This course is one in a series that focuses on environmental issues in southwestern Pennsylvania. Forests are made up of trees. "Timber" is what they yell when the trees are cut and fall. With maturing forests scraping the sky in Pennsylvania and other parts of the northeastern United States, and controversial restrictions on national forest timbering in the Pacific Northwest, there is tremendous pressure to cut the local hardwood forests. But unlike the turn of the century when all of Penn's woods was clear-cut, there is a growing ethic that believes trees are more valuable growing than cut - for recreation and environmental reasons. This course on forest and parks issues is the fourth in a series that focuses on environmental and public policy issues in south western Pennsylvania. Through newspaper articles, field trips and guest speakers, the course will explore the issues and conflicts that abound in our wildlands and urban woods. Emphasis is on a balanced presentation of the issues, discussions of various approaches to solving problems and development of writing skills through a number of short assignments based on readings and presentations of guest speakers.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PLAN: Environmental Geology (BS, BPH) or Environmental Studies (BA, BPH) or Geology (BS, BPH) or Environmental Science (BS)

Course Attributes: MCSI - Sustainability Related

GEOL 1342 - ENVIRONMENTAL ISSUES

Minimum Credits: 3

Maximum Credits: 3

The focus of the class will be on researching, preparing, and revising written assignments on environmental issues. To accomplish this, the class will help students (1) identify environmental issues of interest, (2) organize around a single aspect of the chosen issue, and (3) prepare written assignments that will be reviewed and edited to meet standards of publication (e.g. traditional research paper, a proposal, or long-form journalism).

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Satisfactory/No Credit

Course Requirements: Environ-Geology (BS, BPH) or Environ-Studies (BA, BPH) or Geology (BS, BPH) or Environ-Science (BS); PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or 0213 or 0214 or ENGFLM 0210 or FP (0003 or 0006)

Course Attributes: MCSI - Sustainability Related, Writing Intensive Course (WRIT)

GEOL 1344 - ARCHAEOLOGICAL EXCAVATION FIELD SCHOOL

Minimum Credits: 3

Maximum Credits: 6

This is a 3-6 credit Maymester course that will introduce the student to archaeological survey and archaeological data collection and analysis. The field school will survey and excavate at the Old Economy Village in Ambridge, PA. Old

Economy Village is a National Historical Landmark, founded in 1804 and, as it exists today, consists of 20 buildings and a large green space. The field school will present several archaeological field and analysis techniques to students, providing hands-on experience with each. We will conduct a geophysical survey (fluxgate gradiometry, earth resistance, ground penetrating radar, magnetic susceptibility, electrical conductivity) of the green space. The survey will also introduce students to setting up survey transects and the mapping areas with GPS technology and total stations. The geographic, geophysics, and archaeological data will be incorporated into a GIS. Students will process and interpret geophysics datasets, artifacts, and GIS analyses. Students will also receive training on basic artifact curation. The first two weeks will take place at a hands-on field setting at an archaeological. The final week will be at the University of Pittsburgh's campus in the archaeology laboratories within the Department of Anthropology Laboratory.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

GEOL 1410 - EXPLORATION GEOPHYSICS

Minimum Credits: 3

Maximum Credits: 3

An introduction to the theory, methods, and instrumentation used in exploration geophysics. Topics include gravity, magnetics, electromagnetics, and seismic.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

GEOL 1413 - GEOPHYSICAL WELL LOGGING

Minimum Credits: 3

Maximum Credits: 3

An introduction to the interpretation of well logs derived from various geophysical measurements of down-hole rock properties. Students will learn to infer lithology, fluid characteristics, production zones, and other features useful to both geologists and petroleum engineers. A class in sedimentology and stratigraphy is recommended but not required.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

GEOL 1445 - GIS, GPS, AND COMPUTER METHODS

Minimum Credits: 3

Maximum Credits: 3

The goals of this course are to gain expertise in spatial analysis and geographical information systems.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Global Studies, Urban Studies

GEOL 1446 - ADVANCED GEOGRAPHICAL INFORMATION SYSTEM

Minimum Credits: 3

Maximum Credits: 3

Using advanced geographical information systems technologies and geospatial analysis techniques students will extend their knowledge of geographical information systems to include raster, geostatistical, network, model, and 3d/4d based analysis completing complex analysis of real world data sets.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: GEOL 1445

GEOL 1460 - INTRODUCTION TO REMOTE SENSING

Minimum Credits: 3

Maximum Credits: 3

This course provides a foundation in the theory, techniques and applications of remote sensing and geospatial data visualization spanning the electromagnetic spectrum. Topics include light/matter interaction, optics and sensor design, image analysis, as well as current applications of remote sensing to science and engineering problems facing local and global populations. The course and integrated image-processing laboratory are designed to provide the student with a strong foundation of remote sensing science.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

GEOL 1490 - GIS/RS INDEPENDENT STUDY CAPSTONE

Minimum Credits: 1

Maximum Credits: 4

The independent study capstone for the GIS/Remote Sensing Certificate is a major project intended to reinforce and polish GIS and/or remote sensing skills. Students develop projects in consultation with the capstone instructor, with ideas coming from the student, the capstone instructor, or other faculty. Each project should attempt to answer a particular question and should involve the integration of multiple GIS map layers and/or remote sensing datasets and should use more advanced analysis techniques to produce results. Meetings will include presentation of relevant advanced topics and the on-going results of your work.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Letter Grade

GEOL 1510 - AQUATIC AND SEDIMENTARY GEOCHEMI

Minimum Credits: 3

Maximum Credits: 3

This course will examine the chemistry and geochemistry of modern and ancient aquatic and sedimentary systems, including oceans and fresh waters. Students will gain an understanding of the biogeochemical processes occurring in aquatic systems, and the geochemical signatures they leave in the sedimentary record.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (CHEM 0110 and GEOL 0055) or GEOL 0800 or 0860

Course Attributes: MCSI - Sustainability Related

GEOL 1515 - ENVIRONMENTAL GEOCHEMISTRY

Minimum Credits: 3

Maximum Credits: 3

This course explores the complex interactions of earth's rock, water, air, and life systems that determine the chemical characteristics of our environment. We will examine the distribution, cycling, and transport of chemical compounds in the atmosphere, hydrosphere, and terrestrial environment on local and global scales. Topics will include water

chemistry, organic and inorganic pollution and related toxicology, hazardous wastes, acid rain, acid mine drainage, photochemical smog, ozone depletion, and global climate change. A class project involves chemical analysis of student-provided water samples.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: CHEM 0110 AND GEOL 0055; PLAN: Geology or Environmental Studies or Environmental Geology or Environmental Science (BS) or Ecology and Evolution (BS)

GEOL 1516 - ENVIRONMENTAL GEOCHEMISTRY WITH LAB

Minimum Credits: 4

Maximum Credits: 4

This course explores the complex interactions of Earth's rock, water, air, and life systems that determine the chemical characteristics of our environment. We will examine the distribution, cycling, and transport of chemical compounds in the atmosphere, hydrosphere, and terrestrial environment on local and global scales. Topics will include water chemistry, organic and inorganic pollution and related toxicology, hazardous wastes, acid rain, acid mine drainage, photochemical smog, ozone depletion, and global climate change. We will learn related laboratory and field techniques for geochemical analysis of water and soil in the laboratory section. Lecture (3 hours) and Lab (3 hours).

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (CHEM 0110 or 0710) and GEOL 0055; PLAN: Geology or Environmental Studies or Environmental Geology or Environmental Science (BS) OR ECO-EV-BS OR ENVSCI OR ENVSTD

GEOL 1518 - INTRODUCTION TO ATMOSPHERIC CHEMISTRY

Minimum Credits: 3

Maximum Credits: 3

This course will apply the basic principles of physics and chemistry to describe the complex system of the Earth's atmosphere. We will cover fundamental concepts such as atmospheric structure, transport, chemical kinetics, and photochemistry to address topics including stratospheric ozone, the oxidizing capacity of the Earth's atmosphere, and air pollution via tropospheric ozone, aerosols, and acid rain. We will also study the role of atmospheric composition and chemistry in mediating Earth's climate through topics such as the greenhouse effect, and feedbacks between chemistry, air quality, and climate. The course will familiarize students with the current state of the research through interactive projects and is open to both graduate students and advanced undergraduates.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

GEOL 1641 - ECOSYSTEM ECOLOGY

Minimum Credits: 4

Maximum Credits: 4

This course will provide students with an introduction to the principles of ecosystem ecology and associated applications to environmental change. Broad course themes include descriptions of the physical environment, community ecology, ecosystem ecology, ecological biogeography, and human ecology.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: GEOL 1030

GEOL 1642 - ECOSYSTEM ECOLOGY - NO LAB

Minimum Credits: 3

Maximum Credits: 3

This course will provide students with an introduction to the principles of ecosystem ecology and associated applications to environmental change. Broad course themes include descriptions of the physical environment, community ecology, ecosystem ecology, ecological biogeography, and human ecology.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

GEOL 1651 - ADVANCED ECOSYSTEM ECOLOGY

Minimum Credits: 3

Maximum Credits: 3

Understanding the science of watersheds is critical to improving water quality. This course will examine surface water hydrology, biogeochemistry, and management of watersheds. In addition, we will focus on how varying land uses influence the dynamics of hydrology and biogeochemistry across these systems. Student will develop an understanding of the biogeochemistry of various major elements in watersheds, including nitrogen, carbon, sulfur, and mercury, and how these elemental fluxes are exchanged through atmospheric-terrestrial-aquatic interactions. Students will be expected to demonstrate critical thinking, communication, and analytical skills through student-led lectures, journal discussions, and projects.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SU3 Elective Basis

GEOL 1701 - GEOLOGY OF THE PLANETS

Minimum Credits: 3

Maximum Credits: 3

An introduction to the geological processes and resulting landforms occurring on the surfaces of the planets of our solar system. We will make extensive use of recent spacecraft imagery and data.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: GEOL 0055

GEOL 1750 - VOLCANOLOGY

Minimum Credits: 3

Maximum Credits: 3

Volcanoes are one of the wonders of the natural world. Their existence continually changes the surface of our planet and is one of the most important processes in the development of planetary bodies in our solar system. This course will explore volcanic systems in their entirety, from the generation of magma, its migration through the crust, to its eruption at the surface. We will combine geologic observations with physical models to explain the processes behind different volcanic phenomena that occur under, on, and above the surface of the Earth. We will then explore the ways in which volcanoes are monitored, and their hazards mitigated and communicated. Finally, the volcanic past of the solar system will also be explored, comparing eruptions on Earth with those on objects such as Mars and Io.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: GEOL 0055

GEOL 1853 - WATERSHED HYDROLOGY AND BIOGEOCHEMISTRY

Minimum Credits: 3

Maximum Credits: 3

Understanding the science of watersheds is critical to improving water quality. This course will examine surface water hydrology, biogeochemistry, and management of watersheds. In addition, we will focus on how varying land uses influence the dynamics of hydrology and biogeochemistry across these systems. Student will develop an understanding of the biogeochemistry of various major elements in watersheds, including nitrogen, carbon, sulfur, and mercury, and how these elemental fluxes are exchanged through atmospheric-terrestrial-aquatic interactions. Students will be expected to demonstrate critical thinking, communication, and analytical skills through student-led lectures, journal discussions, and projects.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: CHEM 0110 and GEOL 1641

GEOL 1900 - INTERNSHIP

Minimum Credits: 1

Maximum Credits: 4

This course places the student in an "on-the-job" setting in which he/she receives practical experience in a supervised training environment.

Academic Career: Undergraduate

Course Component: Internship

Grade Component: Satisfactory/No Credit

Course Attributes: Capstone Course

GEOL 1901 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 4

This course permits undergraduates to explore specific topics in the geological sciences. The course is designed in a more flexible format than a directed study, stressing a higher degree of independent library research.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: LG/SNC Elective Basis

GEOL 1903 - UNDERGRADUATE RESEARCH

Minimum Credits: 1

Maximum Credits: 4

This course provides the opportunity for undergraduates to obtain "hands on" experience in geology by actively interacting with faculty members on research projects.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: LG/SNC Elective Basis

Course Attributes: Capstone Course

GEOL 1904 - DIRECTED READING

Minimum Credits: 4

Maximum Credits: 4

This course explores in-depth topics in geology and environmental studies. Topics and structure vary from term to term.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SNC Elective Basis

Course Requirements: PLAN: Environmental Geology (BS, BPH) or Environmental Studies (BA, BPH) or Geology (BS, BPH) or Environmental Science (BS)

GEOL 1907 - EXPERIENCE IN UNDERGRADUATE TEACHING

Minimum Credits: 1

Maximum Credits: 1

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Letter Grade

GEOL 1908 - UNDERGRADUATE FIELD STUDY EXPERIENCE (NON-TRADITIONAL)

Minimum Credits: 1

Maximum Credits: 4

This course provides the opportunity for Students to obtain field experience in environmental studies. The course is designed to be primarily self-guided but within a supervised training environment. Students must receive permission (and number of credits) through advisor. Offered every term. Off-site field experience and regular meetings with advisor are required.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: Satisfactory/No Credit

GEOL 1909 - DIRECTED READING: INTRO TO ENVIRONMENTAL, SOCIAL, & GOVERNANCE

Minimum Credits: 1

Maximum Credits: 1

In recent years, Environmental, Social, and Governance (ESG) factors have emerged as critical considerations for businesses and investors. This course provides an introduction into the fundamentals of ESG, focusing on the principles, practices, and implications of integrating ESG criteria into corporate strategies and investment decisions. As businesses face increasing scrutiny from investors, regulators, and consumers regarding the challenges of climate change, worker safety, and transparent governance, understanding and effectively managing ESG risks and opportunities is essential for long-term success and sustainability.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SNC Elective Basis

GEOL 1910 - UNDERGRADUATE THESIS

Minimum Credits: 1

Maximum Credits: 3

This course is the culmination of an undergraduate research project. Students will write a formal thesis under the

supervision of a faculty mentor and give an oral presentation on their research.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SNC Elective Basis

Course Attributes: Capstone Course

GEOL 1911 - ENVIRONMENTAL STUDIES INTERNSHIP

Minimum Credits: 1

Maximum Credits: 4

This course places the student in an "on-the-job" setting in which he/she receives practical experience in a supervised training environment. Students must receive permission (and number of credits) through advisor or faculty member.

Offered every terms. Off-site work and regular meetings with instructor. 1-4 Credits

Academic Career: Undergraduate

Course Component: Internship

Grade Component: Satisfactory/No Credit

GEOL 1912 - ENVIRONMENTAL SCIENCE INTERNSHIP

Minimum Credits: 1

Maximum Credits: 4

This course places the student in an "on-the-job" setting in which he/she receives practical experience in a supervised training environment. Students must receive permission (and number of credits) through advisor or faculty member.

Offered every terms. Off-site work and regular meetings with instructor. 1-4 Credits

Academic Career: Undergraduate

Course Component: Internship

Grade Component: Satisfactory/No Credit

GEOL 1930 - YELLOWSTONE FIELD CLASS

Minimum Credits: 4

Maximum Credits: 4

This class uses a month of day hikes to examine the relationships between geology, biology, and how people make a living in the greater Yellowstone area. The first third of the class focuses on how the deep geologic past has generated the resources that plants, animals, and humans need to make a living. The ecology section focuses on the diverse ecosystems that exist in the dry basins, the relatively wet mountains and plateaus, and the near-arctic highest elevation areas. Finally, the public policy hikes highlight how people should best use the natural resources of the area. Students will see abundant wildlife, spectacular geology, and come to appreciate the many ways in which the West is culturally quite distinct from the East.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: Letter Grade

GEOL 1950 - WYOMING FIELD STUDIES IN ECOLOGY AND PALEONTOLOGY

Minimum Credits: 3

Maximum Credits: 3

This 6-week course is a unique introduction to the practices of paleontology, ecology, and archaeology, with a strong emphasis on field techniques. This program focuses on the rich resources of Pitt's Spring Creek Preserve outside Laramie, WY, which includes pristine beds of dinosaur fossils, Native American artifacts, and an intact, mixed-grass prairie. We explore ecological systems ranging from prairie basins to alpine forests to mountain snowfields; we study mammals, birds, insects, and stream ecosystems; we excavate dinosaurs and find and document Native American

artifacts; we reconstruct ancient environments revealed by rock outcrops and the fossils they contain; we discuss water rights, cattle grazing, wind farms, and economic development; and we experience a spectacular array of natural wonders while on a hiking and camping trip around the state that includes Yellowstone and the Tetons. This class seeks to develop an understanding of the complex geological, biological, and historical processes that shape the landscape, habitats, and natural and human communities we see today. These lessons apply both to Wyoming and the world at large.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: Letter Grade

Course Requirements: CREQ: GEOL 1951

Course Attributes: DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req.

GEOL 1951 - WYOMING FIELD STUDIES IN GEOLOGY AND PALEONTOLOGY

Minimum Credits: 3

Maximum Credits: 3

This class is one-half of a 6-week field course that, in conjunction with GEOL 1950, provides a spectacular, in-depth introduction to the practices of ecology, paleontology, and (to a lesser extent) archaeology. There is a strong emphasis on field techniques and applying what you have learned to understand how nature works. This program focuses on the rich resources of Pitt's Spring Creek Preserve outside Laramie, WY, which includes pristine beds of dinosaur fossils, Native American artifacts, and an intact, mixed-grass prairie. We explore ecological systems ranging from prairie grasslands to alpine pine forests to rushing streams to mountain snowfields; we study the abundant and diverse mammals, birds, insects, and aquatic organisms of the region; we excavate dinosaurs and find and document Native American artifacts; we reconstruct ancient environments revealed by rock outcrops and the fossils they contain; we discuss water rights, cattle grazing, wind farms, and economic development; and we experience a amazing array of natural wonders while on a hiking and camping trip around Wyoming that includes Yellowstone and the Tetons. You will develop a deep understanding of the complex geological, biological, and historical processes that shape the landscape, habitats, and natural and human communities that we see today, and you will be able to apply the principles and techniques of this class to gradually reveal the deep history of any place you visit. Students must enroll in GEOL 1950 and GEOL 1951 concurrently.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: Letter Grade

Course Requirements: CREQ: GEOL 1950

Course Attributes: DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req.

GEOL 1960 - FIELD CAMP

Minimum Credits: 4

Maximum Credits: 8

A geology summer field camp is four to eight weeks long and includes a substantial component of geologic mapping and report writing. Field camp is the traditional capstone experience for geology and environmental geology majors. You should enroll at any accredited field camp offering at least four semester units of credit and transfer the credits to the University of Pittsburgh.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: Letter Grade

Course Attributes: Capstone Course

GEOL 1962 - ENVIRONMENTAL SCIENCE FIELD STUDY

Minimum Credits: 4

Maximum Credits: 8

Field research provides students an opportunity to observe and critically study different natural and human environments. There are various ways to satisfy this requirement-see your advisor for more information and permission. Students learn one or more of the following: how to collect data in a systematic way and formulate scientific inferences about environmental processes, products, and problems; learn preparation techniques; field research reporting.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Satisfactory/No Credit

GEOL 1964 - ENVIRONMENTAL STUDIES FIELD STUDY

Minimum Credits: 1

Maximum Credits: 4

Field research provides students an opportunity to observe and critically study different natural and human environments. There are various ways to satisfy this requirement-see your advisor for more information and permission. Students learn one or more of the following: how to collect data in a systematic way and formulate scientific inferences about environmental processes, products, and problems; learn preparation techniques; field research reporting.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Satisfactory/No Credit

GEOL 2054 - SOILS: GEOBIOCHEMICAL LANDSCAPES

Minimum Credits: 4

Maximum Credits: 4

An overview of soils with a strong emphasis on landscape scale process. The course consists of lecture and laboratory/field work. The lecture will include description of physical and chemical soil properties and processes, discussion of major soil classifications and description of ramifications at the landscape scale.

Academic Career: GRAD

Course Component: Lecture

Grade Component: Grad LGSNC

GEOL 2446 - ADVANCED GEOGRAPHICAL INFORMATION SYSTEM

Minimum Credits: 3

Maximum Credits: 3

Using advanced geographical information systems technologies and geospatial analysis techniques students will extend their knowledge of geographical information systems to include raster, geostatistical, network, model, and 3d/4d based analysis completing complex analysis of real world data sets.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC

Course Requirements: PREQ: GEOL 2449

GEOL 2449 - GIS, GPS, AND COMPUTER METHODS

Minimum Credits: 3

Maximum Credits: 3

The goals of this course are to gain expertise in spatial analysis and geographical information systems

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC

GEOL 2460 - APPLIED REMOTE SENSING AND GPS TECHNIQUES

Minimum Credits: 3

Maximum Credits: 3

Designed as a follow on to the introduction to remote sensing course this advanced class emphasizes field-oriented problems, data collection, and validation. The ultimate goal is to explore the connection between remotely-gathered imagery and the real-world factors which influence those data. Students taking the course should have had at least 1 semester of high school or college physics.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC

GEOL 2525 - STABLE ISOTOPE GEOCHEMISTRY

Minimum Credits: 3

Maximum Credits: 3

This course will provide students with a thorough introduction to the stable isotope systematics of light elements (hydrogen, carbon, nitrogen, oxygen, and sulfur). The course examines the fundamental concepts of isotope equilibrium and kinetics, physiochemical and biogenic mechanisms of isotope exchange, and the principles of mass spectrometry and stable isotope extraction techniques.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LGSNC
Course Requirements: PREQ: GEOL 2520

GEOL 2853 - WATERSHED HYDROLOGY AND BIOGEOCHEMISTRY

Minimum Credits: 3

Maximum Credits: 3

Understanding the science of watersheds is critical to improving water quality. This course will examine surface water hydrology, biogeochemistry, and management of watersheds. In addition, we will focus on how varying land uses influence the dynamics of hydrology and biogeochemistry across these systems. Student will develop an understanding of the biogeochemistry of various major elements in watersheds, including nitrogen, carbon, sulfur, and mercury, and how these elemental fluxes are exchanged through atmospheric-terrestrial-aquatic interactions. Students will be expected to demonstrate critical thinking, communication, and analytical skills through student-led lectures, journal discussions, and projects.

German

GER 0001 - ELEMENTARY GERMAN 1

Minimum Credits: 5

Maximum Credits: 5

This is an elementary language acquisition course and aims to teach students how to carry out various functions likely

to be necessary in dealing with others in the target language. The course aims to develop all four language skills--speaking, listening, reading, and writing, and deals with culture as an integral part of each skill. The language acquisition exercises are supplemented by an integrated and systematic presentation of grammar.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

GER 0002 - ELEMENTARY GERMAN 2

Minimum Credits: 5

Maximum Credits: 5

This course completes the introduction of the basic structures of German begun in German 0001. It emphasizes all four language skills--speaking, listening, reading, and writing and deals with culture as an integral part of each skill. The language acquisition exercises are supplemented by an integrated and systematic presentation of grammar.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: GER 0001 or GER 0101, or Equivalent; MIN GRADE: B-, or Online Test Score equal/greater 281 or Paper Test Score equal/greater 6

Course Attributes: DSAS Second Language General Ed. Requirement

GER 0004 - INTERMEDIATE GERMAN 2

Minimum Credits: 3

Maximum Credits: 3

Conducted entirely in German, this course enables students to describe in past, present, and future time, and to initiate and sustain a conversation. They discuss contemporary texts and topics, participate in small group activities, and strengthen their writing skills through journal writing.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: College in High School - UGRD - students only.

Course Attributes: DSAS Geographic Region General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

GER 0021 - GERMAN READING 1

Minimum Credits: 4

Maximum Credits: 4

The objective of this course is to develop a basic reading knowledge of German. It is a beginning course which introduces all the structures of German grammar. German 0021 is designed for students who wish to acquire basic reading skills in the shortest possible time.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: West European Studies

GER 0022 - GERMAN READING 2

Minimum Credits: 4

Maximum Credits: 4

This course is designed to help students obtain an intermediate reading knowledge of German. Students read unedited

texts from general fields and from their own areas of specialization. The course includes a systematic review of grammar.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Second Language General Ed. Requirement, West European Studies

GER 0070 - EUROPEAN IDENTITY BETWEEN HISTORY AND EUROPEAN UNION CULTURAL POLICY

Minimum Credits: 3

Maximum Credits: 3

This course explores the state of the European union today with respect to the issue of collective identity formation by integrating the historical development of the EU with studying its evolving institutional structure. The course examines how culture which was originally only an afterthought of European integration has gained in importance since the overarching permissive consensus with which European populations passively supported the integration process began to crumble with the Maastricht treaty of 1992. Through a variety of sources from across the social sciences, political theory and social philosophy, the course elucidates how EU cultural policy aims to engender a transnational European identity.

Academic Career: Undergraduate

GER 0203 - INTENSIVE INTERMEDIATE GERMAN 1

Minimum Credits: 5

Maximum Credits: 5

This is the first part of our intensive intermediate language course sequence. The class meets every day and thus allows students to develop their listening, speaking, reading and writing skills, to strengthen their grammatical knowledge and expand their vocabulary at a faster pace than in the regular courses. Students will begin to work towards the B1-level of the Common European Framework of Reference.

GER 0207 - INTENSIVE INTERMEDIATE GERMAN

Minimum Credits: 6

Maximum Credits: 6

Course Description: This accelerated 6-credit course covers two semesters of Intermediate German (GER 0201 and GER 0202) in a single semester and counts as two courses towards the German Minor, Certificate, or Major. In the course you will continue to develop your German language skills and learn about a variety of cultural topics and themes, from major historical events to modern German city planning. Building on the grammar you have learned in previous semesters and expanding your vocabulary, you will further develop your reading, speaking, writing and listening skills. The course emphasizes meaningful communication and comprehension, and it is held in German. In order to succeed in this course, active and dedicated participation in the classroom and the online module, careful and consistent completion of all homework assignments, as well as independent study will be necessary. That is true for all language courses, but especially for this intensive version, which will have the workload of two courses. Prerequisite: Beginning German 3 (GER 0103), or equivalent. If you did not take GER 0103 at the University of Pittsburgh, please talk to the Director of Language Studies in German.

GER 0226 - INTRODUCTION TO YIDDISH LANGUAGE AND CULTURE

Minimum Credits: 3

Maximum Credits: 3

Students will learn about Yiddish language and culture.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: Russian & East European Studies

GER 1000 - READING LITERARY TEXTS

Minimum Credits: 3

Maximum Credits: 3

This course aims to strengthen your reading skills in German by introducing you to a variety of genres and writing styles, from the eighteenth to the twenty-first century. You will have the opportunity to work on your extensive and intensive reading skills, as you acquire new strategies for identifying generic conventions, differentiating between literal and figurative language, and parsing grammatically complex sentences

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: GER 0202

Course Attributes: West European Studies

GER 1001 - GERMAN WRITING

Minimum Credits: 3

Maximum Credits: 3

This course is designed to strengthen the student's composition skills through constant practice in writing, revising, and editing. The goal is to be able to express thoughts effectively in correct and well-structured German prose, including business correspondence. Strong emphasis is put on problems of stylistics, including punctuation, sentence structure, word usage, and figures of speech.

Academic Career: Undergraduate

Course Requirements: PREQ: GER 0202 or 0204 or 0004 (MIN GRADE: B-) or Online Test Score equal/greater 550

Course Attributes: DSAS Creative Work General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

GER 1010 - COFFEE AND THE NEWS: ADVANCED GERMAN CONVERSATION

Minimum Credits: 1

Maximum Credits: 1

This is a 1-credit conversation class for post-intermediate students of German who would like to practice their German and familiarize themselves with current events in German-speaking lands. You will practice advanced conversational German while discussing current issues in German-speaking Europe. You will meet with an instructor one hour each week and discuss issues from a variety of media (newspapers, magazines, podcasts, etc.). Prerequisites: GER 0202, GER 0205, or equivalent. Please speak with the Director of Undergraduate Studies in German if you have not taken either of these courses.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Satisfactory/No Credit

Course Requirements: PREQ: GER 0202

GER 1012 - INTRODUCTION TO AUSTRIAN LITERATURE

Minimum Credits: 1

Maximum Credits: 1

In this course we explore literary texts representative of some of the major Austrian writers during particular time periods ranging from the 18th to 20th centuries. Authors such as Ebner-Eschenbach, Schnitzler, and Kafka among others will be read and discussed. Using both readings and films, we will navigate cultural history, societal and ideological changes during various time periods, namely the Holy Roman Empire, Austro-Hungarian Empire, and First Republic. Students will develop sensitivity to the particular roles and experiences of Austrian writers as citizens of a multinational empire pre- WWI and the new role writers assumed after the dissolution of the empire post WWI. We will also highlight via structural analysis the various literary devices Austrian authors used to display themes such as sovereignty, gender roles, moral, religious and race differences among others. We will also discuss how these works were received internationally. This course will be taught in German.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

GER 1014 - GERMAN FOR STEM

Minimum Credits: 1

Maximum Credits: 1

German for STEM will introduce students to the German vocabulary and phrasing commonly used in the natural sciences through scientific readings, and standard lectures. Some consideration will be given to the borrowing of some of these words from Latin and Greek. We will also highlight some of the significant scientific discoveries derived from the German speaking world. Students will be expected to write a simple protocol that can be used in the laboratory setting.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Satisfactory/No Credit
Course Requirements: PREQ: GER 0202

GER 1051 - INTRODUCTION TO LITERARY ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

Competing methods of literary investigation are analyzed in terms of (1) their underlying assumptions about the nature of art and the relationship between literature and reality and (2) their usefulness as tools for practical criticism. Each approach is examined as a coherent model and then evaluated with reference to actual critical practice.

Academic Career: Undergraduate
Course Component: Lecture

GER 1105 - LITERARY ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

General content, purposes, and methods of this course: students will learn the characteristic features of poetry, prose, and drama and will develop a technical vocabulary to interpret literary works in German. We will also learn about some of the different methodologies and theoretical approaches that literary critics employ to analyze texts. We will build upon and expand the reading techniques and strategies learned in 1000-level courses to prepare students for the more advanced literature and culture seminars at the 1200-level. Readings, class discussions, tests, oral reports and written assignments, including a journal, will be in German.

GER 1220 - LITERATURE AND CULTURE 1750-1830

Minimum Credits: 3

Maximum Credits: 3

This course reviews one of the most famous and exciting periods of German literature: a period of great social and intellectual upheavals, of sentimental novels and revolutionary plays, of classical poems and folk tales, when an

admired poet became an influential politician, and rebellious women wrote even though they were not supposed to. Students will read some of the classics of German literature, and learn about the historical context of these works. All primary readings and class discussions are in German.

Academic Career: Undergraduate

Course Requirements: PREQ: At least one 3-credit GER course numbered 1100-1499 or by special permission.

GER 1410 - KAFKA AND THE MODERN WORLD

Minimum Credits: 1

Maximum Credits: 1

Kafka's major works are examined both formally and thematically with reference to the modernist tradition. Recurring issues include authority, alienation, mass society, guilt and punishment, truth, and writing. Regular assignments from the secondary literature introduce students to central questions of literary criticism and theory. Essays by Kierkegaard, Marx, Nietzsche, and Freud further elaborate the cultural context in which Kafka's texts were produced. All readings are in German.

GER 1500 - GERMANIC MYTHS, LEGENDS AND SAGAS

Minimum Credits: 3

Maximum Credits: 3

This course presents a survey of Northern European cultural values from about 500 B.C. To about 1500 A.D. Sources include archaeological finds, sagas, ballads, legends, customs, superstitions, place names, and language expressions. Topics include social organization, distribution of labor and wealth, the position of women and children in family and society, and the uses of supernatural beliefs to achieve worldly goals. Where appropriate, parallels will be drawn between modern Northern European values and their formative myths from the distant past.

GER 1501 - WORLD OF WITCHES: WITCHES AND WITCHCRAFT IN GLOBAL PERSPECTIVE

Minimum Credits: 3

Maximum Credits: 3

The witch is arguably the most enduring and prominent supernatural figures in not only the American or 'western' collective consciousness, but also globally. While we might consider vampires, werewolves, and fairies as stiff competition in this regard - especially when we take recent decades of U.S. pop-culture into account - the witch distinguishes itself from other 'fantastical' creatures in her (their) historical, ontological, socio-political complexity, and contemporary relevance. Thousands of predominantly women and girls have been, and still are in some parts of the world, persecuted, tortured, and killed for being accused of witchcraft, or believing themselves to be capable of it. Yet, the best documented and most severe period of witch hunting falls between the 15th and 18th century in Europe, with its peak - the so-called witch craze - taking place between 1560 and 1650, with the German speaking countries at its epicenter. There are multiple and complex reasons for this outbreak of mass-suspicion and violence, but one decisive factor was that not only the uneducated masses believed in witches, but the political, religious, and intellectual elites did, too. Consequently, the witch has not only left its mark in folklore, but is also well traceable through legal, ecclesiastical, and other official documents. However, it is not only the history of violence and persecution that sets the witch apart from other supernatural beings: her (their) name is also extremely overdetermined, which makes it difficult to establish common ground when we talk about witches. Depending on historical, social, and cultural contexts our answer to the question "What is a witch?" will vary widely. The spectrum reaches from evil incarnate in league with malicious forces to wise healer and spiritual leader, to tragically innocent victim of larger power dynamics (expressed in terms of misogyny, ageism, ableism, and religious intolerance etc.). They are represented in tales, art, and pop-culture as monsters, old hags, beautiful temptresses, cute girls, ordinary or undistinguishable neighbors, and sometimes even as men! On top of everything, historians, ethnographers, anthropologists, psychologists, sociologists, as well as legal, literary, folklore, and media scholars have and continue to research the subject through a multitude of academic lenses (such as women, gender, disability, critical race, and religious studies).

Academic Career: Undergraduate

Course Component: Lecture

GER 1504 - EUROPEAN IDENTITY BETWEEN HISTORY AND EUROPEAN UNION CULTURAL POLICY

Minimum Credits: 3

Maximum Credits: 3

This course explores the state of the European union today with respect to the issue of collective identity formation by integrating the historical development of the EU with studying its evolving institutional structure. The course examines how culture which was originally only an afterthought of European integration has gained in importance since the overarching permissive consensus with which European populations passively supported the integration process began to crumble with the Maastricht treaty of 1992. Through a variety of sources from across the social sciences, political theory and social philosophy, the course elucidates how EU cultural policy aims to engender a transnational European identity.

GER 1506 - THEORIES & PRACTICES OF WORK IN GLOBAL PERSPECTIVE

Minimum Credits: 3

Maximum Credits: 3

Whether positively connoted as an ennobling activity engendering human self-consciousness and liberty (Hegel) or as toil and drudgery, work/labor is central to individual and collective human existence. We need to expend our physical and mental capacities to sustain our own lives as well as the lives of others. Work, therefore, has profound significance for the constitution of the individual self as well as for the organization of our society. Hence, work has been the human activity and site of struggle for freedom and equality from the beginning of human history to today's demand for Social Justice. This course combines social philosophy and case studies of working conditions across the globe for engaging with the following questions. What is the justification for past and existing hierarchies of labor typically expressed in different pay and the lack thereof? What are the practical and ethical consequences of such labor hierarchies? What is the relationship between work and human dignity? What is the responsibility of the individual for working conditions domestically and globally? The course allows students to investigate the structures of the economy and choices we make as individuals has profound repercussions on our fellow human beings, in other words, we will recognize the interconnectedness of our world as a fundamental aspect of the human condition today. Theoretical readings range from Kant, Hegel, Marx and Arendt to current social theorists like Michael Hardt (Affective Labor), Maurizio Lazzarato (Immaterial Labor), Oskar Negt to Teju Cole and others. In addition, we will discuss documentaries and case studies on working conditions in our global economy. All materials and language of instruction are in English.

GER 1512 - GERMAN LITERATURE AND EUROPEAN PHILOSOPHY: GOETHE'S FAUST

Minimum Credits: 3

Maximum Credits: 3

This course analyzes Goethe's Faust in its entirety with reference to its epistemological, ethical, and aesthetic investments. Students explore how this masterpiece of German literature staged and re-articulated important conceptual issues within the European philosophical tradition with supplementary readings from Plato, Aristotle, Spinoza, Leibniz, and Kant, as well as Whitehead and Deleuze. The goal of the readings is to construct a conceptual apparatus that can serve as framework of interpretive analysis as well as a reconfiguration of the perennial questions of philosophy and literature regarding their own essence.

GER 1522 - GERMANY TODAY

Minimum Credits: 3

Maximum Credits: 3

In this course the current cultural, political, and social situation in the German speaking countries is assessed. What are the concerns of Germans, Austrians, the Swiss? By concentrating on current conditions and changes of public consciousness, issues important to German speakers are debated. Materials include articles from journals and newspapers, documentaries, slides, and contemporary works of literature. All materials are in English.

GER 1526 - DRAMA OF IDEAS

Minimum Credits: 3

Maximum Credits: 3

Although it has been argued that "a poem should not mean, but be", many writers have unashamedly given their art a didactic function. This course identifies the types of causes that literary artists traditionally have championed, and then focuses on the literary techniques that they used to achieve their end. The course is thus a study of "the art of moral persuasion". The principal works investigated are "dramas of ideas" by such playwrights as Ibsen, Shaw, and Brecht, although supplemental prose writings are also included.

GER 1529 - BERLIN: A DIVIDED CITY

Minimum Credits: 3

Maximum Credits: 3

This course traces the turbulent history of Berlin over the last two centuries by surveying literature and film set in the city, works in which the city itself often functions as a main character. We will focus on the political, economic, and social divisions that define this vibrant city, and will study changes in Berlin resulting from national unification, industrialization and modernization, urbanization, the rise of the proletariat, national division, reunification, and the rise of multi-culturalism. All readings, media, and discussions will be in English.

GER 1530 - SEX, ROBOTS, REVOLUTION: CULTURE OF THE WEIMAR REPUBLIC

Minimum Credits: 3

Maximum Credits: 3

An introduction to the weird and wonderful literature, film, and visual art of Germany's Weimar Republic (1918-1933), a period of crisis and transition. Join us as we use an intersectional feminist approach to examine representations of sex and sexualities, gender, race, ability, and social class during this era of revolution and upheaval in German history. We will explore texts by Franz Kafka, Irmgard Keun, and Magnus Hirschfeld, classic films like Fritz Lang's Metropolis and Robert Wiene's The Cabinet of Dr. Caligari, and artwork by Georg Grosz, Otto Dix, and Hannah Hoch, among others. Taught in English. This course satisfies the Diversity and Geographic Region general education requirements.

Grade Component: Letter Grade

GER 1535 - OUTSIDERS IN GERMAN LITERATURE

Minimum Credits: 3

Maximum Credits: 3

This course surveys major works of German literature of the 18th, 19th and 20th centuries and develops literary analytical skills. Students will learn about various aspects of German culture by focusing on "outsiders"-individuals who live on the margins of a social order and, by their very marginality, help define accepted social norms. Readings include texts by Goethe, Kleist, Hoffmann, Buchner, Mann, Kafka, Borchert, Bachmann, Plenzdorf, and Wolf.

GER 1540 - NIETZSCHE AND THE NIETZSCHEANS

Minimum Credits: 3

Maximum Credits: 3

Friedrich Nietzsche (1844-1900) continues to be one of the most influential modern philosophers, yet controversy surrounds almost every aspect of his life and work. This course will help students go beyond the controversy in order to consider Nietzsche's texts discerningly and how he approached the problems of truth, power, and morality. Close examination of his most important writings will be complemented by inquiry into Nietzsche's effects on Twentieth-Century philosophy, literature, and culture. The course will also survey major influences of Nietzsche's approaches on subsequent philosophers and scholars.

GER 1542 - MARX AND MARXISM

Minimum Credits: 3

Maximum Credits: 3

Having recently passed the 150th anniversary of the publication of capital volume 1, we recognize that our world has changed a great deal since its publication. Yet, in reviewing many of these changes, it is not overstated to say that the works of Karl Marx have provided the transformational impulse. Who was this person, Karl Marx? Why is it that in this post-cold war world his writings continue both to inspire and threaten contemporary readers? How have those inspired by Marx further developed his ideas to constitute the discourse of Marxism? These are some of the questions that this course will raise and try to answer. We will begin with discussions of key works by Marx. Concentrating on the question of culture and cultural analysis, we will then move on to examine some significant contributions to Marxism. The course will end by looking at contemporary attempts at rethinking Marxism.

GER 1544 - FREUD AND FREUDIANS

Minimum Credits: 3

Maximum Credits: 3

Freud is one of the most influential thinkers of the 20th century. His groundbreaking work on dreams, the Oedipus complex, and psychoanalytic method have profoundly changed our understanding of the psyche and social interaction. This course provides a basic survey of Freud's most important and often controversial writings/discoveries within their historical context and with regards to significant criticisms of his work. It includes a brief survey of various branches of psychoanalysis to develop after Freud, especially those of Lacan and Kristeva.

GER 1548 - NEW GERMAN CINEMA

Minimum Credits: 3

Maximum Credits: 3

Devastated after World War II, starting in the 1960s a number of German directors like Herzog, Fassbinder, Wenders, Kluge, Anders-Abrahms managed to bring international attention back to German cinema. They competed against the film industry of Hollywood under difficult conditions of production, and in many instances made the difficult transition out of the art house and into the mainstream movie theater. Yet these names only represent a small portion of those directors active in the new German cinema. This class will examine the aesthetic and technical contributions of new German cinema as well as the historical and social context of its production. The technological, financial, and intellectual destruction caused by the experience of national socialism and World War II required creative responses that have led to a solid and symbolically rich body of work. In examining the themes and experimental forms of various filmmakers, students will gain insight into the issues that occupied the German public sphere from the 1960s onward.

GER 1598 - VIENNA NOW AND THEN: A FIELD TRIP

Minimum Credits: 1

Maximum Credits: 1

This course is a field trip to Vienna that gives students an insight into comparisons between the Austrian capital as gateway to the EU and "Vienna 1900," the major cultural center of the Austrian-Hungarian Monarchy. The course will focus on several key issues: the Austrian, in particular the Viennese role in the European Union and the supranational status of the Habsburg metropolis in Europe 1900; the rise of nationalism, racism, and anti-Semitism now and then; the socio-political situation of minorities; the city's attempts to cope with immigration as well as refugees in the early twentieth century and today; the multifaceted relationships between social classes, genders, and generations now and then; the clash between historicism and modernism in art, architecture, and literature. The field trip is connected to the course GER 1528 VIENNA. Students will visit the historical and civic sites discussed in this course; they will visit the university, national library, and the museums displaying the works of artists and architects such as Klimt, Schiele, and Loos. They will also have an opportunity to meet with a faculty member from the University of Vienna and/or a representative of the city council. The course will be taught in English.

GER 1907 - GERMAN LANGUAGE ABROAD: PITT IN BERLIN

Minimum Credits: 1

Maximum Credits: 5

The German Department and the Office of Study Abroad will launch a new "Pitt in Berlin" program in the Spring of 2020. In this program, as well as in some others we have, students of varying language ability will enroll in a language

course abroad commensurate with their language level. Their language level is typically determined on-site, however, so students need to enroll ahead of time, not knowing what language course they will place into. For this reason we are creating a generic course number and title, German 1904 "German Language Abroad," to account for these situations. This course number, in effect a "placeholder", will allow student to enroll in a language course according to the regular time schedule. Upon return to Pitt, students meet with the Director of Undergraduate Studies in German to determine where the course taken fits into the language curriculum at Pitt and credit will be awarded accordingly.

Academic Career: Undergraduate

Grade Component: Letter Grade

Course Attributes: Capstone Course

GREEK 1904 - UNDERGRAD RESEARCH ASSISTANTSHIP

Minimum Credits: 1

Maximum Credits: 3

This course enables advanced majors to receive academic credit for serving as assistants to faculty members who are conducting research projects (e.g., compiling bibliography for a new class, preparing a work for publication, creating a conference presentation). This collaborative project will result in a meaningful experience that will provide the student with a foundation in the mechanics of research and publication. Given the variable aspects of this learning experience, there is not official syllabus. However, students and faculty who participate in this course are required to submit a signed contract prior to the start of the semester in which the assistantship will occur. This contract is subject to the approval of the undergraduate committee.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: Satisfactory/No Credit

GREEK 1990 - UNDERGRADUATE TEACHING ASSISTANTSHIP IN GREEK

Minimum Credits: 1

Maximum Credits: 5

This course allows students to earn credits for serving as undergraduate teaching assistants in courses listed under the 'Greek' subject code. Admission requires permission of the department chair. Students may repeat for credit.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Letter Grade

Hebrew

HEBREW 0101 - ELEMENTARY HEBREW 1

Minimum Credits: 5

Maximum Credits: 5

This course introduces students to the fundamentals of the Hebrew language. We study basic vocabulary, grammar and sentence structure, and learn to read and write Hebrew. Emphasis is learning to speak the language.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

HEBREW 0102 - ELEMENTARY HEBREW 2

Minimum Credits: 5

Maximum Credits: 5

Continuation of the introductory work begun in Hebrew 1. Students further develop their reading, writing and speaking skills with the greatest emphasis being placed on oral communication.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Second Language General Ed. Requirement

HEBREW 0103 - INTERMEDIATE HEBREW 3

Minimum Credits: 3

Maximum Credits: 3

Students continue to develop the skills acquired in Hebrew 2 with emphasis on speaking and on understanding the spoken language. Readings this term include short stories and articles.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

HEBREW 0104 - INTERMEDIATE HEBREW 4

Minimum Credits: 3

Maximum Credits: 3

Students continue to develop their Hebrew reading and speaking skills. Sophisticated Hebrew texts are introduced.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

HEBREW 0105 - ADVANCED HEBREW 5

Minimum Credits: 3

Maximum Credits: 3

This course is for advanced level students and uses Hebrew language literature, print and electronic media, film, and TV shows. Emphasis is placed on conversation, modern Hebrew literature, and composition.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

HEBREW 0106 - BIBLICAL HEBREW

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to the grammar, syntax and vocabulary of Biblical Hebrew

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

HEBREW 0111 - ELEMENTARY HEBREW 1

Maximum Credits: 4

Academic Career: Undergraduate

Course Component: Internship

Grade Component: Satisfactory/No Credit

HEBREW 1906 - HEBREW LANGUAGE ADD-ON

Minimum Credits: 1

Maximum Credits: 4

Students may complete 1-4 credits of independent work in Hebrew as an add-on to a course in which Hebrew texts are taught in translation. Permission from the instructor is required to enroll.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SNC Elective Basis

Health and Human Development

HHD 0005 - LIFE SPAN DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

This course follows the developing person from conception until the end of life. The course combines theory, research and practical applications from developmental psychology. Lecture topics include genetic influences on development; prenatal and birth factors; physical, cognitive, social, personality, and cultural variables which influence development in infancy, childhood, adolescence, early-, middle-, and late adulthood.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Attributes: UPB Behavioral Sciences General Ed. Requirement

HHD 0031 - MODERN DANCE 1

Minimum Credits: 1

Maximum Credits: 1

Introduces the college student to modern dance as a point of view, rather than a particular technique. There will be exercises to increase strength, and flexibility, as well as to teach techniques of movement, exploration and improvisation. Emphasis is on developing a sensitive awareness of one's own body movement in time and space.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

HHD 0032 - MODERN DANCE 2

Minimum Credits: 1

Maximum Credits: 1

This course is designed for those students who have mastered beginning dance technique and wish to gain more advanced skills. Advanced technique and compositional work is stressed. Course objectives include increased technical skills, awareness and appreciation of modern dance as an art form, ease in phrasing rhythmical movement and skill in improvisational movement.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

HHD 0033 - BALLET 1

Minimum Credits: 1

Maximum Credits: 1

For absolute beginners introducing them to basic fundamentals of the classic ballet technique.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

HHD 0034 - BALLET 2

Minimum Credits: 1

Maximum Credits: 1

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

HHD 0040 - CHOREOGRAPHY

Minimum Credits: 1

Maximum Credits: 1

The art of making dances. Studies dealing with timing, grouping, energy, quality, etc., Lead to the creation of dances. Designed for students who wish to explore the creative process or for those wanting more advanced dance training.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

HHD 0041 - JAZZ 1

Minimum Credits: 1

Maximum Credits: 1

Fundamentals of jazz dance for beginning dance students. Class includes warm-up, center floor, and cross floor movement combinations, contemporary jazz and pop music is emphasized.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

HHD 0042 - JAZZ 2

Minimum Credits: 1

Maximum Credits: 1

A continuation of the basic fundamentals learned in Jazz 1. More emphasis is placed on longer routines and more complicated movement sequences. It is an intermediate jazz class.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

HHD 0044 - DANCE PRODUCTION

Minimum Credits: 2

Maximum Credits: 2

This course is designed to familiarize students with both the technical and production aspects of dance and to increase appreciation of dance in all its forms.

Academic Career: Undergraduate

Course Component: Workshop

Grade Component: LG/SNC Elective Basis

HHD 0050 - SPORTS AND DRUGS

Minimum Credits: 1

Maximum Credits: 1

This course presents medical and scientific information about the use of drugs in sports. It is especially designed for college athletes, but should also be of interest to students preparing for careers in athletic training, coaching, exercise science, health and physical education, physical therapy, and sports medicine.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Letter Grade

HHD 0060 - INTRODUCTION TO DANCE

Minimum Credits: 3

Maximum Credits: 3

A comprehensive overview of dance as an art form and physical activity, covering the history and philosophy of dance. Dance will be examined as a means of communication and expression, and its relationship to other art forms. A particular emphasis will be placed on Western dance forms and its multicultural roots.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

HHD 0195 - FIRST AID AND CPR

Minimum Credits: 1

Maximum Credits: 1

A 1-credit discussion course in which American Red Cross techniques of cardiopulmonary resuscitation (CPR) for the professional rescuer and community first aid and safety are presented. In addition to these skills, current methods of management and treatment of emergency illnesses and injuries are also taught. American Red Cross certification available to all students who meet the standards.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

HHD 0244 - DANCE PRODUCTION 2

Minimum Credits: 2

Maximum Credits: 2

This course is designed to familiarize students with both the technical and production aspects of dance in all its forms. The students will have experiences with lighting, costume, choreography, public relations, and stage management.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

HHD 0473 - DANCE PEDAGOGY

Minimum Credits: 2

Maximum Credits: 2

This course is designed for physical education majors and all students with a desire to learn the how and why of teaching dance in an educational program. Through the lectures the students will cover the educational components of dance, i.e., Dance in education, dance for elementary and secondary schools, dance history and dance resources. The movement lab will introduce the students to the fundamentals of movement.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

HHD 0476 - LIFETIME ACTIVITIES

Minimum Credits: 2

Maximum Credits: 2

An introductory course for prospective instructors of health and physical activity. Includes experiences in the following: group exercise focused on aerobic, resistance, and flexibility; aquatic exercise, dance, yoga, Pilates, and others. Also covers topics such as history, safety, and methods of training and conditioning.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

HHD 0477 - INTRODUCTION TO EXERCISE SCIENCE

Minimum Credits: 1

Maximum Credits: 1

This course will introduce students to the field of Exercise Science and its related professions. This course is intended for those students considering Exercise Science and its related professions as an academic major and for career placement. This course will involve exposure to the history and contemporary opportunities within Exercise Science that will involve both lecture and applied experiences.

Academic Career: Undergraduate

Course Component: Lecture
Grade Component: Letter Grade

HHD 0497 - WATER SAFETY INSTRUCTOR

Minimum Credits: 2

Maximum Credits: 2

The water safety instructor course is designed to earn certification to teach American Red Cross swimming and water safety courses. The course focuses on planning, organizing, sequencing, skill development, and Red Cross operational policies and procedures.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

HHD 1001 - INTRO EDUCATIONAL PSYCHOLOGY

Minimum Credits: 3

Maximum Credits: 3

A survey of current problems in education which psychological theory and research can address. Topics include developmental approaches to teaching, educational applications of learning theory, classroom management, and testing strategies for teachers.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Attributes: Learning Sciences

HHD 1002 - DEVELOPMENT: CONCEPTION THROUGH EARLY CHILDHOOD

Minimum Credits: 3

Maximum Credits: 3

This course follows the developing child from the moment of conception until early adolescence. The course content includes the biological foundations of development, physical and motor changes, language, cognition, sex role development, personality, family and peer relationships, school influences, and examples of deviant development. Theory and application are integrated.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

HHD 1003 - DEVELOPMENT: MIDDLE CHILDHOOD THROUGH ADOLESCENCE

Minimum Credits: 3

Maximum Credits: 3

Adolescence is studied from a developmental perspective. Discussion begins with the history and cultural varieties of adolescence and proceeds to cover psychological accompaniments to puberty. Lectures and readings deal with cognitive growth, identity formation, moral development, family and peer relationships, psychological disturbance and education through the adolescent years.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

HHD 1004 - ATTENTIONAL TEACHING PRACTICES

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

HHD 1005 - TEACHING GLOBALLY AND LOCALLY IN A DIVERSE WORLD

Minimum Credits: 3
Maximum Credits: 3

Students will be able to apply this knowledge specifically to their teaching practice as they begin their field experiences. We will critically engage in understanding the complex factors that impact education in the United States today, with an emphasis on Urban Education. A review of past teaching policies and practices will support a better understanding of the American schooling system in the 21st Century. In the Teaching Globally and Locally in a Diverse World class pre-service teachers will: (a) discuss strategies for teaching all children in a responsive, equitable manner, (b) learn to analyze the effects that marginalization has on children, (c) investigate the impact that race, culture, and socioeconomic status have on a child's education, and (d) review school reform and policy practices that have created various types of schools available to students in the United States. Knowing that the landscape of education is changing in the United States we will discuss the globalization of schooling in our society, along with the need for a higher technological understanding to prepare children for success in today's world.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

HHD 1007 - METHODS OF EVIDENCE-BASED PRACTICE

Minimum Credits: 3
Maximum Credits: 3

This course provides an overview of both quantitative and qualitative research methods. Particular attention is paid to methods of observation, interviewing, and summarizing qualitative data. Students use qualitative or mixed methods to produce a final research project.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SU3 Elective Basis
Course Requirements: CREQ: PSYED 1002

HHD 1010 - DEVELOPMENTAL DISABILITIES

Minimum Credits: 3
Maximum Credits: 3

A study of developmental disabilities and their impact on child/family development. Includes discussion of philosophy of service, legislation, and service systems.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: PSYED 1002

HHD 1011 - APPLIED HUMAN ANATOMY

Minimum Credits: 3
Maximum Credits: 3

This is a non-laboratory lecture discussion course in which all body systems are investigated. Primary emphasis is

placed on the skeletal, articular, muscular, cardiovascular and nervous systems. In addition, the basic mechanical principles underlying human movement and an understanding of human structure are used to analyze movement and physical skills.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

HHD 1012 - APPLIED HUMAN ANATOMY LAB

Minimum Credits: 1

Maximum Credits: 1

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

HHD 1013 - DEVELOPMENTAL PSYCHOPATHOLOGY

Minimum Credits: 3

Maximum Credits: 3

Examines the traditional medical-model view of psychopathology in children and youth, presents alternative ways of looking at this behavior, and gives an introduction to the interpersonal skills needed for therapeutic intervention.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: CREQ: PSYED 1003

HHD 1014 - PSYCHOLOGICAL INTERVENTIONS IN REAL WORLD CONTEXTS

Minimum Credits: 3

Maximum Credits: 3

This course is an introduction to psychological interventions designed to solve real world problems. The focus is on interventions that are universally-administered to adolescents in real world contexts and which have grounding in developmental and social psychological theories. The overall goal of the course is to add to existing skills in research and service provision with youth and families.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

HHD 1016 - DEVELOPMENT CURRICULUM AND ACTIVITIES

Minimum Credits: 3

Maximum Credits: 3

Study of the theoretical rationale for activity and environmental programming; its relationship to the development of children and youth; and practical applications in media selection, use, and environmental design for various populations.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SU3 Elective Basis

Course Requirements: PLAN: Applied Developmental Psychology(BS)

HHD 1017 - FOUNDATIONS OF INFANT MENTAL HEALTH 1

Minimum Credits: 3

Maximum Credits: 3

This course will provide an introduction and overview of Infant Mental Health (IMH). Core theoretical concepts related to the practice of IMH will be examined. Emphasis will be placed on understanding how IMH principles provide a foundation for working with infants, toddlers, and families across cultural, setting and discipline contexts.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

HHD 1021 - THEORY, MEANING AND PRACTICE OF PLAY AND ACTIVITY

Minimum Credits: 3

Maximum Credits: 3

This course provides a comprehensive overview of the role of play and activity in human development, with a particular focus on ways of utilizing play and activity to promote positive growth in social, emotional, physical, and cognitive domains; and on interpreting the meaning of individual and group play and activity. Play and activity in the lives of persons of all ages will be considered with some emphasis on the early and school years. While academic learning is essential in this course, the focus will be on hands-on, real play as the ideal way to learn about it, and encouragement of a life-long playful spirit.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

HHD 1023 - DEATH AND DYING

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the study of death and dying as well as the value of human life. Students will examine theories and concepts of death education and demonstrate the ability to accurately apply them to grief and coping. In addition, cultural and religious perspectives will be discussed. Particular emphasis will be given to strategies for working with children and adolescents as well as those who are terminally ill. These strategies include coping and preparation for the funeral, burial, and end of life-process. Students will also be encouraged to share their own experiences with death, dying and coping.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

HHD 1024 - FAMILY DYNAMICS

Minimum Credits: 3

Maximum Credits: 3

Study of different family types in the American culture and an in-depth analysis of how each family structure contributes to the development (both functionally and dysfunction ally) of all family members, especially the children and youth of the family.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: PSYED 1013

HHD 1025 - CONTEMPORARY ISSUES IN COMMUNITY

Minimum Credits: 3

Maximum Credits: 3

An introduction to the scope, organization and current issues in the child development and child and youth care field as related to the profession and to the variety of services to children and families. Field experiences include site visits to agencies providing a variety of services.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Letter Grade

HHD 1028 - DEVELOPMENTAL PRACTICE SEMINAR 1

Minimum Credits: 3

Maximum Credits: 3

A seminar for the integration of theory, research, practice skills, and experience related to developmentally focused child and youth care practice. The seminar is particularly focused on the internship experience and the related knowledge base.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

HHD 1029 - DEVELOPMENTAL PRACTICE SEMINAR 2

Minimum Credits: 3

Maximum Credits: 3

A continuation of Developmental Practice Seminar 1 for the integration of theory, research, practice skills and experience related to developmentally focused child and youth care practice. The seminar is particularly focused on the internship experience and the related knowledge base.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PLAN: Applied Developmental Psych (BS)

HHD 1030 - APPLIED PHYSIOLOGY LABORATORY

Minimum Credits: 1

Maximum Credits: 1

This laboratory course will allow students to explore physiological mechanisms of action related to acute and chronic effects of exercise and human performance as it pertains to functions of human body systems.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

Course Requirements: CREQ: HHD 1042

HHD 1031 - RESEARCH IN SPORTS SCIENCE

Minimum Credits: 3

Maximum Credits: 3

A course designed to provide the student an understanding of the role of measurement and evaluation in the educational process, the ability to select and/or develop and administer appropriate tests, and the ability to use appropriate mathematical and statistical techniques in data analysis. Additionally the student will gain an introduction to the research process as practiced in health, physical education and sport.

Academic Career: Undergraduate

Course Component: Lecture
Grade Component: Letter Grade

HHD 1032 - PSYCHOSOCIAL ASPECTS OF ILLNESS

Minimum Credits: 3

Maximum Credits: 3

This course is designed to enable students to understand the nature of and dynamics of pediatric illness, appreciate the impact an acute or prolonged health care experience may have upon children throughout the developmental process, better understand a family health care philosophy and gain an understanding of the multi-faceted role child life specialists play in today's health care environment.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SU3 Elective Basis

HHD 1033 - HUMAN PHYSIOLOGY

Minimum Credits: 3

Maximum Credits: 3

Develops knowledge of the functions of the human body. Covers the major systems (e.g., Circulatory, digestive, endocrine, excretory, nervous, reproductive, thermoregulatory). Introduces key concepts for understanding the physiological basis of human performance in sport, dance, and exercise.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

HHD 1034 - EXERCISE SCIENCE SEMINAR 1

Minimum Credits: 2

Maximum Credits: 2

This one credit course will provide an introductory overview of the academic discipline and profession of exercise science and its related fields. The course will also provide established guidelines and procedures necessary for those students enrolled in the university of Pittsburgh movement science undergraduate program.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Letter Grade

Course Requirements: PLAN: Health and Physical Activity (BS

HHD 1035 - EXERCISE SCIENCE SEMINAR 2

Minimum Credits: 1

Maximum Credits: 1

This one credit course will provide final exposure to the profession of exercise science and its related fields. The course will also provide established guidelines and procedures necessary for individual professional interviews, resume, and other requirements necessary for job or graduate school application in an exercise or other health related field.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Letter Grade

HHD 1036 - DEVELOPMNTL MEANING CULTL DISTN

Minimum Credits: 3

Maximum Credits: 3

An exploration of major dimensions and issues of cultural diversity with a particular emphasis on their impact on the developing child and their implications for programs for children and youth.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Attributes: Global Studies

HHD 1041 - CHILD & YOUTH WORK PRACTICE 1

Minimum Credits: 1

Maximum Credits: 6

A university approved, agency based, supervised internship in developmental/interventive practice. This internship may focus on work with and/or for children, youth and families. Fifty hours of placement are required for each credit of registration.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: Letter Grade

HHD 1042 - PHYSIOLOGY OF EXERCISE

Minimum Credits: 3

Maximum Credits: 3

A lecture and laboratory class in which the effects of exercise and sport upon body systems will be investigated. Reviews knowledge concerning physiological mechanisms which relate to improvements of physical performance.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: HPA or HHD 1033 and 1011 and 1012; PLAN: Exercise Science (EXSCI-BS)

HHD 1043 - CHILD/YOUTH PRACTICE 2

Minimum Credits: 6

Maximum Credits: 6

This course is a university approved, agency based, supervised internship in applied developmental practice which may or may not involve intervention practices. The internship may focus on work with and /or for children, youth and /or families. Fifty hours of on-site placement are required for each credit of registration.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: Letter Grade

Course Requirements: PLAN: Applied Developmental Psych (BS)

HHD 1044 - BIOMECHANICS

Minimum Credits: 3

Maximum Credits: 3

Required course for undergraduate students in athletic training, exercise science, and teacher education. Provides studies to develop knowledge of biomechanical concepts and principles. Includes experiences to develop proficiency in the diagnosis of motor performance errors. Also places emphasis on applications of biomechanics in making curriculum and instruction decisions in physical education programs.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: HPA 1011 and 1012; CUM GPA 2.50; PLAN: Health and Physical Activity (BS)

HHD 1045 - DIRECTED RESEARCH PRACTICUM

Minimum Credits: 2

Maximum Credits: 2

Students complete a comprehensive review of literature on a movement-related problem and then, under the guidance of a faculty member, design, conduct, and report an original research project.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: LG/SU3 Elective Basis

Course Requirements: HPA 1045

HHD 1050 - SUPRVSN ADM CHLD YOUTH WRK SETNG

Minimum Credits: 3

Maximum Credits: 3

This course focuses on issues and skill development in areas related to management and supervision in child and youth care programs. A modular format will cover the function of supervision and administration in child care; communication skills; supervisory functions and skills; program development and management; and current issues in child and youth care administration.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Applied Developmental Psych (BS)

HHD 1080 - PSYCHOLOGY AND THE MEDIA

Minimum Credits: 3

Maximum Credits: 3

Psychology and the media focuses on impact of electronic media (radio, television and internet) upon society, especially children. Course introduces students to various psychological theories (e.g., Social cognitive theory, information processing, uses and gratifications theory) to explain how we respond to and learn from the media. Topics receiving special attention include media violence, advertising, health-related behaviors, news, media effects upon academic behavior, and cultural issues. A visit to a local radio or television station will be arranged.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

HHD 1089 - SPECIAL TOPICS

Minimum Credits: 1

Maximum Credits: 3

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

HHD 1098 - DIRECTED RESEARCH

Minimum Credits: 1

Maximum Credits: 6

Student pursues research under the direction of a faculty member.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SU3 Elective Basis

HHD 1099 - DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 6

Provides advanced students an opportunity to explore in depth an area of particular interest to them. It is the student's responsibility to find a faculty member willing to undertake such a tutorial.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SU3 Elective Basis

HHD 1141 - FITNESS FOR INSTRUCTORS

Minimum Credits: 2

Maximum Credits: 2

Fitness for instructors will teach the student the major elements of fitness. How to assess fitness levels, determine fitness goals, design fitness programs and facilities. The course will be a combination of classroom, exercise, and practical experiences.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: Letter Grade

HHD 1169 - HEALTH FITNESS PRACTICUM 1

Minimum Credits: 1

Maximum Credits: 1

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: HPA 0474 and 0475 (MIN GRADE 'C-'); PLAN: Health and Physical Activity (BS), CUM GPA 2.50

HHD 1170 - HEALTH FITNESS PRACTICUM 2

Minimum Credits: 1

Maximum Credits: 1

This 1-credit course will provide HPA students the opportunity to observe, implement and practice the application of exercise testing, assessment and prescription, training, group instruction, and supervision in the health-fitness field using principles and techniques related to the HPA curriculum in a real health and fitness setting.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

HHD 1171 - RESISTANCE TRAINING INSTRUCTOR

Minimum Credits: 1

Maximum Credits: 1

This course is designed to provide students with the knowledge and practical skills needed to work one-on-one with fitness participants and to lead resistance training groups including: basic machine and free weight training skills; proper resistance training techniques; machine and free weight positioning; kinematics and placement; resistance training modifications and utilization of equipment such as kettle bells, stability balls, medicine balls, resistance bands and other tools. Upon completion of this course, students will be competent to develop high quality resistance training programming. It will provide necessary instructor skills such as leadership, appropriate exercise selection and program design, and effective cueing. Students will experience introductory leadership in a variety of traditional and contemporary modes of resistance training instruction.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: HPA 0474 AND HPA 0475 (MIN GRADE 'C-')

HHD 1173 - AEROBICS INSTRUCTOR

Minimum Credits: 1

Maximum Credits: 1

This course is designed to provide students with the knowledge and practical skills needed to lead aerobic group exercise classes including: General aerobics, hi-lo, step and Kickboxing. Upon completion of this course, students will be competent to lead dynamic, high-quality group exercise classes. It will provide necessary instructor skills such as leadership, appropriate exercise selection and program design, and effective cueing. Students will experience introductory leadership in a variety of traditional and contemporary modes of resistance training instruction.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: HPA 0474 AND HPA 0475 (MIN GRADE 'C-')

HHD 1176 - CARDIO CONDITIONING INSTRUCTOR

Minimum Credits: 2

Maximum Credits: 2

This course is designed to provide students with the knowledge and practical skills needed to lead cardiovascular conditioning group exercise classes including: General aerobics, hi-lo, step, cycle exercise, Kickboxing, and others. Upon completion of this course, students will be competent to lead dynamic, high-quality group exercise classes with a focus on cardiovascular conditioning. It will provide necessary instructor skills such as leadership, appropriate exercise selection and program design, and effective cueing. Students will experience introductory leadership in a variety of traditional and contemporary modes of cardiovascular conditioning exercise.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

HHD 1177 - YOGA AND PILATES INSTRUCTOR

Minimum Credits: 2

Maximum Credits: 2

This course is designed to provide students with the knowledge and practical skills needed to lead Yoga and Pilates group exercise. Upon completion of this course, students will be competent to lead dynamic, high-quality group exercise classes in Yoga and Pilates. It will provide necessary instructor skills such as leadership, appropriate exercise selection and program design, and effective cueing. Students will experience introductory leadership in a variety of traditional and contemporary modes of resistance training instruction.

Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: Letter Grade

HHD 1178 - GROUP FITNESS INSTRUCTOR

Minimum Credits: 2

Maximum Credits: 2

This course is designed to provide students with the knowledge and practical skills needed to lead contemporary group exercise classes in bootcamp style fitness, total body conditioning, aquatic conditioning, and therapeutic water rehabilitation. Upon completion of this course, students will be competent to lead dynamic, high quality group exercise courses in both the fitness studio and from the pool deck. It will provide necessary instructor skills such as leadership, appropriate exercise selection, program design, and effective cueing. Students will gain experience in leadership in a variety of traditional and contemporary modes of instruction.

Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: Letter Grade

HHD 1179 - ADVANCED PRINCIPLES OF SPORT PERFORMANCE

Minimum Credits: 2

Maximum Credits: 2

This course is designed for individuals interested in careers and/or gaining experience in strength and conditioning. It will cover advanced concepts in programming, exercise technique, and coaching. Upon completion of this course, individuals will gain experience to prepare for internships or jobs in the sport performance arena.

Academic Career: Undergraduate
Course Component: Practicum
Grade Component: Letter Grade

HHD 1198 - DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 3

Student pursues study of various topics under the direction of faculty.

Academic Career: Undergraduate
Course Component: Directed Studies
Grade Component: LG/SNC Elective Basis

HHD 1199 - DIRECT STUDY

Minimum Credits: 1

Maximum Credits: 9

Directed Study working with a faculty member with Study Abroad

Academic Career: Undergraduate
Course Component: Directed Studies
Grade Component: Letter Grade

HHD 1211 - ATHLETIC INJURY PREVENTION

Minimum Credits: 3

Maximum Credits: 3

This course is designed to provide the student with an introduction to the athletic training profession. Topics to include medical terminology, mechanisms of injury, and recognition and treatment of common athletic injuries to major body parts.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: CREQ: HPA 1212

HHD 1212 - ATHLETIC INJURY PREVENTION LABORATORY

Minimum Credits: 1

Maximum Credits: 1

An introduction to basic taping techniques and injury evaluation techniques used in the profession of athletic training. Basic supportive strappings and paddings for immediate care and competition are presented as well as basic joint evaluation procedures, massage, and crutch fitting.

Academic Career: Undergraduate

Course Component: Clinical

Grade Component: Letter Grade

Course Requirements: CREQ: HPA 1211

HHD 1221 - FITNESS ASSESSMENT AND EXERCISE PRESCRIPTION

Minimum Credits: 2

Maximum Credits: 2

Fitness Assessment and Exercise Prescription will teach the student the major elements of fitness, how to assess fitness levels, determine fitness goals, design fitness programs and facilities according to guidelines set forth by the American College of Sports Medicine. The course will be a combination classroom lecture and interactive case studies. .

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

HHD 1222 - FITNESS ASSESSMENT AND EXERCISE PRESCRIPTION LAB

Minimum Credits: 1

Maximum Credits: 1

Fitness Assess and Ex. Prescrip lab is focused on the application of how to assess fitness levels, determine fitness goals, design fitness programs and technology, and will allow for hands-on practical application. The course is a laboratory format.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

HHD 1226 - ASSESSMENT AND PRESCRIPTION FOR SPECIAL POPULATIONS

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

HHD 1232 - PRINCIPLES OF STRENGTH & CONDITIONING LABORATORY

Minimum Credits: 1

Maximum Credits: 1

This course will expose students to proper strength & conditioning techniques and planning as it relates to specific recreational and sport modalities, facility considerations, equipment, and seasonal demands.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

Course Requirements: CREQ: HHD 1233

HHD 1233 - PRINCIPLES OF STRENGTH AND CONDITIONING

Minimum Credits: 2

Maximum Credits: 2

Instruction is provided describing the principles for development of pre-season, in-season and off-season strength and conditioning programs. Laboratory experiences will include the theory and techniques of operating strength training equipment.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: HPA/HHD 0474, HPA/HHD 0475, HPA/HHD 1033, HPA/HHD 1011 and HPA/HHD 1012; PLAN: Exercise Science (EXSCI-BS) or Health and Physical Activity (HPA-BS)

HHD 1234 - COMMUNITY-BASED ACTION RESEARCH 2

Minimum Credits: 2

Maximum Credits: 2

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Letter Grade

HHD 1235 - COMMUNITY-BASED ACTION RESEARCH 1

Minimum Credits: 2

Maximum Credits: 2

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Letter Grade

HHD 1241 - TEACHING EXPERIENCE 1

Minimum Credits: 1

Maximum Credits: 1

One term clinical teaching experience with an instructor in "basic instruction physical education". Responsibilities include: teaching undergraduate students basic skills, physical fitness, and safety.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

HHD 1242 - TEACHING EXPERIENCE 2

Minimum Credits: 1

Maximum Credits: 1

One term clinical teaching experience with an instructor in "basic instruction physical education". Responsibilities include teaching undergraduate students basic skills, physical fitness, and safety.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

HHD 1300 - NUTRITION IN EXERCISE AND SPORT

Minimum Credits: 1

Maximum Credits: 1

This course will provide the student with basic nutritional information as it pertains to sport and exercise performance. Topics of discussion include weight reduction and management, nutritional requirements for athletic performance and maintenance of a healthy lifestyle, proper eating habits, diet fads, disordered eating, and supplementation.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

HHD 1301 - LIFE AFTER SPORTS

Minimum Credits: 3

Maximum Credits: 3

This class has been designed to address the unique transitional needs of intercollegiate student-athletes. The purpose of this course is to help upperclassmen student-athletes prepare for life after sport - whenever that occurs. Students will learn soft skills that assist with the development of individual leadership and organizational leadership tactics. The course will be structured to address self-awareness or self-mastery, to address the psychological issues that accompany this challenging transition. Lastly, this course will demonstrate ways to utilize skills derived from their competitive sport and team collaboration to use as transitory skills for the future workforce. Topics covered will include career exploration, character development, values assessment and exploration, financial literacy and management, health and well-ness post-college and exploration of life outside of sports.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

HHD 1484 - NUTRITION AND HEALTH

Minimum Credits: 2

Maximum Credits: 2

Nutrition and energy intake have been linked to health related outcomes. The focus of this course will be on educating students on the basic principles of proper nutrition, and how nutrition plays a role in the prevention and treatment of chronic diseases.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

HHD 1485 - NUTRITION AND HEALTH

Minimum Credits: 3

Maximum Credits: 3

Nutrition and energy intake have been linked to health related outcomes. The focus of this course will be on educating students on the basic principles of proper nutrition, and how nutrition plays a role in the prevention and treatment of

chronic diseases.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

HHD 1486 - BEHAVIOR CHANGE STRATEGIES

Minimum Credits: 3

Maximum Credits: 3

This course will focus on behavioral strategies for modifying health related behaviors. Primary focus will be placed on physical activity, eating behaviors, and weight control. Emphasis will be placed on practical application of behavioral principles in health related environments.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

HHD 1487 - CHRONIC DISEASE AND OBESITY

Minimum Credits: 3

Maximum Credits: 3

This course will focus on treatment approaches to obesity including behavioral, pharmacological, and surgical procedures. This will involve expanding on existing knowledge of energy balance, physical activity, nutrition, and behavior modification. The application of this knowledge will encompass the development of interventions to address the obesity epidemic and provide practical knowledge in this area.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: HPA/HHD 1033, HPA/HHD 1031, and HPA/HHD 1224

HHD 1488 - WEIGHT MANAGEMENT AND PHYSICAL ACTIVITY

Minimum Credits: 2

Maximum Credits: 2

This course is designed for students who meet the clinical criteria for being overweight (body mass index > 25 kg/m²) and who desire to lose weight, improve their nutrition, and increase their exercise. This course will combine instruction on behavioral techniques to lose and maintain weight loss along with supervised cardiovascular and resistance exercise. Students will be assessed at the beginning and end of the course to monitor changes in weight, body composition, fitness and other factors.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: Letter Grade

HHD 1489 - CONSIDERATIONS FOR HEALTH AND FITNESS PROGRAMMING

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

HHD 1491 - TEACHING HEALTH AND WELLNESS IN ELEMENTARY SCHOOLS

Minimum Credits: 3

Maximum Credits: 3

This class will focus on those factors that affect the health and well-being of children and how teachers may, through their work, promote the health of children both in and outside the educational setting. We will learn the importance of both promoting a healthy lifestyle within the young and the importance of advocating for a healthy environment in which all children and adults may flourish. Students will plan learning activities that will enhance the health knowledge, skills, attitudes and experience of young children.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

HHD 1542 - EVIDENCE-BASED INTERVENTIONS IN REAL WORLD CONTEXTS I

Minimum Credits: 3

Maximum Credits: 3

Evidence-based interventions (EBIS) are the foundation of effective and high-quality prevention and intervention programs in education, human services, and healthcare. Both pre-service and continuing education of interdisciplinary professionals must emphasize the acquisition of knowledge and applied competencies about diverse ebis in this continuously evolving area. Many forms of prevention and intervention are used in education, human services, and healthcare, but few such practices have 'practice-based evidence' conducted in real-world settings which validate their continued use. Thus, in this course, students will gain knowledge and skills in evidence-based contextual and individual interventions, their content, methodology, implementation, and evaluation. The course will help students who are interventionists but is not primarily clinical in orientation. Rather, it is designed to prepare future leaders ' practitioners, researchers, program administrators/directors, program evaluators, and policy specialists - in best practices and their implications

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

HHD 1622 - CHILD LIFE PRACTICUM

Minimum Credits: 1

Maximum Credits: 1

Credits for approved hospital-based child life practicum experience.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: H/S/U Basis

HHD 1722 - CHILD LIFE INTERNSHIP

Minimum Credits: 1

Maximum Credits: 1

Credits for approved hospital-based child life internship placement.

Academic Career: Undergraduate

Course Component: Internship

Grade Component: H/S/U Basis

Course Attributes: Undergraduate Internship

HHD 1995 - SPECIAL TOPICS

Minimum Credits: 3

Maximum Credits: 3

A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern to educators. Focused on areas within either developmental movement and sport studies or exercise physiology.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SU3 Elective Basis

Course Requirements: PLAN: Health and Physical Activity (BS)

HHD 1996 - CLINICAL INTERNSHIP

Minimum Credits: 12

Maximum Credits: 12

Supervised clinical experience for the B.S. Degree student. The student is placed in a clinical setting appropriate to his/her degree interests and career goals and must complete a minimum of 25 hours of clinical work per credit hour. Supervision is provided by both a cooperating clinical supervisor and the university clinical advisor.

Academic Career: Undergraduate

Course Component: Internship

Grade Component: Letter Grade

Course Requirements: PREQ: HPA 1485, HPA 1011, HPA 1012, HPA 1031, HPA 1033, HPA 0474, HPA 0475, HPA 1224, HPA 1044, HPA 1042, HPA 1486, (HPA 1169 or 1170), HPA 1233, HPA 1487, HPA 1226, HPA 1489, and HPA 1035 (MIN GRADE 'C-')

Course Attributes: Undergraduate Internship

HHD 1998 - DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 6

The student proposes and carries out an independent study project under the direction and supervision of an appropriate member of the faculty.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: H/S/U Basis

Health and Rehabilitation Scs

HRS 1000 - INTRODUCTION TO RESEARCH

Minimum Credits: 3

Maximum Credits: 3

The study of the nature of research and the applications of the scientific approach in the research procedures. The course focuses on concepts, design techniques and interpretations, as well as limiting factors and ethical considerations.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: NS-BS, NS-BS (NSNDMS-TR), ND-MS (NSBS-TR)

HRS 1001 - CASE STUDIES IN THE HEALTH AND REHABILITATION SCIENCES

Minimum Credits: 2

Maximum Credits: 2

This interprofessional course will provide a dynamic introduction to the health and rehabilitation professions through case study representations and interactive engagement with faculty and students from the programs being represented

each class. Students in the course will gain insight into each of the disciplines in the School of Health and Rehabilitation Sciences and the intersection with medical professions to create effective interdisciplinary healthcare teams.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

HRS 1006 - INTRO TO HUMAN NUTRITION

Minimum Credits: 3

Maximum Credits: 3

This course will cover an overview of the scientific principles of nutrition and application of these principles to humans throughout the life cycle. Major focuses of the course are the classification and function of the six major nutrients, review of current nutrition standards, safety of the food supply, and nutrition misinformation.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

HRS 1008 - APPLC OF STATCL CONCEPTS IN HIM

Minimum Credits: 3

Maximum Credits: 3

Designed to present student with the understanding of the research process. Student learns to analyze scientific reports to communicate with statisticians when research problems arise.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 1009 - ORGANIZATIONAL THEORY & BEHAVIOR

Minimum Credits: 3

Maximum Credits: 3

The primary purpose of this course is to facilitate the student's attaining a more comprehensive, integrated and useful understanding of organizational culture, systems and behavior. The overall emphasis will be on formal organizations in both the public and private sector, however, the theory and concepts will be transferable to any type of organization.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Clinical Dietetics-Nutrition (BS)

HRS 1017 - INTRODUCTION TO EPIDEMIOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course will introduce basic concepts of epidemiology for professionals in health and rehabilitation. Descriptive epidemiology, morbidity and mortality studies, and experimental epidemiology will be some of the topics explained and addressed.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

Course Attributes: Global Studies

HRS 1018 - SURVEY OF HEALTH AND REHABILITATION PROFESSIONS

Minimum Credits: 2

Maximum Credits: 2

An interdisciplinary faculty team will introduce students to health science professions in physical therapy and athletic training, occupational therapy, speech-language pathology and audiology, rehabilitation counseling, health information management, rehabilitation technology, emergency medicine, and disability studies. Classes will feature lectures and hands-on activities.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Satisfactory/No Credit

Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 1025 - INTRODUCTION TO MICROBIOLOGY

Minimum Credits: 3

Maximum Credits: 3

An overview of medical microbiology introduces the student to medically important bacteria, fungi, viruses, parasites and to immunity.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

HRS 1052 - TOPICS IN CLINICAL PSYCHOLOGY

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PROG: Sch Hlth & Rehabilitation Scs

HRS 1099 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 6

Provides advanced students an opportunity to explore in depth an area of particular interest to them. It is the student's responsibility to find a faculty member willing to undertake such a tutorial.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: LG/SU3 Elective Basis

Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 1421 - SECURITY, PRIVACY AND LEGAL ISSUES OF HEALTH INFORMATION SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

Students in this course will explore legal, security, and privacy issues related to health information systems. Data availability, integrity and confidentiality of databases and networks, computer security, public key infrastructure, encryption/decryption techniques, and data recovery will be addressed as well as risk assessment, security policies, HIPAA, privacy, applicable health laws, and ethical issues in the management of health information.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 1422 - COMPUTER PROGRAMMING FOR HEALTH INFORMATICS

Minimum Credits: 3

Maximum Credits: 3

This course is designed to introduce advanced computer programming technologies. The course will provide students with skills of solving real health informatics problems using computer programs. This course is not designed as first computer programming class. The instructor assumes that students have taken and are familiar with one or a few programming languages (such as BASIC, C/C++, JAVA, C#, PERL, PYTHON, RUBY) prior to taking this class. One or multiple programming languages may be used in this class to solve health informatics problems. This course is hands-on and project-oriented.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 1424 - DATA BASE MANAGEMENT IN HEALTH CARE

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 1425 - GENOMICS AND PERSONALIZED CARE

Minimum Credits: 3

Maximum Credits: 3

This course is designed as an introductory-level course to data analytics and its application in genomics. In this course, students will learn techniques on data collection, data processing, modeling, data visualization, and result interpretation. Specific examples from genomics will be used to demonstrate the details of these techniques. Students will work on individual projects to extensively practice their data analytics skills. A number of web-based data analysis tools will be used in this course; therefore, students are not required to write their own data analysis programs.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 1515 - REHABILITATION PSYCHOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course explores rehabilitation psychology and the target population of this clinical psychology specialty,

individuals with chronic illness and disability. Psychology and health professionals, regardless of their chosen career profession, will encounter persons with chronic illness and disability (CID). This course provides an overview of key concepts in working with individuals with CID, a discussion of different populations presenting with CID, and examination of evidence based approaches to intervention, and a review of diverse contexts in which counseling and psychology professions treat and interact with persons with CID.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 1700 - COLLEGE ACHIEVEMENT AND CAREER PREPARATION SEMINAR

Minimum Credits: 1

Maximum Credits: 1

This course will focus on career development and job-placement theories, legislation, constructs, and research for persons with disabilities. Through this lens, the course will cover the history of and current practices related to self-advocacy, success strategies, and rights and responsibilities of persons with disabilities. The course will cover time management and goal setting, development of an individual educational plan and identification of services and programs that will lead to college success, and career planning including job-search and employer-negotiation strategies and identification of community, state, and national resources of employment assistance. Using enablement and disablement models, leaders in the disability community will be invited to discuss their career pathways. The course will specifically focus on occupational and labor market information related to assistive technology and related health science and engineering. This course may be of interest to students with disabilities; students pursuing careers related to disability support, policy, or legislation; special education; and vocational/rehabilitation counseling.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 1702 - FUNDAMENTALS OF REHABILITATION ENGINEERING & TECHNOLOGY 1 LAB COMPONENT

Minimum Credits: 1

Maximum Credits: 1

This is the 1-credit lab component associated with HRS 1704. It is optional, for those who wish to get the hands-on experience in a clinic setting. Do not register for this course if you have not also registered for HRS 1704. Introduction to fundamental principles and practices related to multiple areas of assistive technology. Technology areas include: seating and wheelchair mobility, augmentative communication, environmental control, computer access, transportation safety, prosthetics, worksite ergonomics, and man/ machine modeling. In addition, common terminology, disability ethics and models of service delivery related to assistive technology are discussed.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 1704 - FUNDAMENTALS OF REHABILITATION ENGINEERING & TECHNOLOGY 1

Minimum Credits: 2

Maximum Credits: 2

Introduction to fundamental principles and practices related to multiple areas of assistive technology. The technology area includes: seating and wheelchair mobility, augmentative communication, environmental control, computer access,

transportation safety, prosthetics, worksite ergonomic, and man/machine modeling. In addition, common terminology, disability, ethics, and models of service delivery related to assistive technology are discussed. **This course has been 3 credits in the past, which included a hands-on lab component. Due to the need for social distancing, this course is now 2 credits with an optional 1-credit lab component. If you wish to take the lab component, please also register for HRS 1702.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 1709 - DSGN/FABRICATION WITH ENGR MATLS

Minimum Credits: 1

Maximum Credits: 1

Course designed to teach students basic skills of designing and fabricating mechanical mechanisms and components. Solely lab based and will use "learn by doing" approach. Students gain experience working with engineering materials such as wood, plastics, aluminum, brass and steel. Fabrication techniques of turning, milling, cutting, drilling, tapping and welding will be used. Participate in the design and fabrication of various devices with increasing complexity. Shop safety, tool section, and equipment maintenance will be an important component of the course.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: H/S/U Basis

Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 1746 - SERVICE LEARNING THROUGH SUPERVISED FIELD PLACEMENTS IN REHAB AGENCIES

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: Letter Grade

Course Requirements: PREQ: HRS 1730 or 1732; MIN GRADE: 'C-' for listed Courses

HRS 1787 - INTRODUCTION TO ORTHOTICS AND PROSTHETICS

Minimum Credits: 3

Maximum Credits: 3

This will be a lecture, seminar, and laboratory course introducing some of the applied science and clinical aspects of the orthotics and prosthetics (O&P) professions. Topics include: an overview of the profession; introduction to some basic anatomy, kinesiology and biomechanics related to O&P; some pathologies, disabilities, and injuries treated with orthoses or prostheses; introduction to patient evaluation and measurement; and introduction to fabrication of custom O&P devices, using laboratory equipment. The course will be taught using hypothetical or actual case studies. Classes will take place at Bakery Square (Suite 402, 6425 Penn Ave).

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

HRS 1905 - INTER-PROFESSIONAL STUDIES IN HEALTH, REHABILITATION AND DISABILITY IN IRELAND

Minimum Credits: 2

Maximum Credits: 2

This short spring-break study abroad program is designed for a broad range of students with health-related interests. The course will help students develop inter-disciplinary clinical and research insights while addressing health, disability, rehabilitation and related issues. The program provides students with an early introduction to the scope of practice of related disciplines and to models of inter-professional practice. Dublin, Ireland delivers an international context and learning opportunity that allows students to appreciate the influences of different policies and systems on collaborative clinical practices.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 1906 - EDUCATION POLICY AND PRACTICE IN NORTHERN IRELAND

Minimum Credits: 3

Maximum Credits: 3

In this course, which will involve a combination of classroom and community based learning, students will learn about education policy and practice within the social and cultural context of Northern Ireland. Students will explore a wide range of topics including: education policy with specific reference to special education needs, the role of play in cognitive development, physical literacy, issues of disadvantage and mental health, models of collaborative, inter-professional practice, inclusion and equity in education, and community engagement.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 1909 - INTRODUCTION TO SUSTAINABLE FOOD SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

Course Description: Our food system is a multifaceted network of interconnected systems and relationships. In order to be able to feed ourselves well into the future, it must be sustainable. A sustainable food system is a system in which healthy food is provided to people while balancing the environmental, social and economic impacts. These dynamics force stakeholders to confront synergies and tradeoffs in agricultural practices, harvesting, transportation, manufacturing and distribution, healthy diets, and a reduction in wasted food. Goals: This course includes guest speakers, class discussions, latest news and journal articles, interesting assignments, and a semester project to help guide students in developing their understanding of a sustainable food system and how they contribute through their choices. Upon the completion of the course, students should be able to define and describe the concepts of a sustainable food system and how it relates to politics, policy, community, and themselves.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

HRS 2004 - PATHOPHYSIOLOGY ACROSS THE LIFE SPAN

Minimum Credits: 4

Maximum Credits: 4

This course is designed to provide the student with a comprehensive theoretical foundation of the phenomena that produce alterations in human physiologic function in diverse populations across the life span. Information gained in this course will prepare the student for subsequent courses related to the diagnosis and management of disease processes associated with pathophysiologic dysfunction/alterations in people of various ethnic/cultural groups across

the life span.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2008 - ENTREPRENEUR SKILLS FOR NUTRITION PROFESSIONALS

Minimum Credits: 3

Maximum Credits: 3

This course will focus on the components of business planning, implementation and marketing for dietetics related products and services in a variety of settings. Working in teams and independently, students will identify potential products and services, develop business and marketing plans including financial and staffing considerations and present their plan to a panel of their peers and potential "buyers".

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: (Coordinated Mster in Dietetics); or SUBPLAN: (Clinical Dietetics & Nutrition) or (Wellness and Human Performance)

HRS 2623 - ADVANCED MEDICAL NUTRITION THERAPY 1

Minimum Credits: 3

Maximum Credits: 3

This is the first of a two-course sequence in advanced medical nutrition therapy. This course will build on the student's knowledge of medical nutrition therapy from their undergraduate coursework and will focus on the application of the nutrition care process at the practitioner level. The course will cover pathophysiology, nutrition implications, nutrition assessment and diagnosis, and nutrition interventions for acute and chronic diseases based on evidence-based guidelines. Teaching approaches for the course include lectures, assigned readings, in-class discussions and activities, and problem-based learning through case studies.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: ND-MS

HRS 2624 - ADVANCED MEDICAL NUTRITION THERAPY 2

Minimum Credits: 2

Maximum Credits: 2

This is the second of a two-course sequence in advanced medical nutrition therapy. This course will build on the student's knowledge of medical nutrition therapy from her/his undergraduate coursework and HRS 2623 and will focus on the application of the nutrition care process at the practitioner level. The course will cover pathophysiology and treatment, nutrition implications, nutrition assessment and diagnosis, and nutrition interventions, including nutrition support, for acute and chronic diseases based on evidence-based research and guidelines. Teaching approaches for the course include lectures, guest speakers, assigned readings, in-class discussions, and problem-based learning through case studies.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Coordinated Mster in Dietetics (MS)

HRS 2625 - NUTRITION COUNSELING METHODS

Minimum Credits: 3

Maximum Credits: 3

This is an advanced course that emphasizes counseling as a supportive process, characterized by a collaborative counselor-patient relationship that involves behavior and attitudinal change. It will focus on the conceptual foundations and philosophy of behavior change theories, with an emphasis on motivational interviewing, including application in practice to provide the learner with a collection of evidence-based strategies and counseling skills to promote behavior change in patients/clients.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Coordinated Mster in Dietetics (MS) or Health and Rehabilitation Scs (MS) or

SBPLAN: Wellness and Human Performance or Clinical Dietetics & Nutrition

HRS 2631 - NUTRITION FOCUSED PHYSICAL EXAMINATION

Minimum Credits: 3

Maximum Credits: 3

Introduction to professional knowledge and skills in nutrition focused physical examination. The course is based on the knowledge/application of the NCP and Model in professional practice. Learning experiences will include formal class presentations, class discussions, case-based problem solving and simulation laboratory sessions. Knowledge based learning leading to examination technique simulations for anthropometric measurements for body composition, nutrition focused physical examination for malnutrition diagnosing and examination techniques, e.g., vital signs, head and neck exam, intra and extra-oral exams, heart and lung auscultation, as well as, abdominal auscultation and palpation are included. At the completion of the course competency in application of nutrition focused physical examination techniques will be assessed on an individual basis.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Coordinated Mster in Dietetics (MS) or Nutrition and Dietetics (MS)

HRS 2633 - PROFESSIONAL DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

This course provides students with opportunities to explore through study, discussion and practical application, the issues and trends that are affecting food and nutrition professionals and the profession of dietetics. Included is an introduction to the history and structure of the profession of dietetics and to existing and emerging roles.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Coordinated Mster in Dietetics (MS) or Nutrition and Dietetics (MS)

HRS 2637 - PRACTICAL APPLICATIONS OF MEDICAL NUTRITION THERAPY 1

Minimum Credits: 1

Maximum Credits: 2

This weekly conference is designed to prepare students for their planned, supervised practice experiences to be completed at the assigned clinical facility. Teaching approaches for the course include lectures/presentations, group discussions, student presentations, guest lectures, and problem-based learning through case studies. Class exercises are designed to simulate supervised practice assignments and provide opportunity for the student to apply didactic content to the practice of food service management and the nutrition care process used in patient care. Class participation is an important component of the course. Group discussions are used to report on events and share experiences in order to

broaden the class's perspective on dietetics practice in the acute care setting.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Letter Grade

Course Requirements: PLAN: Coordinated Mster in Dietetics (MS)

HRS 2638 - PRACTICAL APPLICATIONS OF MNT 2

Minimum Credits: 1

Maximum Credits: 1

This weekly conference is designed to prepare students for their planned, supervised practice experiences to be completed at the assigned clinical facility. Teaching approaches for the course include lectures/presentations, group discussions, student presentations, peer review exercises, and problem-based learning through case studies. Class exercises are designed to simulate supervised practice assignments and provide opportunity for the student to apply didactic content to the nutrition care process used in patient care. Class participation is an important component of the course. Group discussions are used to report on events and share experiences in order to broaden the class's perspective on dietetics practice in the acute care setting.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad HSU Basis

Course Requirements: PLAN: Coordinated Mster in Dietetics (MS)

HRS 2640 - SUPERVISED PRACTICE : COMMUNITY NUTRITION

Minimum Credits: 2

Maximum Credits: 2

This course is a combination of dietetics related classroom, observation and supervised practice experiences in community settings. Emphasis is on delivering food and nutrition services in community based settings with a focus on wellness. Core rotations are in the following areas: child and adult day care, WIC and breastfeeding support, congregate and home delivered meals (Meals-On-Wheels), schools, the Western Pennsylvania School for Blind Children, food banks and pantries and community-based wellness programs. Students are required to complete the core rotations and to meet course requirements through special projects in sites of their choice across the lifecycle. Course minimum: 120 hours.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Coordinated Mster in Dietetics (MS)

HRS 2642 - SUPERVISED PRACTICE: CLINICAL 1

Minimum Credits: 5

Maximum Credits: 5

This course will provide supervised practice experience in the area of clinical dietetics. This course is designed to follow the topic sequence and content of HRS 2623: Advanced Medical Nutrition Therapy 1. It provides the students with the opportunity to apply their knowledge of the nutrition care process and medical nutrition therapy (MNT) to the practice of dietetics in the acute care setting. This involves planned learning experiences with a variety of patients at various stages of the health/illness continuum. Students will have opportunity to observe and then model the functions of a clinical dietitian. Through the combination of planned learning activities and professional interaction, the students will demonstrate increasing level of proficiency in providing comprehensive nutritional care to individuals within the practice setting. This course is the first of two courses which will provide clinical dietetics supervised practice experience. In this course the initial skills required for the nutrition care process will be mastered: nutrition assessment, diet interviewing, developing a care plan, written documentation, and nutrition education/counseling. Supervised

practice experience caring for patients with the following disease states will be provided: feeding difficulties, energy imbalances, cardiovascular diseases, diabetes mellitus, and renal disease. During this course the student will begin to develop and construct their Quality Improvement (QI) Research project. This project will give each student the opportunity to work independently on a QI project at the primary clinical site. The project should focus on an area that is relevant to the site's Clinical Nutrition Department and/or the field of clinical dietetics. This is a two term project that will continue into HRS 2643: Supervised Practice: Clinical II.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Coordinated Mster in Dietetics (MS)

HRS 2643 - SUPERVISED PRACTICE: CLINICAL 2

Minimum Credits: 5

Maximum Credits: 5

This course is the second of two courses which will provide supervised practice experience in the area of clinical dietetics. This course is designed to follow the topic sequence and content of HRS 2624: Advanced Medical Nutrition Therapy 2. It provides the students with the opportunity to apply their knowledge of nutrition assessment and medical nutrition therapy to the practice of dietetics in the acute care setting. This involves planned learning experiences with a variety of patients of all ages at various stages of the health/illness continuum. Students will have opportunity to observe and then model the functions of a clinical dietitian. Through the combination of planned learning activities and professional interaction, the students will demonstrate increasing level of proficiency in providing comprehensive nutritional care to individuals within the practice setting. Students will be assigned to their same primary site as the fall term; however selected rotations outside of the primary site may be necessary to provide appropriate learning activities. This course will build on skills mastered in HRS 2642 and will provide the students supervised practice experiences to develop and master new skills including calculating and assessing enteral and parenteral nutrition regimens. Supervised practice experience caring for patients with the following disease states/conditions will be provided: gastrointestinal, pancreatic, and liver disorders, cancer, critical illness, and patients requiring nutrition support. During this course the student will complete their Quality Improvement (QI) Research project. This project will give each student the opportunity to work independently on a QI project at the primary clinical site. The project should focus on an area that is relevant to the site's Clinical Nutrition Department and/or the field of clinical dietetics. This is a two term project that will build on the project content from HRS 2642.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Coordinated Mster in Dietetics (MS)

HRS 2644 - SUPERVISED PRACTICE: MANAGEMENT OF NUTRITION CARE

Minimum Credits: 2

Maximum Credits: 2

The supervised practice experience activities for HRS 2644: Management of Nutrition Care are planned to provide the student with the opportunity to assume increased responsibility for the management of nutrition care to hospitalized patients. In this course, the student will function as a clinical dietitian at the clinical site and will independently conduct all phases of the nutrition care process. Students will continue in the same primary supervised practice facility where they were assigned for Supervised Practice: Clinical 1 and 2.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Coordinated Mster in Dietetics (MS)

HRS 2645 - SUPERVISED PRACTICE MANAGEMENT IN LONG-TERM CARE

Minimum Credits: 2

Maximum Credits: 2

This course provides supervised practice experience in a long-term care setting. The course will provide supervised practice experience in the areas of food service management and also clinical dietetics to allow the student to carry out the nutrition care process for patients/residents in this population.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Coordinated Mster in Dietetics (MS)

HRS 2646 - FUNCTIONAL NUTRITION

Minimum Credits: 3

Maximum Credits: 3

This introductory course to functional nutrition is based on a food first approach to promotion of optimal health. Lectures and class activities will explore the scientific basis of medicinal foods and herbs used in cooking. Students will demonstrate practical application by incorporating 'health promoting foods and herbs' into meal planning and preparation with the goal of optimizing health for the prevention and treatment of diet and lifestyle related diseases.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Cord Mster in Nutr and Dietics (CMD-MS) or Wellness and Human Performance (MSNUTR-SP)

HRS 2650 - EXERCISE PHYSIOLOGY

Minimum Credits: 3

Maximum Credits: 3

The purpose of this course is to provide graduate students, within the field of rehabilitation science, the knowledge of theoretical and applied aspects of exercise physiology. An in-depth understanding of how the body responds when exposed to acute and chronic bouts of exercise will be provided through lectures and laboratories. Topics discussed will include physiological responses and adaptations of the cardiovascular, respiratory, metabolic, and neuromuscular systems to exercise; assessing cardiorespiratory fitness, body composition, anaerobic performance and muscular fitness; designing exercise programs for health and wellness and special populations; sport performance; environmental considerations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

HRS 2655 - RESEARCH METHODS AND APPLIED STATISTICS

Minimum Credits: 3

Maximum Credits: 3

This introductory course in research methods and applied statistics will address research study design and descriptive and inferential statistics related to the research process. Inferential statistics will include one-sample, two-sample and multi-sample inference. Topics covered will include issues related to measuring variables (reliability/validity), an introduction to epidemiology and measures of association, and interpreting scientific literature. The course will include hands-on practice in running statistical tests previously taught in class. This course provides awareness about research methods and statistical analysis considerations needed by health sciences students. There are no pre-requisites.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

HRS 2680 - EVIDENCE BASED PROFESSIONALISM IN DIETETICS

Minimum Credits: 2

Maximum Credits: 2

This course will provide students with the tools and resources to facilitate personal and professional development. It will expose students to systems and processes to develop professionally throughout their career, to stay current with research and developments that take place within the profession. Students will gain an understanding of what it means to be a competent professional in the field of nutrition and dietetics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Health Informatics

HI 1011 - CLINICAL SCIENCES IN HEALTH INFORMATION MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

This course has multiple topics, including an introduction to the structure of human cells, tissues, organs and organ systems, and functions associated with them; a general overview of the predisposing factors and direct causes of disease, as well as their effects on the human body; an introduction to pharmacology; and word construction, pronunciation, spelling, definition and use of terms related to all areas of medical science, hospital service and health related professions.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: Restricted to PLANS: HIM-BS, BPH, or BS-H

HI 1020 - HEALTH DATA SCIENCE PROGRAMMING USING PYTHON AND R

Minimum Credits: 3

Maximum Credits: 3

This course introduces the two most widely used statistical programming tools in data science: R and Python. Students will learn how to do data processing of various types of data and prepare the data to be ready for statistical analyses and machine learning. Programming techniques and analyses that are essential for health data scientists will be covered.

This course will also cover the applications of graphical techniques and visualization for health data. This course covers how to do programming to implement various statistical methods and machine learning algorithms from the perspective of health data science. The approach of this course is practical, hands-on and project oriented.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: Restricted to PLANS: HIM-BS, BPH, or BS-H

HI 1210 - HEALTH INFORMATION AND THE HEALTH CARE SYSTEM

Minimum Credits: 3

Maximum Credits: 3

This course will include an introduction the historical development of the health care field with emphasis on the organizational structure of health institutions, as well as federal, state, and local agencies and health informatics and information management associations. Emphasis will be placed on all the key functions that surround health informatics, health information management and data science and the use of technology, regulations, ethical principles

and legal implications regarding these key functions. Information governance, data governance and the integrity of the health data that is used by health care organizations will be emphasized.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: Restricted to PLANS: HIM-BS, BPH, or BS-H

HI 1230 - FINANCIAL MANAGEMENT & HEALTH CARE REIMBURSEMENT

Minimum Credits: 3

Maximum Credits: 3

This course is designed as an introductory level course to principles, concepts and issues of financial management in a health care organization. The aim is to provide an understanding of financial and reimbursement language, concepts, and processes to enhance the daily management performance of current and future leaders in health informatics and information management. Operational budgets, understanding financial trends and variances, developing financial negotiating strategy, quantifying productivity, interpreting reimbursement analytics, ensuring compliance, understanding health care reimbursement will all be discussed and applied in this course.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: Restricted to PLANS: (HIM-BS, BPH, or BS-H) or (HI-BS)

HI 1231 - TALENT MANAGEMENT AND HUMAN RESOURCES

Minimum Credits: 3

Maximum Credits: 3

This course discusses the principles and methods practiced in human resource management in the health care environment. The role of the supervisor is emphasized, and practical applications in conjunction with theory are presented to the student. This course is a practical guide to human resource management in health care and covers topics such as recruitment, compensation and benefits, training, discipline, termination, legal issues, labor unions, and multi-human interactions that emerge in the workplace. It is also an overview of the laws and regulations that guide every decision related to managing people in the complex society in which we exist today.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: Restricted to PLANS: (HIM-BS, BPH, or BS-H) or (HI-BS)

HI 1250 - FOUNDATIONS OF HEALTH INFORMATICS AND INFORMATION MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to health informatics and information management including important concepts in computing and networking, digital health, data analytics, machine learning, data science, health technology intervention, electronic health records, data quality, health care standards, privacy and security, bioinformatics and digital imaging. Students will engage in hands-on applications of these concepts as well.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: Restricted to PLANS: HIM-BS, BPH, or BS-H

HI 1410 - HEALTH VOCABULARY, TERMINOLOGY & CLASSIFICATION SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

This course aims to evaluate the reference terminologies that are currently used in health care settings (SNOMED-CT, LOINC) as well as applications of data capture technologies (such as natural language processing, voice recognition, document imaging). Further, the course intends to introduce students to computer-assisted coding technology applications and evaluate the use of health care terminologies, vocabularies, and classification systems found both nationally and internationally.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: Restricted to PLANS: (HIM-BS, BPH, or BS-H) or (HI-BS)

HI 1411 - QUALITY MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

This course focuses on principles and approaches to the assessment of quality in health care and how this impacts the role of the health informatics and information management professional. Theoretical and pragmatic issues related to quality management, utilization review, and risk management are addressed. Responsibilities of the governing board, medical staff and other health care personnel in relation to quality management and improvement is examined. Requirements of accrediting and licensing agencies related to quality management are presented. Practical applications of quality measures, resource use, and risk management are applied. Students will design, implement, and present a quality management project at designated clinical facilities.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: Restricted to PLANS: (HIM-BS, BPH, or BS-H) or (HI-BS)

HI 1430 - LEADERSHIP

Minimum Credits: 3

Maximum Credits: 3

Leadership is a course designed to introduce and develop leadership behaviors. The goal of this course is to advance the capabilities in meeting current healthcare organization's challenges through both leader and leadership development. It is not intended to provide a background on the evolution of thought on leadership or leadership theory. The course takes a developmental not training approach by providing a leadership development framework that helps guide one in acquiring the characteristics and behaviors associated with good leadership.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: Restricted to PLANS: HIM-BS, or HI-BS, BPH, or BS-H

HI 1431 - REVENUE CYCLE MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

This course will provide an introduction into revenue cycle management which includes the process of when the patient first makes an appointment, checking patient insurance eligibility, understanding payment methodologies, revenue, payment cycle management, claims audits, compliance, value-based purchasing and outpatient prospective payment systems. Clinical Documentation Improvement Programs and the increased use of CAC programs will also be explored as well as minimizing healthcare fraud.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: Restricted to PLANS: (HIM-BS, BPH, or BS-H) or (HI-BS)

HI 1437 - CLASSIFICATION SYSTEMS IN HEALTHCARE

Minimum Credits: 3

Maximum Credits: 3

This course will enable the student to apply the principles of taxonomy as well as understand the purposes of classifying diseases and operations. An in-depth study of ICD-10-CM, ICD-10-PCS and CPT-4 will be undertaken along with an introduction to ICD-11. The interaction of Diagnosis Related Groups (DRG's) with classification systems will be emphasized. Data quality, the Uniform Hospital Discharge Data Set as well as coding/sequencing guidelines for both inpatient and outpatient coding will be examined.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: Restricted to PLANS: HIM-BS, BPH, or BS-H

HI 1450 - SECURITY, PRIVACY, LEGAL & ETHICAL ISSUES IN HEALTH CARE

Minimum Credits: 3

Maximum Credits: 3

This course is designed to introduce basic knowledge of security, privacy, legal and ethical issues in health informatics and information management. In the first half of the course, the major focus will be on security techniques, including basic concepts, encryption and decryption methods, program operating systems, databases, and network security. In the second half of the course, we will shift our attention to the application of the concepts of privacy and security in the health care industry. Legal and ethical issues around the privacy and security of health information will also be discussed. Hospital law and aspects of handling confidential and health records information with actual cases and statutes will also be discussed.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: Restricted to PLANS: (HIM-BS, BPH, or BS-H) or (HI-BS)

HI 1451 - DATABASE DESIGN AND BIG DATA ANALYTICS

Minimum Credits: 3

Maximum Credits: 3

This course will provide students with the theoretical and technical aspects of database, specifically in data modeling, design of database, as well as learning the "language" to manage database. The second section will address advanced topics in database and big data, including transforming data, data warehousing and data mining, and analysis and visualization of data. Students will work extensively with Microsoft Excel, Access, and SQL server to gain practical experience in design and implementation of health-related databases. Students will also learn important healthcare business/consulting skills that include presenting data as information, writing executive summaries, and preparing professional reports that highlight healthcare data findings.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: Restricted to PLANS: HIM-BS, BPH, or BS-H

HI 1452 - DIGITAL HEALTH AND ELECTRONIC HEALTH RECORD SYSTEM

Minimum Credits: 3

Maximum Credits: 3

Digital health technologies include solutions for both health care providers and patients, ranging from Electronic Health Records, Telemedicine, Mobile Health, Wearable Devices, as well as many emerging Internet-of-Things devices and sensors. This course will provide students with opportunities to explore; analyze, and discuss key issues, principles and policies surrounding digital health. The responsibilities of the health informatics and information management professional, as well as the requirements of accrediting and licensing agencies related to digital health technologies will also be discussed. The final assignment of this course will task students to work with key health service stakeholders (who will share their knowledge throughout the course as well) to investigate and propose a practical digital health solution to tackle a specific health issue.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: Restricted to PLANS: HIM-BS, BPH, or BS-H

HI 1453 - DATA ANALYTICS AND MACHINE LEARNING IN HEALTH SCIENCE

Minimum Credits: 3

Maximum Credits: 3

This course is designed for students who want to learn data analytics and machine learning, as well as their applications in healthcare and health information systems across the healthcare continuum. Data analytics tools and methods, machine learning procedures and tools, and their applications in healthcare and health science will be discussed in this course. Students who finish this course should be able to use statistical and machine learning methods and tools to analyze various types of data sets in health science and make predictions and recommendations according to the obtained results.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: Restricted to PLANS: (HIM-BS, BPH, or BS-H) or (HI-BS)

HI 1454 - DATA SCIENCE IN HEALTH INFORMATICS

Minimum Credits: 3

Maximum Credits: 3

This is an introductory course to health data science and will cover data sources, types, collection methods, processing and analysis methods, and analysis result interpretation with an emphasis in health-related data. Assigned hands-on projects will enable students to have the skills to analyze various types of health data sets using different methods and have the ability to interpret the meaning of the results.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: Restricted to PLANS: HIM-BS, BPH, or BS-H

HI 1471 - INTRO TO HEALTHCARE IT AND EMERGING TECHNOLOGIES

Minimum Credits: 3

Maximum Credits: 3

This course will cover important health IT standards for clinical document and healthcare data exchange & interoperability such as Consolidated-Clinical Document Architecture (C-CDA), Fast Healthcare Interoperability Resource (FHIR). This course will also survey emerging health technologies such as cloud computing, artificial intelligence in healthcare, wearable devices and block chain technologies. The contents of the course can change and evolve as new standards and new technologies emerge.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: Restricted to PLANS: (HIM-BS, BPH, or BS-H) or (HI-BS)

HI 1485 - PROJECT MANAGEMENT & SYSTEMS ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

This course will study how technology, people, and economics of software projects interact and the impact these elements have on managing software projects. The presentation of concepts of systems analysis and their relationship to health informatics and information management is a major emphasis of this course. Case problems and individual projects from health-care settings are assigned to develop proficiency.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: Restricted to PLANS: (HIM-BS, BPH, or BS-H) or (HI-BS)

HI 1497 - CLINICAL INTERNSHIP

Minimum Credits: 3

Maximum Credits: 3

This clinical experience involves a six-week clinical affiliation at contracted health care sites or health-related organizations under the supervision of data science, health informatics or health information management professionals. Student assignments are structured to provide actual experiences in the administrative, managerial, technical and project-oriented areas of health informatics and information management, such as electronic health records development and training, project management, systems analysis, human resource management, health information systems, database management, data science, data analytics and other similar experiences.

Academic Career: Undergraduate

Course Component: Internship

Grade Component: Letter Grade

Course Requirements: Restricted to PLANS: HIM-BS, or HI-BS, BPH, or BS-H

HI 1499 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 6

Provides student an opportunity to explore in depth an area of particular interest to them. It is the student's responsibility to find a faculty member willing to undertake such a tutorial.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: LG/SU3 Elective Basis

Course Requirements: Restricted to PLANS: (HIM-BS, BPH, or BS-H) or (HI-BS)

HI 1650 - INTRO TO STATISTICS AND RESEARCH DESIGN

Minimum Credits: 3

Maximum Credits: 3

This course is designed to provide students with a practical understanding of the use of statistics in health informatics and information management (HIIM). Descriptive statistics, inferential statistics, and some non-parametric statistics will be discussed and utilized with healthcare data or concepts. The use of Excel and SPSS will be used to run statistical tests and understand the meaning of the output generated. Research articles and statistical projects will be

used to learn the meaning of statistics and its use in the field of HIIM. Epidemiology and epidemiologic research design and methods for the HIIM student will also be included. Types and purposes of epidemiology, measures of risk, and sources of data will be discussed.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: Restricted to PLANS: HIM-BS, BPH, or BS-H

HI 1651 - CAPSTONE PROJECT

Minimum Credits: 3

Maximum Credits: 3

This is the final capstone course where the faculty will assess students' attainment of all the required professional competencies in health informatics and information management (HIIM). This will be determined by completing the senior project, an independent project in which the student serves as a consultant to a particular health care facility in order to solve a problem. It will also be determined by completing a poster presentation of the senior project, the study preparation, taking both a mock exam developed by the HIM department based upon its curriculum and taking an entry-level nationally validated exam administered by AHIMA, the RHIA.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: Restricted to PLANS: HIM-BS, or HI-BS, BPH, or BS-H

Health Information Management

HIM 1438 - CANCER REGISTRY THRY & PRACT LAB

Minimum Credits: 2

Maximum Credits: 2

Designed to provide students with practical experience in the design, development, performance and administration of various types of research databases. Primary focus is the organizational and operational functions of a cancer registry. Medical management of patient, physiology of disease process methodology used in evaluation extent of disease and assessing outcome through patient follow-up, use of ICD-O classification system is presented. Impact of data quality and availability in relation to utilization of the registry is stressed.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

Course Requirements: CREQ: 1435 and 1436; PLAN: Health Information Management (BPH or BS or BS-H)

HIM 1440 - HIM CLINICAL EDUCATION 1

Minimum Credits: 1

Maximum Credits: 1

Clinical affiliation at contracted health care sites under the supervision of qualified health information management personnel. Student assignments are structured to provide actual experience in the technical and clinical areas of health information management, such as record retention and retrieval, release of information, coding and abstracting, chart analysis, etc.

Academic Career: Undergraduate

Course Component: Clinical

Grade Component: Letter Grade

Course Requirements: PLAN: Health Information Management (BPH or BS or BS-H); PREQ: 1415 and 1416; CREQ: 1435 and 1436

HIM 1442 - APPLC OF STATCL CONCEPTS IN HIM

Minimum Credits: 3

Maximum Credits: 3

Designed to provide students with a practical understanding of the use of statistics in health information management (HIM). This course will focus on management and organization of health information data and the appropriateness of using specific statistical techniques with data. Descriptive statistics, inferential statistics, and non-parametric methods will be discussed and utilized with HIM data or concepts. Database development, research articles and projects will be used to learn the meaning of statistics and its use in the field of HIM.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Health Information Management (BPH or BS or BS-H)

HIM 1445 - HUMAN RELATIONS IN HLTH CARE

Minimum Credits: 2

Maximum Credits: 2

This course discusses principles of effective communication and interpersonal relationships. Course material will include information concerning communication skills, group therapy, diversity, conflict management, etc.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Health Information Management (BPH or BS or BS-H)

HIM 1455 - QUALITY MANAGEMENT

Minimum Credits: 2

Maximum Credits: 2

This course focuses on principles and approaches to assessment of quality in health care and how this impacts the role of the health information manager. Theoretical and pragmatic issues related to quality management, utilization review, and risk management is addressed. Responsibilities of the governing board, medical staff and other health care personnel in relation to quality management and improvement is examined. Requirements of accrediting and licensing agencies related to quality management are presented.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: CREQ: HIM 1456; PLAN: Health Information Management (BPH or BS or BS-H)

HIM 1456 - QUALITY MANAGEMENT LAB

Minimum Credits: 1

Maximum Credits: 1

This quality management laboratory focuses on the practical applications of managing the quality of health care, resource use, and risk. Students will design, implement, and present a quality management project at designated clinical facilities. Also, several in-class/online assignments will be required.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

Course Requirements: CREQ: HIM 1455; PLAN: Health Information Management (BPH or BS or BS-H)

HIM 1460 - HIM CLINICAL EDUCATION 2

Minimum Credits: 1

Maximum Credits: 1

Practice and introduction to areas of impact for health information: revenue cycle management, quality assessment, case and care management, data analysis and business intelligence and information security areas.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

Course Requirements: PLAN: Health Information Management (BPH or BS or BS-H); PREQ: 1455 and 1456; CREQ: 1465

HIM 1462 - EPIDEMIOLOGY

Minimum Credits: 2

Maximum Credits: 2

This course is an introductory course in epidemiology and epidemiologic methodology for the HIM student. It includes types and purposes of epidemiology, measures of risk, and sources of data. There will be an emphasis on epidemiological student designs related to HIM and Health Informatics. Students will design an epidemiological research proposal as part of the course requirements.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Health Information Management (BPH or BS or BS-H)

HIM 1465 - REIMBURSEMENT SEMINAR

Minimum Credits: 1

Maximum Credits: 1

An introduction to topics relating to reimbursement in the health care environment. The course will build on topics covered in Classification Systems including the role of coding in reimbursement and minimizing health care fraud. Additional areas include payment methodologies, revenue, and payment cycle management, claims audits, compliance, value-based purchasing and outpatient prospective payment systems. Clinical Documentation Improvement Programs and the increased use of CAC programs will also be explored.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Letter Grade

Course Requirements: PLAN: Health Information Management (BPH or BS or BS-H)

HIM 1470 - SUPERVISION HUMAN RESOURCES HC

Minimum Credits: 3

Maximum Credits: 3

This course discusses the principles and methods practiced in human resource management in the health care environment. The role of the supervisor is emphasized, and practical applications in conjunction with theory are presented to the student.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Health Information Management (BPH or BS or BS-H); PREQ: 1420

HIM 1475 - HIM NON-TRADITIONAL SETTING

Minimum Credits: 3

Maximum Credits: 3

An overview of health information systems in community-based facilities emphasizing information requirements of ambulatory-care centers, behavioral health, substance abuse, rehabilitation, emergency medicine, occupational health, long-term care, sub-acute care, home health care, hospice, dialysis, managed care, correctional facilities, dental care, and veterinary care settings. The role of the health information manager as a consultant in these settings is discussed. HIM consultants/professionals in these areas are invited to lecture as guest speakers from each of these settings. A 20-hour project is a major component and entails having the student conduct the project as a consultant in one of the health care areas listed above.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Health Information Management (BPH or BS or BS-H); CREQ: 1480

HIM 1482 - LEGAL ASPECTS OF HEALTH CARE

Minimum Credits: 2

Maximum Credits: 2

This course discusses principles of hospital law and aspects of handling confidential and health records information. Actual cases and statutes are discussed.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Health Information Management (BPH or BS or BS-H)

HIM 1486 - FINANCIAL MANAGEMENT FOR HIM

Minimum Credits: 2

Maximum Credits: 2

This course is designed as an intro level course to principles, concepts and issues of financial management in a health care organization. Focus on financial management viewed from the perspective of department/credit manager and supervisor. Institution-wide accounting and budgeting systems are discussed primarily as a framework for understanding how financial reporting, planning and control is linked to organizational effectiveness and how financial management responsibilities of the departmental manager relate to organization-level financial goals.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Health Information Management (BPH or BS or BS-H)

HIM 1490 - ELECTRONIC HEALTH RECORDS

Minimum Credits: 3

Maximum Credits: 3

This course addresses theoretical and pragmatic issues related to EHR technology, such as design and development, standards and clinical terminologies, privacy and security issues, model EHR systems, evaluation of EHR software systems, and outcomes research using the EHR will be addressed. The responsibilities of the health information management professional, as well as the requirements of accrediting and licensing agencies related to EHR, will also be discussed. The responsibilities and involvement of various members of the health care team in the development, use, evaluation, and dissemination of EHR technology will be emphasized.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Health Information Management (BPH or BS or BS-H)

HIM 1496 - CAPSTONE COURSE IN HIM

Minimum Credits: 3

Maximum Credits: 3

This is the final capstone course where the faculty will assess students' attainment of all the required professional competencies in health information management (HIM). This will be determined by completing the senior project, an independent project in which the student serves as a consultant to a particular health care facility in order to solve a problem. It will also be determined by completing a poster presentation of the senior project, the study preparation, taking both a mock exam developed by the HIM department based upon its curriculum and taking an entry-level nationally validated exam administered by AHIMA.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: Letter Grade

Course Requirements: PLAN: Health Information Management (BPH or BS or BS-H)

Course Attributes: Capstone Course

Hindi

HINDI 0101 - HINDI 1

Minimum Credits: 4

Maximum Credits: 4

The greatest part of the first term will be devoted to the presentation and practice of the basic sound patterns of the language, its fundamental sentence patterns, and sufficient vocabulary to illustrate and practice them. An introduction to the writing system will be offered together with the opportunity to acquire elementary writing and reading skills.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Asian Studies, Global Studies

HINDI 0102 - HINDI 2

Minimum Credits: 4

Maximum Credits: 4

At the end of the second term of the first year of study the student should be able to produce all the significant sound patterns of the language, to recognize and use the major grammatical structures within a limited core vocabulary. The student should be able a) to engage in simple conversations with native speakers about a limited number of everyday situations and b) to read and write simple material related to the situations presented.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: LING 0281 or HINDI 0101; MIN GRADE: 'C'

Course Attributes: Asian Studies, DSAS Second Language General Ed. Requirement, Global Studies

HINDI 0103 - HINDI 3

Minimum Credits: 3

Maximum Credits: 3

The first term of the second year will concentrate on the further development of fluency in oral production and the improvement in the student's ability to understand the flow of speech as uttered by a native speaker. Increased attention will be paid to reading as a means of augmenting a vocabulary and writing as a drill and as a means of consolidating and communicating the knowledge gained.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: LING 0282 or HINDI 0102; MIN GRADE: 'C'

Course Attributes: Asian Studies, DSAS Second Language General Ed. Requirement, Global Studies

HINDI 0104 - HINDI 4

Minimum Credits: 3

Maximum Credits: 3

At the end of the second term of the second year the student should be able to converse comfortably with a native speaker on a variety of non-specialized subjects. The student will be offered an opportunity to experience and more fully understand the culture of the people who use the language through readings of various types. More complex writing tasks will be expected at this level.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: LING 0283 or HINDI 0103; MIN GRADE: 'C'

Course Attributes: Asian Studies, DSAS Second Language General Ed. Requirement, Global Studies

HINDI 0105 - HINDI 5

Minimum Credits: 3

Maximum Credits: 3

In this course students will build upon the skills acquired in previous Hindi classes. Through the study of articles, passages, chapters, and video clips that reflect daily life and living in India, students will continue to improve their reading, writing, listening, and speaking skills in Hindi. Literary study will begin at this level with the introduction of short stories. Students will be encouraged to express themselves creatively in both spoken and written Hindi.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

HINDI 0106 - HINDI 6

Minimum Credits: 3

Maximum Credits: 3

This course is a continuation of Hindi 5. Students will build upon the skills acquired in previous Hindi classes. Through the study of articles, passages, chapters, and video clips that reflect daily life and living in India, students will continue to improve their reading, writing, listening, and speaking skills in Hindi. Literary study will continue at this level with additional short stories. Students will be encouraged to express themselves creatively in both spoken and written Hindi.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

HINDI 0111 - INTRODUCTION TO HINDI LANGUAGE IN INDIA

Minimum Credits: 3

Maximum Credits: 3

This study abroad course will provide a basic introduction Hindi language for students with no or very little background in Hindi. It does not take the place of HINDI 0101 - Hindi 1 taught on the Pittsburgh campus.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

HINDI 1615 - MANY RAMAYANAS: TRADITION AND DIVERSITY IN MODERN INDIA

Minimum Credits: 3

Maximum Credits: 3

This course will introduce you to the great Hindu epic, the Ramayana, a blue-print for daily living in India. Although composed two millennia ago, the remarkable fluidity of the story has resulted in literally hundreds of Ramayanas, as it continues to be retold and reimagined while moving across space and time. Within the Ramayana itself there are many controversial episodes; among these the two most important are Sita's trial-by-fire and her subsequent banishment by her husband, Rama, and Rama's mutilation of Shurpanakha as punishment for the latter's bold romantic and sexual overtures. These incidents are of great import because the faithful and loyal Sita is the "Ideal Indian woman" in popular imagination even today. More significant is the fact that authors and commentators continue to use both these characters to address modern issues relating to gender inequality. The Ramayana is thus a rich source of information not just in literary terms, although its defining characteristic, its fluidity, is under threat, with groups on the ultraright attempting to dictate the "correct" version, but also in political, social and religious terms. This course will thus take a multi-disciplinary role in exploring the richness of what modern scholars have come to call the Ramayana tradition, and its role in India today; we will study its implications for women, its reception in South India, and its role in the rising tide of Indian nationalism, while eventually questioning whether its characteristic fluidity is at threat by those who insist on only one "pure" version.

