the homeland.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: SCI Polymathic Contexts: Global&Cross Cul GE. Req.

CHIN 0083 - INTERCULTURAL COMMUNICATION IN CHINESE

Minimum Credits: 3

Maximum Credits: 3

This course helps undergraduate students develop an understanding of the cultural dimensions of conversation and communication when perspectives from different cultural traditions (e.g., Chinese, Western, etc.) are presented. We will be using authentic conversations between Chinese and American college students in a study-abroad context (Dorm Corpus) as our primary texts of analysis. Through the course, students will (1) be able to critically analyze a communicative event with a cross-culture perspective and appreciate how concepts of or ideologies in privacy, personal relationships, health, family, education, etc. may differ due to differences in traditional and transforming values; (2) develop their communicative competence performing in Chinese while understanding the target culture conventions; (3) understand their own cultural identity and raise awareness and sensitivity towards people with cultural and ethnic background that may differ from theirs, and apply such awareness and empathy when functioning in one's extended community; (4) gain knowledge of research and method of investigation pertaining to cultural dimensions of foreign language studies. This course is suitable for those with at least intermediate level oral proficiency and some reading proficiency in Chinese.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Cross-Cult. Awareness General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

CHIN 0085 - REVOLUTION, INVOLUTION, AND IDENTITY IN MODERN CHINESE CULTURE

Minimum Credits: 3

Maximum Credits: 3

This course provides an interdisciplinary introduction to Chinese society and culture from the turn of the 20th century to the present. Specifically, it focuses on the notions of revolution, involution, and identity reflected in literary and visual representations. Exploring the dynamic between change and continuity in modern Chinese history, it seeks to examine concepts such as empire, modernity, revolution, and nation, and investigate identity formations in national, ethnic, gender, and individual levels. It will cover such topics as social changes, historical consciousness, urban life, popular culture, and the values and ideas that captivate contemporary people's imagination. Cultural orientations of Hong Kong, Taiwan, and Tibet will also be explored.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Attributes: DSAS Geographic Region General Ed. Requirement, DSAS Historical Analysis General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Contexts: Soc/Behav. GE. Req.

CHIN 0177 - SAVORING THE LANGUAGE IN CHINESE FOOD CULTURE

Minimum Credits: 3

Maximum Credits: 3

The course introduces students to linguistic inquiries in topics related to Chinese food and food culture. The course content includes the following: (1) Food naming in Chinese culture and polysemy in words associated with food; (2) conceptual metaphors in Chinese associated with food, food texture, taste, cooking method, etc.; (3) issues in language borrowing, transliteration, and translation; (4) sociolinguistic issues including pragmatic competence in the Chinese food culture and speech analysis in food related text. Students will also perform other linguistic analysis on culture product and texts associated with food (culture) in China, including conducting analysis of semiotics, dialects, and cross-cultural comparisons.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: CHIN 0001 (Min Grade 'B-')

CHIN 1009 - THIRD-YEAR CHINESE 1

Minimum Credits: 3

Maximum Credits: 3

The course aims to enhance student's abilities for speaking accurately and appropriately in challenging situations, reading and understanding original texts of different types, writing short essays on various topics with discourse connectors and idiomatic expressions, and conversing on both personal and non-personal topics with sophistication at discourse level. Students in this course should be aware of relevant Chinese traditions and perspectives and be able to make comparisons and connections with other cultures.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: CHIN 0004 (grade C- or higher) or instructor permission

CHIN 1010 - THIRD-YEAR CHINESE 2

Minimum Credits: 3

Maximum Credits: 3

The course aims to enhance student's abilities for speaking accurately and appropriately in challenging situations, reading and understanding original texts of different types, writing short essays on various topics with discourse connectors and idiomatic expressions, and conversing on both personal and non-personal topics with sophistication at discourse level. Students in this course should be aware of relevant Chinese traditions and perspectives and be able to make comparisons and connections with other cultures.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: CHIN 1009 (MIN GRADE 'C') or Instructor Permission

CHIN 1020 - THIRD YEAR CHINESE 1

Minimum Credits: 5

Maximum Credits: 5

The course aims to enhance student's abilities for speaking accurately and appropriately in challenging situations, reading and understanding original texts of different types, writing short essays on various topics with discourse connectors and idiomatic expressions, and conversing on both personal and non-personal topics with sophistication at discourse level. Students in this course should be aware of relevant Chinese traditions and perspectives and be able to make comparisons and connections with other cultures.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: CHIN 0004 (MIN GRADE 'C-')

Course Attributes: Asian Studies

CHIN 1021 - THIRD YEAR CHINESE 2

Minimum Credits: 5

Maximum Credits: 5

The course aims to enhance student's abilities for speaking accurately and appropriately in challenging situations, reading and understanding original texts of different types, writing short essays on various topics with discourse connectors and idiomatic expressions, and conversing on both personal and non-personal topics with sophistication at discourse level. Students in this course should be aware of relevant Chinese traditions and perspectives and be able to make comparisons and connections with other cultures.

Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: CHIN 1020 (MIN GRADE 'C-')
Course Attributes: Asian Studies

CHIN 1025 - ASPECTS OF THE CHINESE LANGUAGE

Minimum Credits: 3

Maximum Credits: 3

Aspects of the Chinese language will offer a linguistic introduction to Chinese. No prior knowledge of linguistics is assumed although familiarity with linguistic analysis is a plus. The Chinese language is substantially different from English or other Indo-European languages. It is also distinct from some other East Asian languages. For instance, it has a logographic writing system and is a tonal language. Its word order is more flexible than English and is a topic-prominent language. It does not have rich grammatical inflections but has a limited number of aspectual markers. The course serves the following purposes: (1) introduce the basic facts of the Chinese language including its development, the phonology, morphology, the semantic and syntactic aspects of Mandarin Chinese, and the interactions of the language with Chinese culture and the society; (2) introduce elementary linguistic concepts relevant to Chinese to enable students to use the right tool to describe and critically analyze the features of a language; (3) encourage students to reflect on their language learning experience or knowledge of other languages to conduct reasoning, such as analyzing the sources of difficulty in their studying of Chinese; (4) to inspire interest in a range of topics including differences in modern and classical Chinese, philosophical belief embodied in the language, Chinese culture manifested in the language (such as the notion of politeness, face, etc.), and to lay a foundation for further studies in linguistics as well as in those relevant topics.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Geographic Region General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req., Undergraduate Research

CHIN 1027 - CHINESE AS A SECOND LANGUAGE AND BILINGUALISM

Minimum Credits: 3

Maximum Credits: 3

The course introduces students to research methods and findings on Chinese as a Second Language (CSL) and it familiarizes students with pedagogical and issues of learning in CSL. The course content includes (1) linguistic perspectives of CSL and second language learners' grammatical knowledge development, including how key structures are acquired and typically dealt with in language classroom; (2) psycholinguistic experimental methods and cognitive development of bilingual speakers of Chinese and English, including in character recognition/production, vocabulary acquisition, morphological awareness development, etc.; (3) corpus approaches in CSL and applications; (4) pragmatics in L2 Chinese; (5) other CSL topics such as learner motivation, Chinese as a heritage language, proficiency assessment, and technologies in CSL. The course will use a combination of lectures, discussions, and presentations. Class will be conducted largely in English, while enrolled students are expected to have an intermediate or above level Chinese proficiency.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SU3 Elective Basis

Course Requirements: PREQ: CHIN 0004 (MIN GRADE B-), OR CHIN 0003 (MIN GRADE B-) AND CREQ: CHIN 0004

Course Attributes: Undergraduate Research

CHIN 1033 - SPECIAL TOPICS: ADVANCED CHINESE ACROSS GENRES

Minimum Credits: 3

Maximum Credits: 3

To develop greater fluency, accuracy and confidence in spoken Chinese. Rhetorical and presentational skills will be introduced and reinforced. Students will narrate and describe an event/situation, maintain sustained discourses, provide structured arguments, develop hypotheses and explain as well as defend opinions. Through reading news articles on various subjects such as society, finance, politics, technology, sports and entertainment, students will gain deeper understanding of social, cultural, political and economic situations in Chinese speaking regions and will be able to conduct in-depth conversations with native speakers.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Lecture

Course Requirements: PREQ: CHIN 1009 or CHIN 1020

CHIN 1040 - LITERARY CHINESE 1 CLASSICAL

Minimum Credits: 3

Maximum Credits: 3

This is a course in classical Chinese whose purpose is to acquaint the student with the language and syntax of classical Chinese.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: CREQ: CHIN 1020 or CHIN 1009

Course Attributes: Asian Studies

CHIN 1041 - LITERARY CHINESE 2 CLASSICAL

Minimum Credits: 3

Maximum Credits: 3

A continuation of Chinese 1040, this course will further develop the student's knowledge of vocabulary and syntactical patterns of classical Chinese.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: CHIN 1040

Course Attributes: Asian Studies

CHIN 1044 - THE CHINESE WRITING SYSTEM IN EAST ASIA

Minimum Credits: 3

Maximum Credits: 3

The Chinese script is presumed to be difficult to the untrained eye, but much of the myth lies in misunderstandings or misinformation. The course will introduce students to the Chinese writing system through historical and applied linguistic perspectives, and it will provide opportunities of discussion on how the Chinese script influences topics in anthropology, arts, education, and politics in the East Asian region. Students will gain foundational knowledge regarding the linguistic features of the Chinese writing system, including its historical development, acquire an insight into the cultural aspect of the script, and be challenged to apply such knowledge to make critical inquiries on the relationship between the writing system and literacy development, cognitive science, visual arts, and society.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: CHIN 0001

CHIN 1047 - CHINESE AND WESTERN POETRY

Minimum Credits: 3

Maximum Credits: 3

A comparative study of Chinese and Western lyric poetry. This course explores the world of feeling as expressed in the poetry of two vastly different worlds; china and the West and focuses on the language of feeling in a poetic medium. The purpose of this course is to appreciate how differences between the two poetic traditions is essential to a better understanding of the two cultures.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Asian Studies, DSAS Cross-Cult. Awareness General Ed. Requirement, DSAS Literature General Ed. Requirement, Global Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Contexts: Humanistic GE. Req., West European Studies

CHIN 1050 - FOURTH YEAR CHINESE 1

Minimum Credits: 3

Maximum Credits: 3

This is an advanced language course which concentrates on reading current journalistic writings such as news reports, periodicals, articles and editorials.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: CHIN 1021 (MIN GRADE 'C-') OR CHIN 1010 (MIN GRADE 'C-')

CHIN 1051 - FOURTH YEAR CHINESE 2

Minimum Credits: 3

Maximum Credits: 3

The second term of fourth year reading this course continues the student's advanced language study concentrating on reading journalistic writings.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: CHIN 1050 (MIN GRADE 'C-')

CHIN 1059 - ADAPTED FOR THE SCREEN: CHINESE LITERATURE AND FILM

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Attributes: DSAS Geographic Region General Ed. Requirement, DSAS Literature General Ed. Requirement, DSAS The Arts General Ed. Requirement, Film Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Contexts: Humanistic GE. Req.

CHIN 1083 - MASTERPIECES OF CHINESE LITERATURE: PREMODERN

Minimum Credits: 3

Maximum Credits: 3

This course is devoted to the study of Chinese literature from ancient times to the end of the 19th century. Lectures and readings include prose (historical, philosophical and literary texts, legends and myths of the remote past, anecdotes, short stories and fantastic tales of ghosts and love) and poetry (from the book of songs to the poetry of the t'ang and sung periods).

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Asian Studies, DSAS Geographic Region General Ed. Requirement, DSAS Literature General Ed. Requirement

CHIN 1084 - MASTERPIECES OF CHINESE LITERATURE: MODERN

Minimum Credits: 3

Maximum Credits: 3

A critical analysis of some of the most representative literary works in modern china from a literary and socio-political perspective.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Geographic Region General Ed. Requirement, DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

CHIN 1085 - INTRODUCTION TO EAST ASIAN CINEMA

Minimum Credits: 3

Maximum Credits: 3

This course investigates the ways in which film addresses and treats the major socio-cultural issues in modern society through a critical study of the works of Chinese and Japanese master filmmakers. The course focuses on changes in marriage and family patterns, women's roles and the plight of youth.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Cross-Cult. Awareness General Ed. Requirement, DSAS Geographic Region General Ed. Requirement, DSAS The Arts General Ed. Requirement, Film Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

CHIN 1086 - LOVE IN CHIN AND WESTERN LITERATURE

Minimum Credits: 3

Maximum Credits: 3

The course will explore and compare expressions of love in Chinese and Western literature. The course will examine a succession of theories and ideas of love such as platonic, religious, courtly, romantic and post-romantic from the Western tradition; love in Confucianism, Monism, Taoism, and Buddhism.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Gender, Sexuality & Women's St, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

CHIN 1087 - INTRODUCTION TO CHINESE NARRATIVE

Minimum Credits: 3

Maximum Credits: 3

The student is introduced to the major forms and important periods of Chinese narrative by reading and discussing a variety of Chinese narratives from the beginning of Chinese literature to the modern period. Texts include philosophical fables, historical records, mythical tales, stories of the supernatural, vernacular stories and novels.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Asian Studies

CHIN 1088 - NEW CHINESE CINEMA

Minimum Credits: 3

Maximum Credits: 3

Students will study Chinese films made by filmmakers of mainland China and Taiwan. They will learn about origins, development, themes, and styles with major directors and important films of new Chinese cinema being studied. Students will have an opportunity to understand contemporary Chinese culture and society.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Asian Studies, DSAS Geographic Region General Ed. Requirement, DSAS The Arts General Ed. Requirement, Film Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

CHIN 1089 - THE WORLD OF CHINA

Minimum Credits: 3

Maximum Credits: 3

This course will survey the wax and wane of pop culture through disparate phases of social and political developments of modern china. The readings will introduce students to works of literature, art, and film to see how tradition and modernity, elite and mass cultures, East and West conflict and converge; how china absorbs, adapts as well as resists capitalistic modernity while embracing global market economy; how china grapples with urban alienation, social flux, moral laxity and other negative aspects of industrialization and urbanization. The course will make available to students a host of art images, dvd clips and e-texts to enhance and expand their perception of modern china.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Asian Studies, Film Studies

CHIN 1090 - GREAT MINDS OF CHINA

Minimum Credits: 3

Maximum Credits: 3

First segment on Confucianism, including the Analects and Mencius, will be studied with relevant commentaries, stressing implications for Chinese culture, especially in ethical and socio-political dimensions. Second segment on Taoism, Lao Tzu and Chuang Tzu, will be studied with emphasis on impact on the arts and literature. Final segment on Buddhism will concentrate on representative sutras of the tradition, diamond sutra and texts from the Chan (Zen) master's.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Asian Studies, DSAS Geographic Region General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

CHIN 1700 - CHINESE TRANSLATION THEORY AND PRACTICE

Minimum Credits: 3

Maximum Credits: 3

This course is intended for speakers of English who possess advanced Chinese proficiency. It is an overview of theory and practice of translation from Chinese to English, including the training on hands-on translation practices. Students will use real-life translation materials such as news articles, legal documents, commercial flyers, financial reports, and technical manuals to simulate a professional translation process. Basic techniques and strategies that are practiced commonly in the translation field will be introduced and further reinforced through lectures, and research and analysis of Chinese-English bilingual websites.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: CHIN 1021 (MIN GRADE 'B-') or CHIN 1010 (MIN GRADE 'B-')

Course Attributes: DSAS Cross-Cult. Awareness General Ed. Requirement, DSAS Social Science General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Contexts: Soc/Behav. GE. Req.

CHIN 1901 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 6

Individual study under the guidance of a department faculty member. For the student whose topic is not covered by regular course work.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: LG/SNC Elective Basis

Course Attributes: Asian Studies

CHIN 1906 - CHINESE INTERNSHIP

Minimum Credits: 1

Maximum Credits: 3

Academic Career: Undergraduate

Course Component: Internship

Grade Component: LG/SNC Elective Basis

Course Attributes: Undergraduate Internship

CHIN 1908 - DIRECTED WRITING FOR MAJORS

Minimum Credits: 1

Maximum Credits: 1

In addition to whatever written assignments are required of those enrolled in the course, this directed writing practicum provides students with an opportunity to contribute writing designed in terms of the intellectual strategies of the course.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: Asian Studies, Writing Intensive Course (WRIT)

CHIN 1909 - FLAC STUDY

Minimum Credits: 1

Maximum Credits: 1

FLAC stands for Foreign Language Across the Curriculum. This course adds a 1-credit Chinese language component to an existing course that is taught in English. For students that enroll in this 1-credit course, content that is studied in the main course in English is reviewed and/or expanded upon in Chinese.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

CHIN 1909 - FLAC STUDY

Minimum Credits: 1

Maximum Credits: 1

FLAC stands for Foreign Language Across the Curriculum. This course adds a 1-credit Chinese language component to an existing course that is taught in English. For students that enroll in this 1-credit course, content that is studied in the main course in English is reviewed and/or expanded upon in Chinese.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

CHIN 1999 - SENIOR PROJECT

Minimum Credits: 3

Maximum Credits: 3

As a summative project for all Chinese majors, the course provides students with guidelines to complete the senior project through integrating culture and language (speaking & writing), traditional & modern Chinese culture as well learning experiences acquired both at Pitt and abroad in china and /or Taiwan. They are to prepare proposals, formulate essay themes in both the English senior essay and the Chinese essay, and determine other formats that can be accepted as supplements: audio-visual, electronic, etc. Also instructs students how to find appropriate resources.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Letter Grade

Course Attributes: Asian Studies, Capstone Course

Civil & Environmental Engineer

CEE 0085 - SOPHOMORE SEMINAR

Minimum Credits: 0

Maximum Credits: 0

Required of all new students in their first year after transferring into the civil and environmental engineering department from freshman engineering or other colleges, the sophomore seminar acquaints the students with the departmental programs in the various civil engineering sub disciplines. It is conducted on weeks alternating with the departmental seminar.

Academic Career: Undergraduate

Course Component: Colloquium

Grade Component: H/S/U Basis

Course Requirements: PROG: Swanson School of Engineering

CEE 0109 - COMPUTER METH IN CIVIL ENGRG 1

Minimum Credits: 3

Maximum Credits: 3

This course emphasizes the mathematics and problem-solving skills necessary to be an intelligent user of a variety of computational tools for engineering analysis. The first portion of the course focuses on linear algebra within the context of engineering problems. Concepts of numerical linear algebra are then introduced, followed by a brief introduction to additional discrete analysis tools such as numerical approximation and signal processing. Lastly, through the introduction of cad software and an individual term project, students are taught how to independently gain familiarity and confidence with engineering software.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: CREQ: (ENGR 0012 or 0712 or 0715 or 0718 or 0016 or ET 0023) and MATH 0240 or 0201 or 0241; PROG: Swanson School of Engineering

CEE 1085 - DEPARTMENTAL SEMINAR

Minimum Credits: 0

Maximum Credits: 0

The departmental seminars are designed to acquaint the student with aspects of the civil engineering profession which are not normally encountered in classes and school activities.

Academic Career: Undergraduate

Course Component: Colloquium

Grade Component: H/S/U Basis

Course Requirements: PROG: Swanson School of Engineering

CEE 1101 - DYNAMICS AND STABILITY

Minimum Credits: 3

Maximum Credits: 3

This is a basic course in dynamics. The course covers kinematics and kinematics of particles, kinetics of systems of particles, work and energy, introduction to vibration, and single-degree-freedom systems. This course also introduces the basic concepts of elastic stability and the approaches used in solving stability problems. Students will learn how to pose the dynamic problems into equations, and solve the problem in different ways. The course will provide the student with a clear and thorough understanding of the applications of dynamics in civil engineering problems.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

CEE 1105 - MATERIALS OF CONSTRUCTION

Minimum Credits: 3

Maximum Credits: 3

The nature, physical properties, including environmental aspects of civil engineering construction materials are discussed. Experimentation, where applicable, is utilized.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: CREQ: ENGR 0141 or 0145 or ET 0051 or 0052; PROG: Swanson School of Engineering

CEE 1106 - NONCONVENTIONAL ENGINEERING MATERIALS

Minimum Credits: 3

Maximum Credits: 3

This course focuses on materials science topics relevant to the application of nonconventional materials in [civil] engineering structures, infrastructure and products. Increasingly, engineers are looking to [often locally-sourced] nonconventional materials to augment or replace resource-intensive conventional engineered materials, such as steel and concrete. This is especially true in resource-scarce regions of the planet. This course will address a broad range of nonconventional materials falling into three categories: i. advanced reinforced polymer composites (GFRP, CFRP, BFRP, pGFRP) and metals (Al and Ti); ii. traditional and vernacular materials such as earth-based materials and bamboo; iii. historic materials (and the repair and restoration thereof); Course deliverables are partially project driven, allowing students to pursue materials issues of interest to their plan or study or research. This course is open to all Engineering and Architecture students (as a technical elective).

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

CEE 1200 - CONSTRUCTION MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

This course introduces undergraduates to the construction management processes including planning, financing, contract administration, and project scheduling and controlling. It is a practical course that provides a broad knowledge of managerial decision-making for young engineers. This is the basic course for all follow-on construction courses.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: Swanson School of Engineering

CEE 1203 - CONSTRUCT PROFSSN DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

This course teaches the student how construction-related organizations (owner, designer, contractor) are organized and managed. The course covers such topics as marketing, TGM, ethics, risk management, and personnel management. The course emphasizes a professional perspective to the practice of construction management and incorporates lectures by practitioners of various professions.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Civil and Environmental Engineering

Course Attributes: Global Studies

CEE 1206 - CONSTRUCTION & COST OF ELECTRICAL SUPPLY

Minimum Credits: 3

Maximum Credits: 3

This course teaches basic construction and cost estimating methodologies for single and three-phase electrical distribution systems that include wiring, power, and controls. The course uses commercial estimating systems and the national electrical code.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: Swanson School of Engineering

CEE 1207 - CONSTRUCTION AND COST OF MECHANICAL SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

This course teaches the student how to plan, organize, and execute mechanical construction operations; and the methodologies for estimating their costs. The course covers mechanical systems such as water (supply and waste), HVAC, fire protection, and their controls.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: Swanson School of Engineering

CEE 1210 - ENGR AND SUSTAINABLE DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

This course is intended as an introductory interdisciplinary engineering course. Topics include principles of sustainable design in engineering, manufacturing, infrastructure, communications, and community development; overview of environmental issues for engineers; design for the environment; models of environmental processes; introduction to the use of life cycle assessment; and case studies examining the relationship of green design and the field of engineering.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: Swanson School of Engineering

Course Attributes: MCSI - Sustainability Related

CEE 1233 - CONSTRUCTION DESIGN PROJECT

Minimum Credits: 3

Maximum Credits: 3

Consists of comprehensive projects with emphasis on the nature of engineering problem solving and creative aspects of design in managerial decision-making of construction in such areas as estimating, scheduling, methods, risk management, and finance.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: CEE 1200 or CET 1152; PROG: Swanson School of Engineering

Course Attributes: Capstone Course

CEE 1323 - PRACTICAL DATA SCIENCE AND MACHINE LEARNING

Minimum Credits: 3

Maximum Credits: 3

This course will introduce data science and machine learning concepts to engineering students and professionals with emphasis on practical engineering applications. Key approaches and techniques for working with applied data science and machine learning with many step-by-step engineering examples, illustrations, and exercises will be presented. The course will cover a range of machine learning methods for classification, clustering and regression including k-nearest neighbors, logistic regression, Naive Bayes, support vector machines, decision trees, neural networks, support vector machines, genetic programming, and deep learning.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

CEE 1325 - INTRODUCTION TO GENERATIVE ARTIFICIAL INTELLIGENCE FOR CIVIL ENGINEERS

Minimum Credits: 3

Maximum Credits: 3

This course provides an in-depth exploration of large language models and their applications in the field of civil engineering. Large language models, such as GPT-3.5, have revolutionized various domains, and this class will equip undergraduate and graduate students with the knowledge and skills to leverage these powerful tools for innovative solutions in civil engineering. From natural language understanding to data analysis and decision support, students will learn how to harness the potential of large language models to tackle real-world civil engineering challenges.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

CEE 1330 - INTRODUCTION TO STRUCTURAL ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

An introduction to linear analysis of statistically determinate, and indeterminate, elastic structural systems.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (MATH 0250 or 0290 or 0202 or 1035) and (ENGR 0141 or 0145 or ET 0053);

PROG: Swanson School of Engineering

CEE 1333 - STRUCTURAL DESIGN PROJECT

Minimum Credits: 3

Maximum Credits: 3

Comprehensive (capstone) structural design project for a building or a bridge, emphasizing conceptual design, design of footings and superstructure, and preparation of cad drawings, a final written and a final oral report.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (CEE 1340 or 1341) or (CET 1111 or 1112) and (ENGR 0151); PROG: Swanson School of Engineering

Course Attributes: Capstone Course

CEE 1335 - DESIGN OF STRUCTURES

Minimum Credits: 3

Maximum Credits: 3

This course will introduce students to the design of building and bridge structures focusing on structural theory, flow of forces, materials selection and selection of structural systems. Structural analysis concepts for a variety of structural types (trusses, frames, plates, membranes and shells) will be introduced or reinforced. Introduction to fundamental structural design in concrete, steel and timber will be affected through design projects.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: CEE 1330- Introduction to Structural Analysis

CEE 1335 - DESIGN OF STRUCTURES

Minimum Credits: 3

Maximum Credits: 3

This course will introduce students to the design of building and bridge structures focusing on structural theory, flow of forces, materials selection and selection of structural systems. Structural analysis concepts for a variety of structural types (trusses, frames, plates, membranes and shells) will be introduced or reinforced. Introduction to fundamental structural design in concrete, steel and timber will be affected through design projects.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

CEE 1340 - CONCRETE STRUCTURES 1

Minimum Credits: 3

Maximum Credits: 3

An introductory concrete design course based on the ACI 318 code. Fundamental topics relating to behavior, strength and design of reinforced concrete beams, one-way slabs, short columns, and footings are presented.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (CEE 1105 or CET 1151) and (CEE 1330 or CET 1111); PROG: Swanson School of Engineering

Course Attributes: MCSI - Sustainability Related

CEE 1341 - DESIGN OF STEEL STRUCTURES

Minimum Credits: 3

Maximum Credits: 3

A course on the design of steel structures based on the load and resistance factor design (LRFD) philosophy. Fundamental topics related to the design of tension members, columns, beams, beam-columns, floor systems, plate girders and steel connections are treated. Issues in stability, fracture and fatigue are also introduced. Prerequisite: CEE 1335

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: CEE 1335; PROG: Swanson School of Engineering

Course Attributes: MCSI - Sustainability Related

CEE 1345 - DESIGN OF TIMBER STRUCTURES

Minimum Credits: 3

Maximum Credits: 3

An introductory course focusing on the design of light-frame timber and 'mass' (or 'heavy') timber structures. Material characterization and properties of wood are addressed including aspects of durability and long-term performance. Fundamental topics related to design of linear (beams and columns) and planar (plates, panels and floors) structural elements are covered. More advanced topics addressed include stability and design of connections. An introduction to fire performance of building structures is included. The course will be focused toward a student-driven design project.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

CEE 1370 - INTRODUCTION TO NONDESTRUCTIVE EVALUATION AND STRUCTURAL HEALTH MONITORING

Minimum Credits: 3

Maximum Credits: 3

The course aims at providing an overview of the different techniques for the nondestructive evaluation (NDE) and the structural health monitoring (SHM) of civil and aerospace structures. Techniques such as electrical resistance strain gauges, fiber optic sensing and ultrasonics will be described within the framework of the NDE. Applications to materials characterization and defect detection will be discussed with emphasis on steel and composite structures. Global and local methods for SHM will be introduced with emphasis on vibration and ultrasonic methods, respectively. The course will also provide the essential tools necessary for the digital signal processing of ultrasonic data. Matlab and laboratory exercises on recent researches will be investigated.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: Swanson School of Engineering

CEE 1371 - STRUCTURAL HEALTH MONITORING

Minimum Credits: 3

Maximum Credits: 3

The course introduces Honors students to the modern paradigm of Structural Health Monitoring (SHM) as it applies to engineering infrastructures and systems with a specific focus on bridges. SHM refers to the implementation of 24/7 nondestructive evaluation (NDE) techniques to detect damage, characterize materials, or to determine non-invasively the static and dynamic response of a given structure to external load such traffic and wind. Typical SHM systems receive and elaborate data from sensors bonded or embedded to the infrastructure or material of interest to establish whether the structure is damaged or if it operates according to design specifications. SHM is a multidisciplinary field that embraces knowledge in areas that include but are not limited to sensors fabrication, signal processing, NDE, materials science, hardware design, and soft computing.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

CEE 1401 - OPEN CHANNEL HYDRAULICS

Minimum Credits: 3

Maximum Credits: 3

Review of the basic principles of open channel flow. Design of flood control channels, riprap, gravity sewer, storm water sewer, grass-lined and natural streams are covered. Design of such hydraulic structures as spillways, stilling basins, drop structures and culverts. Other topics include the hydraulic impact from various encroachments such as from bridges, sediment discharge, scour and the utilization of the HEC-RAS computer program.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: CEE 1402; PROG: Swanson School of Engineering

CEE 1402 - FLUID MECHANICS

Minimum Credits: 3

Maximum Credits: 3

A first course in fluid mechanics discussing basic principles and methods for studying static and dynamic behaviors of fluids. In the laboratory the students conduct experiments on fluid flow in pipes and open channels.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ENGR 0141 and MATH 0240; LVL: Jr or Sr; PROG: Swanson School of Engineering (UENGR)

CEE 1410 - HYDROLOGIC ANALYSIS AND DESIGN

Minimum Credits: 3

Maximum Credits: 3

Basic principles of hydrologic analysis and design. Estimation of missing/bad hydrologic data for analysis. Hydrologic design using the probable maximum flood, reservoir design floods, reservoir storage allocation and reallocation.

Climate variability and impacts on hydrologic design. Hydrologic design using SCS methods, detention pond design, and design of dams. Reservoir reliability for water supply, and reservoir sedimentation. Emergency action plans and response to extreme hydrologic events, ice engineering, and groundwater well design. Dam safety, hydrologic design memorandums and manuals, and portfolio risk assessment for dams and levees. Labs focus on the utilization of various water resources engineering software, i.e. HEC-HMS, TR-55, TR-20, and SWMM; PROG: Swanson School of Engineering

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: CEE 1412; PROG: Swanson School of Engineering

Course Attributes: MCSI - Sustainability Related

CEE 1412 - INTRODUCTION TO WATER RESOURCES ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

Introduction to the basic concepts of surface water hydrology, meteorology, and fields of water resources engineering. Topics include: hydro-meteorological field measurement and computational methods, historical floods and droughts, flood and drought forecasting, groundwater hydrology, statistical analysis of hydrologic data, urban storm water management, irrigation, urban water supply, operational hydrology, water resources projects, water quality as it relates to hydrology, economic aspects of water resources, and introductions into open channel hydraulics and coastal engineering.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (CEE 1102 or 1105 or ENGR 0020 or MATH 1153) and (CEE 1402 or CET 1140);

PROG: Swanson School of Engineering

CEE 1433 - WATER RESOURCES DESIGN PROJECT

Minimum Credits: 3

Maximum Credits: 3

Consists of comprehensive projects with emphasis on the nature of engineering problem solving and the creative aspects of design.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: CEE 1401 or 1410 or 2400 or 2401 or 2405 or 2410; PROG: Swanson School of Engineering

Course Attributes: Capstone Course, MCSI - Sustainability Related

CEE 1503 - INTRO TO ENVIRONMENTAL ENGRNG

Minimum Credits: 3

Maximum Credits: 3

Fundamentals of environmental science and engineering as applied to water and wastewater treatment, air quality control, and solid and hazardous waste management.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: CHEM 0102 or 0112 or 0120 or 0420 or 0720 or 0770 or 0970; PROG: Swanson School of Engineering

Course Attributes: Global Studies, MCSI - Sustainability Related

CEE 1504 - CHEMISTRY IN ENVIRONMENTAL ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

This course will build on fundamentals introduced in CHEM 0960/0970 (chemistry for engineers), applying chemical concepts in the context of environmental science and engineering. Topics covered include chemical kinetics, thermodynamics, and equilibria, organic chemistry, and biochemistry. These concepts will be explored within the primary environmental media, water, soil and air. Students will be expected to work independently and in groups to tackle problem sets, in-class problems, and a class term project. Further, this course serves as a bridge to advanced courses in the environmental engineering curriculum where the concepts introduced will be further applied to understanding important environmental phenomena in CEE 1520 (mass and energy balances in environmental engineering) and CEE 1522 (fate and transport in environmental engineering), and techniques used to analyze environmental samples in CEE 1523 (environmental engineering laboratory).

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

CEE 1505 - WATER TREATMENT AND DISTRIBUTION SYSTEM DESIGN

Minimum Credits: 3

Maximum Credits: 3

Stepwise development and process design, equipment selection, economic evaluation, layout, and operating guidelines for water treatment, storage and distribution systems.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (CEE 1503 and 1402) or CET 1141; PROG: School of Engineering

Course Attributes: Hourly Final

CEE 1513 - ENVIRONMENTAL ENGRNG PROCESSES

Minimum Credits: 3

Maximum Credits: 3

Introduction to basic design concepts applied to water and wastewater treatment, air quality control, and solid and hazardous waste management.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: CEE 1503 or CET 1141; PROG: Swanson School of Engineering

CEE 1514 - ENVIRONMENTAL IMPACT ASSESSMENT

Minimum Credits: 3

Maximum Credits: 3

Technical and procedural aspects of environmental impact analysis and assessment with emphasis on regulatory framework, characterization of impacts and their remediation, and the decision process when applied to engineering systems.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: CEE 1503 or CET 1141; PROG: School of Engineering

CEE 1515 - WASTEWATER COLLECTION AND TREATMENT PLANT DESIGN

Minimum Credits: 3

Maximum Credits: 3

Stepwise development and process design, equipment selection, economic evaluation, layout, and operating guidelines for wastewater collection and treatment systems.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (CEE 1503 and 1402) or CET 1141; PROG: School of Engineering

CEE 1520 - MATERIAL AND ENERGY BALANCES IN ENVIRONMENTAL ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

Introduces students to engineering calculations involving material and energy balances around environmental and chemical processes.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Civil & Environmental Engineering; PREQ: CEE 1503 and MATH 0240 and CHEM 0970

CEE 1522 - FATE AND TRANSPORT IN ENVIRONMENTAL ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

An introduction to the thermodynamic and kinetic drivers of chemical fate in the environment. Processes governing the diffusion, advection and transformation of chemicals in air, water and soil. Inter-media exchange, environmental degradation and uptake into biotic systems.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: CEE 1503; PROG: Swanson School of Engineering

CEE 1523 - ENVIRONMENTAL ENGINEERING LAB

Minimum Credits: 3

Maximum Credits: 3

Physical, Chemical and Biological laboratory procedures for environmental assessment, operation and control of environmental/environmental engineering systems.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: CEE 1503 or CET 1141; PROG: Swanson School of Engineering

Course Attributes: Global Studies, MCSI - Sustainability Related

CEE 1531 - AIR POLLUTION AND CONTROL

Minimum Credits: 3

Maximum Credits: 3

This course covers terminology, scientific principles, control options, regulatory requirements, permitting procedures, testing/modeling techniques and current topics associated with air pollution and control. This course requires quantitative understanding and covers design considerations associated with air pollution and control. It also covers environmental issues and requires an appreciation of the non-technical aspects of air quality management.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

CEE 1533 - ENVRL ENGR DESIGN PROJECT

Minimum Credits: 3

Maximum Credits: 3

Group design of an engineered system for environmental quality control.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: CEE 1505 or 1507 or 1513 or 1515 or (CET 1141 and 1142); PROG: School of Engineering

Course Attributes: Capstone Course, MCSI - Sustainability Related

CEE 1605 - SUSTAINABLE MATERIALS

Minimum Credits: 3

Maximum Credits: 3

Materials are the building block of the natural and built environment. You rely on and interact with materials every day, but have you ever stopped to consider, what is a material? What does it mean to design a material more sustainably? How can you make materials more sustainable and better performing? Answers to these questions, and more, are the foundation for the course. In this course you will learn about sustainable design frameworks (e.g., Green Chemistry, Green Engineering, Cradle-to-Cradle, Biomimicry, Circular Economy) and existing examples of their successful application in markets ranging from consumer electronics, clothing, and personal care products. In addition to these case studies, we will discuss material classes relevant to civil and environmental engineering. The course will be collaborative and highly participatory. In addition, a cornerstone of the class will be a material challenge project. You will work in groups applying what you learn in the course to uncover innovative solutions to currently unsustainable material practices.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

CEE 1609 - LIFE CYCLE ASSESSMENT METHODS AND TOOLS

Minimum Credits: 3

Maximum Credits: 3

This class will introduce students to life cycle thinking and provide engineers with tools to assess the sustainability and environmental impact of a product, process, or activity. Life cycle assessment (LCA) principles, methods, tools, and challenges will be explored throughout the course. Topics include material and energy flow analysis, environmental indicators and metrics for sustainability, case studies of LCA applications, and impact assessment.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: MATH 0140 or 0220 or 0221; PROG: Swanson School of Engineering

CEE 1610 - ENGINEERING AND SUSTAINABLE DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

This course is intended as an introductory interdisciplinary engineering course. Topics include principles of sustainable design in engineering, manufacturing, infrastructure, communications, and community development; overview of environmental issues for engineers; design for the environment; models of environmental processes; introduction to the use of life cycle assessment; and case studies examining the relationship of green design and the field of engineering.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

CEE 1618 - DESIGN FOR THE ENVIRONMENT

Minimum Credits: 3

Maximum Credits: 3

The course begins with an introduction to sustainability, design frameworks, the design process and the role of innovation, followed by how to assess toxicity and risk, systems thinking, and metrics to evaluate and quantify the sustainability of alternatives. The second half of the course will introduce students to designing appropriate technologies within the context of the developing world as well as a series of relevant case studies (e.g., energy, water, agriculture, nanotechnology). Throughout the semester, students will apply what they learn in class to the development of an innovative solution to a real-world sustainability challenge. The course integrates active learning components that provide students the opportunity to exercise the engineering design process, work effectively in a group, and practice written and oral presentation skills.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: Swanson School of Engineering

Course Attributes: MCSI - Sustainability Related

CEE 1700 - TRAFFIC MANAGEMENT AND OPERATIONS

Minimum Credits: 3

Maximum Credits: 3

Introduction to traffic flow theory and characteristics. Highway capacity analysis. Basic traffic management and control.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade
Course Requirements: PROG: Swanson School of Engineering

CEE 1703 - TRANSPORTATION ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

Introduction to the design, planning, operation, management, and maintenance of transportation systems. Transportation planning inter-modal transportation systems (highway, air, rails, etc.). Transportation planning of highways, airports, and railroads with traffic flow models, capacity analysis, and safety. Concepts for designing facilities and systems area study with life cycle costing procedures and criteria for optimization.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: MATH 0240 or 0201 or 0241; PROG: Swanson School of Engineering

CEE 1704 - LAND DATA ANALYTICS

Minimum Credits: 3

Maximum Credits: 3

An Introduction to Land Surveying and Development for Civil Engineers. Topics include property and construction surveying plus land development and highway engineering. Students will learn how to utilize Surveying and other Land Data for all design disciplines in Civil Engineering.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: MATH 0240; PLAN: Civil & Environmental Engineer

CEE 1710 - TRAFFIC CONTROL SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

A range of traffic control systems including the analysis and design of traffic signals are discussed along with traffic signal systems. Other topics covered include data collection for traffic control systems, optimization software and models; traffic signal hardware design; traffic signal systems selection (adaptive traffic signal systems versus traditional systems) and design and implementation. Pre-requisite CEE 1703 for 1710 and CEE 2700 for 2710

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: Swanson School of Engineering

CEE 1711 - ADVANCED TRANSPORTATION MANAGEMENT STRATEGIES

Minimum Credits: 3

Maximum Credits: 3

This is a management-oriented course that covers key aspects of how government transportation agencies operate their transportation systems. Focus is on the strategies that are used to improve public safety and mobility, including traffic incident management, traffic management, traveler information and pricing. Emphasis is also placed on processes, including planning, performance management and systems engineering, that agencies apply in advancing programs and projects. The course concludes with a look at the future, including the effects that automated vehicles and Smart City concepts will have on the future of transportation.

Academic Career: Undergraduate

Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PROG: Swanson School of Engineering

CEE 1712 - DIGITALIZATION IN CIVIL ENGINEERING: FROM CAD TO VIRTUAL REALITY

Minimum Credits: 3

Maximum Credits: 3

Course Description: This course will introduce students to the fundamentals of technical drawing and the modern tools utilized in drafting, modeling, and 3-D visualization for Civil Engineering applications. Topics will include technical drawing and engineering graphics, Computer-Aided Design (CAD), Building Information Modeling (BIM) and modern Virtual Reality (VR) applications in Civil Engineering. More specifically, students will: 1. Gain fundamental knowledge in technical drawing and engineering graphics. 2. Become proficient in modern drafting and modeling software tools for Civil Engineering applications. 3. Gain an understanding of the required workflows for data exchange between 3-D modeling software and immersive Virtual Reality simulations.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

CEE 1714 - PAVEMENT DESIGN AND ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

Concepts and principles in the structural design of pavements for highways and airfields including: traffic loads, climatic factors, soil and material characterization. Application of current pavement design practices and procedures. Economic evaluation of highway and airport pavements.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: CEE 1105 and 1811; PROG: Swanson School of Engineering

CEE 1715 - PAVEMENT MAINTENANCE AND REHAB

Minimum Credits: 3

Maximum Credits: 3

Engineering concepts and information needed to maintain and rehabilitate pavements. Project evaluation, testing and analysis. Design of rigid and flexible overlays, and other methods of rehabilitation. Selection of rehabilitation alternatives. Analysis of the effects of maintenance activities on pavement performance. Initial and life cycle cost analysis of various rehabilitation alternatives.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: CEE 1105 or CET 1151; PROG: Swanson School of Engineering

CEE 1716 - PAVEMENT CONSTRUCTION

Minimum Credits: 3

Maximum Credits: 3

This course teaches the students the theory and practice of constructing highway and airfield pavements and associated construction management responsibilities. The students will learn how pavements are constructed, including earthwork, base and subbase construction, and the paving of the concrete and asphalt surface layers. The course also covers the

impact of construction quality on long-term pavement performance and modern methods utilized for construction quality control.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

CEE 1717 - COMPONENTS, PROPERTIES AND DESIGN OF PORTLAND CEMENT CONCRETE

Minimum Credits: 3

Maximum Credits: 3

Examines the influence of constituent materials (cements, aggregates and admixtures) on the properties of fresh and hardened concrete, mix design handling and placement of concrete; and behavior of concrete under various types of loading and environment; test methods, designing concrete mixes for specific applications.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: CEE 1105 or CET 1151; PROG: Swanson School of Engineering

CEE 1718 - ADVANCED CONSTRUCTION AND BITUMINOUS MATERIALS

Minimum Credits: 3

Maximum Credits: 3

Advanced construction and bituminous materials soils, soil stabilization, aggregates, bituminous materials and mixtures. Advanced topics in selection and design of bituminous materials. Asphalt cement, rheology, emulsions, chip seals, hot-mix asphalt design, visco-elasticity characterization

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: CEE 1105 or CET 1151; PROG: School of Engineering

CEE 1720 - URBAN TRANSPORTATION PLANNING

Minimum Credits: 3

Maximum Credits: 3

All aspects of the transportation planning process including transportation planning and decision making, transportation modeling, demand and supply analysis, transportation studies, environmental issues and project implementation.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: CEE 1703; PROG: Swanson School of Engineering

CEE 1725 - PUBLIC TRANSPORTATION SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

This course is designed to give seniors and graduate students a basic background in the planning, operations and development of public transportation systems within the context of the overall transportation system.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: CEE 1703; PROG: Swanson School of Engineering

CEE 1730 - HIGHWAY ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

Highway administration, classification, planning and programming. Geometric design of highways. Traffic characteristics and capacity analyses. Traffic operations and control. Highway design project.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: CEE 1703; PROG: Swanson School of Engineering

CEE 1733 - TRANSPORTATION DESIGN PROJECT

Minimum Credits: 3

Maximum Credits: 3

Consists of comprehensive projects with emphasis on the nature of engineering problem solving and the creative aspects of design.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: CEE 2700; PROG: Swanson School of Engineering

Course Attributes: Capstone Course

CEE 1750 - PROJECT DEVELOPMENT AND IMPLEMENTATION

Minimum Credits: 3

Maximum Credits: 3

Project development and implementation - 3 credits: this course provides overview of the process used in project programming and planning, design, construction and operation. The course will emphasize the process used for implementation of major projects with emphasis on construction management and how that task interfaces with other aspects of project development. Students will be involved in a team effort to conceptualize the project, plan alternatives, determine the environmental impact, examine design alternatives, prepare the project for construction documents, recommend award of the contract, manage the contract during construction and determine operational needs of the project.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: CEE 1703; PROG: Swanson School of Engineering

CEE 1800 - ENGINEERING GEOLOGY

Minimum Credits: 3

Maximum Credits: 3

Review of basic geologic principles with emphasis on the importance and influence of geology and geologic processes on engineering projects such as dam sites, foundations, tunnels, mine subsidence, landslides, highways, groundwater problems, and seismic studies.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: Swanson School of Engineering

CEE 1802 - GEOTECHNICAL ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

Fundamentals of the analytical and numerical methods in geotechnical engineering are explored. Emphasis will be placed upon implementation and verification of various formulations into basic programs. Seepage, stress distribution, settlement, consolidation, sheet piling wall, and beams on elastic foundations are some of the topics covered.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

CEE 1809 - HYDRAULIC FRACTURING MECHANICS

Minimum Credits: 3

Maximum Credits: 3

This class will prepare students to wisely and critically design hydraulic fracturing treatments as well as make informed recommendations to employers, governments, and communities about the risks and benefits of hydraulic fracturing methods. Upon completion of this course, students will be equipped to use engineering formulae to estimate hydraulic fracture dimensions, evaluate strengths and weaknesses of various modeling approaches, characterize subsurface conditions from wellbore pressure analysis, make sound recommendations for monitoring, and compare and contrast approaches and risks for a range of application domains.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: CEE 1330 and 1402; PROG: Swanson School of Engineering

CEE 1811 - PRINCIPLES OF SOIL MECHANICS

Minimum Credits: 3

Maximum Credits: 3

Basic soil properties, permeability, capillarity and frost action, compaction, stresses in soil masses, two-dimensional seepage, compressibility, stress-strain-time behavior, and shear strength.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ENGR 0141 or 0145 or ET 0053; PROG: Swanson School of Engineering

CEE 1821 - FOUNDATION ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

Application of the principles of soil mechanics to the analysis and design of foundations, the stability of slopes and retaining structures.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (CEE 1811 or CET 1131) and CEE 1330; PROG: School of Engineering

CEE 1833 - GEOTECHNICAL DESIGN PROJECT

Minimum Credits: 3

Maximum Credits: 3

Consists of comprehensive projects with emphasis on the nature of engineering problem solving and the creative aspects of design.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: CEE 1714 or 1715 or 1821 or 2814 or CET 1124 or 1131; PROG: Swanson School of Engineering

Course Attributes: Capstone Course

CEE 1996 - SPECIAL PROJECTS

Minimum Credits: 1

Maximum Credits: 4

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Letter Grade

CEE 2106 - NONCONVENTIONAL ENGINEERING MATERIALS

Minimum Credits: 3

Maximum Credits: 3

This course focuses on materials science topics relevant to the application of nonconventional materials in [civil] engineering structures, infrastructure and products. Increasingly, engineers are looking to [often locally-sourced] nonconventional materials to augment or replace resource-intensive conventional engineered materials, such as steel and concrete. This is especially true in resource-scarce regions of the planet. This course will address a broad range of nonconventional materials falling into three categories: i. advanced reinforced polymer composites (GFRP, CFRP, BFRP, pGFRP) and metals (Al and Ti); ii. traditional and vernacular materials such as earth-based materials and bamboo; iii. historic materials (and the repair and restoration thereof); Course deliverables are partially project driven, allowing students to pursue materials issues of interest to their plan or study or research. This course is open to all Engineering and Architecture students (as a technical elective).

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: CEE 1105 or ENGR 0022; CEE and ENGR Undergraduates must have at least 75 credit hours completed and a GPA greater than 3.2.; BS (Architecture) students may take course with permission

CEE 2201 - CONSTRUCTION COST ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

This course teaches the methodology for estimating construction costs. The course covers all types of costs and all types of construction. The student is introduced to standard reference materials and to computerized estimating systems. The course teaches methods and procedures for developing accurate estimates and the basis for follow-on cost control.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Graduate School of Engineering

CEE 2202 - CONSTRUCTION SCHEDULING

Minimum Credits: 3

Maximum Credits: 3

This course teaches the student the theory and practice of planning, scheduling, and controlling the time and cost of

construction projects. The course covers various advanced techniques such as cost duration analysis, critical resource analysis, stochastic modeling, and cost control. The course teaches the use of contemporary computerized software systems with hands-on application.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Graduate School of Engineering

CEE 2203 - CONSTRUCT METHODS AND EQUIPMENT

Minimum Credits: 3

Maximum Credits: 3

This course teaches the student how to plan, organize, and execute construction operations. The course includes typical operations in both building construction and engineering construction. The course describes how to properly construct in order to achieve quality and productivity objectives.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Graduate School of Engineering

CEE 2204 - CONSTRUCTION LAW AND RISK MGMNT

Minimum Credits: 3

Maximum Credits: 3

This course introduces the student to the legal and risk management issues in construction. The course covers the principles of contract law and various legal areas affecting construction such as environmental regulations, insurance, bonds, tort liability, dispute resolution, and professional services.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Graduate School of Engineering

CEE 2205 - CONSTRUCT FINANCE & COST CONTROL

Minimum Credits: 3

Maximum Credits: 3

This course introduces the student to the company level financial and accounting systems which are used in the construction industry, and to project control systems which are used to manage cost and time. The course includes such topics as financial accounting, cost accounting, financial statements, and variance analysis.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Graduate School of Engineering

CEE 2206 - CONSTRUCT & COST OF ELEC SUPPLY

Minimum Credits: 3

Maximum Credits: 3

This course teaches basic construction and cost estimating methodologies for single and three-phase electrical distribution systems that include wiring, power, and controls. The course uses commercial estimating systems and the national electrical code.

Academic Career: Graduate

Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering

CEE 2207 - CONSTRUCT & COST OF MECHL SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

This course teaches the student how to plan, organize, and execute mechanical construction operations; and the methodologies for estimating their costs. The course covers mechanical systems such as water (supply and waste), HVAC, fire protection, and their controls.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Graduate School of Engineering

CEE 2213 - CONSTRUCTION SAFETY

Minimum Credits: 3

Maximum Credits: 3

Safety is an integral and essential element of the construction industry. This course will teach students the role all personnel play in establishing an effective safety culture in order to achieve a goal of reducing and eliminating worker injuries and illnesses. Industry standards established by OSHA and ANSI will be highlighted. Additionally, the financial impact that accidents have on a company will be taught.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

CEE 2230 - BUILDING INFORMATION MODELING

Minimum Credits: 3

Maximum Credits: 3

The goal of this course is to introduce the students to building information modeling (BIM) and other new and evolving technologies which are revolutionizing the building and horizontal infrastructure construction industry. Students will learn how BIM and other innovative technologies are being adopted currently by progressive builders to streamline the construction process through enhanced coordination, visualization, logistical planning, cost estimation and analysis. They will also learn how these new tools are enabling (and in some instances requiring) new highly integrated processes that are redefining architecture, engineering, construction and operations (AECO) business relationships and delivery contracts.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

CEE 2320 - ADVANCED MECHANICS OF MATERIALS

Minimum Credits: 3

Maximum Credits: 3

The fundamentals of elasticity are introduced and related to various problems such as beams and bars on elastic foundations, unsymmetrical bending, torsion of thin walled members, curved bars, failure theories, and stability.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Graduate School of Engineering

CEE 2321 - ELASTICITY, PLASTICITY AND FRACTURE MECHANICS

Minimum Credits: 3

Maximum Credits: 3

This course provides first-year graduate students with the fundamentals regarding mathematical derivations, mechanical models and numerical analyses in elasticity, plasticity and fracture mechanics. It is aimed at laying the foundations for the students for their future study and research in advanced mechanical problems. The main topics of this course includes: 1) equilibrium and compatibility in elastic domains; 2) complex potential method for elasticity problems; 3) plasticity fundamentals; 4) linear elastic fracture mechanics; 5) stress intensity factors; 6) cohesive crack model and crack band model; 7) size effect and scaling; 8) probabilistic fracture mechanics; and 9) micromechanics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

CEE 2330 - ADVANCED STRUCTURAL ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

Theory and application of matrix stiffness and flexibility methods for analysis of framed structures. Computer implementation for the solution of two- and three-dimensional frames, trusses, and grid systems.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Graduate School of Engineering

CEE 2333 - INTRODUCTION TO FINITE ELEMENTS

Minimum Credits: 3

Maximum Credits: 3

Introduction to the finite element method and its application to various problems of elastic elements and structures. Both physical and variational approaches are used.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Swanson School of Engineering

CEE 2340 - CONCRETE STRUCTURES 2

Minimum Credits: 3

Maximum Credits: 3

Advanced behavior, strength and design of reinforced concrete structures, including column and frame stability effects, two-way slabs, and serviceability criteria. Introduction to earthquake design concepts.

Academic Career: GRAD

Course Component: Lecture

Grade Component: Grad LG/SNC

Course Requirements: PROG: Graduate School of Engineering

CEE 2341 - STEEL STRUCTURES 2

Minimum Credits: 3

Maximum Credits: 3

Advanced design criteria for steel structures, including composite beams, columns, and frames; member and system stability; first- and second- order analysis of frames; and serviceability criteria.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Graduate School of Engineering

CEE 2343 - PRESTRESSED CONCRETE

Minimum Credits: 3

Maximum Credits: 3

Design of prestressed concrete beams and slabs, including shear and torsion effects.

Academic Career: GRAD

Course Component: Lecture

Grade Component: Grad LG/SNC

Course Requirements: PROG: Graduate Engineering Students

CEE 2345 - DESIGN OF TIMBER STRUCTURES

Minimum Credits: 3

Maximum Credits: 3

An introductory course focusing on the design of light-frame timber and 'mass' (or 'heavy') timber structures. Material characterization and properties of wood are addressed including aspects of durability and long-term performance.

Fundamental topics related to design of linear (beams and columns) and planar (plates, panels and floors) structural elements are covered. More advanced topics addressed include stability and design of connections. An introduction to fire performance of building structures is included. The course will be focused toward a student-driven design project.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

CEE 2346 - REPAIR AND RETROFIT OF STRUCTURES

Minimum Credits: 3

Maximum Credits: 3

Introduction and use of performance-based design concepts. Analysis and modeling techniques for existing and repaired structures. Gravity and lateral load retrofit procedures. Selection, modeling and design of repair and/or retrofit measures for a variety of structures and building materials. Retrofit for blast loads.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Swanson School of Engineering

CEE 2347 - BRIDGE ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

Introduce concepts of bridge engineering by providing the students with the necessary knowledge and skills to apply the AASHTO IRFD specifications for the analysis and design of highway bridge superstructure components.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Swanson School of Engineering

CEE 2350 - MACHING LEARNING IN INFRASTRUCTURE ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

This course covers theory and practical algorithms in machine learning from a variety of perspectives, with applications to solve problems in civil infrastructure engineering. The topics include linear methods for regression and classification, regularization, kernel smoothing methods, bayesian inference, sampling, decision tree learning, support vector machines, statistical learning methods, unsupervised learning and deep learning, as well as their field applications. This course is designed to give graduate-level students a thorough grounding in methodologies, technologies and algorithms in machine learning and push field applications in, but not limited to, civil infrastructure engineering.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

CEE 2360 - DYNAMICS OF STRUCTURES

Minimum Credits: 3

Maximum Credits: 3

Fundamentals of free and forced vibration of one and multi degree of freedom structures, including damping. Matrix formulation of multi-degree of freedom structures. Analytical and numerical methods for determining response; deflection and stress evaluation including damping effects.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Swanson School of Engineering

CEE 2401 - OPEN CHANNEL HYDRAULICS

Minimum Credits: 3

Maximum Credits: 3

Basic theories and principles of open channel flows (including flows in rivers and streams). Methods of calculating uniform flow, gradually varied flow, rapidly varied flow, and unsteady flow. Design of open channels.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Graduate Engineering Students

CEE 2410 - WATER RESOURCES ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

This course addresses fundamental and practical issues of water resources engineering. The increasing demand for sufficient water quantity and quality that is distributed in time and space forces engineers and policy makers to develop more comprehensive, complex, and ambitious plans for environmental and water systems. This course emphasizes understanding, formulating, and approaches of solving problems of water resources engineering. Quantitative overview of the water resources development, water resources problems, impacts of climate variability and global warming on water resources, and the fundamental principles and basic tools to solve these problems will be covered. Topics to be discussed also include introduction to basic concepts of hydrology, GIS (Geographic Information Systems)

applications, theory of unit hydrograph, frequency analysis, flood routing through reservoirs and rivers, introduction to rainfall-runoff analyses, and watershed modeling.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Graduate Engineering Students

Course Attributes: MCSI - Sustainability Related

CEE 2500 - ENVRNMNTL ENGRG MICROBIOL

Minimum Credits: 3

Maximum Credits: 3

Biological fundamentals as applied to the description and evaluation of natural environments and environmental quality control systems.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Graduate School of Engineering

CEE 2501 - ENVIRONMENTAL ENGINEERING CHEMISTRY

Minimum Credits: 3

Maximum Credits: 3

Chemical fundamentals as applied to the description and evaluation of natural environments and environmental quality control systems.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Graduate School of Engineering

CEE 2502 - PHYSICAL-CHEMICAL PRINCIPLES IN ENVIRONMENTAL ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

Basic principles and applications of thermodynamics, reaction kinetics, equilibria, diffusion, and mass transfer.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Graduate School of Engineering

CEE 2507 - INDUSTRIAL WASTE MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

Problems and approaches to industrial waste treatment and disposal, pollution prevention and sustainability, waste minimization, process selection, control, and resource recovery.

Academic Career: GRAD

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Graduate School of Engineering

CEE 2513 - ENVIRONMENTAL IMPACT ASSESSMENT

Minimum Credits: 3

Maximum Credits: 3

Technical and procedural aspects of environmental impact analysis and assessment with emphasis on regulatory framework, characterization of impacts and their remediation, and the decision process when applied to engineering systems.

Academic Career: GRAD

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Graduate School of Engineering

CEE 2609 - LIFE CYCLE ASSESSMENT METHODS AND TOOLS

Minimum Credits: 3

Maximum Credits: 3

Life cycle assessment (LCA) is a tool for evaluating the environmental impacts of a product or process by documenting energy and material flows from inception to ultimate disposal. This course teaches framework, methods, and tools that can be applied to decision making in the design, construction, operation, and maintenance of the built environment. Topics include the principles of life cycle assessment, case studies of applications of life cycle assessment, methods for life cycle inventory, and methods for life cycle impact assessment. The course aims to encourage systems thinking and to facilitate life cycle applications to graduate students' individual research topics. Students can expect to develop a project and paper applying LCA to their research topic. In most cases, students will produce a publishable journal article at the end of the semester.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

CEE 2717 - COMPONENTS, PROPERTIES AND DESIGN OF PORTLAND CEMENT CONCRETE

Minimum Credits: 3

Maximum Credits: 3

Examines the influence of constituent materials (cements, aggregates and admixtures) on the properties of fresh and hardened concrete, mix design handling and placement of concrete; and behavior of concrete under various types of loading and environment; test methods, designing concrete mixes for specific applications.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Graduate School of Engineering

CEE 2801 - ADVANCED SOIL MECHANICS

Minimum Credits: 3

Maximum Credits: 3

Mathematical and graphical operations on stress and strain, seepage analysis and flow net, consolidation theory, upper and lower bound analysis, earth pressure theory, bearing capacity, and plasticity based soil models.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Graduate School of Engineering

CEE 2802 - GEOTECHNICAL ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

Fundamentals of the analytical and numerical methods in geotechnical engineering are explored. Emphasis will be placed upon implementation and verification of various formulations into basic programs. Seepage, stress distribution, settlement, consolidation, sheet piling wall, and beams on elastic foundations are some of the topics covered.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Graduate School of Engineering

CEE 2814 - SLOPES & EARTH RETAINING STRUCT

Minimum Credits: 3

Maximum Credits: 3

Conventional methods and recent advances in slope stability analyses; classical and modern earth pressure theories; design of rigid and flexible retaining structures; earth dams, their design and stability.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Graduate School of Engineering

CEE 2818 - ADVANCED FOUNDATION ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

Subsurface exploration and control of groundwater; current procedures for the analysis, design, and construction of waterfront structures and shallow and deep foundations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: CEE 2801; PROG: Swanson School of Engineering

Classics

CLASS 0010 - GREEK CIVILIZATION

Minimum Credits: 3

Maximum Credits: 3

A general introduction to the culture and society of Ancient Greece, with emphasis on the Archaic Period and the fifth and fourth centuries B.C.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Geographic Region General Ed. Requirement, Medieval & Renaissance Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req., West European Studies

CLASS 0020 - ROMAN CIVILIZATION

Minimum Credits: 3

Maximum Credits: 3

A general introduction to the culture and society of the Roman world, with emphasis on the period of the republic and the early empire.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Geographic Region General Ed. Requirement, Medieval & Renaissance Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req., West European Studies

CLASS 0030 - MYTHOLOGY IN THE ANCIENT WORLD

Minimum Credits: 3

Maximum Credits: 3

This course examines in cultural context the traditional stories--myth, legend, and folktale--of the ancient Greeks and Romans. Theories drawn from various disciplines are critically evaluated. Attention to connections with ritual practice and to expression in daily life, art, architecture, etc.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Childrens Literature, DSAS Geographic Region General Ed. Requirement, Medieval & Renaissance Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req., West European Studies

CLASS 0032 - ATHLETICS OF THE ANCIENT WORLD

Minimum Credits: 3

Maximum Credits: 3

This course examines athletic competition, popular games, gladiatorial and other exhibitions of the ancient Greeks and Romans. Much emphasis on the social/cultural context and underlying values. Attention to relevant artistic archaeological, and historical settings.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Attributes: DSAS Geographic Region General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

CLASS 0034 - WOMEN AND MEN IN ANCIENT MEDITERRANEAN

Minimum Credits: 3

Maximum Credits: 3

An examination of ancient Mediterranean society, particularly that of Greece and Rome, from the perspective of male and female gender roles.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Geographic Region General Ed. Requirement, Gender, Sexuality & Women's St, SCI Polymathic Contexts: Global&Cross Cul GE. Req., West European Studies

CLASS 0035 - WOMEN AND MEN ANCIENT MEDITERRANEAN/WRITING PRACTICUM

Minimum Credits: 1

Maximum Credits: 1

Writing practicum for students taking class 0034 as a writing course.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: West European Studies, Writing Intensive Course (WRIT)

CLASS 0037 - MYTH IN ANCIENT WORLD/WRITING PRACTICUM

Minimum Credits: 1

Maximum Credits: 1

Writing practicum for students taking class 0030 as a writing course.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: Writing Intensive Course (WRIT)

CLASS 0040 - SEX AND LOVE IN ANCIENT LITERATURE

Minimum Credits: 3

Maximum Credits: 3

This course investigates representations of sex and romantic love in ancient Greece and Rome, considering how ancient literature treats issues like marriage and infidelity, sex work and slavery, homosociality and homosexuality, and consent and rape. We will engage with a variety of genres of ancient literature, from epic and lyric poetry, to drama and philosophy, to funerary epitaphs, handbooks, and novels. We will read the canonical literature of "dead white men," alongside women writers like Sappho and Sulpicia, as well as documentary texts, especially curse tablets and funerary monuments, that paint a picture of lived experiences in the ancient world. We will also read selections from post-classical literature to explore how modern ideas about love, sex, beauty, and desire have been shaped by their representation in ancient texts.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

CLASS 0100 - MASTERPIECES GREEK AND ROMAN LITERATURE

Minimum Credits: 3

Maximum Credits: 3

An introduction to the critical analysis of literary works through the medium of selected masterpieces of Greek and Roman literature in English translation.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Literature General Ed. Requirement, Medieval & Renaissance Studies, SCI Polymathic Contexts: Humanistic GE. Req., West European Studies

CLASS 0105 - ART AND EMPIRE

Minimum Credits: 3

Maximum Credits: 3

This course is an introductory survey of the art and architecture of historic imperial powers. Rather than viewing the phenomenon of empire as it is reconstructed from texts, this survey will emphasize the comparative cultural profiles of these empires as they are known from visual evidence. The course will examine the imagery, artifacts, monument types and architectural sites that were made to advertise the success and promote the continuity of the regime beyond the lifetime of its founder, the use of regional themes to establish continuity with the historical past, and the cultural impact of empires on those who belonged to them and those who did not. A broad range of imperial powers will be explored, from the ancient Mediterranean world through the upheavals of the 20th century.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

CLASS 0300 - HISTORY OF ANCIENT PHILOSOPHY

Minimum Credits: 3

Maximum Credits: 3

The aim of this course is to introduce students to some of the main achievements and leading ideas of Greek philosophy up to classical times. Emphasis will be on understanding and evaluating the arguments and ideas of the Greek philosophical tradition.

Academic Career: Undergraduate

Course Component: Department of Classics

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: Medieval & Renaissance Studies, SCI Polymathic Contexts: Ethical/Policy GE. Req., West European Studies, Writing Intensive Course (WRIT)

CLASS 0302 - HISTORY ANCIENT PHILOSOPHY/WRITING PRACTICUM

Minimum Credits: 4

Maximum Credits: 4

The aim of this course is to introduce students to some of the main achievements and leading ideas of Greek philosophy up to classical times. Emphasis will be on understanding and evaluating the arguments and ideas of the Greek philosophical tradition. Special writing component for CLASS 0300, "History of Ancient Philosophy".

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: SCI Polymathic Contexts: Ethical/Policy GE. Req., Writing Intensive Course (WRIT)

CLASS 0330 - MYTH AND SCIENCE

Minimum Credits: 3

Maximum Credits: 3

The Greeks in the sixth to fourth century B.C. Initiated forms of thinking we have from then on called "scientific" and "philosophical". This course examines the question of how science is distinguished from "non-science" by studying the role of myth and science in ancient Greece. The aim is to understand what distinguishes the ideas of the first scientists and philosophers from those earlier beliefs called myth.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Global Studies, Medieval & Renaissance Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req., West European Studies

CLASS 0400 - ANCIENT EMPIRES

Minimum Credits: 3

Maximum Credits: 3

Empires dominate and control resources over broad geographical areas, establishing systems (administrative, religious, and intellectual) to perpetuate and justify that control. The course will survey the archaeological remains of the principal empires of the ancient near East and Mediterranean, emphasizing both the modes of control and the themes or messages used to justify it.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS The Arts General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Contexts: Humanistic GE. Req., SCI Polymathic Contexts: Soc/Behav. GE. Req.

CLASS 0500 - ANCIENT ART

Minimum Credits: 3

Maximum Credits: 3

The Mediterranean Sea is a lake and its shores have produced many important cultures and artistic traditions. The course will survey the artistic traditions of Turkey and the near east, Egypt, Greece and Rome. Special attention will be paid to (1) the relationship between the artistic traditions of individual areas and the societies which produced them, and (2) the way in which influences from one culture were transformed by another.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS The Arts General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Contexts: Humanistic GE. Req., West European Studies

CLASS 0600 - INTRODUCTION TO MEDITERRANEAN ARCHAEOLOGY

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Attributes: DSAS Geographic Region General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

CLASS 0618 - DEATH IN THE ANCIENT WORLD

Minimum Credits: 3

Maximum Credits: 3

The death of a loved one is an emotional and powerful occurrence that provokes a variety of human responses. In addition to writings describing their funerary practices, the civilizations of the ancient Mediterranean region have left artistic representations of death and dying, built tombs, and objects associated with funerary rituals. The study of these texts, images, structures, and objects allows us to better understand ancient attitudes and reactions to death. This undergraduate lecture focuses on the visual and material evidence of funerary practices and beliefs in ancient Egyptian, Greek, and Roman societies. The subject will be approached thematically. First, we will explore how archaeologists

discover death-related artifacts and how scholars approach the study and reconstruction of ancient death rituals. Ancient practices and beliefs regarding the mummification, the funeral, commemorative strategies, visits to the grave, and the afterlife will be explored, and images found on specific media (vases, sculpture, built tombs, paintings) will be discussed in depth. The course will conclude with discussions of the roles that sensational topics, like fear of the undead (zombies, vampires, and ghosts) and spectacles of death (gladiatorial contests and public executions), played in ancient Mediterranean civilizations.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Geographic Region General Ed. Requirement, DSAS The Arts General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Contexts: Humanistic GE. Req.

CLASS 0650 - ARCHAEOLOGY OF THE BODY

Minimum Credits: 3

Maximum Credits: 3

This interdisciplinary undergraduate course explores the archaeological evidence of the human body in various Mediterranean civilizations.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Geographic Region General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

CLASS 0700 - ENVIRONMENTAL CLASSICS

Minimum Credits: 3

Maximum Credits: 3

The ongoing degradation and destruction of our natural environment, driven to a large extent by human factors, is often defined in terms of the loss of biodiversity, the collapse of ecosystems, and climate change. This course will focus on the attitudes and views espoused by human agents that led to these phenomena. We will study the history of human relationships with the natural environment in antiquity (ca. 2800 BCE- 400CE) to ask how we may usefully approach ancient thinkers and ideas in a way that allows us to gain a thorough understanding of our present situation, and to evaluate contemporary perspectives and strategies. Ancient readers of King Gilgamesh's conquest of nature, of the Old and New Testament, and of the various treatises, poems, and stories by Greek and Roman writers like Plato, Aristotle, Pliny, and Virgil, could not have envisaged the scale of human impact on the earth in the twenty-first century. Nevertheless, they were acutely aware that they existed as a part of an ecological system. Trying to make sense of the environment in which they found themselves led to broader questions about our human identity and its role in the natural world. We find in the writings of ancient thinkers many questions that are resurfacing in the current debate on environmental ethics: To what extent does true human flourishing require the consumption of material resources? Should a sense of community extend to the land in which we live? What happens if we envisage our natural environment as an independent moral agent? Are we justified in controlling and dominating parts of our environment, or specific types of living creatures? What are the connections between the well-being of the land and social justice? We will examine these questions against their historical background and explore strategies to negotiate current perspectives in a meaningful way.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Literature General Ed. Requirement, DSAS Phil. Think or Ethics General Ed. Requirement, SCI Polymathic Contexts: Ethical/Policy GE. Req., SCI Polymathic Contexts: Humanistic GE. Req.

CLASS 1022 - THE AUGUSTAN AGE

Minimum Credits: 3

Maximum Credits: 3

A survey of the political, intellectual, literary, and artistic achievements of Rome in the time of Augustus.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Geographic Region General Ed. Requirement, DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Contexts: Humanistic GE. Req.

CLASS 1050 - COMPUTER METHODS IN THE HUMANITIES

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to the use of computational modeling and programming to conduct the text-based research in the humanities. Course goals include 1) learning how to identify research questions in the humanities that are amenable to computational systems to explore those questions. No prior programming experience or knowledge of foreign languages required.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

CLASS 1060 - GREEK AND LATIN ELEMENTS IN ENGLISH

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the semantic elements which have come into English from the classical languages, Greek and Latin. In addition, it provides a general introduction to the history of English and its relationship to other Indo-European languages.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

CLASS 1065 - ORIGINS OF MEDICAL & SCIENTIFIC TERMINOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course is intended to increase students' knowledge of medical and scientific terminology through the study of Latin and Greek roots (no prior knowledge of Latin or Ancient Greek required). Although majors in the sciences will directly benefit from the course, all students, regardless of their disciplines, will gain understanding of the English language and will increase their vocabulary and ability to figure out unknown words through the tools of etymology. In addition, we will periodically veer into the realm of Greek and Roman history, culture, and mythology - especially as it relates to the field of ancient science and health care.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

CLASS 1090 - TOPICS IN CLASSICAL CULTURE

Minimum Credits: 3

Maximum Credits: 3

Study of selected topics in Greco-Roman culture.

Academic Career: Undergraduate

Course Component: Lecture
Grade Component: Letter Grade
Course Attributes: West European Studies

CLASS 1130 - CLASSICAL MYTHOLOGY AND LITERATURE

Minimum Credits: 3

Maximum Credits: 3

This course examines how authors of classical antiquity used the traditional figures and stories of their culture's mythology as material for works of literature.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Childrens Literature, DSAS Geographic Region General Ed. Requirement, DSAS Literature General Ed. Requirement, Medieval & Renaissance Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Contexts: Humanistic GE. Req., West European Studies

CLASS 1140 - GREEK TRAGEDY

Minimum Credits: 3

Maximum Credits: 3

Study of representative plays by the three great tragic dramatists of ancient Greece; Aeschylus, Sophocles, and Euripides. All readings are in English translation.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req., West European Studies

CLASS 1142 - ANCIENT EPIC

Minimum Credits: 3

Maximum Credits: 3

Study of selected Greek and Roman epics in English translation. Among the works that may be read are Homer's Iliad and Odyssey, Apollonius' Argonautica, Virgil's Aeneid, and Ovid's metamorphoses.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req., West European Studies

CLASS 1144 - GREEK AND ROMAN LYRIC POETRY

Minimum Credits: 3

Maximum Credits: 3

Study of selected poems and fragments of the Greek and Roman lyric poets in English translation. Among the poets that may be read are Archilochus, Sappho, Pindar, Catullus, and Horace.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

CLASS 1150 - THE RECEPTION OF ANTIQUITY: JULIUS CAESAR

Minimum Credits: 3

Maximum Credits: 3

Julius Caesar is arguably one of the most prominent figures the world has ever seen, and his legacy continues to fascinate us - but who was he, really? This is not a Roman history course, per se; rather, in this Writing-Intensive course we will investigate the puzzling, manifold character of Julius Caesar as presented in a number of works ranging from Caesar's own writing, ancient biographies, Shakespeare's 1599 play, and multiple 20th- and 21st-century interpretations. Throughout the semester, students will engage with these presentations of Caesar with in-class discussion of our literary texts and frequent writing assignments. Indeed, this W-designated course will pay considerable attention to the development of writing skills, refinement of ideas, and improving the expression of ideas, with writing instruction thoroughly integrated into the course.

Academic Career: Undergraduate

Course Component: Lecture

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

CLASS 1151 - DEATH IN THE MEDITERRANEAN WORLD

Minimum Credits: 3

Maximum Credits: 3

In many cultures, people sometimes ask fundamental questions about their existence, including, "what happens after we die?" This course will focus on the evolution of beliefs and rituals related to death and the afterlife in and around the ancient Mediterranean basin, including Egyptian, Greek, Etruscan, and Roman cultures. Using an interdisciplinary approach, we will combine methodologies from anthropology, classics, history, and religious studies. Topics to be covered include myths of the afterlife, books of the dead, magic and death rituals, funeral practices and paraphernalia (disposal of the dead), cults of the dead, divinization, heaven and hell, judgment, and the impact of Christianization on the ancient understanding of death.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Attributes: SCI Polymathic Contexts: Global&Cross Cul GE. Req.

CLASS 1154 - MEDITERRANEAN CROSSROADS

Minimum Credits: 3

Maximum Credits: 3

This course takes a place-based, diachronic approach to the study of Mediterranean interconnectedness, from the perspective of the main Sicilian island and indeed the very notion of islandness. As Godfrey Baldacchino has written in the introduction to his seminal *A World of Islands*: "islands suggest themselves as *terrae nullius*, empty spaces, waiting, wanting, to be possessed: potential laboratories for any conceivable and uninhibited human project, in thought or in action...But: the small, remote and insular also suggests marginality, being on the edge, being out of sight and so out of mind, situations which can expose the weakness of mainstream ideas, orthodoxies, and received wisdoms, while fomenting alternatives to the status quo. Any dominant paradigm is supposedly weakest at its periphery." Baldacchino's insights invite us to think deeply about Sicily's position with regard to the Mediterranean and its components, as a locus of exchange, commerce, conquest, mobility, and travel. Reflecting on Mediterranean islandness and the multicultural history of Sicily permits us to scrutinize the processes of transregional interconnectedness, mobility, and exchange that are hallmarks of historical globalization. Islands connect, but also divide; they are sites where identities are not only forged, but also blended and challenged; they offer a microcosm in which global issues may be observed and studied.

CLASS 1164 - GREEK TRAGEDIES AND MODERN RESPONSES

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Letter Grade

Course Attributes: DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

CLASS 1170 - ANTIQUITY NOW

Minimum Credits: 3

Maximum Credits: 3

In this course, we'll consider modern receptions of ancient literature that reinterpret ancient themes and characters to critique, represent, or reimagine ancient and/or modern cultural and personal identities. We'll delve deeply into issues of race, gender, sexuality, and citizenship (among others) in the ancient and modern worlds to answer the question: why do artists still return to the ancient past to explore modern-day identity? We will also work on developing writing and analytical skills, culminating in an independent research project that will demonstrate your ability to perform close reading and apply comparative analysis to a wide variety of ancient and modern material.

CLASS 1180 - GODDESSES & GLADIATORS: THE ANCIENT WORLD ON SCREEN

Minimum Credits: 3

Maximum Credits: 3

This course investigates representations of ancient Mediterranean history and culture in modern media, considering a wide variety of historical topics, to explore ancient and modern identity and citizenship, religion and philosophy, gender and sexuality, and politics and public morality. Modern media has shaped our perception of who the ancients are, including what they represent for a modern audience, but it does not always accurately reflect who the ancients were in the historical past. In this course, we'll figure out the difference, analyzing both ancient and modern societies and cultures and asking what elements of the ancient world modern people find most fascinating and why. How do we script our past?

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

CLASS 1185 - SCI FI & THE ANCIENTS: FUTURES OF THE PAST

Minimum Credits: 3

Maximum Credits: 3

Science fiction as a category of literature and popular culture is commonly defined by technology, futurism, and scientific modernity, and it often excludes any literature which predates modern scientific methods. This definition of science fiction as tethered to concepts of modernity, however, ignores the critical and pervasive reflections on classical antiquity throughout the development of the science fiction genre. In this course, we will analyze the history of science fiction as a literary genre and ask: How do ancient texts fit into the analytical framework of Science Fiction Studies (or do they)? What can elements of Science Fiction Studies offer to readers of classical texts? Why is classical reception so commonplace in popular science fiction, despite the common emphasis on modernity in Science Fiction Studies?

Grade Component: LG/SNC Elective Basis

Course Attributes: SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Contexts: Soc/Behav. GE. Req., West European Studies

CLASS 1220 - ROMAN HISTORY

Minimum Credits: 3

Maximum Credits: 3

A survey of the history of Rome from the earliest times through the late empire, with particular emphasis on political and social developments during the late republic and early empire.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Geographic Region General Ed. Requirement, DSAS Historical Analysis General Ed. Requirement, Medieval & Renaissance Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Contexts: Soc/Behav. GE. Req., West European Studies

CLASS 1240 - FROM PANDORA TO PSYCHOPATHY: CONCEPTIONS OF EVIL FROM ANTIQUITY TO THE PRESENT

Minimum Credits: 3

Maximum Credits: 3

This lecture course introduces students to the ways in which humanity has struggled to comprehend and explain the existence of evil. The focus lies not on natural evils (such as earthquakes and epidemics) but on moral evil: Why are human beings at times so manifestly wicked? In this course we will look at the many theories and explanations given by poets, philosophers, and theologians over the course of our intellectual history and critically examine their explanatory value as well as their unintended consequences. The course is highly interdisciplinary. It will take into account the literature of various periods, beginning from early bronze age to the 21st century, but also invite students to engage with texts from such different genres as poetry, ancient and modern philosophy, theology, and modern psychology. The aim of the class is to empower students better to evaluate and critique facile contemporary views and prejudices concerning the nature and origin of moral evil.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

CLASS 1270 - THE ROMANS IN BRITAIN

Minimum Credits: 3

Maximum Credits: 3

It may seem strange, but the Romans were in Britain for nearly four hundred years, speaking Latin, wearing the toga or carrying sword and shield, and giving orders. In AD 43 Britannia, more accurately the southeastern section of it, was conquered by the emperor Claudius and annexed as a province of the Roman Empire. Thereafter for nearly four centuries it was occupied by Roman armies and administered by Roman governors. Why did Rome invade and occupy an island that was on the periphery of its Mediterranean empire? What was the impact, social, political, and economic, of the conquest on the native population? How did Rome administer and defend the province? To what extent was Britannia Romanized? To answer these questions and others, we will study a broad range of literary, documentary, and archaeological evidence, including the Romans' triumphal narratives of conquest and rule, the material remains of the Roman occupation, especially towns, forts, and the systems of frontier defense, constructions of identity and interactions of Roman and non-Roman (e.g., soldier and civilian, citizen and non-citizen, collaborator and rebel). All readings of primary sources are in English. This course has no prerequisites, but it is recommended that students have some knowledge of Roman History and/or Roman Civilization.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or

CLASS 1314 - ARISTOTLE

Minimum Credits: 3

Maximum Credits: 3

This course will examine the basic concepts of Aristotle's metaphysics, physics, ethics, and logic.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

CLASS 1402 - GRECO-ROMAN RELIGIONS

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to religious texts and traditions in a formative era of Western civilization and culture. Our focus will be on the variety of religious expression in Greco-Roman culture, which flourished in the geographical area of the Mediterranean basin during the first five centuries of the common era. By considering such topics as debates about the nature of the gods and access to them (through oracles, ritual and magic), the emergence of the idea of the holy person, and a variety of religious traditions as expressed in prayer, ritual and art, students will encounter a rich religious imagination that is truly different from contemporary understandings of religion and yet strangely familiar as well. We will also explore the complete integration between religion politics in the ancient world.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Attributes: SCI Polymathic Contexts: Global&Cross Cul GE. Req., West European Studies

CLASS 1430 - ORIGINS OF CHRISTIANITY

Minimum Credits: 3

Maximum Credits: 3

This course presents a historical-critical investigation of Christian origins. Special attention is paid to varieties of 1st century Hellenistic and Palestinian Judaism within the Greco-Roman world. Primary readings include selected Biblical passages and apocrypha, 1st century historians and philosophers (Josephus, Tacitus, Suetonius, and Philo), the New Testament corpus (including Paul and the Pastorals), and selected readings from the Dead Sea Scrolls. In addition there will be assignments from various modern New Testament critics, historians, and theologians.

Academic Career: Undergraduate

CLASS 1432 - VARIETIES OF EARLY CHRISTIANITY

Minimum Credits: 3

Maximum Credits: 3

An examination of the diverse strands of Christianity as developed both in the Christian bible and outside of it.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Historical Analysis General Ed. Requirement, Medieval & Renaissance Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Contexts: Soc/Behav. GE. Req., West European Studies

CLASS 1510 - GREEK ART

Minimum Credits: 3

Maximum Credits: 3

The study of Greek art begins ca. 3000 B.C. In the so-called "age of bronze" and traditionally ends in 30 B.C. With the completion of the roman conquest of the eastern Mediterranean. The course will trace the development of architecture, sculpture and painting in mainland Greece and to a lesser extent in the Greek colonies of Asia minor and Italy, emphasizing the changes in style and taste which took place over this period.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS The Arts General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Contexts: Humanistic GE. Req., West European Studies

CLASS 1520 - ROMAN ART

Minimum Credits: 3

Maximum Credits: 3

Roman art served as the funnel through which the principles of Greek art passed into European culture, but the principles were transformed in the process of transmission. The course will trace the beginnings and subsequent development of the arts of painting, sculpture, and architecture in Italy from the period of the kings, and the middle years of the empire (ca. 150 A.D.).

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS The Arts General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Contexts: Humanistic GE. Req.

CLASS 1524 - ROMAN ARCHITECTURE

Minimum Credits: 3

Maximum Credits: 3

The course will examine the development of Roman architecture from its origins in Etruria and central Italy to the middle empire (ca. 150 A.D.). Special attention will be given to the relationship of architectural forms, types and functions to changes in Roman politics and society and the significance of materials and outside influences on the development of local Italian traditions and forms. The interaction between roman architectural forms and local traditions in the provinces to create a Roman imperial "koine", will be treated only in passing.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: SCI Polymathic Contexts: Global&Cross Cul GE. Req., West European Studies

CLASS 1610 - GREEK ARCHAEOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to the archaeologist's task of bringing lost societies back to light through the study of their physical remains and material culture. By examining ancient Greek art, architecture, inscriptions, burials, coins, and the many everyday objects that survive from antiquity, archaeologists are able to shine light on details of Greek society that are often totally inaccessible from the surviving literary and historiographical record. The course begins with an examination of the archaeology of the bronze age, and presents a survey of the archaic, classical, and Hellenistic periods, as well as a history of the archaeological discipline itself from the nineteenth century to today.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Letter Grade

CLASS 1630 - MARGINALITY IN THE ANCIENT GREEK WORLD

Minimum Credits: 3

Maximum Credits: 3

This undergraduate course surveys the literary and material evidence of marginality in the ancient Greek world. This course includes an introduction to Greek culture, a discussion of common terms associated with marginality. Different groups who were marginalized, such as those of low socioeconomic status, those of differing ethnicity and race, the disabled and deformed, the mentally ill, slaves and other marginalized individuals will be discussed.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Diversity General Ed. Requirement, SCI Diversity General Ed. Requirements

CLASS 1640 - THINK LIKE A ROMAN

Minimum Credits: 3

Maximum Credits: 3

The course explores the ancient world through the lens of cognition, examining a variety of socio-historical topics, like emotion, spatial and temporal perception, color cognition, and memory and mnemotechnics, as viewed through ancient literature and modern research in cognitive psychology. Through written assignments and group discussion, students practice interpreting psychological research and Classics scholarship that looks at ancient texts through the lens of

cognitive science. In addition to studying ancient cognition, students reflect on their own learning, while engaging with research on metacognition to develop evidence-based practices for improving their writing and study habits. This course is designated as a Writing Intensive course, and students will conduct an independent research project that applies cognitive methods to ancient literature, history, or art.

CLASS 1650 - WARFARE: ANCIENT MEDITERRANEAN

Minimum Credits: 3

Maximum Credits: 3

Since the dawn of civilization, warfare has been a constant threat to society. Although the material remains of ancient warfare survive in the archaeological record, the literary accounts of Greco-Roman authors provide us with additional evidence to reconstruct developments in, and attitudes toward, armed conflict in the ancient Mediterranean region. This undergraduate course surveys the literary and material evidence of Greco-Roman warfare. Significant battles, developments, strategies, and attitudes are presented chronologically, and special attention is paid to issues of biological and chemical warfare, votive dedications and war trophies, casualties and commemoration, civilian impact, and the effects of post-traumatic stress disorder. This class is a designated W-course, so considerable attention will be paid to developing critical reading, writing, and oral presentation skills.

CLASS 1710 - SANSKRIT 1

Minimum Credits: 3

Maximum Credits: 3

An introduction to the basic structure and vocabulary of Sanskrit. Approximately half of the course is devoted to an intensive survey of Sanskrit grammar and half to the reading of a selection from the Mahabharata.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Asian Studies

CLASS 1720 - SANSKRIT 2

Minimum Credits: 3

Maximum Credits: 3

A continuation of Sanskrit 1, this course is devoted to the reading of selected Sanskrit texts. Grammar presented in Sanskrit 1 is reviewed as necessary and some additional grammatical material is introduced.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Asian Studies, DSAS Second Language General Ed. Requirement

CLASS 1730 - SANSKRIT 3

Minimum Credits: 3

Maximum Credits: 3

A continuation of Sanskrit 2, this course is an introduction to Vedic Sanskrit and to the reading of selected hymns from the Rig-Veda.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: CLASS 1720

Course Attributes: Asian Studies

CLASS 1740 - SANSKRIT 4

Minimum Credits: 3

Maximum Credits: 3

In this course, a continuation of Sanskrit 3, students read selected portions of Kaladana's play Sakuntala.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Asian Studies

CLASS 1790 - TOPICS IN SANSKRIT

Minimum Credits: 3

Maximum Credits: 3

Study of selected topics in Sanskrit language and literature.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

CLASS 1800 - HONORS COURSE/MAJORS

Minimum Credits: 3

Maximum Credits: 3

In this course undergraduate majors in classics who wish to graduate with honors (and are otherwise qualified) write an honors paper, usually in conjunction with an upper-level classics course.

Academic Career: Undergraduate

Course Component: Thesis Research

Grade Component: Satisfactory/No Credit

CLASS 1810 - ANCIENT MEDICINE

Minimum Credits: 3

Maximum Credits: 3

This course offers an introduction to ancient Greek and Roman medical thought, theory, and practice. Though many of their teachings and techniques might seem bizarre, gross, or even dangerous, Hippocrates, Galen, and their successors shaped the foundational principles of western medical culture for over a thousand years. From William Harvey's

invocation of the "divine Galen" in his treatise on the circulatory system to the citation of the "Hippocratic Oath" by the prosecution during the Nuremberg Trials, the tradition of Greek and Roman medicine has continued to influence modern medicine and culture in profound ways. A close examination of the theories and practice of medicine in antiquity therefore not only deepens our understanding of Classical Greek, Alexandrian, and Roman cultures, but also illuminates a vital chapter in the development of today's clinical practice.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

CLASS 1900 - INTERSHIP IN CLASSICS

Minimum Credits: 1

Maximum Credits: 3

Students may complete an internship for 1-3 credits to gain practical experience in a supervised training environment. Permission from a faculty advisor is required to enroll.

Academic Career: Undergraduate

Course Component: Internship

Grade Component: Satisfactory/No Credit

Course Attributes: Undergraduate Internship

CLASS 1901 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 9

In this course a student undertakes independent study in the field of classical civilization in consultation with a member of the faculty.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: LG/SNC Elective Basis

CLASS 1902 - DIRECTED STUDY FOR UNDERGRADS

Minimum Credits: 1

Maximum Credits: 9

In this course a student undertakes directed study in the field of classical civilization under the close guidance of a member of the faculty.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SNC Elective Basis

CLASS 1903 - DIRECTED RESEARCH FOR UNDERGRADS

Minimum Credits: 1

Maximum Credits: 9

In this course a student undertakes directed research in the field of classical civilization under the close guidance of a member of the faculty.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Letter Grade

Course Attributes: Capstone Course

CLASS 1904 - UNDERGRADUATE RESEARCH ASSISTANT

Minimum Credits: 1

Maximum Credits: 3

This course enables advanced majors to receive academic credit for serving as assistants to faculty members who are conducting research projects (e.g., compiling bibliography for a new class, preparing a work for publication, creating a conference presentation). This collaborative project will result in a meaningful experience that will provide the student with a foundation in the mechanics of research and publication. Given the variable aspects of this learning experience, there is not official syllabus. However, students and faculty who participate in this course are required to submit a signed contract prior to the start of the semester in which the assistantship will occur. This contract is subject to the approval of the undergraduate committee.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: Satisfactory/No Credit

CLASS 1908 - DIRECTED WRITING FOR MAJORS

Minimum Credits: 1

Maximum Credits: 1

In addition to whatever written assignments are required of those enrolled in the course, this directed writing-practicum provides students with an opportunity to contribute writing designed in terms of the intellectual strategies of the course.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: Writing Intensive Course (WRIT)

CLASS 1950 - CLASSICS CAPSTONE

Minimum Credits: 3

Maximum Credits: 3

This course is designed to encompass, evaluate, and interpret evidence from the ancient world that is commonly left behind in surveys of canonical or traditional works: legal inscriptions, epitaphs, papyri fragments, curse tablets, graffiti, and even human remains are all detritus left behind by the cultures of the Mediterranean, and while they constitute a considerable portion of the ancient evidentiary corpus. We will engage with these "extra-canonical" bodies of evidence through rigorous application of interdisciplinary methodologies in order to complicate our view of the ancient world. Study of these ancient witnesses will reveal the ancient Mediterranean as a vibrant, transcultural, and transchronological environment, filled with the lived experience of more than just the male elite whose works frequently compose literary and cultural histories. The course is meant to serve as a "capstone" applicable for all Classics majors and minors.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Letter Grade

Course Attributes: DSAS Cross-Cult. Awareness General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

Clin Rehab and Mntl Hlth Coun

COUN 1733 - COUNSELING SKILLS FOR THE HELPING PROFESSIONS

Minimum Credits: 3

Maximum Credits: 3

Helping professionals work with clients and patients with various needs and from diverse backgrounds. They face unique and challenging clinical situations every day. This class is designed to assist students in learning tools and techniques for recognizing barriers to effective communication and generating appropriate counseling strategies. This class will consist of three modules: (1) Counseling and Listening Skills, (2) Practicing with Cultural Humility, and (3) Burnout and Compassion Fatigue.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

COUN 2765 - CLINICAL COUNSELING MENTORSHIP

Minimum Credits: 0

Maximum Credits: 0

This course provides a structure for clinical oversight and guidance through structured student-advisor interaction over the course of the program's first year of study. The objective of the course is to facilitate the clinical application of knowledge and skills students have acquired from didactic coursework. This course involves mentoring and ongoing formal and informal evaluation to ensure that students achieve the required level of competency for clinical counseling practice.