History

HIST 0010 - PROFESSIONAL DEVELOPMENT SEMINAR

Minimum Credits: 1

Maximum Credits: 1

You are at a family function and one of your relatives over hears what your major is asks you "do you know what you call a BA in history?" Then before you can answer or walk away, he/she responds with "waiter!" While this is the accepted wisdom of what happens to a history, is this the reality of life after college? The answer to that is an emphatic "no!" Therefore, in this class you will find out why this is false. Then you will prepare for the real world by practicing and implementing the skills needed to navigate your way through the process of finding a job or going on to graduate school.

Academic Career: Undergraduate

HIST 0089 - MAGIC, MEDICINE AND SCIENCE

Minimum Credits: 3

Maximum Credits: 3

Dietary purges, ritualistic spells, mystical transformation, and the balance of self with nature. In each of these approaches is the presence of magic. Magic is a phenomenon common to all societies. In this course, we will study how it has contributed to religion, medicine, the healing arts, and to the emergence of modern scientific thought. Also the extent to which similar systems of belief have given birth to science, religion, magic and therapeutic practice will be explored.

HIST 0100 - WESTERN CIVILIZATION 1

Minimum Credits: 3

Maximum Credits: 3

The study of others leads back to ourselves. We learn about men and women from the past in order to compare their experience to our own, hoping that the comparison will make us more aware of the opportunities and limitations of present-day life. As an introduction to history, this course tries to suggest the excitement and uncertainties of studying the past. We begin at the time of the crusades, and continue through Renaissance and Reformation to the eve of Industrial Revolution.

HIST 0103 - EUROPE IN THE 18TH CENTURY

Minimum Credits: 3

Maximum Credits: 3

It was the best of times, it was the worst of times; it was the age of wisdom, it was the age of foolishness; it was the epoch of belief, it was the epoch of incredulity; it was the season of light, it was the season of darkness. There was a king with a large jaw and a queen with a plain face on the throne of England; there was a king with a large jaw and a queen with a fair face on the throne of France. In both countries it was clearer than crystal to the lords of state, preservers of loaves, and fishes that things in general were settled forever. This course surveys the political, economic, social, and cultural history of Europe in the eighteenth century. Focusing on the major transformations of European society from the Age of Absolutism through the Age of Enlightenment to the Age of Revolution, the course explores local and interconnected histories of Britain, France, Spain, Denmark, Sweden, Russia, Austria, and the Dutch Republic. The course engages five major themes: 'Power, Politics, and Warfare', 'Social, Demographic, and Economic Change', 'Culture, Religion, and the Public Sphere', 'European Expansion Overseas', and 'Revolutionary Europe.' Readings include primary and secondary sources. The course is open to students of all levels.

HIST 0125 - RELIGIONS OF THE WEST

Minimum Credits: 3

Maximum Credits: 3

This course is a historical introduction to the religious traditions that developed in ancient Near East and the Mediterranean. Our major emphasis is on the history of the religious traditions that emerged in late antiquity in this area and which continue to be major world religions: Judaism, Christianity, and Islam. We will also touch on Zoroastrianism. We focus on key concepts, historical developments, and contemporary issues. Throughout the course, we also examine interactions among these religious traditions. In the last part of the course we examine the issue of globalization and the spread of these religions around the world as well as the presence of "non-Western" religion in the

"West." The course also serves as an introduction to the academic study of religion and provides a foundation for further coursework in Judaism, Christianity, and Islam. No prior knowledge of any of the religions studied is expected or assumed.

HIST 0139 - VIKING AGE SCANDINAVIA

Minimum Credits: 3

Maximum Credits: 3

The Viking age, the period from 800 to 1050 AD Marks Scandinavia's transition from prehistoric to historic times. This course will reassess Viking activities as constructive as well as destructive. Raids, commerce and colonization are best illuminated by a blending of written and physical evidence. Through the sagas, secondary readings and an assessment of archaeological sources such topics as state formation, trade, technology, rise of cities, religion and the voyages to Greenland and America will be examined.

HIST 0140 - THE HISTORY OF THE BOOK

Minimum Credits: 3

Maximum Credits: 3

This course examines European book history in global context, from clay tablets through the age of print. Focusing primarily on the medieval and early modern periods, it considers the history of the book from several perspectives: as a story of technologies, both manual (papermaking, printing) and intellectual (literacy, memory), as a story of artistic and cultural forms, as a story of reading, and as a story of global networks. We will consider issues including forgery; censorship; the role of political, religious, and economic forces in the production of books; the development of trust in the written word; the history of libraries; and the formation of reading communities.

HIST 0150 - HISTORY OF MODERN IRELAND

Minimum Credits: 3

Maximum Credits: 3

This class will examine how Britain came to Ireland and why in the context of that period (16th and 17th centuries). It will also examine the very complex relationships between the Catholic church and the British crown in the 17th century, as these relationships played a great role in the Cromwellian era. This will lead us to the heart of the class where we will trace the very complex relationship between modern Irish republicanism and Cromwell.

HIST 0190 - THE DICTATORS

Minimum Credits: 3

Maximum Credits: 3

This course offers a venue to explore a large variety of political regimes frequently bounded together in the professional literature under the conceptual umbrella of "dictatorship." After gaining an introductory overview and acquiring a conceptual toolkit we will systematically scrutinize the trajectories, structures, and policies of some twenty political regimes throughout the world aiming to identify their commonalities and singularities. These findings will allow us to search for shared patters, identify types of political regimes, establish comparisons and connections between them, and understand every regime within a wider global context.

HIST 0200 - BETWEEN KAFKA AND HITLER: HOW CENTRAL EUROPE SHAPED THE MODERN WORLD

Minimum Credits: 3

Maximum Credits: 3

This course offers an introduction to the historical experience of Central Europe, the most diverse and dynamic region of modern Europe. Close to twenty nations with together more than 200 million people exist today between the rivers Rhine and Dnepr, between the Baltic and the Aegean Seas, from Germany in the west to Estonia in the northeast and Greece in south. Since the 1800s, this region made its mark on the world through an astounding cultural and intellectual creativity. People like Hegel and Marx, Kafka and Freud, Albert Einstein and Marie Curie changed the way we think. Yet 20th-century Central Europe was also a place of unprecedented mass violence and destruction, the main theater of two world wars and the site of the Holocaust. During the Cold War, it became the focal point of a global ideological conflict that divided the world into east and west. Ever since the fall of the Iron Curtain, Central Europe is the place where these divided worlds are growing together again. The study of this region and the socioeconomic and cultural forces that shaped it provides a fascinating lens for a better understanding of the modern world. This includes the fact that many of those who built Pittsburgh came from Central Europe and left their mark in this city. The course serves as core course for the Central European Studies Certificate

HIST 0201 - THE BALTIC SEA: FROM THE VIKINGS TO POST-SOVIET RE-UNION

Minimum Credits: 3

Maximum Credits: 3

In this course we will explore the Baltic Sea region, and trace Northern Europe's history from the age of the Vikings to the post-Soviet re-union in 1991. We will study the history of this region and its diverse language communities: Scandinavians, Finns, Balts, Slavs and Germans. We will discuss how the Baltic Sea region was shaped by several European powers, in particular Denmark, Sweden, Poland-Lithuania, Russia, Prussia, and Germany. The course will cover the history of Northern Europe over the course of the last 1,000 years, including the Vikings, the Hanseatic League, the Reformation, the Thirty Years War, the Nordic Wars, the Enlightenment, Nordic Romanticism, the Russian Revolution, the two World Wars, the Cold War, and the renewal of the Baltic Sea region as a unified trading space after the collapse of the Soviet Union.

HIST 0475 - RELIGION AND CULTURE IN EAST ASIA

Minimum Credits: 3

Maximum Credits: 3

Words have consequences. How a society defines "religion" and "culture" have much to say about how they balance individual freedom and collective responsibility. This course focuses on how religion has been and is practiced in East Asia in modern and contemporary times. We begin with an overview of the major religions in the region (e.g., Confucianism, Daoism, Buddhism, Shinto, folk traditions), and examine various themes to help us learn how religion influences the lives of individuals and the wider societies in which they live. Themes dealt with include the relationship between religion and politics and law; nationalism, terrorism, and secularization; gender, sexuality, and the family; healing, the environment, and ethical behavior; and the life cycle and ritual calendar year. By looking at how these issues unfold in modern China and Japan and at their global significance enable us to better understand how religion shapes our world.

HIST 0500 - COLONIAL LATIN AMERICA

Minimum Credits: 3

Maximum Credits: 3

This course explores the material history of Latin America during the period of Spanish and Portuguese Colonial Rule, from 1500 to 1825. In it, we will examine the interplay between material conditions (climate, natural resources, flora and fauna, and geographic features) and material culture (built space, technology, commodities, agriculture, as well as cultural products), asking how they shaped human action. Weekly case studies-ranging from pre-contact indigenous agriculture, through the role of technology in the success of Spanish conquistadors, to the impact horses on the Spanish frontier-prompt students to engage with the lived experience of a broad range of people living in pre-independence Latin America.

HIST 0672 - NATIVES AND NEWCOMERS

Minimum Credits: 3

Maximum Credits: 3

This course will focus on diversifying the narrative of North American history by providing a broad overview of important events, processes, and people that shaped this continent from the fifteenth century to the modern-day. Through a focus on the communities and political institutions created through contact between Native Americans, people of African descent, and white Europeans, students will learn that the United States and its colonial predecessors were shaped by a multiracial, multicultural group of peoples who created multiethnic settlements in different parts of North America simultaneously. These interactions produced the ideas about race and racism, citizenship, national borders, and political sovereignty we still encounter today.

HIST 0674 - UNITED STATES IMMIGRATION HISTORY

Minimum Credits: 3

Maximum Credits: 3

The United States has historically been both "a nation of immigrants" and a nation wary of them. This course will explore the history of immigration in/to the United States, paying close attention to the paradoxes and ironies that have defined that history since the nation's earliest days. We will trace changing migration patterns, examine the development of citizenship as a social and political construct, explain changes in immigration policy over time and their (intended and unintended) consequences, discover the roots of nativism, and assess the struggle for immigrants' rights. We will delve into the experiences of various immigrant groups across time and place and investigate how class, race, and gender have intersected to shape immigration policy, and in turn, how immigration policy has shaped various social groups' politics and social attitudes and identities.

HIST 0675 - WITCHES TO WALDEN POND

Minimum Credits: 3

Maximum Credits: 3

A survey of American religious history from the colonial period through the civil war.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: DSAS Historical Analysis General Ed. Requirement, Global Studies, SCI Polymathic Contexts: Soc/Behav. GE. Req.

HIST 0676 - RELIGION IN MODERN AMERICA

Minimum Credits: 3

Maximum Credits: 3

The course examines the impact of religion as a moral, intellectual, and institutional force in America from 1865 to the present. Despite claims that the nation was becoming less religious, at least seven new religions were founded in the U.S. After the civil war, while millions of migrants from southern and eastern Europe brought large numbers of Catholics and Jews to challenge the dominance of protestants. We seek to understand how religions have both shaped and reflected economic, social, and cultural conditions in the united states. The course combines lecture with student discussion of religious conflicts and critical moments of cultural change, using primary sources and secondary interpreters. We also engage documentary films, slides, and local museums and historical sites. Major emphases include religious responses to intellectual, scientific, and economic change, including biblical criticism, evolutionary theory, immigration, urbanization, industrialization, Marxism, fascism, racism, and feminism. We conclude with questions about the present day: is the United States an exception for its high levels of religious behavior or is secularism on the rise?

HIST 0687 - US IN THE MIDDLE EAST

Minimum Credits: 3

Maximum Credits: 3

This course covers the history of political, economic, and cultural interaction between the United States and the Middle East beginning in the interwar period and continuing forward to the modern day. This course would concentrate on the history of American political and economic ambitions in the region from the 1920s and 1930s to the present. Themes to

be explored in this course would include (in no specific order) oil and politics, Islam and the west, hard power versus soft power in diplomacy, American culture and politics post-9/11, and Palestine-Israel as it is conceived in the American mind. Course topics would proceed in a chronological order with details of each major political, diplomatic or military intervention in the Middle East in the twentieth century covered at length in course modules. Course topics would include analyses of the ramifications of American interventions in the region as well as a critique of contemporary U.S. foreign policy in the region.

HIST 0700 - WORLD HISTORY

Minimum Credits: 3

Maximum Credits: 3

This course is an introductory survey of world history, by which is meant an overview of major processes and interactions in the development of human society since the development of agriculture some 10,000 years ago. It is a selective overview, emphasizing large-scale patterns and connections in political, social, cultural, technological, and environmental history, yet it also provides balance among regions of the world. It encourages students to apply historical techniques to issues of their own interest.

HIST 0705 - AN ENVIRONMENTAL AND CLIMATE HISTORY OF THE WORLD

Minimum Credits: 3

Maximum Credits: 3

This course is a history, from ancient to modern times, of the interactions between human societies and the natural environment, including other forms of life that inhabit our planet. Throughout history, humans have affected the natural environment. Sometimes we have sustained balance with it, but often we have degraded it, with impacts on both nature and society. This course investigates how environmental changes have affected the history of human societies, and also how human activity has transformed nature.

HIST 0706 - DIGITAL MAPPING PRACTICUM

Minimum Credits: 1

Maximum Credits: 1

Students enrolled in the Digital Mapping Practicum will learn to make databases and interactive maps on topics related to environmental history. Students will learn how to find and create spatial data, how to create maps and join data to maps, and how to combine maps with text and images to tell historical stories using customized interactive maps.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: LG/SNC Elective Basis

HIST 0707 - SEX AND GENDER: A GLOBAL HISTORY OF THE MODERN WORLD

Minimum Credits: 3

Maximum Credits: 3

How do ideas of sex and sexuality change over time? Can we understand global history through the lens of sex? This course will survey topics in global history and the history of sex and sexuality from the eighteenth to the twentieth century. We will explore continuities and changes in the definitions of sex and sexualities, the science and politics of sex and reproduction, the relationships between sex, sexuality, and imperialism, the sexual construction of social and cultural differences in different nations, changing portrayals of sex and sexuality by the state and by the media, social and legal activism with regard to issues of sex and sexuality, and the value of using sex and sexuality as a historical framework for issues in social, cultural, and political history.

HIST 0709 - HISTORY OF GLOBAL HEALTH

Minimum Credits: 3

Maximum Credits: 3

This course explores the history of global public health from 1850-present. It focuses on the social, political, economic, environmental, and cultural factors that have influenced the development of global health generally and also shaped specific interventions and policies. What are the political and economic roots of health disparities? Why do interventions succeed or fail and what are their long-term consequences? What can we learn from studying the continuities and disparities between modern global health policies and past programs? Historical analysis of theory and practice provides crucial perspective on the field.

HIST 0712 - A GLOBAL HISTORY OF TERRORISM

Minimum Credits: 3

Maximum Credits: 3

This course will acquaint students with the remarkably long, diverse and widespread use of strategies of terror to advance political, economic, religious and social agendas. Our analysis will focus upon terror from below that is terror by non-state actors; will range from ancient Greece to the present; and will touch upon every inhabited continent. Using examples from many societies, we will discover that the human motivations for terrorist acts have changed little, but that their expression has changed a great deal, from the days of the Spartacus slave revolt, to the calculated terror of the Algerian revolution, to the media-centered "madmen strategy" of Al-Qaeda and Isis. Our organization will be roughly chronological, and will be combined with a typology of different kinds of terrorism. This inherently comparative approach will enable us to make this a true world history course, moving with ease from place to place, movement to movement, while still having a solid temporal and analytical framework to keep the material coherent.

HIST 0713 - A GLOBAL HISTORY OF ANARCHISM

Minimum Credits: 3

Maximum Credits: 3

This course will explore the discourse and history of Anarchism, from its contested origins through the present. It will introduce students to a wide variety of anarchisms in a wide variety of contexts. It will follow the travels and networks of people who were anarchists and who sought to spread anarchist ideas through teaching, activism and, sometimes, violence. It will pay special attention to the world-wide influences and connections of various anarchists and anarchist groups, and it will ask students to think about hierarchies of power, like political and economic systems, not only through the eyes of the anarchists, but also from the perspectives of their opponents.

Course Requirements: MIN CUM GPA: 3.25

HIST 0714 - GUNS AND VIOLENCE IN GLOBAL HISTORY

Minimum Credits: 3

Maximum Credits: 3

Today, the presence of guns and gun violence is a global phenomenon that plagues local, national, and regional communities across the world. Over a thousand people die from gun violence every single day while approximately three thousand people get injured from gunshots. According to a United Nations Report, if the death, injury, and disability resulting from guns were categorized as a disease it would qualify as an epidemic. How did we get here? This course explores the historical development of guns and gun violence in a global context from its early beginnings during the Song Dynasty in China to the current phenomenon of global mass shootings. Following a chronological structure, Part I examines how gunpowder and guns were first developed and deployed in medieval warfare in Asia and how, once guns and gun manufacturing spread to Europe, arms technology developed further, fostering an international arms trade inextricably linked to European imperial expansion into Asia, Africa, and the Americas. Part II explores guns and gun violence as features of industrialization, capitalism, state formation, decolonization, and rebellion. Along the way, students will compare gun cultures in different geographical locations and societal responses to the ever-growing presence of guns. The course will end with a discussion of contemporary efforts to stem the tide of gun violence.

Academic Career: Undergraduate

Course Component: Lecture

HIST 0752 - EMPIRES OF THE STEPPE: EURASIA FROM THE MONGOLS TO THE SOVIET UNION

Minimum Credits: 3

Maximum Credits: 3

Over the last several centuries, EurAsia's domination by successive nomadic steppe empires (stretching from Europe to China) was displaced by new imperial challengers from the periphery (notably Russia, China, and Britain). This course examines the nature of that transition by charting the history of EurAsian empires from the Mongols (thirteenth century) to the present day. From Genghis Khan to Tamerlane to Stalin; between Russian spies, Chinese armies, and the Taliban; spanning silk roads, great games, and more. The empires of the steppe were truly vast in scale, integrating territories usually studied in isolation from one another, and so this course provides important context for separate courses on Russian, eastern European, Chinese, and middle eastern history. The chronological scope of this course is similarly epic, spanning over seven centuries, and thus placing in relief recurring themes related to empires in world history. The thematic emphasis is on geopolitical strategies for imperial rule, but the course will also examine culture, religion, and political economy.

HIST 0753 - RISE OF ISLAM: 500-1200 CE

Minimum Credits: 3

Maximum Credits: 3

This course seeks to impart an understanding of the Islamic tradition by exploring the religion's formative period. It integrates two intertwined themes: (1) early Islamic empires as geopolitical formations; and (2) the development of ideas, from ritual to philosophy to law. The first centuries of Islam are fascinating for many of the same reasons they are complex and even controversial: Surviving primary sources are fragmented, partisan, and often retrospective; a tremendous range of voices competed to define the new religion; and nearly all subsequent Muslim thinkers would harken back to this period to legitimize their own positions. The central goal is to develop an understanding of the diversity of voices in this early period and consider why certain conceptualizations of religion displaced others; and then follow those voices beyond the Arabian Peninsula to examine manifestations in the North African and Central Asian borderlands.

HIST 0755 - RELIGION IN ASIA

Minimum Credits: 3

Maximum Credits: 3

This course serves as an introduction to the major religious traditions of South and East Asia. During the course of the semester, we encounter Hinduism and Jainism; the native Confucian, Daoist (Taoist), and popular traditions of China; and the Shinto, folk and new religions of Japan. Buddhism, which originated in India but later spread to East Asia, is examined in its relation to the history of both Chinese and Japanese religions. We approach these traditions through lectures and discussion based on Chinese classical and popular literature, secondary scholarship, and films, which

inform us about cultural and historical context, beliefs, practices, and personal experience. In the process we expect to learn something about the ways in which non-Western religious traditions see themselves and their world on their own terms, and to see how/if they can complement our own worldviews.

HIST 0756 - INTRODUCTION TO ISLAMIC CIVILIZATION

Minimum Credits: 3

Maximum Credits: 3

This course aims to introduce students to Islamic and Middle Eastern History from the time of the Prophet (ca. 600 C.E.) to the Iranian Revolution in 1979. We will proceed chronologically, focusing mainly on political events. However, a special emphasis will be given to the formation of the Islamic tradition, its evolution across different regions and cultures in time, and its interaction with other traditions. In the modern era, we will particularly explore the Islamic societies' political, cultural, and military encounter with the rising power of the West in the Middle East. In addition to the several historical processes and developments such as modernization, nation-building, Islamic fundamentalism and globalization, which have shaped the history of the Middle East in the last two centuries, our class discussions will also touch on the main theoretical perspectives that have stamped the studies of Islam and the Middle East. Here, concepts such as orientalism, defensive development, and modernity will constitute our main focus.

HIST 0760 - INTRODUCTION TO PUBLIC HISTORY

Minimum Credits: 3

Maximum Credits: 3

The course will introduce students to the theory, methodology, and practice of Public History. Public History is the employment of professional historical methods by public and private agencies to engage communities in shaping the presentation of the past into usable histories. Through the course, students will be able to analyze how Public historians and the Public collaborate to explain individual and collective human behavior through a variety of methods, mediums, and contexts. Moreover, students will learn how Public Historians and the Public create and express historical meaning for their local, state, national, and global communities.

HIST 0791 - HEALTH CONTROVERSIES IN HISTORY: ETHICS, PUBLICS, INTERVENTIONS

Minimum Credits: 3

Maximum Credits: 3

Controversies related to human health have dominated the news in recent years, whether the Ebola epidemic in West Africa, Zika virus in Latin America, or measles outbreaks in California, but a sense of context and causation is often lacking in the public discourse. This introductory course explores the historical roots of selected, current controversies in public health and medicine through the examination of specific case studies from a diverse geographical and chronological range. We will identify and explore the broad historical antecedents of current issues and offers points of comparison from times and places distant from our own.

HIST 1017 - GLOBALIZATION AND HISTORY

Minimum Credits: 3

Maximum Credits: 3

Growing global connections affect all of us. This course explores events and social forces in history that operate at global perspective by examining selected events that occurred simultaneously in many parts of the world such as student protests of the late 1960s, economic downturns and social crises of the mid-1970s, and the effects of the end of the Cold War. Students will be 'assigned' different countries and learn how that society interacted with others internationally. The class includes lectures but will have an emphasis on discussion sections and small group projects.

HIST 1018 - GLOBAL INEQUALITY: HISTORIES AND DEBATES

Minimum Credits: 3

Maximum Credits: 3

Why are some places so rich and others so poor? Do climate-based, geographic, or other natural factors account for the deep disparities between world regions? Or do these reflect human choices and hierarchies of power, within countries or between them? In this course we debate the causes of global inequality and ask what can be done about it. Are international efforts to shape economic growth in the world's poorest countries triumphing over poverty or making the problem much worse? Is 'international development' a success story, a failure, or a fraud?

Academic Career: Undergraduate

HIST 1019 - CITIES IN HISTORICAL PERSPECTIVE

Minimum Credits: 3

Maximum Credits: 3

This course examines the early history of cities, from urban settlements in the ancient world up to the Early Modern period. It will include investigations of imperial capitals, mercantile hubs, and religious centers, including Damascus, Rome, Aksum, Constantinople, Baghdad, Samarkand, Novgorod, Córdoba, Paris, and Venice. We will also consider the elements of urban settlements, the networks that linked them, patterns of urban life, and civic identity.

HIST 1024 - HISTORY POP-UP COURSE

Minimum Credits: 1

Maximum Credits: 1

This one credit course focuses on the rich history, culture and civilization of Austria. Throughout the course of her history, Austria has ruled over an empire in Europe that lasted for centuries, leaving lasting influences in the realms of science, fashion, music, theater, food, healthcare, medicine and much more, not only in Europe, but throughout the world. This course explores the culture of this great civilization to help understand her rise to power, downfall and ability to remain relevant today as a member of the European Union. We will do this using an interdisciplinary approach which will include reading and analysis of key historical texts within the context of major events that shaped her growth. Students will develop an understanding of the Austrian world view through readings of literary and scientific texts written between the Age of Enlightenment and World War I. These texts will answer questions such as: A. How did Austria view herself in relation to the other nations which she ruled and what was her response to nations that might have rejected her influence. B. How did Austrians view the body as it relates to medicine and how did this view in turn help shape the modern healthcare system, which may include non conventional therapeutic approaches. We will also engage with hands on activities that include cooking Austrian cuisine, working with marionettes (we will discuss the Marionette Theater in Salzburg, Mozart's and Haydn's contribution to the marionette theater) and looking at traditional Austrian fashion. This course will be great for students thinking about participating in the Comparative Healthcare in Graz study abroad program.

HIST 1026 - STATES AND SEX IN THE AMERICAS

Minimum Credits: 3

Maximum Credits: 3

This course will trace the evolution of official interest in popular reproductive practice in the United States, Latin America, and the Caribbean from 1800 to 2000. How and why have states sought to regulate sex and its consequences? How have regulations treated people differently on the basis of race, class, marital status, and sexual orientation? And what rights and protections have women and men sought to demand from states? When have they been successful? This course analyzes the Americas-wide history through which the personal became political.

HIST 1031 - A HISTORY OF CURRENT EVENTS

Minimum Credits: 3

Maximum Credits: 3

This course is designed to open students' eyes to the often misunderstood fact that we do not study history for history's sake, but to better understand the present. The course will be offered with varying themes, each time zooming in on one important present-day issue. Students will have the opportunity to explore topics that have been making the national and international headlines by engaging with the oftentimes complex historical developments that led to the current situation. They will leave the course with a better understanding of both the past and the present.

HIST 1040 - THE GREAT WAR: A CULTURAL HISTORY

Minimum Credits: 3

Maximum Credits: 3

The Great War shaped 20th century Europe and the world. So, in section 1 of this class, you will engage with the how and why the war began and the lively debate taking place in Europe today over the origins of the war. In section 2 you will analyze the war itself and the West's 'descent into barbarism.' In section 3 you will analyze the impact of the war on the arts, revolution and women's roles in society. Finally, in section 4, you will analyze how Europeans dealt with memory and mourning after the war as well as how they 'constructed memory' of the war.

HIST 1044 - TWO CENTURIES OF DEMOCRATIZATION

Minimum Credits: 3

Maximum Credits: 3

Democratization has advanced in modern history in several great multicontinental bursts from the late eighteenth century to the present. This course will explore why certain historical eras are such moments of democratization and how the very conception of democracy has developed.

HIST 1046 - NATIONALISM

Minimum Credits: 3

Maximum Credits: 3

Theories of nationalism, ethnicity, and race are examined and are contrasted with theories of modernization and socialism. Particular emphasis is placed on ethnonationalism in developed Western countries, such as Britain, France, Spain, Belgium, and Canada, and on ethnic politics in the U.S. Comparisons are drawn with nationalism in other types of political systems, particularly the USSR, Yugoslavia, and selected Middle East and African countries.

HIST 1047 - COMMUNISM: FROM MARXIST THOUGHT TO "REALLY EXISTING SOCIALISM"

Minimum Credits: 3

Maximum Credits: 3

This course introduces the history of communism from Marxist thought in the 1840s to the collapse of the Soviet-style socialist regimes in eastern Europe in the 1990s. It will cover the major turning points in the history of communism: the revolutions of 1848; the split of Europe's socialist movement in a revolutionary and an evolutionary wing; the Russian Revolution of 1917 and the establishment of the Soviet Union; the shift from Leninism to Stalinism in the 1920s; the implementation of Soviet-style regimes throughout eastern Europe after the Second World War; their economic accomplishments in the 1950s and 1960s; their eventual failure to meet the economic expectations of their citizens, which fueled the protest movements in some socialist countries, before the political developments in communist Poland in the 1980s caused a chain reaction that led to a collapse of the communist regimes throughout eastern Europe between 1989 and 1991; and significant economic changes in China.

HIST 1048 - THE HOLOCAUST IN CONTEXT

Minimum Credits: 3

Maximum Credits: 3

"Ethnic cleansing" and "genocide" are neither twentieth-century phenomena, nor is their occurrence linked to any particular region in the world. However, during the two world wars and their aftermath acts the civilian population of Central and Eastern Europe experienced a degree of mass violence that not only changed to face of the region but also led to the establishment of the very term "genocide". The Holocaust stands out as the most comprehensive, most radically executed case of genocide in modern times. Yet it was embedded in a wider context of systematic violence against various populations in Central and Eastern Europe. Rather than beginning with a general, abstract reflection on the reasons for the various forms of mass violence from ethnic cleansing to genocide, this course allows students to explore the specific social, cultural, and political conditions under which the sometimes entangled cases of mass violence against civilians occurred in twentieth-century Central and Eastern Europe. The course concludes with a general reflection and discussion of the concept of "genocide", the limits of its analytical usefulness, and the political baggage it carries.

HIST 1049 - AFTER HITLER: RETRIBUTION, RECONSTRUCTION, AND RECONCILIATION: POSTWAR EUROPE

Minimum Credits: 3

Maximum Credits: 3

Europe experienced unprecedented levels of destruction and violence during the Second World War. The experience of ethnic cleansing and mass murder, with the Holocaust standing out as the most disturbing case of mass murder in modern times, were so traumatic that many people lost their faith in modern civilization as such. Against this backdrop,

would have predicted that Europe would not only recover but also reach an unprecedented level of political stability, prosperity, and civility after the Second World War. This course examines the striking transformation of postwar Europe by exploring the strategies European societies - with significant involvement of the United States - pursued to overcome the traumas of war and rebuild a shattered continent. Course topics include the legal persecution of war crimes, the building of societies and political orders that are based on the respect of human rights and the rule of law, the reconstruction of Europe's bombed cities, and the attempts to overcome nationalism and xeno-phobia through various forms of European integration.

HIST 1050 - INTELLECTUALS AND POLITICS IN 20THC EUROPE

Minimum Credits: 3

Maximum Credits: 3

Intellectuals have been involved with politics whether they have wished or not throughout this turbulent century. In this seminar we will grapple with different social theories about modern intellectuals, their political and ethnical responsibility, and their production. We will also consider ways of doing intellectual history and practice doing intellectual history in written assignments. We will also do case studies, examining the role of intellectuals in several settings during periods of political crises and conflict such as revolution, Nazism, communism, the Cold War.

HIST 1051 - CATHOLICISM IN THE NEW WORLD

Minimum Credits: 3

Maximum Credits: 3

The course will examine the history of the Roman Catholic church since 1492 in the Americas using various moments of internal crisis or external conflict as focal points for study. Topics will include: missionary and military contact with New World indigenous populations after 1492; the minority situation of Catholics in the new United States; the Irish famine and its global consequences; conflicts between Catholic ethnic groups; the impact of Catholic support for fascist regimes in the 1930s and 1940s; counter cultural forms of Catholicism (conscientious objectors, civil rights activists, pacifists); Vatican ii and its impact; liberation theology, Marxism and structural reform in Latin America; shifting theological positions on social and moral issues; the current sexual abuse crisis; the pope Francis effect. While the emphasis will rest upon the social, economic, and political dimensions of Catholic history, the course will also address the aesthetic and cultural legacy of Catholicism including sacred architecture, music, and the arts, in elite and popular forms.

HIST 1055 - HISTORY OF DANCE

Minimum Credits: 3

Maximum Credits: 3

Does dancing have a history? This course investigates the most popular and controversial dances from the 16th-20th centuries, from the Volta to the Waltz to the Tango to the Grind. We will explore how a dance's initial reception and subsequent development reveal assumptions about class, race, gender, youth culture, sexuality, and the body. The course will focus on social dancing in Europe and North America, but we will also discuss parallel developments in theatrical dance and the significant influence of African dance traditions on Western dance. Assignments will include video clips as well as readings.

HIST 1058 - GLOBAL HISTORY OF DANCE

Minimum Credits: 3

Maximum Credits: 3

We find dancing in every world culture and throughout history, but the dances of each place and time are specific, distinctive, and ever changing. Thus, dance is both an excellent and a problematic subject for cultural and historical comparisons. This course investigates the types, uses, and understandings of dance across the globe and examines shifting attitudes and practices from the renaissance to today. Themes addressed will include dance as a spiritual practice, a tool of the state, and an expression of personal identity. Participatory workshops and video viewing assignments will supplement lectures and readings.

HIST 1062 - HUMAN RIGHTS IN WORLD HISTORY

Minimum Credits: 3

Maximum Credits: 3

Human rights in world history, will provide a historical overview of the human rights movement, focusing on the 18th-20th centuries. The course will lay out the parameters of the struggle to define and implement human rights in the Western and non-Western world, and engage with the different resulting viewpoints. The course will explore

controversial aspects of the implementation of human rights internationally, including calls for the respect of cultural differences. Finally, the course will examine case studies of the racial/ethnic/caste dimension of the human rights struggle, looking at the US, Brazil, Israel, and India as countries with quite different cultural traditions, political makeups, and demographic compositions. The course will enroll 40 students, and will meet once per week in the evening.

HIST 1080 - EMPIRES AND THE ENVIRONMENT IN WORLD HISTORY

Minimum Credits: 3

Maximum Credits: 3

This upper level seminar examines how global commodity trades in natural resources have shaped the world. We will consider how the pursuit of natural wealth has led people to alter the world around them, and what the consequences of those alterations have been for natural and human communities. We will consider places and practices as wide-ranging as silver production in colonial south America, sugar in the 18th Century Caribbean, opium in 19th Century China, and petroleum in the modern-day Middle East. We will examine global themes such as imperialism, colonialism, capitalism, and the spread of epidemic diseases.

HIST 1082 - WOMEN, GENDER AND SPORT

Minimum Credits: 3

Maximum Credits: 3

Serena Williams, Megan Rapinoe, Brittney Griner, Gabrielle Reese, and Aly Raisman each hold a unique place in American culture and elicit a different set of responses. This course seeks to unpack the history of female athleticism and understand the forces that surround access and participation. Societal changes have expanded female opportunities, but have those been experienced by all sectors? What barriers did and do women face? This course will analyze the relationship between gender and sport from multiple perspectives, focusing on economic, cultural, political, social, legal and educational influences. We will consider the evolving roles for women in sport, noting that beliefs regarding

female bodies, gender equity, gender identity, health, and women's role in society have shaped the narrative. Topics will include the history of female athletes, structural constraints, race and ethnicity, class, sexuality and homophobia, the role of the media, and finally, the impact of Title IX.

HIST 1091 - GLOBAL HEALTH HISTORY: HISTORICAL PERSPECTIVE

Minimum Credits: 3

Maximum Credits: 3

This course explores the history of global public health from 1850-present. It focuses on the social, political, economic, environmental, and cultural factors that have influenced the development of global health generally and also shaped specific interventions and policies. What are the political and economic roots of health disparities? Why do interventions succeed or fail and what are their long-term consequences? What can we learn from studying the continuities and disparities between modern global health policies and past programs? Historical analysis of theory and practice provides crucial perspective on the field.

HIST 1115 - THE WEST AND THE WORLD

Minimum Credits: 3

Maximum Credits: 3

From the time of Columbus to that of William Pitt, Europe developed its knowledge and power in a way that enabled it progressively to dominate the world. Around the globe, Europeans reshaped, or destroyed, or failed to affect, the peoples whom they "discovered". This course attempts to explain Europe's rise to dominance, by comparing the West to the societies of Islamand of East Asia. It also explores the various kinds of cultural contact between Europeans, and Africans, Asians, and Amer-Indians, from the 15th to the 18th century.

HIST 1116 - INTRODUCTION TO THE RENAISSANCE

Minimum Credits: 3

Maximum Credits: 3

The idea of the Renaissance is central to Western culture. Many of our values and tastes devolve from--or consciously react against--patterns that were established or reinterpreted five hundred years ago. The student who explores the renaissance, therefore, gains hold of one of the keys of Western civilization. He or she also acquires practice in critical reading, discussion, and the written expression of ideas.

HIST 1121 - TUDOR ENGLAND

Minimum Credits: 3

Maximum Credits: 3

The Tudor period - the age of Henry VIII and Elizabeth I is generally looked upon as a Golden Age of English culture. It was also a period of considerable social and political change when, under the impact of the Renaissance and reformation, as well as an economic revolution, the traditional medieval world gave way to one which was

recognizably modern. Shakespeare's Hamlet, Bacon's advancement of learning all emerge from this culture. This was also the century during which London came to control the destinies of Wales, Scotland and Ireland.

HIST 1134 - IRELAND'S LOYAL REBELS: THE PROTESTANTS OF ULSTER

Minimum Credits: 3

Maximum Credits: 3

This course will examine both Irish and Northern Irish history by focusing on the contested and contrary role of Protestants in Ireland and Northern Ireland in their relationship to the Crown. The course will analyze the roots of Protestant rebellions in Ireland and how they related to the concept of "conditional loyalty", i.e. that some stayed loyal to the Crown, as long as they believed the Crown would meet their expectations. Using case studies of the English Civil War, the Glorious Revolution, the 1798 United Irishmen Rebellion, and a variety of others, students will scrutinize the

concept of loyalty in depth. Doing so provides a very different view of Irish history than the one of popular memory, film, music and literature. Students will study the development of Irish Protestantism and its unique nature within the context of the historical periods as well as the consequences for Irish and Northern Irish history today.

HIST 1135 - BERLIN: HISTORY OF A EUROPEAN METROPOLIS

Minimum Credits: 3

Maximum Credits: 3

Berlin is not just the capital of Germany. It is a city that is shaped more than any other place in Germany by this nation's dramatic past during the 19th and 20th century. All the ups and downs of Germany's modern history have left their traces especially in Berlin. This course looks at the German past from the 19th century to the present by using Berlin as an exemplary place. Besides giving an overview of the history of Germany in general and Berlin in particular, this course investigates to what degree the history of a place can be read through its visual appearance.

HIST 1141 - SPAIN AND PORTUGAL IN THE 20TH CENTURY

Minimum Credits: 3

Maximum Credits: 3

In 1898 Spain lost its empire during the Spanish-American War. Portugal, instead, preserved its empire for most of the 20th century. This divergence resulted in different developments such as a Civil War in Spain (1936-1939) and a political revolution in Portugal (1974). However, both countries also shared similar experiences: long-lasting authoritarian regimes, democratic transitions, and incorporation into the European community. The course tackles the singularities, commonalities, and connections, and places them in global context.

HIST 1144 - THE PORTUGUESE EMPIRE AND EARLY MODERN GLOBALIZATION

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to the study of the Portuguese overseas empire in the early modern period by adopting a non-conventional perspective. In addition to offering a chronological and geographical framework of Portuguese expansion, the course will focus on the political, social and cultural interactions that emerged from the permanent contact of Europeans with non-European societies in Africa, Asia and the Americas. The course considers Portuguese overseas expansion within the broader context of the early modern world and investigates notions of globalization.

HIST 1145 - INTELLECTUAL FOUNDATIONS OF CAPITALISM

Minimum Credits: 3

Maximum Credits: 3

This course explores the salient features of European economic development from the black plague of the Middle Ages to the Great Depression of the 1930's. The emphasis will be to understand how social, demographic, and economic processes interacted and ultimately culminated in one of the most momentous events in the history of mankind, the Industrial Revolution. We shall venture an explanation for why Europe was the first continent and England the first country to industrialize. The social changes in the aftermath of the Revolution will also be covered.

HIST 1157 - HISTORY OF MAPS AND SPATIAL REPRESENTATION

Minimum Credits: 3

Maximum Credits: 3

It has been famously observed that "the map is not the territory." Any useful map must omit a great deal of information about the territory it represents, and must generalize information about the real world into a small number of highly schematized categories. All maps are based on particular technological affordances, executed within a certain cultural, political and historical context. Humans think visually about space, and almost every society, past and present, has developed some form of map making. However, the appearance of maps, the information that they include, and the purposes to which they have been put have all varied dramatically. Moreover, people often reject maps altogether in favor of travel guides, gazetteers and itineraries. Once written on paper, these now take the form of apps in our cars and on our phones. In spite of their diversity, all spatial representations encode some imagination about the world. All of them reinforce it on behalf of some group of people, and frequently at the expense of some others. This course explores how people have depicted the world, and with what consequences, from the stone carvings of the Neolithic era to the global positioning systems of today. In this course, students will create paper and digital maps, write papers, make presentations and engage in discussion in order to: 1) Reveal that representation of the world and its constituent places

is historically and culturally specific. 2) Demonstrate how every mode of spatial representation reinforces particular social interests. 3) Detail how particular maps and changes in cartographic techniques have changed history. 4) Describe transformations in cartography and the way that they result from new technologies, politics, and ideologies.

HIST 1164 - SMALL COUNTRIES AND THE EUROPEAN UNION

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the modern history of three representative small countries of the European Union--Denmark, Latvia and Greece'and upon their relationships with larger countries of the EU, and with the European Union as a whole. We will look at the long process, beginning in the 19th century, which brought each country to its present state, and at each one's current condition and problems as a member of the EU. We will use this knowledge to generalize the experience of all the 21 small countries of the EU, and to critique current models of governance and power in the European Union.

HIST 1197 - BLACK DEATH: PLAGUE AND HISTORY

Minimum Credits: 3

Maximum Credits: 3

The Black Death, the great epidemic of 1347-1350's was the most profound epidemiological-ecological crisis Europe had ever experienced. Between 30 and 70% of the population of the western world vanished. In the wake of this demographic disaster economic, psychological, social, literary and even artistic processes were profoundly altered. This epidemic can be traced through extensive primary sources ranging from literature to art history - from population statistics through village desertions. This course will introduce these data and examine the consequences of the Black Death.

Academic Career: Undergraduate

HIST 1225 - BALKAN HISTORY FROM THE OTTOMANS TO THE YUGOSLAV COLLAPSE

Minimum Credits: 3

Maximum Credits: 3

This course examines the history of the Balkan peninsula (Greece, Bulgaria, Romania, Albania, and the countries of the former Yugoslavia) and its peoples from the Ottoman Empire through to the collapse of Yugoslavia in the 1990s. It places particular stress on the dynamic experience of daily life against a background of regularly shifting political ideologies through the prisms of class, gender, and health. Additionally, it analyzes the conceptualization of what is meant by the term 'Balkans' as discussed by historians, philosophers, journalists, and writers.

HIST 1226 - EASTERN EUROPEAN COMMUNISM AT THE MOVIES

Minimum Credits: 3

Maximum Credits: 3

After the 1917 revolution in Russia, Lenin famously said: "to us film is the most important of all the arts." Communists were to use cinema for propaganda purposes, in order to carry out massive state-wide campaigns aiming to bring radical social change. However, Soviet avant-garde filmmakers were also concerned with revolutionizing filmmaking itself. Some three decades after Lenin's remarks, the leaders of the countries of Eastern Europe which had become "Soviet satellites" after World War II, attempted to use censorship and control over the arts and cinema to produce effective propaganda for their own political campaigns. Writers, artists, and filmmakers were coveted allies of these new communist regimes that came to power in the 1940s. Again, however, filmmakers and actors did not always toe the Party line. Some were able to use film to craft complex works with subtle messages portraying aspects of daily life as it was experienced by ordinary people under the new regimes. Films that we will watch and analyze, released in Hungary, Romania, Yugoslavia, Poland, and Czechoslovakia in the decades before the fall of communism in 1989 managed to depict, evoke, and criticize "really existing communism." This course will trace the history of East European communism and of East European film-making from 1944 to 1990, acquainting students with examples from an exceptional body of cinematographic work together with the broad outlines of East European history. Students will learn to "read" films from 20th century Eastern Europe in their cultural, political, and historical context.

HIST 1434 - TEA, MONSTERS, MANGA, AND ANIME: A CULTURAL HISTORY OF JAPAN

Minimum Credits: 3

Maximum Credits: 3

Through a survey of aesthetic practices ranging from the tea ceremony to surrealism, manga, and anime, this seminar introduces students to the ways in which Japanese society changed socially, politically, and culturally from the

sixteenth century to today. Throughout these changes, multiple ideologies from liberalism to fascism, Marxism jostled against each other and multiple social movements from colonialism to nationalism, women's rights, and environmentalism shaped Japanese society. These social transformations were based not only on rational calculation but on attractions towards particular ways of life, attractions which we can study using the concept of aesthetics.

HIST 1435 - TECHNOLOGY IN ASIA

Minimum Credits: 3

Maximum Credits: 3

This course will investigate the uses, promises, and betrayals of technology in the social context of Asian societies. Any history of technology is also a history of society. Today, for example, atomic energy both provides humanity with a source of energy and gives it the power to annihilate itself. Studying the role of nuclear energy and nuclear weapons in Japanese history provides us insights into the promises and tragedies of this modern technology. The same applies to other sources of energy. Scholars have argued that coal encouraged labor unions, while oil destroyed them. What of nuclear energy, or wind, solar, and other renewable forms of energy? What happens, in other words, when these technologies meet particular social contexts? The course will be based on readings, discussion, and an ongoing workshop in which you will work toward the development of a final project. Students will each produce a vlog on a topic of their choosing that relates to the role of technology in society.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

HIST 1437 - THE WORLD OF THE SWORD: EXPLORING THE SAMURAI

Minimum Credits: 3

Maximum Credits: 3

Samurai is a Japanese word that has entered the English language. It emblazons everything from car models to china patterns. The very popularity of the concept of the warrior lifestyle has obscured its meaning. Through directed reading and writing the students will undertake an in-depth examination of the social, political, and economic world in which the samurai lived as a lens to understanding Japanese culture and Western perceptions of it.

HIST 1446 - EAST ASIAN POLITICAL ECONOMY, 1950-PRESENT

Minimum Credits: 3

Maximum Credits: 3

This upper-level course compares the political, economic, and social development of East Asian societies over the past three generations, with a focus on Japan, South Korea, and greater China. It focuses on the political circumstances that have taken each country down the path it has taken, and how these paths now shape the future prospects of each

country as well as of East Asia as a region. The first half of the course will focus on country-specific historical studies, tracing the development path each country has taken in the post-war period. Some common themes repeat themselves in each of the country case studies: the role of the state, the interaction between domestic and international factors, the relationship between bureaucrats and politicians, and the development of various institutions. Other topics and readings highlight national specificities, revealing unique circumstances that differentiate the experiences of one country from another. The second half of the course will focus on common themes and contemporary challenges shared by countries in East Asia including, but not limited to, rapidly aging populations, industrialization and green technology, competition for energy sources and commodities, and food security.

HIST 1447 - ECONOMIC HISTORY OF JAPAN

Minimum Credits: 3

Maximum Credits: 3

This course investigates the industrialization of Japan from 1868 to the present. The course first looks at the early modern precursors to industrialization, 1600-1850. It then turns to the actual process of economic growth in the late nineteenth century, the impact of this process on the outbreak of World War II, and Japan's recovery and rise to economic preeminence after the war.

HIST 1471 - WATER IN CENTRAL EURASIA

Minimum Credits: 3

Maximum Credits: 3

This course will introduce undergraduate students to debates around the very constitution of "Central Eurasia" as a set of topographical markers (the Aral Sea Basin); as a set of five post-Soviet nation-states; as a larger geographic expanse that stretches from southern Russia to northern China); as a distinct site of recurrent environmental challenges (desertification, cotton production, irrigation); and as a cultural field of nomad and settler cultures. Relying on an interdisciplinary selection of key texts, the course lays the groundwork for a later, more in-depth examination of two core assertions for the region: 1) water is power; and 2) water management determines, for better or worse, human mobility, epidemics, geopolitical rivalries and peaceful exchange, whether commercial, cultural, or technological.

HIST 1475 - EAST ASIAN BUDDHISM

Minimum Credits: 3

Maximum Credits: 3

The transmission of Buddhism to East Asia was a momentous development in the history of world cultures and religions. Not only did it precipitate major changes in the cultures of China, Korea and Japan, it also was attended by transformations within Buddhism itself. Beginning with an introduction to the basic concepts of Buddhism, this course examines the major doctrinal, meditative, devotional, and institutional traditions and themes within Chinese and Japanese Buddhism in historical perspective. Particular attention is paid to the problems of transmission of thought and practices from one culture to another and to the ways in which Buddhism changed to meet those challenges and make itself relevant to the members of East Asian societies. We strive to develop an awareness of how Chinese and Japanese Buddhism interacted with and helped to shape East Asian history as well as to cultivate sensitivity to and appreciation of East Asian Buddhism as a contribution to our understanding of the human experience

HIST 1476 - RELIGION AND HEALING IN CHINA

Minimum Credits: 3

Maximum Credits: 3

This course examines the major traditions and themes that constitute religion in China. The origins and development of Confucianism, Daoism, Buddhism, popular and family religion, and religion and the state are presented within an overall historical framework. As China becomes more and more central to the world's modern commodity culture, some have predicted a decline in traditional religious values and practices. In fact, the reverse is true: from Taiwan and Hong Kong through mainland China, increasing prosperity is resulting in an increased "investment" in religion. In addition to the study of religious ideas, practices, and institutions in premodern China, the course ends by looking at contemporary beliefs and practices and issues of politics, class, and gender. Our purpose is to gain some exposure to Chinese religious thought and practice, to identify dominant themes underlying Chinese values and behavior, and to explore the syncretic nature of religion in China as each tradition finds expression in and comes to influence other aspects of Chinese religion and culture. In this way, we hope to come to understand the critical role played by the various traditions in the unfolding of Chinese history and in the formation of the Chinese view of the world.

HIST 1477 - RELIGION IN JAPAN

Minimum Credits: 3

Maximum Credits: 3

This course provides an historical overview of religion in Japan from the 3rd century BCE up to the present. It introduces many of the fascinating events, texts, doctrines, institutions, personalities, and practices in the history of

religion in Japan. It also examines issues related to myth, shamanism, ritual, art, and politics. During the course, questions such as the following are addressed: How did religious institutions both condemn and condone violence? What are the different paths to enlightenment in Japanese Buddhism? What made a person "holy"? Why did the government make people step on pictures of Jesus?

HIST 1482 - BUDDHISM ALONG THE SILK ROAD

Minimum Credits: 3

Maximum Credits: 3

This class serves as an introduction to Buddhism from its origins through the seventh century CE as it moved along the Silk Road, the ancient EurAsian trading network that is considered one of the earliest and most important super highways of trade and culture. Concomitantly, it serves as an introduction to the silk road as the scenario for contact and exchange. The emphasis is on religious praxis, the actors and places that transformed Buddhism and were transformed by it. We will examine archaeological remains and art and discuss how they complement or sometimes contradict textually-based historical narratives. Through the examination of four case studies we will discuss questions related to religious interaction as embodied in material culture and analyze it in context.

HIST 1484 - DEATH AND BEYOND IN BUDDHIST CULTURES

Minimum Credits: 3

Maximum Credits: 3

Death and beyond in Buddhist cultures mortality is the human condition. This seminar focuses on the philosophical discourse, beliefs and practices relating to death, dying and the afterlife in Buddhist cultures, both traditionally and in modern times. We explore Buddhist cosmology, karmic causality, death tales, postmortem journeys, ancestor rites, mortuary practices and ghost placation. Through primary texts in translation, secondary scholarship, discussion and film, we see how dealing with death tells us as much about life as it does about what lies beyond.

HIST 1510 - VIOLENCE & HUMAN RIGHTS IN LATIN AMERICA

Minimum Credits: 3

Maximum Credits: 3

This course provides a critical perspective on human rights struggles in Modern Latin America. Our primary focus is the 1960s, 1970s, and 1980s, when Latin America suffered the rule of extraordinarily violent military dictatorships that waged a 'dirty war' against the civilian population. The course considers the origins of these authoritarian governments, their forms of rule, and use of violence. It also explores resistance to the massive violation of human rights; the eventual downfall of the dictatorships; and the types of justice, truth-telling, and commemoration that characterized the turn to democratic forms of governance.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

HIST 1511 - VIOLENCE & MEMORY IN LATIN AMERICA

Minimum Credits: 3

Maximum Credits: 3

How do societies that have endured state terror deal with the memory of that collective trauma? In multiple cases, 20th c. Latin American governments used violence against civilians to silence opposition and defend entrenched privilege. What factors make state terror possible? How do people make sense of 'unspeakable' events? Students will focus on case studies from Central America, the Caribbean, and South America. Analyzing materials including novels, films, family stories, documentaries, and museums, we will explore the making of historical memory, and assess its political consequences.

HIST 1522 - BRAZIL

Minimum Credits: 3

Maximum Credits: 3

The course begins with an overview of Brazilian culture and of the country's enormous resource base. Cultural change is traced through the pre-Columbian, colonial, imperial, and republican periods. A major theme throughout is the evolution of a Portuguese heritage into today's distinctive Brazilian national culture. The country is then divided into five regions as a means of understanding its internal diversity. Popular American ideas about subjects like carnival, the Amazon Rainforest, coffee, Copacabana Beach, and the huge foreign debt are also dealt with.

HIST 1628 - THE BLACK WEST

Minimum Credits: 3

Maximum Credits: 3

This is not your traditional American West: The cowboys are Black, the Native Americans are educated strategists, the white settlers marry into Native families, and people of Chinese and Mexican descent navigate varied economies and cultures. This course charts the nineteenth century U.S. governmental policies that created "the West," and shows how the broad region was shaped and settled by a diverse group of people. Though we will examine a multicultural group of colonists and Indigenous peoples, our focus is on people of African descent. Looking at the West as a space of the African Diaspora provides an opportunity to center African Americans, as well as other non-white groups as architects of our modern-day culture and society.

HIST 1630 - U.S. SOCIAL MOVEMENTS HISTORY

Minimum Credits: 3

Maximum Credits: 3

This course provides an introduction to the history of major American social movements from the American Revolution to the present. It explores the impact of various historical actors-industrialists and workers, men and women, political leaders and political dissidents, capitalists and socialists, civil rights leaders and their opponents-whose actions, interactions, and struggles shaped our collective national past. We will cover a broad range of themes, confront and ask difficult questions, and attempt to make sense of how social movements across time and across the political spectrum during this period helped to make the U.S. what it is today.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

HIST 1632 - THE HISTORY OF THE CIVIL RIGHTS MOVEMENT

Minimum Credits: 3

Maximum Credits: 3

One of the most celebrated periods of U.S. history, the Civil Rights Movement has been the subject of countless books, memoirs, and films. These narratives, however, have privileged certain individuals and interpretations over others. This course challenges some of the myths, misrepresentations, and omissions in mainstream representations of the movement. While we will examine the significant contributions of key figures such as Martin Luther King, Jr., Rosa Parks, and Malcolm X, the course will also uncover many of the lesser-known individuals who confronted racial discrimination and fought to secure civil and human rights for black people in the United States. Beginning in the 1940s and moving through the 1970s, the course explores several key areas of inquiry including the role of religion, gender, class and sexuality in shaping the movement; the significance of international historical developments; the growth of freedom struggles in the urban North; and the use of armed resistance in the movement.

Academic Career: Undergraduate

HIST 1640 - AMERICA CHILDHOODS: RACE, GENDER, AND CITIZENSHIP, 1865-PRESENT

Minimum Credits: 3

Maximum Credits: 3

In this course, we will consider the diverse experiences of children and youth in the United States from the mid-nineteenth century to the present day. We will examine how race, class, gender, sexuality, and citizenship informed children's agency and experience, and were in turn influenced by the imposition of ideals of childhood through government policies, medical standards, and educational norms. Special consideration will be given to youth movements, and the role of children and youth in the civil rights movement and other forms of political and social activism. With a few exceptions, the course will offer a consideration of a topic in each decade since the 1860s.

HIST 1653 - COLD WAR AMERICA IN THE WORLD

Minimum Credits: 3

Maximum Credits: 3

This course explores the impact of the Cold War on the American home front during its years of peak influence, 1945-1965. We will investigate the postwar division of the world into two opposing camps, and then take up topics such as McCarthyism, American reactions to the atomic bomb, the culture of consumption, suburbanization, and youth culture. We will ask how the Cold War climate fostered (or hindered) social movements for racial equality, participatory democracy, and women's rights. At its close, the course asks which hallmarks of the early Cold War - from lonely crowds to paranoid politics - persist today.

HIST 1665 - HISTORY OF THE AMERICAN CITY

Minimum Credits: 3

Maximum Credits: 3

This course examines the development of the American city from its colonial origins to its postindustrial expression after the mid-20th century. The growth of an urban system across the nation is briefly addressed. Most attention is focused on the evolution of the city's economy, geography, social organization, and governance under the forces of rural in-migration, foreign immigration, industrialization, and changing technologies of transportation, communication, and energy.

HIST 1670 - AUGUST WILSON: THE MAN, THE ERA, THE PLAYS

Minimum Credits: 3

Maximum Credits: 3

August Wilson is recognized as one of America's leading playwrights. His plays form part of America's literary canon. Wilson wanted his cycle of ten plays - each set in Pittsburgh in a different decade of the twentieth century - to provide a chronicle of the black urban experience. At the same time, the protagonists of Wilson's plays, as he himself once said, "all come out of me, they are - probably - the different aspects of my personality." This course will enable students to grapple with two questions coming out of this: (1) to what extent Wilson's plays re-create the twentieth-century urban black experience; and (2) the extent to which, rather, the plays reflect Wilson's own identity and persona.

HIST 1672 - RELIGION AND SEXUALITY

Minimum Credits: 3

Maximum Credits: 3

Though American political ideologies have often tried to situate both sexuality and religion as private matters that have no bearing on public life, the topics we discuss in this course reveal that quite the opposite is true. This course will trace how religion and sexuality have played an intertwined and formative role in the development of the political and social history of the United States. We will take a chronological approach to our subjects, locating the intersections between religion and sexuality throughout the course of American history, from Puritan attempts to control women's sexuality to contemporary debates over reproductive rights and same-sex intimacy.

HIST 1673 - ISLAM AND RACE IN THE AMERICAN UMMAH

Minimum Credits: 3

Maximum Credits: 3

This course examines the relationship between Islam and racial identities in the United States. The course is divided into three units. For the first third we conduct a historical overview of the history of Muslims in the United States, beginning with enslaved Muslims. We then focus on histories of migration, both in terms of immigration to the United States, and migration within the United States, including the Great Migration. In the second third of the course, we examine case studies of specific Muslim American communities. Muslims are the most racially diverse religious group in the United States today. We examine racism, racial hierarchy, and contested conceptions of race, both external and internal to Muslim American communities. In the last third of the course, we focus on pertinent themes to the stories of Muslims in America, including gender and state surveillance. Each section of the course builds upon the last. The course's focus is on Muslims in the United States, but we also examine representations of Islam and Muslims, both historically and contemporarily, and the ways that specific tropes have been utilized by the state, from Thomas Jefferson's hypothetical Muslim citizen to the War on Terror. In addition to ethnic and racial diversity we examine intra-Muslim theological diversity. A last reoccurring theme throughout the course is the role of laws in the United States in defining racial identity, and the consequences that these laws have had for Muslims. The reading responses, due on Thursday, will help students synthesize the readings and tie them to the main themes of the course. Every Thursday in class we will examine a primary source. These primary sources range from the autobiography of Omar ibn Said, an enslaved Muslim, to excerpts from the Nation of Islam's newspaper Muhammad Speaks, to news articles written during the Iran hostage crisis. No specific prerequisites are required for this course.

HIST 1676 - POPULAR RELIGION IN AMERICA

Minimum Credits: 3

Maximum Credits: 3

Students will examine forms of religion that are called everyday, folk, local, or popular traditions, in contrast to "official" denominational categories that so often dominate the study of religion. With our focus on the western hemisphere, we will learn about new local practices that have emerged since 1492 among African, Caribbean, and

native American peoples and to analyze how they represented responses to colonization, industrial capitalism, or globalization. Examples of popular traditions that we will study include: witchcraft; santeria, voodoo, saint's cults, miracles, pilgrimages, speaking in tongues, faith-healing and snake-handling. The course method is interdisciplinary, drawing upon anthropology, documentary film, history, religious studies, psychology, and sociology.

HIST 1685 - U.S. POPULAR CULTURE

Minimum Credits: 3

Maximum Credits: 3

This course examines the development and social impact of mass-produced and mass-consumed forms of culture in Twentieth Century America.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: DSAS Historical Analysis General Ed. Requirement, SCI Polymathic Contexts: Soc/Behav. GE. Req.

HIST 1686 - WAR AND MILITARY IN UNITED STATES

Minimum Credits: 3

Maximum Credits: 3

A lecture-discussion course on the roles military systems play in international and national affairs, as well as in the social and economic life of the U.S. the effects that wars and military service have on the individual, the family, the economy, and politics are also addressed. This is not a course on battles, tactics, logistics, strategy, and command. It is

concerned with recruitment and social origins of military personnel; training and value inculcation; combat behavior and morale; war crimes and the laws of war; civil military relations; veterans; and inter-service rivalry.

Academic Career: Undergraduate

HIST 1687 - U.S. FOREIGN POLICY IN AFRICA

Minimum Credits: 3

Maximum Credits: 3

This course will focus on the increasing engagement of the United States in Africa from the late 19th century until the present. Using a case study approach, students will analyze American foreign policy in Africa and explore the varied effects of those policies. These case studies will include the political realities of decolonization, the Cold War, and economic aid and the social and cultural ties of black Americans to Africa. The course will identify specific crises in American and African history as focal points for study, but will also provide a larger narrative about American involvement in both the colonial and post-colonial development of Africa.

HIST 1691 - LATINO HISTORY

Minimum Credits: 3

Maximum Credits: 3

This course will analyze the forces shaping population movements between Latin America and the United States and how these have evolved over time. We will explore how Latino immigrants have integrated, resisted, and adapted to the forces impacting their lives in the United States over the last century and a half, creating new ethnic, racial, and regional identities in the process. We uncover the varied experiences of Latinos and Latin American immigrants with racism and discrimination, identity formation, community building, work and labor struggles, and social mobility as we map out the heterogeneous mosaic of Latin American and Caribbean diasporas in the United States.

HIST 1692 - LGBTQ IN THE USA, 1900-PRESENT

Minimum Credits: 3

Maximum Credits: 3

With growing contemporary interest in LGBTQIA issues and student activism surrounding gender identity and sexuality, this course provides necessary historical context for understanding such political and cultural phenomena in 20th-century U.S. history. It charts the trajectory of different identities and sexualities (too often classified as transgressive or deviant) from the beginning of the century through post-World War II efforts to seek greater freedom and inclusion in American society.

HIST 1694 - THE PLASTIC AGE

Minimum Credits: 3

Maximum Credits: 3

The word plastic derives from the Greek word *plassein*, which means "to mold or to shape." This course looks at the history of how, within almost a single generation, new modes of consumption, production, bodily manipulation and credit become such a universal part of everyday life that they frame interactions throughout the entire planet. How can we understand the rise of mass consumption in the postwar era? What kinds of changes need to take place to reconstruct how Americans think of themselves, their wages, their material possessions, and the environment in the time period from the end of the 19th Century to the end of the 20th century? What are the long-term effects of this new mode of operating in the world? How does this consumption reshape our planet and what insight we can learn from the past about how we might make changes that might help us to save it?

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Historical Analysis General Ed. Requirement, SCI Polymathic Contexts: Soc/Behav. GE. Req.

HIST 1695 - ENVIRONMENTAL HISTORY

Minimum Credits: 3

Maximum Credits: 3

Environmental affairs since World War II with an emphasis on policy controversies. Topics include air and water pollution, public lands, wildlife, energy, toxic chemicals, urban environment, facility siting and more. Emphasis on the rise of environmental values in American society, the resulting policies, opposition to them, and the role of science, economic analysis, technology and management in the public debate.

HIST 1706 - DRUGS IN GLOBAL HISTORY

Minimum Credits: 3

Maximum Credits: 3

This course examines the global development of the modern "pharmaceutical era" through historical, anthropological, and sociological analyses. It traces the ever-increasing role played by chemical substances in shaping conceptions of health, treatment, and society itself from the early modern period until the present day. Topics include pharmaceuticals

as an arena for competing and complimentary interests, the social character of drugs (both legal and illegal), the blurred lines between medicinal and recreational use, and the evolvment of government and scientific regulation of medications.

HIST 1707 - GENDER IN GLOBAL HISTORY

Minimum Credits: 3

Maximum Credits: 3

This course examines world history from 1500 through the present from the perspective of gender. It provides an introduction to modern world historical patterns and processes, with a focus on issues of women, gender, and sexuality. The course considers the construction of gender in pre-feminist and post-feminist contexts, and explores how global historical developments have shaped ideologies and politics of gender. The course emphasizes topics including slavery, colonialism, imperialism, industrialization, nationalism, and environmentalism, through the lens of gender.

HIST 1712 - INVENTING ISRAEL: ZIONISM, ANTIZIONISM AND POST ZIONISM,

Minimum Credits: 3

Maximum Credits: 3

In this course, we will study the origins and development of Zionism as a form of modern Jewish nationalism, the emergence of different Zionist ideological streams, and non-Zionist, anti-Zionist, and post-Zionist views of Jews and non-Jews. We will also explore Zionism as a case study of relations of religion and nationalism in modernity. This course is an opportunity to carefully study and to contextualize writings and ideas of religious and political thinkers that have been both influential and controversial. The goal is to offer students historical background to ideas and issues of contemporary importance as well as skills in interpretation and contextualization of complex texts that continue to inform public discourse.

Academic Career: Undergraduate

HIST 1714 - DEATH IN MEDITERRANEAN WORLD

Minimum Credits: 3

Maximum Credits: 3

In many cultures, people sometimes ask fundamental questions about their existence, including, "what happens after we die?" This course will focus on the evolution of beliefs and rituals related to death and the afterlife in and around the ancient Mediterranean Basin, including Egyptian, Greek, Etruscan, and Roman cultures. Using an interdisciplinary approach, we will combine methodologies from anthropology, classics, history, and religious studies. Topics to be covered include myths of the afterlife, books of the dead, magic and death rituals, funeral practices and paraphernalia (disposal of the dead), cults of the dead, divinization, heaven and hell, judgment, and the impact of Christianization on the ancient understanding of death.

Academic Career: Undergraduate

HIST 1716 - INDIAN OCEAN WORLD HISTORY

Minimum Credits: 3

Maximum Credits: 3

Explores the Indian Ocean world from the rise of Islam through the 19th century age of imperialism. Shows how global networks and connections created a vibrant system of economic, technological, and cultural exchange. Begins with interactions of the various peoples, states, and religions of the Indian Ocean from the 8th to 15th century; then focuses on contributions of Europeans, showing how the Indian Ocean world became entwined in a global community. The course provides background to the centrality of the Indian Ocean in the world of today.

HIST 1720 - WEST AFRICA IN THE ERA OF THE SLAVE TRADE

Minimum Credits: 3

Maximum Credits: 3

This course provides an introduction to the history the societies of West and West-Central Africa. It explores the enormous linguistic and cultural variation among these societies and examines their political, economic and social evolution during the centuries of the trans-Atlantic slave trade (roughly 1600 to 1850). Students are encouraged to think about how complex historical processes occurring around the entire Atlantic Ocean basin affected the development of states and societies in Western Africa.

HIST 1722 - MODERN SOUTH AFRICAN HISTORY

Minimum Credits: 3

Maximum Credits: 3

The course will be organized chronologically and use specific conflicts (strikes, political demonstrations, repression, etc.) to focus on various key moments in South African history. The course will utilize both secondary readings from books and articles and a large number of primary materials (ranging from manifestos to novels to film) to generate discussion and further an understanding of the roots of conflict and creation of identity in modern South Africa. Labor and the organization of the work and production processes will be one lens through which ethnic and racial antagonism can be analyzed.

HIST 1725 - DISEASE AND HEALTH IN MODERN AFRICA

Minimum Credits: 3

Maximum Credits: 3

This course explores the history of health, healing, and disease in modern Africa, focusing on the social, political, economic, and environmental aspects of illness and health. The course also provides an orientation to the changing burdens of disease in Africa in the past 300 years. Seeking to understand change and continuity in Africans' experiences of health and healing, how have historical processes shaped understandings of disease, misfortune, and illness? Within what contexts should health interventions be understood? How and when did health in Africa become a global issue?

HIST 1731 - THE HISTORY OF GOD

Minimum Credits: 3

Maximum Credits: 3

God has a history. In the earliest days of that history, God was worshiped as one of a plethora of deities controlling various spheres of cosmic activity or the human world. Students in this course will learn about this ancient pantheon - how gods functioned in society and how their presence was experienced by those devoted to them. They will then trace the evolution of the God of Israel from a mountaintop deity of the southern Levant in the late second millennium BCE to a supreme deity worshiped by a small group of absolute monotheists based in Jerusalem in the mid-first millennium BCE. Students will become more sophisticated readers of biblical texts in the process. The sources of the Hebrew Bible reflect not a homogeneous monotheism, but rather a diverse set of belief systems tending toward henotheism or even polytheism. By appropriating and reinterpreting the religious myths of their neighbors, the Israelites arrived at a character of the divine that has proven problematic to many contemporary theologians, particularly on issues of LGBT rights, women's rights, and the environment.

HIST 1732 - GLOBAL CHRISTIANITY

Minimum Credits: 3

Maximum Credits: 3

This course takes Christianity as a prism through which to consider the origins and growth of global religions. Christianity has tried to achieve a global status since its inception in the ancient Mediterranean world in the first century CE. Stemming from Paul's fateful decision to evangelize the Gentiles, Christianity has long sought to achieve a global network of believers, who now comprise about 20% of the world's population. We will study Christian globalization in the twentieth and twenty-first centuries and focus on two Christian traditions, Catholicism and Pentecostalism, as examples of religions that have deliberately and successfully globalized. We will ask if the contemporary values of and pluralism relativism are good for religions and religious people. And, where religion is no longer a powerful cultural force, what are the prospects for a purely humanitarian approach to common problems in a globalizing world?

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

HIST 1733 - RELIGIOUS DIVERSITY

Minimum Credits: 3

Maximum Credits: 3

What is the best way to accommodate religious and cultural diversity within a nation-state and in civil society? How should individual rights to practice religion be balanced with communal needs? Should freedom from religion be protected as much or more than freedom of religion? These are pressing contemporary issues in many countries, including the United States, but issues of religious diversity and questions of whether and how to tolerate religious minorities have a long history. In this course, we will examine the toleration of minority religions in particular historical settings, and the issues and problems (both doctrinal and social/political) that societies grappled with as they confronted diverse religious landscapes. We will also use these historical precedents as a lens to examine contemporary examples of religious pluralism, diversity, and conflict. Case studies will mainly be drawn from pre-modern Europe and modern Europe and North America, but we will also look at Mughal and modern India and discuss religion in pre-modern China.

Academic Career: Undergraduate

HIST 1740 - BUDDHIST MEDITATIVE TRADITIONS

Minimum Credits: 3

Maximum Credits: 3

Buddhist meditation is perhaps the best known of all Buddhist practices particularly in Western countries. In both Asia and the West, it has been popularized in recent times as a technique that can be used for such secular purposes as reducing stress and managing eating disorders. But what is Buddhist meditation? How it is practiced in its traditional contexts? What are the doctrinal foundations of meditation practices? What are the traditional purposes of practicing Buddhist meditation? What are the various types of meditation explained in Buddhist texts? How this practice evolved over time in different geographical regions in Asia? What are the roles of Buddhist or state institutions in shaping meditation practices? Focusing on these questions, this course examines the breath of Buddhist meditation practices and their historical evolution and transmission in Asian Buddhist countries. The course covers the role of meditation in early Indian Buddhism, the development of different types of meditation in Theravadan Buddhist countries, the emergence of the Chan school of meditation in China and its transmission to Japan (Zen), the appropriation of tantra to Buddhist practices in Tibetan Buddhism, and the modernization of Buddhist meditational practices during the colonial period. The course is taught using classical Buddhist texts and meditational manuals in translation, secondary studies, testimonials and films. In the process, we expect to enhance our familiarity with religious practices and our understanding of the human experience.

HIST 1753 - THE OTTOMAN EMPIRE (1300-1923)

Minimum Credits: 3

Maximum Credits: 3

This course traces the history of the Ottoman Empire from its origins as an obscure band of frontier warriors, to the highpoint of its geopolitical power in the sixteenth century, and on to its further evolution as an increasingly complex and peaceful society, down to the opening of the period of European imperialism and nation building. It will address not only the Ottomans' political power, but also those economic, social, and cultural factors that helped explain that power and gave the empire such a distinctive place in the history of Western Europe, Balkans and the Middle East.

HIST 1765 - ISRAEL IN THE BIBLICAL AGE

Minimum Credits: 3

Maximum Credits: 3

This course explores the history and development of the people of Israel in ancient times. What do we know about the Israelites and how do we know it? Using biblical texts and archaeological remains, students will learn about everyday life in ancient Israel, the role of class and gender, life-cycle events, religious festivals, political institutions, systems of belief, and famous personages in history and lore. The trajectory of the course will begin with the Near Eastern origins of the people, continue through the rise of the Israelite and Judahite monarchies, and end with the Second Temple commonwealth of Judea in the Persian and Hellenistic periods.

HIST 1767 - JEWS AND JUDAISM IN THE MODERN WORLD

Minimum Credits: 3

Maximum Credits: 3

What is a "secular Jew?" How was medieval anti-Judaism different than modern anti-Semitism? How did German Jews go from being full citizens of their country to victims of genocide? What was the relationship between Middle Eastern Jews and European Jews during the age of colonialism? Why did some Jews think it necessary to build a nation of their own, while others were content to be citizens of non-Jewish states? In this course, we talk about these and other questions that are critically important not only to the history of Jews, but also to the history of the modern world.

HIST 1768 - CHRISTIANS MUSLIMS JEWS IN THE MIDDLE AGES: CONNECTION & CONFLICT

Minimum Credits: 3

Maximum Credits: 3

Was the world of Europe and the Middle East before the Enlightenment a period of unending religious conflict and intolerance? Were Jews the victims of severe persecution and violence everywhere during this period? Did Christians and Muslims engage in unceasing religious wars? The answer to all three of these questions is no. While the Middle Ages were a period of conflict and competition between the three major western religious groups, they were also a time of coexistence and cooperation. This class shifts from extreme dichotomies and simplistic stereotypes to deeply examine the period in all of its complexity: what were the theological, political, and legal contexts in which Christians, Muslims, and Jews interacted in both Christian Europe and the Muslim world? How did these deeply religious societies organize themselves to tolerate the religious "Other"? When and why did toleration break down and lead to expulsion, forced conversion, or violence? What kinds of cross-cultural exchanges and cooperation take place in economic, cultural, intellectual, and social life? We will also look at new ideas of toleration (and intolerance) that emerged at the end of the Middle Ages and examine aspects of inter-religious encounters and dialogues today. We will discuss not only the significance of Jewish-Christian-Muslim interactions in the Middle Ages but also assess these encounters as a case study in the broader history of religious diversity, pluralism, and conflict.

HIST 1769 - HOLOCAUST HISTORY AND MEMORY

Minimum Credits: 3

Maximum Credits: 3

The holocaust - that is, the genocide of six million Jews in Nazi-occupied Europe during World War II - was a critical event of the early twentieth-century that continues to resonate today. Our historical survey will look at the holocaust primarily through the experiences of its Jewish victims, though we will discuss some of the other groups, such as the roma, disabled people, and gay men, who were also targeted and systematically murdered by the Nazis. Additionally, we will think about the perpetrators of the holocaust and the ideologies that led to the genocide, such as racism, nationalism, and antisemitism. Finally, we will move beyond the history of the holocaust to think about the ways that this event has been remembered and reconstructed by survivors, nations, institutions, museums, the arts, popular culture and the media. Looking at how institutions here in Pittsburgh commemorate the holocaust will offer us local, concrete examples of how people continue to grapple with this history.

HIST 1776 - VARIETIES OF EARLY CHRISTIANITY

Minimum Credits: 3

Maximum Credits: 3

Through early Christian literature (such as non-canonical gospels and the writings of the Church Fathers) and various types of archaeological evidence, this course examines the many different and often competing forms of Christianity that developed in the first four centuries of the common era. Among the areas of examination are key theological issues, creedal formulation, Gnosticism, martyrdom, asceticism, Christian relations with pagans and Jews, and the battles over orthodoxy and heresy. We also assess the conversion of Constantine and the social and political implications of the Christianization of the Roman Empire.

HIST 1779 - JERUSALEM: HISTORY AND IMAGINATION

Minimum Credits: 3

Maximum Credits: 3

The holy city of Jerusalem is at the heart of the western religious imagination and of contemporary political conflict in the middle east. Traditionally it has been a center of religious pilgrimage, home to Israelite kings and Islamic caliphs. Today it is a cutting-edge urban center marked by stunning demographic diversity, a rapidly expanding economy, and an intractable political crisis. In this course, we will examine the history of the city—from its earliest days to today—with an eye toward its religious significance in Judaism, Christianity, and Islam. Special attention will be given to Jerusalem's changing urban fabric: its architecture, neighborhoods, natural resources, economy, and religious institutions.

HIST 1780 - JEWS AND THE CITY

Minimum Credits: 3

Maximum Credits: 3

Comedian Lenny Bruce riffed in 1963 that "If you live in New York or any other big city, you are Jewish. It doesn't matter even if you're Catholic; if you live in New York you're Jewish." In this course, we will discover why Lenny Bruce -- and so many other observers of Jewish life -- came to understand urbanity as a core component of the Jewish experience. We will begin our study of the Jewish encounter with urban life in the 19th century, as millions of Eastern European Jews migrated from the small villages of their birth to cities across the globe. This course will trace this Eastern European Jewish diaspora to urban destinations around the world, before training its lens on the Jewish encounter with American cities. We will pay close attention to how patterns of Jewish urbanization changed regionally and over time; how urbanization affected Jews' home-life, leisure time, religious practices and occupational choices; how differences in gender and class affected Jews' experiences in urban spaces; and how Jews interacted with other ethnic groups in diverse, urban environments. Delving into the history, built environment, and archival sources

pertaining to the Jewish experience in Pittsburgh will provide us with a dynamic case study for this crucial relationship between Jews and the city.

HIST 1787 - CHRISTIAN-MUSLIM RELATIONS

Minimum Credits: 3

Maximum Credits: 3

This course surveys the historical interaction between Christian and Muslim communities over the past 1400 years and focuses on the art of polemic as an important tool in the human construction of religious concepts. We will begin by understanding the evolution of Islam in the Seventh Century, and continue with the encounters between Islam and the Byzantine Empire, and the medieval caliphate's encounters with the West, including the crusades. We will then consider specific elements of the interaction between Christian and Muslim communities, drawing from a variety of Muslim communities in Europe and the United States.

HIST 1794 - ISLAM, LAW, AND POLITICS

Minimum Credits: 3

Maximum Credits: 3

The emergence of modern Islamic political movements worldwide has had not only a profound impact on contemporary global geo-politics but has also triggered heated debates around the question of the compatibility of Islam with liberal democracy. This class investigates the "vexed" relation between Islam and politics, profoundly influenced by the experience of colonialism, and standing in complex relationship to concepts such as the modern nation-state, democracy, liberalism, or secularism. The class will combine empirically grounded studies the multiple facets of past and contemporary Muslim politics in Muslim-majority and minority contexts with a more theoretical investigation of modern Islamic political thought; here it will examine its intellectual origins, its arguments, the challenge it poses to its liberal counterparts, but also its conundrums and contradictions.

HIST 1801 - GLOBAL STUDIES CAPSTONE COURSE

Minimum Credits: 3

Maximum Credits: 3

This course serves as the annual capstone course for Global Studies certificate students and others writing BPhil or honors theses on global topics, past or present. Taught by the UCIS Visiting Professor in Contemporary Global Issues (GSC post-doc), the course is a workshop for student writing complemented by readings selected to initiate productive conversations that link the students' various research projects and that locate those projects in the appropriate historical,

social, and cultural context(s). It is designed, generally speaking, to provide students with dedicate hours in their work weeks to devote to thesis writing, to help students frame and contextualize their research through renewed engagement with literature on relevant topics, and to ensure that thesis projects are well connected to broader global processes.

Academic Career: Undergraduate

Course Component: Seminar

HIST 1803 - GLOBAL ASIA CAPSTONE

Minimum Credits: 3

Maximum Credits: 3

Asia is by far the largest and most populous continent on Earth, and home to significant social, political, and economic diversity. Yet far too often the history and culture of Asian countries are taught without reference to their regional and global connection, or if a connection is made, it is defined by European colonial history. In this course, we will consider Asia in terms of connections that define the continent. We will look at how Asia from a national, regional, and global perspective, with an eye to the way that Asia has influenced and connected the planet. From anime, k-pop, and Bollywood to global economic flows to political, religious, and ethical thought, we will look at how Asia is and has been a global phenomenon. Throughout this student led course, we will work on developing a research question, doing primary and secondary research, and in the end of producing a capstone research project.

Academic Career: Undergraduate

HIST 1904 - UNDERGRADUATE RESEARCH ASSISTANT

Minimum Credits: 1

Maximum Credits: 6

This course offers students the opportunity to participate in a research project, working as a research assistant under the guidance of a history professor. The aim of the course is to give the student training in historical research methods, and also to promote mentoring relationships between students and faculty. Subject to faculty approval more than one enrollment is possible.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Satisfactory/No Credit

HIST 1905 - UNDERGRADUATE TEACHING EXPERIENCE

Minimum Credits: 1

Maximum Credits: 3

This course offers the opportunity for qualified third-and fourth-year students to assist in teaching history lecture course. Each student must have taken the course previously as a student (with a minimum grade of B) and will work under the direct supervision of the relevant history faculty member. Each student must receive permission of the instructor, complete a teaching agreement with that instructor, and get permission from one of the advisors in the department. Credits gained through this course may only be used toward the elective requirement of the history major.

Academic Career: Undergraduate

Course Component: Independent Study
Grade Component: Satisfactory/No Credit

HIST 1906 - ATLAS INTERNSHIP

Minimum Credits: 3

Maximum Credits: 3

The Digital Atlas Design Internship supports student research by teaching interns how to use digital tools and methods to explore the global past. Students manage a semester-long independent research project using an interactive, public-facing platform that utilizes GIS and web design skills gained during the internship. Students engage with both world history and digital humanities while developing a spatial database about a topic of their choosing. Experience with digital methods or GIS is not necessary, and students can receive publication credit for their work. To learn more about the Digital Atlas Design Internship, please visit <https://www.worldhistory.pitt.edu/digital-atlas-design-internship>. You can also view past internship projects by visiting our project gallery at <https://www.worldhistory.pitt.edu/projects>.

Academic Career: Undergraduate

Grade Component: Satisfactory/No Credit

Course Attributes: Undergraduate Internship

HIST 1910 - READING HISTORICAL RUSSIAN

Minimum Credits: 1

Maximum Credits: 1

This 1-credit mini-course is designed to improve students' ability to read and understand Russian-language texts from the Russian Empire and Soviet Union. It focuses on texts that have never been translated, thus offering a unique glimpse into the past made possible only through investment in language study. It is targeted at students who have completed equivalent of at least 4 semesters of Russian language study, as well as heritage speakers.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Satisfactory/No Credit

History and Phil of Science

HPS 0410 - EINSTEIN: MODERN SCIENCE AND SURPRISES

Minimum Credits: 3

Maximum Credits: 3

Do astronauts age more slowly? Can a finite universe have no edge? Is time travel possible? Can time have a beginning? Does the moon change because a mouse looks at it? Surprisingly, modern science answers yes to all these questions. This course provides simple-to-understand explanations of these and other related questions, their broader philosophical significance and their histories. The course is suitable for students with no science background but with an interest in the world of modern science.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, SCI Polymathic Contexts: Ethical/Policy GE. Req.

HPS 0412 - THE NEWTONIAN REVOLUTION

Minimum Credits: 3

Maximum Credits: 3

In this class we will investigate the transformation of scientific concepts by studying the historical, philosophical, and scientific issues raised by Newton's work in optics and mechanics. We will adopt the methods of integrated history and philosophy of science, whereby understanding is improved through a sustained dialogue between historical investigation and philosophical critical reflection upon the processes and products of a scientific enterprise. We will begin with looking at the traditional notion of a revolution in philosophy of science, and explore the applicability of this notion to the scientific context of sixteenth and seventeenth century England. We will then look closely at the stages in which Newton developed the theory of universal gravitation. This will provide the groundwork for studying the pivotal transformation of the concepts of force, attraction, and inertia, together with the invention of the concept of mass and the cultural reorientation surrounding the nature of the cosmos as a whole. We will then compare and contrast Newton's work in constructing the theory of universal gravitation with his experimental methods in optics. We will then explore the legacy of Newton's work in the subsequent experimental tests of Newtonian gravitation, the codification of modern scientific methodologies, and in the development of central topics in the philosophy of science.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Natural Science General Ed. Requirement, DSAS Phil. Think or Ethics General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req.

HPS 0427 - MYTH AND SCIENCE

Minimum Credits: 3

Maximum Credits: 3

The Greeks in the sixth to fourth century B.C. Initiated forms of thinking we have from then on called "scientific" and "philosophical". This course examines the question of how science is distinguished from "non-science" by studying the role of myth and science in ancient Greece. The aim is to understand what distinguishes the ideas of the first scientists and philosophers from those earlier beliefs called myth.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Geographic Region General Ed. Requirement, Global Studies, Medieval & Renaissance Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req., West European Studies

HPS 0430 - GALILEO AND CREATION OF MODERN SCIENCE

Minimum Credits: 3

Maximum Credits: 3

Galileo is the father of modern science. This course explores his revolutionary discoveries, his attack on Aristotle's natural philosophy, and his transformation of the notion of science, and his epoch-making clash with the religious authorities of the time.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Historical Analysis General Ed. Requirement, DSAS Phil. Think or Ethics General Ed. Requirement, Medieval & Renaissance Studies, SCI Polymathic Contexts: Ethical/Policy GE. Req., SCI Polymathic Contexts: Soc/Behav. GE. Req., Undergraduate Research, West European Studies

HPS 0437 - DARWINISM AND ITS CRITICS

Minimum Credits: 3

Maximum Credits: 3

Charles Darwin's ideas have had an enormous impact on biology and on culture generally. These ideas have been criticized within biology, by philosophers, social theorists and religious fundamentalists. This course studies the historical growth of Darwinism and the criticisms mentioned, and evaluates those criticisms and their impact on the theory.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Historical Analysis General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Contexts: Soc/Behav. GE. Req.

HPS 0515 - MAGIC, MEDICINE AND SCIENCE

Minimum Credits: 3

Maximum Credits: 3

This course introduces students from all backgrounds to humanistic ecology, an interdisciplinary method of learning which combines the humanities with science. Humanistic ecology teaches how to integrate scientific research, philosophy, pedagogy, literature, and health in a holistic framework. Students will learn about classical forms of self-transformation, healing, and knowing that will help them find original pathways to knowledge and wellbeing.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Historical Analysis General Ed. Requirement, Medieval & Renaissance Studies, SCI Polymathic Contexts: Soc/Behav. GE. Req., West European Studies

HPS 0517 - THINKING ABOUT THE ENVIRONMENT

Minimum Credits: 3

Maximum Credits: 3

The goal of HPS 0517, thinking about the environment, is to promote clear and rigorous thinking about environmental issues such as nuclear power, global warming, acid rain, or the use of chemical pesticides. Deciding where to stand on such issues depends on being able to evaluate both scientific and philosophical arguments. We aim to help students develop the skills needed to find the best available information on an environmental issue, and to make informed judgments about what conclusions, and what actions, are warranted on the basis of that information.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Global Studies, MCSI - Sustainability Related

HPS 0545 - SPACE-TIME-MATTER ANTIQU-20THC

Minimum Credits: 3

Maximum Credits: 3

This is an introductory course for students with either scientific or non-scientific backgrounds. It examines the development of the concepts of space, time and matter from the crucible of ancient Greece to the 17th century scientific revolution and foreshadows the revolutionary modifications of the 19th and 20th centuries.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

HPS 0605 - THE NATURE OF THE EMOTIONS

Minimum Credits: 3

Maximum Credits: 3

This course will examine selected historically important theories and portrayals of the human emotions and passions.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, SCI Polymathic Contexts: Ethical/Policy GE. Req.

HPS 0608 - PHILOSOPHY AND SCIENCE

Minimum Credits: 3

Maximum Credits: 3

An introductory course in philosophy of science

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: SCI Polymathic Contexts: Ethical/Policy GE. Req.

HPS 0610 - CAUSAL REASONING

Minimum Credits: 3

Maximum Credits: 3

Do school vouchers really help inner city students become better educated? Do gun control laws really make society safer? This course examines how scientists reason about causal claims like these. It considers use of scientific statistical data that informs our public policy debates. The course uses an interactive, web-based text and exams. In addition, there is an on-line virtual "causality lab" in which students will set up, run, and then analyze simulated experiments. They will construct causal theories, use the lab to derive predictions from these theories, and then test the predictions against the simulated data. While course materials are delivered on-line.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Quant.-Formal Reason General Ed. Requirement, Hybrid

HPS 0611 - PRINCIPLES OF SCIENTIFIC REASONING

Minimum Credits: 3

Maximum Credits: 3

This course will provide students with the skills to understand and assess scientific claims that confront them in daily life. Special attention will be given to reasoning based on samples, evaluating hypotheses and causal claims, as well as common mistakes in scientific reasoning.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Quant.-Formal Reason General Ed. Requirement

HPS 0612 - MIND AND MEDICINE

Minimum Credits: 3

Maximum Credits: 3

Mind and medicine deals with fundamental problems and questions that arise in considering the nature of mental health, mental illness, and branches of medicine that aim to promote mental health and treat mental illness. We will

begin by considering the concepts of 'health', 'disease' and 'illness' in general, and several different models of medicine. From there we will move on to a consideration of the nature of explanation in medicine generally. We will examine some explanatory successes in the domain of physical health and disease, and consider how those successes were achieved. In the second half of the course we will look at controversies over the question of whether there is such a thing as mental illness, and if so, how one is to define, diagnose and treat it. In order to better understand what is at stake, we will explore these controversies by focusing on a specific mental illness, schizophrenia. Looking at recent research on schizophrenia will allow us to see the extent to which the kind of understanding we have achieved in physical medicine is or is not to be expected with serious mental illness. Students who successfully complete this course will be able to identify and analyze different philosophical approaches to selected issues in medicine and psychiatry; have gained insight into how to read and critically interpret philosophical arguments; and have developed skills that will enable them to think clearly about foundational questions as future or current health care providers, policy makers, and consumers. This course is also part of a core sequence leading to certification in the Conceptual Foundations of Medicine Certificate Program, and is a companion course to HPS 0613 (Morality and Medicine) but may be taken independently. The course is of particular interest to pre-medical and pre-health care students.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

HPS 0613 - MORALITY AND MEDICINE

Minimum Credits: 3

Maximum Credits: 3

Ethical dilemmas in the practice of health care continue to proliferate and receive increasing attention from members of the health care profession, ethicists, policy makers, and the general public as health care consumers. In this course we will examine a number of ethical issues that arise in the context of contemporary medical practice and research by analyzing articles and decision scenarios. Topics to be covered typically include the physician-patient relationship; informed consent; medical experimentation; termination of treatment; genetics; reproductive technologies; euthanasia; resource allocation; and health care reform. Students who successfully complete this course will be able to identify and analyze different philosophical approaches to selected issues in medical ethics; have gained insight into how to read and critically interpret philosophical arguments; and have developed skills that will enable them to think clearly about ethical questions as future or current health care providers, policy makers, and consumers. This course is part of a core sequence leading to Certification in the Conceptual Foundations of Medicine Certificate Program, and is a companion course to HPS 0612 (Mind and Medicine) but may be taken independently. The course is of particular interest to pre-medical and pre-health care students.

HPS 0618 - SCIENTIFIC CONTROVERSIES

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, SCI Polymathic Contexts: Ethical/Policy GE. Req.

HPS 0619 - QUANTUM KARMA: SCIENCE IN HINDU AND BUDDHIST TRADITIONS

Minimum Credits: 3

Maximum Credits: 3

We have likely all encountered arguments in which sweeping claims are made about the relationship between religion and science. These claims often generalize on the basis of a limited knowledge of a few locally visible religious traditions. This course offers students an opportunity to explore the way science has interacted with some of the traditions often neglected by these debates. In particular, we will explore how the close relationship between European imperialism and scientific institutions created new parameters for conversations about Hindu and Buddhist traditions. This led intellectuals in these traditions to develop systems of thought that integrate scientific and religious ideas. These ideas played an important role in processes of decolonization, the development of religious nationalism, and the transnational spread of Hindu and Buddhist traditions.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

HPS 0620 - SCIENCE AND RELIGION

Minimum Credits: 3

Maximum Credits: 3

Are science and religion at odds or harmonizable? Do they coincide or represent completely separate discourses? This course examines the relationship between science, rationality, faith, and religion. Special attention will be given to ancient creation narratives and their interpretation, historical dialogues regarding faith and reason in the Western monotheist faiths (Christianity, Judaism, Islam), the scientific revolution, and various approaches to evolutionary theory. We will also consider practical, contemporary issues such as neuroscience and religious practice, ecology and faith, and scientific views toward gender and race.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, SCI Polymathic Contexts: Ethical/Policy GE. Req.

HPS 0621 - PROBLEM SOLVING: HOW SCIENCE WORKS

Minimum Credits: 3

Maximum Credits: 3

This course provides a gentle introduction to quantitative methods in science, showing how these methods are designed to control our natural tendencies to misread nature. It uses the examples of the science of energy and statistics.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Quant.-Formal Reason General Ed. Requirement

HPS 0623 - EXPLANATIONS OF HUMANS AND SOCIETY

Minimum Credits: 3

Maximum Credits: 3

Scientific explanations for human behavior have tremendous authority. They influence medicine, law, and perhaps most importantly, how we understand ourselves and each other. But what constitutes a good explanation for the behavior of human individuals or social groups? In this course, we will investigate the history and philosophy of scientific explanations of human behavior, loosely interpreted. Drawing from debates in biology, psychology, economics, and epidemiology, we will inquire as to what, if anything, makes these scientific models and explanations true, good, or useful, and for whom. In evaluating explanations, we'll draw on history and philosophy of science, feminist epistemology, and philosophy of language. Students of all intellectual backgrounds are welcome in this course.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Social Science General Ed. Requirement, SCI Polymathic Contexts: Ethical/Policy GE. Req., SCI Polymathic Contexts: Soc/Behav. GE. Req.

HPS 0626 - DEVELOPMENT OF MODERN BIOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course will consider major episodes in the history of biology in the 19th and 20th centuries. Beginning with the Charles Darwin's theory of evolution and ending with contemporary genomics, we will place the major milestones of modern biology in their wider social, political, and cultural context. Topics may include Darwinism and its controversial reception, eugenics and the control of heredity, experimentation as a hallmark of twentieth century biology, the impact of molecular biology, and the rise of genomics and big data in biology.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req.

HPS 0628 - PARADOX

Minimum Credits: 3

Maximum Credits: 3

The purpose of this course is to use the natural appeal of paradoxes to introduce students to the methods of philosophical analysis and to give them a taste of the basic content of a wide range of branches of philosophy of science.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, SCI Polymathic Contexts: Ethical/Policy GE. Req.

HPS 0630 - SCIENCE AND PSEUDOSCIENCE

Minimum Credits: 3

Maximum Credits: 3

This course probes the distinction between genuine and pseudo-science using a number of case studies, including ESP and other paranormal phenomena, scientific creationism, UFO's and extraterrestrial life, etc.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis
Course Attributes: Global Studies

HPS 0633 - SCIENCE, PHILOSOPHY AND PUBLIC POLICY

Minimum Credits: 3

Maximum Credits: 3

The course studies problems that arise in making public policy decisions. Topics studied include the nature of science, the nature of technology, our system of values, relations between science, values, and technology. Case studies include teaching creation science in public schools, genetic engineering, legislating sexual morality, and other policy issues on which scientific knowledge has some bearing.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

HPS 0640 - SCIENCE FICTION AND PHILOSOPHY

Minimum Credits: 3

Maximum Credits: 3

Consider classic philosophical questions concerning knowledge of the external world, free will, time, ethics, language, and many more. The philosophical tradition has written many enlightening things on these topics. However, these are all questions that have also been examined by another rich tradition: science-fiction. While philosophy proceeds by careful argumentation and theory-building, science-fiction proceeds by imagining worlds very different from ours that are governed by their own internal logic and sees how stories play out in these worlds. In this way the two disciplines---science fiction and philosophy---are complementary. The goal of this course is to study both these traditions together so as to illuminate these classic philosophical questions. We will see how philosophical arguments become sharper when considered in the context of stories. We will investigate how our intuitions about philosophical problems change when confronted with stories. Hopefully, we will have gained a clearer understanding of philosophical questions and gained a more critical eye for viewing or reading science fiction. Most importantly, we will have developed the ability to write out our thoughts clearly and develop and defend philosophical arguments.

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

HPS 0685 - MATHEMATICS AND CULTURE

Minimum Credits: 3

Maximum Credits: 3

This course provides an introduction to the role of mathematical ideas in various cultural settings. It focuses on the use of math in everyday life.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Quant.-Formal Reason General Ed. Requirement

HPS 1508 - CLASSICS IN HISTORY OF SCIENCE

Minimum Credits: 3

Maximum Credits: 3

In this class we will study the ten most dangerous, controversial, and mind shattering ideas that shaped modern science and the world we live in, their origin in classical historical and philosophical contexts, and their potential for future science. They are: 1) Cosmos. 2) Matter. 3) Life. 4) Species. 5) Organism. 6) Nature. 7) Calculus. 8) Unconscious. 9)

Beauty. 10) God. Disturbing questions will be explored such as: Are these ideas natural or supernatural? Are they within or without the human mind? Are they ecologically sustainable? Are they racist? And of course, we will meet the heretics who revolutionized our understanding of these classical ideas. There are no prerequisites, no quizzes, and no exams.

HPS 1510 - SCIENCE IN GLOBAL PERSPECTIVE

Minimum Credits: 3

Maximum Credits: 3

Science has never been an exclusive practice of any one society or region. In this course we will explore science as a global phenomenon by considering how different practices and traditions of science developed in disparate global contexts, how science travelled and was transformed through global circulation, and how a global and comparative perspective can inform our understandings of science, its history and its philosophy. Regions and time periods considered may vary from offering to offering. Every course offering will include a comparative component which considers how the circulation of materials, texts, technologies, and people have shaped the historical development of science.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

HPS 1530 - EUROPEAN INTELLECTUAL HISTORY 2 1870-1940

Minimum Credits: 3

Maximum Credits: 3

A course of readings and discussions focused on major texts in the European intellectual tradition from the age of positivism to the second World War. There will be occasional lectures, especially on the social and institutional contexts, but the predominant emphasis will be on class discussions of primary readings.

Academic Career: Undergraduate

HPS 1531 - MAN AND COSMOS IN THE RENAISSANCE

Minimum Credits: 3

Maximum Credits: 3

An exploration of the intellectual and scientific activity of the European Renaissance and its influence in shaping modern man and the discoveries of modern science.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: LVL: So, Jr, or Sr; PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGCOMP 0213 or ENGCOMP 0214 or ENGFLM 0210 or FP (0003 or 0006)

Course Attributes: Medieval & Renaissance Studies, Writing Intensive Course (WRIT)

HPS 1600 - PHILOSOPHY & RISE MODERN SCIENCE

Minimum Credits: 3

Maximum Credits: 3

It is generally agreed that what happened in the 17th century changed the human landscape irrevocably. The religious reformation was consolidated; divinely ordained kingship was decisively uprooted; upheavals across Europe ushered in non-traditional political and constitutional formations; and the forces of transformation forged new sociocultural contexts in which life was lived. Lying at the core of these transformations was the impact of early modern science as it emerged in the 17th century. This course will examine the dynamics of the 'scientific revolution' paying close attention to such figures as Kepler, Galileo, Descartes, Hobbes, Leibniz, and Newton. We will be concerned with the philosophical consequences of their thought within the context of their period, but also with the affect it had on the scientific world-picture of the 18th century enlightenment

Academic Career: Undergraduate

Course Attributes: Global Studies, SCI Polymathic Contexts: Ethical/Policy GE. Req., West European Studies

HPS 1602 - RACE: HISTORY, BIOLOGY, PSYCHOLOGY, PHILOSOPHY

Minimum Credits: 3

Maximum Credits: 3

The goal of this course is to help students gain a thorough understanding of the issues raised by races and racism. Such understanding can only be gained by bringing together several disciplines in an interdisciplinary manner. Thus, we will examine issues about race and racism that arise from biology, history, philosophy, and psychology. In particular, we will examine the following questions: Does genetics show that races are real? Why are racial categories used in medicine? Where does the concept of race come from? Is it a recent historical invention? How has it influenced the sciences? What are races? What is racism? Should we be color-blind? How does race contribute to one's identity? Why do we think about races? Are there differences in intelligence between races? What are racial prejudices? The course will involve reading original articles and book extracts from a range of disciplines, including history, philosophy, and several sciences. These articles will be explained and discussed in class.

Academic Career: Undergraduate

Course Component: Lecture

Course Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, SCI Polymathic Contexts: Ethical/Policy GE. Req.

HPS 1612 - PHIL OF 20TH CENTURY PHYSICS

Minimum Credits: 3

Maximum Credits: 3

An examination of the fascinating philosophical problems to which modern physical theories have given rise. No previous formal training in physics or mathematics will be presupposed, since the basic physical ideas needed will be introduced largely qualitatively with an emphasis on concepts rather than equations. Topics will vary from year to year with instructor, but center around classical mechanics, quantum mechanics, and relativity theory.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: LVL: So, Jr, or Sr

HPS 1616 - ARTFCL INTELGNC & PHIL OF SCI

Minimum Credits: 3

Maximum Credits: 3

This course investigates the problem of mechanizing reasoning. For the case of deductive inference, it draws on work in symbolic logic and computation theory. For the case of inductive inference, it draws on work in confirmation theory from philosophy of science and learning theory.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: LVL: So, Jr, or Sr

Course Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, SCI Polymathic Contexts: Ethical/Policy GE. Req.

HPS 1620 - PHILOSOPHY OF BIOLOGY

Minimum Credits: 3

Maximum Credits: 3

Philosophy of biology will consider foundational conceptual issues in biology like the nature and structure of biological explanation, the possibility of laws in evolutionary theory, the relationship between different causal components of biological processes (genetics and development), the problem of species reality and classification, the explanatory character of ascription of biological function, and the extension of biological explanations to human psychology and culture.

Academic Career: Undergraduate

Course Requirements: LVL: So, Jr, or Sr

Course Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, SCI Polymathic Contexts: Ethical/Policy GE. Req.

HPS 1621 - SCIENCE IN THE FIELD

Minimum Credits: 3

Maximum Credits: 3

Laboratories are commonly understood to be the locations of scientific research. Indeed, laboratory experimentation is one of the hallmarks of twentieth century science. However, for many sciences, the field has been and is the primary site of research. For sciences from anthropology to geology, fieldwork is an essential component of scientific practice. In this course, we will consider the differences between laboratory and field sciences. We will focus on the circumstances and contingencies that make fieldwork challenging and the research opportunities that it creates, which make it irreplaceable.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

HPS 1623 - DEATH AND HEALTHCARE PROFESSIONS

Minimum Credits: 3

Maximum Credits: 3

The American culture of the 20th and 21st centuries has been called, not death-defying, but death-denying. It is often said that America is the only place in the world that treats death as optional. Once upon a time, we couldn't have open, public conversations about breast cancer, because the word could not be uttered aloud. In many places, it is just as hard today to have an open, public conversation about death and dying. This phenomenon is not just a social more; it affects the practice of many professions and entire segments of our economy and society. This course will explore our individual and cultural reactions to mortality, the ways in which dying in today's America is different from dying

throughout history or elsewhere in the world, and the responses of a variety of professions, both within the field of healthcare and beyond, to their encounters with people in the various stages of dying. Students will be asked, at turns, to be scientific, philosophical, clinical, analytical, and emotional in encountering the concepts and material presented here. This should be a true interdisciplinary experience.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

HPS 1624 - DEVELOPMENT OF SCIENTIFIC MEDICINE

Minimum Credits: 3

Maximum Credits: 3

This course will explore the history of contemporary scientific medicine, including its sciences (anatomy, physiology, pathology, epidemiology), technologies (diagnostic, surgical, pharmacologic), research methods (clinical trials, biostatistics), and theories and philosophical underpinnings (naturalism, experimentalism, germ theory, the medical model, evidence-based medicine, genetic determinism). Students will come away with an understanding of how the history of medicine illuminates current medical science/practice as well as major topics in the philosophy of medicine and the philosophy of science. Students will read primary historical sources, original research in history of science, and a history of medicine textbook. Classes will consist in a combination of lecture and discussion.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

HPS 1625 - PHILOSOPHY OF MEDICINE

Minimum Credits: 3

Maximum Credits: 3

This course is an introduction to philosophical and yet practical issues in medical science. Students will examine the concepts of "health", "normality", and "disease", and also some representative theories in clinical biochemistry, microbiology and physiology.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: LVL: So, Jr, or Sr

HPS 1627 - LIVING WITH TECHNOLOGY

Minimum Credits: 3

Maximum Credits: 3

A prominent company recently realized the machine-learning algorithm trained on its past hiring data had learned a bias against female candidates and so was unsuitable for resume evaluation. But given competing definitions of fairness, how should we decide what it means for an algorithm to be unbiased? Machine vision algorithms are systematically less likely to recognize faces of people of color. Since many face recognition algorithms are used for surveillance, would improving these algorithms promote justice? Deep fakes may pose serious challenges to democratic discourse, as faked videos of political leaders making incendiary statements cast doubt on the provenance of real videos. Do the researchers developing these algorithms, often academics funded by National Science Foundation grants, have an obligation to desist? In a field filled with such vexing questions, the ethical issue most commonly addressed by the media is whether a self-driving car should swerve to hit one person to avoid hitting two. In this class, we will go beyond the headlines to explore the ethics of technology. We will discuss issues such as transparency, bias and fairness, surveillance, automation and work, the politics of artifacts, the epistemology of deep fakes, and more. By the end of the course, students will be able to identify crucial moral and epistemic issues in contemporary technology and choose between solutions to these difficult problems.

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, SCI Polymathic Contexts: Ethical/Policy GE. Req.

HPS 1630 - MUSIC, CULTURE AND TECHNOLOGY

Minimum Credits: 3

Maximum Credits: 3

In this course, we will explore the history of sound reproduction technology from the end of the nineteenth century into the present day, analyzing the way sonic technologies have shaped the creation, consumption, and social politics of music in North America. This is not a course about how to make sonic technology, or how to use it; instead, it engages with sound reproduction technology as a social, historical, and cultural artifact. Although the course is roughly chronological, it is not comprehensive the purpose is not to learn a single, continuous history of audio technology. We will be exploring various perspectives from more than a century of historical and technological change, moving from the use of sound in 19th-century laboratories to the culture of the iPod. By thinking critically about technology's broader social and intellectual contexts, this class sheds light on the historical and material stakes of sonic technology for listeners in the 21st Century.

HPS 1632 - EINSTEIN FOR ALMOST EVERYONE

Minimum Credits: 3

Maximum Credits: 3

The course will survey Einstein's contributions to physics. This survey will include the contributions of his annus mirabilis of 1905: special relativity, Brownian motion, light quantum; a briefer contact with his work in general relativity and cosmology; and his now celebrated critique of quantum theory. The course content will be organized around modules, corresponding to the above material. It will cover technical details of Einstein's work, so some technical competence is essential. A cumulative GPA of 3.25 and completion of MATH 0220 prerequisites.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: MATH 0220

Course Attributes: David C. Frederick Honors College Course

HPS 1640 - SCIENCE, PHILOSOPHY AND THE SENSES

Minimum Credits: 3

Maximum Credits: 3

Our senses are our only means of obtaining knowledge of the world around us. For this reason, they have long been a subject of philosophical enquiry, concerned with the nature of perceptual knowledge. Alongside philosophical investigation, the perceptual modalities (vision, hearing, etc.) are a central area of experimental research in psychology and neuroscience? Philosophers of perception now seek to integrate their conceptual understanding of the topic with empirical results coming from these sciences. In this course, we will examine debates in contemporary philosophy of perception over the nature of perceptual awareness and sensory knowledge, looking especially at ideas that have been influenced by scientific discoveries. Topics include: naive realism and representationalism; ontology of perceptible

qualities (the existence of colour, sound, smell, etc.); the nature of attention and introspection.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

HPS 1653 - INTRO TO PHILOSOPHY OF SCIENCE

Minimum Credits: 3

Maximum Credits: 3

This course provides a broad, introductory survey of current issues in philosophy of science and treats philosophical problems such as confirmation, which are common to all sciences, as well as problems peculiar to individual sciences.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: LVL: So, Jr, or Sr

HPS 1654 - FEMINIST PHILOSOPHY OF SCIENCE

Minimum Credits: 3

Maximum Credits: 3

If there is a legitimate role for political values in scientific knowledge production, why should those values be feminist? In this course, we will explore the ways that feminist epistemologists and philosophers of science have characterized a positive role for feminist values in scientific theory and practice. We will ask what this means for traditional accounts of science as objective and value-free, and consider possible consequences of feminist arguments for how science ought to be done, and by whom. In particular, we'll examine feminist critiques of essentialism, biological determinism, and reductionism in science, using examples from sex differences research. We'll then consider how political values might play a role in so-called "good science," focusing on underdetermination and the argument from inductive risk. We will examine arguments about the particular role(s) of feminist values in science by attending to the traditions of feminist empiricism and feminist standpoint theory. We will evaluate the consequences of these arguments for concepts of objectivity, for the structure of scientific communities, and for the authority and trustworthiness of scientific explanation.

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, SCI Polymathic Contexts: Ethical/Policy GE. Req.

HPS 1660 - PARADOX

Minimum Credits: 3

Maximum Credits: 3

This course explores paradoxes both for the fun of untangling an intriguing puzzle and for the more serious reason of the easy access they provide to some of the most important foundations issues in philosophy and the sciences.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: LVL: So, Jr, or Sr

HPS 1670 - PHILOSOPHY OF NEUROSCIENCE

Minimum Credits: 3

Maximum Credits: 3

How can neuroscience explain my subjective experiences? How are the mind and brain connected? Do neuroscience and psychology even relate? Is there a problem of consciousness? Can we read minds? These are some of the questions now occupying the minds of both philosophers of neuroscience and many neuroscientists. However, approaching such questions empirically does not reveal the underlying assumptions one might incorporate into one's thinking when formulating questions, developing experiments, and interpreting results. This course will couple metaphysical theories of mind with contemporary research in both cognitive neuroscience and neurobiology. Throughout the class, we will try to answer some of the questions that popularly occupy contemporary philosophy of neuroscience debates, as well as interrogate and identify, philosophically, where and how these questions, including the research they prompt, arose in the first place. Finally, as neuroscience is a largely tool-driven discipline, students will learn about a range of neurotechnologies and explore whether or not these technologies are likely to get us any closer to reading the mind from the brain. Background in neuroscience is not required.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

HPS 1671 - PHILOSOPHICAL FOUNDATIONS OF COGNITIVE SCIENCE

Minimum Credits: 3

Maximum Credits: 3

An overview of the rise of cognitive science as an interdisciplinary field, and the fundamental debates it has engendered. Cognitive science emerged in the twentieth century as a paradigm for studying the mind. Since its beginning, cognitive science has drawn upon formal developments in philosophy, logic, mathematics, and computer science in order to establish various frameworks for generating and testing theories of cognition. It has sought to integrate, as well as further, the empirical findings of psychology, linguistics, anthropology, and neuroscience. The premises behind this ambitious approach have given rise to significant philosophical discussion. The first half of the course will introduce students to philosophical and empirical developments within the individual disciplines related to cognitive science and will show how they interrelate. The second half of the course is devoted to the central debates: classical computationalism versus connectionism; nativism versus empiricism; representationalism versus anti-representationalism; bottom-up versus top-down approaches; the rationality wars; and so on

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

HPS 1682 - FREEDOM AND DETERMINISM

Minimum Credits: 3

Maximum Credits: 3

This course analyzes three concepts of determinism--theological determinism, logical determinism or fatalism, and physical determinism--and examines the various philosophical arguments designed either to show that determinism and free will do clash or alternatively that they are reconcilable.

Academic Career: Undergraduate

HPS 1702 - JR/SR SEMINAR FOR HPS MAJORS

Minimum Credits: 3

Maximum Credits: 3

The goal of this seminar (HPS 1702) will be to introduce you to the cutting-edge research in history and philosophy of science. The seminar is designed to complement the knowledge you have acquired about the classic debates in history and philosophy of science. We will focus on the recent debates in contemporary philosophy of science and on some debates in the history of science that are relevant for philosophy. We will read articles that have been published in the last ten years in the major philosophy of science and history of science journals. We will also read some classic papers that provide a background for the current debates.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Contexts: Humanistic GE. Req., West European Studies

HAA 0018 - DEATH IN THE ANCIENT WORLD

Minimum Credits: 3

Maximum Credits: 3

The death of a loved one is an emotional and powerful occurrence that provokes a variety of human responses. In addition to writings describing their funerary practices, the civilizations of the ancient Mediterranean region have left artistic representations of death and dying, built tombs, and objects associated with funerary rituals. The study of these texts, images, structures, and objects allows us to better understand ancient attitudes and reactions to death. This undergraduate lecture focuses on the visual and material evidence of funerary practices and beliefs in ancient Egyptian, Greek, and Roman societies. The subject will be approached thematically. First, we will explore how archaeologists discover death-related artifacts and how scholars approach the study and reconstruction of ancient death rituals. Ancient practices and beliefs regarding the mummification, the funeral, commemorative strategies, visits to the grave, and the afterlife will be explored, and images found on specific media (vases, sculpture, built tombs, paintings) will be discussed in depth. The course will conclude with discussions of the roles that sensational topics, like fear of the undead (zombies, vampires, and ghosts) and spectacles of death (gladiatorial contests and public executions), played in ancient Mediterranean civilizations.

HAA 0042 - WORLD CITIES

Minimum Credits: 3

Maximum Credits: 3

Cities have existed all over the world for millennia, and their inhabitants have used these urban conglomerations to connect themselves, their ideas, and their goods to a much wider audience - often well beyond their geographic and political boundaries. Cities have also been sites of dramatic demographic changes throughout human history, leading to productive contact as well as structural inequalities between diverse peoples. In this course, students will explore how cities all over the world and through time have grappled with the potentials and problems of a growing, diversifying, and increasingly interconnected world. We will pay particular attention to the cities' heterogeneous inhabitants, their built and natural environments, their interconnectivity, and their different and changing identities as "world cities." Designed around guest lectures by faculty from the Department of History of Art and Architecture, this course will introduce students to a wide array of world cities. Weekly lectures will explore examples of cities across time and space, including Timbuktu, Mexico City, Beijing, Chicago, Istanbul, Cairo, Paris, and other sites; and through a variety of visual media, including architecture, public sculpture, photography, and film. Class sessions will be specifically devoted to comparing the ideas that formed these cities and how their identities and built environments have changed over time.

Academic Career: Undergraduate

Course Component: Lecture

HAA 0050 - INTRODUCTION TO MEDIEVAL ART

Minimum Credits: 3

Maximum Credits: 3

A survey of the architecture, painting, sculpture and minor arts of the medieval world from ca. 300 To ca. 1450 With

the emphasis on visual analysis of period styles.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS The Arts General Ed. Requirement, Medieval & Renaissance Studies, SCI Polymathic Contexts: Humanistic GE. Req., West European Studies

HAA 0065 - THE VIRAL IMAGE

Minimum Credits: 3

Maximum Credits: 3

This course will employ both historical and contemporary frames to come to terms with what it means for an image to "go viral" and why that virality matters. Using this lens, we will be able to concern ourselves with how images have functioned through time as a conceptual site of contradiction and competing claims to knowledge and power. Taking a historic view, the class will examine what it meant for an image to propagate, erupt, and also stay latent in different epochs, such as the age of the printing press and with the emergence of photography. This historical perspective will in turn enable us to contextualize the role(s) that "viral images" take up in the intensely visual and networked digital infrastructure of the twenty-first century. From this conversation, we hope to draw forward important distinctions that arise from the term itself, such as the difference between "virality" and a "shared visual tradition." Disciplinarily, there is a difference between a "viral image," and an image with "staying power" that becomes part of and eventually comes to reinforce a visual tradition, and this course will investigate both the contours of this distinction and its implications. We will consider viral properties such as propagation, contagion, latency, and eruption alongside visual meaning-making, community-building, and human social connection.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

HAA 0070 - ART OF EUROPE

Minimum Credits: 3

Maximum Credits: 3

An introduction to European art and architecture from the early Renaissance to the present. The course will also include American works from the 18th century onwards.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS The Arts General Ed. Requirement, Medieval & Renaissance Studies, SCI Polymathic Contexts: Humanistic GE. Req., West European Studies

HAA 0090 - INTRODUCTION TO CONTEMPORARY ART

Minimum Credits: 3

Maximum Credits: 3

This course explores the latest developments in contemporary art in the context of changes in world visual cultures since the 1960s. The first weeks will concentrate on the transformations of artistic practice that occurred initially in pop art, and on the minimal-conceptual shift in Western art. This will be followed by a survey of the diversification of artistic practice in the 1980s and 1990s, including the emergence of new internationalisms reflecting postcoloniality, global contemporary art and digital media.

HAA 0101 - FOUNDATIONS OF ART HISTORY

Minimum Credits: 3

Maximum Credits: 3

Foundations of Art History is a core course for the HAA major and offers an introduction to the history of the art historical discipline and its research and interpretive methods.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or FP (0003 or 0006); PLAN: History of Art & Architecture (HA-A-BA) or Museum Studies (MUSST-BA or MUSST-MN)

Course Attributes: Undergraduate Research, Writing Intensive Course (WRIT)

HAA 0102 - PROSEMINAR FOR UNDERGRADUATE MAJORS

Minimum Credits: 1

Maximum Credits: 1

This is professional development workshop that assists students with resume development, networking, and establishing and meeting career goals.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Satisfactory/No Credit

HAA 0105 - ART AND EMPIRE

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Undergraduate

HAA 0106 - MUSEUM STUDIES INTERNSHIP PREP WORKSHOP

Minimum Credits: 1

Maximum Credits: 1

This workshop is required for Museum Studies majors seeking to pursue the internship option. This course must be taken before enrolling in the internship credits HAA 1905.

Academic Career: Undergraduate

Course Component: Workshop

Grade Component: Satisfactory/No Credit

HAA 0125 - MUSEUMS: SOCIETY AND INCLUSION?

Minimum Credits: 3

Maximum Credits: 3

What are museums? Who are museums for? This course prompts students to contemplate the role of the museum in society as a public institution. What publics do they serve? How do they generate civic identity and cosmopolitanism? How do they advance learning and spark curiosity? Simultaneously, this course also focuses intensively and purposefully on the historical dependency between the modern institution and forces of colonialism and imperialism, on contested claims of ownership and representation (cultural property and agency), and ethical questions that contemporary museums face (access and inclusion). The course will address the function of the museum in relationship to its collecting practices and its publics in the past and present, and examine innovative initiatives, projects, methods and structures that are being designed to advocate for greater inclusion and equity. Students will not only learn that museums were shaped by and in turn shaped uneven power relationships and inequity, but will also consider how museums might serve and speak with diverse communities more productively in the future.

HAA 0150 - ANCIENT ART

Minimum Credits: 3

Maximum Credits: 3

The Mediterranean Sea is a lake and its shores have produced many important cultures and artistic traditions. The course will survey the artistic and cultural traditions of ancient Mesopotamia, Egypt, and the Aegean Sea. Special attention will be paid to: 1) the relationship between the artistic traditions of these areas and the societies which produced them, and 2) the way in which influences from one culture were transformed by another.

HAA 0302 - RENAISSANCE ART

Minimum Credits: 3

Maximum Credits: 3

We will explore the arts - painting, sculpture, architecture, and the decorative arts - that flourished in Italy between 1250 and 1590. The renaissance is one of the great epochs of western culture; this course offers an introduction to the visual evidence that reveals the development of new attitudes about human life and its meaning. Emphasis will be on works of those revolutionary individuals who transformed the arts - Giotto, Donatello, Brunelleschi, Michelangelo, Leonardo, Raphael, Bellini, Titian, and Palladio, to name only the most important.

HAA 0350 - BAROQUE ART

Minimum Credits: 3

Maximum Credits: 3

This course will consider the careers of the major painters and sculptors of Italy (Caravaggio, the Carracci, Bernini, Cortona, Gaulli), Spain (Ribera, Zurbaran, Velazquez, Montanes, Murillo), France (G. De la Tour, P. De Champaigne, Poussin, Claude, Le Brun, Puget), Flanders (Rubens, van Dyck, Jordaens) and Holland (Hals, Rembrandt, Vermeer, Ruisdael) in the 17thC. It will also consider definitions of the term "baroque" in relation to the history of taste and later responses to 17thC artistic achievement.

HAA 0460 - ART IN PUBLIC: INCLUSION , IDENTITY, AND ACTIVISM

Minimum Credits: 3

Maximum Credits: 3

This course is an introduction to the social, political, and artistic issues surrounding the creation and interpretation of public monuments and public art. We will focus on our local urban environment, particularly the rich collection of works in and around Oakland, but we will also put these local works in larger national and global contexts. The course emphasizes hands-on learning, through multiple site visits, encounters with the works of art in their real urban contexts, and individual and group exercises building on these encounters.

HAA 0501 - AMERICAN ART

Minimum Credits: 3

Maximum Credits: 3

This course will introduce students to American painting, sculpture, and architecture, with an emphasis on painting, from the colonial period to the post-World War II era. Students will also learn the vocabulary of visual analysis and become familiar with the scope of art historical methodology. Students should leave the class with a broad understanding of the contexts in which American artists worked, a fund of information about artists and monuments of art in the American heritage, skills in visual analysis, and the capability to focus several types of critical questions.

HAA 0520 - ART AND POLITICS IN MODERN LATIN AMERICA

Minimum Credits: 3

Maximum Credits: 3

This course examines artistic developments in modern Latin America in relation to broader political forces. Latin America offers rich opportunities to study cases of artists and architects who worked in the service of governmental regimes during the twentieth century, such as Diego Rivera in Mexico and Oscar Niemeyer in Brazil. At the same time, we will consider historical moments in which artists employed their artworks to challenge or subvert political repression, as occurred in Ecuador in the 1930s and in Chile during the dictatorship of Augusto Pinochet. Beyond politics, this course focuses on the tensions indigenous vs. cosmopolitan, urban vs. rural, rich vs. poor, and the international dialogues that have informed the production and reception of art and architecture in Latin America from the age of independence to the present day.

Academic Career: Undergraduate

HAA 0730 - ART AND ARCHITECTURE OF THE MUSLIM WORLD

Minimum Credits: 3

Maximum Credits: 3

This course examines the art and architecture of the Muslim world as it developed through centuries of adoption, adaptation, and innovation which emerged as Islam spread throughout Eurasia, and Muslim communities came into contact with other Muslim and non-Muslim societies. Focusing on a number of prominent sites, buildings, and art

objects, this course introduces students to the plurality of traditions and artistic practices labeled as Islamic Art and Architecture. Furthermore, students will learn about various sources of influence that came from the center and peripheries of the Muslim world. Exploring these concepts will take the class on a journey through time and space: starting in the 7th-century from the birthplace of Islam in the Arabian Desert, we will move through a vast territory that expands from southern Spain to China, with a final stop in 21st-century Dubai. All along the way, buildings and art objects will serve as snapshots that open a window into the social, cultural, economic, and political life of these Muslim societies.

Academic Career: Undergraduate

HAA 0810 - EXPERIMENTAL CINEMA

Minimum Credits: 3

Maximum Credits: 3

This course examines the development of experimental cinema beginning in Europe in the 1920s with dada and surrealist films by Marcel Duchamp, Luis Bunuel and others, and continuing in the U.S. and elsewhere after World War II. The films, many of which are non-narrative and some of which are "abstract", will be examined for the ways in which cinema is used for the filmmakers personal expression. Consideration will be given to the artistic and cultural contexts in which the films were made, and comparisons will be made with other media, especially painting and sculpture.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies

HAA 0860 - INTRODUCTION TO PUBLIC HISTORY

Minimum Credits: 3

Maximum Credits: 3

The course will introduce students to the theory, methodology, and practice of Public History. Public History is the employment of professional historical methods by public and private agencies to engage communities in shaping the presentation of the past into usable histories. Through the course, students will be able to analyze how Public historians and the Public collaborate to explain individual and collective human behavior through a variety of methods, mediums, and contexts. Moreover, students will learn how Public Historians and the Public create and express historical meaning for their local, state, national, and global communities.

HAA 0965 - THE CITY OF ROME AND ITS ARCHITECTURE: FROM AENEAS TO ZAHA HADID

Minimum Credits: 3
Maximum Credits: 3
In this course we will have the absolute pleasure of studying the city of Rome through time and space. We will start with the city's mythical and legendary founding by Aeneas nearly three millennia ago and work our way through contemporary Rome. Focal points will include: the Augustan principate during the Roman Empire, the building and urban planning of the Baroque popes, Mussolini's "Third Rome," and the contemporary city of Renzo Piano and Zaha Hadid. It is important to note that this course aims to present a fuller and richer examination of the lived experience in the city of Rome through time. Recent archaeological work has shed tremendous light on the living and working conditions within city from antiquity to the present day.

HAA 1010 - APPROACHES TO ART HISTORY

Minimum Credits: 3
Maximum Credits: 3
HAA 1010 is the capstone research seminar required of all HAA majors and is an official w-course. Students in this

class will conduct extensive readings on a special topic devised by the course instructor. Each student in the class will be required to produce a substantive research paper under the guidance of the instructor. Students will work to master the skills that are fundamental to the discipline and broader arts related professions: critical thinking, research, and written and oral communication.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Letter Grade

Course Requirements: PLAN: History of Arts and Architecture (BA) or Architectural Studies (BA) or Museum Studies (BA); PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006)

Course Attributes: Capstone Course, Medieval & Renaissance Studies, Undergraduate Research, West European Studies, Writing Intensive Course (WRIT)

HAA 1011 - PITTSBURGH NEIGHBORHOODS

Minimum Credits: 3

Maximum Credits: 3

Pittsburgh Neighborhoods is a course where students learn about people, culture, history, and current issues that confront under-represented communities and neighborhoods in Pittsburgh. Throughout the semester, with direction from the instructor, students learn about and employ ways to see, document, and interpret a neighborhood by engaging the built environment, historical documents, and community members in storytelling. They approach the built environment as a cultural product, explore place as a fusion of material culture and human perceptions and practices, and frame questions of power around the politics of the built environment. In this class, we will employ methods that help us transcend the realm of the visual and explore the experiential and ephemeral. We will learn to observe with all our senses, listen to community members, and document life when in the field, and excavate and explore visual and textual records when in the archive. In doing so, we will adopt theories and methodologies from multiple fields, including urban/architectural history, cultural geography, anthropology, public history, and material culture studies.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Diversity General Ed. Requirement

HAA 1019 - CURATORIAL DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

This museum studies course draws on the University Art Gallery collection to develop an exhibition that will be realized in the Fall by students in the Exhibition Presentation Seminar. Within a defined thematic or collection-area focus, students will survey the holdings of the gallery to develop an exhibition concept and conduct in-depth research into a single work of art to contribute to a catalogue for the exhibition. Students will explore the key texts related to the subject of the exhibition and identify potential loans to complement its storyline.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

HAA 1020 - EXHIBITION DEVELOPMENT

Minimum Credits: 4

Maximum Credits: 4

This course teaches museum practice through practical experience with the permanent collection and with special exhibitions. Students will help in all aspects of exhibitions, from writing labels and/or catalogue copy, deciding how to best display the works, participating in the actual installation of exhibitions and planning related events such as tours.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

HAA 1021 - INSIDE THE MUSEUM

Minimum Credits: 3

Maximum Credits: 3

This course will enable students, particularly those who are pursuing the Museum Studies Minor, to gain behind-the-scenes knowledge of museum practices with sessions taught on location at the various Carnegie Museums of Pittsburgh. The course will provide students interested in museum careers with a rich variety of hands-on, practical, and experience-based learning in addition to theoretical exploration and connect students to professionals working in these institutions. Specific topics will vary depending on the opportunities provided by initiatives and projects that are underway at the time the class is offered.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

HAA 1022 - EXHIBITION PRESENTATION

Minimum Credits: 3

Maximum Credits: 3

This course teaches museum practice through practical experience with the permanent collection and with special exhibitions. Students will help in all aspects of exhibitions, from writing labels and/or catalogue copy, deciding how to best display the works, participating in the actual installation of exhibitions and planning related events such as tours.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

HAA 1025 - HISTORY AND ETHICS OF COLLECTING

Minimum Credits: 3

Maximum Credits: 3

This course will critically examine the history of public and private collecting practices, the cultural and scholarly rationales behind collecting, and the legal and ethical challenges that collections face. Case studies will include the British Museum and the Louvre, Pittsburgh's private collectors Frick and Mellon, the fate of art in Europe during World War II, the antiquities trade, and ethnographic collections. Using these and other examples, we will evaluate the arguments for and against universal art museums, the repatriation of works to source nations or original owners, and the protection of cultural heritage during times of conflict.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Undergraduate Research

HAA 1026 - EXHIBITIONS: FROM WORLD'S FAIRS TO GLOBAL BIENNIALS

Minimum Credits: 3

Maximum Credits: 3

This course surveys the Western origins of museums, world's fairs, and biennials in the 19th century and traces the increasingly global development of exhibitions of visual and material culture up through the present day. Our focus in this long and varied history will be on those shows that have sought, not without controversy, to shape viewers' knowledge of the past, while also structuring their sense of self and relationship to others in national, international,

universal, and/or global terms. We'll critically assess the motivations behind these exhibitions and the changing "world picture" each presented in relation to modernizing and globalizing tendencies of the past two centuries. We'll also take a close look not only at what these shows presented, but also how and for what purpose(s) our chosen exhibitions were organized. Whose worldview, ideology, and/or political interests did they serve? How in each case did the very arrangement of objects and the physical context of their presentation seek to articulate those interests? What sort of public did they envision and attempt to create? We'll also address how and to what extent the achievements and shortcomings of earlier exhibitions have informed the character of subsequent shows down to today. Throughout the course, we'll measure our understanding of this history against local examples of Pittsburgh's rich and extensive museum culture. Written assignments will involve students in exploring these and other local installations as we assess what role museums can and should continue to play in fostering understanding of ourselves and others now and into the future.

Academic Career: Undergraduate

HAA 1027 - HERITAGE SITES

Minimum Credits: 3

Maximum Credits: 3

According to the United Nations Educational, Scientific and Cultural Organization (UNESCO), heritage sites encompass sites of "outstanding universal value from the historical, aesthetic, ethnological or anthropological point of view." This course will develop the fundamental themes, ideas, and case studies required to analyze, understand and critically engage with heritage sites in a comparative and global perspective. We will begin charting the European origins of the western understandings of heritage and exploring the development of national and international heritage legislation, charters and organizations. The course will then explore emerging trends that challenge Eurocentric notions of heritage: from critical heritage studies to approaches that specifically focus on minorities, women, and indigenous groups, and the broader issues of human rights and development. Starting from the second third of the semester, case studies from different geographic areas, time periods and themes will be discussed: heritage sites and national identity; heritage sites and tourism; heritage sites and sustainable development; threats to heritage; negative and difficult heritage; heritage and human rights; heritage futures. Finally, we will discuss the increasing interest in bottom-up initiatives that focus on grassroots, people-centered approaches to foster community engagement and participation in the management, programming and interpretation of heritage.

HAA 1050 - WORLD ART:CONTACT AND CONFLICT

Minimum Credits: 3

Maximum Credits: 3

This course, an advanced undergraduate seminar, is a counterpart to the introductory core course Introduction to World Art and invites students to think more critically about 'World Art' as a disciplinary enterprise as it emerged in the last several decades with the global turn, post-colonialism, and a call for art history to be more inclusive. Students will be introduced to key terms that are employed by this discourse (contact zones, planetarity, world-picturing, cosmopolitanism). The course works through these ideas by focusing its attention on specific sites and art objects, case studies that explicitly circulate within or take as their subject the meeting point of different cultures and groups. First and foremost, this course regards 'the contact zone' as a messy and complicated place. To inhabit the earth as a human being, people encounter, perceive, collaborate with and often resist others. Through the spaces and material objects humans create, boundaries are established and individuals and communities are defined and circumscribed. Art objects and constructed spaces not only arise from but define the contact point of individuals or groups occupying different worlds. By studying these works as a space of encounter, students will learn that boundaries between people are porous, with cultural contact a zone of potentially productive collaboration but also power inequity and strife. How do works of art and built spaces incite, mediate, or instantiate such strife? How have people traditionally perceived to reside at the periphery employed artistic expression or rhetorical strategies to subvert existing power structures (the center) and formulate identity? Students who have taken the HAA 0010 Introductory version of this course are encouraged to take this more advanced version, but it is not necessary to have had HAA 0010 to enroll in HAA 1050

HAA 1105 - JERUSALEM: HISTORY AND IMAGINATION

Minimum Credits: 3

Maximum Credits: 3

The holy city of Jerusalem is at the heart of the western religious imagination and of contemporary political conflict in the middle east. Traditionally it has been a center of religious pilgrimage, home to Israelite kings and Islamic caliphs. Today it is a cutting-edge urban center marked by stunning demographic diversity, a rapidly expanding economy, and an intractable political crisis. In this course, we will examine the history of the city-from its earliest days to today-with an eye toward its religious significance in Judaism, Christianity, and Islam. Special attention will be given to Jerusalem's changing urban fabric: its architecture, neighborhoods, natural resources, economy, and religious institutions.

HAA 1110 - GREEK ART

Minimum Credits: 3

Maximum Credits: 3

The study of Greek art begins ca. 3000 B.C. In the so-called "age of bronze" and traditionally ends in 30 B.C. With the completion of the Roman conquest of the eastern Mediterranean. The course will trace the development of architecture, sculpture and painting in mainland Greece and to a lesser extent in the Greek colonies of Asia minor and Italy, emphasizing the changes in style and taste which took place over this period.

HAA 1230 - PAGANS AND CHRISTIANS: THE EARLY MIDDLE AGES

Minimum Credits: 3

Maximum Credits: 3

This course examines the art of the early middle ages, paying particular attention to the slow disintegration of the

Roman empire, the rapid rise of Christianity, and the evolving identity of Europe and the Mediterranean in a period of migration, crisis, and transformation. Special attention will be paid to the roles played by emperors and kings in this period, including Constantine, Justinian, Clovis and Charlemagne, and the peculiar blend of pagan and Christian cultures that defined early medieval art.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

HAA 1240 - ROMANS AFTER ROME

Minimum Credits: 3

Maximum Credits: 3

Romanesque architecture, evolving from the building practices of about A.D. 800 in the Carolingian empire, marks the coming of age of European culture in the post-antique era. Most of what survives was ecclesiastical in purpose and consists predominantly of monastery churches and their claustral structures. This course will treat both formal and functional issues in the development of the Romanesque tradition and will emphasize the mature period, 1050-1140.

Academic Career: Undergraduate

HAA 1305 - EARLY RENAISSANCE ARCHITECTURE

Minimum Credits: 3

Maximum Credits: 3

The early Renaissance (1420-1500) marked a fundamental change in the way mankind saw and thought about the world. This course examines the buildings, cities, projects, and theories of that period through its major designers. It concentrates on the new acceptance of rationality and modular linkage in building, which prefigures the rationality and scientific method so characteristic of the modern world.

Academic Career: Undergraduate

HAA 1440 - EXPRESSIONISM

Minimum Credits: 3

Maximum Credits: 3

A history of the development of modernist art in Germany from the founding of the "bridge" group in 1905 to the "death" of German expressionism in 1920. Although primarily focused on the art of the "bridge" and "blue rider" groups, the course will also situate this art within the broader context of German art production during these years (academic art, jugendstil, secession, dada).

HAA 1450 - ART AND POLITICS IN THE WEIMAR REPUBLIC

Minimum Credits: 3

Maximum Credits: 3

The course will examine art and architecture in Germany from the end of World War I to the rise of the national socialist dictatorship in 1933. Emphasis will be on a chronological study of the ways in which art developed in Germany under democratic social concepts and a new internationalist outlook in the early years of the republic, and the ways art became embedded in the political structures.

HAA 1455 - ART IN THE THIRD REICH AND MEMORIALIZATIONS OF THE HOLOCAUST

Minimum Credits: 3

Maximum Credits: 3

This course examines national socialist art and the fate of modernism under Hitler in the years between 1933 and 1945. As we will explore, Hitler's regime enlisted the arts and architecture, through party rallies, art exhibitions, building programs, and film, in enforcing its dictatorial policies on everything from the extermination of the Jews to sexuality and the war effort. We shall also consider the impact of the purge of modern art under Hitler on the work of such noted modernists as Otto Dix and Kthe Kollwitz, who chose to remain in Germany, and on the art of those who fled into exile, among them John Heartfield, George Grosz, and Max Beckmann. The final weeks of the course will consider critical issues involved in recent--and invariably controversial--attempts in museum building, sculpture, and site-specific installations to memorialize the Holocaust and examine Germany's Nazi past.

HAA 1490 - ART SINCE 1945

Minimum Credits: 3

Maximum Credits: 3

How have the societal stakes of "contemporary art" evolved since 1945, in local, regional, and global terms? This special edition of Art since 1945, tied to the 58th Carnegie International (September 24, 2022-April 2, 2023), will address this question through a close examination of Carnegie Museum of Art (CMOA)'s approach to collecting and exhibiting art since 1945. The Carnegie International is the second-oldest multiannual exhibition of contemporary art in the world and remains among the most consequential to take place around the globe. The fact that it takes place across the street from Pitt's Frick Fine Arts Building, and that Pitt students can visit the museum anytime for free during the academic year, provides us with an unparalleled opportunity to study the most urgent tendencies and debates in contemporary art firsthand. We will meet in the galleries at CMOA most weeks, to examine works currently on display from the permanent collection of art produced since 1945 alongside the projects included in the 58th Carnegie International. We will compare and contrast developments in painting, sculpture, and photography, as well as conceptual, performance, and installation art. Works by artists from around the world will be analyzed in the context of the shifting political and technological circumstances of the post-World War II era. By the end of the semester, students will be able to relate contemporary artistic strategies to specific historical and cultural contexts, and to critically assess works of art and exhibitions in terms of broader identity-based, mass media, and economic concerns and phenomena.

HAA 1520 - BLACK BUILT AMERICA: ARCHITECTURES OF BLACK RESISTANCE IN THE UNITED STATES

Minimum Credits: 3

Maximum Credits: 3

This course offers a critical history of the Black labor, creativity, craftsmanship, engineering, and activism that built the United States of America. It is undeniable that Black Americans and African Americans have been brutally marginalized by the instruments of systemic racism including segregation, redlining, eviction, and more recently gentrification. In this class, however, that very real and continuing history of oppression is studied as the fuel for the creative agency of Black individuals and communities. Appropriating, intervening, and shaping the built environment became one of the many forms of Black resistance to racism and systemic injustices. In doing so, Black hands and Black minds shaped the very fabric of America's landscape. Our class begins and ends in Washington DC, posing important questions about the hidden and overt symbols of Black heritage in the nation's capital.

HAA 1630 - CHINA: VILLAGE & URBAN ARCHITECTURAL SPACE

Minimum Credits: 3

Maximum Credits: 3

The design of Chinese cities is guided by philosophical principles established in the early dynastic period. Imperial cities follow a regular grid pattern that faces south, and includes an inner city, open only to the imperial leaders and aristocrats, and an outer city in which the business is carried out. The design and use of the city is guided by Confucian and Daoist ideals. Religious centers follow palace designs, but are tied to Buddhist, Confucian and Daoist practice. Village centers are arranged according to Daoist ideas about nature called Fengshui.

HAA 1640 - 20TH CENTURY CHINESE ART

Minimum Credits: 3

Maximum Credits: 3

The 20th century in china was a period of tremendous change. Artists and the society in which they lived crashed into the modern world to struggle with the weight of tradition as well as the draw of the new. We will consider this period and artistic visions of it by looking at arts including printmaking, painting, film, installation and other synthetic and combined forms. All artistic production will be contextualized within the political and cultural history of the period.

HAA 1641 - MODERN AND CONTEMPORARY CHINESE ART

Minimum Credits: 3

Maximum Credits: 3

This course examines art in China since ca. 1900, a period of major cultural transformation. Beginning with the collapse of the 2000-year-old imperial system and ending with the globalized nation-state, students will analyze works in a wide range of media, including ink and oil painting, printmaking and photography, architecture, and video and performance art. Modes and movements range from "national painting" (guohua) and modernist design to socialist realism and state propaganda, contemporary craft, and experimental calligraphy.

HAA 1692 - BUDDHISM CIVILIZATION ALONG THE SILK ROAD

Minimum Credits: 3
Maximum Credits: 3
This class serves as an introduction to Buddhism from its origins through the seventh century CE as it moved along the Silk Road, the ancient EurAsian trading network that is considered one of the earliest and most important super highways of trade and culture. Concomitantly, it serves as an introduction to the silk road as the scenario for contact and exchange. The emphasis is on religious praxis, the actors and places that transformed Buddhism and were transformed by it. We will examine archaeological remains and art and discuss how they complement or sometimes contradict textually-based historical narratives. Through the examination of four case studies we will discuss questions related to religious interaction as embodied in material culture and analyze it in context.

HAA 1806 - AMERICAN INDEPENDENT FILM

Minimum Credits: 3
Maximum Credits: 3
This course examines the development in the U.S. Of independently produced film as an art form, and the filmmaker as an artist, from World War II to the present. Filmmakers to be considered include Maya Deren, Kenneth Anger, Stan Brakhage, Bruce Baillie, Hollis Frampton and others. An examination will be made of the relationships between the films studied and other forms of modern art, such as "abstract expressionism", "structuralism" and "postmodernism". This course does not include "independent" Hollywood and other commercial feature filmmaking.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: Film Studies

HAA 1820 - DOCUMENTARY FILM

Minimum Credits: 3

Maximum Credits: 3

This course examines the development of documentary film from the late 19th century to the present. The films to be considered include such classics as Nanook of the North, Man with a Movie Camera, Triumph of the Will, and Titicut Follies. The premise of the course is that documentaries are never "objective" in any absolute sense. The course will demonstrate, rather, that the forms and strategies employed in a documentary film invariably reveal the thinking of the filmmaker as an individual, and reveal the era and context in which the film was made.

Grade Component: Satisfactory/No Credit

Course Requirements: PLAN: History of Art & Architecture (BA)

HAA 1904 - UNDERGRADUATE TEACHING ASSISTANTSHIP

Minimum Credits: 1

Maximum Credits: 3

This course enables advanced majors to partner with a faculty member as a teaching assistant in a pre-existing departmental course. This collaborative project will result in the enrichment of the course and improve the teaching-learning enterprise for all parties (faculty, Undergraduate teaching assistants, and students enrolled in the course).

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Satisfactory/No Credit

HAA 1905 - MUSEUMS STUDIES INTERNSHIP

Minimum Credits: 3

Maximum Credits: 3

Museum studies minors are required to complete a 3-credit academic internship under the course number HAA 1905. This is both an academic course and an internship placement. Students receive substantive mentoring from a site supervisor at a local museum, collection or historic site, and engage in projects with learning outcomes, whether in curatorial, educational, communications or development departments. Students also participate in monthly cohort meetings with the other interns enrolled in the course, under the guidance of an HAA faculty member, and are required to produce a final product. Note: academic internships through HAA 1905 are also available to HAA majors as an optional elective. The student must apply for the internship through the HAA department.

Course Component: Independent Study
Grade Component: Satisfactory/No Credit

Human Resources Management

BUSHRM 1050 - MANAGING PEOPLE

Minimum Credits: 3

Maximum Credits: 3

Provides an introduction to the management of human resources at the organizational level. HRM is viewed as an integral part of the basic management process and the orientation of the course is toward developing managerial skills useful in establishing organizational personnel policy. Specific topics include the role of HR in the management process, HR planning and forecasting, job information systems, recruitment and selection, HR development, compensation, legal framework and evaluation.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: College of Business Admin; LVL: So, Jr, Sr

BUSHRM 1660 - PROJECTS IN HUMAN RESOURCES MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

BUSHRM 1685 connects undergraduate human resources students with a partner organization to develop/implement specific human resources strategies for an on-campus, student-operated business. Topics include: recruitment, hiring, training and team development, assessment and feedback, organizational change, and succession planning.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

BUSHRM 1665 - NEGOTIATING IN BUSINESS

Minimum Credits: 3

Maximum Credits: 3

Negotiating permeates human interactions. It affects balance and distribution of resources among nations, organizations, families and individuals. In business, outcomes of negotiations influence bottom-line. Students will understand theory behind successful negotiations; recognize situations that call for negotiation; explore use of alternative negotiating strategies and tactics; and be able to analyze, plan, and carry out a successful negotiation.

Academic Career: Undergraduate

Grade Component: Letter Grade

Course Requirements: PREQ: BUSORG 1020 or PSY 0680 or MGMT 1520 or MGMT 1301 (MIN GRAD 'C');
PROG: UCBA; PLAN: NOT CASBUS-UNK or BUSNB-MN

BUSHRM 1670 - GLOBAL WORKFORCE MANAGEMENT AND CHANGE

Minimum Credits: 3

Maximum Credits: 3

This course provides a framework for understanding business and legal challenges associated with effective workforce management around the world. We will examine how labor markets in the Americas, Europe and Asia compare in terms of labor costs and supply, workplace culture, and employment law. News events will be used to illustrate the

complex cultural and regulatory environment that multi-international firms face in such areas as talent and performance management, offshore outsourcing, downsizing and industrial relations. Finally, we will focus on successful expatriate assignments and globally-oriented careers.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

PROG: UCBA; PLAN: NOT CASBUS-UNK or BUSNB-MN

BUSHRM 1675 - HUMAN RESOURCES STAFFING

Minimum Credits: 3

Maximum Credits: 3

Provides an in-depth examination of the organizational staffing process. Procedures for human resource needs assessment such as personnel audits and forecasting are discussed. Recruitment strategies and recruitment sources are explored. The process of organizational choice by candidates may be covered. Emphasis on understanding basic types of assessment tools and procedures for choosing new employees. Core concepts in measurement and validity are discussed. Issues relating to organizational entry and socialization may also be covered.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

BUSHRM 1677 - TRAINING AND DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

In 2012 U.S. Firms spent \$62 billion on training and development programming for their employees. Such programs address the diversity of skills and demographic characteristics of the workforce, the complex technologies that workforce utilizes in the workplace and the competition resulting from ongoing globalization. This course is designed to provide students with an understanding of the strategic advantage gained by a firm as it designs and implements training and development programs. Topics covered include needs assessment, training design, training methods, and evaluation of training. In addition, employee, career and management development and the use of technology in training will be examined.

Course Attributes: Learning Sciences

BUSHRM 1680 - COMPENSATION AND PERFORMANCE MANGEMENT

Minimum Credits: 3

Maximum Credits: 3

Examines the general structure of an organization and the rewards employees seek in exchange for the efforts and contributions they provide. Topics include: rewards and motivating work environment; government and union influences; job content analysis, description and evaluation; determining competitive relationships, developing pay structures; measuring performance and paying for performance; employee benefits; administration of the compensation plan; executive, managerial, professional, and sales compensation.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: BUSORG 1020 or PSY 0680 or MGMT 1520 or MGMT 1301 (MIN GRADE 'C');

PROG: UCBA; PLAN: NOT CASBUS-UNK or BUSNB-MN

BUSHRM 1681 - DIGITAL HUMAN RESOURCE FOUNDATIONS

Minimum Credits: 3

Maximum Credits: 3

Human Resource Management majors can set themselves apart from their competitors for jobs by understanding and working with various human resource systems. Students will be much more marketable if they have worked with systems such as Oracle, PeopleSoft and Workday. Pitt HR and Pitt IT have agreed to help develop and staff (adjunct) an elective course for HR majors that will also be open to all Pitt Business undergraduates. Agreements for use of each of the systems will follow as needed.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

BUSHRM 1684 - ENTERTAINMENT MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

In this course students will get an in-depth overview of the film, media and entertainment industries from a management and content creation perspective. The overall theme will be the business of "the business". Students will learn from professionals working in various roles throughout this field. The industry is very complex with many people, deadlines, and projects all at different stages of development. Students will learn that the key to any successful business/project is effective project management coupled with strong creative material. The course will be led by a working executive in the entertainment industry and include a series of guest lectures on key topics related to entertainment management. Students will learn from interacting with each guest lecturer and learning about their day-to-day work and experiences in each aspect of the field and their path to their current roles. The course recognizes that opportunities for positions in entertainment industry are far greater than being in front of/behind the camera.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

BUSHRM 1685 - EMPLOYMENT AND LABOR RELATIONS

Minimum Credits: 3

Maximum Credits: 3

Provides a close examination of the day-to-day labor-management relationship and processes. Considers contract negotiations, contract administration, discipline and grievance procedures, and third-party conflict resolution assistance such as mediation, fact-finding and arbitration. Emphasis is placed on the structure, organization, and objectives of the parties. The similarities and differences between private and public-sector bargaining are also considered.

Academic Career: Undergraduate

BUSHRM 1686 - SPORTS MANAGEMENT PROJECT COURSE

Minimum Credits: 3

Maximum Credits: 3

The objective of this course is to provide the student a meaningful experience with a real-world client and problem. Each project is distinct and generally will afford opportunities for a team of students to apply conceptual and analytical skills taught in the CBA major and core classes and to report to the client the result of all assessments. While particular projects may have a primary focus on one functional area (marketing, finance, accounting, human resources, supply chain, business information systems or global management), each will also feature cross functional dimensions.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Satisfactory/No Credit

Course Requirements: PREQ: BUSHRM 1689

BUSHRM 1687 - HUMAN RESOURCES STRATEGY AND PLANNING

Minimum Credits: 3

Maximum Credits: 3

The role of human resources in creating a sustainable competitive advantage is covered in detail. Topics often include organizational factors (e.g. cultures, values) that impact HR planning and strategy, HR environmental analysis and competitor analysis, internal analysis of the HR system for competitive initiatives, HR contributions to business strategy formulation, human resources forecasting and planning, HR strategy implementation, succession planning, facilitating organizational change, downsizing and restructuring the organization, and HR aspects of mergers and acquisitions.

BUSHRM 1688 - HUMAN RESOURCE ANALYTICS

Minimum Credits: 3

Maximum Credits: 3

Three credit elective in the College of Business Administration. The course is designed to acquaint students with this rapidly expanding area in the human resource field. Using simulations from a variety of human resource analytics packages common in HR departments, students will learn to critically assess data and metrics for human resource problem solving and examine the manner in which such data is organized and reported. The class will also provide opportunity to interpret and report results from statistical and predictive analysis to aid decision making in the firm.

BUSHRM 1689 - SPORTS MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

Many students aspire to careers in the NFL, NBA, and major league baseball. But, as we all know, employment prospects in those organizations are decidedly limited. However, a February, 2014 forbes.Com post indicates that the sports industry as a whole will grow by \$145.3 billion between 2010 and 2015. This course recognizes that the sports industry is much broader than just professional sports teams including firms in sports clothing, sports equipment, sports drink, sports medicine, venue management, food and beverage, sports media, and sports marketing. The sports industry

is a labor intensive industry with human resource and project management skills as key success factors. This class is designed to examine these administrative skills which will serve well you in any of your career pursuits while satisfying your passion for sports. Planned topics, exercises and activities in the course include a look at game day preparations, facilities management including a behind the scenes tour of a facility, player selection (through a draft simulation) and retention, coaching, licensing, sports media, and sports marketing.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

BUSHRM 1690 - HUMAN RESOURCES MANGEMENT INTERNSHIP

Minimum Credits: 3

Maximum Credits: 3

The human resources management internship provides business credits for project assignments that augment a professional HRM work experience.

Academic Career: Undergraduate

Course Component: Internship

Grade Component: Satisfactory/No Credit

Course Requirements: PREQ: BUSHRM 1050 (MIN GRAD 'C')

BUSHRM 1695 - HUMAN RESOURCES MANGEMENT INDEPENT STUDY

Minimum Credits: 1

Maximum Credits: 3

An independent study course for students desiring to pursue in greater depth a specific set of human resources management issues or problems to which they have been introduced in other human resources management courses. The course involves directed reading and research under the guidance of a full-time faculty member.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Letter Grade

Course Requirements: PREQ: BUSHRM 1050 (MIN GRAD 'C')

BUSHRM 1711 - ITALIAN HOSPITALITY AND TOURISM

Minimum Credits: 3

Maximum Credits: 3

The course will explore the history, culture and heritage of Italy including food, wine and coffee. Museums, historical and religious landmarks will also be explored. Tourism is an important aspect of the Italian culture. Students will take an objective view on agritourism, wine tourism and ecotourism and analyze the impact and benefit to Italian tourism industry.

Hungarian

HUN 0101 - HUNGARIAN 1

Minimum Credits: 4

Maximum Credits: 4

The greatest part of the first term will be devoted to the presentation and practice of the basic sound patterns of the language, its fundamental sentence patterns, and sufficient vocabulary to illustrate and practice them. An introduction to the writing system will be offered together with the opportunity to acquire elementary writing and reading skills.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

HUN 0102 - HUNGARIAN 2

Minimum Credits: 4

Maximum Credits: 4

At the end of the second term of the first year of study the student should be able to produce all the significant sound patterns of the language, to recognize and use the major grammatical structures within a limited core vocabulary. The student should be able a) to engage in simple conversations with native speakers about a limited number of everyday situations and b) to read and write simple material related to the situations presented.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: LING 0291 or LCTL 0391; MIN GRADE: 'C' FOR LISTED COURSES

HUN 0103 - HUNGARIAN 3

Minimum Credits: 3

Maximum Credits: 3

The first term of the second year will concentrate on the further development of fluency in oral production and the improvement in the student's ability to understand the flow of speech as uttered by a native speaker. Increased attention will be paid to reading as a means of augmenting a recognition vocabulary and writing as a drill and as a means of consolidating and communicating the knowledge gained.

Academic Career: Undergraduate

Course Requirements: PREQ: LING 0293 or LCTL 0393; MIN GRADE: 'C' FOR LISTED COURSES

HUN 0105 - HUNGARIAN 5

Minimum Credits: 3

Maximum Credits: 3

This course builds upon the foundations from previous levels of Hungarian to help you refine and consolidate your knowledge from those levels and to expand your speaking, listening, reading and writing skills in more complex communicative situations. By further developing these skills, you will be able to express yourself creatively in both written and spoken Hungarian with more advanced-level grammar, context-specific vocabulary and a more thorough understanding of the cultural nuances that influence interactions in the language. We will also continue to develop cultural understanding of Hungary's customs, traditions, history and geography. Learning outcomes: Upon completion of the course, students who have attended classes and successfully completed all assignments, tests and quizzes with a minimum grade of B- should be able to: successfully apply their knowledge of the fundamental conventions of the language (e.g., word order, conjugation patterns, verb modes, noun cases) to analyze and create spoken and written discourse in familiar and several unfamiliar contexts, narrate and describe in all time frames using connected discourse of paragraph length, using aspect appropriately, in speech and writing incorporate a number of cohesive devices in their writing when providing descriptions or summaries, understand short spoken and written conventional narrative and descriptive texts, confidently relying on contextual clues if necessary, converse confidently with sufficient accuracy, clarity and precision when dealing with familiar situations, formally and informally, have a more in-depth understanding of Hungarian traditions, customs, geography and history. Grammar topics will include: review and expansion of previously learnt material (e.g. the conditional, the imperative-subjunctive, possessives, postpositions), the causative, infinitives with endings, relative clauses and various types of pronouns.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

HUN 0106 - HUNGARIAN 6

Minimum Credits: 3

Maximum Credits: 3

This course builds upon the material from previous levels of Hungarian and is meant to further expand your speaking, listening, reading and writing skills. We will be refining your previously acquired skills and learning new vocabulary to enhance your communicative and pragmatic competence. As a result, you will be able to use Hungarian in more complex communicative situations in speech and writing that require creative and resourceful use of advanced-level language skills. As always, we will also continue to develop cultural understanding of Hungary's customs, traditions, history and geography. Learning outcomes: Upon completion of the course, students who have attended classes and successfully completed all assignments, tests and quizzes with a minimum grade of B- should be able to: narrate and describe in all time frames, dealing effectively with some unanticipated complication, produce organized written descriptions, summaries and narrations with cohesive devices spanning several paragraphs, with good control of aspect understand more expanded spoken and written descriptions of various subjects as well as narrations in all time frames, confidently identifying the main facts and many supporting details contribute to conversations on a variety of familiar topics with ease and convey their message without misrepresentation or confusion, formally and informally have a more in-depth understanding of Hungarian traditions, customs, geography and history. Grammar topics will include: review and expansion of previously learnt material (e.g. cataphoric pronouns, the imperative-subjunctive, causative, the conditional etc.); functions of verbal prefixes, adverbial participles, reported speech.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

HUN 0107 - HUNGARIAN 7

Minimum Credits: 3

Maximum Credits: 3

This course focuses on various everyday as well as more specific topics selected to enhance students' reading, writing, speaking and listening skills in Hungarian. Topics are chosen to broaden vocabulary, illustrate advanced grammar points, and present Hungarian culture and history from different angles. The course counts towards the Hungarian minor. Learning objectives: Upon completion of the course, students who have attended classes and successfully completed all assignments, tests and projects with a minimum grade of B- should be able to: handle with ease and confidence a large number of communicative tasks in formal and informal settings on concrete and more abstract topics, communicate in paragraph-length discourse in speech and writing with detail and organization, use cultural knowledge to conform linguistically and behaviorally in many social and work-related interactions, understand with ease and confidence conventional narrative and descriptive texts as well as complex factual material, explain in detail and narrate with a high level of accuracy in all time frames, dealing confidently with unanticipated complication, use precise vocabulary and intonation to convey meaning, show great fluency and ease of speech. Grammar topics will include: adverbial participles, directional postpositions, postpositions with endings, pronouns, the conditional with the potential, review and expansion of previously learned material (e.g. cases, the causative, the conditional, the imperative-subjunctive, etc).

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

HUN 0108 - HUNGARIAN 8

Minimum Credits: 3

Maximum Credits: 3

This course focuses on various everyday as well as more specific topics introduced through literary texts to enhance students' reading, writing, speaking and listening skills in Hungarian at an advanced level. Texts are chosen to refine vocabulary, practice advanced grammar points and present Hungarian culture and history from different angles. The course counts towards the Hungarian minor. Learning objectives: Upon completion of the course, students who have attended classes and successfully completed all assignments, tests and quizzes with a minimum grade of B- should be able to: talk and write about various topics with specific vocabulary, use Hungarian grammar with high accuracy, use connected discourse with accuracy in speech and writing, manifest improved writing skills, including spelling, manifest improved fluency, enhance their understanding of native speakers, manifest improved pronunciation skills, demonstrate a deeper understanding of Hungarian culture.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

HUN 0120 - HUNGARIAN CULTURE THROUGH CONVERSATION

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to various elements of Hungarian culture through folk songs and films and focuses on the improvement of speaking and listening skills in Hungarian, with a secondary emphasis on reading and writing. Students will increase and refine their vocabulary and enhance their communicative competence and conversational proficiency while practicing their knowledge of Hungarian grammar. Students will also gain a deeper understanding of Hungarian folklore, traditions and history. Some secondary readings will be provided in English for background

information. Course objectives: Upon successful completion of the course, students who have attended classes and successfully completed all assignments and tests with a minimum grade of B will be able to: converse about various everyday topics in Hungarian with topic-specific vocabulary with increased fluency demonstrate an improved understanding of Hungarian grammar manifest improved writing skills, including spelling enhance their understanding of native speakers manifest improved pronunciation skills demonstrate a deeper understanding of Hungarian traditions, customs, folklore, geography and history demonstrate basic knowledge about the characteristics of Hungarian folk music and representative examples of cinematographic art make cross-cultural comparisons between their own culture and that of Hungary.

HUN 1615 - OUTSIDERS ON THE MARGINS: THE AFTERMATH OF SOCIALISM ON FILM

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to the aftermath of Socialism, focusing on East Germany and Hungary through movies. We will look at issues that have been specific to societies in the Eastern Bloc taking these two areas as examples, and thus offer insight into the development of these societies after the fall of Socialism all the way up to the present. A deeper understanding of this development will encourage students to think about current historical-political events from a broader comparative perspective, promote their knowledge about the region of East Central Europe, and help discuss these events in an informed manner. Film as an art reflects the struggles and preoccupations of the time and society it emerges from. The selection of films in this course provides students with a representative sample of issues that take center stage in movies about the shift from Socialism to Capitalism and the aftermath of this transition. Course readings and class discussions illuminate the historical and cultural background to the cinematographic pieces watched and discussed in the course. The movies, readings and class discussions provide insight into how Socialism shaped society and what ramifications it has for the further course of history after its collapse in 1989. More than thirty years after the official end of Socialism, the repercussions of the "cursed forty years" are still palpable in people's lives, their collective memory, societal issues and the way they influence domestic and foreign politics. Under Socialism, inhabitants of the Eastern Bloc largely remained isolated from the Capitalist world and thus remained outsiders to it, quasi-exotic beings who were often regarded with curiosity, pity or suspicion by those in the West. These sentiments are still echoed despite the collapse of Socialism in 1989 and the EU's Eastern Enlargement in 2004, as inhabitants of both the former Eastern Bloc countries and the Western world are still coming to terms with East Central Europe's transformation into democratic societies with a free market economy and the free movement of labor. Historical and cultural differences that had existed before the creation of the Iron Curtain did not cease to be in the Post-Socialist era; on the contrary, they precipitate in discussions and policy-making in the EU and at a global level, where members of the Visegrád countries and their former Eastern Bloc neighbors are yet again often regarded as the nonconformist outsiders on the margins of Europe. In an era of globalization, would we not expect mutual understanding of each other to be less problematic than before the change in 1989? What is the connection between forty years of Socialism and our current day in a Post-Socialist era? We will investigate issues of economic disparity, gender, sexuality, race, ethnicity, ability difference and criminality through a selection of cinematographic works made after 1989 presenting the effect of the change on people's lives from various perspectives. Some of these include the perspective of women, homosexuals, Jews, migrants, people with disabilities, and criminals (if they indeed are criminals), all in addition to the "average" person under Communist rule living on what was perceived by many "the margins" of Europe. The course thus looks not only at the Socialist and post-Socialist citizen as an outsider, but also groups that find themselves in an even more marginalized position - we might as well call them double outsiders because of their position in a society already disadvantaged to more developed Capitalist ones.

Grade Component: LG/SNC Elective Basis

HUN 1915 - FULBRIGHT SEMINAR IN HUNGARIAN STUDIES

Minimum Credits: 3

Maximum Credits: 3

Hungary today is a key site for competing plans for state- and peoplehood in the European Union. The country is also critical for making sense of the relationship between Europe's imperial-colonial legacies, Central Europe's capitalist and (post)socialist transformations, and EU integration, while providing deeper insight into the global issues of 'politics from below,' human rights and security, and migration. This is an interdisciplinary course taught by a visiting Hungarian Fulbright distinguished scholar. The content of the course will depend on the field and research of the individual scholar, but will typically explore history, culture, politics and / or society from a transnational and global perspective, focusing on contemporary Hungary within the broader context of Central Europe.

Industrial Engineering

IE 0015 - INTRODUCTION TO DATA ANALYTICS

Minimum Credits: 3

Maximum Credits: 3

In recent years it has become commonplace for organizations to use large amounts of data to make more informed data-driven decisions. This big data revolution has created an increasing need for engineers who can extract and communicate valuable insights from large and unprocessed data. This requires a variety of tools and techniques, from storing and retrieving the data, to processing it, to visualizing and analyzing it, to eventually effectively communicating any findings that are obtained from it. This course teaches these essential tools and techniques, and it prepares the student with the thought process needed to comfortably use these tools and techniques in an industry setting. The course is also a precursor for more advanced data science courses in the curriculum.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ENGR 0012 or 0016 or 0711; PLAN: Industrial Engineering (BSE or BEH)

IE 1012 - MANUFACTURE OF STRUCTURAL NANOMATERIALS

Minimum Credits: 3

Maximum Credits: 3

Description: this course covers contemporary research topics on the design and manufacture of nanostructured materials. In addition to design and manufacturing, this course would also emphasize the nanometer-scale phenomena that make nanostructured materials particularly attractive for structural applications. Topics such as dislocation theory, large strain plasticity phenomena, super plasticity and kinetics of coarsening will be discussed in the context of structural nanomaterials.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: Swanson School of Engineering

Course Attributes: Hourly Final

IE 1013 - MANUFACTURING PROCESS ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

The objective of this course is to instill a fundamental understanding of manufacturing processes by focusing on the processes, metallurgy and mechanics of deformation in metal forming. To this end, analysis techniques will be developed from solid mechanical principles (stress-strain relationship, deformation and failure) which would then be applied bulk deformation and material removal processes. The course assumes no prerequisites except basic concepts of stress, strain and strength of materials.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: Swanson School of Engineering

IE 1014 - DATA BASE DESIGN

Minimum Credits: 3

Maximum Credits: 3

This course introduces the fundamental aspects of database design and management within the context of a relational data base management system (DBMS). Covered topics include: relational model, database design life-cycle, database design optimization, client/server architecture, data modeling, SQL, database security, database management, data warehousing, internet database environment. Students will gain hands-on experience in analysis, design, implementation, and management of relational data base systems.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 1015 - GEOGRAPHIC INFORMATION SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

Explore the concepts and history of geographic information systems and learn to effectively use the most utilitarian GIS software, ArcGIS.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: Swanson School of Engineering

IE 1035 - ENGINEERING MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

This course focuses on management theory applied to engineering and technical organizations. Topics include: the management process and management functions (planning, organizing, leading, and controlling); project management; managing technical people; engineering ethics, globalization, and other contemporary management concepts.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: Swanson School of Engineering

IE 1040 - ENGINEERING ECONOMIC ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

Discusses cost estimation, time value of money, interest rate calculations, economic equivalence concepts, comparison of alternative investments, evaluating economic life and replacement alternatives, depreciation, the impact of taxes on engineering economic decisions, and dealing with uncertainty.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: MATH 0140 or 0220 or 0221 or 0235; PROG: Swanson School of Engineering (UENGR)

IE 1045 - TRANSPORTATION PLANNING METHOD: OR APPLICATIONS

Minimum Credits: 3

Maximum Credits: 3

This course will focus on modeling and optimization of a wide range of systems in the field of transportation. It will cover quantitative techniques of Operations Research with emphasis on applications in transportation systems analysis and planning: Operations, Management, Transportation technologies and evaluation of passenger and freight transportation systems, Implementation of the Decision Support Systems, Data Envelopment Analysis (DEA) and Heuristic Algorithms.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: IE 1070 or ENGR 0020 or ENGR 0021

IE 1051 - ENGINEERING PRODUCT DESIGN

Minimum Credits: 3

Maximum Credits: 3

Lectures will cover the following: cad functions and cad systems; design process; hardware issues; software issues; use of commercial software; graphics primitives; mathematical transformations; solid modeling; database management systems; relational databases; adding intelligence to cad systems. Laboratory sessions will deal with a diversity of design projects utilizing commercial software packages.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

IE 1052 - MANUFACTURING PROCESSES AND ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

You often hear in the news that manufacturing is an important pillar of economic growth, but what exactly is manufacturing? If you want to make a new product what do you do? Which materials to select and which processes to use for the production of components, devices and systems that we use every day? How to measure and analyze the characteristics of manufactured parts? In this class, you will learn about the fundamentals of engineering materials selection for manufacturing based on their behavior/properties. Next, you will learn about the different processes that are used in actual manufacturing plants, including metal casting, bulk deformation processes, machining, surface modification, additive manufacturing and other emerging processes. All will be discussed in the context of modern product development, prototyping and production. Finally, you will learn the techniques and tools used in collecting measurements for analyzing manufactured parts.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: School of Engineering

IE 1054 - PRODUCTIVITY ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

Introduction to industrial engineering concepts and thought process mapping, operations analysis, and design, 6s, lean systems, root cause analysis, methods engineering, standards development, predetermined time systems, computerized work measurement, motivation and incentives.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: CREQ: ENGR 0021 or ENGR 0020 or IE 1070; PROG: Swanson School of Engineering

IE 1055 - FACILITY LAYOUT AND MATERIAL HANDLING

Minimum Credits: 3

Maximum Credits: 3

Introduction to facility layout and location topics including activity relationships, space and personnel requirements, layout types, manual and computer algorithms for constructing layouts, single facility location methodologies, and

warehouse operations. Material handling methods and equipment including conveyors, lift trucks, carousels, automated guided vehicles, and automated storage and retrieval systems are also discussed.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (IE 1070 or ENGR 0021) and IE 1052; CREQ: IE 1081; PLAN: Industrial Engineering(BSE)

IE 1061 - HUMAN FACTORS ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

A study of human abilities, characteristics, behavior, and motivation in the design, development and operation of components and systems designed for human use.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: CREQ: ENGR 0021 or ENGR 0020 or IE 1070 or BIOENG 1000; PLAN: Industrial Engineering; LVL: Junior or Senior

IE 1062 - DATA ANALYTICS FUNDAMENTALS

Minimum Credits: 3

Maximum Credits: 3

This is a course in the fundamentals of data analytics that requires probability as a prerequisite. The objective is to prepare students to effectively collect and analyze data and to teach data-driven thinking, problem-solving and decision-making. In this class, we will cover various statistics and data mining methodologies and use them to analyze real-world problems.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: IE 1070 and IE 0015; LEVEL: Sophomores and above; PROG: Swanson School of Engineering

IE 1070 - PROBABILITY, RANDOM VARIABLES, AND DISTRIBUTIONS

Minimum Credits: 3

Maximum Credits: 3

The main objective of this course is to introduce IE majors to probability and probabilistic modeling as a foundation for motivating statistics and statistical methods.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: MATH 0150 or 0230 or 0231 or 0235; PROG: Swanson School of Engineering

IE 1071 - STATISTICAL TESTING AND REGRESSION

Minimum Credits: 3

Maximum Credits: 3

Data types and descriptive statistics, sampling distribution theory, Central Limit Theorem, estimation, confidence intervals (mean/proportion/variance; 1 and 2-sample), hypothesis testing (mean/proportion/ variance; 1 and 2-sample), test of independence of categorical variables, goodness of fit testing, simple & multiple linear regression, correlation,

and introduction to nonparametric statistics.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ENGR 0021 or ENGR 0020 or IE 1070; PROG: School of Engineering

IE 1072 - DESIGN OF EXPERIMENTS & QUALITY ASSURANCE

Minimum Credits: 3

Maximum Credits: 3

This elective course serves as a continuation of the second course to provide IE majors with background in designed experiments and quality assurance methods.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: IE 1071; PROG: Swanson School of Engineering

IE 1076 - TOTAL QUALITY MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

introduces the total quality management philosophies and practices of Deming, Juran, and others. We will focus on the use of statistical process control, understanding variability and process capability, acceptance sampling, as well as managing supplier relationships. Research papers and student teaching projects allow students to explore additional topics such as Kaizen, Taguchi methods, FMEA, etc.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: IE 1071 or ENGR 0020; PROG: Industrial Engineering

IE 1079 - LOGISTIC AND SUPPLY CHAIN ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

Modern supply chains are based on networks with a number of actors from manufacturer to distributor to retailer. This course covers the use of modeling for coordinating production, inventory, distribution, and transportation across a supply chain network.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (ENGR 0020 or IE 1070) and IE 1081; PROG: Swanson School of Engineering

IE 1080 - SUPPLY CHAIN ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

An overview of supply chain management with an emphasis on operations and strong quantitative orientation. Supply chain strategies; sourcing decisions; demand forecasting; aggregate planning; managing supply and demand; production and inventory control systems including MRP and JIT; dealing with uncertainty; distribution networks; coordination and integration.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: IE 1055 or 1082; PROG: Swanson School of Engineering

IE 1081 - OPERATIONS RESEARCH

Minimum Credits: 3

Maximum Credits: 3

Introduction to the decision-making process and mathematical modeling; theory and methodology of the simplex algorithm; duality theory, complementary slackness, post-optimality analysis; transportation and assignment problems; introduction to integer programming application to real-life case problems; computer codes.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: MATH 0250 or 0280 or 0206 or 0135 or 1181; PROG: Swanson School of Engineering

IE 1082 - PROBLSTC METH IN OPERATNS RES

Minimum Credits: 3

Maximum Credits: 3

Stochastic decision modeling techniques including discrete-time Markov chains, continuous time Markov chains and queuing theory.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (IE 1070 or ENGR 0020 or ENGR 0021) and (IE 1071 or 1081); PROG: Swanson School of Engineering; PLAN: Industrial Engineering (BS)

IE 1083 - SIMULATION MODELING

Minimum Credits: 3

Maximum Credits: 3

Students will learn how to perform a complete simulation study. Applications of discrete event simulation methods to queuing, inventory control, and production planning problems. Introduction to special-purpose simulation languages.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: IE 1071 or ENGR 0020 or ENGR 0021; PROG: Swanson School of Engineering

IE 1085 - DEPARTMENTAL SEMINAR

Minimum Credits: 0

Maximum Credits: 0

Departmental seminars present the engineering viewpoint by prominent speakers from industry and government. Also serves as an organizational forum for the university chapter of the institute of industrial engineers.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: H/S/U Basis

Course Requirements: PROG: Swanson School of Engineering

IE 1086 - DECISION MODELS

Minimum Credits: 3

Maximum Credits: 3

Decision making under uncertainty is the key to understanding a variety of problems from industry, including inventory control, revenue management, energy, healthcare, and logistics. This course covers the fundamentals of stochastic (sequential) decision models, including data-driven and risk-averse methods, with applications to real-world problems.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: IE 1070 or ENGR 0020 or ENGR 0021; PROG: Swanson School of Engineering

IE 1089 - ADDITIVE MANUFACTURING

Minimum Credits: 3

Maximum Credits: 3

In this course we will analyze the seven primary types of additive manufacturing, their materials, and machines, highlighting their benefits and limitations. Examples of industrial applications will be given along with ongoing research trends and future directions. Labs will focus on design for additive manufacturing, data capture and input, machine setup, and post processing. Field trips will include observation of machine building and part production at some local industries.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: Swanson School of Engineering

IE 1090 - SENIOR PROJECTS

Minimum Credits: 4

Maximum Credits: 4

Analytical investigation techniques for total project problems in technical organizations. Involves solving of client problems utilizing industrial engineering capabilities acquired by students during program of study. Provides students with project team experience, report writing and seminar presentation of team results. Students must be enrolled in this course at least one month prior to the start of the semester.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: CREQ: IE 1035 or 1080 or 1083; PROG: Swanson School of Engineering

Course Attributes: Capstone Course

IE 1098 - SPECIAL PROJECTS

Minimum Credits: 1

Maximum Credits: 4

Independent study projects in specialized industrial engineering topics. Students must have the permission of a faculty member who agrees to mentor the independent study. Independent study is not permitted for subject areas that are part of the regularly scheduled coursework.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Letter Grade

IE 1102 - LEAN SIX SIGMA I (GREEN BELT)

Minimum Credits: 3

Maximum Credits: 3

This course provides an introduction to lean and six sigma principles with an emphasis on the application of statistics to quality control. Topics include value stream mapping, various lean tools, DMAIC methodology, data collection and measurement, and applications of ANOVA and doe. A project is required and the student should be prepared for green belt certification at the end of the course.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: IE 1054 and (IE 1071 or ENGR 0020 or ENGR 0021); LVL: Junior or Senior; PROG: Swanson School of Engineering;

IE 1103 - LEAN SIX SIGMA II (BLACK BELT)

Minimum Credits: 3

Maximum Credits: 3

This is a follow up course in lean and six sigma covering topics such as influence principles and techniques, systems analysis, design for six sigma, lean enterprise analysis and response surface methods. Several projects are required and the student should be prepared for black belt certification at the end of the course.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: IE 1102; PROG: Swanson School of Engineering

IE 1104 - FRUGAL ENGINEERING & VALUE ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

This course will focus on the principles of frugal design of products and processes. Foundational skills in Value Engineering/Analysis including tools such as Functional Analysis will be detailed. Additionally, topics such as Customer Needs Identification, Quality Engineering, Operational Excellence and Lean Process Engineering will be integrated into developing frugal product and process designs. Students in the course will have taken the first step towards certification as Value Methodology Associates (VMA) offered by the SAVE International.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

IE 1106 - OPERATIONS IMPROVEMENT IN HEALTHCARE

Minimum Credits: 3

Maximum Credits: 3

This course leads students to apply basic industrial engineering tools to healthcare operations, with a focus on healthcare providers. This includes data gathering, process mapping, system analysis and modeling, work sampling, work study, and workflow improvement. This course will provide an overview of the differences between healthcare and other more traditional industrial engineering settings (e.g., manufacturing, retail), and the opportunity to apply industrial engineering techniques, while developing and understanding basic healthcare operations and systems in the United States. (This class is designed to be a complement to IE 1108/2108.)

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (IE 1040 and IE 1054) and (ENGR 0021 or ENGR 0020 or IE 1070); PROG: Swanson School of Engineering

IE 1108 - HEALTH SYSTEMS ENGINEERING: QUANTITATIVE ANALYTICS

Minimum Credits: 3

Maximum Credits: 3

This course leads students to apply basic industrial engineering tools to healthcare, with a focus on the financial aspect of healthcare (payers and reimbursement, revenue cycle, and other financial analytics). This course familiarizes students with healthcare financial data, demographic and population health information, quality ratings, and other key data and measures. Students will access data from commercial payers, government healthcare programs and/or hospitals, and utilize data analysis and industrial engineering tools to better understand the financial aspect of healthcare systems in the United States. (This class is designed to be a complement to IE 1106/2106.)

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (IE 1040 and IE 1054) and (ENGR 0021 or ENGR 0020 of IE 1070); PROG: Swanson School of Engineering

IE 1122 - FUNDAMENTALS OF SYSTEMS ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

This course will focus on the fundamentals of systems engineering, including technical processes (e.g., requirements definition, architecture design, system verification), technical management processes (e.g., project planning, risk management), agreement processes (acquisition and supply) and project-enabling processes (e.g., life-cycle model management, quality management). Key systems engineering techniques and methods (e.g., system modeling and simulation, function-based systems engineering) will also be discussed.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Industrial Engineering (BSE or BEH); LEVEL: Senior

IE 1123 - PROJECT MANAGEMENT FOR ENGINEERS

Minimum Credits: 3

Maximum Credits: 3

The focus of the course will be to understand professional project management in achieving strategic organizational objectives and mitigating risks. The process for obtaining professional project management (PMP) certification will be the foundation. The six domains of project management that will be addressed include: initiating the project, planning the project, executing the project, monitoring and controlling the project, project transition and closure, professional and social responsibility.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: IE 1035; PROG: Swanson School of Engineering

IE 1144 - DISCRETE OPTIMIZATION: MODELING AND COMPUTATION

Minimum Credits: 3

Maximum Credits: 3

Discrete optimization is a powerful modeling and computational tool in decision making, especially for critical industrial systems (e.g., transportation, energy and healthcare systems). In this course, we focus on learning various modeling techniques, classical and popular models (including location, scheduling and material handling problems), and solution techniques (including exact and heuristic algorithms) for these models that lead to millions of dollars

savings.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: Prerequisites: IE 1081 (Operations Research) for senior undergraduates or IE 2001 (Operations Research) for master students

IE 1155 - DISCRETE OPTIMIZATION AND APPLICATIONS IN INFRASTRUCTURE SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

Discrete optimization is a powerful modeling and computational tool in decision making, especially for critical industrial systems (e.g., transportation and energy systems). In this course, the focus will be on learning various modeling techniques, classical and popular models (including location, scheduling and transportation problems) and solution techniques (including exact and heuristic algorithms) for these models that lead to millions of dollars in savings.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: IE 1081; PLAN: Industrial Engineering

IE 1171 - DATA FOR SOCIAL GOOD

Minimum Credits: 3

Maximum Credits: 3

This course is organized in three modules: (i) Essence of Data, (ii) AI in the Fabrics of Society, and (iii) Algorithms in the Wild. The first module covers canonical machine learning tasks (classification, clustering, prediction, and estimation) using real-world datasets in applications areas that have societal significance, e.g., medical decision making, bank loan approvals, and bail-setting. The second module covers topics in Law, Ethics, Economics, and Media building on societal implications of the tools encountered in the first module. The third module covers topics in algorithmic fairness and privacy and includes several case studies of algorithms being used for social good, e.g., for wildlife preservation, to prevent poaching, for allocating aid, etc.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: Pre-requisite IE 1071, ENGR 0020, or ENGR 0021

IE 1185 - STOCHASTIC MODELING AND DATA ANALYTICS IN HEALTHCARE OPERATIONS MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

The purpose of this course is to introduce stochastic modeling methods and data analytics tools for analysis, design, and decision support for healthcare delivery systems. The aim is to expose students to various application areas related to hospital workflow and operations management in healthcare systems. Emphasis is placed on rigorous model formulation to solve system performance evaluation and decision-making questions in healthcare delivery systems. The application of Markov process, systems modeling, simulation, and data analytics methods are discussed through papers and case studies in different care settings and areas (e.g., hospital workflow, patient safety, clinical diagnosis and decision process, prediction and intervention).

Academic Career: Undergraduate

Course Component: Lecture
Grade Component: Letter Grade

IE 1187 - OPTIMIZATION FOR MACHINE LEARNING

Minimum Credits: 3

Maximum Credits: 3

Modern machine learning involves fitting predictive models on huge data sets using optimization methods. The choice of optimization method is critical in these problems. For example, using traditional (factorization based) methods to perform regression with ten thousand data points and features will fail - a tiny problem by modern standards. Moreover, modern machine learning methods such as stochastic gradient descent are not plug-and-play: they require user expertise to select tuning parameters and interpret results. The goal of this course is to teach students how to use modern first-order methods to solve large-scale machine learning problems. Coding will be done in python using pytorch. Topics covered: Convexity, nonconvexity, critical points and saddle points. Gradient descent. First-order methods vs second-order methods. Training vs test error. Stochastic gradient descent. Hyperparameter tuning. Explicit and implicit regularization. Batch sizes, parallelization, and GPUs. Transfer learning. It is complementary but not required that students have taken an applied data analytics course (e.g., IE 1062 or IE 2064) prior to taking this course.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: MATH 0240, MATH 0280, IE 0015, and IE 1070 or ENGR 0021 or ENGR 0020

IE 1188 - SIMULATION MODELING AND APPLICATIONS

Minimum Credits: 3

Maximum Credits: 3

Advanced undergraduate course to the concepts, technology and applications of discrete-event and hybrid simulation. Covers the foundational concepts of simulation and the application of those concepts using commercial software. Topics include simulation, modeling, validation, input/output analysis, animation, and project success skills. Students will learn to use the Simio commercial simulation product as well as how to conduct/manage simulation projects. Practical experience will be gained in a simulation project.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

IE 1201 - BIOMATERIALS AND BIOMANUFACTURING

Minimum Credits: 3

Maximum Credits: 3

The purpose of this course is to provide students having a background in biomaterials and biomanufacturing with an opportunity to learn about the many modern aspect of biomaterials from basic science to clinical applications, across the formulations and chemistry of polymers, ceramics, metals and their use in various biomedical devices and implants, as well as their clinical performance and host responses. Students will also gain knowledge and experiences with designing and manufacturing biomedical devices through team projects. This one-semester, graduate course is intended for students majoring in the industrial engineering, or those who contemplating such a major (or minor). Students enrolled in the class should have an understanding of various biomaterials, and the ability to understand biological phenomena and manufacturing processes.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: Swanson School of Engineering

IE 1202 - INTRODUCTION TO MEDICAL PRODUCT DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

This is an undergrad/grad level course in medical product development covering fundamentals, regulatory processes, intellectual property management, and commercialization strategies. This course will provide basic knowledge on the development of medical devices including designing, manufacturing and testing medical devices. This course will also provide an overview of the medical product commercialization (i.e., bench to bedside). This course will develop the student's ability to select and properly use the biomaterials and manufacturing processes for developing medical devices, instruments, biomedical sensors and artificial organs. Students will also learn how to commercialize the medical products to the market through intellectual property management and regulatory processes.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

IE 1203 - WAREHOUSE OPERATIONS

Minimum Credits: 3

Maximum Credits: 3

In both manufacturing and service, transportation and logistics have become increasingly important. A principal component of many logistics systems are warehouses and distribution centers. Companies in the retail sector, healthcare related fields, and manufacturing all have significant distribution networks that utilize warehouses and distribution centers to supply their products. The aim of this course is to study and analyze key factors affecting the productivity of logistics operations and material flows in facilities. In particular, the course focuses on warehouse and distribution center design and operations including material handling equipment and system design, order picking, sortation systems, and cross docking.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: IE 1055, IE 1081, and IE 1082

IE 1204 - APPLIED SUPPLY CHAIN ANALYTICS

Minimum Credits: 3

Maximum Credits: 3

The purpose of this course is to equip students with the knowledge and skills to model, identify, mitigate, respond, and recover from disruptions and delays within supply chain networks. Students will learn about supply chain risk, reliability, resiliency, and quantitative models and methodologies that bring visibility to the supply chain. These topics are relevant in today's world and intersect the managerial, mathematical, and technological aspects of supply chain management.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: IE 1080 and IE 1055

IE 1301 - INTRODUCTION TO SAFETY ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

Introduction to Safety Engineering provides a basis to assist students in understanding and applying the scientific and engineering principles associated with the field of safety engineering. Specifically, the course will provide a background in, information on and application exercises in the natural, chemical and physical laws and forces

associated with safe design and implementation of work-related tasks and industrial and construction projects. These involve soils and excavation, trenching and shoring, permanent and temporary work platforms and scaffolding, cranes, rigging, ropes, slings and chains, fall protection, pressure vessels, confined space entry, energy isolation and preparation of equipment, hot work, welding, personal protective equipment and non-destructive testing. The course will also address safety related issues associated with building and facility design and layout, job, task and work setting layout. The course will stress the importance of safety engineering as part of both the corrective process and the design process.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: Swanson School of Engineering

IE 1302 - ENGINEERING FOR PROCESS SAFETY

Minimum Credits: 3

Maximum Credits: 3

Engineering for process safety" provides for a basic understanding of the quantitative and qualitative analysis methods of process safety engineering and process safety management. The course also provides guidance in planning, implementing and managing an overall process safety management program. It includes coverage of such applicable science and engineering principles as risk, human reliability, fault logic, failure modes, incident cost and prediction. The course is presented in an applied format where several different types of industries are discussed such as oil and chemical, pharmaceuticals, defense, nuclear, aerospace, paper, information technology and manufacturing industries. Regulatory influence on process safety is discussed. Quantitative aspects of the course include application of risk analysis, fault tree analysis, hazard and operability analysis, vapor-cloud dispersion modeling, human reliability analysis, failure modes and effects analysis, etc. This course is also intended to provide a background in managing an overall system safety program and its application to several industries, therefore, cost and effectiveness measurement are covered in the material.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: Swanson School of Engineering

IE 2012 - MANUFACTURE OF STRUCTURAL NANOMATERIALS

Minimum Credits: 3

Maximum Credits: 3

Description: this course covers contemporary research topics on the design and manufacture of nanostructured materials. In addition to design and manufacturing, this course would also emphasize the nanometer-scale phenomena that make nanostructured materials particularly attractive for structural applications. Topics such as dislocation theory, large strain plasticity phenomena, super plasticity and kinetics of coarsening will be discussed in the context of structural nanomaterials.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Industrial Engineering; PREQ: IE 2006

IE 2064 - DATA SCIENCE

Minimum Credits: 3

Maximum Credits: 3

Data Science involves working with complicated and messy data to build prediction models for use in making decisions. This course covers data processing and exploratory data analysis; regression, classification, and clustering

models; and model evaluation methods.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Industrial Engineering; PREQ: IE 2005

IE 2082 - LINEAR OPTIMIZATION

Minimum Credits: 3

Maximum Credits: 3

Review of linear algebra, matrices and the simplex methods; revised simplex method; generalized bounds; product form of inverse; pricing and pivot selection; duality and sensitivity analysis; separable programming; linear complementarity; Dantzig-Wolfe decomposition; column generation; generalized LP; semi-infinite LP, stochastic LP; interior point methods.

Academic Career: GRAD

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: School of Engineering students only.

IE 2088 - DIGITAL SYSTEMS SIMULATION

Minimum Credits: 3

Maximum Credits: 3

Nature of simulation; discrete event simulators; modeling complex systems; input data reduction; random number generation; output data analysis; validation of simulation models; experimental design; variance reduction techniques; comparing alternative systems; overview of simulation languages.

Academic Career: GRAD

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: School of Engineering students only.

IE 2097 - FINANCIAL ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

This course will focus on the structure of forwards, futures, swaps and options as financial instruments relating to the treatment of risk. Risk neutral pricing of these instruments will be studied assisted by principles of optimization with an added emphasis on engineering analysis, and an emphasis on "real world" applications of the "dervigem" software in accompanying CD to textbook.

Academic Career: GRAD

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: School of Engineering students only.

IE 2186 - REINFORCEMENT LEARNING

Minimum Credits: 3

Maximum Credits: 3

This is an introductory course on reinforcement learning (RL), a set of techniques used for learning sequential decision making policies from data. The basics of Markov decision processes necessary for RL will be covered, but a firm grasp of undergraduate level probability and basic programming ability (in Python and MATLAB) will be assumed. A wide range of methods (e.g., TD learning, Q-learning, policy gradients) that perform evaluation and control will be covered.

The focus in this course will be on applications, implementation, intuition and some theory.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: IE 2005 or IE 1070 or Equivalent and IE 1082 PLAN: Industrial Engineering

IE 2725 - DESIGN FOR INJURY PREVENTION

Minimum Credits: 3

Maximum Credits: 3

This course provides instruction for how to design a workplace to prevent occupational injuries. The course will primarily focus on preventing the three types of injuries, the injury mechanism, risk factors, tools for quantifying risk and engineering solutions will be covered. Upon completion of a course, students will be expected to develop custom engineering design solutions to prevent occupational injuries. Students will complete a project where they will design a solution to eliminate or reduce an existing hazard.

Academic Career: GRAD

Course Component: Lecture

Grade Component: Letter Grade

IE 2997 - RESEARCH, M. S.

Minimum Credits: 1

Maximum Credits: 12

Academic Career: Graduate

Grade Component: Grad SN Basis

Information Science

INFSCI 0010 - INTRODUCTION TO INFORMATION, SYSTEMS AND SOCIETY

Minimum Credits: 3

Maximum Credits: 3

Introduction to the concepts, principles, and skills of information science for students with no programming experience. Topics include the need for information and the use of information, data collection, coding, storage and retrieval, information processing, information display, and the evaluation of information. This course is intended for students enrolled in programs other than the BSIS major.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: MATH 0020 or 0025 or 0031 or 0110 or 0002 or 0220 or 0230 (MIN GRADE 'C') or MATH PLACEMENT SCORE (61 or GREATER)

Course Attributes: DSAS Quant.-Formal Reason General Ed. Requirement

INFSCI 0012 - INTRODUCTION TO PROGRAMMING

Minimum Credits: 3

Maximum Credits: 3

Introduction to concepts, principles, and skills of programming, including compilers, algorithms, and problem solving using a high level programming language such as c. Intended for students with little or no programming experience who seek an information science major.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

INFSCI 0013 - COMPUTER METHODS IN HUMANITIES

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to the use of computational modeling and programming to conduct text-based research in the humanities. Course goals include 1) learning how to identify research questions in the humanities that are amenable to computational analysis and processing and 2) designing and implementing xml-based computational systems to explore those questions. No prior programming experience or knowledge of foreign languages required.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

INFSCI 0014 - CYBERSECURITY AND THE LAW

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

INFSCI 0017 - FUNDAMENTALS OF OBJECT-ORIENTED PROGRAMMING

Minimum Credits: 4

Maximum Credits: 4

First programming course for is majors, designed for students with little or no programming experience. Basic principles and concepts of object-oriented programming using java. Classes, interfaces, operators, program control, arrays, testing, debugging, inheritance, polymorphism, and event handling. Techniques for simplifying the programming process and improving code quality. Activity-based learning.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: CREQ: INFSCI 0010

INFSCI 0201 - INTERMEDIATE PROGRAMMING WITH PYTHON

Minimum Credits: 4

Maximum Credits: 4

This is an intermediate Python programming course that provides fundamental skills needed to understand, design, and maintain information systems. While this course does not have formal programming prerequisites, it is not designed to be the first course in a computing sequence and it is very helpful for students to understand the basic concepts of programming (variables, conditional statements, loops) prior to taking this course. The course introduces object-oriented programming and functional programming paradigms, as well as software engineering best practices using Python programming language. This is an active learning course where students complete a realistic sequence of programming assignments using command line Python, as well as integrated development environments (IDE) such as Visual Studio Code and Jupyter Notebooks.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

INFSCI 0310 - COMPUTATION IN INFORMATION SCIENCE

Minimum Credits: 3

Maximum Credits: 3

The objective of this course is to introduce the mathematical and computational techniques used in information science with an emphasis on modeling and analysis of information technology (i.e., computers, data centers, communication networks). Topics course covers fundamental concepts, such as probability, statistical analysis of measurement data, matrix methods, graph theory, and simulation and modeling techniques. Also Covers Basic mathematical concepts that are relevant to information science, including matrix operators, probability, graph theory, binary codes, and entropy.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: MATH 0220 and (CMPINF 0401 or CS 0401 or INFSCI 0017); Minimum C grade or Transfer; Enrollment not permitted if previously enrolled in INFSCI 0009 or CS 1501

INFSCI 0410 - HUMAN-CENTERED SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

This course is an introduction to the study of the design and implementation of human-centered systems. Human-centered systems place the human at the center of the design process. This course will look at theoretical foundations and formal methods from a variety of fields including computer science, psychology and sociology; the actual design process, the dynamics associated with focusing on the individual, small groups and society; and may include selected special topics (instructor dependent) from the following: geospatial reasoning, mobile interaction, multimedia, ubiquitous computing, haptic interaction, virtual reality, wearable computing and sensor based systems.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: CMPINF 0401 or CS 0401 or INFSCI 0017; Minimum C grade or Transfer; Enrollment not permitted if previously enrolled in INFSCI 1044

INFSCI 0419 - PYTHON PROGRAMMING FOR DATA MANAGEMENT & ANALYTICS

Minimum Credits: 3

Maximum Credits: 3

This course will provide an introduction to programming, data processing, and data analytics using Python for highly motivated students with little or no prior experience in programming. The course will focus on learning the Python programming language in the context of working with data, planning and organizing programs, commonly-used algorithms, data management, data cleaning, and basic data mining.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: STAT 0200 or STAT 1000 or STAT 1100 or STAT 1151 or STAT 1152 or ENGR 0020 (Min grade C or Transfer)

INFSCI 0510 - DATA ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

This course will provide an introduction to programming, data processing, and data analytics using Python for highly motivated students with little or no prior experience in programming. The course will focus on learning the Python

programming language in the context of working with data, planning and organizing programs, commonly-used algorithms, data management, data cleaning, basic machine learning, data mining, and fundamentals of computational modeling.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: INFSCI 0310 or INFSCI 0009; Minimum C grade or Transfer; Enrollment not permitted if previously enrolled in INFSCI 0419

INFSCI 0530 - DECISION-MAKING IN SPORTS

Minimum Credits: 3

Maximum Credits: 3

Students will be introduced to concepts related to data collection, data quality, data analysis and modeling, as well as data visualization, through the context of sports analytics. Data and analytics have been part of the sports industry dating to the 1870s, when the first boxscore in baseball was recorded. Recently, advanced data mining and machine learning techniques have been incorporated into the operations of sports franchises. In this course, students will become familiar with data science concepts and data analysis techniques, the interpretation and use of probabilities, the notion of overfitting and how to avoid it, and the components of a useful visualization.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: College In High School

INFSCI 0610 - NETWORKS AND INFORMATION

Minimum Credits: 3

Maximum Credits: 3

Networks are present in most aspects of our lives. On a daily basis, we rely on communication networks to get our work done, on transportation networks to travel around the city or around the world, and on social networks (both physical and virtual) for our well being. There are many other ways in which networks enter our lives in visible and invisible ways. This course is an introductory look into the science of networks and how that science affects us in what we do. As a result, we will study some of the basic ideas that emerge out of network science with a particular attention to the ways in which these ideas arise in the networks that touch our lives on a regular basis. One of the principal types of networks that we will study will be computer communications networks. Thus, a secondary goal of this course is to introduce students to some of the principal ideas and technologies in computer networks.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: INFSCI 0310 or INFSCI 0009; Minimum C grade or Transfer; Enrollment not permitted if previously enrolled in INFSCI 1070

INFSCI 0702 - INTRODUCTION TO COMPUTATIONAL SOCIAL SCIENCE

Minimum Credits: 3

Maximum Credits: 3

This course will serve as the overall introduction to computational social science. It will showcase why computational social science is needed and distinct, and briefly introduces students to cutting edge applications of computational social science across topics that range from climate change and public health to cybersecurity.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

INFSCI 1014 - GRAPHICS

Minimum Credits: 3

Maximum Credits: 3

Techniques for producing graphical displays using computers. How to design and create computer graphics. Overview of artistic and technical knowledge needed to create graphics. What makes a good graphical display will be investigated.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: INFSCI 0017 or 0015 or CS 0401

INFSCI 1017 - IMPLEMENTATION OF INFORMATION SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

Second programming course for is majors. Advanced java language features required for professional software development. Data structures, oo design, graphical user interfaces, exception handling, multithreading, i/o, web and network programming.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: INFSCI 0017 or 0015 or CS 0401; CREQ: INFSCI 1022

INFSCI 1021 - TRENDS IN INFORMATION TECHNOLOGY MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PROG: USCI

INFSCI 1022 - DATABASE MANAGEMENT SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to core concepts in data and information management. It is centered on the core skills of identifying organizational information requirements, modeling them using conceptual data modeling techniques, converting the conceptual data models into relational data models and verifying its structural characteristics with normalization techniques, and implementing and utilizing a relational database using a multi-user database management system. The course will also include coverage of basic database administration tasks and key concepts of data quality and data security, among other emerging and contemporary topics.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: CREQ: INFSCI 0010

INFSCI 1023 - INNOVATION & ENTREPRENEURSHIP IN INFORMATION TECHNOLOGY

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PROG: USCI
Course Attributes: SCI Expression: Communication General Ed. Req.

INFSCI 1024 - SYSTEMS ANALYSIS AND DESIGN

Minimum Credits: 3
Maximum Credits: 3

The course covers a systematic methodology for analyzing a business problem or opportunity, determining what role, if any, computer-based technologies can play in addressing the business need, articulating business requirements for the technology solution, specifying alternative approaches to acquiring the technology capabilities needed to address the business requirements, and specifying the requirements for the information systems solution in particular, in-house development, development from third-party providers, or purchased commercial-off-the-shelf packages.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: INFSCI 0010

INFSCI 1025 - DESIGN OF INFORMATION SYSTEMS

Minimum Credits: 3
Maximum Credits: 3

Object-oriented design best practices; principles of system architecture; design patterns; requirements traceability; construction of UML-compliant models (class, sequence, communication and package diagrams); refactoring; iterative development of system prototype. Requires knowledge of fundamental oo programming concepts including abstract classes, interfaces, inheritance, polymorphism, and message passing.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: (INFSCI 0017 OR 0015 or CS 0401) and INFSCI 1024; CREQ: INFSCI 1022

INFSCI 1027 - IT PROJECT MANAGEMENT

Minimum Credits: 3
Maximum Credits: 3

Project management is the discipline to manage and oversee a project from inception to completion. As more and more organizations look to launch highly competitive and disruptive technologies in the marketplace, it's critical that you can apply these methodologies, tools, and techniques to successfully manage an IT project to completion. In this course, you will acquire a working knowledge of the two more widely used project management methodologies (Agile and Waterfall) and gain hands-on experience by working through real world case studies.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREREQ: INFSCI 1024

INFSCI 1029 - BUSINESS ESSENTIALS FOR THE IT PROFESSIONAL

Minimum Credits: 3

Maximum Credits: 3

Changing forces in the marketplace, along with the emergence of cloud computing and smart devices, have dramatically changed the "IT landscape". These changes are having a profound impact on the industry creating extraordinary opportunities as well as unprecedented challenges for IT professionals. As an IT professional, being able to adapt to this new landscape and emerge a stronger leader requires a unique approach, as well as a unique set of decision making skills. This course will enable you to strengthen your skills in problem solving, risk management, and consultative selling which are tools needed for successful decision making.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: INFSCI 1024

INFSCI 1031 - GOING DIGITAL: TRANSFORMATIONAL CHANGE

Minimum Credits: 3

Maximum Credits: 3

New digital tools are disrupting traditional business models, forcing organizations to develop new business models and strategies that not only strengthen capabilities and drive growth, but also provide a significant competitive advantage. IT business analysts and consultants are uniquely positioned to help organizations integrate these initiatives to solve their most pressing business problems. This course is designed to build IT consulting skills that enhance critical thinking, problem solving, written and oral communication, and presentation capabilities. The course is taught through a combination of lecture, class discussions, case studies and team based projects.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: INFSCI 1024

INFSCI 1038 - MANAGEMENT INFORMATION SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

A semester long project-based course where students will work on individual capstone projects on in teams depending on class size.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PROG:School Computing and Information or School of Information Science

INFSCI 1040 - INTRODUCTION TO DATA ANALYTICS

Minimum Credits: 3

Maximum Credits: 3

The ability to collect, store and process large amounts of detailed data in a variety of fields has led to a surge in the use of data in various decision-making tasks, ranging from governmental policy-making to drafting players in sports. Data literacy is thus important and in this first introductory course, we will focus on shifting the traditional mode of deterministic (yes/no) thinking to probabilistic thinking. We will see concepts from applied probability and statistics, while we will also explore a variety of data analysis methods including linear regression, matrix factorization, and network analysis.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: INFSCI 0019

INFSCI 1044 - HUMAN FACTORS IN SYSTEM DESIGN

Minimum Credits: 3

Maximum Credits: 3

Examines human-machine designs with special emphasis on human-computer interaction. Topics center on how to gather end user requirements, apply knowledge of human factors to inform design and incorporate results into iterated designs through the development life cycle.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: CREQ: INFSCI 0010

INFSCI 1049 - INTRODUCTION TO INFORMATION SECURITY

Minimum Credits: 3

Maximum Credits: 3

Introductory information security and privacy course for students outside of the BSIS/MSIS/MST majors. Covers fundamental issues and first principles of security and information assurance, including security policies, models and mechanisms related to confidentiality, integrity, authentication, identification, and availability issues related to information and information systems. The course will introduce students to risk management, security assurance, secure design principles, organizational security policy, legal and ethical issues in security, and standards and methodologies for security evaluation and certification.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: ANTI-req: Plans cannot be ISCI-BS, CSCI-BS, or INFSYS-CRI

INFSCI 1052 - USER CENTERED DESIGN

Minimum Credits: 3

Maximum Credits: 3

Introduces principles and programming of interactive systems. Interaction techniques are surveyed and incorporated in the design of interfaces.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: INFSCI 1044

INFSCI 1059 - WEB PROGRAMMING

Minimum Credits: 3

Maximum Credits: 3

This course will introduce the PHP scripting language. Students will download and install the apache web server, PHP, and MYSQL database. In addition, PHP installation in the sis labs will be utilized. The course will cover programming concepts, client server architecture, database access and XHTML/cascading style sheets. Students will write a full scale web application as their final project.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (INFSCI 0017 or 0015 or CS 401) and INFSCI 1022; LVL: Jr or Sr; PROG: School of Information Sciences or Sch Computing and Information
Course Attributes: Capstone Course

INFSCI 1060 - GAME DESIGN

Minimum Credits: 3

Maximum Credits: 3

Games have become ubiquitous in our modern world. In addition to entertainment, elements of games are present in everything from promotional advertisements to university classrooms. This course focuses on the exploration of game design in its many permutations. Join us as we critique and design all manner of entertainment and serious game. The class itself is designed as a multiplayer game experience to immerse and engage the student in game design on a fundamental level. One of the final goals of this class is for each student to have designed two separate games in their entirety. These games may be useful in the follow up course: INFSCI 1061: Game Implementation.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (INFSCI 0017 or CS 0401) and INFSCI 1022 and INFSCI 1027; PROG: Sch Computing and Information (USCI)

INFSCI 1061 - GAME IMPLEMENTATION

Minimum Credits: 3

Maximum Credits: 3

This course will introduce students to the digital game design and development process using the Unity 3D platform. Students will develop skills in scripting, user interface design, storytelling, and animation, as well as gain technical knowledge required to program, optimize, and deploy games for multiple platforms/devices.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (INFSCI 0017 or CS 0401) and INFSCI 1022

INFSCI 1068 - GEOSPATIAL INFORMATION SYSTEMS (GIS)

Minimum Credits: 3

Maximum Credits: 3

Introduction to geographic information system (GIS) concept and technology including spatial data sources, spatial data models and structures, spatial database management, map projection systems, geocoding and Georeferencing, spatial analysis, spatial data visualization (maps), GIS applications (e.g., Address-location finding, navigation, routing), and commercial GIS software packages.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (INFSCI 0017 or 0015 or CS 0401) and INFSCI 1022

INFSCI 1070 - INTRODUCTION TO TELECOMMUNICATIONS AND NETWORKS

Minimum Credits: 3

Maximum Credits: 3

Introduction to telecommunications and networks. Top-down orientation relates networking technologies to organizational goals and needs. Data communications and internet technologies and basic system performance analysis. TCP/IP, lans, wans, internetworking, and signals and communications media.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: CREQ: INFSCI 0010

INFSCI 1071 - APPLICATIONS OF NETWORKS

Minimum Credits: 3

Maximum Credits: 3

Second course in telecommunications and networks. Network architecture, protocols, performance, design, and analysis based on application needs, organizational requirements, user requirements, and performance objectives.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (INFSCI 0017 or 0015 or INFSCI 0401) and (INFSCI 1070 or 1004)

INFSCI 1072 - INTRODUCTION TO WIRELESS NETWORKS

Minimum Credits: 3

Maximum Credits: 3

Introductory broad overview for students with a basic background in telecommunications. Not for telecom majors. Principles of wireless communications and how they differ from wired communications. Fundamental concepts including: transmission and mitigation techniques (e.g., Modulation and coding, propagation, interference and antennas) for wireless systems, multiplexing techniques, wireless system architectures, mobility management, security, protocols and location technology. Systems include: cellular phone networks (e.g., Cdma2000, umts), wireless local area networks (e.g., Ieee 802.11G), personal area networks (e.g., Bluetooth), fixed point broadband wireless (e.g., WiMAX) and satellite systems.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: INFSCI 1070 or 1004

INFSCI 1074 - COMPUTER SECURITY

Minimum Credits: 3

Maximum Credits: 3

Overview of cybersecurity concepts and principles of security including confidentiality, integrity, and availability. Operating systems and database security concepts. Basic cryptography and network security concepts. Secure software design and application security. Evaluation standards, security management. Social, legal and ethical issues. Human factors in security.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (INFSCI 0017 or 0015 or CS 0401) and (INFSCI 1070 or INFSCI 1004)

INFSCI 1075 - NETWORK SECURITY

Minimum Credits: 3

Maximum Credits: 3

Network security and cryptographic protocols. Network vulnerabilities, attacks on TCP/IP, network monitoring, security at the link, network and transport layers. Cryptography, e.g., Secret and public key schemes, message authentication codes and key management. Wlan security, ipsec, ssl, and vpns. E-mail security (pgp, s/mime); kerberos;

x.509 Certificates; AAA and mobile IP; SNMP security; firewalls; filters and gateways. Policies and implementation of firewall policies; stateful firewalls; firewall appliances. Network related physical security, risk management and disaster recovery/contingency planning issues and housekeeping procedures.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (INFSCI 0017 or 0015 or CS 0401) and (INFSCI 1004 or 1070)

INFSCI 1079 - COMPUTER NETWORKING LABORATORY

Minimum Credits: 3

Maximum Credits: 3

The objective of this lab-based course is to gain knowledge of fundamental computer networking issues through hands-on experiments with network equipment and services. The sequence of labs start at the physical layer and progress up the protocol stack to the application layer. Topics covered are signal generation and analysis at the physical layer, ethernet and wlan performance and management, ip address planning and management, ip router configuration including rip, ospf, bgp, mpls protocols, tcp connection control, stateful packet filtering, network monitoring and management, signaling protocols for voip services, and web-based services configuration.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: INFSCI 1070 and 1071; PROG: School of Information Sciences or Sch Computing and Information

INFSCI 1080 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 3

Development of readings, research, and practical implementation of a system or other forms of study as arranged between student and instructor.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: LG/SNC Elective Basis

Course Requirements: PROG: School of Information Sciences or Sch Computing and Information; LVL: Jr or Sr

INFSCI 1081 - TEAM-BASED CAPSTONE PROJECT

Minimum Credits: 1

Maximum Credits: 3

Learn how to solve real-world problems and experience the satisfaction of seeing a project through from start to finish. Gain hands-on experience working directly with clients and observe how senior leaders make difficult decisions. Build skills in requirements gathering, scope management and stakeholder management. Strengthen project management and interpersonal skills by working in a team based setting under the guidance of faculty. Performance will be evaluated and graded based on the overall project success and assessments from the client, faculty and student peer reviews

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Letter Grade

Course Attributes: Capstone Course

INFSCI 1082 - INFORMATION SCIENCE COOPERATIVE PROGRAM

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: H/S/U Basis
Course Attributes: Capstone Course

INFSCI 1085 - INTERNSHIP

Minimum Credits: 3
Maximum Credits: 3
Supervised work in an information environment providing a frame of reference for understanding and an opportunity to apply the skills, methodologies, and theories presented in information science courses.
Academic Career: Undergraduate
Course Component: Practicum
Grade Component: Satisfactory/No Credit
Course Requirements: PROG: School of Information Sciences or Sch Computing and Information; LVL: Jr or Sr

INFSCI 1090 - SPECIAL TOPICS: PROGRAMMING

Minimum Credits: 3
Maximum Credits: 3
Advanced class focusing on current or specialized topic in programming area.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: LVL: Jr or Sr; PROG: School of Information Sciences or Sch Computing and Information

INFSCI 1091 - SPECIAL TOPICS: BEHAVIORAL

Minimum Credits: 3
Maximum Credits: 3
Advanced class focusing on current or specialized topic in behavioral area.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

INFSCI 1092 - SPECIAL TOPICS: SYSTEMS

Minimum Credits: 3
Maximum Credits: 3
Advanced class focusing on current or specialized topic in systems area.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: LVL: Jr or Sr; PROG: School of Information Science or Sch Computing and Information

INFSCI 1399 - SPECIAL TOPICS

Minimum Credits: 3
Maximum Credits: 3

Advanced class focusing on a current or specialized topic in Information Science

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: LVL: Jr or Sr; PROG: Sch Computing and Information

INFSCI 1400 - ANALYSIS OF INFORMATION SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

This course provides state-of-the-art skills in requirements management and scope management, which is critical for successful IT projects. Topics include best practices in eliciting, documenting, verifying and modeling requirements. This is an active learning course where students develop an analysis model for a realistic IT project which can serve as a foundation for an analysis model that is suitable for inclusion in the student's IT portfolio.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: INFSCI 0410 or INFSCI 1044; Minimum C grade or Transfer; Enrollment not permitted if previously enrolled in INFSCI 1024

INFSCI 1420 - USER-CENTERED DESIGN

Minimum Credits: 3

Maximum Credits: 3

Introduces principles and programming of interactive systems. Interaction techniques are surveyed and incorporated into the design of interfaces.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: INFSCI 0410 or INFSCI 1044; Minimum C grade or Transfer; and Enrollment not permitted if currently or previously completed INFSCI 1052

INFSCI 1430 - USER EXPERIENCE ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

This course presents the fundamental principles of user experience (UX) engineering across three broad categories of designs and products - digital products, virtual worlds, and physical spaces. This course will cover a broad range of topics, including specifying, designing, and evaluating user experiences, understanding the role of user experience in the design of digital products, virtual environments, and physical spaces, and the roles of psychology, sociology, and psychometrics in user experience design. This is an active learning course where students will be expected to read research papers, participate in class discussions, and work with external stakeholders.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (INFSCI 0410 or INFSCI 1044) and (INFSCI 0510 or INFSCI 0419 or INFSCI 0019); Minimum C grade or Transfer

INFSCI 1440 - SOCIAL COMPUTING

Minimum Credits: 3

Maximum Credits: 3

This course focuses on how social groups form and evolve, how members of these groups interact with each other, and how these groups are supported and augmented with computer systems. The course is interdisciplinary, drawing from the fields of computer science, psychology, and sociology. It covers key theories and technologies of social computing in terms of (1) computer systems supporting social behavior and (2) socially intelligent computing carried out by groups. Students will have a chance to explore social computing systems, get experience with social data analyses and focus on design, and evaluation of a social software as their final project for the course.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (INFSCI 0410 or INFSCI 1044) and (INFSCI 0510 or INFSCI 0419 or INFSCI 0019) and (INFSCI 0610 or INFSCI 1070); Min C grade or Transfer.

INFSCI 1450 - GAME DESIGN

Minimum Credits: 3

Maximum Credits: 3

Games have become ubiquitous in our modern world. In addition to entertainment, elements of games are present in everything from promotional advertisements to university classrooms. This course focuses on the exploration of game design in its many permutations. Join us as we critique and design all manner of entertainment and serious game. The class itself is designed as a multiplayer game experience to immerse and engage the student in game design on a fundamental level. One of the final goals of this class is for each student to have designed two separate games in their entirety. These games may be useful in the follow-up course, Immersive Media Technologies.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: INFSCI 0410 or INFSCI 1044; Minimum C grade or Transfer; and Enrollment not permitted if currently or previously completed INFSCI 1060

INFSCI 1460 - IT PROJECT MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

Project management is the discipline to manage and oversee a project from inception to completion. As more and more organizations look to launch highly competitive and disruptive technologies in the marketplace, it's critical that you can apply these methodologies, tools, and techniques to successfully manage an IT project to completion. In this course, you will acquire a working knowledge of the two more widely used project management methodologies (Agile and Waterfall) and gain hands-on experience by working through real world case studies.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: INFSCI 1400 or INFSCI 1024; Minimum C grade or Transfer; and Enrollment not permitted if currently or previously completed INFSCI 1027

INFSCI 1470 - IMMERSIVE MEDIA TECHNOLOGIES

Minimum Credits: 3

Maximum Credits: 3

This course will introduce students to the design and development of immersive media technologies, such as interactive narratives, digital games, augmented/mixed reality and virtual reality experiences. Students will develop skills in user experience design, user interface design, storytelling, and animation, as well as gain technical knowledge required to program, optimize, and deploy media experiences for multiple platforms/devices.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (INFSCI 0410 or INFSCI 1044) and (INFSCI 0510 or INFSCI 0419 or INFSCI 0019) and (INFSCI 0610 or INFSCI 1070); Minimum C grade or Transfer; and Enrollment not permitted if currently or previously completed INFSCI 1061

INFSCI 1499 - SPECIAL TOPICS: HUMAN-CENTERED

Minimum Credits: 3

Maximum Credits: 3

Advanced class focusing on a current or specialized topic in the Human Centered Computing and Systems areas in Information Science.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: LVL: Jr or Sr; PROG: Sch Computing and Information

INFSCI 1500 - DATABASE MANAGEMENT CONCEPTS AND APPLICATIONS

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to the practical methodologies of data design, management, storage, and retrieval in the context of relational database management systems. This course covers fundamental concepts of effective database development process, including entity-relationship model, normalization, structured query language (SQL), basics of transaction management and physical database design.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (INFSCI 0510 or INFSCI 0419 or INFSCI 0019) or (CMPINF 0401 or CS 0401 or INFSCI 0017 or CS 0422); Minimum C grade or Transfer; Enrollment not permitted if previously enrolled in INFSCI 1022

INFSCI 1520 - INFORMATION VISUALIZATION

Minimum Credits: 3

Maximum Credits: 3

Visualization is a way to explore, present, and express meaning in data, so there is no visualization without data. This course aims to investigate what data presents and how to present data, which requires both data analytics and information design knowledge. In this course, we will introduce concepts, methods and procedures of data visualization, with emphasis on the creative process of organizing, visualizing, communicating and interacting information. The course is designed to help students develop critical thinking for evaluating visualization system and practical skills in solving visualization problems.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (INFSCI 0410 or INFSCI 1044) and (INFSCI 0510 or INFSCI 0419 or INFSCI 0019) and (INFSCI 0610 or INFSCI 1070); Min C grade or Transfer

INFSCI 1525 - CURATING DIGITAL DATA

Minimum Credits: 3

Maximum Credits: 3

"Data curation" is the management and preservation of data, information and systems for the long-term. While ensuring the longevity of information was once the role of librarians and archivists, long-term access and persistence of digital information is dependent on intentional planning and ongoing stewardship by information creators and managers. In the BSIS program, we encounter aspects of data curation in a number of courses. This course will complement and round out your skills and understandings of data curation by exploring fundamental principles, processes, and practices for curating information during its active use and for the long-term. We will address the technical, social, ethical, and legal issues associated with curation of digital data in three sectors: government, corporate, and academic. Finally, we will apply our data curation fundamentals to specific information object types.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PROG: School of Computing and Information

INFSCI 1530 - DATA MINING

Minimum Credits: 3

Maximum Credits: 3

The ability to collect, store and process large amounts of detailed data in a variety of fields has led to a surge in the use of data in various decision-making tasks, ranging from governmental policy-making to drafting players in sports. Data literacy is thus important and in this first introductory course, we will focus on shifting the traditional mode of deterministic (yes/no) thinking to probabilistic thinking. We will see concepts from applied probability and statistics, while we will also explore a variety of data analysis methods including linear regression, matrix factorization, and network analysis.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PRE: [(INFSCI 0510 and MATH 0280)] or (INFSCI 0019 or INFSCI 0419) and (STAT 1061 or STAT 1060); Minimum C grade or Transfer; and Enrollment not permitted if currently or previously completed INFSCI 1040.

INFSCI 1540 - DATA ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

The objective of this course is to introduce major data engineering concepts and techniques. Data engineering utilizes methods of business intelligence and advanced data processing to implement scalable and distributed data ecosystems. Data engineers are focused on building tools, infrastructures, frameworks, and services that support large-scale data analytics. Therefore, data engineering forms a highly acclaimed discipline at the cutting edges of data science and software engineering. The course introduces and organizes data engineering aspects around the data processing pipeline. It covers key concepts of data acquisition, data storage and retrieval, data modeling, data warehousing, data integration, data fusion, as well as distributed and scalable data management.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: INFSCI 1500 or INFSCI 1022; Minimum C grade or Transfer

INFSCI 1550 - GEOSPATIAL INFORMATION SYSTEMS (GIS)

Minimum Credits: 3

Maximum Credits: 3

Introduction to geographic information system (GIS) concept and technology including spatial data sources, spatial data models and structures, spatial database management, map projection systems, geocoding and Georeferencing,

spatial analysis, spatial data visualization (maps), GIS applications (e.g., Address-location finding, navigation, routing), and commercial GIS software packages.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: INFSCI 1500 or INFSCI 1022; Minimum C grade or Transfer; and Enrollment not permitted if currently or previously completed INFSCI 1068

INFSCI 1560 - INFORMATION STORAGE AND RETRIEVAL

Minimum Credits: 3

Maximum Credits: 3

Problems and techniques related to storing and accessing unstructured information with an emphasis on textual information. Overview of several approaches to information access with a primary focus on search-based information access. Covers automated retrieval system design, content analysis, retrieval models, result presentation, and system evaluation. Examines applications of retrieval techniques on the web, in multimedia and multilingual environments, and in-text classification and event tracking.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: INFSCI 1500 or INFSCI 1022; min C grade or Transfer.

INFSCI 1570 - NETWORK AND WEB DATA TECHNOLOGIES

Minimum Credits: 3

Maximum Credits: 3

This course is about the core technologies and standards for web based distributed systems that we use to build Web applications. It includes an overview of the standardization process and the standards organizations. The course will introduce client and server-side technologies for the web with emphasis on front-end technologies such as HTML5, JavaScript, CSS, responsive design etc. and a set of back-end technologies and APIs.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (INFSCI 0410 or INFSCI 1044) and (INFSCI 0510 or INFSCI 0419 or INFSCI 0019) and (INFSCI 0610 or INFSCI 1070); MIN GRADE 'C' or Transfer FOR ALL COURSES LISTED; Enrollment not permitted if previously enrolled in CS 0334 or CS 1520

INFSCI 1599 - SPECIAL TOPICS: DATA AND INFORMATION

Minimum Credits: 3

Maximum Credits: 3

Advanced class focusing on a current or specialized topic in the Data and Information areas in Information Science.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: LVL: Jr or Sr; PROG: Sch Computing and Information

INFSCI 1600 - SECURITY AND PRIVACY

Minimum Credits: 3

Maximum Credits: 3

The objective of this course is to provide an understanding of information security ranging from threats, vulnerabilities,

and attacks to protection, detection, and response. Students will develop the ability to converse with the terminology used in information security (e.g., confidentiality, authentication, integrity, availability). The course will cover the basics of security issues in operating systems, applications, and databases. This is followed by an examination of the architecture and generalized protocol/operational aspects of information networks to identify how security attacks (e.g., denial of service) are possible. Basics of security mechanisms such as cryptography, firewalls, and secure protocols for networks will be presented. The course will include a discussion of privacy and human factors in security (e.g., usable security).

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: INFSCI 0610 or INFSCI 1070; Minimum C grade or Transfer; and Enrollment not permitted if currently or previously completed INFSCI 1075

INFSCI 1610 - QUANTUM INFORMATION AND COMPUTING

Minimum Credits: 3

Maximum Credits: 3

Introduces the emerging field of quantum information and computing, covering the theoretical foundations of the field and exposing students to quantum computing algorithms, quantum QUcommunication protocols, and quantum cryptographic primitives. Provides the necessary basics of quantum mechanics, quantum superposition states and entanglement, quantum information and how to quantify it, noise processes that affect quantum information, and universal set of quantum computing logic gates for quantum information processing. Course covers quantum computing algorithms search algorithms and Quantum Machine Learning algorithms; communication protocols; and cryptographic primitives such as bit commitment and entanglement games.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

INFSCI 1620 - ADVANCED SECURITY AND PRIVACY

Minimum Credits: 3

Maximum Credits: 3

Network security and cryptographic protocols. Network vulnerabilities, attacks on TCP/IP, network monitoring, security at the link, network and transport layers. Cryptography, e.g., Secret and public key schemes, message authentication codes and key management. WLAN security, IPsec, SSL, and VPNs. E-mail security (PGP, s/mime); Kerberos; x.509 Certificates; AAA and mobile IP; SNMP security; firewalls; filters and gateways. Policies and implementation of firewall policies; stateful firewalls; firewall appliances. Network related physical security, risk management, and disaster recovery/contingency planning issues and housekeeping procedures.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: INFSCI 1600 or INFSCI 1070; Minimum C grade or Transfer; and Enrollment not permitted if currently or previously completed INFSCI 1074

INFSCI 1630 - COMMUNICATION NETWORKS

Minimum Credits: 3

Maximum Credits: 3

The focus of this course is on the Internet the most widely-used communication network. Provides an introduction to data communications and networking, particularly examining elements of today's Internet. Students will learn how applications are supported and communicated through services offered by the Internet. Covers features of transport layer protocols, routing protocols, and medium access protocols. Also, the course will explore physical layer

technologies and provide a basic introduction to multimedia networking and network management concepts.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: INFSCI 1600 or INFSCI 1070; Minimum C grade or Transfer, and Enrollment not permitted if currently or previously completed INFSCI 1071

INFSCI 1640 - WIRELESS NETWORKS

Minimum Credits: 3

Maximum Credits: 3

The objective of this course is to provide an understanding of various wireless networking technologies ranging from cellular networks to wireless personal area networks and IoT, including how they differ from wired networks (e.g., signal transmission, interference, medium access, mobility, etc.). Emphasis is on most recent generations of wireless networks. The course will cover the architecture and generalized protocol/operational aspects of cellular networks or wireless wide area networks, wireless local area networks, and wireless personal area networks. Deployment issues, mobility, and radio resource management will be discussed. Physical layer concepts are provided as necessary. Localization and security issues in wireless networks will also be covered.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (INFSCI 1600 and MATH 0280) or INFSCI 1070 ; Minimum C grade or Transfer; and Enrollment not permitted if currently or previously completed INFSCI 1072

INFSCI 1650 - MULTIMEDIA COMMUNICATIONS

Minimum Credits: 3

Maximum Credits: 3

This course will provide students with an introduction to multimedia communications (audio, video, immersive) over data communication networks. It will explore multimedia applications and encoding, quality assessment, systems for transmission and distribution of multimedia, performance, challenges to building networks for content delivery, and designing them for future types of content that might result from advances in virtual reality, robotic manipulation, and immersive experiences.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (INFSCI 0410 or INFSCI 1044) and (INFSCI 0510 or INFSCI 0419 or INFSCI 0019) and (INFSCI 0610 or INFSCI 1070); Minimum C grade or Transfer

INFSCI 1660 - COMPUTER NETWORKING LABORATORY

Minimum Credits: 3

Maximum Credits: 3

The objective of this lab-based course is to gain knowledge of fundamental computer networking issues through hands-on experiments with network equipment and services. The sequence of labs start at the physical layer and progress up the protocol stack to the application layer. Topics covered are signal generation and analysis at the physical layer, ethernet and WLAN performance and management, IP address planning and management, IP router configuration including rip, OSPF, BGP, Mpls protocols, TCP connection control, stateful packet filtering, network monitoring and management, signaling protocols for VoIP services, and web-based services configuration.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: INFSCI 1600 or INFSCI 1070; Minimum C grade or Transfer; and Enrollment not permitted if currently or previously completed INFSCI 1079

INFSCI 1670 - SECURITY MANAGEMENT AND COMPUTER FORENSICS

Minimum Credits: 3

Maximum Credits: 3

This course covers issues related to the administration and management of the security of enterprise information systems and networks. Topics include intrusion detection systems, vulnerability analysis, anomaly detection, computer forensics, application logging, auditing and data management, risk management, contingency planning and incident handling, cyber defense/operations, and security program management and lifecycle. The course will detail the principles and tools related to these topics. The course will also cover security standards, evaluation, accreditation and certification process, security planning, compliance issues, ethical and legal issues in information, privacy, traceability, and cyber-evidence.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (INFSCI 1400 or INFSCI 1024) and (INFSCI 1500 or INFSCI 1022) and (INFSCI 1600 or INFSCI 1070); MIN C GRADE OR TRANSFER

INFSCI 1690 - CLOUD COMPUTING

Minimum Credits: 3

Maximum Credits: 3

This course provides an overview of the concepts and design principles behind existing cloud solutions. Topics include large scale data processing techniques such as mapreduce/hadoop and its related ecosystem, overview of virtualized commercial cloud models, system virtualization, hypervisors and virtualized platforms. Design of cloud storage systems such as key-value stores and geographically distributed storage systems. Introduction to security and privacy issues in cloud computing, issues of data and execution privacy in modern commercial cloud services.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ:(INFSCI 1400 or INFSCI 1024) and (INFSCI 1500 or INFSCI 1022) and (INFSCI 1600 or INFSCI 1070); MIN GRADE C OR TRANSFER

INFSCI 1699 - SPECIAL TOPICS: NETWORKS AND SECURITY

Minimum Credits: 3

Maximum Credits: 3

Advanced class focusing on a current or specialized topic in the networks and security areas in Information Science.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: LVL: Jr or Sr; PROG: Sch Computing and Information

INFSCI 1700 - DATA-DRIVEN COMMUNICATION

Minimum Credits: 3

Maximum Credits: 3

Digital transformation is disrupting traditional business models, enabling organizations to not only increase client value, but develop entirely new business models that drive exponential growth and deliver a significant competitive advantage. Harnessing this technology requires the ability to be better problem solvers and transform data into answers.

In this course, students will build upon their problem solving, data analytics, and communication skills. They will learn how to translate complex technical topics into actionable insights, leverage storytelling to influence and persuade, and visualize data for impact. In summary, students will use advanced information economics, data, their knowledge of human-centered systems, and include digital transformation in organizations and communities for ideation and communication to diverse audiences. This course may serve as a capstone for students in the Information Science major.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: 90 Credits or Career Level = Senior

INFSCI 1710 - DIRECTED RESEARCH

Minimum Credits: 3

Maximum Credits: 3

This course serves as one option to meet the Capstone class/experience required for the BSIS program. This will be a research-intensive experience guided directly by a SCI faculty member. The tasks will include development of a research proposal including literature review, research questions/problems, methodologies, time line, milestones, and implementation of a methodology. This will result in a quantitative or qualitative experiment ending with the student conducting and writing up an analysis of the results and associated conclusions.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SNC Elective Basis

Course Attributes: Capstone Course

INFSCI 1720 - INTERNSHIP

Minimum Credits: 3

Maximum Credits: 3

Supervised work in an information environment providing a frame of reference for understanding and an opportunity to apply the skills, methodologies, and theories presented in information science courses.

Academic Career: Undergraduate

Course Component: Internship

Grade Component: Satisfactory/No Credit

Course Requirements: Enrollment not permitted if currently or previously completed INFSCI 1085

INFSCI 1730 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 3

Development of readings, research, and practical implementation of a system or other forms of study as arranged between student and instructor.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: LG/SNC Elective Basis

Course Attributes: Capstone Course

INFSCI 1740 - TEAM-BASED CAPSTONE PROJECT

Minimum Credits: 3

Maximum Credits: 3

Learn how to solve real-world problems and experience the satisfaction of seeing a project through from start to finish.

Gain hands-on experience working directly with clients and observe how senior leaders make difficult decisions. Build skills in requirements gathering, scope management and stakeholder management. Strengthen project management and interpersonal skills by working in a team-based setting under the guidance of faculty. Performance will be evaluated and graded based on the overall project success and assessments from the client, faculty and student peer reviews.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: Enrollment not permitted if previously enrolled in INFSCI 1081

Course Attributes: Capstone Course

INFSCI 1750 - DIGITAL NARRATIVE AND INTERACTIVE DESIGN CAPSTONE

Minimum Credits: 3

Maximum Credits: 3

A Capstone project in DNID is the culmination of a student's academic journey, serving as a comprehensive demonstration of their skills, knowledge, and creativity in the field. It represents the integration of theoretical concepts, practical application, and critical thinking within the realm of interactive design. Overall, a capstone project in interactive design should serve as a testament to the student's creativity, technical proficiency, and ability to solve complex design problems in a collaborative and user-centered manner.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

INFSCI 1760 - TEAM-BASED CAPSTONE PROJECT: COMPUTING TECHNOLOGIES FOR CULTURAL PRESERVATION

Minimum Credits: 3

Maximum Credits: 3

Learn how to solve real-world problems and experience the satisfaction of seeing a project through from start to finish. Gain hands-on experience working directly with clients and observe how senior leaders make difficult decisions. Build skills in requirements gathering, scope management, and stakeholder management. Strengthen project management and interpersonal skills by working in a team-based setting under the guidance of faculty. The performance will be evaluated and graded based on the overall project success and assessments from the client, faculty, and student peer reviews.

INFSCI 2125 - NETWORK SCIENCE & ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: ISCI-MSI, ISCI-AC, BDAL-ACG, SAISYS-ACG, SAIS-ACG, ISCI-PHD, INFSCI-MSI, INFSCI-AC, INFSCI-PHD

INFSCI 2170 - CRYPTOGRAPHY

Minimum Credits: 3

Maximum Credits: 3

Principles of number theory, cryptographic algorithms and cryptanalysis. Steganography, block and stream ciphers, secret key encryption (DES, res, re-n), primes, random numbers, factoring, and discrete logarithms. Public key encryption (RSA, Diffie-Helman, elliptical curve cryptography, n'tru); key management, hash functions (md5, sha-1, ripemd-160, HMAC), digital signatures, certificates and authentication protocols. Cryptanalytic methods (known, chosen plaintext etc.) For secret and public key schemes (linear and differential cryptanalysis, pollard's rho method, number field sieve, etc.).

INFSCI 2415 - INFORMATION VISUALIZATION

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the visual design, structure, and organization of information as applied to library and information environments and web site design. Topics include visualization literacy, usability research, theories of visual perception and cognition, visualization models, visual analytics, and data graphics. The emphasis is on user and task-centered design for developing and evaluating visualization-based tools for various types of data. Practical work with visualization technologies will be included.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

INFSCI 2621 - SECURITY MANAGEMENT AND COMPUTER FORENSICS

Minimum Credits: 3

Maximum Credits: 3

This course covers issues related to the administration and management of the security of enterprise information systems and networks. Topics include intrusion detection systems, vulnerability analysis, anomaly detection, computer forensics, application logging, auditing and data management, risk management, contingency planning and incident handling, cyber defense/operations, and security program management and lifecycle. The course will detail the principles and tools related to these topics. The course will also cover security standards, evaluation, accreditation and certification process, security planning, compliance issues, ethical and legal issues in information, privacy, traceability, and cyber-evidence.

Course Requirements: PREQ: (INFSCI 2150 or TELCOM 2810) and TELCOM 2821; PLAN: ISCI-MSI, ISCI-AC, BDA-ACG, BDAL-ACG, SAISSYS-ACG, SAIS-ACG, ISCI-PHD, INFSCI-MSI, INFSCI-AC, INFSCI-PHD

Instruction and Learning

IL 2511 - CURR PRG DVLP-LOW INCDNC DISABS

Minimum Credits: 3

Maximum Credits: 3

This course addresses program and curriculum development for students with moderate/severe disabilities. Topics include the development of assessment, instruction/curricula for the following areas: personal management, social interaction, language communication, leisure, community, vocational, and functional academics.

Academic Career: GRAD

Course Component: Lecture
Grade Component: Letter Grade

Integrative Systems Biology

ISB 2045 - CELLULAR BIOLOGY OF NORMAL AND DISEASE STATES

Minimum Credits: 4

Maximum Credits: 4

This one-term course will explore the cellular basis of multiple disease states. The course, which meets twice a week (two hours each session), will be taught through both lecture and in class discussion of primary literature. Each of seven modules will examine normal cell biology and function and then define how defects in these processes lead to the spectrum of pathologies associated with each disease. Discussion of how bench top findings can be translated to treatments in the clinic will be facilitated by a diverse faculty that includes both basic and physician scientists. The seven modules are as follows: the first examines insulin secretion and signaling and how these events are perturbed in diabetes mellitus. The second module focuses on cell-cell adhesion and its role in cancer progression and epithelial barrier function. The third module defines how defects in endocytosis of the low-density lipoprotein receptor leads to hypercholesterolemia. The fourth analyzes the cellular basis of hypertension and how altered internalization of the epithelial sodium channel leads to elevated blood pressure. The fifth module investigates the role of apical membrane recycling and how defects in aquaporin-2 traffic leads to nephrogenic diabetes insipidus. The sixth module appraises the current state of our understanding of cystic fibrosis and how degradation of defective cystic fibrosis transmembrane conductance regulator by the quality control machinery in the endoplasmic reticulum and cell periphery leads to disease. The last module examines cell migration in wound healing and angiogenesis. At the end of the course students will have an increased understanding of normal cellular function and how research in cell biology can lead to a deeper understanding of diseases that impact millions of people each year.

Irish

IRISH 0101 - IRISH (GAELIGE) 1

Minimum Credits: 4

Maximum Credits: 4

The greatest part of the first term will be devoted to the presentation and practice of the basic sound patterns of the language, its fundamental sentence patterns, and sufficient vocabulary to illustrate and practice them. An introduction to the writing system will be offered together with the opportunity to acquire elementary writing and reading skills.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: European Union Studies, European and Eurasian Studies, Global Studies, Medieval & Renaissance Studies, Transatlantic Studies, West European Studies

IRISH 0102 - IRISH (GAELIGE) 2

Minimum Credits: 4

Maximum Credits: 4

At the end of the second term of the first year of study the student should be able to produce all the significant sound patterns of the language, to recognize and use the major grammatical structures within a limited core vocabulary. The student should be able a) to engage in simple conversations with native speakers about a limited number of everyday

situations and b) to read and write simple material related to the situations presented.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: LING 0221 or IRISH 0101; MIN GRADE: 'C'

Course Attributes: DSAS Second Language General Ed. Requirement, European Union Studies, European and Eurasian Studies, Global Studies, Medieval & Renaissance Studies, Transatlantic Studies, West European Studies

IRISH 0103 - IRISH (GAELIGE) 3

Minimum Credits: 3

Maximum Credits: 3

The first term of the second year will concentrate on the further development of fluency in oral production and the improvement in the student's ability to understand the flow of speech as uttered by a native speaker. Increased attention will be paid to reading as a means of augmenting are cognition vocabulary and writing as a drill and as a means of consolidating and communicating the knowledge gained.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: LING 0222 or IRISH 0102; MIN GRADE: 'C'

Course Attributes: DSAS Second Language General Ed. Requirement, European Union Studies, European and Eurasian Studies, Global Studies, Medieval & Renaissance Studies, Transatlantic Studies, West European Studies

IRISH 0104 - IRISH (GAELIGE) 4

Minimum Credits: 3

Maximum Credits: 3

At the end of the second term of the second year the student should be able to converse comfortably with a native speaker on a variety of non-specialized subjects. The student will be offered an opportunity to experience and more fully understand the culture of the people who use the language through readings of various types. More complex writing tasks will be expected at this level.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: LING 0223 or IRISH 0103; MIN GRADE: 'C'

IRISH 0105 - IRISH (GAELIGE) 5

Minimum Credits: 3

Maximum Credits: 3

This course follows level 4, in which students have laid a foundation for further language learning. We now move on to more independent learning, self-discovering, reading articles, and engaging in higher level thinking. Students work on their own and in groups to dissect the mechanics of the language, rationalize texts, and make connections between grammar, natural speech, and idiomatic phrases. Students are expected to come to class enthusiastic and prepared and use this time to learn.

Academic Career: Undergraduate

IRISH 1620 - CULTURAL IMMERSION IN IRELAND

Minimum Credits: 3

Maximum Credits: 3

This three-week immersive course is designed to give students a greater understanding of Ireland and Northern Ireland and the influence of the Irish language in Ireland today. Students will develop a new appreciation for Ireland's culture as we travel through the Emerald Isle, travelling from historic Belfast to cosmopolitan Dublin to the pastoral landscapes of Galway and beyond. This course is designed in two parts; first week you will travel to Belfast with Tony Novosel of the History Department at the University of Pittsburgh and explore the history and culture of Northern Ireland. For the remaining two weeks, you will travel in the company of your Irish-native instructor, throughout the island from the cosmopolitan vibrancy of Dublin to the more pastoral landscape of Galway and the Irish-speaking Gaeltacht beyond. In Ireland's capital, you will experience culture through live music, cuisine and a guided tour of the city. We will explore its history, meet with locals, and gain an understanding of Dublin's place in the world. On our westward journey, we will spend time in the City of the Tribes, Galway. This small pedestrian-friendly city is welcoming and accessible to travelers and has maintained its sense of "Irishness" throughout the Celtic Tiger boom years. Connecting here with the people and the language will enhance your cultural experience and allow you make those personal connections to the Island. Packed with activities and hands-on experience this course will give you a real-life experience, which will be invaluable to your appreciation of Ireland, the Irish language, its culture and people. Highlights will include Irish dance, Book of Kells, tour of government buildings, Gaelic football, conversing and engaging with native speakers and the "craic" of a traditional Irish music session. Ireland is changing and advancing while still maintaining a friendly close personal feel and this two-week course will allow students to see the past and present side by side.

ITAL 0050 - ITALIAN CONVERSATION

Minimum Credits: 1

Maximum Credits: 1

This 1-credit course offers students the opportunity to improve their ability to converse in Italian. Discussions center on topics of interest to students. Students can take this course after successful completion of ITAL 0102 and is designed to give intermediate-level students extra speaking practice. Students do not need to be enrolled in a concurrent Italian language class and therefore may take this class to maintain their spoken Italian. This course may be taken multiple times for credit, but these credits may not be applied to the Italian major or minor. Conducted entirely in Italian. Pre-requisite: ITAL 0102 or permission of the instructor.

ITAL 0055 - ITALIAN CONVERSATION AND CULTURE

Minimum Credits: 3

Maximum Credits: 3

The course focuses on developing the students' listening and speaking proficiency in Italian by providing them opportunities to hear and speak Italian in a variety of contexts, expand their Italian vocabulary, practice different modes of communication (presentational, interpretive and interpersonal), and learn specific verbal and non-verbal strategies to communicate successfully with others in Italian. Course work centers on a theme particularly relevant to Italian culture.

ITAL 0065 - INTENSIVE ADVANCED ITALIAN LANGUAGE FOR STUDY ABROAD

Minimum Credits: 6

Maximum Credits: 6

This 6-credit intensive advanced language course is offered at the Cultural Center for Foreigners of the University of Florence. Its goal is to prepare students to profitably attend the lecture-style lessons in Italian Literature and History conducted (also at the Center and entirely in the target language) by native Italian faculty of that university. The course is design to help the students complete the reading assignments upon which they will be individually tested - at the end of term - in a face-to-face meeting/exam. To this aim extensive and intensive reading skills are practiced in ITAL 1065 throughout the term, so as to enhance students' understanding and control of the language structures, provide them with an increasingly more specialized Italian vocabulary, and improve on their ability to recognize diverse linguistic registers

ITAL 0080 - RENAISSANCE ITALY: HUMANISM, POWER & THE ARTS

Minimum Credits: 3

Maximum Credits: 3

An introduction to Renaissance Italy, this class takes an interdisciplinary approach, exploring connections between major Renaissance works and developments across a wide range of fields: from the rise of humanism to the paintings of Botticelli; from Machiavelli's revolutionary handbook of power, The Prince, to his side-splitting comedy, The Mandrake Root; from the restless experimentation of Leonardo da Vinci to the birth of opera. No prerequisites. This class will be conducted in English and does not require knowledge of Italian. It satisfies the Geographical Region and Historical Analysis General Education Requirements, and counts for the Italian minor and major tracks.

Academic Career: Undergraduate

ITAL 0088 - ITALIAN AMERICA ON SCREEN

Minimum Credits: 3

Maximum Credits: 3

From Valentino to Vinnie Barbarino, from The Godfather to The Sopranos, from Stallone to Snooki, Italian and Italian American cultures have been a mainstay of the American film and television industries since the days of silent film. Through its survey of representations of Italians and Italian Americans, this course seeks to go beyond the stereotypical and scandalous ways in which these images are often produced (and received) to ask questions about the development of American ethnicity; the representation of masculinity and women in the Italian American context; depictions of Italian and Italian American criminality; the potential for culture clash between the Italian American and Italian traditions; and the relationship between stereotype and popular culture. This course is taught in English. No prerequisites. No knowledge of Italian is required.

Academic Career: Undergraduate

ITAL 0089 - HISTORY OF ITALIAN CINEMA

Minimum Credits: 3

Maximum Credits: 3

Taught in English, this course will introduce students to the history of cinema in Italy from the era of silent films to the present day. We will analyze films from all periods and consider a diversity of forms and genres, including mainstream narrative films, art films, avant-garde experiments, and documentaries. In our century-long journey from the silent blockbuster movies of the 1910s to the Italian super-hero films of the 2010s, we will get to know world-class directors such as Federico Fellini and genre masters such as Dario Argento. We will see what Italian cinema has borrowed from other traditions, and what it has given in return. We will appreciate how Italian b-movies would not exist without American blockbusters, and how a director such as Quentin Tarantino would not exist without Italian b-movies. We will learn about Italy and about how much of its history and of its culture can be seen hidden or deliberately displayed through the frames of Italian films. No previous course experience with cinema is presumed, as we will learn the basics of how to watch, discuss, and write about films and the film industry. Readings will be available in English and all films will have English subtitles.