Academic Career: Graduate

Grade Component: Grad HSU Basis

Course Requirements: PLAN: Clinical Mental Health Counsel

Co-Ed Physical Education

PEDC 0001 - BEGINNING SWIMMING

Minimum Credits: 1

Maximum Credits: 1

For students who are unable to swim or who can swim very little. Opportunities are presented to learn basic functional aquatic skills and basic strokes. Students are permitted to set their own achievement goals. Instruction is on an individual basis.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

PEDC 0002 - INTERMEDIATE SWIMMING

Minimum Credits: 1

Maximum Credits: 1

For students who have learned the mechanics of basic aquatic strokes and are interested in the development of proper rhythm and timing necessary for good performance in swimming. Students are permitted to set their own achievement goals. Instruction is on an individual basis.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

PEDC 0026 - AQUATIC CONDITIONING

Minimum Credits: 1

Maximum Credits: 1

Good swimmers who want to learn how to use swimming to maintain or improve their physical fitness should register for this course. Students may determine their capacity for exercise, and they may learn how to apply this effort in the water.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

PEDC 0040 - CHOREOGRAPHY

Minimum Credits: 1

Maximum Credits: 1

The art of making dances. Studies dealing with timing, grouping, energy, quality, etc., Lead to the creation of dances. Designed for students who wish to explore the creative process or for those wanting more advanced dance training.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

PEDC 0044 - DANCE PRODUCTION

Minimum Credits: 2

Maximum Credits: 2

This course is designed to familiarize students with both the technical and production aspects of dance and to increase appreciation of dance in all its forms.

Academic Career: Undergraduate
Course Component: Workshop
Grade Component: LG/SNC Elective Basis

PEDC 0049 - BADMINTON

Minimum Credits: 1

Maximum Credits: 1

This course is designed to introduce the beginner to the significant components of badminton. The following basic strokes will be presented in class; forehand and backhand, overhead clear, high singles service, low doubles service, smash and drop. Rules and regulations and strategies for doubles and singles games will be presented.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

PEDC 0050 - RACQUETBALL 2

Minimum Credits: 1

Maximum Credits: 1

This course provides basic stroke mechanics, practice drills, and winning strategies for advanced players with a knowledge of the game of racquetball. Class time will deal in depth with the drive, lob, overhead z-serves, serve returns, back wall play, and training aids. Developing strategies for winning in singles and doubles will be dealt with extensively in class.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

PEDC 0065 - VOLLEYBALL

Minimum Credits: 1

Maximum Credits: 1

This course is designed to introduce the beginner to the significant components of volleyball. Basic skills to be taught will include the overhead volley, forearm pass, service, spike, individual block and defensive recovery skills. A 4-2 right-side-setter offensive system will be introduced with a 6-back and a 6-up defensive system. All rules and regulations will be reviewed during the course.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

PEDC 0068 - JUDO 1

Minimum Credits: 1

Maximum Credits: 1

An intensive study of the basic physics and principles governing the art of judo. It is no longer an oriental mystique. Today, judo is practiced worldwide by men and women of all ages. The "judoka" (student) will acquire confidence as well as improved physical endurance. In addition to this, the student will begin to grasp the true meaning of judo and find how it can apply to life in general. Judo gi is required.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

PEDC 0069 - JUDO 2

Minimum Credits: 1

Maximum Credits: 1

A continuation of Judo 1 including mat techniques such as strangle, joint lock, and pinning. New students must have a yellow belt.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

PEDC 0090 - VARSITY SPORTS 1

Minimum Credits: 1

Maximum Credits: 1

Students may earn four credits in physical education by participating in a varsity sport. One credit only per term.

Student must be a varsity athlete.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

Course Requirements: STDNT GRP: Student Athlete or Cheer / Dance

Course Attributes: UPB Physical Education General Ed. Requirement

PEDC 0091 - VARSITY SPORTS 2

Minimum Credits: 1

Maximum Credits: 1

Students may earn one credit in physical education by participation in a varsity sport for his/her second term.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

Course Requirements: PREQ: PEDC 0090; STDNT GRP: Student Athlete or Cheer / Dance

PEDC 0099 - BASIC ROCK CLIMBING

Minimum Credits: 1

Maximum Credits: 1

Beginning with bouldering, the course will deal primarily with rope handling and moving on vertical rock planes in a safe manner. Covered in this course are bouldering, friction and balance climbing, 3-point suspension, use of ropes, knot craft, body rappelling, free rigging climbs, mountain safety, basic belaying, use of webbing (slings and harnesses), chimney techniques and natural protection.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

PEDC 0133 - LIFE GUARDING 1

Minimum Credits: 1

Maximum Credits: 1

For the intermediate level or above swimmer who wishes to gain national red cross lifeguard certification. Training is specifically designed to prepare enrollers for lifeguarding pools and openwater beaches. Advanced lifesaving, community first aid, and CPR certifications are required if not already obtained before course completion.

Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: Letter Grade

PEDC 0135 - BASKETBALL 1 - CO-EDUCATIONAL

Minimum Credits: 1

Maximum Credits: 1

Supervised competition follows a conditioning period in which individual skills and team strategy are stressed. Opportunity to improve on previously acquired skills and become a team member is provided.

Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: Letter Grade

PEDC 0147 - WATER SAFETY INSTRUCTOR

Minimum Credits: 2

Maximum Credits: 2

The water safety instructor course is designed to earn certification to teach American red cross swimming and water safety courses. The course focuses on planning, organizing, sequencing, skill development, and red cross operational policies and procedures.

Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: Letter Grade

PEDC 0153 - VARSITY SPORTS 3

Minimum Credits: 1

Maximum Credits: 1

Students may earn one credit in physical education by participation in a varsity sport for his/her third term.

Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: Letter Grade
Course Requirements: PREQ: PEDC 0091; STDNT GRP: Student Athlete or Cheer / Dance

PEDC 0154 - VARSITY SPORTS 4

Minimum Credits: 1

Maximum Credits: 1

Students may earn one credit in physical education by participation in a varsity sport for his/her fourth term.

Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: Letter Grade
Course Requirements: PREQ: PEDC 0153; STDNT GRP: Student Athlete or Cheer / Dance

PEDC 0158 - WEIGHT TRAINING - BEGINNER

Minimum Credits: 1

Maximum Credits: 1

A coeducational class designed to provide the student with the opportunity to develop and practice basic weight training techniques. With the guidance of the instructor, the student will be encouraged to develop an individualized

self-designed program. The emphasis of this course will be placed on progressive-resistive exercises.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

PEDC 0171 - FITNESS KICK BOXING

Minimum Credits: 1

Maximum Credits: 1

Our exercise program is based on the concepts of boxing, karate, muay thai kick boxing, and total fitness accompanied by rhythmic music. Conditioning is focused on the areas of endurance, strength, and flexibility; all of which can bring about positive physical changes in participating students. Aerobic and anaerobic power training with speed bag and heavy bag is part of the training module.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

PEDC 0175 - AEROBIC FITNESS BOXING

Minimum Credits: 1

Maximum Credits: 1

Our exercise program is based on the concepts of boxing, karate, muay thai kick boxing, and total fitness accompanied by rhythmic music. Conditioning is focused on the areas of endurance, strength, and flexibility; all of which can bring about positive physical changes in participating students. Aerobic and power training are a part of the enduring comprehensive training module.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

PEDC 0180 - VOLLEYBALL 1

Minimum Credits: 1

Maximum Credits: 1

This course is designed to introduce the beginner to the significant components of volleyball. Basic skills to be taught will include the overhead volley, forearm pass, service spike, individual block and defensive recovery skills. A 4-2 right-side-setter offensive system will be introduced with a 6-back and a 6-up defensive system. All rules and regulations will be reviewed during the course.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

PEDC 0193 - PERSONAL FITNESS

Minimum Credits: 1

Maximum Credits: 1

An organized approach to health related fitness with diagnostic and prescriptive assessment. The emphasis is on an individual, self-designed program based on scientific principles with the goal of personal improvement and fitness knowledge of primary importance. Various types of exercise will be incorporated into class times.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

PEDC 0194 - SPORTS CONDITIONING

Minimum Credits: 1

Maximum Credits: 1

This course includes sport specific training for a multitude of sports including plyometric, speed and agility training, resistance training and will incorporate different modes of aerobic training. This course focuses on how to train different types of athletes and how each specific type of training is related to the sport/event involved. This is a high intensity exercise course and should not be taken if the student is not apparently healthy and has not already had at least some experience in sport and/or fitness related fields.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

PEDC 0206 - BODY SCULPTING 1

Minimum Credits: 1

Maximum Credits: 1

Exercise to music in this non-impact class designed to develop muscular definition, firming, toning, and strength. Weights and other resistive devices will be incorporated into workout routines.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

PEDC 0209 - "ON THE BALL"

Minimum Credits: 1

Maximum Credits: 1

A 60 minute resistance training workout using stability balls, hand weights, and resistance tubing. This class will focus on increasing core strength, as well as overall muscle tone, balance, and coordination. A nice compliment to your cardio workout!

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: Letter Grade

PEDC 0222 - CYCLE EXERCISE

Minimum Credits: 1

Maximum Credits: 1

This class is for anyone that wants a killer cardiovascular workout without being bored on a traditional cardio machine. Spinning bikes simulate an outside ride by allowing you to change positions on the bike as well as resistance to simulate hills. This class will incorporate sprints, seated climbs, standing climbs, jumps and more for an anything-but-boring workout! During the class, you can work at your own intensity level whether it is light to moderate or vigorous. Spinning is great for anyone and everyone including cyclists as well as those of you that aren't the best of cyclists. No bike riding experience is necessary for this class.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

PEDC 0225 - BUDO

Minimum Credits: 1

Maximum Credits: 1

An overview of martial arts which combines the practice of kobudo, ancient weaponry-bo (long stick), jo (short stick), sia, aiki, sumo jujitsu & karate do. Class will incorporate the use of ancient weaponry and the art of ju-jitsu, which is composed of falling, throwing, pressure points, disarming skills against the weapon, the art of restraining, and ground grappling. This course will cover the history and philosophy of these activities and also physically using tactical application. Budo will provide student insight on how different disciplines are combined and used.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

PEDC 0226 - FITNESS BOXING 1

Minimum Credits: 1

Maximum Credits: 1

For students who want a high level of fitness achieved through learning various beginning, non-contact boxing skills and techniques. Skills include: shadow boxing, defensive techniques, non-contact sparring, heavy bag workout, speed bag techniques, rope jumping, and strength and conditioning exercises.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

PEDC 0232 - TOUCH FOOTBALL 1

Minimum Credits: 1

Maximum Credits: 1

A co-educational course designed to provide the student with an opportunity to develop the fundamental skills of football, along with experimenting with organized competition in touch football games.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

PEDC 0236 - AEROBIC MIX

Minimum Credits: 1

Maximum Credits: 1

This is a great class for anyone who loves variety! This course provides a mixture of various types of cardiovascular exercise including, but not limited to, hi-lo floor aerobics, step aerobics and cardio kickboxing. In addition, resistance training, yoga and/or pilates may be incorporated into the exercise sessions. Classes will vary at the instructor's discretion.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

PEDC 0237 - AEROBIC EXERCISE

Minimum Credits: 1

Maximum Credits: 1

This class is for those who prefer floor aerobics to step aerobics. The class will include predominantly hi-lo floor aerobics. Other forms of exercise may include resistance training, yoga and pilates.

Academic Career: Undergraduate

Course Component: Practicum
Grade Component: Letter Grade

PEDC 0242 - AMER RED CROSS LIFEGUARD INSTRC

Minimum Credits: 2

Maximum Credits: 2

American red cross lifeguard training for instructors will certify the student to teach various components of American red cross classes, i.e. Lifeguard training, adult and child, CPR for the professional rescuer, and community first aid and safety classes. This certification enables students to teach the above mentioned classes in any state authorized by the American red cross.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: Letter Grade

PEDC 0243 - AMER RED CROSS FIRST/CPR INSTRC

Minimum Credits: 2

Maximum Credits: 2

American red cross standard first aid and CPR for instructors will certify the student to teach various components of American red cross classes, i.e. Adult, infant and child, and CPR for the professional rescuer, as well as community first aid and safety classes. This certification enables students to teach the above mentioned classes in any state authorized by the American red cross.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: Letter Grade

PEDC 0244 - DANCE PRODUCTION 2

Minimum Credits: 2

Maximum Credits: 2

This course is designed to familiarize students with both the technical and production aspects of dance in all its forms. The students will have experiences with lighting, costume, choreography, public relations, and stage management.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

PEDC 0266 - PILATES FUSION

Minimum Credits: 1

Maximum Credits: 1

Pilates fusion is based on the Pilates system, but is more movement centered, as we transition from one form to the next through movement stretches taken from release methods. These release methods are designed to lengthen and to soften the muscles. The movements are constant, so there is flow and connection rather than a static approach. There is a focus on proper form, finding center through the pelvis, core strengthening and its relation to the back. Techniques from yoga practice are also incorporated into this class.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: Letter Grade

PEDC 0267 - BEGINNING KARATE

Minimum Credits: 1

Maximum Credits: 1

An introduction on the principles and techniques of traditional shotokan karate. Students will begin training with physical conditioning and basic blocking, striking, punching, and kicking techniques.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

PEDC 0287 - PERSONAL DEFENSE 1

Minimum Credits: 1

Maximum Credits: 1

The purpose of this course is to teach students how to defeat an opponent through the most efficient use of mind and body, but doing so on the principle of "giving away" under his/her attack or effort. Emergency self-defense from various attacks will be taught utilizing basic judo techniques and the "byam" method.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

PEDC 0340 - KETTLE BELL AND CONDITIONING

Minimum Credits: 1

Maximum Credits: 1

This class is designed to provide the student with a total body strength and cardiovascular workout utilizing kettle bell equipment and various strength conditioning techniques. Emphasis is on circuit style or continuous training with the goal of progressively increasing the intensity and difficulty of the workout throughout the semester.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

PEDC 0361 - FITNESS DANCE

Minimum Credits: 1

Maximum Credits: 1

This class, set to contemporary music, is designed to get your moving while learning fun and exciting dance movements! The class begins with a warm-up consisting of fundamental dance principles and techniques that will prepare you to move into dance phrases and choreographed movement. The class cools down with a series of stretches and muscle relaxing exercises. No previous dance training is required.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: Letter Grade

PEDC 0362 - TOTAL BODY FUSION

Minimum Credits: 1

Maximum Credits: 1

This class is for anyone looking to increase cardiovascular fitness, firm and tone muscles, increase flexibility and de-stress. A typical class starts with cardiovascular exercise such as step aerobics, kickboxing and/or hi-lo aerobics, moves to body sculpting using free weights, bands and balls and finishes up with core work and stretching exercises. If you like a little of everything, this is definitely the class for you!

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

PEDC 0363 - ZUMBA

Minimum Credits: 1

Maximum Credits: 1

Zumba is a one of kind combination of dance and exercise, designed to put "Fun" back into fitness. The zumba workout maximizes caloric output, fat burning, and total body toning. The routines feature aerobic interval training with a combination of fast and slow rhythms that tone and sculpt the body. Exotic and explosive Latin rhythms create a party like atmosphere that delivers results, as well as a "Feel happy" workout. No previous experience in dance is needed to have fun with zumba.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: Letter Grade

PEDC 0368 - LATIN RHYTHM AND SWING

Minimum Credits: 1

Maximum Credits: 1

Call it mambo, call it rock-n-roll.....Beginner, learn the basic footwork, turns and combination figures to these fiery dances. Learn to lead a partner. And partner, learn to follow the leader. Leading and following emphasized. Floor craft and dance etiquette will be taught. Styling and technique added to complete all dances. Also, special attention to timing and music recognition.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

PEDC 0380 - CARDIO PILATES

Minimum Credits: 1

Maximum Credits: 1

This class begins with aerobic exercise of various formats including: hi-lo, step and kickboxing to get your heart rate elevated and body moving. It then progresses to a short cool-down period and finishes with pilates mat exercises to sculpt your muscles and stretch your body. This class is great for anyone looking to increase cardiovascular fitness as well as strengthen, stretch and tone the muscles.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: Letter Grade

PEDC 1002 - TAE KWON DO 1

Minimum Credits: 1

Maximum Credits: 1

An ancient Korean martial art that is a free-fighting, self-defense sport in which the athlete's entire body is a weapon. Tae kwon do requires physical training, coordination, and a high degree of mental discipline.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

PEDC 1003 - TAE KWON DO 2

Minimum Credits: 1

Maximum Credits: 1

A continuation for students in Tae Kwan Do 1. Learn to compete olympic style. Competition and advanced style defense techniques will be taught. New students must have a yellow belt.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

PEDC 1006 - JIU JITSU

Minimum Credits: 1

Maximum Credits: 1

Jiu jitsu is a method of defense without weapons using hand, foot, and hip techniques combined with grappling and choke holds designed to render your attacker helpless and to help you gain more self-confidence. Jiu jitsu is not a contest of muscular strength. When practiced properly a smaller person can easily defend themselves against a larger person.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

PEDC 1141 - FITNESS FOR INSTRUCTORS

Minimum Credits: 2

Maximum Credits: 2

Fitness for instructors will teach the student the major elements of fitness. How to assess fitness levels, determine fitness goals, design fitness programs and facilities. The course will be a combination of classroom, exercise, and practical experiences.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: Letter Grade

PEDC 1233 - PRIN OF STRENGTH AND CONDITIONING

Minimum Credits: 2

Maximum Credits: 2

Instruction is provided describing the principles for development of pre-season, in-season and off-season strength and conditioning programs. Laboratory experiences will include the theory and techniques of operating strength training equipment.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: Letter Grade

PEDC 1300 - NUTRITION IN EXERCISE AND SPORT

Minimum Credits: 1

Maximum Credits: 1

This course will provide the student with basic nutritional information as it pertains to sport and exercise performance. Topics of discussion include weight reduction and management, nutritional requirements for athletic performance and maintenance of a healthy lifestyle, proper eating habits, diet fads, disordered eating, and supplementation.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

College of General Studies

CGS 0092 - UNIVERSITY SEMINAR

Minimum Credits: 1

Maximum Credits: 1

University Seminar (CGS 0092) provides new and/or transfer students with the skills necessary to maximize their potential for academic success at the University of Pittsburgh. During this course students will be exposed to various University resources; explore educational and career planning; gain academic confidence; and will become familiar with and utilize cognitive science research-based skills necessary for college success.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Satisfactory/No Credit

CGS 0093 - FROM CLASSROOM TO CAREER: ACADEMIC AND CAREER EXPLORATION 2

Minimum Credits: 1

Maximum Credits: 1

As the second course of a two course series on academic and professional development, this course asks students to further examine the ways that their academic plans and career goals align. Students will identify their current competencies and those they still need to acquire in order to succeed in identified careers. Building on their new understanding of their competencies and interests, students will develop strategies to reach their identified career goals, such as obtaining the internships, informational interviews, and job shadowing experiences necessary to attract prospective career opportunities and build their professional network. Ideal for career launchers and career changers, no prerequisites needed.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Satisfactory/No Credit

CGS 1900 - CHOOSING YOUR PATH: INTERNSHIP SEMINAR

Minimum Credits: 1

Maximum Credits: 6

This is an undergraduate course offered through the College of General Studies for student interns in CGS majors such as Humanities, Social Sciences, Natural Sciences, Media and Professional Communications, Dental Hygiene, and Health Services, as well as several CGS certificate programs. Students enrolled in this internship engage in formal and reflective writing, journaling, and analysis about their work experience and how it relates to their academic and career pursuits. Class workshops and group discussions provide further opportunities for debriefing and consolidation of ideas and skills. This is a hybrid course with one in-person workshop and faculty authorization is required. Students must be registered for the internship course at the time they are completing the internship in order to earn credit.

Academic Career: Undergraduate

Course Component: Internship

Grade Component: Satisfactory/No Credit

CGS 1901 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 6

Allows advanced students to pursue topics and research of special interest which are not otherwise available.

Academic Career: Undergraduate

Course Component: Independent Study
Grade Component: LG/SNC Elective Basis

Comm Science and Disorders

CSD 1020 - NATURE OF LANGUAGE

Minimum Credits: 3

Maximum Credits: 3

This course provides an overview of linguistics and psycholinguistics including phonologic, morphologic, syntactic, semantic, and pragmatic aspects of linguistic theory and behavior. Topics may also include neurolinguistics, developmental psycholinguistics, and the relationship between cognition and language.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

CSD 1021 - LANGUAGE DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

Students in this course become acquainted with current models and empirical evidence concerning the process of language acquisition.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: CSD 1020 or LING 1000; PLAN: Communication Science (BA, BPH) or Not Candidate for Degree CDS

CSD 1022 - TRANSCRIPTION PHONETICS

Minimum Credits: 3

Maximum Credits: 3

The study of the phonemics of American English and of broad and narrow phonetic transcription, utilizing the international phonetic alphabet. Attention will also be paid to the transcription of abnormal speech patterns.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Communication Science (BA, BPH)

CSD 1023 - ANATOMY AND PHYSIOLOGY OF SPEECH

Minimum Credits: 3

Maximum Credits: 3

An overview of the anatomy and physiology of the system involved in speech production including respiration, phonation, articulation, resonance, and nervous system.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Communication Science (BA, BPH) CREQ: CSD 1027

CSD 1024 - ANATOMY AND PHYSIOLOGY OF HEARING

Minimum Credits: 3

Maximum Credits: 3

Study of the anatomy of the outer and middle ears, the middle ear transformer action, and acoustic reflex. Review of cochlear anatomy and theories of the transducer function of the inner ear. Study of central auditory pathways and binatural hearing.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: CREQ: CSD 1029

CSD 1025 - HEARING SCIENCE

Minimum Credits: 3

Maximum Credits: 3

Fundamental concepts in normal audition. Review of acoustics, anatomy, and physiology of auditory system, psychophysical methods and subjective correlates to auditory stimulus.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: CSD 1024 and CSD 1029; CREQ CSD 1028; PLAN: Communication Science (BA, BPH) or Not Candidate for Degree CDS

CSD 1026 - SPEECH SCIENCE

Minimum Credits: 3

Maximum Credits: 3

An introduction to speech physiology, acoustics, perception, models of speech production, research methodology and current topics in the area of speech science.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: CSD 1023 and CSD 1027; PLAN: Communication Science (BA, BPH) or Not Candidate for Degree CDS

CSD 1027 - LAB IN ANAT/PHYSIOLOGY OF SPEECH

Minimum Credits: 1

Maximum Credits: 1

This is a one credit required experience for all students enrolled in the CSD 1023: Anatomy and physiology of speech. Includes opportunities to review and enhance understanding of lecture material, utilizing additional drawings, anatomical models and actual specimens.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

Course Requirements: CREQ: 1023

CSD 1028 - LAB IN HEARING SCIENCE

Minimum Credits: 1

Maximum Credits: 1

This is a one credit required experience for all students enrolled in "Hearing Science".

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

Course Requirements: PREQ: CSD 1024 and 1029; CREQ: CSD 1025; PLAN: Communication Science (BA, BPH) or Not Candidate for Degree CDS

CSD 1029 - LAB IN ANAT/PHYSIOLOGY OF HEARING

Minimum Credits: 1

Maximum Credits: 1

This is a one credit required experience for all students enrolled in the "Anatomy and Physiology of Hearing" course (1024).

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

Course Requirements: CREQ: 1024

CSD 1030 - LAB IN SPEECH SCIENCE

Minimum Credits: 1

Maximum Credits: 1

An introduction to speech physiology, acoustics, perception, models of speech production, research methodology and current topics in the area of speech science.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

Course Requirements: PLAN: Communication Science (BA,BPH)

CSD 1031 - GUIDED CLINICAL OBSERVATION

Minimum Credits: 1

Maximum Credits: 1

In this course guided clinical observations will be used as the context for students acquiring skills in describing and summarizing behaviors relevant to the study of communication disorders. Observation time earned in this course can be applied towards hours of clinical observation required by many graduate programs in audiology and speech-language pathology.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: H/S/U Basis

CSD 1099 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 3

Provides advanced students an opportunity to explore in depth an area of particular interest to them. It is the student's responsibility to find a faculty member willing to undertake such a tutorial.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 1101 - INTRO TO CLINICAL PROCESSES

Minimum Credits: 3

Maximum Credits: 3

This course overviews the clinical processes employed in the diagnosis and treatment of speech, language and hearing disorders. Videotaped observations of clinical sessions will be reviewed and discussed, with students preparing detailed observational reports.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: CSD 1232; CREQ: CSD 1230

CSD 1102 - INTRODUCTION TO PROFESSIONAL AND CLINICAL ISSUES IN COMMUNICATION SCIENCE & DISORDERS

Minimum Credits: 3

Maximum Credits: 3

This course provides an introduction to professional issues related to clinical practice in speech-language pathology and audiology. It includes an introduction to issues that affect service delivery across settings, incorporating guided observation and learning activities to facilitate integration and application of knowledge.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: Sophomore Level or Higher

CSD 1111 - AURAL REHABILITATION

Minimum Credits: 3

Maximum Credits: 3

Principles and practices of aural habilitation and rehabilitation of children and adults. The effects of hearing loss on communication, social and emotional well-being, cognition, and participation in life activities will be addressed. Basic knowledge of treatment approaches and methods, as well as, resources (including technology) to help clients/patients and their family members, will be discussed.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: CSD-BA, CSD-BPH or NDCDSD-ND PREQ: CSD 1232 Introduction to Audiology

CSD 1230 - INTRODUCTION TO SPEECH LANGUAGE PATHOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course is designed to introduce students to the field of communication disorders, by acquainting them with the major disorder types as well as the major activities conducted by speech-language pathologists.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

CSD 1231 - EVALUATION AND TREATMENT OF COMMUNICATION DISEASES

Minimum Credits: 3

Maximum Credits: 3

This course provides students with information concerning identification, assessment, and treatment of clients exhibiting various communication disorders.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PLAN: Communication Science (BA, BPH)

CSD 1232 - INTRODUCTION TO AUDIOLOGY

Minimum Credits: 3

Maximum Credits: 3

A pre-professional course that introduces elements of the basic audiometric/impedance test battery, advanced tests of diagnostic utility, evaluation of special populations, and the role of the clinical audiologist in aural rehabilitation.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

CSD 1233 - INTRODUCTION TO RESEARCH

Minimum Credits: 3

Maximum Credits: 3

This course provides an introduction to research methods in speech, language, and hearing sciences and communicative disorders. Students will learn how to read and critique research articles more effectively. They will also learn to generate research questions and to develop strategies for collecting data and evaluating experimental effects.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Communication Science (BA, BPH)

CSD 1234 - WRITING PRACTICUM FOR CLINICAL METHODS IN COMMUNICATION SCIENCE & DISORDERS

Minimum Credits: 1

Maximum Credits: 1

A one-hour recitation section will be held weekly that will be dedicated to developing writing skills. Students will be required to produce samples of writing in many formats (article summaries and reviews, diagnostic reports, progress reports, and research reports) to prepare them to be effective communicators in the field of communication science and disorders. Students will be required to critique their own products as well as those of their peers.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: Letter Grade

Course Requirements: PLAN: Communication Science (BA, BPH)

CSD 1235 - CLINICAL METHODS IN COMMUNICATION SCIENCE & DISORDERS

Minimum Credits: 3

Maximum Credits: 3

This course provides an introduction to clinical approaches and methods reflected in the management of communication and swallowing disorders across the lifespan. Emphasis is placed on diagnostic and treatment processes and the use of an evidence-based framework to guide clinical decisions.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: CSD-BA, CSD-BPH or NCDCSD-ND

CSD 1237 - INTRO TO NEUROSCIENCE OF COMMUNICATION

Minimum Credits: 3

Maximum Credits: 3

This course describes the fundamentals of human brain structure and function as relevant to human communication. Methods used to probe the neural bases of speech, language, and hearing function along with current research findings are addressed. An understanding of how the brain processes speech and language provides insight into neurological disorders that affect communication.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 1902 - DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 3

This course is designed to enable students to explore an area of particular interest in depth. The student(s) and instructor agree on the topic area, method of study, requirements and evaluation procedure at the outset of the course.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 1903 - USA IRELAND: SURVEY OF HEALTH, SOCIAL SERVICES, EDUCATION AND CULTURE

Minimum Credits: 2

Maximum Credits: 2

This a required course for students who have been offered a place in the summer SHRS multi-disciplinary study abroad program in Ireland, CSD 1904. In this seminar-based course, students will explore the history of Ireland and the political and economic structure of Northern Ireland and the Republic of Ireland. This will serve as a foundation for further study of the health, educational and social service policies of each country and a basis for comparison with the US. Students will also review the medical, rehabilitation and educational sites to be visited during the summer program and become familiar with the conditions and disorders of the individuals served at each of these facilities.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Satisfactory/No Credit

Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 1904 - SHRS STUDY ABROAD IN IRELAND

Minimum Credits: 6

Maximum Credits: 6

This is an interdisciplinary study abroad opportunity offered through the department of communication science and disorders.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: CSD 1903

Course Attributes: Pitt Class

CSD 1906 - SHRS STUDY ABROAD IRELAND

Minimum Credits: 3

Maximum Credits: 3

This is an interdisciplinary study abroad opportunity offered through the department of communication science and disorders.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

CSD 3050 - TRANSLATION CHALLENGES IN CSD

Minimum Credits: 3

Maximum Credits: 3

This seminar explores the challenges of translating basic research findings in model systems to studies in humans (T0-T1) in communication science and disorders. The seminar covers various focus areas including hearing, speech, and voice.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Communication: Rhet & Comm

COMMRC 0300 - COMMUNICATION AND SOCIETY

Minimum Credits: 3

Maximum Credits: 3

This course is an introduction to basic theories, models, and concepts in interpersonal, small group, organizational and intercultural communication.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Social Science General Ed. Requirement

COMMRC 0310 - RHETORIC & SOCIETY

Minimum Credits: 3

Maximum Credits: 3

This is an introductory course designed to give students a sense of the role rhetoric plays in the construction of our social, political, and cultural worlds, and to introduce students to traditional and contemporary approaches to the analysis of rhetorical discourse. Students will prepare a series of short performances for presentation in the recitation sections.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Literature General Ed. Requirement, DSAS Phil. Think or Ethics General Ed. Requirement, Human Rights and Social Justice, SCI Polymathic Contexts: Ethical/Policy GE. Req., SCI Polymathic Contexts: Humanistic GE. Req., Undergraduate Research

COMMRC 0311 - RHETORICAL PROCESS HONORS RECITATION

Minimum Credits: 1

Maximum Credits: 1

The honors recitation section is an extension of the COMMRC rhetorical process course, with special emphasis on 1) the formulation of productive questions, 2) deliberate, informed invention, and 3) the conception of student-driven projects that leverage students' academic expertise and lived experience for the generation of collaborative analyses and solutions to social, political, economic, and cultural problems. In pursuing these goals, students will examine and, through their individual coursework, enact the dialectic of Aristotelian and sophistic understandings of rhetoric: the discernment of the means of persuasion available to them and the capturing of possibilities in opportune moments.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

COMMRC 0320 - MASS COMMUNICATION AND SOCIETY

Minimum Credits: 3

Maximum Credits: 3

This course is designed to introduce students to the basic concepts of mass communication research and to the history and development of various media (TV., Radio, newspapers, magazines, etc.).

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Historical Analysis General Ed. Requirement, DSAS The Arts General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req., SCI Polymathic Contexts: Soc/Behav. GE. Req., Undergraduate Research

COMMRC 0500 - ARGUMENT

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to fundamental principles of argument, and develops argumentative skills through practice analysis and criticism.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Creative Work General Ed. Requirement, DSAS Creative Work General Ed. Requirement, SCI Expression: Communication General Ed. Req., SCI Expression: Communication General Ed. Req., SCI Polymathic Contexts: Humanistic GE. Req., SCI Polymathic Contexts: Humanistic GE. Req.

COMMRC 0510 - DEBATE

Minimum Credits: 3

Maximum Credits: 3

This course offers academic credit for preparation for, and participation in, intercollegiate debate.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: SCI Expression: Communication General Ed. Req.

COMMRC 0520 - PUBLIC SPEAKING

Minimum Credits: 3

Maximum Credits: 3

This course is designed to help students develop increased skill in public speaking by means of theory and practice. This course covers research, organization, style, delivery, and criticism of informative, deliberative, and ceremonial speeches.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Creative Work General Ed. Requirement, SCI Expression: Communication General Ed. Req., SCI Polymathic Contexts: Humanistic GE. Req.

COMMRC 0530 - INTERPERSONAL COMMUNICATION

Minimum Credits: 3

Maximum Credits: 3

The purpose of this course is to introduce students to theories and models of human communication in the face-to-face communication context. Focus of learning is on skill development; lecture, discussion, and practice of communication skills are used to facilitate student learning.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

COMMRC 0540 - DISCUSSION

Minimum Credits: 3

Maximum Credits: 3

This course is designed to increase skills in critical thinking, decision making, and small group discussion. Students are introduced to theories of group process and practice step-by-step group problem solving related to contemporary issues.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

COMMRC 0550 - SPEECH COMPOSITION

Minimum Credits: 3

Maximum Credits: 3

The course deals with the theory and practice of preparing manuscript speeches. Students will focus on several principles of speech composition, including stages of speech development, general analysis of the occasion, maintaining attention, sources of persuasion through argument and qualities of effective style.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: Writing Intensive Course (WRIT)

COMMRC 0575 - INTRODUCTION TO RADIO PRODUCTION

Minimum Credits: 3

Maximum Credits: 3

This course is designed to cover basic theory and techniques of radio and audio production as well as some basic radio station practices. The course consists of lectures as well as studio sessions featuring equipment demonstrations and production exercises in a professional environment.

Academic Career: Undergraduate

Course Component: Lecture
Grade Component: Letter Grade

COMMRC 1013 - RELIGION RIGHT NOW: MEDIA AND RELIGIOUS NEWS IN CONTEMPORARY AMERICA

Minimum Credits: 3

Maximum Credits: 3

It is apparent that Americans devote enormous media attention to the coverage of celebrities, movies and sports, but deal much less skillfully with news coverage of religion. Yet, a glance at any daily news source, print or digital, reveals the pervasiveness of news that involves religious beliefs, conflicts, and practices, and that requires basic knowledge of religious traditions. The purpose of this course is to develop student skills at reading and interpreting current news stories about religious topics in print and visual media (newspapers, journals, blogs, polls, and television) in order to increase understanding of important religious issues in the contemporary United States, including American coverage of international religious events and leaders. Instruction will include lecture, discussion, film, and small group exercises to report on current events.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

COMMRC 1067 - GLOBAL AND US WOMEN'S RHETORIC

Minimum Credits: 3

Maximum Credits: 3

This course informs students of how global and US women use rhetoric (speeches, writings, symbols and images) to advance their rights and agenda. Students will first read about feminist foremothers' writings as touchstones for understanding how contemporary US women in sports, medicine, science and law negotiate gender equality and rights. Then students will learn about global women's rhetoric. For example, they will examine how women in Africa mobilize for liberation, how Chinese women mediate feminism in a market economy and how women in the Middle East wage everyday resistance against male dominance and clamor for self-autonomy. In addition to reading feminist critical theories and testimonial narratives, a variety of interdisciplinary objects of study such as theater, feature and documentary films, webinar, guest lecture, folk songs and poetry will be incorporated into the course.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Asian Studies, DSAS Diversity General Ed. Requirement, DSAS Global Issues General Ed. Requirement, DSAS Phil. Think or Ethics General Ed. Requirement, Human Rights and Social Justice, SCI Diversity General Ed. Requirements, SCI Polymathic Contexts: Ethical/Policy GE. Req., SCI Polymathic Contexts: Global&Cross Cul GE. Req.

COMMRC 1070 - UNDERGRADUATE RESEARCH PROSEMINAR

Minimum Credits: 3

Maximum Credits: 3

The Undergraduate research experience opens horizons for students to envision pursuing scholarship as a profession. What does it mean to be a professional scholar? How have such conceptions changed through time, and what might the future hold for those who aspire to a 'life of the mind'? The academic research profession increasingly calls on scholars to explain their work to researchers from other fields, frame their research findings as useful contributions to society, and interact with public audiences. Hence a communication-based perspective provides a useful point of departure for students from the natural sciences, social sciences, and humanities alike to explore these opportunities and challenges in a collaborative, interdisciplinary seminar setting.

Academic Career: Undergraduate

Course Component: Seminar
Grade Component: Letter Grade

COMMRC 1071 - PUBLIC AFFAIRS RADIO

Minimum Credits: 3

Maximum Credits: 3

Students produce a weekly 30-minute news/public affairs program to be aired on WPTS Radio, with each student rotating through roles to gain experience in a variety of areas of radio production.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

COMMRC 1072 - KNOWING HUMANS: AN INTRODUCTION TO RESEARCH IN THE HUMANITIES

Minimum Credits: 3

Maximum Credits: 3

Don't you just want to fix the world? Doesn't the world look broken in a thousand ways? Can't university researchers just tell us what to do to make all of this-once and for all-better? This course argues that research can provide no quick and final fixes. To be sure, research offers us lots of fixes, but then many of our fixes turn out to be problems in their own right, and we need to be better at recognizing and articulating the complexity of that kind of unintended consequence. In this course, you'll learn about how a cluster of disciplines called the humanities works on complexities of this kind. Why are our fixes so reliably unpredictable in their consequences? Because human beings and human societies are highly complex and because history compounds change. Created by the Co-Directors of Pitt's Humanities Center, this course wagers that the humanities deal with fields of inquiry where the relation between cases and rules is highly complex. In the real world, no rule can tell you definitively what to do in a particular case. In the real world, we're often called upon to recognize what's novel in an unusual case. And in the real world, we often have to create new rules of our own (where we're not just approximating laws of nature). Such work is both critical and creative: it critiques injustice, and it imagines things otherwise. We'll learn how different forms of humanities research push into these complexities of rules and cases: we'll learn how to work with archives, models, storytelling, feelings, genres, objects, play, games, fragments, commitments, and norms. You'll have the opportunity to articulate a humanities research question that matters to you. And you'll have the chance to develop that question into a research proposal that you can then explore in another class at Pitt or in a paid research opportunity that we'll mentor you toward-like the Humanities Center's own Undergraduate Fellowship.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

COMMRC 1073 - INTERPERSONAL COMMUNICATION FOR THE DIVERSE WORKPLACE

Minimum Credits: 3

Maximum Credits: 3

This course strives to inform and help students develop interpersonal communication skills to succeed in an inclusive workplace. They will learn key theories and concepts such as non-verbal communication, effective listening, teamwork and conflict management. Furthermore, they will examine in-depth cultural and social assumptions that undergird workplace practices, and values and attitudes that motivate managers and co-workers. Key concept under discussion include diversity, equity, inclusion and belonging in the workplace, gender equity, religious diversity, intercultural and cross-cultural competencies, disability advocacy, fostering mental health, and LGBTQ+ rights and activism. Finally, as

health communication plays an important role in public discourse, students will be motivated to develop communication competencies to advance equity in health practices.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

COMMRC 1101 - EVIDENCE

Minimum Credits: 3

Maximum Credits: 3

This course examines the nature and structure of evidence and reason-giving in everyday discourse. Students develop critical skills in evaluating argument and reasoning by examining the evidential requirements of argument in specific rhetorical contexts; science, philosophy, and politics.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

COMMRC 1102 - ORGANIZATIONAL COMMUNICATION

Minimum Credits: 3

Maximum Credits: 3

Students in this course are provided with an overview of the relationship between communication and organizing processes. The course emphasizes theories, principles, and concepts of organizational communication. Students learn to analyze the communication which occurs in organizations to recognize sources of communication breakdown and develop an awareness of strategies for prevention and/or resolution of communication on breakdown.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (COMMRC 0300 or 0030 or 0100 or 0101 or 7300) and [ENGCOMP 0200 or (ENGCOMP 0203 or 0205 or 0207 or 0208 or 0250 or FP 0003 or 0006 or ENGCOMP 0004 or 0006 or 0020 or ENG 0102)]

Course Attributes: SCI Expression: Communication General Ed. Req.

COMMRC 1103 - RHETORIC AND CULTURE

Minimum Credits: 3

Maximum Credits: 3

This course explores the constitutive role that rhetoric plays in the formation of culture. Cultural texts and events will be examined both as reflecting and signifying practices. The course focuses on rhetoric's relation to ideology, power, and desire, as well as to class formations and sexual divisions. Selecting two of the above perspectives, students will examine how cultural practices constitute and are constituted by rhetoric.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (COMMRC 0310 or 0320 or 0081 or COMM 0102) and ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006)

Course Attributes: Undergraduate Research, Writing Intensive Course (WRIT)

COMMRC 1104 - POLITICAL COMMUNICATION

Minimum Credits: 3

Maximum Credits: 3

This course examines the way methods of symbol use are employed in the political arena. Persuasive techniques will be studied as they are used in public debates over issues of policy. Rhetorical criticism will be the primary mode of analysis.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (COMMRC 0310 or 0320 or 0081 or COMM 0102) and [ENGCOMP 0200 or (ENGCOMP 0203 or 0205 or 0207 or 0208 or 0250 or FP 0003 or 0006 or ENGCOMP 0004 or 0006 or 0020 or ENG 0102)]

Course Attributes: David C. Frederick Honors College Course

COMMRC 1105 - TELEVISION AND SOCIETY

Minimum Credits: 3

Maximum Credits: 3

This course explores the relationship between television and society. It familiarizes students with the history of the broadcast industry along with related legal, political, and economic issues. The course focuses on analyzing various television programs as constitutive of and constituted by social relations (class, gender, and race).

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (COMMRC 0320 or COMM 0102) and [ENGCOMP 0200 or (ENGCOMP 0203 or 0205 or 0207 or 0208 or 0250 or FP 0003 or 0006 or ENGCOMP 0004 or 0006 or 0020 or ENG 0102)]

Course Attributes: Children's Literature

COMMRC 1106 - SMALL GROUP COMMUNICATION

Minimum Credits: 3

Maximum Credits: 3

Principles of small group communication are examined in this course. In particular, the examination will reveal the principles of group entry, group formation, group cohesiveness, group verbal and nonverbal message exchanges, group leadership, group problem solving and discussion, and group performance and satisfaction. Individual beliefs, attitudes and behaviors will be compared and contrasted with group beliefs, attitudes and behaviors.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (COMMRC 0300 or 0030 or 0100 or 7300 or COMM 0101) and [ENGCOMP 200 or (ENGCOMP 0203 or 0205 or 0207 or 0208 or 0250 or 0210 or 0212 or 0213 or FP 0003 or 0006 or ENGCOMP 0004 or 0006 or 0020 or ENG 0102)]

Course Attributes: Urban Studies

COMMRC 1109 - NONVERBAL COMMUNICATION

Minimum Credits: 3

Maximum Credits: 3

The purpose of this course is to examine the ways we communicate nonverbally. By nonverbal communication is meant that form of communication wherein messages are sent by virtue of an agent's physical characteristics, adornment, eye behavior, design and selection of environment, spatial relationships, utilization of time, touching behavior, body movements, the choice of objects to fill space, and vocal behavior. Principles and applications of nonverbal communication are discussed.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (COMMRC 0300 or 0030 or 7300 or COMM 0101) and [ENGCOMP 0200 or (ENGCOMP 0203 or 0205 or 0207 or 0208 or 0250 or FP 0003 or 0006 or ENGCOMP 0004 or 0006 or 0020 or ENG 0102)]

COMMRC 1110 - THEORIES OF INTERPERSONAL COMMUNICATION

Minimum Credits: 3

Maximum Credits: 3

The purpose of this course is to introduce students to the ways in which researchers conceptualize and study interpersonal communication. Emphasis is upon the various issues which different conceptualizations raise in the study of human relationships. Students will have the opportunity to test the relevancy of insights each conceptualization provides for understanding the communication practices found in natural interactions and personal experience.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (COMMRC 0300 or 0030 or 0100 or 7300 or COMM 0101) and [ENGCOMP 0200 or (ENGCOMP 0203 or 0205 or 0207 or 0208 or 0250 or FP 0003 or 0006 or ENGCOMP 0004 or 0006 or 0020 or ENG 0102)]

COMMRC 1111 - THEORIES OF PERSUASION

Minimum Credits: 3

Maximum Credits: 3

This course surveys theories of persuasion that have been articulated during the twentieth century. It seeks to compare and contrast research about how the spoken word and the visual image influence public belief and action.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (COMMRC 0310 or 0320 or 0081 or COMM 0102) and (COMMRC 0520 or 0052 or COMM 0104) and [ENGCOMP 0200 or (ENGCOMP 0203 or 0205 or 0207 or 0208 or 0250 or 0210 or 0212 or 0213 or FP 0003 or 0006 or ENGCOMP 0004 or 0006 or 0020 or ENG 0102)]

Course Attributes: Global Studies

COMMRC 1112 - THEORIES OF RHETORIC

Minimum Credits: 3

Maximum Credits: 3

The purpose of this course is to introduce students to major theories of rhetoric ranging from the sophists to some modern theorists.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (COMMRC 0310 or 0081) and (COMMRC 0520 or 0052 or COMM 0104) and ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006)

Course Attributes: Writing Intensive Course (WRIT)

COMMRC 1114 - FREEDOM OF SPEECH AND PRESS

Minimum Credits: 3

Maximum Credits: 3

The purpose of the course is to provide students with a critical understanding of the historical themes and contemporary issues involved in the debate over free speech. This course examines philosophies of expression from Plato through the most recent supreme court decisions. Study focuses on cases, major doctrines, and competing interpretations of the first amendment to explore the freedoms and limits of individual expression and regulation of communication industries.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (COMMRC 0310 or 0320 or 0081 or COMM 0102) and [ENGCOMP 0200 or (ENGCOMP 0203 or 0205 or 0207 or 0208 or 0250 or 0210 or 0212 or 0213 or FP 0003 or 0006 or ENGCOMP 0004 or 0006 or 0020 or ENG 0102)]

Course Attributes: West European Studies

COMMRC 1115 - AFRICAN AMERICAN RHETORIC

Minimum Credits: 3

Maximum Credits: 3

This course focuses on race and the rhetoric of history in the United States, with an emphasis on Black freedom struggles in the 20th century. Readings and discussions will address radical activism in the interwar years, Black women's wartime organizing, mass mobilizing strategies in civil rights' "classical phase," and articulations of Black Power and Black feminism. Throughout, students will develop skills in archival analysis: composing and pursuing a research question, presenting selected findings, and reflecting on the experience of archival research.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

COMMRC 1116 - RHETORIC OF THE AMERICAN COUNTERCULTURE

Minimum Credits: 3

Maximum Credits: 3

This course is concerned with social protest and the modern conception of the outsider, people and groups who choose to separate themselves, or are unwillingly separated, philosophically and ideologically from the society within which they live. One of the most recognizable examples of living the life of the outsider was embodied in the beat generation of the 1940's and 1950's, who embraced self-indulgence as well as literary themes of disenchantment and disengagement. A second example is the counterculture of the 1960's, the hippie generation, who tended to express themselves more in mass countercultural themes like student anti-war activism, popular, socially activist music, and film. Requirements include: discussion participation, 3 short papers (3 pages), 3 longer papers (8 pages), and one class presentation.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: Writing Intensive Course (WRIT)

COMMRC 1117 - PROPAGANDA AND MISINFORMATION IN THE 21ST CENTURY

Minimum Credits: 3

Maximum Credits: 3

This course explores propaganda, misinformation, and disinformation from a multidisciplinary argument perspective, including their historical development and current prevalence. Students will engage with a variety of primary texts and

academic commentaries on topics such as conspiracy theories, hoaxes, scams, motivated reasoning, and scientific distortions.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (COMMRC 0310 or 0320 or 0081 or COMM 0102) and [ENGCOMP 0200 or (ENGCOMP 0203 or 0205 or 0207 or 0208 or 0250 or FP 0003 or 0006 or ENGCOMP 0004 or 0006 or 0020 or ENG 0102)]

COMMRC 1119 - PRESIDENTIAL RHETORIC 2

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the rhetorical analysis of presidential addresses as well the communication styles and methods of U.S. Presidents from Dwight Eisenhower through and including George W. Bush it is important to understand that while the primary focus of the course is on the analysis of the political communication style of the presidents, in order to be able to analyze and evaluate the complex nature of both style and content of the addresses and comments, it is necessary to have an awareness of the background, history and events of the day as each may have impacted and/or precipitated the addresses/comments. Thus, an overview of those critical areas as well as basic communication theory and audience analysis will be an integral part of the course. Course components will include two written projects, speech analyses, one of which will serve as the basis for an individual oral presentation; one group project, a midterm and a final exam.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (COMMRC 0310 or 0320 or 0081 or COMM 0102) and [ENGCOMP 0200 or (ENGCOMP 0203 or 0205 or 0207 or 0208 or 0250 or FP 0003 or 0006 or ENGCOMP 0004 or 0006 or 0020 or ENG 0102)]

COMMRC 1120 - RHETORIC OF COLD WAR

Minimum Credits: 3

Maximum Credits: 3

Course examines selected moments in rhetorical aspects of the cold war with a focus on language, perceptions, arguments and the formation of public policy.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (COMMRC 0310 or 0320 or 0081 or COMM 0102) and ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006)

Course Attributes: Russian & East European Studies, Writing Intensive Course (WRIT)

COMMRC 1121 - HISTORY OF MASS MEDIA

Minimum Credits: 3

Maximum Credits: 3

This course provides an in-depth historical examination of U.S. Media (newspapers, magazines, radio, television and/or advertising). Emphasis is placed on the media's technological, political and cultural impact. Topics may vary depending on the particular historical period to be examined.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (COMMRC 0320 or COMM 0102) and [ENGCOMP 0200 or (ENGCOMP 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0250 or FP 0003 or 0006 or ENGCOMP 0004 or 0006 or 0020 or ENG 0102)]

COMMRC 1122 - MEDIA CRITICISM

Minimum Credits: 3

Maximum Credits: 3

This course is designed to introduce students to major trends in media criticism (e.G., Psychoanalysis, genre analysis, feminist theory, and cultural studies). Course readings and discussions will focus primarily on television texts.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (COMMRC 0320 or COMM 0102) and ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006); MIN GRADE 'C' for all listed courses

Course Attributes: Children's Literature, DSAS Diversity General Ed. Requirement, Global Studies, Writing Intensive Course (WRIT)

COMMRC 1123 - RHETORICAL CRITICISM

Minimum Credits: 3

Maximum Credits: 3

The course on rhetorical criticism focuses on the history, methods, and practice of rhetorical criticism in American universities during the twentieth century. The course has been designed to help the student become acquainted with contemporary methods of rhetorical criticism through a combination of lectures, discussions, and practical applications. In addition, the course has been designed to help the student improve their writing abilities.

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (COMMRC 0310 or 0520 or 0052 or 0081 or COMM 0104) and ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006)

Course Attributes: Writing Intensive Course (WRIT)

COMMRC 1125 - MEDIA THEORY

Minimum Credits: 3

Maximum Credits: 3

This course examines the major theoretical approaches in contemporary media studies. Emphasis is placed on understanding the basic tenets of these theoretical models and how they are applied in analyses of media texts.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (COMMRC 0320 or COMM 0102) and [ENGCOMP 0200 or (ENGCOMP 0203 or 0205 or 0210 or 0212 or 0213 or 0207 or 0208 or 0250 or FP 0003 or 0006 or ENGCOMP 0004 or 0006 or 0020 or ENG 0102)]

COMMRC 1126 - MEDIA AND CONSUMER CULTURE

Minimum Credits: 3

Maximum Credits: 3

This course will examine consumer culture in the twentieth and twenty-first century us. It examines advertising, the rise of the brand, and their roles in the commercialization of mass media. Of particular importance will be the role that race, class, and gender have played in shaping consumer culture (and vice versa), as well as the significance of the shift from a society based on an understanding of citizens based on democratic practices to one based on consumerist practices.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (COMMRC 0320 or COMM 0102) and [ENGCOMP 0200 or (ENGCOMP 0203 or 0205 or 0207 or 0208 or 0250 or FP 0003 or 0006 or ENGCOMP 0210 or 0212 or 0213 0004 or 0006 or 0020 or ENG 0102)]; MIN GRADE 'C' for all listed courses

Course Attributes: DSAS Diversity General Ed. Requirement, Undergraduate Research

COMMRC 1143 - KNOWLEDGE, POWER, AND DESIRE

Minimum Credits: 3

Maximum Credits: 3

This course examines issues of power, desire and knowledge in the work of Michel Foucault, and contrasts them with ideas of knowledge production in contemporary Anglo-American philosophy of science.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (COMMRC 0310 or 0081) and ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006)

Course Attributes: Writing Intensive Course (WRIT)

COMMRC 1147 - THE RHETORIC OF SCIENCE

Minimum Credits: 3

Maximum Credits: 3

The course examines how scientists persuade and dissuade each other and broader publics in the creation and dissemination of knowledge. It addresses such topics as: rhetoric and the production of scientific findings, communication of scientific knowledge to various publics, persuasive influences on funding decisions, how the public might better understand or influence scientific processes, and the intersection of science and public policy. These will be studied in the context of major science-related controversies of the recent past.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (COMMRC 0310 or 0081) and ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006)

Course Attributes: Global Studies, Writing Intensive Course (WRIT)

COMMRC 1148 - RHETORIC AND HUMAN RIGHTS

Minimum Credits: 3

Maximum Credits: 3

This course focuses upon discourse about human rights--both the affirmation and the denial of human rights. The course also examines the practice of rhetorical criticism.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (COMMRC 0310 or 0081) and ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006)

Course Attributes: DSAS Diversity General Ed. Requirement, DSAS Phil. Think or Ethics General Ed. Requirement, Global Studies, SCI Polymathic Contexts: Ethical/Policy GE. Req., Undergraduate Research, Writing Intensive Course (WRIT)

COMMRC 1149 - ENVIRONMENTAL RHETORIC

Minimum Credits: 3

Maximum Credits: 3

The purpose of this course is to introduce upper division undergraduates to the most significant rhetorical arguments marshalled by all sides in contemporary American environmental controversies. The course is meant to focus primarily on the practical aspects of environmental controversy while connecting those aspects to the theoretical foundations of environmental rhetoric. Lecture with robust discussion is the preferred teaching method. This class is appropriate for upper division students with an interest in the environment from any discipline, not only Communication. Students should leave the course with a rigorous understanding of how and why contemporary environmental controversies arise and how they constitute one of humanity's most critical challenges.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: MCSI - Sustainability Related

COMMRC 1151 - BRITISH BROADCASTING TODAY

Minimum Credits: 3

Maximum Credits: 3

To examine the variety and range of programme genres broad cast on British TV and radio. Reference will be made to the philosophy and industry structures which nurture them. New developments in technology, regulation and international markets will be considered as will scheduling issues. The cultural underpinnings of the system will be analyzed and internal industry and political debates will be addressed.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Attributes: West European Studies

COMMRC 1152 - DIGITAL AND PROFESSIONAL COMMUNICATION

Minimum Credits: 3

Maximum Credits: 3

In this course, students will examine and perform many different types of oral and written business communication. Special attention will be paid to communication ethics, leadership skills, and learning to work within a team.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

COMMRC 1154 - THE RHETORIC OF SOCIAL MOVEMENTS AND CYBER-PROTEST

Minimum Credits: 3

Maximum Credits: 3

Through active reading, writing, participation in discussions, and analysis of messages (speeches, posters,

advertisements, slogans, blogs, websites, movies), students will be introduced to theory and research pertaining to persuasion, organized social advocacy and protest. Students will engage in critical thinking exercises while applying what they have learned in their studies of mass communication, rhetoric, and persuasion to the analysis of messages published by historic and current social movements.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

COMMRC 1156 - ETHICS AND MEDIA

Minimum Credits: 3

Maximum Credits: 3

This course will address the principal ethical issues facing print and broadcast journalism. It will consider the practical dilemmas reporters and editors have to deal with and relate them to a moral framework. The focus will be on the real time arguments that arise almost daily in media coverage of matters of public controversy - crime, war, privacy and the like. The course objectives are to learn how to evaluate the performance of the media and to help students develop their own ethical philosophy. Problems of regulation and codes of practice will also be examined. Students will be able to take advantage of London's global importance as a media hub and the distinctive media culture of the UK through a program of case studies, visits and guest lectures by practitioners.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

COMMRC 1160 - VISUAL RHETORIC

Minimum Credits: 3

Maximum Credits: 3

This course centers on research concerning visual rhetoric. It will concentrate primarily on a range of interpretive and critical approaches for studying instances of visual communication. Students will write three papers demonstrating their ability to analyze and interpret visual texts. The method of instruction includes lecture, discussion, film and practice workshops. Considerations of gender, sex, race, sexuality, and class will be interwoven throughout the course materials and discussions.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) and (COMMRC 0310 or 0081)

Course Attributes: DSAS Diversity General Ed. Requirement, SCI Diversity General Ed. Requirements, Undergraduate Research, Writing Intensive Course (WRIT)

COMMRC 1161 - COMMUNICATION ETHICS

Minimum Credits: 3

Maximum Credits: 3

Contemporary society offers a wide variety of topics for ethical consideration: deception, lying, fidelity in relationships, hate speech, harassment, privacy, intellectual property, pornography and many others. This class examines the ethical dimensions of communication through the prism of case studies. Students are introduced to traditional forms of ethical reasoning as well as emerging concerns raised by the internet and digital media. One major question that the course addresses is the following: do the internet and new information technologies represent qualitatively new ethical challenges or are these versions of traditional ethical dilemmas? The bulk of class time uses discussion and case studies to emphasize the practice of ethical deliberation and the ability to reason about ethical issues and problems.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: Writing Intensive Course (WRIT)

COMMRC 1162 - INVENTION: WHERE DO GOOD IDEAS COME FROM?

Minimum Credits: 3

Maximum Credits: 3

This course helps us investigate questions that will be crucial for tomorrow's communities of inquiry. How should we understand creativity, imagination, and invention? What are the conditions most conducive to innovation? What can histories of creative individuals and creative groups tell us about the origins of, to use the TED lingo, "ideas worth spreading"? This course examines creativity in a variety of contexts, both scientific and artistic. It draws on the best work in a number of disciplines, principally rhetoric but also philosophy of science, literary theory, economics, and intellectual history. And students will have the opportunity to develop projects on case studies of their choosing. The course satisfies three credit hours toward the interdisciplinary core seminar coursework requirement in the Honors College Certificate in Undergraduate Studies. Students without the GPA or course prerequisites designated by the UHC may also enroll with the permission of the instructor.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: DSAS Historical Analysis General Ed. Requirement, DSAS Phil. Think or Ethics General Ed. Requirement, SCI Polymathic Contexts: Ethical/Policy GE. Req., SCI Polymathic Contexts: Soc/Behav. GE. Req., Undergraduate Research, Writing Intensive Course (WRIT)

COMMRC 1170 - CROSS CULTURAL COMMUNICATION

Minimum Credits: 3

Maximum Credits: 3

The world seems to be in constant flux: ideological dissimilarities, ethnic strife and intercultural conflicts. One poses the question: are there any common grounds peoples from different traditions, cultures and society can seek? The answer is yes. It will require us to develop cross-cultural communication competence - respect differences, listen compassionately, be empathetic, cooperate and have an open mind. This class attempts to help students establish these skills. Examining an array of cross-cultural issues, it helps students establish cross cultural competence, an instrument that resolves conflicts and achieves understanding. Students will have an opportunity, in addition to attending lectures and reading books and articles, listen to guest lectures, write and present book reports, watch multimedia materials and design diversity posters. This class fulfills DAS General Education Cross-Cultural Awareness requirement. It is a 1000-level upper level communication course counting toward a major in communication. It is cross-listed with Global Studies program, earning credits toward a certificate in global studies or global health.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Attributes: DSAS Cross-Cult. Awareness General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

COMMRC 1175 - COMMUNICATION AND GLOBAL COMPETENCE

Minimum Credits: 3

Maximum Credits: 3

With the rise of global mobility and communication, encountering people from a variety of cultures, and the need for effective communication, is commonplace. This course explores the interaction between culture and communication and introduces students to the knowledge and skills necessary to attain global competence. In addition, this course introduces the construct of global competence; creates the opportunity to analyze and evaluate how our own cultural identity influences communication with others; engages interaction with the host culture; and prepares the students with knowledge and skills to be effective and ethical intercultural communicators. This class is held in Dublin and will include lectures, class discussions, simulations, interactive examples, case studies, media presentations cultural encounters, and field experiences.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Attributes: SCI Expression: Communication General Ed. Req., Study Abroad

COMMRC 1181 - HEALTH COMMUNICATION

Minimum Credits: 3

Maximum Credits: 3

COMMRC 1730 provides a broad introduction to the emerging field of health communication. Students will become cognizant of some of the critical issues in health-related interactions. Using texts and examples of clinical discourse, the course will examine theories of health communication, including scholarship on provider-client communication, intercultural health care, models of illness, and alternative health practices. Students will have opportunities to conduct their own analysis reflecting on current health communication practices.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

COMMRC 1182 - MEDIA RELATIONS

Minimum Credits: 3

Maximum Credits: 3

Today's public relations professionals should understand and be competent in many areas of communication--and one of the chief areas is media relations. This course will focus on what defines media relations professionals: Who are they? What do they do? How do they get their stories? What tools are needed in today's media environment? You will learn how to best engage, connect and tell clients' stories and brand messages to a multitude of media outlets, using a wide variety of strategic multimedia tactics and methods. One critical skill both expected and developed in media relations is the ability to write well since most of the work communicating with journalists and other publics involves clear, concise, and persuasive writing.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

COMMRC 1183 - LATINA/O/X MEDIA STUDIES

Minimum Credits: 3

Maximum Credits: 3

This course addresses historical, political, economic, and cultural issues tied to Latina/o/x media. Students will explore the dynamic and contested construction of Latinidad. This course emphasizes interdisciplinary approaches to Latina/o/xs and media. Students will explore case studies in the production, representation, and reception of Latina/o/x media that will be contextualized by, and connected to, broad theoretical concepts in Latina/o/x studies. The significance of Latina/o/x media is explored in this course through analysis of 1) the institutional production of

Latina/o/x texts, 2) the construction of Latina/o/x identity in media, 3) the issues affecting Latina/o/x consumer agency, 4) the role and relationship of Latina/o/x media to "mainstream" media.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

COMMRC 1184 - DISNEY

Minimum Credits: 3

Maximum Credits: 3

This class will examine Disney both as an innovative business model and as a pervasive part of American culture. As such, we will spend part of the semester investigating Disney's business methods and part of the semester delving into how Disney interacts with and shapes American culture. Because this is an upper-level Communication class, you will also work on your group work and public speaking skills.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

COMMRC 1185 - HISTORY OF THE SITCOM

Minimum Credits: 3

Maximum Credits: 3

This course examines the history of the American sitcom. We will learn the generic conventions of the sitcom and how they have changed over time as well as examining the social, political, and economic aspects of the American television industry. Students will both read about and perform television criticism as well as practice their public speaking and teamwork skills.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

COMMRC 1186 - MEDIA LAW

Minimum Credits: 3

Maximum Credits: 3

This course is designed to introduce students to laws and regulations affecting the mass media in the United States. The philosophical and theoretical bases of press freedom will be examined along with the legal interrelationship of the government and the media. Discussions will focus on legal limitations and privileges affecting the press including the law of libel, free press and fair trial, the right of privacy, advertising, development of obscenity law, copyright and access to the media.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: COMMRC 0320 or FMST 0120 or ENGFLM 0400

COMMRC 1520 - ADVANCED PUBLIC SPEAKING

Minimum Credits: 3

Maximum Credits: 3

This course teaches students advanced skills needed in the preparation, delivery, and evaluation of formal public address. Advanced public speaking extends what was learned in the introductory public speaking course by examining more advanced theories and strategies of public address, critically evaluating public discourse in a variety of settings and sharpening the extemporaneous delivery skills of the student

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: COMMRC 0520

COMMRC 1710 - SENIOR THESIS IN COMMUNICATION

Minimum Credits: 3

Maximum Credits: 3

Research on a special project in rhetoric, communication, or media. The study will be embodied in a thesis supervised by the instructor and approved by additional departmental faculty.

Academic Career: Undergraduate

Course Component: Thesis Research

Grade Component: Satisfactory/No Credit

COMMRC 1730 - SPECIAL TOPICS IN COMMUNICATION

Minimum Credits: 3

Maximum Credits: 3

This course covers a specialized topic in communication. Topics vary every semester.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (COMMRC 0300 or 0030 or 0100 or 7300 or COMM 0101) and ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006)

Course Attributes: Undergraduate Research, Writing Intensive Course (WRIT)

COMMRC 1731 - SPECIAL TOPICS IN RHETORIC

Minimum Credits: 3

Maximum Credits: 3

This course covers a specialized topic in rhetoric. Topics vary every semester.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (COMMRC 0310 or 0081) and ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 NEED TO ADD IN THE DESCRIPTION: or ENGCOMP 0213 or ENGCOMP 0214) or ENGFLM 0210 or FP (0003 or 0006)

Course Attributes: African Studies, Undergraduate Research, Writing Intensive Course (WRIT)

COMMRC 1732 - SPECIAL TOPICS IN MASS COMMUNICATION

Minimum Credits: 3

Maximum Credits: 3

This course covers a specialized topic in mass communication. Topics vary every semester.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (COMMRC 0320 or COMM 0102) and ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 NEED TO ADD IN THE DESCRIPTION: or

ENGCOMP 0213 or ENGCOMP 0214) or ENGFLM 0210 or FP (0003 or 0006)
Course Attributes: Undergraduate Research, Writing Intensive Course (WRIT)

COMMRC 1900 - COMMUNICATION INTERNSHIP

Minimum Credits: 1

Maximum Credits: 3

Internships provide practical work experience related to the student's course of study.

Academic Career: Undergraduate

Course Component: Internship

Grade Component: Satisfactory/No Credit

Course Attributes: Undergraduate Internship

COMMRC 1901 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 3

Independent study is a program of academic reading and research taken under the direction of a faculty sponsor.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: LG/SNC Elective Basis

COMMRC 1904 - UNDERGRADUATE TEACHING EXPERIENCE IN COMMUNICATION

Minimum Credits: 1

Maximum Credits: 3

Provides an opportunity for qualified Undergraduate students, under the guidance of a classroom teacher, to have a first-hand experience with peer mentoring and classroom instruction as a UTA. Participation is by instructor invitation only.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: Satisfactory/No Credit

COMMRC 1905 - DIRECTED RESEARCH

Minimum Credits: 1

Maximum Credits: 3

A course for upper level students who have completed at least 45 credits (12 credits in COMMRC) who wish to conduct field research in communication. The course is an opportunity for students to create a semester-long self-designed project resulting in a body of advanced work. Regular progress reports and critiques are scheduled with the instructor individually.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SNC Elective Basis

Computer Engineering

COE 0445 - DATA STRUCTURES

Minimum Credits: 3

Maximum Credits: 3

This course emphasizes the study of the basic data structures of computer science (stacks, queues, trees, lists) and their implementations using the java language. Included in this study are programming techniques which use recursion, reference variables, and dynamic memory allocation. Students in this course are also introduced to various searching and sorting methods and are expected to develop an intuitive understanding of the complexity of these algorithms.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: COE 0401 or CS 0401; PLAN: Computer Engineering

COE 1885 - DEPARTMENTAL SEMINAR

Minimum Credits: 0

Maximum Credits: 0

Seminars are designed to acquaint the student with aspects of engineering that are not normally encountered in classes and school activities and include a wide range of topics such as the significance of engineering as a profession, ethical problems in engineering, and skills required for a successful engineering career.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: H/S/U Basis

Course Requirements: PROG: Swanson School of Engineering

Computer Science

CS 0004 - INTRODUCTION TO COMPUTER PROGRAMMING-BASIC

Minimum Credits: 3

Maximum Credits: 3

This is a first course in computer science. It is designed to be of special interest to students majoring in one of the social sciences or humanities. Objectives of this course include use of the computer in an interactive environment; problem analysis and the development of algorithms; learning the basic language; designing; coding; and documenting programs using techniques of good programming style.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Algebra General Ed. Requirement, DSAS Algebra General Ed. Requirement, DSAS Quant.-Formal Reason General Ed. Requirement, DSAS Quant.-Formal Reason General Ed. Requirement

CS 0007 - INTRODUCTION TO COMPUTER PROGRAMMING

Minimum Credits: 3

Maximum Credits: 3

This is a first course in computer science programming. It is recommended for those students intending to major in computer science who do not have the required background for the School of Computing and Information's intermediate programming class. It may also be of interest to students majoring in one of the social sciences or humanities. The focus of the course is on problem analysis and the development of algorithms and computer programs in a modern high-level language.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: Enrollment blocked if currently or previously enrolled in CS 0401 or CMPINF 0401 or CS

0422 or CS 0417 or CS 0457 or CS 0445 or CS 0455

Course Attributes: DSAS Algebra General Ed. Requirement, DSAS Quant.-Formal Reason General Ed. Requirement

CS 0008 - INTRODUCTION TO COMPUTER PROGRAMMING WITH PYTHON

Minimum Credits: 3

Maximum Credits: 3

This course is designed as a first course in computer science programming. It is recommended for those students majoring in one of the natural sciences, social sciences, or humanities who wish to learn the fundamentals of programming. It is also useful to students intending to major in computer science who do not have the required background for CS 0401. The focus of this course is on problem analysis, the development of algorithms and computer programs in python. Instruction will be provided to students interested in taking CS 401 in converting python programs to Java.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Quant.-Formal Reason General Ed. Requirement, DSAS Quant.-Formal Reason General Ed. Requirement

CS 0010 - INTRODUCTION TO COMPUTING FOR SYSTEMS ENGINEERS

Minimum Credits: 4

Maximum Credits: 4

All of the CS 001X courses will introduce students to the concepts of computing and computer programming. Students in these courses will learn how a computer works and how to write programs in order to use the computer as a problem solving tool. A major focus of the class will be on developing problem-solving skills (e.g., how to decompose a problem into more manageable parts and how to combine those parts into an overall solution). CS 0010 in particular will focus on problems related to IoT and engineering. Students will be required to purchase a Raspberry Pi and sensors in order to complete the projects and labs assigned throughout the course.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

CS 0011 - INTRODUCTION TO COMPUTING FOR SCIENTISTS

Minimum Credits: 4

Maximum Credits: 4

All of the CS 001X courses will introduce students to the concepts of computing and computer programming. Students in these courses will learn how a computer works and how to write programs in order to use the computer as a problem solving tool. A major focus of the class will be on developing problem-solving skills (e.g., how to decompose a problem into more manageable parts and how to combine those parts into an overall solution). CS 0011 in particular will focus on problems related to the natural sciences with an emphasis on computational biology. Domain-specific projects and labs will be assigned throughout the course to encourage students in the natural sciences to apply computing to their field of study.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Quant.-Formal Reason General Ed. Requirement

CS 0012 - INTRODUCTION TO COMPUTING FOR THE HUMANITIES

Minimum Credits: 4

Maximum Credits: 4

All of the CS 001X courses will introduce students to the concepts of computing and computer programming. Students in these courses will learn how a computer works and how to write programs in order to use the computer as a problem solving tool. A major focus of the class will be on developing problem-solving skills (e.g., how to decompose a problem into more manageable parts and how to combine those parts into an overall solution). CS 0012 in particular will focus on problems related to the humanities and allied social sciences. Domain-specific projects and labs will be assigned throughout the course to encourage students in these fields to apply computing to their studies.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Quant.-Formal Reason General Ed. Requirement

CS 0090 - SUSTAINABILITY AND COMPUTING

Minimum Credits: 3

Maximum Credits: 3

What is the environmental impact of websites such as Facebook or Amazon? How is society affected by throwing away old computers? The purpose of this course is to introduce the intersection of computers and society. Sustainability will be used as a concept to bridge the tradeoffs between technological and ecological forces. Topics include but are not limited to: energy production, e-books, telecommuting and e-waste. No computer programming or math background required.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

CS 0131 - SOFTWARE FOR PERSONAL COMPUTING

Minimum Credits: 3

Maximum Credits: 3

An intermediate-level course in computer science for students majoring in areas other than computer science. Objectives include a non-technical study of the windows NT operating system; development of applications using software selected from the principal areas of applications for personal computing. These include word-processing (MS Word), spreadsheets (MS Excel), and relational databases (MS Access).

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

CS 0134 - WEB SITE DESIGN AND DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

This course will provide a basic understanding of the methods and techniques of developing a simple to moderately complex web site. Using the current standard web page language, students will be instructed on creating and maintaining a simple web site. After the foundation language has been established, the aid of an internet editor will be introduced. A second web-based language will be included to further enhance the web sites.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

CS 0155 - DATA WITCHCRAFT

Minimum Credits: 3

Maximum Credits: 3

This course is an Introduction to Data Science for Beginners, designed as a second course in computer science for students who already have some programming background. The course aims to introduce students to basic data management technologies and data analytics skills while building their programming expertise with specific data-related skills and hands-on experience. We will use real-life examples/data to the extent possible and utilize the Python programming language for all projects

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: CS 0007 or 0010 or 0011 or 0012 or CMPINF 0401 or CS 0401 or CS 0417 or CS 0457 or CS 0422; Enrollment blocked if currently or previously enrolled in CS 0445 or 0455 or INFSCI 0510

Course Attributes: DSAS Quant.-Formal Reason General Ed. Requirement

CS 0207 - JAVA FOR INTERMEDIATE PROGRAMMERS

Minimum Credits: 1

Maximum Credits: 1

This course is designed to transition students who can program at an intermediate level into the Java programming language. It focuses on the Java object model and object-oriented programming with Java.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: INFSCI 0201 or ECE 0301; Enrollment blocked if currently or previously enrolled in CS 0401 or CMPINF 0401 or CS 0422 or CS 0417 or CS 0457 or CS 0445 or CS 0455

CS 0241 - NON-JAVA INTERMEDIATE PROGRAMMING

Minimum Credits: 4

Maximum Credits: 4

This course is a rigorous introduction to the fundamental concepts and techniques of computer programming using a programming language other than Java.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

CS 0245 - NON-JAVA ALGORITHMS AND DATA STRUCTURES 1

Minimum Credits: 3

Maximum Credits: 3

This course emphasizes the study of the basic data structures of computer science (stacks, queues, trees, lists) and their implementations using a programming language other than Java. Included in this study are programming techniques that use recursion, reference variables, and dynamic memory allocation. Students in this course are also introduced to various searching and sorting methods and are expected to develop an intuitive understanding of the complexity of these algorithms.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

CS 0251 - NON-JAVA ALGORITHMS AND DATA STRUCTURES 2

Minimum Credits: 3

Maximum Credits: 3

As the second in a two-course sequence on algorithms and data structures, this course covers a broad range of the most commonly used algorithms. Some examples include algorithms for searching, encryption, compression, graphs, and dynamic programming. The students will implement and test several algorithms. The course is programming intensive, focusing on a programming language other than Java.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

CS 0334 - INTERMEDIATE WEB SITE DESIGN AND DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

The course will consist of advanced implementations of both markup as well as scripting languages. In addition, students will be introduced to a graphical interface application that will allow them to explore concepts of server side web development. A reflective programming language and database application will be used to introduce the server side web development concepts.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: CS 0007 or 0134 or 0401 or INFSCI 0017 (Min Grade 'C' or Transfer)

CS 0401 - INTERMEDIATE PROGRAMMING USING JAVA

Minimum Credits: 4

Maximum Credits: 4

This course is a rigorous introduction to the fundamental concepts and techniques of computer programming using the java programming language. This is a first course for students who intend to major in computer science.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Quant.-Formal Reason General Ed. Requirement, DSAS Quant.-Formal Reason General Ed. Requirement

CS 0441 - DISCRETE STRUCTURES FOR CS

Minimum Credits: 3

Maximum Credits: 3

The purpose of this course is to understand and use (abstract) discrete structures that are backbones of computer science. In particular, this class is meant to introduce logic, proofs, sets, relations, functions, counting, and probability, with an emphasis on applications in computer science.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: CREQ: MATH 0220 or 0230 or 0235 or 0140 or 0221 or 0231 (Min Grade 'C' or Transfer) or (Plan: CSCI-MN and MATH 0120)

CS 0445 - ALGORITHMS AND DATA STRUCTURES 1

Minimum Credits: 3

Maximum Credits: 3

This course emphasizes the study of the basic data structures of computer science (stacks, queues, trees, lists) and their implementations using the java language. Included in this study are programming techniques that use recursion, reference variables, and dynamic memory allocation. Students in this course are also introduced to various searching and sorting methods and also expected to develop an intuitive understanding of the complexity of these algorithms.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: CMPINF 0401 or CS 0401 or COE 0401 or 0422 or CIST 0150 or CS 0207 (MIN GRADE 'C' or Transfer); Enrollment blocked if enrolled or previously enrolled in CS 0245

CS 0447 - COMPUTER ORGANIZATION AND ASSEMBLY LANGUAGE

Minimum Credits: 3

Maximum Credits: 3

The purpose of this course is to study the components of computing systems common to most computer architectures. In particular, this class is meant to introduce data representation, types of processors, memory types and hierarchy, and device drivers. The students will learn MIPS assembly language, the design of arithmetic and logic units, and basic designs for RISC processors.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: CREQ: CS 0445 or COE 0445 or 0458 (Min Grade 'C' or Transfer)

CS 0449 - INTRODUCTION TO SYSTEMS SOFTWARE

Minimum Credits: 3

Maximum Credits: 3

This course covers topics related to the interface of hardware and software. It covers device interfaces and hardware synchronization at the lowest level of the operating system, the linkage of operating system services to application software, and the fundamental mechanisms for computer communications.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: CS 0445 or CS 0455 (Min Grade 'C' or Transfer); CREQ: CS 0447 or CS 0456 or COE 0447 or COE 0147

CS 0590 - SOCIAL IMPLICATIONS OF COMPUTING TECHNOLOGY

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: CS 0004 or 0007 or 0008 or 0010 or 0011 or 0012 or 0015 or 0101 or 0401 or CMPINF 0401 (Min Grade 'C' or Transfer for All Listed Courses)

Course Attributes: SCI Polymathic Contexts: Ethical/Policy GE. Req., Writing Intensive Course (WRIT)

CS 0699 - SPECIAL TOPICS IN COMPUTER SCIENCE

Minimum Credits: 3

Maximum Credits: 3

Various topics in Computer Science will be introduced and discussed. This course is not part of the Computer Science

major.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

CS 1501 - ALGORITHMS AND DATA STRUCTURES 2

Minimum Credits: 3

Maximum Credits: 3

As the second in a two-course sequence on algorithms and data structures, this course covers a broad range of the most commonly used algorithms. Some examples include algorithms for searching, encryption, compression, graphs, and dynamic programming. The students will implement and test several algorithms. The course is programming intensive.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (CS 0441 or CS 0406) and ((CS 0445 or CS 0455 or COE 0445) or (CS 0245 and CS 0207)); (MIN GRADE 'C' or Transfer FOR ALL COURSES LISTED)

CS 1502 - FORMAL METHODS IN COMPUTER SCIENCE

Minimum Credits: 3

Maximum Credits: 3

The course is an introduction to the theory of information and computation as a physical phenomenon. The course covers standard formalizations of computational concepts and proofs of noteworthy implications of these formalizations. Typical topics include: finite automata, computability, reducibility, and complexity.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (CS 0441 or CS 0406) and (CS 0445 or CS 0455 or COE 0445) ; (MIN GRADE 'C' or Transfer FOR ALL COURSES LISTED)

CS 1503 - MATHEMATICAL FOUNDATIONS OF MACHINE LEARNING

Minimum Credits: 4

Maximum Credits: 4

This introductory course will cover the essential foundational ideas in probability and statistics. We will then discuss the standard applications of these foundational ideas to understand and analyze data, using computational methods, that all computer scientists should know.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (CS 0441 or CS 0406) and (MATH 0280 or MATH 1180 or MATH 1185)

CS 1510 - ALGORITHM DESIGN

Minimum Credits: 3

Maximum Credits: 3

This course will cover methods and strategies that are useful for the design of nonnumeric algorithms. Students are expected to design their own algorithms.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: [(CS 1501 or COE 1501) and CS 1502] or (CS 0458 and CS 1710); MIN GRADE 'C' or Transfer FOR ALL COURSES LISTED

Course Attributes: Writing Intensive Course (WRIT)

CS 1511 - THEORY OF COMPUTATION

Minimum Credits: 3

Maximum Credits: 3

Understanding the theory of computation provides deeper insights into various topics in computer science. This is an introductory level theory course. The aim of this course is to study the power (or lack of it) of various models of computation. Topics to be covered include automata, formal languages, computability, and computational complexity.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: CS 1502; (MIN GRADE 'C' or Transfer FOR ALL COURSES LISTED)

CS 1520 - PROGRAMMING LANGUAGE FOR WEB APPLICATIONS

Minimum Credits: 3

Maximum Credits: 3

Various programming paradigms will be studied using java and scripting languages. The use of java in programming web based applications, network applications, and the use of the extensive java libraries will be studied. The programming paradigm of building software by gluing components will be explored through the use of scripting languages such as perl and JavaScript. Applications include developing guis and internet programming.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: CS 0445 or COE 0445; (MIN GRADE 'C' or Transfer)

CS 1530 - SOFTWARE ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

The purpose of this course is to provide a general survey of software engineering. Some of the topics covered include: project planning and management, design techniques, verification and validation, and software maintenance. Particular emphasis is on a group project in which a group of students implement a system from its specification.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: CS 0445 or COE 0445; (MIN GRADE 'C' or Transfer)

CS 1538 - INTRODUCTION TO SIMULATION

Minimum Credits: 3

Maximum Credits: 3

The course introduces students to the concepts, definitions, techniques applicable to the simulation of systems. Both continuous and discrete modeling are covered, with emphasis on the latter. The objective of this course is to familiarize the students with several modern discrete simulation languages, and their use in modeling. Topics include: systems characterization, classification, and modeling; pertinence of probability and statistics theory for stochastic processes and model measurement; discrete systems simulation viewpoints; software modeling techniques.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: CS 0447 and (STAT 1000 or 1100 or 1151 or MATH 1153) (Min Grade 'C' or Transfer for All Listed Courses)

CS 1541 - INTRODUCTION TO COMPUTER ARCHITECTURE

Minimum Credits: 3

Maximum Credits: 3

Examination of computer architecture and hardware system organization. Topics include: CPU organization, sequential and microprogrammed control, instruction set implementation, memory organizations, input/output structure, peripherals and computer communications.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (CS 0447 or COE 0447) and (CS 0449 or COE 0449) ; (MIN GRADE 'C' or Transfer)

CS 1550 - INTRODUCTION TO OPERATING SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

An introduction to basic concepts of operating systems, common to most computer systems, which interfaces the machine with upper-level programs. This course will introduce processes as processing unit, process management, concurrency, communication, memory management and protection, and file systems.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (CS 0447 or COE 0447 or COE 0147) and (CS 0449 or COE 0449) or (0456 and 1750); MIN GRADE 'C' or TRANSFER FOR ALL COURSES LISTED

CS 1555 - DATABASE MANAGEMENT SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

The objective of this course is to provide an in-depth knowledge of database systems design. Thus, the emphasis is on how to model one's own data and how to use available database management systems effectively. Towards this end, the relational and the object-relational models are discussed in great detail and object-oriented and other data models are also presented. Commercial database management systems are examined and students get practical experience through the use of such systems.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: CS 1501 (Min Grade 'C')

CS 1566 - INTRODUCTION COMPUTER GRAPHICS

Minimum Credits: 3

Maximum Credits: 3

This course offers an in-depth exploration of fundamental concepts in 2d and 3d computer graphics. The bulk of the course is devoted to 3d modeling, geometric transformations, and 3d viewing and rendering.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (CS 0449); (MIN GRADE 'C' or TRANSFER FOR ALL COURSES LISTED)

CS 1567 - PROGRAMMING SYSTEM DESIGN ON A MOBILE ROBOT PLATFORM

Minimum Credits: 3

Maximum Credits: 3

Students will be introduced to a variety of programming techniques and paradigms, for implementing medium- to large scale software systems. System integration is done on a mobile robot platform rather than a traditional desktop system. However, this is not a course in robotics. It is a course about building systems in a real-world environment.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: CS (0441 and (0445 or COE 0445)) or (0406 and 0455) (MIN GRADE 'C' or Transfer), MIN GPA: 3.25

Course Attributes: University Honors Course

CS 1571 - INTRODUCTION TO ARTIFICIAL INTELLIGENCE

Minimum Credits: 3

Maximum Credits: 3

This course will provide an introduction to the fundamental concepts and techniques underlying the construction of intelligent computer systems. Topics covered in the course include: problem solving and search, logic and knowledge representation, planning, reasoning and decision-making in the presence of uncertainty, and machine learning.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (CS 1501 or COE 1501) and CS 1502 (Min Grade 'C' or Transfer for All Listed Courses)

CS 1613 - QUANTUM COMPUTATION

Minimum Credits: 3

Maximum Credits: 3

This is a one-semester (gentle) introductory course on quantum computation. The course will explore the implications of using quantum mechanics, instead of classical mechanics, to model information and computing. Quantum computing is not about changing the physical substrate on which computation is done from classical to quantum, but rather changing the notion of computation itself. The change starts at the most basic level: the fundamental unit of computation is no longer the bit, but rather the quantum bit, or qubit. Placing computation on a quantum mechanical foundation led to the discovery of faster algorithms, novel cryptographic mechanisms, and improved communication protocols. The course will start with the basic building blocks of quantum information processing: quantum bits and quantum gates. The course will cover common elements of quantum computation and include discussion of concepts of computational complexity. We will also discuss known bounds on the power of classical, randomized, and quantum computation. Finally, the course will explore entanglement and robust quantum computation. We will extensively cover the elegant and important topic of quantum error correction, and techniques to achieve fault tolerance.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: CS 1501 and CS 1502

CS 1621 - STRUCTURE PROGRAMMING LANGUAGES

Minimum Credits: 3

Maximum Credits: 3

An analytical examination of modern high-level programming language structures; including design specification and implementation. Advanced forms of data types, expressions, and control primitives. Relationship of storage management techniques and language design.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: CS (0441 and 0445) or (0406 and 0455); (MIN GRADE 'C' or TRANSFER FOR ALL COURSES LISTED)

CS 1622 - INTRODUCTION TO COMPILER DESIGN

Minimum Credits: 3

Maximum Credits: 3

This course will introduce the basic concepts of compiler design and implementation. Topics include lexical analysis, various types of parsers, intermediate and object code generation and code optimization. The material will be presented from an implementation point of view rather than a formal approach. The impact of language design on compilers will also be examined.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: CS 0441 and ((CS or COE 0447 or COE 0147) or (CS 0406 and 0456)); (MIN GRADE 'C' OR TRANSFER FOR ALL COURSES LISTED)

CS 1631 - SOFTWARE DESIGN METHODOLOGY

Minimum Credits: 3

Maximum Credits: 3

Construction of large computerized systems proceeds through the stages of requirements analysis, specification, and implementation. This course deals with requirements analysis and specification, in particular, methodologies for improving the reliability of specifications (executable specifications and system prototypes).