ITAL 0090 - EURO CHIC: THE INVENTION OF FASHION

Minimum Credits: 3

Maximum Credits: 3

Since the Renaissance, Italy and France have occupied a fundamental role in the establishment and development of fashion as a creative and commercial enterprise deeply rooted in cultural mores. The course address the historical shifts in the cultural understanding of gender roles, class belonging, consumption habits and expectations, the international circulation of craftsmanship and celebrities, and technological innovation. We will start addressing the anthropology of body ornamentation, gender markings and the difference between costume and fashion. Our historical point of

departure is the grand arrival of Catherine De Medici from Florence to Paris in 1547, following her marriage to King Henry II of France. We then follow the progressive establishment of Paris as the capital of European (and eventually international) fashion, together with Italian cities like Florence, Venice and Milan. We also take a significant detour through London during the "dandy" era of the early 19th century and the "mod" and "punk" trends of the decades between 1960 and 1980. Punk leads us into a discussion of current international "anti-fashion" trends, such as the politics and economics of privilege, cheap labor and environmental concerns about "fast fashion." This course is taught in English. *This course may be used for the Italian Studies major (whether listed as FR 0090 or ITAL 0090), but does not count for the Italian major or the Italian minor.

ITAL 0110 - MODERN ITALY

Minimum Credits: 3

Maximum Credits: 3

An introduction to Italian literature and culture. The majority of readings are in the prose and poetry of modern Italian writers.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

ITAL 0113 - MODERN AND CONTEMPORARY CULTURE

Minimum Credits: 3

Maximum Credits: 3

This course is an intermediate-level course (Prerequisite: ITAL 0103) that explores the last 100 years of Italian history, society, and culture. We will examine the major social movements of the 20th and 21st centuries and artistic/literary reactions to these events: Fascism, WWII, and Reconstruction; the Economic Miracle and the rise of modern pop culture; the violence, terrorism, and mafia activity of the Years of Lead; and the more recent reign of Berlusconi, Salvini, and the Northern League. This course is taught entirely in Italian. Students will also review the grammar, syntax and vocabulary studied in the first three semesters of the Italian program. Geographic Region Gen Ed (DSAS).

Academic Career: Undergraduate

Course Attributes: DSAS Geographic Region General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

ITAL 0114 - "DIVERSO DA CHI?" GENDER, QUEERNESS, & RACE IN 20TH- AND 21ST- CENTURY ITALY

Minimum Credits: 3

Maximum Credits: 3

What were the rights of women in Italy during fascism and after WWII? What are women's rights now? How are women and the female body represented and used in contemporary Italian social media, pop media, advertisements, and newspapers? Was it ever illegal not to conform to heteronormativity in Italy? How is queerness represented in contemporary Italian media? What are the rights of children of immigrants in Italy today? How has the COVID pandemic affected the Chinese community in Italy? These are just some of the questions that will guide our exploration of gender, queerness, and race in Italy, providing you with the analytical skills to understand how the structural inequities of Italian society have changed over time, and to assess these inequities both in the Italian context and your own. We will explore these themes through a variety of media: legislation, newspapers, comics, songs, advertisements, literature, and movies. This is a fourth-semester class, taught entirely in Italian; a grade of C- in ITAL 0103 or equivalent is required. No textbook is required; all the necessary materials will be provided by the instructor at no cost for the students.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

ITAL 0115 - MULTIMEDIA ITALY

Minimum Credits: 3

Maximum Credits: 3

This course aims to build on the skills and knowledge students have acquired in ITAL 0003 and continue their development in all aspects of Italian language, with particular emphasis on tools and strategies necessary to advance reading and writing.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Creative Work General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

ITAL 0117 - ITALIES

Minimum Credits: 3

Maximum Credits: 3

This 2nd year course consists of three main parts: Part I introduces students to the geographical contours of the Italian nation throughout history: how has Italy been defined and how is it defined today? In this part we will also identify, compare, and contrast different ways of articulating Italian identity through political, legal, cultural, economic, and linguistic parameters. Part II invites students to engage with the diversity of Italian regions-their languages, cultures, and sub-national identities-through a representative set of regional case studies. Finally, in Part III students will explore the nature of italianità (Italianness) as represented both in the diasporic movement of Italians around the world, and in current debates over immigration to Italy and the rights of immigrants-children-born in Italy-- to enjoy the benefits of Italian citizenship.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ITAL 0003 or 0103 with a grade of C- or better

Course Attributes: DSAS Diversity General Ed. Requirement, DSAS Geographic Region General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

ITAL 0119 - ITALIAN CULTURE IN PRACTICE

Minimum Credits: 3

Maximum Credits: 3

The aim of this fifth semester Italian course is to provide students with the means to better understand Italy, its history and culture, while experiencing Italian everyday life first-hand, in one of its major cities and regions. The course is designed to improve, in particular, students, oral proficiency and sociolinguistic competence through immersion; it consists of various sections focused on different, but complementary social and linguistic skills pertaining to getting to know people and places, learning and discussing current Italian events, making cultural comparisons, and argue one's opinions. All the while, students will get acquainted with the city and its territory, their influential past as well as their vibrant present. Emphasis is on acquiring the authentic oral communication skills necessary to navigate expertly Italian-speaking environments, and acquiring cultural knowledge through daily, immersive and exclusive practice of the Italian language.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

ITAL 0183 - RENAISSANCE ART

Minimum Credits: 3

Maximum Credits: 3

We will explore the arts - painting, sculpture, architecture, and the decorative arts - that flourished in Italy between 1250 and 1590. The renaissance is one of the great epochs of western culture; this course offers an introduction to the visual evidence that reveals the development of new attitudes about human life and its meaning. Emphasis will be on works of those revolutionary individuals who transformed the arts - Giotto, Donatello, Brunelleschi, Michelangelo, Leonardo, Raphael, Bellini, titian, and Palladio, to name only the most important. (Only the Study Abroad in Florence summer version of HAA 0302/ITAL 0183 may be counted toward the Italian minor.)

Academic Career: Undergraduate

ITAL 1071 - THE ETERNAL CITY: ROME FROM ANTIQUITY TO TODAY

Minimum Credits: 3

Maximum Credits: 3

Rome has been called the "Eternal City" because of the enduringly important role it has played in Mediterranean, European, and global affairs over a period of more than two millennia. In this course we will use the rich urban history of Rome as the geographic focal point through which to examine the societal and cultural changes that unfolded across these centuries for Rome's citizens, Rome's imperial subjects, and people connected to Rome by networks of travel and trade. Students will learn about these societal changes through direct analysis of a broad range of authentic texts and media, including letters, short stories, biographies, cinema, travelogues, historical and contemporary maps, architecture and visual arts, graffiti, music, guidebooks, recipes, and exhibition catalogues. Students will create a digital final project: an interactive Story Map (created with the ArcGIS digital mapping platform) that will represent the routes and experiences of multiple individuals who traveled to and within the city of Rome in different centuries, based on these individuals' written accounts.

Academic Career: Undergraduate

Course Attributes: Writing Intensive Course (WRIT)

ITAL 1073 - ITALY AND THE MEDITERRANEAN WORLD: MARCO POLO TO LEO AFRICANUS

Minimum Credits: 3

Maximum Credits: 3

In this course, students will learn about Mediterranean interconnectedness in the medieval and early modern periods by studying six Italian cities whose economic, political, and cultural lives were profoundly shaped by the maritime networks that linked them to other shores of the Mediterranean. Following the trajectories and life stories of a series of historical travelers who voyaged between these Italian hubs and other parts of the Mediterranean (from Constantinople to Fez to Granada), students will come to understand how the sea routes that facilitated transnational flows of people, goods, and ideas played a key role in economic and cultural developments in these Italian centers across these periods. Students will learn about societal and cultural developments through a broad range of original texts, including letters, ambassador reports, diary entries, prose fiction, biographies, poetry, historical maps and nautical charts, paintings and architecture, travelogues, and more. This class has no prerequisites, and is open to all students. It will be conducted in English and does not require knowledge of Italian.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

ITAL 1078 - FULBRIGHT SEMINAR IN ITALIAN STUDIES

Minimum Credits: 3

Maximum Credits: 3

The Fulbright Seminar in Italian Studies is the spring-term undergraduate-level course offered by the Visiting Fulbright Distinguished Lecturer from Italy. This course is typically offered in the fields of art history, cultural studies, film, history, literature, museum studies, political science, or urban studies.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

ITAL 1079 - INTRO TO HOLOCAUST LITERATURE

Minimum Credits: 3

Maximum Credits: 3

This course surveys the central texts of the literature of the holocaust, while introducing students to the main issues and preoccupations of holocaust testimony in literature and film.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Literature General Ed. Requirement, Russian & East European Studies, SCI Polymathic Contexts: Humanistic GE. Req., West European Studies

ITAL 1080 - LETTERATURA DI VIAGGIO: MOBILITIES IN ITALIAN LITERATURE

Minimum Credits: 3

Maximum Credits: 3

This course will examine the ways in which Italian culture, literature, and society have been shaped by phenomena of travel, across a broad chronological arc from the Middle Ages to the present day. The thematic approach of the course will take a broad view of the theme of travel, investigating many different forms of human mobility that have impacted Italian culture, including migration, commerce, pilgrimage and tourism. Texts offering information relating to the real travels of historical individuals (such as Marco Polo and Isabella Teotochi Albrizzi) will sharpen our understanding of the routes and forces that drew travelers between Italy and distant lands in different periods. We will study travel as a central theme in literary fictions, from the Mediterranean travels recounted in Boccaccio's ~Decameron~ to Italo Calvino's imaginative reworkings of Marco Polo in ~Le città invisibili~. This course is taught in Italian.

Academic Career: Undergraduate

Course Component: Lecture

ITAL 1084 - INTERCULTURE AND MIGRATION

Minimum Credits: 3

Maximum Credits: 3

Italy has long been a nation of emigrants, but only in the last few decades has become a nation receiving large numbers of immigrants. The fall of communism in Eastern Europe, and wars and violence in the Balkans, across Africa and the Middle East, have spurred new migrants towards the West in search of safety and economic prosperity. The unique position of the Italian peninsula in the Mediterranean has made it a key territory of arrival in these modern-day migrations, but to what advantage and to what cost? This course will explore the complexities of cultural identity and migration, and the impact they have on intercultural conflict and cooperation. There will be a particular focus on migration in Italy and on the marginalized communities of contemporary Italy, such as migrants, their Italianborn non-citizen children, and the Roma. We will examine the fluidity of cultural boundaries across time and space, and how ingroup and outgroup dynamics contribute to the manufacturing of fear and prejudice among populations. During their semester abroad, students will reflect on the various elements that define a culture while gaining an increased understanding of how culture shapes individuals and how our cultural identities interact in shared social spaces such as the piazzas of Florence. This is a Study Abroad course offered in Florence, Italy.

Course Attributes: DSAS Literature General Ed. Requirement, Medieval & Renaissance Studies, SCI Polymathic Contexts: Humanistic GE. Req., West European Studies

ITAL 1087 - FASCISM AND RESISTANCE

Minimum Credits: 3

Maximum Credits: 3

The "ventennio nero" (or black twenty years; 1922-1943) refers to the period of Italy's Fascist rule under strongman

Benito Mussolini, Fascism's founder. Italian Fascism (first a movement, then a political party, and finally a totalitarian government) continues to fascinate historians, political theorists, and cultural historians alike; it is the foundational period against which all other "fascisms" are measured. This class, taught in English, explores the history, politics, and cultural underpinnings of what Susan Sontag called "fascinating Fascism"; its construction of masculinity and the idealized "Fascist mother"; its invention of a Fascist Mediterranean "race" to rival the Aryan race of Nazi Germany; its pursuit of an Empire that would be a worthy heir to Rome; and finally, the robust resistance culture that rose up to counter it.

Course Attributes: West European Studies

ITAL 1092 - ITALIAN TRANSLATION WORKSHOP: FROM THEORY TO BEST PRACTICES

Minimum Credits: 3

Maximum Credits: 3

Tradurre, tradire. So goes the old Italian saying: to translate is always a betrayal. What makes translation such a complicated and risky process? What, exactly, is the "betrayal" against? What does this kind of formulation tell us about how society views source texts (or "originals") and their translation into other languages, formats, and medias? This course examines translation from both a theoretical and practical perspective, allowing students to understand the ways in which translation has been formulated, promoted, and criticized, but also giving them a laboratory for the translation of texts of various kinds and genres, including letters, oral histories, publicity materials, literature, and even film subtitles. Students in this class will move from short translation exercises to longer translation projects, culminating in a multi-piece portfolio of their translation projects, which will draw on untranslated materials from local archives and library collections. Pre-requisites: any two of the following courses: ITAL 0111, ITAL 0113, ITAL 0114, ITAL 0115, ITAL 0117, ITAL 0119

Academic Career: Undergraduate

ITAL 1119 - ITALIAN CULTURE IN PRACTICE 2

Minimum Credits: 3

Maximum Credits: 3

This is an Italian conversation course abroad in Genoa for students at the advanced level.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

ITAL 1154 - MEDITERRANEAN CROSSROADS

Minimum Credits: 3

Maximum Credits: 3

This course takes a place-based, diachronic approach to the study of Mediterranean interconnectedness, from the perspective of the main Sicilian island and indeed the very notion of islandness. As Godfrey Baldacchino has written in the introduction to his seminal *A World of Islands*: "islands suggest themselves as *terrae nullius*, empty spaces, waiting, wanting, to be possessed: potential laboratories for any conceivable and uninhibited human project, in thought or in action...But: the small, remote and insular also suggests marginality, being on the edge, being out of sight and so out of mind, situations which can expose the weakness of mainstream ideas, orthodoxies, and received wisdoms, while fomenting alternatives to the status quo. Any dominant paradigm is supposedly weakest at its periphery." Baldacchino's insights invite us to think deeply about Sicily's position with regard to the Mediterranean and its components, as a locus of exchange, commerce, conquest, mobility, and travel. Reflecting on Mediterranean islandness and the multicultural history of Sicily permits us to scrutinize the processes of transregional interconnectedness, mobility, and exchange that are hallmarks of historical globalization. Islands connect, but also divide; they are sites where identities are not only forged, but also blended and challenged; they offer a microcosm in which global issues may be observed and studied.

Academic Career: Undergraduate

ITAL 1902 - DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 4

This course enables the student who has completed, or nearly completed, the Italian major to do research under the direction of a faculty member, on a topic of mutual interest.

Academic Career: Undergraduate

Course Component: Directed Studies
Grade Component: LG/SNC Elective Basis
Course Attributes: West European Studies

ITAL 1903 - HONORS DIRECTED RESEARCH: ITALIAN MAJORS

Minimum Credits: 1

Maximum Credits: 3

This course is offered to Italian majors who have high academic achievement, both in Italian and in general. These students are invited by the Italian faculty to engage in a research project under the direction of a faculty member with whom they have previously studied at the advanced undergraduate level.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Letter Grade

Course Attributes: West European Studies

ITAL 1905 - INTERNSHIP IN ITALIAN

Minimum Credits: 1

Maximum Credits: 6

The student is placed in a job setting in which knowledge of Italian language and/or culture is useful.

Academic Career: Undergraduate

Course Component: Internship

Grade Component: LG/SNC Elective Basis

Course Attributes: Undergraduate Internship, West European Studies

ITAL 1907 - ITALIAN UNDERGRADUATE TEACHING ASSISTANTSHIP

Minimum Credits: 1

Maximum Credits: 3

This applied course in pedagogy is designed to provide advanced Italian majors the opportunity to share their knowledge, experience and passion for the Italian language and culture with underclassmen and students newer to the major. In concert with the faculty member teaching the course in which the Italian major serves as UTA, a number of duties will be discussed, which may include: facilitating discussion groups or other collective fora, organizing tutorials and holding office hours, assisting faculty member in lesson planning, material(s) development and maintaining online sites and/or document repositories for the course. Per the guidelines set by the Dietrich School of Arts and Sciences, Italian UTAs may not substitute teach for the faculty member, nor grade papers, quizzes or exams, nor assign any midterm or final grades, nor perform any work for the faculty member unrelated to the course in question. The faculty member teaching the course in which the Italian major serves as UTA, will articulate expectations clearly from the very beginning, and will meet regularly with said UTA, providing guidance and support throughout the term. Attribution of credits (1 to 3) should be commensurate with the work to be performed and should be communicated to the UTA before the start of the term. Further details of the guidelines can be found on the Dietrich School's site. Prerequisites: To be admitted to this elective, a student must be a declared Italian Language and Literature or Italian Studies major in excellent standing (GPA of 3.5 or higher), and must have previously completed the course - for which the student will serve as UTA - with a grade of "A." In order to serve as a UTA for a course conducted in Italian, the student must have advanced Italian-language proficiency, as demonstrated either by completing a 1000-level Italian-taught course with a grade of A- or higher, or by special permission granted by the faculty mentor.

ITAL 1910 - ADVANCED-LEVEL PRACTICUM

Minimum Credits: 1
Maximum Credits: 1

This one-credit course is for students at the advanced proficiency level of Italian (pre-requisite is two of the following: ITAL 0113, 0115, 0117, or their equivalents). This course should be taken in conjunction with an advanced-level Italian course. In this course, students will practice advanced-level writing or speaking, with a focus on genre-based text types. Students will receive regular feedback on their written or spoken production with the aim of improving Italian proficiency. This course may be repeatable for credit when the topic, theme, or academic content is different from previous semesters.

Academic Career: Undergraduate
Course Component: Practicum
Grade Component: LG/SNC Elective Basis

Japanese

JPNSE 0001 - FIRST YEAR JAPANESE 1

Minimum Credits: 5
Maximum Credits: 5

The first step in Japanese language study. The student will acquire a basic competence in speaking, understanding, reading and writing. Emphasis is placed on speaking and understanding as the student learns the sound system, basic vocabulary and essential sentence patterns. Writing will include the katakana and hiragana syllabaries.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: Asian Studies, West European Studies

JPNSE 0002 - FIRST YEAR JAPANESE 2

Minimum Credits: 5
Maximum Credits: 5

The second term in the systematic presentation of the modern standard language begun in Japanese 0001. Students will continue to develop all four skills--speaking, understanding, reading and writing with continued emphasis on content useful in everyday communications. Writing will include the syllabaries and about 50 selected kanji characters.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: JPNSE 0001 (MIN GRADE 'C-')
Course Attributes: Asian Studies, DSAS Second Language General Ed. Requirement

JPNSE 0003 - SECOND YEAR JAPANESE 1

Minimum Credits: 5
Maximum Credits: 5

The third term in the sequence of Japanese language instruction designed to increase the student's proficiency in speaking and understanding of modern standard Japanese through the introduction of more complex grammatical structures and idiomatic expressions. Writing will include about 300 additional kanji characters.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: JPNSE 0002 or JPNSE 1061 (MIN GRADE 'C-')

Course Attributes: Asian Studies, DSAS Second Language General Ed. Requirement

JPNSE 0004 - SECOND YEAR JAPANESE 2

Minimum Credits: 5

Maximum Credits: 5

The fourth term in the sequence of Japanese language instruction designed to develop the student's ability to carry on non-technical conversations while continuing to enhance the reading and writing skills. More complex grammatical structures and the study of about 300 additional characters are introduced.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: JPNSE 0003 (MIN GRADE 'C-')

JPNSE 0005 - JAPAN IN JAPAN: SPECIAL TOPICS

Minimum Credits: 3

Maximum Credits: 3

JPNSE 0005 is a Special Topics course that addresses various topics related to Japan. While all topics are Japan-related, the content of the course varies from semester to semester.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

JPNSE 0006 - JAPAN: ITS PEOPLE AND CULTURE

Minimum Credits: 3

Maximum Credits: 3

This course is designed for students studying abroad in Japan. It is intended to introduce students to the people and culture of Japan in a meaningful way. Designed as a gateway to more specialized training, this is a course for students who have had little or no previous knowledge of Japan.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SU3 Elective Basis

Course Attributes: DSAS Geographic Region General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

JPNSE 0007 - JAPANESE CULTURE AND CIVILIZATION

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to fundamental characteristics of the culture and civilization of Japan from earliest times to the present. As a gateway to more specialized training, it is designed for students having little or no previous knowledge of Japan. Students can expect to leave with a basic grasp of important historical periods, an appreciation of

key figures and places of cultural significance, and an awareness of important social changes from earliest times to the present day. Students will improve their analytical skills as they read from outstanding examples of Japanese literature; they will synthesize relevant information about Japanese art, architecture, religion, literature, society, and history from lectures and background readings in order to present well-reasoned arguments about Japan; and they will develop a nuanced understanding of Japan's place in a global context. This course aims to a) improve cultural literacy about Japan and the Japanese, b) increase familiarity with principal historical periods, c) introduce basic geography ' location of principal Asian countries, Japanese islands, and Japanese cities, and d) identify important political, social, cultural, artistic, and literary themes for each of the principal periods covered.

JPNSE 0010 - SPECIAL TOPICS IN EAST ASIAN POP CULTURE

Minimum Credits: 1

Maximum Credits: 1

This 1-credit mini course explores the spread of Asian pop across the world in conjunction with the Asian Studies Center's annual lecture series on Asian pop culture.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

JPNSE 0011 - BEGINNING JAPANESE 1

Minimum Credits: 3

Maximum Credits: 3

JPNSE 0011 is designed for students with no prior knowledge of Japanese, and in particular for students who due to demanding course schedules or other time conflicts would otherwise be unable to take the regular beginning-level Japanese language course: JPNSE 0001. JPNSE 0011 and 0012 together cover the same content as JPNSE 0001, at a slower pace, with a less demanding time commitment. JPNSE 0011 is offered in Spring semester, and 0012 is offered in Fall semester. Those who complete JPNSE 0011 and 0012 are able to continue their Japanese language study with JPNSE 0002. First Year Japanese language courses are prerequisites for Japanese major courses. While JPNSE 0011 does not fulfill Japanese minor requirements, JPNSE 0012 does fulfill minor requirements.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

JPNSE 0012 - BEGINNING JAPANESE 2

Minimum Credits: 3

Maximum Credits: 3

JPNSE 0012 is designed for students for students who have completed JPNSE 0011. As with JPNSE 0011, it is primarily for students who due to demanding course schedules or other time conflicts would otherwise be unable to take the regular beginning-level Japanese language course: JPNSE 0001. JPNSE 0011 and 0012 together cover the same content as JPNSE 0001, at a slower pace, with a less demanding time commitment. JPNSE 0011 is offered in Spring semester, and 0012 is offered in Fall semester. Those who complete 0012 are able to continue their Japanese language study with JPNSE 0002. JPNSE 0081 - EAST ASIA IN THE WORLD

Minimum Credits: 3

Maximum Credits: 3

To enhance a greater understanding of East Asian cultures; to explore the interactions and relations between the peoples and cultures of East Asia (China and Japan) and the rest of the world, from ancient times to the present. Literary works, memoirs, autobiographies, diaries, historical records and films will be used. Themes involve such topics as the significance of travel in self-understanding, diaspora, immigration, and changing ideas of the homeland.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: SCI Polymathic Contexts: Global&Cross Cul GE. Req.

JPNSE 0083 - INTRODUCTION TO JAPANESE LITERATURE

Minimum Credits: 3

Maximum Credits: 3

This course introduces, through English translations, some of the outstanding works which make up the literary heritage of Japan. The student becomes acquainted with a non-Western literary tradition by exploring similarities and differences in ways of thinking and modes of expression. Readings include selections from ancient poetry, classical Romances, forms of drama, early modern fiction, haiku poetry and modern novels.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Asian Studies, DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Contexts: Humanistic GE. Req.

JPNSE 0085 - JAPANESE TALES OF THE SUPERNATURAL

Minimum Credits: 3

Maximum Credits: 3

This course will look at a broad array of fictional works that deal with the supernatural in Japan. The material is arranged historically, ranging from the seventh century to contemporary times, and including ancient myths, theater and narrative fiction, poetry, picture-books, film and anime. The ostensible purpose of the course is to provide a broad view

of Japanese literature and culture from a particular angle—the representation of the supernatural. However, by looking at the non-human and the non-natural, students are also encouraged to think about human society and individuality in different historical periods in Japan.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Asian Studies, DSAS Cross-Cult. Awareness General Ed. Requirement, DSAS Geographic Region General Ed. Requirement, DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Contexts: Humanistic GE. Req.

JPNSE 1011 - BASIC JAPANESE LANGUAGE 1

Minimum Credits: 5

Maximum Credits: 5

The first in a series of courses in modern standard Japanese designed for the student with no previous knowledge of the language. Emphasis is on speaking and understanding and includes useful expressions and practical vocabulary.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Asian Studies

JPNSE 1012 - BASIC JAPANESE LANGUAGE 2

Minimum Credits: 5

Maximum Credits: 5

The second in a series of courses, this is a continuation of Japanese 1011. The course continues to develop the student's ability to speak and understand the language, with emphasis on conversation using everyday vocabulary and expressions.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Asian Studies

JPNSE 1020 - THIRD YEAR JAPANESE 1

Minimum Credits: 3

Maximum Credits: 3

The first term of the third-year Japanese language course whose primary goal is to develop a broad competency in speaking and reading through materials of academic and cultural interests and the discussion of those materials. The selection of reading materials is made in such a way that most of the characters in the Kyooiku Kanji list is covered.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: JPNSE 0004 or JPNSE 1062 (MIN GRADE 'C-')

Course Attributes: Asian Studies

JPNSE 1021 - THIRD YEAR JAPANESE 2

Minimum Credits: 3

Maximum Credits: 3

The second term of the third year level Japanese language course and a continuation of Japanese 1020. The student further develops competency through speaking and reading materials of academic and cultural interests and through

discussion of those materials.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: JPNSE 1020 (MIN GRADE 'C-')

Course Attributes: Asian Studies

JPNSE 1023 - ASPECTS OF THE JAPANESE LANGUAGE

Minimum Credits: 3

Maximum Credits: 3

This course introduces the student to the Japanese language through a study of its structure, vocabulary and cultural heritage. Some topics discussed include word order, basic structural patterns, and particles such as WA and GA, sexism, and word formation. This course is useful for the Japanese studies student wishing to have a deeper understanding of the language as well as the linguistics student interested in gaining knowledge of a non-Indo-European language.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: JPNSE 0002 or 1061

Course Attributes: Asian Studies, DSAS Geographic Region General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

JPNSE 1030 - JAPANESE LANGUAGE TEACHING AND LEARNING

Minimum Credits: 3

Maximum Credits: 3

This course is intended to introduce students to the field of Japanese language teaching and learning. Students will become familiar with how the Japanese language can be effectively taught, and with aspects of the Japanese language and culture that impact Japanese language pedagogy. Students will also become familiar with the methods used in language pedagogy research, and with some of the most recent research in the field.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

JPNSE 1035 - PRAGMATICS OF JAPANESE

Minimum Credits: 3

Maximum Credits: 3

This course will provide an introduction to the usage aspects of Japanese by reading articles on pragmatic aspects of the language. The instructor will lecture on salient points and lead discussion on specific issues and the appropriate use of the language.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: JPNSE 0002 or JPNSE 1061 with a C- or Better

Course Attributes: DSAS Diversity General Ed. Requirement, DSAS Geographic Region General Ed. Requirement, SCI Diversity General Ed. Requirements, SCI Polymathic Contexts: Global&Cross Cul GE. Req., Undergraduate Research

JPNSE 1040 - INTRODUCTION TO CLASSICAL JAPANESE 1

Minimum Credits: 3

Maximum Credits: 3

This classical Japanese language course is studied through readings of prose and poetry texts written during and immediately after the Heian period. Literary and linguistic techniques are discussed and points of contrast with the modern language are analyzed. Also introduced are reference materials dealing with classical Japanese language and literature. Students are encouraged, but not required, to complete JPNSE 1023 Aspects of the Japanese Language before enrolling in this course.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: CREQ: JPNSE 1021

Course Attributes: Asian Studies

JPNSE 1044 - THE CHINESE WRITING SYSTEM IN EAST ASIA

Minimum Credits: 3

Maximum Credits: 3

The Chinese script is presumed to be difficult to the untrained eye, but much of the myth lies in misunderstandings or misinformation. The course will introduce students to the Chinese writing system through historical and applied linguistic perspectives, and it will provide opportunities of discussion on how the Chinese script influences topics in anthropology, arts, education, and politics in the East Asian region. Students will gain foundational knowledge regarding the linguistic features of the Chinese writing system, including its historical development, acquire an insight into the cultural aspect of the script, and be challenged to apply such knowledge to make critical inquiries on the relationship between the writing system and literacy development, cognitive science, visual arts, and society.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

JPNSE 1050 - FOURTH YEAR JAPANESE 1

Minimum Credits: 3

Maximum Credits: 3

A fourth-year Japanese language course for students interested in reading news stories, editorials, journal articles and other special interest items. The goals are to increase vocabulary and to develop the ability to read unfamiliar material as a tool for future research.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: JPNSE 1021 (MIN GRADE 'C-')

Course Attributes: Asian Studies

JPNSE 1056 - JAPANESE LITERATURE AND THE WEST

Minimum Credits: 3

Maximum Credits: 3

A critical study of modern Japanese works and selected modern Western literary materials with special emphasis on intensive analysis by means of modern Western criticism. The course is designed to encourage the student to examine significant similarities and differences between Japanese and non-Japanese materials and to judge the content from an oriental as well as a Western perspective.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Asian Studies, DSAS Cross-Cult. Awareness General Ed. Requirement, DSAS Geographic Region General Ed. Requirement, DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Contexts: Humanistic GE. Req.

JPNSE 1057 - JAPANESE CULTURE AND SOCIETY THROUGH CINEMA

Minimum Credits: 3

Maximum Credits: 3

This course provides a critical study of selected international prize winning Japanese films and compares these films with Western films dealing with similar themes. The student learns to analyze and interpret films; becomes familiar with particular genres of Japanese films compared with Western; studies the history of Japanese cinema and its place in international cinematography and exposes the inter cultural benefits of judging the content of the films from oriental and Western aesthetic perspectives.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Asian Studies, DSAS Cross-Cult. Awareness General Ed. Requirement, DSAS Geographic Region General Ed. Requirement, DSAS The Arts General Ed. Requirement, Film Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Contexts: Soc/Behav. GE. Req.

JPNSE 1058 - WESTERNS AND SAMURAI FILMS

Minimum Credits: 3

Maximum Credits: 3

A focus on the critical comparative study of two filmic genres--the samurai representing Japanese cinema and the Western representing American cinema. The course demonstrates the analytical processes of the film leading to its structural unity; shows the significance of both genres with respect to the history of Japanese, American and European cinema; compares approaches to films of different countries and provides the overall benefits of approaching films from an intercultural standpoint.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Asian Studies, DSAS Cross-Cult. Awareness General Ed. Requirement, DSAS Geographic Region General Ed. Requirement, DSAS The Arts General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Contexts: Humanistic GE. Req.

JPNSE 1059 - JAPANESE LITERATURE ON SCREEN

Minimum Credits: 3

Maximum Credits: 3

This course will investigate how literature and film treat some major ideological and socio-cultural issues in Japanese society. Readings of pre-modern tales, modern fiction and contemporary novels. Film adaptations will represent the best of Japan's postwar cinematic tradition. The course is designed for the student interested in Japanese society, culture and intellectual currents through film and literature.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Geographic Region General Ed. Requirement, DSAS The Arts General Ed. Requirement, Film Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Contexts: Humanistic GE. Req.

JPNSE 1061 - INTENSIVE JAPANESE 1

Minimum Credits: 10

Maximum Credits: 10

The first step in Japanese language study. The student will acquire a basic competence in speaking, understanding, reading and writing. Emphasis is placed on speaking and understanding as the student learns the sound system, basic vocabulary and essential sentence patterns. Writing will include the katakana and hiragana syllabaries.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Asian Studies, DSAS Second Language General Ed. Requirement

JPNSE 1062 - INTENSIVE JAPANESE 2

Minimum Credits: 10

Maximum Credits: 10

Students will continue to develop all four skills begun in Japanese 1061--speaking, understanding, reading and writing with continued emphasis on content useful in everyday communications. Writing will include selected kanji characters.

Academic Career: Undergraduate

Course Component: Lecture

Course Requirements: PREQ: JPNSE 1061 or JPNSE 0002

JPNSE 1065 - DETECTIVE AND MYSTERY FICTION IN JAPAN

Minimum Credits: 3

Maximum Credits: 3

This course is a one-semester introduction to Japanese literature in English translation. The course is designed for students interested in broadening their knowledge of Japan, as well as for students who wish to compare other literature they have studied with that of Japan. No prior knowledge of Japan or Japanese is necessary to enroll.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

JPNSE 1066 - INTENSIVE JAPANESE 3

Minimum Credits: 6

Maximum Credits: 6

The ultimate aim of this course is communicative ability in the Japanese language, both written and spoken languages. We consider communicative ability to be the ability to convey messages to native speakers who are unused to communicating with foreigners in ways that create no difficulty, discomfort, or misunderstanding. This course is designed for students with two years of prior Japanese study at the University of Pittsburgh (i.e., First and Second Year Japanese).

Academic Career: Undergraduate

Course Attributes: Asian Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

JPNSE 1071 - THE WORLD OF JAPAN

Minimum Credits: 3

Maximum Credits: 3

This course covers the period between 1570 and 1870. Beginning with the unification of Japan under sixteenth century military war lords and ending with the collapse of the Tokugana Shogunate. Students will read selections from the major scholarly literature on the period.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Asian Studies, DSAS Cross-Cult. Awareness General Ed. Requirement, DSAS Geographic Region General Ed. Requirement, DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Contexts: Humanistic GE. Req.

JPNSE 1080 - GHOSTS, MASKS AND ACTORS

Minimum Credits: 3

Maximum Credits: 3

A critical study of three major dramatic genres of Japan--NOH, Bunraku and kabuki--in cultural origins. Areas to be explored are the use of masks in the world of the NOH theatre, the kabuki with its female impersonators and the near-life-size puppets of the Bunraku. Also discussed is the impact that NOH and Kabuki have had on modern Japanese and non-Japanese theatrical and film genres.

Academic Career: Undergraduate

Course Attributes: Asian Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

JPNSE 1081 - FORMS OF JAPANESE THEATRE

Minimum Credits: 3

Maximum Credits: 3

This course will provide a survey of various major forms of Japanese theatre using English language materials. Students will have access to relatively ancient forms of Japanese theatre such as Kagura and no, kabuki drama and the Bunraku puppet theatre through film and videocassette. The modern and avant-garde theatre are also accessible through translation and videocassette material. This course is designed for upper-class majors in theatre arts and non-majors in related fields.

JPNSE 1570 - RELIGION IN JAPAN

Minimum Credits: 3

Maximum Credits: 3

This course serves as a historical, doctrinal and practical introduction to the major religious traditions of Japan both classical and modern-day.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

JPNSE 1700 - INTRODUCTION TO THEORY AND PRACTICE OF TRANSLATION

Minimum Credits: 3

Maximum Credits: 3

This is an introductory course that answers to a growing interest in the theory and practice of translation from Japanese to English. The genres of texts that will be dealt with include literary works of various kinds (novels, poems, children's books), magazine and newspaper articles, web posts, manga, subtitling of anime and other videos, and texts of technical nature. Students will first learn broadly about the discipline of translation studies, including a history of translation and issues in translation (invisibility of the translator, culturally specific translatability issues, etc.). Students will then learn specific types of translation issues that come up when translating Japanese into English, using excerpts from a variety of genres as case studies. Special attention is paid to the structural differences between Japanese and English, cross-cultural differences in stylistics, writing with clarity, reference work, etc.

Course Attributes: Asian Studies

JPNSE 1901 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 6

An individual study under the guidance of a department faculty member. For the student whose topic is not covered by regular course work.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: LG/SNC Elective Basis

Course Attributes: Asian Studies

JPNSE 1902 - DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 6

Topic-focused studies in Japanese culture under the guidance of a department faculty member

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SNC Elective Basis

JPNSE 1906 - JAPANESE INTERNSHIP

Minimum Credits: 1

Maximum Credits: 3

This course places the student in a work setting where they can gain practical experience in a supervised training environment.

Academic Career: Undergraduate

Course Component: Internship

Grade Component: LG/SNC Elective Basis

JPNSE 1908 - DIRECTED WRITING FOR MAJORS

Minimum Credits: 1

Maximum Credits: 1

In addition to whatever written assignments are required of those enrolled in the course, this directed writing practicum provides students with an opportunity to contribute writing designed in terms of the intellectual strategies of the course.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: Asian Studies, Writing Intensive Course (WRIT)

JPNSE 1999 - CAPSTONE PROJECT

Minimum Credits: 3

Maximum Credits: 3

Goal of course is to plan and complete a student-directed academic project (capstone project) that requires the command and synthesis of the knowledge and skills learned in the undergraduate career in order to analyze an intellectual problem or topic in the student's interest. The students will plan, find and use appropriate resources, make and execute plans to bring a capstone project to fruition in consultation with the course instructor and a faculty mentor.

Jewish Studies

JS 0011 - ELEMENTARY HEBREW 1

Minimum Credits: 4

Maximum Credits: 4

This course introduces students to the fundamentals of the Hebrew language. We study basic vocabulary, grammar and sentence structure, and learn to read and write Hebrew. Emphasis is learning to speak the language.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

JS 0012 - ELEMENTARY HEBREW 2

Minimum Credits: 4

Maximum Credits: 4

Continuation of the introductory work begun in Hebrew 1. Students further develop their reading, writing and speaking skills with the greatest emphasis being placed on oral communication.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Second Language General Ed. Requirement

JS 0013 - ELEMENTARY HEBREW 1

Minimum Credits: 5

Maximum Credits: 5

This course introduces students to the fundamentals of the Hebrew language. We study basic vocabulary, grammar and sentence structure, and learn to read and write Hebrew. Emphasis is learning to speak the language.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

JS 0014 - ELEMENTARY HEBREW 2

Minimum Credits: 5

Maximum Credits: 5

Continuation of the introductory work begun in Hebrew 1. Students further develop their reading, writing and speaking skills with the greatest emphasis being placed on oral communication.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Second Language General Ed. Requirement

JS 0025 - INTERMEDIATE HEBREW 3

Minimum Credits: 3

Maximum Credits: 3

Students continue to develop the skills acquired in Hebrew 2 with emphasis on speaking and on understanding the spoken language. Readings this term include short stories and articles.

Academic Career: Undergraduate

Course Component: Lecture
Grade Component: LG/SNC Elective Basis

JS 0026 - INTERMEDIATE HEBREW 4

Minimum Credits: 3

Maximum Credits: 3

Students continue to develop their Hebrew reading and speaking skills. Sophisticated Hebrew texts are introduced.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

JS 0037 - ADVANCED HEBREW 5

Minimum Credits: 3

Maximum Credits: 3

This course is for advanced level students and uses Hebrew language literature, print and electronic media, film, and TV shows. Emphasis is placed on conversation, modern Hebrew literature, and composition.

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

JS 0090 - MYTHOLOGY IN THE ANCIENT NEAR EAST

Minimum Credits: 3

Maximum Credits: 3

The myths of the ancient near East are among the earliest written interpretations of the world and human existence. They are also among the most enduring, although they have only been unearthed in the last 200 years. In this course, we read myths from ancient Mesopotamia, Ugarit, and Israel. We study the myths as literary works, representative of the ideas and issues of the original cultural context in which they were shaped. These myths offer insight into the religious mentality of the ancient near east, as well as societal and political issues. We examine themes such as the presentation of the life of the gods, the relationship between the human and divine worlds, the issues of mortality and immortality, existence, fertility, kingship, and ethics. The primary goal of this course is to better understand these myths as they existed and developed in their ancient settings. Of course, because the myths are expressions of human thought, we may find that in studying them we also come to better understand ourselves.

Academic Career: Undergraduate

Course Component: Lecture

Course Attributes: DSAS Cross-Cult. Awareness General Ed. Requirement, DSAS Geographic Region General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

JS 0115 - BIBLE AS LITERATURE

Minimum Credits: 3

Maximum Credits: 3

While the Bible can be read in many ways with many different goals, the focus of this course is: reading and examining the Bible as a literary text, or, more accurately, as a collection of widely diverse literary texts. Therefore, the questions we ask of the biblical texts will pertain primarily to their forms, interests, and historical contexts. Most of this course will focus on narrative portions of the Bible, although we will see how other literary forms are often interwoven throughout the Bible's stories. Among the topics and issues we will consider in this course are: the origins of biblical texts and their historical contexts; the Bible's own representations of history, particularly the history of Israel; the nature of God throughout the Bible; human-divine relations and covenants; different critical approaches to the text (e.g., source criticism, redaction criticism); the figure of Jesus; uses of the Hebrew Bible in the New Testament; apocalyptic literature; and the various themes, motifs, and literary forms that bring these issues together. Throughout the semester we will also look at different uses of the Bible as a way of illuminating the Bible as a work of literature. Such uses will include different translations or paraphrases of the Bible, various representations of biblical narratives, and examples of the Bible in contemporary popular culture.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

JS 0283 - US AND THE HOLOCAUST

Minimum Credits: 3

Maximum Credits: 3

With increasing interest in the Holocaust in Europe, this course focuses on the American side of the Atlantic - on issues of anti-Semitism and anti-immigrant sentiment in this country and on America's response to the Holocaust. We will also look at some post-holocaust issues as well.

JS 0710 - SOCIOLOGY OF RELIGION

Minimum Credits: 3

Maximum Credits: 3

This course provides an introduction to the sociology of religion, in which we engage both classical and contemporary approaches to the place of religion in social life. We will survey major theoretical debates in the sociology of religion, as well as explore highly contested contemporary topics, such as religion and politics, gender, violence, ethnicity, and more. A particular focus on the sociology of Judaism will enable us to engage many questions about the influence of religion in contemporary life.

Academic Career: Undergraduate

Course Component: Lecture
Grade Component: LG/SNC Elective Basis

JS 1048 - THE HOLOCAUST IN CONTEXT

Minimum Credits: 3

Maximum Credits: 3

"Ethnic cleansing" and "genocide" are neither twentieth-century phenomena, nor is their occurrence linked to any particular region in the world. However, during the two world wars and their aftermath acts the civilian population of Central and Eastern Europe experienced a degree of mass violence that not only changed to face of the region but also led to the establishment of the very term "genocide". The Holocaust stands out as the most comprehensive, most radically executed case of genocide in modern times. Yet it was embedded in a wider context of systematic violence against various populations in Central and Eastern Europe. Rather than beginning with a general, abstract reflection on the reasons for the various forms of mass violence from ethnic cleansing to genocide, this course allows students to explore the specific social, cultural, and political conditions under which the sometimes entangled cases of mass violence against civilians occurred in twentieth-century Central and Eastern Europe. The course concludes with a general reflection and discussion of the concept of "genocide", the limits of its analytical usefulness, and the political baggage it carries.

JS 1100 - ISRAEL IN THE BIBLICAL AGE

Minimum Credits: 3

Maximum Credits: 3

This course explores the history and development of the people of Israel in ancient times. What do we know about the Israelites and how do we know it? Using biblical texts and archaeological remains, students will learn about everyday life in ancient Israel, the role of class and gender, life-cycle events, religious festivals, political institutions, systems of belief, and famous personages in history and lore. The trajectory of the course will begin with the Near Eastern origins of the people, continue through the rise of the Israelite and Judahite monarchies, and end with the Second Temple commonwealth of Judea in the Persian and Hellenistic periods.

JS 1102 - THE HISTORY OF GOD

Minimum Credits: 3

Maximum Credits: 3

God has a history. In the earliest days of that history, God was worshiped as one of a plethora of deities controlling

various spheres of cosmic activity or the human world. Students in this course will learn about this ancient pantheon - how gods functioned in society and how their presence was experienced by those devoted to them. They will then trace the evolution of the God of Israel from a mountaintop deity of the southern Levant in the late second millennium BCE to a supreme deity worshiped by a small group of absolute monotheists based in Jerusalem in the mid-first millennium BCE. Students will become more sophisticated readers of biblical texts in the process. The sources of the Hebrew Bible reflect not a homogeneous monotheism, but rather a diverse set of belief systems tending toward henotheism or even polytheism. By appropriating and reinterpreting the religious myths of their neighbors, the Israelites arrived at a character of the divine that has proven problematic to many contemporary theologians, particularly on issues of LGBT rights, women's rights, and the environment.

JS 1117 - PROPAGANDA AND MISINFORMATION IN THE 21ST CENTURY

Minimum Credits: 3

Maximum Credits: 3

This course explores propaganda, misinformation, and disinformation from a multidisciplinary argument perspective, including their historical development and current prevalence. Students will engage with a variety of primary texts and academic commentaries on topics such as conspiracy theories, hoaxes, scams, motivated reasoning, and scientific distortions.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

JS 1160 - JERUSALEM: HISTORY AND IMAGINATION

Minimum Credits: 3

Maximum Credits: 3

The holy city of Jerusalem is at the heart of the western religious imagination and of contemporary political conflict in

the middle east. Traditionally it has been a center of religious pilgrimage, home to Israelite kings and Islamic caliphs. Today it is a cutting-edge urban center marked by stunning demographic diversity, a rapidly expanding economy, and an intractable political crisis. In this course, we will examine the history of the city-from its earliest days to today-with an eye toward its religious significance in Judaism, Christianity, and Islam. Special attention will be given to Jerusalem's changing urban fabric: its architecture, neighborhoods, natural resources, economy, and religious institutions.

Academic Career: Undergraduate

JS 1170 - ARCHAEOLOGY OF ISRAEL-PALESTINE

Minimum Credits: 3

Maximum Credits: 3

Is archaeology in a place like Israel-Palestine an objective science? In this course, we explore how past and present are linked as nation-states and religious communities utilize the archaeological record to mold identities and to forward certain narratives. Our focus will be on the major archaeological sites of Israel-Palestine, particularly in Jerusalem and its environs. We will explore the political and religious issues that have emerged from or surround their excavation. Archaeology in the Holy Land has long been driven by a desire to shed light on-or even authenticate-the Bible, while the "exotic Orient" was explored in the 19th and early 20th centuries through western expeditions and excavations that served to further colonial interests. These religious and political motivations persist even if their manifestations have shifted with time. Through site tours, museum visits, student-led discussions, talks with local experts, and even a day participating in an archaeological excavation, students will gain direct experience with the places that have aroused controversy because of their problematic relationship to biblical and other ancient texts and/or because of their location in politically contested space.

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Geographic Region General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

JS 1171 - HEALTH AND ILLNESS IN ISRAELI SOCIETY

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to the health field from a socio-cultural perspective and provides an overview of the Israeli social determinants of health, the experience of illness, the doctor-patient relationships, and the health care system in Israel. The course aims to introduce the critical thinking of medical sociology/anthropology, which examine health and illness as a social, cultural, and political phenomena. These perspectives start with the understanding that we cannot grasp problem associate with health and illness based on the biological phenomena and medical knowledge alone. Therefore, during the course, students will learn about different social forces, including the role of the state, politics, social power relations and culture in shaping the medical field. In the course, we will focus on several main issues and concepts within Israeli society related to health and illness: health and reproduction; the intersection of health and the Jewish religion; mental health in Israel; the intersection of health with ethnicity and gender, bioethics in Israel, and more.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

JS 1210 - JEWS AND JUDAISM IN THE ANCIENT WORLD

Minimum Credits: 3

Maximum Credits: 3

This course covers the development of Classical Judaism from the Second Temple Period, beginning with the end of the Babylonian Exile in the 6th century BCE, and continues up through the emergence of Rabbinic Judaism, culminating with the redaction of the Babylonian Talmud in the 6th century CE. We cover both the major historical trends as well as the major religious developments. The course also introduces students to the major Jewish texts of both the Second Temple Period and the Rabbinic Period, emphasizing close readings of primary texts.

JS 1240 - JEWS AND THE CITY

Minimum Credits: 3

Maximum Credits: 3

Comedian Lenny Bruce riffed in 1963 that "If you live in New York or any other big city, you are Jewish. It doesn't matter even if you're Catholic; if you live in New York you're Jewish." In this course, we will discover why Lenny

Bruce -- and so many other observers of Jewish life -- came to understand urbanity as a core component of the Jewish experience. We will begin our study of the Jewish encounter with urban life in the 19th century, as millions of Eastern European Jews migrated from the small villages of their birth to cities across the globe. This course will trace this Eastern European Jewish diaspora to urban destinations around the world, before training its lens on the Jewish encounter with American cities. We will pay close attention to how patterns of Jewish urbanization changed regionally and over time; how urbanization affected Jews' home-life, leisure time, religious practices and occupational choices; how differences in gender and class affected Jews' experiences in urban spaces; and how Jews interacted with other ethnic groups in diverse, urban environments. Delving into the history, built environment, and archival sources pertaining to the Jewish experience in Pittsburgh will provide us with a dynamic case study for this crucial relationship between Jews and the city.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Contexts: Soc/Behav. GE. Req.

JS 1243 - JEWS AND THE BODY

Minimum Credits: 3

Maximum Credits: 3

Jews are not only the "People of the Book," but also a people whose books are deeply concerned with the body. This course examines the body as a religious site to explore key questions about humanity, holiness, gender, sexuality, identity, otherness, community, tradition, and health. We will approach religion as a human phenomenon, studying Jewish bodily practices-rituals, commandments, and cultural behaviors-through critical historical and sociological lenses. These practices reflect Judaism's diversity across time and space. We will consider both historical and contemporary Jewish experiences of the body, covering such topics as food, sexuality, reproduction, queerness, health, and death. Questions we will discuss in this course include: How do Jewish practices shape ideas of the body, and conceptions of the body shape Jewish practice? How do Jewish bodily practices engage with scientific developments? How do Jewish cultures imagine bodies that are hungry, pleased, gendered, transgendered, sexual, transgressive, differently-abled, well, sick, and mortal? All of these issues and more come into play when we shift our attention from the image of Jews as a textual community to the ways that Jews have understood and managed their embodied selves.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

JS 1250 - JEWS AND JUDAISM IN THE MODERN WORLD

Minimum Credits: 3

Maximum Credits: 3

Here we examine the specific challenges that the modern period posed to existing Jewish life and the nature of the responses made by Judaism to those challenges.

Req., SCI Polymathic Contexts: Soc/Behav. GE. Req., West European Studies

JS 1252 - HOLOCAUST HISTORY AND MEMORY

Minimum Credits: 3

Maximum Credits: 3

The holocaust - that is, the genocide of six million Jews in Nazi-occupied Europe during World War II - was a critical event of the early twentieth-century that continues to resonate today. Our historical survey will look at the holocaust primarily through the experiences of its Jewish victims, though we will discuss some of the other groups, such as the roma, disabled people, and gay men, who were also targeted and systematically murdered by the Nazis. Additionally, we will think about the perpetrators of the holocaust and the ideologies that led to the genocide, such as racism, nationalism, and antisemitism. Finally, we will move beyond the history of the holocaust to think about the ways that this event has been remembered and reconstructed by survivors, nations, institutions, museums, the arts, popular culture and the media. Looking at how institutions here in Pittsburgh commemorate the holocaust will offer us local, concrete examples of how people continue to grapple with this history.

JS 1258 - ISRAELI AND PALESTINIAN LITERATURE

Minimum Credits: 3

Maximum Credits: 3

Reading literature from places of conflict provides an opportunity to go beyond headlines and gain insight into the day-to-day existence, desires, imaginings, and perspectives of the people who live there. Reading literature also reveals how religious values and practices become a part of everyday culture and how those values are embraced or challenged.

This course will introduce students to the literature produced by Israeli and Palestinian authors, with a focus on how contemporary issues in Israeli and Palestinian society are depicted by writers from each culture. Topics will include: how these writers construct place; the role of religious texts in literature; conflicts and community within each society; how literature helped shape an Israeli national consciousness and a Palestinian national consciousness; how Israeli and Palestinian writers imagine the other; and the role of the Shoah in Israeli literature and the Nakba in Palestinian literature. The course will equally focus on developing students' academic and reflective writing skills. Students will produce a combination of literary analysis and self-reflective writing that uses techniques of creative nonfiction. Together, these writing assignments will help students respond to both the course texts and the cultural experience of studying in Israel-Palestine.

JS 1280 - MODERN AND CONTEMPORARY JEWISH THOUGHT

Minimum Credits: 3

Maximum Credits: 3

This course will introduce students to the varieties of Jewish thought, which developed out the of the 19th and 20th centuries and to the present day. After exploring the historical context of the philosophical legacy of Jewish thought, we will consider how Jewish intellectuals sought to reimagine their Jewish faith and Jewish identity in response to various concerns in the 19th and 20th centuries. Specifically, we will analyze Jewish responses to modernity and secularism, Jewish engagement with Western culture and Christianity, political theory (e.g, Marxism) and matters of social justice, Jewish feminism, and the prospect of ethics and religious faith after the Holocaust.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

JS 1282 - CONTEMPORARY JEWISH LIFE

Minimum Credits: 3

Maximum Credits: 3

There are many concerns and issues that Jews think about and deal with in contemporary America. Some of these issues have been of long standing, but some have come into focus as a result of dramatic changes and developments in today's society. These issues can invoke real confusion, angst and/or disagreement among Jews, as well as among non-Jews so it is important to raise some of these issues and allow for wide-ranging class discussion. Our class will look at topics such as Zionism in world and American history, the founding of Israel and the relationship of American Jews to that state, antisemitism in history and on campus today, the impact of the Holocaust on Jewry both in the past and now, Jewish feminism, Intermarriage, the shape and structure of the American Jewish community, assimilation and challenges for Judaism in the digital age, and more. To enhance our conversation, we will hear from a variety of Jewish professionals and informed speakers offering their analysis and perspective on important topics.

Academic Career: Undergraduate

JS 1300 - RELIGION, THE BOOK, AND BEYOND

Minimum Credits: 3

Maximum Credits: 3

The goal of this course is for students to think about religious ideas and practices as embodied in material texts. We will be looking at the ways that religious ideas are embedded in different kinds of books—scrolls, manuscripts, printed books, ebooks, and smartphone apps. We will also be looking at the ways that religious practices are often performed or acted using texts—reading scripture ritually or silently, studying texts, chanting, or even displaying books without reading them. And these two foci will let us think about the interactive relationships between religious people and their texts and how this relationship shapes the way we understand religion. It can also serve as an introduction to studying the history of the book, using religious books as the focus. So another way to think about what we are doing is considering the relationship between "religion" and the "book." Throughout the course we will try to think about books in two related senses: in terms of books as literary works (texts) and as material objects.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

JS 1383 - POLITICS OF CONTEMPORARY MIDDLE EAST

Minimum Credits: 3

Maximum Credits: 3

The main emphasis of the course will be on conflict and conflict resolution in the middle east. Conflict has been a constant feature of the region since 1945. This course will be primarily concerned with how and why these conflicts are generated, escalate, become protracted, and are resolved.

Academic Career: Undergraduate

Course Component: Lecture

JS 1475 - RELIGIOUS DIVERSITY

Minimum Credits: 3

Maximum Credits: 3

What is the best way to accommodate religious and cultural diversity within a nation-state and in civil society? How should individual rights to practice religion be balanced with communal needs? Should freedom from religion be protected as much or more than freedom of religion? These are pressing contemporary issues in many countries, including the United States, but issues of religious diversity and questions of whether and how to tolerate religious

minorities have a long history. In this course, we will examine the toleration of minority religions in particular historical settings, and the issues and problems (both doctrinal and social/political) that societies grappled with as they confronted diverse religious landscapes. We will also use these historical precedents as a lens to examine contemporary examples of religious pluralism, diversity, and conflict. Case studies will mainly be drawn from pre-modern Europe and modern Europe and North America, but we will also look at Mughal and modern India and discuss religion in pre-modern China.

Academic Career: Undergraduate

JS 1622 - BODY SIZE AROUND THE GLOBE

Minimum Credits: 3

Maximum Credits: 3

This course will introduce students to the complex interplay between body size, culture, religion, and social perception. We will discuss basic concepts within the critical research of body size, such as fat stigma, BMI, the 'obesity epidemic' and more, while tracing the intersections between gender ideologies, cultural contexts, medical perspectives, and religious beliefs. Our conversations will examine the following questions: How do cultures around the globe construct a 'correct' and healthy body size? How do people of various gender, racial, and sexual identities experience living in bigger bodies, and how does this change depending on national, religious, regional, and cultural contexts? Can weight loss and diets relieve stigma? How do current understandings of fat stigma and fat acceptance activist groups change the discourse? Throughout the course, students will be exposed to a variety of questions and theoretical perspectives from religious studies, fat studies, and the sociology and anthropology of body size.

Academic Career: Undergraduate

Course Component: Lecture

JS 1644 - CHRISTIAN MUSLIMS JEWS IN THE MIDDLE AGES: CONNECTION & CONFLICT

Minimum Credits: 3

Maximum Credits: 3

Was the world of Europe and the Middle East before the Enlightenment a period of unending religious conflict and intolerance? Were Jews the victims of severe persecution and violence everywhere during this period? Did Christians and Muslims engage in unceasing religious wars? The answer to all three of these questions is no. While the Middle Ages were a period of conflict and competition between the three major western religious groups, they were also a time of coexistence and cooperation. This class shifts from extreme dichotomies and simplistic stereotypes to deeply examine the period in all of its complexity: what were the theological, political, and legal contexts in which Christians, Muslims, and Jews interacted in both Christian Europe and the Muslim world? How did these deeply religious societies organize themselves to tolerate the religious "Other"? When and why did toleration break down and lead to expulsion, forced conversion, or violence? What kinds of cross-cultural exchanges and cooperation take place in economic, cultural, intellectual, and social life? We will also look at new ideas of toleration (and intolerance) that emerged at the end of the Middle Ages and examine aspects of inter-religious encounters and dialogues today. We will discuss not only the significance of Jewish-Christian-Muslim interactions in the Middle Ages but also assess these encounters as a case study in the broader history of religious diversity, pluralism, and conflict.

JS 1649 - ANTISEMITISM THEN AND NOW

Minimum Credits: 1

Maximum Credits: 1

A one credit mini-course featuring a series of lectures from faculty experts in different fields on hatred and hostility toward Jews in particular historical and geographical contexts, past and present.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Satisfactory/No Credit

JS 1650 - APPROACHES TO ANTISEMITISM

Minimum Credits: 3

Maximum Credits: 3

We survey historical, sociological, psychological, religious and political approaches to expressions of antisemitism as we study scholarly treatment of the phenomenon in the 20th century.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

JS 1652 - ANTISEMITISM, RACE AND GENDER

Minimum Credits: 3

Maximum Credits: 3

This class on Antisemitism, Race and Gender investigates the similarities between gendered antisemitic representations of Jews and other forms of racism and sectarianism in Europe and America from the Middle Ages onwards. This interdisciplinary class takes a broad and deep approach to its subject matter, tracing the long history of antisemitism and racism; from obsessions with blood purity in early modern Spain and the rise of the Atlantic slave trade to scientific racism, imperialism, and social Darwinism in the nineteenth century. The class ends with a focus on the survival of racism into the twentieth- and twenty-first centuries, contemporary Islamophobia and the recent resurgence of antisemitism in North America. The prominent role of gender in antisemitic representations of Jews, and in racist iconography more broadly, will be foregrounded throughout. The visual nature of antisemitism and racism is a major theme of this class and in-class discussions would be structured around cartoons, woodcuts, and posters that I would present to the students. As the class progresses, I encourage students to engage in their own interpretations of visual material and students are introduced to the study of history using material culture as a source material - an essential skill for anyone studying gender and race. This class does not aim to give students a complete history of antisemitism - that would almost certainly be impossible to achieve in just 15 weeks. What the class does aim to do, though, is to show how anti-Black racism, white supremacy and misogyny can and should be understood as having a shared history with antisemitism. The hatred and extremism that has come more to the fore in American life since 2016 has anti-

Jewish roots. This means that the class has a western-centric focus, not because I think "the West" is more important than anywhere else, but because we all currently live in a western country and in this class we are going to trace the development of a specific and very negative strand of western culture. Sections (i) through (iii) are arranged chronologically, to give an overview of the historical roots and development of antisemitism. Having acquired this historical understanding, students will then engage, sections (iv) and (v), in two extended (and controversial!) case studies of contemporary antisemitism. Classes will be a mixture of lectures and discussions of the assigned readings.

Academic Career: Undergraduate

JS 1681 - INVENTING ISRAEL: ZIONISM, ANTI-ZIONISM, AND POST-ZIONISM

Minimum Credits: 3

Maximum Credits: 3

In this course, we will study the origins and development of Zionism as a form of modern Jewish nationalism, the emergence of different Zionist ideological streams, and non-Zionist, ant-Zionist, and post-Zionist views of Jews and non-Jews. We will also explore Zionism as a case study of relations of religion and nationalism in modernity. This course is an opportunity to carefully study and to contextualize writings and ideas of religious and political thinkers that have been both influential and controversial. The goal is to offer students historical background to ideas and issues of contemporary importance as well as skills in interpretation and contextualization of complex texts that continue to inform public discourse.

Academic Career: Undergraduate

JS 1715 - FEEDING THE SOUL: FOOD, GENDER AND RELIGION

Minimum Credits: 3

Maximum Credits: 3

Food is sustenance and absolutely essential to life. But food is never simply about nutrition. Because it is fundamental to the human experience, food is also a medium for the expression of culture and social identity. Moreover, food relays complex social messages about gender, sexuality, and family. Consequently, food is also a means for expressing the social and symbolic use of power and control in which social inequalities are expressed in culinary forms. This course will examine food from the vantage point of gendered and religious systems of production, distribution, and consumption as we consider: How does your food come to your table (or not) and what are the political implications of personal tastes?

Korean

KOREAN 0001 - FIRST YEAR KOREAN 1

Minimum Credits: 4

Maximum Credits: 4

The greatest part of the first term will be devoted to the presentation and practice of the basic sound patterns of the language, its fundamental sentence patterns, and sufficient vocabulary to illustrate and practice them. An introduction to the writing system will be offered together with the opportunity to acquire elementary writing and reading skills.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Asian Studies

KOREAN 0002 - FIRST YEAR KOREAN 2

Minimum Credits: 4

Maximum Credits: 4

At the end of the second term of the first year of study the student should be able to produce all the significant sound

patterns of the language, to recognize and use the major grammatical structures within a limited core vocabulary. The student should be able a) to engage in simple conversations with native speakers about a limited number of everyday situations and b) to read and write simple material related to the situations presented.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: KOREAN 0001 or 1001 (MIN GRADE 'C-')

Course Attributes: Asian Studies, DSAS Second Language General Ed. Requirement

KOREAN 0003 - SECOND YEAR KOREAN 1

Minimum Credits: 4

Maximum Credits: 4

The first term of the second year will concentrate on the further development of fluency in oral production and the improvement in the student's ability to understand the flow of speech as uttered by a native speaker. Increased attention will be paid to reading as a means of augmenting a recognition vocabulary and writing as a drill and as a means of consolidating and communicating the knowledge gained.

KOREAN 1024 - SOUNDS OF THE KOREAN LANGUAGE

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to the phonetic and phonological study of the Korean language. Students will learn basics of Korean phonetics and phonology and their application in their Korean pronunciation and understanding of sounds of Korean and languages in general. The topics include historical change of the Korean sounds, invention of Korean alphabet, linguistic terms, consonants & vowels, syllable structure, phonological changes, sound symbolism, loanword phonology, and interlanguage phonology. At the end of the semester, students will command better production of Korean sounds through both knowledge and training. They are also expected to produce a paper based on theoretical knowledge they gained throughout the semester. Last, students who desire to continue theoretical research on Korean phonetics and phonology will benefit from descriptive analyses and basic conceptual framework of the Korean sounds from this course. Each week's classes will consist of a combination of lectures and student practice/discussions/presentations. All readings are in English.

KOREAN 1044 - THE CHINESE WRITING SYSTEM IN EAST ASIA

Minimum Credits: 3

Maximum Credits: 3

The Chinese script is presumed to be difficult to the untrained eye, but much of the myth lies in misunderstandings or misinformation. The course will introduce students to the Chinese writing system through historical and applied linguistic perspectives, and it will provide opportunities of discussion on how the Chinese script influences topics in anthropology, arts, education, and politics in the East Asian region. Students will gain foundational knowledge regarding the linguistic features of the Chinese writing system, including its historical development, acquire an insight into the cultural aspect of the script, and be challenged to apply such knowledge to make critical inquiries on the relationship between the writing system and literacy development, cognitive science, visual arts, and society.

Academic Career: Undergraduate

Grade Component: LG/SNC Elective Basis

KOREAN 1050 - FOURTH YEAR KOREAN 1

Minimum Credits: 3

Maximum Credits: 3

Designed to advance students to greater strengths in reading and writing skills and socio-cultural knowledge of Korean beyond high intermediate level. Students will develop skills in reading and listening to various authentic materials, and enhance speaking and writing skills to discuss issues of contemporary Korean society and culture. The goals of the course also include furthering aural comprehension of contemporary television documentaries, news and drama with

decreased reliance on pedagogical aids. This course is student centered and students will develop their knowledge of Korean lexicon (including Chinese characters of Sino-Korean) and grammar through their own readings/writings and class discussions. Students will write short research papers throughout the semester. Class will be conducted in Korean exclusively, and uses a combination of lectures and discussions. Both lectures and discussions are based on assigned readings and discussion topics that will be distributed through bi-weekly schedules.

Minimum Credits: 3

Maximum Credits: 3

The course aims to improve Korean writing skills in academic/formal settings for second/foreign language learners of Korean and/or heritage Korean speakers through reading diverse types of texts. Students who have finished Third Year Korean 2 or have an equivalent proficiency are eligible to register. This course introduces seven writing modules, each of which holds a goal of writing one academic/formal essay at the end. For the goal, students are required to read two reading passages under one topic for each module and various activities on reading (e.g., drawing a structure tree, summarization, paraphrasing, critical analysis) and writing (e.g., practicing diverse expressions, brainstorming, writing a draft, peer-review, revision) will be covered. Through this course, learners are expected to develop language skills, build their understanding on various social/cultural issues in Korea, and strengthen their knowledge on

academic/formal Korean. The instructor will use Korean as much as possible, and the use of English will be minimal. Students are expected to use Korean in class.

KOREAN 1060 - LANGUAGE AND SOCIETY IN KOREA

Minimum Credits: 3

Maximum Credits: 3

Focus on fundamental knowledge of sociolinguistics, language variations, varieties and codes of inherent sociality cultural implements. With substantial differences between eastern and Western cultures, students will study linguistic behavior and social groups, social class, effects of gender, address and reference terms, politeness strategies and style of language form used both in English and Korean in comparative study. Materials arranged to explain and evaluate the interaction of language, society and culture, the process of how people use language to construct social meaning and how those processes influence linguistic structure as well as cross-cultural communication.

KOREAN 1080 - CONTEMPORARY KOREAN CULTURE

Minimum Credits: 3

Maximum Credits: 3

This course aims to help the students achieve in-depth understanding of major cultural developments in Korean society in the past two decades or so. To that end, this course is arranged around some questions intimately tied to recent changes in Korean society such as (re)construction and consumption of tradition, collective traumas and unfinished mourning, political activism in the postauthoritarian era, post-division imagination, the hallyu-new media nexus, sports-sexuality-nationalism, Korean cuisine, homogeneity to multiculturalism, queer Korea, Korean diaspora, and North Korea in transition. This course will examine these issues from various angles by engaging with a wide range of fields and diverse forms of texts such as literature, theater, music, cinema, TV show, new media, food, and sports. Thereby, this course seeks to help the students gain more competence in comparative and interdisciplinary analysis of our culture. Upon successful completion of this course, students will be able to: -Show solid knowledge of major issues in contemporary Korean culture. -Demonstrate increased awareness of the diversity of human societies and cultures. - Exhibit the skills of close reading, critical analysis, and interdisciplinary approach. -Demonstrate the ability to identify engaging research topics, find secondary sources for those questions, and produce well-grounded and original arguments.

KOREAN 1082 - KOREAN LITERATURE

Minimum Credits: 3

Maximum Credits: 3

This course explores the development of modern Korean literature through the works of major writers from the early

twentieth century to the present. Students will first identify idiosyncratic themes and styles in their works. For a deeper understanding, students will be guided to situate literary questions within the nation's turbulent history of colonization, national division, violent conflicts, compressed modernity and rapid globalization. Major topics explored include colonial modernity, minjok (national) literature, nativist (hyangto) literature, leftist literature, modernist sensibilities, division literature, postwar writing, resistance literature (under military rule), posttrauma narrative, women writers, labor literature, multiculturalism, queer Korea, and voices of Korean diaspora. This course also deals with various forms of writing to probe diverse voices in Korean society, for which this course engages with diverse forms of storytelling from traditional ones such as poetry, novel and play to overlooked or new popular genres such as detective story, mystery, fantasy, graphic novels, and webtoons.

Academic Career: Undergraduate

Grade Component: LG/SNC Elective Basis

KOREAN 1088 - KOREAN CINEMA

Minimum Credits: 3

Maximum Credits: 3

This course understands Korean cinema as a valuable venue for critical engagement in discussion of various sociocultural questions. The topics and texts for this course also invite reflection on the complex ways in which local film and media intersect with transnational flows. Issues explored in this course include Korean film history (from the silent era to the present), genre auteurism (in association with reinvention of popular genres like melodrama, horror, comedy, romance, period drama, Manchurian Westerns, K-zombie, revenge story, jopok/gangster films, courtroom drama, action/adventure films, animation, and fantasy), major directors, independent films, documentary, women's films, queer cinema, spectatorship, stardom, new media, film sound, post-trauma films, unban-myth films, K-dystopia (death game drama, disaster films, postapocalyptic tales), Korean diaspora, and North Korean cinema. Weekly activities include lecture, film viewing, discussion, weekly review, research paper, and student presentation. All films are English-subtitled, and all readings are in English.

Course Requirements: PREQ: LATIN 0011

Course Attributes: DSAS Second Language General Ed. Requirement, Medieval & Renaissance Studies

LATIN 0101 - BEGINNING LATIN 1

Minimum Credits: 4

Maximum Credits: 4

This course is the first in a two-semester sequence providing an introduction to the sounds, vocabulary, and basic grammatical structures of the Latin language. In this course, students will begin to develop competence in reading and translating Latin, both from exercises in a beginning textbook as well as from select Latin stories that illustrate Roman mythology, history, and daily life. Students who complete the course requirements with a C- or higher may proceed to the next course in the sequence (LATIN 0102). Note that this course is a hybrid course, consisting of three 50-minute scheduled in-class meetings and a fourth session to be completed asynchronously online. All online work will take place on Pitt-supported applications. Note: If you have previous experience in Latin, you are encouraged to contact the course instructor to discuss the possibility of placement into an intermediate or advanced level course.

Academic Career: Undergraduate

LATIN 0102 - BEGINNING LATIN 2

Minimum Credits: 4

Maximum Credits: 4

An introduction to the sounds, vocabulary and basic grammatical structures of the Latin language. Students will begin to develop a competence in reading the language through textbook drills as well as Latin stories illustrating the Roman way of life. Please note that this course will be a hybrid of three 50-minute scheduled in-class meetings and a fourth 50-minute session to be completed by students working independently, either online at home, or through taking exams at the University Testing Center. Classroom time will generally center around instructor introduction of new material and some rudimentary work with said new material. In the online session, students will then complete more advanced exercises related to introduced material; take quizzes/exams; or complete group assignments. All online work will take place on Pitt supported applications (notably CourseWeb), or free platforms (e.g., Quizlet; TopHat; Centaur Education Software) or websites.

Course Component: Seminar

Grade Component: Letter Grade

Course Requirements: PREQ: LATIN 0220

LATIN 1430 - SPECIAL TOPICS IN LATIN LITERATURE

Minimum Credits: 3

Maximum Credits: 3

In this course students read selected Greek texts. The course may be repeated for credit provided the specific material covered is different.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Letter Grade

Course Requirements: PREQ: LATIN 0220

LATIN 1700 - LATIN PROSE COMPOSITION

Minimum Credits: 3

Maximum Credits: 3

This course provides students with a thorough review of Latin grammar and practice in the writing of Latin prose.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: LATIN 0220

Course Attributes: West European Studies

LATIN 1800 - HONORS COURSE/MAJORS

Minimum Credits: 3

Maximum Credits: 3

In this course undergraduate majors in classics who wish to graduate with honors (and are otherwise qualified) write an honors paper, usually in conjunction with a Latin reading course at the 1300 or 1400 level.

Academic Career: Undergraduate

Course Component: Thesis Research

Grade Component: Satisfactory/No Credit

Course Attributes: Medieval & Renaissance Studies

LATIN 1900 - INTERNSHIP IN LATIN

Minimum Credits: 1

Maximum Credits: 3

Students may complete an internship for 1-3 credits to gain practical experience in a supervised training environment. Permission from a faculty advisor is required to enroll.

Academic Career: Undergraduate

Course Component: Internship

Grade Component: LG/SNC Elective Basis

LATIN 1901 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 9

In this course a student undertakes independent study in Latin in consultation with a member of the faculty.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: LG/SNC Elective Basis

LATIN 1902 - DIRECTED STUDY FOR UNDERGRADS

Minimum Credits: 1

Maximum Credits: 6

In this course a student undertakes directed study in Latin under the close guidance of a member of the faculty.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SNC Elective Basis

LATIN 1903 - DIRECTED RESEARCH FOR UNDERGRADS

Minimum Credits: 1

Maximum Credits: 9

In this course a student undertakes directed research in the field of classical civilization under the close guidance of a member of the faculty.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Letter Grade

Course Attributes: Capstone Course

LATIN 1904 - UNDERGRADUATE RESEARCH ASSISTANT

Minimum Credits: 1

Maximum Credits: 3

This course enables advanced majors to receive academic credit for serving as assistants to faculty members who are conducting research projects (e.g., compiling bibliography for a new class, preparing a work for publication, creating a conference presentation). This collaborative project will result in a meaningful experience that will provide the student with a foundation in the mechanics of research and publication. Given the variable aspects of this learning experience, there is not official syllabus. However, students and faculty who participate in this course are required to submit a signed contract prior to the start of the semester in which the assistantship will occur. This contract is subject to the approval of the undergraduate committee.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: Satisfactory/No Credit

LATIN 1990 - UNDERGRADUATE TEACHING ASSISTSHIP IN LATIN

Minimum Credits: 1

Maximum Credits: 5

This course allows students to earn credits for serving as undergraduate teaching assistants in courses listed under the 'Latin' subject code. Admission requires permission of the department chair. Students may repeat for credit.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Law (PLAW)

Law Criminal Justice and Society

LAW 5623 - CYBER POLICY, CRIME & NATIONAL SECURITY

Minimum Credits: 3

Maximum Credits: 3

This course will explore theoretical and practical aspects of nation-state legal issues concerning cyberspace, with a particular focus on computer-related crime, espionage, war, and international governance. The course will review key legal cases, policy, and legislation. In tandem with a series of expert guest speakers from the field, the course will reflect on the roles of national and international governments, the legal and ethical dimensions of cybersecurity, the relationship between the public and private sectors, and the increasing tensions between privacy and national security. The course will consist of four major components: (1) an assessment of the current cybercrime threat landscape, (2) a review of the relevant national and international legal frameworks, (3) analysis of case studies of significant prosecutions, and (4) assessments of domestic and international policy and security challenges, including gaps in existing frameworks. Students who complete the course will obtain an enhanced understanding of the legal, policy, and security frameworks at the core of these challenging issues for nation-states.

LCJS 0100 - INTRODUCTION TO LAW, CRIMINAL JUSTICE, & SOCIETY

Minimum Credits: 3

Maximum Credits: 3

Enrollment Alert: Effective Spring 2022, this course replaces ADMJ 0100 SOCIETY AND THE LAW. If you have previously taken ADMJ 0100, contact your advisor about course repeat limitations/rules. This course introduces students to socio-legal theory related to the nature of crime, criminalization, and the purpose of punishment in the American criminal justice system. We use theory to explore and evaluate the workings of criminal justice institutions in a broader societal context, including how criminal justice compares with other institutions of social control/welfare (e.g. the education system). We also learn and apply major approaches to law & society in order to interrogate broader issues concerning law's intersection with societal values, power, and inequality. In so doing, we explore the nature, strengths, and limitations of legal reasoning and its application to the criminal justice issues examined throughout the semester.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

LCJS 0200 - RACE, CLASS, GENDER, & THE LAW

Minimum Credits: 3

Maximum Credits: 3

Enrollment Alert: Effective Spring 2022, this course replaces LEGLST 0200 RACE, CLASS, GENDER, & THE LAW. If you have previously taken LEGLST 0200, contact your advisor about course repeat limitations/rules. That "justice is blind" is a central value and claim of criminal justice institutions, and modern legal systems more generally. This course takes a mainly historical approach to examine the overt and subtle ways that this blindness has been compromised by being commodified, gendered, and racialized. In terms of overt class boundaries, this 'blindness' emerged with the rise of the nation-state, but it was long gendered and racialized in overt ways and commodified in more subtle ones. Since roughly the 1960s, the U.S. has been in an era where all three social boundaries impinge on law's blindness in ways that tend to be more subtle than overt. Using a social boundary approach, students in this course will learn these historical trajectories to the present as a foundation for thinking critically about criminal justice, the legal system, and contemporary social inequality more generally. A major focus is law's relationship to inequalities based on race, class, and gender. Topics covered include slavery, Jim Crow, the development of formal equality under the law, affirmative action, and the commodification of legal rights.

Academic Career: Undergraduate

Course Attributes: DSAS Diversity General Ed. Requirement, DSAS Historical Analysis General Ed. Requirement, SCI Polymathic Contexts: Soc/Behav. GE. Req.

LCJS 1100 - CRIMINOLOGY

Minimum Credits: 3

Maximum Credits: 3

Enrollment Alert: Effective Spring 2022, this course replaces ADMJ 0600 INTRODUCTION TO CRIMINOLOGY. If you have previously taken ADMJ 0600, contact your advisor about course repeat limitations/rules. This course provides an overview of the study of the causes and social responses to crime. It examines legal definitions and elements of crime; surveys major categories of crime, i.e., Predatory and non-predatory acts; reviews major measures of crime; identifies major correlates and theories of crime; differentiates types of offenders and evaluates the working of the criminal justice system.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

LCJS 1110 - CRIMINOLOGICAL THEORY

Minimum Credits: 3

Maximum Credits: 3

Enrollment Alert: Effective Spring 2022, this course replaces ADMJ 1265 ADVANCED TOPICS IN CRIMINOLOGY. If you have previously taken ADMJ 1265, contact your advisor about course repeat limitations/rules. This class explores criminological theory from an interdisciplinary perspective. Throughout the semester, we examine major theories of criminality, crime causation, and criminalization. After a general introduction to theory, the first part of the course examines conventional or mainstream theory in criminology, which tends to focus on developing explanations for criminality and why people engage in criminal behavior. The second part of the course examines a relatively newer branch of criminological theory (environmental criminology), which endeavors to explain crime events and patterns rather than criminals and criminality. The last part of the course theorizes crime and criminalization from the perspective of critical criminology.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

LCJS 1120 - CRIME PREVENTION

Minimum Credits: 3

Maximum Credits: 3

This course is designed to explore various theories and methods of evidence-based crime prevention. In contrast to the traditional criminological theories that center on criminality of individuals, the theories of crime and place, crime science, and environmental criminology analyze crime events and their environmental factors to prevent crime. Throughout the course, we will critically explore relevant theories and research related to crime events, examining ways of reducing crime at places and lowering the risk of victimization for individuals. We will evaluate evidence concerning the success and failure of crime prevention efforts.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

LCJS 1200 - CRIMINAL LAW

Minimum Credits: 3

Maximum Credits: 3

Effective Spring 2022, this course replaces ADMJ 1400, LEGLST 1140. INTRODUCTION TO CRIMINAL LAW. If you have previously taken ADMJ 1400, LEGLST 1140, contact your advisor about course repeat limitations/rules. This course acquaints students with the basic principles of criminal law derived from the English common law heritage and from more recent statutory penal code revisions in the American states. It examines criminal law in terms of what conduct is defined as criminal and what punishments are prescribed. Students will learn and apply the principles of criminal liability, theories of punishment, and the definition of specific offenses. Students will be encouraged to develop their own criminal law imagination as they engage with the course material.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

LCJS 1210 - CRIMINAL PROCEDURE

Minimum Credits: 3

Maximum Credits: 3

This course examines the procedural aspects of criminal law, including constitutional rights, state criminal procedure, and appellate decisions and rules. Students will gain knowledge of the legal rules that govern the procedures by which crimes are investigated, prosecuted, and punished. Topics examined include the exclusionary rule, interrogations, the right to counsel, search and seizure, and police use of force.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

LCJS 1300 - LAW AND POLITICS

Minimum Credits: 3

Maximum Credits: 3

Focusing on the United States, this course examines the relationship between law and politics both in general and with respect to specific substantive topics that are subject to change. Recent substantive topics have included low-level (misdemeanor) crime and police use of force. As we study these topics, we will observe the relationship between poverty, race, and the criminal justice system. "Case studies" for each topic will allow us to examine in greater depth the intersection of criminal justice, policing, race and poverty as we see how law and policy play out in real world encounters. Finally, for each topic we will ask "Can we do better?" and we will consider the suggestions of scholars who argue both that we can and we should. Following an initial introductory period on legal reasoning, each class will include student presentations of legal arguments using a courtroom format.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Urban Studies

LCJS 1310 - LAW AND DEVIANCE

Minimum Credits: 3

Maximum Credits: 3

This course examines the concept of deviance, including types and theories of deviant behavior as well as how deviancy and responses thereto are socially constructed. We will examine the hypothesis that social, emotional, and legal responses to many types of behavior depend on myriad factors distinct from the behavior itself, including historical context and the social status of those both judging and being judged. Special attention will be given to variation in criminalization and punishment across historical contexts and social groups.

Course Attributes: Urban Studies

LCJS 1320 - CIVIL RIGHTS LAW

Minimum Credits: 3

Maximum Credits: 3

This course examines the nature and development of civil rights protections under U.S. law, especially as these relate to the U.S. Constitution. We will examine the important impact that interpretations of the Constitution have had on the character of civil rights law, including by allowing or disallowing certain forms of governmental and non-governmental action aimed at supporting or violating what today are recognized as civil rights. We will give attention to the role of civil and/or criminal liability in civil rights protections, and how this role relates to the legal system's approach to other socially defined harms. More broadly, this course considers the relationship between civil rights laws and various forms of group membership (e.g., sex/gender, race, citizenship) and types of rights (e.g., religion, speech, education, privacy).

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

LCJS 1330 - EMERGING ISSUES IN LEGAL AND SOCIAL POLICY

Minimum Credits: 3

Maximum Credits: 3

This fast-paced course explores several issues with which the law is now wrestling. Topics addressed include our Constitution and our judicial system, the religion clauses of our Bill of Rights, assisted reproductive technologies, assisted suicide and right to die movements, intellectual property in the digital age, immigration law, the insanity defense, voting rights, environmental law and climate change, freedom of expression, social media and hate speech, international law, drug law and medical marijuana, and search, seizure, and privacy rights in this hi-tech age. With all of these topics, we will explore how the law struggles to keep pace with advances in science and technology, as well as how the law reacts to a changing society. The course proceeds in seminar fashion, with student participation encouraged, and includes a mid-term and final examination.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Urban Studies

LCJS 1340 - LAW AND SOCIAL CHANGE

Minimum Credits: 3

Maximum Credits: 3

This course investigates the relationship between societal change and legal change. We examine how changes in society produce changes in law, how changes in law create changes in society, and the mutual, ongoing relationship between the two. Our investigation considers a range classical and contemporary theories and how they compare to specific cases that concern the dynamic relationship between law and social change.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

LCJS 1400 - THE SYSTEM OF CRIMINAL JUSTICE

Minimum Credits: 3

Maximum Credits: 3

This course examines the criminal justice system as a set of interlocking institutions that have dynamic inter-relationships with one another and the larger society. We explore the history, structure, and function of policing, prosecution, the courts, and corrections. Special attention is given to trends in and contemporary problems of the criminal justice system.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

LCJS 1410 - LAW ENFORCEMENT AND POLICING

Minimum Credits: 3

Maximum Credits: 3

This course examines law enforcement history, principles, and practices. We consider a range of topics including the origins and development of policing; different philosophical positions on law enforcement and its justification; and the emergence of the bureaucratized urban police force that is prevalent today. Attention is given to a critical examination of different approaches to policing, both past and present, as well as to the constitutional and social issues related to policing in a large-scale society.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

LCJS 1420 - CORRECTIONS

Minimum Credits: 3

Maximum Credits: 3

This course introduces various historical and philosophical approaches to corrections. We explore the origins of correctional institutions and the evolution of correctional practices in contemporary society. The overall goal of this course is to stimulate critical thinking about the state of corrections in the United States today. To do this, we will examine key policy topics such as increasing correctional populations, the characteristics of prisoners, the death penalty, and prisoner reentry.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

LCJS 1430 - THE JUVENILE JUSTICE PROCESS

Minimum Credits: 3

Maximum Credits: 3

The general purpose of this course is to examine the law that has evolved in the U.S. to create and address the unique legal problems associated with children and adolescents. We examine the perception that young people constitute a special class under the law and identify the various ways in which the law operates to treat youth differently from adults as a result of that perception. We also explore various rationales that support this important distinction. In this overview of juvenile law concepts, we examine a number of important aspects of the juvenile justice system, including the nature, operation, and legal requirements of juvenile justice processes, as well as relationship between various parts of the juvenile system.

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Urban Studies

LCJS 1440 - CRIMINAL INVESTIGATION

Minimum Credits: 3

Maximum Credits: 3

The course introduces the student to basic and advanced procedures employed by crime scene investigators, with emphasis on the detection, collection, and presentation of physical and testimonial evidence. The course also identifies items commonly found at crime scenes and examines their significance as trace and physical evidence. Aspects of psychological and transient evidence associated with criminal activity will be explored, including the difficulties of presenting non-tangible evidence to a court and jury. Theories of information, observation and interrogation as they relate to crime scene investigation will be examined, as well the ethics of current investigative procedures utilized by modern law enforcement agencies. Finally, the course will emphasize the value of proper investigative techniques using discussions of case examples.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

LCJS 1500 - CRIMINALISTICS

Minimum Credits: 3

Maximum Credits: 3

This course examines methods commonly used in the scientific investigation of physical evidence. Lecture topics include: the collecting, preserving, and lifting of latent fingerprints; photographing evidence; microscopic examination of hair and fibers; blood testing and typing; tool mark and firearms comparisons; impression casting; and chemical testing of paints, drugs, soils, alcohol, and inks. This course is designed to provide the student with a variety of learning experiences, including but not limited to: lecture using graphic PowerPoint picture presentations, group discussions, examinations, and experiential learning exercises, such as observations and/or presentations. Students must be prepared to work in a participatory learning environment with their peers.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

LCJS 1501 - CRIMINALISTICS LAB

Minimum Credits: 1

Maximum Credits: 1

This is an optional lab for students enrolled in administration of justice 1115. Designed for non-science majors, the lab will introduce students to the basic principles of chemistry, biology, and physics as they are used on a daily basis in criminal investigations. Topics include: identification of hair and fibers, DNA, and chromatography. These and other techniques are then applied to a simulated drug bust, a kidnapping case, and a suicide/homicide investigation.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: CREQ: ADMJ 1115

LCJS 1505 - CRIMINALISTICS 2

Minimum Credits: 3

Maximum Credits: 3

Building on the knowledge gained in Criminalistics (LCJS 1500), this second-level course focuses on death investigation. It is designed to provide in-depth knowledge of how forensic results of physical evidence found at a crime scene, as well as learned crime scene observation and documentation, are used to develop the manner of death into either Homicide, Accident, Suicide, Natural Death or Could Not Be Determined. The course will address the

advanced knowledge needed to investigate or review the many possible different forensic scenes, and provide a higher understanding of what forensic investigators do and how a scene is processed. Each standalone subject introduces the evidence type and its forensic significance, details the relevant distinguishing and discriminating characteristics for the trace material in question, presents the analytical techniques commonly applied in the criminalistics laboratory, and discusses data interpretation and evidential value.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: LCJS 1500 or ADMJ 1115

LCJS 1510 - PSYCHOLOGY AND LAW

Minimum Credits: 3

Maximum Credits: 3

This course introduces the student to the contributions of psychology to the legal process. Throughout the course, we will consider how psychological research can contribute to a better understanding of issues related to law and the legal process, how the legal and criminal justice system can be informed by the results of psychological research, and how the field of psychology can be more responsive to legal issues. Topics include the role of psychology experts in criminal proceedings, the problem of criminal insanity, the process of civil commitment, and the rights of those deemed to be mentally ill. Students will read and analyze legal cases as well as scholarly discussions of these and other related issues.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

LCJS 1520 - CYBERCRIME

Minimum Credits: 3

Maximum Credits: 3

With the ever-increasing connectivity of devices to services, the likelihood of cybercrime victimization is expanding exponentially. In this course, students will learn the types of crimes that occur online, and receive a very basic overview of how these crimes are conducted. A basic overview of technology and common cyber terminology will be provided to assist students new to this subject. The course also will cover the process of cybercrime response, including an overview of evidence collection, evidence preservation, and legal considerations. Students will learn about the challenges Cyber crime investigator encounter when tracking down offenders on the web. Special attention will be given to the current Cyber threats faced by the financial industry.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Russian & East European Studies

LCJS 1521 - CYBER SECURITY, LAW, AND MONEY LAUNDERING

Minimum Credits: 3

Maximum Credits: 3

This course will examine the scope of cyber-crime and its impact on today's system of criminal justice, both domestic and internationally. Topics include the use of computer technology to commit crimes such as hacking and other cyber-dependent crimes, as well as means of committing more traditional violations of law. Also included will be an analysis of the legal considerations facing law enforcement and other cyber-security professionals who are tasked with meeting the challenges of discovering, investigating and prosecuting cyber-crimes. Since our economy and security enterprises are so dependent on the electronic dissemination of information, effective measures to secure this vital resource will be explored. Given the fact that funds are transferred electronically, the electronic transmission of finances will be

examined as well as the more basic methods of raising and laundering funds in order to advance transnational organized crime and terrorist activities throughout the world.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

LCJS 1530 - ORGANIZED CRIME

Minimum Credits: 3

Maximum Credits: 3

This course examines the history and ongoing development of organized crime. The emergence of "non-traditional" groups that compete for power and profits will be examined, as well as the alliances between various criminal groups that have evolved and resulted in the phenomenon of "transnational" organized crime. Those "non-traditional" groups include, but are not necessarily limited to, domestic and international terrorist organizations. Neither organized crime nor a terrorist organization can be effectively discussed without integrating the evolution of US drug policy, which therefore will be included. The course also will give attention to the impact of organized crime on the private sector, as well as to the various government tactics used to counter organized crime.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Global Studies

LCJS 1531 - INTERNATIONAL ORGANIZED CRIME

Minimum Credits: 3

Maximum Credits: 3

Organized crime is no longer confined to a few countries such as Italy, the United States, and Japan. With the end of the Cold War and the immense technological advances that spread with globalization, organized crime has become much more pervasive, with a major impact in countries such as Russia, Mexico, and South Africa, and with increased operations (and especially co-operation) across borders. This course looks at the dynamics of transnational organized crime, explains why it develops in particular countries, the various forms it takes, and the responses of law enforcement agencies and international institutions.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Attributes: Asian Studies, Global Studies, Russian & East European Studies

LCJS 1540 - WHITE COLLAR CRIME

Minimum Credits: 3

Maximum Credits: 3

This course examines the meaning, varieties, and extent of "white collar" crime in the United States. It investigates the developmental history of this concept, theories of white collar crime causation, specific types of white collar crime, empirical and theoretical controversies surrounding white collar crime, and the probable future directions for this type of criminal behavior.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Urban Studies

LCJS 1550 - GENDER, RACE, CLASS AND CRIMINAL JUSTICE

Minimum Credits: 3

Maximum Credits: 3

Gender, race and class are overlapping categories of experience that affect all aspects of life. This course examines relationship of the criminal justice system with these categories of experience. Using intersectional analysis, we analyze and evaluate theoretical approaches and data that seek to explain how gender, race, and class affect the workings of the criminal justice system, and in turn, how the criminal justice system affects symbolic and material inequality based on these social categories.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Urban Studies

LCJS 1560 - PROBATION AND PAROLE

Minimum Credits: 3

Maximum Credits: 3

This course presents and evaluates the nature and impact of probation and parole, and strategies for their most effective use. Attention is given to parole and probation trends over time at the national, state, and local level. Topics include: effects of probation and parole on both the criminal justice system and the larger society; the structure and operation of probation and parole services; and differences between juvenile and adult probation.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

LCJS 1570 - PRINCIPLES OF HOMELAND SECURITY

Minimum Credits: 3

Maximum Credits: 3

This course examines the challenges facing our domestic public service and justice personnel in the context of a borderless world of globalization and technology. Attention is paid to problems of terrorism, incident management systems, violence incident response procedures, changing federal, state, and local response planning and security issues, mass casualty programs, crime scene operations, the evolving role of the intelligence community, and the balance of security and liberty.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Global Studies

LCJS 1571 - TERRORISM

Minimum Credits: 3

Maximum Credits: 3

This course will provide a broad overall understanding of the nature and history of terrorism. Areas to be covered include the history of terrorism, domestic terrorism, the psychology of terrorism, the development of modern terrorism through bio-chemical hazards, narco-terrorism, religion-based terrorism, internal terrorism, and assassinations. Possible root causes and patterns of terrorism will be discussed. Additional topics to be included are counter-terrorism policies, the economics of terrorism, and the role of foreign policy.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Global Studies, Russian & East European Studies

LCJS 1572 - INTRODUCTION POLICE MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the management of police organizations. Topics include evolving community expectations, alternative organizational models, recruitment, training and education, performance evaluations, technology and communications, research and planning, internal and external police accountability, and police culture and ethics.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

LCJS 1580 - THE LEGAL SYSTEM

Minimum Credits: 3

Maximum Credits: 3

This course provides students with an overview of the structure and operation of American law and legal systems. With an emphasis on legal institutions, the course examines the nature, functions, limitations, and operations of law in modern society. Various jurisprudential approaches are examined, and selected problems of law, power, morality, and social and economic stratification are studied.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

LCJS 1581 - INTERNATIONAL LAW

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the nature of international law and how it differs from law within states. Topics covered include the role of the United Nations, treaties, enforcement mechanisms, international courts, human rights issues, the law of war, genocide, and the prospects for the future of international law.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Attributes: Asian Studies, Russian & East European Studies

LCJS 1582 - PUBLIC LAW AND MORAL REASONING

Minimum Credits: 3

Maximum Credits: 3

With an emphasis on public law, this course analyzes moral and legal dilemmas which people face in their respective fields of work, and the larger society. The course will help students to develop the skill of moral reasoning so that they may better identify, analyze, deliberate upon, and resolve moral dilemmas.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

LCJS 1583 - SEX, LAW AND MARRIAGE

Minimum Credits: 3

Maximum Credits: 3

This course surveys the socio-legal aspects of marriage, marital alternatives, and related modes of sexual expression.

Laws in these areas have been changing dramatically, reflecting, if not causing, fundamental shifts in the values and norms surrounding intimate behavior. The following topics are covered: sexual offenses, protection from abuse, abortion rights, child custody, child support, unwed cohabitation, marriage, annulment, separation, divorce, alimony, and marital property rights.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

LCJS 1584 - LEGAL ISSUES IN PUBLIC SERVICE

Minimum Credits: 3

Maximum Credits: 3

This course examines the impact of law on public administration and the manner in which legal implications affect the formulation, adoption, and implementation of programs. Students will learn to recognize major legal issues that affect public administration as a system and those that may arise in an individual public service career.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Attributes: Urban Studies

LCJS 1586 - CONSUMER LAW

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to major laws governing the rights of consumers. The evolution of consumer rights is traced from the common law to our present statutes. Students are introduced to state and federal laws, including: the Truth in Lending Act, the Fair Debt Collection Practices Act, Fair Credit Reporting Act, and the Equal Credit Opportunity Act.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

LCJS 1590 - SPECIAL TOPICS IN LAW AND CRIMINAL JUSTICE

Minimum Credits: 3

Maximum Credits: 3

Although the specific set of topics shifts from semester to semester, this course focuses on key issues at the intersection of law and criminal justice. Possible topics include: policies, goals, and procedures of criminal justice agencies; trends and controversies regarding law enforcement activities; the role of policing and corrections in ensuring human security; the role of law and the courts in ensuring justice; and the scope and impact of the criminal justice system.

Grade Component: LG/SNC Elective Basis

LCJS 1610 - DATA ANALYSIS IN CRIMINAL JUSTICE

Minimum Credits: 3

Maximum Credits: 3

This course examines various data sources related to the context and workings of the criminal justice system. We assess the strengths and weaknesses of existing data sources and analyze how data can be used to improve our understanding of criminal justice institutions and their operation. Students will get regular practice with data interpretation exercises, including using basic arithmetic tools (e.g. rate ratios, percent change) for the purpose of rigorous tabular and descriptive analyses, and in preparation for more advanced forms of quantitative analysis. As a final project, students will draw on several existing sources to create and analyze a data set relevant to their own criminal justice interests.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

LCJS 1620 - INTRODUCTION TO LEGAL RESEARCH

Minimum Credits: 3

Maximum Credits: 3

This is an introductory course to legal research using both primary sources (constitutions, statutes, case-law, and administrative law) and secondary sources (digests, citators, encyclopedias, legal periodicals and newspapers, treatises, annotations, Restatements) for Federal and Pennsylvania law. It assumes no knowledge on your part. It will provide online training for various free and subscription databases (including ULS databases and Westlaw).

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

LCJS 1630 - WRITING IN THE CRIMINAL JUSTICE PROFESSIONS

Minimum Credits: 3

Maximum Credits: 3

This writing-intensive course will employ a combined practical and academic approach to the study of written communications central to the successful operation of the American criminal justice system. We will examine various written communication formats at all levels of the criminal justice system from policing and investigations to prosecution and adjudication, paying particular attention to those that are used regularly and impact significantly the processes and outcomes for those enmeshed in the criminal justice system. To that end, we will examine a variety of written communications used in the criminal justice professions, including law enforcement, prosecution, the judiciary, probation, and corrections. We will examine the role of discretion in written communications by actors in each of these professions. Additionally, we will consider challenges to accurate, effective, and ethical communication by criminal justice practitioners. We will ask how the criminal justice professional can communicate clearly and fairly within an often under-resourced and imperfect criminal justice system. Students will have the opportunity to consider more deeply a communication problem in a profession of interest to them and to investigate and propose solutions aimed at addressing the problem and meaningfully improving communication in that profession. This course will be indispensable to the student who is planning a career in the criminal justice professions, and it will serve as a valuable window into the workings of criminal justice for those who are pursuing pathways related to criminal justice (e.g., research, non-profit advocacy).

LCJS 1700 - ETHICS IN CRIMINAL JUSTICE (CAPSTONE)

Minimum Credits: 3

Maximum Credits: 3

This is a capstone course for LCJS majors in their final year. This writing-intensive course will employ a combined practical and theoretical approach to the study of ethics in relation to the American criminal justice system. We will examine ethical dilemmas at all levels of the criminal justice system from policing and investigations to prosecution and adjudication, paying particular attention to those that lead to discrimination based on race, class and gender and abuse of authority. To that end, we will examine in-group/out-group dynamics and noble cause corruption in both policing and prosecution. We will consider prosecutorial discretion and the ethical mandate of the public prosecutor as well as judicial conduct and oversight. Additionally, we will examine the role of structural biases in the criminal justice system in perpetuating race, class and gender inequality. Above all, we will ask how the criminal justice professional can operate ethically within a morally imperfect system. We will consider not only what is ethical behavior, but also common barriers (cognitive, interactional, organizational) to ethical action. The course will revisit topics introduced early in the major such as the nature of crime, the decision to criminalize and the purpose of punishment in the American criminal justice system, and it will ask students to assess the legitimacy and fairness of these approaches.

LCJS 1900 - PRESERVICE INTERNSHIP

Minimum Credits: 1

Maximum Credits: 6

This course is a supervised placement with specific agencies in the criminal justice system and is offered through the College of General Studies for student interns in the CGS Administration of Justice and Legal Studies majors and minors. Students enrolled in this internship engage in formal and reflective writing, journaling, and analysis about their work experience and how it relates to their academic and career pursuits. Class workshops and group discussions provide further opportunities for debriefing and consolidation of ideas and skills. This is a hybrid course with three in-person workshops and faculty authorization is required. Students must be registered for the internship course at the time they are completing the internship in order to earn credit.

Leadership

LDRSHP 1100 - THEORIES OF LEADERSHIP

Minimum Credits: 3

Maximum Credits: 3

This course is designed to acquaint students with multiple theories and practices associated with effective leadership. In answering the question, "what is leadership," it examines such theories as situational, participative, transformational, and servant leadership. It also addresses those leadership and administrative skills and practices usually associated with

effective community organization and professional management.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

LDRSHP 1200 - LEADERSHIP SEMINAR

Minimum Credits: 3

Maximum Credits: 3

This course is designed to develop in students an understanding of the conceptual and practical strategies of leadership. Through the use of readings, in-class activities and guest presenters, students are exposed to four factors that play a role in the development or modification of a leader. These include: appreciation of the concept of organizational life; understanding the process of change; comprehending the impact of leadership style, delivery, and strategy; and finally, developing an awareness of individual strengths and weaknesses and how to most effectively match individual style to the leadership process. The course is required of all students pursuing the Undergraduate certificate in leadership. Students should have successfully completed both the emerging leaders program and the theories of leadership course prior to registering.

Legal Studies

LEGLST 1140 - INTRODUCTION TO CRIMINAL LAW

Minimum Credits: 3

Maximum Credits: 3

Acquaints the student with basic principles of criminal law derived from our English common law heritage and from more recent statutory penal code revisions in the American states. Course examines the meaning of crime and of criminal responsibility; criminal complicity and conspiracy; sentencing alternatives; and the decriminalization of some offenses.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

LEGLST 1141 - INTRODUCTION TO CRIMINAL PROCEDURE

Minimum Credits: 3

Maximum Credits: 3

This course examines the procedural effects of criminal law, including constitutional rights, state criminal procedure, and appellate decisions and rules.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

LEGLST 1150 - LAWYERS AND LEGAL PROFESSION

Minimum Credits: 3

Maximum Credits: 3

This course offers a multi-disciplinary examination of lawyers and their role in society, with an emphasis on the

relationship of lawyers to courts, judges, clients, and other lawyers. Topics to be covered in the course include: the philosophy of advocacy, the psychological and ethical aspects of practicing law, the role of law schools in the creation of professional identity, societal attitudes towards lawyers and the legal system, the involvement of lawyers in government, politics, and policy making, and evolving concepts of legal practice.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

LEGLST 1260 - LAW, LITERATURE, AND CINEMA

Minimum Credits: 3

Maximum Credits: 3

This course will introduce the student to literary treatments of basic issues of law and justice. Through an examination of plays, novels, essays, and short stories, the student will be able to see competing conceptions of law, justice, and morality. Legal themes as they appear in literature can then be used to analyze and evaluate selected areas of civil and criminal law.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

LEGLST 1318 - SEPARATION, DIVORCE AND CUSTODY

Minimum Credits: 3

Maximum Credits: 3

A structural analysis of the causes and consequences of divorce. The process of divorce in its various psychological, legal, economic and social components is examined. The impact of divorce on the spouses, children and relatives is discussed.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

LEGLST 1320 - LAW AND ENVIRONMENT

Minimum Credits: 3

Maximum Credits: 3

This course introduces the student to the role of law in regulating environmental pollution. Included will be an examination of water pollution, air pollution and noise pollution. Major federal statutes such as the national environmental protection act, and the Clean Air Act will be studied along with judicial and administrative cases and rules governing these areas. Emphasis will be upon the interaction of law, politics, economics and psychology in environment control.

Minimum Credits: 4

Maximum Credits: 4

This course will help you learn to understand, and to express yourself creatively in both spoken and written Amharic. You will acquire basic knowledge of everyday Amharic and of the country and culture of Ethiopia. We will focus on building communicative competence and conversational proficiency, while simultaneously building a solid foundation in Amharic grammar, writing, listening and reading comprehension skills. You will be expected to memorize vocabulary and utilize it in both speech and writing. In this course, you will learn the following thematic / cultural and grammatical topics: Thematic and Cultural Topics; Social interaction; Introducing oneself; Family members and housing; Activities and personal information; Foods; Time; Traveling; Holidays & Ceremonies; Daily routine; Nature Grammar Topics: Amharic alphabet & pronunciation; Pronouns & Indirect subjects; Verbs, Plural marker; Description & comparison; Subordinate Clauses; Preposition; Expressions

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

LCTL 0162 - AMHARIC 2

Minimum Credits: 4

Maximum Credits: 4

This course is a continuation of Amharic 1 and will help you learn to understand, and to express yourself creatively in both spoken and written Amharic. You will acquire basic knowledge of everyday Amharic and of the country and culture of Ethiopia. We will focus on building communicative competence and conversational proficiency, while simultaneously building a solid foundation in Amharic grammar, writing, listening and reading comprehension skills. You will be expected to memorize vocabulary and utilize it in both speech and writing.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

LCTL 0163 - AMHARIC 3

Minimum Credits: 3

Maximum Credits: 3

Building on knowledge acquired in the successful completion of Amharic levels 1 & 2, students will continue to acquire knowledge of everyday Amharic language and of the country and culture of Ethiopia, while strengthening their communicative competence and conversational proficiency, and simultaneously building a solid foundation in Amharic grammar, writing, listening and reading comprehension skills. You will be expected to memorize vocabulary and utilize it in both speech and writing.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

LCTL 0164 - AMHARIC 4

Minimum Credits: 3

Maximum Credits: 3

This course is a continuation of Amharic 3. Students will continue to acquire knowledge of everyday Amharic language and of the country and culture of Ethiopia, while strengthening their communicative competence and conversational proficiency, and simultaneously building a solid foundation in Amharic grammar, writing, listening and reading comprehension skills. You will be expected to memorize vocabulary and utilize it in both speech and writing.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

LCTL 0169 - AMHARIC CULTURAL LANDSCAPE AND ETHIOPIAN INDIGENOUS KNOWLEDGE

Minimum Credits: 3

Maximum Credits: 3

This course explores the cultural environment, social structure, and indigenous knowledge of Ethiopia. It implies an examination of how the culture of Amharic-speaking people contributes to and is interwoven with the broader spectrum of Ethiopian indigenous knowledge. This encompasses understanding the ways in which the physical, spiritual, and social aspects of the Amharic-speaking community reflect and sustain the culture as the collective wisdom passes down through generations. The course focuses on both the tangible and intangible elements of culture, such as language, rituals, economic practices, social norms, and artistic expressions and how these elements serve as a gateway to understanding Ethiopian identity in the Horn of Africa. It also gives pertinent focus to indigenous knowledge of environmental management, medicine and medication, and governance and leadership.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

LCTL 0231 - DANISH 1

Minimum Credits: 4

Maximum Credits: 4

The greatest part of the first term will be devoted to the presentation and practice of the basic sound patterns of the language, its fundamental sentence patterns, and sufficient vocabulary to illustrate and practice them. An introduction to the writing system will be offered together with the opportunity to acquire elementary writing and reading skills.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: European Union Studies, European and Eurasian Studies, Global Studies, Transatlantic Studies, West European Studies

LCTL 0351 - HAITIAN CREOLE 1

Minimum Credits: 4

Maximum Credits: 4

This course will help you learn to understand, and to express yourself creatively in both spoken and written Haitian Creole. You will acquire basic knowledge of everyday Haitian Creole and of the country and culture of Haiti. We will focus on building communicative competence and conversational proficiency, while simultaneously building a solid foundation in Haitian Creole grammar, writing, listening and reading comprehension skills. You will be expected to memorize vocabulary and utilize it in both speech and writing. In this course, you will Talk about yourself (origin, age, appearance), your studies, activities and preferences; Ask others about their life, studies, activities and preferences; Describe where you live and with whom you live (home, family); Discuss present, future, and past events, and tell time; Read short passages on topics such as Haitians and Haitian culture

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

LCTL 0352 - HAITIAN CREOLE 2

Minimum Credits: 4

Maximum Credits: 4

This course is a continuation of Haitian Creole 1, and will help you learn to understand, and to express yourself creatively in both spoken and written Haitian Creole. You will acquire a limited knowledge of Haitian Creole language to conduct limited conversation on a variety of topics including your personal life, work environment, and Haitian culture and society, etc. We will focus on building communicative competence and conversational proficiency, while simultaneously building a solid foundation in Haitian Creole grammar, writing, listening, and reading comprehension skills. You will be expected to memorize vocabulary and utilize it in both speech and writing.

Library & Information Science

LIS 2407 - METADATA

Minimum Credits: 3

Maximum Credits: 3

Principles and application of metadata for networked information resource organization, representation, retrieval, and interoperability using a variety of schemes and tools.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: School of Information Science or Sch Computing and Information

LIS 2676 - RESEARCH DATA MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

This topical course is designed to introduce students to the conceptual and practical challenges of research data management and takes a highly innovative approach by "immersing" the participants in disciplinary research settings in subject domains beyond LIS, as part of the learning process. The seminar will explore disciplinary data diversity, but will also examine how universities and other organizations are developing policy, roadmaps, plans and tools to facilitate good research data management practice. The seminar will investigate roles, responsibilities, and relationships of key stakeholders engaging with legal and ethical data issues, advocacy and training methods, and the costs of providing such research data management services in institutions. A pragmatic approach will be supported by reference to case studies and exemplars, which show how researchers, librarians, technologists, administrators, and others are responding positively to the data challenge.

Linguistics

LING 0007 - ESL WRITING INTERMEDIATE

Minimum Credits: 3

Maximum Credits: 3

This is an intermediate writing skills course for non-native speakers of English, covering (a) the process and mechanics of writing a research paper (b) composition writing, with a focus on expository writing for college work (c) selected grammar skills.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

LING 0008 - ESL SPEAKING AND LISTENING

Minimum Credits: 3

Maximum Credits: 3

This is an advanced conversation course for non-native speakers of English to improve speaking and listening skills while gaining experience in the organization and oral presentation of material for academic work. Pronunciation exercises are done in class, while fluency and comprehensibility are the objectives of the student led discussions and presentations. The student will also learn how to prepare and present speeches and discussions. Note-taking skills are practiced. Some language lab work is required.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

LING 0009 - ESL WRITING ADVANCED

Minimum Credits: 3

Maximum Credits: 3

This course is intended for foreign students who need work on advanced composition skills in English covering (a) the process and mechanics of writing a research paper (b) composition writing, with a focus on expository writing for college work (c) selected grammar skills.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Satisfactory/No Credit

LING 0010 - ESL READING AND VOCABULARY

Minimum Credits: 3

Maximum Credits: 3

This is an advanced reading skills course for non-native speakers of English, emphasizing the type of reading required in University-level course work. The course includes intensive reading of passages from the course text, extensive reading of academic or other material selected by the student or instructor, speed improvement and vocabulary development.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

LING 0232 - DANISH 2

Minimum Credits: 4

Maximum Credits: 4

This course will help you learn to understand, and to express yourself creatively in both spoken and written Danish. You will acquire basic knowledge of everyday Danish and of the country and culture of Denmark. We will focus on building communicative competence and conversational proficiency, while simultaneously building a solid foundation in Danish grammar, writing, listening and reading comprehension skills. You will be expected to memorize vocabulary and utilize it in both speech and writing.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

LING 1000 - INTRODUCTION TO LINGUISTICS

Minimum Credits: 3

Maximum Credits: 3

This course is a survey of general linguistics, emphasizing the theory and methodology of the traditional central areas of the field--phonetics, phonology, morphology, and syntax- with special concentration on phonological and syntactic theories and analytical techniques. The remainder of the course will be devoted to phonetics, morphology, historical

linguistics, semantics and pragmatics, sociolinguistics, and psycholinguistics.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: SCI Polymathic Contexts: Soc/Behav. GE. Req.

LING 1023 - ASPECTS OF THE KOREAN LANGUAGE

Minimum Credits: 3

Maximum Credits: 3

This course will examine and explore essential topics in Korean linguistics such as the Korean scripts and sounds, genetic affiliation, historical development, word structure, grammatical structure, discourse, honorific and speech styles, and first/second language acquisition. Upon completion of this course, students will i) understand how the Korean language developed, and what kind of relationship the Korean language has with other languages, ii) have an ability to critically analyze basic word, phrasal and sentence structures as well as discourse structures, iii) have a general understanding of how the Korean language works as a communication system.

Academic Career: Undergraduate

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Geographic Region General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

LING 1044 - THE CHINESE WRITING SYSTEM IN EAST ASIA

Minimum Credits: 3

Maximum Credits: 3

The Chinese script is presumed to be difficult to the untrained eye, but of the myth lies in misunderstandings or misinformation. The course will introduce students to the Chinese writing system through historical and applied linguistics perspectives, and it will provide opportunities of discussion on how the Chinese script influences topics in anthropology, education, arts, and politics in the East Asian region. Students will gain foundational knowledge regarding the linguistic features of the Chinese writing system, including its historical development, acquire an insight into the cultural aspect of the script, and be challenged to apply such knowledge to make critical inquiries on the relationship between the writing system and literacy development, cognitive science, visual arts, and society.

LING 1095 - LANGUAGE IN SCIENCE FICTION

Minimum Credits: 3

Maximum Credits: 3

If representatives from an alien species appeared on earth from outer space, how would we communicate with them? What if they were not organic creatures, but were instead machines? What would an alien species sound like? What kinds of changes will happen to languages over the next several centuries? Science fiction tropes like aliens, robots, and time travel richly reward linguistic investigation. In this class, we will apply current linguistic theory to various works of science fiction, asking first and foremost: "How linguistically plausible are the scenarios, tropes, and narratives depicted here?"

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Literature General Ed. Requirement

LING 1110 - LINGUISTICS AND POETICS

Minimum Credits: 3

Maximum Credits: 3

A basic premise for this interdisciplinary course is that literary texts and poetry - unique among all the verbal arts - operate at both conscious and unconscious registers of human cognition. At the conscious level, literary scholars dealing with the formal aspects of texts typically tend to confine their analyses to the study of sound patterns and various semantic devices (including prosody, figurative language, and philosophical-conceptual tropes). While this approach has proved fruitful, it is limited to exploring the surface features of writers' conscious use of language. What would happen, however, if, employing the tools of current syntactic and language-processing theory, along with recent discoveries from the field of cognitive science, we were also to investigate what writers and readers are experiencing on an unconscious level? Moreover, what insights could be gained by combining this knowledge with what literary scholars have been teaching us about how literary texts, mostly poetry, work on a conscious level?

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

LING 1235 - LANGUAGE, GENDER AND SEXUALITY

Minimum Credits: 3

Maximum Credits: 3

The course considers the ways in which linguistic patterns are sensitive to the social categories of gender and sexuality, including intersectional categories such as race, class, and age, and the role of power and privilege in these patterns. The main questions considered are: How does language categorize the gender/sexuality world in both grammar and interaction? How do speakers display, create, and orient to gender, sexuality, and desire in interaction? How and why do people display different ways of speaking based on their gender/sexual identities?

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: DSAS Social Science General Ed. Requirement, Gender, Sexuality & Women's St, Global Studies, SCI Polymathic Contexts: Soc/Behav. GE. Req., Writing Intensive Course (WRIT)

LING 1240 - LANGUAGE AND THE LAW

Minimum Credits: 3

Maximum Credits: 3

This course explores some of the ways in which linguistic science can shed light on the use and misuse of language in the legal system. After an introduction to the origins and special characteristics of written English legal language ("legalese"), we will study the layman's (non-) understanding of technical legal language; the language of persuasion (e.g. Exploitation of such linguistic features of ambiguity, implicit "rules of conversation" and socially stigmatized dialect features); and arguments for and against the participation of linguists as expert witnesses in the courtroom.

Grade Component: LG/SNC Elective Basis

LING 1250 - HISTORY OF LANGUAGE IN AMERICA

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Attributes: SCI Polymathic Contexts: Soc/Behav. GE. Req.

LING 1253 - LANGUAGE AND THE BLACK EXPERIENCE

Minimum Credits: 3

Maximum Credits: 3

English colonial expansion and pursuit of trade during the seventeenth to nineteenth centuries gave rise to a wide array of language varieties, among them the pidgin and creole varieties that arose in the plantation colonies of the Atlantic, Pacific and the Americas. In this course, we examine the languages of enslaved Africans as they are reanalyzed/reformed in these new contexts. We will confront and challenge 'common sense' beliefs/ideologies about language, race, education, and power. In particular, we will: examine of the structure, history and use of Afro-American language varieties; take a close look at the history and symbolic role of language in the lives of Blacks; examine how people's sociocultural experience is reflected in language; examine the relationships between language and social life in the African-American and Caribbean communities; and consider implications of language differences for social and educational opportunities.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Attributes: SCI Polymathic Contexts: Global&Cross Cul GE. Req.

LING 1263 - CROSS-CULTURAL COMMUNICATION

Minimum Credits: 3

Maximum Credits: 3

This course is designed for those planning to work or live in a situation which serves as an interface between two or more cultural groups, and also for those who are interested in matters of language and culture. The curriculum deals with aspects of culture as they interact with language, and specific topics (e.g. Dialects; language in situations of cultural contact; and the implications of cross cultural communication differences for education policy).

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Asian Studies, Global Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

LING 1267 - ASPECTS OF SOCIOLINGUISTICS

Minimum Credits: 3

Maximum Credits: 3

Aims at providing insights into how social relationships influence language, and how language can play a role in shaping social relationships, both in the individual and societal level. Some of the issues we will look at are; attitudes towards languages, dialects and society; social differentiations of language; black English; multilingualism; bilingual education and language planning.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: DSAS Social Science General Ed. Requirement, Global Studies, SCI Polymathic Contexts: Soc/Behav. GE. Req., Writing Intensive Course (WRIT)

LING 1269 - LINGUISTIC VARIATION AND CHANGE

Minimum Credits: 3

Maximum Credits: 3

Sociolinguistic variation is a subdiscipline of linguistics, and at its core are the same ideas that motivate all of linguistics: How is language organized and structured? How did particular languages end up the way they did? We will also address two more specific questions: Why does language change? How does language change? In order to address these questions, we will also discuss methodological approaches that have been taken to try to answer them. How do we observe language and find patterns within it to answer the above questions? Course goals: By the end of the course, you will be able to explain how linguistic variation is structured, acquired, and used; how it reflects and is affected by social identity, motivation, and structure; and how it relates to language change. You will learn about methodologies used in studying linguistic variation. Additionally, you will design and carry out a variationist analysis using these methodologies.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: LING 1000 or CSD 1020

Course Attributes: Undergraduate Research

LING 1330 - INTRODUCTION TO COMPUTATIONAL LINGUISTICS

Minimum Credits: 3

Maximum Credits: 3

This is a course designed to introduce students in linguistics to the foundations and real-world applications of computational linguistics. Students will learn how core aspects of human language - words, morphology, grammar, and meaning - are represented and processed computationally. They will also be introduced to the challenges of real-world language engineering problems and discover how the latest language technologies and artificial intelligence systems seek to solve them. Many practical applications will be covered: search, document classification, spell checking, machine translation, corpus exploration, and more. Throughout the course, there will be a big emphasis on hands-on training; students will work extensively with popular natural language processing platforms. NOTE: The Python prerequisite (CS 8, 10-12) can be waived upon proof of Python knowledge. Please email the instructor.

LING 1340 - DATA SCIENCE FOR LINGUISTS

Minimum Credits: 3

Maximum Credits: 3

Data science is a fast-growing professional and academic discipline that is highly interdisciplinary in nature. Its practice centers on domain expertise: this course will introduce linguistics majors to core methods and practices in data science as it pertains to linguistic inquiry. Students will first learn the fundamentals of structuring, manipulating and sharing various forms of linguistic data; be given hands-on training on practical aspects of data processing, including handling large quantities of text data ('big data') and creating statistical language models through machine learning; and get acquainted with the emerging field of knowledge engineering and ontology. Additionally, they will be given a chance to apply data-intensive methods to a term project of their choice. Upon successful completion of this course, students will be able to: identify the best methods for representing and analyzing linguistic data for a given purpose; transform and process linguistic data in large volumes; and understand how statistics-driven text analytics and machine learning methods operate.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: LING 1000 and (LING 1330 or CS 0008 or 0155)

LING 1441 - FIELD METHODS IN LINGUISTICS

Minimum Credits: 3

Maximum Credits: 4

This course is meant to simulate the experience of linguistic field work, and raise awareness about the effectiveness of specific interview techniques for acquiring linguistic data. The course will give instruction and experience in eliciting data from a speaker of non (indo) European language. Students will undertake the investigation of the phonology, some aspect of grammar, and the ethno semantic study of a taxonomically structured semantic field such as plants or animals. Students will make detailed elicitation plans in advance of their administration.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: LG/SNC Elective Basis

Course Requirements: CREQ: LING 1578 and 1773 and 1777; LVL: Sr

LING 1447 - LANGUAGE, CULTURE AND SOCIETY

Minimum Credits: 3

Maximum Credits: 3

Certain cultural concerns are well-labeled linguistically: kinship, plant-names, diseases, colors, etc. The study of how such semantic fields are labeled and organized is ethnosemantics. Much of the way language is used depends on the context of speaking. Different ways of talking to different people is the subject matter of sociolinguistics. Some thoughts that we habitually think seem illogical on reflection, but it seems as if our language predisposes us to think this way. Such phenomena are addressed by the Sapir-Whorf hypothesis.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

LING 1470 - ENDANGERED LANGUAGES

Minimum Credits: 3

Maximum Credits: 3

In this course, we investigate such questions as: What are the symptoms and underlying causes of language endangerment and language death? Are efforts to revitalize dying languages worthwhile, or is the disappearance of languages inevitable or even beneficial? How are thought, identity, and culture influenced by language, and vice versa - and what implications does the answer to that question have for language documentation and revitalization?

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: DSAS Diversity General Ed. Requirement, DSAS Global Issues General Ed. Requirement, SCI Diversity General Ed. Requirements, SCI Polymathic Contexts: Global&Cross Cul GE. Req., Writing Intensive Course (WRIT)

LING 1520 - INTRODUCTION TO ARABIC LINGUISTICS

Minimum Credits: 3

Maximum Credits: 3

In the first half of this course, students will learn about the linguistic structure of modern standard Arabic and related dialects with a special focus on the phonology, morphology and syntax. Material in the second half of the course will focus primarily on social issues related to the Arabic language including discourse, dialectology and language variation, diglossia and language contact.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: LING 1000 or CSD 1020

LING 1578 - PHONETICS AND PHONEMICS

Minimum Credits: 3

Maximum Credits: 3

This course provides an introduction to the production, recognition, and transcription of speech sounds in various languages of the world, and to the patterning of these sounds in phonological systems. Emphasis is on articulatory

phonetics, though there is also some discussion of acoustic and experimental phonetics.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: LING 1000 or CSD 1020; MIN GRAD 'C'

LING 1579 - PHONOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course introduces the principles of phonological analysis and theory. After a brief survey of the roots of modern phonology in Prague school and American descriptivist ('classical phonemic') theories, the main focus of the course will be on generative phonology. Both in and out of class, students will be expected to solve phonological problems and construct theoretical arguments.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: LING 1578 or CSD 1026

LING 1580 - LANGUAGE AND THE MIND

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to the study of language as a cognitive science, focusing on the mental processes and representations that we use to comprehend and produce language. Throughout the course we will emphasize fundamental debates in cognitive science and the ways these debates influence current psycholinguistic research into questions about sentence comprehension, production, and conversation. Because this course is multidisciplinary in nature, drawing primarily from the fields of linguistics and psychology, students will be introduced to ideas, theories, and methods used by researchers in both fields.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: LING 1000 or PSY 0010 or CSD 1020

LING 1650 - ACQUISITION OF VARIATION

Minimum Credits: 3

Maximum Credits: 3

Upon completion of this course, students will: understand how variationist theory accounts for second language acquisition (SLA); develop a knowledge of variationist theory in order to be able to evaluate critically empirical research; be able to write a successful academic abstract; present empirical articles and original projects with clarity and to create an academic handout; apply the theoretical and methodological concepts covered in class to an original final project, which includes the creation of an elicitation task; and, develop professionally.

Academic Career: Undergraduate

LING 1682 - INTRODUCTION TO SEMANTIC THEORY

Minimum Credits: 3

Maximum Credits: 3

A survey course designed to introduce students who have been exposed to linguistics and logic to contemporary work in the theory of meaning.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: LING 1000 or CSD 1020

LING 1720 - STRUCTURE OF SIGN LANGUAGES

Minimum Credits: 3

Maximum Credits: 3

This course will focus on the linguistic structure of sign languages, drawing examples principally, though not exclusively, from American sign language (ASL). It will also highlight similarities and differences between sign languages and spoken languages. In addition to structural features, the course will cover mechanisms unique to visual/spatial languages, the use of the face and body for grammatical signals, language variation, and acquisition of sign languages.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: LING 1000 or CSD 1020

LING 1721 - SOCIOLINGUISTICS OF SIGN LANGUAGE

Minimum Credits: 3

Maximum Credits: 3

There are various sociolinguistic topics that one must consider with respect to signed languages of the deaf. Regarding language contact, ambient languages-either signed or spoken-influence a signed language. Less than 10% of deaf people are exposed to signed language from birth, which results in unique phenomena. Additionally, signed languages exhibit variation based on a myriad of social and geographical factors. These topics, in addition to language planning and language policy, will be addressed in this course.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: LING 1000 or CSD 1020

LING 1738 - LINGUISTIC STRUCTURES OF ENGLISH

Minimum Credits: 3

Maximum Credits: 3

This course is a survey of phonological, morphological, and syntactic structures of English, with an emphasis on its typologically unusual characteristics. The course will cover how English words, phrases, and sentences are put together, as well as current and historical trends that have led to English as it is used today. We will also address differences between prescriptive rules of how English "should be", and descriptive generalizations about how English actually is. Lecture format with class discussion.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: LING 1000

LING 1761 - DISCOURSE ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

How do people manage to carry on coherent conversations, even though the 'rules' aren't specified ahead of time? How do we manage to understand what someone means even when it is not explicitly said? How do people create their social identities in interaction? How do everyday ways of talking help to reinforce and create power imbalances between people, and among groups of people in society? How do conversational narratives help create social identities and power relations? These are the main questions we will consider in this course. Students will acquire the tools for doing discourse analysis, and then use those tools to understand how people use language in interactions to create identities. Along the way, we will also consider how interactions in other modes such as writing and electronic media are different and similar to spoken interaction.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

LING 1773 - MORPHOLOGY

Minimum Credits: 3

Maximum Credits: 3

Morphology, the study of words, is interrelated with the syntax, the phonology, the lexicon, and semantics. The purpose of this course is to develop operational competence, through problem solving and discussion, in the major aspects of morphological theory. Theoretical issues to be addressed will include lexical phonology, prosodic morphology, morphology and logical form, morphology and valence alternations.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: LING 1000 or CSD 1020; MIN GRAD 'C'

Course Attributes: Global Studies, Latin American Studies

LING 1777 - SYNTACTIC THEORY

Minimum Credits: 3

Maximum Credits: 3

This course is an introduction, stressing understanding of theoretical concepts, to the transformational generative approach to English sentence structure. This approach uses formal rules to produce sentences, and to explain how they are composed of phrases. The first part of the course concentrates on mechanical manipulation of systems of rules, aiming to acquaint the student with how the rules work. The second part concentrates on how syntacticians use evidence about a language to support or disconfirm their theories.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: LING 1000 or CSD 1020; MIN GRAD 'C'

LING 1800 - SPECIAL TOPICS IN LINGUISTICS

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: LING 1000 or CSD 1020

LING 1810 - STATISTICS FOR RESEARCH IN LINGUISTICS

Minimum Credits: 3

Maximum Credits: 3

The first goal of this course is to familiarize students with the major statistical tests, analysis strategies, and plotting conventions that are currently considered best practices in linguistics. The course accomplishes these goals through a combination of reading (both of textbook chapters and empirical articles), in-class demos and hands-on practice, and homework exercises. The second goal is to make students comfortable using the R programming language for statistical computing. Assuming absolutely no prior background in statistics or programming, we will work from the ground up to turn you into a novice but proficient statistical programmer; by the end of this course, you will be able to read in your own data, perform basic data re-formatting and summary calculations, and conduct a wide variety of statistical analyses' all in R! The final goal is to get students thinking about how they can apply their new skills to their own research. In service of this goal, you will be required to write a short research paper that describes a data set you would like to work with, and that explains the statistical analyses you would perform in order to answer a small number of questions that are of interest to you.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: LING 1000 (MIN GRADE 'B'); PLAN: Linguistics

Course Attributes: DSAS Quant.-Formal Reason General Ed. Requirement

LING 1820 - LINGUISTICS IN THE LAB

Minimum Credits: 3

Maximum Credits: 3

This course is a bit different from other linguistics courses in that it is not focused on a particular subject area of linguistics, but rather an approach to doing linguistics: our goal is to learn how to think about, design, and implement a basic experiment. We will touch on a variety of topics that will be familiar from other courses: semantic representations, phonemic categories, sociolinguistic identity and stereotyping, and syntactic constituency. Satisfies the methods requirement for the major.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

LING 1844 - RESEARCH METHODS

Minimum Credits: 3

Maximum Credits: 3

Upon successful completion of this course, students will have a broad knowledge of the theoretical, philosophical, ethical, and practical issues of, and possibilities for, researching language in the field of linguistics. In addition to being able to evaluate the methods used in linguistics research, students will be able to choose the proper methods for their own studies and be able to articulate the reasons for choosing that methods or those methods. They will be able to design the broad outlines of the study and where and how to discover resources to fully develop those methods. They will also be able to coordinate the practical aspects of a study, such as participant recruitment, data management, and Institutional Review Board (IRB) approvals. The main goal for this course is that when students are given some linguistic question or problem, they have the experience and ability to think through appropriate research methods in order to answer such a question.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

LING 1860 - INTRO TO HISTORICAL LINGUISTICS

Minimum Credits: 3

Maximum Credits: 3

A survey of the principles and methods of historical linguistics; practice in the basic techniques of historical linguistic research. The major topics to be studied are the analysis of sound change, analogic change, contact-induced language change, the relationship between variation (regional and social) and language change, the comparative method, and internal reconstruction.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: LING 1578 and 1773

Course Attributes: Global Studies

LING 1873 - ACCELERATED MORPHOLOGY

Minimum Credits: 3

Maximum Credits: 3

Students in this course will: understand and define relevant concepts used to discuss morphology; explore the theoretical description of morphology; develop the ability to organize linguistic data as a first step in analysis / to apply key concepts to linguistic problems and original data; analyze complex words in languages other than English and determine the meanings of the parts; describe simply and appropriately how the derivational and/or inflectional morphemes behave in a particular language problem; compare competing analyses and provide justification for selecting one analysis over another; and, apply knowledge of morphology in reading empirical research with a critical eye, including articles that focus on a range of languages (i.e., Dutch, English, French, Frisian, German, Hungarian, Russian, Spanish, Swahili) and morphological phenomena (e.g., compounding, diminutivization, grammatical gender, number, mood, prefixation, etc.)

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: LING 1000 or CSD 1020 (MIN GRADE A-); CUM GPA \geq 3.25; PLAN: Linguistics

LING 1877 - ACCELERATED SYNTACTIC THEORY

Minimum Credits: 3

Maximum Credits: 3

This course will familiarize students with theoretical approaches in classic Principles and Parameters theory and the application of these approaches to some of the defining syntactic structures of English. Students will gain: knowledge of syntactic argumentation, how evidence from data is used incrementally to argue for and against theoretical proposals; the ability to apply syntactic theory to structures in languages other than English; and, insight into alternative approaches to syntactic theory.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: LING 1000 or CSD 1020 (MIN GRADE A-); CUM GPA: 3.25; PLAN: Linguistics (BA)

LING 1878 - ACCELERATED PHONETICS AND PHONEMICS

Minimum Credits: 3

Maximum Credits: 3

In this course, students will acquire the conceptual framework and the practical skills to do further work in phonetics and phonology. Students will learn about: what a sound system is; which questions drive research on speech sounds; acoustics, the acoustic signal, and how it can be represented visually and measured; the acoustics of speech production

and acoustics in relation to hearing and perception; and acoustic descriptions of sounds. At the end of the course, students will study articulatory phonetics.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: LING 1000 or CSD 1020 (MIN GRADE A-); CUM GPA \geq 3.25; PLAN: Linguistics

LING 1879 - ACCELERATED PHONOLOGY

Minimum Credits: 3

Maximum Credits: 3

Phonology is the study of how sounds pattern in the languages of the world. Using this definition, students will try to understand what exactly people are doing when they study phonology. The course will be divided up into two main sections: In the first section, students will learn about the main concepts and analysis techniques that have traditionally formed the backbone of phonology. The focus will be on how to perform a formal phonological analysis and make a phonological argument. In the second section of the course, the focus will shift toward understanding how and why the field of phonology has evolved over time, in terms of both its subject matter and its methods. Students will work through some of the seminal texts in phonological theory and try to understand what each theory does well versus poorly. This course will help students to become better, more critical thinkers and writers.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

LING 1900 - LINGUISTICS CONSULTING/INTERNSHIP: CONNECTING LINGUISTICS TO THE COMMUNITY AND INDUSTRY

Minimum Credits: 3

Maximum Credits: 3

A linguistics perspective is important for life and work, and to create a caring, empathetic, and just community. It improves our understanding of the world that we live in, increases our chances to solve problems, make new discoveries, and build trust with communities we serve. As such, linguistics has many practical applications outside of academia, and this course exists to assist with the transference of academic skills into employable strengths in today's STEM-saturated job market. Course emphases include facilitating networking and fostering cross-disciplinary collaborations world-wide, and preparing for challenging careers where linguistics is part of the solution.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

LING 1901 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 9

This course provides an opportunity for students to formally pursue work on an individual basis.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Satisfactory/No Credit

LING 1903 - DIRECTED RESEARCH

Minimum Credits: 1

Maximum Credits: 3

This course provides a hands-on opportunity for students to learn about linguistic research. By working with faculty and graduate students on approved projects, students can gain exposure to various aspects of research processes, such as data collection, data entry, linguistic analysis, and poster presentations. Students complete literature reviews, collect and/or analyze data, and write a research report.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Satisfactory/No Credit

Course Attributes: Capstone Course

LING 1930 - APPLICATIONS OF LINGUISTICS

Minimum Credits: 3

Maximum Credits: 3

This course is a capstone course for undergraduate majors in linguistics. It should therefore be taken after nearly all other major requirements have been fulfilled. The topics to be covered are the crucial role a knowledge of linguistics plays in language teaching, the law (both interpretation of documents, courtroom discourse, forensic linguistics, and interpreting), communication disorders, archaeology, computational linguistics, and anthropology. Students will develop a portfolio of short papers, some of which are based on their own field research.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: LING 1000 or CSD 1020; LVL: Junior or Senior; PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGCOMP 0213 or ENGCOMP 0214 or ENGFLM 0210 or FP (0003 or 0006)

Course Attributes: Capstone Course, DSAS Social Science General Ed. Requirement, Writing Intensive Course (WRIT)

LING 1951 - LANGUAGES OF THE WORLD

Minimum Credits: 3

Maximum Credits: 3

This course is a survey of language classification, language structures, and language contact. It concentrates on two main questions: first, how do languages resemble, and differ from, each other in sounds, forms, and syntax? And second, what are some linguistic and sociopolitical results of situations in which two or more languages come into contact? The context for these investigations will be a study of selected language families, both in class and in individual student projects (including some elicitation of data from native speakers of various languages).

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Cross-Cult. Awareness General Ed. Requirement, Global Studies, Russian & East European Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

LING 2330 - INTRODUCTION TO COMPUTATIONAL LINGUISTICS

Minimum Credits: 3

Maximum Credits: 3

This is a course designed to introduce students in linguistics to the foundations and real-world applications of computational linguistics. Students will learn how core aspects of human language-words, morphology, grammar, and meaning-are represented and processed computationally. They will also be introduced to the challenges of real-world language engineering problems and discover how the latest language technologies and artificial intelligence systems

seek to solve them. Many practical applications will be covered: search, document classification, spell checking, machine translation, corpus exploration, and more. Throughout the course, there will be a big emphasis on hands-on training; students will work extensively with popular natural language processing platforms. NOTE: The Python prerequisite (CS 8, 10-12) can be waived upon proof of Python knowledge. Please email the instructor.

Management Information Systems

BMIS 3027 - ECONOMICS MODELS OF ARTIFICIAL INTELLIGENCE

Minimum Credits: 3

Maximum Credits: 3

AI is one of the most significant technologies of our time. However, AI also faces several issues such as algorithmic bias, adoption incentives, algorithmic collusion, interpretability, etc. Most of these issues are not due to technological limitations, but due to the misaligned incentives of stakeholders in the ecosystem. In this course, we will discuss several seminal papers related to these issues and discuss economic models of AI used for addressing these issues. Using these papers, students will also be exposed to game-theoretic modeling techniques in research.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SU3 Basis

BMIS 3029 - SOCIAL MEDIA AND DIGITAL PLATFORMS

Minimum Credits: 3

Maximum Credits: 3

This doctoral seminar is designed to provide doctoral students an introduction to recent research issues and challenges in the contexts of social media and other digital platforms. In doing so, the students will gain exposure to how research problems are formulated and refined to a working definition, and how research is conducted and reported. The seminar will also discuss various research perspectives, examine various research methodologies, and explore research in information systems and related disciplines.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SU3 Basis

Marketing

BUSMKT 1040 - INTRODUCTION TO MARKETING

Minimum Credits: 3

Maximum Credits: 3

Provides an understanding of the roles of marketing in the economy and the firm, and develops a rationale for a marketing perspective as a guide to organizational and individual actions. Topics covered are the marketing environment, strategic planning, market segmentation, product development, pricing, distribution, promotion, consumer decision-making, control, and marketing management.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: College of Business Admin

BUSMKT 1041 - INTRODUCTION TO MARKETING HONORS + 1

Minimum Credits: 1

Maximum Credits: 1

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: Restricted to College of Business Admin Students Only.

BUSMKT 1411 - MARKETING RESEARCH

Minimum Credits: 3

Maximum Credits: 3

Emphasizes the development of methods of decision making for marketing management. Formal tools of decision making are stressed. The collection and analysis of marketing data is viewed in the context of a management information system. Provides a common analytical framework for later courses treating specialized aspects of marketing in depth.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: BUSMKT 1040 or BUSERV 1940 or MGMT 1819 or MRKT 0600 or MRKT 1301 (MIN GRADE 'C') and (STAT 1000 or 1040 or 1100 or 1131 or BUSQOM 0101 or MGMT 0024 or ECON 0204); PROG: UCBA; PLAN: NOT CASBUS-UNK or BUSNB-MN

BUSMKT 1422 - PRINCIPLES OF SELLING

Minimum Credits: 3

Maximum Credits: 3

Selling is universal. Everyone uses persuasive communication to "sell" products, services, ideas, opinions, or points of view. Examine and practice the techniques and use the tools examined to develop and/or improve your sales skills. Focused on business-to-business sales, the concepts will apply to negotiating mutually beneficial agreements. From customer identification thru gaining agreement and follow-up, learn to identify customer problems and develop solutions that appeal to customers and benefit your organization.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: BUSMKT 1040 or BUSERV 1940 or MGMT 1819 or MRKT 0600 or MRKT 1301 (MIN GRADE 'C'); PROG: UCBA; PLAN: NOT CASBUS-UNK or BUSNB-MN

BUSMKT 1425 - SALES LEADERSHIP AND MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

Responsible to implement the organization's strategic goals and create profit thru sales, the sales manager must plan, organize, implement, monitor and evaluate the sales function. The manager must assure alignment of goal, strategy, task, action and reward in the sales function to create "mutual benefit" with the customer. The manager's sales forecast drives the organization, while the sales tactics and strategies which the manager plans and oversees make those forecasts a reality. We will examine the sales management process and the evolving role of the manager.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: BUSMKT 1040 or BUSERV 1940 or MGMT 1819 or MRKT 0600 or MRKT 1301 (MIN GRADE 'C'); PROG: UCBA; PLAN: NOT CASBUS-UNK or BUSNB-MN

BUSMKT 1426 - ADVERTISING AND SALES PROMOTION

Minimum Credits: 3

Maximum Credits: 3

Provides students with an understanding of advertising and the marketing process within which effective advertising and sales promotions are rooted. It is further designed to teach students to develop effective advertising and promotion plans. Emphasis will be placed on both theoretical and conceptual foundations and their applications to the fields of advertising and sales promotions.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: BUSMKT 1040 or BUSERV 1940 or MGMT 1819 or MRKT 0600 or MRKT 1301 (MIN GRADE 'C'); PROG: UCBA; PLAN: NOT CASBUS-UNK or BUSNB-MN

BUSMKT 1427 - PUBLIC RELATIONS MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

This course will examine how public relations fits into the strategic management of organizations and how it impacts a firm's performance. Students will develop a competence in applying public relations principles to organizational opportunities and problems, with a focus on developing sound public relations writing skills.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: BUSMKT 1040 or BUSERV 1940 or MGMT 1819 or MRKT 0600 or MRKT 1301 (MIN GRADE 'C'); PROG: UCBA; PLAN: NOT CASBUS-UNK or BUSNB-MN

BUSMKT 1428 - DIGITAL AND SOCIAL MEDIA MARKETING

Minimum Credits: 3

Maximum Credits: 3

This course covers advertising, marketing, and communications strategies in the new media landscape where traditional and social media co-exist. The course will focus on 1) how social media strategies can be used effectively in marketing programs, 2) when they should/should not be used, 3) how to build them, and 4) how to measure, track, and evaluate their performance and effectiveness. This marketing strategy course will focus on analyzing, developing, implementing, and evaluating media strategies as an integral part of overall marketing strategy.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: BUSMKT 1040 or BUSERV 1940 or MGMT 1819 or MRKT 0600 or MRKT 1301 (MIN GRADE 'C'); PROG: UCBA; PLAN: NOT CASBUS-UNK or BUSNB-MN

BUSMKT 1429 - MARKETING COMMUNICATIONS IN AUSTRALIA

Minimum Credits: 3

Maximum Credits: 3

Marketing communications in Australia provides an understanding of the ways in which advertising is effectively planned to achieve the objectives set in the overall marketing plan. The concept of integrated marketing communication is introduced as an organizational tool and as a philosophy for campaign planning. Integrated marketing communication requires a total approach to planning advertising and promotions campaigns and coordinating communication strategies in support of overall brand and goods/services marketing objectives, and more broadly marketing strategy.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

BUSMKT 1430 - MARKETING COMMUNICATIONS IN BRITAIN

Minimum Credits: 3

Maximum Credits: 3

Marketing communications in Britain provides an understanding of the ways in which advertising is effectively planned to achieve the objectives set in the overall marketing plan. Home to the second largest global agency network, WPP - London (parent of major ad agencies Ogilvy & Mather, JWT, and Young & Rubicam, and universally recognized as the center for creative and production excellence), is an ideal place to learn about the industry that is "ad-land". Viewed from the us and elsewhere, a significant proportion of British advertising has a contempt for the hard sell, an antipathy to too much research, along with a penchant for irony and parody. This course is skewed to look at and assess the practice of advertising from this standpoint.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

BUSMKT 1431 - PRODUCT DEVELOPMENT AND MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

Addresses all stages of the product life cycle beginning with the various phases of new product development, including creativity and new product concept generation, concept testing and evaluation, pricing, demand forecasting and new product marketing strategies. Also deals with special challenges related to marketing mature products/services, improving marketing implementation effectiveness, and marketing the intangible features of products.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: BUSMKT 1040 or BUSERV 1940 or MGMT 1819 or MRKT 0600 or MRKT 1301 (MIN GRADE 'C'); PROG: UCBA; PLAN: NOT CASBUS-UNK or BUSNB-MN

BUSMKT 1435 - SERVICES MARKETING

Minimum Credits: 3

Maximum Credits: 3

The focus of this course is to develop the students' skills as marketers-broadening tools learned in the intro course to include development of strategies and programs for service firms. Course utilizes problem solving techniques through

presentation, discussion, and analysis of contemporary service marketing cases involving examples of consumer and business to business services in both large and small firms. The course is appropriate for 1) any student seeking a follow-up course to the basic marketing class; 2) students who plan marketing careers with service firms.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: BUSMKT 1040 or BUSERV 1940 or MGMT 1819 or MRKT 0600 or MRKT 1301 (MIN GRADE 'C'); PROG: UCBA; PLAN: NOT CASBUS-UNK or BUSNB-MN

BUSMKT 1441 - CONSUMER BEHAVIOR

Minimum Credits: 3

Maximum Credits: 3

Focuses on the study of individual consumers through the integration of a wide variety of social science concepts and gaining familiarity with some of the more common techniques of consumer research methodology.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: BUSMKT 1040 or BUSERV 1940 or MGMT 1819 or MRKT 0600 or MRKT 1301 (MIN GRADE 'C'); PROG: UCBA; PLAN: NOT CASBUS-UNK or BUSNB-MN

Course Attributes: Global Studies

BUSMKT 1447 - MARKETING ANALYTICS FOR CUSTOMER ENGAGEMENT

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to analytical rigor and data-centric techniques used to plan, execute, and measure a variety of marketing and paid media campaigns. It will give them hands-on experience in making quantitative decisions about the customers and prospects they target, the types of advertising and promotional programs they design, and how much they can afford to spend to achieve their financial objectives.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: BUSMKT 1040 or BUSERV 1940 or MGMT 1819 or MRKT 0600 or MRKT 1301 (MIN GRADE 'C') and (BUSQOM 0050 or MGMT 1818 or BUSMKT 1441); PROG: UCBA; PLAN: NOT CASBUS-UNK or BUSNB-MN

BUSMKT 1451 - RETAIL MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

Emphasizes the strategic decisions for developing an enduring store image, and the marketing policies to produce customer satisfaction through service quality. Topics covered include store location, layout and atmosphere, logistics and information systems, merchandising, vendor relations and customer services, as well as topics related to non-store retailing.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: BUSMKT 1040 or BUSERV 1940 or MGMT 1819 or MRKT 0600 or MRKT 1301 (MIN GRADE 'C'); PROG: UCBA; PLAN: NOT CASBUS-UNK or BUSNB-MN

BUSMKT 1461 - INTERNATIONAL MARKETING

Minimum Credits: 3

Maximum Credits: 3

Examines the unique characteristics of global marketing and the strategic marketing decisions for effective competition in the global environment in view of the rapid integration of the global economy.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: BUSMKT 1040 or BUSERV 1940 or MGMT 1819 or MRKT 0600 or MRKT 1301 (MIN GRADE 'C'); PROG: UCBA; PLAN: NOT CASBUS-UNK or BUSNB-MN

Course Attributes: Global Studies, West European Studies

BUSMKT 1470 - SPORTS MARKETING

Minimum Credits: 3

Maximum Credits: 3

This course will provide a framework for understanding how various marketing strategies are formulated, implemented, and evaluated in sports context. Sports have been one of the major economic activities of our modern society, and knowledge of the role marketing plays in its operation has emerged as a valuable asset to all the parties involved (e.g., firms, governments, consumers, and players). The course is organized into two themes; 1) sports as product and 2) sports as medium. The first theme focuses on the applications of marketing theories and principles to promote sports and sport related products. It puts the students in the shoes of a marketing manager of a sports related business. The second theme, on the other hand, considers sports as one of the vehicles to promote a product or service. It covers how non-sport related businesses can benefit from utilizing sports as a part of their marketing communication program. Another area that will be discussed throughout the course is the role of ethics in sports marketing. What we sell in both sports as product and sports as medium is the positive values that sports represent. Therefore, sports often serve as a platform to promote the core values of our society and introduce positive change. This unique nature of sports marketing provides us with an opportunity to integrate the business aspects of sports and ethical perspectives in its marketing. Issues such as gambling, Title IX, performance enhancing drugs, and social responsibilities of sports organizations will be discussed in length whenever it is relevant to the course material.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: BUSMKT 1040 or BUSERV 1940 or MGMT 1819 or MRKT 0600 or MRKT 1301 (MIN GRADE 'C'); PROG: UCBA; PLAN: NOT CASBUS-UNK or BUSNB-MN

BUSMKT 1481 - BRAND MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

Exposes students to a wide range of marketing problems and provides them with the analytic perspectives and strategic marketing decision tools for analyzing and solving those problems.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: BUSMKT 1040 or BUSERV 1940 or MGMT 1819 or MRKT 0600 or MRKT 1301 (MIN GRADE 'C'); PROG: UCBA; PLAN: NOT CASBUS-UNK or BUSNB-MN

BUSMKT 1485 - PROJECTS IN MARKETING

Minimum Credits: 3

Maximum Credits: 3

BUSMKT 1485 connects undergraduate marketing students with prominent commercial/government clients to

develop/implement specific marketing strategies. Students receive hands-on exposure to planning, strategy, research, advertising, public relations, event planning, and budgeting. Students demonstrate oral/written presentation skills via formal presentations to representatives from the client organizations.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Letter Grade

Course Requirements: PREQ: BUSMKT 1040 (MIN GRAD 'C'); PLAN: Accounting, Finance, General Management, Global Management, Marketing, Business Information Systems, Human Resources Management, Supply Chain Management, Undeclared CBA majors

BUSMKT 1490 - MARKETING INTERNSHIP

Minimum Credits: 3

Maximum Credits: 3

The marketing internship provides business credits for project assignments that augment a professional marketing work experience.

Academic Career: Undergraduate

Course Component: Internship

Grade Component: Satisfactory/No Credit

BUSMKT 1495 - MARKETING INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 3

An independent study course for students desiring to pursue in greater depth a specific set of marketing issues or problems to which they have been introduced in other marketing courses. The course involves directed reading and research under the guidance of a full-time faculty member.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Letter Grade

BUSMKT 1511 - MARKETING "MADE IN ECUADOR" TO THE WORLD

Minimum Credits: 1

Maximum Credits: 1

Historically, Ecuador sits at the contact zone of the Incan and Caari culture where trade through the spine of the Andes has been active for centuries. Currently, Ecuador is in the midst of building its brand to the world and is seen as the crucible of the chocolate industry. Promotion of the Galapagos, Yasuni Park and adventure travel on wild rivers has been part of the effort to showcase the best of the country to foreign markets. Ecuador's stunning volcanic peaks and rich tropical rainforest offer some of the greatest destinations on the planet along with unique and marketable resources of foods and culture. This course is designed to give you an understanding of Ecuador's natural and cultural assets including art, chocolate, ancient cities and adventure destinations and how to best market them to the world. This will be a hands-on experience where you will make your own chocolate, pottery and help locals prepare native crops as well as design promotions and refine and position their natural and cultural offerings for the global market. This is a real world experience that will be invaluable in your career as a marketer or employee in global enterprise.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Materials Science and Engr

MSE 2052 - INTRODUCTION TO TECHNICAL COMMUNICATION

Minimum Credits: 3

Maximum Credits: 3

An introduction to technical writing and oral presentation skills using Word, Powerpoint, Mendeley, InkScape and LaTeX.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Mathematics

MATH 0010 - COLLEGE ALGEBRA PART 1

Minimum Credits: 1.5

Maximum Credits: 1.5

First of a two course sequence which covers the topics of linear equations and inequalities and their graphs, quadratic equations and their graphs, and systems of equations and their graphs. This course is intended for students who need to learn elementary algebra over an extended period of time.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

MATH 0020 - COLLEGE ALGEBRA PART 2

Minimum Credits: 1.5

Maximum Credits: 1.5

Second of two courses (0010-0020) which covers polynomials, rational functions and exponential and logarithmic growth. This course is intended for students who need to learn algebra over an extended period of time.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: MATH 0010

Course Attributes: DSAS Algebra General Ed. Requirement

MATH 0025 - APPLIED COLLEGE ALGEBRA

Minimum Credits: 3

Maximum Credits: 3

This course is designed for non-math majors or non-science majors. This course will parallel the topics in MATH 0031, but will stress real life data, problem solving and the use of technology to aid in mathematical understanding.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Algebra General Ed. Requirement

MATH 0031 - ALGEBRA

Minimum Credits: 3

Maximum Credits: 3

The course covers basic algebra skills. Linear, polynomial, rational, exponential, and logarithmic functions are

included. Systems of linear equations are also covered.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Algebra General Ed. Requirement

MATH 0120 - BUSINESS CALCULUS

Minimum Credits: 4

Maximum Credits: 4

This course introduces the basic concepts of limits, continuity, differentiation, integration, maximization and minimization. Applications to the social sciences, especially business and economics, are stressed.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: MATH 0020 or 0031 or 0110 or 0002 (MIN GRADE 'C') or MATH PLACEMENT SCORE (61 or GREATER)

Course Attributes: DSAS Algebra General Ed. Requirement, DSAS Quant.-Formal Reason General Ed. Requirement, SCI Quantitative: Mathematics GE. Req.

MATH 0125 - CALCULUS FOR BUSINESS 1

Minimum Credits: 2

Maximum Credits: 2

This is the first half of a two course sequence (0125-0126). It will cover concepts such as limits, continuity, differentiation and integration. Maximization and minimization of functions will also be covered, with emphasis placed on applications in the social sciences, especially business and economics.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: MATH 0020 or 0031 or 0110 or 0002 (MIN GRADE 'C') or MATH PLACEMENT SCORE (61 or GREATER)

Course Attributes: SCI Quantitative: Mathematics GE. Req.

MATH 0126 - CALCULUS FOR BUSINESS 2

Minimum Credits: 2

Maximum Credits: 2

This is the second half of the two sequence course (0125 0126). It provides an introduction to calculus for students in business, economics and other social sciences.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: MATH 0125

Course Attributes: DSAS Algebra General Ed. Requirement, DSAS Quant.-Formal Reason General Ed. Requirement, SCI Quantitative: Mathematics GE. Req.

MATH 0200 - PREP FOR SCIENTIFIC CALCULUS

Minimum Credits: 3

Maximum Credits: 3

A variety of topics are studied: functions, rational functions, logarithmic and exponential functions, graphs, asymptotes,

inverse, conic sections, translation and rotation of axes, trigonometric identities and equations, and possibly vectors.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: MATH 0020 or 0031 or 0110 or 0002 (MIN GRADE 'C') or MATH PLACEMENT SCORE (61 or GREATER)

Course Attributes: DSAS Algebra General Ed. Requirement

MATH 0205 - BRIDGE TO CALCULUS

Minimum Credits: 1

Maximum Credits: 1

The goal of the course is to fill the gap between Math 0120 Business Calculus and Math 0220 Calculus 1 in order for a student to fulfill Calculus requirement and/or meet a prerequisite for Math 0230 Calculus 2. The following topics are not covered in Math 0120 Business Calculus comparing to Math 0220 Calculus 1 and therefore will be covered by this course: -Trigonometric functions and their properties -Limits, derivatives, and integrals of functions that involve trigonometric functions -Linear Approximation -Indeterminate Forms and L'Hospital's Rule -Related Rates that involve trigonometric functions

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: MATH 0120 (MIN GRADE 'C' or higher)

MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1

Minimum Credits: 4

Maximum Credits: 4

This is the first of a sequence of three basic calculus courses. It covers the derivative and integral of functions of one variable and their applications.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: MATH 0032 (MIN GRADE 'C') or MATH 0200 or 0132 or 0004 (MIN GRADE 'C') or MATH PLACEMENT SCORE (76 or GREATER) or MATH 0220 (No MIN GRADE) or MATH 0220 AP Credit

Course Attributes: Architectural Studies, DSAS Algebra General Ed. Requirement, DSAS Quant.-Formal Reason General Ed. Requirement, SCI Quantitative: Mathematics GE. Req.

MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2

Minimum Credits: 4

Maximum Credits: 4

This is the second of a sequence of three basic calculus courses. It covers the calculus of transcendental functions, techniques of integration, series of numbers and functions, polar coordinates, and conic sections.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: MATH 0220 or 0140 or 0221 or (0120 and 0205); MIN GRADE: 'C'

Course Attributes: Architectural Studies, DSAS Algebra General Ed. Requirement, DSAS Quant.-Formal Reason General Ed. Requirement, SCI Quantitative: Mathematics GE. Req.

MATH 0235 - HONORS 1 - VARIABLE CALCULUS

Minimum Credits: 4

Maximum Credits: 4

An enriched version of MATH 0220/0230. Course will cover same topics but in greater depth and with more challenging problems, computer experimentation and applications using maple. This course is intended for honors students.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Algebra General Ed. Requirement, DSAS Quant.-Formal Reason General Ed. Requirement, David C. Frederick Honors College Course, SCI Quantitative: Mathematics GE. Req.

MATH 0240 - ANALYTIC GEOMETRY AND CALCULUS 3

Minimum Credits: 4

Maximum Credits: 4

This is the third of a sequence of three basic calculus courses. It covers vectors and surfaces in space and the calculus of functions of several variables including partial derivatives and multiple integrals, stokes theorem, and first order differential equations.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: MATH 0230 or 0231 or 0150 or 0235; MIN GRADE: 'C'

Course Attributes: DSAS Algebra General Ed. Requirement, DSAS Quant.-Formal Reason General Ed. Requirement, SCI Quantitative: Mathematics GE. Req.

MATH 0280 - INTRO TO MATRICES & LINEAR ALG

Minimum Credits: 3

Maximum Credits: 3

The principal topics which this course will cover include vectors, matrices, determinants, linear transformations, eigenvalues and eigenvectors, and selected applications.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: MATH 0220 or 0140 or 0221 or 0235 or (0120 and 0205) (Min Grade 'C')

Course Attributes: SCI Quantitative: Mathematics GE. Req.

MATH 0290 - DIFFERENTIAL EQUATIONS

Minimum Credits: 3

Maximum Credits: 3

This course presents an introduction to the theory of differential equations from an applied perspective. Topics include linear and nonlinear ordinary differential equations, Laplace transform, and introduction to partial differential equations.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: MATH 0230 or 0231 or 0150 or 0235; MIN GRADE: 'C'

Course Attributes: SCI Quantitative: Mathematics GE. Req.

MATH 0400 - FINITE MATHEMATICS

Minimum Credits: 3

Maximum Credits: 3

The course covers the basic concepts of set theory, logic, combinatorics, Boolean algebra, and graph theory with an orientation towards applications.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: MATH 0020 or 0031 or 0110 or 0002 (MIN GRADE 'C') or MATH PLACEMENT SCORE (61 or GREATER)

Course Attributes: DSAS Quant.-Formal Reason General Ed. Requirement, SCI Quantitative: Mathematics GE. Req.

MATH 0413 - INTRO THEORETICAL MATHEMATICS

Minimum Credits: 4

Maximum Credits: 4

This course is an introduction to the theoretical treatment of sets, functions, relations, numbers, sequences, and limits. Classwork and homework concentrate reading and writing of proofs of theorems centered on these topics.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: MATH 0230 or 0235 or 0231 or 0150; and ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006)

Course Attributes: SCI Quantitative: Mathematics GE. Req., Writing Intensive Course (WRIT)

MATH 0420 - INTRO THEORY 1-VARIABLE CALCULUS

Minimum Credits: 3

Maximum Credits: 3

The course provides a careful treatment of the theoretical concepts of limit, continuity, derivative and integral, including the fundamental theorem of calculus.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: MATH 0413 or MATH 0450

Course Attributes: SCI Quantitative: Mathematics GE. Req.

MATH 0430 - INTRO ABSTRACT ALGEBRAIC SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

This course introduces the student to abstract algebraic concepts, rings, integral domains, fields, integers, rational, real and complex numbers, and polynomials. Many examples will be presented during class and in the homework. The students are expected to enhance their proof writing techniques.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: MATH 0413 or 0450 or 1185

Course Attributes: SCI Quantitative: Mathematics GE. Req.

MATH 0450 - INTRODUCTION TO ANALYSIS

Minimum Credits: 4

Maximum Credits: 4

This course is intended as a first course in mathematical analysis for highly motivated students. Topics will include sets and functions, number systems, topology of Euclidean spaces, limits, continuity, and the main theorems of elementary calculus.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: SCI Quantitative: Mathematics GE. Req., Writing Intensive Course (WRIT)

MATH 0470 - ACTUARIAL MATHEMATICS 1

Minimum Credits: 3

Maximum Credits: 3

This course will cover the material listed in the syllabus for mathematics of finance of the society of actuaries. Specifically it will present the relevant topics in the theory of interest (interest and discount rates, cash flows, annuities, amortization and sinking funds, bonds) and investment (stocks, capital asset pricing model, arbitrage pricing theory, portfolios, options). The material will be presented in the traditional academic format of lectures and help sessions along with optional sessions directed specifically at preparing students for the SOA exam.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: CREQ: MATH 0230 or 0231 or 0150 or 0235

Course Attributes: SCI Quantitative: Mathematics GE. Req.

MATH 0480 - APPLIED DISCRETE MATHEMATICS

Minimum Credits: 3

Maximum Credits: 3

The purpose of this course is to introduce first or second year students to important discrete structures that appear in both pure and applied math as well as computer science, computer engineering, computer security and information systems. Math 0480 will be an excellent preparation for classes in Combinatorics, Graph Theory, Algebra and Number Theory. Topics include sets, functions, sequences, algorithms, growth of functions, complexity of algorithms, induction, counting, discrete probability, graphs and trees, discrete geometry, network flows, the Traveling Salesperson Problem and discrete optimization.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: MATH 0220

MATH 0500 - PROFESSIONAL DEVELOPMENT

Minimum Credits: 1

Maximum Credits: 1

The Professional Development course is a 1-credit course required of all Mathematics majors. It will assist students to progress through the major and toward their career goals, and to attain skills in technical writing and programming.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Satisfactory/No Credit

Course Requirements: PREQ: MATH 0413 or MATH 0450

MATH 1010 - PUTNAM SEMINAR

Minimum Credits: 2

Maximum Credits: 2

The aim of this course is to develop the capacity to solve mathematical problems involving a substantial element of ingenuity and perseverance. Training will involve the study of problems from previous Putnam competitions, for which this course can be regarded as a useful preparation. An attempt will be made to look for unifying mathematical ideas. General strategies for solving problems will also be discussed.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Attributes: University Honors Course

MATH 1020 - APPLIED ELEMENTARY NUMBER THEORY

Minimum Credits: 3

Maximum Credits: 3

This course will reveal the key role played by number theory in the development of mathematics. Some applications of number theory will be covered in the course.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: MATH 0430

MATH 1025 - INTRODUCTION TO MATHEMATICAL CRYPTOGRAPHY

Minimum Credits: 3

Maximum Credits: 3

The course covers the theoretical underpinnings of cryptosystems and the analysis of their limitations and vulnerabilities. Special emphasis will be placed on public key cryptosystems, including elliptic curve based systems. Real world applications such as browser security and bitcoin will be discussed.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: MATH 0430

MATH 1050 - COMBINATORIAL MATHEMATICS

Minimum Credits: 3

Maximum Credits: 3

Topics covered include the binomial theorem, inclusion exclusion principle, recurrence relations, generating functions, and coloring problems.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (MATH 0413 or 0450) and (MATH 0280 or 1180 or 1185)

MATH 1070 - NUMERICAL MATHEMATICAL ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

This course, with MATH 1080 forms a two term introduction to numerical analysis at the advanced undergraduate level and includes interpolation, numerical differentiation and integration, solution of non-linear equations, numerical solution of systems or ordinary differential equations, and additional topics as time permits. Emphasis is on understanding the algorithms rather than on detailed coding, although some programming will be required.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: MATH 0240 or 0241 or 0201 or 0245

MATH 1080 - NUMERICAL MATH: LINEAR ALGEBRA

Minimum Credits: 3

Maximum Credits: 3

This course is an introduction to numerical linear algebra which addresses numerical methods for solving linear algebraic systems and matrix Eigen problems and applications to partial differential equations. Although the course will stress a computational viewpoint, analysis of the convergences and stability of the algorithms will be investigated.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (MATH 0240 or 0245 or 0241 or 0201) and (MATH 0250 or 0280 or 1180 or 1185)

MATH 1101 - AN INTRODUCTION TO OPTIMIZATION

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to the techniques of optimization. Applications will be emphasized, but some theory will be addressed and proofs will be discussed. As well, students will be taught how to use available software to answer questions. Course topics will include linear programming, integer programming, nonlinear programming, convex and affine sets, convex and concave functions, unconstrained optimization, and combinatorial optimization (i.e. Network flow problems).

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: MATH 0230 and (MATH 0280 or 1180 or 1185)

MATH 1103 - MATHEMATICAL PROBLEMS IN BUSINESS, INDUSTRY, AND GOVERNMENT

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

MATH 1119 - APPLIED PROBABILITY FOR ACTUARIAL MATHEMATICS

Minimum Credits: 3

Maximum Credits: 3

This course covers standard topics in probability and their applications to actuarial risk management. It prepares students for the probability exam offered by the Society of Actuaries.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: MATH 0230 or 0231 or 0150

MATH 1121 - ACTUARIAL MATHEMATICS 2

Minimum Credits: 3

Maximum Credits: 3

This course will cover the material listed in the syllabus for exam m (3) (mathematics of life contingencies and financial economics) of the society of actuaries. Specifically it will present the relevant topics in life insurance and life annuities, including multiple decrement models as well as the Black and Scholes pricing of derivative securities and risk analysis. The material will be presented in the traditional academic format of lectures and help sessions along with optional sessions directed specifically at preparing students for the SOA exam.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: MATH 0470 or 1120

Course Attributes: Capstone Course

MATH 1122 - ACTUARIAL MATHEMATICS 3

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (MATH 0470 or 1120) and (MATH 1119 or STAT 1151)

MATH 1123 - ACTUARIAL MATHEMATICS 4

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

MATH 1124 - ACTUARIAL MATHEMATICS 5

Minimum Credits: 3

Maximum Credits: 3

This 3-credit course will cover the topics in "Short-Term Actuarial Mathematics 1" that provides the basis for a subsequent course in "Short-Term Actuarial Mathematics 2" as well as prepare students for the SOA STAM Exam. Students will be introduced to a variety of frequency, severity, and aggregate models that are useful for short-term actuarial applications. Students will learn the steps involved in the modeling process and how to apply these steps. At the end of the course, students will be able to: 1) analyze data from an application in a business context; 2) determine a suitable model including parameter values; 3) provide measures of confidence for decisions based upon the model. Students will be introduced to a variety of tools for the calibration and evaluation of the models.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

MATH 1126 - PREDICTIVE ANALYTICS 1

Minimum Credits: 3

Maximum Credits: 3

This is an introductory topics course in modern Data Science, including Statistical Learning and Time Series. The topics that will be covered are: Linear Regression (Validation, Resampling Methods, Model Selection and Regularization, Shrinkage, Dimension Reduction, Principal Components), Generalized Linear Models (Logistic and Probit Regression Models, Categorical and Count Response, Measures of Fit), Unsupervised Learning (Decision Trees and Random Forests, Bootstrap, Bagging, Principal Components, Cluster Analysis), Time Series (Random Walk Models, Autoregressive Models, ARCH/GARCH Models, Box-Jenkins Modeling and Forecasting).

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: MATH 0230 and MATH 1119

MATH 1127 - PREDICTIVE ANALYTICS 2

Minimum Credits: 3

Maximum Credits: 3

This 3-credit course is a continuation of Math 1126, "Predictive Analytics 1". It will cover the fundamental knowledge about data science with applications to insurance and business. Students will be introduced to Basic R, data acquisition, data cleanup, data exploration and visualization, predictive modeling, and professional reporting. It also prepares students for the SOA Exam PA. Upon completion of this course, students will have developed skills in predictive analytics that allow them to: (1) articulate the types of problems that can be addressed by predictive modeling, identify the business problem and how the available data relates to possible analyses, use the information to propose models such as Generalized Linear Model (GLM), Decision Trees, Cluster and Principal Components Analysis; (2) develop expertise in the use of R for predictive analytics and be able to create effective graphs in RStudio, work with various data types, understand principles of data design, and construct a variety of common visualizations for exploring data; (3) evaluate data quality, resolve data issues, and identify regulatory and ethical issues; (4) effectively communicate the results of applying predictive analytics to solve a business problem.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: MATH 1126 or STAT 1152

MATH 1128 - ACTUARIAL MATHEMATICS 5

Minimum Credits: 3

Maximum Credits: 3

This 3-credit course will cover the topics in "Short-Term Actuarial Mathematics 1" that provides the basis for a subsequent course in "Short-Term Actuarial Mathematics 2" as well as prepare students for the SOA STAM Exam. Students will be introduced to a variety of frequency, severity, and aggregate models that are useful for short-term actuarial applications. Students will learn the steps involved in the modeling process and how to apply these steps. At the end of the course, students will be able to: 1) analyze data from an application in a business context; 2) determine a suitable model including parameter values; 3) provide measures of confidence for decisions based upon the model. Students will be introduced to a variety of tools for the calibration and evaluation of the models.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: MATH 1119 and STAT 1152

MATH 1129 - ACTUARIAL MATHEMATICS 6

Minimum Credits: 3

Maximum Credits: 3

This 3-credit course will cover the topics in "Short-Term Actuarial Mathematics 2" (STAM 2) which builds on topics in STAM 1 as well as prepare students for the SOA STAM Exam. Students will be introduced to credibility theory: prior distribution, posterior distribution, predictive distribution, Bayesian premium, Buhlmann model, Buhlmann-Straub models, credibility premium, credibility factor and empirical Bayes methods. At the end of the course, students will be able to: 1) understand and estimate losses using credibility procedures; 2) understand the fundamental principles of pricing and reserving of some of the more common short-term insurance and reinsurance coverages: auto, homeowners, liability, health, disability, and dental. Students will be introduced to some of the methods and the underlying statistical models used for estimating losses incurred from short-term insurance and reinsurance coverages.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: MATH 1128

MATH 1180 - LINEAR ALGEBRA 1

Minimum Credits: 3

Maximum Credits: 3

This course stresses the theoretical and rigorous development of linear algebra. Major topics include the theory of vector spaces, linear transformations, matrices, characteristic polynomials, bases and canonical forms. Other topics may be covered as time permits.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: CREQ: MATH 0413 or MATH 0450

MATH 1185 - HONORS LINEAR ALGEBRA

Minimum Credits: 3

Maximum Credits: 3

An introduction to computational and theoretical aspects of linear algebra. Syllabus includes Gaussian elimination, matrix algebra, triangular factorization, vector spaces, linear independence, basis, dimension, orthogonality, inner product, gram-Schmidt, singular value decomposition, determinants, eigenvalues, matrix exponentials, unitary matrices, similarity, positive definiteness, minimum principles, finite elements, norm and condition number, computation of Eigen values, iterative solutions of linear systems, linear inequalities, simplex method.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: University Honors Course

MATH 1230 - THE BIG IDEAS OF MATHEMATICS

Minimum Credits: 3

Maximum Credits: 3

The "big ideas" course is intended to provide a capstone type experience for math majors. It will integrate the student's current math knowledge into a coherent whole via the adoption of a historical perspective. It is particularly aimed at math majors with an interest in math education or the history, philosophy and psychology of mathematics. Students opting for the optional internship, MATH 1231, will explore how the historical development of math relates to the math in the secondary school. The capstone experience will culminate with a research project and presentation.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: MATH 0430, and ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006)

Course Attributes: Capstone Course, Writing Intensive Course (WRIT)

MATH 1231 - MATH EDUCATION INTERNSHIP 1

Minimum Credits: 1

Maximum Credits: 1

This internship has two components 1) a classroom experience mentoring a high school student who is developing a research project and 2) a seminar discussing the "big ideas" of mathematics in MATH 1230 and how math is developed in the elementary and secondary school curriculum. Interns will spend one hour every two weeks mentoring a high school student at an area high school.

Academic Career: Undergraduate

Course Component: Internship

Grade Component: LG/SNC Elective Basis

Course Requirements: CREQ: MATH 1230

Course Attributes: Undergraduate Internship

MATH 1250 - ABSTRACT ALGEBRA

Minimum Credits: 3

Maximum Credits: 3

In this course the basic algebraic systems, groups and rings are studied in some detail. Topics include: subgroups, permutation groups, homomorphism's, subrings, ideals and quotient rings. The emphasis is on theory with examples.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: MATH 0430

MATH 1270 - ORDINARY DIFFERENTIAL EQUATIONS 1

Minimum Credits: 3

Maximum Credits: 3

This course covers methods of solving ordinary differential equations which are frequently encountered in applications. General methods will be taught for single n-th order equations, and systems of first order nonlinear equations. This will include phase plane methods and stability analysis. Computer experimentation will be used to illustrate the behavior of solutions of various equations.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: MATH 0280 or 1180 or 1185

MATH 1275 - HONORS ORDINARY DIFFERENTIAL EQUATIONS 1

Minimum Credits: 3

Maximum Credits: 3

This course provides a more thorough mathematical treatment of the theory than is possible in the non-honors course (MATH 1270), and also covers some more recent applications. In addition to basic material on exact solutions, mathematical proofs will be given of the existence and uniqueness theorems, leading to a better understanding of such important topics as phase plane behavior and stability theory. In addition, more topics will be covered, including a more extensive discussion of series solutions and special functions than is possible in MATH 1270. Finally, a course

project, usually done in pairs, on a topic to be chosen by the students with guidance and approval from the instructor, will be a key feature.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (MATH 0230 or 0231 or 0150 or 0235) and (MATH 1180 or 1185); CREQ: MATH (0413 or 0450)

Course Attributes: University Honors Course

MATH 1280 - ORDINARY DIFFERENTIAL EQUATIONS 2

Minimum Credits: 3

Maximum Credits: 3

This is a course in stability and qualitative methods for analyzing ordinary differential equations which arise in realistic models. Phase plane techniques, perturbation methods, and bifurcation theory are studied.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (MATH 0240 and 1270) OR MATH 1275

MATH 1290 - TOPICS IN GEOMETRY

Minimum Credits: 3

Maximum Credits: 3

A course intended to give a "modern" view of geometry. Possible approaches include (1) the connection of geometries to abstract algebraic systems and (2) the deductive, synthetic development of Euclidean and non-Euclidean geometry.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: MATH 0240 or 0241 or 0201 and (MATH 0413 or MATH 0450)

MATH 1310 - GRAPH THEORY

Minimum Credits: 3

Maximum Credits: 3

The concept of a graph and the study of its theoretical properties and applications form the core of this course. Topics include paths, circuits, trees, planar graphs, coloring problems, digraphs, matching theory, and network flows.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (MATH 0413 or 0450) and (MATH 0280 or 1180 or 1185)

MATH 1350 - INTRODUCTION TO DIFFERENTIAL GEOMETRY

Minimum Credits: 3

Maximum Credits: 3

Possible topics are the basic ideas of topology, description of curves in space, definition and local study of smooth surfaces in Euclidean space (fundamental forms, geodesics, and curvature), global properties of surfaces, gauss-bonnet formula and applications.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: MATH 0240 or 0241 or 0201 and (MATH 1180 or 1185)

MATH 1360 - MODELING IN APPLIED MATH 1

Minimum Credits: 3

Maximum Credits: 3

This course introduces some of the fundamental approaches of applied mathematics. The emphasis is on the model-building process and on developing an understanding of some of the unifying themes of applied mathematics such as equilibria, stability, conservation laws, etc. The material is presented in the form of case studies.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: MATH 0290 or 1270 or 1275

MATH 1370 - INTRODUCTION TO COMPUTATIONAL NEUROSCIENCE

Minimum Credits: 3

Maximum Credits: 3

This course presents contemporary mathematical theories of neuroscience, including single neurons and neuronal networks. Attention will be given to the dynamics and the function of neural activity.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: MATH 0230 or 0235 (Min Grade 'C')

MATH 1380 - MATH BIOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course will provide a broad introduction to mathematical methods typically applied to problems in biology. Models using calculus, ordinary differential equations, partial differential equations, discrete dynamical systems, stochastic dynamics, or a cellular automata framework will be presented and principal methods for their analysis will be described. Computational methods will also be covered, including computing platforms such as XPPAUT. Throughout the course, students will have extensive opportunities to practice the development and analysis of mathematical biology models.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (MATH 0240 or 1180 or 1185) and (MATH 0290 or 1270 or 1275)

MATH 1410 - INTRODUCTION FOUNDATIONS OF MATHEMATICS

Minimum Credits: 3

Maximum Credits: 3

This course introduces the logical foundations of mathematics; it covers the propositional and predicate calculi, formal number theory, and Gödel's first Incompleteness Theorem. As time permits, we will also cover beginning set theory, and beginning model theory.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: MATH 0413 or MATH 0450

MATH 1470 - PARTIAL DIFFERENTIAL EQUATIONS 1

Minimum Credits: 3

Maximum Credits: 3

This is the first term of a two-term sequence in elementary PDE's. The objectives of the course are to provide students with the techniques necessary for the formulation and solution of problems involving PDE's and to prepare for further study in PDE's. The three main types of second order linear PDE's - parabolic, elliptic, and hyperbolic are studied. In addition the tools necessary for the solution of PDE's such as Fourier series and Laplace transforms are introduced.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: MATH 0240 or 0201 and {(MATH 0280 or 1180 or 1185) and (0290 or 1270 or 1275)} or 0250}

MATH 1510 - MATHEMATICAL THEORY OF PROBABILITY

Minimum Credits: 3

Maximum Credits: 3

This course is an introduction to the mathematical theory of probability. Major topics include random variables, expectation, characteristic functions, conditional probability, and an introduction to Martingales and Markov chains.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (MATH 0420 or 0450) and (MATH 0280 or 1180 or 1185) or Permission From Instructor

MATH 1530 - ADVANCED CALCULUS 1

Minimum Credits: 3

Maximum Credits: 3

This course contains a rigorous development of the calculus of functions of a single variable, including compactness on the real line, continuity, differentiability, integration, and the uniform convergence of sequences and series of functions. Other topics may be included, such as the notion of limits and continuity in metric spaces.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: MATH 0420 or 0450

MATH 1540 - ADVANCED CALCULUS 2

Minimum Credits: 3

Maximum Credits: 3

This course, a continuation of MATH 1530, covers the theory of limits, differentiation, and integration of functions of several variables.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: MATH 1530

MATH 1550 - VECTOR ANALYSIS AND APPLICATIONS

Minimum Credits: 3

Maximum Credits: 3

Topics covered include: vector algebra, vector differentiation and integration, divergence, gradient, curl, the theorems of green, gauss and stokes, and curvilinear coordinate systems. There will be an emphasis upon problem solving and applications in electromagnetic theory and fluid flow.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: [MATH 0240 or 0241 or 0201 (MIN GRADE 'B-') for all] and (0250 or 0280 or 1180 or 1185)

MATH 1560 - COMPLEX VARIABLES & APPLICATIONS

Minimum Credits: 3

Maximum Credits: 3

This course covers the following topics: elementary operations with complex numbers, derivatives, integrals, Cauchy's theorem and consequences such as the integral formula, power series, residue theorem, applications to real integrals and series.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: [MATH 0240 or 0241 or 0201 or MATH 0245 (MIN GRADE 'B') for all] or MATH 1550

MATH 1570 - INTRODUCTION TO FOURIER ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

The course is a rigorous introduction to Fourier series and integrals with applications to heat flow, wave motion, physics, and number theory. It is intended for students with a basic knowledge of real analysis including uniform convergence of sequences and series of functions. No knowledge of the Lebasque integral is assumed.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (MATH 0420 or 0450) AND (MATH 0280 or 1180 or 1185)

MATH 1700 - INTRODUCTION TO TOPOLOGY

Minimum Credits: 3

Maximum Credits: 3

The topology of \mathbb{R}^1 , as well as that of general metric spaces, will be studied. Basic notions will be applied to obtain the fundamental existence theorem for first order ordinary differential equations. The course will be run on a theorem proving and problem solving basis.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: MATH 0420 or 0450

MATH 1800 - ADVANCED TOPICS IN MATHEMATICS

Minimum Credits: 3

Maximum Credits: 3

The course will cover the mathematics of machine learning from a modern perspective. It will introduce various learning tasks (supervised, semi-supervised, unsupervised, reinforcement, online/offline) and a sample of classical and modern solution methods. The course will explore core concepts of modern machine learning: empirical risk minimization, approximation, generalization, and optimization and the challenges of high-dimensional data. Specific machine learning models will be introduced and used, but the focus will be on key concepts and rigorous proofs. Homework may include mathematical analysis and programming assignments. In addition to the listed prerequisites, a foundation in probability at the level of MATH 1119 or 1510, or STAT 1151, and in analysis at the level of MATH 0420, is recommended.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: MATH 0240 and MATH 0413 and (MATH 0280 or 1180 or 1185)

Course Attributes: Undergraduate Research

MATH 1900 - INTERNSHIP

Minimum Credits: 1

Maximum Credits: 3

Under faculty supervision the student participates in a mathematics related experience, project, or job.

Academic Career: Undergraduate

Course Component: Internship

Grade Component: Satisfactory/No Credit

Course Attributes: Undergraduate Internship

MATH 1902 - DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 3

Under the direction of a faculty member, a student studies a mutually agreed upon topic in mathematics.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SNC Elective Basis

Mechanical Engineering

ME 2018 - INTRODUCTION TO COMPUTER-AIDED ENGINEERING ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

Introduction to computational fluid dynamics and finite element analysis using industry-grade simulation software. The class covers the fundamental concepts behind finite volume and finite element methods. The class emphasizes application and effective use of simulation software through laboratory exercises and simulation assignments. Topics covered include mesh generation, time-dependent flows, thermally driven flows, turbulence modeling, and linear stress analysis of mechanical parts.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ME 2043 - MACHINE LEARNING-BASED METHODS FOR DYNAMICS AND CONTROL

Minimum Credits: 3

Maximum Credits: 3

This course will discuss and study the utility of learning algorithms in dynamic systems and control applications. Approximately 1/6 of the course will study iterative learning control (useful in manufacturing, robotics, etc.), and the remainder split between shallow and deep neural networks for approximating and designing controllers and prediction algorithms (widely applicable in time series prediction), and a final portion spent on reinforcement learning and basic dynamic programming. It is meant to complement other data-driven courses in the department and add a dynamic systems and control flavor and perspective, and provide some survey of the state of the art via the projects. This course will mostly focus on linear and nonlinear ODE (difference, and differential equation) based systems as opposed to PDE-based ones.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ME 2046 - DIGITAL CONTROL SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

This course provides the student with the tools necessary to analyze and design discrete-time (digital computer) control systems for real-time control of dynamic systems. It builds upon the background of classical control topics including Nyquist, bode, and root locus, and transform ideas will be used extensively for design and analysis to give the student an understanding of how discrete-time and classical control systems are related. State-space representations will be used for MIMO systems, so a prior understanding of modern control ideas is important.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ME 2052 - INTRODUCTION TO TECHNICAL COMMUNICATION

Minimum Credits: 3

Maximum Credits: 3

An introduction to technical writing and oral presentation skills using Word, Powerpoint, Mendeley, InkScape and LaTeX.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

ME 2063 - DATA-DRIVEN MODELING FOR ENGINEERS

Minimum Credits: 3

Maximum Credits: 3

Introduction to data-driven modeling techniques: regression, Bayesian probabilities, parameter estimation, dimension reduction, neural networks.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ME 2812 - HACKING FOR ENERGY

Minimum Credits: 3

Maximum Credits: 3

This course will teach students how to build products and services using lean methods. This will be done by solving real-world energy industry problems. The course uses the lean launchpad platform for entrepreneurship. This is a highly customer-centered hypothesis-test approach to developing a mission modes, and is particularly well-suited for technology startups. It incorporates customer needs and user testing to build a minimum viable prototype. At the conclusion of the course, students will be able to understand the problems/needs of searching for product-market fit; understand all the stakeholders, deployment issues, costs, resources, and ultimate mission value; deliver minimum viable products that match customer needs in an extremely short time; produce a repeatable model that can be used to launch other potential technology solutions.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Mechanical Engr and Materials Science and Engr

MEMS 0023 - INTRODUCTION TO MATERIALS SCIENCE AND ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

This is an introductory class for students majoring in materials science and engineering. It begins by focusing on fundamentals of structure including bonding, crystal structures and defect in crystals and microstructure. It then addresses the relationship between structure and properties, including mechanical, thermal, electrical, magnetic, and optical properties. It concludes by introducing thermodynamic and kinetic principles of materials especially those pertinent to materials processing.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (MATH 0150 or 0230 or 0231 or 0235) and (PHYS 0150 or 0174 or 0201 or 0475);

PROG: School of Engineering

MEMS 0024 - INTRODUCTION TO MECHANICAL ENGINEERING DESIGN

Minimum Credits: 3

Maximum Credits: 3

Fundamentals of the design process, basic techniques of graphic communication, and an introduction to the most common mechanical components and manufacturing processes.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ENGR 0011 or 0015 or 0711 or ET 0011; PROG: School of Engineering

MEMS 0031 - ELECTRICAL CIRCUITS

Minimum Credits: 3

Maximum Credits: 3

Fundamental laws, principles, and analysis techniques for DC and AC linear circuits whose elements consist of passive and active components used in modern engineering practice, including the determination of steady-state and transient responses.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (PHYS 0175 or 0476 or 0152 or 0202); CREQ: (MATH 0290 or 1271 or 1035 or 0202); PROG: School of Engineering

MEMS 0040 - MATERIALS AND MANUFACTURING

Minimum Credits: 3

Maximum Credits: 3

Manufacturing and processing of ceramics, metals, polymers and composites covering refining and synthesis, shaping methods, control of properties and process selection.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ENGR 0022 or MEMS 0023 or MET 1162; PROG: School of Engineering

MEMS 0041 - MATERIALS PROCESSING

Minimum Credits: 3

Maximum Credits: 3

This class covers the following topics: Sustainable production and recycling of materials. Refining of metals, primarily for iron and aluminum. Fundamentals of solidification-based and deformation-based shaping processes. Powder processing of metals and ceramics. Property enhancing operations and material/process selection. Engineering and fabrication of composite materials.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: CREQ: MEMS 0023; PROG: School of Engineering

MEMS 0048 - THERMODYNAMICS OF MATERIALS

Minimum Credits: 3

Maximum Credits: 3

This course teaches the essentials of thermodynamics of materials, which concerns the basic concepts and principles of thermodynamics, and the application of thermodynamic principles to the analysis of multitude phenomena related to the behavior of materials. The course covers topics on the laws of thermodynamics, relation between work, heat and energy, entropy, free energy, phase equilibrium in one-component system, chemical reactions involving gases, and chemical reactions involving both solids and gases.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (PHYS 0150 or 0174 or 0201 or 0475) and (CHEM 0101 or 0110 or 0111 or 0410 or 0710 or 0760 or 0960); PROG: Swanson School of Engineering

MEMS 0051 - INTRODUCTION TO THERMODYNAMICS

Minimum Credits: 3

Maximum Credits: 3

Basic concepts and interlinking relationships of thermodynamics, fluid mechanics and heat transfer; fluid statics; system and control volumes; thermodynamic properties; work and heat; first law of thermodynamics for control mass and control volume; integral forms of conservation of mass and momentum.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (PHYS 0150 or 0174 or 0201 or 0475) and (CHEM 0101 or 0110 or 0111 or 0410 or 0710 or 0760 or 0960); PROG: School of Engineering

MEMS 0071 - INTRODUCTION TO FLUID MECHANICS

Minimum Credits: 3

Maximum Credits: 3

Fundamentals of fluid mechanics, with emphasis on inviscid and linearly viscous, incompressible fluids. Basic physical phenomena of fluid mechanics. Fluid kinematics. Governing equations (both integral and local forms). Exact solutions. Internal flows. Dimensional analysis and modeling.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (PHYS 0152 or 0174 or 0202 or 0476) and (CHEM 0101 or 0110 or 0111 or 0710 or 0770 or 0960); CREQ: MATH 0290; PLAN: Mechanical Engineering (BSE) PROG: Swanson School of Engineering

MEMS 0112 - NANOSCALE MODELING AND SIMULATION: MOLECULAR DYNAMICS

Minimum Credits: 3

Maximum Credits: 3

The course covers the essentials of molecular dynamics simulation by integrating theories from dynamics, statistical mechanics, thermodynamics, continuum mechanics, and quantum mechanics. Topics include heat bath methods, time integration methods accelerated methods, and different applications related to nanotechnology. Students gain hands-on experience using state-of-the-art simulation software. Minimum

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

MEMS 1010 - EXPERIMENTAL METHODS IN MATERIALS SCIENCE AND ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

Principles and techniques of optical metallography: imaging and quantitative analysis. Mechanical testing techniques, electron microscopy and chemical analysis.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ENGR 0022 or MEMS 0023 or MET 1162; PROG: School of Engineering

MEMS 1011 - STRUCTURE AND PROPERTIES LAB

Minimum Credits: 3

Maximum Credits: 3

Experimental demonstrations of important structure-property relationships for metals, ceramics and polymers.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: Letter Grade

Course Requirements: PREQ: MEMS 1010; PROG: School of Engineering

MEMS 1012 - COMPUTATIONAL MATERIALS SCIENCE

Minimum Credits: 3

Maximum Credits: 3

This course teaches the fundamentals and applications of computational materials science, which concerns the use of modern computational tools to the analysis of the properties and behavior of materials at various temporal and length scales. The current emphasis of this course is on integrated multiscale simulation method. The course covers topics on the first-principles density functional theory, molecular dynamics, Monte Carlo simulation, and phase-field method. Crystal structure, mechanical properties, structural defects, and electronic structures of materials as well as techniques for modeling them are also discussed. The course consists of a term project, in which students perform modeling and simulation of a material system of their choice and analyze simulation results by visualization and data mining methods using software provided.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

MEMS 1014 - DYNAMIC SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

Modeling and analysis of physical systems. Time- and frequency-domain analyses; transient and steady state system response to various excitations; transfer function and state space model representations; Laplace and Fourier transforms.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: [(ENGR 0012 or 0016) or (ET 0023 and 0030)] and (MEMS 0031 or ME 0031 or ECE 0031 or EET 0110) and (MATH 0280 or 0206 or 1180 or 1181 or 1035) and (MEMS 1015); PROG: School of Engineering

MEMS 1015 - RIGID-BODY DYNAMICS

Minimum Credits: 3

Maximum Credits: 3

Dynamics of particles, systems of particles, and rigid bodies including energy and momentum methods, problems of varying forces and constraints, and relationship of motion to different reference frames.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (MATH 0240 or 0241 or 0201) and (ENGR 0135 or 0131 or ET 0051); PROG: School of Engineering

MEMS 1016 - NONLINEAR DYNAMICAL SYSTEMS 1

Minimum Credits: 3

Maximum Credits: 3

Nonlinear systems are the rule, rather than the exception, in physics and engineering. This course serves as an introduction to their formal study and leverages both analysis and computation heavily to study analysis methods for nonlinear physical and engineering problems. The course introduces important topics such as bifurcations, limit cycles, Lyapunov functions and stability, and chaos.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: MEMS 1014; PROG: School of Engineering

MEMS 1020 - MECHANICAL VIBRATIONS

Minimum Credits: 3

Maximum Credits: 3

Review of free and forced vibrations of single-degree-of-freedom systems with and without damping, multi-degree of freedom systems, vibration isolation, nonlinear vibrations, LaGrange's equations, and vibration of continuous systems.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ME 1014 or MEMS 1014 or BIOENG 1255; PROG: School of Engineering

MEMS 1028 - MECHANICAL DESIGN I

Minimum Credits: 3

Maximum Credits: 3

Stress and deflection analysis; survey of mechanical design criteria; selection and applications of working stresses for ductile and brittle materials; static, fatigue, and impact loading and combination of stresses.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ENGR 0141 or 0145 or ET 0053 or BIOENG 1630; PROG: Undergraduate School of Engineering

MEMS 1029 - MECHANICAL DESIGN II

Minimum Credits: 3

Maximum Credits: 3

Analysis and design of machine elements, components, and mechanical systems. Machine elements include shafts, keys, bearings, gears, belts, chains, springs, screws, and motors.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (ME 0024 or MEMS 0024 or ET 0035) and (ME 1028 or MEMS 1028); PROG: School of Engineering

MEMS 1030 - MATERIAL SELECTION

Minimum Credits: 3

Maximum Credits: 3

Methodology for materials selection in mechanical design processes. Includes: (i) design process and consideration, (ii) criteria for materials and their shape selection, and (iii) design case study. Mechanical components have mass; they carry loads; they conduct heat and electricity; they are exposed to wear and to corrosive environments; they are made of one or more materials; they have shape; and they must be manufactured. This course provides knowledge on how these activities are related.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (ENGR 0022 or MEMS 0023 or MET 1162) and (ME 1028 or MEMS 1028); PROG: School of Engineering

MEMS 1032 - AUTOMOTIVE DESIGN AND FABRICATION

Minimum Credits: 3

Maximum Credits: 3

Covers the basics of automotive fabrication. Students working as one team have the opportunity to experience hands-on application of both classical and modern manufacturing techniques while adhering to a very strict externally imposed deadline. The team effort culminates in the production of a high-performance automobile.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: Swanson School of Engineering

MEMS 1033 - FRACTURE MECHANICS FOR PRODUCT DESIGN AND MANUFACTURING

Minimum Credits: 3

Maximum Credits: 3

An introduction to the principles of fracture mechanics; the essential concepts underlying appropriate materials selection including the effects of shape selection for maximum performance; and the strengths and weaknesses inherent in the choice of, say, metals versus ceramics versus polymers, etc.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (ENGR 0022 or MEMS 0023 or MET 1162) and (ME 1028 or MEMS 1028); PROG: School of Engineering

MEMS 1035 - COMPOSITE MATERIALS DESIGN AND APPLICATIONS

Minimum Credits: 3

Maximum Credits: 3

Extensive uses of composites can be seen in several aspects of engineering applications. Industrial sectors, such as in wind turbines, oil and natural gas exploration and production, natural gas and hydrogen vehicle storage tanks, high-speed and precision machinery, etc., are today the largest user of composites, surpassing aerospace industries. Other applications are in semiconductor manufacturing equipment; automobile engines, bodies, brakes and clutches; energy storage flywheels; gas turbine engines; process industries equipment; data storage equipment; medical diagnostic equipment; prosthetics and orthotics, etc. The advantages of composite materials stem from their outstanding strengths and stiffnesses, low densities, in addition to their unique and tailorable physical properties, including good thermal conductivities compared to copper and thermal expansions that can be varied from high to near zero. Composites, such as metallic, ceramic and carbon materials have both high-temperature and low-temperature capabilities, making them useful in high temperature regimes, e.g. in gas turbine engines, automobile and aircraft brakes. This course offers an in-depth presentation of design, analysis and manufacturing methods for composites, with particular reference to polymer matrix composites. For an efficient use of composites in lightweight structural design applications, this course offers the needed fundamental understanding of the structure, properties, and mechanics of composite materials. A typical mechanical analysis and design of composite structures, which are significantly more complex than those of their metallic equivalents due to the anisotropic nature of laminated composite materials, will be presented.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: MEMS 1028; LVL: Jr. OR Sr;; PLAN: Swanson School of Engineering

MEMS 1038 - FUNDAMENTALS OF ENGINEERING PROJECTS

Minimum Credits: 1

Maximum Credits: 1

This course will focus on the development of professional skills required for successful engineering projects. The central objective will be to prepare foundation skills relevant to the senior design course. Course topics will include: project management tools, professional standards and codes, prototype development, design for manufacturing, GD&T, oral presentation skills and presentation of engineering data.

Academic Career: Undergraduate

Course Component: Workshop

Grade Component: Letter Grade

MEMS 1041 - MECHANICAL MEASUREMENTS 1

Minimum Credits: 3

Maximum Credits: 3

Fundamentals of mechanical measurements including steady-state and dynamic signals, detector-transducer elements, signal conditioning and readout systems, standards, instrument calibration, statistical treatment of data, error analysis, and technical report writing.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (ENGR 0141 or 0145 or ET 0053 or BIOENG 1630) and (ME 0031 or MEMS 0031 or ECE 0031 or EET 0110 or BIOENG 1310); CREQ: ME 1014 or MEMS 1014 or BIOENG 1255; PROG: School of Engineering

MEMS 1042 - MECHANICAL MEASUREMENTS 2

Minimum Credits: 3

Maximum Credits: 3

Builds on the foundation of mechanical measurements provided in MEMS 1041 to provide students with the ability to properly design and perform an experiment on a complex mechanical system in order to determine specific characteristics or performance of that system. Specific material includes extended knowledge of statistics and error analysis, computer-based data acquisition, and technical communications.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (ME 1041 or MEMS 1041); PROG: School of Engineering

MEMS 1043 - SENIOR DESIGN PROJECT

Minimum Credits: 3

Maximum Credits: 3

A major project involving literature search, planning, design, fabrication, experimentation, analysis, technical report, poster presentation, and presentation at a technical symposium is performed by a small team of students under the direction of a faculty advisor and corporate advisor on a project presented by the corporate advisor.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: LVL: Sr; PROG: School of Engineering

Course Attributes: Capstone Course

MEMS 1045 - AUTOMATIC CONTROLS

Minimum Credits: 3

Maximum Credits: 3

Modeling of mechanical systems and classical feedback control theory for single-input-single-output systems.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (ME 1014 or MEMS 1014 or BIOENG 1255); PROG: School of Engineering

MEMS 1047 - FINITE ELEMENT ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

The finite element method applied in solid mechanics, fluid mechanics, and heat transfer.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: MEMS 1028; PROG: School of Engineering

MEMS 1048 - ANALYSIS AND CHARACTERIZATION AT THE NANO-SCALE

Minimum Credits: 3

Maximum Credits: 3

This course offers a survey of micro-analytical, microscopy and diffraction methods that are widely used for the analysis of composition, chemistry, structure, scale and morphology of advanced materials. It introduces the most basic concepts required to understand experimental data obtained with these modern techniques. The main objectives of the course are to enable students to interpret and evaluate relevant data sets presented in the research literature and to identify experimental tools to solve a given Nano-research characterization problem. Some prerequisite basic knowledge of the structure of solid matter (e.g. crystals and amorphous materials), diffraction methods (e.g. X-ray diffraction) and processing-property-structure relationships in materials is expected.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: Swanson School of Engineering

MEMS 1049 - MECHATRONICS

Minimum Credits: 3

Maximum Credits: 3

An introduction to the design of electromechanical or "mechatronic" systems using embedded microcontrollers, with emphasis on the AVR family of chips. The course will build upon students' prior knowledge of dynamic systems and electrical circuits, adding the remaining components of a mechatronic system including basic actuators, digital and analog interfacing circuitry, power, and microcontrollers.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (ME 1014 or MEMS 1014) and (MEMS 0031); PROG: School of Engineering

MEMS 1051 - APPLIED THERMODYNAMICS

Minimum Credits: 3

Maximum Credits: 3

Thermodynamic processes involving energy and entropy changes in real and ideal gases, vapors, and liquids, and mixtures of those fluids. Basic thermodynamic cycles (vapor and gas power, refrigeration, and heat pumps). Discussion of thermodynamic relations for simple compressible substances and introduction to psychometrics.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ME 0051 or MEMS 0051 or MET 1110 or BIOENG 1210; PROG: School of Engineering

MEMS 1052 - HEAT AND MASS TRANSFER

Minimum Credits: 3

Maximum Credits: 3

One- and two-dimensional steady and unsteady heat conduction; internal and external forced convection; free convection; engineering principle of radiation; heat exchangers and special topics.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ME 0051 or MEMS 0051 or MEMS 0048 or BIOENG 1210 or MET 1110; PROG: School of Engineering

MEMS 1053 - STRUCTURE OF CRYSTALS AND DIFFRACTION

Minimum Credits: 3

Maximum Credits: 3

Crystallography of materials; Bravais lattices, crystal systems, and crystal structures. Diffraction methods; x-ray, electron, and neutron scattering; atomic scattering factor; structure factor; powder techniques; Laue method; reciprocal lattice; electron diffraction; amorphous materials; thermodynamics of crystals and crystal defects; polymorphism; order-disorder phenomena.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (ENGR 0022 or MEMS 0023 or MET 1162); LVL: Jr or Sr; PROG: Swanson School of Engineering

MEMS 1055 - COMPUTER AIDED ANALYSIS IN TRANSPORT PHENOMENA

Minimum Credits: 3

Maximum Credits: 3

An introduction to some of the numerical/computational methods for solving problems in transport phenomena.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: [ENGR 0712 or 0715 or 0718 or (ET 0023 and 0030)] and (ME 0051 or MEMS 0051 or MET 1110 or BIOENG 1210) and MATH 0290 and MEMS 0071 and (ENGR 0012 or ENGR 0016); PROG: School of Engineering

MEMS 1057 - MICRO/NANO MANUFACTURING

Minimum Credits: 3

Maximum Credits: 3

Explores different micro/nano manufacturing options, material choices, and a variety of applications. The goal is to gain an understanding of various micro/nano fabrication techniques, learn major applications and principles of micro/nano systems, and develop an ability to design and fabricate new micro/nano systems.

Academic Career: Undergraduate

Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PROG: Swanson School of Engineering

MEMS 1058 - ELECTROMAGNETIC PROPERTIES OF MATERIALS

Minimum Credits: 3

Maximum Credits: 3

Review of basic principles: quantum theory, band and zone theory. Transport, electrical, and thermal properties; semiconductors and semiconductor devices; magnetic materials, hard and soft; dielectric and optical properties.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ENGR 0022 or MEMS 0023 or MET 1162; PROG: School of Engineering

MEMS 1059 - PHASE EQUILIBRIA IN MULTI-COMPONENT MATERIALS

Minimum Credits: 3

Maximum Credits: 3

Thermodynamics of solutions with applications to materials systems; heterogeneous phase equilibria; relations between free energy and phase diagrams, electrochemistry; rate processes; thermodynamics of surfaces.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (ENGR 0022 or MEMS 0023 or MET 1162) and (ME 0051 or MEMS 0051 or MET 1110 or MEMS 0048 or BIOENG 1210); LVL: Jr or Sr; PROG: Swanson School of Engineering

MEMS 1060 - NUMERICAL METHODS

Minimum Credits: 3

Maximum Credits: 3

Introduction to numerical techniques for the solution of linear and nonlinear equations, numerical integration and differentiation, interpolation, ordinary and partial differential equations, and eigenvalue problems.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: Swanson School of Engineering

MEMS 1063 - PHASE TRANSFORMATION AND MICROSTRUCTURE EVOLUTION

Minimum Credits: 3

Maximum Credits: 3

Phase equilibria; binary and ternary system; phase rule; thermodynamics and phase diagrams; diffusion in materials; phase transformations; nucleation and growth kinetics; precipitation reactions; solidification; glass-forming systems; phase separation; displacive or martensitic transformations; microstructural development in metallic and non-metallic systems; electron theory of solids; zone theory; electrical and magnetic properties of materials.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: MEMS 1053 and MEMS 1059; LVL: Jr or Sr; PROG: Swanson School of Engineering (UENGR)

MEMS 1065 - THERMAL SYSTEMS DESIGN

Minimum Credits: 3

Maximum Credits: 3

Design, analysis, and optimization of thermal systems. Systems analysis applied to heat exchanger, power conversion, air conditioning, refrigeration, and heat recovery systems. Economics, equation fitting, and thermal property evaluation is integrated into the simulation and optimization of thermal system designs.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: MEMS 0051 and 0071 and 1052; PROG: School of Engineering

MEMS 1066 - METHODS FOR MATERIAL CHARACTERIZATION

Minimum Credits: 3

Maximum Credits: 3

This course offers a survey of analytical, microscopy, diffraction and other testing methods that are widely used for the characterization of composition, chemistry, structure, morphology, thermal, magnetic, electric, mechanical and other properties of materials from nano- to macro-scale. It introduces the most basic concepts required to understand experimental data obtained with these techniques. The main objectives of the course are to enable students to identify characterization methods that would result in given characterization problem, interpret and critically evaluate relevant data sets presented in the research literature. Some prerequisite basic knowledge of the structure of solid matter (e.g. Crystals and amorphous materials), diffraction methods (e.g. X-ray diffraction) and processing-property-structure relationships in materials is expected.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

MEMS 1069 - DATA-DRIVEN MODELING FOR ENGINEERS

Minimum Credits: 3

Maximum Credits: 3

Introduction to data-driven modeling techniques: regression, Bayesian probabilities, parameter estimation, dimension reduction, neural networks.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: MATH 0280 and CS 0004

MEMS 1070 - MECHANICAL BEHAVIOR OF MATERIALS

Minimum Credits: 3

Maximum Credits: 3

Theory of elasticity, stress, strain, constitutive equations, isotropic and anisotropic elasticity, wave propagation in brittle solids, time dependent deformation, viscoelasticity, vibrations, damping, anelasticity, creep, design of creep resistant microstructures, deformation of polymers, physics of fracture, fracture mechanisms, brittle fracture, ductile fracture, design of fracture-resistant microstructures.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: (ENGR 0022 or MEMS 0023 or MET 1162) and (ENGR 0141 or ENGR 0145 or ET 0053);

PROG:UENGR

MEMS 1071 - APPLIED FLUID MECHANICS

Minimum Credits: 3

Maximum Credits: 3

Basic principles of computational fluid dynamics (CFD). Hands-on experience using a commercial CFD package. Students will use this tool to solve a design problem. External flows with particular emphasis on aerodynamics. Fluid machinery. Experimental fluid mechanics.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: MEMS 0071 or 1072; PROG: Swanson School of Engineering

MEMS 1074 - NANOMATERIALS AND BIOMOLECULAR ASSEMBLY

Minimum Credits: 3

Maximum Credits: 3

With the miniaturization of the building blocks of materials down to the nanoscale, one hundred-thousandth the size of a human hair, many interesting properties emerge that underlie the societal interest in nanotechnology. Importantly, learning how nature builds a panoply of functional materials from the bottom-up opens the door for bio-inspired self-assembly techniques for engineering nanomaterials. This class focuses on the fundamentals of size-dependent properties and interactions governing the manipulation of matter in the 1-100 nm length scale. Various synthesis methods are leveraged for creating nanoscale building blocks with tailored sizes, shapes, and properties. Moreover, techniques for assembling nanoscale building blocks depend on the interplay among different types of forces and how they scale, including van der Waals, electrostatic, magnetic, molecular, and entropic interactions. Topics covered include chemical synthesis and self-organization of low dimensional materials, such as zero-dimensional nanoparticles, one-dimensional nanowires/nanotubes, and two-dimensional layered structures, like graphene. Examples of heterostructures and multiphase/hybrid material systems with organic and inorganic components will be discussed leveraging capillary assembly, block copolymer phase segregation, protein assembly, and DNA origami.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

MEMS 1079 - SENIOR MATERIALS RESEARCH PROJECT

Minimum Credits: 3

Maximum Credits: 3

A major project involving literature search, planning, experimentation, analysis, an oral presentation, and a final technical report. The project is either sponsored by the department or a local company and is conducted by an individual or a small team of students with a faculty adviser.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Letter Grade

Course Requirements: PREQ: MEMS 1011

MEMS 1080 - POWDER PROCESSING OF MATERIALS

Minimum Credits: 3

Maximum Credits: 3

Powder processing is widely practiced in the traditional powder metals and ceramics industries as well as in additive manufacturing. This course will review these applications and focus on the underlying materials science and engineering employed in: production of metals and ceramic powders, powder characterization methods, the forming methods used to make shapes from metal and ceramic powders as well as sintering and heat treatment.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

MEMS 1081 - SMART MANUFACTURING - KEY TO INNOVATIONS

Minimum Credits: 3

Maximum Credits: 3

This course covers a range of topics centered on "smart manufacturing", which is a key to provide novel products and solutions for critical industries and special situations. These topics include additive manufacturing, manufacturing metrology, quality control, cyber-physical manufacturing system, supply chain, and artificial intelligence. Fundamental concepts and hands-on practice in smart manufacturing will be demonstrated through lectures, assignments and projects. A background in dynamic systems, mechanical design and measurements is expected but not required.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

MEMS 1082 - ELECTROMECHANICAL SENSORS AND ACTUATORS

Minimum Credits: 3

Maximum Credits: 3

The objective of this course is to provide a thorough understanding of the various mechanisms that can be exploited in the design of electromechanically sensors and actuators. These transduction mechanisms include: 1) transduction based on changes in the energy stored in the electric field, 2) in the energy stored in the magnetic field, 3) piezoelectricity and pyroelectricity, 4) linear inductive transduction mechanisms, and 5) resistive transduction mechanisms. Will discuss various transduction materials, sensors and actuators from a wide range of applications.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: Swanson School of Engineering

MEMS 1083 - ROBOT MODELING AND CONTROL

Minimum Credits: 3

Maximum Credits: 3

This course introduces the fundamentals of robot modeling and control. The course will cover forward and inverse kinematics, Jacobians, Lagrangian dynamics, motion planning, robust and adaptive motion and force control. The course will provide relevant applications from industrial robotics, mobile robotics, and human robotics and interaction. The course will be mathematically rigorous and requires knowledge of linear algebra, dynamic systems, and automatic control. Background material on these topics will be reviewed in the class. The course is appropriate for undergraduate and graduate students from electrical engineering, mechanical engineering, computer science, and mathematics.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: MEMS 1014 and MATH 0280; PROG: Swanson School of Engineering

MEMS 1085 - DEPARTMENTAL SEMINAR

Minimum Credits: 0

Maximum Credits: 0

Seminars are designed to acquaint the student with aspects of engineering not normally encountered in classes and include a wide range of topics such as the significance of engineering as a profession and the relation of engineering to

current social problems.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: H/S/U Basis

Course Requirements: PROG: Swanson School of Engineering

MEMS 1086 - MSE SEMINAR

Minimum Credits: 0

Maximum Credits: 0

Seminars are designed to acquaint the student with aspects of engineering not normally encountered in classes and include a wide range of topics such as the significance of engineering as a profession and the relation of engineering to current social problems.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: H/S/U Basis

MEMS 1087 - SUSTAINABLE MATERIALS PRODUCTION

Minimum Credits: 3

Maximum Credits: 3

This course will focus on the use of global resources in the production of the most heavily consumed materials in manufacturing and construction. For each of these materials the production process will be described starting with the resources from which they are derived and ending with the needs of the manufacturing or construction process in which they are used. The material life cycle and materials eco-selection criteria will be used to highlight end-of-life issues and how the sustainability of materials production may be improved. The use of strategic minerals in materials production will also be highlighted. Finally, renewable materials will be introduced and the prospects for their widespread use in materials production considered.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ENGR 0022 or MEMS 0023 or MSE 2067

Course Attributes: MCSI - Sustainability Related

MEMS 1097 - SPECIAL PROJECTS

Minimum Credits: 1

Maximum Credits: 3

Investigation and research embodying testing, original design, or research on an approved subject; or an individual course of study guided by an approved departmental faculty member.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Letter Grade

MEMS 1098 - SPECIAL PROJECTS II

Minimum Credits: 1

Maximum Credits: 3

Investigation and research embodying testing, original design, or research on an approved subject; or an individual course of study guided by an approved departmental faculty member.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Letter Grade

MEMS 1101 - FERROUS PHYSICAL METALLURGY

Minimum Credits: 3

Maximum Credits: 3

This course will introduce the student to the thermomechanical processing of austenite in plain carbon, high strength low alloy steels, high formability sheet steels and high alloy and special steels. The course will also present the use of hot rolling as a thermomechanical treatment. The importance of thermomechanical treatment, microstructural control and mechanical properties will be presented.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (ENGR 0022 or MEMS 0023 or MET 1162) and (ME 0051 or MEMS 0048 or MEMS 0051 or BIOENG 1210 or MET 1110) and MEMS 1010; PROG: Undergraduate Engineering

MEMS 1102 - PRINCIPLES AND APPLICATIONS OF STEEL ALLOY DESIGN

Minimum Credits: 3

Maximum Credits: 3

This course will present the students with a discussion of the properties that are required of engineering alloys for a given commercial application. The alloy design, thermomechanical processing and required package of mechanical properties for plate, strip, bar, rod, wire and tubular products will be reviewed. These include: strength, toughness, formability, weldability, fatigue resistance and corrosion/oxidation resistance.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: MEMS 1101; PROG: Swanson School of Engineering

MEMS 1103 - PRINCIPLES AND APPLICATIONS OF STEEL PROCESSING AND DESIGN

Minimum Credits: 3

Maximum Credits: 3

This course will present case studies of actual components used in commercial applications in the automotive, construction, oil and gas, and nuclear industries. This course will guide the student from the alloy selection, microstructural processing, and mechanical properties to the final fabrication steps.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: MEMS 1102; PROG: Swanson School of Engineering

MEMS 1104 - ADVANCED PHYSICAL METALLURGY OF NONFERROUS ALLOYS

Minimum Credits: 3

Maximum Credits: 3

The course covers the following content but is not limited to thermokinetics, phase transformations, and microstructure evolution in different non-ferrous alloys; phenomena related to non-metallic inclusions as well as strengthening particles; structure defects and their impacts on mechanical performance; processing with heat treatment; grain size and texture control through heat treatment; the relationship between processing, microstructure, and mechanical properties. Particularly, some of the case studies related to industrial applications will be discussed. Fundamental problems related

to the physical metallurgy of advanced manufacturing, such as additive manufacturing, will be addressed by discussing practical applications.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

MEMS 1105 - STEELMAKING AND SUSTAINABILITY

Minimum Credits: 3

Maximum Credits: 3

This course will cover the various routes of modern ironmaking and steelmaking, including the primary existing processes and alternative processes, as well as attempts to develop lower carbon and carbon-free ironmaking and steelmaking routes. The blast furnace process for ironmaking will be analyzed, together with currently available alternative technologies and the possible use of hydrogen or electrolysis for ironmaking. The engineering aspects of the basic oxygen furnace and electric arc furnace steelmaking routes will be examined, together with alternative process routes to produce steel. The technical aspects of ingot casting and continuous casting will be reviewed. There will be a focus on some of the environmental issues facing the steel industry, as well as recent developments related to sustainability.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

MEMS 1111 - MATERIALS FOR ENERGY GENERATION AND STORAGE

Minimum Credits: 3

Maximum Credits: 3

The objective of this course is to provide an overview of the important renewable energy resources and the modern technologies to harness and store them. After taking MEMS 1111, students are expected to develop a solid scientific and technological understanding of new alternative energy technologies. This course will give an overview on harnessing renewable energy resources and storing collected energy. In each topic, issues relevant to basic principles and technological barriers limiting the use of non-fossil energy will be discussed.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: Swanson School of Engineering

MEMS 1120 - APPLIED ENGINEERING SIMULATION IN DESIGN

Minimum Credits: 3

Maximum Credits: 3

This course will focus on the development of critical thinking skills tailored to engineering simulation in mechanical design. Commonly used computational simulation tools including finite element analysis and computational fluid dynamics will be highlighted. Students will examine the role of simulation in product design and learn to recognize opportunities to integrate simulation-based analysis into traditional engineering analysis and design workflows. A term-long project will offer exposure to simulation tools and provide students the context to practice their skills in a complex design environment. Students are required to take the one-credit course MEMS 1121 Simulation Workshop concurrently.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: MEMS 0051 and 0071 and 1028

MEMS 1121 - APPLIED ENGINEERING SIMULATION IN DESIGN

Minimum Credits: 1

Maximum Credits: 1

Provide an environment for hands-on learning of simulation software and an opportunity to interact with the simulation student community. Provide a mechanism for the discussion of special topics and for guest speakers. Develop practical simulation software skills.

Academic Career: Undergraduate

Course Component: Workshop

Grade Component: Letter Grade

Course Requirements: PREQ: ENGR 0145 and MEMS 0051; CREQ: MEMS 1120

MEMS 1122 - FUNDAMENTALS OF MAGNETIC MATERIALS AND APPLICATIONS

Minimum Credits: 3

Maximum Credits: 3

This course will cover the fundamentals of magnetic properties of materials and will provide an introduction to a number of important applications. Classes of materials to be covered include elemental metals and metallic alloys as well as ceramics with an emphasis on ferromagnetic and ferrimagnetic material systems. Topics to be discussed in detail include quantum mechanical exchange interactions, magnetic anisotropy (shape, magnetocrystalline, exchange bias, induced, etc.), saturation magnetization, magnetostriction, temperature dependence of magnetic properties including statistical mechanics treatments of magnetic moment ordering.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: MEMS 1058

MEMS 1130 - INTRODUCTION TO ADDITIVE MANUFACTURING OF MATERIALS

Minimum Credits: 3

Maximum Credits: 3

This class is targeted toward students who want to learn more about additive manufacturing in general, different additive manufacturing techniques, and how they can be used to produce parts out of a large variety of materials. We will cover the general difference between subtractive and additive manufacturing, introduce and detail the advantages and disadvantages of energy beam based and non-beam based additive manufacturing methods, and discuss which materials can be additive manufactured. We will also describe as-printed microstructures and properties and their improvement through post-processing. Furthermore, elements of characterization, testing and qualification will be introduced. If circumstances permit, students will be able to tour the Additive Manufacturing Research Laboratory at the Swanson School of Engineering and potentially compare different AM methods in hands-on demonstrations.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (ENGR 0022 or MEMS 0023) and MEMS 0040

MEMS 1140 - PROGRAMMING WITH PYTHON AND MATLAB FOR ENGINEERS

Minimum Credits: 1

Maximum Credits: 1

This course covers some of the most commonly used elements of Python and MATLAB required for solving computational and data-science problems in engineering. The course assumes no familiarity with Python and introductory familiarity with MATLAB. Significant in-class programming in MATLAB and Python is included.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ENGR 0012 OR ENGR 0016 OR ENGR 0712; PLAN: ME-BSE

MEMS 1141 - INTRODUCTION TO DATA SCIENCE FOR ENGINEERS

Minimum Credits: 1

Maximum Credits: 1

This course covers some of the most commonly used mathematical and statistical tools encountered in solving data science problems for engineering applications. The course assumes no familiarity with data science but basic familiarity with MATLAB and Python is required. Significant in-class programming in MATLAB and Python is included

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: MEMS 1140; PLAN: ME-BSE

MEMS 1142 - APPLIED DATA SCIENCE FOR ENGINEERS

Minimum Credits: 1

Maximum Credits: 1

This course includes applying data science techniques to solve various engineering problems. The applications are diverse, and they include fluid mechanics, heat transfer, thermodynamics, vibration, solid mechanics, and material science. The course assumes basic familiarity with data science and experience with programming in MATLAB and Python. In-class programming in MATLAB and Python is included.

Academic Career: Undergraduate

Course Component: Workshop

Grade Component: Letter Grade

Course Requirements: PREQ: (ENGR 0011 or 0015) and (ENGR 0012 or 0016)

MEMS 1163 - CERAMIC MATERIALS

Minimum Credits: 3

Maximum Credits: 3

Structure of ceramics and glasses. Microstructures and their development. Properties, processing, and applications.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ENGR 0022 or MEMS 0023; PROG: Undergraduate School of Engineering

MEMS 1165 - MATERIALS DESIGN

Minimum Credits: 3

Maximum Credits: 3

Alloy manufacturing has been improved over the last 50 years with many new technologies developed. This course introduces several advanced manufacturing of advanced alloys. The methods introduced in this course include alloy casting, additive manufacturing, rapid solidification, powder metallurgy. However, rather than exclusively introducing the techniques themselves, the course particularly focuses on the metallurgical fundamentals of these manufacturing techniques. The materials design concepts and methods will be introduced, and design principles with the process-structure-property-performance relationships for these manufacturing techniques will be emphasized. The course will also cover major contents as below: 1. Fundamental metallurgical concepts for alloy design and manufacturing 2. Materials design principles and methods 3. Casting, welding, and their metallurgical design aspects 4. Powder

metallurgy and their applications 5. Alloy 3D printing and its optimization 6. Computational simulation of advanced manufacturing 7. Microstructure engineering for advanced manufacturing 8. Future manufacturing of advanced alloys Each lecture will cover two weeks of class. About 16 weeks are planned for this course. The course will further develop some design projects for students to accomplish.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

MEMS 1174 - CERAMIC PROCESSING

Minimum Credits: 3

Maximum Credits: 3

The course is focused on powder processing of ceramic materials. It is arranged according to the steps in processing, starting with powder synthesis and characterization, proceeding through the commonly used powder forming methods and finally to the high temperature sintering of the product.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: ENGR 0022, MEMS 0023, MSE 1163 or MEMS 1163; PROG: School of Engineering

MEMS 1183 - INTRODUCTION TO ADDITIVE MANUFACTURING

Minimum Credits: 3

Maximum Credits: 3

Additive manufacturing processes, operating principles, materials used in the processes, applications, process chain, design for manufacturability, mechanical behavior of printed plastics and metals, process-microstructure-property relationship, post-processing and inspection.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

MEMS 1256 - APPLIED COMPUTATIONAL HEAT AND MASS TRANSFER

Minimum Credits: 3

Maximum Credits: 3

Introduction to the implementation of commercial and open-source computational fluid dynamics (CFD) software to solve complex, multi-physics, multi-scale engineering problems. Topics covered include mesh generation, discretization and input uncertainty, model selection for internal and external laminar and turbulent flow, conjugate heat transfer, multi-phase flow, uncertainty quantification, and high-performance/supercomputing.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: MEMS 0071; PROG: Swanson School of Engineering

MEMS 1300 - LINEAR ALGEBRA FOR MACHINE LEARNING

Minimum Credits: 3

Maximum Credits: 3

Core concepts from linear algebra that are key for understanding and creating applied machine learning algorithms. Topics include least square approximation, neural networks, and matrix factorization for dimension reduction.

Academic Career: Undergraduate

Course Component: Lecture
Grade Component: Letter Grade

Medical Education

MEDEDU 2101 - ENHANCING RESEARCH SKILLS

Minimum Credits: 1

Maximum Credits: 1

The objective of this course is to expose students to a breath of research designs and methodologies which can be applied to evaluate and explore relevant topics in health sciences education.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MEDEDU 2360 - CURRENT TOPICS IN TEACHING, LEARNING, AND HEALTH SERVICES RESEARCH

Minimum Credits: 1

Maximum Credits: 2

The objective of this course is to expose students to 1) current, relevant topics, that effect, teaching and learning and health sciences and 2) models for health sciences education research methodology that can be applied to their own work.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Medical Elective

MSELCT 5722 - PSTP RESEARCH MONTH

Minimum Credits: 0

Maximum Credits: 0

This research elective month for students in the Physician Scientist Training Program (PSTP) enables them to continue needed research associated with longitudinal PSTP scientific training during the MS2/MS3/MS4 years. Notably, the student's participation in the PSTP fulfills the school's Scholarly Research Project (SRP) requirement, and any research elective month(s) that PSTP students engage receive elective credit as training compatible with the SRP goals. The time set aside for this elective can be focused on either the longitudinal project undertaken in their PSTP research plan (which encompasses 2 summer laboratory rotations and 10-12 months of directed research) or on an independent research project.

Academic Career: Medical School

Course Component: Thesis Research

Grade Component: S/U Basis

Medicine

MED 5106 - LONGITUDINAL ALLIANCE PROGRAM

Minimum Credits: 0

Maximum Credits: 0

The purpose of the Longitudinal Alliance Program is to create meaningful relationships between patients and medical students to develop empathetic, compassionate physicians and increase awareness of what a patient goes through in today's health care system.

Academic Career: Medical School

Course Component: Workshop

Grade Component: S/U Basis

MED 5107 - COMMUNITY ALLIANCE PROGRAM

Minimum Credits: 0

Maximum Credits: 0

CAP fosters community-engaged approaches to learning by helping students connect with Pittsburgh-area organizations working to improve health for populations; students will work in teams on projects designed to improve health equity and the overall health of the community.

Academic Career: Medical School

Course Component: Practicum

Grade Component: S/U Basis

MED 5109 - CARDIOLOGY

Minimum Credits: 0

Maximum Credits: 0

This course helps students understand normal cardiac anatomy, cardiovascular physiology, and cardiac electrophysiology; gain a basic comprehension of common pathophysiological conditions which affect the cardiovascular system; know the mechanisms of action and clinical uses of common-cardiovascular medications; and learn the physical findings, clinical presentation, diagnostic tools and basic treatments used in the management of cardiovascular disease.

Academic Career: Medical School

Course Component: Seminar

Grade Component: S/U Basis

MED 5118 - DIGESTION & NUTRITION

Minimum Credits: 0

Maximum Credits: 0

This course covers the normal function and pathophysiology of the several organs that comprise the gastrointestinal tract. In general, part one covers hollow organs and part two covers solid organs.

Academic Career: Medical School

Course Component: Workshop

Grade Component: S/U Basis

MED 5120 - NEPHROLOGY

Minimum Credits: 0

Maximum Credits: 0

The nephrology course helps students understand the relationship between structure and function in the renal organ system, learn the embryologic basis of structure-based malfunctions in the kidney, learn primary cellular processes that mediate the actions of pharmaceutical agents that are active in the renal system and how kidneys participate in establishing drug levels in circulation, understand the etiology and treatment of common diseases of the renal system, and gain a good understanding of salt and water balance and the critical importance of this function to homeostasis.

Academic Career: Medical School
Course Component: Workshop
Grade Component: S/U Basis

MED 5125 - PATIENT, PHYSICIAN & SOCIETY 2

Minimum Credits: 0

Maximum Credits: 0

This course continues to focus on the development of skills needed for effective interactions with patients and on increasing student understanding of the many roles physicians fill in society, in the health professions, and in the lives of their patients, including integrated instruction on cross-cutting themes such as ethics, professionalism, cultural competence, quality, patient safety, health care systems, racism in medicine, and legal aspects of healthcare.

Academic Career: Medical School

Course Component: Workshop

Grade Component: S/U Basis

MED 5129 - EVIDENCE, DISCOVERY AND REASONING 2

Minimum Credits: 0

Maximum Credits: 0

The skills of reading biomedical literature, interpreting data, and evaluating clinical studies are the focus of this course, integrating themes of clinical expertise and scientific reasoning, and showing how students can keep up with new science.

Academic Career: Medical School

Course Component: Workshop

Grade Component: S/U Basis

MED 5130 - RHEUMATOLOGY

Minimum Credits: 0

Maximum Credits: 0

This course introduces students to the underlying pathophysiology and phenomenology of rheumatologic disorders, presenting basic approaches to assessment and management, to prepare them for clinical rotations.

Academic Career: Medical School

Course Component: Practicum

Grade Component: S/U Basis

MED 5136 - DERMATOLOGY

Minimum Credits: 0

Maximum Credits: 0

This course introduces students to the underlying pathophysiology and phenomenology of skin disorders, presenting basic approaches to assessment and management, to prepare them for clinical rotations.

Academic Career: Medical School

Course Component: Workshop

Grade Component: S/U Basis

MED 5139 - INTRODUCTION TO CLINICAL MEDICINE 1

Minimum Credits: 0

Maximum Credits: 0

Combining advanced physical exam practice with complex communication skill development, and utilizing both simulated and real patient encounters, this course builds on introductory courses in those areas and prepares students for clinical rotations in the clerkship phase.

Academic Career: Medical School

Course Component: Workshop

Grade Component: S/U Basis

MED 5140 - PULMONOLOGY

Minimum Credits: 0

Maximum Credits: 0

This course helps students learn the structure and physiology of the pulmonary system, how structural and functional changes secondary to disease alter normal physiology, and how to best evaluate and treat patients for those diseases.

Academic Career: Medical School

Course Component: Seminar

Grade Component: S/U Basis

MED 5153 - LONGITUDINAL ALLIANCE INTERIM GRADE 1

Minimum Credits: 0

Maximum Credits: 0

The purpose of the Longitudinal Alliance Program is to create meaningful relationships between patients and medical students to develop empathetic, compassionate physicians and increase awareness of what a patient goes through in today's health care system.

Academic Career: Medical School

Course Component: Practicum

Grade Component: S/U Basis

MED 5162 - COMMUNITY ALLIANCE INTERIM GRADE 2

Minimum Credits: 0

Maximum Credits: 0

CAP fosters community-engaged approaches to learning by helping students connect with Pittsburgh-area organizations working to improve health for populations; students will work in teams on projects designed to improve health equity and the overall health of the community.

Academic Career: Medical School

Course Component: Workshop

Grade Component: S/U Basis

MED 5173 - LONGITUDINAL ALLIANCE INTERIM GRADE 2

Minimum Credits: 0

Maximum Credits: 0

The purpose of the Longitudinal Alliance Program is to create meaningful relationships between patients and medical students to develop empathetic, compassionate physicians and increase awareness of what a patient goes through in today's health care system.

Academic Career: Medical School

Course Component: Practicum

Grade Component: S/U Basis

MED 5595 - SUBSTANCE USE DISORDERS IN GENERAL MEDICAL SETTINGS

Minimum Credits: 0

Maximum Credits: 0

Students on this rotation will work primarily with general internists with expertise in addiction medicine, caring for patients with substance use disorders in general medical settings, such as the acute care hospital and the Primary Care and Addiction Recovery Engagement Services (PCARES) clinic, with additional exposure to a methadone clinic setting and the care of women with opioid use disorders at Magee.

Academic Career: Medical School

Course Component: Clinical

Grade Component: S/U Basis

MED 5688 - DIVERSITY IN SEXUAL ORIENTATION AND GENDER IDENTITY AND EXPRESSION EXPERIENTIAL ELECTIVE

Minimum Credits: 0

Maximum Credits: 0

The majority of this course will be conducted as clinical experiences in addition to a weekly didactic session on pertinent topics relating to SOGIE-diverse health. The course will strive to provide both medical and surgical opportunities for patients; however, this is dependent on availability of procedures. At the conclusion of the experience, the students will be asked to write a reflective essay on their educational experience.

Grade Component: H/HS/S/LS/U

Medieval & Renaissance Studies

MRST 1002 - INTRODUCTION TO THE RENAISSANCE

Minimum Credits: 3

Maximum Credits: 3

The idea of the Renaissance is central to Western culture. Many of our values and tastes devolve from--or consciously react against--patterns that were established or reinterpreted five hundred years ago. The student who explores the renaissance, therefore, gains hold of one of the keys of Western civilization. He or she also acquires practice in critical reading, discussion, and the written expression of ideas.

Microbiology and Immunology

MSMI 2480 - MECHANISMS OF VIRAL PERSISTENCE AND PATHOGENESIS

Minimum Credits: 2

Maximum Credits: 2

Microorganisms have evolved a vast array of mechanisms to avoid detection or elimination by host defenses, and to establish persistent infections that can lead to chronic or recurrent disease. The ability to establish persistent infections often complicates the successful therapeutic treatment of disease caused by such microorganisms. This course is designed to familiarize students with the mechanisms by which select bacterial and viral pathogens establish

persistence in their host cells and/or organisms, and the subsequent considerations for pathogenesis and therapy.

Military Science & Tact

MILS 0011 - INTRODUCTION TO THE ARMY

Minimum Credits: 1

Maximum Credits: 1

This course serves as an introduction to the Army ROTC. Course instruction includes survival techniques, first aid, wear of the military uniform, organization structure of the Army, and the roles and various officer branches of the Army. This course is open to all students. Students who are enrolled or contracted in the ROTC Program must take part in physical fitness training, labs, and all ROTC activities. Students who are taking this class as an elective only do not need to take part in physical fitness training, labs, or other ROTC activities.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

MILS 0012 - ADAPTIVE LEADERSHIP

Minimum Credits: 1

Maximum Credits: 1

MILS 0012 is offered during the spring term. This freshman course is an introduction to army ROTC. Course instruction includes leadership and management, drill and ceremonies, land navigation, basic, pistol/rifle marksmanship and organization and role of the U.S. army reserve and national guard units.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

MILS 0021 - LEADERSHIP & DECISION MAKING

Minimum Credits: 1

Maximum Credits: 1

Course instruction includes the total Army concept, Army rank and structure, leadership and management, land navigation, and drill and ceremonies. This course is open to all students. Students who are enrolled or contracted in the ROTC Program must take part in physical fitness training, labs, and all ROTC activities. Students who are taking this class as an elective only do not need to take part in physical fitness training, labs, or other ROTC activities.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

MILS 0022 - ARMY TEAM DEVELOPMENT

Minimum Credits: 1

Maximum Credits: 1

MILS 0022 is offered during the spring term. This sophomore course is an introduction to army ROTC. Course instruction includes group communication, decision making and problem solving techniques, military history, leadership and management and land navigation.

Academic Career: Undergraduate

Modern Greek

GREEKM 0101 - GREEK (MODERN) 1

Minimum Credits: 4
Maximum Credits: 4
The greatest part of the first term will be devoted to the presentation and practice of the basic sound patterns of the language, its fundamental sentence patterns, and sufficient vocabulary to illustrate and practice them. An introduction to the writing system will be offered together with the opportunity to acquire elementary writing and reading skills.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: European Union Studies, European and Eurasian Studies, Global Studies, Russian & East European Studies, Transatlantic Studies, West European Studies

GREEKM 0102 - GREEK (MODERN) 2

Minimum Credits: 4
Maximum Credits: 4
At the end of the second term of the first year of study the student should be able to produce all the significant sound patterns of the language, to recognize and use the major grammatical structures within a limited core vocabulary. The student should be able a) to engage in simple conversations with native speakers about a limited number of everyday situations and b) to read and write simple material related to the situations presented.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: LING 0231 or GREEKM 0101; MIN GRADE: 'C'
Course Attributes: DSAS Second Language General Ed. Requirement, European Union Studies, European and Eurasian Studies, Global Studies, Russian & East European Studies, Transatlantic Studies, West European Studies

GREEKM 0103 - GREEK (MODERN) 3

Minimum Credits: 3
Maximum Credits: 3
The first term of the second year will concentrate on the further development of fluency in oral production and the improvement in the student's ability to understand the flow of speech as uttered by a native speaker. Increased attention will be paid to reading as a means of augmenting are cognition vocabulary and writing as a drill and as a means of consolidating and communicating the knowledge gained.

Academic Career: Undergraduate

GREEKM 0105 - GREEK (MODERN) 5

Minimum Credits: 3

Maximum Credits: 3

Third-year Modern Greek builds on skills acquired in first and second year Greek. It is a thematic exploration of Greek culture at the advanced intermediate level. Through a combination of movies, songs, poems and newspapers, it exposes students to aspects of traditional and pop Greek culture as well as to important current issues. By the end of this course students should be able to: talk about ecology and the environment; discuss "rembetica" songs within their social context; look for a job, write a CV, prepare for an interview; and, understand the history of the Greek language.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: LING 0234 or GREEKM 0104; MIN GRADE 'C' FOR ALL LISTED COURSES

Course Attributes: European Union Studies, European and Eurasian Studies, Global Studies, Russian & East European Studies, Transatlantic Studies, West European Studies

GREEKM 0106 - GREEK (MODERN) 6

Minimum Credits: 3

Maximum Credits: 3

This course continues the thematic exploration of Greek culture at the advanced intermediate level. By the end of this year, students will be able to participate in most conversations employing common idiomatic language and express opinion and arguments with clarity and fluency. By the end of this course students should be able to: talk about the history of the Akropolis and the Olympic Games; discuss the achievements of the Byzantine Empire; employ useful banking and economic terminology; understand the Greek polity and the language of the Press; and engage with Modern Greek literature.

Academic Career: Undergraduate

Course Attributes: European Union Studies, European and Eurasian Studies, Global Studies, Russian & East European Studies, Transatlantic Studies, West European Studies

GREEKM 1615 - THE GREEKS: JOURNEY THROUGH CULTURE

Minimum Credits: 3

Maximum Credits: 3

What makes Greek culture appear both familiar and distinct? What are some of the root metaphors through which contemporary Greeks make sense of the world? How do Greeks approach their history and their future today? These are some of the questions that will inform our exploration of Greek culture and society in this course. Focusing on both history and social context, this course will introduce students to issues such as language and identity, continuity and social change, food and memory, narrative and metaphor, heroes and symbols, performance and ritual, crisis and transformation. It will expose students to the complexity and richness of experience and cultural expression in the Greek world and provide them with the tools to better analyze, understand and appreciate both the Greek as well as their own cultural practices.

Molecular Pharmacology

MSMPHL 3375 - NEUROPHARMACOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course will broadly review neuropharmacology and neurobiology, study monoamine, cholinergic and GPCR biology, and explore the blood-brain barrier and its significance to neuropharmacology. The course will focus on the molecular mechanisms of drug action for different classes of compounds including but not limited to; antidepressants, antipsychotics, anti-epileptics, anesthetics, weight loss, stimulants, neuroprotective, addiction, pain and migraine drugs. In addition to the formal lectures the course will emphasize critical reading of the primary literature through journal-club style discussions and cover the most recent treatment and therapeutic avenues being developed for a broad range of neurologic and psychiatric disorders. The course is ideally suited for Molecular Pharmacology and Neuroscience graduate students or any other graduate student with interest in neurological diseases and their treatments. The course is also appropriate for senior undergraduates who have completed 4 semesters of chemistry, 2 semesters of biology, and other relevant upper division course work (e.g. Cell Biology, Physiology or Biochemistry)

Music

MUSIC 0100 - FUNDAMENTALS OF WESTERN MUSIC

Minimum Credits: 3

Maximum Credits: 3

This class provides a comprehensive introduction to reading and understanding tonal music. It is intended for music majors preparing to enter the music theory sequence, or for non-majors who wish to learn to better understand and produce musical notation. Topics include pitch, rhythm and meter, scales, intervals, chords, and harmony. By the end of this semester, you will be able to identify basic harmonic progressions and musical forms both visually and aurally. Prior experience with music theory is neither required nor assumed. If you feel that this course may be review, you may be able to exempt out of it by taking an exam. More information about that exam is here:

<https://www.music.pitt.edu/academics/undergraduate/composition-track#:~:text=A%20passing%20grade%20of%2085,after%20clicking%20the%20test%20link>.

MUSIC 0115 - THE ALEXANDER TECHNIQUE

Minimum Credits: 1

Maximum Credits: 1

An elective, this course teaches musicians, actors, and other kinetic performers how posture and body awareness impact their health. Students will learn how to take conscious control of their movements during activities so their performances will be fluid, natural, poised and expressive to their fullest potential. The course will improve the quality

of performance, daily routines, and study habit positions, and prevent repetitive movement through conscious release of the muscles in the upper body.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

MUSIC 0120 - BASIC MUSICIANSHIP: CLASS MANDOLIN

Minimum Credits: 3

Maximum Credits: 3

This group mandolin class provides theoretical and practical means to play the mandolin. Students will learn to tune, pick, and play melodies and chords. This beginner class is intended for students with little to no mandolin experience. Students with mandolin experience are welcome to join to advance their performance abilities.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

MUSIC 0121 - BASIC MUSICIANSHIP: CLASS PIANO

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to the basics of playing the piano within the context of Western Classical Music. Students will learn simple piano pieces, scales, intervals, chords, as well as simple musical analysis. The class emphasizes performing what we learn. Electronic pianos are used in class and are available for daily practice.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Creative Work General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

MUSIC 0122 - BASIC MUSICIANSHIP: CLASS GUITAR

Minimum Credits: 3

Maximum Credits: 3

This course is designed to provide non-music majors with an introduction to the techniques of classical, folk, rock, and jazz guitar. While the emphasis is on playing skills, the course also introduces many aspects of music theory and notation.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

MUSIC 0123 - BASIC MUSICIANSHIP: CLASS VOICE

Minimum Credits: 3

Maximum Credits: 3

This course is designed for non-voice majors who want to develop their singing and sight-reading skills. It provides an introduction to posture, breathing, tone production, diction, and interpretation, while introducing students to the elements of music theory and notation.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

MUSIC 0124 - INTERMEDIATE PIANO

Minimum Credits: 3

Maximum Credits: 3

This course is designed for students who have previously studied the piano. Throughout the semester, you will set individual goals with your instructor and work toward meeting those goals. The class will include preparation for and performance in two recitals, where students will present polished performances of appropriately challenging pieces (one ensemble and one solo). Alongside these performance objectives, students will also undertake a study of musical form, developing large-scale listening and analysis skills.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Creative Work General Ed. Requirement, DSAS The Arts General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

MUSIC 0125 - CREATIVE MUSICIANSHIP

Minimum Credits: 3

Maximum Credits: 3

This class provides an introduction to music composition designed for students that may or may not read music. It is intended for any student that wants to learn vocabulary and skills around music making. All of the units involve using different technologies, music concepts, and instrumentation in order to create original compositions. By the end of the semester, you will have produced a podcast, made beats, written and recorded compositions for your own voice, written assemblage and found sound compositions, and drawn graphic scores. You will have also acquired vocabulary that will help you discuss your classmates' projects.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Creative Work General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

MUSIC 0128 - INTERMEDIATE GUITAR

Minimum Credits: 3

Maximum Credits: 3

Throughout this course, students with previous experience with guitar will engage in continuing their development in crafting and sharing their own music with others. The course is designed to encourage performance practices in concentrated fields of studies finely tuning several styles / genres including Jazz, Classical, Rock, Pop, folk, and much more! Topics of study include rhythm and lead guitar playing, performance development, and singing while strumming. While emphasis will be on skills and repertoire, students will enjoy expanding their knowledge of the fundamentals of music theory as they deepen their musicianship. Students will learn practices to become much more familiar with performing having frequent opportunities to own the stage. Our journey will continue to develop as students shape their sound and become more confident in their own practice as well as sharing and working with others. As we align our goals with practice and application, students will obtain the tools to thrive in the music industry as a guitarist. Whether you are new to music or continuing your artistry, our time together will help broaden your perspective and make future musical experiences more rewarding. Please bring your guitar for each class as we will use it for our regular class meetings. Your application to music with the guitar is imperative to your success and growth throughout this class. A classical, nylon string or acoustic, steel string guitar is preferable, however, an electric guitar is also acceptable.

Academic Career: Undergraduate

MUSIC 0411 - THEORY 1

Minimum Credits: 3

Maximum Credits: 3

This course is designed for beginning to intermediate music theory students. It introduces tonal melody and harmony, and may cover topics such as chord progressions, inversions, lead sheet symbols, non-chord tones, and/or voice leading.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: MUSIC 0100(MIN GRADE: B-) or Music Theory Score equal/greater 13

MUSIC 0412 - MUSICIANSHIP 1

Minimum Credits: 1

Maximum Credits: 1

This course provides a disciplined environment in which to develop or improve audiation and aural skills, including sight-singing (moveable 'Do' solfeggio) in major and minor keys, interval recognition exercises, recognition of triads in inversions and with added tones, and melodic and rhythmic dictation. Students are expected to be able to accurately match pitch (reproduce with their singing voice the pitch of a tone they hear, particularly one played on a piano). The ability to match pitch will be assessed individually during the first week of classes and must meet a minimum standard in order for the student to proceed with the course.

Minimum Credits: 3

Maximum Credits: 3

This course is designed for intermediate to advanced music theory students. It may cover topics such as rhythm, form, counterpoint, chromatic harmony and/or 20-21st century compositional/songwriting techniques.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: MUSIC 0411

MUSIC 0419 - THEORY 4

Minimum Credits: 3

Maximum Credits: 3

This course is designed for intermediate to advanced music theory students. It may cover topics such as rhythm, form, counterpoint, chromatic harmony and/or 20-21st century compositional/songwriting techniques.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: MUSIC 0411

Course Attributes: DSAS Creative Work General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

MUSIC 0510 - VOICE-JAZZ

Minimum Credits: 1

Maximum Credits: 1

This course is designed to teach jazz vocal style and improvisation in an individualized setting. Students will learn the basics of jazz voice production through technical exercises at the keyboard. Jazz terminology will be introduced and students will internalize jazz rhythms and articulations. The course provides for active listening with an emphasis on sight singing and ear training. Students will explore scale pattern and modes as elements of improvisation. They will express such technique through call-and-response and the embellishment of standard jazz tunes. Dietrich School students must complete three credits in performance courses to meet the Creative Work General Education

Requirement.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: MUSIC 0510

Course Attributes: DSAS Creative Work General Ed. Requirement

MUSIC 0511 - VOICE

Minimum Credits: 1

Maximum Credits: 1

This course provides instruction in vocal techniques and literature. Students receive a one hour private lesson each week. May be repeated for credit. Dietrich School students must complete three credits in performance courses to meet the Creative Work General Education Requirement.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Letter Grade

Course Requirements: PREQ: MUSIC 0511

Course Attributes: DSAS Creative Work General Ed. Requirement

MUSIC 0512 - PIANO

Minimum Credits: 1

Maximum Credits: 1

This course provides instruction in the techniques and literature of the piano. Students receive a one hour private lesson each week. May be repeated for credit. Dietrich School students must complete three credits in performance courses to meet the Creative Work General Education Requirement.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Letter Grade

Course Requirements: PREQ: MUSIC 0512

Course Attributes: DSAS Creative Work General Ed. Requirement

MUSIC 0513 - ORGAN

Minimum Credits: 1

Maximum Credits: 1

This course provides instruction in the techniques and literature of the organ. Students receive a one hour private lesson each week. May be repeated for credit. Dietrich School students must complete three credits in performance courses to meet the Creative Work General Education Requirement.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Letter Grade

Course Requirements: PREQ: MUSIC 0513

Course Attributes: DSAS Creative Work General Ed. Requirement

MUSIC 0515 - VIOLIN

Minimum Credits: 1

Maximum Credits: 1

This course provides instruction in the techniques and literature of the violin. Students receive a one hour private lesson each week. May be repeated for credit. Dietrich School students must complete three credits in performance courses to

meet the Creative Work General Education Requirement.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Letter Grade

Course Attributes: DSAS Creative Work General Ed. Requirement

MUSIC 0516 - VIOLA

Minimum Credits: 1

Maximum Credits: 1

This course provides instruction in the techniques and literature of the viola. Students receive a one hour private lesson each week. May be repeated for credit. Dietrich School students must complete three credits in performance courses to meet the Creative Work General Education Requirement.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Letter Grade

Course Attributes: DSAS Creative Work General Ed. Requirement

MUSIC 0517 - VIOLONCELLO

Minimum Credits: 1

Maximum Credits: 1

This course provides instruction in the techniques and literature of the violoncello. Students receive a one hour private lesson each week. May be repeated for credit. Dietrich School students must complete three credits in performance courses to meet the Creative Work General Education Requirement.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Letter Grade

Course Requirements: PREQ: MUSIC 0517

Course Attributes: DSAS Creative Work General Ed. Requirement

MUSIC 0518 - DOUBLE BASS / BASS GUITAR

Minimum Credits: 1

Maximum Credits: 1

This course provides instruction in the techniques and literature of the double bass. Students receive a one hour private lesson each week. May be repeated for credit. Dietrich School students must complete three credits in performance courses to meet the Creative Work General Education Requirement.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Letter Grade

Course Requirements: PREQ: MUSIC 0518

Course Attributes: DSAS Creative Work General Ed. Requirement

MUSIC 0519 - FLUTE

Minimum Credits: 1

Maximum Credits: 1

This course provides instruction in the techniques and literature of the flute. Students receive a one hour private lesson each week. May be repeated for credit. Dietrich School students must complete three credits in performance courses to meet the Creative Work General Education Requirement.