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (CS 0441 and (CS or COE 0445)) or (CS 0406 and 0455); (MIN GRADE 'C' OR TRANSFER FOR ALL COURSES LISTED)

CS 1632 - SOFTWARE QUALITY ASSURANCE

Minimum Credits: 3

Maximum Credits: 3

This course provides students with a broad understanding of modern software testing and quality assurance. Although it will cover testing theory, the emphasis is on providing practical skills in software testing currently used in industry. To that end, it will cover: manual and automated tests, test-driven and behavior-driven development, performance testing, and understanding and developing a testing process.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: Pre-requisites: (CS 0445 or COE 0445 or CS 0455) and (CS 0449 or COE 0449) (Min Grade 'C' or Transfer for All Listed Courses)

CS 1635 - INTERFACE DESIGN METHODOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course will introduce concepts and common practices for building software for user interfaces. Concepts will connect across input, visual layout techniques, and software patterns for responsive user interaction with a focus on mobile platforms (web and native). Emergent interface concepts, such as voice, AR/VR, and IoT will also be explored while building upon the course's software foundation. This course is targeted for students who desire skills in front-end development, interface design and prototyping, and user experience engineering.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: CS 0445 (MIN GRADE 'C' or Transfer)

CS 1637 - INTRODUCTION TO HUMAN-COMPUTER INTERACTION

Minimum Credits: 3

Maximum Credits: 3

The focus of the course is on the design of human-centered systems that people find usable, desirable, and useful. The course will introduce students to user-centered practices in Human Computer Interaction. The course will cover the theory and practical application of Human-Computer Interaction concepts and ideas. Students will gain knowledge on diverse methods and tools to understand, improve, and create technology that harmonizes with and improves human capabilities, goals, and social environments.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: CS 1501: Algorithm Implementation; MIN GRADE: C or Transfer

Course Attributes: Learning Sciences

CS 1640 - BIOINFORMATICS SOFTWARE DESIGN

Minimum Credits: 3

Maximum Credits: 3

This course will develop software for bioinformatic applications.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: LG/SU3 Elective Basis

Course Requirements: PREQ: CS 1501 and BIOSC 1540 (Min Grade 'C' or Transfer); PLAN: Bioinformatics or Computational Biology

Course Attributes: Capstone Course

CS 1645 - INTRODUCTION TO HIGH PERFORMANCE COMPUTING SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

This course is an introduction to the architecture of and software techniques for parallel and high performance computing systems. The content includes fundamental aspects of vector processing, shared-memory, and distributed-memory systems. Specific applications in parallel processing paradigms will be covered.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: CS 0447 and 0449 and 1501; (MIN GRADE 'C' OR TRANSFER FOR ALL COURSES LISTED)

CS 1651 - ADVANCED SYSTEMS SOFTWARE

Minimum Credits: 3

Maximum Credits: 3

To discuss in depth some advanced features of fundamental importance in the design of operating systems. The subjects discussed include interprocess communication, real-time scheduling, advanced file systems, security and protection mechanisms. The objective of the course is to provide an understanding of these advanced issues, as well as to bring awareness of the known solutions to these problems and to the limitations of these solutions.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: CS 1550 or 1312 or 1792; (MIN GRADE 'C' OR TRANSFER FOR ALL COURSES LISTED)

CS 1652 - DATA COMMUNICATION AND COMPUTER NETWORKS

Minimum Credits: 3

Maximum Credits: 3

This course will include basic principles and topics of computer communications. An overview of interfaces that interconnect hardware and software components, describing the procedures and rules involved in the communication process and the software which controls computers communication. Discussion on network architectures, design principles, basic protocol suites, and the concept of internetworking. Proficiency in this course requires a foundation in intermediate Java programming, basic C programming, elementary data structures, as well as knowledge in multithreading and mutexes.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (CS 0447 or COE 0447 or COE 0147) and (CS 0449 or COE 0449); (MIN GRADE 'C' OR TRANSFER FOR ALL COURSES LISTED)

CS 1653 - APPLIED CRYPTOGRAPHY AND NETWORK SECURITY

Minimum Credits: 3

Maximum Credits: 3

This course will provide the necessary conceptual background and hands-on experience to understand the most common cryptographic algorithms and protocols and how to use them to secure computers networks and distributed applications. Topics include: cryptographic algorithms for data confidentiality, authentication, and integrity, user authentication methods (secure tokens and biometrics), internet security protocols, security in local area networks, firewalls, and intrusion detection systems.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (CS 0449 or COE 0449) and (CS 1501 or COE 1501) or (CS 0458 or CS 1750); (MIN GRADE 'C' OR TRANSFER FOR ALL COURSES LISTED)

CS 1655 - SECURE DATA MANAGEMENT AND WEB APPLICATIONS

Minimum Credits: 3

Maximum Credits: 3

The main objectives for this course are: (1) to study in more depth query optimization and security, (2) to study advanced topics; data mining, information retrieval, and web data management, and (3) to expose students to advanced data and information management technologies, while gaining hands-on experience. These include mobile data management, continuous queries and their applications in areas such as biomedical informatics and e-commerce.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: CS 0441 and (CS 0445 or COE 0445); (MIN GRADE 'C' OR TRANSFER FOR ALL COURSES LISTED)

CS 1656 - INTRODUCTION TO DATA SCIENCE

Minimum Credits: 3

Maximum Credits: 3

This course aims to expose students to different data management, data manipulation, and data analysis techniques. The class will cover all the major data management paradigms (relational/SQL, XML/Xquery, RDF/SPARQL) including NOSQL and data stream processing approaches. Going beyond traditional data management techniques, the class will expose students to information retrieval, data mining, data warehousing, network analysis, and other data analysis topics. Time permitting, the class will include big data processing techniques, such as the map/reduce framework.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: CS 1501 or COE 1501 (MIN GRADE 'C' or Transfer For All Listed Coures)

CS 1657 - PRIVACY IN THE ELECTRONIC SOCIETY

Minimum Credits: 3

Maximum Credits: 3

Privacy is an increasingly significant concern in our modern, connected society. We all share personal information on a daily basis with a wide range of organizations. Although at times such sharing can be intentional and beneficial for the user, other times information is shared against the user's will, used for purposes that the user did not expect, revealed to entities other than those approved by the user, or used to infer additional information that the user did not intend to reveal. In this course, students will learn to reason about what information is revealed through the use of computer systems. They will study several different scenarios in which information sharing is either unavoidable or to some extent desirable, and discuss the balance between the benefits and costs of sharing. Finally, students will learn about several privacy-enhancing technologies (PETs), and how these can be put to use by software developers to defend the privacy of their users.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: CS 0441 and CS 1501 with a minimum grade of C or TRANSFER

CS 1660 - INTRODUCTION TO CLOUD COMPUTING

Minimum Credits: 3

Maximum Credits: 3

Cloud computing has emerged as a new paradigm for efficient and highly elastic delivery of computing services over the Internet to achieve economies of scale. The course will explore the concept of Cloud Computing, considering both its benefits and challenges. The course will also cover the basic design principles and architectures of Cloud Computing, including its usability and utility to deliver efficiently and flexibly infrastructure, platform, and software as a service. Topics include types of public, private and hybrid cloud computing services, data centers architecture and deployment, cloud computing programming models, virtualization and virtual networking and storage, and large-scale

distributed processing framework to manage, process and store big data applications running in clustered systems. The course will also include hands-on projects focused on developing applications on a MapReduce and Hadoop cluster. Upon successfully completing the course of the course, students will gain an understanding of the goals, benefits, and models of cloud computing, and how storage, processing, and services are designed and managed in a virtualized environment. Through hands-on projects, students will demonstrate proficiency in deploying and evaluating cloud computing applications and services. They will be able to design and deploy data-centered applications and services, and efficiently use frameworks and tools for data analytics.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: CS 1550; MIN GRADE: C or Transfer

CS 1666 - PRINCIPLES OF COMPUTER GAME DESIGN AND IMPLEMENTATION

Minimum Credits: 3

Maximum Credits: 3

The purpose of this course is to give an introduction and insight into designing and implementing video games. This course questions the nature, intent, and motivation of games and how to construct a compelling experience for users. It is a project-based course, with a final project being to make a game with a small team.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: CS 1501 or COE 1501; (MIN GRADE 'C' or Transfer)

CS 1671 - HUMAN LANGUAGE TECHNOLOGIES

Minimum Credits: 3

Maximum Credits: 3

This course provides an introduction to the field of natural language processing (NLP) - the creation of computer programs that can understand, generate, and learn languages used by humans. It will expose students to real-world applications such as speech recognition, information retrieval, dialogue agents, question answering systems, and machine translations by means of computational techniques including search algorithms, dynamic programming, hidden Markov models, probabilistic context free grammars, and related machine learning algorithms.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: CS 1501; (MIN GRADE 'C' OR TRANSFER)

Course Attributes: Learning Sciences

CS 1674 - INTRODUCTION TO COMPUTER VISION

Minimum Credits: 3

Maximum Credits: 3

In this class, students will learn the basics of modern computer vision. The course will cover topics such as image filtering, edge detection, feature extraction, description and matching, grouping and clustering, object detection, activity recognition, and recognition with a human in the loop.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: CS 1501 or COE 1501 (MIN GRADE 'C' OR TRANSFER)

CS 1675 - INTRODUCTION TO MACHINE LEARNING

Minimum Credits: 3

Maximum Credits: 3

This introductory machine learning course will give an overview of many models and algorithms used in modern machine learning, including linear models, multi-layer neural networks, support vector machines, density estimation methods, bayesian belief networks, clustering, ensemble methods, and reinforcement learning. The course will give the student the basic ideas and intuition behind these methods, as well as, a more formal understanding of how and why they work. Through homework assignments students will have an opportunity to experiment with many machine learning techniques and apply them to various real-world datasets.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: CS 1501 or COE 1501 and (STAT 1000 or 1100 or 1151 or ENGR 0020) (Min Grade 'C' or Transfer for All Listed Courses)

CS 1678 - INTRODUCTION TO DEEP LEARNING

Minimum Credits: 3

Maximum Credits: 3

This undergraduate course will cover the basics of modern deep neural networks. The first part of the course will introduce neural network architectures, activation functions, and operations. It will present different loss functions and describe how training is performed via backpropagation. In the second part, the course will describe specific types of neural networks, e.g. convolutional, recurrent, and graph networks, as well as their applications in computer vision and natural language processing. The course will also briefly discuss reinforcement learning and unsupervised learning, in the context of neural networks. In addition to attending lectures and completing bi-weekly homework assignments, students will also carry out and present a project.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: Pre-requisites: MATH 0230 and (MATH 0280 or MATH 1180) and CS 1501 with a minimum grade of C or TRANSFER.

CS 1678 - INTRODUCTION TO DEEP LEARNING

Minimum Credits: 3

Maximum Credits: 3

This undergraduate course will cover the basics of modern deep neural networks. The first part of the course will introduce neural network architectures, activation functions, and operations. It will present different loss functions and describe how training is performed via backpropagation. In the second part, the course will describe specific types of neural networks, e.g. convolutional, recurrent, and graph networks, as well as their applications in computer vision and natural language processing. The course will also briefly discuss reinforcement learning and unsupervised learning, in the context of neural networks. In addition to attending lectures and completing bi-weekly homework assignments, students will also carry out and present a project.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

CS 1684 - BIAS AND ETHICAL IMPLICATIONS IN ARTIFICIAL INTELLIGENCE

Minimum Credits: 3

Maximum Credits: 3

Artificial intelligence holds tremendous promise to benefit nearly all aspects of society, including healthcare, food production, economy, education, security, the law, and even our personal activities. The development of AI is creating

new opportunities to improve the lives of people around the world. At the same time, these intelligent models may incorporate existing biases or create new biases that can seriously harm society. At its worst, AI can exacerbate misguided old practices and aggravate past social harms with its unprecedented processing powers and the veneer of seemingly objectivity, as humans in various social factions are disparately impacted by the AI-aided decisions. Facing the ethical implications of AI, students need to be prepared with the critical intellectual capacities that allow them to understand and deal with these ethical challenges. These capacities comprise multi-disciplinary concepts ranging from statistical learning theories, model design, and ethical foundation, to psychological and cultural frameworks that are necessary for successfully navigating and evaluating responsible AI practices. Further, "ethical competence" will involve understanding various challenges surrounding AI, such as ethical regulation, fairness assessment, and interpretability of models. Note that this is a technical class. Our focus will be on designing, evaluating, and mitigating bias in machine learning models. You will have three programming assignments in Python.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PRE: CS1501 and (MATH 1180 OR MATH 0206 OR MATH 0280 OR MATH 1080 OR MATH 1181 OR MATH 1185)

CS 1699 - SPECIAL TOPICS IN COMPUTER SCIENCE

Minimum Credits: 3

Maximum Credits: 3

This is a special topics course that allows the computer science department to test run a course before deciding whether to permanently add it to our curriculum.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

CS 1900 - INTERNSHIP

Minimum Credits: 1

Maximum Credits: 6

This course places the student in an "on-the-job" setting in which he/she receives practical experience in a supervised training environment.

Academic Career: Undergraduate

Course Component: Internship

Grade Component: Satisfactory/No Credit

Course Attributes: Capstone Course

CS 1901 - INTERNSHIP

Minimum Credits: 1

Maximum Credits: 3

This course places the student in an "on-the-job" setting in which they receive practical experience in a supervised training environment. This course does not satisfy the Computer Science capstone requirement.

Academic Career: Undergraduate

Course Component: Internship

Grade Component: Satisfactory/No Credit

CS 1902 - DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 3

This course is designed to give students the opportunity to design a plan of study to be agreed upon by the student and a supervising faculty member. This course does not satisfy the computer science capstone requirement.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SNC Elective Basis

CS 1906 - COMPUTER SCIENCE COOPERATIVE PROGRAM

Minimum Credits: 1

Maximum Credits: 1

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: H/S/U Basis

Course Attributes: Capstone Course

CS 1950 - DIRECTED RESEARCH: CAPSTONE

Minimum Credits: 3

Maximum Credits: 3

This course is designed to give students the opportunity to design a plan of study to be agreed upon by the student and a supervising faculty member. Before seeking consent to enroll in this course, Computer Science majors must have completed an introduction to systems software and advanced algorithm data structures. This course satisfies the Computer Science capstone requirement.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SNC Elective Basis

Course Attributes: Capstone Course

CS 1951 - DIRECTED RESEARCH

Minimum Credits: 1

Maximum Credits: 3

This course is designed to give students the opportunity to design a plan of study to be agreed upon by the student and a supervising faculty member. This course does not satisfy the computer science capstone requirement.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SNC Elective Basis

CS 1980 - TEAM PROJECT DESIGN AND IMPLEMENTATION

Minimum Credits: 3

Maximum Credits: 3

Students will choose a project from proposals provided by our faculty and industry partners. Teams will consist of 3 or 4 students and they will be supervised by a project mentor. This course satisfies the capstone requirement.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: Satisfactory/No Credit

Course Requirements: PLAN = CSCI-BS; PREQ: CS 0449 and CS 1501 (min grade 'C' or transfer for all courses listed)

CS 2032 - SOFTWARE QUALITY ASSURANCE

Minimum Credits: 3

Maximum Credits: 3

This course provides students with a broad understanding of modern software testing and quality assurance. Although it will cover testing theory, the emphasis is on providing practical skills in software testing currently used in industry. To that end, it will cover manual and automated tests, test-driven and behavior-driven development, performance testing, and understanding and developing a testing process.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

CS 2052 - DATA COMMUNICATION AND COMPUTER NETWORKS

Minimum Credits: 3

Maximum Credits: 3

This course will include basic principles and topics of computer communications. An overview of interfaces that interconnect hardware and software components, describing the procedures and rules involved in the communication process and the software which controls computers communication. Discussion on network architectures, design principles, basic protocol suites, and the concept of internetworking. Proficiency in this course requires a foundation in intermediate Java programming, basic C programming, elementary data structures, as well as knowledge in multithreading and mutexes.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

CS 2074 - INTRODUCTION TO COMPUTER VISION

Minimum Credits: 3

Maximum Credits: 3

In this class, students will learn the basics of modern computer vision. The course will cover topics such as image filtering, edge detection, feature extraction, description and matching, grouping and clustering, object detection, activity recognition, and recognition with a human in the loop.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Computer Science (CS-PHD; CS-MS; CSMSBS-MS) or Computer Engineering (COEAS-PHD; COEAS-MS; COEENG-PHD; COEENG-MCO)

Computing and Information

CMPINF 0000 - COMPUTING AND INFORMATION TRANSFER

Minimum Credits: 0

Maximum Credits: 99

This course is to be used for the transfer of non-articulated courses in the area of Computing and Information.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

CMPINF 0001 - SCI FIRST-YEAR SEMINAR

Minimum Credits: 1

Maximum Credits: 1

The first-year seminar will provide students with an introduction to SCI and the University of Pittsburgh. The format of this course will be mixed between large group informational sessions, and small group discussions and activities. The small group sections will be led by members of our advising staff, undergraduate peer mentors, and/or faculty. The course will be split approximately evenly between large-group informational sessions and small-group discussions.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Satisfactory/No Credit

Course Requirements: PROG: School of Computing and Information

CMPINF 0002 - SCI TRANSFER STUDENT SEMINAR

Minimum Credits: 1

Maximum Credits: 1

Transfer Seminar is taught by SCI's undergraduate academic advisors and peer advisors and is designed to help internal and external transfer students make a smooth transition into the School of Computing and Information, identify programs of study that fit their interests, make use of school-and campus-wide resources, and prepare for the transition from college to career. Discussions will address a range of topics including academic mechanics (e.g., advising, registration, university policies), academic support services and opportunities (e.g., academic program options, tutoring centers, study abroad, internships and co-ops, undergraduate research), student support services (e.g., career services, counseling center, student health services), career exploration, and other student opportunities.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Satisfactory/No Credit

Course Requirements: PROG:School Computing and Information or School of Information Science

CMPINF 0010 - BIG IDEAS IN COMPUTING AND INFORMATION

Minimum Credits: 4

Maximum Credits: 4

Computing and information systems underlie nearly every facet of life in today's highly-networked societies. Accordingly, there are many paths through the degree programs offered by the School of Computing and Information, each focusing on different aspects of the theories, practices, and applications of computing and information. This course will introduce students to a variety of core principles and important themes that cross-cut this array of computing- and information-oriented disciplines, as well as explore the types of work that individuals educated in these disciplines engage in.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

CMPINF 0011 - BIG IDEAS IN COMPUTING AND INFORMATION FOR TRANSFER STUDENTS

Minimum Credits: 3

Maximum Credits: 3

Computing and information systems underlie nearly every facet of life in today's highly-networked societies. Accordingly, there are many paths through the degree programs offered by the School of Computing and Information, each focusing on different aspects of the theories, practices, and applications of computing and information. This course will introduce students to a variety of core principles and important themes that cross-cut this array of computing- and information-oriented disciplines, as well as explore the types of work that individuals educated in these disciplines engage in.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: CREQ: CMPINF 0002

CMPINF 0035 - SAB EXCHANGE: MAJOR EQUIVALENT

Minimum Credits: 1

Maximum Credits: 5

Students participating in an exchange program where in-major equivalents have been determined by their undergraduate director will be enrolled in this course.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

CMPINF 0036 - INTERNATIONAL EXCHANGE PROGRAM

Minimum Credits: 0

Maximum Credits: 0

Used to adjust tuition and fees for Study Abroad Exchange programs

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: No Grade Required

CMPINF 0055 - SAB PRP: ADMINISTRATIVE FEES

Minimum Credits: 0

Maximum Credits: 0

This is a study abroad course used for the sole purpose of attaching the study abroad admin fee.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: No Grade Required

CMPINF 0070 - STUDY ABROAD: SCIENCE SEQ

Minimum Credits: 1

Maximum Credits: 5

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Attributes: SCI Polymathic Contexts: Science Seq.GE. Req., Study Abroad

CMPINF 0401 - INTERMEDIATE PROGRAMMING

Minimum Credits: 4

Maximum Credits: 4

This is an intermediate programming course that focuses on programming via an object-oriented paradigm. Students entering CMPINF 0401 are expected to have some previous concepts and then focus on object-oriented programming, including classes, encapsulation and abstraction, inheritance, polymorphism and interfaces. Some introductory data structures and algorithms will also be covered in this course. This class is a programming-intensive course, and students will be expected to complete several non-trivial programming projects throughout the term.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: Enrollment not permitted if currently or previously completed CS 0401 or INFSCI 0017

Course Attributes: DSAS Quant.-Formal Reason General Ed. Requirement

CMPINF 0999 - SPECIAL TOPICS IN COMPUTING AND INFORMATION

Minimum Credits: 3

Maximum Credits: 3

Various topics in computing and information will be covered.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

CMPINF 1061 - FOUNDATIONS OF DATA SCIENCE

Minimum Credits: 4

Maximum Credits: 4

This course is designed to provide a general introduction to the rapidly growing field of data science. Topics will include data summarization and visualization, data distributions, the scientific and statistical inference process, confidence intervals, hypothesis testing, sampling, regression, and classification. The course will be very hands-on with students actively carrying out the techniques and procedures being taught on real datasets in order to foster the ability to reason with data. As part of this process, students will be taught the basics of programming (coding) in R and these skills will be reinforced through weekly lab sessions. In developing the core concepts, students will also be exposed to ancillary topics such as data ethics, simulation basics, and best practices in programming. No previous programming experience nor any background in statistics will be assumed.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

CMPINF 1201 - DIGITAL NARRATIVE AND INTERACTIVE DESIGN

Minimum Credits: 3

Maximum Credits: 3

How are computational artifacts currently designed, and how can they be designed differently? What stories can be told by collaborating with computers? What stories can't be told? This project-based course will enable students to engage with and create computational narratives and interactive projects with data, hardware and algorithms. Each collaboratively taught iteration of the course will include 3-4 of these units, such as: fabrication, interactive hardware, computational narrative, interactive data, and prototyping. Students will consider what it means to compose with computers for human audiences, and with humans for computer audiences. Designed for Digital Narrative and Interactive Design (DNID) majors to take midway through the major, it will help students consolidate the interdisciplinary knowledge they have obtained in their prerequisite courses, introduce them to examples of interdisciplinary work that will inform their later capstone projects, and give them practice in working on collaborative projects that span the humanities and information/computing fields.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (ENGCMP 0425, OR HAA 0425, OR ENGLIT 0512) AND (CS 0010, OR CS 0011, OR CS 0012, OR CS 0007, OR CS 0008, OR INFSCI 0419)

CMPINF 1205 - COMPARATIVE DIGITAL PRIVACIES

Minimum Credits: 3

Maximum Credits: 3

This course will offer a broad survey of significant issues relating to privacy in the digital age. It investigates privacy in the digital world from cultural, social, communication, and policy perspectives. Taking a comparative approach, privacy related to digital communication is compared across several global regions in an attempt to understand the distinctiveness of privacy in those regions. The course will first introduce students to the concepts of privacy, the digital age, and the relation between privacy protections and the state. Students will understand the significance of the issue of digital privacies and why we need to employ a comparative approach to examine it. The course will then look at selected case studies of digital privacy in several global regions, including the United States, Canada, Europe, China, and South East Asia. Issues related to digital privacies such as Internet laws and policies, media regulations and public interest, data protection, state control, and commercial interests in the digital age, surveillance, copyright, and privacy advocates will also be included.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: European Union Studies, European and Eurasian Studies, SCI Polymathic Contexts: Ethical/Policy GE. Req., SCI Polymathic Contexts: Global&Cross Cul GE. Req., Transatlantic Studies, West European Studies

CMPINF 1207 - WRITING MACHINES

Minimum Credits: 3

Maximum Credits: 3

Large Language Models (LLMs) like ChatGPT promise--or threaten--to upend everything we know about writing. Can machines really write? What do writing machines do to or for human writers? This class approaches the contemporary buzz about ChatGPT and Natural Language Generation (NLG) through a sociotechnical and historical lens, exploring automated writing through historical and contemporary writing machines: 18th century automatons, Ouija boards, combinatorial poetics, procedural algorithms, recurrent neural networks, and the transformer technology that drives cutting-edge LLMs like ChatGPT. The course is organized into units focusing on different methods of automating writing: mechanical; spiritual; procedural; statistical; simulative. Each unit teaches students historical and technical contexts of its associated automation through texts and hands-on projects. Students who take this class will learn to generate text using computational processes and critically examine the text they produce. In so doing, students will engage with the political and ethical implications of large-scale data usage to train machine learning algorithms, including issues of underrepresented languages, bias, hate speech, further marginalizing communities, automating labor, environmental impacts, dirty data, and privacy violations. As we trace the development and commercialization of NLG, we'll consider whose writing is being automated, and for what purposes.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

CMPINF 1981 - PROJECT STUDIO

Minimum Credits: 3

Maximum Credits: 3

This course is designed as a practicum for the joint degree programs offered by the School of Computing and Information in conjunction with other units on campus. Students will apply skills learned during their studies in SCI to problems existing at the confluence of computing, information, and other disciplinary studies. This course is meant to help satisfy the Capstone requirement for joint programs allowing team-based project Capstone options.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Satisfactory/No Credit

CMPINF 1999 - ADVANCED SPECIAL TOPICS IN COMPUTING AND INFORMATION

Minimum Credits: 3

Maximum Credits: 3

Various advanced topics in computing and information will be covered.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Cross-Disciplinary Dental Ed

DMED 5360 - PROFESSIONALISM AND ETHICS 8

Minimum Credits: 1

Maximum Credits: 1

This course series will follow student progression each term through all four years of the curriculum and will assess the professional and ethical knowledge, skills, and values that the faculty members of Pitt Dental Medicine deem essential for a successful general dentist. This assessment includes actions displayed in all locations within the School as well as in external curricular locations when students are participating in didactic, preclinical, or clinical activities associated with the Pitt Dental Medicine program, including Pitt Dental Medicine activities occurring between terms.

Dental Hygiene

DENHYG 1000 - FULL-TIME DENTAL HYGIENE STUDY

Minimum Credits: 0

Maximum Credits: 0

Students who are working full-time toward the Associate of Science Degree in Dental Hygiene may register for this course.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: No Grade Required

Course Requirements: PROG: School of Dental Medicine (Undergraduate)

DENHYG 1017 - DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 3

This directed study is designed for the dental hygiene student who desires to pursue interests in specific area(s). The content of the course is specified by the student and approved by the course director and program director. The teaching format is designed to teach the student specific knowledge or skills using enhanced faculty instruction and personal contact.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SU3 Elective Basis

Course Requirements: PROG: School of Dental Medicine (Undergraduate)

DENHYG 1047 - DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 3

This directed study is designed for the dental hygiene student who desires to pursue interests in specific area(s). The content of the course is specified by the student and approved by the course director and program director. The teaching format is designed to teach the student specific knowledge or skills using enhanced faculty instruction and personal contact.

Academic Career: Undergraduate

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SU3 Elective Basis

Course Requirements: PROG: School of Dental Medicine (Undergraduate)

DENHYG 1110 - BIOLOGICAL SCIENCES 1

Minimum Credits: 2

Maximum Credits: 2

This introductory level course is the first of 3 sequential courses in the biological sciences, each of which represents an interdepartmental integration of gross and neuroanatomy, histology and physiology. Through lectures and assigned readings, students will gain insight into structure-function relationships of cells, tissues, organs, and organ systems of the body. This course deals with the cell, epithelium, connective tissue, the skeletal system, myology, blood, the lymphatic system, neural histology, and introductory neural physiology.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: School of Dental Medicine (Undergraduate)

DENHYG 1112 - INTRODUCTION TO DENTAL HYGIENE

Minimum Credits: 3

Maximum Credits: 3

This course is designed to introduce dental hygiene students to the techniques and information necessary for comprehensive patient care.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: School of Dental Medicine (Undergraduate)

DENHYG 1113 - INTRODUCTION TO DENTISTRY

Minimum Credits: 3

Maximum Credits: 3

This course provides an overview of the activities of each dental specialty; also, it may include oral anatomy, dental materials and dental charting. The lectures introduce the student to the content and scope of each specialty area; the services delivered with emphasis on dental hygiene interaction.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: School of Dental Medicine (Undergraduate)

DENHYG 1114 - DENTAL ANATOMY

Minimum Credits: 2

Maximum Credits: 2

This course is designed to help students identify the normal structures with the oral cavity. The use of correct terminology is stressed in order to effectively communicate with members of the dental profession. The student will be able to differentiate normal formation of teeth from abnormalities.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: School of Dental Medicine (Undergraduate)

DENHYG 1116 - DENTAL HYGIENE PRECLINIC

Minimum Credits: 2

Maximum Credits: 2

Dental hygiene preclinic is established as the preclinical time for students to observe, discuss, and practice the skills required to perform the oral prophylaxis. Each student works and progresses at his/her own rate and must demonstrate consistent mastery of the skills taught.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: Letter Grade

Course Requirements: PROG: School of Dental Medicine (Undergraduate)

DENHYG 1118 - CHEMISTRY AND BIOCHEMISTRY

Minimum Credits: 3

Maximum Credits: 3

The course is designed to give the students the fundamental principles and concepts of chemistry and biochemistry as they are related to physiological and pathological aspects of oral health and the practice of dental medicine. The course is not designed to make the student an expert in chemistry and biochemistry but rather to provide the basic principles of these sciences which will enable the student to more effectively manage oral disease.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

DENHYG 1119 - DENTAL HYGIENE RADIOLOGY 1

Minimum Credits: 2

Maximum Credits: 2

This course provides the student with the theoretical knowledge required to achieve a working knowledge of the radiologic sciences as they apply to dental hygiene. Also included will be concepts of radiation safety and radiation biology. An introduction to normal radiographic anatomy and the radiographic aspects of dental pathology will be included.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

DENHYG 1241 - PRINCIPLES OF MICROBIOLOGY

Minimum Credits: 3

Maximum Credits: 3

An introductory course in microbiology for dental hygiene students with no previous background in microbiology. Major areas included are microorganisms, immune mechanisms of the host and the interaction of the host and the microorganisms in disease and homeostasis. Major emphasis is placed on diseases with oral manifestations and infection control in dental medicine. The laboratory component is devoted to microbiological methods, infection control and oral ecology.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: School of Dental Medicine (Undergraduate)

DENHYG 1242 - BIOLOGICAL SCIENCES 2

Minimum Credits: 3

Maximum Credits: 3

This introductory level course is the second of three sequential courses in the biological sciences. Through lectures and assigned readings, students will gain insight into structure-function relationships of cells, tissues, organs, and organ systems of the body. This course deals with the gross anatomy, neuroanatomy and physiology of the nervous system, including the eye and ear, the cardiovascular system, and the oral cavity with emphasis on the formation and structure of the teeth.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: School of Dental Medicine (Undergraduate)

DENHYG 1244 - COMMUNICATIONS

Minimum Credits: 3

Maximum Credits: 3

This course is designed to increase the student's proficiency as a public speaker, through learning organization of material, delivery and criticism of speeches.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: School of Dental Medicine (Undergraduate)

DENHYG 1247 - DENTAL HYGIENE SEMINAR 1

Minimum Credits: 1

Maximum Credits: 1

This course is an extension of the introduction to dental hygiene course. The focus of this course is the special needs and medically compromised patient. It combines lectures, guest presentations and clinical experiences. The students will acquire greater understanding of the psychological and physiological needs of these patients and how to better meet those needs to provide the best patient care.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Letter Grade

Course Requirements: PROG: School of Dental Medicine (Undergraduate)

DENHYG 1248 - DENTAL MATERIALS

Minimum Credits: 2

Maximum Credits: 2

This course introduces the dental hygiene student to the field of dental materials. The methods of instruction include didactic and laboratory components. Lectures will cover basic properties of dental materials; gypsum products, waxes, rigid and elastic impression materials and restorative materials. Laboratory sessions give each student practical experience in the proper manipulation of these materials.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: School of Dental Medicine (Undergraduate)

DENHYG 1249 - DENTAL HYGIENE CLINIC 1

Minimum Credits: 2

Maximum Credits: 2

This course is scheduled as clinical sessions in which students utilize the skills necessary to perform an oral prophylaxis on individual patients, and to provide patient education.

Academic Career: Undergraduate

Course Component: Clinical

Grade Component: Letter Grade

Course Requirements: PROG: School of Dental Medicine (Undergraduate)

DENHYG 1250 - DENTAL HYGIENE RADIOLOGY 2

Minimum Credits: 1

Maximum Credits: 1

This course is designed to increase the radiographic interpretation skills of the first year dental hygiene student through the use of critical thinking exercises and an in depth exposure to radiographs illustrating caries, periodontal diseases, trauma and pulpal involvement. Radiographic case formatted questions and exercises will be reviewed to enable students to correlate the pathology content of the curriculum as well as the interpretation of normal and abnormal oral

structures.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

DENHYG 1370 - INTRODUCTION TO CLINICAL PERIODONTICS

Minimum Credits: 3

Maximum Credits: 3

This course concerns the healthy periodontium, changes with aging, and changes to disease. Classification of periodontal diseases, etiology, histopathology and prevention are discussed. This course teaches the student the role of the hygienist in clinical management, treatment and control of periodontal disease.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: School of Dental Medicine (Undergraduate)

DENHYG 1373 - BIOLOGICAL SCIENCES 3

Minimum Credits: 3

Maximum Credits: 3

This introductory level course is the third of three sequential courses in the biological sciences, each of which represents an interdepartmental integration of gross and neuroanatomy, histology, and physiology. Through lectures and assigned readings, students will gain insight into structure-function relationships of cells, tissues, organs and organ systems of the body. This course deals with the gross anatomy, histology, and physiology of the respiratory, digestive, urinary, and endocrine systems. Wound healing is covered.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: School of Dental Medicine (Undergraduate)

DENHYG 1375 - ANESTHESIA FOR DENTAL HYGIENIST

Minimum Credits: 2

Maximum Credits: 2

This course introduces the student to the entire spectrum of pain and anxiety control techniques currently in use in dentistry. Emphasis is placed on the basic physiology of the pain phenomena and the relevant clinical pharmacology of local anesthetics. The general topic of preoperative patient assessment is integrated with a practical and systematic approach to the recognition, management, and prevention of specific medical emergencies that may occur in a dental office.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: School of Dental Medicine (Undergraduate)

DENHYG 1377 - DENTAL HYGIENE SEMINAR 2

Minimum Credits: 1

Maximum Credits: 1

This course is an extension of the introduction to dental hygiene course. The focus of this course is the special needs and medically compromised patient. It combines lectures, guest presentations and clinical experiences. The student will acquire greater understanding of the psychological and physiological needs of these patients and how to better meet

those needs to provide the best patient care.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Letter Grade

Course Requirements: PROG: School of Dental Medicine (Undergraduate)

DENHYG 1378 - HEALTH PROMOTIONS THROUGH THE LIFE SPAN

Minimum Credits: 3

Maximum Credits: 3

This course will examine common health issues found throughout the human lifespan with the intention of helping students gain a holistic perspective of the clinical patient experience. The course content is designed to provide the student with relevant issues affecting the various physical stages of the human life cycle, with special emphasis on the most under-served populations of pediatrics and geriatrics. The content will be developed using the following themes: biological, psychological, social, environmental, and medical aspects of different age populations and their relationship to dental hygiene care. While there are not specific prerequisites for this course, it is recommended that enrolled students have successfully completed 45 college credits prior to course enrollment. Students not within the Dental Hygiene Program must obtain permission from the course instructor to enroll. Hybrid course format including weekly online synchronous course meetings.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

DENHYG 1379 - DENTAL HYGIENE CLINIC 2

Minimum Credits: 3

Maximum Credits: 3

This course is scheduled as clinical sessions in which the student integrates and applies knowledge and concepts learned in previous courses to provide comprehensive dental hygiene care to individual patients.

Academic Career: Undergraduate

Course Component: Clinical

Grade Component: Letter Grade

Course Requirements: PROG: School of Dental Medicine (Undergraduate)

DENHYG 1380 - INTRODUCTION TO NUTRITION AND ORAL HEALTH FOR THE DENTAL PROFESSIONAL

Minimum Credits: 2

Maximum Credits: 2

This course will examine the relationship between nutrition and systemic and oral health. Nutrition is a continuously evolving science. This course will focus on building foundational knowledge in macro and micronutrient's role in nutrition. Emphasis will be placed on fostering personal value in nutrition's role in health with reinforcement in the necessity of life-long learning to stay current in this science for the benefit of self and patient advocacy. Nutrition's role in the management of systemic and oral health conditions will be explored. Cultural implications to nutritional choices will be examined. The course will continuously emphasize the dental professional's role in the evaluation, with an emphasis on dental hygiene care.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

DENHYG 1411 - DENTAL PHARMACOLOGY

Minimum Credits: 2

Maximum Credits: 2

This course provides oral hygiene students with the opportunity to become familiar with pharmacotherapeutics as utilized by all health professionals. All drug groups are considered in order to familiarize students with the dental patient's therapeutic status. The therapeutics and adverse effects of the drugs are discussed.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: School of Dental Medicine (Undergraduate)

DENHYG 1412 - PUBLIC HEALTH DENTISTRY

Minimum Credits: 3

Maximum Credits: 3

Public health dentistry is that portion of the dental hygiene curriculum which prepares students to promote oral health and prevent oral disease in the community through organized community based programs. It provides students with a broad understanding of the social, political, and economic forces directing the system. The approach taken within this course provides students with knowledge and skills necessary to meet specific dental health needs of community groups as distinct from the traditional clinical approach which is designed to meet the needs of individuals.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: School of Dental Medicine (Undergraduate)

DENHYG 1414 - GERONTOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course will provide the student with an introduction to the phenomenon associated with our aging society. It will also familiarize the student with the special needs of the elderly patient. It will provide background information as to why these needs will be important to the health care professionals of the future. The methods used will be lecture, discussion, partner and group exercise, awareness assignments and simulations.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: School of Dental Medicine (Undergraduate)

DENHYG 1417 - DENTAL HYGIENE SEMINAR 3

Minimum Credits: 1

Maximum Credits: 1

This course is designed to compliment the dental hygiene 3 clinical experience. Students will be exposed to various traditional and non-traditional dental therapeutic techniques including, but not limited to subgingival irrigation with antimicrobial agents, an update of new dental products and devices as well as the presentation of case studies for analyses. The goal of the course is to enhance the clinical and didactic skills of the dental hygienist.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SU3 Elective Basis

Course Requirements: PROG: School of Dental Medicine (Undergraduate)

DENHYG 1419 - DENTAL HYGIENE CLINIC 3

Minimum Credits: 4

Maximum Credits: 4

This course provides clinical sessions in which the student's integrate and apply knowledge and concepts learned in previous courses to provide comprehensive dental hygiene care to individual patients.

Academic Career: Undergraduate

Course Component: Clinical

Grade Component: Letter Grade

Course Requirements: PROG: School of Dental Medicine (Undergraduate)

DENHYG 1420 - ETHICS HEALTH CARE PROFESSIONAL

Minimum Credits: 3

Maximum Credits: 3

This course is designed to introduce health-care professionals to the principles of ethics. Various aspects of ethics will be discussed including the decision making process on which evaluation is based.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SU3 Elective Basis

Course Requirements: PROG: School of Dental Medicine (Undergraduate)

DENHYG 1422 - HEALTH PROMOTIONS THROUGH THE LIFE SPAN

Minimum Credits: 3

Maximum Credits: 3

This course will examine common health issues found throughout the human lifespan with the intention of helping students gain a holistic perspective of the clinical patient experience. The course content is designed to provide the student with relevant issues affecting the various physical stages of the human life cycle, with special emphasis on the most under-served populations of pediatrics and geriatrics. The content will be developed using the following themes: biological, psychological, social, environmental, and medical aspects of different age populations and their relationship to dental hygiene care. While there are not specific prerequisites for this course, it is recommended that enrolled students have successfully completed 45 college credits prior to course enrollment. Students not within the Dental Hygiene Program must obtain permission from the course instructor to enroll. Hybrid course format including weekly online synchronous course meetings.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: School of Dental Medicine (Undergraduate)

DENHYG 1423 - GENERAL AND ORAL PATHOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course in general and oral pathology is designed to give the dental assistant and oral hygiene student as broad a background as possible in both general and systemic diseases, as well as special emphasis on the oral manifestations of these conditions. Additional emphasis is placed on those diseases which are specifically related to the Oro Dental complex. Primary emphasis is placed on the clinical and behavioral manifestations of disease as they relate to pathological processes. Moreover, the radiologic aspects of specific diseases are emphasized where appropriate.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

DENHYG 1424 - CLINICAL DENTISTRY FOR PATIENTS WITH SPECIAL HEALTH CARE NEEDS

Minimum Credits: 1

Maximum Credits: 1

The goals of this course are to introduce the dental/dental hygiene student to common developmental and acquired disabling conditions and issues related to the dental care of patients with special needs. The material presented will aid the student in assessing, planning, implementing and monitoring treatment for the patient with special needs.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

DENHYG 1544 - INTRODUCTION TO RESEARCH ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

The Introduction to Research Analysis course is designed to provide the student with a broad-based understanding of healthcare research with an introduction to concepts of research design, sampling, and statistics. This course will focus on practical application of accessing scholarly sources, critically appraising the literature, and applying this to a clinical question in dental hygiene practice. The students will gain knowledge and skills to analyze research articles through continued practice which will be used to develop a literature review. Students will be aligned in small groups in which a PICO question will be developed, a literature review will be conducted, and a group presentation will be developed. It is recommended that students have a basic knowledge of algebra and the scientific method before enrolling in this course. This course is designed to provide a hybrid learning experience, including both face-to-face, synchronous online instruction, and online activities.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: School of Dental Medicine (Undergraduate)

DENHYG 1545 - DENTAL HEALTH EDUCATION, METHODS AND PRACTICUM

Minimum Credits: 4

Maximum Credits: 4

This course is an introduction to classroom teaching for the dental hygienist. It involves the acquisition of knowledge and skills for classroom instruction in dental health education. Emphasis is placed on preparation, implementation and evaluation of lesson plans and the design and selection of effective audio-visual aids. It includes six weeks of dental health presentations in the community exhibiting the skills acquired the first half of the course.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: School of Dental Medicine (Undergraduate)

DENHYG 1547 - DENTAL HYGIENE SEMINAR 4

Minimum Credits: 1

Maximum Credits: 1

This course was designed to synthesize pertinent clinical and basic science information. In addition, students will be required to analyze and present a periodontal case study for peer review.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Letter Grade

Course Requirements: PROG: School of Dental Medicine (Undergraduate)

DENHYG 1549 - DENTAL HYGIENE CLINIC 4

Minimum Credits: 5

Maximum Credits: 5

This course was designed to facilitate the synthesis and application of information using a multidisciplinary approach for patient treatment. The clinical environment stimulates and prepares students for a private practice dental setting. All students are afforded the opportunity to participate in internal and external clinical rotations in the capacity of a dental auxiliary. Each student's clinical competency level is assessed and evaluated during all phases of patient treatment.

Academic Career: Undergraduate

Course Component: Clinical

Grade Component: Letter Grade

Course Requirements: PROG: School of Dental Medicine (Undergraduate)

DENHYG 1682 - BASIC PSYCHOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course is an intensive introduction to the application of behavioral theory and intervention for health professionals. Topics include learning theory, assessment, respondent and operant behavior modification, theories of anxiety, stress, and fear, and behavior change strategies for these responses.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: School of Dental Medicine (Undergraduate)

DENHYG 1689 - ADVANCED CLINICAL DENTAL HYGIENE PRACTICE

Minimum Credits: 2

Maximum Credits: 2

This course is designed to increase the proficiency and self-direction of the dental hygiene student. The assessment of patient's oral health status, planning and provision of preventive services and the identification of the need for referrals will be stressed. This will enable the student to develop fundamental skills which are necessary for various career options in the dental profession.

Academic Career: Undergraduate

Course Component: Clinical

Grade Component: H/S/U Basis

Course Requirements: PROG: School of Dental Medicine (Undergraduate)

DENHYG 1901 - ALLIED HEALTH EDUCATION

Minimum Credits: 3

Maximum Credits: 3

His course provides the student with knowledge and experience in classroom and clinical dental education. Emphasis is placed on the development of objectives and instructional units, teaching methods, learner characteristics, learning styles and conditions, instructional resources, utilization of media, and the evaluation process.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: School of Dental Medicine (Undergraduate)

DENHYG 1902 - ALLIED HEALTH EDUCATION PRACTICUM

Minimum Credits: 3

Maximum Credits: 3

This course provides the student with practical experience in both the dental hygiene classroom and clinical settings.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: Letter Grade

Course Requirements: PROG: School of Dental Medicine (Undergraduate)

DENHYG 1903 - DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 3

This course allows the student in conjunction with their advisor to expand their knowledge and experience in the identified area of interest. Projects to be determined by the student and approved by the advisor.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SU3 Elective Basis

Course Requirements: PROG: School of Dental Medicine (Undergraduate)

DENHYG 1904 - DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 3

This course allows the student in conjunction with their advisor to expand their knowledge and experience in the identified area of interest. Projects to be determined by the student and approved by the advisor.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SU3 Elective Basis

Course Requirements: PROG: School of Dental Medicine (Undergraduate)

DENHYG 1915 - INTRODUCTION TO PEER TUTORING IN DENTAL HYGIENE EDUCATION

Minimum Credits: 1

Maximum Credits: 1

This selective course will allow participants to develop the skills necessary to provide peer tutoring as part of the School of Dental Medicine Peer Tutoring Program. The course is open to second year dental hygiene and bachelor's degree completion students. The course is the first of two consecutive courses to fulfill credits towards the B.S. Degree Completion Program in Dental Hygiene and is highly recommended for those pursuing the education track.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: H/S/U Basis

DENHYG 1916 - PEER TUTORING IN DENTAL HYGIENE EDUCATION

Minimum Credits: 1

Maximum Credits: 1

This selective course will allow participants to develop the skills necessary to provide peer tutoring as part of the School of Dental Medicine Peer Tutoring Program. The course is open to second year dental hygiene students. The

course is the second of two consecutive courses to fulfill credits towards the B.S. Degree Completion Program in Dental Hygiene and is highly recommended for those pursuing the education track.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: H/S/U Basis

DENHYG 1921 - HEALTH MANAGEMENT SEMINAR

Minimum Credits: 3

Maximum Credits: 3

This seminar course is designed to provide the student with a broad based understanding of the health care delivery system. Emphasis will focus on leadership, management, quality assurance, development of dental health programs, and current health care delivery issues.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: School of Dental Medicine (Undergraduate)

DENHYG 1922 - HEALTH MANAGEMENT PRACTICUM

Minimum Credits: 3

Maximum Credits: 3

This course provides the student through a variety of field experiences with the opportunity to apply the knowledge gained in the health management seminar.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: Letter Grade

Course Requirements: PROG: School of Dental Medicine (Undergraduate)

DENHYG 1923 - DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 3

This course allows the student in conjunction with their advisor to expand their knowledge and experience in the identified area of interest. Projects to be determined by the student and approved by the advisor.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: H/S/U Basis

Course Requirements: PROG: School of Dental Medicine (Undergraduate)

DENHYG 1924 - DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 3

This course allows the student in conjunction with their advisor to expand their knowledge and experience in the identified area of interest. Projects to be determined by the student and approved by the advisor.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SU3 Elective Basis

Course Requirements: PROG: School of Dental Medicine (Undergraduate)

DENHYG 1945 - DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 3

This course allows the student in conjunction with their advisor to expand their knowledge and experience in the identified area of interest. Projects to be determined by the student and approved by the advisor.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SU3 Elective Basis

Course Requirements: PROG: School of Dental Medicine (Undergraduate)

DENHYG 1947 - DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 3

This course allows the student in conjunction with their faculty advisor to expand their knowledge and experience in the area of dental hygiene education. Projects to be determined by the student and approved by the advisor.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SU3 Elective Basis

Maximum Credits: 3

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SU3 Elective Basis

DIASCI 5800 - DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 1

This directed study course is designed for the predoctoral dental student who desires to pursue additional knowledge in specific areas of diagnostic sciences. These areas may include any of the following, but are not limited to: general, systemic, or oral pathology, or oral medicine. The content of the course is specified by the student and approved by a full-time faculty member. The teaching format is designed to teach the student specific knowledge or skills using enhanced faculty interaction and personal contact.

Academic Career: Dental Medicine

Course Component: Directed Studies

Grade Component: Grad HSU Basis

Dental Pharmacology

DSPHL 1010 - DENTAL PHARMACOLOGY

Minimum Credits: 2

Maximum Credits: 2

This course provides oral hygiene students with the opportunity to become familiar with pharmacotherapeutics as utilized by all health professionals. All drug groups are considered in order to familiarize students with the dental patient's therapeutic status. The therapeutics and adverse effects of the drugs are discussed.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

East Asian Studies

EAS 0001 - SPECIAL TOPICS IN CULTURAL EXCHANGE

Minimum Credits: 1

Maximum Credits: 2

This course provides students with a unique language/culture experience either on campus or on a short abroad trip. As a Special Topics course, the region focused on, as well as the structure and content of the course, are variable.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

EAS 0080 - CITY LIFE AND EAST ASIAN CULTURE

Minimum Credits: 3

Maximum Credits: 3

This is a humanities based modular course designed as an introduction to important areas of East Asian civilization. The student will discover how literature, art and thought has flourished in the urban areas of china and Japan.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

EAS 0081 - EAST ASIA IN THE WORLD

Minimum Credits: 3

Maximum Credits: 3

To enhance a greater understanding of East Asian cultures; to explore the interactions and relations between the peoples and cultures of East Asia (china and Japan) and the rest of the world, from ancient times to the present. Literary works, memoirs, autobiographies, diaries, historical records and films will be used. Themes involve such topics as the significance of travel in self-understanding, diaspora, immigration, and changing ideas of the homeland.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

EAS 1044 - THE CHINESE WRITING SYSTEM IN EAST ASIA

Minimum Credits: 3

Maximum Credits: 3

The Chinese script is presumed to be difficult to the untrained eye, but much of the myth lies in misunderstandings or misinformation. The course will introduce students to the Chinese writing system through historical and applied linguistic perspectives, and it will provide opportunities of discussion on how the Chinese script influences topics in anthropology, arts, education, and politics in the East Asian region. Students will gain foundational knowledge

regarding the linguistic features of the Chinese writing system, including its historical development, acquire an insight into the cultural aspect of the script, and be challenged to apply such knowledge to make critical inquiries on the relationship between the writing system and literacy development, cognitive science, visual arts, and society.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: CHIN 0001

EAS 1901 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 6

Individual study under the guidance of a faculty member. For the student whose topic is not covered by regular course work.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: LG/SNC Elective Basis

Economics

ECON 0100 - INTRODUCTION TO MICROECONOMIC THEORY

Minimum Credits: 3

Maximum Credits: 3

Introduction to principles of economic analysis as applied to the study of prices and markets. The course builds a theoretical basis for understanding producer and consumer behavior, and prepares students to appreciate the importance of markets in our economic system.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Social Science General Ed. Requirement, SCI Polymathic Contexts: Soc/Behav. GE. Req.

ECON 0110 - INTRODUCTION TO MACROECONOMIC THEORY

Minimum Credits: 3

Maximum Credits: 3

An introductory course which develops the basic tools needed to analyze the behavior of various macroeconomic phenomena including inflation, gross domestic product, and unemployment. In addition, these tools are used to study how and whether the government can impact the behavior of the overall economy. Finally, the course looks at the role various institutions such as banks and the stock and bond markets play in affecting the economic environment.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Social Science General Ed. Requirement, SCI Polymathic Contexts: Soc/Behav. GE. Req.

ECON 0150 - ECONOMIC DATA ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

An introduction to economic data and statistical concepts. Topics covered include: measures of location and dispersion and introduction to probability theory; characteristics of probability distributions; sampling theory, point estimation

and hypothesis testing. Correlation analysis and the linear regression model are treated with special emphasis placed on the construction, estimation, and interpretation of economic models. Emphasis is placed on understanding and using statistical concepts rather than on proving theorems.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: STAT 0800 or 0200 or 1000 or 1100 or ENGR 0020

ECON 0160 - INTRODUCTION TO ECONOMETRICS

Minimum Credits: 3

Maximum Credits: 3

Develop an understanding of basic econometrics. Teaches use of the computer for econometric and statistical analysis, and how to acquire information about published data on basic economic activity. Attempts to develop an understanding of the difficulties inherent in collecting and interpreting actual data. The heart of the course is the development of basic econometric skills. Learning about data sources and computer software will be included as the basic econometric theory is developed.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: Writing Intensive Course (WRIT)

ECON 0200 - GAME THEORY PRINCIPLES

Minimum Credits: 3

Maximum Credits: 3

This course introduces the basic concepts of game theory. The emphasis is on the unifying perspective that game theory offers to questions in economics, other disciplines, and everyday life. The course draws on a wide range of substantive and intellectually stimulating applications of game theory across areas in economics, other disciplines, and beyond. It will enable students to view social interactions as strategic games, to use game theoretic concepts to predict behavior in these interactions and to conceive of ways in which altering the game affects social outcomes.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Quant.-Formal Reason General Ed. Requirement, DSAS Social Science General Ed. Requirement, SCI Polymathic Contexts: Soc/Behav. GE. Req.

ECON 0220 - INTRO TO HEALTH ECONOMICS

Minimum Credits: 3

Maximum Credits: 3

This course applies microeconomic analysis to the allocation of resources and consumption of products within the health care economy. It will allow students to develop an understanding of microeconomic theory, in particular as it is applied to real world problems. Also it will provide students with knowledge of the economic aspects of health care in the US and related policy. Unique features of health care which interfere with competitive market allocation and pricing will be emphasized.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ECON 0100; MIN GRADE 'C' for all courses

ECON 0230 - INTRODUCTION TO PUBLIC ECONOMICS

Minimum Credits: 3

Maximum Credits: 3

The objectives of this course are - to illustrate how basic economic principles can be used to determine the economic effects of government expenditure and tax policies; to develop the students' ability to analyze issues and to recognize the value judgments which lie behind various positions taken in current policy debates.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ECON 0100 or 0800

Course Attributes: Urban Studies

ECON 0260 - EVERDAY DECISIONS & RATIONALITY: INTRO TO BEHAVIORAL ECONOMICS

Minimum Credits: 3

Maximum Credits: 3

This course provides students a hands-on introduction to applications of behavioral economics in the real world. Behavioral economics aims to explain economic decision-making using insights from psychology -- when predictions of traditional economic theory fail and the need for alternative explanations for the observed behavior emerges. Students will apply the scientific method by generating a research question about economic behavior; collecting data through experimental, observational, or survey methods; and analyzing the data to test their hypothesis.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ECON 0100

ECON 0280 - MONEY AND BANKING

Minimum Credits: 3

Maximum Credits: 3

The course is directed toward giving the student an insight into the role that monetary policy and financial markets play in the economy. It will cover both the theoretical and institutional aspects of banking necessary to function successfully in the business world. One object of the course is to give the student the ability to analyze and appraise critically the monetary policy of federal reserve system.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ECON 0110 or 0800 (MIN GRADE 'C')

Course Attributes: Urban Studies

ECON 0290 - FINANCIAL MARKETS AND INSTITUTIONS

Minimum Credits: 3

Maximum Credits: 3

This course will provide the student with a strong foundation in financial market analysis and the roles of non-bank financial institutions in the modern economy. The course covers financial markets such as debt markets, equity markets, and derivatives markets and non-bank financial institutions, including mutual funds, pension funds, securities firms, and insurance companies.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ECON 0110 AND (STAT 0200 OR STAT 1000 OR STAT 1100 OR STAT 1152 OR ECON 0150 OR ECON 1150)

ECON 0290 - FINANCIAL MARKETS AND INSTITUTIONS

Minimum Credits: 3

Maximum Credits: 3

This course will provide the student with a strong foundation in financial market analysis and the roles of non-bank financial institutions in the modern economy. The course covers financial markets such as debt markets, equity markets, and derivatives markets and non-bank financial institutions, including mutual funds, pension funds, securities firms, and insurance companies.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

ECON 0360 - INTRODUCTION TO ENVIRONMENT AND RESOURCE ECONOMICS

Minimum Credits: 3

Maximum Credits: 3

Basic economic theory applied to issues involving joint interaction of economic activity, the environment, and use of natural resources. Debate over the sustainability of economic development, renewability and/or depletion of natural resources, and effects of pollution on environmental quality will be surveyed. The issues of ozone depletion, loss of biodiversity, and greenhouse gas emissions and global warming will be considered.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ECON 0100 or 0800

Course Attributes: Global Studies

ECON 0400 - LABOR AND THE ECONOMY

Minimum Credits: 3

Maximum Credits: 3

An introductory survey of contemporary labor developments and issues. Readings and lectures have a more historical and institutional perspective and less emphasis on analytical techniques than other labor offerings.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ECON 0100 or 0800 (Min Grade 'C')

ECON 0410 - ECONOMICS OF DIVERSITY

Minimum Credits: 3

Maximum Credits: 3

This course aims to strengthen students' understanding of how race, class, gender, disability, ethnicity, nationality, culture, sexuality, religion, and age interact with public policies to influence various economic outcomes. We analyze the evolution of economic consequences on populations that have been historically disadvantaged. Specifically, we discuss how governments (especially the U.S. government) and societies deal with diversity and their level of discrimination vs inclusivity of different groups over time and across space.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

ECON 0430 - WOMEN IN THE LABOR MARKET

Minimum Credits: 3

Maximum Credits: 3

The empirical evidence suggests that women earn lower income than men, and that the wage rates earned by women are lower than those of men --- even when they have similar job classifications. This course examines the role of women in the labor market; the nature of their decision to invest in education, their labor force participation, and the demand for their labor services. In this way, a framework for policy analysis is developed.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ECON 0100 or 0800

Course Attributes: Gender, Sexuality & Women's St

ECON 0460 - SPORTS ECONOMICS

Minimum Credits: 3

Maximum Credits: 3

The objective of this course is for students to understand and apply the concepts of microeconomics that are relevant for the business and practice of sports. Areas of study include labor economics, public economics, industrial organization, the economics of information, and the economics of sports betting markets. Examples of questions addressed within these fields include: how have owners in professional sports leagues coordinated to limit player salaries? How much are players worth, in an economic sense? What pricing strategies can teams employ to maximize profits?

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ECON 0100; MIN GRADE: C

ECON 0480 - ECONOMICS OF INEQUALITY

Minimum Credits: 3

Maximum Credits: 3

The objective of this course is to provide students with an overview of the recent economic research on inequality. The primary focus will be inequality in economic outcomes such as income and wealth. Inequality in other outcomes such as education, health, and housing may be covered. The material will seek to provide answers to questions along the following lines: Why does inequality matter? How do we measure inequality? What is the extent of inequality,

including race and gender disparities, among other dimensions? What are the drivers of inequality? What are possible policy responses to inequality? How does inequality affect social mobility? Are there political causes and consequences of inequality? What are some historical origins of inequality?

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: ECON 0100 (min grade C)

ECON 0500 - INTRODUCTION TO INTERNATIONAL ECONOMICS

Minimum Credits: 3

Maximum Credits: 3

Provides an introduction to international economics. Half the topics are pure theory, half international monetary economics. Topics from the real world are analyzed. Topics include alternative pure trade theories; effects of trade barriers; U.S. commercial policy; forms of regional integration; balance of payments; elimination of balance of payments disequilibrium; international monetary system.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (ECON 0100 and 0110) or 0800 (MIN GRADE 'C')

Course Attributes: Asian Studies, DSAS Global Issues General Ed. Requirement, Global Studies, Latin American Studies, MCSI - Sustainability Related, SCI Polymathic Contexts: Global&Cross Cul GE. Req., West European Studies

ECON 0501 - INTRODUCTION TO INTERNATIONAL ECONOMICS

Minimum Credits: 3

Maximum Credits: 3

An introduction to the basic issues of international economics and to the historical evolution and institutional structure of the international economy. Topics include mercantilism, comparative advantage as a basis for trade, the impact of trade on income distribution, the evolution of the international financial system, and the working of the international gold standard.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SU3 Elective Basis

ECON 0530 - INTRODUCTION TO DEVELOPMENT ECONOMICS

Minimum Credits: 3

Maximum Credits: 3

An introductory description and analysis of the economic systems of countries commonly referred to as less developed countries. Alternative development policies with respect to international trade, agriculture, industry, health, and education will be outlined. The roles played by government, population growth, environmental degradation, income distribution, and foreign aid will be discussed. The economic aspects of development will be stressed.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (ECON 0100 and 0110) or ECON 0800 (MIN GRADE 'C')

ECON 0630 - EAST ASIA'S DYNAMIC ECONOMIES

Minimum Credits: 3

Maximum Credits: 3

An introductory survey of several East Asian economies. The primary objective is to equip students with a clear understanding of major elements of recent Asian economic history and current economic conditions, and of implications of Asian economic gains for the United States economy, particularly U.S. Trade relationships with this region and their dynamically changing patterns. A secondary objective is to use case studies and empirical materials as vehicles to appreciate how economic principles can be used in real world analysis.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (ECON 0100 and 0110) or ECON 0800; MIN GRADE: 'C' for all listed Courses; PLAN: Economics (ECON-BA), Economics (ECON-BS), Economics-Statistics (ECNSTC-BS), Mathematics-Economics (M-ECON-BS)

Course Attributes: Asian Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

ECON 0640 - ECONOMIC DEVELOPMENT OF THE MIDDLE EAST AND NORTH AFRICA (MENA) REGION

Minimum Credits: 3

Maximum Credits: 3

This course is designed to expose students to current views by academics and policy makers on past practices and future challenges facing the economies of the Mena region. The course will be taught with an interdisciplinary emphasis on political, social, and cultural, as well as economic aspects. Assignments will include a research paper in addition to a group project presentation. Students will gain an overall understanding of the economic problems of the region, and will be able to effectively analyze changes in the economic climate of the region.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: African Studies, DSAS Geographic Region General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

ECON 0800 - INTRODUCTION TO ECONOMICS

Minimum Credits: 3

Maximum Credits: 3

A one-term course designed primarily for the non-major. The main goals are to create interest in the study of economics and introduce some basic tools economists use to analyze social issues. Issues range from farm subsidies to changes in income tax rates to changes in spending on crime reduction.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Social Science General Ed. Requirement, SCI Polymathic Contexts: Soc/Behav. GE. Req.

ECON 0900 - PROFESSIONAL DEVELOPMENT FOR ECONOMISTS

Minimum Credits: 1

Maximum Credits: 1

In this course, students will 1) understand the range of career and advanced degree options for which their studies in Economics will make them eligible. 2) develop professional skills in presentation and communication. 3) maximize progress within the major by setting broader academic and career goals and exploring learning opportunities.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Satisfactory/No Credit

Course Requirements: RESTRICTED TO ECON PLANS: ECON-BA; ECON-BS; ECNSTC-BS; M-ECON-BS

ECON 0905 - SPECIAL TOPICS

Minimum Credits: 3

Maximum Credits: 3

Current topics of particular interest to economics majors are discussed and analyzed.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ECON 0100; MIN GRADE: C or better

ECON 1010 - AMERICAN ECONOMIC HISTORY

Minimum Credits: 3

Maximum Credits: 3

The course presents a survey of the strategic factors in the economic development of the United States from colonial times to the great depression. The topics covered include the record of economic growth, the process industrialization and its major phases, British mercantilism, the role of technological change, demographic history, the slave economy, distribution of income, urbanization, and the financial sector.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ECON 0100 or 0800 (MIN GRADE 'C')

Course Attributes: DSAS Historical Analysis General Ed. Requirement, SCI Polymathic Contexts: Soc/Behav. GE. Req.

ECON 1030 - INTELLCL FOUNDTNS OF CAPITALISM

Minimum Credits: 3

Maximum Credits: 3

This course explores the salient features of European economic development from the black plague of the middle ages to the great depression of the 1930's. The emphasis will be to understand how social, demographic, and economic processes interacted and ultimately culminated in one of the most momentous events in the history of mankind, the industrial revolution. We shall venture an explanation for why Europe was the first continent and England the first country to industrialize. The social changes in the aftermath of the revolution will also be covered.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Contexts: Soc/Behav. GE. Req.

ECON 1050 - SOCIALISM VERSUS CAPITALISM

Minimum Credits: 3

Maximum Credits: 3

The course covers the economic changes that produced capitalism; the attempts to understand capitalism which culminated in the theories of Adam Smith; the problems of communist societies and their attempts to return to some form of capitalism.

Academic Career: Undergraduate

Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ECON 1070 - HISTORY OF ECONOMIC THOUGHT 1

Minimum Credits: 3

Maximum Credits: 3

This course surveys the development of economic thought from post-Renaissance times through the early 20th Century. The primary objective of the course is to understand the intellectual foundations of modern economic theory and understand how economic philosophy evolved through-and alongside-history. The course will focus on 1) the origins of modern economic thought during the Renaissance and Reformation, 2) English mercantilism, 3) key pre-Smith writers such as Hobbes, Locke, Petty, Cantillon, Law and the French Physiocrats, 4) the classical model of Adam Smith's Wealth of Nations, 5) early classical theorists, particularly Ricardo, Mill and Malthus, 6) the 19th century emergence of neoclassical economics--marginal analysis and optimization , 7) the Austrian school, 8) Walrasian general equilibrium, 9) the early 20th Century Cambridge School, and 10) the emergence of Keynesianism as a challenge to classical orthodoxy.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ECON 0100 or ECON 0110 or ECON 0800

ECON 1100 - INTERMEDIATE MICROECONOMICS

Minimum Credits: 3

Maximum Credits: 3

Microeconomics is the study of how small economic units, such as individual consumers and firms, engage in trade and set prices through their interaction in a world characterized by scarcity. We will examine models of consumer and firm behavior that allow for a rich analysis of the markets and the effects of government policy. This course will help students expand and refine their understanding of the theoretical tools utilized by microeconomists and provide an introduction to game theory and its applications. Students who complete this course will be prepared for more advanced economics courses in economic theory and applied microeconomic fields.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ECON 0100 (C or better) and ECON 0110 (C or better) and Calculus: Math 0220 (C or better) or MATH 0120 (B or better) or MATH 0125 (B or Better) and Math 0126 (B or Better)

Course Attributes: Global Studies

ECON 1102 - ECONOMIC MODELING SKILLS

Minimum Credits: 1

Maximum Credits: 1

This course focuses on the skills needed to use economic models to analyze economic phenomena including: model choice, model specification, approaches to problem solving, abstract reasoning, math skills, and interpreting and analyzing results.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

ECON 1110 - INTERMEDIATE MACROECONOMICS

Minimum Credits: 3

Maximum Credits: 3

A systematic treatment of macroeconomic analysis including such topics as policy analysis, inflation-unemployment tradeoffs, business cycles, budget deficits, and the balance of payments.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ECON 0110 and ECON 0110 [Math 120 or {0125 and 0126} (with a B or higher) or 0220 or 0230 or 0235] MIN GRADE: "C" for all listed courses

Course Attributes: Global Studies

ECON 1150 - APPLIED ECONOMETRICS 1

Minimum Credits: 3

Maximum Credits: 3

Introduces basic tools in applied econometrics that are commonly employed in government, business, and academic research. The main emphasis is on application of various econometric methods. Students are expected to become familiar with standard computer programs that are frequently used in quantitative economic research. Topics covered are a review of basic statistics, classical linear regression models, and associated inferential problems, and generalized linear regression models and associated inferential problems.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: [MATH 0120(with a B or higher) or 0220 (C or higher) or (0125 and 0126) (with B or higher) or (0230 or 0235) (with c or higher)] and (STAT 0200 or 1000 or 1100 or 1152) (with a C or higher)

Course Attributes: DSAS Quant.-Formal Reason General Ed. Requirement

ECON 1160 - FINANCIAL ECONOMETRICS

Minimum Credits: 3

Maximum Credits: 3

Covers important advanced techniques and models frequently used in quantitative economic research in government, business, and academic institutions. Emphasis is on application. Among the subjects to be covered are distributed lag models, seemingly unrelated regression models, error components models, simultaneous equation models, and an introduction to the use and analysis of econometric models.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ECON 1150 OR STAT 1221

ECON 1190 - APPLIED ECONOMETRICS 2: ADVANCED METHODS

Minimum Credits: 3

Maximum Credits: 3

This course teaches students hands-on skills in applied econometric research methods, with a focus on research design and approaches to establish empirical relationships of cause and effect. The course will cover advanced methods in regression analysis and the toolkit of quasi-experimental methods. Topics covered include omitted variable bias, fixed effects, instrumental variables, randomized control trials, difference-and-differences, and regression discontinuities. There is a strong focus on learning the basic tools of programming and coding (R, Python or STATA) though no prior knowledge of these programs is required.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ECON 1150 or Stat 1221 (min grade C)

ECON 1191 - ECONOMIC RESEARCH & DATA SKILLS - MINI COURSE

Minimum Credits: 1

Maximum Credits: 1

This course teaches students hands-on skills for conducting and presenting economic research and data analysis. Topics vary each semester, reflecting current software and new techniques.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

ECON 1192 - ECONOMIC RESEARCH & DATA SKILLS - SHORT COURSE

Minimum Credits: 2

Maximum Credits: 2

This course teaches students hands-on skills for conducting and presenting economic research and data analysis. Topics vary each semester, reflecting current software and new techniques.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

ECON 1193 - ECONOMIC RESEARCH & DATA SKILLS

Minimum Credits: 3

Maximum Credits: 3

This course teaches students hands-on skills for conducting and presenting economic research and data analysis. Topics vary each semester, reflecting current software and new techniques.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ECON 1150 or Stat 1221 (min grade C)

ECON 1200 - GAME THEORY

Minimum Credits: 3

Maximum Credits: 3

The aim of the course is to introduce the main elements of game theory, in a manner which emphasizes the connections between the "cooperative" and "non-cooperative" traditions. Students will be expected to develop understanding sufficient to construct proofs as well as to perform computations, and there will be emphasis on modelling issues.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: MATH 0120(with a B or higher) or 0220 or (0125 and 0126) or 0230 or 235 and (STAT 0200 or 1000 or 1100); MIN GRADE: 'C' FOR LISTED COURSES

ECON 1230 - PUBLIC ECONOMICS

Minimum Credits: 3

Maximum Credits: 3

The objective of this course is to provide you with the tools necessary to understand the justifications for and the consequences of government interventions in the economy. We will examine the role of public policy in markets in which there are external costs (e.g. pollution) or benefits (e.g. education) as well as the role of government in providing social insurance. Finally, we will study the incidence and efficiency implications of various types of taxation. In order to understand the consequences of government intervention in the economy, a significant amount of attention will be given to empirical research that tries to answer policy relevant questions.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ECON 1100 (MINGRADE: 'C')

ECON 1250 - BEHAVIORAL ECONOMICS

Minimum Credits: 3

Maximum Credits: 3

This course will expose students to how insights from psychology and experiments have been incorporated into economic models. We will discuss how the insights have changed our understanding of markets and auctions, strategic interactions (game theory), individual decision making under uncertainty and over time, political behavior and more. We will also explore the welfare and policy implications of the findings from behavioral economics.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ECON 1100 (Min Grad 'C')

Course Attributes: MCSI - Sustainability Related

ECON 1260 - EXPERIMENTAL ECONOMICS

Minimum Credits: 3

Maximum Credits: 3

This course will expose students to the methodology and practice of experimental economics, where economic theories and hypotheses are tested and evaluated using data collected from controlled experiments. We will read and discuss a variety of different experiments that have been conducted including those examining markets and auctions, strategic interactions (game theory), individual decision making, political institutions and more.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ECON 1100; MIN GRADE 'C'

ECON 1280 - MONETARY THEORY AND POLICY

Minimum Credits: 3

Maximum Credits: 3

Course focuses on financial system and important role it plays in facilitating growth in the U.S. Economy. Financial intermediaries are discussed with emphasis placed on the banking system and its regulator, the federal reserve system, the federal reserve's influence on money supply and interest rates and nonbank public's demand for money is discussed. Role of monetary policy in promoting price stability and economic growth discussed in the context of a U.S. Economy that is growing more integrated with worldwide economic events.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ECON 1110 (MIN GRADE 'C')

ECON 1290 - MONETARY POLICIES AND FINANCIAL MARKETS

Minimum Credits: 3

Maximum Credits: 3

The main goal of this course is to understand credit markets and monetary policy. Why are credit markets organized in a particular way? What forces shape financial contracts and the behavior of asset markets? Why do we need financial regulation? What is the role of central banks? How do they conduct monetary policy? How does monetary policy affect financial markets and the real economy? We will study how monetary policy influences interest rates and asset markets, such as the bond market and the stock market. We will analyze the effect of asymmetric information in corporate finance, and on the design of financial contracts. We will study the role of financial intermediaries, such as banks, in the economic system and study the economic rationale behind domestic and international banking regulation. Finally, we will discuss monetary policy. We will review evidence and theory on how monetary policy affects real economic activity and financial markets. We will study the instruments and goals of monetary policy, focusing in particular on credibility and expectations management for central banks, the connection with fiscal policy and international cooperation in monetary policy.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ECON 1110; MIN GRADE: C

ECON 1360 - ENVIRONMENTAL ECONOMICS

Minimum Credits: 3

Maximum Credits: 3

Basic economic theory is applied to issues involving the joint interaction of economic activity, the environment, and use of natural resources. The debate over the sustainability of economic development, the renewability and/or depletion of natural resources, and the effects of pollution on environmental quality will be surveyed, including the issue of greenhouse gas emissions and global warming. Benefit-cost analysis, optimal tax and regulatory schemes, public goods, property rights, emission rights markets, and other economic policy instruments/concepts will be studied.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ECON 1100 (MINGRADE: 'C')

Course Attributes: Global Studies

ECON 1420 - LABOR ECONOMICS

Minimum Credits: 3

Maximum Credits: 3

This is an advanced elective course on labor economics for undergraduate students. The purpose of the course is to apply the analytical tools from intermediate microeconomic theory to analyze how society develops, allocates and rewards human resources, and to study a wide range of labor-related issues, such as labor supply; household production and labor force participation; labor demand; minimum wages; labor market discrimination; compensating wage differentials; schooling and earnings; wage inequality, and immigration. Emphasis will also be given to the empirical evidence on those topics.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ECON 1100 (MINGRADE: 'C')

ECON 1440 - ECONOMICS OF CORPORATION FINANCE

Minimum Credits: 3

Maximum Credits: 3

The course is intended as an analysis of the investment valuation and financing of the corporation. Attention will be focused on the application of economic theory to the solution of financial problems. The interrelations between investment and financing policies and their dependence on security valuations will be stressed. The institutional background necessary to analyze these problems will be examined, and practical cases drawn from personal and business situations will be used along with more theoretical materials.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ECON 1100 (MINGRADE: 'C')

ECON 1460 - FINANCIAL MARKETS & INSTITUTIONS

Minimum Credits: 3

Maximum Credits: 3

The objective of this course is to provide the student with a strong foundation in financial market analysis and the roles of nonbank financial institutions in the modern economy. This course will commence with the necessary background for financial market analysis, including methods of valuation and the role of interest rates and monetary policy. The course will then cover three broad types of financial markets: debt markets, equity markets and derivatives markets. Each section will focus on the types of instruments and the markets in which they are traded, as well as methods of valuation of these asset classes. The course then investigates nonbank financial institutions, including mutual funds: pension funds, securities firms and insurance companies, paying close attention to their role in the previously-discussed markets.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

ECON 1470 - MARKET STRUCTURE AND COMPETITION

Minimum Credits: 3

Maximum Credits: 3

The course is a survey of the behavior of firms, the structure of industrial markets, and market performance. The survey will cover both theoretical models and empirical analyses.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ECON 1100 (MINGRADE: 'C')

ECON 1490 - POLITICAL ECONOMY

Minimum Credits: 3

Maximum Credits: 3

Political economy studies the interrelationships between economic systems and political systems. This course will focus on theories of public choice, social choice, and economic models of political processes. Students will study how collective decision-making and individual preferences shape public policies, examining the incentives and behaviors of voters, politicians, and bureaucrats. By integrating these perspectives, the course aims to provide an understanding of how political and economic forces interact to influence policy outcomes and societal welfare.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

ECON 1500 - INTERNATIONAL TRADE

Minimum Credits: 3

Maximum Credits: 3

This course is an intermediate level survey of the theory of international trade and related evidence. Topics include causes and consequences of international trade, trade and income distribution, commercial policy, political economy aspects of trade policy, preferential trading arrangements (USMCA, European Union, etc.), Trade and development, and others. While no one geographic area is singled out, examples will come from most areas of the world economy.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ECON 1100 (Min Grad 'C')

Course Attributes: Global Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req., West European Studies

ECON 1510 - INTERNATIONAL FINANCE

Minimum Credits: 3

Maximum Credits: 3

This course provides an in-depth analysis of international monetary economics and related topics in the area of international finance. Topics to be covered include exchange rate determination, balance of payments, exchange market efficiency, forward exchange rates, effects of devaluation, the international monetary system.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ECON 1110 (MIN GRADE: 'C')

Course Attributes: DSAS Global Issues General Ed. Requirement, Global Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req., West European Studies

ECON 1540 - ECONOMIC GROWTH: INNOVATION & POLICY

Minimum Credits: 3

Maximum Credits: 3

In this course, we will seek to understand both the causes and effects of long-term economic growth. We will study how industrial organization, intellectual property policy, education, knowledge diffusion, cultural and political institutions, international trade, productivity, health, welfare, and inequality impact economic growth. We will document the broad trends in growth and development in a global context, first historically, then with greater emphasis on the experience of the US in the 20th century and beyond. We will study a variety of models that have been proposed over the years to explain the observed facts.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ECON 1110 (MINGRADE: 'C'); PROG: School of Arts & Sciences

Course Attributes: Global Studies

ECON 1580 - ECON GROWTH PBLC HLTH DEMOGRAPHY

Minimum Credits: 3

Maximum Credits: 3

Surveys the principle elements of demographic science, particularly within the context of developed and developing economies. Focuses on causes and consequences of changes in mortality, natality, migration and immigration as they apply to such current problems as (1) sufficient saving; (2) physical capital accumulation; (3) productivity changes; (4) the distribution of wealth and income, and (5) changes in population dependency ratios.

Academic Career: Undergraduate

Course Attributes: SCI Polymathic Contexts: Global&Cross Cul GE. Req.

ECON 1610 - LATIN AMERICA ECON DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

A survey of institutional economic problems and development theories and policies in Latin America. Introductory section: significance of economic and non-economic factors. Core of the course: causes of underdevelopment, national planning, demographic growth, land tenure and agrarian reform, industrialization, financing, inflation, trade and balance of payments, foreign debt, regional integration, employment-unemployment, distribution, and social welfare. Final section: integrated model presenting alternative strategies to economic development in the area.

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (ECON 0100 and 0110) or ECON 0800; MIN GRADE: 'C' For All Listed Courses

ECON 1630 - ECONOMIC DEVELOPMENT OF CHINA

Minimum Credits: 3

Maximum Credits: 3

This course surveys the development of china's economy since 1800 with particular emphasis on studying china's experience under different forms of economic organization (market economy, central planning, reformed system combining plan and market) and comparing china's development with that of other nations.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ECON 1100; MIN GRADE: C

Course Attributes: Asian Studies, DSAS Geographic Region General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

ECON 1680 - ECONOMICS OF THE EUROPEAN UNION

Minimum Credits: 3

Maximum Credits: 3

Introduction to economy of Europe, including theory and institutions of European community as they relate to economic systems, its economic relations with other European states and the world, its economic problems and policies. Elementary economics will be reviewed, but no specialist knowledge is required. European economic policies are examined in a critical manner. Some study of breakdown of eastern bloc and the implications of eastern European crisis for European community and the United States.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

ECON 1700 - CAPSTONE SEMINAR IN MICROECONOMICS

Minimum Credits: 3

Maximum Credits: 3

In this seminar, students will study in-depth a current topic in Economics. Their work will include a research paper or other culminating project which requires them to apply economic concepts and theories to analyze issues and situations in the real world.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ECON 1100 (Min Grade 'C') and ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006)

Course Attributes: Capstone Course, Global Studies, Undergraduate Research, Writing Intensive Course (WRIT)

ECON 1701 - GREEN INFRASTRUCTURE IMPLEMENTATION: A CASE STUDY OF THE PITTSBURGH REGION

Minimum Credits: 3

Maximum Credits: 3

This course is designed to exercise the student's academic knowledge, passions, and skills to facilitate real-world problem solving in a collaborative setting. It will improve the students' skills in these areas: analytical; collaborative work; project management; communication; experimentation; and decision analysis. Differences in baseline skills and interests will be recognized in assignments and grading.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

ECON 1710 - CAPSTONE SEMINAR IN INTERNATIONAL ECONOMICS

Minimum Credits: 3

Maximum Credits: 3

In this seminar, students will study in-depth a current topic in International Economics. Their work will include a research paper or other culminating project which requires them to apply economic concepts and theories to analyze issues and situations in the real world.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ECON 1100 and ECON 1110 (Both Min Grade: 'C') and ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006)

Course Attributes: Asian Studies, Capstone Course, DSAS Global Issues General Ed. Requirement, Global Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req., Undergraduate Research, Writing Intensive Course (WRIT)

ECON 1720 - CAPSTONE SEMINAR IN MACROECONOMICS

Minimum Credits: 3

Maximum Credits: 3

In this seminar, students will study in-depth a current topic in Economics. Their work will include a research paper or other culminating project which requires them to apply economic concepts and theories to analyze issues and situations in the real world.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ECON 1110 (Min Grade: 'C') and ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or

0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006)

Course Attributes: Capstone Course, Undergraduate Research, Writing Intensive Course (WRIT)

ECON 1730 - SEMINAR EXPERIMENTAL ECONOMICS

Minimum Credits: 3

Maximum Credits: 3

There is a small, but rapidly growing literature in which behavioral experiments are used to test central propositions of various economic theories. This course will review the experimental literature that exists in several areas of economics, including industrial organization, social choice and preference revelation, behavior of decentralized markets, and bargaining.

Academic Career: Undergraduate

Course Attributes: Capstone Course, Undergraduate Research, Writing Intensive Course (WRIT)

ECON 1750 - ECONOMIC RESEARCH METHODS

Minimum Credits: 3

Maximum Credits: 3

This course is the first in a two-course series in which students learn the process of economic research and carry out a research project. In this course students will learn to formulate a feasible economic research question, review the related literature, identify or create an appropriate economic model with a testable hypothesis, and identify appropriate data and methods to test the hypothesis. Students will write and present a research proposal which includes the introduction, literature review, model, and methods sections of their research paper.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ECON 1150 or Stat 1221 (min grade C) or instructor permission

ECON 1750 - ECONOMIC RESEARCH METHODS

Minimum Credits: 3

Maximum Credits: 3

This course is the first in a two-course series in which students learn the process of economic research and carry out a research project. In this course students will learn to formulate a feasible economic research question, review the related literature, identify or create an appropriate economic model with a testable hypothesis, and identify appropriate data and methods to test the hypothesis. Students will write and present a research proposal which includes the introduction, literature review, model, and methods sections of their research paper.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

ECON 1760 - ECONOMIC RESEARCH CAPSTONE

Minimum Credits: 3

Maximum Credits: 3

This course is the second in a two-course series in which students learn the process of economic research and carry out a research project. In this course students will learn to collect the appropriate data, perform the appropriate hypothesis testing, and analyze results. Students will present their research and write a publishable academic journal article.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ECON 1901 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 12

Student designed project of study in a particular area of economics. Supervised closely by a faculty member.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: LG/SNC Elective Basis

Course Attributes: Capstone Course

ECON 1902 - DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 12

A course of directed study on an economic topic under the direction of a faculty mentor.

Academic Career: Undergraduate

ECON 1910 - SEMINAR IN CURRENT ECONOMIC RESEARCH

Minimum Credits: 1

Maximum Credits: 1

This course features research by Pitt faculty exploring the current frontier of a selected topic in economics. Students will learn to read and evaluate research papers in economics. Students will understand how research in the field builds on prior work and how multiple studies with different approaches, methods, data, and cases contribute to consensus in the field.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Satisfactory/No Credit

Course Requirements: PREQ: ECON 1100

ECON 1910 - SEMINAR IN DIVERSITY: CURRENT ECONOMIC RESEARCH

Minimum Credits: 1

Maximum Credits: 1

This course features research by Pitt faculty exploring the impact of race, gender, immigration status, etc, in many economic contexts, as well as implications for economic fundamentals such as risk, bargaining, and competition.

Academic Career: Undergraduate

Grade Component: Satisfactory/No Credit

Education

EDUC 1011 - CULTURALLY RESPONSIVE PEDAGOGY

Minimum Credits: 3

Maximum Credits: 3

Instructional practices that respond to the social context in which they (will) work. The course covers general principles and approaches to culturally responsive teaching such as how teachers develop meaningful relationships with students, how teachers learn from and about a school and local community, how teachers develop and implement culturally responsive classroom management, and how teachers develop expectations for students that maximize their capacity. In addition, the course will assist students in learning about and developing culturally responsive curriculum and pedagogy in their different content/subject matter areas (such as mathematics, science, art, language arts, and social studies). A recurrent and central question of the course is: how do teachers develop culturally responsive instructional practices in their particular disciplinary domain to maximize students learning opportunities?

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Letter Grade

EDUC 1015 - FROM CLASSROOM TO COMMUNITY: INTER-AND INTRA-PERSONAL SKILLS DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

This course provides an introduction to intervention and prevention efforts designed to improve educational, mental health, and socio-behavioral outcomes for first-year students with various backgrounds and lived experiences. The transition to college presents students with a unique set of challenges. With rapid assimilation into an institution of higher learning, an athletic department, and a varsity athletic team, Pitt student-athlete's particular transitional needs differ from nearly all other student populations. This course is therefore designed to assist them with skills acquisition and practice necessary for everyday wellness and resilience in the classroom and the community. The focus of the class will be on skills for thriving and improving their lives, and the lives of others, rather than just surviving in life. By the end of the course, you should be able to: (1) Directly practice a variety of wellness and resilience skills, habits, and routines in different areas of your life to minimize stress and optimize well-being, (2) Describe why intentionally 'practicing' wellness and resilience skills is critical to developing the fluency to use and reap the benefits from them, (3) Develop a wellness and resilience toolbox of skills, strategies, and resources that serves as the vehicle on your road map for your future as a student and in the workplace, (4) Plan for how to use these skills to be your own and others' advocates in your future careers and communities.

EDUC 1110 - GENDER AND EDUCATION

Minimum Credits: 3

Maximum Credits: 3

This seminar examines the role that gender plays in the lives of students, researchers, educators, and policy makers. Major topics may include: changing trends of participation and success in k-16 schooling; childhood and professional socialization; media and curricular bias; coming of age; embodiment, sexuality, and sexual harassment; gender and the educational professions; feminist and ant-bias teaching; leadership and transnational communities of practice; activism and engaged feminist scholarship.

Academic Career: Undergraduate

Ed Foundations, Org, & Policy

EFOP 1001 - SOCIAL FOUNDATIONS OF EDUCATION

Minimum Credits: 3

Maximum Credits: 3

Students in the course have the opportunity to develop a foundational understanding of the dynamics of schooling in society by addressing the cultural aspects that underlie society's educational ideas and practices. Through an interdisciplinary approach, readings and activities are designed for school practitioners, or those contemplating careers in education, to engage in the study of those cultural aspects and consequences. The general intent of foundational study is to introduce students to interpretive uses of knowledge germane to education and to establish a basis for lifelong learning through normative and critical reflection on education within its historical philosophical, cultural and social contexts. Special emphasis is focused on the role of schooling in cultivating the habits necessary for democratic citizenship which include ongoing efforts to secure equitable and just social relations, and to advance the common good.

EFOP 1086 - FOUNDATIONS OF RESIDENCE LIFE

Minimum Credits: 1

Maximum Credits: 1

This course reviews the historical and theoretical foundations of the student affairs field with an emphasis on residential living. The course focuses on the influence of campus residential life on student success, community development, student leadership skills, and diversity, equity, and inclusion in higher education.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Satisfactory/No Credit

EFOP 1359 - GENDER, EDUCATION, AND INTERNATIONAL DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

In this course, we look at gendered dimensions of education and development in international contexts. We look cross-culturally, across space, and across "development" continua and paradigms. We examine gendered issues through three modules that represent diverse levels of educational practice - basic education, higher education, and non-formal and informal education. In order to provide focus in this rich and complex field, we hone in on key policy orientations that build sequentially, starting with the most fundamental issues of access and equity, continuing with capacity building, and extending to sustainability and creating social change. Since this class is feminist by design, we explicitly link policy with agency, theory with advocacy, and reflection with action. Each course section also contains a strand on advocacy and action, through which students are able to create a synthesis of module lessons through a personal, analytical standpoint piece.

Academic Career: Undergraduate

Course Component: Lecture

Electrical and Computer Engineering

ECE 0101 - LINEAR CIRCUITS AND SYSTEMS

Minimum Credits: 4

Maximum Credits: 4

This course covers the fundamentals of linear electric circuit analysis used throughout the electrical and computer engineering curricula. Students learn basic concepts and terminology of electrical engineering and develop knowledge and skills to analyze, evaluate, and design electrical circuits in class and in an accompanying laboratory where they build prototyping and analysis skills using modern test equipment. Primary topics include electric variables and circuit elements, Kirchhoff's and Ohm's Laws, mesh and node equations, Thevenin and Norton equivalent circuits, first- and second-order circuits, time- and frequency-domain analyses, ideal transformers, and AC power. **PREREQUISITES:** PHYS 0175 and ENGR 0012 or ENGR 0016 **COREQUISITE:** ECE 0401

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: PHYS 0175; COREQ: ECE 0401; PLAN: EE-BSE, COE-BSE, UNDENG-UNK

ECE 0102 - MICROELECTRONIC CIRCUITS

Minimum Credits: 4

Maximum Credits: 4

This course covers the fundamentals of microelectronic circuits, specifically operational amplifiers, diode and rectifier circuits, analysis and design of MOS field-effect transistor and bipolar-junction transistor amplifiers, and CMOS digital-logic circuits. In this course, the students will integrate their knowledge of linear circuits and will learn how to analyze, evaluate, and design electronic circuits. This course includes a laboratory section in which the students will gain prototyping, design, and testing skills using conventional equipment.