Academic Career: Undergraduate

Course Component: Directed Studies
Grade Component: Letter Grade
Course Requirements: PREQ: MUSIC 0519
Course Attributes: DSAS Creative Work General Ed. Requirement

MUSIC 0520 - OBOE

Minimum Credits: 1

Maximum Credits: 1

This course provides instruction in the techniques and literature of the oboe. Students receive a one hour private lesson each week. May be repeated for credit. Dietrich School students must complete three credits in performance courses to meet the Creative Work General Education Requirement.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Letter Grade

Course Requirements: PREQ: MUSIC 0520

Course Attributes: DSAS Creative Work General Ed. Requirement

MUSIC 0521 - CLARINET

Minimum Credits: 1

Maximum Credits: 1

This course provides instruction in the techniques and literature of the clarinet. Students receive a one hour private lesson each week. May be repeated for credit. Dietrich School students must complete three credits in performance courses to meet the Creative Work General Education Requirement.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Letter Grade

Course Requirements: PREQ: MUSIC 0521

Course Attributes: DSAS Creative Work General Ed. Requirement

MUSIC 0522 - SAXOPHONE

Minimum Credits: 1

Maximum Credits: 1

This course provides instruction in the techniques and literature of the saxophone. Students receive instruction in both jazz and classical techniques. One hour private lesson per week. May be repeated for credit. Dietrich School students must complete three credits in performance courses to meet the Creative Work General Education Requirement.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Letter Grade

Course Requirements: PREQ: MUSIC 0522

Course Attributes: DSAS Creative Work General Ed. Requirement

MUSIC 0523 - FRENCH HORN

Minimum Credits: 1

Maximum Credits: 1

This course provides instruction in the techniques and literature of the French horn. Students receive a one hour private lesson each week. May be repeated for credit. Dietrich School students must complete three credits in performance courses to meet the Creative Work General Education Requirement.

Academic Career: Undergraduate

Course Component: Directed Studies
Grade Component: Letter Grade
Course Requirements: PREQ: MUSIC 0523
Course Attributes: DSAS Creative Work General Ed. Requirement

MUSIC 0524 - TRUMPET

Minimum Credits: 1

Maximum Credits: 1

This course provides instruction in the techniques and literature of the trumpet. Students receive a one hour private lesson each week. May be repeated for credit. Dietrich School students must complete three credits in performance courses to meet the Creative Work General Education Requirement.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Letter Grade

Course Requirements: PREQ: MUSIC 0524

Course Attributes: DSAS Creative Work General Ed. Requirement

MUSIC 0525 - BASSOON

Minimum Credits: 1

Maximum Credits: 1

This course provides instruction in the techniques and literature of the bassoon. Students receive a one hour private lesson each week. May be repeated for credit. Dietrich School students must complete three credits in performance courses to meet the Creative Work General Education Requirement.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Letter Grade

Course Requirements: PREQ: MUSIC 0525

Course Attributes: DSAS Creative Work General Ed. Requirement

MUSIC 0526 - TROMBONE

Minimum Credits: 1

Maximum Credits: 1

This course provides instruction in the techniques and literature of the trombone. Students receive a one hour private lesson each week. May be repeated for credit. Dietrich School students must complete three credits in performance courses to meet the Creative Work General Education Requirement.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: MUSIC 0526

Course Attributes: DSAS Creative Work General Ed. Requirement

MUSIC 0527 - PERCUSSION

Minimum Credits: 1

Maximum Credits: 1

This course provides instruction in the techniques and literature of percussion. Students receive a one hour private lesson each week. May be repeated for credit. Dietrich School students must complete three credits in performance courses to meet the Creative Work General Education Requirement.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Letter Grade

Course Requirements: PREQ: MUSIC 0527

Course Attributes: DSAS Creative Work General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

MUSIC 0528 - JAZZ-STUDIO SET DRUMMING

Minimum Credits: 1

Maximum Credits: 1

Course will consist of the following styles of music technique for students to become qualified professionals in the entertainment industry. The music styles for the course will be: jazz, pop, big band, and recording session technique. These styles will also be enhanced with training in ear development, sight reading, and improvisational class demonstrations. Dietrich School students must complete three credits in performance courses to meet the Creative Work General Education Requirement.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: MUSIC 0528

Course Attributes: DSAS Creative Work General Ed. Requirement

MUSIC 0529 - GUITAR

Minimum Credits: 1

Maximum Credits: 1

This course provides instruction in the techniques and literature of the guitar. Students receive a one hour private lesson each week. May be repeated for additional credit. Dietrich School students must complete three credits in performance courses to meet the Creative Work General Education Requirement.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Letter Grade

Course Attributes: DSAS Creative Work General Ed. Requirement

MUSIC 0530 - JAZZ GUITAR

Minimum Credits: 1

Maximum Credits: 1

This course provides instruction in the techniques and literature of the jazz guitar. Students receive a one hour private lesson each week. May be repeated for credit. Dietrich School students must complete three credits in performance courses to meet the Creative Work General Education Requirement.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Letter Grade

Course Requirements: PREQ: MUSIC 0530

Course Attributes: DSAS Creative Work General Ed. Requirement

MUSIC 0533 - JAZZ PIANO

Minimum Credits: 1

Maximum Credits: 1

This course is designed to teach jazz piano and improvisation in an individualized setting. Students will learn the basics of jazz piano through technical exercises at the keyboard. Students will explore scale pattern and modes as elements of improvisation. Dietrich School students must complete three credits in performance courses to meet the Creative Work

General Education Requirement.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: MUSIC 0533

Course Attributes: DSAS Creative Work General Ed. Requirement

MUSIC 0540 - NON-WESTERN INSTRUMENTS

Minimum Credits: 1

Maximum Credits: 1

This course provides instruction in the techniques and literature of non-Western instruments. Students receive a one hour private lesson each week. May be repeated for credit. Dietrich School students must complete three credits in performance courses to meet the Creative Work General Education Requirement.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Letter Grade

Course Attributes: Asian Studies, DSAS Creative Work General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

MUSIC 0609 - GOSPEL CHOIR

Minimum Credits: 1

Maximum Credits: 1

Dietrich School students must complete three credits in performance courses to meet the Creative Work General Education Requirement.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

Course Attributes: DSAS Creative Work General Ed. Requirement

MUSIC 0611 - COLLEGIATE CHORALE

Minimum Credits: 1

Maximum Credits: 1

Open to students, faculty, staff, and community. The study and performance of traditional and contemporary choral works.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

MUSIC 0612 - HEINZ CHAPEL CHOIR

Minimum Credits: 1

Maximum Credits: 1

An a cappella choir singing a wide range of choral music. Regular performances on campus and on annual tour. Dietrich School students must complete three credits in performance courses to meet the Creative Work General Education Requirement.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: MUSIC 0612
Course Attributes: DSAS Creative Work General Ed. Requirement

MUSIC 0613 - UNIVERSITY GLEE CLUB

Minimum Credits: 1

Maximum Credits: 1

An ensemble of men's voices that performs on campus and on tour. Repertoire ranges from traditional glee club numbers, through Broadway hits, to works from the classical literature. Dietrich School students must complete three credits in performance courses to meet the Creative Work General Education Requirement.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: MUSIC 0613

Course Attributes: DSAS Creative Work General Ed. Requirement

MUSIC 0614 - TREBLE CHORAL ENSEMBLE

Minimum Credits: 1

Maximum Credits: 1

Performs treble choral music from the 16th century to today. Members receive instruction in vocal technique and sight singing skills. Emphasis is given to diction and stage presence. Dietrich School students must complete three credits in performance courses to meet the Creative Work General Education Requirement.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: MUSIC 0614

Course Attributes: DSAS Creative Work General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

MUSIC 0615 - CARPATHIAN MUSIC ENSEMBLE

Minimum Credits: 1

Maximum Credits: 1

The ensemble introduces students to Hungarian, Slovak, Romanian, Polish, Ukrainian, Gypsy, and Jewish musical traditions. Through weekly rehearsals, students learn musical styles, improvisation techniques, and performance practices with regard to diverse yet mutually interconnected music genres. Dietrich School students must complete three credits in performance courses to meet the Creative Work General Education Requirement.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Letter Grade

Course Attributes: DSAS Creative Work General Ed. Requirement, Russian & East European Studies

MUSIC 0616 - BLUEGRASS ENSEMBLE

Minimum Credits: 1

Maximum Credits: 1

Bluegrass, a form of American roots music, is an Appalachian-based genre that draws on immigrant traditions, blues, gospel, and folk. Once associated primarily with poorer whites, it has been reclaimed by numerous musicians who have popularized it as a global genre. The popularity of bluegrass in Western Pennsylvania is, in part, a result of the broadening market of audiences and musicians. Pittsburgh's local embrace of bluegrass, however, can be understood, as an integral aspect of the city's refashioning. The Bluegrass Ensemble seeks to augment the University of Pittsburgh world music ensemble program through an emphasis on local music traditions. The ensemble will draw from students

who have some experience with bluegrass instruments, including violin (fiddle), guitar, mandolin, banjo, and dobro. The ensemble will perform as a group on campus and will make connections with the folk music revival scenes in Pittsburgh. Please contact the instructor to discuss what instrument(s) you play and your musical background. Students who have met the requirements for the course will receive a permission number to enroll. Instructor contact information can be found in the class notes.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SNC Elective Basis

MUSIC 0620 - UNIVERSITY ORCHESTRA

Minimum Credits: 1

Maximum Credits: 1

Open to students, faculty, staff, and community musicians. The orchestra performs a wide variety of works from the standard repertoire, along with contemporary compositions. Dietrich School students must complete three credits in performance courses to meet the Creative Work General Education Requirement.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: MUSIC 0620

Course Attributes: DSAS Creative Work General Ed. Requirement

MUSIC 0630 - MARCHING BAND

Minimum Credits: 1

Maximum Credits: 1

The band performs at athletic events and in concert. Membership is by audition. Dietrich School students must complete three credits in performance courses to meet the Creative Work General Education Requirement.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: MUSIC 0630

Course Attributes: DSAS Creative Work General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

MUSIC 0631 - CONCERT BAND

Minimum Credits: 1

Maximum Credits: 1

The concert band prepares and performs music from the band repertoire. Membership is by audition. Dietrich School students must complete three credits in performance courses to meet the Creative Work General Education Requirement.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: MUSIC 0631

Course Attributes: DSAS Creative Work General Ed. Requirement

MUSIC 0640 - JAZZ ENSEMBLE

Minimum Credits: 1

Maximum Credits: 1

Big band jazz performances and rehearsal techniques. Performances include festivals, concerts, and tours. Dietrich

School students must complete three credits in performance courses to meet the Creative Work General Education Requirement.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: MUSIC 0640

Course Attributes: DSAS Creative Work General Ed. Requirement

MUSIC 0660 - AFRICAN DRUMMING ENSEMBLE

Minimum Credits: 1

Maximum Credits: 1

The ensemble focuses on the drumming techniques of selected African society, the ensemble performs in collaboration with the Afro-American dance class and the Oakland dance school, and various local schools. Dietrich School students must complete three credits in performance courses to meet the Creative Work General Education Requirement.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: African Studies, DSAS Creative Work General Ed. Requirement

MUSIC 0661 - THE PITT AFROPOP ENSEMBLE

Minimum Credits: 1

Maximum Credits: 1

In this course, students will learn how to perform and compose popular music styles that originated from or have a cultural connection to Africa. Through performance, the course exposes the interconnections between African music and the music of the African diaspora such as reggae and jazz.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

MUSIC 0672 - CHAMBER MUSIC

Minimum Credits: 1

Maximum Credits: 1

Students may elect chamber music to study any approved repertoire involving more than one instrument or voice. Dietrich School students must complete three credits in performance courses to meet the Creative Work General Education Requirement.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Creative Work General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

MUSIC 0673 - SMALL JAZZ ENSEMBLES

Minimum Credits: 3

Maximum Credits: 3

In this course, students will familiarize themselves with notable standard jazz songs and play them in small ensembles. Students will learn melodies and chord progressions of the assigned songs and improvise on them. In addition, basic jazz theory and performance conventions will be discussed. Furthermore, students are encouraged to write their original compositions. There will be midterm and final juries as well as a public concert at the end of the semester.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Attributes: DSAS Creative Work General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

MUSIC 0690 - UNIVERSITY GAMELAN

Minimum Credits: 1

Maximum Credits: 1

A gamelan is a set of mostly percussive instruments featuring tuned bronze gongs, bronze-keyed instruments, and drums. In the beginning ensemble, students will learn how to perform simple compositions on several instruments as well as the basic organizing principles of javanese traditional music. The advanced ensemble is made up of students invited to join after at least one semester of beginning gamelan. Students in the advanced group will learn more complex instruments and pieces. The ensemble will also perform publically at least once every year. Dietrich School students must complete three credits in performance courses to meet the Creative Work General Education Requirement.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Asian Studies, DSAS Creative Work General Ed. Requirement

MUSIC 0711 - HISTORY OF JAZZ

Minimum Credits: 3

Maximum Credits: 3

The course focuses on the chronological development of jazz from its beginnings on the plantation to its present state as a world concert music. Various styles such as ragtime, blues, gospel, spirituals, rhythm and blues, rock, soul, etc., are examined.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Historical Analysis General Ed. Requirement, DSAS The Arts General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req., SCI Polymathic Contexts: Soc/Behav. GE. Req.

MUSIC 0824 - SPECIAL TOPICS IN ROCK MUSIC

Minimum Credits: 3

Maximum Credits: 3

The social, cultural, and stylistic history of rock and roll music. The class begins with important precedents such as blackface minstrelsy, jazz, and blues. In addition to addressing styles actually sold under the rock marketing label, we will cover genres and styles that were influenced by rock and roll but sold under different labels, such as soul, funk, salsa, disco, and hip-hop. Attention will also be given to global varieties of rock and roll.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

MUSIC 0854 - HEAVY METAL MUSIC

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Attributes: DSAS Diversity General Ed. Requirement, DSAS The Arts General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

MUSIC 0896 - MUSIC AND FILM

Minimum Credits: 3

Maximum Credits: 3

This introductory course, designed for non-majors with no previous background in music or film studies, examines music within the context of film, instructing students how to listen and think critically about the music and its relationship to the moving image and narrative.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Attributes: DSAS The Arts General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

MUSIC 1000 - MUSIC AND FILM 2

Minimum Credits: 3

Maximum Credits: 3

This introductory course, designed for non-majors with no previous background in music or film studies, examines music within the context of film, instructing students how to listen and think critically about the music and its relationship to the moving image and narrative.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: MUSIC 0896

MUSIC 1224 - LATER RENAISSANCE AND BAROQUE MUSIC

Minimum Credits: 3

Maximum Credits: 3

Starting with the new attitudes towards word-tone relationships that can be seen in the music of Josquin, and with the rise of idiomatic instrumental music, the course will trace those trends, among others through the music of such composers as Josquin, Willaert, Rore, Lassus, Monteverdi, Corelli, Vivaldi, Handel, and J.S. Bach.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: Medieval & Renaissance Studies, Undergraduate Research, West European Studies, Writing Intensive Course (WRIT)

MUSIC 1228 - LATE ROMANTIC AND EARLY 20TH CENTURY MUSIC

Minimum Credits: 3

Maximum Credits: 3

This course will begin with the more revolutionary nineteenth-century composers who worked in Paris--Chopin, Berlioz, Liszt--and trace the breakdown of tonality and the emergence of new styles and structural principles in the late nineteenth and twentieth centuries.

Academic Career: Undergraduate

Course Attributes: Russian & East European Studies, Undergraduate Research, West European Studies, Writing Intensive Course (WRIT)

MUSIC 1230 - MUSIC SINCE 1945

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to Western art music created since 1945.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

MUSIC 1242 - MAJOR COMPOSER

Minimum Credits: 3

Maximum Credits: 3

This course examines the life and works of a major figure in Western art music. The content of the course changes, but it emphasizes music in its historical and cultural contexts, as well as individual genres and styles.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: MUSIC 0411

MUSIC 1244 - THE MUSIC OF THE BEATLES

Minimum Credits: 3

Maximum Credits: 3

This course combines a study of the cultural context in which The Beatles worked with a consideration of how the music was created and evolved over time. Topics include the band's formative influences, relationships to contemporary artists, and evolution from live performing band to studio recording artists. Broader contextual themes include the rise of "teenage culture", Beatlemania as a phenomenon most closely associated with young female fans, and the band's relationship to the "youth counterculture".

Academic Career: Undergraduate

Course Attributes: DSAS Historical Analysis General Ed. Requirement, DSAS The Arts General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req., SCI Polymathic Contexts: Soc/Behav. GE. Req., West European Studies

MUSIC 1247 - THE MUSIC OF LED ZEPPELIN

Minimum Credits: 3

Maximum Credits: 3

This course will focus on the life and music of the band Led Zeppelin and the social and cultural conditions of the 1970s. Recipients of a Kennedy Center Honor for "lifetime contributions to American culture through the performing arts," Led Zeppelin is widely considered to be one of the most innovative, successful, and influential bands in the history of rock music. We will consider the band's formative influences; stylistic cross-influences with contemporary artists; and the song-writing and musical styles of individual band members. In this course, the band serves as a lightning rod for analyzing social issues of musical appropriation and race; gender and sexuality; Orientalism; and cultural rights and copyrights. We will pay close attention to the band's repertoire of songs (87 in all), which are

astounding for their variety and innovation. As progenitors of heavy metal, the course will assess the influence of Led Zeppelin during the last fifty years, and their place in the history of rock music. By the end of the semester, students will submit a paper that embraces critical thinking about music from analytical, historical, cultural, and multi-disciplinary perspectives. There are no prerequisites for this course; everyone is welcome. This course does not overlap with other courses in the Department of Music.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

MUSIC 1253 - LISTENING TO LIVE MUSIC PERFORMANCE

Minimum Credits: 3

Maximum Credits: 3

Listening to Live Music Performance is a course that hopes to deepen the way you understand music and, through new understanding, inspire the way you experience music! Over the course of the semester, we will explore, without prejudice, a variety of live music performances that will help you develop a lifelong ability to analyze music performance, think critically about the act of listening to music, and to consider your critical role as a member of the audience. The purpose of this class is to transform your experience with music by focusing on live performance. Music is a ubiquitous part of our everyday lives, so much so that many people have lost the ability to listen critically to what they are hearing. In many contexts, we are not even aware that music is playing until it is brought to our attention! Recorded music accounts for much of this ubiquity and it's also changed many listeners' relationship with music. Throughout the semester, we will explore the experience of listening to live performances of music, which may include large ensembles, chamber ensembles, solo concerts, and multi-media performances. Topics will include protocol and traditions of the audience, criteria for critical listening, and discrimination of basic elements of performance. Students will attend live performances, consider evaluative criteria for music performances, and develop critical listening skills. We will also have opportunities to speak with performers to learn about various ways of experiencing music. We are interested in developing critical skills to experience, analyze, and appreciate the myriad musical styles and contexts you will encounter over a lifetime of listening. To that end, this class is focused totally on the act of critical, experiential listening, how to do it, informed listening, and what it can tell the listener's not only about a piece of music, but about the culture and society that created that music, as well as the challenges faced by the increasing ubiquity of music in our world. You do not need a musical background to have a successful semester. Through listening, reading, and associated assignments, the objective is to deepen your experience of music.

Academic Career: Undergraduate

MUSIC 1271 - THE SOUNDS OF ROMANTIC COMEDY

Minimum Credits: 3

Maximum Credits: 3

Sometime between Ernst Lubitsch's *The Shop Around the Corner* (1940) and Nora Ephron's *You've Got Mail* (1998), romance changed in the United States. Where class and wealth used to be deciding factors for romantic love, there now emerged the concept of the soulmate, who could be anyone. In this course, we will watch American romantic comedies of the last 100 years, paying particular attention to how the development of the soundtrack has changed what love sounds and feels like. Students will develop skills in closely analyzing sound and image in film, critically interpreting popular culture in relation to broader events in society, and thinking about the relation between music, identity, and politics. In particular, we will together develop answers to the following questions: how did capitalism, social justice movements, the changing nature of work, and other cultural transformations affect what people expected from intimate union? What aesthetic norms for representing romance changed alongside cultural norms? How is the narrative of love inflected by race, gender, ethnicity, sexuality, religious difference, ability difference, and/or economic disparity?

MUSIC 1273 - JAZZ AND FILM

Minimum Credits: 3

Maximum Credits: 3

Ralph Ellison, the author of the American classic *Invisible Man*, asserted that all of American life was "jazz-shaped." By this he meant that jazz (and blues) were more than music, that jazz (and blues) had ubiquitously infiltrated American life, and that it served as a model for an expanding pluralist culture. *Jazz and Film* explores this notion in three areas: in representations of jazz culture on film, in the sonic presence of jazz in film, and the influence of jazz on filmmaking. Students will give weekly responses to readings, films, or recordings, and will write a research paper on a topic of their own choosing.

MUSIC 1308 - CULTURAL POLITICS OF SOUL

Minimum Credits: 3
Maximum Credits: 3

This is an introductory level course which examines soul music as a lived cultural practice, an artistic genre, a transnational phenomenon, and an important historical site for the articulation of gender, race and class in both American popular culture and the African diaspora. Special attention is placed on the transitions and parallels of "soul" as a musical genre, with "soul" as a marker of cultural politics and identity. As a musical genre, "soul" was first recognized as the secular reinvention of the Southern, gospel tradition, acting as a soundtrack to the Civil Rights Movement. Once the Black community merged this music with the ideals of Black radical politics, it transformed the popular genre into an urban practice of "Soul Power," which then acted as a soundtrack to the Black Power Movement. Positioning music within a broader context of postcolonial, technological, and transnational development, this course analyzes the rich intersections of music, culture, and politics as it exists in soul music as well as the entire media apparatus, including independent and corporate record labels, African American print media, and radio, television and film, that gave rise to the soul music industry. There are no prerequisites for this course, nor do students need to have any formal training in music or need to know how to read western music notation.

MUSIC 1326 - AFRICAN-AMERICAN MUSIC IN U.S.

Minimum Credits: 3

Maximum Credits: 3

This course is designed to familiarize the student with various phases of African-American music existing in North America; blues, gospel-spirituals, work songs, children's games songs, and classical compositions of ragtime composers Scott Jobin, J.P. Johnson, etc. Students will conduct field projects centered around "street recordings, locations, interviews of local and visiting artists, etc." A detailed study of great Pittsburgh performers present and past will constitute a major portion of this course.

MUSIC 1327 - GLOBAL HIP HOP

Minimum Credits: 3

Maximum Credits: 3

This seminar analyzes how diverse groups of musicians and listeners use hip-hop to express local and transnational claims of belonging through the appropriation of musical genres identified with the West and with African Americans in particular. A closer reading of global hip-hop practices offers insights into the genre's artistic goals and its social profile in a variety of contexts. Through analyses of locally distinct musical expressions, marketing trends within national and global music industries, and state-sponsored policies relating to hip-hop, this course sheds light on hip-hop's role in constituting cultural and political identities among diverse groups of people in the U.S. And abroad.

MUSIC 1328 - CREATIVE ETHNOMUSICOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course introduces a diverse students from the University of Pittsburgh and SCI Fayette to music genres from the world. Drawing on examples from Sub-Saharan Africa, Latin America, Mexico and the Caribbean, this course provides students with the analytical tools with which to better comprehend the intertextual nature of sound. Post/colonial studies, race, and gender studies offer a theoretical lens for analyzing the musical traditions in context. Lectures frame the genres within broader theoretical narratives informed by cultural modes of perception and physical reactions to sound. Giving space to develop and share aesthetic emotions, the course fosters a learning environment in which students work individually and in collaborative groups to create informed projects inspired by aspects of the musical traditions covered in the course.

MUSIC 1360 - ROMANI / GYPSY MUSIC

Minimum Credits: 3

Maximum Credits: 3

Gypsy music has emerged as one of the most popular world music genres in the last two decades. The genre's success on the world stage is closely connected with the Romani (gypsy) minority rights movement, which has strengthened on local, national, and international levels due to increased education opportunities for roam, and more positive representation in the media. The present proliferation and popularization of a great variety of musical styles marketed as 'gypsy' points to the fact that Romani musical expressions draw their musical characteristics from Romani and non-Romani elements. Styles are differentiated according to time, place, and cultural influences with regard to ornamentation, language choice, vocal timbres, and choice of instruments. This course analyzes the musical varieties within genres marketed as 'gypsy' and offers broader political, economic, and historical perspectives on a variety of factors rooted in race, ethnicity, gender, and class relations that have contributed to contemporary understandings of 'gypsy' music

Academic Career: Undergraduate

MUSIC 1366 - HYMNS & HIPHOP: SOUNDS OF ISLAM

Minimum Credits: 3

Maximum Credits: 3

From its inception, the Islamic tradition has placed a heavy emphasis on the word and on listening to the word, and has developed a rich and ambiguous relationship to sound. This course draws on theological, historical, anthropological and theoretical perspectives to investigate the this relationship. We discuss various scholarly approaches to the senses, the relationship between listening and power, and the changing conceptions of what it has meant to listen in Islamic culture. In particular, we discuss how new media technologies and popular culture have transformed sound in Muslim communities, and how the ongoing "war on terror" has refashioned Islamic soundscapes.

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Creative Work General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req., Undergraduate Research

MUSIC 1441 - ELECTRONIC AND COMPUTER MUSIC 1

Minimum Credits: 3

Maximum Credits: 3

This course provides an introduction to composing electronic music. It includes instruction in MIDI and audio sequencing, synthesis, sampling, effects, and other digital audio concepts. Course-work will primarily involve a series of creative projects utilizing a variety of techniques.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Creative Work General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

MUSIC 1442 - ELECTRONIC MUSIC STUDIO

Minimum Credits: 3

Maximum Credits: 3

This is a fast-paced course on the creation of original electronic music in the University of Pittsburgh's Electronic Music Studio. It is intended for students with some prior experience in creating original music. The course will review electronic music basics (audio and MIDI sequencing, effects, synthesis, and sampling) while also introducing advanced and specialized techniques and concepts. Students will primarily be evaluated on a series of creative projects where they will utilize the studio on a weekly basis. Students will also engage in listening discussions of electronic music in both experimental and popular styles and will share their own work and provide peer feedback on a regular basis.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

MUSIC 1450 - MUSIC PRODUCTION AND RECORDING

Minimum Credits: 3

Maximum Credits: 3

This class explores the fundamentals of music recording, audio engineering, studio equipment and studio operations. Topics covered will include microphone techniques and positioning, recording workflow and setup, signal processors such as equalizers, compressors, limiters, and time based effects, basics of digital audio and digital audio editing, and mixing multitrack audio. Throughout the semester, students will record a multitude of instruments in class, learn simple recording, editing, and mixing of multi-track audio, and record and create their own multi-track recordings. Upon successful completion of this course students have introductory knowledge of or be able to: Pro tools multitrack recording software Appropriate use of various types of microphones Identify different frequency ranges and determine the appropriate use of equalization Recognize dynamic range and determine the appropriate uses of dynamic range processors Identify various time-based effects processors and determine their appropriate use Record live vocals, drums, guitars and a range of acoustic instruments Produce and record a multi-track recording Understand signal flow Stereo recording

MUSIC 1726 - MARY LOU WILLIAMS: STUDYING JAZZ, GENDER, AND RACE THROUGH A PITTSBURGH ICON

Minimum Credits: 3

Maximum Credits: 3

Few figures in jazz enjoyed a longer or more dynamic career than Mary Lou Williams. After emerging as a child prodigy in Pittsburgh in the 1920s, Williams became one of the most sought-after arrangers of the swing era and a germinal figure in the bebop movement. Her later work included compositions for chamber and symphonic orchestras, a full mass setting, and even concerts with avant-garde improvisers. At every turn, Williams cultivated a reputation for elegant arrangements, stalwart professionalism, and a fiercely swinging piano style. This course will examine Williams' storied life and work, paying particular attention to the larger contexts relating to jazz and gender in the 20th century. Like many women artists, Williams never wished to be reduced solely to her gender a trend too-frequently embedded in patronizing epithets like "the great female pianist" Our discussions will therefore seek to avoid framing her in overly-reductive ways. We will strive toward a deeper interrogation of how jazz's complex and often fraught discourses surrounding gender impacted Williams' career, as well as those of subsequent generations of artists. The course will explore a wide range of texts (some unrelated to Williams) in order to grapple with such issues. In doing so, we seek

not only to celebrate the legacy of one major jazz composer, but also to think about the cultural landscapes that underlie the construction of such legacies in the first place.

Academic Career: Undergraduate

MUSIC 1731 - JAZZ COMPOSITION AND ARRANGING 1

Minimum Credits: 3

Maximum Credits: 3

This course develops the students' knowledge of the techniques of jazz-rock composition and arranging. The distinctive features of jazz-rock harmony are studied, and students write arrangements for various instrumental combinations.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Creative Work General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

MUSIC 1732 - JAZZ COMPOSITION AND ARRANGING 2

Minimum Credits: 3

Maximum Credits: 3

A continuation of music 1731. The course develops the student's knowledge of the techniques of jazz-rock composition and arranging. The distinctive features of jazz-rock harmony are studied, and students write arrangements for various instrument combinations.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

MUSIC 1741 - JAZZ IMPROVISATION 1

Minimum Credits: 3

Maximum Credits: 3

This course provides an analysis of the techniques of jazz-rock-pop improvisation. Students develop a repertoire of current standards and compose and analyze pieces in several styles.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Creative Work General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

MUSIC 1742 - JAZZ IMPROVISATION 2

Minimum Credits: 3

Maximum Credits: 3

A continuation of music 1741. The course provides an analysis of the techniques of jazz-rock-pop improvisation. Students develop a repertoire of current standards and compose and analyze pieces in several styles.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

MUSIC 1743 - CREATIVE ARTS PRACTICE AND ENSEMBLE

Minimum Credits: 3

Maximum Credits: 3

Creative Arts Practice and Ensemble is an exploratory performing and research multi-arts ensemble. In this course we will explore collaboration between music and expressive arts, including poetry, dance/movement, visual art and/or video. Artists whose primary practice includes video/film, visual art, poetry/prose and skilled musicians of diverse stylistic backgrounds are welcome. While the possibilities of multidisciplinary art are endless, this class will focus on works that explore social justice as a focus, and where music is a prioritized expression, i.e. music and video, music and poetry, music and dance, music and visual art, etc.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

MUSIC 1900 - MUSIC INTERNSHIP

Minimum Credits: 1

Maximum Credits: 3

The music internship provides majors with opportunities to develop skills in music-related professions. Students are responsible for finding an appropriate internship that is approved by a faculty member in music who agrees to oversee the student's work. May be taken for 1-3 credits, based on University guidelines relating to internship requirements. A maximum of 3 credits may be applied toward a music major.

Academic Career: Undergraduate

Course Component: Internship

Grade Component: Letter Grade

MUSIC 1901 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 3

Independent study is elected by students who are making significant use of university resources in an independent project not related to any regularly offered course. The project is often off campus, but with some guidance from sponsoring faculty member(s).

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: LG/SNC Elective Basis

MUSIC 1903 - SPECIAL TOPICS-DIRECTED RESEARCH

Minimum Credits: 1

Maximum Credits: 3

This course consists of an individual project, exploring a topic not currently covered by any course offering. The student plans and carries out a research project in conjunction with a supervising faculty member.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SNC Elective Basis

MUSIC 1904 - SENIOR SEMINAR

Minimum Credits: 3

Maximum Credits: 3

The seminar is required of students wishing to earn a major in music. The topic of the seminar changes, but participants are expected to produce a major research project or other approved project displaying the ability to work independently at an advanced level.

Academic Career: Undergraduate

National Preparedness and Homeland Security

NPHS 1510 - FEDERAL AND INTERNATIONAL FRAMEWORK FOR EMERGENCY PREPAREDNESS

Minimum Credits: 3

Maximum Credits: 3

NPHS 1510 covers overarching frameworks for the federal government's planning and response to crises. These

include the National Response Framework (NRF) and the National Incident Management Systems (NIMS), which establishes the Incident Command System (ICS) and the Emergency Support Functions (ESFs). Because the federal government is the interface with foreign governments for events with transnational elements, international aspects of crisis management and the international context for threat assessment are covered in this course.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Letter Grade

NPHS 1520 - STATE AND LOCAL FRAMEWORK FOR EMERGENCY PREPAREDNESS

Minimum Credits: 3

Maximum Credits: 3

All response to crisis begins locally. NPHS 1520 presents ways in which states, regions and localities have implemented response planning for their jurisdictions. It also explores boundaries between federal and state law, and how, for example, decisions are made for evacuation versus sheltering in place. Case studies and models for drafting response plans will be offered and rehearsed, as well as templates for planning and allocation of resources.

Academic Career: Undergraduate

NPHS 1530 - ANALYSIS, INTELLIGENCE AND DECISION TOOLS FOR EMERGENCY PREPAREDNESS

Minimum Credits: 3

Maximum Credits: 3

Efforts to professionalize the emergency management workforce include familiarizing the next generation with modern decision support software and analytical tools now used in planning and responding to crises. These include discrete- and agent-based simulation, geographical information systems, pattern recognition, virtual reality and predictive modeling tools. This course will offer introductory experience with these tools in realistic crisis scenarios. NPHS 1530 also will explore realities that are changing the delivery of emergency services to a model based on distributed versus centralized operations.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Letter Grade

NPHS 1540 - CAPSTONE COURSE IN EMERGENCY PREPAREDNESS

Minimum Credits: 3

Maximum Credits: 3

Along the lines of workshops conducted by the Defense Advanced Research Projects Agency (DARPA), the capstone course is dedicated to exploring a variety of solutions to a single, complex, interdisciplinary problem - a "wicked" problem - in emergency management. "Wicked" problems are complex problems for which there is an unlimited number of potential solutions, but choosing among them is difficult because they have huge impacts and there are no immediate or ultimate tests of their worth - they are neither true nor false but good or bad. The "wicked" problem considered in NPHS 1540 may change from term to term to meet emerging demands or class composition.

Grade Component: Letter Grade

Course Requirements: PREQ/CREQ: (NPHS 1510 or 1520 or 1530); PLAN: National Prep & Homeland Secur (CERT-1)

NPBS 1900 - INTERNSHIP

Minimum Credits: 3

Maximum Credits: 3

Students registered for NPBS 1900 pursue an internship involving work related to national preparedness and emergency management. Students are responsible for securing internships and a faculty member to sponsor the internship. Students should produce academic work in conjunction with their internship, which the faculty sponsor will evaluate and grade. Faculty permission is required prior to enrollment. Consult an advisor for further information.

Academic Career: Undergraduate

Course Component: Internship

Grade Component: Satisfactory/No Credit

Course Requirements: PLAN: National Prep & Homeland Secur (CERT-1)

NPBS 1901 - INDEPENDENT STUDY

Minimum Credits: 3

Maximum Credits: 3

Students registered for NPBS 1901 pursue research on a project related to national preparedness and emergency management under the direction of a faculty member. Students develop a study plan with the faculty member, typically working independently on a paper or report, with occasional meetings. Faculty permission is required prior to enrollment. Consult an advisor for further information.

Course Requirements: PLAN: National Prep & Homeland Secur (CERT-1)

Neurobiology

MSNBIO 2627 - THE NEXT THREE YEARS: HOW TO DEVELOP YOUR OWN RESEARCH PROGRAM

Minimum Credits: 3

Maximum Credits: 3

The goal of this course is to help students learn how to identify important scientific questions, the art of generating a testable hypothesis, how to design experiments that test their hypothesis, and the interpretation of potential outcomes of the proposed experiments. We will also provide students with a complete understanding of the NIH grant writing and review process. These goals will be accomplished via different, integrated mechanisms. The course begins with a discussion of the grant review process and a viewing of an NIH-produced video that reenacts an actual study section review panel. Students will then participate in a mock study section review of successful and unsuccessful NIH applications. For this exercise the students will be given one week to read and write reviews of two F31 applications. The students will then present their reviews as they would in a real study section, discuss their reviews and score their applications. For the remainder of the course, students use the format of the NIH F31 application to develop a research plan that will guide the next three years of their graduate work. Please note that while students will be generating written documents, the focus of this course is on the concepts, ideas and strategies for designing a successful research program, not on sentence and paragraph structure that are also an essential component of scientific writing. The course will conclude with a study section-style review of the student's completed applications.

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Neuroscience

NROSCI 0080 - BRAIN AND BEHAVIOR

Minimum Credits: 3

Maximum Credits: 3

This course analyzes the relations between brain function and overt behaviors. Topics include: the control of movement, sensory processing, mechanisms controlling sleep, arousal, and other circadian rhythms, hunger and thirst, learning and memory, the biological bases of neuropsychiatric disorders, and the functioning of the cerebral hemispheres. Many clinical disorders will be discussed including language disorders, amnesia, epilepsy, depression, anxiety, schizophrenia, and Alzheimers disease.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req., SCI Polymathic Contexts: Science Seq.GE. Req.

NROSCI 0081 - DRUGS AND BEHAVIOR

Minimum Credits: 3

Maximum Credits: 3

This course provides a general background in the fields of neuroscience and psychopharmacology. The course examines the behavioral effects and biological mechanisms of action of the major groups of psychoactive compounds, including stimulants, depressants, narcotics, and hallucinogens. Drugs used in the treatment of common psychiatric neurological disorders, such as schizophrenia, depression, and Parkinson's disease, will also be discussed.

Academic Career: Undergraduate

NROSCI 0083 - UHC BRAIN AND BEHAVIOR

Minimum Credits: 4

Maximum Credits: 4

This course examines the function of the mammalian nervous system. Specific topics include sensation, movement, sleep and wakefulness, hunger, thirst, and various neurological and psychiatric disorders. One class meeting per week will discuss some of the original research articles presented in the general lectures. This course has no prerequisites, although BIOSC 0150 or its equivalent is recommended.

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req., University Honors Course

NROSCI 1000 - INTRO TO NEUROSCIENCE

Minimum Credits: 3

Maximum Credits: 3

This course highlights the intellectual challenges and excitement of what many see as the last great frontier of biological science, neuroscience. The 24 lectures are grouped into four blocks: Block I, Introduction to neuroanatomy and cellular neurophysiology; Block II, Sensory systems; Block III, Motor systems; and Block IV, The complex brain functions and diseases. We begin Part I by introducing the structure and function of individual neurons, how they communicate chemically, and how these building blocks are arranged to form a nervous system. In Block II, we go

inside the brain to examine the structure and function of the systems that serve the senses such as touch, pain, visual, auditory, and chemical. In Block III, we discuss the structure and function of the motor systems that command voluntary movements. Finally, in Block IV, we explore the neurobiology of human behavior and diseases, including language, emotion, addiction, and various neurological and psychiatric disorders.

NROSCI 1004 - NEUROBIOLOGY OF LEARNING LABORATORY

Minimum Credits: 3

Maximum Credits: 3

The Neurobiology of Learning Laboratory will provide a discovery-based neuroscience laboratory course within which students will use an invertebrate animal model organism to develop hypotheses regarding the neurobiological basis of learning, and then test these hypotheses using modern laboratory techniques (electrophysiology, genetic screening, molecular biology, behavioral testing, confocal imaging, and/or live cell imaging). This laboratory course is intended to not only provide a framework to teach these valuable neuroscience techniques, but also develop critical thinking skills, hypothesis testing skills, and an understanding and appreciation of the evolutionary basis for the neuroscience of learning. This course fulfills a requirement for a writing intensive course in the neuroscience major.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

Course Requirements: PREQ: NROSCI 1000 (MIN GRADE C), ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006)

Course Attributes: Learning Sciences

NROSCI 1011 - FUNCTIONAL NEUROANATOMY

Minimum Credits: 3

Maximum Credits: 3

This course deals with human neuroanatomy and covers the basic structure of the central nervous system from spinal cord to cerebral cortex. Emphasis is placed on major systems and subsystems within the brain, and on their functional significance. The basic structure and morphology of nerve cells will be covered.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: NROSCI 1000 or 1003; MIN GRADE: 'B-' for listed courses; PLAN: Neuroscience (BS or MN)

NROSCI 1012 - NEUROPHYSIOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course examines the functioning of neurons and synapses, the basic units responsible for fast communication within the nervous system. The course focuses on the elegant use of electrical mechanisms by the nervous system, and on the powerful quantitative approach to scientific investigation that is fundamental to neurophysiology. Topics include: principles of electric current flow exploited by the nervous system; the basis of the resting potential of neurons; the structure and function of voltage-gated and neurotransmitter-gated ion channels; the generation and propagation of action potentials; the physiology of fast synaptic communication.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: [NROSCI 1000 (MIN GRADE 'B-') or NROSCI 1003 (MIN GRADE 'B-')] and (CHEM 0120 or 0720 or 0770 or 0960 or 0102 or 0112) and (PHYS 0110 and 0111 or 0174 and 0175) and MATH 0220; PLAN: Neuroscience (BS or MN)

NROSCI 1013 - FUNCTIONAL NEUROANATOMY (UHC)

Minimum Credits: 4

Maximum Credits: 4

This is an honors course that deals with issues of how we can understand the function of the human brain through the study of neurological diseases. The manifestations of selected neurological diseases are presented and discussed in the context of how they can be analyzed and understood through application of the findings from basic research in neuroscience.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: NROSCI 1000 or 1003; Min Grade 'B'; Minimum GPA requirement of 3.25

NROSCI 1014 - SPEAKING OF SCIENCE

Minimum Credits: 3

Maximum Credits: 3

Students will learn strategies for giving presentations about science to both a scientific audience and a public audience. Topics covered will include 1) how to engage our audience, 2) the art of breaking down your message, 3) tips to make clear, interesting slides, and 4) pointers on presentation style. All audiences want to learn interesting new scientific information, and have it delivered as a good story in an understandable manner by a personable, easy to approach person. Communication skills, including knowing your audience and why they are interested in the information you are speaking about, how to translate scientific jargon into understandable concepts for the public, and how to keep the audience engaged will be discussed. Pointers will be given on answering questions, being conversational, and

conveying the "big picture". Students will give a number of presentations in this course and learn to receive and give feedback effectively.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: NROSCI 1000 or Permission of the Instructor

Course Attributes: University Honors Course

NROSCI 1017 - SYNAPTIC TRANSMISSION

Minimum Credits: 3

Maximum Credits: 3

This course examines the mechanisms by which neurotransmitters are synthesized and released and the biochemistry of synaptic responses. Basic physiological, biochemical, and morphological characteristics of neuronal transmission will be discussed. An emphasis will be placed on the experimental approaches used to examine these processes.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: NROSCI 1000 or 1003; MIN GRADE 'B-' for Listed Courses

NROSCI 1018 - FHC NEUROPHYSIOLOGY

Minimum Credits: 4

Maximum Credits: 4

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PHYS 0111/(0175 UHC), MATH 0220, NROSCI 1000/(1003 UHC) a "B-" or better ("C" will not do) must be earned in NROSCI 1000/1003 in order to enroll in subsequent Neuroscience core courses or advanced electives. MIN CUM GPA: 3.25

Course Attributes: David C. Frederick Honors College Course

NROSCI 1026 - FOUNDATIONS OF CLINICAL NEUROPHYSIOLOGY

Minimum Credits: 3

Maximum Credits: 3

This is a three credit advanced elective course that will cover the fundamental and basic principles used in the practice of clinical neurophysiology with the goal of providing an overview of both basic science and clinical topics relevant to performing intraoperative neurophysiological monitoring in a surgical setting. Topics will include anatomy and physiology of the motor and sensory systems and the theoretical basis of electroencephalography, sensory and motor evoked potentials, electromyography, transcranial Doppler and compound action potentials. Students will be able to explain the practical applications of these techniques in the diagnosis of nervous system disorders and in the continuous monitoring of the integrity of the human nervous system during surgical procedures.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: NROSCI 1000 (MIN GRADE: 'B-') or 1003 (MIN GRADE: 'B-') and (NROSCI 1011 or 1013) and (NROSCI 1012 or 1018); PLAN: Neuroscience (BS or MN)

NROSCI 1027 - NEUROSCIENCE PROSEMINAR

Minimum Credits: 2

Maximum Credits: 2

Program graduate students, postdoctoral fellows, and faculty will present an overview of their respective research topics and discussion of current research articles on that topic. Critical analysis of experiments and research is emphasized.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: NROSCI 1000 or 1003; MIN GRADE: 'B-' for listed courses; PLAN: Neuroscience (BS or MN)

Course Attributes: Capstone Course

NROSCI 1028 - SIGNALING PATHWAYS IN SYNAPTIC PLASTICITY

Minimum Credits: 3

Maximum Credits: 3

This class focuses on signaling mechanisms, which underlie long-term synaptic plasticity. It will address the molecular pathways, which regulate thresholds for synaptic plasticity, the synaptic machinery for induction and expression of long-term synaptic plasticity and how it is converted to structural changes of the neural network, which might underlie the consolidation of memory. The presentations will be guided by experimental approaches, which have influenced the conceptual framework.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Neuroscience (BS or MN); PREQ: NROSCI 1000 or 1003 (MIN GRADE: B- for listed courses)

NROSCI 1030 - PSYCHTRC DISORDERS AND BRAIN FUNCTION

Minimum Credits: 3

Maximum Credits: 3

This course examines the neurobiological basis of psychiatric disturbances (including schizophrenia, depression, Parkinson's disease, and Huntingtons chorea). The initial portion presents an overview of basic neuropharmacology, with an emphasis on recent findings of relevance to psychiatric disorders. The major portion consists of lectures on the anatomical, physiological, and neurochemical bases for specific psychiatric disturbances, and the mechanism of action of therapeutic drugs used in their treatment. A strong neuroscience background is required.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: [NROSCI 1000 (MIN GRADE 'B-') or NROSCI 1003 (MIN GRADE 'B-')] and NROSCI 1011 or NROSCI 1013; PLAN: Neuroscience (BS or MN)

NROSCI 1032 - FUNCTIONAL ORGANIZATION OF THE HUMAN NERVOUS SYSTEM

Minimum Credits: 3

Maximum Credits: 3

The intent of this course is to examine the biological basis of neurological dysfunction and to use this information to gain further insight into the functional organization of the human nervous system. A disease oriented approach will be used to illustrate localization of function. Well known clinical cases will define the functional consequences of disease or damage to regions of the brain and current information on the mechanisms underlying the disease process or physical damage will be used to provide further insight into the functional alterations that contribute to the deficit.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: NROSCI 1000 (MIN GRADE: 'B-') or 1003 (MIN GRADE: 'B-') and NROSCI 1011 or NROSCI 1013; PLAN: Neuroscience (BS or MN)

NROSCI 1033 - NEURAL BASIS OF VISION

Minimum Credits: 3

Maximum Credits: 3

This course examines the neural basis of visual perception and action. It is divided into four units. The first unit covers methods for studying visual perception and its neural basis and discusses the neural hardware that underlies our ability to see. The second unit covers object recognition, cognitive factors that influence visual perception, and how the way we are planning to use visual information affects the way it is encoded in the brain. Unit three focuses on perceptual decision-making and using visual motion as a model system. We will also touch on some data analysis methods for using psychophysical and neuronal data to figure out how we make decisions based on visual information. The fourth unit will focus on perception of color and depth and on how visual perception develops after birth. Throughout the course, we will focus on what neural mechanisms can tell us about how we perceive the visual world and on how we can design experiments to better understand the relationship between neural mechanisms and perception.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (NROSCI 1000 or NROSCI 1003 (MIN GRADE 'B-')) and NROSCI 1011 or 1013; PLAN: Neuroscience (BS or MN)

NROSCI 1034 - NEURAL BASIS OF COGNITION

Minimum Credits: 3

Maximum Credits: 3

This advanced elective is designed for students interested in learning about the neural basis of higher order cognitive functions, with an emphasis on cortical mechanisms. Topics will include: occipitotemporal mechanisms of visual perception; parietal mechanisms of spatial attention and vision for action; premotor mechanisms of action planning and movement execution; prefrontal mechanisms of working memory and behavioral control; hippocampal mechanisms of episodic memory; multimodal integration and cognitive effort.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: NROSCI 1000 or 1003 (Min Grad 'B-'); PROG: School of Arts & Sciences; PLAN: Neuroscience (BS or MN)

NROSCI 1036 - NEUROBIOLOGY OF AGING

Minimum Credits: 3

Maximum Credits: 3

This course examines age-related changes in neurobiological systems, including motor, sensory, cognitive, and neuroendocrine. Emphasis will be placed on distinguishing biochemical, molecular, physiological, and behavioral changes associated with normal aging versus changes associated with pathologic conditions such as Alzheimer's disease. Introductory lectures will discuss different theories of aging, how aging is studied in the laboratory, and how these relate specifically to neuroscience.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: [NROSCI 1000 (MIN GRADE 'B-') or NROSCI 1003 (MIN GRADE 'B-')] and NROSCI 1011 or NROSCI 1013; PLAN: Neuroscience (BS or MN)

NROSCI 1038 - RESEARCH IN BEHAVIORAL NEUROSCIENCE

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

NROSCI 1039 - PROCESSING IN NEURAL CIRCUITS

Minimum Credits: 3

Maximum Credits: 3

Sensory information flows from the periphery through different stages of processing in the central nervous system, to the thalamus and cerebral cortex. Within the cerebral cortex, feedforward processing is strongly modulated by top-down "feedback", with impacts on perception and decision making. The computations performed by individual neurons and networks of neurons within each region transform incoming information to produce an output that is projected to other targets in the brain. This course explores the local circuit mechanisms underlying the representation and refinement of sensory information at successive stages of the feedforward processing pathways. We will focus on the formation of receptive field properties within individual neurons, including contributions of feedforward circuitry and interactions between neurons within local circuits, and on how populations of neurons work together to encode information. An important theme of the course will also be to learn about current methodology in systems neuroscience research to study and perturb circuits. Descriptions of such experiments will be incorporated into lectures, and we will also read several primary research articles relevant to the major themes of the course.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: NROSCI 1000

NROSCI 1040 - BIOLOGICAL BASIS OF LEARNING AND MEMORY

Minimum Credits: 3

Maximum Credits: 3

This course is designed to provide an overview on the neural basis of simple learned behavior like classical conditioning. Topics covered include experimental results obtained by anatomical, electrophysiological and biochemical techniques. Emphasis will be placed on research undertaken in invertebrate and vertebrate models, as well as in isolated mammalian preparations.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: NROSCI 1000 (MIN GRADE: 'B-') or 1003 (MIN GRADE: 'B-') and (NROSCI 1012 or 1018) and NROSCI 1017; PLAN: Neuroscience (BS or MN)

NROSCI 1041 - DEVELOPMENTAL NEUROSCIENCE

Minimum Credits: 3

Maximum Credits: 3

This course is designed to provide an overview of issues that govern the developmental assembly of a complex nervous system. Topics covered include formation of neural tube and neural crest, birth and proliferation of neurons, cell migration, neuronal differentiation, molecular control of neural development, synapse formation, neuron-target

interactions, and synaptic plasticity. These topics will be discussed in the context of experimental results obtained by anatomical, biochemical and electrophysiological techniques using vertebrate and invertebrate animals.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: NROSCI 1000 or 1003; MIN GRADE: 'B-' for listed courses; PLAN: Neuroscience (BS or MN)

NROSCI 1042 - NEUROCHEMICAL BASIS OF BEHAVIOR

Minimum Credits: 3

Maximum Credits: 3

Neurochemistry is the study of the many chemicals - neurotransmitters, neuromodulators, hormones, and more - that influence the brain and nervous system. This class will focus on understanding the role of various neurochemicals in normal (and some abnormal) behavior, from behaviors that seem simple - like eating and sleeping - to complex cognition and social behavior. After an initial unit on neurochemical structure, classification, and signaling pathways, we will segue into topics including sleep and circadian rhythms; sex and social status; reward pathways and addiction; and decision-making. We will also examine the neurochemical basis of selected psychiatric disorders.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: NROSCI 1000 or 1003 (MIN GRADE: 'B-'); PLAN: Neuroscience (BS or MN)

Course Attributes: Hourly Final

NROSCI 1043 - NEURAL PLASTICITY

Minimum Credits: 3

Maximum Credits: 3

This class is designed to establish conceptual and technical foundations for students who are interested in plasticity-associated neuroscience. Whereas the class will go through major findings in the plasticity field, the emphasis will be placed on why these findings are important, how these findings were made, and what challenges/debates these findings trigger.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: NROSCI 1000 (MIN GRADE: 'B-') or 1003 (MIN GRADE: 'B-'); PLAN: Neuroscience (BS or MN)

NROSCI 1044 - WHY DO NEURONS FIRE? A MATHEMATICAL INTRODUCTION

Minimum Credits: 3

Maximum Credits: 3

This course introduces advanced undergraduates to a selection of key ideas and mathematical models in theoretical neuroscience through an essential question: why do neurons fire action potentials? It aims to give students a foundation for understanding current theoretical methods in the field. It will include discussions of the Hodgkin-Huxley model, the efficient coding hypothesis, and neural network models. Students are not expected to enter the course with an extensive mathematical and programming background, rather the tools needed will be taught through each of the topics. This course is designed to provide the mathematical background for the Introduction to Computational Neuroscience (NROSCI 1046) but it can be taken on its own or afterwards.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

NROSCI 1045 - TOPICS IN NEUROSCIENCE

Minimum Credits: 1

Maximum Credits: 6

Flexible subject matter oriented to special topics of interest to the faculty.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (NROSCI 1000 or 1003); MIN GRAD: 'B-' for all listed Courses; PROG: School of Arts and Sciences

NROSCI 1046 - INTRODUCTION TO COMPUTATIONAL NEUROSCIENCE

Minimum Credits: 3

Maximum Credits: 3

Computational neuroscience applies theoretical and numerical techniques to understand brain functions and neural coding. In this course, students will learn how to simulate and analyze model neurons and networks of neurons, and how simple neuronal networks perform computations. Students will also learn how to analyze spike train data and decode information from neural responses. We will have hands-on MATLAB practice sessions throughout the course. By the end of the course, students will be familiar with the mathematical formulations to study neural coding and network dynamics, and acquire programming skills in MATLAB. Knowledge of linear algebra, probability and differential equations is recommended, but not required.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: NROSCI 1000 (MIN GRADE: 'B-') or 1003 (MIN GRADE: 'B-'); PLAN: Neuroscience (BS or MN)

Course Attributes: Capstone Course

NROSCI 1049 - RESEARCH TOPICS IN NEUROSCIENCE

Minimum Credits: 1

Maximum Credits: 1

This course is required for all newly declared majors. This course will provide students with an overview of research conducted by neuroscience faculty and familiarize students with potential research topics.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Letter Grade

Course Requirements: PREQ: NROSCI 1000 or 1003; MIN GRADE: 'B-' for listed courses; PLAN: Neuroscience (BS); LEVEL: SOPHMORE, JUNIOR, SENIOR

NROSCI 1051 - FOUNDATIONS OF THEORETICAL NEUROSCIENCE

Minimum Credits: 3

Maximum Credits: 3

This course introduces advanced undergraduates to a selection of key ideas and mathematical models in theoretical neuroscience. It aims to give students a foundation for understanding current theoretical methods in the field. It will include discussions of the Hodgkin-Huxley model, neural network models, and the efficient coding hypothesis. While each topic could fill a course in its own right, we will focus in on specific questions relating to each topic. Students are not expected to enter the course with an extensive mathematical and programming background, rather the tools needed will be taught through each of the topics. That said, this course will be rigorous and intensive so students should come with a strong interest in learning these mathematical tools.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: NROSCI 1000 or 1003 with a minimum grade of B-; MATH 0220 (or equivalent) with a minimum grade of B-.

NROSCI 1053 - RESTORATIVE NEUROSCIENCE

Minimum Credits: 3

Maximum Credits: 3

Restorative neuroscience investigates and develops the biological principles that repair or regenerate the nervous system. This course will provide an overview of the biological process involved in the endogenous repair response following injury to the peripheral and central nervous system. It will further detail therapeutic approaches, such as growth factors, gene therapy, cell therapy, exosomes, and rehabilitation. The student will learn the scientific background to this topic, as well as how to design experiments to address specific research questions and evaluate therapeutic efficacy.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: NROSCI 1000 or 1003 with a grade of B-

NROSCI 1070 - HUMAN PHYSIOLOGY-FHC

Minimum Credits: 4

Maximum Credits: 4

In this course we will examine the signaling, cellular processes, and feedback loops of physiological systems in the human body that maintain homeostasis. Compensatory pathways and mechanisms to maintain homeostatic control will be investigated. Research related to the functioning of these systems will be emphasized throughout the course.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (BIOSC 0160 or 0180 or 0191 or 0716 or BIOENG 1071 or 1072 or BIOL 0102 or 0120) and [CHEM 0102 or 0120 or 0720 or 0770 or 0970 or (CHEM 0112 and 0114)]; MIN GRADE 'C' for all listed courses

Course Attributes: David C. Frederick Honors College Course

NROSCI 1097 - UNDERGRADUATE TEACHING EXPERIENCE

Minimum Credits: 1

Maximum Credits: 2

This course is intended for neuroscience majors who wish to assist faculty in the teaching of a NROSCI core course or a NROSCI advanced elective. Students and faculty meet regularly to discuss the important topics for each week and effective teaching techniques.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: LG/SNC Elective Basis

NROSCI 1111 - FUNCTIONAL NEUROANATOMY HONORS PRACTICE

Minimum Credits: 2

Maximum Credits: 2

This is an honors course that supplements NROSCI 1011 by using several approaches to study the functional

organization of the nervous system. Examples of such approaches are studying human and animal brain material and discussing important original papers in neuroanatomy.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: NROSCI 1000 or NROSCI 1003 (BOTH MIN GRADE 'B-'); PLAN: Neuroscience (BS or MN)

Course Attributes: University Honors Course

NROSCI 1112 - FUNCTIONAL NEUROANATOMY HONORS PRACTICUM

Minimum Credits: 3

Maximum Credits: 3

This honors course supplements the material in the companion lecture course, NROSCI 1011, in two ways. In the initial laboratory portion of the course, human and animal brain tissue will be examined to provide students a first-hand knowledge of the structures that make up the brain and spinal cord. Subsequently, major journal articles that were key in establishing the scientific principles discussed in NROSCI 1011 will be reviewed. This portion of the course will allow students to gain insights into the methods that neuroscientists use to learn about the nervous system. This is a three credit course and will count as an advance elective for majors.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: NROSCI 1000 or 1003; Min Grade 'B-'; COREQ: NROSCI 1011 or 1013; PLAN: Neuroscience (BS or MN)

NROSCI 1117 - FHC SYNAPTIC TRANSMISSION

Minimum Credits: 4

Maximum Credits: 4

This FHC course examines the mechanisms by which neurotransmitters are synthesized and released and the biochemistry of synaptic responses. Basic physiological, biochemical, and morphological characteristics of neuronal transmission will be discussed. An emphasis will be placed on the experimental approaches used to examine these processes.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: NROSCI 1000

Course Attributes: David C. Frederick Honors College Course

NROSCI 1140 - BIO BASIS OF LEARNING AND MEMORY-UHC

Minimum Credits: 4

Maximum Credits: 4

This course is designed to provide an overview on the neural basis of simple learned behavior like classical conditioning. Topics covered include experimental results obtained by anatomical, electrophysiological and biochemical techniques. Emphasis will be placed on research undertaken in invertebrate and vertebrate models, as well as in isolated mammalian preparations.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (NROSCI 1000 or NROSCI 1003 (BOTH MIN GRADE 'B-')) and (NROSCI 1012 or 1018) and NROSCI 1017; PLAN: Neuroscience (BS or MN); Cumulative Grade Point Average 3.25 or better

NROSCI 1200 - NEUROPHARMACOLOGY OF ADDICTION

Minimum Credits: 3

Maximum Credits: 3

This course is designed to provide an overview of the biological basis of addiction and the neuropharmacology of drugs of abuse and dependence, including basic principles of drug action as well as comprehensive coverage of the major classes of drugs (opioids, stimulants, nicotine, alcohol, sedatives, cannabis, hallucinogens). Students will study mechanisms of action, effects, pharmacokinetics as well as tolerance and dependence for each of these drugs/drug classes. The reasons for addiction including biological, genetic, cultural and other determinants will be discussed. Students will learn about laboratory-based methods used in addiction research, common pharmacotherapies used to manage alcohol and drug addiction, and consider public health issues associated with addiction.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: NROSCI 1000 or 1003; MIN GRADE 'B-' for all listed courses

NROSCI 1250 - HUMAN PHYSIOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course will consider the function of various physiological systems in the human body, such as cardiovascular, respiratory, gastrointestinal, urinary, and reproductive. Each system discussed will be integrated into the larger function of homeostasis in health, disease or during challenges, such as stress and exercise.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (BIOSC 0160 or 0716 or 0191 or 0180 or BIOENG 1071 or BIOENG 1072 or BIOL 0102 or 0120) and [(CHEM 0120 or 0720 or 0770 or 0970 or 0102 or (0112 and 0114)]; Min Grade 'C' for all courses listed

NROSCI 1410 - TRANSLATING SCIENCE

Minimum Credits: 3

Maximum Credits: 3

Students will work in creative teams of 2-3 students/team to develop creative new outreach tools for communication of science to the public (new lectures, videos, films, activities). At the beginning of the semester, didactic lectures will cover background information about how to effectively communicate scientific information, how to break down a message, production of effective engaging slides, animations and videos, and the use of hands-on activities to engage the audience. Guest speakers with expertise in film, video and use of museum exhibits will be included. Students will then choose a topic area they wish to create an outreach lecture/video/etc. In, and with the assistance of dr. Cameron will choose a scientific advisor with specific expertise on the topic for which an outreach tool will be developed. Students will do background reading for the development of their outreach tool and have discussions with their advisor. If developing a lecture, students will develop a set of PowerPoint slides for the lecture, the lecture text with background references, and hands-on activities to complement the lecture for both a junior high and high school version of the lecture. They will present the lecture to one of the grade levels for which it was designed. For other activities, the activity will be developed along with background information regarding the use of the activity. The activity will be presented to a public group.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: NROSCI 1000 or NROSCI 1003 (BOTH MIN GRADE 'B-') and NROSCI 1014; PLAN: Neuroscience (BS or MN)

NROSCI 1800 - NEUROSCIENCE/WRITING PRACTICUM

Minimum Credits: 1

Maximum Credits: 1

This course is restricted to neuroscience majors & minors and fulfills the writing requirement for the major. It includes extra emphasis on and credit for instruction in proper writing for the discipline of neuroscience using topics from an appropriate co-requisite neuroscience course taken in the same term.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: LG/SNC Elective Basis

Course Requirements: ENG 0102 or ENGCMP (0002,0006,0020,0200,0203,0205,0207,0208,0210 or 0212) or 0213 or 0214 or ENGFLM 0210 or FP (0003, 0006); NROSCI 1014, 1028, 1030, 1032, 1033, 1034, 1036, 1038, 1039, 1041, 1040, 1042, 1043, 1046, 1112, 1140, 1200 or 1027; NROSCI (BS or MN)

Course Attributes: Writing Intensive Course (WRIT)

NROSCI 1801 - NEUROSCIENCE/WRITING PRACTICUM

Minimum Credits: 1

Maximum Credits: 1

This course is restricted to neuroscience majors & minors and fulfills the writing requirement for the major. It includes extra emphasis on and credit for instruction in proper writing for the discipline of neuroscience using topics from an appropriate co-requisite neuroscience course taken in the same term.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: LG/SNC Elective Basis

Course Requirements: ENG 0102 or ENGCMP (0002,0006, 0020,0200,0203,0205,0207,0208, 0210 or 0212) or 0213 or 0214 or ENGFLM 0210 or FP (0003,0006); NROSCI 1014, 1028,1030,1032,1034,1140, 1036, 1038, 1039, 1041, 1046, 1112, 1040,1043,1042,1200 or 1027; PLAN: NROSCI (BS or MN)

Course Attributes: Capstone Course, Writing Intensive Course (WRIT)

NROSCI 1900 - INTERNSHIP EXPERIENCE

Minimum Credits: 1

Maximum Credits: 3

Students may earn 1-3 credits for approved, supervised field experiences related to neuroscience. A faculty sponsor must agree to provide and review academic assignments related to the practical experience.

Academic Career: Undergraduate

Course Component: Internship

Grade Component: LG/SNC Elective Basis

Course Attributes: Undergraduate Internship

NROSCI 1901 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 6

This course involves student participation in neuroscience research supervised by a faculty member of the department of neuroscience or some other department in which neuroscience research is performed. This course is particularly valuable for students interested in graduate study of neuroscience.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: LG/SNC Elective Basis

Course Attributes: Capstone Course

NROSCI 1903 - INTERNSHIP CAPSTONE

Minimum Credits: 3

Maximum Credits: 6

Students may earn 1-3 credits for approved, supervised field experiences related to neuroscience. A faculty sponsor must agree to provide and review academic assignments related to the practical experience.

Academic Career: Undergraduate

Course Component: Internship

Grade Component: Letter Grade

Course Attributes: Undergraduate Internship

NROSCI 1961 - THESIS RESEARCH

Minimum Credits: 1

Maximum Credits: 6

This course involves independent neuroscience research leading to the preparation and defense of a written thesis. This course involves student participation in neuroscience research supervised by a faculty member of the department of neuroscience or some other department in which neuroscience research is performed.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: LG/SNC Elective Basis

Course Attributes: Capstone Course

NROSCI 1962 - THESIS RESEARCH/WRITING

Minimum Credits: 1

Maximum Credits: 1

This course involves writing a thesis based on independent neuroscience research that is supervised by a faculty member of the department of neuroscience or some other department in which neuroscience research is performed.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Letter Grade

Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: Capstone Course, Writing Intensive Course (WRIT)

NROSCI 2014 - SPEAKING OF SCIENCE

Minimum Credits: 3

Maximum Credits: 3

Fulfills neuroscience advanced elective requirement. You will learn strategies for giving presentations about science to both a scientific audience and a public audience. Topics covered will include (1) how to engage your audience, (2) the art of breaking down your message, (3) tips for how to make clear, interesting slides, and (4) pointers on presentation style. All audiences want to learn interesting new scientific information, and have it delivered as a good story in an understandable manner by a personable, easy to approach person. You want to emphasize your message, stay focused, and convey the importance of your message while being interesting, maintaining the attention of the audience and making the learning process enjoyable. Guest speakers will provide background information about various uses of scientific information in the public domain. Communication skills, including knowing your audience and why they are interested in the information you are speaking about, how to translate scientific jargon into understandable concepts for the public, and how to keep the audience engaged will be discussed. Pointers will be given on answering questions, being conversational, and conveying the "big picture". Students will give a number of presentations in this course and learn to receive and give feedback effectively.

Academic Career: GRAD

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Neuroscience (PhD) or Neurobiology (PhD)

NROSCI 2410 - TRANSLATING SCIENCE

Minimum Credits: 3

Maximum Credits: 3

Students will work in creative teams of 2-3 students/team to develop creative new outreach tools for communication of science to the public (new lectures, laboratories, videos, films, activities). At the beginning of the semester, didactic lectures will cover background information about how to effectively communicate scientific information, how to break down a message, production of effective, engaging slides, animations and videos, and the use of hands-on activities to engage the audience. Guest speakers with expertise in film, video and use of museum exhibits will be included.

Students will then choose a topic area they wish to create an outreach lecture/video/etc. In, and with the assistance of dr. Cameron you will choose a scientific advisor with specific expertise on the topic you will develop an outreach tool for. Students will do background reading for the development of their outreach tool and have discussions with their advisor. If developing a lecture, students will develop a set of PowerPoint slides for the lecture, the lecture text with background references, and hands-on activities to complement the lecture for both a junior high and a high school version of the lecture. They will present the lecture at one of the grade levels it was designed for. For other activities, the activity will be developed along with background information regarding the use of the activity. The activity will be presented to a public group.

Academic Career: GRAD

Nurse Midwife

NURNM 3508 - NURSE MIDWIFE GLOBAL AND COMMUNITY HEALTH

Minimum Credits: 1

Maximum Credits: 1

This course is concerned with the role of nurse midwives in population-based health. Public health, epidemiologic, ethical and legal issues applicable to women, newborns, and childbearing families in diverse settings at local, national and international levels will be emphasized.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NURNM 3509; PLAN: Nurse Midwife (NURSMW-DNP)

Nurse Specialty Role

NURSP 2061 - ORGANIZTNL & MANAGEMENT THEORY

Minimum Credits: 3

Maximum Credits: 3

This graduate level course focuses on organizational, leadership, and management theories and how they apply to health service organizations, both today and in the future. Emphasis will be placed on leading the clinical discipline of nursing based on organizational and systems thinking as well as relevant political and cultural perspectives. Quality and performance improvement strategies, as well as creating and sustaining appropriate levels of change, are explored in order to facilitate the ability to create safe and effective care delivery environments.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Nursing students only.

NURSP 2062 - ORGANIZATIONAL AND SYSTEMS MANAGEMENT FOR HEALTHCARE LEADERS

Minimum Credits: 2

Maximum Credits: 2

This graduate level course focuses on organizational, leadership and management theories and how they apply to health service organizations, both today and in the future. Emphasis will be placed on leading the clinical discipline of nursing based on organizational and systems thinking as well as relevant global political and cultural perspectives. Quality and performance improvement strategies, as well as creating and sustaining appropriate levels of change, are explored in order to facilitate the ability to create safe and effective care delivery environments.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

NURSP 2092 - LEADERSHIP DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the application of leadership theory and the development of critical leadership skills necessary for success in today's health care environment. The course is based on five essential competencies for nursing leadership: professionalism, business skills and principles, knowledge of the health care environment, communication and relationship management, and transformational leadership.

Academic Career: GRAD

Course Component: Lecture

Grade Component: Grad LGSNC

Course Requirements: School of Nursing students only.

NURSP 2093 - EDUCATION AND MENTORING IN THE CLINICAL SETTING

Minimum Credits: 3

Maximum Credits: 3

This course is designed to develop a theoretical, practical, and evidence-based foundation for graduate students in the education of clients/patient/families, nurse colleagues, and other health care providers. Students will broaden their knowledge base in the dynamics of human behavior, values clarification, educational psychology, and motivation which are fundamental to behavior change and sustaining that change (transformation). Content includes principles of andragogy and pedagogy, analysis of learning styles, replete with instruments and a contemporary model focusing upon behavior change of employees, mentoring, the role and function of preceptors, coaching and feedback skills and application of a competency model will be emphasized. The AACN competencies and curricular expectations for clinical nurse leader education and practice (October 2013) will serve as the overall framework for the course.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Nursing students only.

NURSP 2099 - FINANCIAL, BUSINESS, AND ECONOMICS DRIVERS IN HEALTHCARE MANAGEMENT

Minimum Credits: 2

Maximum Credits: 2

This course is designed to familiarize clinical leaders with the basic concepts of business, economics, and financial management in health care organizations. Students will learn key financial terms; the relevance of health care finances in today's environment; the ability to develop and monitor budgets for practice initiatives; and the business and financial acumen needed to evaluate and design effective practice changes. The course utilizes financial and clinical data to allow clinical leaders to learn how to effectively balance the administrative and clinical needs of today's health care environment.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Nursing

NUR 0001 - FIRST YEAR SEMINAR

Minimum Credits: 1

Maximum Credits: 1

This course is designed to provide beginning nursing students with an overview of the nursing profession and an introduction to the school of nursing. The purpose of the course is to facilitate the students' adjustment to the University environment and to acquaint them with the skills and resources available to promote success.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: H/S/U Basis

Course Requirements: School of Nursing students only.

NUR 0002 - NURSING ANATOMY AND PHYSIOLOGY LABORATORY 1

Minimum Credits: 1

Maximum Credits: 1

This laboratory course is designed to provide students with hands-on experience related to the anatomy and physiology of the human body. Laboratory sessions complement the lecture component of NUR 0012. Laboratory instruction emphasizes structure and how it relates to function and the maintenance of homeostasis in the whole body.

Academic Career: Undergraduate

Course Component: Clinical

Grade Component: Letter Grade

Course Requirements: CREQ: NUR 0012

NUR 0003 - NURSING ANATOMY AND PHYSIOLOGY LABORATORY 2

Minimum Credits: 1

Maximum Credits: 1

This laboratory course is designed to provide students with hands-on experience related to the anatomy and physiology of the human body. Laboratory sessions complement the lecture component of NUR 0013. Laboratory instruction emphasizes structure and how it relates to function and the maintenance of homeostasis in the whole body.

Academic Career: Undergraduate

Course Component: Clinical

Grade Component: Letter Grade

Course Requirements: CREQ: NUR 0013

NUR 0005 - HONORS FRESHMAN SEMINAR

Minimum Credits: 1

Maximum Credits: 1

Using a flexible format, this course is designed to provide beginning nursing students with an overview of the David C. Frederick Honors College and the honors track within the school of nursing. The purpose of this course is to facilitate the students' exposure to the David C. Frederick Honors College environment, and to acquaint them with the opportunities and resources that are available to promote success in the honors track in the school of nursing.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: H/S/U Basis

NUR 0012 - HUMAN ANATOMY AND PHYSIOLOGY 1

Minimum Credits: 3

Maximum Credits: 3

This course is designed to present students with a basic foundation in normal human anatomy and physiology. Topics covered are: cell physiology, histology, integumentary, skeletal, muscular, nervous and sensory systems. Emphasis is on the interaction of structure and function and the mechanisms which maintain homeostasis in the human body.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

NUR 0013 - HUMAN ANATOMY AND PHYSIOLOGY 2

Minimum Credits: 3

Maximum Credits: 3

This course is designed to present students with a basic foundation in normal human anatomy and physiology. Body systems covered include: endocrine, cardiovascular, respiratory, digestive, urinary, reproductive, and embryological development. Emphasis is on the interaction of structure and function and the mechanisms which maintain homeostasis in the human body.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: CREQ: NUR 0012

NUR 0020 - PATHOPHYSIOLOGIC FOUNDATIONS OF NURSING CARE

Minimum Credits: 4

Maximum Credits: 4

This course will examine mechanisms that produce disease and injury, the ways in which the body responds to these mechanisms, and the clinical manifestations produced by the body's response.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: NUR 0013

NUR 0031 - MICROBIOLOGY

Minimum Credits: 3

Maximum Credits: 3

This lecture course will introduce students to the basic properties of bacteria, archaea, eukaryotic microorganisms and viruses, with an emphasis on bacteria. The diversity within the microbial world will be emphasized, as well as their relevance to the health and diseases of humans. Approaches for controlling the growth of microbes in the environment

and for preventing the spread of infectious diseases will also be discussed. In addition, students will also become familiar with host-microorganism interactions and host-immune responses.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

NUR 0032 - MICROBIOLOGY LABORATORY

Minimum Credits: 1

Maximum Credits: 1

This laboratory course will provide students with hands-on experience in terms of the techniques used to detect, grow, isolate and identify microorganisms.

Academic Career: Undergraduate

Course Component: Clinical

Grade Component: Letter Grade

Course Requirements: COREQ: NUR 0031

NUR 0051 - INTRODUCTION TO PROFESSIONAL NURSING

Minimum Credits: 3

Maximum Credits: 3

This course provides a broad overview and synthesis of the issues and trends most relevant to the practice of professional nursing. Historical, contemporary and potential influences on professional nursing practice are reviewed. An emphasis on the unique and varied roles of nurses in today's interdisciplinary health care environment are examined within the context of individual, family, community, and global health. Characteristics and major changes in health care delivery systems (federal, state, and local) are discussed. Components of professional nursing values and core practice competencies are presented. The concept of an evidence-based approach to clinical practice is introduced. Critical thinking strategies are introduced in the context of the nursing process.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: School of Nursing students only.

NUR 0053 - INTRODUCTION TO INCLUSION, EQUITY, AND DIVERSITY IN HEALTH CARE

Minimum Credits: 1

Maximum Credits: 1

The purpose of this course is to increase understanding of how health care relates to the concepts of inclusion, equity and diversity domestically and globally. It will provide an overview of how these concepts influence the health of individuals and populations, and our role in applying them. We will define diversity in its broadest meaning but focus on exploring local communities looking at diversity in culture, race, ethnicity, gender, ability, socioeconomics, sexual orientation, and immigration. During this exploration, community strengths and capacity to promote positive change will be presented. The goals of this course are to increase our value of and advocacy for inclusion, equity and diversity in health care. Learning activities will support skill development to interact productively with a variety of individuals and groups. Key components of this course are direct engagement with diverse individuals, self-reflection, and community-engaged learning.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: H/S/U Basis

Course Requirements: PLAN: Nursing - BSN

NUR 0066 - NUTRITION FOR CLINICAL PRACTICE

Minimum Credits: 3

Maximum Credits: 3

This course focuses on nutrition for clinical practice for nurses. Food for energy and the major nutrients are considered for the promotion of health and for medical nutrition therapy for selected disruptions of health. Emphasis is placed on nutrition assessment and interventions in relation to the goals of the current healthy people document and dietary guidelines for Americans.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

NUR 0067 - NURSING RESEARCH: AN INTRODUCTION TO CRITICAL APPRAISAL AND EVIDENCE-BASED PRACTICE

Minimum Credits: 3

Maximum Credits: 3

This course is designed to provide the opportunity for students to become consumers of research and to provide the basis for evidence-based practice and the provision of culturally-congruent care. Students gain an understanding of research processes to the development of nursing knowledge and the contributions of research to evidence based practice. Students are expected to critically appraise research articles, to identify useful, valid research that can be applied to nursing practice.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: COREQ: NUR 0020 or NUR 0081

NUR 0080 - FOUNDATIONS OF NURSING PRACTICE 1

Minimum Credits: 3.5

Maximum Credits: 3.5

This course focuses on the concepts of communication, therapeutic intervention, and decision-making as they relate to the nursing process. Techniques of assessment of the physical, psychological, and developmental dimensions of the individual are explored through a variety of learning strategies. Variations of expected findings based on influences such as age, social condition, and culture are discussed. Emphasis is placed on the therapeutic interventions of safety, hygiene and comfort, health assessment and health promotion.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: School of Nursing students only.

NUR 0080C - FOUNDATIONS OF NURSING PRACTICE 1 CLINICAL

Minimum Credits: 1.5

Maximum Credits: 1.5

This course is designed to provide clinical experiences related to the theory provided in Foundations of Nursing Practice 1. Techniques used in the assessment of the physical, psychological and development dimensions of the individual within an acute care setting are demonstrated. Variations of findings based on influences such as age and culture are identified. Emphasis is placed on the therapeutic interventions of safety, hygiene and comfort, health assessment and health promotion.

Academic Career: Undergraduate

Course Component: Clinical

Grade Component: H/S/U Basis
Course Requirements: CREQ: NUR 0080

NUR 0081 - FOUNDATIONS OF NURSING PRACTICE 2

Minimum Credits: 2

Maximum Credits: 2

This course builds on the fundamental skills learned in NUR 0080. The focus is on direct practice and correct manipulation of equipment during the performance of psychomotor skills. During laboratory sessions, students will have the opportunity to practice simulated clinical skills. The nursing process and clinical reasoning will serve as the framework for decision-making during skill performance. Through active laboratory participation, the student will demonstrate self-direction as a learner.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: NUR 0080 and 0020; CREQ: NUR 0087

NUR 0082 - NURSING MANAGEMENT OF ADULT WITH ACUTE/CHRONIC HEALTH PROBLEMS

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the nursing care of adults, including older adults, with acute and/or chronic illnesses. Students will be guided in critical thinking exercises and the use of therapeutic interventions and research findings in the management of adults. Nursing process, critical thinking, and decision-making serve as the framework for acquisition of knowledge for the management of patients. Societal and cultural influences will be emphasized.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: NUR 0020 and NUR 0080; CREQ: NUR 0081 and (NUR 0082C or NUR 0092) and NUR 0087

NUR 0082C - NURSING MANAGEMENT OF ADULT WITH ACUTE/CHRONIC HEALTH PROBLEMS CLINICAL

Minimum Credits: 4

Maximum Credits: 4

This course focuses on the nursing care of adults, including older adults, with acute and/or chronic illnesses. Students will be guided in critical thinking exercises and the use of therapeutic interventions and research findings in the management of adults with acute and/or chronic illnesses. During clinic, students will have the opportunity to practice clinical skills learned in the lab. Nursing process, critical thinking, and decision-making serve as the framework for acquisition of clinical psychomotor skills. Common concepts of care will be emphasized, including societal and cultural influences.

Academic Career: Undergraduate

Course Component: Clinical

Grade Component: H/S/U Basis

Course Requirements: CREQ: NUR 0082

NUR 0086 - NURSING INFORMATICS

Minimum Credits: 2

Maximum Credits: 2

This course focuses on concepts relevant to the practice of nursing informatics. The course emphasizes information technology applications and the principles of nursing informatics from a current and historical perspective. Learners will examine the analysis of healthcare data and its transformation to nursing knowledge. Nursing language concepts and their importance in clinical information system development will be identified. Learners will examine information technologies that manage clinical information and support patient care. Social and ethical issues in the context of clinical information systems will be examined. The impact of evolving/emerging information technologies on healthcare provider and consumer roles will be discussed.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: School of Nursing; CREQ: NUR 0080 OR NUR 0081

NUR 0087 - PHARMACOLOGY AND THERAPEUTICS ACROSS THE LIFESPAN

Minimum Credits: 3

Maximum Credits: 3

This course provides an introduction to pharmacology that integrates the concepts of physiology, pathophysiology, chemistry, and nursing fundamentals to build a foundation for administering drug therapy to patients. Using a simple to complex approach, key content areas are presented to help conceptualize the important components related to pharmacology. The basic concepts of pharmacology, such as drug testing and approval, pharmacokinetics and pharmacodynamics, pharmacotherapeutics and toxic effects, dosage calculations, and challenges related to drug therapy, provide the foundation from which drug therapy associated with specific body systems can be addressed. Discussion of the major drug groups focuses on therapeutic actions and indications, mechanism of action, pharmacokinetics, contraindications and precautions, adverse effects, clinically important drug-drug interactions and nursing implications which emphasize the nursing process and focus on patient care and education. Prototypes of the major drug groups are emphasized. Lifespan considerations, evidence for best practice, patient safety, and critical thinking are integrated throughout the course.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: CREQ: NUR 0020

NUR 0088 - INTRODUCTION TO BASIC STATISTICS FOR EVIDENCE-BASED PRACTICE

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to descriptive statistics and parametric and nonparametric statistical tests that are commonly used by researchers in the health sciences and appear in published research reports. Emphasis is placed on student mastery of concepts and principles that are fundamental to descriptive and inferential statistics, as well as interpretation and critical appraisal of their use in research studies. Opportunities are provided to manipulate data, perform basic statistical tests, and summarize findings in tabular, graphical, and narrative form.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: School of Nursing students only.

NUR 0090 - FOUNDATIONS OF NURSING PRACTICE 1 CLINICAL

Minimum Credits: 1

Maximum Credits: 1

This course is designed to provide clinical experiences related to the theory provided in Foundations of Nursing Practice 1. Techniques used in the assessment of the physical, psychological and development dimensions of the individual within an acute care setting are demonstrated. Variations of findings based on influences such as age and culture are identified. Emphasis is placed on the therapeutic interventions of safety, hygiene and comfort, health assessment and health promotion.

Academic Career: Undergraduate

Course Component: Clinical

Grade Component: H/S/U Basis

Course Requirements: CREQ: NUR 0080; PLAN: Nursing (BSN)

NUR 0092 - NURSING MANAGEMENT OF ADULT WITH ACUTE/CHRONIC HEALTH PROBLEMS CLINICAL

Minimum Credits: 3.5

Maximum Credits: 3.5

This course focuses on the nursing care of adults, including older adults, with acute and/or chronic illnesses. Students will be guided in critical thinking exercises and the use of therapeutic interventions and research findings in the management of adults with acute and/or chronic illnesses. During clinic, students will have the opportunity to practice clinical skills learned in the lab. Nursing process, critical thinking, and decision-making serve as the framework for acquisition of clinical psychomotor skills. Common concepts of care will be emphasized, including societal and cultural influences.

Academic Career: Undergraduate

Course Component: Clinical

Grade Component: H/S/U Basis

Course Requirements: CREQ: NUR 0082; PLAN: Nursing (BSN)

NUR 1012 - HEALTH POLICY AND HUMAN FLOURISHING

Minimum Credits: 3

Maximum Credits: 3

The nation is facing a health crisis. For the first time since the early 20th century, we are experiencing a reduction in life expectancy overall and especially in vulnerable communities. Moreover, Americans face even broader and more existential threats to personal and community health as evidenced by growing rates of loneliness, depression, social isolation, civic unrest, and polarization. The government has an important role to play in promoting a health of the nation through development of public policy that promotes conditions that make health possible. In this class, we explore different conceptions of health and work to develop a capacious definition of health as "human flourishing" that incorporates threats to personal and community health beyond the physical and psychological. We then discuss ways in which the government in combination with rich civil society might promote human flourishing. We conclude the course exploring challenges and opportunities facing American liberal democracy in promoting human flourishing.

NUR 1014 - HAPPINESS AND HUMAN FLOURISHING

Minimum Credits: 3

Maximum Credits: 3

Aristotle wrote that "Happiness is the meaning and purpose of life, the whole aim and end of human existence." The modern west, however, is facing a happiness crisis. We are experiencing historic levels of depression, anxiety, and lack of meaning. Cultures around the world and throughout history have had a lot to say about the nature of happiness. In

this interdisciplinary class, we explore different conceptions of happiness and work to develop a capacious definition of happiness as "human flourishing." We then turn our attention to the pre-conditions necessary to promote human flourishing and survey how various disciplines might be oriented toward the flourishing person. We conclude the course by reflecting on the course material to help students reflect on their own lives and how they might construct flourishing lives in college and beyond.

Course Requirements: NOT PROG: Engineering (PENGR or UENGR)

NUR 1020 - ADVANCED NURSING MANAGEMENT OF THE ADULT WITH ACUTE/COMPLEX HEALTH PROBLEMS CLINICAL

Minimum Credits: 2

Maximum Credits: 2

This clinical course focuses on the nursing care of adults with acute and complex illnesses in a hospital setting. Emphasis is placed on using the nursing process to assist students with the development of priority nursing goals and in applying critical thinking skills to patient care. The clinical nursing responsibilities include interpretation of diagnostic studies, medical/surgical patient management, evaluation of outcomes, health promotion, and support for individuals and families experiencing acute and complex health problems. This course includes application of cultural diversity awareness training to the nursing process. Clinical learning is focused on developing and refining the knowledge and skills to manage patient care as part of inter-professional teams. Clinical experiences are offered in acute care, critical care, and monitored units.

Academic Career: Undergraduate

Course Component: Clinical

Grade Component: H/S/U Basis

Course Requirements: CREQ: NUR 1120; PLAN: Nursing (BSN)

NUR 1020C - ADVANCED NURSING MANAGEMENT OF THE ADULT WITH ACUTE/COMPLEX HEALTH PROBLEMS CLINICAL

Minimum Credits: 2

Maximum Credits: 2

This clinical course focuses on the nursing care of adults with acute and complex illnesses in a hospital setting. Students will prepare for a 1 day per week clinical experience by gathering key information on their assigned patient. Emphasis is placed on using the nursing process, the clinical judgement model, and critical thinking skills to assist students with the development of a comprehensive, holistic plan of care for their assigned patient. During the clinical experience, students will have the opportunity to build on skills learned in the lab and in previous clinical courses. The clinical nursing responsibilities include performing a complete patient assessment, interpretation of assessment findings and diagnostic studies, medical/surgical patient management, evaluation of outcomes, health promotion, patient teaching, discharge planning, and support for individuals and families experiencing acute and complex health problems. Clinical learning is focused on developing and refining the knowledge and skills to manage patient care as part of inter-professional teams. Clinical experiences are offered in acute care, progressive care, and cardiac monitored units.

Academic Career: Undergraduate

Course Component: Clinical

Grade Component: H/S/U Basis

NUR 1021C - ADVANCED CLINICAL PROBLEM SOLVING CLINICAL

Minimum Credits: 2

Maximum Credits: 2

This course focuses on the management of the adult who experiences an acute or complex illness with an alteration in multiple body systems. The students' ability to apply the nursing process, using critical thinking skills, is expanded through clinical activities. Collaboration with interdisciplinary health professionals in health promotion and restoration is fostered.

Academic Career: Undergraduate

Course Component: Clinical

Grade Component: H/S/U Basis

Course Requirements: CREQ: NUR 1121

NUR 1034 - PHARMACOLOGY WITH NURSING APPLICATIONS ACROSS THE LIFE SPAN

Minimum Credits: 3

Maximum Credits: 3

This course provides an introduction to pharmacology that integrates the concepts of physiology, pathophysiology, chemistry, and nursing fundamentals to build a foundation for administering drug therapy to patients. Using a simple to complex approach, key content areas are presented to help conceptualize the important components related to pharmacology. The basic concepts of pharmacology, such as drug testing and approval, pharmacokinetics and pharmacodynamics, pharmacotherapeutics and toxic effects, dosage calculations, and challenges related to drug therapy, provide the foundation from which drug therapy associated with specific body systems can be addressed. Discussion of the major drug groups focuses on therapeutic actions and indications, mechanism of action, pharmacokinetics, contraindications and precautions, adverse effects, clinically important drug-drug interactions and nursing implications, which emphasize the nursing process and focus on patient care and education. Prototypes of the major drug groups are emphasized. Lifespan considerations, evidence for best practice, patient safety, and critical thinking are integrated throughout the course. Nursing applications will be made using a case study approach.

Academic Career: Undergraduate

NUR 1042 - NURSING CARE OF CHILDREN AND THEIR FAMILIES CLINICAL

Minimum Credits: 2

Maximum Credits: 2

This course focuses on nursing practice for restoration and maintenance of health in children in various stages of development within their families and the broader social contexts in which children grow and develop. Nursing approaches used in the clinical setting are based on the use of best evidence, developmental perspectives, and cultural competence. The nursing process is applied to the child and family to minimize the effects of stressors which have resulted in a disruption of health. There is an emphasis on critical thinking and decision making as the student applies theory to nursing care.

Academic Career: Undergraduate

NUR 1050 - NURSING CARE OF MOTHERS, NEWBORNS AND FAMILIES

Minimum Credits: 2.5

Maximum Credits: 2.5

This course provides an introduction to the process of childbirth and the dynamics of the childbearing family. It explores the areas of health promotion, physiologic changes associated with pregnancy, high risk conditions associated with pregnancy and the development of the fetus and newborn. Emphasis is on adaptation to the biopsychosocial needs of the childbearing family with sensitivity to the cultural needs and ethical issues of a diverse population. Critical

thinking, problem solving, stress adaptation, role, family and nursing theories provide a major focus for understanding childbearing.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: NUR 0066 and 0082 and NUR 0087

NUR 1050C - NURSING CARE OF MOTHERS, NEWBORNS AND FAMILIES CLINICAL

Minimum Credits: 2.5

Maximum Credits: 2.5

This course provides an introduction to the process of childbirth and the dynamics of the childbearing family. It explores the areas of health promotion, physiologic changes associated with pregnancy, high risk conditions associated with pregnancy and the development of the fetus and newborn. Emphasis is on adaptation to the biopsychosocial needs of the childbearing family with sensitivity to the cultural needs and ethical issues of a diverse population. Critical thinking, problem solving, stress adaptation, role, family and nursing theories provide a major focus for understanding childbearing. Clinical experiences reflect a diversity of settings including outpatient, inpatient, and community programs that provide services to the childbearing family.

NUR 1054 - NURSING CARE OF OLDER ADULTS

Minimum Credits: 2

Maximum Credits: 2

This course is designed to ensure competency in providing evidence-based nursing care to older adults and their families, across a continuum of health care settings. Attention is given to the complex interaction of acute and chronic co-morbid conditions, interdisciplinary collaboration, the recognition of risk factors, valid and reliable health assessment, and individualized and evidence-based care for older adults across a continuum of health care settings. The influence of attitudes, age, gender, race, culture, religion, language, lifestyle, technology, and health care policy on the biological, psychological, and social functioning of older adults is considered.

NUR 1060 - NURSING CARE OF CLIENTS WITH PSYCHIATRIC MENTAL HEALTH PROBLEMS

Minimum Credits: 2.5

Maximum Credits: 2.5

This course is designed to teach basic psychiatric mental health nursing concepts and their application to clinical practice. Classroom learning is focused on developmental, psychological, and biological theories in order to enhance understanding of psychiatric illness. Major psychiatric illnesses throughout the lifespan as well as contemporary

methods of treatment are addressed. Emphasis is placed on understanding the unique contributions of social and cultural factors to mental health.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: NUR 0066 and NUR 0082 and NUR 0087; CREQ: NUR 1120

NUR 1060C - NURSING CARE OF CLIENTS WITH PSYCHIATRIC MENTAL HEALTH PROBLEMS CLINICAL

Minimum Credits: 2.5

Maximum Credits: 2.5

This course focuses on nursing practice of health promotion and restoration in individuals with mental health problems. Application of theoretical concepts and nursing interventions is the focus of the clinical experience in acute, chronic, and community mental health settings. Emphasis is placed on understanding the unique contributions of social and cultural factors in the development of treatment plans for clients experiencing psychiatric problems.

Academic Career: Undergraduate

Course Component: Clinical

Grade Component: H/S/U Basis

Course Requirements: CREQ: NUR 1060

NUR 1061 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 3

An independent study is a student-initiated experience planned to permit students to pursue an area of interest in nursing with guidance of a faculty preceptor.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: LG/SU3 Elective Basis

NUR 1066 - NURSING CARE OF CLIENTS WITH PSYCHIATRIC MENTAL HEALTH PROBLEMS CLINICAL

Minimum Credits: 2

Maximum Credits: 2

This course focuses on nursing practice of health promotion and restoration in individuals with mental health problems. Application of theoretical concepts and nursing interventions is the focus of the clinical experience in acute, chronic, and community mental health settings. Emphasis is placed on understanding the unique contributions of social and cultural factors in the development of treatment plans for clients experiencing psychiatric problems.

Course Component: Clinical

Grade Component: H/S/U Basis

NUR 1068 - TRANSITION FOR CO-MANAGEMENT OF GROUPS OF PATIENTS CLINICAL

Minimum Credits: 2

Maximum Credits: 2

This course is designed to facilitate the transition for co-management of groups of patients through the preceptorship with registered nurses in a variety of settings. Students synthesize knowledge about the professional nursing roles and

increase their responsibility and accountability for the nursing care of individuals, families, and aggregates as members of the interprofessional healthcare team.

Academic Career: Undergraduate

Course Component: Clinical

Grade Component: Letter Grade

NUR 1074 - PROFESSIONAL DEVELOPMENT AND PRACTICUM 1

Minimum Credits: 3

Maximum Credits: 3

This course enables the registered nurse student to further develop critical thinking, leadership abilities, communication and decision-making skills in the development and implementation of an evidence-based clinical capstone project to enhance patient care quality. A systematic approach is used to identify a clinical topic for evidence-based literature review, presentation, and evaluation. Each student identifies specific learning activities for the practicum, which relate directly to a selected culturally diverse environment. Under the guidance of faculty and a clinical preceptor, didactic seminars, assignments, and mentored clinical practicum are used to foster independence and self-direction for all students.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: Letter Grade

Course Requirements: PREQ: NUR 0067 or 2000 or 2001

NUR 1077 - SCHOOL NURSE SEMINAR

Minimum Credits: 3

Maximum Credits: 3

This course is designed to prepare the professional nurse for certification as a school nurse in Pennsylvania; both the theory component (NUR 1077) and the practicum (NUR 1078) are required for eligibility. The role of the school nurse is explored through the historical, legal, ethical, research and practice perspectives. The biological, physical, developmental, behavioral, cultural and psychosocial needs of children of all ages in the school setting are examined. Throughout the course, current evidence related to school nursing and Pennsylvania educational requirements is applied to the health needs of school age children, including those with special health and learning needs, the culturally diverse and English language learners (ell's). The independent and collaborative aspects of the school nurse role are explored.

Academic Career: Undergraduate

NUR 1078 - SCHOOL NURSE PRACTICUM

Minimum Credits: 3

Maximum Credits: 3

This course is designed to prepare the professional nurse for certification as a school nurse in Pennsylvania; both the theory component (NUR 1077) and this practicum (NUR 1078) are required for eligibility. This course provides the required 100 hours of clinical practicum experience in elementary, middle and high school settings. The nursing care of children requiring acute, chronic and episodic care is performed under the guidance of an experienced school nurse. Throughout the course, the application of the nursing process and evidence-based approaches are employed when providing nursing services to school age children. Interdisciplinary care and management for school age children with special health and learning needs, including the culturally diverse and English language learners (ELL's) is emphasized. The independent and collaborative aspects of the school nurse role are explored within the school setting.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: Letter Grade

Course Requirements: CREQ: NUR 1077; PROG: School of Nursing

NUR 1079 - PROFESSIONAL DEVELOPMENT AND PRACTICUM 2

Minimum Credits: 3

Maximum Credits: 3

This course enables the registered nurse student to further develop oral and written communication, critical thinking, and leadership skills through the presentation, implementation, and evaluation of an evidence-based clinical practice process during the clinical practicum. Under the guidance of faculty and a clinical preceptor, didactic seminars, assignments, and mentored clinical practicum are used to foster leadership skills, independence and self-direction with a clinical project for all students.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: Letter Grade

Course Requirements: PROG: School of Nursing

NUR 1081 - NURSING MANAGEMENT OF ACUTE AND CHRONIC ILLNESS IN ADULTS

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the nursing care of adults, including older adults, with acute and/or chronic illnesses. Students will be guided in clinical judgment exercises and the use of therapeutic interventions and research findings in the management of adults with acute and/or chronic illnesses. Nursing process, clinical judgment, and decision-making serve as the framework for acquisition of knowledge for the management of patients. Social determinants of health and interprofessional collaboration and teamwork will be emphasized.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

NUR 1085 - ETHICS IN NURSING AND HEALTH CARE

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to the domain of clinical ethics as a foundation for developing ethical expertise in nursing practice. The course focuses on contemporary nursing and health care issues that raise personal and professional ethical concerns. Emphasis is placed on cultural differences, current legislation, political and religious controversy, economic constraints, and professional commitment related to the resolution of the identified ethical dilemmas. The process of ethical analysis and reasoning is used to resolve representative patient and health care situations.

Grade Component: H/S/U Basis

NUR 1095 - COMMUNITY CONNECTOR COURSE

Minimum Credits: 2

Maximum Credits: 2

This course is especially well-suited for students from SHRS, PHARM, NUR and School of Social Work. This seminar focuses on the patient population which is a high risk population who are vulnerable to frequent readmissions to the hospital. Emphasis will be placed on: 1) understanding this patient population, the health system and health behavior challenges associated with this population, and systematic needs associated with reducing their health care needs 2) The course will include presentations by researchers, clinicians, and healthcare industry experts. Students will need to be available for approximately 6, out-of-classroom activities during the semester. This course will expose students to the patient population through visits with clinicians at the hospital, home, and community, including in-home assessments, patient education sessions, and behavior change (motivational interviewing) techniques. Students may be paired with a nurse, speech language pathologist, occupational therapist, or physical therapist during one of these activities. Each out-of-classroom visit often requires a 4-hour block of time.

Academic Career: Undergraduate

NUR 1120 - ADVANCED NURSING MANAGEMENT ADULT ACUTE/COMPLEX HEALTH PROBLEMS

Minimum Credits: 2.5

Maximum Credits: 2.5

This course focuses on the patient centered nursing care of adults experiencing acute and complex illnesses. Emphasis is placed on the prioritization and decision making processes of nursing care and the nursing responsibilities associated with translating, integrating and applying medical/surgical management, evaluation of outcomes, health promotion, and support for individuals and families experiencing acute and complex health problems. This course will also discuss the increasing diversity of this nation's population as expressed through age, racial, ethnic, gender, cultural, spiritual and sexual orientation. Discussions will occur with the effect of socio-economic differences and how it may affect the patient's overall health care. Discussion of interdisciplinary collaboration healthcare professional is emphasized.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: NUR 0066 and NUR 0067 and NUR 0082 and NUR 0087

NUR 1120C - ADVANCED NURSING MANAGEMENT OF THE ADULT WITH ACUTE/COMPLEX HEALTH PROBLEMS CLINICAL

Minimum Credits: 2.5

Maximum Credits: 2.5

This clinical course focuses on the nursing care of adults with acute and complex illnesses in a hospital setting. Emphasis is placed on using the nursing process to assist students with the development of priority nursing goals and in applying critical thinking skills to patient care. The clinical nursing responsibilities include interpretation of diagnostic studies, medical/surgical patient management, evaluation of outcomes, health promotion, and support for individuals and families experiencing acute and complex health problems. This course includes application of cultural diversity awareness training to the nursing process. Clinical learning is focused on developing and refining the knowledge and skills to manage patient care as part of inter-professional teams. Clinical experiences are offered in acute care, critical care, and monitored units.

Academic Career: Undergraduate

Course Component: Clinical

Grade Component: H/S/U Basis

Course Requirements: CREQ: NUR 1120

NUR 1121 - ADVANCED CLINICAL PROBLEM SOLVING

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the nursing management of the adult who experiences an acute or complex illness with an alteration in multiple body systems. The students' ability to apply the nursing process, using critical thinking skills, is expanded through classroom and case study activities. Professional competence is enhanced through the utilization of high fidelity human simulation technology.

Academic Career: Undergraduate

Course Component: Lecture

NUR 1136 - HIMALAYAN WILDERNESS FIRST RESPONDER

Minimum Credits: 6

Maximum Credits: 6

This is an intensive Wilderness First Responder (WFR) course taught as the second course in a required, two-course sequence in the Pitt/Hanifl Summer Program (May through June) addressing health, medicine, and the environment in the Himalayas of North India. WFR is the standard training in the United States for guides, international leaders, and backcountry travelers. The course assumes that access to advanced medical care is hours to days away from the point of injury or illness, and as a result, the responder must focus on patient assessment, long-term, and improvised patient care. The Pitt/Hanifl WFR course will not only emphasize care in remote, international settings, but also augment didactic and scenario learning with clinical visits and observations at Landour Community Hospital (LCH) and its surrounding communities, where students will shadow LCH and Aerie staff, as they care for patients.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SU3 Elective Basis

Course Requirements: PREQ: Must have completed Freshmen year

NUR 1138 - COMMUNITY HEALTH NURSING CLINICAL

Minimum Credits: 2

Maximum Credits: 2

The overall objective of this course is to provide the student with a broad introduction to community health and the role of nursing within this context. Students will experience independence and collaboration with community-based clinicians in a variety of settings. Students will have opportunities to apply epidemiology; health promotion and disease prevention within groups; individual and family case management; community assessment and intervention; environmental hazards; and factors influencing the delivery of and access to community health services at the individual, family, and aggregate levels.

Academic Career: Undergraduate

Grade Component: H/S/U Basis

Course Requirements: CREQ: NUR 1128; PLAN: BSN

NUR 1140 - COMPARATIVE HEALTH ISSUES: TRENDS WITHIN HEALTH CARE SYSTEMS (GLOBAL SEMINAR IN BUENOS AIRES)

Minimum Credits: 3

Maximum Credits: 3

Provides students with the opportunity to apply concepts and tools acquired in BUSSPP 0020 managing in complex

environments and new concepts and tools to the study of firms in a non-U.S. environment. Students work in teams with engineering students on research projects that are linked to specific firms and industries. Business environment and practices abroad are compared to those in the U.S. The trip abroad includes company visits, lectures, and cultural excursions during a two-week study period in Germany under the guidance of a faculty member.

NUR 1141 - HEALTH DISPARITIES IN VULNERABLE POPULATIONS AND ETHNIC CULTURAL GROUPS

Minimum Credits: 2

Maximum Credits: 2

The primary focus of this course is to explore a set of major health disparities affecting diverse racial and ethnic groups (Black or African American, Asian American, Native American, Hispanic or Latinos, American Indian or Alaska Natives and White) living in urban, suburban, and rural settings. Students will learn about the specific health conditions affecting each group, social justice and environmental justice issues affecting their health, and stress-related issues whether it be military, community violence or community environmental issues locally or in the state. The course is designed for undergraduate juniors and seniors and honor students.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade
Course Requirements: PLAN: Nursing (BSN)

NUR 1142 - PROFESSIONAL ISSUES IN ADVANCED PRACTICE NURSING: NURSE ANESTHESIA

Minimum Credits: 2

Maximum Credits: 2

This course is designed to provide the undergraduate nursing student with an understanding of the role of the nurse anesthetist as an advanced practice nurse. Emphasis will be placed on exploring 1) the advanced practice role as a nurse anesthetist, 2) health care policies affecting nurse anesthesia practice, and 3) evidence based practice in nurse anesthesia practice. Students will describe the opportunities and barriers for nurse anesthetists in a variety of practice settings. Students will also explore the implications of health care policies at the national, state and local level on practice.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Letter Grade

Course Requirements: PREQ: NUR 1120; PROG: Nursing; GPA: 3.5

Course Attributes: University Honors Course

NUR 1143 - FOUNDATIONS OF PERSONALIZED HEALTH: TRANSLATION FROM BASIC RESEARCH TO CLINICAL PRACTICE

Minimum Credits: 2

Maximum Credits: 2

This course is designed to provide the undergraduate nursing student with a Foundation in Personalized Health Care and to introduce students to many facets of this emerging field. Emphasis will be placed on exploring 1) nursing implications of personalized and precision health care, 2) ethical issues of importance to the field of nursing, 3) next generation methods to tailor precise and personalized treatments, and 4) evidence-based interventions in personalized health care. Students will immerse themselves in the clinical settings and research areas related to personalized health care. Student will explore the implementations of personalized health care, a predictive, preventive, and patient-centered approach treatment.

Academic Career: Undergraduate

Grade Component: Letter Grade

NUR 1150 - NURSING IN NICARAGUA: PUBLIC AND COMMUNITY HEALTH

Minimum Credits: 3

Maximum Credits: 3

Students broaden their global health perspective in this two-week immersion program by learning first-hand how a developing country's approach to public and community health compares to that of the United States. Students visit the Nicaraguan World Health Organization office, Ministry of Health, UPOLI University, rural and urban community health centers, and attend local cultural events. In addition, students partner with local nursing students to observe family assessments in the home, plan a health promotion event for community members, and have opportunities to give back through service.

Grade Component: Letter Grade

Course Requirements: PREQ: NUR 0082 and NUR 0082C or 1282C

Course Attributes: Study Abroad

NUR 1154 - NURSING CARE OF OLDER ADULTS

Minimum Credits: 2

Maximum Credits: 2

This course is designed to ensure competency in providing evidence-based nursing care to older adults and their families, across a continuum of health care settings. Attention is given to the complex interaction of acute and chronic co-morbid conditions, interdisciplinary collaboration, the recognition of risk factors, valid and reliable health assessments, and individualized care for older adults in acute and skilled nursing facilities. The influence of attitudes, age, gender, race, culture, religion, language, lifestyle, technology, and health care policy on the biological, psychological, and social functioning of older adults is considered.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SU3 Elective Basis

NUR 1155 - NURSING CARE OF ADULTS 1

Minimum Credits: 3

Maximum Credits: 3

This course focuses on patient-centered nursing care of adults and older adults with acute and/or chronic illnesses. Students will be guided in clinical judgment exercises and the use of therapeutic interventions and research findings in the management of adults with acute and/or chronic illnesses. Nursing process, clinical judgment, and decision-making serve as the framework for acquisition of knowledge for the management of patients. Social determinants of health and interprofessional collaboration and teamwork will be emphasized.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: CREQ: NUR 1156

NUR 1156 - NURSING CARE OF ADULTS CLINICAL 1

Minimum Credits: 1.5

Maximum Credits: 1.5

This clinical course focuses on the nursing care of adults and older adults with acute and complex illnesses. Emphasis is placed on using the nursing process and the clinical judgment model to assist students with the development of priority nursing goals and in the application critical thinking skills to patient care. The clinical nursing responsibilities include interpretation of assessment findings and diagnostic studies, medical/surgical patient management, evaluation of outcomes, health promotion, and support for individuals and families experiencing acute and complex health problems. Clinical learning is focused on developing and refining the knowledge and skills to manage patient care as part of inter-professional teams.

Academic Career: Undergraduate

Course Component: Clinical

Grade Component: H/S/U Basis

Course Requirements: CREQ: NUR 1155

NUR 1157 - NURSING CARE OF ADULTS 2

Minimum Credits: 2

Maximum Credits: 2

This course focuses on the nursing management of adults and older adults who experience an acute or complex illness with an alteration in multiple body systems. The students' ability to apply the nursing process, using critical thinking skills, is expanded through classroom and case study activities. Professional competence is enhanced through the utilization of high-fidelity human simulation technology.

Academic Career: Undergraduate
Course Component: Lecture

Course Requirements: PREQ: NUR 1155 and 1156; CREQ: NUR 1158

NUR 1158 - NURSING CARE OF ADULTS CLINICAL 2

Minimum Credits: 1

Maximum Credits: 1

This clinical course focuses on the nursing management of adults and older adults who experience an acute or complex illness with an alteration in multiple body systems. The students' ability to apply the nursing process, using critical thinking skills, is expanded through clinical activities. Collaboration with interdisciplinary health professionals in regenerative or restorative care is fostered. Use of high-fidelity simulation is used to provide experiences in critical and life-threatening situations.

Academic Career: Undergraduate
Course Component: Clinical
Grade Component: H/S/U Basis
Course Requirements: PREQ: NUR 1155 and 1156; CREQ: NUR 1157

NUR 1166 - MEDICAL NUTRITION THERAPY

Minimum Credits: 1

Maximum Credits: 1

This course focuses on medical nutrition therapy for clinical practice for nurses. Food for energy and the major nutrients are considered for the promotion of health and medical nutrition therapy for selected disruptions of health. Emphasis is placed on nutrition assessment and interventions in relation to the latest evidence-based practices.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

NUR 1212 - INTRODUCTION TO HEALTHCARE FINANCE AND POLICY

Minimum Credits: 0.5

Maximum Credits: 0.5

The aim of this course is to provide students with an overview of the healthcare financing system in the United States as well as key issues in healthcare policy. The course will focus on providing students with a basic introduction to: 1) the health insurance system in the United States, 2) theoretical conceptual, and philosophical basis of healthcare policy making, 3) the role of public policy in the finance and provision of healthcare in the United States and 4) the process through which multiple branches of government create and implement policy. We will reference literature from economics, political science, nursing, and health services research throughout the course.

Academic Career: Undergraduate

Grade Component: Letter Grade
Course Requirements: Class restricted for BSN School of Nursing Undergraduates

NUR 1220C - ADVANCED NURSING MANAGEMENT OF THE ADULT WITH ACUTE/COMPLEX HEALTH PROBLEMS CLINICAL

Minimum Credits: 2.5

Maximum Credits: 2.5

This clinical course focuses on the nursing care of adults with acute and complex illnesses in a hospital setting. Emphasis is placed on using the nursing process to assist students with the development of priority nursing goals and in

applying critical thinking skills to patient care. The clinical nursing responsibilities include interpretation of diagnostic studies, medical/surgical patient management, evaluation of outcomes, health promotion, and support for individuals and families experiencing acute and complex health problems. This course includes application of cultural diversity awareness training to the nursing process. Clinical learning is focused on developing and refining the knowledge and skills to manage patient care as part of inter-professional teams. Clinical experiences are offered in acute care, critical care, and monitored units.

Academic Career: Undergraduate

Course Component: Clinical

Grade Component: H/S/U Basis

Course Requirements: CREQ: NUR 1120

NUR 1221C - ADVANCED CLINICAL PROBLEM SOLVING CLINICAL

Minimum Credits: 1

Maximum Credits: 1

This course focuses on the nursing management of the adult who experiences an acute or complex illness with an alteration in multiple body systems. The students' ability to apply the nursing process, using critical thinking skills, is expanded through clinical activities. Collaboration with interdisciplinary health professionals in health promotion and restoration is fostered.

Academic Career: Undergraduate

Course Component: Clinical

Grade Component: H/S/U Basis

Course Requirements: CREQ: NUR 1121

NUR 1228C - COMMUNITY HEALTH NURSING CLINICAL

Minimum Credits: 0.5

Maximum Credits: 0.5

The overall objective of this course is to provide the student with a broad introduction to community health and the role of nursing within this context. Students will experience independence and collaboration with community-based clinicians in a variety of settings. Students will have opportunities to apply epidemiology; health promotion and disease prevention within groups; individual and family case management; community assessment and intervention; environmental hazards; and factors influencing the delivery of and access to community health services at the individual, family, and aggregate levels.

Academic Career: Undergraduate

Course Component: Clinical

Grade Component: H/S/U Basis

Course Requirements: CREQ: NUR 1128

NUR 1234C - TRANSITION INTO PROFESSIONAL NURSING PRACTICE CLINICAL

Minimum Credits: 3

Maximum Credits: 3

This course is designed to facilitate the transition into professional practice through the preceptorship with registered nurses in a variety of settings. Students synthesize knowledge about the professional nursing roles and increase their responsibility and accountability for the nursing care of individuals, families and aggregates.

Academic Career: Undergraduate

Course Component: Clinical

Grade Component: H/S/U Basis

Course Requirements: CREQ: NUR 1134

NUR 1250C - NURSING CARE OF MOTHERS, NEWBORNS AND FAMILIES CLINICAL

Minimum Credits: 1

Maximum Credits: 1

This course provides an introduction to the process of childbirth and the dynamics of the childbearing family. It explores the areas of health promotion, physiologic changes associated with pregnancy, high risk conditions associated with pregnancy and the development of the fetus and newborn. Emphasis is on adaptation to the biopsychosocial needs of the childbearing family with sensitivity to the cultural needs and ethical issues of a diverse population. Critical thinking, problem solving, stress adaptation, role, family and nursing theories provide a major focus for understanding childbearing. Clinical experiences reflect a diversity of settings including outpatient, inpatient, and community programs that provide services to the childbearing family.

Academic Career: Undergraduate

Course Component: Clinical

Grade Component: H/S/U Basis

Course Requirements: CREQ: NUR 1050

NUR 1252C - NURSING CARE OF CHILDREN AND THEIR FAMILIES CLINICAL

Minimum Credits: 1

Maximum Credits: 1

This course focuses on nursing practice for restoration and maintenance of health in children in various stages of development within their families and the broader social contexts in which children grow and develop. Nursing approaches used in the clinical setting are based on the use of best evidence, developmental perspectives, and cultural competence. The nursing process is applied to the child and family to minimize the effects of stressors which have resulted in a disruption of health. There is an emphasis on critical thinking and decision making as the student applies theory to nursing care.

Academic Career: Undergraduate

Course Component: Clinical

Grade Component: H/S/U Basis

Course Requirements: CREQ: NUR 1052

NUR 1260C - NURSING CARE OF CLIENTS WITH PSYCHIATRIC MENTAL HEALTH PROBLEMS CLINICAL

Minimum Credits: 1.5

Maximum Credits: 1.5

This course focuses on nursing practice of health promotion and restoration in individuals with mental health problems. Application of theoretical concepts and nursing interventions is the focus of the clinical experience in acute, chronic, and community mental health settings. Emphasis is placed on understanding the unique contributions of social and cultural factors in the development of treatment plans for clients experiencing psychiatric problems.

Academic Career: Undergraduate

Course Component: Clinical

Grade Component: H/S/U Basis

Course Requirements: CREQ: NUR 1060

NUR 1281 - FOUNDATIONS OF NURSING PRACTICE 1

Minimum Credits: 3.5

Maximum Credits: 3.5

This course focuses on theory acquisition and skills application in communication, therapeutic intervention, and clinical reasoning. Techniques of assessment, analysis, intervention, and planning of the physical, psychological, and

developmental dimensions of the individual are explored through a variety of learning strategies. Variations of expected findings based on influences such as age, social condition, and culture are discussed. Emphasis is placed on the therapeutic interventions of safety, hygiene, comfort, health promotion, and safe performance of psychomotor skills.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: CREQ: NUR 0082 and NUR 1282C

NUR 1282C - NURSING MANAGEMENT OF ADULT WITH ACUTE/CHRONIC HEALTH PROBLEMS CLINICAL

Minimum Credits: 3.5

Maximum Credits: 3.5

This course focuses on the nursing care of adults, including older adults, with acute and/or chronic illnesses. Students will be guided in critical thinking exercises and the use of therapeutic interventions and research findings in the management of adults with acute and/or chronic illnesses. During clinic, students will have the opportunity to practice clinical skills learned in the lab. Nursing process, critical thinking, and decision-making serve as the framework for acquisition of clinical psychomotor skills. Common concepts of care will be emphasized, including societal and cultural influences.

Academic Career: Undergraduate

Course Component: Clinical

Grade Component: H/S/U Basis

Course Requirements: CREQ: NUR 0082 and NUR 0087 and NUR 1281

NUR 1308 - ETHICAL AND SOCIAL IMPLICATIONS OF BIOTECHNOLOGY

Minimum Credits: 3

Maximum Credits: 3

This discussion-based course provides an introduction to the ethical issues accompanying the development and implementation of a range of biotechnologies and the social implications of their use. Two types of biotechnologies will be examined: the use of engineering and technology in the health sciences to treat disease, protect people, and improve human well-being, as well as the use of microorganisms or other biological substances in the development of new products. Biotechnologies to be considered include genomic sequencing, gene editing and genetic engineering (CRISPR-Cas9); reproductive technologies (e.g., ectogenesis, fertility preservation); use of stem cells, phage, and neurotechnologies to treat human disease and disability; forensic uses of data (e.g., facial recognition technologies, identification of humans and human remains); Big Data and machine learning in healthcare; robotics, and neuroengineering, as well as the use of technologies to protect people or to avoid placing humans in harm's way (e.g., military use of drone technology, or search and rescue use of robots). This course encourages students to consider: issues of diversity, equity, and inclusion in developing and deploying biotechnologies; issues of research ethics, intellectual property, and global access to biotechnologies; professional and social responsibilities for the funding, development, marketing, and use of biotechnologies; ethical use of personal data and biological materials; and ethical frameworks for evaluating the social implications of biotechnology.

NUR 1710 - APPLIED ADULT CARDIOPULMONARY CRITICAL CARE

Minimum Credits: 3

Maximum Credits: 3

The purpose of this course is to provide students with the opportunity to synthesize and apply concepts related to the cardiopulmonary assessment and multidisciplinary management of critically ill adults. Through the use of presentations and laboratory sessions, the student will explore the pathophysiologic basis of critical cardiopulmonary instability, physical and technologic assessment parameters, and treatment modalities commonly utilized in the care of these patients in the intensive care unit. Interactive laboratory demonstration of vasoactive drugs, arterial, central venous and pulmonary artery monitoring, artificial airways, mechanical ventilation and rhythm strip interpretation will be provided. Critical clinical decision making and nursing responsibilities specific to dysrhythmia interpretation are addressed, including institution of appropriate immediate nursing intervention, pharmacological, and electrical therapeutic interventions based on advanced cardiac life support (ACLS) algorithms. Further, students will have the opportunity to synthesize and apply this information within patient care scenarios of respiratory and cardiac instability.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: NUR 1120; PROG: School of Nursing

NUR 1711 - INTERSECTIONALITY AT THE CROSSROADS OF EDUCATION AND HEALTHCARE

Minimum Credits: 3

Maximum Credits: 3

This three-credit research-focused study abroad opportunity is meant to engage and encourage cross-disciplinary learning between education and nursing undergraduate students at the University of Pittsburgh. The academic focus of this experiential course is an introduction to public health nursing and PK-12 education focused on issues of diversity and organization of systems (e.g., healthcare and education). Built upon a comparative, multidisciplinary framework, this course addresses education, health services, and social services for children, young people, and families within the context of race, gender, ethnicity, class, and sexuality while providing students with a broad perspective on the distinctive healthcare and education systems operating in the United Kingdom and the United States.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Letter Grade

NUR 1765 - RISK FACTORS AND HEALTH

Minimum Credits: 3

Maximum Credits: 3

The overall objective of this course is to provide the student with a broad description of risk factors and health promotion for individuals, families and communities. Current federal, state and professional organization guidelines and recommendations for health promotion and disease prevention are applied. Current research on the efficiency of health promotion activities is presented.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

NUR 1767 - RISK FACTORS AND HEALTH: A GLOBAL PERSPECTIVE

Minimum Credits: 3

Maximum Credits: 3

The overall objective of this course is to provide the student with a broad description of risk factors and health promotion for individuals, families and communities from a global perspective. Students select a country of interest and apply that country's government, policy and professional organization guidelines and recommendations for health promotion and disease prevention. Current evidence on the efficacy of health promotion activities is studied.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SU3 Elective Basis

Course Requirements: PREQ: NUR 1765

NUR 1829 - CONTEM ISSUES CROSS CULTL HEALTH

Minimum Credits: 3

Maximum Credits: 3

Purpose of course is to increase awareness of how delivery and acceptance of health care may be influenced by social, cultural, and environmental factors. It will provide an overview of how these factors influence a person's response to stressors, daily health and living needs. Goal is to help students increase their understanding of culturally congruent care by utilizing cultural concepts, theories, and research. Students will analyze factors that facilitate/ hinder communication about health needs, acceptance of the health care regimen, and access to health care systems.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Attributes: Global Studies

NUR 1990 - SENIOR SEMINAR

Minimum Credits: 1

Maximum Credits: 1

The goal of this course is to support the senior student's successful progression to entry-level professional nursing practice. Classroom activities and self-directed learning will prepare students to attain the benchmarks associated with professional licensure and provide a foundation for the continuous self-evaluation and life-long learning required to support professional nursing practice (AACN, 2008).

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: H/S/U Basis

Course Requirements: PREQ 1121 or 1134 and CREQ 1121 or 1134; LVL: Sr; PROG: School of Nursing (UNURS)

NUR 2000 - RESEARCH FOR EVIDENCE-BASED PRACTICE 1

Minimum Credits: 2

Maximum Credits: 2

This course examines the interaction of theory, research, and clinical expertise in the development of evidence-based nursing practice. Students develop the skills needed to identify relevant research and to critically appraise published studies to evaluate their quality and applicability to clinical practice. Students gain an understanding of the research process, the critical appraisal of published research studies that use a variety of research designs, and the role of research in evidence-based practice.

Academic Career: GRAD

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: CREQ: NUR 2011 or NUR 2211 or NUR 2411

NUR 2004 - PATHPHYLGY ACROSS LIFE SPAN

Minimum Credits: 4

Maximum Credits: 4

This course is designed to provide the student with a comprehensive theoretical foundation of the phenomena that produce alterations in human physiologic function in diverse populations across the life span. Information gained in this course will prepare the student for subsequent courses related to the diagnosis and management of disease processes associated with pathophysiologic dysfunction/alterations in people of various ethnic/cultural groups across the lifespan.

Academic Career: GRAD

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Nursing students only.

NUR 2010 - HEALTH PROMO/DISEASE PRVNTN

Minimum Credits: 3

Maximum Credits: 3

Health promotion and disease prevention are examined from theoretical foundations to clinical applications. The course focuses on individual and community health promotion assessment, screening, and interventions in diverse populations. Epidemiological principles and real clinical examples are discussed as a basis for focusing health promotion assessment and interventions. Course topics are delineated according to health people 2010 goals with a corresponding focus on factors related to health care disparities among vulnerable populations. Current research in health promotion and disease prevention is the basis for identifying appropriate interventions in diverse populations and settings.

Academic Career: GRAD

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Nursing students only.

NUR 2011 - APPLIED STATISTICS FOR EBP

Minimum Credits: 3

Maximum Credits: 3

This course will provide students with the basis for understanding and interpreting commonly used statistical tests, as well as critically appraising their use in published research studies. Content will include descriptive and inferential statistics commonly reported in published research studies including both univariate and multivariate parametric and nonparametric tests. The course will also cover meta-analytic techniques and students will learn to calculate effect sizes.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Nursing students only.

NUR 2031 - DIAGC PHYSCL EXAM LIFE SPAN

Minimum Credits: 3

Maximum Credits: 3

This didactic course focuses on the use of the diagnostic history and physical examination to formulate a health assessment in patient populations across the lifespan. Concentration is on selected theories, principles and techniques from the physical and behavioral sciences essential to obtaining a complete health history and performing a methodical physical examination on patients across the life span.

Academic Career: GRAD

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NUR 2004 or NUR 2204 or NUR 2404; PLAN: NURSAN-MSN or NURSAN-DNP; SUBPLAN: MSNNNP or DNPNNP or DNPFLNP or DNPPPNP or MSNCNL or DNPMSN or DNPAGAC or DNPNA or ODNPNA or MSNADM or OCNL or ONAD or DNPAGNP-SP or DNPPCNP or DNPAGCN or DNPPMHN

NUR 2044 - NUR GRAD ORIENTATION MODULE

Minimum Credits: 0

Maximum Credits: 0

This module provides a web-based graduate nursing orientation that is designed to provide graduate nursing students with an overview of the school of nursing and information that they will need to successfully complete their programs and achieve their career goals.

Academic Career: GRAD

Course Component: Independent Study

Grade Component: Grad HSU Basis

Course Requirements: School of Nursing students only.

NUR 2061 - ORGANIZTNL & MANAGEMENT THEORY

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the organization and management, particularly of nursing personnel, in health services organizations. Organizational theories, their analysis, and their application to health care services systems will be explored. Management theories will also be discussed. Emphasis will be placed on personnel management aspects relevant to nursing such as licensure, certification, advance practice, nurse extender, etc.

Academic Career: GRAD

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Nursing students only.

NUR 2680 - INTRO GENETCS & MOLEC THERPUTC

Minimum Credits: 3

Maximum Credits: 3

This introductory course focuses on the fundamentals of human and molecular genetics. It is designed to give students a basic understanding of genetic concepts and molecular techniques so that this knowledge can be applied to current

and future genetic diagnoses and therapies encountered in nursing.

Academic Career: GRAD

Course Component: Lecture

Grade Component: Grad Letter Grade

NUR 2682 - HUMAN GENETICS AND CLINICAL APPLICATIONS

Minimum Credits: 3

Maximum Credits: 3

This introductory course focuses on the fundamentals of human and molecular genetics. It is designed to give students a basic understanding of genetic concepts and molecular techniques so that this knowledge can be applied to current and future genetic diagnoses and therapies encountered in nursing

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Nutrition

NUTR 1000 - INTRODUCTION TO RESEARCH

Minimum Credits: 3

Maximum Credits: 3

NUTR 1000 is a course aimed to further understanding of research methods, design, and procedures. A research overview will be provided in the framework of evidence-based practice and nutrition. Quantitative research methods will be discussed including research study designs, data types and collection, data organization and management, and how to retrieve and review published literature. Statistical analysis will be discussed in terms of how data are analyzed depending on the type of data collected, study design, and controlling for confounding variables that may affect the dependent variable of a research study. Further, students will become familiar with research ethics and IRB requirements as they relate to human subjects protection and the informed consent process. Students will be provided with opportunities to learn scientific writing, the Journal of the Academy of Nutrition and Dietetics (JAND) reference formatting skills, and research methodology. For the final project, students will prepare a research proposal.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: NS-BS; SUBPLAN: Accelerated Nutr Sci Nutr Diet (NSNDMS-TR) or Post-Baccalaureate (NS)

NUTR 1005 - INTRODUCTION TO SPORTS NUTRITION AND PERFORMANCE

Minimum Credits: 3

Maximum Credits: 3

This course is designed to develop a deeper understanding of the appropriate nutrition practices in relation to exercise or sport training to promote health and wellness. 1. Students will classify and list the functions of the six major nutrients. 2. Students will choose nutritious foods for healthy lifestyles and peak performance. 3. Assess dietary supplements for effectiveness and safety. 4. Evaluate sports nutrition research and effectively communicate material into practical applications for athletes.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

NUTR 1006 - INTRO TO HUMAN NUTRITION

Minimum Credits: 3

Maximum Credits: 3

This course will cover an overview of the scientific principles of nutrition and application of these principles to humans throughout the life cycle. Major focuses of the course are the classification and function of the six major nutrients, review of current nutrition standards, safety of the food supply, and nutrition misinformation. This course is meant for nutrition majors.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

NUTR 1007 - INTRO TO HUMAN NUTRITION

Minimum Credits: 3

Maximum Credits: 3

This course will cover an overview of the scientific principles of nutrition and application of these principles to humans throughout the life cycle. Major focuses of the course are the classification and function of the six major nutrients, review of current nutrition standards, safety of the food supply, and nutrition misinformation.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

NUTR 1020 - NUTRITION ASSESSMENT

Minimum Credits: 2

Maximum Credits: 2

This course will introduce the student to the concepts and components of nutritional assessment. The steps and methods used in the Nutrition Care Process to determine the nutrition status and nutritional problems of individuals will be presented. Methods used to assess dietary intake and reference standards for individuals and groups will be a major focus of the course. Common tools and resources used by the Registered Dietitian Nutritionist will also be addressed.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

NUTR 1030 - NUTRIENT METABOLISM

Minimum Credits: 4

Maximum Credits: 4

This course examines the biochemical and physiological basis for human macronutrient and micronutrient requirements. Students will learn food sources, requirements, functions, digestion, absorption, metabolism, and storage of macronutrients and micronutrients as well as the metabolic consequences of nutrient deficiencies and toxicities.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

NUTR 1600 - INTRODUCTION TO DIETETICS

Minimum Credits: 2

Maximum Credits: 2

This is an introduction to the profession of dietetics. Emphasis will be placed on the scope of the profession of dietetics practice, the role and functions of registered dietitian nutritionists, and the education requirements for entry into practice.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

NUTR 1603 - NUTRITION ASSESSMENT 2

Minimum Credits: 3

Maximum Credits: 3

Introduction to professional practice methods and skills in nutrition focused physical examination. Learning experiences will include formal class presentations, class discussions, case-based problem solving and skill development laboratory sessions. Knowledge based learning leading to examination technique simulations for anthropometric measurements for body composition, nutrition focused physical examination for malnutrition diagnosing and examination techniques, e.g., vital signs, head and neck exam, intra and extra-oral exams, heart and lung auscultation, as well as, abdominal auscultation and palpation are included. At the completion of the course competency in application of nutrition focused physical examination techniques will be assessed on an individual basis.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Clinical Dietetics-Nutrition (BS, BPH, BS-H) or Clinical Dietetics - Nutrition (NDNUTR-ND)

NUTR 1604 - FOOD SERVICE MANAGEMENT WITH LAB

Minimum Credits: 3

Maximum Credits: 3

This course presents the basic principles and skills of food service management and leadership. Learning experiences include lectures, discussions, and required field trips. Please note, no other courses can be scheduled during the break between the morning and afternoon class sessions as this time will be needed for travel to field trips sites.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Clinical Dietetics-Nutrition (BS, BPH, BS-H) or Nutrition Science (NS-BS) or Clinical Dietetics - Nutrition (NDNUTR-ND)

NUTR 1605 - PRINCIPLES OF NUTRITION EDUCATION

Minimum Credits: 3

Maximum Credits: 3

Concepts and components of the teaching-learning process and their application in the dietetics practice. Experience in the instructional planning and implementation functions of clinical dietitians is emphasized.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Clinical Dietetics-Nutrition (BS, BPH, BS-H) or Nutrition Science (NS-BS) or Clinical Dietetics - Nutrition (NDNUTR-ND)

NUTR 1608 - PROFESSIONAL TRENDS AND ISSUES

Minimum Credits: 3

Maximum Credits: 3

Identification and discussion of critical issues pertaining to the profession of dietetics.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Clinical Dietetics-Nutrition (BS, BPH, BS-H) or Clinical Dietetics - Nutrition (NDNUTR-ND)

NUTR 1609 - CLINICAL BIOCHEMISTRY

Minimum Credits: 3

Maximum Credits: 3

This course will introduce the basic concepts of biochemistry. The structures and function of the major biomolecules, carbohydrates, lipids, proteins and nucleic acids will be discussed and their metabolism integrated.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Clinical Dietetics-Nutrition (BS, BPH, BS-H) or Clinical Dietetics - Nutrition (NDNUTR-ND)

NUTR 1610 - FOOD APPLICATION

Minimum Credits: 3

Maximum Credits: 3

This is an introductory course emphasizing the chemical and physical properties of food in relation to its selection, quality, and preparation. Experience in the construction, modification and preparation of recipes to meet various dietary needs is also provided.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: NUTR 1602; PLAN: Nutrition and Dietetics (BPH; BS; BS-H) or Clinical Dietetics - Nutrition (NDNUTR-ND) or (NS-BS)

NUTR 1612 - FOOD AND CULTURE

Minimum Credits: 3

Maximum Credits: 3

Introduction to ethnic influence on the diversity of American food patterns. Social, cultural, economic, geographic, and religious factors are considered.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Nutrition and Dietetics (BPH; BS; BS-H) or Clinical Dietetics - Nutrition (NDNUTR-ND) or (NS-BS)

NUTR 1613 - FOOD APPLICATION LAB

Minimum Credits: 1

Maximum Credits: 1

Study of the chemical and physical changes that occur in food as a result of various food preparation methods and their effects on nutrient quality. Experience in the construction, modification and preparation of recipes to meet various dietary needs is also provided.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: Letter Grade

Course Requirements: PREQ: NUTR 1602; PLAN: Nutrition and Dietetics (BPH; BS; BS-H) or Clinical Dietetics - Nutrition (NDNUTR-ND) or (NS-BS)

NUTR 1614 - NUTRITION CRITICAL THINKING

Minimum Credits: 3

Maximum Credits: 3

An application of critical thinking skills to evaluate nutrition issues.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Clinical Dietetics-Nutrition (BS, BPH, BS-H) or Clinical Dietetics - Nutrition (NDNUTR-ND) or (NS-BS)

NUTR 1621 - MICRONUTRIENT METABOLISM

Minimum Credits: 3

Maximum Credits: 3

Second of a two-course sequence in advanced nutrition and metabolism. Emphasis is placed on the essential micronutrients.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Nutrition and Dietetics (BPH; BS; BS-H) or Clinical Dietetics - Nutrition (NDNUTR-ND)

NUTR 1622 - LIFE CYCLE NUTRITION

Minimum Credits: 3

Maximum Credits: 3

This course is a study of the physiological, developmental, sociological, and environmental factors that affect nutrient requirements at various stages of the life cycle. Students will gain a working knowledge of nutrition needs and recommendations for individuals at different stages of the life span. Teaching approaches for the course include lectures, guest speakers, assigned readings, in-class exercises and discussions, and problem-based learning through simulation/case studies.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Nutrition and Dietetics (BPH; BS; BS-H) or Clinical Dietetics - Nutrition (NDNUTR-ND) or (NS-BS); NDNUTR-ND

NUTR 1625 - NUTRITION THERAPY

Minimum Credits: 4

Maximum Credits: 4

This course will provide an introduction to medical nutrition therapy in the prevention and treatment of disease. The course will cover the nutrition implications, nutrition assessment process, and nutrition interventions for specific diseases. Teaching approaches for the course include lectures, assigned readings, in-class discussions, and problem-based learning through simulation/case studies.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: NS-BS and NDNUTR-ND

NUTR 1626 - PUBLIC HEALTH NUTRITION

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the application of nutrition knowledge to improve the health of populations through public health efforts.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

NUTR 1628 - PRACTICAL EXPERIENCE

Minimum Credits: 2

Maximum Credits: 2

Supervised practical experience providing students with the opportunity to gain real world experience related to nutrition science. This course is for Nutrition Science students only.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: H/S/U Basis

Course Requirements: PLAN: Nutrition Science (BS)

NUTR 1630 - NUTRITION THERAPY 1

Minimum Credits: 3

Maximum Credits: 3

The first of a two-course sequence which will provide an introduction to medical nutrition therapy in the treatment of acute and chronic diseases. The course will cover pathophysiology and treatment of specific diseases, nutrition implications of specific diseases, nutrition assessment, determination of nutrient requirements, and nutrition interventions including calculation of modified diets.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Nutrition and Dietetics (BPH; BS; BS-H) or Clinical Dietetics - Nutrition (NDNUTR-ND) or (NS-BS)

NUTR 1690 - UNDERGRADUATE TEACHING EXPERIENCE

Minimum Credits: 1

Maximum Credits: 3

Students can gain supervised teaching experience by assisting an instructor in the teaching of an undergraduate-level course in the Nutrition Science curriculum.

Academic Career: Undergraduate

Course Component: Internship

Grade Component: LG/SNC Elective Basis

Course Requirements: PLAN: NS-BS Students Only

NUTR 1699 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 6

Provides advanced students an opportunity to explore in depth an area of particular interest to them. It is the student's responsibility to find a faculty member willing to undertake such a tutorial.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: H/S/U Basis

Course Requirements: PLAN: NS-BS or NDNUTR-ND

Occupational Therapy

OT 3214 - ADVANCED THEORY AND PRACTICE

Minimum Credits: 2

Maximum Credits: 2

Examines select theoretical perspectives, practice areas, evaluation procedures, intervention protocols, and/or professional issues in-depth.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Oncology/Cancer Biology

MSOGP 2000 - FOUNDATIONS IN CANCER BIOLOGY

Minimum Credits: 3

Maximum Credits: 3

This 3-hour credit course will serve as the first foundations course for the Oncology Graduate Program. It will provide a biological foundation and background to cancer biology for students entering their first semester of the program. This class will meet twice per week (9:00-10:30am Monday and Wednesday) in the Assembly Building. The course will be directed by program co-directors Drs Katherine Aird and Chris Bakkenist, with lectures each week led by cancer researchers from various areas of expertise within the Hillman Cancer Center

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Oral and Craniofacial Sciences

OCS 1020 - PRINCIPLES OF MICROBIOLOGY

Minimum Credits: 4

Maximum Credits: 4

An introductory course in microbiology for dental hygiene students with no previous background in microbiology. Major areas included are microorganisms, immune mechanisms of the host and the interaction of the host and the microorganisms in disease and homeostasis. Major emphasis is placed on diseases with oral manifestations and infection control in dental medicine. The laboratory component is devoted to microbiological methods, infection control and oral ecology.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SU3 Elective Basis

OCS 1025 - INTRODUCTION TO MICROBIOLOGY

Minimum Credits: 3

Maximum Credits: 3

An overview of medical microbiology introduces the student to medically important bacteria, fungi, viruses, parasites and to immunity.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

OCS 1900 - DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 3

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SU3 Elective Basis

Pathology

MSPTH 5441 - BREAST, GYNECOLOGIC, AND PERINATAL PATHOLOGY

Minimum Credits: 0

Maximum Credits: 0

Students scheduling this elective will be assigned to the Department of Pathology Magee Women's Hospital. Students may elect to spend four or eight weeks on this rotation. This elective is designed to provide an opportunity for the student to tailor a program within surgical pathology with emphasis on women's care and obstetrical and perinatal pathology that meets their current or future career objectives. This elective is particularly suitable for students with interest in Obstetrics and Gynecology, Maternal-Fetal Medicine, Neonatology, and related specialities. Activities may include a research project or participation in department functions, such as diagnostic work and teaching conferences. We encourage the opportunity to learn via activities that concentrate on clinicopathological correlation, such as Morbidity and Mortality conferences with the teams from Neonatology, Obstetrics and Gynecology, High Risk Pregnancy and Maternal-Fetal Medicine; tumor board; breast care consultation center conference, ultrasound pathology correlation and oncology teaching rounds. Close collaboration with Magee Women's Hospital Medical Genetics and Genomics Laboratories allows for involvement in projects and clinical work-up in cases of congenital malformations, gestational trophoblastic disease and novel genetic links between placental morphology and clinical syndromes presenting in later life. The student may also become involved in on-going investigations being conducted by various staff pathologists including studies on gynecological tumors (clinicopathologic, immunohistochemical as well as DNA analysis using flow cytometry and molecular studies); breast tumors (clinicopathologic, immunohistochemical and DNA analysis using flow cytometry and molecular studies) and others.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

MSPTH 5900 - EXTRAMURAL PATHOLOGY

Minimum Credits: 0

Maximum Credits: 0

A clinical experience in pathology may be arranged at an institution other than the University of Pittsburgh School of Medicine. Arrangements must be made in accordance with the process set out in the upset course catalog with all appropriate approvals to be received before the course may be added to the student schedule for credit.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U

Pediatrics

PEDS 5415 - NICU ACTING INTERNSHIP

Minimum Credits: 0

Maximum Credits: 0

A 4-week neonatal intensive care unit acting internship at Magee-Womens Hospital NICU through the Division of Newborn Medicine, Department of Pediatrics. Students have the same clinical responsibilities as the pediatric interns, including spending time in our Triage unit and giving a presentation on a core Neonatology topic. The NICU team is made up of an attending neonatologist, neonatal-perinatal medicine fellows, an advanced practice provider (PA or NP), pediatric interns, neonatal nurses, and other specialized providers, including pharmacists, nutritionists and therapists. Students will assume a panel of up to 4 patients and be responsible for evaluation, performing procedures, formulating plans for these patients. Students will have the opportunity to perform procedures such as arterial puncture, umbilical arterial or venous catheterization, lumbar puncture, thoracentesis, paracentesis, and endotracheal intubation under the supervision of NICU staff. The NICU is covered at night and on weekends by an attending neonatologist, NICU fellow, senior resident and a team of neonatal nurse practitioners. Students will not be required to take night or weekend call. Students will attend radiology rounds and other educational talks. Up to one student per rotation can be accommodated to maximize the experience.

Academic Career: Medical School

Course Component: Clinical

Grade Component: S/U Basis

Persian (Farsi)

PERS 0101 - PERSIAN (FARSI) 1

Minimum Credits: 4

Maximum Credits: 4

The greatest part of the first term will be devoted to the presentation and practice of the basic sound patterns of the language, its fundamental sentence patterns, and sufficient vocabulary to illustrate and practice them. An introduction to the writing system will be offered together with the opportunity to acquire elementary writing and reading skills.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Asian Studies, European and Eurasian Studies, Global Studies, Russian & East European Studies

PERS 0102 - PERSIAN (FARSI) 2

Minimum Credits: 4

Maximum Credits: 4

At the end of the second term of the first year of study the student should be able to produce all the significant sound patterns of the language, to recognize and use the major grammatical structures within a limited core vocabulary. The student should be able to engage in simple conversations with native speakers about a limited number of everyday situations and b) to read and write simple material related to the situations presented.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: LING 0421 or PERS 0101; MIN GRADE: 'C' FOR LISTED COURSES

Course Attributes: Asian Studies, DSAS Second Language General Ed. Requirement, European and Eurasian Studies, Global Studies, Russian & East European Studies

PERS 0103 - PERSIAN (FARSI) 3

Minimum Credits: 3

Maximum Credits: 3

The first term of the second year will concentrate on the further development of fluency in oral production and the improvement in the student's ability to understand the flow of speech as uttered by a native speaker. Increased attention will be paid to reading as a means of augmenting a recognition vocabulary and writing as a drill and as a means of consolidating and communicating the knowledge gained.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: LING 0422 or PERS 0102; MIN GRADE: 'C' FOR LISTED COURSES

Course Attributes: Asian Studies, DSAS Second Language General Ed. Requirement, European and Eurasian Studies, Global Studies, Russian & East European Studies

PERS 0104 - PERSIAN (FARSI) 4

Minimum Credits: 3

Maximum Credits: 3

At the end of the second term of the second year the student should be able to converse comfortably with a native speaker on a variety of non-specialized subjects. The student will be offered an opportunity to experience and more fully understand the culture of the people who use the language through readings of various types. More complex writing tasks will be expected at this level.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: LING 0423 or PERS 0103; MIN GRADE: 'C' FOR LISTED COURSES

Course Attributes: Asian Studies, DSAS Second Language General Ed. Requirement, European and Eurasian Studies, Global Studies, Russian & East European Studies

PERS 0105 - PERSIAN (FARSI) 5

Minimum Credits: 3

Maximum Credits: 3

This course will continue to focus on the development and integration of students' language skills at a more advanced level. It will also aim to broaden students' vocabulary to improve their spoken proficiency in a variety of communicative contexts and situations. At this level, students will read various texts and literary works from Persian poetry, then discuss and analyze each text and poetry to understand the meaning and to improve comprehension of advance level grammar forms and culture specific vocabulary. Because Persian language and culture are closely related to each other, students will read and extract details that will help them develop more in depth understanding of Persian culture.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: LING 0424 or PERS 0104; MIN GRADE 'C' FOR ALL LISTED COURSES

Course Attributes: Asian Studies, European and Eurasian Studies, Global Studies, Russian & East European Studies

PERS 0106 - PERSIAN (FARSI) 6

Minimum Credits: 3

Maximum Credits: 3

In this advanced course, students will integrate their language skills from all previous levels. At this level, students will identify an area of interest in Persian culture, gather sources to prepare discussion and analysis, and demonstrate advance levels of language comprehension.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: PERS 0105; MIN GRADE 'C'

Course Attributes: Asian Studies, European and Eurasian Studies, Global Studies, Russian & East European Studies

PERS 0107 - PERSIAN (FARSI) 7

Minimum Credits: 3

Maximum Credits: 3

The main goal of this course is to improve students' oral communication skills to an advanced professional level, and to develop a deeper knowledge of the culture. Students will analyze and discuss, in detail, about various issues such as, politics, religion, social problems, and film. Much of the course will adapt to the areas of interest or field specialty of the students.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: PERS 0106; MIN GRADE 'C'

Course Attributes: Asian Studies, European and Eurasian Studies, Global Studies, Russian & East European Studies

PERS 0108 - PERSIAN (FARSI) 8

Minimum Credits: 3

Maximum Credits: 3

This course provides additional practice to help students achieve advanced linguistic fluency and accuracy. Students acquire mastery of speaking and pronunciation at a professional level through the use of authentic materials from various sources such as (Persian film, online Persian TV, internet radio, songs, newspapers, short stories, and more). The ultimate goal of this course is to improve their communication skills with fluency and accuracy and a more in depth understanding of Persian culture.

Academic Career: Undergraduate

Petroleum Engineering

PETE 1097 - SPECIAL PROJECTS

Minimum Credits: 1
Maximum Credits: 6
Student develops an individual project under supervision of a faculty member. Project may be experimental, design-oriented, or instructional. A written report is prepared.
Academic Career: Undergraduate
Course Component: Directed Studies
Grade Component: Letter Grade

PETE 1160 - PETROLEUM RESERVOIR ENGINEERING

Minimum Credits: 3
Maximum Credits: 3
This course covers the principles of reservoir engineering and material balance calculation in petroleum reservoirs. The topics include petroleum origin and oil occurrence and migration; oil, gas, and gas-condensate reservoirs; basic drilling of oil and gas wells; p-v-t behavior of natural gas; material balances in gas reservoirs; oil reservoirs under simultaneous dissolved gas drive, gas cap drive, and water drive; generalized material balance in petroleum reservoirs; basic equations for fluid flow in reservoirs, absolute, effective, and relative permeabilities; and a design project on reservoir calculations.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: MATH 0250 or 0290 or 1270 or 0202 or 1035 or CHE 1290 PROG: Swanson School of Engineering

PETE 1201 - RECOVERY OF OIL BY WATERFLOODING

Minimum Credits: 3
Maximum Credits: 3
Theory of immiscible fluid displacement starting with frontal advance theory and applying it to waterflooding, fluid patterns, sweep efficiency, stratified reservoirs, etc. Relative permeability experiments are simulated.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PROG: Swanson School of Engineering

PETE 1204 - ENHANCED OIL RECOVERY PROCESSES

Minimum Credits: 3

Maximum Credits: 3

This course covers different topics on enhance oil recovery processes (co₂, thermal, miscible fluids and surfactants); coal-bed methane, enhanced methane recovery, and underground coal gasification; surface and in-situ heavy oil, tar sand and oil shale production; and co₂ capture, sequestration and disposal. The fundamentals, thermodynamics, reaction kinetics and transport phenomena as well as the environmental issues and regulations related to these topics are also covered.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: Swanson School of Engineering

PETE 1205 - PETROLEUM PRODUCTION ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

This course covers principles of oil and gas production from hydrocarbon-bearing formations. Topics include: flow through porous media of incompressible, compressible and slightly compressible fluids; reservoir, producing formation, vertical lift, and chock performances; principles of gas lift, gas lift valves and design; and sucker rod pumping design; and design project on artificial gas lift.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: MATH 0202 or 0250 or 0290 or 1035 or 1270 or CHE 1290; PROG: Swanson School of Engineering

PETE 1206 - OIL RECOVERY TECHNIQUES

Minimum Credits: 3

Maximum Credits: 3

This course covers various oil recovery techniques, including waterflooding and enhanced oil recovery (EOR) methods. Emphasis is placed on polymer flooding, steam flooding, and CO₂ flooding as well as the environmental issues and regulations associated with these methods.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

PETE 1207 - PETROLEUM AND NATURAL GAS PROCESSING

Minimum Credits: 3

Maximum Credits: 3

The course covers different topics on natural gas, petroleum and petrochemical processing. The topics include natural gas cleanup, methane reforming for h₂ production, partial oxidation of ch₄ for synthesis gas production, and chemicals from methanol; refinery feed-stocks, crude distillation and refinery products, alkylation, hydrotreating, catalytic reforming and isomerization, catalytic cracking, resid, tar sands and oil shale processing; and methanol/other alcohols, ethylene, fertilizer, and plastic production plants.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: Swanson School of Engineering

PETE 1208 - PETROLEUM DRILLING AND WELL COMPLETION

Minimum Credits: 3

Maximum Credits: 3

This course covers different topics related to drilling operations; directional drilling techniques; completion operations; and work-over operations. The drilling operations encompass drilling rig components, bit selection program, drilling fluid types, cementing program design and well control/safety. The directional drilling techniques include: well-path design/applications, downhole motor components, directional surveys, and logging while drilling. The well completion operations contain: formation evaluation tools, open-hole log interpretation, coring tools, flow testing, perforating, hydraulic fracturing and other stimulation techniques. The work-over operations comprise work-over rig components, cased hole log interpretation, plugs/packers/fishing tools, squeeze job design, casing integrity tests and stimulation evaluation. A special project on casing design is also included.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: Swanson School of Engineering

PETE 1209 - HYDRAULIC FRACTURING MECHANICS AND APPLICATIONS

Minimum Credits: 3

Maximum Credits: 3

Course description: this class will prepare students to wisely and critically design hydraulic fracturing treatments as well as make informed recommendations to employers, governments, and communities about the risks and benefits of hydraulic fracturing methods. Upon completion of this course, students will be equipped to use engineering formulae to estimate hydraulic fracture dimensions, evaluate strengths and weaknesses of various modeling approaches, characterize subsurface conditions from wellbore pressure analysis, make sound recommendations for monitoring, and compare and contrast approaches and risks for a range of application domains.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: CHE 0300; PROG: Swanson School of Engineering

PETE 1211 - RESERVOIR SIMULATION

Minimum Credits: 3

Maximum Credits: 3

This course introduces the students to the simulation process of fluid flow in petroleum reservoirs. Governing equations required to describe fluid flow in porous media are derived, numerical techniques for solving the equations are introduced. Students will learn how reservoir flow simulators can be used in assessment studies of hydrocarbon reservoirs.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: Swanson School of Engineering

PETE 1212 - CO₂ FOR ENHANCED OIL RECOVERY AND FRACKING

Minimum Credits: 3

Maximum Credits: 3

This course will cover the physical properties of CO₂ that make it an attractive solvent for enhanced oil recovery (EOR), the natural and anthropogenic sources of CO₂, the types of fields that are suitable for CO₂ EOR, and the mechanisms responsible for CO₂ increasing oil recovery. The current status of CO₂ EOR in the United States will also

be reviewed, along with its potential for future expansion. The foremost technical challenges of CO₂ EOR, namely mobility control and conformance control, will be discussed along with a current research efforts. The course will conclude with a brief review of how CO₂ has been used as a hydraulic fracturing, whether as a pure fluid, as the gaseous component of foams, or as an energizing component.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SU3 Elective Basis

Course Requirements: PREQ: CHE 0100 and 0200; PLAN: Chemical Engineering (BSE); PROG: Swanson School of Engineering

Pharmacy

PHARM 0178 - SCIENTIFIC PRINCIPLES & ADMINISTRATIVE APPROVALS THAT TRANSFORM A CHEMICAL INTO A DRUG

Minimum Credits: 3

Maximum Credits: 3

This course will introduce the many facets of the drug development process as governed by the FDA, from assessment of risk and evaluation of safety and efficacy via clinical trials, to the post-marketing process when drugs enter circulation and are marketed in the media. Through the utilization of real-world evaluations and marketing materials, topics covered will include general mechanisms of action for drugs, what happens to a drug after administration, sources of variability in drug response, the legality and ethics of the pharmaceutical development process, and the marketing of drugs to the public. While principles of pharmacology will be reviewed, focus will be placed on the process of how a drug moves through the FDA approval process to be introduced to the public for everyday use. As such, while this course may be of particular interest to students studying biology, chemistry, mathematics, data science, healthy policy, public health, and other health science programs, it may also appeal to students interested in a variety of disciplines, including ethics, marketing, and law. All students are welcome.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

PHARM 1096 - ADDICTION

Minimum Credits: 3

Maximum Credits: 3

Knowledge of substance use disorders and addiction, including its etiology, natural history, biomedical and social consequences, and tactics for prevention and treatment is integral to healthcare practice, especially considering that many drugs prescribed by physicians/dentists and many over-the-counter products have addictive properties. This course examines addiction resulting from medicines prescribed used to treat psychological and physical problems, self-directed use of medicines and complementary putative health-promoting compounds (e.g. nutrition supplements) and "recreational" substances. This elective course will inculcate an understanding of addiction accompanied with basic skills in screening, problem identification, and intervention pertinent to effective healthcare practice.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

PHARM 1097 - MENTORED RESEARCH

Minimum Credits: 1

Maximum Credits: 3

The course provides undergraduates and PharmD students the opportunity to participate in systematic, hypothesis-

driven research bridging bench to bedside in pharmaceutical or pharmacy-focused research. Students are guided through the research process under direct mentorship from an expert in development of problem-solving and other skills in research.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: H/S/U Basis

PHARM 1098 - PHARMA 101: INTRODUCTION PHARMACEUTICAL INDUSTRY

Minimum Credits: 1

Maximum Credits: 1

The course provides undergraduates and PharmD students with knowledge of pharmaceutical industry including functions and responsibilities of key divisions and their individual contributions and interactions in the drug design and development process.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Satisfactory/No Credit

Philosophy

PHIL 0010 - CONCEPTS OF HUMAN NATURE

Minimum Credits: 3

Maximum Credits: 3

An introduction to some ways in which ethical and social thought has been influenced by different views of human nature. Readings are from such authors as Plato, Hobbes, Rousseau, Marx, and Freud.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, SCI Polymathic Contexts: Ethical/Policy GE. Req., West European Studies

PHIL 0012 - CONCEPTS HUMAN NATURE/WRITING PRACTICUM

Minimum Credits: 4

Maximum Credits: 4

This practicum is the special writing recitation for the lecture course "Concepts of Human Nature".

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, SCI Polymathic Contexts: Ethical/Policy GE. Req., West European Studies, Writing Intensive Course (WRIT)

PHIL 0080 - INTRODUCTION TO PHILOSOPHICAL PROBLEMS

Minimum Credits: 3

Maximum Credits: 3

An introduction to some classical problems of philosophy. Topics vary, but might include skepticism, free will, the existence of god, and the justification of ethical beliefs.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, SCI Polymathic Contexts: Ethical/Policy GE. Req., West European Studies, Writing Requirement Course

PHIL 0082 - INTRODUCTION PHILOSOPHICAL PROBLEM/WRITING PRACTICUM

Minimum Credits: 4

Maximum Credits: 4

An introduction to some classical problems of philosophy. Topics vary, but might include skepticism, free will, the existence of god, and the justification of ethical beliefs. Special writing component for PHIL 0080, "Introduction to Philosophical Problems".

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, SCI Polymathic Contexts: Ethical/Policy GE. Req., West European Studies, Writing Intensive Course (WRIT)

PHIL 0200 - HISTORY OF ANCIENT PHILOSOPHY

Minimum Credits: 3

Maximum Credits: 3

The aim of this course is to introduce students to some of the main achievements and leading ideas of ancient Greek philosophy up to classical times. Emphasis will be on understanding and evaluating the arguments and ideas of the Greek philosophical tradition.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, Medieval & Renaissance Studies, SCI Polymathic Contexts: Ethical/Policy GE. Req., West European Studies

PHIL 0202 - HISTORY ANCIENT PHILOSOPHY/WRITING PRACTICUM

Minimum Credits: 4

Maximum Credits: 4

The aim of this course is to introduce students to some of the main achievements and leading ideas of ancient Greek philosophy up to classical times. Emphasis will be on understanding and evaluating the arguments and ideas of the Greek philosophical tradition. Special writing component for PHIL 0200, "History of Ancient Philosophy".

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, Medieval & Renaissance Studies, SCI Polymathic Contexts: Ethical/Policy GE. Req., West European Studies, Writing Intensive Course (WRIT)

PHIL 0210 - HISTORY OF MODERN PHILOSOPHY

Minimum Credits: 3

Maximum Credits: 3

An introduction to the philosophical period from Descartes through Kant. Special attention is given to at least one rationalist, one empiricist, and Kant.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, Global Studies, SCI Polymathic Contexts: Ethical/Policy GE. Req., West European Studies

PHIL 0212 - HISTORY OF MODERN PHILOSOPHY/Writing Practicum

Minimum Credits: 4

Maximum Credits: 4

This practicum is the special writing recitation for the lecture course "History of Modern Philosophy".

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, Global Studies, SCI Polymathic Contexts: Ethical/Policy GE. Req., West European Studies, Writing Intensive Course (WRIT)

PHIL 0220 - INTRODUCTION TO EXISTENTIALISM

Minimum Credits: 3

Maximum Credits: 3

This introductory level course explores the central existentialist question of how to be a genuine individual or self through reading of several major authors, such as Pascal, Kierkegaard, Dostoevski, Nietzsche, and Sartre.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, Global Studies, SCI Polymathic Contexts: Ethical/Policy GE. Req., West European Studies

PHIL 0222 - INTRODUCTION TO EXISTENTIALISM/Writing Practicum

Minimum Credits: 4

Maximum Credits: 4

This practicum is the special writing recitation for the lecture course "Introduction to Existentialism"; it includes extra emphasis on and credit for instruction in writing skills.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, SCI Polymathic Contexts: Ethical/Policy GE. Req., Writing Intensive Course (WRIT)

PHIL 0275 - INTRODUCTION TO CHINESE PHILOSOPHY

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, SCI Polymathic Contexts: Ethical/Policy GE. Req., SCI Polymathic Contexts: Global&Cross Cul GE. Req.

PHIL 0280 - INTRODUCTION TO INDIAN PHILOSOPHY

Minimum Credits: 3

Maximum Credits: 3

An introduction to the classical philosophy of India. Topics vary, but might include unselfing, knowledge, dharma, and karma.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PHIL 0300 - INTRODUCTION TO ETHICS

Minimum Credits: 3

Maximum Credits: 3

This is an introductory course considering the question of one fundamental moral principle - right and wrong. The results are applied to moral problems of serious interest today.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, SCI Polymathic Contexts: Ethical/Policy GE. Req., West European Studies

PHIL 0302 - INTRODUCTION TO ETHICS/WRITING PRACTICUM

Minimum Credits: 4

Maximum Credits: 4

This practicum is the special writing recitation for the lecture course "Introduction to Ethics".

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, Global Studies, SCI Polymathic Contexts: Ethical/Policy GE. Req., West European Studies, Writing Intensive Course (WRIT)

PHIL 0320 - SOCIAL PHILOSOPHY

Minimum Credits: 3

Maximum Credits: 3

An introduction to some traditional philosophical perspectives on the nature of society. Philosophers studied might include Plato, Hobbes, Marx, and Twentieth-Century social theorists.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, Global Studies, SCI Polymathic Contexts: Ethical/Policy GE. Req., West European Studies

PHIL 0322 - SOCIAL PHILOSOPHY/WRITING PRACTICUM

Minimum Credits: 4

Maximum Credits: 4

This practicum is the special writing recitation for the lecture course "Social Philosophy".

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, SCI Polymathic Contexts: Ethical/Policy GE. Req., West European Studies, Writing Intensive Course (WRIT)

PHIL 0330 - POLITICAL PHILOSOPHY

Minimum Credits: 3

Maximum Credits: 3

This introductory level undergraduate course studies several important views on the nature and justification of government, such as those of Plato, Hobbes, and Marx.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, Global Studies, SCI Polymathic Contexts: Ethical/Policy GE. Req., West European Studies

PHIL 0332 - POLITICAL PHILOSOPHY/WRITING PRACTICUM

Minimum Credits: 4

Maximum Credits: 4

This practicum is the special writing recitation for the lecture course "Political Philosophy".

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, Global Studies, SCI Polymathic Contexts: Ethical/Policy GE. Req., West European Studies, Writing Intensive Course (WRIT)

PHIL 0350 - PHILOSOPHY AND PUBLIC ISSUES

Minimum Credits: 3

Maximum Credits: 3

The aim of this introductory undergraduate course is to encourage systematic and clear thought about issues of public importance by philosophic reflection which emphasizes the implications of different moral and political theories for these issues.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, SCI Polymathic Contexts: Ethical/Policy GE. Req.

PHIL 0352 - PHILOSOPHY AND PUBLIC ISSUES/WRITING PRACTICUM

Minimum Credits: 4

Maximum Credits: 4

This practicum is the special writing recitation for the lecture course "Philosophy and Public Issues".

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, SCI Polymathic Contexts: Ethical/Policy GE. Req., Writing Intensive Course (WRIT)

PHIL 0360 - INTRODUCTION TO BIOMEDICAL ETHICS

Minimum Credits: 3

Maximum Credits: 3

This introductory level undergraduate course examines various ethical problems arising in medicine, such as euthanasia, abortion, and the allocation of resources.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, SCI Polymathic Contexts: Ethical/Policy GE. Req.

PHIL 0362 - INTRODUCTION TO BIOMEDICAL ETHICS CREDIT LABORATORY

Minimum Credits: 4

Maximum Credits: 4

This practicum is the special writing recitation for the lecture course "Introduction to Bioethics"

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, SCI Polymathic Contexts: Ethical/Policy GE. Req., Writing Requirement Course

PHIL 0380 - WOMEN AND PHILOSOPHY

Minimum Credits: 3

Maximum Credits: 3

Primary objectives will be to acquaint students with the history of the relation between women and philosophy in the Western tradition and to teach students to think and write clearly.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Gender, Sexuality & Women's St, SCI Polymathic Contexts: Ethical/Policy GE. Req.

PHIL 0440 - MINDS AND MACHINES

Minimum Credits: 3

Maximum Credits: 3

This introductory level course is devoted to explicating and critically evaluating the thesis that the human mind, or at least its cognitive faculty, can be understood as a computing machine. Readings are primarily from contemporary authors, and include both scientists and philosophers.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, SCI Polymathic Contexts: Ethical/Policy GE. Req.

PHIL 0442 - MINDS AND MACHINES/WRITING PRACTICUM

Minimum Credits: 4

Maximum Credits: 4

This practicum is the special writing recitation for the lecture course "Minds and Machines".

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, SCI Polymathic Contexts: Ethical/Policy GE. Req., Writing Intensive Course (WRIT)

PHIL 0450 - THEORIES OF KNOWLEDGE & REALITY

Minimum Credits: 3

Maximum Credits: 3

This course gives a broad introduction to classic and contemporary work on central questions in metaphysics and epistemology. Central topics of concern will be the nature of reality and the possibility of knowledge. Along the way we will discuss skeptical arguments to the effect that knowledge of certain aspects of reality is impossible and classic and contemporary responses to them. We will also discuss a number of topics in metaphysics, which may include the nature of the self, time, the relationship between mind and body, the existence of god, and debates between materialists and idealists.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, SCI Polymathic Contexts: Ethical/Policy GE. Req.

PHIL 0452 - THEORIES OF KNOWLEDGE & REALITY / WRIT LABORATORY

Minimum Credits: 4

Maximum Credits: 4

This writing laboratory is the special writing recitation for the lecture course "Theories of Knowledge & Reality".

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, SCI Polymathic Contexts: Ethical/Policy GE. Req.

PHIL 0460 - INTRODUCTION TO PHILOSOPHY OF MIND

Minimum Credits: 3

Maximum Credits: 3

This course gives a broad introduction to contemporary work on the philosophy of mind. It will primarily focus on the nature of consciousness, the mind-body problem, and may include how we know the minds of other human beings, the nature of personal identity over time, as well as discussion of the theory of action.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, SCI Polymathic Contexts: Ethical/Policy GE. Req.

PHIL 0462 - INTRODUCTION TO PHILOSOPHY OF MIND / WRIT LABORATORY

Minimum Credits: 4

Maximum Credits: 4

This writing laboratory is the special writing recitation for the lecture course "Introduction to Philosophy of Mind".

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, SCI Polymathic Contexts: Ethical/Policy GE. Req., Writing Intensive Course (WRIT)

PHIL 0470 - PHILOSOPHY OF RELIGION

Minimum Credits: 3

Maximum Credits: 3

A critical examination of the rationality of faith in the existence of god. Traditional arguments both for and against the existence of god are considered, along with pragmatic justifications of faith based upon its beneficial consequences.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, Global Studies, SCI Polymathic Contexts: Ethical/Policy GE. Req.

PHIL 0472 - PHILOSOPHY OF RELIGION/WRITING PRACTICUM

Minimum Credits: 4

Maximum Credits: 4

This practicum is the special writing recitation for the lecture course "Philosophy of Religion".

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, SCI Polymathic Contexts: Ethical/Policy GE. Req., Writing Intensive Course (WRIT)

PHIL 0473 - PHILOSOPHY OF RELIGION

Minimum Credits: 3

Maximum Credits: 3

An examination of the arguments for and against the existence of god.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, Global Studies, SCI Polymathic Contexts: Ethical/Policy GE. Req., West European Studies

PHIL 0500 - INTRODUCTION TO LOGIC

Minimum Credits: 3

Maximum Credits: 3

An introduction to the concepts and methods of modern deductive logic. Propositional logic is emphasized, but quantificational logic is touched upon.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Quant.-Formal Reason General Ed. Requirement

PHIL 0610 - PHILOSOPHY AND SCIENCE

Minimum Credits: 3

Maximum Credits: 3

An introductory course in philosophy of science.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, SCI Polymathic Contexts: Ethical/Policy GE. Req.

PHIL 0612 - PHILOSOPHY AND SCIENCE/WRITING PRACTICUM

Minimum Credits: 4

Maximum Credits: 4

This practicum is the special writing recitation for the lecture course "Philosophy and Science".

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, SCI Polymathic Contexts: Ethical/Policy GE. Req., Writing Intensive Course (WRIT)

PHIL 0831 - RELIGION AND RATIONALITY

Minimum Credits: 3

Maximum Credits: 3

Does--and should--religion have a role in the secular sphere? How does culture shape religion? Is faith compatible with reason? This course critically examines how both religious and nonreligious thinkers have navigated the question of the relation between faith and reason throughout the history of Western thought. Special attention will be paid to evaluating how the relationship between religion and philosophy developed within Christianity, Judaism, and Islam. A further

emphasis will be given to how the relationship between religion and philosophy shapes the our approach to myth, race, gender, and science.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, SCI Polymathic Contexts: Ethical/Policy GE. Req.

PHIL 0840 - SCIENCE AND RELIGION

Minimum Credits: 3

Maximum Credits: 3

Are science and religion at odds or harmonizable? Do they coincide or represent completely separate discourses? This course examines the relationship between science, rationality, faith, and religion. Special attention will be given to ancient creation narratives and their interpretation, historical dialogues regarding faith and reason in the Western monotheist faiths (Christianity, Judaism, Islam), the scientific revolution, and various approaches to evolutionary theory. We will also consider practical, contemporary issues such as neuroscience and religious practice, ecology and faith, and scientific views toward gender and race.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, SCI Polymathic Contexts: Ethical/Policy GE. Req.

PHIL 0850 - PHILOSOPHY AND LIBERAL DEMOCRACY

Minimum Credits: 3

Maximum Credits: 3

This course provides an introduction to several problems common to philosophers and politics and introduces students to the different theories, modes of argument, and techniques of analysis used by the two disciplines to understand them. It is intended to help students deepen their understanding of the dominant political stance of our society.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SU3 Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, SCI Polymathic Contexts: Ethical/Policy GE. Req., West European Studies, Writing Intensive Course (WRIT)

PHIL 1020 - PLATO

Minimum Credits: 3

Maximum Credits: 3

This is an advanced undergraduate course examining Plato's main views both in their historical context, and as they influence our own thinking today; the relations between Socrates and the sophists are also studied.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: Any other Philosophy course.

Course Attributes: West European Studies

PHIL 1040 - ARISTOTLE

Minimum Credits: 3

Maximum Credits: 3

This is an advanced undergraduate course examining the basic concepts of Aristotle's metaphysics, physics, ethics and logic.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: Any Other Philosophy Course

Course Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, SCI Polymathic Contexts: Ethical/Policy GE. Req., West European Studies

PHIL 1070 - TOPICS IN ANCIENT PHILOSOPHY

Minimum Credits: 3

Maximum Credits: 3

An investigation of a particular topic or figure in the field of ancient philosophy.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: Any Other Philosophy Course

PHIL 1075 - PHILOSOPHY AND ANCIENT SCIENCE

Minimum Credits: 3

Maximum Credits: 3

An examination of philosophical issues arising in the development of ancient science.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PHIL 1078 - ISLAMIC PHILOSOPHY

Minimum Credits: 3

Maximum Credits: 3

An examination of the great philosophers of the classical period of Islam.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PHIL 1080 - MEDIEVAL PHILOSOPHY

Minimum Credits: 3

Maximum Credits: 3

This advanced undergraduate course examines selected major figures in European philosophy during the middle ages.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: Any Other Philosophy Course

PHIL 1110 - RATIONALISM

Minimum Credits: 3

Maximum Credits: 3

An examination, at the advanced undergraduate level, of several important rationalist philosophers, such as Hobbes, Descartes, Spinoza, and Leibniz.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: Any Other Philosophy Course

Course Attributes: West European Studies

PHIL 1140 - EMPIRICISM

Minimum Credits: 3

Maximum Credits: 3

An examination, at the advanced undergraduate level, of several important empiricist philosophers, such as Bacon, Locke, Berkeley, Hume, and Reid.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: Any Other Philosophy Course

Course Attributes: West European Studies

PHIL 1170 - KANT

Minimum Credits: 3

Maximum Credits: 3

An introduction to the philosophy of Kant, focusing on the "critique of pure reason". The course seeks to enable the advanced undergraduate to understand the theories and arguments of this revolutionary and rewarding work.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: PHIL 0210 or 0212 or PHIL 1110 or PHIL 1140 or permission of the instructor

Course Attributes: West European Studies

PHIL 1171 - KANT'S PRACTICAL PHILOSOPHY

Minimum Credits: 3

Maximum Credits: 3

An introduction to the practical philosophy of Kant. The course seeks to enable the advanced undergraduate to understand the arguments of Kant's ethical theory.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PHIL 1180 - 19TH CENTURY PHILOSOPHY

Minimum Credits: 3

Maximum Credits: 3

A survey, at the advanced undergraduate level, of the thought and unity of the three great German philosophers of the nineteenth century; Hegel, Marx, and Nietzsche.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: Any Other Philosophy Course

PHIL 1183 - MARX

Minimum Credits: 3

Maximum Credits: 3

An examination of the philosophy of Marx and his place in the history of philosophy.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PHIL 1200 - 20TH CENTURY ANALYTIC PHILOSOPHY

Minimum Credits: 3

Maximum Credits: 3

This advanced undergraduate course examines major trends in contemporary analytic philosophy, including, for instance, some (but not all) of logical empiricism, logical positivism, Wittgenstein and his followers, ordinary language ("oxford") philosophy, Quine and his followers, Sellars and his followers, and so on.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: Any other Philosophy course.

PHIL 1225 - WITTGENSTEIN

Minimum Credits: 3

Maximum Credits: 3

In depth study of some central sections of Wittgenstein's Philosophical Investigations. The objective will be not only to improve understanding of issues about language, mind, and reality raised in that brilliant but cryptic work, but also to situate the work historically in relation to Wittgenstein's earlier masterpiece Tractatus Logico-Philosophicus; the analytic tradition in 20th century philosophy; and modern philosophy in general.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: Any Other Philosophy Course

Course Attributes: West European Studies

PHIL 1240 - AMERICAN PRAGMATISM

Minimum Credits: 3

Maximum Credits: 3

This is an advanced undergraduate course in the "classical" American pragmatists, especially Pierce, James, Dewey, and Mead.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: Any Other Philosophy Course

PHIL 1290 - TOPICS IN HISTORY OF PHILOSOPHY

Minimum Credits: 3

Maximum Credits: 3

This course covers a special topic in the history of philosophy. Please consult the Philosophy Department or the instructor for details

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: Must have taken 1 prior philosophy course to enroll in PHIL 1290.

PHIL 1300 - ETHICAL THEORY

Minimum Credits: 3

Maximum Credits: 3

An advanced undergraduate examination of various topics in ethical theory, such as ethical relativism, subjective and objective value, the relation of reason and ethics, ethical realism, utilitarianism and contractarianism, and virtues and vices.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: PHIL 0300 or 0330 or 0332 or 0350 or any 1000 level Philosophy course.

PHIL 1305 - TOPICS IN ETHICS

Minimum Credits: 3

Maximum Credits: 3

Examination of one or more specific ethical topics, such as the nature of evil, the highest good, the conditionality thesis.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PHIL 1310 - HISTORY OF ETHICS

Minimum Credits: 3

Maximum Credits: 3

An examination of some of the principal moral philosophers in one or more of the major historical periods from Homeric times to the present day--such as Plato, Aristotle, Aquinas, Hobbes, Hume, Kant, Nietzsche, Mill, and Rawls.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: Any Other Philosophy Course

Course Attributes: SCI Polymathic Contexts: Ethical/Policy GE. Req.

PHIL 1315 - APPLIED ETHICS

Minimum Credits: 3

Maximum Credits: 3

The application of ethical theory to specific issues of contemporary life. Specific topics vary with each offering of the course.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PHIL 1317 - PHILOSOPHY OF RACE AND RELIGION

Minimum Credits: 3

Maximum Credits: 3

The history of European religious thought (particularly Christianity) and the development of the idea of race are interwoven. While many devoutly religious people throughout history have, no doubt, been part of movements to oppose the horrific acts that occurred under colonization, end slavery, oppose Nazi anti-Semitism, or promote Civil Rights, for example, the very concept of separate races and the promotion of the ideal of white supremacy were in many ways innovations of European Christian theology. Indeed, religious arguments for white supremacy undergird many of the justifications for colonization and genocide, for slavery, and for Jim Crow laws and apartheid. As a result, despite important developments toward equality, racism remains ubiquitous and part of the underlying logic of the religious, political, and cultural milieu of American society, even if its effects often remain unnamed or are less explicit. This course is a philosophical exploration of the intersections of race, racism, and religious thought. It begins with an analysis of the philosophical and religious positions that solidified and promoted the idea of race, traces the entanglement of Western philosophy and Christian theology with racist political ideologies, and presents critical responses to race from African-American philosophers and liberation theologies. It ends by evaluating the continued effects of racism in American culture and religious thought and considers how we might both understand and respond to the epistemological, phenomenological, and existential effects of white supremacy in Western thought.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PHIL 1319 - ETHICS AND SPORT

Minimum Credits: 3

Maximum Credits: 3

An examination of the ethical and social issues that arise in connection with sport.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PHIL 1320 - TOPICS IN SOCIAL PHILOSOPHY

Minimum Credits: 3

Maximum Credits: 3

This advanced undergraduate course concentrates on a few selected philosophical problems concerning the nature of society; the selection will vary from one offering of the course to another. The course may be historical or topical in approach.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: Any Other Philosophy Course

PHIL 1330 - TOPICS IN POLITICAL PHILOSOPHY

Minimum Credits: 3

Maximum Credits: 3

This advanced undergraduate course concentrates on a few selected philosophical problems concerning the nature and justification of government; the selection will vary from one offering of the course to another.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: Any Other Philosophy Course

PHIL 1340 - FEMINIST PHILOSOPHY

Minimum Credits: 3

Maximum Credits: 3

A comparison of biological, psychological, and economic theories of the nature and causes of the oppression of women. Authors studied might include de Beauvoir, Freud, Marx, Veblen, and Emma Goldman.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: Any Other Philosophy Course

Course Attributes: Gender, Sexuality & Women's St, Global Studies

PHIL 1360 - BIOMEDICAL ETHICS

Minimum Credits: 3

Maximum Credits: 3

This advanced undergraduate course examines a selection of ethical problems arising in medicine, such as euthanasia, abortion, and the allocation of resources, and/or ethical issues relating to other species, such as vegetarianism, animal rights, and possible interplanetary morality. The selection will vary from one offering of the course to the next.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: Any Other Philosophy Course

Course Attributes: SCI Polymathic Contexts: Ethical/Policy GE. Req.

PHIL 1370 - PHILOSOPHY OF ART

Minimum Credits: 3

Maximum Credits: 3

This advanced undergraduate course addresses philosophical problems that arise in connection with art, such as the nature of works of art, the comparison and contrast between representational and non-representational art, the definition of beauty, and special obligations concerning art works.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: Any Other Philosophy Course

PHIL 1375 - PHILOSOPHY AND LITERATURE

Minimum Credits: 3

Maximum Credits: 3

An examination of philosophical issues relating to literature and/or the literary character of philosophy.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PHIL 1385 - ETHICS AND ECONOMICS

Minimum Credits: 3

Maximum Credits: 3

Ethicists and political philosophers are often interested in which economic policies we should adopt. For instance, should we have a school voucher program? Should healthcare be subsidized by the state? Should income or resources be redistributed to achieve a more equitable society? The field of welfare economics is also interested in questions like these, and has developed a comprehensive ethical theory which allows the theoretical tools of economics to be brought to bear on, and offer answers to, these questions. Arguments imported from welfare economics are frequently cited in public policy debates. Figuring out what we think of these arguments requires a careful study of the theoretical and ethical assumptions implicit in the framework of welfare economics, as well as an appraisal of the kinds of ethical views welfare economics commits itself to.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PHIL 1390 - PHILOSOPHY OF LAW

Minimum Credits: 3

Maximum Credits: 3

This advanced undergraduate course examines a selection of philosophical questions that arise in connection with the theory and practice of law, including constitutional, criminal, and tort law. Topics might include such issues as the comparative role of judges and legislators in making law, the nature of justice, and the relation of law to morality.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: Any Other Philosophy Course

PHIL 1400 - RIGHTS AND HUMAN RIGHTS

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PHIL 1410 - PHILOSOPHY OF ACTION

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PHIL 1420 - PHILOSOPHY OF LANGUAGE

Minimum Credits: 3

Maximum Credits: 3

This course is an introduction to the philosophy of language that is, the study of representation, meaning, truth, communication, and the relationships between them. In the past century, the philosophy of language has been one of the most influential branches of philosophy, both in terms of its influence on philosophy more generally and its influence on other disciplines. Within philosophy, it has shaped the terms of debate in virtually every other subfield. Outside philosophy, it has provided insight into human cognition and social interactions. This course will survey a series of classic topics while providing students with a toolbox of concepts and techniques common to the discipline.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: Any Philosophy Course

PHIL 1422 - INTRODUCTION TO SEMANTIC THEORY

Minimum Credits: 3

Maximum Credits: 3

This course is designed to introduce students who have been exposed to linguistics and logic to contemporary work in the theory of meaning.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: PHIL 0500 or Instructor Permission

PHIL 1440 - PHILOSOPHY OF MIND

Minimum Credits: 3

Maximum Credits: 3

This is an advanced undergraduate course in the philosophy of mind, taking up problems of both historical and contemporary interest. Topics vary, but are likely to include many of mind-body dualism, materialist reductionism, phenomenalism, the other-minds problem, philosophical behaviorism, qualia, propositional attitude ascriptions, intentionality, and so on.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: Any Other Philosophy Course

PHIL 1460 - THEORY OF KNOWLEDGE

Minimum Credits: 3

Maximum Credits: 3

This is an advanced undergraduate course in recent and contemporary epistemology. Topics vary somewhat, but generally include many of the following: skepticism, sense data and the myth of the given, induction and confirmation, definition of "knowing-that-p", holism and coherence, the status of common sense, and so on.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: Any Other Philosophy Course

PHIL 1465 - SOCIAL EPISTEMOLOGY

Minimum Credits: 3

Maximum Credits: 3

As social creatures, we learn from each other, and our ways of believing affect each other. As animals, we have imperfect cognitive systems, facts about which may help answer what we can and should believe in certain contexts. With these facts in mind, the guiding questions of the course will be these: (1) Can we arrive at knowledge, given that we are imperfect animals acting in complicated social and environmental contexts? (2) How should facts about our social identities and our cognitive systems determine what we should or should not believe? (3) How do our ways of believing affect each other, and how can we mitigate potential harms that may arise on account of our ways of believing?

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

PHIL 1480 - METAPHYSICS

Minimum Credits: 3

Maximum Credits: 3

This advanced undergraduate course considers a selection of central problems in metaphysics, such as the problems of realism, essentialism, free will, necessity and possibility, substance and property, persistence through time (including personal identity), the nature of truth, and so on.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: Any Other Philosophy Course

PHIL 1500 - SYMBOLIC LOGIC

Minimum Credits: 3

Maximum Credits: 3

This advanced undergraduate course develops skills in formal and informal reasoning in predicate-quantifier logic, and covers formal semantics for sentential logic, informal semantics for predicate-quantifier logic, and elementary syntactic metatheory.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: PHIL 0500

Course Attributes: DSAS Quant.-Formal Reason General Ed. Requirement

PHIL 1530 - SET THEORY

Minimum Credits: 3

Maximum Credits: 3

An elementary development of axiomatic set theory, together with a philosophical discussion of set-theoretic foundations of mathematics.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: PHIL 0500

PHIL 1550 - PROBABILITY AND INDUCTION

Minimum Credits: 3

Maximum Credits: 3

A survey of major issues regarding inductive reasoning in everyday life and in science. Various concepts of probability will be examined and related to human decision making. The classic problems of justification and induction, due to David Hume, will be discussed.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: PHIL 0500

PHIL 1555 - RATIONALITY

Minimum Credits: 3

Maximum Credits: 3

This course will focus on an influential analysis of rationality: the game-theoretic notion, which has agents attempting to maximize their expected utility. We will consider the foundations of this approach, criticisms of it, and applications of it to several areas of philosophy (including political philosophy, philosophy of language, and philosophy of science).

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: Any Other Philosophy Course

PHIL 1580 - PHILOSOPHY OF MATHEMATICS

Minimum Credits: 3

Maximum Credits: 3

A survey of issues in the philosophy of mathematics, emphasizing both a historical perspective and contemporary logical foundations of mathematics. Special attention is given to geometry or number theory.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: Must have previously taken any Philosophy course

PHIL 1600 - PHILOSOPHY & RISE MODERN SCIENCE

Minimum Credits: 3

Maximum Credits: 3

This advanced undergraduate course explores the mutually reinforcing relationships between modern philosophy and modern empirical science in and around the seventeenth century. Authors studied might include Copernicus, Galileo, Bacon, Descartes, Locke, Newton, and Leibniz, as well as contemporary historians of science and philosophy.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: Any Other Philosophy Course

Course Attributes: Global Studies, SCI Polymathic Contexts: Ethical/Policy GE. Req., West European Studies

PHIL 1610 - INTRO TO PHILOSOPHY OF SCIENCE

Minimum Credits: 3

Maximum Credits: 3

This course provides a broad, introductory survey of current issues in philosophy of science and treats philosophical problems such as confirmation, which are common to all sciences, as well as problems peculiar to individual sciences.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: Any Other Philosophy Course

PHIL 1612 - PHIL OF 20TH CENTURY PHYSICS

Minimum Credits: 3

Maximum Credits: 3

An examination of the fascinating philosophical problems to which modern physical theories have given rise. No previous formal training in physics or mathematics will be presupposed, since the basic physical ideas needed will be introduced largely qualitatively with an emphasis on concepts rather than equations. Topics will vary from year to year with instructor, but center around classical mechanics, quantum mechanics, and relativity theory.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: Any Other Philosophy Course

PHIL 1640 - PHILOSOPHY OF PSYCHOLOGY

Minimum Credits: 3

Maximum Credits: 3

This advanced undergraduate course covers such topics as mind-body reductionism, behaviorism, functionalism, cognitivism, and the relation of artificial intelligence research to psychological theory.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: Any Other Philosophy Course

PHIL 1650 - PHILOSOPHY OF BIOLOGY

Minimum Credits: 3

Maximum Credits: 3

Philosophy of biology will consider foundational conceptual issues in biology like the nature and structure of biological explanation, the possibility of laws in evolutionary theory, the relationship between different causal components of biological processes (genetics and development), the problem of species reality and classification, the explanatory character of ascription of biological function, and the extension of biological explanations to human psychology and culture.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: Any Other Philosophy Course

Course Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, SCI Polymathic Contexts: Ethical/Policy GE. Req.

PHIL 1660 - PARADOX

Minimum Credits: 3

Maximum Credits: 3

This course explores paradoxes both for the fun of untangling an intriguing puzzle and for the more serious reason of the easy access they provide to some of the most important foundational issues in philosophy and the sciences.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: Any Other Philosophy Course

Course Attributes: Hourly Final

PHIL 1682 - FREEDOM AND DETERMINISM

Minimum Credits: 3

Maximum Credits: 3

This course analyzes three concepts of determinism--the logical determinism, logical determinism or fatalism, and physical determinism--and examines the various philosophical arguments designed either to show that determinism and free will do clash or alternatively that they are reconcilable.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: Any Other Philosophy Course

Course Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, SCI Polymathic Contexts: Ethical/Policy GE. Req.

PHIL 1690 - TOPICS IN PHILOSOPHY OF SCIENCE

Minimum Credits: 3

Maximum Credits: 3

Discussion, at the advanced undergraduate level, of selected problems such as confirmation, concept formation, the nature of theories. In any given term, the course might focus on problems in physical, biological, or social sciences.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: Any Other Philosophy Course

PHIL 1762 - THE GUIDE OF THE PERPLEXED

Minimum Credits: 3

Maximum Credits: 3

Moses Maimonides (1138-1204) was the greatest Jewish thinker of the medieval period, and remains highly influential today. Born in Spain, he became the leading rabbinic authority of his time by writing a compendium of Jewish law, the Mishnah Torah. He was also famous as a physician and author of medical works. His widest impact, however, has been through his masterpiece of philosophy of religion, *The Guide of the Perplexed*. This engaging, elusive book is important not only for its influence on such major thinkers as Aquinas, Spinoza, Leibniz, and Newton, but also for its insight into questions of religion and rationality. In this course we will study virtually all of the *Guide*, giving special attention to Maimonides' account of the fall, his theory of religious language, his arguments for the existence of god, his doctrine of creation, his teachings on religious experience, prophecy, and revelation, and his views on human perfection and immortality. In our sessions we will work closely and carefully through the text, at each step following up Maimonides' hints and challenges to his readers. Our goal will be not merely to appreciate the surface purport of the book, but also to discern its deeper implications, through which Maimonides sought to suggest, to a few of his readers, the secret meaning of the bible itself.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, SCI Polymathic Contexts: Ethical/Policy GE. Req.

PHIL 1765 - MODERN AND CONTEMPORARY JEWISH THOUGHT

Minimum Credits: 3

Maximum Credits: 3

This course will introduce students to the varieties of Jewish thought, which developed out of the 19th and 20th centuries and to the present day. After exploring the historical context of the philosophical legacy of Jewish thought, we will consider how Jewish intellectuals sought to reimagine their Jewish faith and Jewish identity in response to various concerns in the 19th and 20th centuries. Specifically, we will analyze Jewish responses to modernity and secularism, Jewish engagement with Western culture and Christianity, political theory (e.g. Marxism) and matters of

social justice, Jewish feminism, and the prospect of ethics and religious faith after the Holocaust.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PHIL 1770 - INDIAN PHILOSOPHY

Minimum Credits: 3

Maximum Credits: 3

This course offers a detailed study of one or more traditions in Indian philosophy, such as Jainism or Buddhism.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PHIL 1890 - ISSUES IN PHILOSOPHY (VARIOUS)

Minimum Credits: 3

Maximum Credits: 3

This intensive, advanced-level seminar is reserved for special philosophical topics that do not fit standard course-catalog categories. Issues discussed vary from year to year, but tend to be narrowly focused and specialized.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: Any Other Philosophy Course

PHIL 1901 - INDEPENDENT STUDY--UNDERGRADUATE

Minimum Credits: 1

Maximum Credits: 9

This course is a way of offering university credit in philosophy for relevant experiences or work undertaken independently, with little or no formal interaction with an instructor.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: LG/SNC Elective Basis

PHIL 1902 - DIRECTED STUDY--UNDERGRADUATE

Minimum Credits: 1

Maximum Credits: 9

This course provides an individualized study program, on a topic not covered in the regular curriculum, under the close supervision of a faculty advisor. The student is generally expected to produce a substantial piece of written work.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SNC Elective Basis

PHIL 1903 - DIRECTED RESEARCH--UNDERGRADUATE

Minimum Credits: 1

Maximum Credits: 9

This course is a way of offering university credit in philosophy for research work undertaken by a student under the direction of a faculty member in connection with that faculty member's own research.

Academic Career: Undergraduate
Course Component: Directed Studies
Grade Component: LG/SNC Elective Basis

PHIL 1940 - HONORS THESIS/MAJORS

Minimum Credits: 3

Maximum Credits: 3

This is a special directed study for senior philosophy majors who wish to write an honors thesis over two terms. Use course PHIL 1941 for the second term.

Academic Career: Undergraduate
Course Component: Directed Studies
Grade Component: Letter Grade

PHIL 1941 - HONORS THESIS 2/MAJORS

Minimum Credits: 3

Maximum Credits: 3

This is the second term of course 1940.

Academic Career: Undergraduate
Course Component: Directed Studies
Grade Component: Letter Grade

PHIL 1942 - HONORS THESIS 3/MAJORS

Minimum Credits: 6

Maximum Credits: 6

This is a special directed study for senior philosophy majors who wish to write an honors thesis in one term.

Academic Career: Undergraduate
Course Component: Directed Studies
Grade Component: Letter Grade

Physics

PHYS 0081 - SPACE AND TIME, LIGHT AND MATTER

Minimum Credits: 3

Maximum Credits: 3

This course introduces non-science students to the ideas of physics with emphasis on modern physics. Early ideas of the atom, Newton's laws of motion, heat and energy, electromagnetic waves and light are discussed. This is followed by modern ideas of space and time as explained by Einstein's famous theories as well as current ideas about our Universe and cosmology. The course concludes by addressing current ideas about the quantum world. The course contains trace amounts of Math. The minimum requirement is MATH 0031 (Algebra).

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req.

PHYS 0082 - SCIENCE OF MUSICAL SOUNDS

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to the physical ideas underlying musical phenomena.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: MATH 0020 or any MATH greater than or equal to MATH 0031 (Min Grade 'C') or MATH PLACEMENT SCORE (61 or greater) or SAT Math (620 or greater) or ACT Math (27 or greater)

Course Attributes: DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req.

PHYS 0087 - PHYSICS AND SOCIETY

Minimum Credits: 3

Maximum Credits: 3

This course is meant for non-science students interested in learning about the scientific method and its applications to current societal issues. Topics include: (1) What is Science?; (2) Studies; (3) Pseudoscience; (4) Energy and Entropy; (5) Electricity, Magnetism, and Light; (6) Atom and Light; (7) Climate; (8) Nuclear Energy; and (9) Global Resources. There will be no mathematics beyond multiplication and reading graphs.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req.

PHYS 0088 - THE PHYSICS OF ENERGY

Minimum Credits: 3

Maximum Credits: 3

This is an introductory course on energy. The course will describe both qualitatively and quantitatively energy use, energy generation, and sources of energy. In this course, we will explore potential energy sources and the limitations of potential energy sources for specific practical applications. The course will also describe many of the basic physical considerations related to climate change as this phenomenon has now become intimately connected with energy use.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SU3 Elective Basis

Course Attributes: DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req.

PHYS 0089 - PHYSICS AND SCIENCE FICTION

Minimum Credits: 3

Maximum Credits: 3

This course looks at some of the physical ideas underlying stories by leading writers of science fiction.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req.

PHYS 0091 - CONCEPTUAL PHYSICS

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req.

PHYS 0110 - INTRODUCTION TO PHYSICS 1

Minimum Credits: 3

Maximum Credits: 3

This is the first term of a two-term, algebra-based sequence in introductory physics. This term deals with mechanics, heat and thermodynamics, and waves.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: MATH 0020 or any MATH greater than or equal to MATH 0031 or SAT Math Score (620 or greater) or ACT Math Score (27 or greater) or Math Placement Score (61 or greater)

Course Attributes: DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req., SCI Polymathic Contexts: Science Seq.GE. Req.

PHYS 0111 - INTRODUCTION TO PHYSICS 2

Minimum Credits: 3

Maximum Credits: 3

This is the second term of a two-term, algebra-based sequence in introductory physics. This term deals with electricity and magnetism, optics, and modern physics.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: PHYS 0110 or 0174 or 0475; MIN GRAD: 'C' for all listed Courses

Course Attributes: DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req., SCI Polymathic Contexts: Science Seq.GE. Req.

PHYS 0174 - BASIC PHYSICS, SCIENCE AND ENGINEERING 1 (INTEGRATED)

Minimum Credits: 4

Maximum Credits: 4

The integrated curriculum version of PHYS 0104, the first part of a two-term sequence (0174-0175) introduces students to the basic principles of mechanics. An effort has been made to achieve a better integration of physics with the first term of calculus, engineering, and chemistry. The theory of waves and the kinetic theory of gases will be discussed.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: CREQ: MATH 0220 or 0235

Course Attributes: DSAS Natural Science General Ed. Requirement, DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req., SCI Polymathic Contexts: Science NonSeq.GE. Req., SCI Polymathic Contexts: Science Seq.GE. Req., SCI Polymathic Contexts: Science Seq.GE. Req.

PHYS 0175 - BASIC PHYSICS, SCIENCE AND ENGINEERING 2 (INTEGRATED)

Minimum Credits: 4

Maximum Credits: 4

The integrated curriculum version of PHYS 0105, the second part of a two-term sequence (0174-0175), introduces students to the basic principles of physics. An effort has been made to achieve a better integration of physics with the first term of calculus, engineering, and chemistry. Modern physics (special relativity, elementary quantum mechanics, and atomic structure) will be discussed.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ:(PHYS 0174 MIN GRAD 'C' or 0475 MIN GRAD 'C') and (PREQ: MATH 0235 MIN GRAD 'C' or CREQ: MATH 0230)

Course Attributes: DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req., SCI Polymathic Contexts: Science Seq.GE. Req.

PHYS 0212 - INTRODUCTION TO LABORATORY PHYSICS

Minimum Credits: 2

Maximum Credits: 2

This is an introductory physics laboratory associated with the physics 0110-0111 sequence.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: CREQ: PHYS 0111 or 0175 or 0476

PHYS 0219 - BASIC LABORATORY PHYSICS SCIENCE AND ENGINEERING

Minimum Credits: 2

Maximum Credits: 2

This is an introductory physics laboratory associated with the physics 0104-0105-0106 sequence.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: CREQ: PHYS 0175 or 0476

PHYS 0310 - FIRST YEAR SEMINAR IN PHYSICS AND ASTRONOMY

Minimum Credits: 1

Maximum Credits: 1

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Satisfactory/No Credit

PHYS 0330 - PHYSICS AND QUANTUM COMPUTING SEMINAR

Minimum Credits: 1

Maximum Credits: 1

Introduce first-year students to the field, practice, research, and opportunities in Physics and Quantum Computing. Students will be able to describe the variety of pursuits that physicists and computer scientists pursue; explain both basic and recent topics in QC/QI; and understand and articulate their own career interests. This is intended to be taken for a satisfactory/non-satisfactory grade.

Academic Career: Undergraduate

Course Component: Seminar
Grade Component: Satisfactory/No Credit

PHYS 0410 - PHYSICS OF THE HUMAN BODY

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

PHYS 0411 - PHYSICS OF THE HUMAN BODY 2

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

PHYS 0475 - INTRODUCTION TO PHYSICS, SCIENCE AND ENGINEERING 1

Minimum Credits: 4
Maximum Credits: 4
This is the first term of a two-term honors version of the physics 0104-0105-0106 sequence. This term deals with mechanics, waves and thermodynamics.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: CREQ: MATH 0230 or 0235
Course Attributes: DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req., University Honors Course

PHYS 0476 - INTRODUCTION TO PHYSICS, SCIENCE AND ENGINEERING 2

Minimum Credits: 4
Maximum Credits: 4
This is the second term of a two-term honors version of the physics 0104-0105-0106 sequence. This term deals with electricity and magnetism, relativity, and an introduction to modern physics and quantum phenomena.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: [PHYS 0174 (MIN GRADE 'B') or PHYS 0475 (MIN GRADE 'C')] and (MATH 0230 or 0235); CREQ: MATH 0240
Course Attributes: DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req., University Honors Course

PHYS 0477 - INTRODUCTION TO THERMAL PHYSICS, RELATIVITY AND QUANTUM MECHANICS

Minimum Credits: 4
Maximum Credits: 4

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: PHYS 0175 (B- or better) or PHYS 0476 (C or better); CREQ: MATH 0240

PHYS 0481 - PRINCIPLES OF MODERN PHYSICS 2

Minimum Credits: 3

Maximum Credits: 3

This is the second term of a two-term intermediate-level course in modern physics. This term deals with further applications of quantum mechanics to atoms, molecules, and solids, as well as an introduction to the physics of nuclei and particles.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: PHYS 0477 or 0479 MIN GRAD: 'C' for all listed Courses

PHYS 0520 - MODERN PHYSICS MEASUREMENTS

Minimum Credits: 3

Maximum Credits: 3

This honors laboratory course provides an introduction to the scientific questions and techniques in modern physical measurements, including exposure to various current experimental puzzles and accomplishments, hands-on experience with research grade equipment and microcomputer-controlled data acquisition interfaces, data analysis (and simple data analysis programs), prior preparation for data taking, and error estimation.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: PHYS 0175 or 0476

PHYS 0525 - ANALOG AND DIGITAL ELECTRONICS

Minimum Credits: 3

Maximum Credits: 3

A laboratory course designed to introduce the student to contemporary analog and digital electronics techniques used in basic science and engineering research. Topics include the study of measurement instruments, passive circuits, diode and transistor circuits, operational amplifiers and feedback, digital gates, analog to digital and digital to analog circuits. The course consists of a lecture and a lab.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: PHYS 0219 or 0520; MIN GRADE: 'C' for listed Courses

PHYS 1110 - SPECIAL TOPICS

Minimum Credits: 1

Maximum Credits: 9

This course is offered when a particular upper level topic not in the regular curriculum is being offered.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SNC Elective Basis

PHYS 1310 - UNDERGRADUATE SEMINAR

Minimum Credits: 1

Maximum Credits: 1

The undergraduate seminar provides a venue for students to discuss topics of interest in physics and astronomy. It gives students experience presenting research in the form of a poster presentation. The seminar will give the students a taste of what conducting scientific research and presenting scientific results is all about.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (PHYS 0477 or 0479) and (PHYS 0520 or 0525 or 1361 or 1426 or ASTRON 1263) or (PHYS 0219 and ASTRON greater than or equal to ASTRON 1120 or PHYS greater than or equal to PHYS 1321

Course Attributes: Capstone Course

PHYS 1311 - UNDERGRADUATE SEMINAR

Minimum Credits: 1

Maximum Credits: 1

The undergraduate seminar provides a venue for students to discuss topics of interest in physics and astronomy. It gives students experience presenting research, both as a short oral communication, and in the form of a poster presentation, in formats similar to conference talks and poster papers given by researchers in the field at topical meetings. The seminar will give the students a taste of what conducting scientific research, and presenting scientific results, is all about.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: PHYS 1310

Course Attributes: Capstone Course

PHYS 1321 - COMPUTATIONAL METHODS IN PHYSICS

Minimum Credits: 3

Maximum Credits: 3

Students will master computational techniques and good programming practice and apply these skills to enhance their understand of problems in physics and astronomy. The first 3 weeks of the course will introduce essential programming strategies and debugging techniques with the rest of the course devoted to applications. Topics include interpolation and approximation techniques, ordinary differential equations (e.g., projectile motion with drag and spin), oscillators (linear and nonlinear), orbits, data analysis/curve fitting, partial differential equations (e.g., fluid mechanics), and Fourier transforms.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: CREQ: (PHYS 0477 or 0479) and (PHYS 0219 or 0520 or CS 0008 or ENGR 0012) and MATH 0240 and (MATH 0290 or 1270)

PHYS 1331 - MECHANICS

Minimum Credits: 3

Maximum Credits: 3

This is an intermediate-level course dealing with classical mechanics.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (PHYS 0175 or 0476) and MATH 0240 MIN GRAD: 'C' for listed Courses]; CREQ: (MATH 0280 or 1180 or 1185) and (MATH 0290 or 1270)

PHYS 1341 - THERMODYNAMICS AND STATISTICAL MECHANICS

Minimum Credits: 3

Maximum Credits: 3

This course deals with the basic ideas of equilibrium thermodynamics and statistical mechanics.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (PHYS 0477 or 0479) and MATH 0240 and (MATH 0290 or 1270); MIN GRAD: 'C' for all listed Courses

Course Attributes: Capstone Course

PHYS 1351 - INTERMEDIATE ELECTRICITY AND MAGNETISM

Minimum Credits: 3

Maximum Credits: 3

This is an intermediate-level course in electricity and magnetism.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: [(PHYS 0175 or 0476) and MATH 0240; MIN GRAD: 'C' for listed Courses)]; CREQ: MATH 0290 or 1270 or 1275

PHYS 1361 - WAVE MOTION AND OPTICS

Minimum Credits: 3

Maximum Credits: 3

This is an intermediate-level course dealing with wave motion and optics. Laboratory work is included as part of this course.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (PHYS 0219 or 0520) and MATH 0240(MIN GRAD: 'C'); CREQ: MATH 0280 or 1180 or 1185

PHYS 1370 - INTRODUCTION TO QUANTUM MECHANICS 1

Minimum Credits: 3

Maximum Credits: 3

This is the first-term of a two-term introduction to quantum mechanics. This term introduces the necessary formalism and treats some of its basic applications.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (PHYS 0477 or PHYS 0479) and (MATH 0280 or 1180 or 1185); CREQ: PHYS 1331 and 1351; MIN GRAD: 'C' for all listed Courses except PHYS 0477

PHYS 1371 - INTRODUCTION TO QUANTUM MECHANICS 2

Minimum Credits: 3

Maximum Credits: 3

This is the second-term of a two-term introduction to quantum mechanics. The quantum formalism developed in the first term will be applied in a variety of physical situations.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: PHYS 1370; MIN GRAD: 'C'

Course Attributes: Capstone Course

PHYS 1372 - ELECTROMAGNETIC THEORY

Minimum Credits: 3

Maximum Credits: 3

This is an advanced course in which Maxwell's equations are applied to a variety of electromagnetic phenomena.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (PHYS 0477 or 0479) and 1351 and (MATH 0280 or 1180 or 1185); CREQ: PHYS 1331; MIN GRAD: 'C' PHYS 1351 / MATH 0280, 1180, 1185

Course Attributes: Capstone Course

PHYS 1373 - MATHEMATICAL METHODS IN PHYSICS

Minimum Credits: 3

Maximum Credits: 3

This course deals with mathematical techniques that are commonly used in physics.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: CREQ: PHYS 1370

PHYS 1374 - SOLID STATE PHYSICS

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: PHYS 0477 or PHYS 0479 or CHEM 0710 or CHEM 1410

PHYS 1375 - FOUNDATIONS OF NANOSCIENCE

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PHYS 1376 - INTRODUCTION TO BIOLOGICAL PHYSICS

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (PHYS 0111 or 0175 or 476) and [(MATH 0230 or 0235) or (MATH 0220 and STAT 1000)]

PHYS 1378 - INTRODUCTION TO NUCLEAR AND PARTICLE PHYSICS

Minimum Credits: 3

Maximum Credits: 3

This course gives an introduction into the theory concepts and the experimental methods used for nuclear and particle physics research. While some of the basic principles will be discussed from a historical perspective, the emphasis of this course is on modern developments, such as the standard model and the Higgs Boson, supersymmetry, extra dimensions, dark matter, CP-violation and baryogenesis, and neutrino oscillations. The main aspects of physics processes will be understood and calculated from symmetry principles and kinematics.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: PHYS 1370 or PHYS 0477

PHYS 1415 - QUANTUM PHYSICS AT THE NANOSCALE

Minimum Credits: 2

Maximum Credits: 2

This class is a guided inquiry-based laboratory, in which individual labs are chained into a semester-long sequence that emulates a real research project. In parallel with the laboratory track, students will attend or watch online a series of lectures introducing the principles of quantum research as well as a full spectrum of research topics ranging from quantum optics to quantum materials.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Satisfactory/No Credit

Course Requirements: PREQ: PHYS 0175 OR PHYS 0476; MIN GRADE:'C'

Course Attributes: Undergraduate Research

PHYS 1426 - MODERN PHYSICS LABORATORY

Minimum Credits: 2

Maximum Credits: 2

This is an advanced laboratory course that introduces students to the experimental techniques and equipment used in research laboratories.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: PHYS 0525 and (0477 or 0479)

PHYS 1470 - FOUNDATIONS OF QUANTUM COMPUTING AND QUANTUM INFORMATION

Minimum Credits: 3

Maximum Credits: 3

This is a mandatory course for students interested in the Quantum Computing and Quantum Information (QCQI) Undergraduate Certificate and students must pass this course with at least a C+ to fulfill the requirements of the QCQI Certificate. Any undergraduate student who has obtained at least a C+ in Calc I and Calc II is eligible to enroll in this course. Although linear algebra is used in the course, the necessary linear algebra will be taught as part of this course. No prerequisite knowledge of quantum mechanics is required. This course will help provide an overview of the foundations of quantum computing and quantum information. Linear algebra necessary for helping these foundational concepts will be taught as part of the course. The topic covered will include basics such as qubits, quantum states and their time evolution, superposition, measurement, entanglement, decoherence, as well as how these concepts can be applied in quantum computing, quantum communication and quantum sensing.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PHYS 1626 - PHYSICS OR ASTRONOMY WRITING PRACTICUM 2

Minimum Credits: 1

Maximum Credits: 1

This is a writing practicum to accompany physics 1226.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: PH 1426 or ASTRON 1263; PLAN: Physics(BS) or Ph and Astr (BS, BA) or Astronomy (BA); PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGCOMP 0213 or ENGCOMP 0214 or ENGFLM 0210 or FP (0003 or 0006)

Course Attributes: Writing Intensive Course (WRIT)

PHYS 1661 - PHYSICS OR ASTRONOMY WRITING PRACTICUM 1

Minimum Credits: 1

Maximum Credits: 1

This is a writing practicum to accompany physics 1361.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: CREQ: PHYS 0520 or 1361; PLAN: Physics(BS) or Physics and Astronomy(BS, BA); PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGCOMP 0213 or ENGCOMP 0214 or ENGFLM 0210 or FP (0003 or 0006)

Course Attributes: Writing Intensive Course (WRIT)

PHYS 1687 - RESEARCH WRITING IN PHYSICS AND ASTRONOMY

Minimum Credits: 1

Maximum Credits: 1

Research Writing in Physics and Astronomy will facilitate students' development as practicing physicists and astronomers through writing. Many of the writing styles and techniques that are crucial for success in physics and astronomy careers possibly (probably) were not taught in the basic English courses that you have already completed. The primary goal of this class is to practice writing and speaking in a variety of contexts that might be encountered in astronomy/physics careers to thereby help the student further develop some of the skills central to life as a scientist (collaborative learning, effective reading, scientific writing, and impactful communication). A secondary, but almost equally important, goal is to expand and reinforce the students' knowledge of astronomy and physics.

Academic Career: Undergraduate

Course Component: Lecture
Grade Component: LG/SNC Elective Basis

PHYS 1900 - INTERNSHIP

Minimum Credits: 1

Maximum Credits: 9

This course places the student in an "on-the-job" setting in which they receive practical experience in a supervised training environment.

Academic Career: Undergraduate

Course Component: Internship

Grade Component: LG/SNC Elective Basis

PHYS 1901 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 9

This course gives students the opportunity to design and carry out an individual project not covered by any course offerings.

Academic Career: Undergraduate

Course Component: Independent Study
Grade Component: LG/SNC Elective Basis

PHYS 1902 - DIRECTED READING

Minimum Credits: 1

Maximum Credits: 9

This course is designed to give students the opportunity to design a plan of reading to be agreed upon by the student and a supervising faculty member.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SNC Elective Basis

PHYS 1903 - DIRECTED RESEARCH

Minimum Credits: 1

Maximum Credits: 9

This course is designed to give students the opportunity to design and carry out a research project to be agreed upon by the student and a supervising faculty member.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SNC Elective Basis

Course Attributes: Capstone Course

PHYS 1904 - EXPERIENCE IN UNDERGRADUATE TEACHING

Minimum Credits: 1

Maximum Credits: 2

A program to allow qualified students to assist in the teaching of introductory physics courses.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SNC Elective Basis

PITT

PITT 0099 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 1

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Satisfactory/No Credit

PITT 0130 - WELLNESS AND RESILIENCE

Minimum Credits: 3

Maximum Credits: 3

The purpose of this course is to teach undergraduate students skills for having resilience in the face of commonly experienced stressors and difficulties. Stated simply, resilience is the ability to both survive and thrive. Resilience is not only about your ability to positively adapt in the face of adverse or challenging circumstances (that is, survive), but it is

also about learning the positive skills, strategies and routines that enable you to live a happy, fulfilling, and successful life (in other words, thrive). This course will provide you with a personalized set of strategies and skills for self-care and optimize your academic and social experiences while at the University of Pittsburgh and beyond.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SU3

Course Attributes: David C. Frederick Honors College Course

PITT 0210 - ANTI-BLACK RACISM: HISTORY, IDEOLOGY, AND RESISTANCE

Minimum Credits: 1

Maximum Credits: 1

In the wake of the police killings of George Floyd, Breonna Taylor, Tony McDade and many others in recent months, activists and scholars in the United States have taken to the streets, the workplace, and classrooms to decry anti-Black racism and call attention to the ongoing devaluation of Black lives in the US and globally. The wave of uprisings that have swept the nation and globe represent part of a long struggle of anti-racist organizing--one that can be traced back hundreds of years. This multidisciplinary course seeks to provide a broad overview of this rich and dynamic history. Built around the expertise of Pitt faculty and Pittsburgh area activists, this course will introduce students to the established tradition of scholarship focused on the Black experience and Black cultural expression. It also seeks to examine the development, spread, and articulations of anti-Black racism in the United States and around the world. The course will grapple with three key areas of inquiry: the roots, ideology, and resistance to anti-Black racism. Each unit will be focused through readings, lectures and discussions. First, we will explore the roots of anti-Black racism in the United States, drawing connections to African history, the history of slavery, and the Transatlantic Slave trade. Second, the course will grapple with the ideology of anti-Black racism--the ideas that undergird the creation of racial hierarchies, often shaped by pseudo-science and eugenics. Third, the course will highlight the theme of resistance, paying close attention to the range of political strategies and tactics Black activists and their allies have employed in their effort to obtain a more just and equal society here and internationally. Significantly, the course employs an intersectional analysis--taking into account how race is interwoven into other categories including ethnicity, gender, class, sexuality and nationality. We will use a variety of scholarly disciplines spanning the Humanities, Social Sciences, the Arts, Science and Public Health to explore these themes to help students understand how anti-Black racism functions in US society.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Satisfactory/No Credit

Polish

POLISH 0010 - ELEMENTARY POLISH 1

Minimum Credits: 3

Maximum Credits: 3

A traditional four-skills language course, with equal emphasis on speaking, reading, writing, and listening. By the end of the first semester, students have developed a good Polish accent and the ability to converse on many practical subjects, including family, friends, work, studies, free time and lifestyle.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Russian & East European Studies

POLISH 0020 - ELEMENTARY POLISH 2

Minimum Credits: 3

Maximum Credits: 3

A continuation of elementary POLISH 0010, this four-skill language course extends the grammatical coverage to include verbal aspect, numeral expressions, and the locative, dative and genitive cases. Emphasis continues to be on developing spoken language competence.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Second Language General Ed. Requirement, Russian & East European Studies

POLISH 0030 - INTERMEDIATE POLISH 3

Minimum Credits: 3

Maximum Credits: 3

The continuation of elementary POLISH 0020, this course focuses more on written polish and developing listening comprehension than in the first-year course. Attention is paid to developing a good control of basic idioms, and to the formation of participles.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Russian & East European Studies

POLISH 0040 - INTERMEDIATE POLISH 4

Minimum Credits: 3

Maximum Credits: 3

A continuation of intermediate POLISH 7030, this course attempts to round out the student's basic oral competence in relation to specific matters of polish culture and reality. For many students, this course is preparatory to summer study in Poland.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Russian & East European Studies

POLISH 0210 - INTENSIVE BEGINNING POLISH

Minimum Credits: 6

Maximum Credits: 6

This is a four-skill intensive course in beginning Polish language which is to be offered as part of the summer intensive workshops in Slavic languages.

Academic Career: Undergraduate

Course Component: Workshop

Grade Component: Letter Grade

Course Attributes: DSAS Second Language General Ed. Requirement, Russian & East European Studies, West European Studies

POLISH 0211 - BEGINNING INTENSIVE POLISH PITT/POLAND

Minimum Credits: 10

Maximum Credits: 10

This is a first-year Polish course equivalent to POLISH 0210. Six weeks on campus and four weeks in class in Poland. Part of the Slavic, East European, and Near Eastern Summer Language Institute.

Academic Career: Undergraduate
Course Component: Workshop
Grade Component: Letter Grade
Course Attributes: Russian & East European Studies, West European Studies

POLISH 0220 - INTENSIVE INTERMEDIATE POLISH

Minimum Credits: 6

Maximum Credits: 6

This is a four-skill intensive course in intermediate Polish which is offered as part of the summer intensive workshops in Slavic languages.

Academic Career: Undergraduate

Course Component: Workshop

Grade Component: Letter Grade

Course Attributes: Russian & East European Studies, West European Studies

POLISH 0221 - INTERMEDIATE INTENSIVE POLISH PITT/POLAND

Minimum Credits: 10

Maximum Credits: 10

This is a second-year course in Polish. Six weeks on campus and four weeks in class in Poland. Part of the Slavic, East European, and Near Eastern Summer Language Institute.

Academic Career: Undergraduate

Course Component: Workshop

Grade Component: Letter Grade

Course Attributes: Russian & East European Studies, West European Studies

POLISH 0222 - INTERMEDIATE INTENSIVE POLISH IN POLAND

Minimum Credits: 4

Maximum Credits: 4

This is a second year second semester course equivalent to POLISH 0040. It is taught in Krakow, Poland and is part of the Slavic, East European, and Near Eastern Summer Language Institute.

Academic Career: Undergraduate

Course Component: Workshop

Grade Component: LG/SNC Elective Basis

Course Attributes: Russian & East European Studies, West European Studies

POLISH 0223 - INTERMEDIATE POLISH IN POLAND

Minimum Credits: 6

Maximum Credits: 6

Academic Career: Undergraduate

Course Component: Workshop

Grade Component: LG/SNC Elective Basis

POLISH 0230 - ADVANCED INTENSIVE POLISH

Minimum Credits: 6

Maximum Credits: 6

This is a four-skill intensive course in advanced Polish, which is offered as part of the summer intensive workshops.

Academic Career: Undergraduate
Course Component: Workshop
Grade Component: Letter Grade

POLISH 0231 - ADVANCED INTENSIVE POLISH PITT/POLAND

Minimum Credits: 10
Maximum Credits: 10

This is a ten-week course in Advanced Polish language, six weeks of intensive study in Pittsburgh followed by four weeks of intensive study in Krakow Poland.

Academic Career: Undergraduate
Course Component: Workshop
Grade Component: Letter Grade

POLISH 0232 - ADVANCED INTENSIVE POLISH IN POLAND

Minimum Credits: 4
Maximum Credits: 4

This is four week course of Advanced Polish in Krakow Poland.

Academic Career: Undergraduate
Course Component: Workshop
Grade Component: LG/SNC Elective Basis

POLISH 0233 - ADVANCED POLISH IN POLAND

Minimum Credits: 6
Maximum Credits: 6

This is an advanced-level four-skills Polish language course held in Krakow, Poland, and is part of the Slavic, East European and near eastern summer language institute.

Academic Career: Undergraduate
Course Component: Workshop
Grade Component: LG/SNC Elective Basis

POLISH 0240 - FOURTH-YEAR INTENSIVE POLISH

Minimum Credits: 6
Maximum Credits: 6

This is a four-skill intensive course in fourth-year Polish, which is offered as part of the summer intensive workshops at the Slavic, East European and Near Eastern Summer Languages Institute.

Academic Career: Undergraduate
Course Component: Workshop
Grade Component: Letter Grade

POLISH 0325 - THE SHORT STORY

Minimum Credits: 3
Maximum Credits: 3

An introduction to the formal analysis of the literary genre of the short story, on the example of works of polish literature of the 19th and 20th centuries. The course will examine works both formally and as they reflect the reality or literary-social concerns of given historical periods 19th century positivism, women's issues, prison-camp literature, post-war literature of the absurd, and others.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: DSAS Geographic Region General Ed. Requirement, DSAS Literature General Ed. Requirement, Russian & East European Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Contexts: Humanistic GE. Req., Writing Intensive Course (WRIT)

POLISH 0400 - ADVANCED POLISH THROUGH FILM

Minimum Credits: 3

Maximum Credits: 3

A two-semester sequence in Polish advanced conversation, reading, and composition. This course aims at developing the student's command of idioms, while thoroughly reviewing all aspects of Polish conjugation and declension. Focus is placed on the contemporary colloquial Polish language, as spoken by the young in authentic Polish cultural contexts.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Russian & East European Studies

POLISH 0410 - ADVANCED POLISH 2

Minimum Credits: 3

Maximum Credits: 3

This is the second part of third-year Polish language. (Advanced level).

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Russian & East European Studies

POLISH 0870 - CONTEMPORARY POLISH CINEMA:LITERATURE ON FILM

Minimum Credits: 3

Maximum Credits: 3

This course presents contemporary Polish cinema from 1945 to the present. Concepts will be studied in their historical, political, philosophical, and aesthetic perspective. The main trends (schools, movements) in Polish cinema, such as the so-called Polish school and the cinema of moral concern, and the works of most important modern Polish filmmakers will be examined.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Film Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

POLISH 1260 - SURVEY OF POLISH LITERATURE AND CULTURE

Minimum Credits: 3

Maximum Credits: 3

Major literary monuments of Polish literature are examined against the background of Polish history and culture.

Works are related to the major literary and intellectual currents of the time and are placed in both a Polish and a general European context. Literary works are additionally examined critically from a formalistic literary point of view, the aim being to develop in students the basic concepts and vocabulary of literary criticism.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: DSAS Diversity General Ed. Requirement, DSAS Literature General Ed. Requirement, Russian & East European Studies, SCI Polymathic Contexts: Humanistic GE. Req., Writing Intensive Course (WRIT)

POLISH 1901 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 3

This course allows students to work independently on individually designed projects.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: LG/SNC Elective Basis

Course Attributes: Russian & East European Studies

Political Science

PS 0200 - AMERICAN POLITICS

Minimum Credits: 3

Maximum Credits: 3

This course is, quite generally, designed to provide students with a basic working knowledge of the basic goals of the constitutional framers, giving students an understanding of the purposes of the American political system; the essential structures (or institutions) within the American political system, the behavior (broadly defined) of the actors within the American political system, the purpose and performance of the linkage institutions in the United States (possibly including political parties, elections, and interest groups); and the types of policies that are often produced by a system with the characteristics of those found in the United States. Depending on the interests, area of expertise, and inclinations of the particular instructor, some of these may be emphasized more heavily than others.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Social Science General Ed. Requirement, DSAS Social Science General Ed. Requirement, SCI Polymathic Contexts: Soc/Behav. GE. Req., SCI Polymathic Contexts: Soc/Behav. GE. Req.

PS 0300 - COMPARATIVE POLITICS

Minimum Credits: 3

Maximum Credits: 3

This course provides students with basic information about a range of political systems outside the United States and teaches them to use that information to examine major theories about politics. The course is also designed to help students understand the government and the politics of the United States in comparative perspective and to develop some understanding of comparative methodology and the logic of comparison as a social science method. Depending on the interests, area of expertise, and inclinations of the particular instructor, some regions and topics might be emphasized more heavily than others.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Global Issues General Ed. Requirement, DSAS Social Science General Ed. Requirement,

Global Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Contexts: Soc/Behav. GE. Req., West European Studies

PS 0500 - INTERNATIONAL RELATIONS

Minimum Credits: 3

Maximum Credits: 3

This course aims to increase students' knowledge of the history of the modern state system and, in particular, political developments during the past few decades. It introduces students to basic concepts and analytic frameworks that political scientists employ to understand world politics, enhancing students' knowledge of international institutions that play important roles in world politics and exploring current issues in world affairs relating to human welfare and security. Depending on the interests, area of expertise, and inclinations of the particular instructor, some of these may be emphasized more heavily than others.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Global Issues General Ed. Requirement, DSAS Social Science General Ed. Requirement, Global Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Contexts: Soc/Behav. GE. Req., West European Studies

PS 0550 - INTRODUCTION TO GLOBAL STUDIES

Minimum Credits: 3

Maximum Credits: 3

Global Studies is a rapidly growing interdisciplinary field that explores how people interact with one another and with nature across existing boundaries, over long distances, and in ways that affect the entire planet. It provides new and exciting ways of looking at connections and divisions in the world beyond the confines of particular places, nation states, and regions. This course provides an introduction to the field. It examines current global trends and issues in ways that encourage you to think critically about how we analyze, interpret, and respond to global interactions and their consequences for different regions, localities, and groups. It gives particular attention to the concept of globalization, highlighting the controversies surrounding its use and engaging core debates about the impact of global and transnational processes on economic relations, politics and governance, cultural interactions, and the environment.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Diversity General Ed. Requirement, DSAS Global Issues General Ed. Requirement, Global Studies, MCSI - Sustainability Related, SCI Diversity General Ed. Requirements, SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Contexts: Soc/Behav. GE. Req.

PS 0600 - POLITICAL THEORY

Minimum Credits: 3

Maximum Credits: 3

This course is designed to introduce students to the idea of normative political theory and to important authors and concepts in the western political theory tradition. Students will learn to understand both historical and contemporary debates surrounding important political concepts such as authority, justice, liberty, and democracy, and to appreciate the differences among normative, empirical, logical, and faith-based political claims. Students will learn to read critically and analytically, to make simple normative arguments, and to explain the specific role of normative arguments in political science and political life. Depending on the interests, area of expertise, and inclinations of the particular instructor, some of these may be emphasized more heavily than others.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, Global Studies, SCI Polymathic Contexts: Ethical/Policy GE. Req., West European Studies

PS 0700 - RESEARCH METHODS IN POLITICAL SCIENCE

Minimum Credits: 3

Maximum Credits: 3

The course provides an introduction to scientific inquiry applied to the study of politics. The main emphasis of this course is to introduce political science majors to key analytical concepts and to their application to the study of politics. The course covers the logic of scientific inquiry, research design, and quantitative methods.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Quant.-Formal Reason General Ed. Requirement

PS 0702 - INTRODUCTION TO COMPUTATIONAL SOCIAL SCIENCE

Minimum Credits: 3

Maximum Credits: 3

This course will serve as the overall introduction to computational social science. It will showcase why computational social science is needed and distinct, and briefly introduces students to cutting edge applications of computational social science across topics that range from climate change and public health to cybersecurity.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PS 0835 - HAMILTON

Minimum Credits: 3

Maximum Credits: 3

This class is an inquiry into Hamilton the Musical and Alexander Hamilton the political thinker. It is divided into three sections, where exploration of the Political, Theatrical, and Musical/Cultural significance of both the musical and the historical figure is conducted.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: MIN CUM GPA: 3.25

PS 1000 - HONORS THESIS-MAJORS

Minimum Credits: 3

Maximum Credits: 3

Students prepare a thesis, under guidance of a faculty advisor, which is read and evaluated by a committee of three faculty members.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Letter Grade

Course Attributes: Capstone Course

PS 1201 - CONSTITUTION AND CIVIL LIBERTIES

Minimum Credits: 3

Maximum Credits: 3

The course will explore major topics in the area of civil liberties and civil rights which have concerned the Supreme Court in recent years and which have provoked extensive political and social controversy. Examples include decisions about discrimination, privacy, freedom of speech and assembly, and conflicts between freedom of the press and a fair trial.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PS 1202 - AMERICAN CONSTITUTIONAL LAW

Minimum Credits: 3

Maximum Credits: 3

The course will serve as an in-depth introduction to the study of constitutional law. The class work and discussions will focus on the development and evolution of the law relating to the powers of each branch of government, the checks and balances limiting those powers and the rights of individuals protected by amendments to the Constitution. Students will be responsible for reading and being able to discuss court decisions addressing major constitutional issues confronted by government and society as a whole. Class members will also be encouraged to identify and discuss factors that may impact judicial decision making, such as current events, political forces, judges backgrounds and historical events.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PS 1203 - JUDICIAL POLITICS

Minimum Credits: 3

Maximum Credits: 3

The course will focus on judicial policy making and the political, social and economic underpinnings influencing cases and their decisions. Areas of focus will be: right of privacy (sexual orientation and abortion), classification (race and gender), speech (freedom of speech and press and the internet), religion (exercise and establishment), and criminal (investigations, trials and punishment).

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: PS 0200

PS 1204 - WOMEN IN POLITICS

Minimum Credits: 3

Maximum Credits: 3

This course will consider political issues and explore the changing political role of women as citizens, candidates, office-holders, and policymakers. The emphasis will be on the American political experience, although examples will be drawn from other countries.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PS 1205 - RACE, GENDER AND POLITICS

Minimum Credits: 3

Maximum Credits: 3

This course deals with the political consequences of ethnic identity in the advanced industrial states of North America and Western Europe. The major theoretical concerns include the sources of ethnic identity, the relationship between ethnicity and social class, and the persistence or resurgence of ethnic political movements in contemporary societies.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PS 1211 - LEGISLATIVE PROCESS

Minimum Credits: 3

Maximum Credits: 3

This course provides an analysis of the legislative process in modern democracies with primary attention devoted to the legislative process in the United States. The history and meaning of representation is analyzed as is the behavior of participants in the legislative process. The impact of social-economic forces on decision-making in the United States is studied as are the roles of interest groups, political parties, the executive branch, and the judiciary.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PS 1212 - AMERICAN PRESIDENCY

Minimum Credits: 3

Maximum Credits: 3

This course provides an analysis of presidential leadership in the United States. The first part of the course deals with factors helping to explain presidential leadership; how presidents are nominated and elected, the constitutional framework within which the presidency operates, presidential relations with the bureaucracy, and presidential personality. This framework is then used for an intensive analysis of presidential leadership in foreign and domestic policy.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PS 1213 - LAW AND POLITICS

Minimum Credits: 3

Maximum Credits: 3

Examines the relationship between law and values, law and power, and law and discretion. Legal reasoning is examined as applied to statutory, case, and constitutional law.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Urban Studies

PS 1214 - US CONGRESS

Minimum Credits: 3

Maximum Credits: 3

This course will explore the evolution and current place of the U.S. Congress within the American political system beginning with an examination of the theory and history of electing representatives to government. Students will examine the role and structure of the legislative branch as anticipated in the American constitution. Other areas of focus include the congressional election process, the importance of congressional committees and differences in rules for the house and senate, policy making, and how congress relates to the other two branches of government. A key overarching

goal in this course is to assess challenges and changes facing the contemporary U.S. Congress.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SU3 Elective Basis

PS 1216 - MODERN CIVIL RIGHTS IN AMERICAN POLITICS

Minimum Credits: 3

Maximum Credits: 3

In this class, we will analyze several major areas of civil rights in American politics from the 20th century until the present day. Our primary case studies will be disability rights, women's rights, Black civil rights, and LGBT rights. For each of these topics, we will detail the role of the political parties, coalitions, mass activism, and the judiciary in the expansion of civil rights.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PS 1220 - SPORTS AND AMERICAN POLITICS

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the intersection of politics and sports from a social science perspective. We will critically examine empirical evidence on the politics of sports on such topics as race, gender, stadium siting, concussions, collective bargaining, and corruption. These are just a few of the issues that demonstrate how sports and politics are intertwined. Indeed, sports are even used as a tool by government to promote nationalism (e.g., the olympics, the singing of the national anthem before events, etc.). You do not need to be a fan of sports to understand and analyze the relationship between them and politics; indeed, being a fan may lead you to have "blind spots" on certain topics.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SU3

PS 1221 - LATINA/O/X POLITICS

Minimum Credits: 3

Maximum Credits: 3

Latinas/os/xs are the largest ethnoracial minority group in the United States. This course starts with an overview of the foundation of Latinx politics as an area of inquiry and how Latinas/os/xs emerged as a key political group. We will discuss the history of several national origin groups, including Mexican-Americans, Cuban-Americans, Dominicans, and Puerto Ricans. The course will also delve into key issues relating to identity within the Latina/o/x population and how this impacts their political incorporation. We will discuss issues relating to partisanship, public opinion, mobilization and outreach to the group, as well as social movements. The course will close with a discussion of the complexities of the Latina/o/x umbrella and the heterogeneity of the group.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PS 1222 - AFRICAN AMERICAN POLITICS

Minimum Credits: 3

Maximum Credits: 3

This course explores the development of African-American politics in the United States. We begin by examining the modes of thought that emerged in the black community in reaction to systematic racial discrimination. Next, we deal

with the social movements that took place within the African-American community to combat racial segregation in the South; in particular, this portion of the course highlights the legal battles that led to Brown v. Board of Education as well as the protest activities that paved the way for the passage of the Civil Rights Act of 1964 and the Voting Rights Act of 1965. Lastly, we will cover issues related to African Americans' transition from protest politics to mainstream electoral involvement as well as current trends in African-American politics.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PS 1227 - RACIAL AND ETHNIC POLITICS

Minimum Credits: 3

Maximum Credits: 3

This course is an overview of the historical and political experiences of the four major racial and ethnic minority groups in the United States (Blacks Americans, American Indians (Indigenous), Latina/o Americans, and Asian Americans or Pacific Islanders) and their paths to political incorporation. Major topics include (pan)ethnic identity, citizenship, suffrage, inequality in political participation and representation, policing, and critical race theory. Current politics and policy debates affecting racial/ethnic minorities such as voting rights, affirmative action, Black Lives Matter and immigration reform will also be covered.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PS 1230 - INTEREST GROUP POLITICS

Minimum Credits: 3

Maximum Credits: 3

Are interest groups vital or vicious? Do interest groups use money to 'buy power,' or do they play a key part in the representation of diverse ideas? What roles do, and should, interest groups (i.e., Special interests, pressure groups, lobbyists) play in democracies? This course explores the role of interest groups in the participation and representation of citizens in the United States. Focusing on key themes like liberty and equality, the course examines what interest groups are, what they do, and what implications that has for the laws that get passed and enforced, political campaigns, the ability of different groups (that differ by race/ethnicity, income, religion, and sexual preference) to get their voices heard in the political process, and what could be done to improve or curb their influence.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PS 1231 - POLITICAL PARTIES AND ELECTIONS

Minimum Credits: 3

Maximum Credits: 3

This course examines the organization and character of American political parties, the impact of environmental factors on party processes and behavior, patterns of party competition, and the role of parties in shaping public policy and in providing a linkage between public and government. Attention is also given to the political behavior of the American public. Recent changes in the organization of party institutions are examined.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PS 1232 - POLITICAL ATTITUDE & PUBLIC OPINION

Minimum Credits: 3

Maximum Credits: 3

This course explores the formation and measurement of mass public opinion. Topics include: how individuals gather information; the formation of political ideology, political attitudes, and political preferences; the stability of public opinions across different issues; the relationship between mass public opinion and government policy (both what it is, and what it should be); and methods for measuring public opinion, including public opinion surveys.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PS 1233 - POLITICAL PSYCHOLOGY

Minimum Credits: 3

Maximum Credits: 3

There are numerous ways that we can explain political behavior (including both overt behavior such as voting and latent behaviors such as attitudes and preferences). In this course, we consider a number of such explanations (all from the discipline of psychology), including those rooted in personality, biology, emotions, culture, and environmental influence.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PS 1234 - ELECTORAL BEHAVIORS AND DEMOCRATIC PROCESS

Minimum Credits: 3

Maximum Credits: 3

This course examines the factors that affect national electoral outcomes in the U.S.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Social Science General Ed. Requirement, SCI Polymathic Contexts: Soc/Behav. GE. Req.

PS 1235 - MEDIA AND POLITICS

Minimum Credits: 3

Maximum Credits: 3

The media is all around us, but what impact does it have? It permeates everything from leisure and entertainment to how candidates communicate with the public and what political decisions get made. This course tackles three broad questions about the intersection of media and politics. First, how is news created and why does it matter? For example, are late night talk shows like Stephen Colbert or the internet news sources; why or why not? Second, how is the media used in political campaigns and how does it influence campaigns? Can a bad tweet (i.e. Anthony Weiner) end a campaign or a political career? Third, how do the media shape the creation of public policies ' the laws that do or do not get passed ' and the decisions that get made? Can media-savvy politicians use the media to help their cause or rally public support for big decisions like going to war?

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PS 1240 - THE POLITICS OF DIVERSITY

Minimum Credits: 3

Maximum Credits: 3

This course explores the benefits and pitfalls of diversity both in American national politics and the politics of everyday life. Students will read and discuss some of the top research on questions surrounding diversity and will conduct original research on the topic. Students will also learn valuable skills they will be able to bring to bear as they enter today's diverse workplaces.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PS 1241 - PUBLIC ADMINISTRATION AND POLITICAL SYSTEM

Minimum Credits: 3

Maximum Credits: 3

This course analyses the nature of the public bureaucracy in the United States and its role in governance. Special emphasis is placed on questions of accountability and responsibility.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PS 1250 - GAMES, POLITICS, AND STRATEGY

Minimum Credits: 3

Maximum Credits: 3

How can we better understand politics by viewing it as a game of strategy? What can we really say about the "will of the majority"? Can democratic procedures be manipulated? How is conflict like a game of poker? Campaigns, elections, persuasion, lobbying, conflict, and war involve elements of competition, cooperation, and chance. The course develops analytical tools that can be applied to a variety of political phenomena. Learn how to model and analyze strategic interaction by playing classroom games and applying tools from game theory.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PS 1251 - URBAN GOVERNMENT AND POLITICS

Minimum Credits: 3

Maximum Credits: 3

This course is an introduction to the key structures, procedures and problems of cities and urban areas. Topics covered include: city-suburban conflicts, relations between cities and the federal government, forms of local government and their advantages and disadvantages, property taxes, housing, urban renewal, crime, courts, and education. The principal objective of the course is to help the student develop a well-informed and differentiated view of urban places and problems.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Urban Studies

PS 1252 - STATE GOVERNMENT

Minimum Credits: 3

Maximum Credits: 3

This course will survey political processes and public policy outcomes in the fifty American states. Policy areas to be covered include the environment, era, taxation, crime and law enforcement, and welfare.

Academic Career: Undergraduate

Course Component: Lecture
Grade Component: LG/SNC Elective Basis

PS 1254 - POLITICS OF APPALACHIA

Minimum Credits: 3

Maximum Credits: 3

Pittsburgh is the largest city in the Appalachian region, which stretches from New York's Catskill Mountains to the plains of Mississippi. It spans 13 states, more than 400 counties, and a population of more than 26 million people. It is also politically and culturally unique in the United States, so it provides us an opportunity to study political phenomena such as urban-rural divides, identity politics, and intergovernmental relations. One cannot truly understand American politics without understanding the politics of Appalachia. This course will provide students with a political introduction to this fascinating, historically important, and widely misunderstood region as a means to better understand the broad concepts we study as political scientists.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PS 1261 - AMERICAN PUBLIC POLICY

Minimum Credits: 3

Maximum Credits: 3

This course will focus on a variety of public policy issues. The issues include social welfare programs, management of the economy, governmental regulation of business activities, environmental programs, urban problems, civil rights, civil liberties, crime control efforts, and foreign policy.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PS 1262 - HEALTH POLICY IN UNITED STATES

Minimum Credits: 3

Maximum Credits: 3

This course is an introduction to current problems of health care and health policy in the United States. Description and analysis of the proposals, current practices, and the reactions of interest groups will be the central theme of the course.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PS 1263 - HEALTH POLICY AND HUMAN FLOURISHING

Minimum Credits: 3

Maximum Credits: 3

The nation is facing a health crisis. For the first time since the early 20th century, we are experiencing a reduction in life expectancy overall and especially in vulnerable communities. Moreover, Americans face even broader and more existential threats to personal and community health as evidenced by growing rates of loneliness, depression, social isolation, civic unrest, and polarization. The government has an important role to play in promoting a health of the nation through development of public policy that promotes conditions that make health possible. In this class, we explore different conceptions of health and work to develop a capacious definition of health as human flourishing that incorporates threats to personal and community health beyond the physical and psychological. We then discuss ways in which the government in combination with rich civil society might promote human flourishing. We conclude the course exploring challenges and opportunities facing American liberal democracy in promoting human flourishing.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

PS 1264 - AMERICAN POLITICS THROUGH FILM

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

PS 1275 - RELIGION AND AMERICAN POLITICS

Minimum Credits: 3
Maximum Credits: 3
In recent years religious groups and religious values have played an increasingly prominent role in politics in many countries, including the United States. The purpose of this course will be to consider the public and political aspects of religion in the United States. Religious beliefs and institutions have wide-ranging implications for civic norms, public policy, political leadership, international relations, and the treatment of various social groups. After an historical survey of the role of religion in American politics, the second part of the course will focus on the contemporary impact of American religious groups and values on public opinion, lobbying, and electoral choice. We will also discuss the implications of the doctrine of "separation of church and state" for law, education, and civil liberties.

PS 1281 - CAPSTONE SEMINAR IN AMERICAN POLITICS

Minimum Credits: 3
Maximum Credits: 3
Capstones are writing intensive courses for senior, PS majors. Subject matter will vary from term to term depending on the interests, area of expertise, and inclinations of the particular instructor.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: Letter Grade
Course Requirements: PREQ: PS 0200; PLAN: Political Science (BA or BS or BPH); LVL: Sr; PREQ: ENG 0102 or ENG CMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006)
Course Attributes: Capstone Course, Undergraduate Research, Writing Intensive Course (WRIT)

PS 1283 - TOPICS IN AMERICAN POLITICS

Minimum Credits: 3
Maximum Credits: 3
Current topics of interest in American politics. Topics covered vary with instructor and term.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

PS 1291 - WOMEN IN POLITICS - ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

This course will consider political issues and explore the changing political role of women as citizens, candidates, office-holders, and policymakers. The emphasis will be on the American political experience, although examples will be drawn from other countries. This class will include a significant training in a specific analysis method or methods to complement the course topic, as well as satisfy the requirement for a Political Science department analysis course.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PS 1292 - RACE, GENDER, AND POLITICS - ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

This course deals with the political consequences of ethnic identity in the advanced industrial states of North America and Western Europe. The major theoretical concerns include the sources of ethnic identity, the relationship between ethnicity and social class, and the persistence or resurgence of ethnic political movements in contemporary societies. This class will include a significant training in a specific analysis method or methods to complement the course topic, as well as satisfy the requirement for a Political Science department analysis course.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Undergraduate Research

PS 1293 - LEGISLATIVE PROCESS - ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

This course provides an analysis of the legislative process in modern democracies with primary attention devoted to the legislative process in the United States. The history and meaning of representation is analyzed as is the behavior of participants in the legislative process. The impact of social-economic forces on decision-making in the United States is studied as are the roles of interest groups, political parties, the executive branch, and the judiciary. This class will include a significant training in a specific analysis method or methods to complement the course topic, as well as satisfy the requirement for a Political Science department analysis course.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PS 1294 - POLITICAL ATTITUDE - ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

This course explores the formation and measurement of mass public opinion. Topics include: how individuals gather information; the formation of political ideology, political attitudes, and political preferences; the stability of public opinions across different issues; the relationship between mass public opinion and government policy (both what it is, and what it should be); and methods for measuring public opinion, including public opinion surveys. This class will include a significant training in a specific analysis method or methods to complement the course topic, as well as satisfy the requirement for a Political Science department analysis course.

Academic Career: Undergraduate

Course Component: Lecture
Grade Component: LG/SNC Elective Basis

PS 1295 - POLITICAL PSYCHOLOGY - ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

There are numerous ways that we can explain political behavior (including both overt behavior such as voting and latent behaviors such as attitudes and preferences). In this course, we consider a number of such explanations (all from the discipline of psychology), including those rooted in personality, biology, emotions, culture, and environmental influence. This class will include a significant training in a specific analysis method or methods to complement the course topic, as well as satisfy the requirement for a Political Science department analysis course.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PS 1299 - ANALYSIS OF AMERICAN POLITICS

Minimum Credits: 3

Maximum Credits: 3

This class focuses on significant training in a specific analysis method or methods to complement the study of American Politics, as well as satisfy the requirement for a Political Science department analysis course.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PS 1300 - CAPSTONE IN RUSSIAN AND EAST EUROPEAN STUDIES

Minimum Credits: 3

Maximum Credits: 3

The objective of this capstone course in Russia and east European studies is to provide you with the opportunity to draw on and synthesize all of the skills and knowledge gained in the various courses and seminars that you have taken in the process of earning your REES certificate, and apply them to a topic of particular interest to you. The course will culminate in an analytical/research paper on a topic in Russian and east European studies to be chosen by each individual student. In keeping with multidisciplinary objectives of our certificate, the paper must draw on methodologies and literature from multiple disciplines.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Letter Grade

Course Attributes: Capstone Course, Writing Requirement Course

PS 1301 - COMPETING PERSPECTIVES ON GLOBAL ENERGY: FROM WESTERN PA TO EASTERN EUROPE

Minimum Credits: 3

Maximum Credits: 3

THIS COURSE PROVIDES PROFESSIONAL SCHOOL STUDENTS IN THE FIELDS OF BUSINESS, LAW, ENGINEERING, PUBLIC POLICY AND OTHER AREAS WITH A FIRST-HAND EXPERIENCE OF THE GLOBAL IMPACT OF CONTEMPORARY DEVELOPMENTS IN THE NATURAL GAS AND OTHER ENERGY SECTORS. PARTICIPANTS WILL FIRST WITNESS THE EFFECT THAT MARCELLUS SHALE HAS HAD IN WESTERN PA AND THEN SEE HOW THESE DEVELOPMENTS ARE IMPACTING THE US'S FOREIGN

POLICY AND TRADE PRACTICES. AFTER THIS, STUDENTS WILL BE FAMILIARIZED WITH A VERY DIFFERENT SIDE OF THE GLOBAL NATURAL GAS AND ENERGY EQUATION BY TRAVELLING TO MOSCOW, WHERE THEY WILL SEE THE KREMLIN'S VIEW OF GLOBAL AND REGIONAL GAS AND ENERGY MARKETS. THE COURSE ENDS WITH AN EXPLORATION OF THE ROLE THAT TRANSIT STATES LIKE BULGARIA PLAY IN GLOBAL ENERGY MARKETS AND EFFORTS BY THESE PLAYERS TO USE THEIR TERRITORY AND ENERGY ALTERNATIVES TO BARGAIN WITH LARGER STATES AT BOTH ENDS OF ENERGY PIPELINES. THROUGHOUT THIS EXPLORATION, STUDENTS WILL BE EXPOSED TO A VARIETY OF STAKEHOLDERS AND A GAIN AN UNDERSTANDING OF ENERGY'S IMPACT ON DOMESTIC AND INTERNATIONAL POLITICS, ECONOMIES, SOCIETIES AND THE ENVIRONMENT.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

PS 1302 - POLITICAL DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

This course will examine the major problems involved in the study and understanding of change in "less developed countries," the main approaches and theories applied to these problems, and the criticisms directed at some of these approaches. In particular, it will consider attempts to understand "development" by reference to the earlier experiences of Europe and the United States and will evaluate the relevance of such an approach to the current problems of the underdeveloped world.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Global Issues General Ed. Requirement, Global Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

PS 1303 - PEACE MOVEMENTS AND EDUCATION

Minimum Credits: 3

Maximum Credits: 3

This course focuses on two major components in the field of peace studies: peace movements and peace education. Key concepts (e.g., peace, war, violence, conflict, justice, equality, democracy, and citizenship) and theories are discussed. Movements for (inter-personal, inter-group, and international) peace initiated by people in the United States and other countries historically and today will be analyzed. School-, University-, and community-based peace education programs developed in various countries will also be examined.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PS 1309 - COMPARATIVE REGIONALISM (EUROPE AND ASIA)

Minimum Credits: 3

Maximum Credits: 3

More than 80% of today's international trade is generated through regional trading arrangements. 65% of international trade is produced by Europe and Asia, two of the largest and most integrated regions in the world. If you are interested in international policy issues, including peace and security, aid, development and trade, or transnational policy issues such as climate change, people trafficking, and managing health pandemics, this course is for you. How can you best prepare yourself for international policy work in a government agency, an international organization, or an international non-governmental organization? Start with this course to gain an understanding of the regional dynamics in Europe and East Asia, and how these regions are shaping the international order. Are you looking to acquire new practical skills? In

this course students will conduct primary and secondary research, and learn to use Tableau, a data visualization software, to present their research findings.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PS 1311 - WESTERN EUROPEAN GOVERNMENT AND POLITICS

Minimum Credits: 3

Maximum Credits: 3

This course covers the politics and government of Western European countries at the national and local levels. It also considers some aspects of the relationships between the European Union and its member states.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Geographic Region General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req., West European Studies

PS 1316 - ASIAN POLITICS

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to the politics of Asia by examining and comparing the political systems, economic performance, civil society, and the effect of globalization among countries of East- and South-East Asia. Particular attention will be given to Asian regionalism, focusing on regional powers and their efforts in promoting regional cooperation and integration. The course offers an overview of Asian regional cooperation mechanisms (ASEAN and ASEAN+, East Asia Summit, ARF) as well as current thematic issues such as Asian integration, contemporary Asian nationalism, and state-centered capitalism. Through the use of contemporary film and media, students will be engaging in discussions on Asia and its impact on the future of the international order.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PS 1317 - POLITICS OF THE EUROPEAN UNION

Minimum Credits: 3

Maximum Credits: 3

This course is designed to introduce students to the government and politics of the European Union. It will provide a historical overview of the creation of the EU and development of European integration and introduce students to the EU's governing institutions, current policies and debates, and the public's views of the EU through public opinion and electoral politics.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Russian & East European Studies, West European Studies

PS 1318 - EUROPEAN GOVERNMENT AND POLITICS

Minimum Credits: 3

Maximum Credits: 3

This course will encompass the comparative study of the political systems of Western Europe including the UK, France, Germany, Italy, Spain, Poland, and Scandinavia. The primary themes will include political development and

institutions, security, European integration, political culture, political economy, and democratization.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Hourly Final

PS 1321 - LATIN AMERICAN POLITICS

Minimum Credits: 3

Maximum Credits: 3

This course compares and contrasts the governments and political processes throughout Latin America. It offers a detailed look at several countries, and also provides a comparative framework to discuss the rise, fall, and quality of democracy.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Cross-Cult. Awareness General Ed. Requirement, DSAS Geographic Region General Ed. Requirement, Latin American Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

PS 1322 - LATIN AMERICAN POLITICAL DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

In this course we will address the following puzzle: why was it so difficult to build stable democracies in Latin America during the twentieth century? We will use the analytical tools provided by political science to illuminate the political history and the current situation of Latin America. Some of the topics that we will deal with in this course are: institutional arrangements, economic policy, and role of the military, elections, and political and social equality. Most of the course we will focus on thematic material using comparative analysis. However, we will also study four Latin American countries in greater detail.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Latin American Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

PS 1324 - US-LATIN AMERICAN RELATIONS

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the history, politics, and legitimacy of US policy towards Latin America. How have these relations changed over time? What have been the consequences for the US or for the Latin American countries? What interests and structures have driven us decisions?