Academic Career: Undergraduate

Course Component: Lecture

ECE 0201 - DIGITAL CIRCUITS AND SYSTEMS

Minimum Credits: 4

Maximum Credits: 4

In this course, students study the fundamental building blocks used in the design of modern digital electronics and

computers. Students learn how to use and combine digital components to create circuits that perform fundamental computing tasks such as arithmetic and storage of information. Primary topics covered include Boolean algebra and binary arithmetic, combinational and sequential logic circuits, Finite-State Machine (FSM), Hardware Design Language (HDL), and Register Transfer Level (RTL) for digital design. Students extend their knowledge to practice by way of hands-on laboratory exercises where various software and hardware tools are used to design and test solutions for real-world applications. After completing this course, students understand the design of digital computing systems at their most fundamental level and are able to craft such systems using modern tools and techniques.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: PHYS 0175 and (ENGR 0012 or ENGR 0712 or ENGR 0716); PLAN: EE-BSE, COE-BSE, UNDENG-UNK

ECE 0202 - EMBEDDED PROCESSORS AND INTERFACING

Minimum Credits: 4

Maximum Credits: 4

This course covers the fundamentals of embedded processors and interfacing, including microprocessor structure and instruction sets, programming using C and assembly languages, memory and peripherals, interfacing, and embedded system design. Detailed studies of microprocessor I/O and interrupt techniques as applied to analog-to-digital, digital-to-analog, timers, and parallel and serial interfaces are also included. Laboratory activities provide the student with experience in developing and testing the hardware and software required to incorporate embedded computers into systems that solve real-world problems.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (ECE 0201 and ECE 0301) or ((COE or CS 0447 or COE 0147) and (COE 0501 or ECE 0501)); PLAN: Electrical Engineering or Computer Engineering

ECE 0211 - DIGITAL CIRCUITS AND SYSTEMS CREDIT LAB

Minimum Credits: 1

Course Component: Credit Laboratory

Grade Component: Letter Grade

ECE 0301 - ECE PROBLEM SOLVING WITH C++

Minimum Credits: 3

Maximum Credits: 3

This course covers fundamental concepts and techniques in software design for solving problems in electrical and

computer engineering (ECE) using C++. Students learn procedural and object-oriented program development, as well as basic control structures, data structures, and algorithms. Students apply these skills in crafting and testing structured programs to solve problems of interest in ECE, such as linear circuits and systems, digital circuits and systems, and linear algebra and differential equations, through assignments that are tied to concepts covered in these other core sophomore courses of ECE.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ENGR 0012 or 0016 or 0711; PLAN: EE-BSE, COE-BSE, UNDENG-UNK

ECE 0302 - DATA STRUCTURES AND ALGORITHMS

Minimum Credits: 3

Maximum Credits: 3

This course covers the fundamentals of data structures and algorithms. Topics include stacks, queues, trees, lists, heaps and other widely used abstract data types. Students will learn how to implement these data structures using C++ and techniques for analyzing algorithms that contain them. Advanced applications of recursion, sorting, and searching algorithms and other algorithms that incorporate data structures will also be discussed.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ECE 0301, or with special permission; PROG: Swanson School of Engineering; PLAN: Electrical Engineering or Computer Engineering

ECE 0401 - ECE ANALYTICAL METHODS

Minimum Credits: 3

Maximum Credits: 3

This course provides the fundamental mathematical background to solve problems in electrical and computer engineering (ECE). The main objective is to cover topics from calculus, linear algebra, differential equations, and complex analysis most relevant to electrical and computer engineering. Primary topics include matrices, vectors, systems of equations, determinants, double integrals, first- and second-order ordinary differential equations, complex numbers, Eulers identity, phasor analysis, signal waveforms, Laplace transform, transfer functions, frequency response, and an introduction to the Fourier transform. Students also learn to solve mathematical problems based upon these topics, both analytically and using the MATLAB programming environment.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: MATH 0230; COREQ: (ENGR 0012 or ENGR 0016 or ENGR 0711 or ENGR 0712 or ENGR 0716); PLAN EE-BSE, COE-BSE, UNDENG-UNK

ECE 0402 - SIGNALS, SYSTEMS, & PROBABILITY

Minimum Credits: 3

Maximum Credits: 3

This is an introductory course covering the mathematical modeling and analysis of signals and input-output systems, probability and statistics, with an emphasis on ECE applications of these concepts. The signal-processing portion builds on existing knowledge of ordinary differential equations and Laplace transforms, to a complete treatment of continuous-time signals and systems, especially linear time-invariant systems, in the time and frequency domains. The latter portion of the course covers basic concepts in probability, including discrete and continuous random variables, probability density and mass functions, computation of expected values, conditional probability densities, as well as an introduction to hypothesis testing and statistical analysis.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ECE 0401; Plan: Electrical Engineering or Computer Engineering

ECE 1095 - SPECIAL TOPICS: UNDERGRADUATE

Minimum Credits: 4

Maximum Credits: 4

An undergraduate-level course in special topics of current interest in electrical and computer engineering.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

ECE 1110 - COMPUTER ORGANIZATION AND ARCHITECTURE

Minimum Credits: 3

Maximum Credits: 3

This course provides a detailed introduction into the basics of computer design common to most computer architectures including topics of digital computer data representation, arithmetic and logic units, instruction formats, control, microprocessor architecture, and memory systems. This course includes a heavy focus on assembly language and its interaction with a RISC computer architecture.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ECE 0202; PLAN: Electrical Engineering or Computer Engineering

ECE 1115 - HIGH PERFORMANCE COMPUTING

Minimum Credits: 3

Maximum Credits: 3

This course teaches high-performance computing as a complex system that sits at the intersection of algorithms, programming, systems, networks, and processors. Students are introduced to generalized abstractions of parallel programming via data and task parallelism. Topics include processor pipelining, instruction-level parallelism, superscalar instructions, multiprocessor parallelism with threading, cluster computing and interconnection networks. Students engage in several hands-on programming assignments using parallel programming standards, such as MPI.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ECE 0202 and 0302; PLAN: Electrical Engineering or Computer Engineering

ECE 1120 - HARDWARE DESIGN METHODOLOGIES 1

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (COE 0501 or ECE 0501) and (COE 0147 or COE 0447 or CS 0447 or ECE 0142); PLAN: Computer Engineering or Electrical Engineering

ECE 1140 - SYSTEMS AND PROJECT ENGINEERING

Minimum Credits: 4

Maximum Credits: 4

This course covers system and software engineering processes, tools, and common practices through lectures and labs. Both the waterfall model and agile methods, specifically Extreme Programming and Scrum, are presented and used in developing a term-long group project. Students experience firsthand each of the concepts covered throughout the term by specifying, designing, and building an integrated working hardware/software system with equal contribution from each of the 5 or 6 team members. During the group project, full lifecycle documentation is created, UML is used for designing the system and a fully working system is developed, tested, and publicly presented. During the course students will use an IDE, UML, code repository, defect tracking, testing, scheduling, and documentation tools.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREREQS: ECE 0202 and ECE 0302 PLAN: Electrical Engineering or Computer Engineering

ECE 1145 - SOFTWARE CONSTRUCTION AND EVOLUTION

Minimum Credits: 3

Maximum Credits: 3

In this course, students will learn about software engineering principles related to software construction, maintenance, and evolution, focusing on standards and techniques for developing maintainable, flexible software. Topics covered include: version control and branching, test-driven development, design patterns, coding standards and documentation, exception handling, refactoring, and code review. Students will apply knowledge of these topics in assignments, peer code reviews, and a course project with multiple iterations.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ECE 0302; PLAN: Electrical Engineering or Computer Engineering

ECE 1147 - ALGORITHMS FOR BIG DATA

Minimum Credits: 3

Maximum Credits: 3

In this course, students will learn about Big Data, its various applications, and different mathematical models and algorithms to efficiently manage it. The theoretical aspect of this course will cover mathematical methods for developing such algorithms while the practical application aspect will cover the use of these algorithms on real Big Datasets. Topics include randomized streaming algorithms, fast matrix multiplication with Big Data, data mining techniques such as shingling and min-hashing and MapReduce programming models. Hands-on assignments are completed using including cloud-computing services, SQL and the Python programming language.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ECE 0302 and 0402; PLAN: Electrical Engineering or Computer Engineering

ECE 1148 - ALGORITHMIC THINKING

Minimum Credits: 3

Maximum Credits: 3

The course will cover the application of data structures and algorithms to solve complex engineering problems. Topics include: Asymptotic analysis of algorithms, efficient sorting algorithms, proofs, and discrete probability, divide and conquer techniques, dynamic programming, greedy algorithms, graphs and minimum cuts, breadth and depth first

searching, shortest path algorithms and more. By way of several programming assignments and projects, students will gain the skills necessary to develop algorithmic solutions using these techniques.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ECE 0302; PLAN: Computer Engineering or Electrical Engineering

ECE 1150 - COMPUTER NETWORKS

Minimum Credits: 3

Maximum Credits: 3

The course covers a theoretical understanding of technology involving, as well as problem solving skills for, interconnected devices where potential methods of interconnection are fundamental to the system design. Fundamentals related to wireless network systems and networks of computers or embedded digital devices, especially the lower levels of the stack, are emphasized. Coverage includes data link protocols, medium access control, addressing, routing, and transport protocols.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (ECE 0142 or (COE 0147 or COE 0447 or CS 0447); or (ECE 0302 and ECE 0402); PLAN: Electrical Engineering or Computer Engineering

ECE 1155 - INFORMATION SECURITY

Minimum Credits: 3

Maximum Credits: 3

This course is an introduction to information security at the computer system level, the network level, and the human level. Students will first learn general computer security technology and principles such as cryptographic tools, user authentication, access control, malicious software and attacks, and defending techniques. Then, we will delve into the details of software and system security, including buffer overflow vulnerability, operating system security, and Cloud and Internet-of-Things (IoT) security. The latter units of the course cover cryptographic and message authentication algorithms and their application in security network protocols, as well as human factors and legal and ethical issues.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (ECE 0202 and ECE0302), or (COE 0147 or COE 0447 or CS 0447), or (ECE 0142 or ECE 1770); PLAN: Electrical Engineering or Computer Engineering

ECE 1165 - DEPENDABLE COMPUTER ARCHITURE

Minimum Credits: 3

Maximum Credits: 3

The field of dependable computing has recently emerged as one of the most important areas of study in computer and electrical engineering. Modern computer systems are susceptible to a broad range of potential faults, errors, and failures, and increasing chip density and design complexity exacerbate the problem. Novel methods in hardware, information, network, software, and time redundancy are now available to mitigate these threats in the form of resilient computer architectures, apps, and systems. The focus of studies here is the design and analysis of dependable machines, from small embedded systems to space-based platforms to high-end supercomputers, in terms of reliability, availability, performability, testability, and safety metrics, and more.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ECE 1110 or ECE 1673 (min grade 'B'); PROG: Swanson School of Engineering;
PLAN: COE or EE

ECE 1166 - PARALLEL COMPUTER ARCHITECTURE

Minimum Credits: 3

Maximum Credits: 3

Introduction to fundamental and newly developing hardware and software topics in parallel computer architecture (pca) including concepts, models, methods, metrics, systems, and applications. Pca has become one of the most challenging and important areas of ece, and it is now a dominant theme throughout computer architecture, systems, and programming, from low-power embedded systems to high-end supercomputers, and featuring various forms of fixed-logic (e.g., cpu, dsp, gpu), reconfigurable-logic (e.g., fpga), and hybrid (e.g., cpu+dsp, cpu+fpga, cpu+gpu, cpu+fpga+gpu) processing devices.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ECE 0142 or (COE 0147 or COE 0447) and (COE 0401 or CS 0401 or strong programming skills and experience in C or C++); and LVL: Senior; PLAN: Computer Engineering or Electrical Engineering

ECE 1170 - SPECIAL TOPICS: COMPUTERS

Minimum Credits: 3

Maximum Credits: 3

An undergraduate course dealing with special topics of current interest in ECE.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ECE 0302; PLAN: Electrical and Computer Engineering

ECE 1175 - EMBEDDED SYSTEMS DESIGN

Minimum Credits: 4

Maximum Credits: 4

This course introduces the fundamental challenges, methodologies, and techniques for designing different components of embedded computing systems, including microprocessors, I/O, memory and caches, and external sensors and actuators. Various system design issues including power management, real-time operating system design and system scheduling will also be discussed. Laboratory activities provide the students with the opportunities of gaining hands-on project experiences with modern embedded and mobile computing platforms such as microcontrollers, smartphones, sensors and wearables, as well as practicing these programming platforms over real-world embedded computing applications.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ((ECE 0142) or (COE 0142 or 0147 or 0447) or (CS 0447)), or ECE 0202; PROG: Undergraduate Swanson School of Engineering; Plan: Computer or Electrical Engineering

ECE 1180 - COMPUTATIONAL MODELING AND SIMULATION FOR ENGINEERS

Minimum Credits: 3

Maximum Credits: 3

In this course students will develop several software programs to model and simulate a range of different physical

systems. The course will focus on building software simulations of systems in terms of underlying model objects, world representations, interactions between objects, and a variety of models for time. Some experience in c/c++ programming is assumed.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ECE 0302; PROG: School of Engineering

ECE 1188 - CYBER-PHYSICAL SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

The arrival of the internet-of-things (IOT) has brought about a world where the everyday objects we interact with, ranging from health monitoring devices to appliances and automobiles, are embedded with intelligence, the ability to communicate over a network and act on information stored in the "cloud". In this intensive laboratory course, students, by way of a series of projects, follow the journey data takes from a sensor, to a microcontroller, through a network and then to the cloud (and back!). Along the way students are exposed to a broad range of electrical and computer engineering topics including electronic design, embedded programming, digital signal processing, networking and information theory, wireless communications, antenna theory and big data analytics.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ECE 0202 and ECE 0302; PLAN: Electrical Engineering or Computer Engineering

ECE 1190 - ROBOTICS STUDIO

Minimum Credits: 1

Maximum Credits: 1

In this course, students will learn how to design modern, mobile robotic systems. Students will study advanced robotic topics via off-the-shelf robotic kits. Students are placed in teams, assigned a robotic platform, tailored to their interests and skill level, and tasked with learning how to operate and develop software for it. No prior experience in robotics is necessary and all experience levels, from complete beginners to advanced robotics developers, are welcomed. The goals of this course are to introduce students to the field of robotics, give them exposure to advanced robotic technologies and build enthusiasm for the field.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: H/S/U Basis

Course Requirements: PREQ: ECE 0302

ECE 1192 - INTRODUCTION TO VLSI DESIGN

Minimum Credits: 4

Maximum Credits: 4

Understand basic concepts and introductory techniques of modern integrated digital circuit design using Complementary Metal-Oxide-Semiconductor (CMOS) transistors. Learn how to design/simulate essential CMOS circuits for digital Very Large Scale Integration (VLSI) designs using state-of-the-art Computer Aided Design (CAD) tools.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ECE 0201 and ECE 0102; PROG: Undergraduate Swanson School of Engineering

ECE 1193 - ADVANCED VLSI DESIGN

Minimum Credits: 3

Maximum Credits: 3

This course is organized as a full semester project in conjunction with a small amount of lecture material on advanced CMOS digital design techniques, as well as the group design process itself. Students form groups of 3 to 5 per group that design and implement different VLSI projects which are then fabricated by MOSIS and returned for testing. Focus is on teamwork with frequent oral/written reports.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ECE 1192 or ECE 2192; PROG: Swanson School of Engineering

ECE 1195 - ADVANCED DIGITAL DESIGN

Minimum Credits: 3

Maximum Credits: 3

This course is designed to teach both the theoretical and practical considerations in the design of computing systems. It introduces the students to modern computer aided design (CAD) tools, languages, and techniques. The student is exposed to a variety of design experiences that complement their knowledge of digital circuits and microprocessors. Students will complete a series of laboratory assignments and learn how to implement large-scale, complex digital systems with commercial CAD tools. Designs will be prototyped using Field Programmable Gate Arrays (FPGA) and verified using electronic test equipment.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ECE 0202; PLAN: Electrical Engineering or Computer Engineering

ECE 1212 - ELECTRONIC CIRCUIT DESIGN LAB

Minimum Credits: 3

Maximum Credits: 3

An electronic circuits laboratory experience with emphasis on circuit applications and design. Topics include: multi stage amplifier design; operational amplifier applications; analog-digital conversion applications, active filters.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ECE 0102; Plan: Electrical Engineering or Computer Engineering

ECE 1215 - ELECTROACOUSTICS AND AUDIOELECTRONICS

Minimum Credits: 3

Maximum Credits: 3

Topics covered include: Electroacoustics (SPL, microphones, loudspeakers) Design of audio-specific small-signal circuitry (OP amp design, JFETs, vacuum tubes, noise) Power amplifier topologies (class A, AB, D) Audio effects circuitry (distortion, delay, tremolo, wah). This is a lab-based course in which students will complete a lab assignment on a different topic every week, concluding with the design, construction, and characterization of a custom audio circuit using the DIYRE Colour module system.

Academic Career: Undergraduate

Grade Component: Letter Grade

Course Requirements: PREQ: ECE 0102 and ECE 0402 ; PLAN: Electrical Engineering or Computer Engineering

ECE 1232 - INTRO LASERS & OPTCL ELECTNC

Minimum Credits: 3

Maximum Credits: 3

Introduction to and applications of basic laser and optical electronic principles; optical modulation and detection systems.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ECE 0101 and (ECE 1259 or PHYS 1351); PROG: Swanson School of Engineering

ECE 1237 - ANALOG CIRCUIT DESIGN

Minimum Credits: 3

Maximum Credits: 3

The objectives of this course are: to understand the operation of essential CMOS analog circuits and learn how to design them. To design the analog circuits using a 45nm CMOS process and verify their performance by SPICE simulation using a commercial EDA tool (Cadence Spectre). Topics include: comparators; two-stage amplifiers; folded-cascade amplifiers; voltage and current references; oscillators; linear regulators; switched-capacitor circuits; digital-to-analog converters, analog-to-digital converters; SAR ADCs; delta-sigma ADCs; second order effects & noise assignment; sensor interfaces. Prerequisites: ECE 1286 or equivalent

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

ECE 1238 - DIGITAL ELECTRONICS

Minimum Credits: 3

Maximum Credits: 3

Switching behavior of semiconductor devices; logic circuit families; DTL, TTL, Schottky, Ecl, CMOS, i2l; regenerative logic circuits; semiconductor memories; spice circuit simulation.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ECE 0201 and ECE 0102; PROG: Swanson School of Engineering

ECE 1247 - SEMICONDUCTOR DEVICE THEORY

Minimum Credits: 3

Maximum Credits: 3

Electrical properties of solids, energy levels, semiconductor theory, diodes, bipolar junction transistors, field effect transistors.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ECE 1212 and (ECE 0402 or ECE 1552); PLAN: Electrical Engineering or Computer Engineering

ECE 1250 - NANOTECHNOLOGY & NANO-ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

The course introduces nanoscale devices created from a range of nanomaterials including carbon nanotubes (CNTS), nanoparticles (NPS), and nanowires (NWS). Theories of operation, fabrication techniques and applications of Nano devices will be discussed. The course combines lecture, laboratory work, and web-supported project-based learning.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (MATH 0230 or 0235 or 0150 or 0221) and [PHYS 0175 or 0476 or (0210 and 0203) or (0150 and 0151)]; PROG: Swanson School of Engineering

ECE 1251 - MICRO AND NANO DEVICE FABRICATION LABORATORY

Minimum Credits: 3

Maximum Credits: 3

Micro/Nano fabrication area in science and engineering has already produced remarkable results in understanding and controlling matter and is expected to make a tremendous impact on electronics and society by facilitating breakthroughs for tomorrow's electronic devices. Micro and Nano Device Laboratory will introduce students to device fabrication and design methodology for fundamental fabrication processes. In addition, this course will provide an understanding of the scientific and technical aspects of microtechnology/nanotechnology and will enable students to contribute to this rapidly developing new technology field. This course comprises laboratory work and accompanying lectures that cover cleanroom introduction, wafer cleaning, silicon oxidation, mask design, photolithography, thin film deposition, wet and dry etching, and other nanofabrication processes. This elective course is designed for junior and senior level undergraduate students.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (CHEM 0970 or CHEM 0420) and PHYS 0175 and (ENGR 0240 or ECE 1250) or instructor approval. PROGRAM: Swanson School of Engineering

ECE 1259 - ELECTROMAGNETICS

Minimum Credits: 3

Maximum Credits: 3

Vector calculus, gradient curl, divergence theorem and stokes' theorem, coulomb's law gauss's law, Laplace equation, poisson equation, dielectrics, BIOT-Savart Law, vector potentials, ampere's law, faraday's law, inductance, magnetic materials, Lorentz force, Maxwell's equation, electromagnetic radiation.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: MATH 0240 or ECE 0402; PLAN: Electrical Engineering or Computer Engineering

ECE 1266 - APPLICATIONS OF FIELDS AND WAVES

Minimum Credits: 3

Maximum Credits: 3

Plane waves, the wave equation, poyniting vector, transmission lines, wave guides, antennas and radiation applications.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ECE 1259; PROG: Swanson School of Engineering

ECE 1270 - SPECIAL TOPICS ADVANCED APPLICATIONS IN ECE 2

Minimum Credits: 1

Maximum Credits: 1

An undergraduate course dealing with special topics of current interest in ECE.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Satisfactory/No Credit

Course Requirements: PREQ: ECE 0301 and ECE 0402; PROG: Swanson School of Engineering; PLAN: Electrical Engineering Students and Computer Engineering Students

ECE 1272 - SIMULATION AND DESIGN OF SILICON PHOTONICS

Minimum Credits: 3

Maximum Credits: 3

The goal of this course is to enable students to design basic photonic integrated circuits by providing them with an intuitive understanding of core photonic components (e.g. waveguides, couplers, resonators, etc.) as well as a solid grasp of the tools needed to simulate multi-component designs. By the end of the course, students should understand the steps needed to take a PIC design from original concept to fabrication at a foundry. This includes such topics as: on-chip filtering/routing using ring resonators and Bragg gratings; methods for optimizing bandwidth and on/off-chip coupling efficiency using edge and grating couplers; integrated high-speed silicon PN modulator design and optimization; integrated high-speed germanium PIN photodetector design and optimization; full photonic circuit simulation using the S-parameter method. Prerequisites: an undergraduate course covering the fundamentals of electromagnetic waves.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: B or better in the following courses: ECE 1259 or PHYS 1361 or ECE 1232 or PHYS 1363 or CHEM 1470 or CHEM 1472 or ECE 1240

ECE 1286 - ANAL & DSGN ANLG INTGRTD CRCT

Minimum Credits: 3

Maximum Credits: 3

Introduction to spice. Multiple transistor circuits, internal structure of operational amplifiers. Current sources and current steering circuits, active loads. Frequency response of directly coupled, capacitive coupled and tuned amplifiers. Analysis and design of multistage amplifiers. Feedback and frequency compensation in operational amplifiers.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ECE 0102; PROG: Swanson School of Engineering

ECE 1390 - INTRO TO IMAGE PROCESSING

Minimum Credits: 3

Maximum Credits: 3

Introductory subjects in image processing include image spaces and image representation, image enhancement, edge detection, edge and region based segmentation, and feature extraction and object recognition. Spatial and frequency domain approaches will be addressed with emphasis on spatial domain approaches. Some problems are solved on the computer in the c programming language.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ECE 0402 or ECE 1552; PROG: Undergraduate Swanson School of Engineering;
PLAN: ECE or COE

ECE 1395 - INTRODUCTION TO MACHINE LEARNING

Minimum Credits: 3

Maximum Credits: 3

Machine Learning methods are at the core of many recent advances in "intelligent computing". Current applications include machine perception (vision, speech recognition), control (process control, robotics), data mining, time-series prediction (e.g. in finance), natural language processing, text mining and text classification, bio-informatics, neural modeling, computational models of biological processes, and many other areas. This is an introductory undergraduate course on machine learning and its applications in different areas. The course will briefly cover techniques for visualizing and analyzing multi-dimensional data along with algorithms for projection, dimensionality reduction, regression, clustering, classification and neural networks, and deep learning. A main course objective is to present various approaches to classifier design so that students can make judicious choices when confronted with real pattern recognition problems. However, it is important to emphasize that the design of a complete pattern recognition system for a specific application domain requires domain knowledge, which is beyond the scope of this course. Students will use available tools and libraries to implement some algorithms using MATLAB.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: [ECE 0402 and ECE 0301] ; PLAN: Electrical Engineering or Computer Engineering

ECE 1472 - ANALOG COMMUNICATION SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

Analysis of modern analog communication systems, including the theory underlying their design and practical implementation issues. Various forms of amplitude and angle modulation. Amplifiers, mixers, detectors, phase-lock loops, and the design of transmitters and receivers. Probability, random signals, optimal receivers, noise and performance analysis. Case studies including telephone, commercial radio, and television.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ECE 1552 or ECE 0402; PROG: Swanson School of Engineering

ECE 1473 - DIGITAL COMMUNICATION SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

Analysis of modern digital communications systems, including the theory underlying their design and practical implementation issues. Baseband digital signaling: pam, PCM, quantization, ISI, multiplexing. Modulation formats: ask, FSK, BPSK, DPSK, GAM. Probability, information channel capacity random signals, optimal receivers and performance analysis. Case studies include modems, satellite systems, and cellular telephone.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ECE 1552 or ECE 0402; PROG: Swanson School of Engineering

ECE 1475 - SOFTWARE DEFINED RADIO PRACTICUM

Minimum Credits: 1

Maximum Credits: 1

This is a Practicum course in which students investigate and implement communication systems using software-defined radio. Students work in pairs to pursue a project of their own choosing and present their results to the class. The projects will consist of the development of transmitters and receivers and testing them to evaluate their performance. The goals of this course are to introduce students to the field of software defined radio, give them exposure to the GNU Radio platform, and to build enthusiasm for the field.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: H/S/U Basis

Course Requirements: PREQ: ECE 0301 and 0402

ECE 1560 - DIGITAL SIGNAL PROCESSING

Minimum Credits: 3

Maximum Credits: 3

This course provides students with theoretical background and practical experience in data acquisition and digital signal processing related to computer-based measurements. The course addresses the representation, analysis, and design of discrete time signals and systems. Topics covered include implementation of discrete systems, discrete-time Fourier analysis and the FFT algorithm, analysis of discrete systems in terms of poles and zeros, and design of infinite and finite impulse response filters.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ECE 0402 or ECE 1552 Plan: Electrical Engineering or Computer Engineering

ECE 1562 - DIGITAL AND ANALOG FILTERS

Minimum Credits: 3

Maximum Credits: 3

Active filter design; operational amplifier circuits; cascade design with first-order and biquad circuits; Butterworth and Chebyshev low pass filters; sensitivity and frequency transformations. Digital filter design; IIR filter design using bilinear transformation; window design of fir filters; realization of IIR and fir filters.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ECE 1552 or ECE 0402; PROG: Swanson School of Engineering

ECE 1570 - SPECIAL TOPICS: ADVANCED APPLICATIONS IN ECE 3

Minimum Credits: 1

Maximum Credits: 3

An undergraduate course dealing with special topics of current interest in ECE.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Letter Grade

Course Requirements: PREQ: ECE 0202 or ECE 0302; PROGRAM: Swanson School of Engineering

ECE 1673 - LINEAR CONTROL SYSTEMS

Minimum Credits: 4

Maximum Credits: 4

Introduction to feedback control systems, mathematical models, second order systems response and identification, system types, steady-state errors, root locus analysis and design, bode plots, nyquist theory and frequency domain compensation techniques. Includes a laboratory.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ECE 1552 or ECE 0402 Plan: Electrical Engineering or Computer Engineering

ECE 1674 - MECHATRONIC SYSTEMS

Minimum Credits: 4

Maximum Credits: 4

This course covers Mechatronic system design providing an understanding of each of the basic engineering disciplines and their interactions involved: controls (control laws, analytic tools and error budgets), mechanical systems (motors, bearings, ballscrews, gears etc.), electrical systems (controllers, power amplifiers, sensors, cable management), and software engineering (embedded computing & PLCs). This course will emphasize designing mechatronic systems from a control system perspective.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (ECE 0202 and ECE 0402), or ECE 1552 PROG: Swanson School of Engineering; PLAN: Computer or Electrical Engineering

ECE 1675 - ROBOTIC CONTROL

Minimum Credits: 4

Maximum Credits: 4

This course focuses on the application of control theory in robotics. Topics to be covered include: review of classical and modern control design methods such as PID control, state feedback, optimal control, adaptive control, and hybrid system control; control of mobile robots; control of robot manipulators; reinforcement learning; cognitive robotics.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: Pre-Req - ECE 0402 Plan - Electrical and Computer Engineering

ECE 1701 - FUNDAMENTALS OF ELECTRIC POWER ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

This is a first course in electric power engineering for electrical and computer engineers. The course provides the fundamental background to solve some common problems in electric power engineering, and to design power systems using engineering assumptions based on this background. The main objective is to cover topics in AC single phase and three phase power, transformers, transmission lines and electric machinery by integrating their knowledge of linear circuit analysis, electricity, and magnetism to these power systems topics. Students will also gain knowledge of power systems simulation using the PowerWorld simulator. This course will provide the prerequisite knowledge for the study of load flow, symmetrical components, and fault analysis which will be covered in a later course.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ECE 0102; Plan: Electrical Engineering or Computer Engineering

Course Attributes: MCSI - Sustainability Related

ECE 1710 - POWER DISTRIBUTION SYSTEMS ENGINEERING AND SMART GRIDS

Minimum Credits: 3

Maximum Credits: 3

Review of power engineering fundamentals, load characteristics and distribution transformers, design of distribution substations, design considerations of primary and secondary systems, substation grounding, voltage drop and power loss, application of capacitors to distribution systems, distribution system voltage regulation and system software, smart grid technologies, energy management.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ECE 0031 or ECE 0101 or MEMS 0031 or ENGR 1869; PROG: Swanson School of Engineering

Course Attributes: MCSI - Sustainability Related

ECE 1750 - POWER ELECTRONICS CONVERSION THEORY

Minimum Credits: 3

Maximum Credits: 3

Analysis of power electronic circuits. Converter concepts, models and metrics. Rectifiers. DC-DC converters. Inverters. Thermal and reliable design. Control and applications, e.g. photovoltaic and motor drives.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ECE 0102 and 0402

Course Attributes: MCSI - Sustainability Related

ECE 1770 - SPECIAL TOPICS:ADVANCED APPLICATIONS IN ECE 4

Minimum Credits: 3

Maximum Credits: 3

An undergraduate course dealing with special topics of current interest in ECE.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ECE 0302 ; PROG: Swanson School of Engineering

ECE 1771 - ELECTRIC MACHINERY

Minimum Credits: 3

Maximum Credits: 3

Application of magnetostatics to the design of magnetic circuits, actuators, sensors and rotating electric machines. Performance characteristics of transformers, induction machines, synchronous machines and DC machines. Includes a laboratory.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ECE 0102 or instructor permission; PROG: Swanson School of Engineering

ECE 1773 - POWER GENERATION, OPERATION, AND CONTROL

Minimum Credits: 3

Maximum Credits: 3

Area control error (ace), automatic generation control (AGC), characteristics of power generation units, economic dispatch of generators, unit commitment, hydrothermal coordination and storage, interchange power, limited energy supply, optimal power flow, power system security, production cost modeling, state estimation, transmission system effects, unit commitment.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ECE 1673 or 1769; PROG: Swanson School of Engineering

ECE 1774 - ADVANCED POWER SYSTEMS ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

Steady state phenomena, matrix transformations, system parameters, system unbalances, digital methods, and numerical analysis techniques applied to load flow, state estimators, and fault studies in the large power systems.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ECE 0102 and 0302

Course Attributes: MCSI - Sustainability Related

ECE 1775 - POWER QUALITY

Minimum Credits: 4

Maximum Credits: 4

An introductory power systems laboratory course providing hands-on experience covering various electric power topics. The course will be conducted in the Electric Power Systems Laboratory and will include lectures, analytical and simulation assignments, and laboratory procedures. Topics include: familiarization with lab equipment and safety, power system equipment, power conversion equipment, and electric machinery.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ECE 0402

ECE 1776 - MICROGRID CONCEPTS & DISTRIBUTED GENERATION TECHNOLOGIES

Minimum Credits: 3

Maximum Credits: 3

This course describes fundamental concepts related with the development of microgrids and the integration of distributed generation. Technical topics are divided into three modules. The first module introduces microgrid components and discusses the main types of microsources. The second focuses on energy storage technologies. The third includes system integration topics, such as power electronics interfaces; dc and ac architectures; economics, operation, stabilization, and control; reliability aspects; grid interconnection, and microgrids as part of the "smart" grids. This course also aims at preparing students to conduct research or helping them improve their research skills.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ECE 0402

ECE 1885 - DEPARTMENTAL SEMINAR

Minimum Credits: 0

Maximum Credits: 0

Seminars are designed to acquaint the student with aspects of engineering that are not normally encountered in classes and school activities and include a wide range of topics such as the significance of engineering as a profession, and ethical problems in engineering and skills required for a successful engineering career.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: H/S/U Basis

Course Requirements: PROG: Swanson School of Engineering

ECE 1890 - ECE PROTOTYPING FUNDAMENTALS

Minimum Credits: 1

Maximum Credits: 1

In this course students will learn fundamental prototyping techniques used in the design of electronic systems. This includes Printed-Circuit Board (PCB) Design, soldering, manufacturing and various other hands-on skills. The learning objective of this course is to prepare students with practical skills that are often needed in design-oriented electrical and computer engineering courses and projects.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: H/S/U Basis

Course Requirements: PLAN: Computer and Electrical Engineering

ECE 1893 - ECE UNDERGRADUATE RESEARCH PROJECT

Minimum Credits: 1

Maximum Credits: 3

Undergraduate research experience involves students in an original research project. Using one or a variety of methods, students will collect original data and contribute to problem solving in ECE. As a first research experience, emphasis will be placed on the process of scientific research, including formulation of a research plan, data collection, assessment of data quality, and interpretation based on available data. Students are required to present their results to an audience outside of the department.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Letter Grade

ECE 1894 - ECE UNDERGRADUATE INDUSTRY PROJECT

Minimum Credits: 1

Maximum Credits: 3

In this course, students work in a team to solve real world engineering problems via an industry sponsored design project. Students will be provided design requirements and be charged with the development and testing of a functional prototype. In addition to technical skills, students will also learn various professional skills, such as the importance of professionalism and good communication, by way of regular interaction and meetings with industry mentors.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Letter Grade

ECE 1895 - JUNIOR DESIGN FUNDAMENTALS

Minimum Credits: 3

Maximum Credits: 3

This course teaches students the engineering design process. Emphasis is placed on the development of fundamental hands-on-skills commonly used in the design of modern electrical and computer engineering technologies. Students participate in a series of mock design experiences, culminating in the participation of an actual design project. After completion of this course, students will be able to design a system that meets specifications and satisfies a stakeholder's needs and requirements. Students will also learn how to create functional design prototypes and verify them.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQS: ECE 0102, and ECE 0202, and ECE 0302, and ECE 0402; PLAN: Electrical Engineering or Computer Engineering

ECE 1896 - SENIOR DESIGN PROJECT

Minimum Credits: 3

Maximum Credits: 3

This is a rigorous, capstone design course where students apply the analytical and synthesis skills they have developed during undergraduate coursework to the design of a working prototype. Students work in teams to identify and analyze a real problem, design a hardware/software solution, and construct, test and then evaluate the effectiveness of the prototype. The primary goal of this course is to provide students with a culminating, major design experience that incorporates engineering standards and realistic constraints, preparing them for professional engineering practice.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Letter Grade

Course Requirements: PREQ: [(ECE 0031 or COE 0031) and (ECE 0257 or COE 0401 or CS 0401)] or ECE 1895; LEVEL: Senior; PLAN: Electrical Engineering or Computer Engineering

Course Attributes: Capstone Course

ECE 1898 - ENGINEERING PROJECT

Minimum Credits: 1

Maximum Credits: 6

An investigation of an approved engineering subject under the supervision of a faculty monitor. Must be approved in advance by the faculty monitor and the department chair.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SU3 Elective Basis

ECE 2156 - ADVANCED INFORMATION SECURITY

Minimum Credits: 3

Maximum Credits: 3

This course covers information security at the computer system level, the network level, and the human level. Students will first learn general computer security technology and principles such as cryptographic tools, user authentication, access control, malicious software and attacks. Then, we will delve into the details of network attacks and defending techniques. The latter units of the course cover software and system security, including buffer overflow vulnerability, operating system security, and Cloud and IoT security as well as human factors and legal and ethical issues.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ECE 2165 - DEPENDABLE COMPUTER ARCHITECTURE

Minimum Credits: 3

Maximum Credits: 3

The field of dependable computing has recently emerged as one of the most important areas of study in computer and electrical engineering. Modern computer systems are susceptible to a broad range of potential faults, errors, and failures, and increasing chip density and design complexity exacerbate the problem. Novel methods in hardware, information, network, software, and time redundancy are now available to mitigate these threats in the form of resilient computer architectures, apps, and systems. The focus of studies here is the design and analysis of dependable machines, from small embedded systems to space-based platforms to high-end supercomputers, in terms of reliability, availability, performability, testability, and safety metrics, and more.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ECE 2192 - INTRODUCTION TO VLSI DESIGN

Minimum Credits: 4

Maximum Credits: 4

Understand basic concepts and introductory techniques of modern integrated digital circuit design using Complementary Metal-Oxide-Semiconductor (CMOS) transistors. Learn how to design/simulate essential CMOS circuits for digital Very Large Scale Integration (VLSI) designs using state-of-the-art Computer Aided Design (CAD) tools.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ECE 2193 - ADVANCED VLSI DESIGN

Minimum Credits: 3

Maximum Credits: 3

This course is organized as a full semester project in conjunction with a small amount of lecture material on advanced CMOS and bicom digital design techniques, as well as the group design process itself. Students form groups that design and implement different VLSI projects which are then fabricated by NSF Mosis facility and returned for testing. Focus is on group projects with written and oral reviews and reports.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ECE 2195 - SPECIAL TOPICS: COMPUTERS

Minimum Credits: 3

Maximum Credits: 3

An MS level course in special topics of current interest in computer engineering.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ECE 2233 - FOCUSED ION BEAM AND SCANNING ELECTRON MICROSCOPY

Minimum Credits: 3

Maximum Credits: 3

This course introduces the basic theory of FIB, SEM, X-EDS, and EBSD instrumentation, milling, deposition, and analytical capabilities. It discusses and presents the theory directly related to applications and techniques used in FIB/SEM dual beam platform instruments. Throughout the course, the students will be exposed to these methods and required to apply them to real research projects either provided by the instructor or from their research supervisors.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ECE 2235 - MONOLITHIC INTEGRATED CIRCUITS

Minimum Credits: 3

Maximum Credits: 3

Fabrication of integrated silicon monolithic circuits, thermal oxidation, solid state diffusion, epitaxial growth, ion implantation, photo and electron lithography, design considerations, active and passive elements in monolithic blocks, surface effects.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Graduate School of Engineering

ECE 2240 - NANO-OPTICS

Minimum Credits: 3

Maximum Credits: 3

A graduate level course designed for students who want to understand the mechanisms of interaction of light and matter at the nanometer scale, and become acquainted with nano-optics-based technologies. Topics include: electromagnetic theory of optical interaction with matter, optical waves in periodic media, photonic bandgap structures, surface plasmons, optical interaction with metal nanostructures (metal nanoapertures and arrays, and metal nanoparticles), surface plasmon resonance spectroscopy, plasmon coupling and concentration/funneling of electromagnetic energy, surface-enhanced raman scattering, near-field imaging and microscopy, and negative refraction. Prerequisite: junior or senior level em theory course.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ECE 2250 - POWER ELECTRONICS

Minimum Credits: 3

Maximum Credits: 3

The objective of this course is to cover the fundamental concepts in the field in sufficient depth to allow students to analyze and design power electronics circuits. The course covers dc-dc converters and dc-ac converters.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ECE 2260 - SCANNING PROBE MICROSCOPY-BASED CHARACTERIZATION AND NANOFABRICATION

Minimum Credits: 3

Maximum Credits: 3

The course concentrates on both theoretical and practical issues of advanced scanning probe microscopy (SPM) techniques. It introduces concepts, theoretical backgrounds, and operation principles of varieties of scanning probe microscopies; addresses the fundamental physical phenomena underlying the SPM imaging mechanism; covers the practical aspects of SPM characterization of a wide range of materials as well as operation devices; discusses SPM-based approaches to nanofabrication and nanolithography such as dip-pen nanolithography and nano-robotic manipulation.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ECE 2262 - LOW-DIMENSIONAL NANOELECTRONIC DEVICES

Minimum Credits: 3

Maximum Credits: 3

This graduate course discusses the electrical transport, electrothermal interactions, and power dissipation in emerging low-dimensional (1D and 2D) nanoelectronics. Topics include band structures, electronic transport in 1D nanowire and nanotubes as well as layered 2D materials (graphene, transition metal dichalcogenides, black phosphorus, and etc.), electrothermal interactions in nanoelectronics, power dissipation in nanoelectronics, thermometry, and system-level power dissipation issues (breakdown, heat sink, etc.). This course is intended to bridge a gap between device operations, solid-state physics, thermal transport, and materials science.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ECE 2272 - SIMULATION AND DESIGN OF SILICON PHOTONICS

Minimum Credits: 3

Maximum Credits: 3

The goal of this course is to enable students to design basic photonic integrated circuits by providing them with an intuitive understanding of core photonic components (e.g. waveguides, couplers, resonators, etc.) as well as a solid grasp of the tools needed to simulate multi-component designs. By the end of the course, students should understand the steps needed to take a PIC design from original concept to fabrication at a foundry. This includes such topics as: on-chip filtering/routing using ring resonators and Bragg gratings; methods for optimizing bandwidth and on/off-chip coupling efficiency using edge and grating couplers; integrated high-speed silicon PN modulator design and optimization; integrated high-speed germanium PIN photodetector design and optimization; full photonic circuit simulation using the S-parameter method. Prerequisites: an undergraduate course covering the fundamentals of electromagnetic waves.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ECE 2295 - SPECIAL TOPICS: ELECTRONICS

Minimum Credits: 3

Maximum Credits: 3

An MS level course in special topics of current interest in electronics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: School of Engineering students only.

ECE 2372 - PATTERN RECOGNITION

Minimum Credits: 3

Maximum Credits: 3

Emphasis on machine pattern recognition and learning; Bayes decision theory, parameter estimation, Bayesian belief networks, discriminant functions, supervised learning, nonparametric techniques, feature extraction, principal component analysis, hidden Markov models, expectation-maximization, support vector machines, artificial neural networks, unsupervised learning, clustering, and syntactic pattern recognition.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ECE 2521 - ANALYSIS STOCHASTIC PROCESSES

Minimum Credits: 3

Maximum Credits: 3

Probability theory, random variables, sums and limits of random variable sequences, time and frequency domain, modeling of continuous and discrete random signals, least square estimation.

Academic Career: GRAD

Course Component: Lecture

Grade Component: Letter GRD

Course Requirements: School of Engineering students only.

ECE 2523 - DIGITAL SIGNAL PROCESSING

Minimum Credits: 3

Maximum Credits: 3

Discrete-time signal processing, discrete Fourier transform and FFT implementation, design and stability considerations of FIR and IIR filters, filter implementation and finite register effects.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ECE 2525 - DETECTION AND ESTIMATION THEORY

Minimum Credits: 3

Maximum Credits: 3

A study of optimal techniques for extracting information from the observation of random variables or random signals. This includes hypothesis testing, estimation theory, optimal receiver design, Wiener and Kalman-Bucy filtering, and applications such as digital communications and medical imaging.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ECE 2570 - ROBOTIC CONTROL

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the application of control theory in robotics. Topics to be covered include: review of classical and modern control design methods such as PID control, state feedback, optimal control, adaptive control, and hybrid system control; control of mobile robots; control of robot manipulators; and cognitive robotics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ECE 2646 - LINEAR SYSTEM THEORY

Minimum Credits: 3

Maximum Credits: 3

Linear spaces and operators, mathematical descriptions of linear systems, controllability and observability, irreducible realization of rational transfer-function matrices, canonical forms, state feedback, and state estimators, stability.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ECE 2654 - DIGITAL CONTROL SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

Transform domain approach to analysis and design of digital computer control systems, linear discrete dynamic systems analysis and the z-transform, discrete equivalents to continuous transfer functions, sampled data systems, design of digital control systems using transform techniques, quantization effects, sample rate selection. Prerequisite: ECE 1673

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Graduate School of Engineering

ECE 2680 - ADAPTIVE CONTROL

Minimum Credits: 3

Maximum Credits: 3

Adaptation and learning play an essential role in biological systems, and these characteristics have been widely incorporated in modern control systems. This course introduces the general principles of adaptive control and learning. Topics to be covered include: real-time parameter estimation, self-tuning regulators, model-reference adaptive systems, adaptive control of nonlinear systems, practical aspects and implementation of adaptive control systems, introduction to computational learning theory and learning in neural systems, and an example of adaptive control by the cerebellum.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ECE 2774 - ADVANCED POWER SYSTEMS ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

Steady state phenomena, matrix transformations, system parameters, system unbalances, digital methods, and numerical analysis techniques applied to load flow, state estimators, and fault studies in the large power systems.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Graduate School of Engineering

ECE 2776 - MICROGRID CONCEPTS & DISTRIBUTED GENERATION TECHNOLOGIES

Minimum Credits: 3

Maximum Credits: 3

This course describes fundamental concepts related with the development of microgrids and the integration of distributed generation. Technical topics are divided into three modules. The first module introduces microgrid components and discusses the main types of microsources. The second focuses on energy storage technologies. The third includes system integration topics, such as power electronics interfaces; dc and ac architectures; economics, operation, stabilization, and control; reliability aspects; grid interconnection, and microgrids as part of the "smart" grids. This course also aims at preparing students to conduct research or helping them improve their research skills.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ECE 2777 - POWER SYSTEMS TRANSIENTS 1

Minimum Credits: 3

Maximum Credits: 3

Lumped parameter analysis, switching transients in ac/dc systems, arc modeling, damping, current suppression, traveling wave phenomena, line discontinuities, Ferro resonance, transient recovery voltage.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ECE 2780 - RENEWABLE AND ALTERNATIVE ENERGY

Minimum Credits: 3

Maximum Credits: 3

This course covers an in-depth analysis and understanding of various renewable and alternative energy technologies' including wind, solar, biomass, thermal, wave, hydro, and other sources and systems. Investigation of applications, integration, markets, policy, and other aspects of renewable development will be studied. Supporting technologies, such as energy storage, power electronics, and controls as applied to renewable and alternative energy applications are also explored.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Attributes: MCSI - Sustainability Related

ECE 2781 - SMART GRID TECHNOLOGIES AND APPLICATIONS

Minimum Credits: 3

Maximum Credits: 3

This is a comprehensive course designed to introduce students to new technologies dedicated to reliably, efficiently and safely managing electric power across utility, commercial, industrial, and residential networks. The course will cover the application of smart grid technologies from power generation through power consumption including grid automation, smart meters, demand response, communication, electric vehicle integration, grid connectivity, renewable energy, cyber security, microgrids and the business processes. Students will gain an understanding of the how the broad spectrum of smart grid technologies is integrated into the electrical energy industry, with an emphasis on distribution systems within homes, buildings, factories, transportation systems, and the utilities serving them

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ECE 2795 - SPECIAL TOPICS POWER

Minimum Credits: 3

Maximum Credits: 3

An MS level course in special topics of current interest in power.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ECE 3795 - ADVANCED TOPICS POWER

Minimum Credits: 3

Maximum Credits: 3

A Ph.D. level course in advanced topics of current interest in power.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

Course Attributes: MCSI - Sustainability Related

Emergency Medicine

EM 1102 - EMERGENCY MEDICINE TECHNICIAN

Minimum Credits: 4

Maximum Credits: 4

This course provides learners with the cognitive knowledge and values to develop as an emergency medical professional at the basic life-support level. This course meets all minimum training requirements as established by the U.S. Department of Transportation in the EMT, National Education Standards. This course provides the learner with the opportunity to develop basic life-support psychomotor skills. Successful completion of this course makes the learner eligible to become certified by the National Registry of EMT's and the Pennsylvania Department of Health.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: Sch Hlth & Rehabilitation Scs

EM 1104 - EMT CLINICAL

Minimum Credits: 1

Maximum Credits: 1

Academic Career: Undergraduate

Course Component: Clinical

Grade Component: Letter Grade

Course Requirements: CREQ: EM 1102; PROG: Sch Hlth & Rehabilitation Scs

EM 1111 - FOUNDATIONS OF EMERGENCY CARE

Minimum Credits: 3

Maximum Credits: 3

This course focuses on pre-hospital assessment and therapeutic intervention of adult and pediatric patients with acute traumatic injury and includes advanced airway assessment and procedural intervention for patients with acute respiratory pathophysiology. Students will explore emergency medical services systems and appreciate their role and responsibility as pre-hospital practitioners. Learning strategies include scenario-based case presentations with a focus on critical thinking and decision making. This course is paired with a required lab component.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PLAN: Emergency Medicine (BS)

EM 1112 - PATHOPHYSIOLOGY

Minimum Credits: 3

Maximum Credits: 3

Introductory course in pathophysiology for entry-level health care providers. This course focuses on human responses to illness expressed at the physiologic, pathophysiologic, experiential, and behavioral levels. Human responses are examined in terms of assessments appropriate to selected problems, rationale for medical interventions, and therapeutic effectiveness. Topics include: general principles of pathophysiology.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Emergency Medicine (BS)

EM 1113 - PHARMACOLOGY

Minimum Credits: 3

Maximum Credits: 3

Introduces students to the categories of pharmacological agents and the application of pharmacological concepts to clinical practice. Emphasis will be placed on understanding physiologic medication action. A separate medication lab is offered.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: EM 1111 and 1112 and 1115 and 1122; PLAN: Emergency Medicine (BS, BPH, BS-H)

EM 1114 - MEDICATION ADMINISTRATION LAB

Minimum Credits: 1

Maximum Credits: 1

Practical skills lab designed to allow students to develop the psychomotor skills of medication administration. Skills

include: phlebotomy, intramuscular and subcutaneous injections, IV cannulation, IV medication administration, inhalation, endotracheal and sublingual administration, and pharmacology math. This course also provides students with the practical skills needed for Advanced Cardiac Life Support (ACLS) care.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

Course Requirements: PLAN: Emergency Medicine (BS)

EM 1115 - INTRODUCTION TO PHYSICAL ASSESSMENT

Minimum Credits: 3

Maximum Credits: 3

Designed to introduce students to the principles and techniques of physical examination. Students will be taught an organized systemic approach to assessment.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Emergency Medicine (BS)

EM 1116 - PHYSICAL EXAM LAB

Minimum Credits: 1

Maximum Credits: 1

Practical skills lab designed to assist in the development of psychomotor skills of patient assessment, airway management, ventilation, and trauma care skills.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

Course Requirements: PLAN: Emergency Medicine (BS)

EM 1117 - EMS OPERATIONS

Minimum Credits: 3

Maximum Credits: 3

Designed to expose the paramedic student to various field operations procedures. Topics include: medical incident command, rescue awareness and operations, hazardous materials awareness and operations, and crime scene awareness.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: EM 1111 and 1112 and 1115 and 1122; PLAN: Emergency Medicine (BS, BPH, BS-H)

EM 1122 - CARDIOLOGY AND RESPIRATORY

Minimum Credits: 3

Maximum Credits: 3

This course covers the specific pathophysiology, assessment, and management of the cardiac patient. Topics include: 3-lead and 12-lead ECG interpretation, cardiac anatomy and physiology, patient assessment and management, ACLS, pharmacological, and other therapies. This class is offered with a required lab course.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Emergency Medicine (BS)

EM 1123 - CARDIOLOGY LAB

Minimum Credits: 1

Maximum Credits: 1

This lab section, in conjunction with the Assessment-Based Management Lab, provides case-based learning for the students related to general adult emergencies. Students will participate in case-based sessions that allow them to work on a simulated patient that is suffering from a specific illness or injury and allows the students to develop strong patient, resource, and scene management skills that they can take with them into their field practice. This lab helps to promote strong clinical decision-making skills that will allow the students to function as a strong clinical provider in the field.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

Course Requirements: PREQ: EM 1114 and 1116; PLAN: Emergency Medicine (BS or BPH or BS-H)

EM 1124 - ADULT MEDICAL EMERGENCIES

Minimum Credits: 3

Maximum Credits: 3

This course focuses on pre-hospital assessment and therapeutic intervention of acute and chronic adult pathophysiology. Students will explore the different processes of patient care for special populations across the life span. Learning strategies include scenario-based case presentations with a focus on critical thinking and decision making. This course is paired with a required lab component.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: EM 111, 1112, 1115, and 1122; PLAN: Emergency Medicine (BS, BPH, BS-H)

EM 1125 - OB/GYN, NEWBORN, AND PEDIATRIC CARE

Minimum Credits: 3

Maximum Credits: 3

This course covers the specific pathophysiology, assessment, and management of common medical and trauma conditions in pediatric patients. Additional information regarding obstetrics, neonates, and gynecologic patients will be presented.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: EM 1111 and 1112 and 1115 and 1122; PLAN: Emergency Medicine (BS, BPH, BS-H)

EM 1126 - ASSESSMENT-BASED MANAGEMENT LAB

Minimum Credits: 1

Maximum Credits: 1

This lab section, in conjunction with the Cardiology Lab, provides case-based learning for students related to general adult emergencies. Students will participate in case-based sessions that allow them to work on a simulated patient that is suffering from a specific illness or injury and allows the students to develop strong patient, resource, and scene management skills that they can take with them into their field practice. This lab helps to promote strong clinical

decision-making skills that will allow the students to function as a strong clinical provider in the field.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

Course Requirements: PREQ: EM 1114 and 1116; PLAN: Emergency Medicine (BS or BPH or BS-H)

EM 1131 - CLINICAL 1

Minimum Credits: 4

Maximum Credits: 4

Designed to accompany the fall semester courses, these clinical rotations focus on the development and documentation of history taking and assessment skills. Additionally, psychomotor skill development in a clinical setting is emphasized.

Academic Career: Undergraduate

Course Component: Clinical

Grade Component: Letter Grade

Course Requirements: PLAN: Emergency Medicine (BS, BPH, BS-H)

EM 1132 - CLINICAL 2

Minimum Credits: 4

Maximum Credits: 4

Designed to accompany the spring semester courses, these clinical rotations focus on the integration of psychomotor skills with assessment and history taking. In addition to scheduled rotations students will spend the last weeks completing a summative field evaluation. This evaluation consists of 80 field hours with the student functioning as a primary care provider.

Academic Career: Undergraduate

Course Component: Clinical

Grade Component: Letter Grade

Course Requirements: PREQ: EM 1114 and 1116; PLAN: Emergency Medicine (BS, BPH, BS-H)

EM 1135 - CRITICAL CARE CLINICAL EXPERIENCE I

Minimum Credits: 1

Maximum Credits: 1

The sequential critical care courses offered within the EM Program provides a solid foundation for understanding the principles of critical care. Students with only out of hospital clinical practice have little foundation to understand the in hospital critical care environment. The addition of diagnostic testing and hemodynamic monitoring provides for a more tailored and timely response to the patient's clinical needs. Students can gain an appreciation for these interactions while in an observational role through case study and with the support of a critical care preceptor.

Academic Career: Undergraduate

Course Component: Internship

Grade Component: Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

Course Attributes: Undergraduate Internship

EM 1152 - ISSUES IN HEALTH CARE

Minimum Credits: 2

Maximum Credits: 2

This course is designed to engage students in current aspects of health care impacting patients and health care practitioners. Topics are extremely diverse in assuring all possible domains of health care are addressed. Various methods of presentation are utilized in this course. Health care delivery at national and international models is

explored.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Emergency Medicine (BS)

EM 1153 - ISSUES IN HEALTH CARE EDUCATION

Minimum Credits: 2

Maximum Credits: 2

Survey course designed to teach the principles of adult education, classroom management skills, selection of teaching aides, and development of lesson plans. Students will function as teaching assistants in EMS education programs.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Emergency Medicine (BS)

EM 1154 - HEALTH CARE RESEARCH

Minimum Credits: 2

Maximum Credits: 2

This course provides an overview of basic concepts of research, including statistics, measurement, and design. This course emphasizes the ability of the student to read and evaluate research papers.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Emergency Medicine (BS)

EM 1155 - LEGAL ISSUES IN HEALTH CARE

Minimum Credits: 2

Maximum Credits: 2

This course is meant to provide students with a survey of some of the major legal issues facing emergency medical services providers and administrators, and those who aspire to those positions. This course will focus on the practical issues confronting EMS organizations. Major areas to be addressed include the law of negligence and medical malpractice; consent and refusal of emergency care; "do not resuscitate" issues; the legal aspects of documentation; confidentiality and HIPAA; EMTALA and ER diversions; fraud and abuse; personnel management; OSHA; legal issues for non-profit EMS organizations; and the basics of EMS reimbursement.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Emergency Medicine (BS)

EM 1158 - FINANCE AND ACCOUNTING FOR HEALTH CARE

Minimum Credits: 2

Maximum Credits: 2

Finance and Accounting provides an introduction to the basic concepts of accounting and financial management in health care. The course is geared for professionals who do not anticipate serving primarily in a financial management role. The concepts will be studied in the context of their practical application.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Emergency Medicine (BS, BS-H, BPH)

EM 1160 - PROFESSIONAL ISSUES

Minimum Credits: 3

Maximum Credits: 3

This course will provide the student with the tools necessary to promote the long-term viability of an EMS service. This course has been designed to prepare the student to be a leader of traditional or entrepreneurial EMS opportunities.

Guest speakers will be utilized for their expertise in the administration of EMS agencies.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Emergency Medicine (BS, BPH, BS-H)

EM 1164 - EMS SPECIAL RESPONSE SITUATIONS

Minimum Credits: 2

Maximum Credits: 2

An elective course for seniors introducing students to the various responses they may encounter during specialized events or a disaster. The student will be introduced to the unique EMS systems, hazards and treatment considerations that occur in these often austere environments. This is an introductory course and is not a replacement of specialized courses on the various topics or disciplines.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

EM 1166 - SENIOR INTERNSHIP

Minimum Credits: 1

Maximum Credits: 1

The senior internship is designed to allow students to gain valuable experience in an educational, clinical, or administrative aspect of health care. Students are asked to find internships in their specific area of health care interest. The internship can take place domestically or internationally.

Academic Career: Undergraduate

Course Component: Internship

Grade Component: Letter Grade

Course Requirements: PLAN: Emergency Medicine (BS, BPH, BS-H)

Course Attributes: Undergraduate Internship

EM 1168 - LEADERSHIP IN HEALTH CARE

Minimum Credits: 3

Maximum Credits: 3

Through reading, review, and discussion of germane reference materials, this class will explore the components of leadership for industry, organizations, and individuals as applicable to U.S. health care in general, and more specifically, to emergency medical services as part of the health care system.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Emergency Medicine (BS, BPH, BS-H)

EM 1169 - CRITICAL CARE MANAGEMENT

Minimum Credits: 4

Maximum Credits: 4

This course focuses on advanced assessment and therapeutic intervention common in the critical care setting for both adult and pediatric patients. Emphasis is placed on continuum of critical care interventions during inter-facility transport. The course follows the ASTNA core curriculum outline, the PA DoH Pennsylvania Air Ambulance Transport Educational Program guidelines, and is approved for continuing education by the IBSC. Topics highlighted include intra-aortic balloon pump management, hemodynamic monitoring and pharmacology, and initiation and maintenance of the mechanically ventilated patient. Learning strategies include lectures with integrated, scenario-based case presentations and a focus on critical thinking and decision making.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Emergency Medicine (BS, BPH, BS-H)

EM 1170 - CRITICAL CARE MEDICINE 1

Minimum Credits: 3

Maximum Credits: 3

This course provides a foundational review and focuses on advanced assessment and therapeutic intervention common in the critical care setting for both adult and pediatric patients. Emphasis is placed on continuum of critical care interventions during inter-facility transport. The course follows elements of the ASTNA core curriculum outline and the PA DoH Pennsylvania Air Ambulance Transport Educational Program guidelines. Topics highlighted include body systems assessment, analysis of laboratory diagnostics, hemodynamic monitoring and pharmacology, and chemically facilitated management of the crash airway. Learning strategies include lectures with case presentations and a focus on critical thinking and decision making.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Emergency Medicine (BS or BPH or BS-H)

EM 1171 - CRITICAL CARE MEDICINE 2

Minimum Credits: 3

Maximum Credits: 3

This course provides a foundational review and focuses on advanced assessment and therapeutic intervention common in the critical care setting for both adult and pediatric patients. Emphasis is placed on continuum of critical care interventions during inter-facility transport. The course follows elements of the ASTNA core curriculum outline and the PA DoH Pennsylvania Air Ambulance Transport Educational Program guidelines. Topics highlighted include intra-aortic balloon pump management, advanced shock management, and initiation and maintenance of the mechanically ventilated patient. Learning strategies include lectures with case presentations and a focus on critical thinking and decision making. EM 1170 is a prerequisite course.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Emergency Medicine (BS)

EM 1172 - ISSUES IN HEALTH CARE - WEB

Minimum Credits: 2

Maximum Credits: 2

This course is designed to engage students in current aspects of health care impacting patients and health care practitioners. Topics are extremely diverse in assuring all possible domains of health care are addressed. Various methods of presentation are utilized in this course. Health care delivery at national and international models is explored.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

EM 1173 - ISSUES IN HEALTH CARE EDUCATION - WEB

Minimum Credits: 2

Maximum Credits: 2

Survey course designed to teach the principles of adult education, classroom management skills, selection of teaching aides, and development of lesson plans. Students will function as teaching assistants in EMS education programs.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

EM 1174 - HEALTH CARE RESEARCH - WEB

Minimum Credits: 2

Maximum Credits: 2

This course provides an overview of basic concepts of research, including statistics, measurement, and design. This course emphasizes the ability of the student to read and evaluate research papers.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

EM 1175 - LEGAL ISSUES IN HEALTH CARE - WEB

Minimum Credits: 2

Maximum Credits: 2

This course is meant to provide students with a survey of some of the major legal issues facing emergency medical services providers and administrators, and those who aspire to those positions. This course will focus on the practical issues confronting EMS organizations. Major areas to be addressed include the law of negligence and medical malpractice; consent and refusal of emergency care; "do not resuscitate" issues; the legal aspects of documentation; confidentiality and HIPAA; EMTALA and ER diversions; fraud and abuse; personnel management; OSHA; legal issues for non-profit EMS organizations; and the basics of EMS reimbursement.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

EM 1176 - SENIOR INTERNSHIP - WEB

Minimum Credits: 1

Maximum Credits: 1

The Senior Internship is designed to allow students to gain valuable experience in an educational, clinical, or administrative aspect of health care. Students are asked to find internships in their specific area of health care interest.

The internship can take place domestically or internationally.

Academic Career: Undergraduate

Course Component: Internship

Grade Component: Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

Course Attributes: Undergraduate Internship

EM 1177 - SENIOR SEMINAR

Minimum Credits: 1

Maximum Credits: 1

Senior Seminar requires students to create a scholarly paper and presentation. Students are permitted to utilize the information gained during their internship if they desire. Students can also develop new materials based upon an approved topic in any health care area of interest to them.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Letter Grade

Course Requirements: PLAN: Emergency Medicine (BS, BPH, BS-H)

Course Attributes: Undergraduate Research

EM 1178 - LEADERSHIP IN HEALTH CARE-WEB

Minimum Credits: 3

Maximum Credits: 3

Through reading, review, and discussion of germane reference materials, this class will explore the components of leadership for industry, organizations, and individuals as applicable to US health care in general, and more specifically, to Emergency Medical Services as part of the health care system.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

EM 1179 - HEALTH CARE MANAGEMENT - WEB

Minimum Credits: 2

Maximum Credits: 2

The purpose of the course is to provide an introduction to the basic concepts of managing in organizations with a particular focus on health care organizations. The concepts will be studied in the context of their practical application.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

EM 1180 - HEALTH CARE MANAGEMENT

Minimum Credits: 2

Maximum Credits: 2

The purpose of the course is to provide an introduction to the basic concepts of managing in organizations with a particular focus on health care organizations. The concepts will be studied in the context of their practical application.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Emergency Medicine (BS, BPH, BS-H)

EM 1181 - PROFESSIONAL ISSUES - WEB

Minimum Credits: 3

Maximum Credits: 3

This course will provide the student with the tools necessary to promote the long-term viability of an EMS service. This course has been designed to prepare the student to be a leader of traditional or entrepreneurial EMS opportunities.

Guest speakers will be utilized for their expertise in the administration of EMS agencies.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

EM 1182 - CRITICAL CARE MANAGEMENT - WEB

Minimum Credits: 4

Maximum Credits: 4

This course provides a foundational review and focuses on advanced assessment and therapeutic intervention common in the critical care setting for both adult and pediatric patients. Emphasis is placed on continuum of critical care interventions during inter-facility transport. The course follows elements of the ASTNA core curriculum outline and the PA DoH Pennsylvania Air Ambulance Transport Educational Program guidelines. Topics highlighted include intra-aortic balloon pump management, hemodynamic monitoring and pharmacology, and initiation and maintenance of the mechanically ventilated patient. Learning strategies include lecture with case presentations and a focus on critical thinking and decision making.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

EM 1183 - FINANCE AND ACCOUNTING FOR HEALTH CARE - WEB

Minimum Credits: 2

Maximum Credits: 2

Finance and Accounting provides an introduction to the basic concepts of accounting and financial management in health care. The course is geared for professionals who do not anticipate serving primarily in a financial management role. The concepts will be studied in the context of their practical application.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

EM 1184 - SENIOR SEMINAR - WEB

Minimum Credits: 1

Maximum Credits: 1

Senior Seminar requires students to create a scholarly paper and presentation. Students are permitted to utilize the information gained during their internship if they desire. Students can also develop new materials based upon an approved topic in any health care area of interest to them.

Academic Career: Undergraduate

Course Component: Internship

Grade Component: Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

Course Attributes: Undergraduate Internship

EM 1185 - BEYOND THE BODY - WEB

Minimum Credits: 3

Maximum Credits: 3

This course was designed to introduce clinicians and health administrators to variables that influence health beyond behaviors, genes, and germs. This course will introduce the "social ecology" model that addresses the broader social, environmental, and policy factors (known as "health determinants") that influence our health.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

EM 1186 - CERTIFIED AMBULANCE CODER - WEB

Minimum Credits: 1

Maximum Credits: 1

This course is designed to provide the student with a comprehensive understanding of the complex rules and requirements related to effective and compliant ambulance billing. The course focuses on a baseline of critical knowledge and commitment to excellence necessary to be a well-informed, conscientious, and compliant ambulance billing professional.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

EM 1187 - ORGANIZATIONAL THEORY - WEB

Minimum Credits: 3

Maximum Credits: 3

Through didactic and practical sessions, students will have the opportunity to discover organizational theory and to evaluate an EMS agency. Through this course students will learn about the 11 components of an EMS system and how to use them to evaluate an EMS system.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

EM 1190 - CRITICAL CARE MEDICINE 1 - WEB

Minimum Credits: 3

Maximum Credits: 3

This course, deployed in a web-based format, provides a foundational review and focuses on advanced assessment and therapeutic intervention common in the critical care setting for both adult and pediatric patients. Emphasis is placed on continuum of critical care interventions during inter-facility transport. The course follows elements of the ASTNA core curriculum outline and elements of the PA DoH Pennsylvania Air Ambulance Transport Educational Program guidelines. Topics highlighted include body systems assessment, analysis of laboratory diagnostics, hemodynamic monitoring and pharmacology, and chemically facilitated management of the crash airway. Learning strategies include lectures with case presentations and a focus on critical thinking and decision making.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

EM 1191 - CRITICAL CARE MEDICINE 2 - WEB

Minimum Credits: 3

Maximum Credits: 3

This course provides a foundational review and focuses on advanced assessment and therapeutic intervention common in the critical care setting for both adult and pediatric patients. Emphasis is placed on continuum of critical care interventions during inter-facility transport. The course follows elements of the ASTNA core curriculum outline and the PA DoH Pennsylvania Air Ambulance Transport Educational Program guidelines. Topics highlighted include intra-aortic balloon pump management, advanced shock management, and initiation and maintenance of the mechanically ventilated patient. Learning strategies include lectures with case presentations and a focus on critical thinking and decision making. EM 1190 is a prerequisite course

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

Course Attributes: Online

EM 1199 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 6

Provides students an opportunity to explore in depth an area of particular interest to them. It is the student's responsibility to find a faculty member willing to undertake such a tutorial.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

EM 1250 - INTRODUCTION TO COMMUNITY HEALTH

Minimum Credits: 2

Maximum Credits: 2

The role of paramedics in the health care system is evolving in many parts of the country to include helping patients avoid unnecessary 911 calls and hospitalizations. This introductory course will prepare the paramedic to function as a community paramedic. This course will describe the difference between traditional EMS and community paramedic assessments; introduce therapeutic communication techniques; describe mental and behavioral health issues and their effect on chronic disease management; review professional boundaries and provider wellness techniques; and review potential patient populations that could be helped through these new services.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Emergency Medicine (BS or BPH or BS-H)

EM 1251 - MOBILE INTEGRATED HEALTH CARE

Minimum Credits: 2

Maximum Credits: 2

Part two of the community paramedic introductory course will introduce therapeutic communication techniques that are essential for chronic disease management and the coordination of services needed to avoid the unnecessary utilization of EMS and hospital services. This course will discuss the business models used across the country for community paramedicine programs and the documentation methods used, as well as, how to design a program, and how to effectively become a patient advocate to help navigate the patient through the changing health care system.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: EM 1250; MIN GRADE: C or better; PLAN: EMERGENCY MEDICINE (BS or BPH or BS-H)

EM 1252 - STRUCTURAL DRIVERS OF HEALTH

Minimum Credits: 3

Maximum Credits: 3

This course exposes students to the components of social ecology as it relates to health conditions and progression of maladies due to external factors. Topics include Health and Information Literacy, Social Support Mechanisms, Economic and Environmental effects on Health, Influence of Insurance coverage and benefits on care planning and compliance with health plans. Students will understand the correlation between intrinsic and extrinsic health drivers and their impact on both near- and long-term patient needs.

Academic Career: Undergraduate

Course Component: Lecture

EM 1260 - COGNITIVE PSYCHOLOGY OF DECISION MAKING - WEB

Minimum Credits: 2

Maximum Credits: 2

Health care providers make dozens of clinical decisions every day. Errors in cognitive processes have been determined to be one of the most common causes of preventable death and disability in this country. The goal of this class is to examine the current science of decision making and the barriers to optimal decision making. Students will learn to recognize System I and System II thinking and the benefits and limitations of each. Unconscious cognitive biases and heuristics that are commonly relied upon in everyday thinking, as well as professional decisions, will be analyzed. The class will be taught in seminar fashion with active learning and discussion.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

EM 1270 - INTRODUCTION TO COMMUNITY HEALTH - WEB

Minimum Credits: 2

Maximum Credits: 2

The role of paramedics in the health care system is evolving in many parts of the country to include helping patients avoid unnecessary 911 calls and hospitalizations. This introductory course will prepare the paramedic to function as a community paramedic. This course will describe the difference between traditional EMS and community paramedic assessments; introduce therapeutic communication techniques; describe mental and behavioral health issues and their effect on chronic disease management; review professional boundaries and provider wellness techniques, and review potential patient populations that could be helped through these new services.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

EM 1271 - MOBILE INTEGRATED HEALTH CARE - WEB

Minimum Credits: 2

Maximum Credits: 2

Part two of the community paramedic introductory course will introduce therapeutic communication techniques that are essential for chronic disease management and the coordination of services needed to avoid the unnecessary utilization of EMS and hospital services. This course will discuss the business models used across the country for community paramedicine programs and the documentation methods used, as well as, how to design a program, and how to effectively become a patient advocate to help navigate the patient through the changing health care system.

Engineering

ENGR 0005 - INTRODUCTION TO TECHNOLOGY IN INTERNATIONAL CONTEXT

Minimum Credits: 3

Maximum Credits: 3

Often engineering and science are considered to be culturally independent. This, however turns out not to be the case. This course examines the constructs of science and engineering education, the practice of engineering, and industry and their underlying cultural bases. When offered off-campus in a foreign country, this course will also include site visits and field work.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SU3 Elective Basis

Course Requirements: PROG: Swanson School of Engineering

ENGR 0011 - INTRO TO ENGINEERING ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

This course will provide an introduction to Excel and an introduction to design and entrepreneurship. In addition, we will address teamwork and professional integrity, both important aspects of engineering. This is a team-based, hands-on course, in which most of our class time will be spent working in teams to solve problems and participate in discussions, using what we learn in the course.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: CREQ: ENGR 0081 or ENGR 0181; PROG: School of Engineering

ENGR 0012 - INTRO TO ENGINEERING COMPUTING

Minimum Credits: 3

Maximum Credits: 3

In this course, we will learn basic programming skills using MATLAB and C. In addition, we will address teamwork and professional integrity, both important aspects of engineering. This is a team-based, hands-on course, in which most of our class time will be spent working in teams to develop programs, solve problems, and participate in discussions, using what we learn in the course.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ENGR 0011; CREQ: MATH 0220 or 0230 or 0240 or 0280 or 0290 or ENGR 0082; and ENGCOMP 0412 . PROG: School of Engineering

ENGR 0015 - INTRODUCTION TO ENGINEERING ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

This course will provide an introduction to Excel and an introduction to design and entrepreneurship. In addition, we will address teamwork and professional integrity, both important aspects of engineering. This is a team-based, hands-on course, in which most of our class time will be spent working in teams to solve problems and participate in discussions, using what we learn in the course.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: CREQ: (MATH 0220 or 0235) and (PHYS 0174 or 0475)

ENGR 0016 - INTRODUCTION TO ENGINEERING COMPUTING

Minimum Credits: 3

Maximum Credits: 3

In this course, we will learn basic programming skills using MATLAB and C. In addition, we will address teamwork and professional integrity, both important aspects of engineering. This is a team-based, hands-on course, in which most of our class time will be spent working in teams to develop programs, solve problems, and participate in discussions, using what we learn in the course.

ENGR 0020 - PROBABILITY AND STATISTICS FOR ENGINEERS 1

Minimum Credits: 4

Maximum Credits: 4

An introductory course in statistics. Topics covered include: data analysis, probability, random variables, selected discrete and continuous probability distributions, one sample and two sample estimation, hypothesis testing, experiments with two factors and introduction to regression analysis.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: MATH 0150 or 0230 or 0231 or 0235; PROG: Swanson School of Engineering

Course Attributes: SCI Quantitative: Statistics GE. Req.

ENGR 0021 - PROBABILITY AND STATISTICS FOR ENGINEERS

Minimum Credits: 3

Maximum Credits: 3

An introductory course in statistics. Topics covered include: data analysis, probability, random variables, selected discrete and continuous probability distributions, one sample and two sample estimation, hypothesis testing, experiments with two factors and introduction to regression analysis.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: MATH 0150 or 0230 or 0231 or 0235; PROG: Swanson School of Engineering

ENGR 0022 - MATERIALS STRUCTURE AND PROPERTIES

Minimum Credits: 3

Maximum Credits: 3

An introduction to the basic concepts of materials science and engineering. The concepts of atomic, crystal, micro- and macro-structure, their control and effects on chemical, electrical, magnetic, optical, and mechanical properties. Modification of properties by heat treatment and control of processing. Fundamental considerations in materials selection.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (MATH 0150 or 0230 or 0231 or 0235) and (PHYS 0150 or 0174 or 0201 or 0475);
PROG: School of Engineering

ENGR 0023 - PLUS 3 COSTA RICA

Minimum Credits: 3

Maximum Credits: 3

The course involves lectures, company visits and sightseeing, and culminates in a research paper and presentation that focuses on a global industry and its value chain.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Attributes: Latin American Studies, Pitt Class

ENGR 0024 - INTERNATIONAL FIELD PROJECT - CHINA

Minimum Credits: 3

Maximum Credits: 3

The course involves lectures, company visits and sightseeing, and culminates in a research paper and presentation that focuses on a global industry and its value chain.

Academic Career: Undergraduate

ENGR 0081 - FRESHMAN ENGINEERING SEMINAR 1

Minimum Credits: 0

Maximum Credits: 0

An in-depth orientation in the various areas of engineering and the related fields of employment. Includes small group meetings with departmental representatives and special freshman academic advisors. A formal departmental choice is made at the conclusion of these courses.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: H/S/U Basis

Course Requirements: CREQ: ENGR 0011 or 0711; PROG: Swanson School of Engineering

ENGR 0082 - FIRST-YEAR ENGINEERING SEMINAR 2

Minimum Credits: 0

Maximum Credits: 0

An in-depth orientation in the various areas of engineering and the related fields of employment. Meetings include departmental representatives, professional development, and first-year academic advisors. A formal departmental choice is made at the conclusion of this course.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: H/S/U Basis

Course Requirements: CREQ: ENGR 0012 or 0712 or 0715 or 0716; PROG: Undergraduate Swanson School of Engineering

ENGR 0087 - TRANSFER SEMINAR

Minimum Credits: 0

Maximum Credits: 0

A 9 week seminar course for first semester regional and external engineering transfer students. The course discusses the transition to the Swanson School of Engineering and resources available to students at the University of Pittsburgh.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: H/S/U Basis

Course Requirements: PROG: Swanson School of Engineering

ENGR 0090 - SWANSON SUCCESS PROGRAM: A FRAMEWORK FOR ACADEMIC SUCCESS

Minimum Credits: 0

Maximum Credits: 0

The Swanson success class provides students with a series of academically-focused workshops critical to success within the Swanson School of Engineering and at the University of Pittsburgh. In this course, students will explore a variety of personal development topics including goal-setting, time prioritizing, motivation, and learning strategies. Students who invest the time and energy into this course, which is just one component of the student retention program, can expect to enhance their academic and personal efficiency as well as their performance in the classroom.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: H/S/U Basis

ENGR 0131 - STATICS FOR CIVIL AND ENVIRONMENTAL ENGINEERS

Minimum Credits: 3

Maximum Credits: 3

A basic course in statics. Utilizing the free-body diagram, the course covers forces and equilibria of particles, rigid bodies, surfaces, trusses, beams, cables, and other basic structural elements.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: PHYS 0104 or 0150 or 0174 or 0201; PROG: Swanson School of Engineering

ENGR 0135 - STATICS & MECHC OF MATERIALS 1

Minimum Credits: 3

Maximum Credits: 3

First of a two course sequence covering statics and strength of materials. Topics covered include: concurrent force systems, equilibrium, axial loading, stress, strain, deformation, moments, equivalent systems, centroids, centers of mass, and distributed loads, free-body diagrams, equilibrium of rigid and deformable bodies, plane trusses, frames and machines, equilibrium in 3D, torsion and friction. Use is made of computers for problem solving.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (MATH 0150 or 0230 or 0231 or 0235) and (PHYS 0150 or 0174 or 0201 or 0475);
PROG: School of Engineering

ENGR 0141 - MECHANICS OF MATERIALS CIVIL AND ENVIRONMENTAL ENGINEERS

Minimum Credits: 3

Maximum Credits: 3

An introductory course in the mechanics of deformable bodies, with special application to the range of topics needed by civil engineers. The course material covers internal strains, stresses and deformations which occur when a structure is subjected to applied loads. Problems with tie-in to practical design issues will be covered

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ENGR 0131 or 0135 or ET 0051; PROG: Swanson School of Engineering

ENGR 0145 - STATICS & MECHC OF MATERIALS 2

Minimum Credits: 3

Maximum Credits: 3

Second of a two course sequence covering statics and strength of materials. Topics include: flexure; second moment of areas, shear force and bending moment diagrams, composite beams, shearing stresses, beam deflections, energy methods, Castigliano's methods, moment area method, combined static loading and columns.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (ENGR 0135 or ET 0051); PROG: School of Engineering

ENGR 0151 - DYNAMICS CIVIL & ENVRN ENGNRS

Minimum Credits: 3

Maximum Credits: 3

A basic course in dynamics. Utilizing the Newtonian mechanics of particles, the course covers kinematics and kinematics of particles, kinetics of systems of particles, work and energy, introduction to vibration, single-degree-freedom systems, and two-degrees-of-freedom systems. Applications of dynamics in civil engineering problems. Use is made of computer solution to a two-story building vibration.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (ENGR 0141 or 0145 or ET 0053) and (MATH 0250 or 0290 or 1035 or 0202);

PROG: Swanson School of Engineering

ENGR 0240 - NANOTECHNOLOGY AND NANO-ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

This research-oriented course is a multidisciplinary course taught by a faculty team including a professor of electrical engineering and a professor of chemistry. The course introduces nanoscale devices created from a range of nanomaterials including carbon nanotubes (CNTS), nanoparticles (NPS), and nanowires (NWS). Theories of operation, fabrication techniques and applications of Nano devices will be discussed. The course combines lecture, laboratory work, and web-supported project-based learning.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (MATH 0230 or 0235 or 0150 or 0221) and [PHYS 0175 or 0476 or (0201 and 0203) or (0150 and 0151)]; PROG: Swanson School of Engineering

ENGR 0300 - STATICS AND STRUCTURES

Minimum Credits: 3

Maximum Credits: 3

This course introduces architecture students to the language (lingua franca), mathematics, and engineering behind the field of structural engineering. Using building structures as a foundation, students will engage in fundamental analysis (statics and simple structural analysis), materials selection and performance (mechanics and materials science), and the selection of both gravity and lateral-force resisting systems (engineering design). The course content will focus on 'hand methods' of calculation suitable for preliminary design and so-called 'back of the envelope calculations.'

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

ENGR 0501 - MUSIC ENGINEERING LABORATORY

Minimum Credits: 1

Maximum Credits: 1

A course directed toward development of basic skills in recording engineering through expanded understanding of the science and engineering of music. The course will use the music engineering laboratory (MEL) located in Benedum hall. The MEL is a state of the art sound recording facility with research and educational capabilities for sound recording and music engineering. Students are expected to have prior musical experience, working knowledge of Fourier transforms, and working knowledge of basic electronics. Topics covered: recording engineering (microphones, amplifiers, and mixing, filtering, special effects). Physics, mathematics, and psychophysics of sound and music (acoustics, speech and singing, hearing, pitch, stereo perception). Musical instrument function (mechanical and electronic)

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Satisfactory/No Credit

Course Requirements: PROG: Swanson School of Engineering

Course Attributes: David C. Frederick Honors College Course

ENGR 0711 - HONORS ENGINEERING ANALYSIS AND ENGINEERING COMPUTING

Minimum Credits: 3

Maximum Credits: 3

In this course, we will learn basic programming skills using MATLAB and C. In addition, we will address teamwork and professional integrity, both important aspects of engineering. This is a team-based, hands-on course, in which most of our class time will be spent working in teams to develop programs, solve problems, and participate in discussions, using what we learn in the course.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: MATH 0220; COREQ: (MATH 0230 or 0235 or 0240 or 0290) and ENGR 0081;
PROG: Swanson School of Engineering

Course Attributes: David C. Frederick Honors College Course

ENGR 0712 - ADVANCED ENGINEERING APPLICATIONS FOR FRESHMAN

Minimum Credits: 3

Maximum Credits: 3

This is an honors course and a continuation of ENGR 0711. Students will be introduced to engineering research and various special topics.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ENGR 0711; CREQ: ENGR 0082; PROG: Undergraduate Swanson School of Engineering

ENGR 0716 - ART OF HANDS-ON SYSTEM DESIGN AND ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

Engineering is fundamentally a creative process in which ideas are generated and transformed into new systems and devices in the world to meet human needs. The term engineer shares its origins with ingenious: one definition of engineer is 'a skillful inventor.' In this course, we will explore tools and techniques for inventing, designing and prototyping systems. Through discussion, small-team activities, workshops and hands-on projects, students will obtain an introduction to design thinking, 'maker culture' and systems engineering. We will explore user-centric design principles; sketch modeling; basic building elements for systems such as sensors, computer controllers, actuators and displays; materials and methods for prototyping; and ways to analyze and troubleshoot systems. Students will gain an introduction to 'smart systems': automated systems that can sense the world and automatically respond in useful ways. We will also focus on the user interface: how to create control and display interfaces that enhance users' ability to operate systems effectively and efficiently.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ENGR 0711; CREQ: ENGR 0082; PLAN: Undeclared

ENGR 0717 - FOUNDATIONS OF ENGINEERING DESIGN: EXPLORING INNOVATIONS ACROSS DISCIPLINES

Minimum Credits: 3

Maximum Credits: 3

This is an honors introductory course that offers an interdisciplinary exploration of engineering innovations, design, technology, and scientific phenomena. In the initial part of the course students will engage in hands-on workshops that require them to think critically about engineering designs and describe their mechanisms using science and engineering

principles. They will also learn how to investigate, identify, frame, and validate both design problems and value propositions by communicating with multiple audiences and using entrepreneurship frameworks that screen for scalable innovations. In the latter part of the course, teams of students will develop the foundational skills and creativity necessary for engineering problem-solving by collaborating to tackle real-world challenges using design thinking, iterative prototyping, and the engineering design process. Students will appreciate the significance of their design decisions as they simultaneously consider multiple design factors (cost, quality, safety, societal impact and sustainability etc.) and weigh their tradeoffs. With an emphasis on personal and professional development, students will be given multiple opportunities throughout the course to apply principles from Happiness and Human Flourishing to design purpose-driven lives that help them to become more emotionally intelligent, intrinsically motivated, service-oriented, mature and dependable people. By the end of the course, students will have developed a robust understanding of engineering design, innovation, and themselves.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

ENGR 1000 - LAB EXPERIENCES

Minimum Credits: 0

Maximum Credits: 0

Provide opportunities to students to volunteer in a research lab to determine if undergraduate research is an area that the student would like to further engage in for course credits, for payment from a PI, or for summer research experience.

Academic Career: Undergraduate

Course Component: Internship

Grade Component: Satisfactory/No Credit

Course Requirements: LEVEL: Undergraduate; PROG: Swanson School of Engineering

ENGR 1011 - MODERN MACHINING PROCESSES

Minimum Credits: 2

Maximum Credits: 2

This course is designed to introduce the student to modern machining processes and engineering materials through theory and active learning

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

ENGR 1012 - MODERN MACHINING PROCESSES BASIC LAB

Minimum Credits: 1

Maximum Credits: 1

This introduction lab is designed to introduce the student to machining processes through theory, active learning and hands-on training on industry grade machine tools.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

ENGR 1013 - MODERN MACHINING PROCESSES ADVANCED LAB

Minimum Credits: 3

Maximum Credits: 3

This advanced lab is designed to train students in modern machining processes through theory, active learning and

hands-on training on industry grade machine tools.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Grad Letter Grade

ENGR 1014 - CNC THEORY AND OPERATION

Minimum Credits: 2

Maximum Credits: 2

This course is designed to introduce the student to the theory, programming and operation of computer controlled manufacturing machines. Course will cover topics using active learning and hands-on training projects.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

ENGR 1015 - CNC THEORY AND OPERATION - BASIC LAB

Minimum Credits: 1

Maximum Credits: 1

This introduction lab is designed to introduce the student to the programming and operation of computer controlled manufacturing machines with industry grade machine tools.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

ENGR 1016 - CNC THEORY AND OPERATION - ADVANCED LAB

Minimum Credits: 3

Maximum Credits: 3

This advanced lab is designed to train students in extensive programming and operation of computer controlled manufacturing machines with industry grade machine tools.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

ENGR 1017 - MANUFACTURING FOR THE FUTURE: FLEXIBLE, GREEN, AND DIGITAL

Minimum Credits: 3

Maximum Credits: 3

What is flexible device manufacturing? What is green manufacturing? What is cybermanufacturing? Importantly, how do these emerging "types" of manufacturing differ from traditional manufacturing? It is important to recognize that global manufacturing is undergoing major transformations nowadays. The confluence of new advanced materials, emerging fabrication technologies, and connected cyber-physical systems is creating paradigm shifts for the ways products are conceived, made, distributed, used, and disposed. In the ever-increasing competition of "making things" of value to consumers, many industries are now reinventing themselves to cope with this new reality. This class covers the fundamentals behind major global trends, and their implication for the future of manufacturing from an engineering perspective. Topics covered include the following: (1) How the need for flexible and wearable devices is driving innovation in new materials and fabrication processes beyond the traditional microfabrication techniques adopted in the semiconductor industry. (2) How protein-based materials, degradable polymers, and novel recycling technologies are paving the way for more sustainable manufacturing of consumer products. (3) How data analytics and internet of things (IoT) technologies are enabling a new generation of digital manufacturing systems referred to as Industry 4.0, and

beyond.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

ENGR 1018 - GREEN MANUFACTURING

Minimum Credits: 3

Maximum Credits: 3

This class introduces green manufacturing from the perspective of design and manufacturing engineers. It covers the fundamentals underlying this interdisciplinary topic with economic, social and ecological considerations. In particular, the principles and applications of creating a "circular economy" or "closed-loop systems" will be presented in contrast to the traditional "linear" models. In order to develop and assess new green manufacturing technology wedges, an important set of metrics and analysis approaches are introduced. The class will also cover the application of green manufacturing in specific industrial sectors and case studies, including the semiconductor industry.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

ENGR 1029 - INTRODUCTION TO ENGINEERING FOR HUMANITY

Minimum Credits: 3

Maximum Credits: 3

Engineering is commonly perceived as being impartial, providing purely technical solutions to defined problems for the good of all. In reality, most engineering solutions have greatly benefited the wealthiest of peoples of the world while hundreds of millions continue to live in extreme poverty. This course will consider the central role engineering must play in sustainable human development. It will introduce the practical frameworks that have been developed for small-scale, community level engineering projects that directly address poverty. These frameworks include aspects of community development, planning, project management and assessment necessary for engineers to apply their technical skills. In addition, the course will introduce appropriate technologies with examples for: water and sanitation, energy and shelter.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ENGR 1030 - ENGINEERING FOR HUMANITY SERVICE LEARNING PROJECT

Minimum Credits: 1

Maximum Credits: 3

A service learning project in which social and/or environmental sustainability is a core thrust. The project is guided by an approved member of faculty from the Swanson school of engineering and satisfies a requirement of the engineering for humanity certificate program. The project can be international or based within the US and is subject to pre-approval.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Letter Grade

Course Requirements: PREQ: ENGR 1029

ENGR 1050 - PRODUCT REALIZATION

Minimum Credits: 3

Maximum Credits: 3

This interdisciplinary course will focus on product analysis, product redesign and product development. Student teams will work with industrial sponsors to develop product plans for emerging and existing products.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Attributes: Capstone Course

ENGR 1060 - SOCIAL ENTREPRENEURSHIP- ENGINEERING FOR HUMANITY

Minimum Credits: 3

Maximum Credits: 3

The course will explore the concepts of social entrepreneurship through the three tenets of sustainability: environment, economy, and equity in the context of complex or 'wicked' problems. An introduction will provide a foundation in sustainability and social entrepreneurship while exploring the impact of innovative business models, such as disruptive innovation and Prahalad and Hart's fortune at the bottom of the pyramid. Additional class time will explore different examples and challenges in the developed and developing worlds. Through weekly readings, the course will focus on classroom discussions about the tenets of sustainability and the relevance of engineering in crafting 'solutions'. The course project will provide students with an opportunity to work with a multi-disciplinary team to design an engineering-based business plan targeting a specific challenge either locally or in the developing world.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: Swanson School of Engineering

Course Attributes: MCSI - Sustainability Related

ENGR 1061 - INTRAPRENEURSHIP: ENTREPRENEURSHIP WITHIN THE CORPORATION

Minimum Credits: 3

Maximum Credits: 3

This course explores the developing practice of intrapreneurship which is defined as the application of entrepreneurial principles in a corporate environment for the creation of new products and businesses. The focus will be on providing the student with the needed awareness of cultural and political barriers while providing a specific tool set targeted at maximizing new business as well as career success. The course is designed for junior and senior engineering students who have already had some work experience.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

ENGR 1062 - START UP FUNDAMENTALS

Minimum Credits: 3

Maximum Credits: 3

This course is offered within the Swanson School of Engineering to undergraduate and graduate students. At the undergraduate level, the class is part of the new Certificate in Innovation, Product Design and Entrepreneurship. The class is designed to introduce the student to the core business concepts behind innovation and entrepreneurship. The class is highly interactive, and students will be required to participate in groups and individually. Grading is heavily weighted around participation in the group project which will be ongoing throughout the semester. The class is taught by Babs Carryer, Director of Education & Outreach, Innovation Institute at Pitt. Guest speakers, who are experts in their fields, will supplement the core teaching. Topics covered will include: ideation, problem/solution, market

opportunity, competitive analysis, customer discovery, pitching, funding, finance, legal issues, team building, and innovation within existing companies.

ENGR 1066 - INTRODUCTION TO SOLAR CELLS AND NANOTECHNOLOGY

Minimum Credits: 3

Maximum Credits: 3

Introduction to solar cells and nanotechnology this course aims to prepare Undergraduate students in the design and development of low-cost, high-efficiency solar cells. Students will learn the basics of solar cells, introduce themselves to nanotechnology and how this may enable next-generation solar cells, learn how to use instruments for synthesis and characterization of nanomaterials and solar cells, examine the social implication of nanotechnology and solar cells, and practice problem solving and engineering design skills within a collaborative team. Portions of the class will be flipped (video lectures at home and assignments in class) in order to facilitate an active and engaged learning process.

Grade Component: Letter Grade

Course Requirements: PREQ: PHYS 0175; PROG: Swanson School of Engineering

ENGR 1075 - ENERGY DEVELOPMENT, USE, AND IMPACT

Minimum Credits: 3

Maximum Credits: 3

This course will serve as an overview of energy engineering for both non-engineers and engineers and will be taught in a combined lecture/seminar format. While the course is broadly based it does not cover all aspects of energy harvesting and use. Topics include the history of energy use, the types of energy used (fossil fuel, nuclear, renewables, energy efficiency, energy economics, and climate change). Because of the seminar format, some topics can be covered more fully than others.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: Instructor Consent Required; PROG: Swanson School of Engineering

Course Attributes: MCSI - Sustainability Related

ENGR 1080 - INNOVATING FOR COMMERCIAL IMPACT

Minimum Credits: 3

Maximum Credits: 3

Conventional wisdom regarding starting a business is dead wrong. This conclusion led Steve Blank and others to develop the lean startup method, an approach for systematically exploring the business model needed to make an idea into a success. In Blank's own words: 'existing companies execute a business model, startups search for one. This distinction shapes the lean definition of a startup: a temporary organization designed to search for a repeatable and scalable business model.' In this course, we discuss the basic elements of the lean startup method and apply them to the domain of engineering product and customer development. Students are expected to come to the class with their own idea(s) for potential product offering(s), which they will then test using the lean startup approach over the course of the term. *This course was formerly titled LEAN LAUNCHPAD: EVIDENCE-BASED ENTREPRENEURSHIP

ENGR 1097 - INTERNATIONAL SPECIAL PROJECT

Minimum Credits: 3

Maximum Credits: 3

This course involves an individual project done under the supervision of a university of Pittsburgh engineering faculty member and a faculty member of a foreign university. The project is done on site at the foreign university and involves an experimental study, a design project, a literature review of a special topic, or instruction.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Letter Grade

ENGR 1098 - INTERNATIONAL SENIOR DESIGN EXPERIENCE

Minimum Credits: 1

Maximum Credits: 1

This one credit course is focused on understanding globalization and technology with a particular emphasis on sustainability design and international experience. By the end of this course, students should understand the basic history, government, and economic strategies, related to their country; produce a final design that is the most cost-effective design possible, as funding for construction is limited and repairs in the future would be undertaken by members of the community; be able to define 'globalization' and 'sustainability' and identify how it is impacting their respective fields of study and future employment; gain awareness of differences in the business environments of the U.S. in relationship to the rest of the world.

Academic Career: Undergraduate

ENGR 1150 - ENGR STUDY ABROAD RETURNEE PROFESSIONAL DEVELOPMENT

Minimum Credits: 1

Maximum Credits: 1

This one-credit course is designed for engineering students who have recently returned from a global experience. In addition to strategies for enhancing intercultural perspectives and coping with re-entry challenges, students will learn how to translate skills learned abroad into professional competencies and build on their academic, professional, and personal development as future global engineers. Through comparative discussion and analysis, project-based learning, and professional development workshops, students will break down and learn to frame experiences abroad in a contemporary context. Mastery will be demonstrated through written and oral communication.

Minimum Credits: 6

Maximum Credits: 6

This course examines the development and practice of science and engineering in the context of their underlying cultural bases (social, political, religious, and organizational). The goal of the course is not just to understand the practice of technology in one country versus another, but to develop analytical skills for analyzing technology in any international setting. The course is designed for students from a wide variety of backgrounds and majors; engineering background is useful but not necessary.

ENGR 1281 - CLEAN ENERGY GRID ENGINEERING: SCANDINAVIA UG

Minimum Credits: 3

Maximum Credits: 3

The course will cover the application of various grid technologies from power generation through power consumption including transmission networks, grid automation, power electronics systems, communications and control, protection, grid operations, grid connectivity, renewable energy resource integration, cyber security, micro grids, DC technologies, and other emerging areas, as well as a brief introduction to power utility markets, business processes, and policy/regulation. Through classroom discussion and an assortment of group exercises, you learn to frame contemporary energy production and utilization issues in societal and global contexts, and demonstrate mastery of the issues through written and oral communication.

ENGR 1282 - GERMAN ENGINEERING CULTURE UG

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the day-to-day business issues facing German engineers. The course will cover service businesses in Germany, workplace culture, digital factories, engineering law in Germany and a project that will tackle solving real engineering problems. Students learn to analyze typical German cultural aspects in order to understand differences in the social system of a company and use the knowledge to improve the processes and structures. Students work with appropriate analytical methods and apply their knowledge on real business examples, given by experienced international Managers.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Satisfactory/No Credit

ENGR 1283 - EXPLORATION ENERGY AND ELECTRIFICATION

Minimum Credits: 3

Maximum Credits: 3

This international experience course will explore energy conversion, conservation, delivery, and end-use in Brazil. Students will learn about the history of Brazilian energy infrastructure, and how it has driven Brazil's strategy to generate and use renewable energy. There will be a heavy focus on hydropower which makes up the largest percentage of Brazil's energy generation. In addition, students will explore new and emerging technologies which take advantage of other means of renewable energy. Additionally, the concept of electrification in Brazil will be explored.

Electrification is the conversion of devices which classically use fossil fuels or other non-electrical energy sources to

devices which use electricity as their source of energy. This phenomenon is taking place all over the world at different rates and Brazil is no exception to that. Students will visit companies who are active in electrification to study electrification in Brazil. Students will make comparisons of electrification Brazil and the United States.

ENGR 1450 - ENGINEERING- THE GERMAN WAY

Minimum Credits: 3
Maximum Credits: 3
This course highlights the German approach to engineering from various perspectives. It is designed as mixture of in-class lectures and industrial experience in the form of factory tours. Four broad topics are addressed from the German perspective: (1) R&D; management, (2) production and manufacturing systems, (3) digital factory layout and factory simulation, and (4) product-ergonomics and ergonomic aspects in manufacturing. In addition students select one of two additional options dealing with unique aspects of the German business economy: (1) the nature of cooperation between trade unions and employers or (2) the impact on technology law and harmonization on engineering in Europe.

ENGR 1451 - EXPLORATORY DATA SCIENCE

Minimum Credits: 3
Maximum Credits: 3
In this course, we will learn data science and analysis approaches to identify statistically significance relationships and better model and predict the behavior of these systems. We will assemble and explore real-world datasets, perform clustering and pair plot analyses to investigate correlations, and logistic regression will be employed to develop associated predictive models. Results will be interpreted, visualized and discussed. We will introduce basic elements of statistical analysis using R Project open source software for exploratory data analysis and model development. R is an open-source software project with broad abilities to access machine-readable open-data resources, data cleaning and munging functions, and a rich selection of statistical packages, used for data analytics, model development and prediction. This will include an introduction to R data types, reading and writing data, looping, plotting and regular expressions, so that one can start performing variable transformations for linear fitting and developing structural equation models, while exploring for statistically significant relationships.
Academic Career: Undergraduate

Course Component: Lecture
Grade Component: Letter Grade

ENGR 1453 - DATA SCIENCE: STATISTICAL LEARNING, MODELING & PREDICTION

Minimum Credits: 3

Maximum Credits: 3

In this course, we will use an open data science tool chain to develop reproducible data analyses useful for inference, modeling and prediction of the behavior of complex systems. In addition to the standard data cleaning, assembly and exploratory data analysis steps essential to all data analyses, we will identify statistically significant relationships from datasets derived from population samples, and infer the reliability of these findings. We will use regression methods to model a number of both real-world and lab-based systems producing predictive models applicable in comparable populations. We will assemble and explore real-world datasets, use pair-wise plots to explore correlations, perform clustering, self-similarity, and logistic regression develop both fixed-effect and mixed-effect predictive models. We will introduce machine-learning approaches for classification and tree-based methods. Results will be interpreted, visualized and discussed. We will introduce the basic elements of data science and analytics using R Project open source software. R is an open-source software project with broad abilities to access machine-readable open-data resources, data cleaning and assembly functions, and a rich selection of statistical packages, used for data analytics, model development, prediction, inference and clustering. With this background, it becomes possible to start performing variable transformations for linear regression fitting and developing structural equation models, fixed-effects and mixed-effects models along with other statistical learning techniques, while exploring for statistically significant relationships. The class will be structured to have a balance of theory and practice. We'll split class into Foundation and Practicum a) Foundation: lectures, presentations, discussion b) Practicum: coding, demonstrations and hands-on data science work.

ENGR 1474 - SCUPI - PITT ON LOCATION

Minimum Credits: 1

Maximum Credits: 18

Joint Program Course offered through Sichuan University - University of Pittsburgh Institute (SCUPI).

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: LG/SNC Elective Basis

ENGR 1500 - ETHICAL DILEMMAS BALANCING COST, RISK, AND SCHEDULING

Minimum Credits: 3

Maximum Credits: 3

Students will explore the interfaces among engineering ethics, design, schedules, costs and risk assessment. Teamwork, communications and management skills will also be developed. Students will analyze a series of well-known cases, as well as discussing current ethical situations involving engineers and engineering managers. Students will learn to recognize and resolve the types of ethical dilemmas that they could encounter in the workplace. A term paper serves to integrate and extend the entire course material.

Grade Component: Letter Grade

ENGR 1620 - PRODUCT DESIGN AND DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

The focus of product design and development is integration of the marketing design and manufacturing functions of firms in creating new products in a diverse economy that is experiencing rapid growth. Students will analyze several case-studies within the Indian context to study the multiple stages involved with new product creation, design, engineering, and production. The importance of creating new products suited for rural-agricultural settings which are eco-friendly and satisfy sustainable economic communities will be addressed throughout the course. Topics include: discuss the set of tools and methods for product design and development; develop abilities to create a new product; awareness of the role of multiple functions in creating a new product (e.g. Marketing, finance, industrial design, engineering, production); ability to coordinate multiple, interdisciplinary tasks in order to achieve a common objective (examine local conditions, needs and constraints; case studies (to be gathered from various sources).

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

ENGR 1624 - MOVING THE CITIES

Minimum Credits: 1

Maximum Credits: 3

This course aims to develop students' entrepreneurial and innovation skills while immersed in a collaborative multicultural experience. Students in cross cultural teams will practice design thinking methods to formulate innovative solutions to challenges in a regional context.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Letter Grade

ENGR 1625 - ENGINEERING BUSINESS COLLABORATIONS IN INDIA

Minimum Credits: 3

Maximum Credits: 3

This course will focus on the studying modern engineering and business principles, methods, and tools, within the context of the Indian environment. The three focal areas of study are: manufacturing systems, service engineering operations, and call centers. A visit to India will showcase challenges and opportunities available at the corporate level and at the individual level in this rapidly growing economy. It will also focus on the societal impacts of new technologies and rapid expansion of engineering industries in India. Students can utilize this forum to analyze and visualize service manufacturing engineering challenges and opportunities around the world. Plant visits and interfaces with engineering students and practicing engineers will allow students to appreciate the following professional characteristics: ethics, the ability to work with others, an appreciation for other disciplines, adaptability, and an appreciation for life-long learning.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

ENGR 1631 - INTRODUCTION TO MINING ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

The course introduces students to: 1) the history and importance of mining, 2) the exploration and development of surface and underground mines, 3) modern mining methods and operations, 4) common mining equipment, 5) fundamentals of mine ground control and ventilation, 6) elements of coal preparation and mineral processing plants, and 7) mine health and safety management. It is designed to provide students with basic understanding of the primary elements of a mining operation and the engineering issues associated with operating a mine in a safe, effective, and sustainable manner. The mining industry is replete with technical jargon and specialized processes and machinery that require mastery by students prior to exploration of more technically complex engineering coursework. Introductory lectures and field trips help to prepare students for the rigors of studying the other mining engineering courses offered within the Swanson School of Engineering.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: (PROG: Swanson School of Engineering) or (PLAN: Geology (BS or BPH))

ENGR 1634 - ENVIRONMENTAL CONTROLS IN MINING

Minimum Credits: 3

Maximum Credits: 3

The course is designed to study the environmental impact of coal, stone, and other mining operation and examine the engineering controls used to mitigate these impacts. The examination begins with the exploration and permitting of the mine site, emphasizing important environmental issues. Next, the impacts of active mining on land and water use are outlined. Most of these issues are related to subsidence impacting surface structures and water movement both at the surface and underground. To complete the mine's life cycle, closure and remediation issues are investigated. Lastly, a detailed examination of the issues associated with abandoned mined-lands, i.e. Acid-mine drainage, mass-wasting,

fires, etc., Are studied. Throughout the course, engineering controls that focus on mitigating the environmental impacts of mining are acknowledged and assessed.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ENGR 1635 - MINE VENTILATION ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

This course provides the skills needed to analyze and design ventilation systems for underground mines based on 1) regulatory requirements, 2) health concerns for workers, 3) levels of dusts and toxic or explosive gases present, 4) mining methods used, and 5) splitting and delivery of different quantities of air to various workplaces.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ENGR 1637 - STRATA CONTROL ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

This course provides the skills needed to analyze and design ground control systems for underground mines based on 1) regulatory requirements, 2) safety concerns for workers, 3) stress and displacement characteristics, 4) proposed mining methods, and 5) local geologic conditions.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ENGR 1638 - MINING HEALTH AND SAFETY

Minimum Credits: 3

Maximum Credits: 3

Presents an overview of the health and safety issues within the mining industry and to examine current efforts to address these issues. In-depth discussion of health issues affecting mining include: diesel control, noise induced hearing loss, silicosis, coal mine dust monitoring and control, toxic substances, and toxic fumes. In-depth discussion of safety issues affecting mining include: explosives, falls of ground, mine inundation's, fire prevention, mine explosions, ventilation, methane control, emergency response and rescue, training, ergonomics, machine safety, and electrical safety.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

ENGR 1686 - SPACE ORBITAL MECHANICS

Minimum Credits: 3

Maximum Credits: 3

This course presents rigorous treatment of classical mechanical systems pertaining to spaceflight and orbital dynamics. Students will be able to apply mathematical treatments to Newtonian systems and in the process appreciate both physical nature and engineering feats achieved in the successful completion of space missions.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

ENGR 1700 - INTRODUCTION TO NUCLEAR ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

Introduction to nuclear science and technology; applications of nuclear engineering; careers in nuclear industry; nuclear history; reactor types; elementary nuclear and reactor physics; nuclear radiation and safety; fuel cycle; regulations and sustainability.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

ENGR 1701 - FUNDAMENTALS OF NUCLEAR REACTORS

Minimum Credits: 3

Maximum Credits: 3

Nuclear physics, fission and fusion; cross-sections; neutron flux and slowing-down; diffusion and transport; criticality condition and calculations; reactor kinetics and shielding; heat generation, transfer and cooling; reactor materials; reactor structure.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (PHYS 0152 or 0175 or 0202 or 0476) and (CHEM 0102 or 0112 or 0120 or 0420 or 0720 or 0770 or 0970); PROG: Undergraduate School of Engineering

ENGR 1702 - NUCLEAR PLANT TECHNOLOGY

Minimum Credits: 3

Maximum Credits: 3

Current and future reactor systems; nuclear power plants; balance of plant configuration; fuel cycle management; reactor operation principles; reactor plant economics; analysis and design of nuclear systems; design projects.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (PHYS 0152 or 0175 or 0202 or 0476) and (CHEM 0102 or 0112 or 0120 or 0420 or 0720 or 0770 or 0970); PROG: Undergraduate School of Engineering

ENGR 1711 - HAPPINESS AND HUMAN FLOURISHING

Minimum Credits: 3

Maximum Credits: 3

Aristotle wrote that "Happiness is the meaning and purpose of life, the whole aim and end of human existence." The modern west, however, is facing a happiness crisis. We are experiencing historic levels of depression, anxiety, and lack of meaning. Cultures around the world and throughout history have had a lot to say about the nature of happiness. In this interdisciplinary class, we explore different conceptions of happiness and work to develop a capacious definition of happiness as "human flourishing." We then turn our attention to the pre-conditions necessary to promote human flourishing and survey how various disciplines might be oriented toward the flourishing person. We conclude the

course by reflecting on the course material to help students reflect on their own lives and how they might construct flourishing lives in college and beyond.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

ENGR 1713 - RADIATION DETECTION AND MEASUREMENT

Minimum Credits: 3

Maximum Credits: 3

This combined lecture and laboratory course will provide students with an introduction to the principles of radiation detection and measurement and experimental techniques. The lecture material will provide students with an understanding of the theoretical bases of detector operation, radiation interactions with matter, signal conditioning and processing electronics, measurement techniques, and statistical considerations. Laboratory work will emphasize the practical aspects of radiation detection using an array of radioactive sources, detectors, and associated signal processing electronics. Through a series of laboratory experiments, students will learn to configure and operate instrumentation used in a wide range of radiation detection applications that are of interest to nuclear power, nuclear medicine, radiochemistry, and other scientific disciplines.

Grade Component: Letter Grade

ENGR 1716 - THE ART OF MAKING: AN INTRODUCTION TO HANDS-ON SYSTEM DESIGN AND ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

Engineering is fundamentally a creative process in which ideas are generated and transformed into new systems and devices in the world to meet human needs. The term engineer shares its origins with ingenious: one definition of engineer is 'a skillful inventor.' In this course, we will explore tools and techniques for inventing, designing and prototyping systems. This course is based on experiential learning: through interactive discussions, small-team exercises, maker assignments, workshops and hands-on projects, students will obtain an introduction to design thinking, 'maker culture' and systems engineering. ENGR 1716 is an upper division version of freshman honors ENGR 0716. It is for sophomore, junior and senior level students. We will explore user-centric design principles, low-resolution prototyping and experience prototyping, basic building elements for systems such as sensors, computer controllers, actuators and displays, materials and methods for prototyping, and ways to analyze and troubleshoot systems. Students will gain an introduction to 'smart systems': automated systems that can sense the world and automatically respond in useful ways. We will also focus on the user interface: how to create control and display interfaces that enhance users' ability to operate systems effectively and efficiently.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

ENGR 1811 - MISSION-FOCUSED LEAN INNOVATION

Minimum Credits: 3

Maximum Credits: 3

This course will teach students how to build products and services using lean methods. This will be done by solving real-world military and intelligence community problems. The course uses the lean launchpad platform for entrepreneurship. This is a highly customer-centered hypothesis-test approach to developing a mission mode, and is particularly well-suited for technology startups. It incorporates customer needs and user testing to build a minimum viable prototype. At the conclusion of the course, students will be able to understand the problems/needs of searching

for product-market fit; understand all the stakeholders, deployment issues, costs, resources, and ultimate mission value; deliver minimum viable products that match customer needs in an extremely short time; produce a repeatable model that can be used to launch other potential technology solutions. This course was formerly titled HACKING FOR DEFENSE.

ENGR 1869 - INTRO ELEC ENGRG FOR NON EE'S

Minimum Credits: 3

Maximum Credits: 3

Linear electric circuits, circuit elements and sources, mesh and node equations, the venin equivalent circuits, sinusoidal steady state analysis, three phase circuits, power concepts.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ENGR 1870 - SOLIDS PROCESSING AND TRANSPORT

Minimum Credits: 3

Maximum Credits: 3

Particle technology affects as much as 80% of the chemical process industry, yet is often omitted from the undergraduate curriculum of chemical engineers. This course is designed to give advanced undergraduates as well as early-term graduate students an introduction to this rich and diverse field. Topics will range from fundamentals (particle classification, properties, and flow) to applied (hopper design, mixing, etc. Industry related examples and designs will be presented.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

ENGR 1900 - INTRODUCTION TO SUSTAINABLE WATER TECHNOLOGY & DESIGN

Minimum Credits: 3

Maximum Credits: 3

In this course, students will be introduced to the complex and global interactions that make up the human-water interface and learn to design for water applications. Beginning with the physical/chemical and biological significance of water, this course will analyze the development of water technologies within their historical, cultural and geopolitical contexts. This introduction will serve as the foundation for quantitatively evaluating: 1) the present day water challenges that face communities, cities, and nations & 2) the state-of-the-art technologies currently deployed to manage these needs. The second half of the course will be used to explore innovative examples, examine current water research and technology and work on a course project in which students will have the opportunity to create and design sustainable methods and technologies to meet local and or global water challenges.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

ENGR 1905 - CURRENT ISSUES IN SUSTAINABILITY

Minimum Credits: 3

Maximum Credits: 3

This course will introduce the core principles of sustainability (i.e. Social, economic, and environmental) from the perspective of several disciplines and research fields. Covering a variety of topics such as urban infrastructure, energy policy and the environment, sustainable water-use, habitat sustainability and biodiversity, the curriculum and schedule are updated annually to reflect advancements in the field of sustainable engineering and science, and to continually incorporate current topics. While the course is primarily taught by the sustainability faculty fellows it will also consist of various guest lectures by sustainability faculty and senior practitioners working throughout the Pittsburgh region. Course assignments will consist of a series of essays and assignments and culminate in a team term project. This is a required course for the undergraduate sustainability certificate and the M.S. in Sustainable Engineering.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Attributes: MCSI - Sustainability Focused, MCSI - Sustainability Related

ENGR 1907 - SUSTAINABILITY CAPSTONE

Minimum Credits: 3

Maximum Credits: 3

Building upon students' previous experience and skills, this course will focus on enabling interdisciplinary student teams to synthesize comprehensive solutions to complex real-world Sustainability challenges. This is a project-based course. Project topics will be developed in consultation with instructors and sustainability stakeholders. Innovative solutions will require the application of critical thinking and collaboration to resolve. By the end of the course the students will have a deeper understanding of 1) the multi-faceted nature of Sustainability solutions 2) approaches to problem solving across fields and 3) how to communicate sustainable solutions and concepts in an interdisciplinary team environment. This course serves as a capstone course for the Sustainability certificate and M.S. in a Sustainable Engineering degree and is a required course for these two programs.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ENGR 1905 or 2905

Course Attributes: Capstone Course, MCSI - Sustainability Focused, MCSI - Sustainability Related

ENGR 1909 - INTRODUCTION TO SUSTAINABLE FOOD SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

Our food system is a multifaceted network of interconnected systems and relationships. In order to be able to feed ourselves well into the future, it must be sustainable. A sustainable food system is a system in which healthy food is provided to people while balancing the environmental, social and economic impacts. These dynamics force stakeholders to confront synergies and tradeoffs in agricultural practices, harvesting, transportation, manufacturing and distribution, healthy diets, and a reduction in wasted food.

ENGR 1920 - ENGINEERING CRAFT BREWERY - INTERNATIONAL OPPORTUNITY

Minimum Credits: 1

Maximum Credits: 1

This course provides the opportunity to explore and learn about the Craft Brew process in Europe. You will be able to

describe and analyze the entire brew process as you are traveling to local breweries, malteries and Yeast manufactures in an European city. The program abroad occurs during spring break. Students must have taken ENGR 1933 or be taking ENGR 1933 in order to qualify for this course. Students must apply and be accepted by Engineering International Programs in order to be registered.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Letter Grade

Course Requirements: PREQ or CREQ: ENGR 1933

ENGR 1933 - SCIENCE, TECHNOLOGY, & CULTURE OF CRAFT BREWING

Minimum Credits: 3

Maximum Credits: 3

This course will introduce students to the science of brewing and technology needed to design and operate a craft brewery. Students will learn and apply biology, chemistry, and foundational engineering concepts and equipment needed to convert grain, water, yeast, and hops into craft beer. Students will also develop product analysis and product design skills to justify brewing choices based upon brewing science, technology, economic, and cultural considerations. Judging craft beer quality is a sensory experience that draws upon technical, cultural, and geographic aspects of each beer style; different styles will be highlighted throughout the course. Student must be 21 years of age with government-issued photo ID by the first day of class in the term taken.

Academic Career: Undergraduate

ENGR 2061 - INTRAPRENEURSHIP: ENTREPRENEURSHIP WITHIN THE CORPORATION

Minimum Credits: 3

Maximum Credits: 3

This course explores the developing practice of intrapreneurship which is defined as the application of entrepreneurial principles in a corporate environment for the creation of new products and businesses. The focus will be on providing the student with the needed awareness of cultural and political barriers while providing a specific tool set targeted at maximizing new business as well as career success. The course is designed for junior and senior engineering students who have already had some work experience.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ENGR 2062 - STARTUP FUNDAMENTALS FOR ENGINEERS

Minimum Credits: 3

Maximum Credits: 3

This course is offered within the Swanson School of Engineering to undergraduate and graduate students. At the undergraduate level, the class is part of the new Certificate in Innovation, Product Design and Entrepreneurship. The class is designed to introduce the student to the core business concepts behind innovation and entrepreneurship. The class is highly interactive, and students will be required to participate in groups and individually. Grading is heavily weighted around participation in the group project which will be ongoing throughout the semester. The class is taught by Babs Carryer, Director of Education & Outreach, Innovation Institute at Pitt. Guest speakers, who are experts in their fields, will supplement the core teaching. Topics covered will include: ideation, problem/solution, market opportunity, competitive analysis, customer discovery, pitching, funding, finance, legal issues, team building, and innovation within existing companies.

Academic Career: Graduate

Course Component: Lecture
Grade Component: Grad Letter Grade

ENGR 2080 - INNOVATING FOR COMMERCIAL IMPACT

Minimum Credits: 3

Maximum Credits: 3

Conventional wisdom regarding starting a business is dead wrong. This conclusion led Steve Blank and others to develop the lean startup method, an approach for systematically exploring the business model needed to make an idea into a success. In Blank's own words: 'existing companies execute a business model, startups search for one. This distinction shapes the lean definition of a startup: a temporary organization designed to search for a repeatable and scalable business model.' In this course, we discuss the basic elements of the lean startup method and apply them to the domain of engineering product and customer development. Students are expected to come to the class with their own idea(s) for potential product offering(s), which they will then test using the lean startup approach over the course of the term. *This course was formerly titled LEAN LAUNCHPAD: EVIDENCE-BASED ENTREPRENEURSHIP

ENGR 2210 - UNDSST BRAZIL-PREP RES & STUDY

Minimum Credits: 2

Maximum Credits: 2

This seminar is specifically designed for students who will be doing research and/or studying in Brazil. It introduces the economic, political, social, and cultural aspects of Latin America in general and Brazil in particular. The seminar is organized and conducted by the center for Latin American studies, and features guest lectures from on Brazil, readings from current popular literature and news sources (available from the Eduardo Lozano Latin American collection, a library resource of over 340,000 volumes spanning 30 years), and contemporary films (such as decade of destruction: killing for land and Brazilian populations: stories and myths). The first half of the course will introduce students to day-to-day life in Brazil, as well as its current socio-economic situation, the influence of politics and ethnic relations, and the many aspects of Brazilian culture. The second half will focus on disciplinary perspectives that allow students to explore regional issues from a variety of viewpoints. The final seminars in the semester will be used for the presentation of individual student reports on a topic related to Brazilian life, such as the governmental structure, university system, or integration of technology with indigenous lifestyles and traditions. This course is required for all Igert fellows.

ENGR 2451 - EXPLORATORY DATA SCIENCE

Minimum Credits: 3

Maximum Credits: 3

In this course, we will learn data science and analysis approaches to identify statistically significant relationships and better model and predict the behavior of these systems. We will assemble and explore real-world datasets, perform clustering and pair plot analyses to investigate correlations, and logistic regression will be employed to develop associated predictive models. Results will be interpreted, visualized and discussed. We will introduce basic elements of statistical analysis using R Project open source software for exploratory data analysis and model development. R is an open-source software project with broad abilities to access machine-readable open-data resources, data cleaning and munging functions, and a rich selection of statistical packages, used for data analytics, model development and prediction. This will include an introduction to R data types, reading and writing data, looping, plotting and regular expressions, so that one can start performing variable transformations for linear fitting and developing structural equation models, while exploring for statistically significant relationships.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ENGR 2453 - DATA SCIENCE: STATISTICAL LEARNING, MODELING & PREDICTION

Minimum Credits: 3

Maximum Credits: 3

In this course, we will use an open data science tool chain to develop reproducible data analyses useful for inference, modeling and prediction of the behavior of complex systems. In addition to the standard data cleaning, assembly and exploratory data analysis steps essential to all data analyses, we will identify statistically significant relationships from datasets derived from population samples, and infer the reliability of these findings. We will use regression methods to model a number of both real-world and lab-based systems producing predictive models applicable in comparable populations. We will assemble and explore real-world datasets, use pair-wise plots to explore correlations, perform clustering, self-similarity, and logistic regression develop both fixed-effect and mixed-effect predictive models. We will introduce machine-learning approaches for classification and tree-based methods. Results will be interpreted, visualized and discussed. We will introduce the basic elements of data science and analytics using R Project open source software. R is an open-source software project with broad abilities to access machine-readable open-data resources, data cleaning and assembly functions, and a rich selection of statistical packages, used for data analytics, model development, prediction, inference and clustering. With this background, it becomes possible to start performing variable transformations for linear regression fitting and developing structural equation models, fixed-effects and mixed-effects models along with other statistical learning techniques, while exploring for statistically significant relationships. The class will be structured to have a balance of theory and practice. We'll split class into Foundation and Practicum a) Foundation: lectures, presentations, discussion b) Practicum: coding, demonstrations and hands-on data science work.

English Composition

ENGCOMP 0150 - WORKSHOP IN COMPOSITION

Minimum Credits: 3

Maximum Credits: 3

This course is designed to give students who have had limited experience with writing an opportunity to increase their control of written language and their confidence in performing academic inquiry, analysis and argument. Students write in response to weekly assignments, and instruction focuses on helping students to extend, revise, and edit their work.

Academic Career: ENGLISH

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Workshop in Comp. General Ed. Requirement

ENGCOMP 0151 - WORKSHOP TUTORIAL

Minimum Credits: 2

Maximum Credits: 2

This course provides support for students who are taking ENGCOMP 0150 workshop in composition. Students meet weekly with a writing center consultant to work on understanding and addressing writing assignments. Students can also expect to learn how to strengthen their writing at the sentence- and paragraph-levels. Students work one-on-one with a consultant, using the papers they produce in ENGCOMP 0150 as materials for discussion.

Academic Career: Undergraduate

Course Component: Workshop

Grade Component: Satisfactory/No Credit

Course Requirements: CREQ: ENGCOMP 0150 or 0152

ENGCOMP 0152 - ESL: WORKSHOP IN COMPOSITION

Minimum Credits: 3

Maximum Credits: 3

This course is designed to give students learning English as a foreign language an opportunity to develop their ability to write in English and their confidence in performing academic inquiry, analysis and argument. Students write in response to weekly assignments, and instruction focuses on helping students to extend, revise, and edit their work.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

ENGCOMP 0210 - SEMINAR IN COMPOSITION: ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

Seminar in Composition is a course taken by almost all undergraduates at the University of Pittsburgh. Seminar in Composition: Engineering undertakes the goals of Seminar in Composition within a first-year (and beyond) engineering context. First-year Swanson School of Engineering (SSOE) students in Seminar in Composition: Engineering will explore engineering disciplines, practices, methods, ethics, and education and will analyze their own views and goals as engineering students and as future engineers as they are learning about and practicing writing as a rigorous, disciplined form of critical inquiry and a responsible form of communication. In Seminar in Composition: Engineering, students will strengthen their knowledge and practice of the textual conventions required of university- and professional-level writing and will, via drafting and revision, regularly reexamine the clarity and effects of their writing processes and outcomes. Writing instruction will take place in the ENGR 0011 or 0711 classroom, so students won't have a separate class meeting for ENGCOMP 0210; be sure that your ENGR and ENGCOMP courses meet at the same day and time in the same classroom.

Academic Career: Undergraduate

ENGCOMP 0212 - SEMINAR IN COMPOSITION: TOPICS IN DIVERSITY

Minimum Credits: 3

Maximum Credits: 3

Seminar in Composition is a course taken by almost all undergraduates at the University of Pittsburgh. Its goals are to help you engage in writing as a creative, disciplined form of critical inquiry; compose thoughtfully crafted essays that

position your ideas among other views; write with precision, nuance, and awareness of textual conventions; and revise your writing by rethinking the assumptions, aims, and effects of prior drafts. This seminar will include readings and writing activities that explore concepts and practices relating to diversity and its established and emerging definitions. Your section may address, for example, issues like race, gender, sexuality, ethnicity, religious difference, differences in abilities, and economic disparities. You can expect to identify and analyze assumptions about difference, study how texts can generate and perpetuate such assumptions, and explore the consequences of such assumptions. You will also learn how to research and compose with attention to difference. We will read a challenging set of essays to frame our work in the course, but the key texts will be your own writings and those of your classmates. Your focus on student writing will be detailed: you will work closely with the papers that you and your fellow classmates have written, trying to think of ways to make them more precise, interesting, organized, complex, and reflexive. This course is an opportunity to learn how to use reading (published texts, the papers of your classmates, and readers' comments) to help you work on your writing and how to use writing to help you strengthen ways of reading and thinking. Like other seminars in composition, this introductory course offers students opportunities to improve as writers by developing their understanding of how they and others use writing to interpret and share experience, affect behavior, and position themselves in the world. This seminar will include readings and writing activities that explore concepts and practices relating to diversity and its established and emerging definitions. Your section may address, for example, issues like race, gender, sexuality, ethnicity, religious difference, differences in abilities, and economic disparities. You can expect to identify and analyze assumptions about difference, study how texts can generate and perpetuate such assumptions, and explore the consequences of such assumptions. You will also learn how to research and compose with attention to difference.

ENGCOMP 0213 - SEMINAR IN COMPOSITION: DISABILITY STUDIES

Minimum Credits: 3

Maximum Credits: 3

This composition course will engage students in formal and informal writing that fosters critical thinking on the topic of disability. Drawing on theoretical writing in disability studies as well as creative and critical literature by writers with disabilities, the course will introduce students to ways of identifying and questioning certain sociocultural assumptions about ability, sensory experiences of the world, and mental as well as physical health. The nature of the writing assignments and writing processes will vary in order to recognize a diversity of abilities and ways of thinking. In exploring disability as a diversity issue, the course aims at intersectionality, a concept introduced in 1989 by legal scholar Kimberlé Crenshaw. Intersectionality is the recognition that none of us can be said to inhabit a single identity; for example, our racial identity is always complicated by our socioeconomic class, gender and sexuality, as well as by our identities as abled/disabled. Anyone may become disabled at any point in time, and according to the Center for Disease Control, 61 million Americans identify as disabled, so it's safe to say that disability impacts every identity.

Course Requirements: PREQ: ENGCOMP 0002 OR 0003 OR 0005 OR 0010 OR 0100 OR 0150 OR 0152 OR ENG 0101; TEST SCORE: SAT Verbal 560 or Higher or ACT English 24 or Higher.; Enrollment not permitted if currently enrolled in ENGCOMP 0200-level courses, FP 0003, or FP0006

ENGCOMP 0214 - SEMINAR IN COMPOSITION: SUSTAINABILITY

Minimum Credits: 3

Maximum Credits: 3

This course is an opportunity to take up writing as a method for engaging the world, for affecting change in the world, and for developing sustainable relationships with all those beings, systems, cultures, networks, and environments that we're entangled within. Writing is more than a simple tool of communication, and when taken as such, this simplified view of writing might be taken up as partially to blame for the current crisis of sustainability we're deep within. When we act as though our writing is merely a means of describing the world from a distance, we reinforce a sharp divide between our selves and the world around us. Instead, we can strive to write in rather than about the world. Writing can be a tool for developing and shaping our relationships with the world. In this section of Seminar in Composition we will engage with Sustainability as both a practice and interdisciplinary field of study. We will read texts that work to define sustainability and sustainable living. They will both promote particular practices of sustainability and trouble the notion of a sustainability that doesn't require an overhaul in how we experience and engage the world around us. We will examine what it means to pursue sustainability and what it means to say that we are living through a crisis of sustainability.

ENGCOMP 0400 - WRITTEN PROFESSIONAL COMMUNICATION

Minimum Credits: 3

Maximum Credits: 3

This course explores the methods of inquiry, analysis and composition characteristic of written communication in professional settings. The course will examine such writing's specialized use of language, conventions and formats, premises, motives, and purposes. By preparing letters, resumes, proposals, reports, etc. Students will get a feel not only for what "professional" communication is, but also for how and why it does, or can, or should function.

Course Attributes: SCI Expression: Tech/Bus/Res writing Gen. Ed. Req., Writing Intensive Course (WRIT)

ENGCOMP 0401 - WRITTEN PROFESSIONAL COMMUNICATION: TOPICS IN DIVERSITY

Minimum Credits: 3

Maximum Credits: 3

This course explores the methods of inquiry, analysis and composition characteristic of written communication in professional settings. The course will examine such writing's specialized use of language, conventions and formats, premises, motives, and purposes. By preparing letters, resumes, proposals, reports, etc., students will get a feel not only for what "professional" communication is, but also for how and why it does, or can, or should function. This Topics in Diversity section of WPC will invite students to expand and complicate their understanding of the benefits of workplace diversity and of the problems arising from the unequal distribution of power and privilege across positions (including race, gender, sexuality, ethnicity, ability, religion, and class) in the professions. Students will explore the dynamics of power and hierarchy in their chosen field as they observe daily operations and interactions during work-site field visits, and they will consider how these dynamics perpetuate or diminish inequities and marginalization. Among the topics considered are discrimination in hiring and on the job in terms of employment training, responsibilities, pay, and promotions. Students gain practice articulating their individual diversity as job candidates in resumes and cover letters, and in composing professional documents that address a complaint, seek a remedy, and establish new policies to address hypothetical discriminatory issues that they may experience in the future.

ENGCOMP 0412 - ENGINEERING COMMUNICATION IN A PROFESSIONAL CONTEXT

Minimum Credits: 3

Maximum Credits: 3

ENGCOMP 0412 Engineering Communication in a Professional Context, is a required course for all Swanson School of Engineering first-year students enrolled in ENGR 0012. In ENGCOMP 0412 students write a significant research paper for the Swanson School of Engineering's Annual Conference on Sustainability, held near the end of the spring term. Students compose this paper in teams of 3; students also compose individual papers reporting and reflecting on their experience with teamwork and with researching, composing, assessing, and presenting written work within a context of maximum personal and professional responsibility and integrity. In ENGCOMP 0412 students undertake intensive research into a current engineering innovation/technology. Students expand upon that research as they move through a multi-step process of writing and revising a conference paper that includes considerable technical content as well as intensive analyses of the social value and ethical applications of that technology. Through ENGCOMP 0412, students will continue to increase their experience and success with major teamwork projects, will practice best policies and procedures for professional communication and presentation, will continue to learn about and practice communication modes and expectations in engineering, science, and technology, and will continue with an academically and intellectually rigorous process (begun in ENGCOMP 0210, Seminar in Composition: Engineering), of understanding and communicating what it means personally, educationally, professionally, socially, and globally to "be an engineer."

Course Attributes: SCI Expression: Tech/Bus/Res writing Gen. Ed. Req., Writing Intensive Course (WRIT)

ENGCOMP 0415 - WRITING AND ANXIETY

Minimum Credits: 3

Maximum Credits: 3

This course is designed for students who are interested in learning about ways of navigating anxiety and apprehension about writing and for those who expect to teach or support other writers in business, education, and other nonprofit, public health and service institutions. Writing can be an anxiety-provoking process for many people who nevertheless have to write because of academic or professional responsibilities. The course will explore ways of theorizing the writing process and will identify and share strategies for navigating roadblocks (such as writing apprehension, writing anxiety, and blocking) as they arise. Students can expect to learn essential terms from the rhetorical tradition in order to become more aware of the choices they make as thinkers and writers, and they will analyze the rhetoric of a variety of texts from a disability studies perspective. In addition to learning about writing theory, students can expect to read and write about anxiety and about how the idea of disability functions in our culture.

ENGCOMP 0420 - WRITING FOR THE PUBLIC

Minimum Credits: 3

Maximum Credits: 3

This course explores the theory and practice of writing that serves the public interest, including writing for the nonprofit and the governmental sectors of American society. The course will explore the ethics of writing for the public, the impact of rhetorical contexts on writing, and the ways in which writing and revision can allow us to understand a problem or issue in a new way. Students can expect to read examples of writing for the public, conduct significant research, and write in different genres.

ENGCOMP 0430 - PUBLIC COMMUNICATION OF SCIENCE AND TECHNOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course explores the theory and practice of writing that serves the public interest. We will focus on writing about science, technology, and the environment areas that influence our daily lives in innumerable ways. By composing in a variety of genres, students will gain a deeper understanding of the ethics of writing about science and technology for public audiences, the interaction of communication and rhetorical context, and how writing and revision can facilitate new ways of thinking. Students will study academic articles, professional examples, news coverage, and student work.

ENGCOMP 0432 - WRITING FOR ENVIRONMENTAL ADVOCACY

Minimum Credits: 3

Maximum Credits: 3

This course focuses on writing in response to the natural environment, primarily as a tool to raise awareness of environmental challenges and to advocate for sustainable ways to meet those challenges. We'll read a variety of voices and styles of advocacy writing, including public documents, always with a strong focus on the craft of language: How does the writing reach its target and accomplish its goal? What makes the writing persuasive? Through varied assignments including blog posts, op-eds, and a researched project for a specific audience, you'll increase familiarity with approaches to and niches for environmental writing and with the historical and political context of the environmental sustainability movement. We will investigate the concept of environmental justice: who feels the greatest impacts of environmental degradation and who feels the greatest economic impacts of sustainable solutions. You'll hear from at least one guest speaker about writing for a local environmental organization, and we will likely take a field trip off campus. You'll devote the second half of the semester to an individual writing project and presentation focusing on a specific environmental challenge of your choice.

ENGCOMP 0435 - THE PUBLIC ATHLETE

Minimum Credits: 3

Maximum Credits: 3

Sport is a ripe avenue for public meaning-making, as athletes have used their platforms to bring awareness to various societal issues throughout history. In US contexts, athletes, like Serena Williams, Muhammad Ali, Simone Biles, LeBron James, Megan Rapinoe, Colin Kaepernick, John Carlos, and Tommie Smith (among many others), have taken public stands against various injustices. The ways in which sports data and narratives-in journalism, on social media, in film, or local communities, for example-are crafted also make meaning for a variety of genres and purposes. Thinking deeply about this subject offers participants ways to construct and deconstruct sport-writing to understand how these messages are made. In this course, we will engage with public writing about sports--both by and about athletes. Participants will not only study histories of sports-writing but will also consider how today's technologies can shape representations of the public athlete. We will read and write in a variety of rhetorical, journalistic, informational, creative, and research-based genres, while thinking carefully about the role of sports and athletes in shaping notions of

racial, gender, and class-based identities.

Academic Career: Undergraduate

ENGCMP 0521 - WRITING WITH DATA

Minimum Credits: 3

Maximum Credits: 3

This course is designed to allow students to engage with data in their writing and learn how to effectively write with numbers. This course is for anyone: those who love to write but are sometimes less confident working with numbers, those who love numbers but want to improve their writing, for people who love numbers and writing rather equally, for scientists, for artists, for people who anticipate working with a lot of data in their career, etc. Students will work with a dataset of their choosing and develop several pieces reliant on quantification for both lay and specialized audiences. Through these writing projects and through classroom activities, students will learn about how to find data to use for their writing, how to plan effective utilization of this data in a broader argument, how to responsibly and effectively use word choice and syntax to convey quantified material, how to organize writing reliant on data for both lay and specialized audiences, and how to incorporate data visualization for purposes of understanding and persuasion. There is no need to know anything about statistics; throughout the term we will learn how mathematical encounters with writing can be engaging, exciting, and something we can work on together. We will be going over a handful of statistical concepts in the second half of the course so we can write about them, but the emphasis here will ultimately be on proficiency for the purposes of a given concepts use in writing. By the end of the course, both traditional and quantitative literacy will be improved to serve student development as competent quantitative writers and readers in future PPW courses, courses across different majors at Pitt, in their writing as professionals, and as more discerning consumers and producers of knowledge as global citizens.

Academic Career: Undergraduate

Course Attributes: Undergraduate Research, Writing Intensive Course (WRIT)

ENGCMP 0530 - WRITING FOR THE SCIENCES

Minimum Credits: 3

Maximum Credits: 3

This course invites students to explore the purposes and conventions of writing within the sciences. Students will read and analyze examples of professional scientific documents' including abstracts, literature reviews, research proposals, graduate school papers, journal articles, and correspondence. They will learn to craft scientific research into engaging written material, using information drawn from publicly available studies or their own research. They will consider their audience's needs and tailor their writing for both expert and general readers in different rhetorical contexts. Students will also learn strategies for document design, including how to effectively use visuals to represent data and findings. Throughout the course, students will learn how to write clear, powerful sentences and paragraphs. Finally, to develop their professional collaboration skills, students will practice providing each other with effective feedback on works-in-progress.

Academic Career: Undergraduate

Course Attributes: Undergraduate Research, Writing Intensive Course (WRIT)

ENGCMP 0535 - WRITING IN THE HEALTH SCIENCE PROFESSIONS

Minimum Credits: 3

Maximum Credits: 3

This course is designed for students who are interested in learning about the kinds of writing typically done by clinicians, researchers, and others working in health science contexts. The course focuses on developing the skills needed to write and communicate effectively in health and medical contexts, from writing essays for graduate and professional program applications and documenting research to communicating with patients and staff, writing professional reports and correspondence, and giving conference presentations. Students will gain familiarity with the formal requirements of biomedical abstracts, literature reviews, and research papers, and they will learn effective strategies for conducting secondary research using health science databases and search engines. The course will also introduce techniques for improving documents, structure and style, so that readers can easily grasp, follow, and absorb the significance of the information presented. Students will be introduced to expectations and challenges they are likely to encounter in other common writing scenarios, such as explaining complex information to patients, writing reports for administrators or regulatory agencies, and communication policies or procedures to staff. Different approaches to writing graduate and professional school personal statements will be discussed, and students will draft and revise either personal statements for applications or mission statements articulating their professional visions within a larger ethical framework. Through the course of the term students will work towards completion of a final paper on a medical communication issue, and they will present their findings in a conference-style format, at the end of the semester.

Course Attributes: Undergraduate Research, Writing Intensive Course (WRIT)

ENGCOMP 0540 - INTRODUCTION TO DISABILITY STUDIES

Minimum Credits: 3

Maximum Credits: 3

This course provides students with a foundation for using writing to understand, apply, and critically engage with key concepts and histories that have been crucial to the experiences of people with disabilities, and perceptions and treatment of those with disabilities. Students can expect to explore and write theoretical pieces, first-person accounts, and representations of people with disabilities. They will learn various models of understanding and discussing disability (including the social, medical, individual model, and identity models) and the histories that have shaped the lives, experiences, and perceptions of people with disabilities. Students in the course will have the opportunity to compose rhetorical analyses of popular, public, and professional representations of disability. Historically, disability has been viewed as a deficiency or defect through the lens of religious and, most prominently, medical discourses, locating disability within an individual's body and mind. Seeing disability as a problem to be solved has resulted in significant barriers to access and representation for people with disabilities within all areas of the public sphere. Students will develop their own written critical inquiries into concepts such as normalcy, disability, and barriers to access (including physical, social, attitudinal, legal barriers). This course will not only offer critical interrogations of disability as a construct, but also center the lives and experiences of those with disabilities, viewing disability as a locus of identity and culture. To that end, students will watch documentaries and television media, and read memoir, personal essays, and poetry that present the pride, struggles, and everyday experiences of people with disabilities. Students will also study the Disability Rights Movement and inquiries into identity politics as related to disability as an identity category. The course will invite students to use composition to increase accessibility for those with disabilities and to consider the potentials and limitations of universal design.

ENGCOMP 0545 - WRITING FOR ACCESSIBILITY

Minimum Credits: 3

Maximum Credits: 3

Creating a more just world means creating a more accessible world, and we can do that with and in our writing. Through readings and discussions on issues of disability justice, linguistic justice, and access, this course will first offer students a framework for understanding the social and cultural significance of creating accessible writing and using writing to increase the accessibility of non-written material (e.g. audiovisual content). Students will then learn and apply a variety of strategies to make their academic and public/professional writing more accessible for a broad range of audiences with and without disabilities, drawing from and extending principles of Universal Design. Students will also write in genres meant specifically for accessibility purposes, such as alt-text descriptions of visual material, image descriptions of social media posts and museum objects, and audio descriptions of video clips. Throughout the course, students will carefully consider the rhetorical context of their work to inform the writing choices they make, including user needs and goals that may differ or compete with one another. By the end of this course, students will produce a polished project that prioritizes accessibility in its original design in a genre of their choosing.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

ENGCOMP 0550 - TOPICS IN PUBLIC/PROFESSIONAL WRITING

Minimum Credits: 3

Maximum Credits: 3

This topics course is intended for students beginning the public and professional writing certificate, and as a writing-intensive course for students fulfilling general education requirements or interested in writing as a subject as well as a mode of instruction. The course will focus on varied topics, addressing different forms and environments for public and professional writing.

Academic Career: Undergraduate

Course Attributes: Writing Intensive Course (WRIT)

ENGCOMP 0560 - WRITING ARGUMENTS

Minimum Credits: 3

Maximum Credits: 3

Rooted in a foundation of rhetorical inquiry, this course has two goals: to help students become more adept at understanding and critically analyzing arguments, and to help students become better arguers themselves. Students in "Writing Arguments" will practice composing arguments across a variety of forms, genres, and technologies (written, visual, digital) in order to develop and hone their persuasive language skills. As part of this practice, students will have the opportunity to design and participate in intellectual conversations on topics of social interest and to compose their own examples of public persuasive discourse. Writing Arguments would be especially appropriate for students headed to law school, graduate school, careers in writing, and/or advanced courses in Public and Professional Writing.

ENGCOMP 0565 - WRITING PLACES

Minimum Credits: 3

Maximum Credits: 3

A. Can place make meaning? What roles do spaces, ecologies, or geographies play in shaping how we experience people, rooms, buildings, communities, regions, or the world? How do others, based on our placings, see us within these multiple frames? Writing Places introduces participants to cultural and rhetorical exchanges with places, and to constructions of place and community by thinking and moving through them. We'll consider what it means to construct, to be responsible for, to be culturally aware of, and to live place in local ecologies and/or digital/virtual environments. Unpacking current social in/justice issues and the communities they affect, participants may explore issues of racism, environmental and otherwise, land-based social in/justice, environmental sustainability, disability in/justice, im/migration, community-based activisms, and more. Through this process, we may be challenged to reorient our place/identity/orientation through various genres of writing places.

Course Attributes: SCI Expression: Tech/Bus/Res writing Gen. Ed. Req., Writing Intensive Course (WRIT)

ENGCOMP 0610 - COMPOSING DIGITAL MEDIA

Minimum Credits: 3

Maximum Credits: 3

This course requires students to compose digital media while exploring the rhetorical, poetic, and political implications of multiple writing platforms. Students will learn how to compose a range of critical media objects using web-authoring languages, text, sound, images, and video in proprietary and open-source software. Classes will focus on theories of writing, composing, design, critique, delivery, and networked distributions; critique and analysis of digital media produced by professional and amateur digital media practitioners; and analysis and revisions of digital media composed by the students themselves.

ENGCOMP 0620 - THEORIES OF WRITING AND TEACHING

Minimum Credits: 3

Maximum Credits: 3

This course explores theoretical and practical questions regarding how we understand the practice of writing and how we teach it. Thus the goal of the course will be for students to engage various debates regarding literacy theories and experiment with different approaches to literacy instruction. The work of the class will be analytical, inventive, and experimental, as students will have the opportunity not only to study literacy theories and pedagogues but also to create imaginative responses to these theories by considering how teachers might translate theoretical understandings about literacy into classroom practice.

ENGCOMP 0641 - WRITING FOR CHANGE

Minimum Credits: 3

Maximum Credits: 3

This course is an opportunity for students to examine and produce writing that engages in advocacy, solidarity, social critique, and/or social justice. Students will explore theories of persuasive writing for public audiences, as well as argumentative strategies more broadly. Students will define the subject of a core project for the term, and move beyond understanding an issue to understanding various discourse communities that generate writing on that topic, how those organizations represent themselves, and how they define an audience. Our theoretical discussion will be balanced by a more pragmatic look at the language of social change, and how various writing forms, produced by nonprofits, activist groups, international organizations and coalitions, as well as socially engaged journalism, inform, persuade, and engage the public. Students in Writing for Change can expect to compose traditional essays as well as public writing in print, digital, visual, and a variety of other forms of persuasive communication.

ENGCOMP 1099 - THE LANGUAGE OF POLICY AND POWER: TOPICS IN DIVERSITY

Minimum Credits: 3

Maximum Credits: 3

This course invites students to deepen and expand their understanding of public policy writing and to build the skills necessary to address the unequal distribution of power and privilege influencing policy in the public sphere. The course provides students with the opportunity to develop a portfolio of practical and analytical policy-related writing by grounding our work in current discussions about diversity (including race, gender, LGBT+, ethnicity, ability, religion, and class). In this writing-intensive class, students will write a variety of documents, such as a history memo, a set of responses to the readings, a letter of public comment, an op-ed, a polemical essay, and a final policy memo, related to a specific and properly-scaled diversity policy issue. The course will address the specialized use of language, conventions and formats, premises, motives, and purposes related to policy documents and arguments in light of diversity. By preparing both reflective academic and professional policy documents, students will master not only the basics of policy writing, but, through their own research and writing, the rhetorical and critical thinking skills necessary to create effective policy. Students will learn to employ methods of inquiry, analysis, and composition characteristic of written and oral policy discussions as they relate to diversity questions, concerns, and legal requirements. We will read broadly and deeply, and engaged, informed class discussion responding to reading and current policy questions is a cornerstone of the class. We will explore how the explicit and implicit history and applications of public and private policies have created long-standing outcomes that are often taken for granted, and address ways to change and improve those outcomes.

ENGCOMP 1100 - LANGUAGE OF BUSINESS AND INDUSTRY

Minimum Credits: 3

Maximum Credits: 3

This course concentrates on how professional people in business and industry communicate among themselves and with the rest of the world. We will both analyze written material from professional areas and practice forms and languages of successful communication in those areas. This course is primarily for students who plan to enter or now hold positions in business and industry.

Academic Career: Undergraduate

ENGCOMP 1104 - CORPORATE STORYTELLING

Minimum Credits: 3

Maximum Credits: 3

Corporate writers play key roles in defining and developing the communications landscape for organizations and their audiences. But what exactly is corporate writing? How do we, as writers, ensure we are effectively advancing the goals of our companies and clients? In this course, students will explore the conventions of content marketing, search engine optimization, writing for the web, and the other forms of business writing in order to craft inventive and accessible messages. We will also examine corporate storytelling as a tool used to construct and maintain strong company personas. Assignments will incorporate written, visual, and oral components as students launch their own companies to simulate real world projects and dynamics. This course will help you strengthen and flex your creative communication skills to engage and influence readers in a variety of channels within the corporate setting.

ENGCOMP 1111 - PROFESSIONAL WRITING IN GLOBAL CONTEXTS

Minimum Credits: 3

Maximum Credits: 3

In order to create effective and powerful documents for diverse global audiences, students need to be able to negotiate the expectations, assumptions, conventions, and professional practices of different cultures. This course will help advanced undergraduate students better understand what is at stake in writing for international audiences, how to research issues relating to communication (and especially the use of English) in global contexts, and how to write professional publications for particular international audiences.

ENGCOMP 1120 - HISTORY AND ETHICS OF ADVERTISING AND PUBLIC RELATIONS

Minimum Credits: 3

Maximum Credits: 3

As philosopher George Santayana once said, Those who cannot remember the past are condemned to repeat it. But how do history and ethics intersect to inform our decisions as writers? How do we serve the roles of advertiser and PR specialist simultaneously? What do the answers of these questions look like in the context of a real-world campaign? In this course, students will learn how pivotal ethical moments in advertising and PR history changed the face of these professions and influence our creative choices even now. Students will use the four-step planning process of research, strategy, implementation, and evaluation to construct innovative campaigns and tackle common ethical issues these professions face today. Topics to be explored may include manipulation and misrepresentation of facts, privacy concerns in the technology age, sensitivity to diversity and appropriation, responsible interaction with vulnerable populations, subliminal messaging tactics, and more. By the end of this course, students will produce a multi-faceted PR and advertising campaign that navigates a complex ethical issue and showcases their professional writing skills.

ENGCOMP 1130 - PROJECTS IN DIGITAL COMPOSITION

Minimum Credits: 3

Maximum Credits: 3

This course builds upon Composing Digital Media (ENGCOMP 0610) by requiring students to compose original projects in a particular focal area digital media while exploring the rhetorical, poetic, and political implications of that focal area. Where students in Composing Digital Media typically learn how to compose a range of critical media objects using web-authoring languages, text, sound, images, and video, Projects in Digital Composition will give students the opportunity to focus closely on a particular theme or category of multimodal composition. As with Composing Digital Media, theories of writing, composing, design, critique, delivery, remediation, and revision are central to the coursework. The course also emphasizes the importance of self-guided skills acquisition.

ENGCOMP 1200 - ADVANCED TOPICS IN COMPOSITION

Minimum Credits: 3

Maximum Credits: 3

Each course will use a specific thematic or methodological focus to enact, reflect on, and criticize a specialized mode of academic or professional discourse. Topics courses require regular reading, writing, and revision.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGCOMP 0213 or ENGCOMP 0214 or ENGFLM 0210 or FP (0003 or 0006) or (ENGR 0012 or 0712 or 0715 or 0718)

Course Attributes: Undergraduate Research, Writing Intensive Course (WRIT)

ENGCOMP 1201 - DIGITAL NARRATIVE AND INTERACTIVE DESIGN

Minimum Credits: 3

Maximum Credits: 3

How are computational artifacts currently designed, and how can they be designed differently? What stories can be told by collaborating with computers? What stories can't be told? This project-based course will enable students to engage with and create computational narratives and interactive projects with data, hardware and algorithms. Each collaboratively taught iteration of the course will include 3-4 of these units, such as: fabrication, interactive hardware, computational narrative, interactive data, and prototyping. Students will consider what it means to compose with computers for human audiences, and with humans for computer audiences. Designed for Digital Narrative and Interactive Design (DNID) majors to take midway through the major, it will help students consolidate the interdisciplinary knowledge they have obtained in their prerequisite courses, introduce them to examples of interdisciplinary work that will inform their later capstone projects, and give them practice in working on collaborative projects that span the humanities and information/computing fields.

Academic Career: Undergraduate

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (ENGCOMP 0425 or HAA 0425 or ENGLIT 0512) AND (CS 0007 or CS 0008 or CS 0010 or CS 0011 or CS 0012 or INFSCI 0419)

ENGCOMP 1207 - WRITING MACHINES

Minimum Credits: 3

Maximum Credits: 3

Large Language Models (LLMs) like ChatGPT promise--or threaten--to upend everything we know about writing. Can machines really write? What do writing machines do to or for human writers? This class approaches the contemporary buzz about ChatGPT and Natural Language Generation (NLG) through a sociotechnical and historical lens, exploring automated writing through historical and contemporary writing machines: 18th century automatons, Ouija boards, combinatorial poetics, procedural algorithms, recurrent neural networks, and the transformer technology that drives cutting-edge LLMs like ChatGPT. The course is organized into units focusing on different methods of automating writing: mechanical; spiritual; procedural; statistical; simulative. Each unit teaches students historical and technical contexts of its associated automation through texts and hands-on projects. Students who take this class will learn to generate text using computational processes and critically examine the text they produce. In so doing, students will engage with the political and ethical implications of largescale data usage to train machine learning algorithms, including issues of underrepresented languages, bias, hate speech, further marginalizing communities, automating labor, environmental impacts, dirty data and privacy violations. As we trace the development and commercialization of NLG, we'll consider whose writing is being automated, and for what purposes.

Course Attributes: Undergraduate Research, Writing Intensive Course (WRIT)

ENGCOMP 1220 - THE ART OF THE ESSAY

Minimum Credits: 3

Maximum Credits: 3

This course offers students who have fulfilled the introductory composition requirement an opportunity to develop more advanced strategies as writers and a deeper understanding of how "effective" writing gets defined in various contexts. As they work on their own writing, students will read and discuss work by writers whose prose has received acclaim. Weekly writing assignments and exercises will provide the occasion to explore different styles and approaches to an audience.

Course Attributes: DSAS Diversity General Ed. Requirement, SCI Diversity General Ed. Requirements, Undergraduate Research, Writing Intensive Course (WRIT)

ENGCOMP 1400 - GRANT WRITING FOR NONPROFITS

Minimum Credits: 3

Maximum Credits: 3

This course allows students to study the practices related to proposing change, requesting funds, and defining projects.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGCOMP 0213 or ENGCOMP 0214 or ENGFLM 0210 or FP (0003 or 0006) or (ENGR 0012 or 0712 or 0715 or 0718)

Course Attributes: SCI Expression: Tech/Bus/Res writing Gen. Ed. Req., Undergraduate Research, Writing Intensive Course (WRIT)

ENGCOMP 1401 - WRITING FOR FUNDRAISING AND DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

This class focuses on Writing for Fundraising and Development. "Development" is the work of cultivating relationships between an organization and its community of supporters in order to sustain the organization and advance its work. All nonprofits do development work; large nonprofits likely have an entire development team. Those who work in development may run major campaigns, communicate with donors, write for social media, organize events, solicit corporate giving and corporate sponsorships, and write everything from newsletters to direct mail pieces to thank you letters to reports. This class focuses on the writing that supports development work and teaches you the landscape of development work today. We will study real-world examples from both local and national nonprofits. You can expect to identify an organization to write for this term and to create a series of documents (in various forms) that will constitute your development portfolio by the end of the term. Some Pitt alumni who work in or run development offices will visit class to talk about their experiences.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: Undergraduate Research, Writing Intensive Course (WRIT)

ENGCOMP 1402 - GRANT WRITING FOR RESEARCH

Minimum Credits: 3

Maximum Credits: 3

Grant Writing for Research invites students to study practices related to researching and requesting federal funds for a specific project. This course is for those interested in learning: how funding supports projects and research in their

aspirant discipline or area of study; the interest areas and differences amongst notable grant-making agencies; how to read requests for proposals; proposal formats; logic models; and how to write and collaborate within a team. Research experience is not needed to enroll, but students should be interested in federal grants, either for their own (future) work or to gain valuable writing knowledge to support others. By the end of the course, students will understand the nature of public-sector grants, their lifecycles, where to find them, and application requirements. Students will also practice writing parts of a proposal (individually and within teams), engage in peer review, and deliver pitches to other teams in the class.

Academic Career: Undergraduate

Course Component: Seminar

Course Attributes: Undergraduate Research, Writing Intensive Course (WRIT)

ENGCOMP 1420 - WRITING PROPOSALS FOR BUSINESS

Minimum Credits: 3

Maximum Credits: 3

Successful business proposals have great potential; they can jumpstart businesses, build a strong client base, create change in the workplace, foster professional relationships, and facilitate projects that meet the needs of specific audiences. But what is a business proposal? How does it differ from a grant proposal or a business plan? What should a business proposal look like? How do we make our proposals stand out from the rest? This course will enable students to understand the functions and conventions of business proposals, the types of research that they require, and the processes that generate them and lead to approval. Coursework will help students develop an understanding of business proposal writing from an initial idea through final submission. Students will complete a variety of written pieces leading up to the final proposal, which may be valuable in their employment portfolios. Upon completion of this course, students will have acquired the research and writing skills necessary to write successful proposals for real-world for-profit contexts.

Course Attributes: Undergraduate Research, Writing Intensive Course (WRIT)

ENGCOMP 1430 - USABILITY TESTING IN TECHNICAL WRITING

Minimum Credits: 3

Maximum Credits: 3

This course prepares students for the creative and technical demands of the professional and technical writing workplace, ensuring each student possess the hard skills of usability testing and the soft skills required to best communicate those results. It introduces students to design theories and principles alongside practical applications on measuring usability and user experiences for products and services. Ethical and practical questions of accessibility and disability necessarily inform our discussion and practice. This course also incorporates aspects of product consulting, providing students with an opportunity to apply their theoretical and practical understanding of usability testing to the benefit of stakeholders.

ENGCOMP 1452 - DISCIPLINING ENVIRONMENTAL EDUCATION: USING DIGITAL STORYTELLING TO UNPACK ENVIRONMENTAL ISSUES

Minimum Credits: 1

Maximum Credits: 1

In other parts of the world, such as Finland, environmental education is infused throughout the curriculum in history, science, technology, and math. This pop-up course serves as one way to provide a platform for Pitt students to experience Finnish nature schools in their backyard. The goal of the pop-up classes will be to provide a space for developing student projects at both the undergraduate and graduate levels. This course is geared for students interested in authoring visual content and testing the productive tensions of this new media. During the pop-up classes, we will establish a student-led AR/VR authoring club, training sessions for students, and work to amplify and circulate our content across our local and global communities.

Academic Career: Undergraduate

ENGCOMP 1510 - WRITING WITH STYLE

Minimum Credits: 3

Maximum Credits: 3

Designed with the writer in mind, this advanced-level, workshop-style course explores the sentence in its many forms and seeks to deepen students' understanding of grammar, syntax, punctuation, and style as opportunities for creative endeavor. Through the use of imaginative exercises, revisions, and discussion of texts written by students, poets, and essayists, we will immerse ourselves in the practice of writing compelling sentences that best express our thoughts and motives. The course involves a weekly workshop of works-in-progress and the creation of a chapter-length (20-25 pages) prose revisionary project by the end of semester.

Course Attributes: Writing Intensive Course (WRIT)

ENGCOMP 1520 - REVISING WITH PLAY AND PURPOSE

Minimum Credits: 3

Maximum Credits: 3

Revising with Play and Purpose emphasizes revision (the iterative and reciprocal process of drafting, reworking, and refining a project) and remediation (the process of transforming an existing project into new modes, genres, and forms) as subjects of academic inquiry in Writing Studies and meaningful practices of critical thought and critical making. Students in this course will continue a line of inquiry, problem, or issue for which they have already produced at least some writing (even messy, nascent, fragmentary writing), in order to revise and polish a project intended for a context beyond the classroom. This could be (for example) a researched essay to be used as a writing sample for graduate school applications; a project to submit to a public or Pitt-oriented essay competition or award; a project to launch a personal newsletter or other public-facing "self-published" content; a grant proposal or project pitch; or another subject ready to move from the back burner to sustained attention. In each unit, we'll reimagine the possibilities for this line of inquiry through revision experiments and rigorous play. By the end of the course, students will develop a final portfolio with a draft of a project they intend to send out into the world in some way, with a rationale for the intended genre, venue, and audience(s) for their work.

Academic Career: Undergraduate

ENGCOMP 1551 - HISTORY AND POLITICS OF THE ENGLISH LANGUAGE

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to both historical and present use and descriptions of the English language. Students also learn techniques for analyzing and understanding the language.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGCOMP 0213 or ENGCOMP 0214 or ENGFLM 0210 or FP (0003 or 0006) or (ENGR 0012 or 0712 or 0715 or 0718)

Course Attributes: DSAS Diversity General Ed. Requirement, Medieval & Renaissance Studies, SCI Diversity General Ed. Requirements, Undergraduate Research, West European Studies, Writing Intensive Course (WRIT)

ENGCOMP 1552 - LANGUAGE, LITERACY, LEARNING

Minimum Credits: 3

Maximum Credits: 3

This course examines how individuals and societies acquire, develop, and make use of literacy. Students engage in questions concerning the social and personal consequences of literacy, and they explore various theories and practices of reading, writing, and schooling. The dual focus on how literacy functions in the development of individuals and societies makes this course especially appropriate for advanced students considering careers in elementary and secondary education.

Academic Career: Undergraduate

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGCOMP 0213 or ENGCOMP 0214 or ENGFLM 0210 or FP (0003 or 0006) or (ENGR 0012 or 0712 or 0715 or 0718)

Course Attributes: Children's Literature, Undergraduate Research, Writing Intensive Course (WRIT)

ENGCOMP 1900 - INTERNSHIP: PUBLIC/PROFESSIONAL WRITING

Minimum Credits: 3

Maximum Credits: 3

This internship is intended for juniors and seniors who are pursuing the public and professional writing certificate. The internship is designed to give students a productive, substantive writing experience where they will learn from and contribute to the sponsoring agency or project. Students will consult with an advisor to arrange for internships and to construct the plan of work, writing, and oversight.

Academic Career: Undergraduate

Course Component: Internship

Grade Component: LG/SNC Elective Basis

ENGCOMP 1901 - UTA IN TEACHING AND TUTORING WRITING

Minimum Credits: 1

Maximum Credits: 3

This experience is intended for students who wish to engage with the theory and practice of teaching writing under the mentorship of an English department faculty member. The undergraduate teaching assistantship is designed to give students a productive, substantive experience in which they will learn from and contribute to students' learning in a classroom or in the writing center. Students will consult with a faculty mentor to arrange the undergraduate teaching assistantship and to construct the plan of work, writing, and supervision.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SNC Elective Basis

ENGCOMP 1902 - INDEPENDENT STUDY PUBLIC PROFESSIONAL WRITING

Minimum Credits: 1

Maximum Credits: 6

This course will allow PPW students to define special projects and a course of study to explore over the course of a term.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: LG/SNC Elective Basis

ENGCOMP 1903 - SERVICE-LEARNING SEMINAR IN PUBLIC AND PROFESSIONAL WRITING

Minimum Credits: 1

Maximum Credits: 1

This course is open to students who are enrolled in public and professional writing courses. It is taken concurrently with these anchor courses as a voluntary, one-credit add-on. The service-learning seminar pairs meaningful and sustained service activities in a professional non-profit organization with investigation of professional writing.

Academic Career: Undergraduate

ENGCOMP 1906 - PROFESSIONAL EXPERIENCE: WRITING, EDITING, OR PR

Minimum Credits: 3

Maximum Credits: 3

This course offers an exciting opportunity for students who have taken at least a couple of PPW or Writing courses: Professional Experience at Sampsonia Way, the literary journal of City of Asylum/Pittsburgh.

<http://www.sampsoniaway.org> The PPW program is teaming up with City of Asylum to produce the magazine. The course is for responsible students who are interested in writing for this journal or running social media to promote the journal. The team will work with a teacher who will serve as managing editor and also faculty member in charge of the project. The group will learn about writing, editing, and PR while producing the online literary magazine. You can also expect to learn more about free speech and social justice while working with writers who are under threat in their home countries. Weekly meetings on campus will focus on learning about the context for the work, learning good practices for professional writing, editing, and PR, reading work by writers in exile, and workshopping your articles for publication. Interviews for articles will be in-person or via Skype. Expect to spend 10-12 hours a week working on this project. You will also need to attend class. A monthly meeting will be held at City of Asylum on the Northside (easily accessible by bus).

English Film Studies

ENGFLM 0355 - VISUAL LITERACY

Minimum Credits: 3
Maximum Credits: 3

This is an online course. Visual literacy is an emerging area of study which deals with the growing importance of visual culture in our contemporary world and how we interpret what is seen. This course will emphasize the process of critically viewing specific media artifacts and provide tools to students that will allow them to comprehend and evaluate information presented by a variety of forms of visual media, including television, video, film, photography, and the internet. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: DSAS Creative Work General Ed. Requirement, DSAS The Arts General Ed. Requirement, Film Studies, SCI Polymathic Contexts: Humanistic GE. Req.

ENGFLM 0400 - INTRODUCTION TO FILM

Minimum Credits: 3
Maximum Credits: 3

This is a basic course on the visual arts that offers the student abroad introduction to the medium of film. As part of this overview, the class will consider such issues as: the process of contemporary film production and distribution; the nature of basic film forms; selected approaches to film criticism; comparisons between film and the other media.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Attributes: DSAS The Arts General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

ENGFLM 0401 - IMAGES, ICONS, AND IDEAS

Minimum Credits: 3
Maximum Credits: 3

This course develops skills to interpret visual culture in contemporary life. Using a wide variety of media, including film, television, advertisements, fashion magazines, museum exhibits, comic books, painting, graffiti, video games, the web, and photography, the course focuses on understanding how conceptions of visibility, gender, race, and politics shape definitions of high and low culture as well as questions of knowledge and being. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS The Arts General Ed. Requirement, Film Studies, SCI Polymathic Contexts: Humanistic GE. Req.

ENGFLM 0520 - FILM THEORY

Minimum Credits: 3

Maximum Credits: 3

This course is designed as a survey of film theory as a historical practice. Film Theory gives students both a firm grasp on the major topics of film theory from its origins to new media, and an understanding of how those theories developed in relation to their historical contexts. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies, Writing Intensive Course (WRIT)

ENGFLM 0530 - FILM ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to the art of the cinema, and to the techniques for its formal and iconographic analysis. It examines the nature of shot composition and visual framing, the use of color, the role of lighting as a pictorial element, the potentials of camera movement, the modes of editing and the nature of image/sound montage. It also introduces students to dominant cinema forms--narrative, experimental, documentary, etc.--And connects the cinema to visual arts (like painting and sculpture).

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Children's Literature, DSAS The Arts General Ed. Requirement, Film Studies, SCI Polymathic Contexts: Humanistic GE. Req.

ENGFLM 0532 - INTRODUCTION TO FILM GENRES

Minimum Credits: 3

Maximum Credits: 3

This course surveys major film genres, which may include Westerns, musicals, horror, film noir, screwball comedy, etc. We will trace the history of film genres from the studio era to the present, including European transformations. The course seeks to relate film genres to the culture that created them. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*
Course Attributes: Film Studies, Writing Intensive Course (WRIT)

ENGFLM 0540 - WORLD FILM HISTORY

Minimum Credits: 3

Maximum Credits: 3

This course both introduces students to techniques of film analysis and acquaints them with major works and movements in international cinema. The course pays particular attention to the evolution of film narrative and visual style through landmarks in film development--European avant-garde films, British documentary, Italian neo-realism, etc. This is a Critical Studies course and is a required course for the Film and Media Studies major and minor.

Academic Career: Undergraduate

ENGFLM 0570 - INTRODUCTION TO NEW MEDIA

Minimum Credits: 3

Maximum Credits: 3

In this course we will look at how new media -- ranging from television, computers, digital image production, video games, to social media platforms and smart phones -- have begun to supplant the social and cultural prominence of film and other traditional media. We'll look at how these media work: at the history and theory of their development, at the changes they have brought about in a broader media culture, and at their social status and significance (e.g., The place they occupy in culture, the kinds of interactions they make possible). This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Attributes: DSAS The Arts General Ed. Requirement, Film Studies, SCI Polymathic Contexts: Humanistic GE. Req.

ENGFLM 0585 - TECHNOLOGIES OF THE BODY

Minimum Credits: 3

Maximum Credits: 3

This course considers how we learn new technologies by looking at the treatment of the body in cinema and television, as well as animation, sports, gaming, and VR. In addition to analyzing media examples, students will experiment with low-tech and high-tech adaptations of optical toys and smart phone cinema to explore how movement and the body have been imagined in science and entertainment. This is a Critical Studies course with Production elements and counts for Category III towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Creative Work General Ed. Requirement, DSAS Diversity General Ed. Requirement, Film Studies, SCI Diversity General Ed. Requirements, SCI Polymathic Contexts: Humanistic GE. Req.

ENGFLM 0590 - FILMMAKING: PRODUCTION AND CRITICISM

Minimum Credits: 3

Maximum Credits: 3

This course introduces filmmaking practices as related to cinematic expression, aesthetics, criticism, and ethics. Working in groups, students will produce short film projects. All aspects of production are viewed as a creative extension and continuation of the film writing, directing, and producing process. Through lectures and a range of readings, the class will explore craft, aesthetic, production and storytelling issues. This is an introductory Production course and counts for Category III towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Creative Work General Ed. Requirement, Film Studies, SCI Polymathic Contexts: Humanistic GE. Req.

ENGFLM 0712 - CRITICAL MAKING

Minimum Credits: 3

Maximum Credits: 3

The Maker movement is an emerging social and media form that is at once highly networked and post-digital. Making is situated at the intersection of social media, the online gift economy, and a participatory, interventionist engagement with one's physical environment. Drawing on open source ideals and innovation structures -the free sharing of code to enable collaborative development - making has become an attempt to democratize material culture through networked access to tools. MakerSpaces and MakerHubs have become critical nodes in efforts to materialize the virtual gift economy of the Internet. In this course we will engage the intellectual and practical roots of this new medial and social form and engage in our own critical making projects, utilizing scanning, modeling, and 3D printing technologies. We will begin by looking at the history and philosophy of open source software development, and then the political, social, cultural, and technological developments that have together given rise to critical maker culture. We will then learn some of the basic tools of scanning, modeling, and 3D printing. After initial modeling and printing assignments, students will form groups and develop collaborative final projects that involve materializing complex conceptual relationships from a topic of your choice and in a medium of your choice. The aim of this course is to "close the circuit" between creative conceptual production, social networking, and materialized object relationships. Critical making is about critically engaging and creatively remaking the world around us. By the end of the semester, you will become a critical maker! This is a Critical Studies course with Production elements and counts for Category III towards the Film and Media Studies major and minor.

Course Attributes: DSAS Creative Work General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req., Writing Intensive Course (WRIT)

ENGFLM 0812 - MEDIA/ECOLOGY

Minimum Credits: 3

Maximum Credits: 3

From the late twentieth century to the present, ecology as a scientific discipline and set of cultural narratives has risen to the forefront of knowledge production as a way to study and understand complex biological systems, their environments, and their internal dynamics. During the same period, media systems have grown exponentially in complexity until they too have begun to exhibit some of the behaviors of ecological systems, including self-organization, feedback, evolution, and emergent properties. The term "media ecology" captures both this new, nonlinear systems approach to understanding media itself as well as the intersection between natural ecosystems and the technological assemblages with which they are intertwined. This course will explore both media that interface with natural ecosystems and works that engage contemporary media systems at different scales. The secret life of

information, contagious media, and the post-natural ecologies of our present and future will challenge us to conceive of Media and Ecology as a single coupled system: the emblem of our contemporary environment. Students will have the option to produce collaborative media projects that explore the themes of the course. These can take the form of simulations, games, network graphing, film or video projects, local ecosystem analysis and/or visualization, or the mapping and analysis of a media ecosystem that interfaces with the environment. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

ENGFLM 1190 - BRITISH FILM

Minimum Credits: 3

Maximum Credits: 3

This course explores the status of British film as a national cinema. It examines the forms and styles indigenous to British cinema; the relationship of British cinema to British social reality; the changes in film language, production and forms as they relate to the development of British cinema. This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies

ENGFLM 1226 - EASTERN EUROPEAN COMMUNISM AT THE MOVIES

Minimum Credits: 3

Maximum Credits: 3

After the 1917 revolution in Russia, Lenin famously said: "to us film is the most important of all the arts." Communists were to use cinema for propaganda purposes, in order to carry out massive state-wide campaigns aiming to bring radical social change. However, Soviet avant-garde filmmakers were also concerned with revolutionizing filmmaking itself. Some three decades after Lenin's remarks, the leaders of the countries of Eastern Europe which had become "Soviet satellites" after World War II, attempted to use censorship and control over the arts and cinema to produce effective propaganda for their own political campaigns. Writers, artists, and filmmakers were coveted allies of these new communist regimes that came to power in the 1940s. Again, however, filmmakers and actors did not always toe the Party line. Some were able to use film to craft complex works with subtle messages portraying aspects of daily life as it was experienced by ordinary people under the new regimes. Films that we will watch and analyze, released in Hungary, Romania, Yugoslavia, Poland, and Czechoslovakia in the decades before the fall of communism in 1989

managed to depict, evoke, and criticize "really existing communism." This course will trace the history of East European communism and of East European film-making from 1944 to 1990, acquainting students with examples from an exceptional body of cinematographic work together with the broad outlines of East European history. Students will learn to "read" films from 20th century Eastern Europe in their cultural, political, and historical context. This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor.

ENGFLM 1290 - AMERICAN FILM 1

Minimum Credits: 3

Maximum Credits: 3

This course explores the development of American film from 1895 to 1939. Though the course will emphasize the evolution of American film style and genre, attention will also be paid to the history of the American film industry, and the relationship between Hollywood cinema and the broader cultural context of American society. The course will provide the student with the historical and aesthetic background with which to better appreciate the American cinema of today and yesterday. This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

ENGFLM 1460 - GLOBAL STARDOM AND CELEBRITY

Minimum Credits: 3

Maximum Credits: 3

This course will introduce students to the analysis of the "star text" of individual stars/celebrities, which involves the interrelationship of screen-mediated roles, off-screen appearances and information, publicity material, and cultural context. Students will research a specific star/celebrity as a nexus of global circulation and fandom, while addressing some core methodological questions: what is the difference between star biography and star analysis? How do we read the "star/celebrity text" in different local contexts and ideas about the public and the private? How does stardom presume and shape norms of identity pertaining to gender, sexuality, social class, race/ethnicity, bodily norms, and other cultural values? This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies, Undergraduate Research

ENGFLM 1470 - FILM DIRECTORS

Minimum Credits: 3

Maximum Credits: 3

This is a course that changes topics every term; please see the Topic title and/or Class Notes for the specific director. This course looks at the mode of production of films and works to understand the interweaving contributions of directors, producers and screenwriters. It will also consider less personal forces--social climate, studio style, genre and audience taste. It examines the films of particular directors for signs of personal style, theme, or personal preoccupation. This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies

ENGFLM 1471 - ORSON WELLES

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the screen career of Orson Welles. In considering his films, the course explores the evolution of Welles' cinematic style; the thematic concerns of his work; the ideological implications of his fictional universe; and his contribution to the development of American narrative cinema. This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies

ENGFLM 1472 - HITCHCOCK'S FILMS

Minimum Credits: 3

Maximum Credits: 3

This course will look at the development of Hitchcock's cinema as a way of touching upon issues central to the study of film as a cultural force; the relationship between art and entertainment; the social origins of suspense and fear; the role of the director in creating a film's meaning; the role and function of genre and cross-generic influence. We will closely look at films from all phases of Hitchcock's career and examine what their style, tone, and subject matter reveal about the powers of cinema and Hitchcock's influence on a new generation of directors. This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: Film Studies, West European Studies, Writing Intensive Course (WRIT)

ENGFLM 1473 - SPIKE LEE

Minimum Credits: 3

Maximum Credits: 3

Spike Lee's films, videos, and TV work have been both provocative and groundbreaking, challenging the structures of American filmmaking at the level of production, reception, and film style. Including feature films, documentaries, music videos, and mini-series, his work has a diversity that discourages the restrictive labels of African-American director or independent director. This course will cover most of this body of work in terms of Lee's cinematic style and cultural concerns, and also in terms of the cultural debates his work has triggered or participated in. By the very nature of these films, a Spike Lee course has to engage with much more than directorial style and vision alone, and will thus also be an opportunity to consider various approaches to the study of film. This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies

ENGFLM 1475 - GUILLERMO DEL TORO

Minimum Credits: 3

Maximum Credits: 3

This course aims to discover the extent to which Guillermo del Toro's films and other media texts are unified in style and theme in order to explore auteurism, transnational critical approaches, genre theory, transformations across media forms and exhibition spaces (from SVOD to theatrical distribution to museum installations), adaptation studies, and horror studies, in particular. Guillermo del Toro is commonly identified with two other contemporary Mexican directors achieving international success (Alejandro Gonzalez Inarritu and Alfonso Cuarón), but his production of genre films and revisionist genre films, and the intertextuality of his works present an excellent case study of the uses and limitations of an auteurist approach. Thus, the course will examine films, television shows, video games and their intertexts and in relation to del Toro's body of work and Latin American, transnational and global contexts. This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor. It will also be submitted for consideration for the Latin American Studies Certificate, the Children's Literature Certificate, and the future Horror Studies Certificate.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

ENGFLM 1476 - THE FILMS OF STANLEY KUBRICK

Minimum Credits: 3

Maximum Credits: 3

This course aims to discover the extent to which Kubrick's films are unified in style and theme. We will explore their sources in other films, reputed novels and short stories. Special attention will be paid to themes commonly found in Kubrick; a satirical view of society, the links between violence and sexuality, etc. This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies

ENGFLM 1479 - CHILDREN AND MEDIA

Minimum Credits: 3

Maximum Credits: 3

This course examines contemporary children's media from social, cultural, and historical perspectives, with a focus on media in the United States produced by and for children ages 0-13. Video games, the internet, and emerging digital and portable technologies for communicating and consuming media are often tailored specifically to children, who, as "digital natives," are increasingly early adopters of new technologies. This course asks how children's media fits into contemporary debates about children's role in families, schooling, and the public sphere. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

ENGFLM 1480 - TOPICS IN FILM

Minimum Credits: 3

Maximum Credits: 3

This is a course that changes topics every term; please see the Topic title and/or Class Notes for the specific focus. Explores selected issues in the production, reception, themes, or theory of film. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies

ENGFLM 1481 - TEEN FILM

Minimum Credits: 3

Maximum Credits: 3

This course will look at a type of film that has been prominent in Hollywood and international cinema since 1955: the youth film or teen film or teenpic. The teenpic has been variously defined as films targeted at a teenage market and as films about teenagers (and sometimes both). In considering the teenpic as a genre, we will attempt to break it down into subgenres such as the juvenile delinquent film, the teen musical, the teen horror film, nostalgic teen films, postmodern youth cult films, African American teen films, "girl" teenpics, and LGBTQIA+ teenpics. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Attributes: Film Studies

ENGFLM 1482 - THE STAR SYSTEM AND THE MOVIES

Minimum Credits: 3

Maximum Credits: 3

This course will deal with all aspects of the phenomenon of stardom in film: the production of stars, film acting, and fandom. This is not a course on any particular star, but we will use case studies of individual stars for our weekly focus. We will draw on film examples from the old Hollywood studio system as well as from post-studio films and popular culture. A particular emphasis of the course will be gendered differences between star images. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: Film Studies, Undergraduate Research, Writing Intensive Course (WRIT)

ENGFLM 1483 - FILM SOUND

Minimum Credits: 3

Maximum Credits: 3

In this course, we will shift the way we think about films and learn to listen to films, using the language and tools of audio analysis to analyze the aural environment produced by films. Topics include the history of film sound, the relation of sound and image, aural and visual pleasures, sound and narrative meaning, soundscapes and theories of shock and modernity, the aesthetics of analog and digital sound in cinema, the 'realism' of recorded sound, film sound and space, sound in documentary cinema, and culturally specific theories of sound. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS The Arts General Ed. Requirement, Film Studies, SCI Polymathic Contexts: Humanistic GE. Req.

ENGFLM 1485 - FILM AND POLITICS

Minimum Credits: 3

Maximum Credits: 3

This course examines film production, economics and forms of representation as reflections of political attitudes. We will study a variety of narrative and non-fiction films which reveal differing political points of view, ranging from those that legitimize the dominant culture to those which criticize, if not challenge, dominant attitudes. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

ENGFLM 1487 - FILM CENSORSHIP AND AMERICAN CULTURE

Minimum Credits: 3

Maximum Credits: 3

This course considers some of the most important censorship battles in American history. As the first mass medium to pose a serious threat to the cultural hegemony of the genteel middle class, the movies initiated both a debate about the place of media in our society and a series of struggles over the control of commercialized leisure. This course seeks a deeper appreciation of the complexities of contemporary media politics through an engagement with the history of motion picture regulation. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Historical Analysis General Ed. Requirement, Film Studies, SCI Polymathic Contexts: Soc/Behav. GE. Req., Undergraduate Research

ENGFLM 1489 - CULT FILM

Minimum Credits: 3

Maximum Credits: 3

This course will interrogate the criteria by which a film is identified as cult. A cult movie is not made; a film only becomes cult through the consumption patterns of an audience. This course explores how the nature of cult viewership shifted in response to technological innovation: at first VCRs, then DVDs, and now the internet. This course also looks to how cult has shifted now that unavailable films or banned films are increasingly accessible due to shifts in new media and the dominance of internet commerce (international shopping, eBay, bootlegs, downloads). This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

ENGFLM 1490 - POLITICAL MEDIA: FILM AND POWER IN THE 20TH CENTURY

Minimum Credits: 3

Maximum Credits: 3

This is a study abroad course taught at the Pittsburgh-London Film Program. This class examines the way media has been constructed and used by elite institutions to advance broad and specific goals for the management of populations and the establishment of political and economic conditions beneficial to those institutions. It also looks at the use of media by progressive and radical groups to challenge those conditions and institutions, beginning in the early twentieth century and expanding in the era of digital media. It includes particular focus on cinema and imperialism, making use of the resources in London and online at the Colonial Film Project. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Historical Analysis General Ed. Requirement, SCI Polymathic Contexts: Soc/Behav. GE. Req.

ENGFLM 1493 - CITY MADE STRANGE: LONDON ON SCREEN IN HORROR AND SCIENCE FICTION CINEMA

Minimum Credits: 3

Maximum Credits: 3

This is a study abroad course taught at the Pittsburgh-London Film Program. This course aims to explore the deep funds of strangeness and otherness that permeate London's places and spaces, through examining films and television series that show the city as a brimming reservoir of past and future shocks. The course will examine science fiction, horror and noir/neo-gothic cinema and television from all eras, with a particular emphasis on works that take London itself as a major part of their story. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Geographic Region General Ed. Requirement, DSAS The Arts General Ed. Requirement, Film Studies, SCI Polymathic Contexts: Humanistic GE. Req.

ENGFLM 1495 - CITY SYMPHONY

Minimum Credits: 3

Maximum Credits: 3

This is a study abroad course taught at the Pittsburgh-London Film Program. The city has been an integral part of the filmmaker's vocabulary since cinema's genesis in the late nineteenth century. The urban environment and the craft of film grew up together in the twentieth century, seasoned by various convergences of technology, one notable one in the 1920s and another over the last fifteen years. This course bridges these two periods, drawing on history and theory to interrogate the form of the city symphony film essay, and develop an urban filmmaking practice that allows students to gather and formulate their own reflections on London. The course is made up of two strands, City Symphony and Urban Scavenger, taught by the same team in double sessions. Students will be strongly encouraged to bring ideas from one to the other, and to combine critical analysis with practical filmmaking. This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies

ENGFLM 1497 - URBAN SCAVENGING

Minimum Credits: 3

Maximum Credits: 3

This is a study abroad course taught at the Pittsburgh-London Film Program. This course will give students a critical look at the writing, development, and production of film in the 21st century. Using case studies and examples from the masters of filmmaking in both the United States and the United Kingdom, students will gain in-sight into the nature of production, the economics of making a film, and the potential avenues through which film can be distributed to an audience. This is a Critical Studies course with Production elements and counts for Category III towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Creative Work General Ed. Requirement, Film Studies, SCI Polymathic Contexts: Humanistic GE. Req., Undergraduate Research

ENGFLM 1499 - INDUSTRY INSIDER: FROM SHOWRUNNER TO FINAL CUT

Minimum Credits: 3

Maximum Credits: 3

This is a study abroad course taught at the Pittsburgh-London Film Program. This course will give students the opportunity to learn about screenwriting from a professional screenwriter and producer. The scope of the course will take students through the process of writing for screen based on the very simple stages of concept, story, outline, draft, and the revision and development process. Students will also learn about the pitch process and be given opportunities to practice the pitch based on their own individual stories. This is a Production course and counts for Category III towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies

ENGFLM 1533 - DISABILITY IN FILM AND TELEVISION

Minimum Credits: 3

Maximum Credits: 3

This course explores disability in media through representational tropes and trends as well as how political activism has focused on mainstream media as a site for protest, a site for education, and a site for self expression. We will explore trends in film and television while engaging with the important roles of social media and online communities. This is a Critical Studies course and counts for Category II for the Film and Media Studies major and minor. It (will be) part of the Disability Studies Certificate.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

ENGFLM 1534 - GIANT MONSTERS AND KAIJU FILMS

Minimum Credits: 3

Maximum Credits: 3

"Giant Monsters and Kaiju Films" explores a wide range of issues relevant to the use of the giant monster as a staple of science fiction and horror films, and the giant monster movie (or kaiju film) as its own genre. Such issues include: the origins of the genre; various cultural critics' and historians' responses to it; the intersections between kaiju narratives, audiences, and the cultural and historical contexts that produce them; the form and structures of the genre itself; the international distribution and influence of kaiju films and their transformations across audiences; the central roles of special effects, spectacle, and fantasies of disaster and destruction in creating meaning in the films. The course will also use the giant monster to examine how the concept of genre works to shape the kinds of entertainment we enjoy and to influence how we interpret and understand popular texts, as well as how the changing representations of iconic popular culture figures such as Godzilla and King Kong have intersected or reflected larger concerns in the history of global cinema. This critical studies course is a Category II elective in the Film and Media studies major and minor.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

ENGFLM 1545 - THE AMERICAN FILM AND TELEVISION HISTORY

Minimum Credits: 3

Maximum Credits: 3

This American Film and Television Industry course is designed to demystify the film and television business, and give students a sense of the process and structures in which films and television shows are made and brought to market. They will explore the roles of the key personnel on a movie or television show from conception to completion including cinematographers, editors, writers, producers and directors. They will also examine the roles of agents, managers, lawyers and executives and learn how decisions are made from greenlight to distribution. Students will learn about the history of the entertainment industry from the studio system to present day and consider the disruptions of the

films business today in that context. In order to truly understand this industry, students will read first-hand accounts of life in the industry and watch documentaries and narrative films that shed light on the film business. They will read texts that give overviews of how the industry works, its history, and how it has changed. Students will do their own research on various aspects of entertainment from production to distribution, and work in groups to present this research to the class. They will also be asked about how modes of production inform content. Guest speakers will speak to the class periodically to talk to their own experiences in the business. Ultimately, students will focus an area they are passionate about to complete a mid-term and a final project that will reflect their comprehensive knowledge of various aspects of the American film industry.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

ENGFLM 1548 - AMERICAN INDEPENDENT FILM

Minimum Credits: 3

Maximum Credits: 3

This course examines the development in the U.S. of independently produced film as an art form, and the filmmaker as an artist, from World War II to the present with a consideration of exploitation film through to Miramax and how the industry changed once the independent companies were bought by the major conglomerates. This critical studies course counts for the Film and Media Studies major and minor as a Category 2 elective.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

ENGFLM 1549 - INDUSTRIES AND FESTIVALS

Minimum Credits: 3

Maximum Credits: 3

This Film and Media Studies Program topics course serves as an overview of film histories historically and today, and it will explore the crucial ways that film industries have shaped contemporary production, exhibition, and distribution practices. Within the course, there will be a specific emphasis on film festival as a crucial element in global cinema. Film industries, be they free market giants such as Hollywood or national industries funded in part or in whole by the state, are crucial factor in the ways that films are made and shown, influencing aesthetics, politics, and the cultures of filmmaking. Explorations of film industries have shown how distinct market forces, technologies, national politics, and globalization have affected all aspects of cinema. This course will examine these elements, focusing on the Classical Hollywood era, the 1970s New American Cinema, and contemporary transnational film industries. Moreover, the course will focus specifically on the role of film festivals in the film industry. Since the pre-WWII era, film festivals have played a crucial role in a myriad of industries and markets, developing alternatives to Hollywood, promoting national cinemas, legitimizing colonialism, advocating anti-colonialism, and imagining a space for art in the cinematic industry. The course will examine festival history, theory and methods, allowing students to learn about how festivals have impacted industry history and how festivals are produced and executed.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

ENGFLM 1585 - CINEMA AND REVOLUTION

Minimum Credits: 3

Maximum Credits: 3

This course investigates the relationship between Black power era, Black American cinema, and the third cinema movement, which are traditionally understood to be distinct movement/moments only loosely related through overlapping politics. In the course, our primary focus will be third world and Black American film making, and the

postcolonial, pan-national and militant theoretical texts and movements that influenced the directors. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

ENGFLM 1613 - TOPICS IN FILM GENRE AND THEME

Minimum Credits: 3

Maximum Credits: 3

This is a course that changes topics every term; please see the Topic title and/or Class Notes for the specific focus. This course seeks to provide a forum for new issues that might arise in the area of film genre and/or the thematic of film representation. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies

ENGFLM 1615 - THE WAR FILM

Minimum Credits: 3

Maximum Credits: 3

This course will consider stable and changing elements of the war film genre, while remaining attentive to specific cultural moments, beginning with World War I. Although the main emphasis of the course will be on the war film as genre, part of the semester will be devoted to documentary and non-fiction approaches to war in cinema. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Course Attributes: DSAS The Arts General Ed. Requirement, Film Studies, SCI Polymathic Contexts: Humanistic GE. Req.

ENGFLM 1670 - GLOBAL ANIME

Minimum Credits: 3

Maximum Credits: 3

This course introduces the arts, history, and culture of Japanese animation (anime) in a global context. We will focus on analyzing the forms and idioms of anime in relation to changing technological conditions and the media environment. Students are expected to relate the aesthetic and cultural characteristics of anime with their own experience of digital technologies, and to expand their interest in anime to wider theoretical questions about techno-culture and new media. This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies

ENGFLM 1671 - MAKING THE DOCUMENTARY

Minimum Credits: 3

Maximum Credits: 3

This is a production course in which students will research, define, and schedule their own projects. The class covers all stages of producing a documentary from the idea through development, preproduction, production and postproduction and will examine the fundamentals of the art of documentary making: artistic identity, point of view and storyteller, form and style, and light and sound etc. Students will develop and produce original documentary short film in a collaborative learning environment, working in small groups (of two or three students). They will write, develop, and shoot their own short documentary project (8 to 10 minutes). While those interested in writing or filmmaking will find practical uses for their skills in this course, students from all disciplines - writing, science, film studies, or general liberal arts - are welcomed, and will find benefit in the acquisition of skills for presenting, representing, and persuading via sound and image. No filmmaking experience is necessary. This is a Production course and counts for Category III towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Workshop

Grade Component: LG/SNC Elective Basis

ENGFLM 1672 - VISITING FILMMAKER: PRODUCTION AND CRITICISM

Minimum Credits: 3

Maximum Credits: 3

This course allows students to experience the full process of making a professional micro-budget feature, experimental, or documentary film. Students work on a visiting filmmaker's film from conception to final shooting, while learning about the different jobs/tasks/departments needed to realize a completed work. This is a Production course and counts for Category III towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Workshop

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies

ENGFLM 1680 - ANIMATION STUDIES

Minimum Credits: 3

Maximum Credits: 3

This course surveys the history of animation, both American and international. Providing an understanding of animation's history, technologies, and stylistic possibilities across national and international boundaries, the course will consider early animators through to contemporary uses of digital technologies with their fully realized characters inhabiting three-dimensional space. It will also have a thematic organization, focusing at times on specific techniques (e.g., cel animation) and styles (e.g., abstract). This is a Critical Studies course and counts for Category II towards the

Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SU3 Elective Basis

Course Attributes: Film Studies, SCI Polymathic Contexts: Humanistic GE. Req.

ENGFLM 1681 - FILM COMEDY

Minimum Credits: 3

Maximum Credits: 3

This course surveys film comedy from the silent period through the contemporary moment. It focuses on major comic performers and directors as well as on comic forms, traditions and their relation to politics. In addition the course considers a number of comedy subgenres, such as slapstick, romantic comedy, gross-out comedy, and the buddy film. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies

ENGFLM 1683 - KEEPING IT REAL: DOCUMENTARY FILM AND NONFICTION

Minimum Credits: 3

Maximum Credits: 3

This course explores the nature and impact of the non fiction film, its changing forms, strategies for movies, and claims to veracity and objectivity. It is concerned with identifying types of documentary, the "motives" of such films, their audience and the problems posed by "documenting reality." This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS The Arts General Ed. Requirement, Film Studies, Global Studies, SCI Polymathic Contexts: Humanistic GE. Req.

ENGFLM 1684 - MOCKUMENTARY: PRODUCTION AND CRITICISM

Minimum Credits: 3

Maximum Credits: 3

The mockumentary - a fictional film made to "look like" a documentary - became popularized as a term to describe a distinct genre in coverage of Rob Reiner's 1984 film This is Spinal Tap. Since then, the genre has evolved to treat a variety of subjects through a range of styles - including straightforward hoaxes, social parodies, and sharp criticisms of nonfictional form. In addition to readings, lectures and discussions, students in this class will produce short mockumentary projects. Previous production experience is not required. This is a Production course with Critical Studies elements and counts for Category III towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies

ENGFLM 1685 - FILM MUSICAL

Minimum Credits: 3

Maximum Credits: 3

This course studies the musical as an example of a popular art in the age of mass culture, looking at the aesthetics and history of this genre as it relates to the culture that produced it. We will be looking at musicals with the goal of analyzing and understanding our reactions, and those of the mass audience. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies

ENGFLM 1688 - FILM WESTERN

Minimum Credits: 3

Maximum Credits: 3

This course examines the meaning of the Western to a mass audience. More specifically we will explore the genre's popularity, the way it represents the past, the concept of the mythic hero, changes in the genre over time, and the contributions of specific directors. We will consider how the Western adapts to changing concepts of America. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies

ENGFLM 1694 - THE AUSTRALASIAN NIGHTMARE

Minimum Credits: 3

Maximum Credits: 3

This is a study abroad course taught at Pitt in Sydney. The classic American horror is derived from a gothic heritage, an inheritor of a European context and its tropes; the falling apart of civilization through wars, disease, economic collapse, and a deconstruction of society. The horror that the current, post 9/11 generation has produced is inherently different; it plays upon central themes that pull from an Australasian context, driven from the horror films of Australia, Japan, and Korea. These films have been made and distributed outside of an American context but then repackaged to the west in remakes and revisits that awaken an American audience to themes of horror that are decidedly non-European in identity. This course will examine these films, comparing and contrasting European and Australasian tropes for horror as well as their reflection and impact on society. This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Attributes: Film Studies, Study Abroad

ENGFLM 1695 - HORROR FILM

Minimum Credits: 3

Maximum Credits: 3

This course will investigate the key films and critical discussions surrounding the horror genre from its silent film beginnings to the present. We will use horror as a lens to ask wide-ranging questions about spectatorship, theory, history, aesthetics, and politics that have shaped and continue to transform film and media studies. This course examines horror subgenres, the ways that producers and directors have developed the genre, and the ways horror film exploits social attitudes and values to generate audience involvement. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies

ENGFLM 1696 - FILM NOIR

Minimum Credits: 3

Maximum Credits: 3

This course will explore film noir from its classical period 1941-1958 (e.g. Double Indemnity), to contemporary films considered to be 'neo-noir' since the 1970s (e.g. Taxi Driver, Blade Runner, Fight Club, Memento, etc.), and the international films described as 'global noir' from Japan, Hong Kong, Europe, and many other places throughout the world. We will look at these films and media objects from the perspective of film art and history, of their relationship to wider socio-cultural contexts, and of their exploration of gender and sexuality. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies

ENGFLM 1699 - SCIENCE FICTION FILM

Minimum Credits: 3

Maximum Credits: 3

This course examines the development of science fiction as a cinematic form, its relationship to genres such as horror and melodrama, its structure, images and style. We will trace linkages between the films and social, political, scientific and aesthetic attitudes within the culture. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies

ENGFLM 1703 - GENDER AND FILM

Minimum Credits: 3

Maximum Credits: 3

This course examines and questions aspects of gender and sexuality in international cinema. While the course considers the intersectional realities affecting masculinity and femininity on-screen, it will also consider who is behind the camera and ideas of "authentic" representation. Attention will also be paid to the social and historical context in which these films were made, in an attempt to understand the relationship between art and ideology. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: DSAS Diversity General Ed. Requirement, Film Studies, Gender, Sexuality & Women's St, SCI Diversity General Ed. Requirements, Writing Intensive Course (WRIT)

ENGFLM 1705 - QUEER CINEMAS

Minimum Credits: 3

Maximum Credits: 3

While sexuality in the cinema has been subjected to various ideological and regulatory constraints, the same has also been true of lived sexuality. Likewise, and despite appearances, the history of sexual representation in the media is just as dynamically diverse as the history of sexualities as lived in the twentieth and twenty-first centuries. This course is both a general introduction to queer theory-especially as it relates to visual culture-and an investigation into queer theory's impact on media history, media criticism, and/or film and video production. A portion of the course will be devoted to reevaluating the history of the dominant media's narrative representation and regulation of queer bodies and subjectivities. The course will also serve as a brief survey of contemporary LGBTQ media practices. Course screenings and readings are occasions for pleasure, as well as occasions to think through the implications and problems of different, queer, and deviant representational strategies.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

ENGFLM 1750 - CREATIVE PRODUCTION WORKSHOP

Minimum Credits: 3

Maximum Credits: 3

Creative Production Workshop is a projects-based course in which students will research, define, schedule, budget, and workshop their own independent projects. The primary goal of the course is to design and execute a self-directed, self-designed, creative project in a collaborative environment. This process can be broken down into a series of smaller goals, including: pre-production, treatment, pitching, project design, and peer workshoping. This is a Production course and counts for Category III towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Workshop

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies

ENGFLM 1752 - TELEVISION ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

This course studies television as a visual medium, an industry, and as a cultural force by examining the forms television programming takes and the way these structures influence viewer response. We will examine specific television genres from longstanding series types (sitcoms, cop shows, serials, etc.) to the gendered forms of "quality" television. This is a Critical Studies course with Production elements and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Attributes: Children's Literature, DSAS The Arts General Ed. Requirement, Film Studies, SCI Polymathic Contexts: Humanistic GE. Req., Writing Intensive Course (WRIT)

ENGFLM 1760 - CINEMA AND VIDEO GAMES

Minimum Credits: 3

Maximum Credits: 3

This course introduces a comparative study of cinema and video games, exploring their historical, cultural, aesthetic, technological and industrial intersections. Combining film screenings with game plays, we will try to understand how cinema and video games inform, influence and converge with each other. We will focus on race, gender, and ethical issues of visual representations in both cinema and video games. This is a Critical Studies course and counts for

Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies

ENGFLM 1790 - FILM AND LITERATURE

Minimum Credits: 3

Maximum Credits: 3

Cinema has enjoyed a close relationship with literature, borrowing from literary source texts and forms. Yet this relationship is not uncomplicated, nor is it unidirectional: the cinema offers new possibilities for novelistic source texts, poses interesting problems for literature's authors and readers alike and provokes a reconsideration of age-old debates of the divide between words and images. Thus this course examines film's convergence with, and divergence from, literary forms. Poised at the intersection of the study of film and the study of literature, it enables us to explore what is most unique -- and perhaps most interesting -- about each of the media as we consider their overlap. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: DSAS The Arts General Ed. Requirement, Film Studies, SCI Polymathic Contexts: Humanistic GE. Req., Writing Intensive Course (WRIT)

ENGFLM 1847 - CREW PRODUCTION PRACTICUM

Minimum Credits: 3

Maximum Credits: 3

In this course, students will take a professional project, consisting of one or several short films, through the process of production and postproduction. The preproduction development for these films will have been largely completed in a previous course. Students will be assigned to specific on-set and off-set roles necessary to complete production to a high level of excellence, including Directors, Editors, Line Producers, and members of the visual and sound crews. This course counts as a Technical Elective and a Category III elective in the Film and Media Studies Minor or Production Track.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: LG/SNC Elective Basis

ENGFLM 1901 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 6

The independent study option permits students to design courses of their own with approval of a department faculty member. Students are required to submit a proposal to a faculty member; usually, this faculty member is one that the student has worked with before and is comfortable with the subject matter of the study. Specific forms for requesting faculty approval are available in the department advising office. The forms require a description of the project, a list of the requirements and readings that the student and the faculty sponsor have agreed upon, the signature of the faculty sponsor, and the signature of the department adviser. A student must have earned at least 6 credits in film studies courses and the study proposed must not duplicate the content of regularly offered courses.

Academic Career: Undergraduate

Course Component: Independent Study
Grade Component: LG/SNC Elective Basis

ENGFLM 1904 - UTA IN FILM STUDIES

Minimum Credits: 1

Maximum Credits: 3

Undergraduate Teaching Assistants are arranged with individual faculty members and require special permission. A range of credit hours and grading options are available.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: LG/SNC Elective Basis

ENGFLM 1915 - PROFESSIONAL DEVELOPMENT IN FILM AND MEDIA STUDIES

Minimum Credits: 1

Maximum Credits: 1

This one-credit seminar invites Film and Media Studies majors to deepen and expand their understanding of professional life and options. Professional Development will allow students to explore the ways their academic work has prepared them for life after graduation, allow them to identify next steps in their career planning, and help them learn about practical aspects of professional life. They will have the opportunity to work on crucial career documents and an online portfolio.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Satisfactory/No Credit

ENGFLM 1920 - ADVANCED SEMINAR IN FILM STUDIES

Minimum Credits: 3

Maximum Credits: 3

This course is designed for Film and Media Studies majors and can be taken only when all other major requirements are satisfied. It will focus on issues of film history (either as an historical survey or through an examination of particular themes and/or problems that have arisen in the critical literature). The class will be organized as a seminar, and will involve considerable writing and/or class presentation on the part of students. This Category II course is a required capstone in the Critical Studies track of the Film and Media Studies major.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: Capstone Course, Film Studies, Global Studies, Writing Intensive Course (WRIT)

ENGFLM 1930 - INTERNSHIP IN FILM

Minimum Credits: 1

Maximum Credits: 3

Internships can be taken for credit with special permission from the Internship Coordinator in Film and Media Studies. One internship can count for Category III towards the Film and Media Studies major and minor.

English Literature

ENGLIT 0140 - HISTORY OF THE BOOK: ENGLISH LITERATURE CROSSLIST

Minimum Credits: 3
Maximum Credits: 3
This course examines European book history in global context, from clay tablets through the age of print. Focusing primarily on the medieval and early modern periods, it considers the history of the book from several perspectives: as a story of technologies, both manual (papermaking, printing) and intellectual (literacy, memory), as a story of artistic and cultural forms, as a story of reading, and as a story of global networks. We will consider issues including forgery; censorship; the role of political, religious, and economic forces in the production of books; the development of trust in the written word; the history of libraries; and the formation of reading communities.
Academic Career: Undergraduate

Course Component: Seminar
Grade Component: Letter Grade

ENGLIT 0300 - INTRODUCTION TO LITERATURE

Minimum Credits: 3

Maximum Credits: 3

This course examines the definitions, functions, and values of literature by reading across a range of genres, styles, historical periods, and cultures. It will also introduce various reading strategies for making sense of plays, poems, novels, short stories, and essays.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) or (ENGR 0012 or 0712 or 0715 or 0716 or 0718)

Course Attributes: DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req., Writing Intensive Course (WRIT)

ENGLIT 0310 - THE DRAMATIC IMAGINATION

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to the major dramatic forms and compares the ways playwrights from several centuries use ideas, characters and dramatic techniques. We will consider how social, historical, and dramatic contexts influence our interpretations and evaluation, or may lead to alternative understandings of a play.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) or (ENGR 0012 or 0712 or 0715 or 0716 or 0718)

Course Attributes: DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req., Writing Intensive Course (WRIT)

ENGLIT 0315 - READING POETRY

Minimum Credits: 3

Maximum Credits: 3

Poetry is usually the first literary form to evolve in a culture. Yet many today reject it as artificial, overly refined and removed from ordinary human experience. By studying various kinds of poetry, this course aims to help students break down the barriers between classic poems, contemporary poetry, and a more general lyric impulse. As the most highly condensed literary experience, poetry invites very close reading, so we will explore various techniques for making sense of poems.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) or (ENGR 0012 or 0712 or 0715 or 0716 or 0718)

Course Attributes: DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req., Writing Intensive Course (WRIT)

ENGLIT 0318 - WRITING IN PARIS

Minimum Credits: 3

Maximum Credits: 3

Students will study the American writers who lived in Paris during the 1920s "the lost generation" and the ways they were influenced by Paris and its culture.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

ENGLIT 0321 - ESSAYS AND MEMOIRS

Minimum Credits: 3

Maximum Credits: 3

This course examines different uses of prose narrative in both fiction and non-fiction. Texts include memoir, essay, novels, short stories, travelogue, and biography.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) or (ENGR 0012 or 0712 or 0715 or 0716 or 0718)

Course Attributes: DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req., Writing Intensive Course (WRIT)

ENGLIT 0325 - THE SHORT STORY

Minimum Credits: 3

Maximum Credits: 3

This course studies short stories that explore a variety of themes. It seeks to define the short story as a specific literary genre and to distinguish it from earlier forms of short narrative literature. It then goes on to examine the effects of literary, cultural and historical traditions on these stories and their reception.

Academic Career: Undergraduate

Course Component: Seminar

ENGLIT 0333 - PARIS THROUGH THE AGES

Minimum Credits: 3

Maximum Credits: 3

The readings will introduce students to French writers who were influenced by Paris and who influenced the city and its intellectuals, from the Middle Ages through the twentieth century. This study abroad course includes excursions through the streets and museums of Paris. Taught in English.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

ENGLIT 0354 - WORDS AND IMAGES

Minimum Credits: 3

Maximum Credits: 3

This interdisciplinary course explores the relationships between language and the diverse kinds of images that often accompany it (film, video, photography, book illustration, painting, etc.). The goal is to study the parallels and differences between images and words (as systems of communication) and to understand how they can productively interrelate within creative works such as literature, films, videos, and photographic studies.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006) or (ENGR 0012 or 0712 or 0715 or 0716 or 0718)

Course Attributes: DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req., Writing Intensive Course (WRIT)

ENGLIT 0365 - IMAGINING SOCIAL JUSTICE

Minimum Credits: 3

Maximum Credits: 3

This course questions the relationship between present and/or "contemporary" literature and past literary traditions. It is not a course solely in contemporary literature but a course that compares contemporary texts with texts from other periods. It investigates the contemporary as both a complex reworking of past narratives and traditions and as the production of the experimental and the new.

ENGLIT 0367 - CRIME STORIES: COURTROOM DRAMAS & PSYCHOLOGICAL THRILLERS

Minimum Credits: 3

Maximum Credits: 3

This course will examine literary representations of the law, legal issues, punishment, and legal ethics, using works that range from, "Twelve Angry Men" to "Soul on Ice" to "The Indian Lawyer."

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

ENGLIT 0375 - INTRODUCTION TO OPERA

Minimum Credits: 3

Maximum Credits: 3

This course, offered jointly in collaboration with the artistic and educational staff of Pittsburgh opera, provides an interdisciplinary introduction to the multimodal and synthetic art form of opera. Over the course of the semester, we will explore the essential literary, musical, and dramatic elements that have shaped the development of opera throughout the past four-hundred years. We will study a variety of historically significant operatic works, each representing a different style in the evolution of this art form. Every semester, the class as a whole will also attend two current opera productions staged by Pittsburgh opera.

Academic Career: Undergraduate

ENGLIT 0380 - SLOVAK TRANSATLANTIC CULTURES

Minimum Credits: 3

Maximum Credits: 3

Slovak European history and the interaction of Slovak and American cultures during the 120-year history of Slovak immigration is conveyed through readings in Slovak and Slovak-American literature, and through issues in literary theory that concern this theme. The course is structured around the history of Slovak, and in a broader cultural sense central European immigration to the U.S. With a special focus on Pittsburgh. Students are encouraged to investigate Pittsburgh's rich ethnic heritage and to research and write on topics tailored to individual interests.

ENGLIT 0505 - HOW TO DO THINGS WITH LITERATURE 1

Minimum Credits: 3

Maximum Credits: 3

We explore the historical, generic, and transnational range of literature in English as an object and field of study. A variety of lecturers introduce the concepts of periods and "key moments".

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

ENGLIT 0506 - LITERARY FIELD STUDIES

Minimum Credits: 3

Maximum Credits: 3

In this course, students will learn about and practice the various activities central to literary studies. Students will learn how to frame interesting critical inquiries and conduct original research, which could include historical research or contemporary cultural study. Students will engage with books as historical objects, which will include learning about the history of books and other print media and studying the ways that material factors shape writers' work. This could include visiting the library's Special Collections and/or a creative project around bookmaking. Students will engage in a variety of interpretive practices, including taking creative and inventive approaches to critical work and adapting texts for new purposes. Students will attend live performances and readings by diverse contemporary writers, gaining insight into the process of how great literature is made. Students will have the opportunity to find new intersections between literature and other disciplines. Finally, students will be invited to approach a range of writing projects as active makers, attending carefully to the formal elements of their own writing as well as that of others.

ENGLIT 0512 - NARRATIVE AND TECHNOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course explores the ways in which new technologies impact how we engage with stories. It examines the relationship between traditional literary forms and contemporary media, such as hypertext, web logs, fan fiction, video games, comics, and interactive fiction. As a writing-intensive course, "Narrative and Technology" will ask students to write regularly in response to course texts and class discussions. Students will have opportunities not only to write critically about the relationships among narratives and technologies but also to write creatively, experimenting with interactive, hypermedia, and/or other new media forms.

ENGLIT 0601 - PROTESTS, POLITICS, AND BLACK LYRICAL TRADITIONS

Minimum Credits: 3

Maximum Credits: 3

Black poetic traditions span print, the spoken word, song lyrics, especially, the Blues, and rap. This course considers the history of Black lyrical traditions in the context of various moments of protest and various political movements. The course examines the mutual influences of Black music-sound, rhythm, voice, and orchestration-and Black poetry-verse, spoken word, and song and rap lyrics. Extending the analytical practice of "close reading," this course asks students to also engage in practices of "close listening" to the Blues and rap as well as to the sounds of the written word. Practicing these together, students will gain an intricate understanding of the mutual influences between sonic and print forms of Black lyrical traditions. Additionally, this course will examine the role that Black lyrical traditions play in the cultural movements that address anti-Black racism in American culture.

Course Attributes: DSAS Literature General Ed. Requirement, Global Studies, SCI Polymathic Contexts: Humanistic GE. Req., Writing Intensive Course (WRIT)

ENGLIT 0612 - LITERATURE AND SCIENCE

Minimum Credits: 3

Maximum Credits: 3

This course aims to restore and improve the dialogue between scientific and critical-humanistic ways of understanding the world. It examines the share both ways of knowing have had in shaping our culture and our ideas by studying (and developing critical perspectives on) both scientific and literary texts. Its goal is to produce an understanding of the common history of literature and science. The course usually focuses on a theme, issue, or topic that has historical

range and contemporary relevance. Different versions of the course might focus on social, literary, and scientific understandings of gender; the social, literary, and scientific attitudes toward death and the dead; or the social, literary, and scientific definitions and theories about the "human." Though works of science fiction may be studied, this is not a course in science fiction. This course should be of particular interest to students in the sciences, students of literature, students of philosophy, and students of history.

ENGLIT 0616 - EXILES, NOMADS, AND MIGRANTS

Minimum Credits: 3

Maximum Credits: 3

The course reads various reflections on the immigrant's experience of separation or exile, the problems of encountering a new society, and the processes of acculturation.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Literature General Ed. Requirement, Global Studies, SCI Polymathic Contexts: Humanistic GE. Req., Urban Studies

ENGLIT 0617 - CHANGING FAMILIES

Minimum Credits: 3

Maximum Credits: 3

This course will explore varying literary representations of unconventional families including families made by adoption, foster families resulting from migration, multiracial families, and families involving gay, lesbian, or transgender parents or children. Considering different points of view, it will examine plots involving search for family, search for identity, construction of family, loss, conflict, poverty, prejudice, and reconciliation. The course will explore how these works portray and relate to changing attitudes toward childhood, parenthood, heredity, nurture, race, class, nation, and sexuality. As a literature course, it will train students in close reading and critical analyses of texts.

Course Attributes: DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

ENGLIT 0619 - THE LITERATURE OF THE GREAT WAR

Minimum Credits: 3

Maximum Credits: 3

This course focuses solely upon the literature that most poignantly depicts the experiences and perspectives of the soldiers who fought on the battlefields of World War I and the civilians who suffered its destruction. It will allow students to explore the most significant memoirs, poetry, and works of fiction that emerged from the ravaged battlefields of the western front and the ravaged homes destroyed by what some called "war to end all wars".

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Letter Grade

ENGLIT 0620 - THE GRAPHIC NOVEL

Minimum Credits: 3

Maximum Credits: 3

This course examines how graphic novels use the comics medium to tell stories, convey information, and create meaning. We will read a range of authors and artists, considering works in their historical, cultural, and literary contexts. We will study various approaches to comics and graphic novels, developing and applying a critical vocabulary and tools for the analysis of the medium. We will pay particular attention to how individual texts use the comics form, represent various genres, and demonstrate stylistic innovations.

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

ENGLIT 0621 - AFRICAN-AMERICAN LITERATURE

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to key literary texts and critical debates crucial to African American Literary Studies. By reading novels, short stories, and essays, we will work towards an understanding of key themes, conceptual frameworks, and critical terms and who they have developed in relationship to historical and cultural transformations. Beginning with works from the 19th century, charting changes in the topics and issues resulting from major historical events and movements (including civil rights movements and social revolutions), and moving towards more recent texts and conversations, students will develop foundational knowledge concerning the study of African American Literature.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

ENGLIT 0648 - NARRATIVE AND GRAPHIC PERSPECTIVES IN HEALTH HUMANITIES

Minimum Credits: 3

Maximum Credits: 3

This course emphasizes the narrating and understanding of difference as central to the education of those engaged in/with the healthcare field. Students will examine how narratives of neuro-diversity; gender barriers; racial inequities in education and health services, are all crucial issues for providers and receivers of medical care. By studying literature about medicine/the health professions from diverse perspectives, students in the course will learn to "observe, parse, appreciate, critique, and creatively reimagine points of contact between individuals in healthcare sphere." Through a series of readings including Paul Kalanithi's *When Breath Becomes Air*; and a mixed-media biography such as Lauren Redniss's *Radioactive*; Damon Tweedy's *Black Man in a White Coat*; Danielle Ofri's *What Patients Say, What Doctors Hear*; and the *Graphic Medicine Manifesto*, this course will introduce students to an exciting new field that erases the boundaries between authoritative "medical discourse" and what is commonly assumed to be a non-serious genre, graphic novel/comics; between physicians and patients' modes of accessing information and exchanging knowledge; between academic "essays" and Critical Creative Work that engages rigorously with knowledge and experience. Through this series of readings, students will consider issues such as: What kind of health practitioner do you wish to be? What models exist for asking important questions about the nature of human empathy through knowledge of Other's stories? and how is awareness of identity and difference nurtured in the education of the healthcare providers? How can you begin to articulate or represent your own in rigorous but creative ways?

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

ENGLIT 0655 - REPRESENTING ADOLESCENCE

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the question of how adolescence gets represented in a variety of genres, including young adult and children's literature; novels, plays and poetry aimed at adults that take adolescence as a theme; films and television programs; scientific, journalistic, or autobiographical commentaries on the nature of adolescence; and so on. This is one of the core courses for the children's literature certificate program, but all interested students are welcome.

ENGLIT 0670 - QUEER AND TRANSGENDER LITERATURE

Minimum Credits: 3

Maximum Credits: 3

"Queer and Transgender Literature" will examine the changing relationship between queer and transgender identities in literature, science and culture from the early twentieth century to the present. Students will learn to read literature in its historical context, pairing it with primary sources from relevant scientific and medical discourses, as well as locating it in competing literary criticism traditions in queer theory and transgender studies. The weekly course meetings will revolve around discussion of key works in queer and transgender literature, paired alternately with important literary criticism and primary sources. Classroom discussion and in-class writing assignments will focus on building these historicist and critical skills in sequence, so as to prepare students for their main assignment sequence, which asks them to apply the skills they are learning to generate their own contributions to debates in criticism about the proper boundaries between queer and transgender identities.

ENGLIT 0702 - INTRODUCTION TO GAME STUDIES

Minimum Credits: 3

Maximum Credits: 3

This course offers an introduction to the critical study of games and gaming. From a theoretical overview of the roles that games play in our cultures and lives to in-depth examinations of specific games, this course seeks to investigate the uses and potentials of gaming as a cultural form that combines elements of literature, cinema, and computation. While the course focuses primarily on video games, it also examines other forms of games such as board games, role-playing games, and literary games. Students will be urged to examine games as narratives and narratives as games, consider ethical and ideological conundrums inherent in virtual representations of bodies and environments, and analyze traditional elements of narrative, time, tropes, and simulations in games.

Academic Career: Undergraduate

ENGLIT 0710 - CONTEMPORARY ENVIRONMENTAL LITERATURE

Minimum Credits: 3

Maximum Credits: 3

This course examines the ways in which contemporary writers in English have engaged with the natural environment. We will read a range of authors, from the 1960s to the present day, to consider how they have looked critically at the human effects on ecosystems, and we will also study the interdisciplinary scholarly field of ecocriticism and its

responses to such writings. Throughout, we will be attentive both to the literary qualities of writings about the environment and to their historical and political contexts.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Letter Grade

Course Attributes: DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

ENGLIT 0712 - CRITICAL MAKING

Minimum Credits: 3

Maximum Credits: 3

The Maker movement is an emerging social and media form that is at once highly networked and post-digital. Making is situated at the intersection of social media, the online gift economy, and a participatory, interventionist engagement with one's physical environment. Drawing on open source ideals and innovation structures -the free sharing of code to enable collaborative development - making has become an attempt to democratize material culture through networked access to tools. MakerSpaces and MakerHubs have become critical nodes in efforts to materialize the virtual gift economy of the Internet. In this course we will engage the intellectual and practical roots of this new medial and social form and engage in our own critical making projects, utilizing scanning, modeling, and 3D printing technologies. We will begin by looking at the history and philosophy of open source software development, and then the political, social, cultural, and technological developments that have together given rise to critical maker culture. We will then learn some of the basic tools of scanning, modeling, and 3D printing. After initial modeling and printing assignments, students will form groups and develop collaborative final projects that involve materializing complex conceptual relationships from a topic of your choice and in a medium of your choice. The aim of this course is to "close the circuit" between creative conceptual production, social networking, and materialized object relationships. Critical making is about critically engaging and creatively remaking the world around us. By the end of the semester, you will become a critical maker! This is a Critical Studies course with Production elements and counts for Category III towards the Film and Media Studies major and minor.

ENGLIT 0717 - FAIRY TRADITION

Minimum Credits: 3

Maximum Credits: 3

Fairies go by many names: the Folk, the Good People, the Other Crowd, Sidhe, fey. Usually beautiful, ethereal, and

morally ambiguous, fairies are a staple of western folklore and legend. Once associated with the realm of the dead and lost magic, fairies are now creatures of children's literature and fantasy. The fairy tradition encompasses vital cultural questions about the work of imagination, magic, and vision in our understanding of ourselves and the world around us. Either elusive or non-existent, depending on perspective, fairy lore evokes issues related to: the reliability of witness and of the senses; privileged and discounted perception; the interplay of the imagination and knowledge; and the role of cultural authority. Students will consider the significance of these themes through aspects of fairy folklore, book history, portrayals of childhood, reception studies, and an end-of-term creative project.

ENGLIT 0732 - TABLETOP GAMING

Minimum Credits: 3

Maximum Credits: 3

The current moment is frequently referred to as the "golden age of tabletop games" (a category that encompasses board games, card games, and role playing games), marked by significant innovation in the form, an explosion of tabletop

game popularity, and a significant online culture devoted to this most offline of media. Why are analog games flourishing as never before in a culture supposedly saturated by and enamored with the digital? How do these games function as emergent narrative structures? How do they respond to digital modalities, either by implicitly opposing their aesthetics and informatics or incorporating various digital dynamics and remediating them into offline, tactile form? This course will examine the narrative, social, and material dynamics of games that have emerged within the era of ubiquitous digital media, yet employ analog elements as either a rejection of the digital, a critical response to it, or an exploration of the hybrid potentials of analog-digital systems. We will also examine hybrid games that incorporate both digital and analog elements, such as early video games that promiscuously combined the two, or more recent digital games that "spill into" analog space and incorporate analog dynamics into their hybrid simulations. How do these games frame the relationship between the analog and the digital, the body and code, open systems and closed worlds? In the course of this adventure through narrative, emergent social dynamics, and simulated worlds, we'll play innovative tabletop games from recent years, some older games that have been remediated in various ways, early video games, and recent innovations in hybrid analog-digital games. We'll consider how the narrative architectures and gameplay mechanics employed by these games enable emergent storytelling and critical simulation at the same time, reflecting on and probing identity, social dynamics, traumatic histories, and ethics in an era of digital media. Game design will play a significant role in a series of assignments. No prior gaming or game design experience is required.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

ENGLIT 0762 - CHILDHOOD GAMES

Minimum Credits: 3

Maximum Credits: 3

This course will examine key moments in the history of children's games from early optical toys and Victorian board games to video games and interactive technology like computer games, console games, and online game creation platforms. The course will examine the development of games within the context of the history of childhood. How do games designed for children embed expectations of play related to different constructions of childhood? How do games from different eras echo educational goals and structures of the same time period? What do the physical and mental skills fostered by certain games tell us about the finer points of different historical constructions of childhood? Students will read a range of historical and cultural materials to provide context for the close analysis of specific games while the analysis of games will yield insights into the way different forms of play respond to cultural norms and prompt cultural change. Students will play select games to gain perspective on how they shape attention, strategy, and relationships to other players, knowledge that reveals how the cultural shaping of childhoods was likely experienced and enacted. Students will also gain perspective on the changing positioning and construction of children by adopting the roles of game producers, using theoretical and historical knowledge to inform game design. In this course on childhood games, students play: playground games and games that are loosely rule-bound; classic board games; child-created online games; edutainment games; and video games. Students will play these games as critical participants, which will involve considering how narrative design and material elements script styles of participation and, in turn, construct versions of childhood. Game design and product creation will figure significantly in the content of this class.

ENGLIT 0812 - MEDIA/ECOLOGY

Minimum Credits: 3

Maximum Credits: 3

From the late twentieth century to the present, ecology as a scientific discipline and set of cultural narratives has risen to the forefront of knowledge production as a way to study and understand complex biological systems, their environments, and their internal dynamics. During the same period, media systems have grown exponentially in complexity until they too have begun to exhibit some of the behaviors of ecological systems, including self-organization, feedback, evolution, and emergent properties. The term "media ecology" captures both this new, nonlinear systems approach to understanding media itself as well as the intersection between natural ecosystems and the technological assemblages with which they are intertwined. This course will explore both media that interface with natural ecosystems and works that engage contemporary media systems at different scales. The secret life of information, contagious media, and the post-natural ecologies of our present and future will challenge us to conceive of Media and Ecology as a single coupled system: the emblem of our contemporary environment. Students will have the option to produce collaborative media projects that explore the themes of the course. These can take the form of simulations, games, network graphing, film or video projects, local ecosystem analysis and/or visualization, or the mapping and analysis of a media ecosystem that interfaces with the environment.

ENGLIT 0850 - THE FEMALE HERO

Minimum Credits: 3

Maximum Credits: 3

This course studies heroism as a gendered concept as it has evolved over time. The hero is a commonly understood archetype across genres but is most often associated with masculinity. This course seeks to define, authenticate, and analyze the female hero as a powerful figure in her own right. This course will take into account the tropes of classical heroism but consider modern and contemporary texts in which the image of the hero is redefined in line with the concept of the "female hero." Issues we will investigate include: the role of the masculine gaze in the construction of female heroes; feminist versions of heroism and strength; and the role race, class, and gender play in the making of a hero. We will also consider the ways that the female hero inflects or alters traditional feminine roles. And we will consider how the binary constructions of masculinity and femininity are impacted by stories with female heroes. Through analysis of fiction, film, and criticism, we will begin to define the female hero.

ENGLIT 0880 - SHAKESPEARE AND SOCIAL JUSTICE

Minimum Credits: 3

Maximum Credits: 3

When Shakespeare's King Lear finally turns his attention to the plight of "poor naked wretches" who have no clothing to protect them from a "pitiless" storm, he realizes he has taken "too little care" of human suffering in his kingdom. Departing from scenes such as this one, this course explores the work of artists and critics who have used Shakespeare's plays to confront a range of social injustices, including US persecution of Native Americans, the legacies of white settler colonialism across the globe, and intimate partner violence. Examining adaptations, remediations, and appropriations of Shakespeare plays, such as Toni Morrison's *Desdemona* or Aimé Césaire's *A Tempest*, students will be invited to consider what Shakespeare signifies in different cultural contexts and to examine related contests of cultural authority and ownership. Focusing on scholarship, performances, poetry, and art by people from various marginalized groups, students will explore the histories and futures of Black Shakespeare, Indigenous Shakespeare, Trans Shakespeare, Chicano Shakespeare, and many others. Several short writing assignments will build students' skills in a range of critical and creative practices that can contribute to social justice and diversity: archival research, critical fabulation, social network mapping, oppositional reading, comparative analysis of two or more productions, and personal reflection.

ENGLIT 1005 - LITERATURE AND THE ENVIRONMENT

Minimum Credits: 3

Maximum Credits: 3

This course examines the ways in which writers in English have engaged with the natural environment. We will read a range of authors, across time periods and up to the present day, to consider how they have looked critically at the

human effects on ecosystems, and we will also study the interdisciplinary scholarly field of ecocriticism and its responses to such writings. Throughout, we will be attentive both to the literary qualities of writings about the environment and to their historical and political contexts.

ENGLIT 1009 - J.R.R. TOLKIEN AND COUNTERCULTURE

Minimum Credits: 3

Maximum Credits: 3

This course studies the persona, work, and critical and popular reception of J.R.R. Tolkien (1892-1973) from his initial publication of *The Hobbit* in 1937 through today. In the 1960s and '70s, people were scribbling "Frodo Lives" on subway walls and getting married dressed like Aragorn and Arwen. Less than half a century later, *The Lord of the Rings* repeatedly beat out the Bible as "best-loved" book in British polls, and Peter Jackson's adaptations made history both for their box-office earnings and for their groundbreaking contributions to film-making. Widely recognized as the father of modern fantasy and touted as the "Author of the [Twentieth] Century" by scholars, Tolkien continues to exert a panoramic influence on culture, particularly in his ability to speak to and for the marginalized. From Comic Con to *Elder Scrolls* to *Game of Thrones*, his sub-creation of Middle-earth embodies and fuels "nerd" culture now just as it did for the hippies of the previous century. Yet, Tolkien "war veteran, Oxford professor of Medieval languages and literature, devout Catholic" was a man of his time and quite conservative, at least publicly. While he famously said that his wife "should be satisfied by devotion to her children" and not "enter the intellectual side of life," the female characters in his stories, while small in number, are arguably great in power, assertiveness, and heroism. Tolkien's writing argues for the importance of a community where all cultures coexist: Elves, Dwarfs, Men, Hobbits go to war against Sauron and the "One Ring" designed to "rule them all." In this course we will read Tolkien's major works, *The Hobbit* and *The Lord of the Rings* in their entirety, as well as excerpts from what he considered to be his master work, *The Silmarillion*. We will explore Tolkien materials housed in Special Collections at Hillman Library and online. Our reading list will include reviews and scholarship on Tolkien's life and work, as well as on the ways in which his mythology continues to resonate and be reimagined in the twenty-first century. Ultimately, we will analyze the relationship between Tolkien and the counterculture as a way of understanding the ways in which myth, fantasy, and literature more broadly represent, shape, and interrogate complex social and political systems.

Course Attributes: DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

ENGLIT 1011 - MILTON TO MINECRAFT: ART, NATURE, AND TECHNOLOGY

Minimum Credits: 3

Maximum Credits: 3

In this course, we will examine literature pertaining to the long history of relations among humans, technical devices, and the natural world, situating changing views of nature within larger cosmic and socioeconomic contexts.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

ENGLIT 1015 - UNRULY BODIES

Minimum Credits: 3

Maximum Credits: 3

This course studies the body as a phenomenon of cultural construction, as a product and process of lived experience, as the object of societal techniques of control, and as the subject of radical liberation. This course will examine the body in literature and other forms of representation. It will examine the ways that demands of "unruly bodies" to conform to normative body images intersect with gender, sex, sexuality, age, race, and other identity categories.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

ENGLIT 1020 - HISTORY OF LITERARY CRITICISM

Minimum Credits: 3

Maximum Credits: 3

This course considers influential critical theorists ranging from Plato and Augustine to Nietzsche and Freud. Neither the readings nor the approach of the class fall under the narrow definitions of literary criticism; our focus instead will be on texts from several disciplines that offer powerful models of reading and writing and that raise interesting questions about the foundations of literature, culture, and interpretation.

ENGLIT 1100 - MEDIEVAL IMAGINATION

Minimum Credits: 3

Maximum Credits: 3

This course explores some of the ways people in the middle ages saw the world around them. We will try to understand those perceptions by reading a variety of literary works, by comparing those works to other art forms and by examining

similar kinds of experience in the modern world.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Literature General Ed. Requirement, Medieval & Renaissance Studies, SCI Polymathic Contexts: Humanistic GE. Req., West European Studies

ENGLIT 1101 - INVENTION OF ENGLISH

Minimum Credits: 3

Maximum Credits: 3

The English language and its literatures are in constant flux, but this was especially true in medieval England as waves of foreign invaders and immigrants shaped the language, and political, religious, and mercantile contact with other regions of Europe contributed new aesthetic and poetic ideals. Beginning with Old English riddles, this course helps you discover the linguistic and literary DNA of English. You will discover the multiple "Englishes" and other languages that remain present in modern English and prefigure the global diversity of the Anglophone world. Along the way, you will develop familiarity with Old English and multiple dialects of Middle English. You will begin to chart the continuities and ruptures involved in the transitions from tribal heroic culture to a growing sense of common identity as English people of an English kingdom. And on a parallel trajectory, you will track how the notion of a specifically English literature written by the English, in English, for the English, emerges from adaptations and negotiations with other European vernaculars. This focus forms a bridge to further study in early modern or Renaissance English literature. The tools of philology, historical language study, rhetorical analysis, and manuscript studies, lend themselves to this course's emphasis on language and history, and in developing facility with them, you will be better prepared for the study of any area of literature.

ENGLIT 1103 - INTRODUCTION TO OLD ENGLISH

Minimum Credits: 3

Maximum Credits: 3

The purpose of this course is to learn the fundamentals of Old English as quickly as possible, in order to be able to read some of the very best Old English poetry by the end of the term. While the course is not linguistically oriented, it can serve as a background to courses in Middle English or Old Norse, as well as leading to further study in Old English literature.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

ENGLIT 1110 - LINGUISTICS AND POETICS

Minimum Credits: 3

Maximum Credits: 3

This course will examine literary texts, in particular poems, to understand better the unique role that language plays in the artistic works of various writers in different languages. Although the course focuses on English-language writers, it will also investigate how poets across languages employ similar structural techniques, or linguistic patterns, based on grammatical features that are common to all languages. In particular, the course explores the role that certain grammatical features of language, such as syntax and diction, play in poetic creativity. It asks, for example, what sort of effects may be the intentional result of a poet's use of language, and what may be an unintentional result of the

structural constraints of the particular language that a poet writes in?

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

ENGLIT 1115 - CHAUCER

Minimum Credits: 3

Maximum Credits: 3

This course closely examines major works by Chaucer--the Canterbury tales and Troilus and Cressida. Though most of the reading will be in modern English translations, some will be in the original middle English. We will view Chaucer's work in its historical, social, artistic and intellectual contexts.

ENGLIT 1127 - SHAKESPEARE ON FILM

Minimum Credits: 3

Maximum Credits: 3

This course examines how Shakespeare's works have been adapted to film and television. In this study, we will be concerned with Shakespeare as a cultural icon and with the expectations surrounding both high art and popular entertainment. Central to this examination are the relationships between a film and a text.

Academic Career: Undergraduate

Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ENGLIT 1128 - SHAKESPEARE'S SEXUALITIES

Minimum Credits: 3

Maximum Credits: 3

This course explores the roles of Shakespeare's female characters as they relate to cultural ideas about gender and sexuality. We will examine beliefs about "proper" behavior of both women and men and the relationship of representations of gender to social power.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

ENGLIT 1135 - LITERATURE, MEDIA, AND SCIENCE IN THE AGE OF SHAKESPEARE

Minimum Credits: 3

Maximum Credits: 3

This course will introduce students to the broad range of styles, genres, and concerns of literature written in English in the early modern period, particularly the 17th century. The designation "early modern" is capacious enough to straddle the Renaissance as well as the early Enlightenment. Readings could include English writers, writers from the Americas, and writers who composed in English but wrote about countries other than England, Ireland or New England.

ENGLIT 1141 - JOHN MILTON AND HIS LITERARY AFTERLIVES

Minimum Credits: 3

Maximum Credits: 3

This course studies the works and literary legacies of John Milton, the controversial intellectual titan of 17th-century England. We will read a representative selection of Milton's writing from all stages of his life, with the aim of tracking the literary, intellectual, and political development of a radical early modern thinker. Texts might include some of his early shorter poems; Milton's masque, popularly known as *Comus*; his epic poems, *Paradise Lost* and *Paradise Regained*; his tragedy, *Samson Agonistes*; and selections from Milton's treatises on various public debates. We will read Milton's work closely in ways that reveal its participation in the major transformations in scientific thought, government, religion, and political economy that define early modernity. Through the study of Milton alongside literary and critical works that engage directly with Milton's own writing or indirectly with Miltonic concerns and legacies, we will also gain an understanding of how historical controversies and texts from the past remain relevant to understanding political, scientific, ethical, and aesthetic formations in our contemporary world.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

ENGLIT 1142 - ANCIENT EPIC

Minimum Credits: 3

Maximum Credits: 3

Study of selected Greek and Roman epics in English translation. Among the works that may be read are Homer's Iliad and Odyssey, Apollonius' Argonautica, Virgil's Aeneid, and Ovid's metamorphoses.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

ENGLIT 1150 - ENLIGHTENMENT TO REVOLUTION

Minimum Credits: 3

Maximum Credits: 3

This course focuses on literature and culture of the late 17th and 18th centuries--a period of revolutionary changes in the way writers and readers viewed their world. We will read widely in the important texts of the period in order to explore the interplay of enlightenment and revolution.

Academic Career: Undergraduate

ENGLIT 1199 - TOPICS IN BRITISH LITERATURE

Minimum Credits: 3

Maximum Credits: 3

Explores thematic, formal, historical or cultural topics in British literature. It ties these issues to critical and social concerns in the development of British literature and culture.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req., West European Studies

ENGLIT 1200 - AMERICAN LITERATURE TO 1860

Minimum Credits: 3

Maximum Credits: 3

This course surveys literature produced in America before the Civil War. In the process it explores the historical, political, social and cultural factors that affected the development of that literature. It examines the work of writers who saw themselves as powerful framers of the national experience yet fearful they would have little effects on a culture confronting problems of slavery, divisiveness, literacy, economic change, immigration, etc.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Historical Analysis General Ed. Requirement, DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req., SCI Polymathic Contexts: Soc/Behav. GE. Req.

ENGLIT 1201 - DIGITAL NARRATIVE AND INTERACTIVE DESIGN

Minimum Credits: 3

Maximum Credits: 3

How are computational artifacts currently designed, and how can they be designed differently? What stories can be told by collaborating with computers? What stories can't be told? This project-based course will enable students to engage with and create computational narratives and interactive projects with data, hardware and algorithms. Each collaboratively taught iteration of the course will include 3-4 of these units, such as: fabrication, interactive hardware, computational narrative, interactive data, and prototyping. Students will consider what it means to compose with computers for human audiences, and with humans for computer audiences. Designed for Digital Narrative and Interactive Design (DNID) majors to take midway through the major, it will help students consolidate the interdisciplinary knowledge they have obtained in their prerequisite courses, introduce them to examples of interdisciplinary work that will inform their later capstone projects, and give them practice in working on collaborative projects that span the humanities and information/computing fields.

Academic Career: Undergraduate

ENGLIT 1210 - THE AMERICAN RENAISSANCE

Minimum Credits: 3

Maximum Credits: 3

This course surveys the flowering of American literature during the first half of the nineteenth-century. It analyzes the struggle of American writers to develop a new national literature.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SU3 Elective Basis

ENGLIT 1220 - CIVIL WAR TO WORLD WAR 1 IN AMERICAN LITERATURE

Minimum Credits: 3

Maximum Credits: 3

An examination of changing literary practices from the civil war to the beginning of World War I. The course explores the interactions of economic and social developments on American culture.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Historical Analysis General Ed. Requirement, DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req., SCI Polymathic Contexts: Soc/Behav. GE. Req.

ENGLIT 1225 - 19TH CENTURY AFRICAN AMERICAN LITERATURE

Minimum Credits: 3

Maximum Credits: 3

This course will cover a wide range of materials, beginning with the late eighteenth-century poetry and prose of authors such as Phillis Wheatley and Olaudah Equiano and ending with Civil War, reconstruction, or gilded-age authors such as William Wells Brown, Frances Harper, Pauline Hopkins, or Paul Laurence Dunbar. Readings will include a variety of different genres of writing (slave narratives, poetry, drama, fictive and non-fictive prose) as well as paying attention to the significant African American intellectual and cultural movements that had a role in shaping these various literary productions.

Academic Career: Undergraduate

ENGLIT 1230 - 20TH CENTURY AFRICAN AMERICAN LITERATURE

Minimum Credits: 3

Maximum Credits: 3

The first half of this course begins by examining some of the major authors from the 1920s who were a part of what came to be known as the 'new negro renaissance' or 'Harlem renaissance,' such as Langston Hughes, Nella Larsen, Countee Cullen, Claude McKay, and Zora Neale Hurston. We will then study a range of modernist and naturalist writers of the 1930s and 1940s, such as Richard Wright, Ann Petry, and Gwendolyn Brooks. In the second half of the course we will focus on several post-WWII writers that were associated with the civil rights and black arts movements, from the 1950s to the 1970s, including such figures as Ralph Ellison, James Baldwin, and Toni cade Bambara. Finally, we will consider the recent wave of African American writers that emerged with the popularization, in the 1980s, of several new genres of African American literature.

ENGLIT 1232 - CONSPIRACY THEORIES

Minimum Credits: 3

Maximum Credits: 3

Historical record has shown the dangerous effects of conspiracy theories. This style of suspicious thinking has a long pedigree extending from the 21st century back into the remote recesses of the past. But how do conspiracy theories work? How do they persuade large audiences to believe contradictory or illogical claims? This course proposes the study of conspiracy theories as phenomena that extend across multiple cultural zones, sometimes circulating in mainstream channels, sometimes operating in less-travelled circuits, sometimes using the techniques of authoritative discourse, sometimes drawing on ways of thinking that are eccentric to the accepted modes of reasoning. In each instance, conspiracy theories provide glimpses of the divide between a culture's accepted modes of thought and the many other forms of processing information that are part of the same moment. Accordingly, this course follows a case-study model of historical and cultural analysis, focusing intensively on specific conspiracy theories and the specific historical contexts in which they circulate, while considering and testing various explanations of these phenomena. Studying assemblages of texts and contexts with the tools of literary and cultural analysis, students will examine conspiracy theories as: genre; mode of communication; and style of argument. Students will conduct individual research projects and produce creative-critical work in multiple modes of communication-with options that include

writing, video, podcast, infographics, and lesson plans; this critical-creative work is designed to immerse students in various media, social media, and information environments as both critical observers and activist participants.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

ENGLIT 1247 - AUGUST WILSON

Minimum Credits: 3

Maximum Credits: 3

This course closely examines the work of the American dramatist August Wilson. A significant amount of the playwright's work, including his epic 10-play 'Pittsburgh Cycle,' is set in Pittsburgh and notably in the Hill District, where Wilson spent his first 33 years. The course will engage with Wilson's plays as well as criticism, history and literature by other authors. Course goals include increased insight and skill in reading, in close analysis, and in discussing and writing about this imaginative world in its historic, social, and literary contexts. Assignments may include viewing plays and videos, researching Pittsburgh history, and field trips to the Hill District.

ENGLIT 1345 - DOCUPOETRY

Minimum Credits: 3

Maximum Credits: 3

Docupoetry (also known as investigative poetry, creative nonpoetry, research-based poetry) is a form of creative writing that relies on a considerable amount of research. To explore various topics or issues, and to pursue new ways of knowing, poets incorporate historical documents, visual artifacts, scientific data, and other materials. The poems that emerge from the process are artistically and intellectually daring, as they interact with other genres (such as essay, memoir, testimony, reportage) and disciplines (history, ethnography, philosophy, geology, environmental science,

among others). In this course students will gain familiarity with major forerunners of the practice and examine a diverse set of contemporary examples. In addition, they will spend most of the semester designing and developing their own research-based poems. Previous creative writing experience is welcome but not necessary. Workshop opportunities and instructor feedback will be provided.

ENGLIT 1355 - VIRTUAL REALITY

Minimum Credits: 3

Maximum Credits: 3

Can there be more than one reality? Is there even one? What relationship do the senses and the mind bear to the physical environment? From the dawn of human society, no topic has been more fiercely debated than the nature of reality. In narrative, philosophy, and media, virtual reality has always been with us. This course dives deep into the rabbit hole of the real and the virtual, an adventure that includes philosophy, literature, film, and, of course, VR headsets aplenty! In addition to exploring the history of the real and the virtual, we will consider the relationship of virtual reality to the body, to space, to human gesture and communication, and to code. We will also explore the role of the imagination and creativity in the generation of new worlds. You will learn to think historically, theoretically, and critically about VR. You will have the option of either writing critical papers or creating your own virtual environment or game as your final project. This course assumes no prior experience with VR or coding, but those skills can optionally be put to use in final projects. Come prepared to question your reality!

ENGLIT 1360 - TOPICS IN 20TH CENTURY LIT

Minimum Credits: 3

Maximum Credits: 3

Considers thematic, formal historical or cultural topics in late 19th and 20th century literature. It ties these issues to critical and social concerns in international modernism and post modernism.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Literature General Ed. Requirement, Global Studies, SCI Polymathic Contexts: Humanistic GE. Req., West European Studies

ENGLIT 1380 - WORLD LITERATURE IN ENGLISH

Minimum Credits: 3

Maximum Credits: 3

This course examines contemporary literature, primarily in English, written in eastern Europe, Africa, Latin America, etc. It pays particular attention to its depiction of social, political and moral concerns.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Attributes: African Studies, DSAS Cross-Cult. Awareness General Ed. Requirement, DSAS Diversity General Ed. Requirement, DSAS Literature General Ed. Requirement, Global Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Contexts: Humanistic GE. Req.

ENGLIT 1382 - PRIZED BOOKS

Minimum Credits: 3

Maximum Credits: 3

How do metropolitan taste and recognition affect dominant and emergent literatures and nations? How do particular contexts and award-winning texts exert pressure on existing criteria and values? How does the category "prized books" also implicitly constitute and comment upon a body of literature that is "unprized"? How do prized books redefine notions of readership and citizenship in the world of globalization and electronic access? Such questions will open up the idea of "world literature" not as an afterthought to the canon of "English" literature, but as an integral and definitive part of it. Students will read literature, speeches, and essays by winners of the nobel and other global literary prizes such as the booker and the commonwealth.

ENGLIT 1406 - U.S. LATINX LITERATURE

Minimum Credits: 3

Maximum Credits: 3

This course will focus on U.S. Latino literature. While Mexican-Americans have roots in North America that go back to colonial times, the Latino explosion has happened mainly in the last thirty years, giving rise to new processes and forms of cultural expression, including an emerging literature that is neither a subset of U.S. Literature nor an extension of modern Latin American literature, though it has connections to both. To get an idea of what this literature involves and where it is going, we will look at some representative novels, poetry, memoirs, plays and films.

ENGLIT 1412 - SECRET PITTSBURGH

Minimum Credits: 3

Maximum Credits: 3

How much do you know about the city outside Pitt? Have you explored a hillside neighborhood using stairways instead of streets? Visited the church with the largest collection of relics outside Europe? Eaten a macaroon prepared by a transplanted French baker? Pittsburgh has a rich cultural history, from labor disputes to a vibrant arts scene. It's also a city with secrets. Students in this course will explore Pittsburgh's most unusual sites and locales; learn about the city's history and the literature it has inspired; and research and write entries for a public guide to secret Pittsburgh.

Academic Career: Undergraduate

Course Attributes: DSAS Creative Work General Ed. Requirement, DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

ENGLIT 1413 - HUMANITIES IN THE CITY

Minimum Credits: 3

Maximum Credits: 3

This course will explore the way the arts and humanities work through institutions (museums, journals, cultural organizations, etc.) to shape Pittsburgh. Each week, students will engage with people and institutions- such as City of Asylum, the Center for PostNatural History, and the Andy Warhol Museum - that contribute to Pittsburgh's cultural landscape. Readings and discussions will encourage students to think about the contributions that various institutions make to the city, as well as broader connections between the humanities and public concerns such as housing, transportation, diversity, and social justice. Through discussions and assignments (see Student Responsibilities, below), the course aims to help students achieve a deeper understanding of the city and inspire them to be active forces in shaping their surroundings by engaging with the arts and humanities in institutional settings.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

ENGLIT 1415 - READING AND WRITING COMMUNITIES

Minimum Credits: 3

Maximum Credits: 3

This course will allow students to explore the intersection of literature and community, and to practice literature-based community engagement in a series of structured experiences with Pittsburgh residents. These experiences will be guided by best practices of community engagement, which the students will read about and discuss throughout the semester. A portion of the course will be devoted to reading and discussing books about Pittsburgh, and the different ways these books represent community. Another portion will consist of joint meetings with Pittsburgh residents who are reading the same books the students are reading. These meetings will be discussion based and guided by questions that encourage Pitt students and Pittsburgh residents to use the readings to reflect on their various experiences in the city. The discussions will also serve as opportunities for students and community members to learn from each other, and to understand the diverse experiences and backgrounds that shape the group's perspectives. In the final weeks of the course, Pitt students and Pittsburgh residents will work to plan a final event that looks back over the course as whole. Assignments throughout the semester will teach students how to critically reflect on their own personal

perspectives, enter into dialogue with others', and engage with critical sources to understand how to read and write communities. The course will allow students to think about the value of literature and criticism outside the college classroom, specifically the ways it can be enriched by engagement with a broader community.

Grade Component: LG/SNC Elective Basis

ENGLIT 1635 - CHILDREN IN PITTSBURGH

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

ENGLIT 1645 - CRITL APPRCH TO CHILDREN'S LIT

Minimum Credits: 3

Maximum Credits: 3

This course examines a variety of children's books from a number of theoretical perspectives; historical, feminist,

transactional, structuralist, etc. The implications of theory will be emphasized. We will place children's books and reading in the wider context of the emotional, cognitive, and moral development of the child, the popular culture of childhood, and contemporary multicultural society.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENGLIT 0560 and 0562 or 0655

Course Attributes: Childrens Literature, DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

ENGLIT 1701 - TOPICS IN WOMEN'S STUDIES

Minimum Credits: 3

Maximum Credits: 3

Investigates issues raised by the woman's movement in literature written by and about women. It ties these issues to critical and cultural concerns both at the time the text was written and to the present day.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

ENGLIT 1704 - WOMEN NOVELISTS

Minimum Credits: 3

Maximum Credits: 3

This course explores the important role women have played in the development of the novel and how they have used and transformed its generic traditions. We will place novels in the contexts of issues important to their own time and discuss questions raised by recent feminist criticism.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

ENGLIT 1705 - WOMEN AND DRAMA

Minimum Credits: 3

Maximum Credits: 3

This course will focus on the work of playwrights who came of age during the feminist movement in the 1970s and won critical and /or popular acclaim. Students will choose one of the playwrights to research for a class presentation and term paper.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SU3 Elective Basis

Course Attributes: Gender, Sexuality & Women's St

ENGLIT 1715 - GLOBAL BLACK LITERATURE

Minimum Credits: 3

Maximum Credits: 3

Despite their geographical and cultural differences, writers from Africa, the Caribbean, and the United States undergo similar experiences of oppression. Problems of self-identity, and the quest for self-respect. These similarities will be discussed in class along with a comparative approach to the texts with supplementary films, slides, and recordings.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: Global Studies, Latin American Studies

ENGLIT 1719 - INTRO TO HOLOCAUST LITERATURE

Minimum Credits: 3

Maximum Credits: 3

This course surveys the central texts of the literature of the holocaust, while introducing students to the main issues and preoccupations of holocaust testimony in literature and film.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

ENGLIT 1730 - CHINESE AND WESTERN POETRY

Minimum Credits: 3

Maximum Credits: 3

A comparative study of Chinese and Western lyric poetry. This course explores the world of feeling as expressed in the poetry of two vastly different worlds: china and the West and focuses on the language of feeling in a poetic medium.

The purpose of this course is to appreciate how differences between the two poetic traditions is essential to a better understanding of the two cultures.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Asian Studies, DSAS Cross-Cult. Awareness General Ed. Requirement, DSAS Literature General Ed. Requirement, Global Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Contexts: Humanistic GE. Req., West European Studies

ENGLIT 1738 - IRISH LITERATURE

Minimum Credits: 3

Maximum Credits: 3

This course samples the work of major figures in Irish literature. It seeks to define its national character through careful reading of selected texts.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Attributes: West European Studies

ENGLIT 1756 - BALLADS AND BLUES

Minimum Credits: 3

Maximum Credits: 3

This course acquaints students with folk and literary aspects of ballads and blues in the Anglo-American and Afro-American traditions. It surveys both forms from their separate beginnings to contemporary examples. Organized both historically and topically, the course explores influences on these forms as well as their historical, social and cultural context.

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

ENGLIT 1760 - TOPICS IN POPULAR CULTURE

Minimum Credits: 3

Maximum Credits: 3

Focuses on the emergence of popular culture, the relationship of modern social and economic practices, mass audiences, and modes of cultural representation, or specific popular forms.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Attributes: West European Studies

ENGLIT 1797 - BIBLICAL IMAGINATIONS

Minimum Credits: 3

Maximum Credits: 3

This course continues the bible as literature and it provides an opportunity to consider more carefully books read in the earlier course as well as to consider other books that were entirely neglected. This second semester will permit us to address some fascinating problems; what happens to narratives as they pass from an oral tradition to written form; problems of translation; the formation of a canon; the ways the bible influences later literature. The generally historical approach will permit the student to understand the time and culture of the bible.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

ENGLIT 1900 - PROJECT SEMINAR

Minimum Credits: 3

Maximum Credits: 3

The junior seminar, required for English literature majors, offered in varied versions, will investigate methods and goals of literary historical study by directing attention to broad historical and theoretical issues and to long-duration developments and transformations of literacy cultural practices. Will include a range of literary, theoretical and historical texts selected to enable exploration of issues and problems that cut across traditional designations of literary historical periods.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

ENGLIT 1906 - RESEARCH TUTORIAL

Minimum Credits: 3

Maximum Credits: 3

The Research Tutorial course is one in which a small cohort of students work both independently and collaboratively as they develop and carry out independent research projects with the goal of producing unique contributions to literary studies and of preparing for further education or research-oriented careers. Along with a structure that leads students through research processes, students receive one-on-one guidance and support from the professor. Students will learn to formulate productive research inquiries, to identify necessary resources and archives, to create a bibliography of literary and critical texts, and to define an appropriate scope in relationship to timeframe and goals. Students will gain advanced skills in research-based writing based on intensive, individual feedback from the instructor. Students will also learn how to write fellowship proposals, conference abstracts, and other digests of their research.

Academic Career: Undergraduate

Course Attributes: Capstone Course, Writing Intensive Course (WRIT)

ENGLIT 1913 - ADVANCED RESEARCH IN LITERATURE

Minimum Credits: 3

Maximum Credits: 3

Working closely with faculty members on her/his senior thesis committee to do the primary reading, foundational research, and exploratory writing for the senior thesis, the student will read a majority of the primary literary works and a significant amount of criticism and complete a minimum of 20 pages of exploratory writing or a draft of the thesis.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SNC Elective Basis

ENGLIT 1914 - SENIOR HONORS THESIS

Minimum Credits: 3

Maximum Credits: 3

In this course, the student will complete all remaining research for the senior thesis and will work closely with the faculty members on his/her committee to plan, write, and revise the senior thesis.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SNC Elective Basis

ENGLIT 1915 - PROFESSIONAL DEVELOPMENT IN LITERATURE

Minimum Credits: 1

Maximum Credits: 1

This one-credit seminar invites Literature majors to deepen and expand their understanding of professional life and options. Professional Development will allow students to explore the ways their academic work has prepared them for life after graduation, allow them to identify next steps in their career planning, and help them learn about practical aspects of professional life. They will have the opportunity to work on crucial career documents and an online portfolio.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Satisfactory/No Credit

ENGLIT 1916 - PROFESSIONAL DEVELOPMENT IN DIGITAL NARRATIVE AND INTERACTIVE DESIGN

Minimum Credits: 1

Maximum Credits: 1

This one-credit seminar invites Digital Narrative and Interactive Design majors to deepen and expand their understanding of professional life and options. Professional Development will allow students to explore the ways their academic work has prepared them for life after graduation, allow them to identify next steps in their career planning, and help them learn about practical aspects of professional life. They will have the opportunity to work on crucial career documents and an online portfolio.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Satisfactory/No Credit

ENGLIT 1922 - DNID CAPSTONE IN ENGLISH

Minimum Credits: 3

Maximum Credits: 3

This course is the English side of the DNID major's capstone requirements. DNID students complete a two-course capstone sequence, with one course each in English and in SCI, which allows them to design and implement a signature project to complete the major. This course is designed to fulfill part one of two for the DNID capstone sequence and will focus on preparing a design proposal with the support of DNID faculty. Students will read widely on both the process and potential content of design creation.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENGLIT 1201

ENGLIT 1925 - UNDERGRAD TEACHING IN LITERATURE

Minimum Credits: 3

Maximum Credits: 3

Students enrolled in this course will work with an instructor as an assistant to any upper-level course being offered to English majors. They will help with course materials and generate class discussion.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: Satisfactory/No Credit

Course Attributes: Capstone Course

ENGLIT 2141 - MAKING AND UNMAKING THE BOOK

Minimum Credits: 3

Maximum Credits: 3

This course is a historical, practical, and creative introduction to one of the most important media forms in human history—the codex book. You will have the chance to design your own books and to create the various components of books, including making paper, setting movable type, inking and printing on a letterpress printer, and learning to stitch and glue book bindings. You'll have lots of support along the way, including working with the wonderful staff in Pitt's Text and Context Lab. At the same time, we will study and discuss the material and cultural history of books, including a process of Western canon-formation that moved from the publication of the first printed bibles to the treatment of certain English literary works as quasi-sacred texts. After tracing how this influential view of the book was formed, we will turn to various modes of "unmaking" the book, from artists' books to poetry such as M. NourbeSe Philip's *Zong!* As we trace the material history of books, another central theme will be the relationship between words and images: Are different processes used to produce them, as when movable type would be combined with woodblock printing in the first European printed books? Or are they combined, as with William Blake's illuminated printing or graphic novels such as Alison Bechdel's *Fun Home*? Other case studies will include literary, artistic, and political examples of many kinds of print publications, including medieval illuminated manuscripts, early modern poems and plays such as Shakespeare's, illustrated religious and political broadsides, pop-up and other children's books, and many other of modern forms—such as zines, chapbooks, and art books. Students from all departments and programs are welcome, and you will have a chance to develop independent projects on topics of personal interest to you.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

ENGLIT 2320 - CARIBBEAN ENVIRONMENTAL IMAGINATIONS

Minimum Credits: 3

Maximum Credits: 3

What do our postcolonial and global solidarities invite us to learn about places in the global south? How might we situate our scholarship in dialogue with such places and with their cultural and intellectual histories? How can thinking about the specificities of place deepen our theoretical generalizations? And how does postcolonial studies itself change if we think from the perspective of islands and archipelagoes rather than subcontinents and continents? Since the Caribbean (and the New World more broadly) were key to the making of capitalist modernity, we will address the above questions by exploring the environmental imaginations of Caribbean literature as it responds to the inextricably linked (post)colonial histories of extractivist, environmental, and epistemic violence. Caribbean writers have found extraordinarily inventive and wide-ranging ways to navigate both archival erasures and dominant representations of the Caribbean as picturesque paradise or as place of tragedy or disaster. We will study their environmental maneuvers across several different genres and forms--from realism to speculative fiction to epic to satire, from theater to literary essays to allegory to "small" forms such as the vignette, the fragment, patwa proverbs and creole voicings, short ekphrastic poems, and postcards. We will explore the affordances of each genre for framing and resolving environmental considerations: what vocabularies for environmental witnessing and repair do particular genres offer? How do they approach problems of representation, knowledge, agency, and political desire? For example, how might the politics of water be treated differently in a realist novel, a found poem drawn from a newspaper article, a postcard, and a visual poem? Our readings will focus on the Anglophone Caribbean, Puerto Rico, Haiti, the Atlantic, and the Caribbean diaspora. Writers will include Nobel laureate Derek Walcott; Jamaican poet laureates Lorna Goodison and Olive Senior; Kei Miller; Marlene NourbeSe; Jacques Roumain; and Aliyah Khan. Our theoretical interlocutors include Michel-Rolph Trouillot, Rob Nixon, Isabel Hofmeyr, Elizabeth DeLoughrey, Yarimar Bonilla, Deborah Thomas. Assignments will include a presentation; exploratory, academic, and public writing; and short writing exercises in different genres.

English Writing

ENGWRT 0400 - INTRODUCTION TO CREATIVE WRITING

Minimum Credits: 3

Maximum Credits: 3

This course offers the opportunity to experiment with forms of nonfiction/journalism, poetry, and fiction and to read and discuss from a writer's point of view contemporary writing in these genres.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: DSAS Creative Work General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

ENGWRT 0520 - INTRODUCTION TO FICTION WRITING

Minimum Credits: 3

Maximum Credits: 3

This first course in the fiction sequence introduces students to aspects of prose fiction--plot, point of view, characterization, conflict, etc. Students may write exercises on these aspects of fiction, write one or more short stories and revise frequently. Students will also read representative stories and explore their use of particular fictional techniques.

Academic Career: Undergraduate

ENGWRT 0540 - WRITING YOUTH LITERATURE

Minimum Credits: 3

Maximum Credits: 3

This course will introduce undergraduates to the art of writing for young people. It may focus on a single genre in depth (for instance, the young adult novel) or invite students to read and write broadly across a range of genres (picture books, children's poetry, nonfiction for the young, etc.). This course serves as an approved category 1 elective for the children's literature certificate program, but all interested students are welcome.

Academic Career: Undergraduate

Course Requirements: PREQ: ENGCOMP 0200 or (ENGCOMP 0203 or 0205 or 0207 or 0208 or 0250 or FP 0003 or 0006 or ENGCOMP 0004 or 0006 or 0020 or ENG 0102) or (ENGR 0012 or 0712 or 0715 or 0716 or 0718)

ENGWRT 0550 - FUNDAMENTALS OF NEWS REPORTING

Minimum Credits: 3

Maximum Credits: 3

The internet has led newspapers, corporations and non-profit agencies to create websites that dispense news and information 24 hours a day, seven days a week, and these agencies need people who can write efficiently in that style. This makes clear, concise, accurate writing - the basis of all news reporting - more important than ever. In fundamentals of news reporting, students will learn to identify news, write effective summaries of the information, structure stories well, conduct research, and identify sources of reliable facts and informed opinions. Students will write about their surrounding communities: the University, Oakland, the city of Pittsburgh. The course will also include lectures and discussions about media law and ethics.

ENGWRT 0555 - PITT NEWS WRITING INTERNSHIP

Minimum Credits: 1

Maximum Credits: 1

Students writing for The Pitt News will work with an editorial advisor as they develop stories for The Pitt News. This includes developing and pitching their own feature stories that are local to both the university and Pittsburgh community; understanding news values and basic news story structure; interviewing for both in-depth and quick turnaround pieces; and writing clearly, concisely, and with brevity. Over the course of the semester, students will meet once a week for an hour and discuss their stories, sources, and roadblocks in reporting. In doing so, they will discover gaps in news locally, and work to fill those gaps. As journalists, students will participate in, and work to better understand the community in which they attend school.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

ENGWRT 0560 - SCREENWRITING AND NARRATIVE

Minimum Credits: 3

Maximum Credits: 3

This course will explore developing character-based stories in the screenplay form. Students will be exposed to a variety of readings including original screenplays, related prose, and texts which reinforce basic tenets of good story telling. Students will write rigorously building from idea to outline with great attention to structure and character development. Students will develop writing abilities, critical facilities in approaching work, and an understanding of principles of storytelling common in narrative forms.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) or (ENGR 0012 or 0712 or 0715 or 0718)

Course Attributes: Writing Intensive Course (WRIT)

ENGWRT 0610 - INTRODUCTION TO JOURNALISM AND NONFICTION

Minimum Credits: 3

Maximum Credits: 3

This course is designed to develop your skills as a nonfiction writer. Through a combination of required readings, creative exercises, peer critiques and critical discussions, you will develop an understanding of the fundamentals of journalism as well as an introduction to the wide-ranging possibilities of nonfiction writing as a genre: narrative long form, the personal essay, immersion journalism and forms of creative nonfiction. This class will be divided into two components; gathering information and shaping stories.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

ENGWRT 0650 - READINGS IN JOURNALISM

Minimum Credits: 3

Maximum Credits: 3

This course is intended to introduce journalism students to news, feature, and column/op-ed writing as practiced by the best papers - and the best writers - nationally. The course will focus on the methods for obtaining the information needed to create solid news stories, and strategies ranging from extensive, in-depth interviewing, background reading, and the journalistic "legwork" and "digging" that produces incisive, accurate accounts and the very best "investigative reporting".

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ENGWRT 0710 - INTRO TO AUDIO STORYTELLING

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ENGWRT 1010 - INTERMEDIATE FICTION

Minimum Credits: 3
Maximum Credits: 3
Students work on writing short stories and read a wide range of stories. Students can expect to revise their work regularly. Class sessions will address problems in fiction writing -- from plot to characterization, from point-of-view to style.
Academic Career: Undergraduate
Course Component: Workshop
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENGWRT 0520; MIN GRADE: 'C'

ENGWRT 1050 - The Lyric Essay

Minimum Credits: 3
Maximum Credits: 3
In this class, students will be invited to experiment with the boundaries between nonfiction, fiction, and poetry. They will read and write a wide variety of Lyric Essays-including mosaics, prose poems, and double-portraits; as well as compose a short audio monologue.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ENGWRT 1090 - MASTERING POINT OF VIEW

Minimum Credits: 3
Maximum Credits: 3
This course acquaints the student with a variety of first and third person points of view. Through readings, class discussions and written work, students develop a mastery of the internal monologue, dramatic monologue, letter, diary and other forms.
Academic Career: Undergraduate
Course Component: Workshop
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENGWRT 0520 or 0530 or 0550 or 0610

ENGWRT 1091 - AUTOBIOGRAPHY AND CREATIVE IMPULSE

Minimum Credits: 3
Maximum Credits: 3

This advanced level, mixed-genre course will explore various ways autobiographical material might be generated, structured, modified, and revised. In addition to frequent in-class writing and a final project, students will read and respond to published essays, poetry, and fiction.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENGWRT 0520 or 0530 or 0550 or 0610

ENGWRT 1092 - WRITER'S JOURNALS

Minimum Credits: 3

Maximum Credits: 3

This course studies the journal as an art form. It also questions the purpose and value of journal keeping for a writer.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENGWRT 0520 or 0530 or 0550 or 0610

ENGWRT 1094 - READINGS IN CONTEMPORARY FICTION

Minimum Credits: 3

Maximum Credits: 3

This course acquaints students with a variety of contemporary writers. This study helps students raise questions about their own developing aesthetics as they are reflected in form and take into account their dual roles as creative writers and critics.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENGWRT 0520

ENGWRT 1097 - TOPICS IN FICTION

Minimum Credits: 1

Maximum Credits: 1

This course concerns itself with matters of interest in fiction writing; form and technique, contemporary production, and the relation of the fiction writer to his/her society.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

ENGWRT 1101 - SENTENCE SHOP: EXPERIMENTS IN TIME AND SPACE

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

ENGWRT 1132 - ELEMENTS OF SCREENWRITING

Minimum Credits: 3

Maximum Credits: 3

This course will explore developing character-based stories in the screenplay form. Students will be exposed to a variety of readings, including original screenplays, related prose, and texts which reinforce basic tenets of good story telling. Students will write a completed 1st Act for a 3 to 5 part screenplay, building from idea to outline with particular attention to structure and character development.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies

ENGWRT 1133 - INTERMEDIATE SCREENWRITING

Minimum Credits: 3

Maximum Credits: 3

This advanced course will help you develop your feature film idea into a full treatment. Weekly discussions and writing assignments focus on creating the plot, scene, sequences, setting, and subplots. By the end of the semester, you will have completed a scene-by-scene treatment of your original work. Considerable outside work is required. Grading is based on weekly assignments, the quality of the written treatment and class participation.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies

ENGWRT 1200 - WRITING THE CITY

Minimum Credits: 3

Maximum Credits: 3

The course's goal is to encourage your personal recording of experiences through which you gain insight and self-discovery. Journal entries reflect the significance of travel experiences that others can share and expand. Travel narratives and oral presentations are evaluated.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: Writing Intensive Course (WRIT)

ENGWRT 1210 - POETRY WORKSHOP

Minimum Credits: 3

Maximum Credits: 3

For this advanced poetry writing course, the central text will be the student's own writing. Students will read recently published poetry, regularly write their own poetry and frequently rewrite it.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENGWRT 0530; MIN GRADE: 'C'

ENGWRT 1245 - STUDIO IN AFRICAN-AMERICAN POETRY AND POETICS

Minimum Credits: 3

Maximum Credits: 3

Intended for graduate students and advanced undergraduates, Studio in African American Poetry and Poetics will be a course in interdisciplinary making, as we investigate the evolving fields of African American poetry and poetics through a critical and a creative lens.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENGWRIT 0400 or ENGWRIT 0530 or ENGLIT 0315 or ENGLIT 0515

Course Attributes: DSAS Creative Work General Ed. Requirement, DSAS Diversity General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

ENGWRT 1290 - READINGS IN CONTEMPORARY POETRY

Minimum Credits: 3

Maximum Credits: 3

This course focuses on American poets who have come to prominence since 1963. We will read widely in the poetry of this period to understand its unique contribution to the development of poetic form and its relationship to the culture that produced it.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENGWRT 0530; ; PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006)

Course Attributes: Writing Intensive Course (WRIT)

ENGWRT 1293 - TOPICS IN POETRY

Minimum Credits: 3

Maximum Credits: 3

This course concerns itself with matters of interest in poetry writing: form and technique, contemporary production, and the relation of the poet to his/her society.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Attributes: Asian Studies

ENGWRT 1330 - INTERMEDIATE NONFICTION: SCENE AND POINT-OF-VIEW

Minimum Credits: 3

Maximum Credits: 3

Students in this course will study, practice, produce and revise short pieces of literary nonfiction while examining basic structures of the essay, the profile, and long form narratives. We will study the anatomy of a scene and explore techniques of scene-by-scene construction. Students will be expected to master the basics of point-of-view, and to begin experimenting with voice. We will develop research techniques including the art of the interview and immersion research. This course will place emphasis on digital forms of publishing. Students will develop personal blogs. Workshopping of student work will be limited.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENGWRT 0550 or 0610; MIN GRADE: 'C'

ENGWRT 1360 - THE ART OF THE INTERVIEW

Minimum Credits: 1

Maximum Credits: 3

In this course, we'll explore the interview as an essential tool for nonfiction storytelling across forms. We'll consider approaches to interviewing practice from across subfields and genres or example, print journalism, memoir, oral history, radio, and documentary film, and consider how different techniques yield different materials suited to a range of purposes and stories. What makes a good question tick? How can you get through to a challenging or resistant subject? What habits of mind and body can help you transform an answer into an image or an opinion into a story? Through focused case studies and discussions, you'll learn from the craft of master interviewers across fields. And through hands-on exercises, you'll gain experience planning, conducting, and making meaning from real-world interviews in a range of styles and contexts. You'll come away with a toolkit of adaptable skills and techniques to continue your work in the world, wherever you choose to take it.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENGWRT 0610 or ENGWRT 0710

ENGWRT 1370 - JOURNALISM BOOT CAMP: WRITE NOW

Minimum Credits: 3

Maximum Credits: 3

The course is a journalism boot camp-like experience where students will work closely with the instructor and editors on the Pitt news to prepare for the real world of journalism.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

ENGWRT 1377 - MEDIA LITERACY: WRITING AND READING YOUR WAY THROUGH THE DIGITAL LANDSCAPE

Minimum Credits: 3

Maximum Credits: 3

An examination of digital media, advertising, ethics and social media that impacts the practice of journalism. A &S Catalog Description: This course will teach you how to be media literate and understand the role of media in a democracy. You will learn how to identify and verify news, and how to understand news gathering and sourcing. You will learn how to distinguish between the demands of real journalism as you do your own writing and the realities of the digital world.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

ENGWRT 1378 - WOMEN IN JOURNALISM

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Gender, Sexuality & Women's St

ENGWRT 1390 - READINGS IN CONTEMPORARY NON-FICTION

Minimum Credits: 3

Maximum Credits: 3

This course familiarizes students with a number of different forms of and approaches to contemporary non-fiction writing.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENGWRT 0550 or 0610

ENGWRT 1391 - WRITING THE REVIEW

Minimum Credits: 3

Maximum Credits: 3

This course explores various types and styles of reviews. Students read a variety of critics as well as write original reviews of film, television, theatre, music, books, etc.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (ENGCMP 0004 or 0006 or 0020 or 0200 or 0203 or 205 or 207 or 208 or 0250) or (FP 0003 or 0006) or ENG 0102 or ENGR 0012

ENGWRT 1393 - SPORTS WRITING

Minimum Credits: 3

Maximum Credits: 3

The course affords students the opportunity of studying modern sports writing techniques, with an added goal of improving their writing skills. It deals with the differences between sports reporting and writing and news reporting and writing. Ideally, a student with an interest in sports writing will complete the course with an idea of how best to collect information, organize it and disseminate it in an appealing manner. Clear, entertaining prose will be stressed.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENGWRT 0550 or 0610

ENGWRT 1399 - TOPICS IN NON-FICTION: NEWSPAPER

Minimum Credits: 3

Maximum Credits: 3

This course examines the history, lives and livelihoods famous female journalists who made exceptional contributions to journalism despite institutional and gender obstacles. Starting with the turn-of-the century, we look at women and their writing who covered domestic and international beats such as Nellie Bly, Martha Gellhorn, Gloria Steinem, and Lara Logan who have left their mark on women's history.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

ENGWRT 1403 - TOPICS IN NON-FICTION: ELECTRONIC MEDIA

Minimum Credits: 3

Maximum Credits: 3

This course concerns itself with the varieties of writing for the electronic media, and with related matters of interest; form and technique, contemporary production, ethical and legal matters, and the general relation of the writer in this field to his/her society.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENGWR 0520 or 0530 or 0610

ENGWR 1430 - LITERARY AND ONLINE PUBLISHING

Minimum Credits: 3

Maximum Credits: 3

This course will introduce students to the art and craft of literary and online publishing. Students will research independent literary magazines and small presses, both online and in print. They will learn the basics of literary publishing from both an editorial and an authorial perspective. They will use what they learn to produce an online site featuring the work of Pitt-Greensburg writing program graduates, as well as individual print chapbook-length collections from the English writing program capstone.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENGWR 0520 or 0530 or 0610

ENGWR 1435 - LITERARY PUBLISHING IN PRINT AND ONLINE

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENGWR 0520 or 0530 or 0610

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENGWR 0400, or 0410, or 0520, or 0530, or 0610

ENGWR 1451 - MULTIMEDIA ESSAY

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENGWR 0400 or 0410 or 0520 or 0530 or 0610

ENGWRT 1490 - LISTENING TO NARRATIVE AUDIO

Minimum Credits: 3

Maximum Credits: 3

With podcasts on the rise, audio is an increasingly vibrant platform for storytelling across genres, from narrative journalism, to the audio essay, to serial (non)fiction. What can we, as writers learn from close encounters with these forms? How can born-audio narratives help us approach questions of style, structure, scene, and voice in unexpected ways? And how can we take inspiration from these forms to reimagine the possibilities of our writing, whether it's for the ear or for the page? Just as a "Readings" course teaches you to read like a writer, in this course, you'll be challenged to listen like an audio producer, attuning yourself to the craft of audio stories in order to inform and enrich your own creative work. Throughout the semester, you'll produce focused responses to weekly listening assignments, engage in rigorous discussions on craft, and generate some of your own creative work in response to the stories we encounter. While no formal technical training in audio production will be provided or required, students interested in exploring their writing in audio forms will be encouraged to do so.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENGWRT 0520 ENGWRT 0610 or ENGWRT 0710 or ENGWRT 1132 or FMST 1860

ENGWRT 1501 - TOPICS IN CREATIVE WRITING

Minimum Credits: 3

Maximum Credits: 3

Topics in Creative Writing will explore writing that crosses boundaries in a variety of ways, between traditional genres (fiction, nonfiction, poetry, drama) or that is interdisciplinary (between writing and, for instance, studio arts, photography, music, or dance). Writers of all genres have been influenced, challenged, and enriched by other kinds of artists' productions and practices (and vice versa), and this class will examine those engagements and influences especially in but not limited to contemporary work.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENGWRT 0400 or 0520 or 0530 or 0610

ENGWRT 1514 - WRITING AND MAKING COMICS

Minimum Credits: 3

Maximum Credits: 3

This course is designed as an introduction to making comics. The class will focus primarily on writing scripts: pitching, outlining, drafting, and editing. Students need not have skills as illustrators. However, students will gain a basic understanding of drawing comics, collaborating with artists, and comic layout and design.

Academic Career: Undergraduate

Course Component: Workshop

Grade Component: LG/SNC Elective Basis

ENGWRT 1515 - THE BOOK AS ART: TEXT AND IMAGE

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Undergraduate

Course Component: Workshop

Grade Component: LG/SNC Elective Basis

Course Requirements: Pre-requisite: ENGWR 0520 or ENGWR 0530 or ENGWR 0610 (or instructor permission)

ENGWR 1540 - WRITING YOUTH LITERATURE 2

Minimum Credits: 3

Maximum Credits: 3

Expanding on the fundamentals of writing youth literature, students will aim to complete the first draft of a novel-length piece for either a young adult or middle grade audience. Incoming students must have an approved idea and roughly sixty consecutive pages of writing already completed.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

ENGWR 1650 - PLAYWRITING 1

Minimum Credits: 3

Maximum Credits: 3

A beginning course in writing for the stage. Starting with short scenes, students will work towards understanding the craft and art of constructing theatre stories to be performed by actors. The final project will be a one-act play.

Throughout there will be emphasis on the stage effectiveness of the writing and opportunity for informal performance of student scripts.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: Writing Intensive Course (WRIT)

ENGWR 1651 - PLAYWRITING 2

Minimum Credits: 3

Maximum Credits: 3

This is an advanced course in the study of playwriting. The goal is to create performable plays.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: THEA 1365 or ENGWR 1650

ENGWR 1710 - SENIOR SEMINAR IN FICTION

Minimum Credits: 3

Maximum Credits: 3

In this seminar students are expected to criticize student work intelligently and constructively. It is designed for students familiar with the craft of writing who wish to refine their writing skill and make their stories more subtle, original and meaningful. Analysis of student writing will be supplemented by the reading of professionally written stories.

Academic Career: Undergraduate

Course Component: Workshop

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENGWR 1010

Course Attributes: Capstone Course

ENGWRT 1730 - SENIOR SEMINAR IN POETRY

Minimum Credits: 3

Maximum Credits: 3

A fairly broad knowledge of 20th century poetry in English is assumed. Most class hours will be devoted to workshop critiques; a portion of class time will be spent discussing the work of younger contemporary poets.

Academic Career: Undergraduate

Course Component: Workshop

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENGWRT 1210

Course Attributes: Capstone Course

ENGWRT 1750 - SENIOR SEMINAR IN NONFICTION

Minimum Credits: 3

Maximum Credits: 3

This is a workshop-intensive class in which students will work on one research-intensive piece of long form narrative nonfiction of about 8,000 words. This course will place heavy emphasis on digital forms of publishing. Students will maintain personal blogs and personal websites where they will publish their own work and participate in the editing and publishing of a class-wide digital magazine.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENGWRT 1330

Course Attributes: Capstone Course

ENGWRT 1760 - ADVANCED REPORTING

Minimum Credits: 3

Maximum Credits: 3

This course will stress in-depth-interpretive reporting in specialized areas such as science, business, and politics.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENGWRT 0550 or 0610

ENGWRT 1770 - STUDIO IN AUDIO FICTION

Minimum Credits: 3

Maximum Credits: 3

Audio fiction has undergone a kind of renaissance, reimagining the possibilities and forms of classic radio drama for contemporary podcast audiences. In this advanced production course, we will take up this growing genre as a platform for experimentation. Drawing inspiration from focused listening assignments and from creative exchange with your peers you will work in a collaborative studio setting to produce an original, sound-rich work of audio fiction, aiming to come away with a polished, broadcast-worthy story by the end of the semester. This is a workshop-intensive course. You will be asked to provide detailed feedback on your peers, work and to offer up your own work-in-progress for critique at regular intervals, using this feedback to inform your story's development at every stage. Class discussions and activities include techniques for story structure, character development, dialogue, and directing, as well as hands-on instruction in mixing and sound design. This course assumes prior experience in narrative audio production and/or a self-directed approach to the technical elements of audio recording and editing. Your active contributions to the collaborative working environment of this class are key to its success.

Academic Career: Undergraduate

Course Component: Workshop

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENGWRT 0710 OR ENGWRT 1132 or FILMST 1132 ; AND ENGWRT 1490 OR BY PERMISSION OF INSTRUCTOR

ENGWRT 1780 - STUDIO IN AUDIO DOCUMENTARY

Minimum Credits: 3

Maximum Credits: 3

In this advanced production course, we will explore the craft of audio documentary in a hands-on studio setting. Over the course of the semester, you will dedicate yourself to producing a single sound-rich work of audio documentary, which you will pitch, research, record, script, edit, and revise, aiming to come away with a polished, broadcast-worthy story by the end of the term. This is workshop-intensive course. You will provide detailed feedback on your peers, work and to offer up your own work-in-progress for critique at regular intervals, using this feedback to inform your story's development at every stage. Class discussions include strategies for generating and pitching stories, planning and conducting interviews, scripting and structuring tape, and working with music and field recordings. While our primary texts will be your own stories, we will also engage with a variety of forms of audio documentary through focused listening assignments, which will serve as models and inspiration for your work. This course assumes prior experience in narrative audio production and a self-directed approach to the technical elements of audio recording and editing.

Academic Career: Undergraduate

Course Component: Workshop

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENGWRT 0710 or ENGWRT 1490 or ENGWRT 1350 or FMST 0780 or FMST 0835 or FMST 1781 or COMMRC 0575 OR BY PERMISSION OF INSTRUCTOR

ENGWRT 1865 - WRITING FOR AN ORIGINAL SERIES

Minimum Credits: 3

Maximum Credits: 3

In this course students will study and practice writing for a serialized or episodic motion picture series. Formats discussed include one-hour and half-hour streaming and broadcast series as well as short-episode web series. This course does NOT cover writing spec scripts for existing series or the specifics of the sitcom format. Each student will pitch a series, describing the format, franchise, characters, and basic story arc. The classroom will function as a writers' room for each of the series, as each student develops a show bible, then writes a beat sheet and first draft of the series pilot (half-hour format) or several episodes (short web series format). Students will also be asked to study and write about the structure of existing series and episodes in the format they've chosen. This course will satisfy a Category III Technical Elective in the Film and Media Studies Major and Minor subplan, as well as an elective within a proposed Scriptwriting Certificate.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

ENGWRT 1866 - WRITING THE ANIMATION SERIES PILOT

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the numerous disciplines of animation series writing. Animation series pilot writing will incorporate analysis, engineering of popular animated series, character creation, world building, and professional script production. The course will focus on Hollywood Style script writing, writing for animated series, formatting, oral pitching, casting voice talent, and hosting a table read. This course is a Category III elective in the Film and Media Studies major and minor, and a Technical Elective in the Production Track.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENGWR 1132 or FMST 1860 or THEA 1365 or ENGWR 1650 or FMST 0780 or ENGWR 1710

ENGWR 1900 - INTERNSHIP: WRITING

Minimum Credits: 3

Maximum Credits: 3

This course offers students an opportunity to work as interns for local media, including newspapers, magazines and television stations. The internships are complemented by close supervision and seminars dealing with some of the ethical, legal, and practical issues facing the working professional.

Academic Career: Undergraduate

Course Component: Internship

Grade Component: LG/SNC Elective Basis

ENGWR 1901 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 6

This option permits students to design their own course with the approval of a department faculty member. Students must submit a proposal to the faculty member. Note: the proposed study must not duplicate the content of regularly offered courses.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: LG/SNC Elective Basis

ENGWR 1904 - UTA IN WRITING

Minimum Credits: 1

Maximum Credits: 3

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: LG/SNC Elective Basis

ENGWR 1915 - PROFESSIONAL DEVELOPMENT IN WRITING

Minimum Credits: 1

Maximum Credits: 1

This one-credit seminar invites Writing majors to deepen and expand their understanding of professional life and options. Professional Development will allow students to explore the ways their academic work has prepared them for life after graduation, allow them to identify next steps in their career planning, and help them learn about practical aspects of professional life. They will have the opportunity to work on crucial career documents and an online portfolio.

Academic Career: Undergraduate

Grade Component: Satisfactory/No Credit

Environmental Studies

ENVSTD 1310 - HIMALAYAN GEOGRAPHY

Minimum Credits: 3

Maximum Credits: 3

The Himalayan region is characterized by a tremendous range of social and cultural diversity that corresponds to climatic, ecological and geographical variation, as well as local and regional geopolitical factors. Historical change from the emergence of early forms of social complexity centered on chiefs and their forts ' from which the regional designation of 'Garhwali' takes its name ' through the development of kingdoms and larger polities shows the intimate link between geography, environment and socio-political transformation. Similarly, local language patterns, regional religious practices, musical styles, mythology, food culture, sartorial fashion, architectural design, agricultural and transportation technologies and engineering and trade networks have all been shaped by the structure of Mountain barriers, bounded valley communities and bracketed lines of communication that follow river systems. Whereas the political economy of the Himalayas has been structured around agricultural production, and the development of elaborate field terrace systems, there have also been subsidiary economies centered on trans-Himalayan trade and pilgrimage as well as pastoral nomadism and transhumance. Since the colonial period, the Himalayas have increasingly become a place for rest, relaxation, tourism and adventure, and this ' along with further political transformations since Indian independence 'has led to the rapid development of urban areas. This course will provide a survey of Himalayan history, society and culture with a focus on the relationship among nature, the environment and geography.

ENVSTD 1311 - HIMALAYAN BIODIVERSITY

Minimum Credits: 3

Maximum Credits: 3

Ranging in altitude from several hundred meters above sea level to over seven thousand, from subtropical forests to high altitude meadows and deserts, and from areas with little or no rainfall to regions that are among the wettest in the world, the Himalayas define a geographical region of enormous geological variation and biodiversity. The goal of this course is to gain an understanding of this diversity, with a focus on ecology. More specifically we will examine ecology and ecosystems in terms of biosemiotics ' how and why organisms within an ecological niche communicate with one another, and how these patterns and structures of communication define different kinds of interdependence. Within the framework of standard classificatory schemes ' mammals, birds, reptiles, insects ' we will focus on particular species and specific niche systems for more detailed biosemiotic/behavioral analysis.

ENVSTD 1350 - UNDERGRADUATE SEMINAR

Minimum Credits: 3

Maximum Credits: 3

This seminar brings together all undergraduate majors in anthropology for a seminar on the methods by which cultures around the world change over time. Defining such methods occupies much of any anthropologist's time, be he or she an ethnographer, archaeologist, physical anthropologist or linguist. The seminar therefore examines this central problem from many perspectives and affords the student ample opportunity for personal expression as well as rewarding discussion and research in a peer group environment.

Grade Component: LG/SNC Elective Basis

ENVSTD 1399 - HIMALAYAN POLITICAL ECOLOGY

Minimum Credits: 3

Maximum Credits: 3

The Himalayan region is characterized by dramatic climatic and geological variation, a tremendous range of biodiversity and a complex ecology. Within the region there is also profound cultural variation. This course seeks to provide a critical perspective on the ecology and environment of the Himalayas by examining how different groups at the village, state, national and international level are implicated in the political ecology of the mountains. We will look at the way in which village farming communities use natural resources, what kind of pressure is put on resources as a result of development and population growth, how the mountain environment shapes the politics and resource distribution at the level of the state and, finally, how environmental and energy issues shape national policy and international relations.

Film Studies

FILMST 0001 - FILMMAKING 1: FUNDAMENTALS

Minimum Credits: 3

Maximum Credits: 3

Filmmaking is a creative process that combines art, science, craft, and collaboration. This course is a hands-on introduction to the process, starting with the building blocks of motion pictures: light and cameras, composition, editing, and visual storytelling. You will complete two short videos over the course of the semester, shooting video with DSLR cameras and editing using Adobe Premiere Pro. In-class exercises will provide a deeper understanding of making moving images. All enrolled students will be responsible for paying a course fee for the use of equipment.

Academic Career: Undergraduate

Course Component: Seminar

Course Attributes: DSAS Creative Work General Ed. Requirement, Film Studies, SCI Polymathic Contexts: Humanistic GE. Req.

FILMST 0120 - PHOTOGRAPHY 1

Minimum Credits: 3

Maximum Credits: 3

This course introduces you to the world of digital photography. During the semester, you will develop your unique photographic style through hands-on practice with camera controls, print quality, composition, and subject matter. You will explore different facets of what makes a quality photograph: exposure, quality of light, Photoshop, and digital printing. Lectures will examine the work of important contemporary and historical photographers. Grading is based on assignments, written exams and a final portfolio. All enrolled students will be responsible for paying a course fee for the use of equipment.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

FILMST 0121 - ANIMATION 1

Minimum Credits: 3

Maximum Credits: 3

This course in frame-by-frame motion picture production is designed for both beginners and seasoned animators. Over the course of the semester, you will be encouraged to experiment with a variety of media and techniques including digital 2D, hand-drawn 2D, clay, cutouts, puppets, time-lapse, and pixelation. Through lectures and demonstrations,

you will explore storyboarding, animation history, character development, acting, and the principles of animation. While drawing is one approach to animation, drawing skills are not required to succeed. All enrolled students will be responsible for paying a course fee for the use of equipment.

FILMST 0250 - BUSINESS OF PHOTOGRAPHY AND MULTIMEDIA

Minimum Credits: 3

Maximum Credits: 3

In this class students learn the basics of professional practices as they relate to various photography markets including, Editorial, Advertising, Weddings, Portraits and Fine Art Photography. Students will learn to research and apply basic marketing principles so that they can successfully promote their work and skills as a professional photographer. Students will create business cards, letterhead and promotional pieces to use in the day-to-day dealings of their business. They will learn to sequence and format their portfolio (created in Advanced Photographic Production) for both print and online viewing. Other topics include branding, blogs, SEO - analytics, artist statements, and production proposals, copyright, licensing and professional business practices and etiquette.

FILMST 0430 - AUDIO PRODUCTION

Minimum Credits: 3

Maximum Credits: 3

This course explores sound as a fundamental element of human experience and media. Audio production - the recording and editing of sound - is the focus of the class, leading to the creation of an original sound file and podcast file as a final project. Emphasis is on creating a "soundscape": a rich, multi-layered production constructed from audio sources such as interviews, narration, ambience, live events, sound effects, and music. Class demonstrations cover how various microphones work and how to use them, as well as the physics, history, and theory of sound recording. All enrolled students will be responsible for paying a course fee for the use of equipment.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies

FILMST 0601 - FILMMAKING 2: SIGHT AND SOUND

Minimum Credits: 3

Maximum Credits: 3

In this hands-on course, you will continue to acquire the skills required to design, shoot and edit HD video. Demonstrations and in-class exercises introduce more professional camera operation, lighting, sound, special effects, and editing workflows. You will apply this new knowledge and facility to several out-of-class assignments of

increasing sophistication over the course of the semester. All enrolled students will be responsible for paying a course fee for the use of equipment.

Academic Career: Undergraduate

FILMST 1001 - BROADCASTING

Minimum Credits: 3

Maximum Credits: 3

FILMST 1000 Broadcasting introduces students to television production through academic and hands-on experience, utilizing the University of Pittsburgh's new state-of-the-art television studios and equipment. In addition to students learning how to produce a live broadcast event for collegiate teams and a news broadcast, guest lecturers will talk about the industrial realities of the profession. Students will understand how to format and make a show rundown, apply graphics, utilize replay, work a television camera, comprehend audio application and mixing, produce and direct live events and news broadcast, as well as gain experience in front of the camera as news anchors, reporters and on-air talent for live events.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies

FILMST 1002 - BROADCASTING 2

Minimum Credits: 3

Maximum Credits: 3

The unique and dynamic Broadcasting 2 course will utilize every aspect of the state-of-the-art Pitt Studios, offering students a challenging and stimulating curriculum. Students will produce a Live Event Show Open (incorporating all pre-production elements), a Newscast, and a Podcast, incorporating video and animation marketing support. Students' projects will be crewed by classmates.

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: FILMST 1130

Course Attributes: Film Studies

FILMST 1130 - DIRECTING MOTION PICTURES

Minimum Credits: 3

Maximum Credits: 3

This course addresses some of the basic problems of designing and directing scenes for motion pictures. Some of the problems discussed are the relationship of film to reality, the meaning of cinematic techniques, continuity, shot selection, cut selection and visualization techniques. The format is a combination of lecture, screening and interactive group exercises. Extensive outside work is necessary. All enrolled students will be responsible for paying a course fee for the use of equipment.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: FILMST 0001 or ENGFLM 0590

Course Attributes: Film Studies

FILMST 1132 - ELEMENTS OF SCREENWRITING

Minimum Credits: 3

Maximum Credits: 3

This course will explore developing character-based stories in the screenplay form. Students will be exposed to a variety of readings, including original screenplays, related prose, and texts which reinforce basic tenets of good story telling. Students will write a completed 1st Act for a 3 to 5 part screenplay, building from idea to outline with particular attention to structure and character development.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

FILMST 1133 - INTERMEDIATE SCREENWRITING

Minimum Credits: 3

Maximum Credits: 3

This advanced course will help you develop your feature film idea into a full treatment. Weekly discussions and writing assignments focus on creating the plot, scene, sequences, setting, and subplots. By the end of the semester, you will have completed a scene-by-scene treatment of your original work. Considerable outside work is required. Grading is

based on weekly assignments, the quality of the written treatment and class participation.

Academic Career: Undergraduate

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENGWRT 0560 OR FMST 0700 OR ENGWRT 1132 OR FILMST 1132 OR FMST 1860 OR ENGLM 1499 OR FMST 1194 OR ENGWRT 0520

Course Attributes: Film Studies

FILMST 1135 - WRITING THE ORIGINAL SERIES

Minimum Credits: 3

Maximum Credits: 3

Episodic stories can be traditional TV sitcoms or drama series, serialized narratives meant to be binged on streaming networks, independent web series, even stories told through a series of Snapchat stories. As different as they are structurally, they all have similar challenges - the writer must create a rich, interesting world and populate it with compelling characters in order to keep an audience watching from episode to episode. In this course students with basic screenwriting skills will apply those skills to the creation of an episodic series, from pitching the series through developing the story arc to writing the pilot episode.

Academic Career: Undergraduate

Course Requirements: PREQ: FILMST 1132 or ENGWRT 0560

Course Attributes: Film Studies

FILMST 1140 - ACTING FOR THE CAMERA

Minimum Credits: 3

Maximum Credits: 3

This course is designed for actors who would like to improve their craft by better understanding the differences between acting for the stage and acting for the camera. The course will describe and demonstrate the contrasts between stage and screen acting in specific shooting scripts and follow that with appropriate script study, character analysis and exercise in film acting techniques. Each class will include lecture, videotaped examples of performances for analysis and critique and the practical experience of working in front of the camera.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PROG:College of General Studies

Course Attributes: Film Studies

FILMST 1145 - SOUND FOR MOTION PICTURES

Minimum Credits: 3

Maximum Credits: 3

This course will enable students to convert sound to a digital analog, recording, processing, storing and mixing sounds to varied effects in relation to visual media. Particular emphasis will be placed on the special requirements of sound for narrative film: intelligibility in voice reproduction, achieving and maintaining synchronism, and the relationship between voice, music, sound effects and story. All enrolled students will be responsible for paying a course fee for the use of equipment.

Academic Career: Undergraduate

Course Requirements: PREQ: FILMST 0500 or 0601

Course Attributes: Film Studies

FILMST 1157 - LIGHTING FOR MOTION PICTURES

Minimum Credits: 3

Maximum Credits: 3

This course allows students from both the film and video disciplines to expand their aesthetic boundaries by overcoming technical limitations. Students will learn theories of lighting to create a particular emotional, psychological, or physiological effect in the viewer, and will participate in lighting and shooting a variety of situations in class. Differences between lighting for film and video, light metering, and various lighting tools are among the topics covered. Contemporary film examples will be examined and discussed in class. All enrolled students will be responsible for paying a course fee for the use of equipment.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: LG/SNC Elective Basis

Course Requirements: PROG:College of General Studies

Course Attributes: Film Studies

FILMST 1235 - EXPERIMENTAL CAMERA

Minimum Credits: 3

Maximum Credits: 3

This will be a workshop course dealing with a variety of techniques utilizing the camera as a tool for visual information outside of its normal use and function. The course will look at the history of cameras and the many image making devices that were invented to date.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: LG/SNC Elective Basis

Course Requirements: PROG:College of General Studies

Course Attributes: Film Studies

FILMST 1580 - DIGITAL CINEMATOGRAPHY

Minimum Credits: 3

Maximum Credits: 3

This course will cover advanced video technology and professional techniques of videography. Emphasis will be placed on high image quality and meeting broadcast specifications for video and audio. Professional-quality video cameras will be covered extensively. All enrolled students will be responsible for paying a course fee for the use of equipment.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: FILMST 0601

Course Attributes: Film Studies

FILMST 1600 - FILMMAKING 3: STORY TO SCREEN

Minimum Credits: 3

Maximum Credits: 3

Building on your experiences in Filmmaking 1 and 2, you will continue to develop your style as a filmmaker while creating more ambitious work and improving your technical skills. Demonstrations cover HD video cameras and

lenses, advanced lighting and sound techniques, creating a pre-production binder, and advanced post-production workflows using Adobe Creative Cloud software. In addition to creating short projects in class, significant outside work is required, as you will take a short film from concept to a polished final version. All enrolled students will be responsible for paying a course fee for the use of equipment.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: FILMST 0601 or ENGFLM 1497 or SA 1380

FILMST 1901 - INDEPENDENT STUDY

Minimum Credits: 3

Maximum Credits: 3

Under certain circumstances students may elect to study film production on an independent basis. Such independent study will be closely supervised by an instructor and will entail the writing of a contract prior to beginning the course. Independent study will involve a minimum of eight meetings (between student and teacher) per term. All enrolled students will be responsible for paying a course fee for the use of equipment.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies

FILMST 1921 - FILMMAKING 4: CAPSTONE

Minimum Credits: 3

Maximum Credits: 3

This is a capstone course in motion picture production. You should arrive with a script for a short film which you will work on throughout the semester. The film can be any genre, and should represent the culmination of your studies in filmmaking, meeting high standards of technical and aesthetic quality. Through script workshops, pre-production reviews, and critique of rough cuts, your instructor will mentor you through the filmmaking process. All enrolled students will be responsible for paying a course fee for the use of equipment.

Academic Career: Undergraduate

Film and Media Studies

FMST 0100 - VISUAL LITERACY

Minimum Credits: 3

Maximum Credits: 3

Visual literacy is an emerging area of study which deals with the growing importance of visual culture in our contemporary world and how we interpret what is seen. This course will emphasize the process of critically viewing specific media artifacts and provide tools to students that will allow them to comprehend and evaluate information presented by a variety of forms of visual media, including television, video, film, photography, and the internet.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Creative Work General Ed. Requirement, DSAS The Arts General Ed. Requirement, Film Studies, SCI Polymathic Contexts: Humanistic GE. Req.

FMST 0120 - INTRODUCTION TO FILM

Minimum Credits: 3

Maximum Credits: 3

This is an entry-level course on the visual arts that offers the student a broad introduction to the medium of film. As part of this overview, the class will consider such issues as: the process of contemporary film production and distribution; the nature of basic film forms; selected approaches to film criticism; comparisons between film and the other media. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS The Arts General Ed. Requirement, Film Studies, SCI Polymathic Contexts: Humanistic GE. Req.

FMST 0130 - IMAGES, ICONS, AND IDEAS

Minimum Credits: 3

Maximum Credits: 3

This course develops skills to interpret visual culture in contemporary life. Using a wide variety of media, including film, television, advertisements, fashion magazines, museum exhibits, comic books, painting, graffiti, video games, the web, and photography, the course focuses on understanding how conceptions of visuality, gender, race, and politics shape definitions of high and low culture as well as questions of knowledge and being. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS The Arts General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

FMST 0150 - FILM ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to the art of the cinema, and to the techniques for its formal analysis. It examines the nature of shot composition and visual framing, the use of color, the role of lighting as a pictorial element, the potentials of camera movement, the modes of editing and the nature of image/sound montage. It also introduces students to dominant cinema forms--narrative, experimental, documentary, etc. This is a Critical Studies course and is a required course for the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS The Arts General Ed. Requirement, Film Studies, SCI Polymathic Contexts: Humanistic GE. Req.

FMST 0170 - WORLD FILM HISTORY

Minimum Credits: 3

Maximum Credits: 3

This course both introduces students to techniques of film analysis and acquaints them with major works and movements in international cinema. The course pays particular attention to the evolution of film narrative and visual style through landmarks in film development--European avant-garde films, British documentary, Italian neo-realism, etc. This is a Critical Studies course and is a required course for the Film and Media Studies major and minor.

FMST 0300 - ITALIAN CINEMA

Minimum Credits: 3

Maximum Credits: 3

The course will present Italian movies from the forties to the present time. The films will provide us not only with the pleasure afforded by outstanding works of art but also with a means of assessing the central intellectual, historical, political, and economic phenomena that have shaped today's Italy.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies

FMST 0301 - HISTORY OF ITALIAN CINEMA

Minimum Credits: 3

Maximum Credits: 3

Taught in English, this course will introduce students to the history of cinema in Italy from the era of silent films to the present day. We will analyze films from all periods and consider a diversity of forms and genres, including mainstream narrative films, art films, avant-garde experiments, and documentaries. In our century-long journey from the silent blockbuster movies of the 1910s to the Italian super-hero films of the 2010s, we will get to know world-class directors such as Federico Fellini and genre masters such as Dario Argento. We will see what Italian cinema has borrowed from other traditions, and what it has given in return. We will appreciate how Italian b-movies would not exist without American blockbusters, and how a director such as Quentin Tarantino would not exist without Italian b-movies. We will learn about Italy and about how much of its history and of its culture can be seen – hidden or deliberately displayed – through the frames of Italian films. No previous course experience with cinema is presumed, as we will learn the basics of how to watch, discuss, and write about films and the film industry. Readings will be available in English and all films will have English subtitles. This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

FMST 0500 - INTRODUCTION TO FILM GENRES

Minimum Credits: 3

Maximum Credits: 3

This course surveys major film genres, which may include Westerns, musicals, horror, film noir, screwball comedy, etc. We will trace the history of film genres from the studio era to the present, including European transformations. The course seeks to relate film genres to the culture that created them. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

FMST 0505 - INTRODUCTION TO NEW MEDIA

Minimum Credits: 3

Maximum Credits: 3

In this course we will look at how new media -- ranging from television, computers, digital image production, video games, to social media platforms and smart phones -- have begun to supplant the social and cultural prominence of film and other traditional media. We'll look at how these media work: at the history and theory of their development, at the changes they have brought about in a broader media culture, and at their social status and significance (e.g., The place they occupy in culture, the kinds of interactions they make possible). This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Attributes: DSAS The Arts General Ed. Requirement, Film Studies, SCI Polymathic Contexts: Humanistic GE. Req.

FMST 0700 - SCREENWRITING AND NARRATIVE

Minimum Credits: 3

Maximum Credits: 3

This course will explore developing character-based stories in the screenplay form. Students will be exposed to a variety of readings including original screenplays, related prose, and texts which reinforce basic tenets of good story telling. Students will write rigorously building from idea to outline with great attention to structure and character development. Students will develop writing abilities, critical facilities in approaching work, and an understanding of principles of storytelling common in narrative forms.

FMST 0710 - FILMMAKING: PRODUCTION AND CRITICISM

Minimum Credits: 3

Maximum Credits: 3

This course introduces filmmaking practices as related to cinematic expression, aesthetics, criticism, and ethics. Working in groups, students will produce short film projects. All aspects of production are viewed as a creative extension and continuation of the film writing, directing, and producing process. Through lectures and a range of

readings, the class will explore craft, aesthetic, production and storytelling issues. This is an introductory Production course and counts for Category III towards the Film and Media Studies major and minor.

Course Attributes: DSAS Creative Work General Ed. Requirement, DSAS The Arts General Ed. Requirement, Film Studies, SCI Polymathic Contexts: Humanistic GE. Req.

FMST 0760 - CRITICAL MAKING

Minimum Credits: 3

Maximum Credits: 3

The Maker movement is an emerging social and media form that is at once highly networked and post-digital. Making is situated at the intersection of social media, the online gift economy, and a participatory, interventionist engagement with one's physical environment. Drawing on open source ideals and innovation structures -the free sharing of code to enable collaborative development - making has become an attempt to democratize material culture through networked access to tools. MakerSpaces and MakerHubs have become critical nodes in efforts to materialize the virtual gift economy of the Internet. In this course we will engage the intellectual and practical roots of this new medial and social form and engage in our own critical making projects, utilizing scanning, modeling, and 3D printing technologies. We will begin by looking at the history and philosophy of open source software development, and then the political, social, cultural, and technological developments that have together given rise to critical maker culture. We will then learn some of the basic tools of scanning, modeling, and 3D printing. After initial modeling and printing assignments, students will form groups and develop collaborative final projects that involve materializing complex conceptual relationships from a topic of your choice and in a medium of your choice. The aim of this course is to "close the circuit" between creative conceptual production, social networking, and materialized object relationships. Critical making is about critically engaging and creatively remaking the world around us. By the end of the semester, you will become a critical maker! This is a Critical Studies course with Production elements and counts for Category III towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Creative Work General Ed. Requirement, Film Studies, SCI Polymathic Contexts: Humanistic GE. Req.

FMST 0762 - MEDIA/ECOLOGY

Minimum Credits: 3

Maximum Credits: 3

From the late twentieth century to the present, ecology as a scientific discipline and set of cultural narratives has risen to the forefront of knowledge production as a way to study and understand complex biological systems, their environments, and their internal dynamics. During the same period, media systems have grown exponentially in complexity until they too have begun to exhibit some of the behaviors of ecological systems, including self-organization, feedback, evolution, and emergent properties. The term "media ecology" captures both this new, nonlinear systems approach to understanding media itself as well as the intersection between natural ecosystems and the technological assemblages with which they are intertwined. This course will explore both media that interface with natural ecosystems and works that engage contemporary media systems at different scales. The secret life of information, contagious media, and the post-natural ecologies of our present and future will challenge us to conceive of Media and Ecology as a single coupled system: the emblem of our contemporary environment. Students will have the option to produce collaborative media projects that explore the themes of the course. These can take the form of simulations, games, network graphing, film or video projects, local ecosystem analysis and/or visualization, or the mapping and analysis of a media ecosystem that interfaces with the environment. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

FMST 0780 - INTRODUCTION TO AUDIO STORYTELLING

Minimum Credits: 3

Maximum Credits: 3

Created for cross-listing with ENGWR 710. Podcasts are growing as an industry and an art form. There has never been a better time to tell stories in sound. In this introductory production course, we'll explore the craft of narrative audio across genres, including live storytelling, profiles, and flash fiction. Through a series of short creative projects, you'll learn the foundations of interviewing, field recording, scripting, structure, and sound design, while gaining basic technical competency in professional audio editing software. Class sessions will include a blend of discussions, workshops, and hands-on production, preparing you for more advanced work in the medium. This is a writing- and production-intensive course. You should expect to invest significant time and energy planning, scripting, recording, and editing your projects outside of class-and significant time in class discussing your peers' work through both written and oral critiques. This course welcomes writers from all backgrounds and genres. No previous experience with audio production is expected or required.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SU3 Elective Basis

FMST 0790 - TECHNOLOGIES OF THE BODY

Minimum Credits: 3

Maximum Credits: 3

This course considers how we learn new technologies by looking at the treatment of the body in cinema and television, as well as animation, sports, gaming, and VR. In addition to analyzing media examples, students will experiment with low-tech and high-tech adaptations of optical toys and smart phone cinema to explore how movement and the body have been imagined in science and entertainment. This is a Critical Studies course with Production elements and counts for Category III towards the Film and Media Studies major and minor.

FMST 0800 - FILMMAKING 1: FUNDAMENTALS

Minimum Credits: 3

Maximum Credits: 3

Filmmaking is a creative process that combines art, science, craft, and collaboration. This course is a hands-on introduction to the process, starting with the building blocks of motion pictures: light and cameras, composition, editing, and visual storytelling. You will complete several short video projects over the course of the semester, shooting video with DSLR cameras and editing using Adobe Premiere Pro. In-class exercises will provide a deeper understanding of making moving images. No previous filmmaking experience is required. This is a required course for the Film and Media Studies Major Production Track.

FMST 0802 - PHOTOGRAPHY 1

Minimum Credits: 3

Maximum Credits: 3

This course introduces you to the world of digital photography. During the semester, you will develop your unique photographic style through hands-on practice with camera controls, print quality, composition, and subject matter. You will explore different facets of what makes a quality photograph: exposure, quality of light, Photoshop, and digital printing. Lectures will examine the work of important contemporary and historical photographers. Grading is based on assignments, written exams and a final portfolio.

FMST 0805 - ANIMATION 1

Minimum Credits: 3

Maximum Credits: 3

This course in frame-by-frame motion picture production is designed for both beginners and seasoned animators. Over the course of the semester, you will be encouraged to experiment with a variety of media and techniques including digital 2D, hand-drawn 2D, clay, cutouts, puppets, time-lapse, and pixelation. Through lectures and demonstrations, you will explore storyboarding, animation history, character development, acting, and the principles of animation. While drawing is one approach to animation, drawing skills are not required to succeed.

Course Attributes: Film Studies

FMST 0816 - STUDIO LIGHTING

Minimum Credits: 3

Maximum Credits: 3

This is a production course in studio photography. The emphasis will be on lighting techniques. Assignments will include portraiture, tabletop set ups and synchronizing flash units with daylight. Considerable outside time is required to complete assignments.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies

FMST 0826 - POST-PRODUCTION

Minimum Credits: 3

Maximum Credits: 3

In this course, students will explore the possibilities of digital editing through the software of Adobe's Creative Cloud suite, concentrating on Premiere while incorporating AfterEffects, Audition, and Media Encoder using Dynamic Link. Students will review basic editing theory and discuss more advanced concepts relating to continuity editing and various approaches to discontinuity. Students will edit a short continuity scene using footage shot in class or provided by the instructor, and a short profile piece based on subject interviews. Each student will also present an analysis of the editing in a feature film, series episode, or other motion picture. No filmmaking experience is necessary. This course counts as a Technical Elective and a Category III elective in the Film and Media Studies Minor or Production Track.

Academic Career: Undergraduate

Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Attributes: Film Studies

FMST 0827 - ADVANCED EDITING

Minimum Credits: 3

Maximum Credits: 3

"Advanced Editing" offers students engaged in film and media production the unique opportunity to focus and expand their editing skills through the process of appropriating and repurposing pre-existing audiovisual materials. Students will work with materials from a range of sources, including popular Hollywood movies, digitally archived "orphan" films, television commercials, and propaganda films. The act of transforming already existing creative works into newly created short film projects will allow three key learning objectives to be met: (i) students will further hone their awareness of the ideological and formal functions of their source media as they decontextualize and recontextualize it for alternative purposes; (ii) students will develop a better awareness of their own critical and creative orientations as they are required to position their own projects in relation to others; (iii) students will develop their competence with multiple professional NLEs like Avid Media Composer, Adobe Premiere and DaVinci Resolve. By focusing on nonfiction and experimental editing practices, where the meaning and purpose of available footage is open for interpretation, students enrolled in the course will experience the transformative power of editing to shape and understand media.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SU3 Elective Basis

Course Requirements: PREQ: FMST 0826 or FMST 0845 or SA 1380 or FMST 1193 or FMST 1775

FMST 0830 - BUSINESS OF PHOTOGRAPHY AND MULTIMEDIA

Minimum Credits: 3

Maximum Credits: 3

In this class students learn the basics of professional practices as they relate to various photography markets including, Editorial, Advertising, Weddings, Portraits and Fine Art Photography. Students will learn to research and apply basic marketing principles so that they can successfully promote their work and skills as a professional photographer. Students will create business cards, letterhead and promotional pieces to use in the day-to-day dealings of their business. They will learn to sequence and format their portfolio (created in Advanced Photographic Production) for both print and online viewing. Other topics include branding, blogs, SEO - analytics, artist statements, and production proposals, copyright, licensing and professional business practices and etiquette.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: LG/SNC Elective Basis

FMST 0833 - PRODUCING: FILM, TELEVISION AND OTHER MEDIA

Minimum Credits: 3

Maximum Credits: 3

Producing: Film, Television, and Other Media is a production Film and Media Studies course designed to give students a breadth of knowledge of what is entailed from taking an idea from conception to completion in various forms of media production. Students will read texts and articles with producers in film, television, webseries and podcasts and examine case studies in each of these. At the mid-term, students will do a detailed proposal on a project they would like to bring to fruition, and by the end of the term, either produce a short production piece, a pitch deck, or a detailed production plan for their project. This is a Category III production course.

Academic Career: Undergraduate

Course Component: Lecture
Grade Component: LG/SU3 Elective Basis

FMST 0835 - ELEMENTS OF AUDIO PRODUCTION

Minimum Credits: 3

Maximum Credits: 3

This course explores sound as a fundamental element of human experience and media. Audio production techniques are the primary focus of the class. Hands-on training prepares students to record broadcast-quality audio across a range of contexts; including interviews, narration, field recordings, and live events, and to edit and mix those recordings for various media using industry standard software. Class discussions cover how various microphones work and how to use them, as well as the physics, history, and theory of sound recording. This course welcomes students looking to deepen their understanding of audio production, as well curious beginners. This course fulfills a Technical Elective requirement in the Film and Media Studies Production Track.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: LG/SNC Elective Basis

FMST 0845 - FILMMAKING 2: SIGHT AND SOUND

Minimum Credits: 3

Maximum Credits: 3

In this hands-on course, you will continue to acquire the skills required to design, shoot and edit video. Demonstrations and in-class exercises introduce more professional camera operation, lighting, sound, and editing workflows. You will apply this new knowledge and facility to several out-of-class assignments of increasing sophistication over the course of the semester. This is a required course for the Film and Media Studies Major Production Track.

Academic Career: Undergraduate

Course Attributes: Film Studies

FMST 1190 - CITY SYMPHONY

Minimum Credits: 3

Maximum Credits: 3

This is a study abroad course taught at the Pittsburgh-London Film Program. The city has been an integral part of the filmmaker's vocabulary since cinema's genesis in the late nineteenth century. The urban environment and the craft of film grew up together in the twentieth century, seasoned by various convergences of technology, one notable one in the 1920s and another over the last fifteen years. This course bridges these two periods, drawing on history and theory to interrogate the form of the city symphony film essay, and develop an urban filmmaking practice that allows students to gather and formulate their own reflections on London. The course is made up of two strands, City Symphony and Urban Scavenger, taught by the same team in double sessions. Students will be strongly encouraged to bring ideas from one to the other, and to combine critical analysis with practical filmmaking. This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies

FMST 1191 - CITY MADE STRANGE: LONDON ON SCREEN IN HORROR AND SCIENCE FICTION CINEMA

Minimum Credits: 3

Maximum Credits: 3

This is a study abroad course taught at the Pittsburgh-London Film Program. This course aims to explore the deep funds of strangeness and otherness that permeate London's places and spaces, through examining films and television series that show the city as a brimming reservoir of past and future shocks. The course will examine science fiction, horror and noir/neo-gothic cinema and television from all eras, with a particular emphasis on works that take London itself as a major part of their story. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

FMST 1192 - POLITICAL MEDIA: FILM AND POWER IN THE 20TH CENTURY

Minimum Credits: 3

Maximum Credits: 3

This is a study abroad course taught at the Pittsburgh-London Film Program. This class examines the way media has been constructed and used by elite institutions to advance broad and specific goals for the management of populations

and the establishment of political and economic conditions beneficial to those institutions. It also looks at the use of media by progressive and radical groups to challenge those conditions and institutions, beginning in the early twentieth century and expanding in the era of digital media. It includes particular focus on cinema and imperialism, making use of the resources in London and online at the Colonial Film Project. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

FMST 1194 - INDUSTRY INSIDER: FROM SHOWRUNNER TO FINAL CUT

Minimum Credits: 3

Maximum Credits: 3

This is a study abroad course taught at the Pittsburgh-London Film Program. This course will give students the opportunity to learn about screenwriting from a professional screenwriter and producer. The scope of the course will take students through the process of writing for screen based on the very simple stages of concept, story, outline, draft, and the revision and development process. Students will also learn about the pitch process and be given opportunities to practice the pitch based on their own individual stories. This is a Production course and counts for Category III towards the Film and Media Studies major and minor.

FMST 1195 - DIVERSITY IN BRITISH CINEMA: RACE, GENDER AND CLASS

Minimum Credits: 3

Maximum Credits: 3

This course considers race, gender and class in close dialogue with the underlying cultural phenomena that shape the British cinematic landscape. The course is designed to introduce students to British cinema whilst engaging in theory, practice and analysis. It intertwines historical accounts with film screenings and lectures as well as discussions with filmmakers and curators. This is a Category I course in the FMST major and minor for the Pittsburgh London Film Program study abroad.

Academic Career: Undergraduate

Course Component: Lecture
Grade Component: LG/SNC Elective Basis

FMST 1196 - DIGITAL MEDIA PRACTICE

Minimum Credits: 3

Maximum Credits: 3

This intensive and comprehensive course will allow students to create their own portfolio, including a selection of digital media techniques used in a wide range of settings, from marketing videos to audio-visual essays. Quickly and efficiently students will learn how to produce videos for social media, conduct interviews and present themselves in front of the camera. The course will offer basic skills in digital photography, camerawork, editing and podcast production. Students will also be able to choose one of the four specialized areas which include VR production, social media advertising, audiovisual essay filmmaking and digital journalism. The content of the students portfolios will be produced as part of weekly assignments throughout the course, as students develop their skills, with a final project in their area of specialization.

Academic Career: Undergraduate

FMST 1197 - MOVING IMAGE EDITING

Minimum Credits: 3

Maximum Credits: 3

Moving image editing: theory and practice is based on an innovative approach to editing techniques that sees them in a close dialogue with the underlying cultural phenomena that shape the current media landscape. The course is designed to introduce students to the theory, practice and art of editing. It intertwines historical accounts of editing practice with media analysis and hands-on exercises. This is a Category III course in the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

FMST 1198 - GOGGLEBOX: BRITISH TELEVISION ANALYSIS AND INDUSTRY

Minimum Credits: 3

Maximum Credits: 3

The gogglebox, the tv set, or perhaps these days your phone or tablet: The small screen takes many forms these days, and is 'on demand' in a way unlike any other time in the last century. Britain has a long and complex history of televisual endeavours. The influence of the BBC, ITV, Channel Four and now the streaming giants on British social, cultural and economic practices is immeasurable. The theoretical half of this course will critically engage with genre, national identity, culture wars and the sense of self Britain gets from the massive output of content on these shores, whilst simultaneously examining the nuances of British television industry practices, funding structures and distribution networks. The practical half of this course will seamlessly integrate practical exercises that make connections between these case studies and technological and industry policies and practices. While the title of this course refers to British television, this misnomer will form an undercurrent running through every session: who decides what British identity vis a vis television is? Who is defined as British on screen? What outputs are embraced as emblematic of Britain and who is excluded and overlooked? Why say British at all and not English since this course will not examine specific Scottish, Welsh or Irish productions? Through written critical work and practical exercises in pitching ideas and analyzing television scripts, students will leave with a critical and practical foundation in the British television industry. This course is a Category II elective that counts for the major, minor, and TVBA certificate. This course takes place in London as part of the Pittsburgh London Film Program.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

FMST 1199 - THE AUSTRALASIAN NIGHTMARE

Minimum Credits: 3

Maximum Credits: 3

This is a study abroad course taught at Pitt in Sydney. The classic American horror is derived from a gothic heritage, an inheritor of a European context and its tropes; the falling apart of civilization through wars, disease, economic collapse, and a deconstruction of society. The horror that the current, post 9/11 generation has produced is inherently different; it plays upon central themes that pull from an Australasian context, driven from the horror films of Australia, Japan, and Korea. These films have been made and distributed outside of an American context but then repackaged to the west in remakes and revisits that awaken an American audience to themes of horror that are decidedly non-European in identity. This course will examine these films, comparing and contrasting European and Australasian tropes for horror as well as their reflection and impact on society. This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Attributes: Film Studies

FMST 1200 - INTRODUCTION TO EAST ASIAN CINEMA

Minimum Credits: 3

Maximum Credits: 3

This course investigates the ways in which film addresses and treats the major socio-cultural issues in modern society through a critical study of the works of Chinese and Japanese master filmmakers. The course focuses on changes in marriage and family patterns, women's roles and the plight of youth.

Academic Career: Undergraduate

FMST 1240 - INTRODUCTION TO KOREA THROUGH FILMS

Minimum Credits: 3

Maximum Credits: 3

Introduces Korean cinema to students in broader (and at times narrow) cultural, social, and aesthetic contexts to investigate transnational media production and circulation, globalization, consumer culture, commercialization, and construction of national, ethnic and gender identities. Through this course, students will learn more about specific issues pertaining to Korea and its people, as well as gain familiarity with some prominent film directors of Korea's. They will develop a critical and historical consciousness of Korean visual culture, assessing the worth and content of the films.

Academic Career: Undergraduate

FMST 1250 - BOLLYWOOD AND INDIAN CINEMA

Minimum Credits: 3

Maximum Credits: 3

This course will offer an overview of various Indian cinema traditions in their historical, aesthetic, and cultural contexts. Students will learn how to analyze Indian films from the 1920s to the present in terms of formal techniques, narrative conventions, and viewing contexts and also in terms of broader historical contexts such as colonialism and the independence movement. The history and formal conventions of Mainstream Bombay Cinema will be counterpointed with other kinds of Indian film. This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

FMST 1260 - BRITISH FILM

Minimum Credits: 3

Maximum Credits: 3

This course explores the status of British film as a national cinema. It examines the forms and styles indigenous to

British cinema; the relationship of British cinema to British social reality; the changes in film language, production and forms as they relate to the development of British cinema. This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies

FMST 1261 - IRISH FILM

Minimum Credits: 3

Maximum Credits: 3

Irish Film will consider what it means to think about films in terms of being a national cinema or part of the transnational cinema during the global Hollywood era. We will also consider how the UK and USA imagine Ireland as well as what effect Irish cinema has had on other cinemas due to immigration and the increasing visibility of Irish directors, locations, and actors in the international industry. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor, and also counts for the Irish minor.

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies

FMST 1270 - AMERICAN FILM 1

Minimum Credits: 3

Maximum Credits: 3

This course explores the development of American film from 1895 to 1939. Though the course will emphasize the evolution of American film style and genre, attention will also be paid to the history of the American film industry, and the relationship between Hollywood cinema and the broader cultural context of American society. The course will provide the student with the historical and aesthetic background with which to better appreciate the American cinema of today and yesterday. This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies, Undergraduate Research

FMST 1271 - AMERICAN FILM 2

Minimum Credits: 3

Maximum Credits: 3

This course explores the development of American film from 1940 to the present. The course examines the evolution of American film style and genre, the history of the American film industry, and the relationship between Hollywood cinema and the broader cultural context of American society. This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Seminar

FMST 1292 - NAZI CULTURE

Minimum Credits: 3

Maximum Credits: 3

In an era of Alt-Right and growing neo-Nazi movements, this course takes us to the past to understand our present. We will rely on the films and other primary sources of the Third Reich to understand the conditions in Germany and what motivated the Germans to make the choices they did. We will examine anti-Semitism, racism, gender and sexuality, mass culture, the cult of the leader, propaganda, and more.

FMST 1293 - NEW GERMAN CINEMA

Minimum Credits: 3

Maximum Credits: 3

Devastated after World War II, starting in the 1960s a number of German directors like Herzog, Fassbinder, Wenders, Kluge, Annders-Abrahms managed to bring international attention back to German cinema. They competed against the film industry of Hollywood under difficult conditions of production, and in many instances made the difficult transition out of the art house and into the mainstream movie theater. Yet these names only represent a small portion of those directors active in the new German cinema. This class will examine the aesthetic and technical contributions of new German cinema as well as the historical and social context of its production. The technological, financial, and intellectual destruction caused by the experience of national socialism and World War II required creative responses that have led to a solid and symbolically rich body of work. In examining the themes and experimental forms of various filmmakers, students will gain insight into the issues that occupied the German public sphere from the 1960s onward.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

FMST 1321 - EASTERN EUROPEAN COMMUNISM AT THE MOVIES

Minimum Credits: 3

Maximum Credits: 3

After the 1917 revolution in Russia, Lenin famously said: "to us film is the most important of all the arts." Communists were to use cinema for propaganda purposes, in order to carry out massive state-wide campaigns aiming to bring radical social change. However, Soviet avant-garde filmmakers were also concerned with revolutionizing filmmaking

itself. Some three decades after Lenin's remarks, the leaders of the countries of Eastern Europe which had become "Soviet satellites" after World War II, attempted to use censorship and control over the arts and cinema to produce effective propaganda for their own political campaigns. Writers, artists, and filmmakers were coveted allies of these new communist regimes that came to power in the 1940s. Again, however, filmmakers and actors did not always toe the Party line. Some were able to use film to craft complex works with subtle messages portraying aspects of daily life as it was experienced by ordinary people under the new regimes. Films that we will watch and analyze, released in Hungary, Romania, Yugoslavia, Poland, and Czechoslovakia in the decades before the fall of communism in 1989 managed to depict, evoke, and criticize "really existing communism." This course will trace the history of East European communism and of East European film-making from 1944 to 1990, acquainting students with examples from an exceptional body of cinematographic work together with the broad outlines of East European history. Students will learn to "read" films from 20th century Eastern Europe in their cultural, political, and historical context. This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

FMST 1340 - U.S. LATINO FILM

Minimum Credits: 3

Maximum Credits: 3

The major purpose of the course consists of illustrating and analyzing the role of the audiovisual media film (fiction and documentary) and video (and television, to a certain degree) for an understanding of the socio-cultural and conceptual status that Latina/o identities have acquired in today's society. Thematically, the course will focus on themes of modernity vs. tradition in U.S. Latino culture. The course uses a selection of audiovisual materials which is fairly innovative in its variety. Chicano films and videos will constitute the major part of the material.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies

FMST 1341 - LATIN AMERICAN FILM & MEDIA

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the study of Latin American film and media by both engaging in critical viewing/reading of Latin American film and media production, as well as an exploration of relevant topics and theoretical frameworks. We will engage with questions of film and representation, art and politics, and culture and economy.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Diversity General Ed. Requirement, DSAS Geographic Region General Ed. Requirement, DSAS The Arts General Ed. Requirement, Film Studies, SCI Diversity General Ed. Requirements, SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Contexts: Humanistic GE. Req.

FMST 1346 - DRUGS, MONEY AND VIOLENCE: NARCO-CULTURE IN LATIN AMERICAN FILM

Minimum Credits: 3

Maximum Credits: 3

This course explores the complex, multi-layered, and often contradictory world of transnational narcotics traffic particularly as it is configured in and through contemporary Latin American cinema. Departing from the contention that the relations between drug trafficking networks, governmental responses to the drug trade, drug production and consumption, are not clear and transparent as depicted in dominant discourses exemplified by the narrative of the War on Drugs, this course analyzes narco-culture not as a simplistic response centered merely on the idolization of drug lords or drug culture, but as a dynamic creative current that tries to make sense of the complexity and violence of the world of drugs. Why do official narratives of capitalist enterprise disavow the capitalist foundation of the drug trade? How are discourses of security and protection ironically embodied in violent militarized actions and neo-imperial ventures? How does the criminalization of certain cultural practices and symbols - particular languages, dress codes, music - relate to the racialization and sexualization of certain peoples and bodies? Moreover, how can we understand the (global) commercial success of narco-culture as exemplified by recent mainstream media and popular culture? In this course, we will address these questions by engaging in close reading/viewing of contemporary Latin American films that center on representations and (re)productions of narco-culture. These primary works will be examined in conjunction with secondary readings that discuss topics relevant to our analysis of narco-culture, such as globalization, neoliberal capitalism, immigration, femicides, cultural appropriation, and racial and gender construction.

Academic Career: Undergraduate

FMST 1350 - FILM DIRECTORS

Minimum Credits: 3

Maximum Credits: 3

This is a course that changes topics every term; please see the Topic title and/or Class Notes for the specific director. This course looks at the mode of production of films and works to understand the interweaving contributions of directors, producers and screenwriters. It will also consider less personal forces--social climate, studio style, genre and audience taste. It examines the films of particular directors for signs of personal style, theme, or personal preoccupation. This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

FMST 1352 - ORSON WELLES

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the screen career of Orson Welles. In considering his films, the course explores the evolution of Welles' cinematic style; the thematic concerns of his work; the ideological implications of his fictional universe; and his contribution to the development of American narrative cinema. This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies

FMST 1355 - HITCHCOCK'S FILMS

Minimum Credits: 3

Maximum Credits: 3

This course will look at the development of Hitchcock's cinema as a way of touching upon issues central to the study of film as a cultural force; the relationship between art and entertainment; the social origins of suspense and fear; the role of the director in creating a film's meaning; the role and function of genre and cross-generic influence. We will closely look at films from all phases of Hitchcock's career and examine what their style, tone, and subject matter reveal about the powers of cinema and Hitchcock's influence on a new generation of directors. This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: Writing Intensive Course (WRIT)

FMST 1357 - THE FILMS OF STANLEY KUBRICK

Minimum Credits: 3

Maximum Credits: 3

This course aims to discover the extent to which Kubrick's films are unified in style and theme. We will explore their sources in other films, reputed novels and short stories. Special attention will be paid to themes commonly found in Kubrick; a satirical view of society, the links between violence and sexuality, etc. This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies

FMST 1360 - SPIKE LEE

Minimum Credits: 3

Maximum Credits: 3

Spike Lee's films, videos, and TV work have been both provocative and groundbreaking, challenging the structures of American filmmaking at the level of production, reception, and film style. Including feature films, documentaries, music videos, and mini-series, his work has a diversity that discourages the restrictive labels of African-American director or independent director. This course will cover most of this body of work in terms of Lee's cinematic style and cultural concerns, and also in terms of the cultural debates his work has triggered or participated in. By the very nature of these films, a Spike Lee course has to engage with much more than directorial style and vision alone, and will thus also be an opportunity to consider various approaches to the study of film. This is a Critical Studies course and counts

for Category I towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies

FMST 1364 - GUILLERMO DEL TORO

Minimum Credits: 3

Maximum Credits: 3

This course aims to discover the extent to which Guillermo del Toro's films and other media texts are unified in style and theme in order to explore auteurism, transnational critical approaches, genre theory, transformations across media forms and exhibition spaces (from SVOD to theatrical distribution to museum installations), adaptation studies, and horror studies, in particular. Guillermo del Toro is commonly identified with two other contemporary Mexican directors achieving international success (Alejandro Gonzalez Inarritu and Alfonso Cuaron), but his production of genre films and revisionist genre films, and the intertextuality of his works present an excellent case study of the uses and limitations of an auteurist approach. Thus, the course will examine films, television shows, video games and their intertexts and in relation to del Toro's body of work and Latin American, transnational and global contexts. This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

FMST 1410 - FILM AND POLITICS

Minimum Credits: 3

Maximum Credits: 3

This course examines film production, economics and forms of representation as reflections of political attitudes. We will study a variety of narrative and non-fiction films which reveal differing political points of view, ranging from those that legitimize the dominant culture to those which criticize, if not challenge, dominant attitudes. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Attributes: DSAS The Arts General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req., Writing Intensive Course (WRIT)

FMST 1411 - FILM AND LITERATURE

Minimum Credits: 3

Maximum Credits: 3

Cinema has enjoyed a close relationship with literature, borrowing from literary source texts and forms. Yet this relationship is not uncomplicated, nor is it unidirectional: the cinema offers new possibilities for novelistic source texts, poses interesting problems for literature's authors and readers alike and provokes a reconsideration of age-old debates of the divide between words and images. Thus this course examines film's convergence with, and divergence from, literary forms. Poised at the intersection of the study of film and the study of literature, it enables us to explore what is most unique -- and perhaps most interesting -- about each of the media as we consider their overlap. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: DSAS The Arts General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req., Writing Intensive Course (WRIT)

FMST 1412 - CINEMA AND VIDEO GAMES

Minimum Credits: 3

Maximum Credits: 3

This course introduces a comparative study of cinema and video games, exploring the historical, cultural, aesthetic, technological and industrial intersections between these two media forms. Combining film screenings with game plays, we will try to understand how cinema and video games inform, influence and converge with each other, as well as how the interrelations between these two media may have affected visual cultures at large. We will focus on race, gender, and ethical issues of visual representations in both cinema and video games, discussing the political questions of identity, power and representation in popular culture. The class also intends to provide students with analytical frameworks in film and media studies to guide their critical interpretations of the technology, history, and forms of video games. Through writings of game designers, film scholars and media theorists, we will consider the foundational role of the discipline of film studies in the formation of critical game studies. Students will be introduced to some key theoretical questions and concepts, such as realism, affect, hypertext, interactivity, post-humanism, media convergence and participatory culture, which are crucial for understanding the technological, cultural and social conditions of both cinema and video games in the digital age.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies

FMST 1415 - FILM CENSORSHIP AND AMERICAN CULTURE

Minimum Credits: 3

Maximum Credits: 3

This course considers some of the most important censorship battles in American history. As the first mass medium to pose a serious threat to the cultural hegemony of the genteel middle class, the movies initiated both a debate about the place of media in our society and a series of struggles over the control of commercialized leisure. This course seeks a deeper appreciation of the complexities of contemporary media politics through an engagement with the history of motion picture regulation. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Historical Analysis General Ed. Requirement, SCI Polymathic Contexts: Soc/Behav. GE. Req., Undergraduate Research

FMST 1416 - GENDER AND FILM

Minimum Credits: 3

Maximum Credits: 3

This course examines and questions aspects of gender and sexuality in international cinema. While the course considers the intersectional realities affecting masculinity and femininity on-screen, it will also consider who is behind the camera and ideas of "authentic" representation. Attention will also be paid to the social and historical context in which these films were made, in an attempt to understand the relationship between art and ideology. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: DSAS Diversity General Ed. Requirement, SCI Diversity General Ed. Requirements, Writing Intensive Course (WRIT)

FMST 1417 - QUEER CINEMAS

Minimum Credits: 3

Maximum Credits: 3

While sexuality in the cinema has been subjected to various ideological and regulatory constraints, the same has also been true of lived sexuality. Likewise, and despite appearances, the history of sexual representation in the media is just as dynamically diverse as the history of sexualities as lived in the twentieth and twenty-first centuries. This course is both a general introduction to queer theory—especially as it relates to visual culture—and an investigation into queer theory's impact on media history, media criticism, and/or film and video production. A portion of the course will be devoted to reevaluating the history of the dominant media's narrative representation and regulation of queer bodies and subjectivities. The course will also serve as a brief survey of contemporary LGBTQ media practices. Course screenings and readings are occasions for pleasure, as well as occasions to think through the implications and problems of different, queer, and deviant representational strategies.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

FMST 1420 - THE STAR SYSTEM AND THE MOVIES

Minimum Credits: 3

Maximum Credits: 3

This course will deal with all aspects of the phenomenon of stardom in film: the production of stars, film acting, and fandom. This is not a course on any particular star, but we will use case studies of individual stars for our weekly focus. We will draw on film examples from the old Hollywood studio system as well as from post-studio films and popular culture. A particular emphasis of the course will be gendered differences between star images. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: Undergraduate Research, Writing Intensive Course (WRIT)

FMST 1421 - GLOBAL STARDOM AND CELEBRITY

Minimum Credits: 3

Maximum Credits: 3

This course will introduce students to the analysis of the "star text" of individual stars/celebrities, which involves the interrelationship of screen-mediated roles, off-screen appearances and information, publicity material, and cultural context. Students will research a specific star/celebrity as a nexus of global circulation and fandom, while addressing some core methodological questions: what is the difference between star biography and star analysis? How do we read the "star/celebrity text" in different local contexts and ideas about the public and the private? How does stardom presume and shape norms of identity pertaining to gender, sexuality, social class, race/ethnicity, bodily norms, and other cultural values? This is a Critical Studies course and counts for Category I towards the Film and Media Studies

major and minor.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies, Undergraduate Research

FMST 1440 - FILM SOUND

Minimum Credits: 3

Maximum Credits: 3

In this course, we will shift the way we think about films and learn to listen to films, using the language and tools of audio analysis to analyze the aural environment produced by films. Topics include the history of film sound, the relation of sound and image, aural and visual pleasures, sound and narrative meaning, soundscapes and theories of shock and modernity, the aesthetics of analog and digital sound in cinema, the 'realism' of recorded sound, film sound and space, sound in documentary cinema, and culturally specific theories of sound. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS The Arts General Ed. Requirement, Film Studies, SCI Polymathic Contexts: Humanistic GE. Req.

FMST 1450 - TOPICS IN FILM

Minimum Credits: 3

Maximum Credits: 3

This is a course that changes topics every term; please see the Topic title and/or Class Notes for the specific focus. Explores selected issues in the production, reception, themes, or theory of film. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies

FMST 1508 - TELEVISION ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

This course studies television as a visual medium, an industry, and as a cultural force by examining the forms television programming takes and the way these structures influence viewer response. We will examine specific television genres from longstanding series types (sitcoms, cop shows, serials, etc.) to the gendered forms of "quality" television. This is a Critical Studies course with Production elements and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: DSAS The Arts General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req., Writing Intensive Course (WRIT)

FMST 1510 - ANIMATION STUDIES

Minimum Credits: 3

Maximum Credits: 3

This course surveys the history of animation, both American and international. Providing an understanding of animation's history, technologies, and stylistic possibilities across national and international boundaries, the course will consider early animators through to contemporary uses of digital technologies with their fully realized characters inhabiting three-dimensional space. It will also have a thematic organization, focusing at times on specific techniques (e.g., cel animation) and styles (e.g., abstract). This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SU3 Elective Basis

Course Attributes: Film Studies

FMST 1520 - FILM COMEDY

Minimum Credits: 3

Maximum Credits: 3

This course surveys film comedy from the silent period through the contemporary moment. It focuses on major comic performers and directors as well as on comic forms, traditions and their relation to politics. In addition the course considers a number of comedy subgenres, such as slapstick, romantic comedy, gross-out comedy, and the buddy film. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies

FMST 1522 - FILM MUSICAL

Minimum Credits: 3

Maximum Credits: 3

This course studies the musical as an example of a popular art in the age of mass culture, looking at the aesthetics and history of this genre as it relates to the culture that produced it. We will be looking at musicals with the goal of analyzing and understanding our reactions, and those of the mass audience. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies

FMST 1523 - FILM WESTERN

Minimum Credits: 3

Maximum Credits: 3

This course examines the meaning of the Western to a mass audience. More specifically we will explore the genre's popularity, the way it represents the past, the concept of the mythic hero, changes in the genre over time, and the contributions of specific directors. We will consider how the Western adapts to changing concepts of America. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies

FMST 1525 - HORROR FILM

Minimum Credits: 3

Maximum Credits: 3

This course will investigate the key films and critical discussions surrounding the horror genre from its silent film beginnings to the present. We will use horror as a lens to ask wide-ranging questions about spectatorship, theory, history, aesthetics, and politics that have shaped and continue to transform film and media studies. This course examines horror subgenres, the ways that producers and directors have developed the genre, and the ways horror film exploits social attitudes and values to generate audience involvement. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Attributes: Film Studies

FMST 1526 - THE WAR FILM

Minimum Credits: 3

Maximum Credits: 3

This course will consider stable and changing elements of the war film genre, while remaining attentive to specific cultural moments, beginning with World War I. Although the main emphasis of the course will be on the war film as genre, part of the semester will be devoted to documentary and non-fiction approaches to war in cinema. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS The Arts General Ed. Requirement, Film Studies, SCI Polymathic Contexts: Humanistic GE. Req.

FMST 1527 - SCIENCE FICTION FILM

Minimum Credits: 3

Maximum Credits: 3

This course examines the development of science fiction as a cinematic form, its relationship to genres such as horror and melodrama, its structure, images and style. We attempt to trace linkages between the films and social, political, scientific and aesthetic attitudes within the culture.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies

FMST 1530 - FILM NOIR

Minimum Credits: 3

Maximum Credits: 3

This course will explore the notion of 'film noir' in a trans-national and trans-medial context. We will examine the classic films noir of the period 1941-1958 (e.g. Double Indemnity, The Killers and The Naked City), the films considered to be 'neo-noir' since the 1970s (e.g. Taxi Driver, Blade Runner, Fight Club and Memento), and the international films described as 'global noir' from Japan, Hong Kong, Europe, and many other places throughout the world (e.g. Better Tomorrow, Branded to Kill, Sonatine, and Oldboy). We will also explore how the generic modes and conventions of film noir have been incorporated into other media such as comics, animations, and video games (e.g. Ghost in the Shell, Cowboy Bebop, LA Noir and Heavy Rain). We will look at these films and media objects from the

perspective of film art and history, of their relationship to wider socio-cultural contexts, and of their exploration of gender and sexuality. The course will explore debates as to whether film noir is a style, a genre, an idea in criticism, or a marketing category. We will examine the roots of film noir in German expressionism and hard-boiled detective fiction. We will examine the work of significant directors of these films, in both Hollywood and beyond, including Billy Wilder, Robert Siodmak, Fritz Lang, Orson Welles, Nicholas Ray, Guy Ritchie, Takashi Beat, Seijun Suzuki, John Woo, Johnnie To, and Park Chang-wook.

Academic Career: Undergraduate

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies

FMST 1531 - CULT FILM

Minimum Credits: 3

Maximum Credits: 3

This course will interrogate the criteria by which a film is identified as cult. A cult movie is not made; a film only becomes cult through the consumption patterns of an audience. This course explores how the nature of cult viewership shifted in response to technological innovation: at first VCRs, then DVDs, and now the internet. This course also looks to how cult has shifted now that unavailable films or banned films are increasingly accessible due to shifts in new media and the dominance of internet commerce (international shopping, eBay, bootlegs, downloads). This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies

FMST 1532 - SUPERHEROES ON FILM AND TELEVISION

Minimum Credits: 3

Maximum Credits: 3

This course explores a wide range of issues relevant to the superhero genre in popular media, including: the origins of the genre; various cultural critics' responses to it; the intersections between superhero narratives, audiences, and the cultural and historical contexts that produce them; and the ever-changing form and structure of the genre itself. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

FMST 1533 - DISABILITY IN FILM AND TELEVISION

Minimum Credits: 3

Maximum Credits: 3

This course explores disability in media through representational tropes and trends as well as how political activism has focused on mainstream media as a site for protest, a site for education, and a site for self expression. We will explore trends in film and television while engaging with the important roles of social media and online communities. This is a Critical Studies course and counts for Category II for the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SU3 Elective Basis

Course Attributes: DSAS Diversity General Ed. Requirement, DSAS The Arts General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

FMST 1534 - GIANT MONSTERS AND KAIJU FILMS

Minimum Credits: 3

Maximum Credits: 3

"Giant Monsters and Kaiju Films" explores a wide range of issues relevant to the use of the giant monster as a staple of science fiction and horror films, and the giant monster movie (or kaiju film) as its own genre. Such issues include: the origins of the genre; various cultural critics' and historians' responses to it; the intersections between kaiju narratives, audiences, and the cultural and historical contexts that produce them; the form and structures of the genre itself; the international distribution and influence of kaiju films and their transformations across audiences; the central roles of special effects, spectacle, and fantasies of disaster and destruction in creating meaning in the films. The course will also use the giant monster to examine how the concept of genre works to shape the kinds of entertainment we enjoy and to influence how we interpret and understand popular texts, as well as how the changing representations of iconic popular culture figures such as Godzilla and King Kong have intersected or reflected larger concerns in the history of global cinema. This course is a Category II elective in the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

FMST 1535 - WESTERNS AND SAMURAI FILMS

Minimum Credits: 3

Maximum Credits: 3

A focus on the critical comparative study of two filmic genres--the samurai representing Japanese cinema and the Western representing American cinema. The course demonstrates the analytical processes of the film leading to its structural unity; shows the significance of both genres with respect to the history of Japanese, American and European cinema; compares approaches to films of different countries and provides the overall benefits of approaching films from an intercultural standpoint.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Geographic Region General Ed. Requirement, DSAS The Arts General Ed. Requirement, Film Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Contexts: Humanistic GE. Req.

FMST 1540 - DOCUMENTARY FILM

Minimum Credits: 3

Maximum Credits: 3

This course explores the nature and impact of the non-fiction film, its changing forms, strategies for movies, and claims to veracity and objectivity. It is concerned with identifying types of documentary, the "motives" of such films, their audience and the problems posed by "documenting reality." This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS The Arts General Ed. Requirement, Film Studies, SCI Polymathic Contexts: Humanistic GE. Req.

FMST 1545 - THE AMERICAN FILM AND TELEVISION INDUSTRY

Minimum Credits: 3

Maximum Credits: 3

The American Film and Television Industry is a critical studies Film and Media Studies course is designed to give

students an extensive view of the various roles involved in the making of film and television and a sense of how these roles have changed over as the entertainment business itself have changed. In addition to learning about the history of the industries as well as the responsibilities of different jobs above and below the line, students will do their own research towards two major projects for the course. This is a Category II critical studies course.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SU3 Elective Basis

FMST 1546 - EXPERIMENTAL CINEMA

Minimum Credits: 3

Maximum Credits: 3

This course examines the development of experimental cinema beginning in Europe in the 1920s with dada and surrealist films by Marcel Duchamp, Luis Bunuel and others, and continuing in the U.S. and elsewhere after World War II. The films, many of which are non-narrative and some of which are "abstract", will be examined for the ways in which cinema is used for the filmmakers' personal expression. Consideration will be given to the artistic and cultural contexts in which the films were made, and comparisons will be made with other media, especially painting and sculpture.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

FMST 1548 - AMERICAN INDEPENDENT FILM

Minimum Credits: 3

Maximum Credits: 3

This course examines the development in the U.S. Of independently produced film as an art form, and the filmmaker as an artist, from World War II to the present. Filmmakers to be considered include Maya Deren, Kenneth Anger, Stan Brakhage, Bruce Baillie, Hollis Frampton and others. An examination will be made of the relationships between the films studied and other forms of modern art, such as "abstract expressionism", "structuralism" and "postmodernism". This course does not include "independent" Hollywood and other commercial feature filmmaking.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies

FMST 1549 - INDUSTRIES AND FESTIVALS: FILM AND MEDIA

Minimum Credits: 3

Maximum Credits: 3

This course explores how film industries have shaped contemporary production, exhibition, and distribution practices with focus on the role of film festivals in the film industry. We will examine festival history, theory, and methods to learn how festivals have impacted industry history and how festivals are produced and executed. This is a Critical Studies course and counts for Category II for the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

FMST 1550 - TOPICS IN GENRE

Minimum Credits: 3

Maximum Credits: 3

This is a course that changes topics every term; please see the Topic title and/or Class Notes for the specific focus. This course considers genres that are not commonly offered. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies

FMST 1585 - CINEMA AND REVOLUTION

Minimum Credits: 3

Maximum Credits: 3

This course investigates the relationship between Black power era, Black American cinema, and the third cinema movement, which are traditionally understood to be distinct movement/moments only loosely related through overlapping politics. In the course, our primary focus will be third world and Black American film making, and the postcolonial, pan-national and militant theoretical texts and movements that influenced the directors. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Lecture

Requirement, SCI Diversity General Ed. Requirements, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

FMST 1610 - TEEN FILM

Minimum Credits: 3

Maximum Credits: 3

This course will look at a type of film that has been prominent in Hollywood and international cinema since 1955: the youth film or teen film or teenpic. The teenpic has been variously defined as films targeted at a teenage market and as films about teenagers (and sometimes both). In considering the teenpic as a genre, we will attempt to break it down into subgenres such as the juvenile delinquent film, the teen musical, the teen horror film, nostalgic teen films, postmodern youth cult films, African American teen films, "girl" teenpics, and LGBTQIA+ teenpics. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies

FMST 1615 - CHILDREN AND MEDIA

Minimum Credits: 3

Maximum Credits: 3

This course examines contemporary children's media from social, cultural, and historical perspectives, with a focus on media in the United States produced by and for children ages 0-13. Video games, the internet, and emerging digital and portable technologies for communicating and consuming media are often tailored specifically to children, who, as "digital natives," are increasingly early adopters of new technologies. This course asks how children's media fits into contemporary debates about children's role in families, schooling, and the public sphere. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS The Arts General Ed. Requirement, Film Studies, SCI Polymathic Contexts: Humanistic GE. Req.

FMST 1630 - PHOTOGRAPHY AND ART

Minimum Credits: 3

Maximum Credits: 3

This introductory course is intended to provide a thorough familiarity with the history of photography from its development in the 19th century to the present day, and to link that history to major trends in the history of modern art, such as realism, impressionism, cubism, surrealism, abstract art, etc.

Academic Career: Undergraduate

Course Component: Lecture

Requirement, Film Studies, SCI Polymathic Contexts: Ethical/Policy GE. Req., SCI Polymathic Contexts: Humanistic GE. Req., SCI Polymathic Contexts: Soc/Behav. GE. Req.

FMST 1650 - TOPICS IN FILM GENRE AND THEME

Minimum Credits: 3

Maximum Credits: 3

This is a course that changes topics every term; please see the Topic title and/or Class Notes for the specific focus. This course seeks to provide a forum for new issues that might arise in the area of film genre and/or the thematic of film representation. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies

FMST 1655 - TOPICS IN CONTEMPORARY CINEMA

Minimum Credits: 3

Maximum Credits: 3

This is a course that changes topics every term; please see the Topic title and/or Class Notes for the specific focus. This course deals with issues related to contemporary cinema. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies

FMST 1699 - ADVANCED SEMINAR IN FILM STUDIES

Minimum Credits: 3

Maximum Credits: 3

This course is designed for Film and Media Studies majors and can be taken only when all other major requirements are satisfied. It will focus on issues of film history (either as an historical survey or through an examination of particular themes and/or problems that have arisen in the critical literature). The class will be organized as a seminar, and will involve considerable writing and/or class presentation on the part of students. This Category II course is a required capstone in the Critical Studies track of the Film and Media Studies major.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: Writing Intensive Course (WRIT)

FMST 1715 - MOCKUMENTARY: PRODUCTION AND CRITICISM

Minimum Credits: 3

Maximum Credits: 3

The mockumentary - a fictional film made to "look like" a documentary - became popularized as a term to describe a distinct genre in coverage of Rob Reiner's 1984 film *This is Spinal Tap*. Since then, the genre has evolved to treat a variety of subjects through a range of styles - including straightforward hoaxes, social parodies, and sharp criticisms of nonfictional form. In addition to readings, lectures and discussions, students in this class will produce short mockumentary projects. Previous production experience is not required. This is a Production course with Critical Studies elements and counts for Category III towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: FMST 0800

Course Attributes: Film Studies

FMST 1720 - VISITING FILMMAKER: PRODUCTION AND CRITICISM

Minimum Credits: 3

Maximum Credits: 3

This course allows students to experience the full process of making a professional micro-budget feature, experimental, or documentary film. Students work on a visiting filmmaker's film from conception to final shooting, while learning about the different jobs/tasks/departments needed to realize a completed work. This is a Production course and counts for Category III towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Workshop

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies

FMST 1740 - MAKING THE DOCUMENTARY

Minimum Credits: 3

Maximum Credits: 3

This is a production course in which students will research, define, and schedule their own projects. The class covers all stages of producing a documentary from the idea through development, preproduction, production and postproduction and will examine the fundamentals of the art of documentary making: artistic identity, point of view and storyteller, form and style, and light and sound etc. Students will develop and produce original documentary short film in a collaborative learning environment, working in small groups (of two or three students). They will write, develop, and shoot their own short documentary project (8 to 10 minutes). While those interested in writing or filmmaking will find practical uses for their skills in this course, students from all disciplines - writing, science, film studies, or general liberal arts - are welcomed, and will find benefit in the acquisition of skills for presenting, representing, and persuading via sound and image. No filmmaking experience is necessary. This is a Production course and counts for Category III towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Workshop

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: FMST 0800

Course Attributes: DSAS Creative Work General Ed. Requirement, Film Studies, SCI Polymathic Contexts: Humanistic GE. Req.

FMST 1745 - ADVANCED DOCUMENTARY PRODUCTION

Minimum Credits: 3

Maximum Credits: 3

This intensive workshop is designed for students with prior documentary production experience to develop, produce and direct an in-depth documentary short film over the course of the semester. Topics include determining subject matter, research, proposal writing, establishing filmmaker's POV, dramatic structure, production design, copyright and fair use, and a variety of practical, aesthetic and ethical concerns specific to documentary. Feedback and targeted exercises in class will help students hone their storytelling skills, from concept to final film. Students will leave the class with a short (6-10 min), substantial project ready to screen for others. This course is a Category III elective in the Film and Media Studies major and minor, and a Technical Elective in the Production Track.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: FMST 1740 or ENGFLM 1671

FMST 1750 - CREATIVE PRODUCTION WORKSHOP

Minimum Credits: 3

Maximum Credits: 3

Creative Production Workshop is a projects-based course in which students will research, define, schedule, budget, and workshop their own independent projects. In a collaborative learning environment, students develop and produce original digital projects while conducting critical investigations into their role as participants in and products of digitally mediated culture. The primary goal of the course is to design and execute a self-directed, self-designed, 14-week creative project. This process can be broken down into a series of smaller goals: Students will gather and create materials for the preliminary (treatment) stage of a project; conduct creative research to develop a project design; define the goals of a project and the areas of study; identify and address technical/logistical issues of the project; organize project materials; schedule and plan use of time; create a written description of a project; and make an oral/visual presentation of their project at different stages of its development. The methods of instruction will include discussion of assigned readings, in- and out-of-class viewings of assigned films, production instruction in the film editing lab, and workshop-style peer review and feedback at all stages.

Academic Career: Undergraduate

Course Component: Workshop

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies, Undergraduate Research

FMST 1765 - VIRTUAL REALITY

Minimum Credits: 3

Maximum Credits: 3

Can there be more than one reality? Is there even one? What relationship do the senses and the mind bear to the physical environment? From the dawn of human society, no topic has been more fiercely debated than the nature of reality. In narrative, philosophy, and media, virtual reality has always been with us. This course dives deep into the rabbit hole of the real and the virtual, an adventure that includes philosophy, literature, film, and, of course, VR headsets aplenty! In addition to exploring the history of the real and the virtual, we will consider the relationship of virtual reality to the body, to space, to human gesture and communication, and to code. We will also explore the role of the imagination and creativity in the generation of new worlds. You will learn to think historically, theoretically, and critically about VR. You will have the option of either writing critical papers or creating your own virtual environment

or game as your final project. This course assumes no prior experience with VR or coding, but those skills can optionally be put to use in final projects. Come prepared to question your reality!

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Creative Work General Ed. Requirement, DSAS Phil. Think or Ethics General Ed. Requirement

FMST 1770 - DIGITAL STUDIO: IMAGING

Minimum Credits: 3

Maximum Credits: 3

Digital Studio: Imaging is a studio designed to immerse students in the investigation of digital art practices. Emphasis will be on the history and aesthetics of art and digital technology, including screen-based imaging practices, creative coding, and digital fabrication. Throughout the course, you will acquire and enhance technical skills, but the emphasis will be on the use of the computer as an art-making tool for your creative expression. Thoughtfulness, experimentation and curiosity is encouraged.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Attributes: Film Studies

FMST 1775 - DIGITAL STUDIO: VIDEO

Minimum Credits: 3

Maximum Credits: 3

This is an advanced studio designed for students to intensely experiment and explore the moving digital image in an art context. Students will explore the concepts and skills involved in working with digital video, from pre to post-production. Each student will propose and undertake a final, self-designed project during the final four weeks of the term. Major effort, time, research, imagination, productivity, and involvement are expected throughout the term.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Attributes: Film Studies

FMST 1777 - DIGITAL STUDIO: ANIMATION

Minimum Credits: 3

Maximum Credits: 3

This is an advanced course designed for students to intensely experiment and explore the moving digital image in an art context. Students will explore the concepts and skills involved in working with digital animation - from pre to post-production. Each student will propose and undertake a final, self-designed project during the final four weeks of the term. Major effort, time, imagination, productivity, and involvement are expected throughout the term.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (SA 0110 and 0180) or ENGFLM 0590 or FILMST 0001 or FMST 0800

Course Attributes: Film Studies

FMST 1781 - LISTENING TO NARRATIVE AUDIO

Minimum Credits: 3

Maximum Credits: 3

With podcasts on the rise, audio is an increasingly vibrant platform for storytelling across genres, from narrative journalism, to the audio essay, to serial (non)fiction. What can we, as writers learn from close encounters with these forms? How can born-audio narratives help us approach questions of style, structure, scene, and voice in unexpected ways? And how can we take inspiration from these forms to reimagine the possibilities of our writing, whether it's for the ear or for the page? Just as a "Readings" course teaches you to read like a writer, in this course, you'll be challenged to listen like an audio producer, attuning yourself to the craft of audio stories in order to inform and enrich your own creative work. Throughout the semester, you'll produce focused responses to weekly listening assignments, engage in rigorous discussions on craft, and generate some of your own creative work in response to the stories we encounter. While no formal technical training in audio production will be provided or required, students interested in exploring their writing in audio forms will be encouraged to do so.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

FMST 1817 - LIGHTING FOR MOTION PICTURES

Minimum Credits: 3

Maximum Credits: 3

This course allows students from both the film and video disciplines to expand their aesthetic boundaries by overcoming technical limitations. Students will learn theories of lighting to create a particular emotional, psychological, or physiological effect in the viewer, and will participate in lighting and shooting a variety of situations in class. Differences between lighting for film and video, light metering, and various lighting tools are among the topics covered. Contemporary film examples will be examined and discussed in class.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: FMST 0800

Course Attributes: Film Studies

FMST 1830 - EXPERIMENTS IN 3D ANIMATION

Minimum Credits: 3

Maximum Credits: 3

EXPERIMENTS IN 3D ANIMATION introduces students to alternative methods of moving image making through the use of animated 3D computer generated imagery (CGI). Students will learn and explore techniques in 3D modeling, 3D cameras and lighting, keyframe animation, procedural materials, image texturing, model rigging, and physical simulations, while contextualizing these skills with parallel viewings and discussions of contemporary 3D animation work. Particular focus will be placed on individual student projects with a strong technical emphasis on using the Blender 3D creation suite. Course time will consist of lectures, technical demonstrations, in-class work time, screenings, discussions, and group critiques. This course is a Film and Media Studies Category 3 elective, and a Technical Elective in the Production Track.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

FMST 1846 - FILMMAKING 3: STORY TO SCREEN

Minimum Credits: 3

Maximum Credits: 3

This course assumes an intermediate knowledge of cinema pre-production, production, and post-production. Each

student will have the opportunity to work on one of two main projects: if the student chooses the Individual Project, they will spend the semester taking a short film over which they have creative control from concept to finished product. This can be a narrative, documentary, or experimental film and should be shorter than 15 minutes long. Students who chose the Group Project will indicate which role(s) they would like to fill as all students choosing this option work together to create one or several short films - total running time should be less than 20 minutes. Group Project students will all be part of the writers' room, and will fill primary preproduction, production, or postproduction roles. This course counts as a Technical Elective and a Category III elective in the Film and Media Studies Minor or Production Track.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: FILMST 0601 or ENGFLM 1497 or SA 1380 or FMST 0845 or FMST 1193 or FMST 1775

FMST 1847 - CREW PRODUCTION PRACTICUM

Minimum Credits: 3

Maximum Credits: 3

In this course students will take a professional project, consisting of one or several short films, through the process of production and postproduction. The preproduction development for these films will have been largely completed in a previous course. Students will be assigned to specific on-set and off-set roles necessary to complete production to a high level of excellence, including Directors, Editors, Line Producers, and members of the visual and sound crews. This course counts as a Technical Elective and a Category III elective in the Film and Media Studies Minor or Production Track.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: FMST 0800

FMST 1852 - DIRECTING ACTORS

Minimum Credits: 3

Maximum Credits: 3

This course explores the communication between directors and actors and how a director's vision translates into playable action on the screen. Class sessions will provide examples and practical experience in successful director/actor collaboration. Students will learn how to judge a good performance and will practice directing techniques that lead to better performances by actors. It is a laboratory class and students will direct each other. The format combines hands-on exercises, taping, screening and lecture. Grading is based on exercises, homework, taped scenes and participation.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies

FMST 1855 - DIRECTING MOTION PICTURES

Minimum Credits: 3

Maximum Credits: 3

This course addresses some of the basic strategies of designing and directing scenes for motion pictures. Some of the issues discussed are the relationship of film to reality, the meaning of cinematic techniques, continuity, shot selection, cut selection and visualization techniques. The format is a combination of lecture, screening and interactive group exercises. It is recommended but not required that students complete FMST 0800 before taking this course. This course counts as a Technical Elective and a Category III elective in the Film and Media Studies Minor or Production Track.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: FMST 0800
Course Attributes: Film Studies

FMST 1860 - ELEMENTS OF SCREENWRITING

Minimum Credits: 3

Maximum Credits: 3

This course will explore developing character-based stories in the screenplay form. Students will be exposed to a variety of readings, including original screenplays, related prose, and texts which reinforce basic tenets of good story telling. Students will write a completed 1st Act for a 3 to 5 part screenplay, building from idea to outline with particular attention to structure and character development.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Attributes: Film Studies

FMST 1862 - INTERMEDIATE SCREENWRITING

Minimum Credits: 3

Maximum Credits: 3

This advanced course will help you develop your feature film idea into a full treatment. Weekly discussions and writing assignments focus on creating the plot, scene, sequences, setting, and subplots. By the end of the semester, you will have completed a scene-by-scene treatment of your original work. Considerable outside work is required. Grading is based on weekly assignments, the quality of the written treatment and class participation.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENGWR 0560 OR FMST 0700 OR ENGWR 1132 OR FILMST 1132 OR FMST 1860 OR ENGLM 1499 OR FMST 1194 OR ENGWR 0520
Course Attributes: Film Studies

FMST 1865 - WRITING THE ORIGINAL SERIES

Minimum Credits: 3

Maximum Credits: 3

In this course students will study and practice writing for a serialized or episodic motion picture series. Formats discussed include one-hour and half-hour streaming and broadcast series as well as short-episode web series. This course does NOT cover writing spec scripts for existing series or the specifics of the sitcom format. Each student will pitch a series, describing the format, franchise, characters, and basic story arc. The classroom will function as a writers' room for each of the series, as each student develops a show bible, then writes a beat sheet and first draft of the series pilot. Students will also be asked to study and write about the structure of existing series and episodes in the format they've chosen. This course counts as a Technical Elective and a Category III elective in the Film and Media Studies Minor or Production Track.

Academic Career: Undergraduate
Course Component: Practicum
Grade Component: LG/SNC Elective Basis
Course Requirements: ENGWR 1132 or FMST 1860 or THEA 1365 or ENGWR 1650 or FMST 0780 or ENGWR 1710
Course Attributes: Film Studies

FMST 1866 - WRITING THE ANIMATION SERIES PILOT

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the numerous disciplines of animation series writing. Animation series pilot writing will incorporate analysis, engineering of popular animated series, character creation, world building, and professional script production. The course will focus on Hollywood Style script writing, writing for animated series, formatting, oral pitching, casting voice talent, and hosting a table read. This course is a Category III elective in the Film and Media Studies major and minor, and a Technical Elective in the Production Track.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENGWRT 1132 or FMST 0800 or THEA 1365 or ENGWRT 1650 or FMST 0780 or ENGWRT 1710

FMST 1870 - ACTING FOR THE CAMERA

Minimum Credits: 3

Maximum Credits: 3

This course is designed for actors who would like to improve their craft by better understanding the differences between acting for the stage and acting for the camera. The course will describe and demonstrate the contrasts between stage and screen acting in specific shooting scripts and follow that with appropriate script study, character analysis and exercise in film acting techniques. Each class will include lecture, videotaped examples of performances for analysis and critique and the practical experience of working in front of the camera.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies

FMST 1875 - SOUND FOR MOTION PICTURES

Minimum Credits: 3

Maximum Credits: 3

This course will enable students to convert sound to a digital analog, recording, processing, storing and mixing sounds to varied effects in relation to visual media. Particular emphasis will be placed on the special requirements of sound for narrative film: intelligibility in voice reproduction, achieving and maintaining synchronism, and the relationship between voice, music, sound effects and story.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: FMST 0835 or FMST 0845 or SA 1380 or FMST 1193 or FMST 1775

Course Attributes: Film Studies

FMST 1880 - DIGITAL CINEMATOGRAPHY

Minimum Credits: 3

Maximum Credits: 3

This course will cover advanced video technology and professional techniques of videography. Emphasis will be placed on high image quality and meeting broadcast specifications for video and audio. Professional-quality video cameras will be covered extensively.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: FMST 0800
Course Attributes: Film Studies

FMST 1883 - EXPERIMENTAL CAMERA

Minimum Credits: 3

Maximum Credits: 3

This will be a workshop course dealing with a variety of techniques utilizing the camera as a tool for visual information outside of its normal use and function. The course will look at the history of cameras and the many image making devices that were invented to date.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: LG/SNC Elective Basis

FMST 1884 - VIDEO INSTALLATION

Minimum Credits: 3

Maximum Credits: 3

Video Installation is an experimental production course where students will have the opportunity to focus on the conceptual and technical aspects of moving-image installations and alternative viewing scenarios. The course will consist of lectures, readings, in-class experiments, a field trip to view video installation works, and three main creative projects. Students will work on creating multi-channel video projects, experiment with basic project mapping, and set up various spatial installations. This course is a Category III elective in the Film and Media Studies major and minor, and a Technical Elective in the Production Track.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

FMST 1885 - BROADCASTING

Minimum Credits: 3

Maximum Credits: 3

Broadcasting introduces students to television production through academic and hands-on experience, utilizing the University of Pittsburgh's new state-of-the-art television studios and equipment. In addition to students learning how to produce a live broadcast event for collegiate teams and a news broadcast, guest lecturers will talk about the industrial realities of the profession. Students will understand how to format and make a show rundown, apply graphics, utilize replay, work a television camera, comprehend audio application and mixing, produce and direct live events and news broadcast, as well as gain experience in front of the camera as news anchors, reporters and on-air talent for live events.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies

FMST 1886 - BROADCASTING 2

Minimum Credits: 3

Maximum Credits: 3

The unique and dynamic Broadcasting 2 course will utilize every aspect of the state-of-the-art Pitt Studios, offering students a challenging and stimulating curriculum. Students will produce a Live Event Show Open (incorporating all pre-production elements), a Newscast, and a Podcast, incorporating video and animation marketing support. Students' projects will be crewed by classmates.

Academic Career: Undergraduate
Course Component: Workshop
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: FMST 1885 or FILMST 1001
Course Attributes: Film Studies

FMST 1890 - THE BUSINESS OF BROADCASTING

Minimum Credits: 3

Maximum Credits: 3

The Business of Broadcasting teaches students how business is incorporated into every form of television broadcasts, including newscasts, documentaries, live event, magazine, interview, Network series, social media and streaming services, from ethics, copyright, "back of house" (payroll, crew call, work-flow) to social media. This is a Category III course that combines critical studies and production elements. It counts for the Film and Media Studies major and minor.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

FMST 1892 - ON-AIR PERFORMANCE BROADCASTING

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the numerous disciplines of on-air performance broadcasting. On-Air Performance: Broadcasting will incorporate on-air presentation for news and sports anchoring, field reporting, play-by-play and color analysis for live sports and live events, multimedia journalism, and documentary-style program hosting. The course will focus on AP Style writing, writing for on-air, research, formatting, pre-production elements - i.e. - VOs (Broll with voice-over), SOTs (sound on tape), feature packages, highlights, public speaking, and interviewing techniques. This is a production course and counts for a Category 3 elective for the Film and Media Studies major and minor, a Topical Elective in the Production Track, and an elective on the Television and Broadcast Arts Certificate.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

FMST 1893 - HUMAN INTEREST STORIES FOR BROADCAST

Minimum Credits: 3

Maximum Credits: 3

Human Interest Stories for Broadcast will teach students how to present and tell a compelling story about a person, place, or thing in the confines of television broadcast, streaming, or social media platform. Writing techniques for television, research techniques, interview techniques, adding graphics, mixing sound and music, video, tracking and voice-over will be required for the feature packages ranging from :45 seconds in length to 3:00 minutes in length. This is a Category III class that combines critical and production elements. This course counts for the Film and Media Studies major and minor.

Academic Career: Undergraduate
Course Component: Workshop
Grade Component: LG/SNC Elective Basis

FMST 1898 - TELEVISION NEWS PRACTICUM: PITT TO THE POINT

Minimum Credits: 3

Maximum Credits: 3

Television News Practicum: Pitt to the Point is a hands-on course practicum that produces one live hour-long, television news/magazine program per week, incorporating every facet of broadcast television. The course incorporates news writing, feature writing, research, formatting, pre-production, live production, as well as public speaking and direct interaction with broadcast industry professionals. The course covers news, sports, entertainment and politics across the University of Pittsburgh campuses, as well as the city of Pittsburgh. This is a production course and counts for a Category III for the Film and Media Studies major and minor. It is part of the Television and Broadcast Arts Certificate and the Media and Creative Industries certificate.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SU3 Elective Basis

Course Requirements: PREQ: FMST 1885 or 0800

FMST 1899 - THE FRONT BENCH

Minimum Credits: 3

Maximum Credits: 3

The Front Bench examines the crew positions that lead to a broadcast event. The course will focus on the responsibilities of the show producer, who writes the story; the director, who presents the story; and the technical director, who executes the story. Pitt Studios state-of-the-art control room(s) will be used for the course. The 3-hour course will be held one (1) day per week for 15 weeks.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: FMST 1885 and 0800 and (ENGWRT 0610 or FMST1893 or FMST 1898)

FMST 1900 - INTERNSHIP IN FILM AND MEDIA STUDIES

Minimum Credits: 1

Maximum Credits: 3

Working in consultation with faculty, advanced students wishing to pursue careers in film and media have the opportunity to work with independent media artists or production companies. This course offering is designed to give students valuable experience in their chosen field of study outside the college and classroom environment.

Academic Career: Undergraduate

Course Component: Internship

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies, Undergraduate Internship

FMST 1901 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 3

Under certain circumstances students may elect to study film and media on an independent basis. Such independent study will be closely supervised by a faculty member and will entail the writing of a proposal prior to beginning the course.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies

FMST 1904 - UTA IN FILM AND MEDIA STUDIES

Minimum Credits: 1

Maximum Credits: 3

Undergraduate Teaching Assistants are arranged with individual faculty members and require special permission. A range of credit hours and grading options are available.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies

FMST 1921 - FILM AND MEDIA STUDIES PRODUCTION CAPSTONE

Minimum Credits: 3

Maximum Credits: 3

This is a capstone course in motion picture production. Each student will have the option to create an individual project of their choice, which can be any genre of narrative, documentary, or experimental. Students who choose to work on their own personal project should be prepared to pitch the project to the class and the instructor during the first class session. Through script workshops, preproduction reviews, and critique of rough cuts, the instructor will mentor you through the filmmaking process. Depending on class size, students may have the option to instead work together on a collaborative project, with different students filling the roles of producer, writer, director, and editor, and taking on multiple roles in the production crew. This course is a requirement for Film and Media Studies students taking the Production Track.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: (ENGFLM 1497 or SA 1380 or FMST 0845 or FMST 1193 or FMST 1775) and (ENGWRT 1132 or FMST 1860)

FMST 1930 - INTERNSHIP IN FILM AND MEDIA

Minimum Credits: 1

Maximum Credits: 3

Internships can be taken for credit with special permission from the Internship Coordinator in Film and Media Studies. One internship can count for Category III towards the Film and Media Studies major and minor.

Academic Career: Undergraduate

Course Component: Internship

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies

Finance

BUSFIN 1030 - INTRODUCTION TO FINANCE

Minimum Credits: 3

Maximum Credits: 3

Provides a survey and analysis of the problems and tools of financial decision-making by individuals and firms. The firm's role in the market system and the nature of its objective with reference to the welfare of investors and society is also treated. An analysis of the implications of this role to decisions regarding choice among alternative investment projects and capital budgeting decisions as well as an introduction to the structure of capital asset prices and the implications for financial policies of firms and individuals are also included.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (BUSACC 0030 or BUSERV 1920 or CDACCT 6030 or MGMT 0022 or ACCT 0115 or ACCT 0201) and (STAT 1000 or STAT 1100 or STAT 1040 or ECON 0204 or BUSQOM 0101 or STAT 1151 and 1152 or ENGR 0021 or IE 1070 and 1071);PROG: College of Business Administration

BUSFIN 1031 - INTRODUCTION TO FINANCE HONORS + 1

Minimum Credits: 1

Maximum Credits: 1

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: Restricted to College of Business Admin Students Only.

BUSFIN 1311 - CORPORATE FINANCE

Minimum Credits: 3

Maximum Credits: 3

Investigates the investment and financing decisions of firms from the perspective of the corporate manager. The pedagogical format combines conceptual and case analyses so as to provide both a theoretical and practical foundation. Specific topics to be considered include the following: capital budgeting, cost of capital determination, capital structure decisions and dividend policy.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: BUSFIN 1030 or MGMT 1821 or FIN 0300 or MATH 0470 (MIN GRADE 'C');

PROG: UCBA; PLAN: NOT CASBUS-UNK or BUSNB-MN; PROG: UA-S; PLAN: ACTMTH-BS

BUSFIN 1316 - CORPORATE FINANCIAL STRATEGY

Minimum Credits: 3

Maximum Credits: 3

Examines a variety of applied topics in corporate finance, including mergers and acquisitions, corporate restructuring, leasing, pensions, short term financial management, and the use of derivatives in corporate finance.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: BUSFIN 1311; PLAN: Accounting, Finance, General Management, Global Management, Marketing, Business Information Systems, Human Resources Management, Supply Chain Management, Undeclared CBA majors

BUSFIN 1321 - INVESTMENT MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

Emphasizes the development of tools required for investment decision-making. Reviews various financial instruments, examines their historical performance for evidence of risk return trade-off, presents basic portfolio theory and its implications for diversification, discusses the capital asset pricing model, and empirical estimation of beta riskiness. Other topics include mutual fund performance and the theory of efficient markets.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: BUSFIN 1030 or MGMT 1821 or FIN 0300 or MATH 0470 (MIN GRADE 'C');
PROG: UCBA; PLAN: NOT CASBUS-UNK or BUSNB-MN

BUSFIN 1326 - EFFICIENCY OF CAPITAL MARKETS

Minimum Credits: 3

Maximum Credits: 3

This course covers a central issue in finance: the Efficient Market Hypothesis (EMH). The EMH states that security prices reflect all relevant information and implies that investors cannot earn excess profits. Evidence in support of the EMH and contrary to it is studied. The implications of efficiency impact all financial managers and individuals in their financial decisions. Topics include: what actions can a financial manager take to maximize shareholder wealth, why do prices fluctuate, and technical versus fundamental analysis. The course focuses on valuation methods like DCF and CAPM.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: BUSFIN 1030 (MIN GRAD 'C'); PLAN: Accounting, Finance, General Management, Global Management, Marketing, Business Information Systems, Human Resources Management, Supply Chain Management, Undeclared CBA majors

BUSFIN 1327 - RISK MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

This course examines financial risk management from the perspective of the corporate manager. The overarching goal is to learn about why and how managers can create value for shareholders by way of risk management. In doing so, we will explore different sources of financial risk faced by managers and how these risks can be measured, quantified, and managed. The first part of the class focuses on the basics of forwards and options. The second part focuses on applications, including Monte Carlo simulation techniques.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: BUSFIN 1311 and 1321 and 1351; PROG: UCBA; PLAN: NOT CASBUS-UNK or BUSNB-MN

BUSFIN 1328 - CAPITAL MARKETS

Minimum Credits: 3

Maximum Credits: 3

This course provides an in-depth analysis of stock and bond valuation. The analysis of bonds covers bond pricing principals, the term structure of interest rates, and fixed income portfolio management. The analysis of stocks focuses on earnings and dividend-based valuation models, and a discussion of "value investing" and indexing.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: BUSFIN 1030 (MIN GRAD 'C'); PLAN: Accounting, Finance, General Management, Global Management, Marketing, Business Information Systems, Human Resources Management, Supply Chain Management, Undeclared CBA majors

BUSFIN 1329 - INVESTMENTS ANALYSIS & STRATEGIES

Minimum Credits: 3

Maximum Credits: 3

The objective of this course is to provide the student with a thorough practical and theoretical exposure in the field of securities markets with a focus on the credit segment. The course has substantial experience-based learning content and requires the student to work on the Bloomberg Terminals available in the Financial Analysis Laboratory located in 201 Mervis Hall. The course covers the major topics of bond pricing, international markets, term structure of interest rates, duration, convexity and their implications for portfolio management, interest rate models, asset-backed securities, interest rate derivatives and credit risk analysis. The course is intended for students who are preparing for the CFA Program exams. Real-world examples will be given to make connections with the theoretical framework. In this course, you will have the opportunity to manage a hypothetical fixed-income portfolio and work in groups on multiple team projects. All projects will be administered in the Bloomberg environment.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: BUSFIN 1030 (MIN GRAD 'C'); PLAN: Accounting, Finance, General Management, Global Management, Marketing, Business Information Systems, Human Resources Management, Supply Chain Management, Undeclared CBA majors

BUSFIN 1331 - FINANCIAL INSTITUTIONS AND MARKETS

Minimum Credits: 3

Maximum Credits: 3

Analysis of the behavior of financial intermediaries in the capital market. The performance of capital markets and examination of the role of regulations of financial markets, and the effects of decision-making by individuals and firms are covered. Sources of short-term and long-term financing will also be analyzed.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: BUSFIN 1030 (MIN GRADE 'C'); PLAN: Accounting, Finance, General Management, Global Management, Marketing, Business Information Systems, Human Resources Management, Supply Chain Management, Undeclared CBA majors

BUSFIN 1341 - INTERNATIONAL FINANCE

Minimum Credits: 3

Maximum Credits: 3

This course applies the principles of finance to international issues in financial management. It deals in topics such as the valuation of foreign subsidiaries, estimating the cost of capital of foreign investments, investing in foreign multinational firms, the correlation of returns across international security markets, hedging foreign exchange risk, and the use of foreign securities markets.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: BUSFIN 1311 and 1321 and 1351; PROG: UCBA; PLAN: NOT CASBUS-UNK or BUSNB-MN

Course Attributes: Global Studies

BUSFIN 1345 - MARKETS AND TRADING

Minimum Credits: 3

Maximum Credits: 3

This course gives participants a broad understanding of the operations of various financial markets with special focus

on liquidity, market structure and trading. The course concentrates on the ops of exchanges, trading systems and broker-dealer intermediaries. Students will be exposed to range of issues regarding the formulation of trading decisions and market structure design and regulation. Simulation software will be used to provide experience making tactical trading decisions in different market structure environments. Students will manage equity portfolios using OTIS.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: BUSFIN 1030 (MIN GRADE 'C') and 1311 and 1321; PLAN: Accounting, Finance, General Management, Global Management, Marketing, Business Information Systems, Human Resources Management, Supply Chain Management, Undeclared CBA majors

BUSFIN 1347 - MERGERS, ACQUISITIONS AND CORPORATE STRUCTURES

Minimum Credits: 3

Maximum Credits: 3

This course examines the major structural transactions that corporations experience from an internal perspective, based on sound financial analysis conducted with an understanding of corporate governance, firm strategy, law, accounting, and organizational behavior. Particular emphasis will be on mergers and acquisitions (M&A), and include topics in venture capital, initial public offerings, buyouts, divestitures, and bankruptcy. Readings, case study analysis, and active class discussion are emphasized. Teams of students will put the M&A process into practice by searching out and analyzing potential target firms for a major corporation and presenting their analyses and recommendations.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: BUSFIN 1311 and 1321; PLAN: Accounting, Finance, General Management, Global Management, Marketing, Business Information Systems, Human Resources Management, Supply Chain Management, Undeclared CBA majors

BUSFIN 1351 - FINANCIAL MODELING

Minimum Credits: 3

Maximum Credits: 3

The course applies economic theories to solve various problems in financial management and investments. Using a hands-on approach in building financial spreadsheet models, the student will gain knowledge of numerical and graphical practices. These include but are not limited to asset return calculations, portfolio theory, index models, and the capital asset pricing model, option pricing models, bond pricing and investment performance analysis. MS excel is the primary tool to implement these financial models, however the course will also make use of statistics and probability.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREC: BUSFIN 1030 or MGMT 1821 or FIN 0300 or MATH 0470 (MIN GRADE 'C') and CREQ: BUSFIN 1311 or 1321; PROG: UCBA; PLAN: NOT CASBUS-UNK or BUSNB-MN

BUSFIN 1355 - VALUATION

Minimum Credits: 3

Maximum Credits: 3

This course examines the topic of value: what it is, how to measure it, and how to use it to guide managerial decisions. This is done by accomplishing three objectives: 1) provide students with a conceptual framework for thinking about value; 2) provide students with tools for estimating value and measuring value creation and destruction; and 3) teach students how to apply valuation models in different settings.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: BUSFIN 1311 and 1321 and 1351; PROG: UCBA; PLAN: NOT CASBUS-UNK or BUSNB-MN

BUSFIN 1356 - FINTECH

Minimum Credits: 3

Maximum Credits: 3

This course focuses on applications of new technologies in financial settings. The course introduces FinTech topics such as digital lending, blockchain and cryptocurrency, and digital wealth management. Applications of machine-learning and big-data techniques in finance are also examined. The course also explores various trading technologies, algorithmic trading, and portfolio management tools such as risk/return optimization and value-at-risk. The course leverages current data acquisition tools and statistical software packages to improve students' analytical skills.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: BUSFIN 1311 and 1321 and 1351; PROG: UCBA; PLAN: NOT CASBUS-UNK or BUSNB-MN

BUSFIN 1357 - EMERGING TOPICS IN FINANCE

Minimum Credits: 3

Maximum Credits: 3

This course is offered periodically to cover unique and timely topics in finance. The topics vary but generally coincide with particular areas of expertise on the part of a finance faculty member or an executive in residence.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: BUSFIN 1311 and 1321 and 1351; PROG: UCBA; PLAN: NOT CASBUS-UNK or BUSNB-MN

BUSFIN 1360 - REAL ESTATE FINANCE

Minimum Credits: 1.5

Maximum Credits: 1.5

This course provides an introduction to real estate with a focus on the valuation and financing of real estate. The following topics are expected to be covered as the course focuses on income producing properties: economic theory of real estate, valuation technique (including pro-forma cash flow projections), financing strategies, risk analysis, taxation, and the securitization of real property interests. No prior knowledge of the industry is required, but students are expected to rapidly acquire a working knowledge of real estate terminology and real estate markets. Classes are conducted in a standards lecture format with discussion required.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: BUSFIN 1311 and 1321 and 1351; PROG: UCBA; PLAN: NOT CASBUS-UNK or BUSNB-MN

BUSFIN 1361 - REAL ESTATE FINANCE

Minimum Credits: 3

Maximum Credits: 3

Real estate represents the largest asset class in the world and is historically the asset most closely associated with wealth in every culture and country. Our objective is to understand the financial characteristics of income-producing real estate by focusing on capital costs, cash flow characteristics, discount rates, exit values, and required rates of return. We will explore some of the unique characteristics that shape the economic performance of real estate assets. We will deploy a set of analytical tools to model potential economic outcomes of real estate investments; review the most common sources of capital deployed in income producing properties; and explore how securitization and secondary markets have revolutionized financing approaches, not always with positive results.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

BUSFIN 1365 - VALUATION 2

Minimum Credits: 3

Maximum Credits: 3

This is a continuation of valuation 1.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

BUSFIN 1380 - GLOBAL FINANCIAL SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

This course will examine the history and development of the global economy. It will examine the structure and principal operations of the global financial system. In doing so it will explore the impact of these operations in terms of trade, financial assets, capital movements and economic growth, putting into evidence the new global processes and its impact especially over the Brics and European markets.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

BUSFIN 1390 - FINANCE INTERNSHIP

Minimum Credits: 3

Maximum Credits: 3

The finance internship provides business credits for project assignments that augment a professional finance work experience.

Academic Career: Undergraduate

Course Component: Internship

Grade Component: Satisfactory/No Credit

Course Requirements: PREQ: BUSFIN 1030 (MIN GRAD 'C'); PLAN: Finance (BSB)

BUSFIN 1395 - FINANCE INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 3

An independent study course for students desiring to pursue in greater depth a specific set of finance issues or problems to which they have been introduced in other finance courses. The course involves directed reading and research under the guidance of a full-time faculty member.

Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: BUSFIN 1030 (MIN GRAD: 'C'); PLAN: Finance (BSB)

French

FR 0006 - SPECIAL TOPICS IN CONVERSATION AND CULTURE

Minimum Credits: 1

Maximum Credits: 6

Designed for students at the second-year level of proficiency (French 3 or French 4), this course will treat topics in French and/or francophone cultures, with a focus on oral communication.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SNC Elective Basis

FR 0008 - INTENSIVE FRENCH FOR READING 2

Minimum Credits: 4

Maximum Credits: 4

This course consists of translation and discussion in English of a variety of non-literary readings. It is a logical continuation of French 0007.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: FR 0007 (MIN GRADE: 'C')

Course Attributes: DSAS Second Language General Ed. Requirement, West European Studies

FR 0012 - FRENCH KISS: LOVE, SEX, FRANCE

Minimum Credits: 3

Maximum Credits: 3

Taught in English. From kissing to romantic escapades, from Paris to the Riviera, from Tahiti to Marrakesh, France and the Francophone world have a highly recognizable profile in matters of sex and love. Sexual behavior is always culturally inflected, and it evolves through time in its creation of emotions, attachments, families and institutions. In this class, we will adopt a historical lens to retrace the cultural transformations of sex and love in the French cultural and social landscape. We will study contemporary visual and textual materials (especially film), and a variety of historical documents from the Middle Ages to the present day. We will address controversial issues such as virginity, adultery, same-sex relationships, women's sexual agency, gender definitions through sexuality, the shifting boundaries of pornography and other related matters. This course is open both to incoming and more advanced students. It will count toward the French major and minor as a course in English.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Diversity General Ed. Requirement, DSAS Geographic Region General Ed. Requirement, DSAS Literature General Ed. Requirement, Gender, Sexuality & Women's St, SCI Diversity General Ed. Requirements, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

FR 0014 - INTRODUCTION TO FRENCH-SPEAKING CANADA

Minimum Credits: 3

Maximum Credits: 3

This course is an introduction to French-speaking Canada as a linguistic and cultural geopolitical entity. While principal focus will be on Quebec, we will also examine French-speaking areas contiguous with Quebec and various isolates and extensions of this sociocultural area. We will begin chronologically with a historical presentation of the province's history as part of various geopolitical entities, and then focus on more contemporary Quebec, the bid for independence and the quiet restlessness of a "distinct society" concerned with its survival

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

FR 0016 - HISTORY OF FRENCH CINEMA

Minimum Credits: 3

Maximum Credits: 3

History of French Cinema: From Technological Marvels to Ubiquitous Screens French cinema is recognized the world over for its artistic daring, its sophisticated style, and its inimitable sense of cool. Indeed, the French like to say that they invented cinema. Whether true or not, moving images have been a central way through which the French understand themselves, their place in the world, and the impact that new forms of media technology have on everyday life. This course will take a historical perspective to French cinema and to our sense of what French cinema is. We'll track how French society has changed along with its cultures of making and consuming images, and we'll see how French films of the past can help us better understand the media-saturated present in which we live. Along the way, we'll look at silent films, classical-era sound films, films from the New Wave period, and contemporary films in a variety of forms, including documentary, the musical, horror, art cinema, the essay film, postcolonial cinema, digital media, and much more. No previous course experience with cinema is presumed. This course will be run like a traditional French ciné-club in which students are introduced to some of the most important French films that we still talk about today and to the varied ways we watch, discuss, and write about films in general. The course will be taught in English; all readings will be available in English; and all films will have English subtitles.

FR 0017 - PARIS: URBANISM PAST AND PRESENT

Minimum Credits: 3

Maximum Credits: 3

This course embarks on a study of Paris as an ever-evolving urban center in time and space. A two-pronged approach sees the City of Light as both a geopolitical entity with a history of great importance and an idea that has influenced politics, society and the arts all over the world. The syllabus features both the diachronic evolution of Paris from Gallo-Roman times to the present day as well as the synchronic weight of Paris as place and notion both in and out of France.

FR 0031 - ELEMENTARY FRENCH 1 FOR MBAS

Minimum Credits: 1.5

Maximum Credits: 1.5

French 0031 is designed for business students who have no previous knowledge of French. It is an elementary language acquisition course and aims to teach students how to carry out basic functions likely to be necessary in dealing with others in the target language. The course aims to develop very basic abilities in all four language skills--speaking, listening, reading, and writing and deals with culture as an integral part of each skill.

FR 0070 - KINGS & QUEENS: FROM VIKINGS TO THE GUILLOTINE

Minimum Credits: 3

Maximum Credits: 3

French Vikings. A wicked Italian queen. Art, sex, and politics. Guillotines. The history of the French monarchy has it all. Join us as we study the art, palaces, gender performances, laws, ideas and people who created, and undid, the French monarchy. Explore historical artifacts and art objects from medieval France to the French and Haitian Revolutions. And then put your historical and cultural skills to work in understanding why monarchy is having such a moment now, in television series, music videos, art, pop culture and politics. Course taught in English. No prerequisites. Counts toward the French studies minor and as an English-language course substitute for 1000-level course in the French major and as a course in English for the French minor.

FR 0075 - GLOBAL FICTIONS OF CLIMATE CHANGE

Minimum Credits: 3

Maximum Credits: 3

Scientists have been saying it for a while: humans have forever changed the Earth's climate. We know that glaciers are melting, seas are rising, wildfires are raging, and hurricanes are destroying shorelines. But how do we imagine the future? As the planet gets hotter, a new genre has emerged to inspire action: climate fiction (or cli-fi). In this course - taught in English with no prerequisites - you will read literature and watch television series and films that deal with the global impact of climate change. Explore a variety of creative work from around the French-speaking world: the Caribbean, sub-Saharan and East Africa, Canada, and the Mediterranean. Join us as we learn about the Anthropocene, environmental racism, slow violence, petrofiction, and Afrofuturism. Counts toward the Environmental Studies major, the French studies minor, the French major (as an English-language course substitute for a 1000-level course), and the French minor (as a course in English).

FR 0080 - MODERN FRENCH NOVEL

Minimum Credits: 3

Maximum Credits: 3

What makes a great read? Is it plot? Characters? Breaking literary conventions? Immersing yourself in different times and different voices? Playing with your emotions? This course explores some of the great reads of modern and contemporary French literature to find out what defines "the modern French novel." We will focus on developing your skills as discerning, attentive, feeling readers as we practice different ways to study, and enjoy, novels. This course is about you as a reader; it's also about you as a writer. As part of this W course, you will learn ways to troubleshoot

common writing difficulties (finding a topic, formulating a thesis, revising). Together, we practice a process approach to writing that includes informal and formal writing, a variety of revision activities, and developing competence in critical writing functions and formats. Come for the great reads, and stay to create great writing!

FR 0088 - AILING BODIES: NARRATIVES OF HEALTH AND ILLNESS

Minimum Credits: 3

Maximum Credits: 3

How can disease or illness be put into fictional form? Taught in English for a general audience, this course focuses on literary and cultural representations of disease from the perspective of the humanities. Topics may include Alzheimer's, anorexia, organ transplant, HIV-AIDS, and others. The novels that we will study all translate pain into language, and they rethink the doctor-patient relation and what an ailing body can do, as consequences of accident, illness, or disability. We will focus on contemporary literary texts from the French-speaking world and examine historical and cultural differences between France and the United States on medical issues such as organ donation, surrogacy, or vaccination. The French literary context is especially rich in the areas of medicine and health. Our approach will be informed by European philosophies of medicine, and we will investigate the narrative and aesthetic dimensions as well as the ethical stakes presented by a variety of types of texts. We will also examine how medicine interacts with, and redefines, notions of class, race, gender, and disability, and how science influences fictional, social, and political discourses on bodies. The course's focus on health and medicine should be of interest to premed/health/science students and anyone who wishes to study health topics from an interdisciplinary perspective. All texts will be read in English translation.

FR 0090 - EURO CHIC: THE INVENTION OF FASHION

Minimum Credits: 3

Maximum Credits: 3

Since the Renaissance, Italy and France have occupied a fundamental role in the establishment and development of fashion as a creative and commercial enterprise deeply rooted in cultural mores. The course address the historical shifts in the cultural understanding of gender roles, class belonging, consumption habits and expectations, the international circulation of craftsmanship and celebrities, and technological innovation. We will start addressing the anthropology of body ornamentation, gender markings and the difference between costume and fashion. Our historical point of departure is the grand arrival of Catherine De Medici from Florence to Paris in 1547, following her marriage to King Henry II of France. We then follow the progressive establishment of Paris as the capital of European (and eventually international) fashion, together with Italian cities like Florence, Venice and Milan. We also take a significant detour through London during the "dandy" era of the early 19th century and the "mod" and "punk" trends of the decades between 1960 and 1980. Punk leads us into a discussion of current international "anti-fashion" trends, such as the politics and economics of privilege, cheap labor and environmental concerns about "fast fashion." This course is taught in English. *This course may be used for the Italian Studies major (whether listed as FR 0090 or ITAL 0090), but does not count for the Italian major or the Italian minor.

FR 0104 - INTERMEDIATE FRENCH 2: FRENCH IN A GLOBAL CONTEXT

Minimum Credits: 3

Maximum Credits: 3

What does it mean to speak French in today's globalized world? Find out in French 0104! This second-year course in French language and Francophone cultures approaches French or rather "Frenches" as an umbrella term for the spoken and written conventions of multiple French-speaking spaces that go well beyond the borders of modern France. We explore the global use of the French language as a cognitive and communicative vehicle that spans six continents and is now official in 29 countries. Emphasis is on communicative, cultural and cognitive competencies in the various Frenches of the world. The course integrates the study of pronunciation, grammar, and vocabulary with the topics of the course. By the end of the semester, students will be able to identify the salient features of different Francophone accents (sounds, words, and structures), all while engaging in spontaneous conversation or written communication on familiar topics using dialect-appropriate vocabulary and grammar. Through class discussions and the study of primary visual, written and sung texts, we will consider questions such as: How precisely is French "global"? How is the French spoken in one part of the world different from that spoken in other parts of the world? How do different Frenches reflect different cultural values? How does migration function between Francophone cultures? Prerequisite: FR 0103, placement, or equivalent. Fulfills DSAS General Education Requirement in Global Issues. Language of instruction: French.

FR 0106 - CONVERSATION HOUR

Minimum Credits: 1

Maximum Credits: 1

This course is a one-hour weekly conversation workshop taught at the level of French 0103/0104. It is open to all students who have taken French 0102 at Pitt or equivalent elsewhere or who have the same proficiency level as would be expected after completion of such courses. We will approach oral skills in a relaxed and low-stakes environment. Based on the interests of the class, we will engage in various types of "conversation," including, but not limited to, current events in various Francophone polities, cultural products, practices and perspectives as well as speaking practice through debate and role-play. This course is meant to provide an arena to practice French and extra practice for students in 3-credit French language courses (especially 0103 and 0104) desirous of increasing their accuracy and fluency in the spoken language. It also serves students who want to maintain their French skills in order to enroll in a French course in a future semester. Grades will be calculated based on attendance and active participation in class. This course does not satisfy the Dietrich School language requirement.

FR 0220 - LA FRANCE AUJOURD'HUI

Minimum Credits: 3

Maximum Credits: 3

Who are the French today? What role have historical events played in defining the country and its people? What perceptions do the French have of themselves? How do geography, urbanism, and regionalism define the French? Are Parisians really snobs? What do the French have to say about current social and political movements and ideologies related to democracy, capitalism, socialism, globalization, post-colonialism, multiculturalism, far-right nationalism, racism, Islamophobia, feminism, and sexuality? This course investigates these questions and more, while delving into the habits and behaviors of the French in their daily lives. To this end, students will study recent articles, videos, and other media. This course is taught in French. Recommended prerequisite: FR 0004 or 0104 or 0021/0221 or 0027/0227 or 0055/0255 or 0056/0256.

FR 0221 - READING FRENCH: LITERATURE, MEDIA, CULTURE

Minimum Credits: 3

Maximum Credits: 3

How do French-speakers today experience media such as video games, graphic novels, literature, film, YouTube, medieval manuscripts, pre-modern books, and others in the digital age? This course examines how stories get told in French across different kinds of media; in illuminated manuscripts and graphic novels, in novels and films, in video games and fan fiction. You'll encounter some of the "classics" of French literature; and you'll explore how these classics have been rethought, remediated, and revitalized for new media and new audiences in exciting ways. This course practices a supportive, structured approach to language acquisition, with a focus on boosting and enhancing your reading skills in French. Taught entirely in French. Recommended prerequisite: FR 0004 or 0104 or 0027/0227 or 0055/0255 or 0056/0256.

FR 0227 - THE FRENCH ATLANTIC

Minimum Credits: 3

Maximum Credits: 3

This course is a study of the history of French colonization of the "New World" of the Americas from the sixteenth to mid-twentieth centuries, just after the second World War. By adopting an "Atlantic" approach, we will examine Europe, Africa and the Americas as interconnected regions. The course explores several themes: Voyages et Rencontres; les Français en Amérique du Nord; la Traite des Noirs; les Lumières et le Nouveau Monde; et Révolution à Saint-Domingue. Although each theme treats a different region and highlights a different time period, our approach will allow us to follow the writings of explorers, philosophers, administrators, generals, merchants, and former slaves around the Atlantic, from the coasts of France and West Africa, to the eastern United States, and south to the Caribbean and South American mainland. The course will be conducted in French.

FR 0255 - SPEAKING FRENCH: ATELIER D'EXPRESSION ORALE

Minimum Credits: 3

Maximum Credits: 3

As an oral skills course, French 0255 approaches speaking French in real life contexts. Focus is on speech acts. Students will learn how to present, narrate, describe, and speak French in various registers (from very informal to very formal) and with tact. We will continue to work on vocabulary building and grammatical mastery so that students are able to use French as needed to carry out various daily, professional and personal functions. Some examples of the speech acts we will learn to execute include: how to present oneself and one's peers, how to describe in detail people, places and things, how to narrate in the present, past and future, how to express and support points of views. These various speech acts will serve a larger framework of real life scenarios students may encounter later on in their studies or careers, for example when interviewing for a job, when interviewing others for a job, when speaking in front of a group, when speaking with colleagues, when running a meeting, when providing consulting services. The study and practice of spoken French is thus concentrated on the social turn and use in context. This course is taught entirely in French. Recommended prerequisite: FR 0004 or 0104 or 0021/0221 or 0027/0227 or 0056/0256.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: West European Studies

FR 0256 - WRITING FRENCH: ATELIER D'EXPRESSION ECRITE

Minimum Credits: 3

Maximum Credits: 3

Question: What do Samuel Becket, Edith Philips, and Oscar Wilde have in common? Answer: they are all exophonic

writers, writers who wrote in languages that were not their native tongues. And they were all English-speakers who wrote some or most of their work in French. You can too! What are the secrets to writing well in a language that is not your first? How can you leverage all you know about writing in your native language to improve your written expression in French? "Writing French: Atelier d'expression Ecrite" will teach you how to cultivate exophonic writing skills through a writing-as-process approach that is keyed to the challenges of foreign language composition. Class work and written assignments will include writing effective professional and personal correspondence, composing a CV or job resume, writing journal articles and critiques as well as creative pieces (such as fables, poems, or song lyrics for a Francophone audience). Through textual modeling, cooccurrence analysis (words that go "together"), and comparative vocabulary and grammar review, you will learn techniques needed to write in a variety of genres and to "sound French." Recommended prerequisite: FR 0004 or 0104 or 0021/0221 or 0027/0227 or 0055/0255.

FR 0258 - ADVANCED FRENCH CONVERSATION

Minimum Credits: 1

Maximum Credits: 1

An advanced conversation course in French for majors and non-majors who wish to maintain or improve their command of the French language through a discussion of contemporary topics. This one-unit class at once builds on and complements French 0055/0255. It is designed to improve students' oral proficiency and sociolinguistic competence through contextualized simulated immersion. The course is divided into four sections, each demanding different, but complementary social and linguistic skills, to wit 1) getting to know people and places; 2) current events; 3) debate and disagreement; 4) cultural comparisons. Emphasis is on acquiring the authentic oral communication skills, in the widest sense of the term, necessary to navigate expertly French-speaking environments. This course can be repeated, but can only be counted toward the French major/minor once.

FR 1022 - CREATIVE WRITING WORKSHOP

Minimum Credits: 3

Maximum Credits: 3

In this workshop, you will create your own texts in French. We will work on the prose poem, the short story, the fairy

tale, and creative nonfiction, while exploring the boundaries between these different genres and the stakes of reading and creating literature in today's digital world. The workshop format includes presentation of your work and guided peer critique in a collaborative and supportive environment, as well as discussions of textual "intermediality" and of literary models as inspiration for your own work. This course will focus on guided production of written work in French and on the language choices that writers make within the conventions of certain literary genres. You will organize and host a "book club" in French on a recently published novel from the French-speaking world. A public reading of a selection of your work, followed by a Q&A session with the audience, will be organized at the end of the semester. No previous experience in creative writing is required or expected. Taught entirely in French. Prerequisite: at least one of the following: FR20, FR21, FR27, FR55, FR56, or permission of the instructor.

Academic Career: Undergraduate

Course Component: Workshop

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Creative Work General Ed. Requirement, DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

FR 1023 - FRENCH THEATRICAL WORKSHOP

Minimum Credits: 3

Maximum Credits: 3

In "French Theatrical Workshop," we will use theatre and performance to improve your ability to interact in French, through the studying and staging of a play. The class will behave as a performing troupe, with every student being involved in every stage of a theatre production. Students refine their communication skills by memorizing lines, delivering them, and interacting in French.

Course Attributes: DSAS Creative Work General Ed. Requirement, DSAS The Arts General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

FR 1025 - THE IDEA OF FRANCE

Minimum Credits: 3

Maximum Credits: 3

In this course, students will examine the question of how France, the French nation, and Frenchness (francité) have been imagined. What is the "idea of France" throughout different historical periods? How do modern notions of what France is imagined to be relate to pre-modern notions? What have different time periods (such as the Middle Ages, the Renaissance, the Enlightenment, colonization) contributed to the concept of France? What role does language play in Frenchness? How do concepts of race, gender, and ethnicity factor in to all these questions? This course will investigate what France was/is thought to be, how it is constructed through words, images, and acts. To treat this topic, we will take an interdisciplinary cultural studies approach. This means we will examine many types of "texts", including literature, philosophy, manifestos, historical documents, film, video, music, webpages, architecture, newspaper and magazine articles, essays, works of art, maps, encyclopedias, and dictionaries. We will investigate the concept of "citizenship" in challenging texts and relate it to current events and the news. This course is also about you sharing your knowledge and passion for things French with the general public, through research in the French Nationality Room archives and the organization of an event during the Week of Francophonie. You will also write formally and informally in French in several genres (academic paper, op-ed piece, rationale, podcast script). This course will be taught in French.

Academic Career: Undergraduate

Minimum Credits: 3

Maximum Credits: 3

The Paris Climate Agreement. Climate change's effect on French wine and cheese. Nuclear energy in France. French green political parties. "Agro-ecology." Environmental rights in French philosophy. French climate fiction. French culture has always been closely connected to environmentalism and sustainability and to questions around climate change. Taught in English for a broad audience, "Green France" allows students from a variety of fields to consider French and Postcolonial French ecological and environmental challenges. We will adopt an interdisciplinary perspective, from disciplines such as sociology, economics, political science, cultural studies, philosophy, film and media studies, and literary studies. Students will consider French philosophical approaches to these issues as well as land- and energy-related issues in geographical spaces situated in specific historical, political, geographical, and anthropological contexts (including the French Hexagon, the French Caribbean, and Algeria). Students will study and analyze cultural materials, bringing in their own disciplinary interests to formulate a final research project on a topic related to sustainability/environmentalism, and they will share their work with their peers and online.

FR 1037 - FRENCHES IN EUROPE: DIALECTS IN DIALOGUE

Minimum Credits: 3

Maximum Credits: 3

Il drache ! Dans les années septante... Peux-tu attendre sur ces clients ? Elles refusent de poutzer toute la chambre... On est amis, peut-on faire schmolitz ? Ou est-ce que vous entendriez ces tournures ? Font-elles partie du français "standard" ? Qu'est-ce que le français dit "standard" de toute façon ? Dans ce cours nous répondrons à toutes ces questions et à bien d'autres en explorant la diversité linguistique de l'Europe francophone là où elle est en contact intense avec d'autres sphères linguistiques : le nord de la France (Lille). Nous analyserons alors les prononciations, les mots, les tournures et les innovations récentes dans ce contexte multidialectal et multilingue. Car pouvoir dire parler le français suppose forcément pouvoir dire entendre et comprendre le français--dans toutes ses différentes réalisations. Notre approche multilittéraires ouvrira la porte à l'étude de la différence dialectale en nous permettant un accès aux textes dans le sens large du terme : textes oraux (balados, radio, enregistrements), textes écrits (extraits littéraires, articles de presse, textes techniques), textes multimédias (télévision, cinéma, publicités, vlogues, youtube). It is pouring ! In the nineteen seventies... can you wait for these customers? They refuse to clean the whole room. We're friends eh, can we use the familiar (beers in hand with arms together)? Where would you hear these turns of phrase? Are they a part of standard French? What is standard French anyway? In this course, we answer these questions and many more by exploring the linguistic diversity of French-speaking Europe there where it is in intense contact with other linguistic communities. We will thus analyze pronunciations, words, expressions and recent innovations in this multidialectal and multilinguistic context. Indeed, being able to say you speak French necessarily implies being able to hear and understand French in all its different manifestations. Our multiliteracies approach opens the door to the study of dialectal difference by giving us real access to texts in the widest sense of the term: spoken texts (podcasts, radio, recordings), written texts (literary excerpts, press articles, technical writings), multimedia texts (television, movies, advertisements, vlogs, youtube).

Grade Component: LG/SNC Elective Basis

FR 1039 - VARIETIES OF WORLD FRENCH(ES)

Minimum Credits: 3

Maximum Credits: 3

Dans ce cours, nous retracerons l'évolution de l'espace francophone (la « Francophonie ».) Bien que la sociolinguistique historique fasse partie de notre programme, nous privilégierons davantage les questions synchroniques. Nous analyserons donc les caractéristiques des français différents (en Amérique du Nord, en Amérique du Sud, en Afrique, en Asie et en Europe) en tenant compte des distinctions phonétiques, phonologiques, morphologiques, lexicales, sémantiques, syntaxiques et pragmatiques de ces variétés socio-géolinguistiques. À la fin du semestre, vous serez capables de distinguer les variétés du français en vous rapportant à l'interface de ces caractéristiques linguistiques et les milieux sociaux dans lesquels elles se manifestent. Une telle appréciation vous aidera également à mieux maîtriser le français et donc à mieux vous exprimer, car vous aurez acquis des connaissances plus approfondies de la langue telle qu'elle s'emploie-à l'oral, à l'écrit et en tant que symbole culturel-partout dans le monde. COURS PRÉALABLES: FR 0104 + au moins deux cours de la série suivante: 0220, 0221, 0227, 0255, 0256 ou la permission du professeur.

FR 1047 - FRENCH TELEVISION: MEDIA TRANSLATION, SUBTITLING, AND DUBBING

Minimum Credits: 3

Maximum Credits: 3

This course will introduce students approaches to studying television made in and about France and to basic translation techniques (French into English and English into French) through media localization (subtitling and dubbing projects). In the first third of the course, students will learn basic tools to analyze and describe television narrative, images, sound design and genres while we work on listening comprehension through transcription exercises of the French series we watch. In the second third of the course, we will shift to learning theories and practices of translation and subtitling using some of transcribed scenes students created earlier. In this part of the course, students will individually transcribe, translate into English, and subtitle a short three to five-minute episode of a French comedy series. In the final third of the course, we will study dubbing practices and collectively translate and dub an episode of an American sitcom into French. We will also learn about possible career paths in translation and media localization throughout the semester. This course presumes no prior knowledge of or experience with television, translation, transcription, subtitling, and

dubbing practices or software. It does presume an intermediate mid-high (B1) or above level of French. Ideally, students will have completed the intermediate sequence (220, 221, 227, 255, and 256) before taking this course. The course will involve significant group and lab work in addition to individual projects. Class projects will be graded using specification grading emphasizing task completion and learning rather than quality of translation or technical polish. Course readings will be in French and English, and the course will be mainly taught in French with some English used during the technology workshops and some of the translation parts of the course. This course satisfies the Dietrich School general education requirements for "E.3. A Course in Creative Work." Translation is a form of creative labor, as calls in the localization industry for better pay, longer time to work on individual projects, and increased recognition demonstrate. Subtitling and dubbing exercises in this class will focus on comedy, one of the most challenging genres to translate and one that requires significant creativity. Students will learn about the difficulties of translating humor and cultural references by subtitling a French comedy episode into English and by translating an American sitcom into French. They will also perform and record the dubbed voices in French. They will learn professional practices in the localization industry, common translation techniques, and the software tools for subtitling and dubbing. They will leave the class with a subtitled short episode made on their own and a dubbed 30-minute sitcom episode produced by the whole class. Many of our French majors and minors are interested in translation as a form of creative research, and this class will train them to work on future creative research projects in this area.

FR 1053 - GLOBAL FRENCH

Minimum Credits: 3

Maximum Credits: 3

Global French is a designated W-Course and fulfills a writing-intensive course requirement. This course frames questions about French and francophone literature, culture and film in a global context to ask: how can one be French and global? We will investigate spaces, objects, environments, and texts that allow us to think about connections between France and the world in different transcultural, literary, and historical contexts. Course materials cover the Middle Ages to the contemporary period and include literary texts, historical documents, film, visual culture, critical readings, and online sources. As a Writing-Intensive course, this seminar gives you the opportunity to define and explore questions about global French, engage in original research, and test and revise your ideas through different kinds of writing activities. You will produce approximately 25 pages of written French, including informal writing, short essays, and a longer research project. TAUGHT IN FRENCH Prerequisite(s): at least nine credits above FR 0104 or permission of instructor; completion of FR 0027 (French Atlantic) is recommended but not required.

FR 1065 - GENDER, SEXUALITY, AND FRENCH THOUGHT

Minimum Credits: 3

Maximum Credits: 3

Course taught in English. Some of the most important thinkers about gender and sexuality are French. In this course, you will study French thought about both gender and sexuality. We will discuss and evaluate key French thinkers, including their takes on relations between men and women that they posit or critique. Simone de Beauvoir gets things started for the 20th century, but many have responded to *The Second Sex*, which may be the most influential work of western gender theory ever. And let's not forget that there were feminist thinkers in the middle ages and Renaissance. What did they have to say? Are there French trans* and non-binary theories? (The short answer is yes.) And what of the theories of sexuality from Michel Foucault, whose work helped found the field of LGBTQ studies? Can someone explain what sexuality is in his hugely influential *History of Sexuality*? Why is Foucault critical of science? And what do the French have to say about masculinity? About intersex? About intersectionality? About pronouns? Gender and sexuality are taken in the broadest possible sense, and we will consider thought on women, equality, feminism, queerness, homosexuality, intersex, masculinity, trans*, non-binary, and race/gender intersections. We will consider the transatlantic reception of French thought in American gender theory and consider how French film and other cultural texts are in dialogue with theoretical models. French films about gender/sexuality will be used to "test" some of the theoretical models and to think about what they might mean in cultural practice. This interdisciplinary and discussion-based course is open to all students (no pre-req). As the French have been deeply influential in gender thought, this course helps students understand a key Western intellectual tradition. This course is taught in English, and all readings/texts will be in English. No French is required. Mid-term and final exams are take-home. The course counts as a course in English for the French major and minor. It satisfies the following general education requirements: DSAS Diversity, DSAS Geographic Region, DSAS Philosophical Thinking or Ethics. It also counts toward the major/minors in Gender, Sexuality and Women's Studies.

FR 1067 - FEMINIST AFRICA

Minimum Credits: 3

Maximum Credits: 3

"We should all be feminists," claimed Nigerian writer and feminist activist Chimamanda Adichie. But what does it mean to think about Africa as feminist? How do race, postcolonialism, and nation relate to feminism in this context? To reflect upon these issues, this course explores how African writers, directors, and critics construct and represent female subjectivities and identities in their creative works. In addition, we will explore key theoretical texts that deal with feminist discourse in Africa and the diaspora to understand its genealogies and to contextualize critical categories such as "gender." What does "gender" even mean in these contexts? The course approaches gender and feminism via a diverse corpus, taking into account temporality, geography, and language, to help students understand and appreciate the literary tradition of African feminism. Through close readings of core written texts and films from both Francophone and Anglophone Africa, we will examine the intersections of gender, class, race, nation, and

postcolonialism. Through readings and viewings, "Feminist Africa" aims to introduce students to the histories of feminism on the continent and to help them understand how African writers articulate women's experiences. In tandem, we will analyze how scholars and feminist activists develop theoretical frameworks and analytical tools rooted in their realities to address issues about African women. This course is taught in English and open to any interested student (no prerequisite). The course should be of particular interest to students in postcolonial studies, English, African/a studies, global studies, French/Francophone studies, political science, international studies, public health, and gender studies.

FR 1068 - LA VIE EN NOIR: CULTURES OF BLACK FRANCOPHONE AFRICA

Minimum Credits: 3

Maximum Credits: 3

Much of Sub-Saharan Africa is "Francophone," but what does this mean exactly? How does French relate to daily life, to visual culture, and to written texts in this part of Africa? This course introduces students to the field of Francophone cultural studies and Black Francophone perspectives on key issues in the twenty-first century. What does it mean to "be Francophone"? What are the particularities of Francophone cultural expressions in Black Africa? How do Francophones address social issues in cultural production? We will explore these questions (and others) through a wide range of materials, including music, film, literature, and ethnographic works from this geographic and cultural region of Africa. We will examine topics such as African oral traditions, nationality, language, postcolonialism, Negritude, Francophonie, gender, sexuality, sports, and immigration. Course taught in French. Suggested prerequisite is at least one of the following: FR0255, FR0256, FR0220, FR0221, any 1000-level course taught in French, or permission of instructor.

Academic Career: Undergraduate

FR 1070 - GENDER AND SEXUALITY IN 21ST CENTURY FRANCE

Minimum Credits: 3

Maximum Credits: 3

French culture has always had much to say about questions of gender and sexuality. In this course, we will consider key cultural products, perspectives, and practices around the concept of gender broadly conceived, including masculinity, feminism, hetero/homosexuality, transgenre, and others. Questions of nation, race, and ethnicity will factor into our discussions as well, and we will think often about the words or language that texts employ to talk about gender. We will also engage in cross-cultural comparison between France and our own cultural context(s) to give us comparative insight into the world we live in. We will treat questions such as: What is the current 'crisis' in French masculinity? What does it mean to be a man today in France? What is the current state of feminism in France, and how does it differ from previous incarnations? How does the discourse of homosexuality and queerness compare to the US context? What does transgenre signify? When and how did transgenre appear as a category in France? How are French constructs of gender inflected with Arab or North African identities? What other recurring forms of intersectionality are there? And how is all this represented in cultural texts? Our focus will be French culture since the turn of the century. Taking an interdisciplinary cultural studies approach, this is not a literature course per se (though we will read some literature). To aid us in our task, we will discuss and analyze a wide variety of recent texts in French from the 21st century: comic books (BD), films, documentaries, YouTube videos, music, webpages, journalistic prose, manifestos, political and government tracts, school textbooks, autofiction, novels, children's literature, pop psychology, etc. As the course is taught entirely in French and all written work is in French, you will increase your linguistic proficiency in reading, writing, speaking, and listening. You will also acquire the semantic tools you need to talk and write about gender and sexuality in French. Prerequisite: at least six credits above French 104, or permission of the instructor.

FR 1074 - PLAGUES AND PANDEMICS: PUBLIC HEALTH IN THE FRANCOPHONE WORLD

Minimum Credits: 3

Maximum Credits: 3

The COVID-19 pandemic has urged us to rethink our role in global health, from taking care of all living beings to rethinking our relationship to the environment as the "new normal" renegotiates our collective memory, recovery, and resilience. Experiencing the lockdown and the successive waves of COVID variants has brought us to reassess what we mean when we talk of "good physical and mental health." Delving into philosophy, literature, and the arts can provide comfort in knowing that humanity has gone through similar phases in the past. In this literature and cultural studies course, students will have an overview of the principles and practice of public health in the Francophone context, that is to say: in hexagonal France, its former colonial Empire, and its current overseas territories. Our interdisciplinary approach will consider primary sources ranging from literature and the arts to news outlets, film and social media, but will also draw on scientific studies, historical accounts, sociological studies, and urban studies to shed light on current and pressing questions such as: is there a link between vaccination status, class and race? Should obesity and diabetes be considered as "epidemics" in a culture where food is so important? Are we entering into an age of zoonoses (a disease or infection that is naturally transmissible from vertebrate animals to humans, such as monkeypox), and how should we design better cities to accommodate all forms of lives? How should societies include disabled people beyond providing accessibility? Students will gain knowledge about the organization of healthcare (patient-centered, as well as research programs) in France and how public health is organized at the local, national, and international level. First, they will read about the successes and failures in terms of the management of epidemics: the plague, AIDS, hysteria (or collective feminine madness), chikungunya, and dengue. They will also examine a series of case studies such as the chlordecone pollution in the French West Indies, reproductive injustice in Reunion, nuclear instability in French Polynesia, and the development of health humanities art programs in Quebec. They will become acquainted with current challenges in the Francophone world and think about ways to improve health and eliminate health disparities. They will also examine how public health interacts with and redefines notions of class, race, gender, and disability, and how science influences social and political discourses on bodies. This course is taught in English, no French is necessary.

FR 1076 - FRENCH INTELLECTUALS

Minimum Credits: 3

Maximum Credits: 3

From environmental issues to gender politics, from the culture of capitalism to universal human rights, from media encroachment to esthetic values, French intellectuals had something to say about it all! In this class, we will discuss the tradition and the contemporary practice of public intervention on the part of writers, artists, sociologists and philosophers in modern France. The class starts with the contemporary figure of French economist Thomas Piketty, and then goes through a chronological review of the significance of enlightenment thinkers such as Voltaire and Rousseau, early critics of capitalist society such as the writers Balzac and Stendhal, Emile Zola's famous denunciation of anti-Semitism in the French military establishment at the turn of the 19th/20th century, 20th-century French existentialist Jean-Paul Sartre, feminist thinkers such as Simone de Beauvoir and Monique Wittig, environmental critics such as the un-growth advocate Serge Latouche and postmodern sociologist Jean Baudrillard.

FR 1077 - THINKING THE EARTH: THEORIES OF THE ENVIRONMENT FROM THE FRENCH-SPEAKING WORLD

Minimum Credits: 3

Maximum Credits: 3

Climate change is forcing us to radically rethink the human position in our environment. In this class (taught in English with all reading in translation), students will benefit from the important contributions that French-speaking thinkers have made to our conceptual arsenal in the field of environmental ethics and philosophy. Some of our questions will include: Why are we still reading and debating Jean-Jacques Rousseau's evocation of a state of nature and his critique of Western social and political development? Why did French philosophers and cultural scholars recast Martin Heidegger's understanding of the Umwelt (the World Around Us) and his critique of technology? How did Rousseau and Denis Diderot critique the French colonial enterprise already in the 18th century? How do post- and decolonial thinkers reframe the debate about the Anthropocene today? And finally, how do philosophy and ethics offer us the tools to take a stand in today's political debates about the future of the human environment? In short, how can we "think the Earth"? Open to any student (no prerequisite), the course may be of particular interest to students in areas such as the humanities, the natural sciences, history, environmental studies, political philosophy, global/international studies, public health, and the sustainability program.

Course Attributes: Undergraduate Internship, West European Studies

FR 1907 - FRENCH UNDERGRADUATE TEACHING ASSISTANTSHIP

Minimum Credits: 1

Maximum Credits: 3

This applied course in pedagogy is designed to provide advanced French majors the opportunity to share their knowledge, experience and passion for the French language and French-speaking cultures with underclassmen and students newer to the major. In concert with the faculty member teaching the course for which the French major will be the UTA, a list of duties will be discussed, among which may include : facilitating discussion groups or other collective fora, organizing tutorials and holding consultatory office hours, assisting faculty member in lesson planning, material(s) development and maintaining course Canvas sites and/or online document repositories for the course. Per the guidelines set by the Dietrich School of Arts and Sciences, French UTAs may not substitute teach for the faculty member, nor grade papers, quizzes or exams, nor assign any midterm or final grades, nor perform any work for the faculty member unrelated to the course in question. Faculty members under whom a French Major UTA works will meet regularly with said UTA throughout the term and provide guidance and support while articulating expectations clearly to the UTA. Attribution of credits (1-3) should be commensurate with the work to be performed and should be communicated to the UTA before the start of the term. Further details of the guidelines can be found on the Dietrich School's site.

FP 0008 - ACADEMIC FOUNDATIONS - EXPLORATION OF CIVIC ENGAGEMENT

Minimum Credits: 1

Maximum Credits: 1

Academic Foundations - Exploration of Civic Engagement is designed for first-term students as an academic orientation to the University and to the Dietrich School of Arts and Sciences. Through class work and out-of-class activities, students will gain knowledge of the educational opportunities available to them on and off campus, engage in cohort style learning with other first-term students and be introduced to valuable resources that can aid them as a first-year college student. Using Stanford University's Civic Pathways framework, students will explore their civic identity through intentional dialogue and mindfulness reflection practices. This course's aim is to encourage students to commit to civic engagement for the entirety of their university experience to make a positive lasting impact in Pittsburgh communities and beyond.

Gender, Sexuality, and Women's Studies

GSWS 0001 - GENDER AND LEADERSHIP

Minimum Credits: 1

Maximum Credits: 1

Students residing in the women lead LLC enroll in this course, which is a one-credit experiential course in the fall term. This seminar will expose students to information about women leaders and the challenges they experience during their ascension to, and acceptance of, various leadership positions. The course will include discussion, reflection, and attendance at speakers and events within the Pitt and Pittsburgh community.

GSWS 0100 - INTRODUCTION TO GENDER, SEXUALITY, AND WOMEN'S STUDIES

Minimum Credits: 3
Maximum Credits: 3

What is sex? What is gender? What is sexuality? How are these concepts related to culture? To nature? To help you answer these important questions, this course will introduce you to the exciting field of gender and sexuality studies. We will use a range of interdisciplinary concepts, tools, and methods to understand and analyze sex, gender, femininity, masculinity, and sexuality. Through readings, multimedia, and class discussion, we will study how gender and sexuality are socially and culturally constructed. In addition, we will consider how gender intersects with other identity categories such as race, class, ethnicity, nation, age, ability, and sexuality. Because we all have a gender and a sexuality, this course is crucial for any profession and for understanding the world around us. Taught in discussion-based sections, it is also a great opportunity for you to develop your written and oral skills. Also, you will learn to apply the critical vocabulary used in gender studies to other fields of study. The course is open to all students regardless of background and has no pre-requisite. As a prerequisite for more advanced courses in the GSWS program and as the intro course for current or future students in the GSWS major and minor, this course will prepare you for more advanced coursework. Check the individual section to determine whether the section is a 'W' section.

GSWS 0150 - GENDER IN THE PROFESSIONS

Minimum Credits: 3
Maximum Credits: 3

How are the goals and concerns of feminism relevant in a variety of workplaces? Why haven't women achieved equal pay for equal work, compared to men? What is unpaid labor, and why does it matter? Why should my organization create policies that support individuals regardless of gender identity, gender expression, and sexuality (and what do those terms mean, anyway)? To help you answer these important questions, this course will take an introductory, intersectional approach to gender in the professions. We will use a range of interdisciplinary concepts, tools, and methods to understand and analyze sex, gender, and sexuality as they relate to the world of work. Through readings, multimedia activities, and class discussion, students will develop tools to critically analyze the ways in which social and cultural forces shape us as gendered individuals and influence our career aspirations, professional interactions, and service experiences. In addition, we will consider how gender and sexuality intersect with other identity categories such as race, class, ethnicity, nationality, age, and ability. Because we all have a gender and a sexuality, this course is crucial for any profession and for understanding the world around us.

GSWS 0200 - SEX, RACE, AND POPULAR CULTURE

Minimum Credits: 3

Maximum Credits: 3

Popular culture is often defined as a collection of ideas, images, beliefs and practices that have become an essential component of peoples' daily lives. While popular culture is dismissed by some as merely a mass consumer culture, others acknowledge that contemporary popular cultural forms may, in keeping with a history of once contemporary popular art, culture, and literature (e.g. Dickens, Warhol, etc.) Come to be understood as essential, canonical and elite. Ultimately, these materials may be read as a texts that inform our understanding of culture and social life and prompt such questions as: how does popular culture (re)construct our sense of "ordinary" life as something extraordinary? Why are some cultural forms dismissed and others more readily accepted? What social processes bring cultural forms into the public domain? This course will examine popular culture in a variety of forms such as: music, art, television, collectibles, internet, and social media. Students will consider examples from Western, non-Western, and "global" culture, but will use sex and sexuality, gender, and ideas of race to understand the relationship between popular culture, material culture, representation, and consumerism, and power and resistance. It will also address these phenomenon over time. This course will make especially strong use of contemporary and popular media such as video clips, internet media and images, and music.

GSWS 0230 - INTRODUCTION TO LGBTQ STUDIES

Minimum Credits: 3

Maximum Credits: 3

This course is an introduction to Lesbian, Gay, Bisexual, Trans and Queer (LGBTQ) Studies. Course readings will explore LGBTQ Studies from an interdisciplinary and intersectional perspective with a focus on how sexual orientation and gender shape human experience and access to privilege. Our work will foster a critical understanding of a range of issues in LGBTQ Studies, including LGBTQ as it relates to questions of sexual diversity, the legal history of LGBTQ lives, LGBTQ social movement, LGBTQ health, LGBTQ literature/art, LGBTQ history, global approaches to LGBTQ Studies, and theories and methods in LGBTQ studies. Students will choose a research topic in LGBTQ Studies and will develop a final paper that explores this topic using key concepts, theories, and methods in LGBTQ Studies. Final papers will also reflect on LGBTQ contributions to our understanding of human variation and diversity.

GSWS 0400 - GENDER AND SCIENCE

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the interaction of gender and sexuality with science, medicine, and technology. The goal of this course is to assist students in developing an understanding of the ways in which science has constructed our understanding of gender and sexuality since the nineteenth century, as well as the lived experiences of people within the scientific community who shape and navigate these concepts. To accomplish this goal, we will apply feminist theory, including feminist critiques of the history of medicine, psychology, and science, and gender theory, to an investigation of the evolution of scientific knowledge regarding gender and sexuality, as well as race, disability, and health. We will also explore the ways in which people, especially women, people of color, and transpeople have interacted with technology, shaped scientific discourse. In each course lecture and discussion, we will focus on a broad range of scientific fields, discourses, and narratives to construct a comprehensive understanding of the scientific knowledge and identity in the modern world. While the readings focus largely on American and Western examples and experiences, class discussions and presentations will expand the scope of this class considerably, allowing students to understand the global relationship of gender and science.

GSWS 0500 - INTRODUCTION TO FEMINIST THEORY

Minimum Credits: 3

Maximum Credits: 3

This course is an interdisciplinary introduction to the feminist ideas and debates concerning gender, women and men, and their political, social and economic positions over the last two hundred years. While we will focus on the United States, there will be some engagement with global feminist perspectives on gender, race, class, and sexuality. In keeping with the activist nature of feminist theory, this course will approach 'theory' as attempts to answer fundamental questions about the power relations that structure our everyday lives and consciousness. Theory in this sense is a tool for thinking systematically about how the world works, and for constructing arguments about how it should work. Consequently, we will pay particular attention to the (de)construction of power in both public and private relations as we critically analyze texts, discuss and present ideas in class, and complete written analyses. Students will have opportunities to apply feminist theories to their work in their home disciplines.

GSWS 0550 - SEX AND SEXUALITIES

Minimum Credits: 3

Maximum Credits: 3

How and why did sex and sexuality become subjects of study? How are our experiences of sex and sexuality shaped by a history of 'scientific' explorations of desire? Why has sexuality become so central to our understandings of identity? What was sex like before 'sexuality' was invented? This seminar explores these questions by approaching sex and sexuality as socially, historically, and culturally contingent concepts. We will consider sex and sexuality as they are related to other categories of identity, including race, class, ethnicity, nation, and ability. Our theoretical and historical investigations will create the groundwork for understanding and rethinking how sexuality is understood in culture today.

GSWS 0600 - GLOBAL LGBTQ LITERATURE

Minimum Credits: 3

Maximum Credits: 3

This course will survey global LGBTQ literature. We will read novels, short stories, poetry, and/or plays from a variety of different locations with a strong focus on non-Western texts. We will also read key works in literary analysis, LGBTQ theory, postcolonial theory, critical race studies, and global studies. The variety of reading will allow us to engage with different approaches to LGBTQ literature, and it will introduce you to the various ways that nation and culture shape literary production. Students will be able to identify key methods in literary analysis upon completion of the course. Seminar discussions will focus on the use of key terms and theories as well as the development of research skills so that students will be prepared to produce written research on global LGBTQ literature.

GSWS 1130 - GENDERED BODIES

Minimum Credits: 3

Maximum Credits: 3

For centuries, the biological sciences have embraced the human body as a product of nature in need of study, measurement, and treatment. Much of this knowledge has contributed to discourses of "normal" and "healthy" bodies. However, contemporary social science and feminist perspectives offer alternative readings of the human body as a social construction based upon cultural conventions and perceptions of gender, race, class, and sexuality. As Lorber and others have argued, "the result is a gendered body, produced for a gendered social world." This class will examine a

wide variety of gendered social constructions of the human body at work, in sports, and in media images that reflect standards and ideals of "beauty," "health" and "deviance." We will also consider the meaning of gendered bodies in light of contemporary technologies - such as plastic surgery, steroids, infertility treatments - that help to reveal the ways in which males, females, and "others" become "men" and "women."

Academic Career: Undergraduate

Course Attributes: Gender, Sexuality & Women's St

GSWS 1180 - POLITICS OF GENDER AND FOOD

Minimum Credits: 3

Maximum Credits: 3

Food is sustenance and absolutely essential to life. But food is never simply about nutrition. Because it is fundamental to the human experience, food is also a medium for the expression of culture and social identity. Moreover, food relays complex social messages about gender, sexuality, and family. Consequently, food is also a means for expressing the social and symbolic use of power and control in which social inequalities are expressed in culinary forms. This course will examine food from the vantage point of gendered systems of production, distribution, and consumption as we consider: How does your food come to your table (or not) and what are the political implications of personal tastes? By the end of this course, students will be able to: 1) apply anthropological and feminist theories to food and eating in a cross-cultural perspective; 2) understand how gender, race and class influence our access to and perspective on food; and 3) make connections between eating and cultural identities and beliefs.

Academic Career: Undergraduate

GSWS 1200 - TRANSGENDER STUDIES

Minimum Credits: 3

Maximum Credits: 3

This course is an introduction to the interdisciplinary field of transgender studies. The course is first and foremost about trans contributions to our shifting understandings of sex, gender, identity, and the body in theory, culture, art, psychology, science, and activism. Some of the topics we will examine include: the history and emergence of transgender theory, global understandings of trans issues, feminist/queer encounters with trans theories, the politics of trans visibility, and trans lives in film and literature. The course will cover major topics within the discipline, including queer/trans "border wars," intersectional approaches in trans theory, the various meanings and uses of "trans" in different disciplines, and the relationship between trans theories and existing models of sex, gender, and sexuality.

We'll pay close attention to how transgender studies has challenged and/or enhanced thinking in feminist and queer theory.

GSWS 1210 - GENDER AND THE DIGITAL

Minimum Credits: 3

Maximum Credits: 3

This course will explore the relationship between identity, media, and digital culture, specifically how gender is constructed and contested through forms of media. Students will consider how media also informs notions of race, class, sexuality, religion, and ethnicity, among other identity markers. This course will rely on thoughtful and academically stimulating analyses of media, such as television, film, music, advertising, online spaces, video games, among others, and in various combinations.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

GSWS 1230 - GENDER AND MEDICINE

Minimum Credits: 3

Maximum Credits: 3

In this course, we will explore the ways in which modern, western medicine creates, and organizes, and studies gender, sex, race, and class, as well as the historical and theoretical/philosophical concepts that underpin these categories. We will also consider how identity and privilege shape the relationship between medical professionals and those seeking care, and how the study of medical humanities can improve and enrich those relationships. Using historic texts, medical resources, and feminist critiques of science and medicine, we will query how notions of health and illness have evolved over time and in specific historic moments, questioning the construction of medical diagnoses, research methods and ethics, and the implications of data gaps in medicine. Each class will be structured around a series of questions that provide students an opportunity to apply prior knowledge and developing research skills to describe the evolution of medical knowledge, the medical profession, and its impact on culture, activism, and feminist theory.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SU3 Elective Basis

GSWS 1280 - TRANSNATIONAL SEXUAL POLITICS

Minimum Credits: 3

Maximum Credits: 3

This course develops students' understanding of diversity and global issues in relation to sexuality and sexual identities in a transnational context. More than just assuming that sexuality and sexual identities are stable across different historic periods and geo-political contexts, this course approaches sexuality and sexual politics from the perspective that there are diverse ways that people express their sexuality across time and place, and that these expressions are embedded in politics of contestation, resistance, and liberation connected to histories of colonialism and contemporary conditions of globalization. Looking at social movements, global conflicts, violence, activism, and socio-legal frameworks, the course investigates how sexuality, sexual identities, and sexual politics are much more diverse across the globe than popularly understood. Looking specifically at the relationship between sexuality and colonialism, race and racialization, gender identity, ethnicity, globalization, neoliberalism, and citizenship, the course introduces students to texts that interrogate the assumption that sexuality is stable, coherent, or universal; instead, these texts argue that

sexuality is diverse across history and geography, and a key facet of both human self-expression and global politics.

Academic Career: Undergraduate

GSWS 1300 - WANDERLUST: SEX & GENDER IN GLOBAL TOURISM

Minimum Credits: 3

Maximum Credits: 3

Tourism is among one of the world's largest industries, generating trillions of dollars in revenues and employing millions. It is heavily relied upon as an economic strategy for developing countries. This course will examine the gendered cultural practices of travel and the impact tourism has on both host and guest communities. Leisure activities were once deemed unimportant topics for study. However, tourism has been a central dimension of globalization, and it can be used as a lens to reflect on many questions about identity and heritage, commoditization, historical and cultural representation, authenticity and ownership, neoliberalism, inequality, gender relations, environmental sustainability, and more. We will examine various forms of tourism, including, but not limited to: ethnic, historical, regional, and ecotourism. We will pay close attention to health and medical tourism, a growing phenomenon in today's global world. Themes of the gaze, authenticity, identity, consumption, ritual, borders, and pilgrimage will be considered throughout the term especially with regard to the ways in which they simultaneously draw upon and reconstruct notions of the "Other" that are built upon social constructions of gender, race, class, sexuality, age, ability, etc. There are no prerequisites for this course, although GSWS 0100: Introduction to Gender, Sexuality, and Women's Studies; GSWS 0500: Introduction to Feminist Theory; or another course on gender is recommended.

GSWS 1450 - GENDER AND SUSTAINABILITY

Minimum Credits: 3

Maximum Credits: 3

This course will critically analyze sustainability from gendered perspectives. It will take a three-pronged approach to the study of sustainability and gender, engaging with the economic, social, and environmental components that contribute to our understandings of sustainability and sustainable development. Through readings, written assignments, and class discussions, students will examine the intersectionality of gender and sustainability with class, race, ability, age, nationality, religion, power, politics, social movements, and health from local and global perspectives. Students will critique practical applications of sustainable development and the role of gender in creating a more sustainable future. Taking an interdisciplinary approach, this course will draw on perspectives from anthropology, sociology, environmental studies, gender and development, human geography, public and international affairs, political science, economics, engineering, geology, business, urban studies, and a range of health sciences. Students will have the opportunity to learn about gender and sustainability through case study analyses stemming from a variety of geographic regions. There are no prerequisites for this course, although GSWS 0100 Introduction to Gender, Sexuality and Women's Studies, GSWS 0500 Introduction to Feminist Theory or another course on gender is recommended.

GSWS 1460 - GENDER, SEXUALITY, AND CHILDHOOD IN A GLOBAL CONTEXT

Minimum Credits: 3

Maximum Credits: 3

Although childhood is often conflated with a biological category based on an immature body, in reality it is much more. Instead, this course examines the ways in which childhood is a discursive and continuously shifting category, one that changes across time and place. This course will introduce students to the study of children and childhood in a cross-cultural context and will pay particular attention to the ways in which notions of childhood, and the experience of being a child, draw from and reproduce understandings of gender and sexuality as they intersect with race, class, ethnicity, etc. Through readings, lectures, and films, we will also consider the meaning of gendered childhoods in light of contemporary forms of conception, children's culture (media, toys and artifacts, stories), child labor and play, and ritual and coming of age ceremonies. An analysis of these contemporary phenomenon highlight local and regional notions of childhood and their intersection with broader global patterns. In addition to lectures, a portion of each class will be devoted to group discussions in which students are encourage to engage with the course readings. Students will give presentations and assist with discussion facilitation. We will also view films. Evaluations will be based on the student's participation in these discussions, as well as two exams, and a series of four writing assignments.

GSWS 1470 - GENDER & CITIZENSHIP IN EUROPE

Minimum Credits: 3

Maximum Credits: 3

This Study Abroad course analyses women's claims for citizenship throughout twentieth and early twenty-first century Europe from a variety of perspectives. By 1945, the majority of women in Europe had been enfranchised, yet as women demanded to exercise the rights of citizenship, they frequently faced limitations upon their rights as citizens based on gender. This course charts the ways in which women have adapted to and attempted to challenge the ideological, political and material conditions of citizenship in modern Europe. Topics to be examined include: women's political activism; citizenship and warfare; consumer citizenship; sexuality and reproductive rights; and citizenship within the context of multicultural society. Classes are arranged both chronologically and thematically, and will combine contextual lectures, seminars, and presentations in order to facilitate discussion. The course is organized around three key themes: Women, Regulation and the State; Gender Discourses; and Citizenship and Women's Activism. Each of these themes is designed to allow students to engage with a wide array of historical and contemporary sources including: personal narratives, political essays, representations of women in art, fiction, and the contemporary media, and a variety of field studies based in London.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

GSWS 1610 - QUEER AND FEMINIST MEDIA ART

Minimum Credits: 3

Maximum Credits: 3

This course develops students' understanding of diversity and will build that understanding through the production of creative work relating to media art that is focused on gender and sexuality. Looking at the different ways that people express their gender and sexuality using media - including but not limited to: video and film, digital media, images, analog media, etc. - this course surveys the diverse ways that people express their sexuality and gender through creative expressions that are also connected to social change, resistance, and difference. Surveying a wide range of queer and feminist media, the course asks students to examine the relationship between gender, sexuality and colonialism, race and racialization, ethnicity, globalization, religion, and nationalism through the formats of creative expression. The

course draws heavily on building creative assignments on topics relating to gender and sexuality, including self-reflexive projects that ask students to think about their own relationship to these categories through creative mediums. Class assignments are designed to connect analytic tools from readings and class analysis of media objects to the creative process of making media art works. Students will also create art works in the class, such as making their own animated GIF, a performance video, and a final media project, all paired with reflexive writing assignments.

GSWS 1625 - BODY SIZE AROUND THE GLOBE

Minimum Credits: 3

Maximum Credits: 3

This course will introduce students to the complex interplay between body size, culture, religion, and social perception. We will discuss basic concepts within the critical research of body size, such as fat stigma, BMI, the 'obesity epidemic' and more, while tracing the intersections between gender ideologies, cultural contexts, medical perspectives, and religious beliefs. Our conversations will examine the following questions: How do cultures around the globe construct a 'correct' and healthy body size? How do people of various gender, racial, and sexual identities experience living in bigger bodies, and how does this change depending on national, religious, regional, and cultural contexts? Can weight loss and diets relieve stigma? How do current understandings of fat stigma and fat acceptance activist groups change the discourse? Throughout the course, students will be exposed to a variety of questions and theoretical perspectives from religious studies, fat studies, and the sociology and anthropology of body size.

GSWS 1715 - FEEDING THE SOUL: FOOD, GENDER AND RELIGION

Minimum Credits: 3

Maximum Credits: 3

Food is sustenance and absolutely essential to life. But food is never simply about nutrition. Because it is fundamental to the human experience, food is also a medium for the expression of culture and social identity. Moreover, food relays complex social messages about gender, sexuality, and family. This course will examine and reflect upon these aspects of culture by exploring the particular relationship between religion, gender, and food in cross-cultural perspective as we investigate the role of feasting, fasting, food taboos, diets, etc. and their relationship to notions of spirituality. We will pay particular attention to regions of Asia, the Middle-East, Latin America, the Caribbean, and indigenous and

marginalized peoples.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SU3 Elective Basis

GSWS 1900 - INTERNSHIP

Minimum Credits: 3

Maximum Credits: 3

An opportunity to extend academic training to a practical work experience in an area where the student has gained some expertise.

Academic Career: Undergraduate

Course Component: Internship

Grade Component: Satisfactory/No Credit

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: Gender, Sexuality & Women's St, Undergraduate Internship

GSWS 1901 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 3

A variety of individual research and reading projects may be undertaken under the supervision of a core faculty member.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Letter Grade

Course Attributes: Gender, Sexuality & Women's St

GSWS 1902 - UNDERGRADUATE RESEARCH

Minimum Credits: 1

Maximum Credits: 3

Undergraduate students engage in research projects under the direction of a core faculty member. Consent of instructor required.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: LG/SNC Elective Basis

GSWS 1910 - CAPSTONE

Minimum Credits: 3

Maximum Credits: 3

Designed as a capstone, this course is a seminar that allows students to explore feminist theory and methodology in greater depth. We will pay particular attention to the current state of feminist theory as we consider future directions and challenges, and address the ways in which feminist theories and methodologies can inform research in other disciplines. Students will respond to a series of intense readings that focus on the intersections of feminist theory with other theoretical approaches, such as queer theory, environmental ethics, and critical race theory, among others. Using this theoretical foundation, students will construct a research project of their own design that will apply academic work to a "real world" setting and prepare students for careers and/or graduate study.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: GSWS 0100 or 0500

Course Attributes: Capstone Course, Gender, Sexuality & Women's St, Writing Requirement Course

GSWS 2150 - TRANSNATIONAL FEMINISMS

Minimum Credits: 3

Maximum Credits: 3

This class will look at the situation of women in international perspective. We will examine how feminist organizations operate in difficult national and local contexts and how women's rights have been addressed through international organizations such as the United Nations and the World Court. Through case studies, we will consider a number of contentious issues in global feminism, including sexual assault, sex tourism, and the global assembly line, and the role of feminism in national liberation movements.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Geology

GEOL 0008 - ENVIRONMENTAL SCIENCE, FRENCH TRAILER

Minimum Credits: 1

Maximum Credits: 1

A one credit French Language Trailer where we'll discuss the UN sustainability development goals related to GEOL 0840: Environmental Science topics. We'll focus on French vocabulary related to sustainability, air pollution, water pollution, environmental justice, and climate change. Class discussion/activities will be primarily in English. Readings for discussion will be in French with a target audience of policymakers or the public. Students should have taken the equivalent of two-years of high school French or of French 102 at Pitt, or have permission of the instructor to enroll.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Satisfactory/No Credit

GEOL 0055 - GEOLOGY LABORATORY

Minimum Credits: 2

Maximum Credits: 2

The course consists of a laboratory structured to give students an overview as well as hands-on experience with the methodology used by earth scientists to study geologic processes.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: Letter Grade

Course Requirements: CREQ: GEOL 0800 or 0820 or 0860 or 0840

GEOL 0060 - HISTORY OF THE EARTH

Minimum Credits: 4

Maximum Credits: 4

This course surveys the evolution of the earth and its inhabitants from its origins to the present. Lectures and lab emphasize the identification and interpretation of rocks, geologic features, and geologic maps. Lab work also includes fossil identification, stratigraphic correlation, and sedimentary facies analysis.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: GEOL 0055

Course Attributes: DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req.

GEOL 0800 - GEOLOGY

Minimum Credits: 3

Maximum Credits: 3

Geology is the study of how the earth works. This class covers the classification and origin of basic rocks and minerals; examines the role of plate tectonics in shaping the earth and producing such hazards as earthquakes and volcanoes; and examines the forces that shape beaches and rivers and sometimes threaten our lives and property. We also survey the evidence for changing climate and the future of such resources as groundwater, fossil fuels, and ores.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Natural Science General Ed. Requirement, Global Studies, SCI Polymathic Contexts: Science NonSeq.GE. Req.

GEOL 0802 - GEOLOGY OF THE NATIONAL PARKS

Minimum Credits: 3

Maximum Credits: 3

The magnificent scenery of the national parks provides a backdrop to an exploration of the basic geological principles that govern the creation and development of landscapes. The geological history of the North American continent will be explored in order to provide a framework in which to understand the development of the landscapes of our country.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req.

GEOL 0820 - NATURAL DISASTERS

Minimum Credits: 3

Maximum Credits: 3

The geologic, hydrologic and atmospheric processes that impact the human environment in catastrophic ways are examined in this course. Natural disasters surveys energy cycles, plate tectonics with an emphasis on how they produce earthquakes, volcanic eruptions, tornadoes, hurricanes, tsunamis, wildfires, flooding, landslides, climate change and mass extinctions. Students will get hands on experience in recitation. This course serves as an introductory course for three majors in geology and planetary science.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Natural Science General Ed. Requirement, MCSI - Sustainability Related, SCI Polymathic Contexts: Science NonSeq.GE. Req.

GEOL 0840 - ENVIRONMENTAL SCIENCE

Minimum Credits: 3

Maximum Credits: 3

This class is an interdisciplinary introduction to the science underlying environmental issues. Focusing on the principles of geology, biology, and chemistry and in their application to human impacts on the environment, strategies for sustainable management of environment and natural resources, and global change.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Natural Science General Ed. Requirement, MCSI - Sustainability Related, SCI Polymathic Contexts: Science NonSeq.GE. Req.

GEOL 0860 - ENVIRONMENTAL GEOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course takes an integrated earth systems approach to understanding our planet and its resources. We will investigate geologic processes and hazards (e.g., earthquakes, volcanoes, landslides, and weather hazards), geologic resources (water, soil, minerals, energy) and the local and global ramifications of human interaction with the earth (e.g., air, soil and water pollution, ozone depletion, and climate change). This course also serves as an introductory course for three majors in the department of geology and planetary science.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Natural Science General Ed. Requirement, Global Studies, SCI Polymathic Contexts: Science NonSeq.GE. Req.

GEOL 0870 - THE PLANETS

Minimum Credits: 3

Maximum Credits: 3

This course is an introduction to the worlds of our solar system. We will make extensive use of the most recent and dramatic images to discuss the nature, origin, and history of the planets and moons of our solar system

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req.

GEOL 0871 - INTELLIGENT LIFE IN THE UNIVERSE

Minimum Credits: 3

Maximum Credits: 3

This course attempts to answer the question of whether intelligent life exists elsewhere in the galaxy by considerations of the origin and subsequent evolution of the universe, our solar system, terrestrial life, and the human species.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req.

GEOL 0880 - INTRODUCTION TO CLIMATE CHANGE

Minimum Credits: 3

Maximum Credits: 3

Climate change poses a critical challenge for the global community, with increasing impacts on food security, water resources, human health, ecosystem diversity, and energy, among others. A fundamental step towards developing climate change solutions is the ability to recognize, understand, and communicate its causes and impacts. This course offers a multi-disciplinary approach to learning about climate change that both develops the science and enables the students to build ongoing interactions with the broader community, setting them up to be "Climate Science Ambassadors." The course will cover the evidence supporting anthropogenic climate change, future climate projections, and the development of climate policy related to adaptation and mitigation strategies. Students will engage in active and collaborative learning exercises, integrate data analysis projects using physical and social climate science data, and develop written and oral communication techniques through workshops with local journalists and political and social scientists. This course requires no previous background in climate science.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

GEOL 0881 - EXPLORING ISSUES IN CLIMATE CHANGE

Minimum Credits: 3

Maximum Credits: 3

Climate change poses a critical challenge for the global community, with increasing impacts on food security, water resources, human health, ecosystem diversity, and energy, among others. A fundamental step towards developing climate change solutions is the ability to recognize, understand, and communicate its causes and impacts. This course offers a multi-disciplinary approach to learning about climate change that both develops the science and enables the students to build ongoing interactions with the broader community, setting them up to be "Climate Science Ambassadors." The course will cover the evidence supporting anthropogenic climate change, future climate projections, and the development of climate policy related to adaptation and mitigation strategies. Students will engage in active and collaborative learning exercises, integrate data analysis projects using physical and social climate science data, and develop written and oral communication techniques through workshops with local journalists and political and social scientists. Students from this course will be invited to participate in the Dietrich School Climate and Global Change Center to access resources and mentorship on science communication. This course requires no previous background in climate science. Honors students will be given enrollment priority.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

GEOL 0890 - OCEANOGRAPHY

Minimum Credits: 3

Maximum Credits: 3

The oceans play a central role in global climate and supporting a stunning diversity of life. This survey of oceanography examine the major physical, chemical, and biological processes that shape the modern oceans and the life they contain.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Attributes: DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req.

GEOL 1001 - MINERALOGY

Minimum Credits: 4

Maximum Credits: 4

Physics and chemistry of minerals. Includes physical properties, crystal chemistry, crystal structure and symmetry,

mineral identification using a petrographic microscope, and the processes of mineral formation and breakdown.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: GEOL 0055

GEOL 1002 - HUMAN DRIVEN GLOBAL CHANGE

Minimum Credits: 3

Maximum Credits: 3

This course is an introduction to the quantification of human activities and human environmental impacts that form the basis for scientific inquiry in the 'Anthropocene.' The course will emphasize both reconstruction of early human activities from environmental records (e.g., the advent of soil erosion or mining from sediment records) and analysis and interpretation of modern 'big-data' resources (e.g., transformation of census records to chemical fluxes). Class examples and problems will focus on policy relevant facets of human activities, ranging from nutrient budgets to carbon dynamics to water and sediment fluxes.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: GEOL 1030 and GEOL 1445

GEOL 1003 - IGNEOUS & METAMORPHIC PETROLOGY

Minimum Credits: 4

Maximum Credits: 4

A lecture and laboratory course concerned with a study of the origin, occurrence, identification, and classification of igneous and metamorphic rocks. The primary purpose of the course is to familiarize the student with the physical and chemical processes that control the formation of the main igneous and metamorphic rock types.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: GEOL 1001

GEOL 1006 - ENVIRONMENTAL MODELING

Minimum Credits: 3

Maximum Credits: 3

Models allow scientists and others to represent features and behaviors of environmental systems in order to promote inquiry, develop insight, test hypotheses, and consider solutions to problems. The class will use primary literature and hands on experiences with computer models to introduce environmentally relevant modeling tools. Topics covered will include process-based models of disease, climate, ice, ecosystems, ecosystem services, hydrology, predator-prey systems, and competition among species for resources. Students will have the opportunity to conduct original research projects either by developing their own environmental model or by using existing models. No programming experience is required. Students should have some upper level undergraduate coursework in environmental studies, science, biology, geology, physics or chemistry and be comfortable thinking quantitatively.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: MATH 0220; PLAN: Geology, Environmental Studies, Environmental Geology, or Environmental Science

Course Attributes: MCSI - Sustainability Related

GEOL 1015 - GEOLOGY COLLOQUIUM

Minimum Credits: 1

Maximum Credits: 1

The colloquium is a weekly series of lectures focusing on research in geology, environmental science, planetary science, paleontology, environmental engineering, and environmental policy. Guest speakers come from universities, government labs, and the private sector. You may take this class as early and often as you like, but be aware that you will likely get more out of the talks once you have taken more of the core classes. You are always welcome to attend any of these public lectures, even if you are not registered for the class.

Academic Career: Undergraduate

Course Component: Colloquium

Grade Component: Satisfactory/No Credit

GEOL 1020 - SEDIMENTOLOGY AND STRATIGRAPHY

Minimum Credits: 4

Maximum Credits: 4

Sedimentology is the study of the processes that produce modern and ancient sedimentary deposits. The lectures will focus on a variety of modern sedimentary systems (rivers, deltas, beaches, etc.) As well as their ancient equivalents. The class culminates with an exploration of how long-term changes in sediment supply and sea level act to shape regional-scale sedimentary sequences. The lab focuses on rock identification and interpretation and on a variety of stratigraphic problems.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: GEOL 0055 or 1001

GEOL 1030 - THE ATMOSPHERE, OCEANS AND CLIMATE

Minimum Credits: 3

Maximum Credits: 3

This course will examine the atmospheric and oceanic interactions that determine the nature of the global climate system. Specifically, the course will explore the origin, evolution, and structure of the earth's oceans and atmosphere, the earth's energy balance, atmospheric circulation patterns, and surface and deep ocean currents. The course will also consider records of past climate, evidence for recent warming, climate change projections, and climate change policy.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Global Studies

GEOL 1045 - STATISTICS FOR EARTH SCIENCE

Minimum Credits: 3

Maximum Credits: 3

A statistics course geared toward environmental science and geology majors with an emphasis on applying data analysis and statistical techniques to environmental data. Topics will include: visualizing data, summary statistics, correlation, selected parametric statistics (t-tests, general linear models), selected non-parametric methods, statistical inference, and experimental design.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: STAT 0200 or STAT 0800 or STAT 1000 or STAT 1100

GEOL 1050 - SURFACE WATER HYDROLOGY

Minimum Credits: 4

Maximum Credits: 4

This course shall provide an Earth systems science overview of the processes that govern the hydrologic cycle including precipitation, evapotranspiration, runoff and discharge, infiltration, and groundwater. The course shall emphasize the movement of water through the atmosphere, over the land surface, and within the unsaturated and saturated zones.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (GEOL 0800 or 0820 or 0840) and (MATH 0120 or 0220)

Course Attributes: MCSI - Sustainability Related

GEOL 1051 - GROUNDWATER GEOLOGY

Minimum Credits: 4

Maximum Credits: 4

This course focuses on physical and chemical processes controlling water movement and composition in sub-surface environments. The lab focuses on practical field methods for the characterization of groundwater.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: GEOL 0055 and CHEM 0110 and (MATH 0120 or MATH 0220)

GEOL 1052 - PALEOCLIMATOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course presents the different types of data used to study the earth's climatic history and long-term climatic variability. Particular emphasis is given to the climatic changes during the late Cenozoic -- the so called glacial ages. Topics of discussion include time scales of climatic change, types of paleoclimatic records and their limitations, numerical climate models, the causes of climatic change, and the importance of paleoclimatic research in forecasting the future.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: GEOL 0055

GEOL 1055 - ENVIRONMENTAL ETHICS

Minimum Credits: 3

Maximum Credits: 3

This course asks students to evaluate environmental decision-making, land-management, and use of natural resources by investigating the underlying assumptions of discussions with in the fields of science, management, economics, law, religion and public policy on the environment. Throughout the semester, we will discuss our historical and current day evolution toward Land Ethic.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PLAN: Environmental Geology (BS, BPH) or Environmental Studies (BA, BPH) or Geology

(BS, BPH) or Environmental Science (BS)

Course Attributes: MCSI - Sustainability Related, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

GEOL 1056 - UHC ENVIRONMENTAL ETHICS, SCIENCE AND PUBLIC POLICY

Minimum Credits: 3

Maximum Credits: 3

This course examines the interrelationships among environmental science, ethics, and policy. It covers such topics as origin and development of the environmental movement, environmental values and attitudes, enactment and mechanics of environmental regulations and statutes, environmental economics and politics, and future environmental scenarios.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PLAN: Environmental Geology (BS, BPH) or Environmental Studies (BA, BPH) or Geology (BS, BPH) or Environmental Science (BS)

Course Attributes: Capstone Course, University Honors Course

GEOL 1060 - GEOMORPHOLOGY

Minimum Credits: 4

Maximum Credits: 4

This course is a survey of the major landform features found on the earth's surface. Each landform type is first described qualitatively and then examined in terms of the processes, such as stream flow or glacial activity, which cause its development. The purpose of the course is to familiarize students with geomorphic principles.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: GEOL 0055

GEOL 1062 - GEOMORPHOLOGY: DYNAMIC EVOLUTION OF EARTH'S SURFACE

Minimum Credits: 4

Maximum Credits: 4

This course aims to introduce students to the geomorphologic processes that shape the surface of Earth, the physical mechanisms by which they operate, and the landforms they create. It will combine qualitative and quantitative descriptions of land-shaping processes such as river erosion, glaciers motion, and landslides. The course builds on in class discussions and assignments to train students in applying basic physical and mathematical tools to explore geomorphological processes.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

GEOL 1100 - STRUCTURAL GEOLOGY

Minimum Credits: 4

Maximum Credits: 4

A course devoted to the study of folded, faulted, flowed, sheared, and jointed rocks with the aim of preparing a student to recognize and interpret deformed rocks. The evolution of mountain belts and deformation related to this process are emphasized.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: GEOL 0055; CREQ: GEOL 1003 and (GEOL 1020 or ANTH 1520)

GEOL 1203 - PALEONTOLOGY: INVERTEBRATES AND PRIMITIVE VERTEBRATES

Minimum Credits: 4

Maximum Credits: 4

This class surveys the history of life from its origins through the first amphibian groups that invaded the land. Along the way we will cover the basic biology and marine ecology of the major invertebrate groups that dominate the fossil record. An associated lab will provide hands-on exposure to invertebrate fossils and relevant paleobiology databases. Paleontology II will continue with a focus on mammal ancestors, dinosaurs and their relatives, and the mammals.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

GEOL 1240 - VERTEBRATE PALEONTOLOGY

Minimum Credits: 3

Maximum Credits: 3

This class focuses on the evolution and extinction of the vertebrates. We will first examine the normal processes of evolution and extinction and how they are reflected in the fossil record. We will then begin a tour of the fossil record supplemented as necessary with insights from living organisms. We will begin our deep dive into the past by examining what is known about the origin of our phylum. We will then survey the amazing diversity of fishes, amphibians, mammal-like reptiles, dinosaurs, and mammals over the next half billion years. We will focus throughout on transitional fossils and the various processes that have driven evolution and extinction over time.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

GEOL 1300 - ENVIRONMENTAL EDUCATION FOR SOCIAL CHANGE

Minimum Credits: 3

Maximum Credits: 3

Earth's human population has reached 7.5 billion and continues to grow rapidly. As concerns heighten over the ability of the planet to support and sustain life, it is becoming ever more important that we understand the crucial relationship between nature and society. This course seeks to use South Africa, one of the most culturally and environmentally diverse countries in the world, as an outdoor classroom to highlight the challenges, solutions and negotiations that are central to sustaining life on Earth. By immersing students in diverse communities that showcase unique perspectives, facilitating real-world experiences, actively engaging with South African citizens including students, this course will provide participants with skills, experiences and diverse perspectives that are crucial to supporting innovative problem solving and decision-making long after the course is over. By taking this course, students will have the opportunity to use one of the most culturally and environmentally diverse countries in the world, South Africa, to:

- o Actively engage with a variety of South African communities to enhance critical assessment of globally-relevant social and environmental challenges
- o Examine the multiple ways in which socio-environmental challenges impact different cultures
- o Reflect upon how culture and traditions impact environmental education and social change in urban spaces (e.g. Cape Town, South Africa and Pittsburgh, PA, USA)

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: Pitt in South Africa Study Abroad Program. MIN GPA: 2.75 (2.5 for Engineers); Pitt Students must have completed 24 credits on a Pitt Campus; Clear Judicial Record, Open to Non-Pitt students, and students from

all Pitt campuses

Course Attributes: DSAS Cross-Cult. Awareness General Ed. Requirement, DSAS Diversity General Ed. Requirement, DSAS Global Issues General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req., Study Abroad

GEOL 1307 - SUSTAINABLE FOOD SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

Our food system is a multifaceted network of interconnected systems and relationships. In order to be able to feed ourselves well into the future, it must be sustainable. A sustainable food system is a system in which healthy food is provided to people while balancing the environmental, social and economic impacts. These dynamics force stakeholders to confront synergies and tradeoffs in agricultural practices, harvesting, transportation, manufacturing and distribution, healthy diets, and a reduction in wasted food.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

GEOL 1308 - SUSTAINABLE AGRICULTURE AND FOOD SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

This is an interdisciplinary course that examines the environmental, social, and economic dimensions of agriculture, and relevant emerging challenges involving climate change, and resource depletion and degradation, particularly in tropical environments. It treats the Green Revolution, capital intensive/high-input practices, and corporate agriculture. Students will learn about the implications of "conventional" agriculture for the environmental protection, and food systems, security, and sovereignty. Additionally, students will explore the principles and practice of alternatives, including integrated crop and pest management, agroforestry, permaculture, plus organic, sustainable, and "climate smart" agriculture. Using a framework of "systems thinking", and drawing analogies between agricultural and ecological systems, the course explores the multiple drivers, inputs, and outputs of agricultural production and trade. Students will have firsthand, immersive experiences with production systems that are wide-ranging, and will explore the costs and benefits of each, through the lens the environment, economy, and society.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

GEOL 1309 - LIMNOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course will explore the physicochemical and geological aspects of inland waters (lakes, rivers, springs, and wetlands). Specifically, the course will examine the origin and evolution of lakes, the physical and chemical properties of fresh and saline waters, watershed hydrology, and the biogeochemical cycling of major elements and nutrients.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: CHEM 0110 and (GEOL 0055 or 0800); LVL: Jr or Sr

GEOL 1312 - ENVIRONMENTAL LAW AND POLICY

Minimum Credits: 3

Maximum Credits: 3

The survey course will examine the role of law and policy in regulating human impact on the environment. topics include the history and development of U.S. environmental law; theoretical approaches to environmental protection; mechanisms employed in environmental laws and regulation; the roles of the legislative, executive, and judicial branches of government in developing and implementing environmental law and policy; an overview of the principal environmental laws at the federal and state levels; the role of citizens in development and enforcement of environmental law; and constitutional constraints on government authority.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

GEOL 1313 - COM ENVIRONMENTAL PROFESSIONALS

Minimum Credits: 3

Maximum Credits: 3

This course serves as a w-course for environmental studies. We will sample various tools and methods (typical "professional" tasks such as memos and letters, building into comprehensive assignments such as case studies), all while concentrating on how audience and purpose affect communication.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or 0213 or 0214 or ENGFLM 0210 or FP (0003 or 0006);.Environ-Geology (BS, BPH) or Environ-Studies (BA, BPH) or Geology (BS, BPH) or Environ-Science (BS)

Course Attributes: Writing Intensive Course (WRIT)

GEOL 1314 - PEOPLE, PLACE AND CULTURE: ENVIRONMENTAL DEBATES IN AUSTRALIA, NEW ZEALAND AND THE PACIFIC

Minimum Credits: 3

Maximum Credits: 3

This course explores the multi-faceted dimensions of human interaction with diverse environments in Australia, New Zealand and the Pacific to illuminate the origins of environmental concerns and current debates in these regions from pre-European contact to now. From the peopling of the Pacific to the challenge of climate change, this course is broad in its scope while concentrating on selected issues such as the impact of mining, clean energy futures, our vulnerability to 'natural' disasters and increasing urbanization. In so doing, the intersection of culture and nature is explored. The course is embedded in the environmental humanities, but uses the approaches of environmental history, as well as insights from the disciplines of science, politics, sociology and cultural studies.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Attributes: Study Abroad

GEOL 1315 - COMMUNICATION IN GEOSCIENCES/WRIT REQUIREMENT

Minimum Credits: 3

Maximum Credits: 3

This class is perfect preparation for undergraduate research or graduate school. It will introduce students to the main scientific journals, how to read and assimilate the scientific literature, discuss how to give oral presentations, and address how to write clear scientific papers. Students will also explore topics of potential interest that they either propose or select from a provided list.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: GEOL 0060 or 1003 or 1020 or 1030 or 1051 or 1060 or 1515 or 1100 or 1641; PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006)

Course Attributes: Writing Intensive Course (WRIT)

GEOL 1316 - ENVIRONMENTAL JUSTICE

Minimum Credits: 3

Maximum Credits: 3

What is Environmental Justice (EJ)? How does this change our approach to the environment and environmental issues? This seminar course will introduce students to environmental justice (EJ) theory and frameworks for analyzing environmental inequities. We will explore the historical, social, political, and economic causes for disproportionate environmental burdens. The course is organized into seven topic modules. The first three will focus on the history of the environmental movement, EJ theory, and intersectional environmentalism to situate EJ within US environmentalism. Four to six will examine specific EJ issues - housing, food security, air, and water quality - and focus on SWPA and Pittsburgh communities as case studies, learning how communities are impacted and the actions being taken to promote the wellbeing of communities. The seventh and final module will address the current state of the environmental movement and EJ initiatives.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Environmental Science, Environmental Studies, or Geology

GEOL 1330 - SUSTAINABILITY FLASH LAB

Minimum Credits: 3

Maximum Credits: 3

Sustainability involves a systems approach. By exploring the inputs and outputs of energy and resources, we will ask broad questions: How do we measure production and consumption? How do geographical and socio-economic environments affect these things? How do we go beyond traditional measurements to quantify more comprehensive impacts and life-cycles? Answering these larger questions begins on a smaller, very specific, and personal scale: Where you live, and how you live. By examining and measuring resource use (including electricity, water and sewage, garbage and recycling, energy use, and transportation), we trace inputs and outputs to their source/destination, and begin to unravel and understand the complex web of production, distribution, delivery, and environmental consequences. We will investigate how these metrics change due to location and societal practices, as well as changes created through conservation and public policy. Eventually, it is the aim of this course to also reflect, at cultural and philosophical levels, on our energy/resource usage and underlying causalities thereof.

GEOL 1331 - HEALTH AND SAFETY (HAZWOPER)

Minimum Credits: 3

Maximum Credits: 3

Hazwoper (hazardous waste operations and emergency response) is a 40-hour course that promotes awareness of safety and response plans for those who may work with chemical and other hazards in the work-site. Students will learn how hazardous materials are handled and identified; human responses to exposure; learn what to do in case of site emergencies; use appropriate safety methods and work practice controls; and understand labels that are used to alert personnel of danger involving hazardous material. (Many employers in environmental consulting firms and other industries require 40-hour osha training.) The course will count as an elective in the environmental studies major.

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PLAN: Environmental Geology (BS, BPH) or Environmental Studies (BA, BPH) or Geology (BS, BPH) or Environmental Science (BS)

GEOL 1332 - ENVIRONMENTAL ADVOCACY AND ACTION

Minimum Credits: 3

Maximum Credits: 3

Environmental Advocacy is much more than simply advocating. To be effective, you must also take Action, and although "enthusiasm" goes a long way, volunteers and professionals alike need a wide range of skills in order to make a lasting impact. This includes planning successful events, running effective meetings, communicating science, writing grants, accounting & mind-numbing IRS paperwork, avoiding burn-out, and dealing with the media, volunteers, government and people who don't agree with you. It can be overwhelming even to those who know what to expect! And don't forget about the actual goal: Making a difference. This course covers the "inner workings" of environmental advocacy. We go beyond the slogans, logos, direct mail, and big events to study what's behind the nonprofit world, what it takes to succeed at the grassroots. Speakers from the Pittsburgh environmental community will share their experiences, concerns, and perspectives most weeks, and a wide range of readings and assignments are designed not only to have students take a deep look, but to experience some of this world, too.

Course Attributes: MCSI - Sustainability Related

GEOL 1333 - SUSTAINABILITY

Minimum Credits: 3

Maximum Credits: 3

Sustainability is a term that has many meanings, depending on who's using it, and we will cover most of them in this class, from green campuses to green-washing. The class features guest speakers from the academic, governmental, nonprofit and business sectors to offer as many perspectives as possible on sustainability topics. The real focus of the class, though, is the development of sustainability projects on campus and in the Pittsburgh community. Students also participate in sustainability-related events and field trips with the opportunity to present their work to a larger audience at the end of the semester.

Course Requirements: PLAN: Environmental Geology (BS, BPH) or Environmental Studies (BA, BPH) or Geology (BS, BPH) or Environmental Science (BS)

GEOL 1335 - ENVIRONMENTAL ISSUES: AIR QUALITY

Minimum Credits: 3

Maximum Credits: 3

Pittsburgh has had a checkered past when it comes to air quality issues, and faces an uncertain future. Once known as "hell with the lid off" due to industrial emissions, Pittsburgh and its environs once had some of the worst air in the nation. In 1948, a noxious cloud killed 22 in nearby Donora and sickened thousands. But Pittsburgh also became one of the first American cities to pass legislation aimed at cleaning its air. Today it faces a new threat from emissions from coal-burning utilities in Ohio and west Virginia. This course is one in a series that focuses on the history, progress and

current events of environmental issues in southwestern Pennsylvania that also have application throughout the region and U.S. emphasis is on a balanced presentation of the issues, discussions of various approaches to solving problems and development of writing skills. To accomplish this, the course will (1) focus on a single environmental issue, (2) structure individual classes around a single aspect of that issue, (3) feature guest lectures and presentations by government regulators and policymakers, interest groups, corporate leaders and experts.

Course Requirements: PLAN: Environ-Geology or Environ-Studies or Geology or Environ-Science; PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006)

Course Attributes: MCSI - Sustainability Related, Writing Intensive Course (WRIT)

GEOL 1337 - ENVIRONMENTAL ISSUES: WATER QUALITY

Minimum Credits: 3

Maximum Credits: 3

This course will focus on environmental issues related to water quality, including the effects of Marcellus Shale waste water on public and private drinking water supplies. The emphasis will be on southwestern Pennsylvania, but we'll look at the effects of Marcellus Shale industry operations on a state and regional basis too. Emphasis is placed on a balanced, in depth presentation of the issues that must be addressed to realistically solve modern environmental problems. This will be accomplished by (1) focusing on a single environmental issue of relevance to southwestern Pennsylvania (2) structuring weekly sessions around a single aspect of that issue, and (3) giving students an opportunity to learn about the issues from local professionals and community leaders active in these fields.

Course Attributes: MCSI - Sustainability Related, Writing Intensive Course (WRIT)

GEOL 1339 - ENVIRONMENTAL ISSUES: MINING AND GAS DRILLING ISSUES

Minimum Credits: 3

Maximum Credits: 3

This term's focus is on mining issues. Mining and oil and gas extraction has a long, important and sometimes dark history in Pennsylvania. Almost since the first black chunk was pried from the first mine, coal has been king in the keystone state. It has fueled industries, heated homes, and powered trains and river tugs. It has been politically powerful. It has also colored streams, creeks and rivers orange and left them dead. It has scarred the rolling Allegheny hills, first with strip mines and now with "valley fills." how is mining's environmental legacy being addressed? How effective are current laws in regulating the industry? What's the latest, best, mining technique, and what is its public impact? What has been industry's response? What impacts,"