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Cross-Cult. Awareness General Ed. Requirement, DSAS Historical Analysis General Ed. Requirement, Latin American Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Contexts: Soc/Behav. GE. Req.

PS 1326 - EAST ASIAN POLITICAL ECONOMY 1950-PRESENT

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Asian Studies, DSAS Cross-Cult. Awareness General Ed. Requirement, DSAS Geographic Region General Ed. Requirement, DSAS Historical Analysis General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Contexts: Soc/Behav. GE. Req.

PS 1327 - POLITICS OF REVOLUTION

Minimum Credits: 3

Maximum Credits: 3

Politics is often about conflict, but sometimes that conflict takes place within legislative bodies and other times in the streets. Most of what we study in political science courses focuses on conflict within the electoral framework, but this course asks what happens when citizens take conflict into their own hands. This course will examine the conditions that prompt people to organize on behalf of their collective interests, how protest movements evolve, and under what conditions they succeed. The first half of the class will cover theoretical topics: the causes, strategies, and consequences of protest activity. The second half of the class will focus on types of protest (political protests, revolutionary movements, social movements, riots, and guerrillas) through comparative case studies. Most case studies in class will be based on examples within the Western hemisphere (North, central, South America, and the Caribbean) - a geographical region with an enormous variety of types, causes, and consequences of protest movements - but students will be encouraged to become independently familiar with protest movements around the world.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PS 1328 - AUTHORITARIAN STATECRAFT AND THE ARTS OF RESISTANCE

Minimum Credits: 3

Maximum Credits: 3

According to the democracy index, only 19 countries are "full democracies," housing only 13% of the world's population. Countries like Japan and the United States are considered "flawed democracies" while the majority of the world's political systems are either "hybrid" or "authoritarian." Therefore, if we want to truly understand politics, it is essential that we understand politics in non-democracies, or political systems conventionally referred to as "authoritarian regimes." This course invites students to think critically about the nature of authoritarian political systems. We will examine how society and politics are organized in authoritarian systems and how individuals experience power and authority in these societies: historical and contemporary.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PS 1330 - EUROPEAN UNION SEMINAR

Minimum Credits: 3

Maximum Credits: 3

This course will focus on various topics related to the European Union. Students will have the opportunity to engage in an individual or group research project on a topic of their choosing related to the EU/Europe.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Attributes: Russian & East European Studies, West European Studies

PS 1332 - GOVERNMENT AND POLITICS IN CONTEMPORARY CHINA

Minimum Credits: 3

Maximum Credits: 3

An introductory analysis of contemporary Chinese politics. Topics to be considered include the traditional background, the Chinese revolution, the role of revolutionary ideas and institutions in Chinese political life since 1949, recent and current policy issues, and possible future trends.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Asian Studies, DSAS Cross-Cult. Awareness General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

PS 1333 - GOVERNMENT AND POLITICS OF JAPAN

Minimum Credits: 3

Maximum Credits: 3

This course considers postwar Japanese government and politics in comparative perspective. Topics to be covered include the following: the American occupation, Japanese society, political culture, election system and election campaigns, government and political leadership, the ruling party, opposition parties, protest movements, the parliamentary and policymaking processes. Frequent comparisons will be made between the Japanese system and other democratic systems in North America and Europe.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Asian Studies

PS 1336 - BUSINESS AND POLITICAL ECONOMY IN MODERN CHINA

Minimum Credits: 3

Maximum Credits: 3

The program will focus on how contemporary China handles conflict and opportunity between its culture and tradition on the one hand, and modernization and Western influence on the other.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Attributes: Asian Studies

PS 1338 - POLITICS IN DEVELOPING COUNTRIES

Minimum Credits: 3

Maximum Credits: 3

This course explores the question of why it is so hard for many under-developed countries to overcome persistent problems of poverty, bad governance, and civil conflict. We will explore the politics of under-development, looking at the role of geography, institutions, historical legacies of slavery and colonialism, corruption, natural resources, ethnic divisions, and international aid. The course will take us to virtually every part of the globe, from Africa to Latin America to Asia to Europe and the United States.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PS 1340 - DEMOCRATIZATION

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the process of democratization, when nations shift from authoritarian regimes to more democratic forms of organization. Students will explore theoretical debates regarding democracy, democratization, and democratic consolidation. The lectures, readings, and assignments will explore country case studies from several different world regions. These comparative case studies will be used to examine the effect of causal factors such as political culture, political institutions, civil-military relations, civil society, the resource curse, and the international environment on democratization.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: UPB Global General Ed. Requirement, UPB Political Science General Ed. Requirement

PS 1341 - GOVERNMENT AND POLITICS USSR/RUSSIAN FEDERATION

Minimum Credits: 3

Maximum Credits: 3

A survey of the political systems in the USSR (1917-1991) and its major successor, the Russian Federation (1991-present). The first section deals with the period from the Bolshevik Revolution in 1917 until the mid-1980s. The second section examines the efforts to reform the political system under general Secretary Gorbachev. The final section deals with the collapse of the USSR in 1991 and the subsequent development of the Russian Federation as an independent state.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Cross-Cult. Awareness General Ed. Requirement, DSAS Historical Analysis General Ed. Requirement, Russian & East European Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Contexts: Soc/Behav. GE. Req.

PS 1345 - POLITICS OF OCEANIA

Minimum Credits: 3

Maximum Credits: 3

This course examines the government and politics of Australia and Australian engagement in the Asia-Pacific region. It does so by surveying similarities with and differences from the North American democratic model and by examining Australia's substantial and abiding interests in the Asia-Pacific region. By the end of course, students will be aware of the importance of geographical distance and location in the Australian story. Students will also be aware of the continuing importance of cultural and political inheritance in the development of Australian public and foreign policy. Students will be encouraged to make comparisons with the US system of government and politics.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

PS 1348 - XENOPHOBIA IN MODERN EUROPE

Minimum Credits: 3

Maximum Credits: 3

This course will examine Europe's post-war xenophobic, racist and exclusionary policies. We will use memoirs, photo journalism, film and interviews to understand recent discrimination against refugees, guest workers, Jews, linguistic and religious minorities. We will also put the question into scholarly context, as we examine how historians, sociologists, psychologists and anthropologists try to understand the way in which Europeans construct the categories of "us" and the "others".

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Diversity General Ed. Requirement, DSAS Geographic Region General Ed. Requirement, DSAS Historical Analysis General Ed. Requirement, Russian & East European Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Contexts: Soc/Behav. GE. Req., West European Studies

PS 1349 - TRANSATLANTIC GOVERNANCE AND POLICY

Minimum Credits: 3

Maximum Credits: 3

The economic, political and defense links between North American countries and European countries, and especially the European Union, generate important governance and policy issues. This course examines those issues in light of general theories of governance at the national and international levels. Special attention will be given to on-going trade negotiations and climate change policy.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Attributes: West European Studies

PS 1351 - GOVERNMENT AND POLITICS OF THE MIDDLE EAST

Minimum Credits: 3

Maximum Credits: 3

A survey of the developing political systems of the Middle East and their positions in world affairs. Considered are the growth of political institutions in the modern era, the nature of political leadership, the evolution of political attitudes, and the legacy of Western and Soviet imperialisms. The states dealt with are Iran, Turkey, Iraq, Lebanon, Jordan, Syria, Egypt, and Israel. The course includes a diplomatic simulation exercise designed to illustrate the complexity of foreign policy interactions in the region.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Asian Studies, DSAS Geographic Region General Ed. Requirement, Russian & East European Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Contexts: Soc/Behav. GE. Req.

PS 1352 - INTRODUCTION TO AFRICAN POLITICS

Minimum Credits: 3

Maximum Credits: 3

A general introduction to African politics at macro level for freshmen and sophomores with special focus on traditional African political system, European imperialism in Africa, African nationalism, independence and post-independence problems of nation-building and economic development.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: African Studies, DSAS Cross-Cult. Awareness General Ed. Requirement, DSAS Diversity General Ed. Requirement, DSAS Historical Analysis General Ed. Requirement, Global Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Contexts: Soc/Behav. GE. Req.

PS 1356 - THE GOVERNMENT AND POLITICS OF AFRICA

Minimum Credits: 3

Maximum Credits: 3

This course examines African politics from the historical legacy of European imperialism to contemporary issues. Topics of focus will include the role of ethnicity, institutions, and ideologies; patterns of change, social forces, global economics and how they have impacted nation building across the continent.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SU3 Elective Basis

PS 1357 - THE POLITICS OF FOOD, LAND, AND SUSTAINABILITY

Minimum Credits: 3

Maximum Credits: 3

The debates surrounding food and agricultural land are often seen as scientific and outside the realm of social scientists. Yet many of the key decisions regarding food production, distribution, and consumption are decidedly political. This course provides students with the concepts and theories necessary for understanding and analyzing the various policies and proposals put forth by food producers, consumer groups, politicians, government regulators, and other food-related interest groups. This course is based on the premise that rational and desirable policy goals for any society are to create and maintain food systems that promote health, protect the environment, are sustainable, and support the livelihoods of participants, but that powerful forces in society including large businesses seeking profits and school boards protecting budgets may oppose this premise in theory or practice. Hence: politics. The course considers how the U.S. and other governments develop policies aimed at ensuring a sufficient, nutritionally adequate, safe, affordable, and sustainable food supply. Drawing on contemporary case studies, it examines: why and how governments establish food and nutrition policies; how stakeholders in the food system use the political system to influence policy; the cultural, social, economic, and political factors that influence stakeholder and government positions on policy issues.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Asian Studies

PS 1359 - EU INTERNATIONAL LAW PERSPECTIVE

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PS 1361 - COMPARATIVE POLITICAL PARTY SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

This course compares the political party systems, electoral processes, and other institutions of governance in four or more countries, which vary by instructor and term.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Global Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req., West European Studies

PS 1364 - CLIMATE CHANGE & PUBLIC POLICY IN EUROPE AND THE US

Minimum Credits: 3

Maximum Credits: 3

Climate change is one of the most difficult problems faced by humankind. We are all causing and suffering from it to varying degrees. As a result, some have labeled it a "super wicked problem." the politics underlying climate change are complex and therefore particularly interesting. In the first part of this course, we will analyze what policymaking really is: how does it work? How are policies designed? Where is policymaking the most effective? In the second part, we will study the determinants of climate policy in Europe and elsewhere. Specifically, we will investigate the role played by public opinion, political leaders, bureaucracies, scientists, and interest groups. The last part of this course evaluate the effectiveness of actual policies designed to solve climate change. We will examine a broad range of policies ranging from carbon taxes to technology transfers.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: MCSI - Sustainability Related

PS 1365 - SOCIAL MOVEMENTS

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to social movements and international political activism, as well as to competing theoretical arguments regarding social movements. Issue areas we will examine include (but are not limited to) human rights, civil rights, labor rights, children's rights, women's rights, lgbt rights, indigenous rights, immigrant and refugee rights, HIV/AIDS, the environment, climate change, peace, and global justice. Students will explore different causal factors that influence social movements, and compare and contrast how these factors affect movements cross-nationally.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: UPB Global General Ed. Requirement, UPB Political Science General Ed. Requirement

PS 1367 - ENVIRONMENTAL POLITICS

Minimum Credits: 3

Maximum Credits: 3

A multidisciplinary general education course designed at an introductory level. This course provides students with comprehensive knowledge of the organizations, interests, and processes that shape environmental policy. It explores the local, regional, and global dimensions of the most critical environmental problems and issues facing policy makers today, including land-use management, energy conservation, acid rain, lead poisoning, indoor air pollution (radon pollution), ozone depletion, waste management, waste dumping in the ocean, deforestation worldwide, habitat destruction, and global warming.

Academic Career: Undergraduate

PS 1371 - ISLAM, LAW, AND POLITICS

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: SCI Polymathic Contexts: Global&Cross Cul GE. Req.

PS 1373 - COMPARATIVE POLITICAL ECONOMY

Minimum Credits: 3

Maximum Credits: 3

Comparative political economy studies how politics and economics interact within countries. The interaction of politics and economics varies significantly across countries and leads to differences in policy-making and outcomes. The course begins by analyzing the main theories of comparative political economy and the role of markets and governments. Throughout, the course explores various topics such as monetary policy, taxation, income inequality and social welfare policies, debt and deficit, immigration and populism, and the role of domestic institutions.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PS 1374 - POLITICS OF GLOBAL INEQUALITY

Minimum Credits: 3

Maximum Credits: 3

In this course we will first examine the evidence for the assertion that the rich are getting richer and the poor poorer by paying particular attention to questions of relative vs. Absolute poverty. We will then review the major theoretical studies that have attempted to explain the trend in growing income gaps. Finally, we will turn our attention to the empirical studies that have attempted to test the various theories that have been proposed.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Contexts: Soc/Behav. GE. Req.

PS 1375 - RELIGION AND POLITICS

Minimum Credits: 3

Maximum Credits: 3

This course discusses religion and politics, especially in its contemporary dimensions. Taking a comparative focus that will change from term to term.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Social Science General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Contexts: Soc/Behav. GE. Req.

PS 1377 - FRANCE IN THE 21ST CENTURY: POLITICS, PROTEST AND IDENTITY

Minimum Credits: 3

Maximum Credits: 3

This course will provide students with a thorough understanding of France at the end of the 20th and beginning of the 21st century. Topics covered will include: party politics, public opinion, voting behavior, protest, the rise of the far right and France in the EU.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PS 1378 - CHALLENGES TO DEMOCRACY AND ITS INSTITUTIONS

Minimum Credits: 3

Maximum Credits: 3

Developing a new democracy is a process, with at least two main parts. First the country must move away from authoritarian rule. The first part of the course, therefore, will examine why (or why not) countries make that transition and how they do so. The second part of the course will then examine why some countries are more successful in their transition, based on an examination of civil society and the types of political institutions (such as political parties, the executive system, and the judiciary) that countries develop. What influences these choices and how do these choices affect success and stability of the new democracy? Has international aid been successful in helping countries develop democratic practices?

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Global Issues General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

PS 1381 - CAPSTONE SEMINAR IN COMPARATIVE POLITICS

Minimum Credits: 3

Maximum Credits: 3

Capstones are writing intensive courses for senior, PS majors. Subject matter will vary from term to term depending on the interests, area of expertise, and inclinations of the particular instructor.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Letter Grade

Course Requirements: PREQ: PS 0300; PLAN: Political Science (BA or BS or BPH); LVL: Sr; PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or 0213 or 0214 or ENGFLM 0210 or FP (0003 or 0006)

Course Attributes: Capstone Course, Global Studies, Undergraduate Research, West European Studies, Writing Intensive Course (WRIT)

PS 1383 - POLITICS OF CONTEMPORARY MIDDLE EAST

Minimum Credits: 3

Maximum Credits: 3

The main emphasis of the course will be on conflict and conflict resolution in the Middle East. Conflict has been a constant feature of the region since 1945. This course will be primarily concerned with how and why these conflicts are generated, escalate, become protracted, and are resolved.

Academic Career: Undergraduate

PS 1384 - TOPICS IN COMPARATIVE POLITICS

Minimum Credits: 3

Maximum Credits: 3

EU international Law Perspective AT A TIME WHEN THE EUROPEAN UNION FACES AN EXISTENTIAL CRISIS AND A SERIOUS MULTI-DIMENSION DISINTEGRATION THREAT (AS EVIDENCED, FOR INSTANCE, BY THE WITHDRAWAL OF EXISTING MEMBERS AND THE POSSIBLE COLLAPSE OF COMMON POLICIES), UNDERSTANDING THE EU AND ITS IMPACT ON THE INTERNATIONAL ARENA

SEEMS MORE IMPORTANT THAN EVER. TOO OFTEN, EVEN IN EUROPE, THE HISTORY OF THE EU, THE LEGAL INFRASTRUCTURE OF THE EUROPEAN PROJECT OF INTEGRATION AND THE EFFECTS OF HARMONIZATION/UNIFICATION OF THE LEGAL SYSTEMS OF THE MEMBER STATES BY THE EU REMAIN UNKNOWN TO MANY. FROM AN EUROPEAN PERSPECTIVE, THIS IS DETRIMENTAL TO FEELING EUROPEAN, GIVES RISE TO MISLEADING INFORMATION AND CONSTITUTES THE BREEDING-GROUND OF POPULIST POLITICAL NARRATIVES. CONVERSELY, FROM AN NON-EU PERSPECTIVE, THIS LACK OF KNOWLEDGE PREVENTS NON-MEMBER STATES TO CONSIDER THE EU AS A POSSIBLE GEO-POLITICAL MODEL OR AS AN EXPORTER OF REGULATORY STANDARDS AND, MOREOVER, LIMITS THE POSSIBILITY OF NON-MEMBER STATES TO UNDERSTAND THE LEGAL FRAMEWORK THAT GOVERNS ONE OF THE LARGEST ECONOMY OF THE WORLD. THE PROPOSED COURSE, ADDRESSED BOTH TO UNDERGRADUATE AND LAW STUDENTS, INTENDS TO INTRODUCE STUDENTS TO THE EU AND ITS POLICY FRAMEWORK FROM AN INTERNATIONAL LAW PERSPECTIVE. ON THE ONE HAND, IT AIMS AT PROVIDING THEM WITH A BASIC BUT CRITICAL UNDERSTANDING OF THE HISTORICAL, INSTITUTIONAL, CONSTITUTIONAL AND SUBSTANTIVE DIMENSION OF THE EU AND OF THE SUI GENERIS CHARACTER OF THE UNION LEGAL ORDER VIS-À-VIS INTERNATIONAL LAW. ON THE OTHER HAND, IT STRIVES TO EXPLORE THE FUNDAMENTALS OF EU BUSINESS LAW WITH THE AIM TO ANALYZE THE LEGAL CHALLENGES THAT A NON-MEMBER STATE BUSINESS COULD FACE WHEN ENTERING THE EU MARKET. THE FIRST PART OF THE COURSE WILL PROVIDE STUDENTS WITH A GENERAL INTRODUCTION ON THE EU AND EU LAW. AFTER A SYNOPSIS OF THE HISTORY, THE INSTITUTIONAL STRUCTURE AND THE COMPETENCES OF THE EU, THE COURSE WILL FOCUS ON THE SOURCES AND THE PRINCIPLES OF EU LAW AND ON ITS STATUS WITHIN THE LEGAL SYSTEMS OF MEMBER STATES. ATTENTION WILL ALSO BE DEVOTED TO THE CRUCIAL ASPECT OF ENFORCING EU LAW BY BOTH EU AND NATIONAL LEVEL INSTITUTIONS AND TO THE KEY FEATURES OF SUBSTANTIVE EU LAW, WITH A PARTICULAR EMPHASIS ON THE FOUR FREEDOMS AND ON EU COMPETITION LAW. THE SECOND PART OF THE COURSE WILL EXAMINE THE (AT TIMES TORMENTED) RELATIONSHIP BETWEEN EU LAW AND PUBLIC INTERNATIONAL LAW. FOLLOWING A CONCISE ILLUSTRATION OF THE BASIC FEATURES OF PUBLIC INTERNATIONAL LAW, THE STATUS OF THE EU AS A (SUI-GENERIS) LEGAL ORDER AND THE RISING ROLE OF THE EU AS A CO-CREATOR OF THE INTERNATIONAL LEGAL ORDER WILL BE ANALYZED. THE THIRD PART OF THE COURSE WILL DEAL WITH THE FUNDAMENTALS OF EUROPEAN BUSINESS LAW IN AN INTERNATIONAL SETTING. SUBJECTS COVERED WILL INCLUDE JURISDICTION AND CHOICE OF LAW IN CIVIL AND COMMERCIAL MATTERS, CONSUMER PROTECTION IN EUROPEAN LAW AND THE IMPACT OF EU LAW ON INTERNATIONAL COMMERCIAL ARBITRATION. THIS DESCRIPTION CHANGES EVERY TERM DEPENDING ON THE INSTRUCTOR. THIS DESCRIPTION IS FOR THE SPRING TERM 2184.

PS 1386 - POLITICS OF LEADERSHIP

Minimum Credits: 3

Maximum Credits: 3

The life and work of every politician and statesman is a unique story, which can illustrate much about extremely complex and convoluted nature of politics. This course will study some of the key politicians and statesmen of the 20th and 21st centuries as the positive and negative examples of political leadership. Moreover, relying on the vast scholarly literature on this subject, the course will review different types of leadership (charismatic, institutional, hereditary, and others) in different political systems and regimes (authoritarian, liberal-democratic, and monarchial) and very importantly, will focus on leadership personalities, tactics, techniques and skills in order to fully dissect and understand the key characteristics of good and bad, effective and ineffective leadership.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PS 1387 - POLITICS OF WATER

Minimum Credits: 3

Maximum Credits: 3

Given the need to highlight the contributions political science offers to our study of the Anthropocene, this interdisciplinary course investigates the role of water in the political development of contemporary Central Eurasia. As a landlocked world region, Central Eurasia provides a compelling case for the study of the political, social, and technological innovations that has yielded sites of ecological disaster and environmental frontiers of opportunity. This course guides students through the key stages of Soviet political change and its impact on the issues of Central Eurasian water culture: the collapse of tsarist governance and the withdrawal of its engineer-specialists, ending its "civilizing mission"; the arrival of US experts whose modern irrigation methods inadvertently contributed to environmental degradation and economic dependence; the "shock" construction sites of the Stalin era; the misguided dam-building projects of the late Soviet period; and finally the issues relating to the international cooperation to manage the river basins connecting Kyrgyzstan, Tajikistan, Uzbekistan, Turkmenistan, and Kazakhstan.

Grade Component: LG/SNC Elective Basis

PS 1391 - AUTHORITARIAN STATECRAFT AND THE ARTS OF RESISTANCE - ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

According to the democracy index, only 19 countries are "full democracies," housing only 13% of the world's population. Countries like Japan and the United States are considered "flawed democracies" while the majority of the world's political systems are either "hybrid" or "authoritarian." Therefore, if we want to truly understand politics, it is essential that we understand politics in non-democracies, or political systems conventionally referred to as "authoritarian regimes." This course invites students to think critically about the nature of authoritarian political systems. We will examine how society and politics are organized in authoritarian systems and how individuals experience power and authority in these societies: historical and contemporary. This class will include a significant training in a specific analysis method or methods to complement the course topic, as well as satisfy the requirement for a Political Science department analysis course.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PS 1392 - EUROPEAN POLITICS-ANALYSIS IN COMPARATIVE POLITICS

Minimum Credits: 3

Maximum Credits: 3

This class takes a comparative approach to studying the political systems of Europe and the European Union and the current policy issues facing both European governments and their citizens. Students will also learn how to use, interpret and present data relating to these topics.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Undergraduate Research

PS 1393 - GLOBAL PUBLIC HEALTH AND SOCIAL POLICY

Minimum Credits: 3

Maximum Credits: 3

This course compares health care systems and welfare systems as well as developments in public health and social policy across a range of countries. We will examine the impact of political, economic and cultural factors as well as the role of state actors, international organizations, non-governmental organizations, and corporations on public health and social policy globally. An intersectional perspective will be used to examine patterns of inequality and to assess the ways in which policy-making impacts different groups in society.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PS 1395 - LATIN AMERICAN POLITICS-ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

The course compares and contrasts the governments and political processes throughout Latin America. It offers a detailed look at several countries and provides a comparative framework to discuss the rise, fall, and quality of democracy. To meet the analytical requirements, there will be an emphasis on using data to evaluate the level and quality of democracy, economic activity, and public opinion.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PS 1398 - EU SIMULATIONS

Minimum Credits: 3

Maximum Credits: 3

The European Union (EU), one of the most integrated, economically and politically, regions globally, is currently faced with a myriad of challenges ranging from collective security to socio-economic concerns. Through a series of hands-on interactive simulations throughout the semester, this course helps you to learn in greater detail about the EU as an institution and explore some of these key challenges. First, to ensure students have a solid understanding of the EU, the course briefly outlines the theories used within political science to explain the driving forces behind EU integration and then overviews the key institutional bodies within the EU that help to set its policy agendas. The course then explores three of these policy areas individually, exploring the evolution of each within the context of the EU, and then culminating in a hands-on simulation where you help determine the EU's direction for each of the examined policy agendas.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PS 1399 - ANALYSIS OF COMPARATIVE POLITICS

Minimum Credits: 3

Maximum Credits: 3

This class focuses on significant training in a specific analysis method or methods to complement the study of Comparative Politics, as well as satisfy the requirement for a Political Science department analysis course.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PS 1412 - COMPARATIVE POPULISM

Minimum Credits: 3

Maximum Credits: 3

Populism has gained a successful foothold and generated new challenges in numerous long-established democracies across the globe over the past few decades. It has become a widely debated and well-researched theme in light of the global resurgence of populist leaders, parties and movements, as well as events like the Brexit referendum and the Trump presidency. Nevertheless, some misconceptions and inaccurate interpretations surrounding the concept remain- this course addresses these questions by exploring: (i) what populism stands for in today's political context, (ii) how it differs from its earlier manifestations, (iii) how it relates to democracy and affects the political structure, and (iii) which strategic responses are available to mitigate its impacts.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PS 1442 - POLITICS OF EAST CENTRAL EUROPE

Minimum Credits: 3

Maximum Credits: 3

This course will compare how different historical legacies, events, actors, and societies shape the variation in political outcomes in East Central Europe today. We will start with a brief historical overview, but we will spend most of the semester studying the post-1989 period. We will analyze variation in the degree to which countries set up liberal democratic institutions, the ways political participation is structured, and the current challenges countries in the region face (e.g. public corruption, democratic backsliding, policies and attitudes towards sexual, ethnic, and religious minorities, and Russia's full-fledged invasion of Ukraine).

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PS 1450 - TOPICS IN POLITICAL SCIENCE

Minimum Credits: 3

Maximum Credits: 3

An advanced study of a specific topic in political science.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PS 1501 - THEORY OF INTERNATIONAL RELATIONS

Minimum Credits: 3

Maximum Credits: 3

This course explores central concepts and theories employed by political scientists to explain how world politics functions. You will be introduced to theoretical orientations such as realism, institutionalism, and constructivism, and we will discuss how constructs such as power, interests, identity, legitimacy, and order provide insight into political behavior. Much of the material examined in the course is abstract and you will need to think carefully about how the various concepts and arguments can be integrated. By the end of the course, you should have developed a relatively sophisticated conceptual framework with which to analyze events in world politics.

Academic Career: Undergraduate

Course Attributes: DSAS Social Science General Ed. Requirement, Global Studies, SCI Polymathic Contexts: Soc/Behav. GE. Req.

PS 1502 - INTERNATIONAL LAW AND PROBLEMS OF WORLD ORDER

Minimum Credits: 3

Maximum Credits: 3

International law provides an important framework through which state and non-state actors interact at the global level on a great many number of topics. This course will start with a survey of the sources, processes, institutions, and politics of public international law. We'll then explore historical manifestations of international criminal law related to mass atrocity crimes such as genocide, war crimes (i.e., attacking civilians, rape, and torture), and crimes against humanity (i.e., slavery and apartheid). Throughout the term, we will reflect on the stakes of defining actions and policies as "mass atrocity crimes," the construction of popular and official discourses through which crimes and bystander actions are justified, the power and effects of international legal instruments, and the politics of pursuing justice through international tribunals or other legal mechanisms. [WARNING: This course covers a wide array of emotionally difficult topics.]

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PS 1503 - INTERNATIONAL ORGANIZATION

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the interplay among states, intergovernmental organizations, civil society organizations, and multinational corporations. Cases are drawn from a broad range of issue areas, including economic relations, human rights, peace and security, and the environment. The objective is to better understand the dynamics and evolution of formal and informal international institutions and what difference they make, in light of globalization and emerging geopolitical changes.

PS 1508 - INTERNATIONAL TERRORISM

Minimum Credits: 3

Maximum Credits: 3

Terrorism has gone from a relatively marginal security concern to one of the thorniest security issues in international politics. Indeed, today there are few countries that do not suffer from some form of terrorism. And terrorist groups such as the Islamic state in Syria pose significant challenges for the international community. This course aims to introduce students to main debates surrounding terrorism. The course will deal with questions regarding the definition of terrorism, its causes and historical evolution, the relationship between insurgency and terrorism, the organizational structure of terrorist groups and the tactics they use. We will also analyze counter-terrorism and the factors that influence its effectiveness. Throughout the course, we will have a chance to take a closer look at some of the terrorist groups such as Al-Qaeda, Islamic state, Hamas, ETA, Tamil Tigers, among others. In the last part of the course, we will deal with the rise of domestic terrorism in the U.S.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SU3 Elective Basis

PS 1509 - CONFLICT AND WAR THEORY

Minimum Credits: 3

Maximum Credits: 3

The primary objective of this course is to introduce the student to theoretical arguments and empirical evidence concerning the sources of conflict and war in human society, particularly within the international arena. Reading material will be drawn from a number of disciplines, including psychology, sociology, history and political science.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Global Studies, West European Studies

PS 1510 - COLDWAR:SOVIET UNION AND WEST 1917-91

Minimum Credits: 3

Maximum Credits: 3

This course is designed to help students understand the central question in world politics during much of the 20th century-the relationship between the West and the Soviet Union from 1917 to 1991. The course surveys the Western response to the formation of the USSR as the first "socialist" state and to the international communist movement which developed under its leadership from 1917 to 1991.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Global Studies, Russian & East European Studies

PS 1511 - AMERICAN FOREIGN POLICY

Minimum Credits: 3

Maximum Credits: 3

Provides a historical survey of American foreign policy from the end of World War II until the present, an analysis of the decision making process led by the president of the United States, and a discussion of the impact of both the international political system and American domestic politics on this process.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Global Studies

PS 1512 - THE POLITICS OF MIGRATION

Minimum Credits: 3

Maximum Credits: 3

Global human mobility in the 21st century has become an increasingly divisive issue among states. Nowhere is this trend best illustrated than in Europe today. This course offers students an opportunity to study up-close migration governance and politics in Europe with particular attention to Italy and the Central Mediterranean. The course explores European migration policy, its legal and political dimensions across different levels of governance - the European level (EU), the national level (EU member state) and the sub-national level (regions & provinces). Regarding the national and sub-national level, this course will focus on Italy. Considering the multiplicity of state and non-state actors involved in managing migration, lectures and discussions will center around five areas: search and rescue (SAR), arrival/disembarkation, reception, asylum, and integration. The course has two goals: 1) to provide students with the knowledge and tools to navigate European migration politics, and 2) to offer students the opportunity to build on their research, data management, analysis, and writing skills. As such, in addition to content on the migration policy in Southern Europe, a major part of this course is devoted to conducting original research, working with data, and present findings at the end of the course.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Russian & East European Studies

PS 1513 - FOREIGN POLICIES--CHANGING WORLD

Minimum Credits: 3

Maximum Credits: 3

The aim of this course is to introduce students to the analysis of foreign policy as a form of political behavior and to the specific factors influencing the foreign policies of several of the world's most powerful states. The lectures and readings follow several intertwining themes, covering: 1) the conceptual and analytical tools utilized to investigate and compare the foreign policies of states; 2) the nature of certain phenomena which present countries with complex and dangerous international problems, e.g. security, interdependence; 3) the particular sources, processes and outcomes involved in the foreign policies of several states including the United States, Russia and others. The approach is analytical and though some of the readings and lectures are historical, the emphasis is on the contemporary context. It is also comparative, offering students a look at how these states' domestic culture, processes and institutions affect their foreign policies. (International relations field)

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Russian & East European Studies

PS 1514 - POLITICAL STRATEGY INTERNATIONAL RELATIONS

Minimum Credits: 3

Maximum Credits: 3

Strategic interdependence dominates international relations - how one state behaves not only affects its own outcomes but other states' outcomes as well. Game theory has become a primary method of studying strategic interdependence. This class offers a brief primer in elementary game theory and then surveys the major formal findings in international relations, with focuses on explanations for war and design of international institutions.

PS 1516 - TRANSATLANTIC POLICY ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

This new skills based course aims to provide students with crucial analytical and professional skills pertinent to the transatlantic policy world. Among them are: to read analytically and critically and to speak knowledgeably about a range of transatlantic issues that concern political scientists and policy makers, including immigration, environmental protection, social policies, and trade and economic development; and to communicate such policy analysis in a clear and persuasive manner accessible to a wide range of policy focused audiences at the international and national levels.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PS 1517 - US FOREIGN POLICY TOWARD THE MIDDLE EAST

Minimum Credits: 3

Maximum Credits: 3

The purpose of the course is to have students use a conceptual framework to analyze U.S. foreign policy towards the Middle East. They will do this within the context of the various traditions that have given direction to U.S. foreign policy conduct over the ages. As part of this, students will analyze U.S. policy towards the Middle East since the Cold War, and then use this as an historical backdrop for looking at different foreign policy options towards this tumultuous region for the future. The class will help develop the students' conceptual understanding of the complexities of foreign policy-making and enable them to tease out pertinent trends and patterns that otherwise might seem elusive. They will also get a grounding in how to conduct high level foreign policy analysis and gain an understanding of the foundations of strategy and its application in U.S. foreign policy towards the Middle East.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PS 1518 - GERMANY AND EUROPE: A FOREIGN POLICY TRANSFORMED

Minimum Credits: 3

Maximum Credits: 3

This course explores continuity and change in the foreign policy of Germany ' the largest, wealthiest, and arguably most influential European union member state ' from state unification through the present era. (International relations field)

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Attributes: SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Contexts: Soc/Behav. GE. Req.

PS 1519 - GLOBAL ENERGY POLICY

Minimum Credits: 3

Maximum Credits: 3

This course explores energy policy and policymaking. Energy represents a crucial input for any modern society. Consider a typical day: your electric alarm wakes you up, you take a warm shower, you drink a cup of hot tea, you take the bus to school, you navigate internet, you cook a meal. None of these can be done without energy. Thus, how energy is provided, how abundant it is, how much it costs, and how clean it is all affect everybody's daily lives. This makes energy important. Yet energy is also complicated. It must be transformed from primary fuels that are geographically concentrated, require modern technology, and can have all kinds of side effects on our lives. This makes energy a highly contention political problem. This course thus investigates the nuances of energy policy, from the very local to the global. We will examine everything from oil to renewable energy and try to understand how and why politics matters.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PS 1521 - EASTERN EUROPE IN WORLD POLITICS

Minimum Credits: 3

Maximum Credits: 3

Eastern Europe has now seen more than twenty years of dramatic changes encompassing a movement away from one-party dictatorship and state-run economies to democratic politics and market economies. These changes have affected and been affected by developments in Europe, including Russia, Euro-Atlantic relations and international relations more broadly. The aim of this course is to explore the background and dynamics of the remarkable changes in "the other Europe." The course will move quickly over the history of the region generally referred to as "East Europe" and will focus primarily on contemporary developments. A particular focus of the course is the impact on the region of developments elsewhere, especially in the politics and policies of outside powers, and the ripple effect of changes in the region on European and world politics.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PS 1523 - EAST ASIA IN WORLD POLITICS

Minimum Credits: 3

Maximum Credits: 3

This course focuses on how the peoples and states of East Asia are affected by and in turn influence the world environment. Students examine the modern history of the region, which is crucial to understanding the contemporary situation. The doctrines that affect governance and international affairs in the region are also examined.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Asian Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

PS 1533 - POLITICAL VIOLENCE AND REVOLUTION

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to the conceptual parameters of political violence, its various forms and understanding these phenomena by studying the diverse range of violent conflicts in South Asia. It explores the colonial legacy in the subcontinent and, the political character of the state for explaining the genesis and nature of different conflicts and asks why only certain conflicts become violent and how? Students will also learn about different strategies adopted by states for coping with such violent conflicts. These issues will be examined in a comparative framework and as part of the course work, students will be encouraged to undertake some case studies of conflicts to understand 'what works' and 'what doesn't' in managing or ending political violence and, resolving such conflicts.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

PS 1534 - CIVIL WARS

Minimum Credits: 3

Maximum Credits: 3

This course explores why peace sometimes lasts a long time and sometimes falls apart quickly after Civil Wars. We will examine how the international community deals with civil conflicts and what can be done to ensure a long-lasting peace in war-torn countries. Emphasis will be placed on the factors that increase the durability of peace and aid the establishment of long-term prospects for reconciliation to rebuild societies after wars. Students will gain knowledge of theories that explain whether and how peacekeeping forces, agreement design, power-sharing institutions, mediation, foreign aid, and post-war elections help domestic belligerents reach and keep peace.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Global Issues General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

PS 1536 - HUMAN SECURITY

Minimum Credits: 3

Maximum Credits: 3

This is a topics course in international relations focusing on the politics of human security. The politics of human security is an area of evolving interest within the field of international relations. Currently, few political science departments offer courses on the topic and there is little agreement on what should be included in such a course. The general consensus is that 'human security' differs from 'national security' in that the latter is concerned with the well-being of the state, while the former is concerned with the well-being of individuals. In this course, we will focus on how violence, political oppression, poverty, and ecological destruction threaten individual welfare and what the international community is (and is not) doing to address these concerns.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: MCSI - Sustainability Related

PS 1537 - PEACEMAKING & PEACEKEEPING

Minimum Credits: 3

Maximum Credits: 3

This course explores the conditions that lead to initiation, escalation, and termination of Civil Wars as well as the circumstances that promote or restore peace within states. Why do Civil Wars break out in some countries but not others? Why do Civil Wars last as long as they do? How does the international community help resolve Civil Wars?

The ultimate goal of this course is not to examine a particular Civil War in detail but rather to provide a broad theoretical treatment of Civil Wars, and a better understanding of international relations. Upon completion of this course, you should be familiar with the factors that mitigate or exacerbate conflict within states and develop informed insights about the mechanisms of conflict management and resolution.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PS 1538 - THE POLITICS OF OIL AND NATURAL RESOURCES

Minimum Credits: 3

Maximum Credits: 3

Oil has played an incredible role in shaping the domestic and international politics of both producer and consumer countries around the globe. Since commercial production first began in the late 19th century, rising world demand for oil coupled with a geographically concentrated and exhaustible supply has defined the nature of global economic competition, economic and political development within countries and geo-political power struggles between countries. This course aims to shed light on why oil (and related natural resources) has had such a powerful effect on world politics to date and what our dependence on oil might mean for the future.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PS 1541 - POLITICS GLOBAL ECONOMIC RELATIONS

Minimum Credits: 3

Maximum Credits: 3

This course examines the connections between power and wealth, states and markets, and economics and politics in order to gain a better understanding of the political underpinnings of the global economy as well as the influences that international economics has on national and international politics. It is an introduction to what political scientists call international political economy (or simply IPE).

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: PS 0500 and PS 0700

PS 1550 - GENDER AND GLOBAL POLITICS

Minimum Credits: 3

Maximum Credits: 3

This seminar examines the connections between (1) gender and sexuality and (2) global political processes, including armed conflict, violence, international security, global governance, transnational economics and development, global environmental politics, human rights, and activism/advocacy. Throughout the term we'll put gender-inclusive approaches in direct conversation with genderless analyses of global processes, paying particular attention to cross-cutting themes of identity construction, intersectionality, vulnerability, resource distribution, and power relations,

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PS 1555 - GLOBAL STUDIES MINI COURSE

Minimum Credits: 1

Maximum Credits: 1

This mini course will be offered in Fall and Spring terms. The basic descriptions differ in each term and can be found below. Additionally, specific information will be added to the Notes section as it becomes available and edited by individual events and instructors each term. Fall Terms: Global Health: This course engages the interdisciplinary nature of global health by approaching the issue through the lens of the Sustainable Development Goals (SDG) developed by the United Nations. With an applied focus, the course will assist students in engaging and advocating for a community on a global health issue through a policy memo. For more information see the Global Studies web site or contact global@pitt.edu. Spring Terms: Cities in Transformation: This course views cities as hubs where patterns, connections, discussions, and the processes shape such issues as social justice, economic development, technology, migration, the environment among others. By examining cities as a lens, this course encourages students to examine cities as a system for discussing social processes being built and rebuilt. For more information see the Global Studies web site or contact global@pitt.edu.

Grade Component: LG/SNC Elective Basis

PS 1581 - CAPSTONE SEMINAR IN INTERNATIONAL RELATIONS

Minimum Credits: 3

Maximum Credits: 3

Capstones are writing intensive courses for senior, PS majors. Subject matter will vary from term to term depending on the interests, area of expertise, and inclinations of the particular instructor.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Letter Grade

Course Requirements: PREQ: PS 0500; PLAN: Political Science (BA or BS or BPH); LVL: Sr; PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006)

Course Attributes: Capstone Course, Global Studies, Undergraduate Research, West European Studies, Writing Intensive Course (WRIT)

PS 1583 - TOPICS IN INTERNATIONAL RELATIONS

Minimum Credits: 3

Maximum Credits: 3

Current topics of interest in international relations. Topics covered vary with instructor and term.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Global Studies, West European Studies

PS 1587 - U.S. FOREIGN POLICY IN AFRICA

Minimum Credits: 3

Maximum Credits: 3

This course will focus on the increasing engagement of the United States in Africa from the late 19th century until the present. Using a case study approach, students will analyze American foreign policy in Africa and explore the varied effects of those policies. These case studies will include the political realities of decolonization, the cold war, and economic aid and the social and cultural ties of black Americans to Africa. The course will identify specific crises in American and African history as focal points for study, but will also provide a larger narrative about American involvement in both the colonial and post-colonial development of Africa.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Diversity General Ed. Requirement, DSAS Historical Analysis General Ed. Requirement, SCI Polymathic Contexts: Soc/Behav. GE. Req.

PS 1591 - ANALYSIS OF CIVIL WARS

Minimum Credits: 3

Maximum Credits: 3

In this class, we will learn about the conditions that lead to the origins of internal conflicts (such as the ones in Ethiopia, Syria, and Yemen), investigating the domestic and international factors that cause the onset of these contentions. For the analysis portion of the class, we will learn the basics of a statistical package (Python, Stata, or R), the fundamentals of statistics, and then use these skills to empirically analyze the onset of civil wars.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: Undergraduate Research

PS 1592 - POLITICS OF GLOBAL ECONOMIC RELATIONS - ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

This course examines the connections between power and wealth, states and markets, and economics and politics in order to gain a better understanding of the political underpinnings of the global economy as well as the influences that international economics has on national and international politics. It is an introduction to what political scientists call international political economy (or simply IPE). This class will include a significant training in a specific analysis method or methods to complement the course topic, as well as satisfy the requirement for a Political Science department analysis course.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

PS 1599 - ANALYSIS OF INTERNATIONAL RELATIONS

Minimum Credits: 3

Maximum Credits: 3

This class focuses on significant training in a specific analysis method or methods to complement the study of International Relation, as well as satisfy the requirement for a Political Science department analysis course.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

PS 1601 - ANCIENT AND MEDIEVAL POLITICAL THOUGHT

Minimum Credits: 3

Maximum Credits: 3

This course surveys the work of major thinkers in the Western political tradition from ancient Greece through the middle ages, such as Plato, Aristotle, Augustine, Aquinas, and others.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: SCI Polymathic Contexts: Ethical/Policy GE. Req., West European Studies

PS 1602 - STATES OF NATURE: EARLY MODERN POLITICAL THOUGHT IN CONTEXT

Minimum Credits: 3

Maximum Credits: 3

Description: This course builds upon the common threads of some of the major thinkers in the Western political tradition from the Enlightenment (Hobbes, Locke, and Rousseau), but places them--and in particular their "State of Nature" arguments--in critical discourse with political theory from other modern, intersectional, and cross-cultural approaches and traditions. This class challenges the way that political theory has traditionally understood the "State of Nature", while at the same time offering other accounts of "natural state" that are important to consider when judging not only the outcomes but the very utility of this mode of political thought.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, Global Studies, SCI Polymathic Contexts: Ethical/Policy GE. Req., West European Studies

PS 1603 - MODERN AND CONTEMPORARY POLITICAL THOUGHT

Minimum Credits: 3

Maximum Credits: 3

This course provides a three-part introduction to modern and contemporary political thought with a focus on identity and identity politics. The first third of the course will explore major modern and contemporary theories about how identities are formed and experienced. The second portion of the course will focus on the relationship between identity and law. The final third of the course will use case studies from U.S. history and current events to explore how identity shapes and is shaped by social movements and public policy. Throughout the semester, students will develop a research project that uses the case of their choosing to explore the ways in which identity affects and is affected by the political world.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, SCI Polymathic Contexts: Ethical/Policy GE. Req.

PS 1604 - MYTH, PROPAGANDA, AND THE STATE

Minimum Credits: 3

Maximum Credits: 3

This course focuses on a single notion: that states use narrative(s) to support their regimes. The class aims to prepare students for understanding how story, myth, propaganda, and indoctrination are used by various political actors to build, sustain, and/or destroy regimes. The course begins with a consideration of quintessential cases of states engaging in these practices (ancient Rome, fascist Italy, imperial Japan, and Cambodia under the Khmer Rouge). It then examines parallel examples within United States history and narratives. The second half of the course then focuses on the practice of propaganda specifically, considering its modern origins in WWI, examining transitions in technique across multiple states, weighing linkages to advertising and public information campaigns, and finally having students construct their own propaganda. The course concludes with a formal content analysis training focused on a particular vein of propaganda, and an assignment that has students blending content analysis consideration with political theory argument construction.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PS 1607 - AMERICAN POLITICAL THOUGHT

Minimum Credits: 3

Maximum Credits: 3

This course provides a survey of American political thinking from the founding to the present.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, SCI Polymathic Contexts: Ethical/Policy GE. Req.

PS 1612 - MARXISM

Minimum Credits: 3

Maximum Credits: 3

This course is concerned with Marxist political theory, with some attention to related philosophical and historical issues as well. Approximately two thirds of the course will be devoted to analysis of the original sources of Marxism—the writings of Marx and Engels; the remainder will consider various developments in the theory of Marxism.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PS 1614 - THEORIES OF JUSTICE

Minimum Credits: 3

Maximum Credits: 3

This course addresses the key intersection between two important topics in contemporary political theory: justice and globalization. The first half of the course will cover the highly influential works of John Rawls as well as reactions from Robert Nozick, Onora O'Neill, and Susan Moller Okin. The second half of the course will weave in the issue of globalization to questions of justice 'again using Rawls' work and various respondents as a vehicle for doing so. The course ends with a significant applied project on the intersection of globalization and justice that will challenge students to consider the current state of justice in a particular global case of their choosing.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, SCI Polymathic Contexts: Ethical/Policy GE. Req.

PS 1619 - DEMOCRATIC THEORY

Minimum Credits: 3

Maximum Credits: 3

Democracy is a centrally important concept in political science. Those who wish to study almost any aspect of politics ' from election campaigns to domestic policy processes to international relations ' will, at some point, be expected to articulate a theory of democracy. Even those who study authoritarian regimes often use democratic regimes as counterpoint examples. In short, a well-rounded political scientist must know something about both democratic institutions and democratic theory. This course aims to provide students with an appreciation of the varieties of democratic thought, a knowledge of the great debates in the field, and a sense of how democratic ideals have been approximated in institutional forms.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PS 1621 - HISTORY OF FEMINIST POLITICAL THOUGHT

Minimum Credits: 3

Maximum Credits: 3

This course will introduce students to the so-called first wave of feminist theorizing and activism. It aims to familiarize students with the main philosophical and political debates that concerned early feminists, with particular emphasis on the development of the woman suffrage movement in the United States. We will critically assess the struggle for suffrage in relation to the wider philosophical concerns of feminists and reflect on the strengths and limitations of first-wave feminism. We will also consider critiques of first-wave feminism from various subaltern perspectives and ponder the renewed relevance of first-wave insights in the current political context.

Academic Career: Undergraduate

Course Component: Lecture
Grade Component: LG/SNC Elective Basis

PS 1622 - "OUTSIDER POLITICS" : ANARCHIST, PUNK, QUEER, AND FEMINIST THEORY

Minimum Credits: 3

Maximum Credits: 3

This course examines the notion of what "outsider" means in political thought, and focuses on a specific subset of inter-related theoretical, social, economic, and political movements that emerged in the 1970's and into the 21st century. While there were elements of each of these long before that time, the past fifty years have been marked by increasing visibility, and thus tension with the very notion that they are "outsider". This class focuses on some (but certainly not all) "non-dominant" approaches to political thought and life, covering specifically anarchist, queer, punk, and feminist thought. The class will explore their historical progression as theories and movements both, as well as focus students on current and intersectional approaches to each. The class will motivate students to be not merely consumers of these theories, but producers in the spots where they are inclined-a strong focus on writing, making, and publishing one's own and peers' scholarship will be the core of work for the class. Note: This course is paired with PS 1621 History of Feminist Political Thought. That course is not a pre-requisite for this one, but students will find that this one picks up historically roughly where that one ended (with just a bit of overlap).

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, SCI Polymathic Contexts: Ethical/Policy GE. Req.

PS 1629 - TOPICS IN POLITICAL THEORY

Minimum Credits: 3

Maximum Credits: 3

This course focuses intensely on a specific topic or problem in political theory; topics vary by instructor and term.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PS 1650 - PROCESSES OF IDENTITY FORMATION

Minimum Credits: 3

Maximum Credits: 3

This course foregrounds theoretical perspectives on meaning-making about "selves"-that is, how do "selves" acquire identities? In the context of contemporary Romanian society, students will engage with commonly circulating socially salient identity framings (related to nationality, religion, ethnicity/race, class, sex/gender, sexual orientation, etc.) and consider how they take shape and evolve through social interaction. We will examine social processes including self/other recognition, metaphor use, traumatization and healing, memory-making, institutionalization of narratives, and migration.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

PS 1661 - GAME OF THRONES AND POLITICAL THEORY

Minimum Credits: 3

Maximum Credits: 3

This course considers George R.R. Martin's popular "song of fire and ice"/"game of thrones" series in a political context. The class will consider the way that the series speaks to and shapes political attitudes and beliefs, as well as the way that martin's creative vision was formed by reference to history and politics. The course will begin with reading martin's own writing: the book game of thrones. Then it will explore the historical inspiration of the series, the wars of the roses, and some of the political theory that was created in reaction to that period. Following that, it will cover a few critical political theorists whose works focus on narratives about power, deception, and authority (the core themes of the series). Students in the class will gain exposure to Machiavelli, Locke, de Montesquieu, and Arendt in the course of this consideration, while also getting a chance to understand and discuss the popular books and television show in academic and sustained fashion. As a note, prior reading or viewing of the series is not required, nor necessary, though it will be helpful (and a spoiler policy will be given before the start of the term to minimize concern for those at various points of encountering the series). Grading will be primarily focused on short reaction papers, in-class writing and recall exercises, and a final argumentative research paper.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PS 1675 - POLITICS OF HUMAN RIGHTS

Minimum Credits: 3

Maximum Credits: 3

Human rights have become the dominant normative discourse in global politics today. They are invoked by world leaders justifying military or 'humanitarian' interventions and by local and indigenous social movements challenging their domination within existing systems of social relations. They are lauded as essential to human dignity and decried as tools of imperialism and neo-colonialism. They are tools of the oppressor and tools for the oppressed. How can we make sense of these seemingly contradictory uses and understandings of human rights? This course seeks to explain human rights as fundamentally contested political claims. It develops this perspective through attention to the real politics of human rights, surveying existing human rights law and institutions, examining several important contemporary human rights issues, and reflecting on the different tools that political and social science offer for making sense of these controversies. The emphasis is on helping students to acquire a critical understanding of human rights that they can use to assess contemporary events; students will work together on collaborative projects on issues of their own choosing to develop and apply their learning.

Academic Career: Undergraduate

PS 1693 - POLITICAL THEORY & THE FUTURE-ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

Political Science has been effective at charting the patterns of the past and diagnosing concerns of the present, but consideration of the future is a different matter. This course deals with how to conduct "future-regarding" inquiry effectively, and seeks to train students in this analytical method of approaching a variety of topics that will be critical areas of political life and change in the future. The course covers why the future is difficult for political institutions and political thinkers to deal with and what attempts to effectively regard the future do exist. Automation, the nature of war, relations between generations, climate change, privacy, and many more topics will be covered in the process of learning to be more "future-regarding". This class focuses on significant training in a specific analysis method or methods to complement the study of Political Theory, as well as satisfy the requirement for a Political Science department analysis course.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Undergraduate Research

PS 1699 - ANALYSIS OF POLITICAL THEORY

Minimum Credits: 3

Maximum Credits: 3

This class focuses on significant training in a specific analysis method or methods to complement the study of Political Theory, as well as satisfy the requirement for a Political Science department analysis course.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PS 1702 - VISUALIZING AND UNDERSTANDING SOCIAL DATA

Minimum Credits: 3

Maximum Credits: 3

Much of modern data analysis involves presenting and interpreting various forms of social data (e.g. political, economic, and sociological) in a way that is clearly interpretable and understandable to a general audience. This class is a gentle introduction into data analysis and visualization. The key objective is learning through practical examples how messy real world data can be turned into clear and interpretable visualizations, tables, and more. The course will cover topics such as creating maps of spatial data, visualizing trends over time, analyzing text data, merging different datasets and creating reproducible projects. It aims to give students exposure to coding and computer languages that are often used in data analytics in industry, government and academia.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Undergraduate Research

PS 1781 - EXPLORING SOCIAL PHENOMENON USING INTERACTIVE DATA VISUALIZATION

Minimum Credits: 3

Maximum Credits: 3

A key goal of computational social science is presenting important data on social and political phenomena in an accessible and interactive fashion. This capstone gives students the skills and hands-on experience to do so. It focuses on creating interactive websites or dashboards that are responsive to the input of the user and can, among other things, contain dynamic tables and plots, 3D charts, interactive maps, and animations. In addition to creating these interactive data visualizations, students will reflect on the choices they make in designing their applications and the implications of their analyses for social and political questions.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Letter Grade

PS 1836 - POLITICS THROUGH FILM

Minimum Credits: 3

Maximum Credits: 3

This course uses cinema from a variety of countries to explore, in comparative perspective, central concepts and themes of politics, such as power, authority, conflict, leadership, ideology, propaganda, revolution, justice, and participation.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PS 1900 - INTERNSHIP

Minimum Credits: 1

Maximum Credits: 12

Credit for internships per se is normally limited to the Washington center for learning alternatives or other special centers with which the University of Pittsburgh has formal arrangements.

Academic Career: Undergraduate

Course Component: Internship

Grade Component: Satisfactory/No Credit

PS 1901 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 6

Independent study is normally associated with internships or special programs like the Washington center on learning alternatives.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: LG/SNC Elective Basis

PS 1902 - DIRECTED READING

Minimum Credits: 1

Maximum Credits: 3

Readings on special topics for which courses are not currently offered.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SNC Elective Basis

PS 1903 - DIRECTED RESEARCH

Minimum Credits: 1

Maximum Credits: 6

Research on special topics for which courses are not currently offered.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SNC Elective Basis

PS 1905 - DIRECTED STUDY:FIELD TRIP ABROAD

Minimum Credits: 1

Maximum Credits: 6

Readings on special topics for which courses are not currently offered.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SNC Elective Basis

PS 1906 - UNDERGRADUATE TEACHING ASSISTANTSHIP

Minimum Credits: 1

Maximum Credits: 3

Open to senior Political Science majors, the teaching assistantship consists of providing instructional support to a faculty member as well as taking on some instructional responsibilities under faculty supervision.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: H/S/U Basis

PS 1907 - UNDERGRADUATE RESEARCH ASSISTANT EXPERIENCE

Minimum Credits: 1

Maximum Credits: 2

This course reflects a student's experience working with a member of the political science department as a research assistant. Each project is different, but all involve extensive training in the core disciplinary skills of research: data gathering and analysis, archival work, literature reviews, experimental design, survey methodology, and more.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Satisfactory/No Credit

PS 1909 - POLITICAL SCIENCE LANGUAGE PRACTICUM

Minimum Credits: 1

Maximum Credits: 1

Optional, supplementary 1-credit language trailer.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: Satisfactory/No Credit

PS 1910 - INSTITUTE OF POLITICS INTERNSHIP/SEMINAR

Minimum Credits: 4

Maximum Credits: 4

Students selected for the institute of politics internship will register for this course for the experiential component of their internships. The purpose of the internship experience is to provide the student with direct exposure to the process of public decision-making. Each student will spend nine hours a week working with an individual or office directly involved in the policy making process. Students will be given specific responsibilities and will be expected to be an active and integral part of the office in which they are placed. The details and terms of each placement will be carefully worked out and agreed upon by the student, the placement supervisor and the placement sponsor. Utmost care will be taken to insure that the student is placed in a situation that will maximize his/her exposure to all office activities and that the student is not left unsupervised and uninvolved. Students from all disciplines may apply, but preference will be given to students in their junior and senior years. Students must report to their placement for at least nine hours a week and fulfill any agreed upon responsibilities. Students will also be required to keep a written journal which describes and analyzes their internship experience

Portuguese

PORT 0101 - ELEMENTARY PORTUGUESE 1

Minimum Credits: 3

Maximum Credits: 3

Basic elements of Brazilian Portuguese emphasizing a development of speaking, reading and writing skills.
Introductory course.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PORT 0102 - ELEMENTARY PORTUGUESE 2

Minimum Credits: 3

Maximum Credits: 3

The second half of this introductory course continues to develop skills in the speaking, reading and writing of Portuguese.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: PORT 0101 or 1001 (MIN GRADE 'C' for Listed Courses)

Course Attributes: African Studies, DSAS Second Language General Ed. Requirement, Latin American Studies, West European Studies

PORT 0103 - INTERMEDIATE PORTUGUESE 3

Minimum Credits: 3

Maximum Credits: 3

A continuation of the development of conversational as well as writing skills.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: PORT 0102 or 1002 or 1010 (MIN GRADE 'C' for Listed Courses)

Course Attributes: African Studies, Latin American Studies, West European Studies

PORT 0104 - INTERMEDIATE PORTUGUESE 4

Minimum Credits: 3

Maximum Credits: 3

Follows PORT 0103. A consolidation of speaking, reading and writing skills.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SU3 Elective Basis

Course Requirements: PREQ: PORT 0003 or 0103 or 1003 (MIN GRADE 'C' for Listed Courses)

Course Attributes: African Studies, Latin American Studies, West European Studies

PORT 0120 - CONVERSATION

Minimum Credits: 3

Maximum Credits: 3

An intermediate course in Portuguese conversation.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: PORT 0004 or 1004 (MIN GRADE 'C' for Listed Courses)

Course Attributes: Latin American Studies, West European Studies

PORT 0125 - GRAMMAR AND COMPOSITION

Minimum Credits: 3

Maximum Credits: 3

An intermediate course in grammar and composition for those who have completed PORT 0004/0104 or the equivalent.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: PORT 0004 or 1004 (MIN GRADE 'C' for Listed Courses)

Course Attributes: Latin American Studies, West European Studies

PORT 1010 - PORTUGUESE FOR SPANISH SPEAKERS 1

Minimum Credits: 3

Maximum Credits: 3

Portuguese for Spanish speakers is designed as an accelerated introductory course for native speakers of Spanish or English speakers with fluency in Spanish. It will be the equivalent of Portuguese 0001/1001 and Portuguese 0002/1002.

This course concentrates on aspects of the Portuguese language that are most difficult for Spanish speakers, such as pronunciation, vocabulary, idioms and grammatical structures particular to Portuguese.

Academic Career: Undergraduate

Grade Component: LG/SNC Elective Basis

Course Attributes: Latin American Studies, West European Studies

PORT 1052 - LUSO-BRAZILIAN LITERATURE

Minimum Credits: 3

Maximum Credits: 3

This course studies various Portuguese or Brazilian literary topics according to the needs and interests of the students. Taught in Portuguese.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Attributes: Latin American Studies

PORT 1053 - LUSO-BRAZILIAN TOPICS

Minimum Credits: 3

Maximum Credits: 3

This course deals with literary, linguistic or cultural topics, or a combination of these, relating to Portugal, Brazil or other Portuguese speaking areas.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Latin American Studies

PORT 1061 - SURVEY OF BRAZILIAN LITERATURE

Minimum Credits: 3

Maximum Credits: 3

A general overview of Brazilian literature from the middle ages to the present.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

PORT 1451 - SENSORY EXPLORATIONS OF THE LUSOSPHERE

Minimum Credits: 3

Maximum Credits: 3

What could be gained by a focus on the sensorial? What meanings are revealed through the honing in on the banal processes of our everyday lives? How are these often overlooked details connected to larger social phenomena and structures? How can the literary representation of individual food choice provide clues to the racial and migratory politics of late nineteenth-century Brazil? Through a critical examination of literary texts, art, performances, and films from Brazil, Angola, Mozambique, and Guinea Bissau that center on the senses and the sensorial, this course explores the woven logics of sensorial representation and cultural narratives of race, gender, class, politics, and nation in the Lusophone world. Aided by accompanying theoretical readings as well as individual research, students are expected to critically discuss both in the classroom with their peers and through formal writing assignments the connections between sensorial representations and cultural narratives related to nation building, (neo)coloniality, post-revolutionary disillusionment, historical reverberations in the contemporary present, among others, within the Lusosphere. Key concepts and issues: cultural cannibalism, the sensorial, (nation)alism, semiotics of food, aurality, affect, synestheticism, (post)colonialism, neocoloniality, gendered constructions of nation, and racial indigestion. Lectures and discussion will be in English. Course materials will be made available to students in English; however, students may choose to submit written work in English, Portuguese, and/or Spanish. This course is aimed at advanced undergraduate students.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

PORT 1458 - CULTURES OF THE PORTUGUESE SPEAKING WORLD

Minimum Credits: 3

Maximum Credits: 3

This course presents an overview of the contemporary cultures of the Portuguese-speaking world. It is especially designed for students with little to no previous knowledge of these geographical regions. In the course, students will explore contemporary social realities throughout the Portuguese-speaking world (namely Brazil, Angola, Mozambique and Cape Verde) through the close and critical reading of texts, literature, film, short videos, podcast episodes, TV programs, among other mediums. Students will be exposed to issues regarding gender, race, nation, sexuality, class, status, among other issues within a contemporary context. Students are expected to engage in critical discussions with the materials and the varying perspectives of their peers. The purpose of this course is not to merely passively digest content but to also think and express oneself critically in reaction to cultural representations both from the perspective of the respective nation and also from US perspectives. It is also necessary to keep in mind that rather than attempting an exhaustive survey of the Portuguese-speaking world in its entirety, the course provides merely a glimpse into the cultural offerings of these diverse and vast geographical regions; it is also an attempt to promote global and cultural understanding. Hopefully, through this exposure, it is also a starting point for further exploration and research in studies of the Portuguese-speaking world and beyond.

Minimum Credits: 1

Maximum Credits: 6

This course allows students to work in depth in areas of their choice, with the approval and supervision of a faculty member, who meets regularly with the student. Evaluation is by examination or by the production of a term paper or series of papers.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SNC Elective Basis

Course Attributes: West European Studies

Prosthetics and Orthotics

PO 1101 - PRECERTIFICATION ORTHOTIC FITTER

Minimum Credits: 2

Maximum Credits: 2

Course will provide an introduction into certain prefabricated and custom fit orthoses. Review of conditions and symptoms indicating treatment in the provision of certain orthoses. It will provide an introduction to patient assessment, formulation of treatment plan, implementation of treatment plan, follow-up and practice management, effectiveness, and adjustment within the scope of practice of an orthotic fitter.

Academic Career: Undergraduate

Grade Component: Letter Grade

PO 1102 - PRECERTIFICATION ORTHOTIC FITTER INTERNSHIP

Minimum Credits: 1

Maximum Credits: 5

Course will provide an introduction into certain prefabricated and custom fit orthoses in a clinical setting. It will provide a clinical experience for an introductory level of patient assessment, formulation of treatment plan, implementation of treatment plan, follow up and practice management, effectiveness and adjustment within the scope of practice of an orthotic fitter. The Orthotic Fitter course is a prerequisite or corequisite for this course.

Academic Career: Undergraduate

Course Component: Internship

Grade Component: Letter Grade

PO 2103 - INTRODUCTION TO MATERIALS, EQUIPMENT, AND FABRICATION

Minimum Credits: 2

Maximum Credits: 2

This course will introduce the student to the concepts of general material properties, the common materials used in orthotics and prosthetics, and the specific properties of these materials. The student will be introduced to equipment and fabrication techniques as well as safety precautions for handling and using materials and equipment.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Prosthetics and Orthotics (MS)

PO 2302 - PROSTHETICS 2

Minimum Credits: 3

Maximum Credits: 3

Covered topics (in lecture and laboratory) include: Review of conditions and symptoms indicating treatment with trans-femoral prostheses, Review of evidence for effectiveness of treatment, Patient evaluation for prescription and design of trans-femoral prostheses, Fabrication of prostheses, including techniques for taking measurements and impressions, Fitting, evaluation of effectiveness, and modification of prostheses.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

PO 2401 - ORTHOTICS 3

Minimum Credits: 3

Maximum Credits: 3

The third course in this series, Orthotics 3 builds on the knowledge basis established in PO 2301, Orthotics 3, and will review concepts in lower extremity orthotic design and will introduce students to upper extremity orthotic design and their components including, but not limited to: Review of anatomy and biomechanics of the upper and lower extremity, review of conditions and symptoms that can be treated with orthoses with a focus on conditions affecting the upper extremity, including upper and lower motor neuron conditions; review of the evidence basis for upper extremity orthotic devices; patient evaluation for prescription and design of upper extremity orthoses; fabrication of upper extremity orthoses, including techniques for taking measurements and impressions; fitting, evaluation of effectiveness, and modification of upper extremity orthoses.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

PO 2402 - PROSTHETICS 3

Minimum Credits: 3

Maximum Credits: 3

This course will be an overview of all aspects related to upper extremity prostheses, including components, socket design, and harnessing. The course will also include the fabrication of upper extremity prostheses, including techniques for taking measurements and impressions, model modification, fabrication of check sockets, lamination, fitting, and evaluation of effectiveness.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

Prosthodontics

PROSTH 2211 - COMPREHENSIVE INTERDISCIPLINARY CLINICAL DISCUSSION AND PLANNING

Minimum Credits: 2

Maximum Credits: 2

This is a multidisciplinary course in comprehensive/diagnosis and treatment planning for graduate students/residents in endodontics, orthodontics, periodontics, prosthodontics, oral and maxillofacial surgery, maxillofacial prosthetics and advanced education in general dentistry.

Academic Career: Graduate

Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

Psychology

PSY 0005 - INTRODUCTION COGNITIVE SCIENCE

Minimum Credits: 3

Maximum Credits: 3

A survey course that utilizes a cross disciplinary approach to cognition, and an introduction to the various disciplines within a single coherent framework. The course covers basic cognitive processes of perception, language and thought, examining how each of these areas is examined within the disciplines of psychology, neuroscience, linguistics, philosophy and artificial intelligence.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req.

PSY 0010 - INTRODUCTION TO PSYCHOLOGY

Minimum Credits: 3

Maximum Credits: 3

Summary of our present knowledge in fundamental areas of learning, sensation and perception, biological basis of behavior, developmental patterns, motivation, emotion, personality and adjustment, and measurement of behavior. Information and concepts are applied to problems in understanding human behavior. Additional out-of-class experiments or an equivalent research paper are a part of the course.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Natural Science General Ed. Requirement, DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req., SCI Polymathic Contexts: Science NonSeq.GE. Req.

PSY 0011 - INTRODUCTION TO THE FIELD

Minimum Credits: 1

Maximum Credits: 1

This one-credit course is designed for newly declared psychology majors. Course content will provide an introduction to the psychology department, a review of experiential learning opportunities, a discussion of graduate school and career options including subfields within psychology and related fields, and out of the classroom exercises. Through lectures, guest speakers, in-class exercises, small group discussions and written assignments, students will engage in self-assessment, undertake academic and career planning, develop professional skills and learn to utilize available resources to advance in their careers.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Satisfactory/No Credit

Course Requirements: Restricted to PSY majors with fewer than 85 credits.

PSY 0035 - RESEARCH METHODS

Minimum Credits: 4

Maximum Credits: 4

The course introduces students to the fundamentals of psychological research, including the nature of psychology as a science, the selection of a research problem, research designs, writing research proposals and papers using APA style and ethical considerations. PSY 0035 is only available to students who have taken it in the past and wish to improve their grade. Anyone who has not previously taken 0035 will not be allowed to enroll and should instead enroll in PSY 0036 Research Methods Lecture and PSY 0037 Research Methods Lab (this is the same course as 0035 (Lecture and Lab); only the numbers and name have changed). If you have previously enrolled in PSY 0035 and wish to repeat it for grade improvement, you will need the permission of the Psychology Advising Office. To obtain a permission number, contact Jennifer Stapel, jstapel@pitt.edu, 3113 Sennott Square.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (PSY 0010 or 0012 or 0101 or 0200) and (STAT 0200 or 1000 or 1100 or PSY 0201 or 0270 or MATH 0133) and Permission of the Department

Course Attributes: Writing Requirement Course

PSY 0036 - RESEARCH METHODS LECTURE

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to the fundamentals of psychological research. Specifically, the goals are to learn how to: a) read, interpret, and understand research; b) critique research; and c) design valid research that is robust to critiques.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (PSY 0010 or 0012 or 0101 or 0200 grade of C or better) and (STAT 0200 or 1000 or 1100 or PSY 0201 or 0270 or MATH 0133 with a grade of C or better). ANTIREQ: Enrollment blocked if currently or previously enrolled in PSY 0032, PSY 0035, or PSY 1031

PSY 0037 - RESEARCH METHODS LABORATORY

Minimum Credits: 3

Maximum Credits: 3

The course amplifies the introduction to the fundamentals of psychological research provided by PSY 0036, Research Methods Lecture. It introduces students to the fundamentals of writing scientific reports in psychology. Students will learn how to use APA style, how to display and report quantitative results, and basic guidelines for writing format, style, and expression. This course is writing intensive, and students are expected to write research reports and comment extensively on the writing of their peers during in-class and take-home exercises.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (PSY 0010 or 0012 or 0101 or 0200 grade C or better) and (STAT 0200 or 1000 or 1100 or PSY 0201 or 0270 or MATH 0133 with a grade of C or better) and PSY 0036 ANTIREQ: Blocked if currently or previously enrolled in PSY 0032, PSY 0035, or PSY 1031

Course Attributes: Undergraduate Research, Writing Intensive Course (WRIT)

PSY 0105 - INTRODUCTION TO SOCIAL PSYCHOLOGY

Minimum Credits: 3

Maximum Credits: 3

An overview of social psychology. The scientific study of how one person's behavior and/or characteristics can influence the thoughts, feelings and behaviors of others. Topics covered include social perception, attitude formation and change; prejudice and discrimination; altruism and aggression; cooperation, competition, and bargaining; group decision making, leadership; and environmental effects on behavior.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: PSY 0010 or 0012 or 0101 or 0200

Course Attributes: DSAS Social Science General Ed. Requirement, SCI Polymathic Contexts: Soc/Behav. GE. Req.

PSY 0105 - INTRODUCTION TO SOCIAL PSYCHOLOGY

Minimum Credits: 3

Maximum Credits: 3

An overview of social psychology--the scientific study of how people's thoughts, feelings, and behavior are influenced by the actual, imagined, or implied presence of other people (Allport, 1985). Topics covered include conformity to social norms, attitudes and persuasion, stereotyping and prejudice, social judgment and person perception, emotional and motivational influences on social perception and behavior, aggression and social conflict, helping and prosocial behavior, interpersonal attraction, and close relationships.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: PSY 0010 or 0012 or 0101 or 0200

PSY 0160 - PSYCHOLOGY OF PERSONALITY

Minimum Credits: 3

Maximum Credits: 3

Survey of major approaches to the study of personality, focusing on their relative abilities to provide coherent explanations for individual behavior. Issues involved in the assessment of personality will also be discussed and several assessment procedures evaluated. Recent research in personality psychology is reviewed and analyzed.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: PSY 0010 or 0012 or 0101 or 0200

Course Attributes: DSAS Social Science General Ed. Requirement

PSY 0182 - LAW AND SOCIAL PSYCHOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the social psychological aspects of the criminal justice system. Topics covered include victim reporting, police discretion, pretrial processes, interaction in the courtroom, juror selection and decision making, the sentencing decision, the prison experience, parole decision making and return to society.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: PSY 0010 or 0012 or 0015 or 0101 or 0200

PSY 0184 - PSYCHOLOGY OF GENDER

Minimum Credits: 3

Maximum Credits: 3

This course is an introduction to psychological theories and research on the impact of gender on the human experience. Experiences of cisgender men and women as well as trans individuals and those who identify outside of the gender binary will be discussed. Although the focus will be on societal constructs within the United States, we will also discuss cross-cultural research. Intersections with race and sexual orientation and the influence of power will be considered in the discussion of the effects of cultural factors that determine the gendered nature of cognitive abilities, emotional expression, interpersonal relationships, victimization, labor, and health.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: PSY 0010 or 0012 or 0105 or 0101 or 0200 or 0203 or 0210

Course Attributes: DSAS Diversity General Ed. Requirement, DSAS Social Science General Ed. Requirement, Gender, Sexuality & Women's St, Global Studies, SCI Polymathic Contexts: Soc/Behav. GE. Req.

PSY 0186 - CROSS CULTURAL PSYCHOLOGY

Minimum Credits: 3

Maximum Credits: 3

The systematic, scientific study of human behavior takes into account the diverse ecological and cultural settings in which we live. The course covers traditional topics in human psychology-perception, cognition, personality development, intergroup relations and impact of social change. Research data are emphasized. Approach is interdisciplinary, integrating material from anthropology as well as psychology.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PSY 0205 - PSYCHOPATHOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course provides an overview of the major issues in the area of mental illness. This course emphasizes the scientific approach to understanding the major psychological and behavioral disorders. The research and clinical literatures regarding the etiology, course and treatment of these disorders will be presented.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: PSY 0010 or 0012 or 0101 or 0200. ANTIREQ: Enrollment blocked if currently or previously enrolled in PSY 1205, PSY 0206, or PSY 1141.

PSY 0310 - DEVELOPMENTAL PSYCHOLOGY

Minimum Credits: 3

Maximum Credits: 3

The course focuses on development of the child from birth to adolescence, the current theory and research concerning social, emotional, intellectual, perceptual and language development. The organization of the course is topical. Coverage is confined to normal development; what develops, how and why in the average child. Little attention to abnormal development.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: PSY 0010 or 0012 or 0101 or 0200

Course Attributes: Children's Literature, Learning Sciences

PSY 0405 - LEARNING AND MOTIVATION

Minimum Credits: 4

Maximum Credits: 4

This course elucidates fundamental principles of learning and motivation as derived predominantly from animal research. Focus is given to the empirical and conceptual processes underlying the facilitation and suppression of behavior, e.g. primary and conditioned reinforcement, non-reinforcement, punishment and avoidance as well as the generalization and discrimination of these processes.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: PSY 0010 or 0012 or 0101 or 0200

Course Attributes: Children's Literature, DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req.

PSY 0407 - LEARNING AND BEHAVIOR

Minimum Credits: 3

Maximum Credits: 3

This course elucidates fundamental principles of learning and motivation as derived predominantly from animal research. Focus is given to the empirical and conceptual processes underlying the facilitation and suppression of behavior, e.g. primary and conditioned reinforcement, non-reinforcement, punishment and avoidance as well as the generalization and discrimination of these processes.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PSY 0422 - COGNITIVE PSYCHOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to core issues, theories, and experimental finding in cognitive psychology. Topics to be covered include sensory perception, attention, memory, imagery, language, reasoning, problem solving and decision making.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: PSY 0010 or 0012 or 0101 or 0200

Course Attributes: DSAS Natural Science General Ed. Requirement, Learning Sciences, SCI Polymathic Contexts: Science NonSeq.GE. Req.

PSY 0423 - COGNITIVE PSYCHOLOGY LAB

Minimum Credits: 3

Maximum Credits: 3

This course exposes students to the details of experimental methods in cognitive psychology, with a particular focus on experimental laboratory studies. Students will also improve their understanding of research report writing, computer skills, and quantitative data analysis skills. The course is organized according to the research process, which is implemented twice across two projects. For each project, students read background literature, develop research

hypotheses, design experiments to test them, conduct the experiments, analyze the results, and write-up the experiments.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SU3 Elective Basis

Course Requirements: PREQ: (PSY 0010 or 0012 or 0101 or 0200 grade C or Better) and (PSY 0035 or 1031 or PSY 0036 and 0037); PLAN: Psychology (BS)

Course Attributes: Writing Intensive Course (WRIT)

PSY 0505 - INTRODUCTION TO BIOPSYCHOLOGY

Minimum Credits: 3

Maximum Credits: 3

This is a survey course in which the biological bases of certain classes of behavior are explored. The behaviors studied are limb movement, sleep and wakefulness, feeding, sexual behavior and learning and memory. Each of these behaviors is considered from the point of view of which brain structures and which neurotransmitters are involved in the production of that behavior. Emphasis is also placed on experimental techniques used to obtain relevant data and on the type of inferences which can be made from these experiments.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: PSY 0010 or 0012 or 0101 or 0200. Anti-requisite NROSCI 1000

Course Attributes: DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req.

PSY 0510 - SENSATION AND PERCEPTION

Minimum Credits: 3

Maximum Credits: 3

This course examines the nature of the mechanisms that transform sensory input into our perceptual experience of the world. Topics include structure and function of sensory system, perception of color, object, motion, etc. Both information-processing and ecological approaches to the study of perception are considered.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: PSY 0010 or 0012 or 0101 or 0200

Course Attributes: DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req.

PSY 0515 - REHABILITATION PSYCHOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course explores rehabilitation psychology and the target population of this clinical psychology specialty, individuals with chronic illness and disability. Psychology and health professionals, regardless of their chosen career profession, will encounter persons with chronic illness and disability (CID). This course provides an overview of key concepts in working with individuals with CID, a discussion of different populations presenting with CID, and examination of evidence based approaches to intervention, and a review of diverse contexts in which counseling and psychology professions treat and interact with persons with CID.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PSY 1010 - THE SCIENCE OF LEARNING: BRAIN, CLASSROOM AND SOCIETY

Minimum Credits: 3

Maximum Credits: 3

The learning sciences examine the process of learning and the factors that shape it. This course provides an overview and deep examination of areas across the learning sciences, including cognitive science (the study of learning and thinking), sociocultural theory (with a focus on how learning is a social activity and informed by cultural knowledge), cognitive neuroscience (how the brain embodies and allows learning and thinking), organizational theories of learning, educational technology, instructional design, and educational policy. Each class will focus on one framework, with the first half being led by an expert faculty member in the area, and the other half focusing on particular questions, applications, and methods. Students will be required to complete assigned readings, to provide brief responses to each reading, and to create a final poster on an application of the learning sciences. This is a core course of the Learning Sciences Transcript Distinction.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PSY 1050 - TOPICS IN PSYCHOLOGY

Minimum Credits: 3

Maximum Credits: 3

A topics course. Content will vary from term to term depending on instructor.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: PSY 0010 or 0012 or 0015 or 0200

PSY 1051 - TOPICS IN SOCIAL PSYCHOLOGY

Minimum Credits: 3

Maximum Credits: 3

Topics in social psychology will vary from term to term, depending on instructor.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: PSY 0105 or 0203 or 0210

PSY 1052 - TOPICS IN CLINICAL PSYCHOLOGY

Minimum Credits: 3

Maximum Credits: 3

Topics in clinical psychology will vary from term to term, depending on instructor.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (PSY 0010 or equivalent) and (PSY 0205 or equivalent).

PSY 1053 - TOPICS IN DEVELOPMENTAL PSYCHOLOGY

Minimum Credits: 3

Maximum Credits: 3

Topics in developmental psychology will vary from term to term depending on instructor.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (PSY 0010 or 0012 or 0015 or 0101 or 0200) and (0202 or 0230 or 0310) and (STAT 0200 or 1000 or 1100)

PSY 1054 - TOPICS IN COGNITIVE PSYCHOLOGY

Minimum Credits: 3

Maximum Credits: 3

Topics in cognitive psychology will vary from term to term, depending on instructor.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (PSY 0010 or 0012 or 0101 or 0200) and (PSY 0035 or 1031 or 0036 and 0037)

PSY 1057 - TOPICS IN BIOLOGICAL AND HEALTH PSYCHOLOGY

Minimum Credits: 3

Maximum Credits: 3

Topics in biological and health psychology will vary from term to term, depending on instructor.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (PSY 0010 or 0012 or 0015 or 0200) and (PSY 0032 or 0035 or 1031 or PSY 0036 and 0037) and (PSY 0505 or 1215 or NROSCI 1000)

PSY 1059 - TOPICS IN ADVANCED LABORATORY METHODS

Minimum Credits: 3

Maximum Credits: 3

This course involves the practical application of theories, concepts, and scientific methods to generate testable hypotheses, identify appropriate methodology, select and operationalize appropriate variables, conduct a small scale research project, conceptualize relevant data analyses, and engage in writing assignments involving analysis, interpretation, and critical evaluation of results. Research topics are specific to and will vary from section to section.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (PSY 0035 or 1031 or 0036 and 0037) and (STAT 0200 or 1000 or 1100 or PSY 0201 or 0270 or Math 0133); PROG: School of Arts & Sciences

Course Attributes: Undergraduate Research

PSY 1064 - DIRECTED RESEARCH ADVANCED LAB

Minimum Credits: 3

Maximum Credits: 3

This three-credit course is designed to supplement the directed research experience so as to satisfy the Psychology Major requirement for an advanced lab. Enrollment is by Permission of the Department. Instead of students enrolling in a second semester of PSY 1907, students can meet the advanced lab requirement by enrolling in 1064 while continuing to work for a second semester in the same research lab with the same faculty research mentor. To enroll in PSY 1064, students must complete an Advanced Directed Research Course (ADRC) agreement (downloadable with instructions

from the department's website) in conjunction with the ADRC instructor and the faculty research mentor. The grade for PSY 1064 will be based upon performance in the research lab as evaluated by the faculty research mentor and completion of course assignments carried out under the guidance of the ADRC instructor.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: PSY 0035 or PSY 0036 and 0037.

Course Attributes: Undergraduate Research

PSY 1075 - HISTORY OF PSYCHOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course will focus on major trends in the history of American psychology and their 18th- and 19th-century social and intellectual roots. Topics include the physiological and philosophical origins of scientific psychology; the rise of dynamic psychology in Europe and the United States; Lunacy and American Asylum care; early experimental and quantitative psychology; the influence of William James and James Mark Baldwin; the structuralism/functionalism debate; animal learning and the origins of behaviorism; World War I and mental testing; neobehaviorism; the influence of gestalt psychology; and World War II and the cognitive revolution.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: PSY 0010 or 0012 or 0101 or 0200; LVL: Jr or Sr

Course Attributes: West European Studies

PSY 1080 - PSYCHOLOGY AND THE MEDIA

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PSY 1110 - PSYCHOLOGICAL ASPECTS OF HUMAN SEXUALITY

Minimum Credits: 3

Maximum Credits: 3

The course presents a social-psychological and psycho-biological orientation towards the study of human sexuality. Current research is emphasized. Topics such as sexual attitudes, hormones and behavior, changing sexual behavior, sex education, gender-role development, alternative forms of sexual expression, and violence and sex are covered.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: [(PSY 0010 or 0012 or 0015 or 0101 or 0200) and (PSY 0105 or 0203 or 0210)] or (PSY 0160 or 0184 or 0204 or 0240)

Course Attributes: Gender, Sexuality & Women's St, Global Studies

PSY 1112 - PSYCHOLOGICAL ASPECTS OF HUMAN SEXUALITY LAB

Minimum Credits: 3

Maximum Credits: 3

This course presents a social-psychological and psychobiological orientation towards the study of human sexuality.

Current research is emphasized. Topics such as sexual attitudes, hormones and behavior, changing sexual behavior, sex education, gender-role development, alternative forms of sexual expression, and violence and sex are covered

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (PSY 0035 or 1031 or 0036 and 0037) and (STAT 0200 or 1000 or 1100 or PSY 0201 or 0270 or Math 0133)

Course Attributes: DSAS Diversity General Ed. Requirement, SCI Diversity General Ed. Requirements, Undergraduate Research, Writing Intensive Course (WRIT)

PSY 1113 - PSYCHOLOGY OF WOMEN+

Minimum Credits: 3

Maximum Credits: 3

This course will critically examine the history of androcentric bias within the field of psychology. We will discuss research on the experiences of women and gender minorities (individuals who do not identify as their assigned sex at birth), using a feminist psychological and intersectional framework, in domains such as emotional expression, interpersonal relationships, labor, health, and victimization. I will give particular attention to how structural power in a patriarchal society influences these experiences. We will also discuss masculinity and cisgender men's experiences, but the focus of the course will be on cisgender women and gender minorities. This is a discussion-based course designed to help students develop oral communication skills particularly around the discussion of sensitive topics. Students will be required to complete a group oral presentation project.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (PSY 0010 or 0012 or 0015 or 0101 or 0200) and (PSY 0105 or 0160 or 0184 or 0202 or 0203 or 0204 or 0210 or 0230 or 0240 or 0310)

PSY 1130 - SPECIAL TOPICS ON PSYCHOLOGY OF GENDER

Minimum Credits: 3

Maximum Credits: 3

An advanced course which deals with psychological research relating to women and power. Topics covered include physical power, nonverbal perpetuation of power differences, power motivation, social power, power dynamics in the family and political power. Each semester the course has a different focus.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Gender, Sexuality & Women's St

PSY 1134 - SOCIAL BONDING: FROM MOLECULES TO MIND

Minimum Credits: 3

Maximum Credits: 3

This course explores how emerging findings at the interface of psychology and affective neuroscience combine to inform our understanding of how we bond with others. Following a review of relevant brain regions, neurochemicals, and methodology, topics span current theories and research on the study of bond formation and maintenance, and the supporting neurobiology underlying different types of social bonds. Readings will come from relevant selections from the current literature. Course requirements include 2 exams, in-depth class discussion and exercises, and a formal presentation of assigned readings.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: PSY 0105 or 0203 or 0210

PSY 1135 - SOCIAL PERCEPTION AND COGNITION

Minimum Credits: 3

Maximum Credits: 3

Historical problems and current issues are identified. Some general principles of perception and cognition are reviewed. Recent research and theoretical formulations are considered in each of these areas; impression formation, interpersonal attraction, causal and moral attribution, prediction of behavior, perceptions of interpersonal relations, group stereotyping and prejudice.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: PSY 0010 or 0012 or 0015 or 0101 or 0200; Min Grade 'B'

PSY 1137 - CLOSE RELATIONSHIPS

Minimum Credits: 3

Maximum Credits: 3

A seminar-style course examining adult close relationships (with an emphasis on romantic relationships) from a social psychological perspective. Topics covered include interpersonal attraction, commitment and interdependence, relationship cognition, attachment and insecurity, communication, sexuality, conflict, relationship dissolution, and relationship maintenance. Class meetings will consist mainly of facilitated discussions and student-led presentations.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: PSY 0010 or 0012 or 0101 or 0200

PSY 1139 - SOCIAL NEUROSCIENCE

Minimum Credits: 3

Maximum Credits: 3

In this discussion-based seminar course, we will focus on the principles of social cognitive and affective neuroscience (SCAN) and survey a broad array of topics in the field. SCAN is a fundamental merging of social science questions and neuroscience methods, with particular emphasis on fMRI. We will discuss how neuroimaging can inform our understanding of social interaction, self-perception, and our emotions, beliefs and behaviors. This course is appropriate for both students with background in social neuroscience and those with no prior background, but who are considering doing research in this area or are interested in the neurobiology of social behavior. Students are expected to read and comment on papers, participate actively in class discussions, complete written assignments, and lead a group discussion.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (PSY 0010 or 0012 or 0101 or 0200) and (PSY 0105 or 0203 or 0210)

PSY 1142 - CONFLICT RESOLUTION

Minimum Credits: 3

Maximum Credits: 3

This course explores the psychology of conflict and its resolution, with a focus on conflict in our interpersonal relationships. Topics include the nature of conflict, barriers to conflict resolution, the benefits and costs of various

responses to conflict (e.g., forgiveness, revenge, apologies), and factors that predict constructive vs. destructive responses to conflict. Classes include a lecture component but generally follow a seminar format consisting of facilitated discussions.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (PSY 0010 or 0012 or 0101 or 0200) and (PSY 0035 or 1031 or 0036 and 0037) and (PSY 0105 or 0203 or 0210)

Course Attributes: Undergraduate Research

PSY 1143 - PERSUASION AND SOCIAL INFLUENCE

Minimum Credits: 3

Maximum Credits: 3

Do we act differently when other people are around compared to when we are alone? Why do we comply with other people's requests? How can we influence others to behave in ways that will make the world a better place? Questions like these are at the very core of social-psychological theory and are powerful dynamics that shape our experiences as individuals, as groups, and as societies. Persuasion and social influence are all about how people are affected by the people (and institutions) around them. In this class, we will survey classic and contemporary research on persuasion and social influence through lectures and class discussion sessions and learn to use that research to identify when persuasion techniques are being employed in the world, to critically evaluate persuasive messages, and to craft theory-based persuasive messages.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Letter Grade

Course Requirements: PREQ: PSY 0010 and 0105

PSY 1145 - SOCIAL RESEARCH ADVANCED LAB

Minimum Credits: 3

Maximum Credits: 3

This is a laboratory course that will focus on research methods in the area of social psychology. As a student in this course, you will complete in-class activities as well as individual and small group assignments designed to prepare you for conducting research in social psychology. Course requirements include oral presentations and written assignments. Students will critique empirical journal articles, complete small group assignments that explore a variety of research designs, develop an independent research proposal based on a prominent social psychological theory, and collect and analyze data to test a hypothesis that extends upon a published empirical paper relevant to social psychology.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (PSY 0010 or 0012 or 0101 or 0200) and (PSY 0035 or 1031 or 0036 and 0037) and (PSY 0105 or 0203 or 0210)

PSY 1205 - ABNORMAL PSYCHOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course provides an overview of the major issues in the area of mental illness. This course emphasizes the scientific approach to understanding the major psychological and behavioral disorders. The research and clinical literatures regarding the etiology, course and treatment of these disorders will be presented. PSY 1205 is only available to students who have taken it in the past and wish to improve their grade. Anyone who has not previously taken 1205 will not be allowed to enroll and should instead enroll in PSY 0205: Psychopathology (this is the same course as 1205; only the

number and name have changed). If you have previously enrolled in PSY 1205 and wish to repeat it for grade improvement, you will need the permission of the Psychology Advising Office. To obtain a permission number, contact Jennifer Stapel, jstapel@pitt.edu, 3113 Sennott Square.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: PSY 0010, PSY 0101 or PSY 0200 and Permission of the Department

PSY 1210 - INTRODUCTION TO CLINICAL PSYCHOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course is directed toward the student seriously interested in the major issues pertaining to clinical psychology. The course provides an overview of the major therapeutic approaches and incorporates other germane issues such as history of the field, assessment issues, interviewing approaches, community psychology, behavioral medicine, and clinical research and methodology. Present therapeutic approaches are placed in the context of an evolving discipline, anchored in an empirical-scientific approach to the subject matter.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (PSY 0010 or 0012 or 0101 or 0200) and (PSY 0205 or 1205 or 0206 or 1141)

PSY 1213 - PSYCHOPATHOLOGY ADVANCED LAB

Minimum Credits: 3

Maximum Credits: 3

In this course, students will design and conduct a unique research project using simulated or previously collected data to animate our understanding of contemporary research methods in clinical psychology. Psychopathology topics will vary depending on the instructor, but recent topics have included sleep and circadian influences, and cognitive processes in mood and anxiety disorders. Through the experience of organizing and evaluating previous empirical findings, situating a novel research question within a theoretical framework, and conducting and interpreting a statistical analysis, we will strive to become competent and critical consumers of published empirical research, appreciating the rich complexities inherent to the scientific process.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: PSY 0205 or 1205 or 0206 or 1141

Course Attributes: Undergraduate Research

PSY 1215 - HEALTH PSYCHOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course provides an introduction to the major questions and methods which have guided the research in health psychology. This field examines the role of psychological and social factors in the development and progression of medical disease. Three main topics are covered: (1) conceptual underpinnings of health psychology, (2) psychosocial factors and specific diseases, and (3) evaluating behavioral medicine interventions.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (PSY 0010 or 0012 or 0101 or 0200) and (PSY 0035 or 1031 or 0036 and 0037) and (PSY 0105 or 0505 or 1500 or 0203 or 0210)

PSY 1217 - FUNCTIONAL MRI

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PSY 1225 - PSYCHOLOGY OF EMOTION

Minimum Credits: 3

Maximum Credits: 3

The science of emotion is critical to our understanding of human behavior. Applications and related fields include neuroscience, marketing, affective computing, psychopathology, and human-robot communication. This course will introduce you to major approaches to emotion and address topics that may include perception, communication, individual differences, development, affective computing, and dynamics of facial and vocal expression. Depending upon student interests, some topics and readings may be more or less emphasized and others introduced. Readings will include a textbook and empirical articles and chapters. You will learn about measurement approaches and develop and present a major project.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (PSY 0035 or 1031 or 0036 and 0037) and (PSY 0105 or 0160 or 0202 or 0203 or 0204 or 0210 or 0230 or 0240 or 0310)

PSY 1226 - ANXIETY: THEORY & TREATMENT

Minimum Credits: 3

Maximum Credits: 3

We are living in an important moment in time for mental health. When there are legitimate reasons to be worried or anxious - global health crises, systemic injustice, political unrest - where and how do we draw a line between "normal anxiety" and anxiety disorder? When anxiety does become a problem, how do we figure out what might help? This seminar-style course invites students to learn about current research, theory, and evidence-based treatment in the area of anxiety and related forms of psychopathology. We will explore major issues at the heart of clinical psychology - theory, diagnosis, research, and treatment - using a contemporary, scientifically-minded lens. Weekly readings and discussion boards complement in-class activities, which are a combination of lecture, small group discussion, demonstrations, and live Q&A.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (PSY 0010 or 0012 or 0101 or 0200) and (PSY 0205 or 0206 or 1141 or 1205)

PSY 1227 - BEHAVIOR GENETICS

Minimum Credits: 3

Maximum Credits: 3

The goals of this course are to introduce and discuss behavior genetic approaches to psychology, which involve the study of the genetic and environmental causes of psychological differences among individuals. The following topics will be covered: overview of genetic principles and introduction to quantitative and molecular behavior genetic concepts and methods, as illustrated through studies of several important clinical psychopathologies.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (PSY 0010 or 0012 or 0101 or 0200) and (PSY 0035 or 1031 or 0036 and 0037) or Permission of the Department

PSY 1230 - PSYCHOLOGY OF DEATH AND DYING

Minimum Credits: 3

Maximum Credits: 3

The purpose of this course is to widen the student's understanding of human death in its biological, socio-cultural, and primarily psychological dimensions. We will examine the concept of death, psychological reactions to death and dying, historical and demographic aspects, selected issues such as end-of-life care, medical ethics, suicide, legal concerns, children's concepts of death, and the process of bereavement.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (PSY 0010 or 0101 or 200) and (PSY 0205 or 1205 or 0206 or 1141)

PSY 1235 - ALCOHOL USE AND ABUSE

Minimum Credits: 3

Maximum Credits: 3

This course covers a range of topics related to alcohol, including history, anthropology, sociology, epidemiology and literature. Topics include psychopharmacology, social-cognitive effects of drinking, etiology of alcoholism, as well as the prevention and treatment of alcoholism. This course also addresses abuse of other selected drugs such as nicotine, cocaine and heroin.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (PSY 0010 or 0012 or 0101 or 0200) and (PSY 0035 or 1031 or 0036 and 0037) and (PSY 0205 or 0206 or 1141 or 1205) and (PSY 0105 or 0203 or 0210 or 0410 or 0422)

PSY 1255 - PRINCIPLES OF BEHAVIOR MODIFICATION

Minimum Credits: 3

Maximum Credits: 3

Behavior modification techniques are the most commonly used interventions in psychology, education and health psychology. In this course, students will learn basic concepts, theories and research in behavior modification in the context of clinical applications. Most learning will occur through practical, applied exercises. In one set of exercises, students will choose a hypothetical client and apply behavioral methods to their client's case. Students will develop a portfolio of assessment and treatment techniques for their client.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PSY 1270 - CHILD PSYCHOPATHOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course considers research and theory which bear on the development of psychological disorders in children. Biological and environmental factors which contribute to childhood disorders are considered with special emphasis on the role of the family. Childhood psychosis, hyperactivity, and depression are studied to illustrate theoretical models and empirical findings.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (PSY 0010 or 0012 OR 0101 or 0200) and (PSY 0310 or 0202 or 0230) and (PSY 1205 or 0205 or 0206 or 1141)

PSY 1305 - DEVELOPMENTAL PSYCHOLOGY LAB

Minimum Credits: 4

Maximum Credits: 4

This course introduces students to the scientific basis of theories and issues in developmental psychology. In lectures, discussion and structured experiments students learn about and apply basic methods of research in child development, including conceptualization, design, data collection, analysis and write-up. This course exposes students to development over infancy and childhood. The actual topics under study may vary by semester and include gender role development, cognitive development, and language development.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (PSY 0010 or 0012 OR 0101 or 0200) and (PSY 0035 or 1031 or (0036 and 0037)) and (PSY 0310 or 0202 or 0230)

Course Attributes: Undergraduate Research, Writing Intensive Course (WRIT)

PSY 1309 - MIXED METHODS RESEARCH IN DEVELOPMENTAL PSYCHOLOGY

Minimum Credits: 3

Maximum Credits: 3

In this course, students will be introduced to mixed methods research in psychology. Mixed methods research consists of combining statistical trends (quantitative data) with participants' stories and personal experiences (qualitative data) to provide a better understanding of a research problem than either type of data alone. A primary aspect of this course will be to teach students a) how to determine if mixed methods are necessary given their problem statement and research questions, b) the advantages and challenges of using mixed methods, and c) how to design a mixed methods study. Undergraduate students will develop an independent research proposal, collect, and analyze data to test a mixed methods research question, and write an APA mixed methods paper. Graduate students will conceptualize and design a mixed methods research study and write a research study grant proposal.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

Course Requirements: PREQ: PSY 0036 and 0037

PSY 1312 - CHILD DEVELOPMENT & SOCIAL POLICY

Minimum Credits: 3

Maximum Credits: 3

In this course we will examine how a range of public policies shape the well-being of children and families. Poverty and inequality will be a central focus of the course. Policies addressed in the course include means-tested government programs, tax policy, early care and education policy, home visitation programs, housing policy, child abuse and neglect policies, k-12 education policy, and immigration policy. The goal of this course is to teach students to think critically about the implications of local, state, and federal policies for children and families.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: PSY 0202 or 0230 or 0310

PSY 1315 - DEVELOPMENTAL PSYCH: INFANCY

Minimum Credits: 3

Maximum Credits: 3

This course will explore how infants develop from conception to approximately age three. Topics that will be covered include motor development, social development, emotional development, perceptual development, and cognitive development. The course will also explore how knowledge about infant development is applicable across disciplines and careers.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (PSY 0010 or 0012 or 0101 or 0200) and (PSY 0035 or 1031 or 0036 and 0037) and (PSY 0310 or 0202 or 0230); Minimum overall GPA of 3.0

PSY 1320 - LANGUAGE DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

What does mastering a language look like and how do human children do it so quickly while animals do not? What happens if children are deprived of language? Is language special, or is it part of our general cognitive ability? We will examine all these questions and, in the process, learn about typical language development and the methods used to study it.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: PSY 0310 or 0202 or 0230

Course Attributes: Childrens Literature

PSY 1321 - AUTISM SPECTRUM DISORDER AND ADAPTATIONS

Minimum Credits: 3

Maximum Credits: 3

This course will be devoted to a discussion of psychological theory and research in ASD. Topics to be covered include the early history of the study, diagnosis, and treatment of autism; current classification and diagnostic issues and techniques; epidemiological and etiological issues; major neurological and psychological theories of ASD; research on sensory atypicalities and stereotyped and repetitive motor behaviors, early identification, early social and communicative skills, affective, attentional, symbolic, and social factors; and intervention issues in ASD.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: PSY 0010 or 0012 or 0101 or 0200

Course Attributes: Undergraduate Research

PSY 1322 - OBSERVATIONAL METHODS FOR DEVELOPMENTAL SCIENCE LAB

Minimum Credits: 3

Maximum Credits: 3

Observing and quantifying the complexities of human behavior presents a number of significant challenges. Yet observational methods are one of the best ways (and sometimes the only way) to study the behavior of children who cannot perform complex tasks or provide verbal responses. This course focuses on the principles of quantitative, systematic observation of behavior and the rationale for selecting among the many options at all stages of observational measurement. Topics to be covered include: (a) principles for selecting elements in observational measurement systems

(including selecting procedures or contexts, behavior sampling methods, designing coding systems), (b) training observers, (c) estimating agreement and reliability, and (d) validation of observational variables.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (PSY 0010 or 0012 or 0101 or 0200) and (PSY 0035 or 1031 or 0036 and 0037)

PSY 1323 - RISK, RESILIENCE, AND EARLY STRESS

Minimum Credits: 3

Maximum Credits: 3

Sadly, millions of children in the United States and throughout the world are exposed to chronic and uncontrollable adversities (e.g., extreme poverty; maltreatment). These adverse childhood experiences are related to compromised physical and mental functioning throughout development. However, individuals and communities exposed to these types of intense challenges often exhibit an amazing level of resiliency. Across the course, we will anchor ourselves in bio-psycho-social models of development, review these different sets of findings, and think about developmental interactions between the individual, family, community, and culture.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: PSY 0010 and 0310

PSY 1325 - DEVELOPMENTAL PSYCHOLOGY: SOCIAL DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

An introductory survey of methods, theories, and research on the personality and social development of humans from infancy through early adolescence in the United States. This course examines individual development from a biological, contextual, and cultural point of view: how people come to be who they are, and how change and continuity work together over time. First comes an investigation of starting points in development. We will study the infant's first social relationships and try to understand the connection between early temperament and mature personality. Basic concepts of developmental theory will also be introduced. Next we examine how children function within increasingly complex and varied social environments such as families, peer groups, and educational settings. Topics covered include self-development, sex differences and gender role development, achievement motivation, prosocial behavior/altruism, moral development, and social behavior. This upper level course is designed for psychology majors. The course may be of interest to other advanced undergraduate students who are interested in psychology, child and adolescent development, education, and related disciplines.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (PSY 0010 or 0012 or 0101 or 0200) and (PSY 0310 or 0202 or 0230) and (PSY 0035 or 1031 or 0036 and 0037)

PSY 1326 - CULTURE, PARENTING AND LITERACY

Minimum Credits: 3

Maximum Credits: 3

The course focuses on positive development of minority children and their families and takes a strengths-based approach to studying them. Students examine different sources of evidence of whether and how sociocultural factors and parenting practices shape children's language and literacy development. Students discuss evidence-based interventions at home and school that aim to improve children's language and literacy skills, particularly in low-income and ethnically diverse communities. Class sessions involve a combination of lectures and group discussion based on

empirical articles, book chapters, press articles, and videos. Students complete individual assignments. The course may include both graduate and undergraduate students, and that course requirements will be different for each group.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: PSY 0010 or 0012 or 0101 or 0200 or 0310

PSY 1329 - MOTOR DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

Motor development is more than a list of norms on a growth chart. Adaptive control of movement is a major developmental task, and the acquisition of new motor skills provides infants and young children with valuable opportunities for learning. In this course, we will examine theory and research on motor development from infancy through childhood, focusing on behavioral aspects, such as movement patterns and developmental sequences, and underlying mechanisms related to change over time. Topics to be covered include movement in the fetal period; early motor behavior; the development of ballistic, object manipulation, and locomotor skills; links between motor advances and developments in perception, cognition, communication, and language; and developmental disabilities. Major course goals are to: a) introduce you to the major areas of and contributors to theory and research in motor development and familiarize you with recurring themes and issues that characterize the field; b) increase your understanding of the way in which advances in motor skill can directly and indirectly affect the development of skills and experiences in domains as diverse as perception, social cognition, and communication; and c) refine your ability to observe and evaluate behavior of infants and young children.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: PSY 0010 or 0012 or 0101 or 0200

PSY 1330 - DEVELOPMENTAL PSYCHOLOGY: COGNITIVE DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

This course covers major areas of cognitive and intellectual development spanning infancy, childhood, adolescence and old age. Topics covered include perception, language, memory, attention, and higher order cognition

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (PSY 0010 or 0012 or 0101 or 0200) and (PSY 0035 or 1031 or (0036 and 0037)) and (PSY 0310 or 0202 or 0230 or 0410 or 0422)

Course Attributes: Learning Sciences

PSY 1355 - ADOLESCENCE

Minimum Credits: 3

Maximum Credits: 3

Adolescence is one of the most rapidly changing periods of the lifespan. This course will cover the fundamentals of psychological development during adolescence by exploring how the psychological, biological, and social changes that occur across this timeframe impact the development of the self, identity, and relationships. We will explore how these changes are tied to psychopathology, risk behaviors, and positive development during adolescence, and how development during the adolescent period sets the stage for functioning in adulthood. A major emphasis of this course will be on the role of interpersonal and sociocultural contexts of adolescent development.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (PSY 0010 or 0012 or 0101 or 0200) and (PSY 0310 or 0202 or 0230)

Course Attributes: Children's Literature

PSY 1357 - PSYCHOLOGY OF AGING

Minimum Credits: 3

Maximum Credits: 3

This course is designed to examine the psychological changes that occur through adulthood and into late life from a life-span developmental perspective. Biological, cognitive, emotional, and social aspects of the aging process will be explored in depth. Historical and contemporary perspectives on aging as well as cultural influences on the experience of aging will be examined. Psychological aspects of aging will be explored from individual, familial, and societal viewpoints. Lecture, class discussion, small group work and media presentations will be utilized.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: PSY 0010 or 0012 or 0101 or 0200

PSY 1360 - PSYCHOLOGY OF BLACK CHILDREN

Minimum Credits: 3

Maximum Credits: 3

This course surveys and critically evaluates literature on the development of black children from birth to adolescence. Topics to be covered include prenatal influences on growth and development; structure and socialization practices of black families; black English and language development; cognitive development; psychological testing of black children; self-concept and racial identification.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (PSY 0035 or 0032 or 1031) and (PSY 0310 or 0202 or 0230) and (STAT 0200 or STAT 1000 or STAT 1100 or PSY 0020 or 0201 or 0270)

Course Attributes: Children's Literature

PSY 1361 - DIVERSITY IN CLINICAL PRACTICE

Minimum Credits: 3

Maximum Credits: 3

This course is intended to enhance students' knowledge base, awareness, and appreciation for diverse groups in the U.S. Course content will cover foundational cognitive and social psychology research relevant to diversity concepts, identity development and experiences of members of numerous diverse groups, clinical research relevant to work with diverse clients, and review of education, training, and practice guidelines for psychologists.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: PSY 0010 or 0012 or 0101 or 0200

Course Attributes: DSAS Diversity General Ed. Requirement, SCI Diversity General Ed. Requirements

PSY 1365 - THE DEVELOPMENT OF CHILDREN AND YOUTH OF COLOR

Minimum Credits: 3

Maximum Credits: 3

This advanced undergraduate seminar introduces students to theory and research that contextualizes the development of children of color. This course will use a theoretically-informed, scientific approach to investigate the multiple factors shaping the development and developmental contexts of racially- and ethnically-diverse children. Among the factors we will consider include family socioeconomic status; parenting practices; neighborhood contexts; and racism, discrimination, and prejudice. We will explore these influences on children of color's academic, social-emotional, behavioral, and identity development from an interdisciplinary perspective grounded in developmental psychology but drawing from scholarship in sociology, economics, and education. By adopting an interdisciplinary perspective, we can critically assess the complex influences-both proximal and direct as well as distal and indirect-shaping the development of children of color. Participants in this course will learn about multiple domains of child and youth development, socio-historical factors and policy issues that impact children and families of color, and the specific contextual challenges and developmental assets that confer risk or support resilience among racial/ethnic minority children.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

PSY 1435 - BEHAVIOR CONTROL IN SOCIETY

Minimum Credits: 3

Maximum Credits: 3

This course provides an overview of the scientific principles used in behavior management and examines some of the uses of behavior management in various work settings, other institutional settings, in governmental control and in open society. The relation of the uses of behavior control procedures to ethics, social planning, and individual freedom are explored. Behavior analysis serves as the basis for examining traditional management of people as it is found in a variety of social situations without the intervention of experts in behavior management.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PSY 1462 - LEARNING AND MOTIVATION IN EDUCATIONAL CONTEXTS

Minimum Credits: 3

Maximum Credits: 3

In this course we will explore how development, instruction, and learning environments affect motivation and learning outcomes in formal and informal educational contexts. Students will apply their understanding of learning and motivational processes to support new insights in education. This is an advanced course that prepares students to critically evaluate existing educational practices and to innovate sound practices based on psychological theory and empirical findings.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Letter Grade

PSY 1467 - EMOTION AND THE BRAIN

Minimum Credits: 3

Maximum Credits: 3

Our emotions can seemingly rule our daily lives. Feeling happy, angry, or sad can influence the things we do and the decisions we make. Why is that? Neuroscience has started to reveal some important answers to these questions. Through research with neuroimaging (MRI; PET), neurologically- damaged humans, and non-human animals, we have begun to understand the neural mechanisms by which emotions are generated and regulated. This course will unpack these ideas and focus on the links between emotion, cognition, and the brain. We will also discuss how individual and contextual differences may influence and interact with the brain to give rise to our emotions.

Academic Career: Undergraduate

Course Component: Lecture
Grade Component: LG/SNC Elective Basis

PSY 1470 - COGNITION AND THE BRAIN

Minimum Credits: 3

Maximum Credits: 3

Cognitive psychologists have been exploring the human mind through behavioral studies for over fifty years. In parallel, neuroscientists have built-up an understanding of the human brain. The study of cognition in the brain, known as cognitive neuroscience, lies at the intersection of these fields, asking some of the toughest but most fascinating questions in science: How are memories stored in the brain? Is our brain pre-prepared to learn language? How does the average human brain outperform many face recognition algorithms? What is the role of sleep in cognition? We will explore these and many other questions in this course. As well as being interesting in its own right, cognitive neuroscience is having an increasing impact on our lives, such as through the developing field of 'brain reading' with brain scanners, or new devices that can change the brain's activity at the push of a button. Through learning about the techniques used by cognitive neuroscientists and reading studies first-hand, students will come away with a better understanding of this cutting-edge field and of their own brain.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Learning Sciences

PSY 1471 - HUMAN BRAIN CONNECTIVITY LAB: BASIC RESEARCH AND CLINICAL APPLICATIONS

Minimum Credits: 3

Maximum Credits: 3

This course covers use of a novel Pittsburgh developed High Definition Fiber Tracking (HDFT) technology providing human brain connectivity with unprecedented fidelity. The technology maps a million streamlines (0.1mm diameters sets of axons) per person providing 93 miles of tracts within the head involving 40 tracts connecting 170 brain areas. We can follow tracts from source to destination mapping projection fields with high accuracy. The fibers can be visualized and quantified providing circuit diagrams of cortical networks. These techniques will advance the study of brain systems, disorders, development, neuropathology, and neurosurgery. Students will perform projects individually or in groups analyzing collected data or developing new analysis or biomedical methods. Students can do projects that are cognitive neuroscience studies of a brain system or technical development of new methods. Sample projects might include mapping a sensory system, developmental assessment or automated brain segmentation and circuit tracing and detection of clinical anomalies (e.g., TBI breaks, tumors). Technical projects might involve better fiber reconstruction, tracking, tract segmentation or developing new visualization or statistical projects. Students must have some statistics and research experience/course work.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: PSY 0036 and 0037

Course Attributes: Undergraduate Research

PSY 1472 - NEUROPSYCHOLOGY LAB

Minimum Credits: 3

Maximum Credits: 3

This advanced research laboratory course will give students authentic and hands-on experience with the collection and analysis of behavioral and brain imaging data from individuals with brain damage due to stroke. Students will be

assigned to a 3-person project team throughout the course. During class sessions, students will receive instruction and opportunities for hands-on practice of the component skills covered in a given week. Students will be expected to draw upon this instruction to complete a series of out-of-class requirements. The first quarter of the course will prepare students to administer a set of tasks assessing math and language abilities to individuals with localized brain damage due to stroke, and prepare project teams to assist with the collection of brain imaging data. In the second quarter of the course, each project teams will collect behavioral and brain imaging data from three research participants. In the third quarter of the course, students will learn how to code the behavioral and brain imaging data, and will use this knowledge to enter their results into a project database. In the final quarter of the course, students will learn methods for examining the relationship between the location of brain damage and its effects on cognitive abilities, and each team will use this knowledge in combination with available data to construct a final course presentation. The course is synergistic with a research project funded by the National Science Foundation on the brain basis of math and language abilities. The data collected by students in the course will eventually be incorporated into scientific publications and made publicly available to the scientific community. Students must have sufficient weekend availability to complete the required participant testing, provide evidence of a highly responsible work or research track-record, and have the motivation to commit 6-9 hours of time outside of the classroom each week.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (PSY 0035 or 1031 or 0036 and 0037) and (STAT 0200 or 1000 or 1100 or PSY 0201 or 0270 or Math 0133)

PSY 1514 - EVOLUTIONARY PSYCHOLOGY

Minimum Credits: 3

Maximum Credits: 3

The relevance of Darwinian Theory to the study of anatomy and physiology has been obvious for many decades. Only recently however, have evolutionists begun to focus their explanatory tools on cognition, motivation, emotion, perception, and "mind". This course will examine the rationale, contributions, failures and future of evolutionary approaches to psychological phenomena. Initial lectures on the status of Evolutionary Theory will prepare the students for the discussion and evaluation of evolutionary psychology that will follow.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: PSY 0010 or 0012 or 0101 or 0200

PSY 1580 - LANGUAGE AND THE MIND

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to the study of language as a cognitive science, focusing on the mental processes and representations that we use to comprehend and produce language. Throughout the course we will emphasize fundamental debates in cognitive science and the ways these debates influence current psycholinguistic research into questions about sentence comprehension, production, and conversation. Because this course is multidisciplinary in nature, drawing primarily from the fields of linguistics and psychology, students will be introduced to ideas, theories, and methods used by researchers in both fields.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: PSY 0010 or 0012 or 0101 or 0200 or LING 1000

Course Attributes: Undergraduate Research

PSY 1581 - BILINGUALISM

Minimum Credits: 3

Maximum Credits: 3

In this class, we will discuss models of bilingualism, and the psycholinguistic aspects of being bilingual. Topics that may be covered include: bilingual memory representation as a function of language proficiency, language learning method, and word/concept type; how bilinguals recognize words (printed and spoken); whether the bilingual's two languages are always "active" to some extent; how bilinguals manage to use one language without getting "mixed up"; and, how speaking two languages influences thought. Discussion will be emphasized during meeting periods, and a final paper will be required.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (PSY 0035 or 1031 or 0036 and 0037)

Course Attributes: Undergraduate Research, Writing Intensive Course (WRIT)

PSY 1582 - MEMORY AND METACOGNITION

Minimum Credits: 3

Maximum Credits: 3

What are the most effective ways to learn and study, and do we recognize them as students-and if we do not, why not? We will discuss basic principles of human learning, memory, and metacognition, and we will cover how these scientific principles and discoveries can be applied to education, business, technology, and the law. Readings will focus on primary sources from the literature, including both current and historical perspectives. Assignments will include a research-based final paper and shorter assignments in which you apply scientific principles to learning and education outside the lab.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (PSY 0010 or 0012 or 0101 or 0200) and (PSY 0035 or 1031 or 0036 and 0037)

PSY 1635 - ORGANIZATIONAL PSYCHOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course will provide broad exposure to the field of organizational psychology. We will cover concepts of leadership, motivation, group dynamics, personality, organizational development strategies, and other behavioral aspects involved in the effective management of an organization through readings, lecture, video, discussion, and case analyses. The emphasis is on building a sound grasp of leadership practice, and on developing the ability to apply such knowledge to actual business problems. The class format will include multiple hands-on assignments to assist the student in understanding how psychological theories can be applied in a work context.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (PSY 0010 or 0012 or 0101 or 0200) and (PSY 0035 or 1031 or 0036 and 0037) and (STAT 0200 or 1000 or 1100 or PSY 0201 or 0270)

PSY 1775 - BIOPSYCHOLOGY OF HEALTH INEQUALITIES

Minimum Credits: 3

Maximum Credits: 3

What is socioeconomic status? What does it have to do with our physical health? This seminar addresses these questions from biopsychological perspective. In doing so, an emphasis will be placed on specific aspects of physical health and health behaviors for which there are known socioeconomic inequalities. By the end of the course, students

will have a deeper understanding of how biological and health psychologists (1) define and measure socioeconomic status, (2) conceptualize health inequalities, and (3) investigate the complex factors associated with socioeconomic health inequalities. Students will also learn about intervention approaches aimed at reducing socioeconomic health inequalities across the lifespan. Class meetings will consist of discussions of primary readings from the literature. These discussions will be facilitated by students and the instructor. Reaction papers to reading assignments and a final term paper are required. This course will introduce you to the primary research literature on health inequalities, emphasizing studies of inequalities in health that are patterned by socioeconomic status. By the end of the course, you will have an advanced working knowledge of key research on the main questions in this area, including major research methodologies and theories that have a biological emphasis. As a result of this knowledge, you will be able to write a term paper that expresses your ability to synthesize and critique existing concepts and research in the health inequalities literature and proposes to take work in this area in new directions. Course meetings will be interactive and discussion-based. Each week, we will focus on a particular topic within the field of socioeconomic health inequalities. There is no textbook for the course. In the first few weeks of the course, I will be leading discussions to provide you with foundational knowledge needed for the rest of the semester. Thereafter, the primary format of the course involves student-led discussions of current research articles.

Academic Career: Undergraduate

PSY 1900 - SUPERVISED FIELD PLACEMENT

Minimum Credits: 1

Maximum Credits: 3

Psychology majors may receive up to 3 credits for field experience in supervised agencies in the community. The experiences vary from term to term.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Satisfactory/No Credit

Course Requirements: PROG: Psychology (BS); LEVEL: Junior or Senior

Course Attributes: Capstone Course

PSY 1902 - DIRECTED INDIVIDUAL READING

Minimum Credits: 1

Maximum Credits: 3

Under special circumstances, psychology majors can design an individual reading course with a member of the department and in consultation with the graduate advisor.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SNC Elective Basis

Course Attributes: Capstone Course

PSY 1903 - DIRECTED INDIVIDUAL RESEARCH S/NC

Minimum Credits: 1

Maximum Credits: 3

This course involves student participation in individual experimental research supervised by a member of the faculty. This course is particularly valuable for students interested in graduate study in psychology.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Satisfactory/No Credit

Course Requirements: PREQ: (PSY 0035 or 1031 or 0036 and 0037)

Course Attributes: Capstone Course

PSY 1907 - DIRECTED INDIVIDUAL RESEARCH LG

Minimum Credits: 1

Maximum Credits: 3

This course involves student participation in individual experimental research supervised by a member of the Psychology Department faculty. This course is particularly valuable for students interested in graduate study in psychology.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: PSY 0035 or 1031 or 0036 and 0037

PSY 1950 - PSYCHOLOGY SENIOR SEMINAR

Minimum Credits: 1

Maximum Credits: 1

This one-credit course is designed for psychology majors in their final year of study (either final or next-to-final term). Course content will include exploration of the field of psychology, self-assessment of learning experiences, identification of marketable skills for career and graduate school paths, and planning for transition to post-college life.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Satisfactory/No Credit

Course Requirements: PLAN: Psychology (BS or BPH); LVL: Sr

PSY 1970 - UNDERGRADUATE TEACHING ASSISTANT EXPERIENCE

Minimum Credits: 1

Maximum Credits: 3

This course involves student participation as an undergraduate teaching assistant (UTA) for a psychology course under the supervision of a faculty member.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Satisfactory/No Credit

Course Attributes: Capstone Course

PSY 1973 - HONORS DIRECTED RESEARCH

Minimum Credits: 3

Maximum Credits: 3

This is the first term of research in preparation for the honors major in psychology. Development of the research problem and approval of the theses prospectus.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Letter Grade

Course Attributes: Capstone Course

PSY 1975 - HONORS THESIS/MAJORS

Minimum Credits: 3

Maximum Credits: 3

Undergraduate honors majors in psychology will register for this course when their thesis proposal has been approved and they are ready to conduct and write up the research.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Letter Grade

Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: Capstone Course, Writing Intensive Course (WRIT)

PSY 2302 - MIXED METHODS RESEARCH IN DEVELOPMENTAL PSYCHOLOGY

Minimum Credits: 3

Maximum Credits: 3

In this course, students will be introduced to mixed methods research in psychology. Mixed methods research consists of combining statistical trends (quantitative data) with participants' stories and personal experiences (qualitative data) to provide a better understanding of a research problem than either type of data alone. A primary aspect of this course will be to teach students a) how to determine if mixed methods are necessary given their problem statement and research questions, b) the advantages and challenges of using mixed methods, and c) how to design a mixed methods study. Undergraduate students will develop an independent research proposal, collect, and analyze data to test a mixed methods research question, and write an APA mixed methods paper. Graduate students will conceptualize and design a mixed methods research study and write a research study grant proposal.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PSY 2326 - CULTURE, PARENTING AND LITERACY

Minimum Credits: 3

Maximum Credits: 3

The course focuses on positive development of minority children and their families and takes a strengths-based approach to studying them. Students examine different sources of evidence of whether and how sociocultural factors and parenting practices shape children's language and literacy development. Students discuss evidence-based interventions at home and school that aim to improve children's language and literacy skills, particularly in low-income and ethnically diverse communities. Class sessions involve a combination of lectures and group discussion based on empirical articles, book chapters, press articles, and videos. Students complete individual assignments. The course may include both graduate and undergraduate students, and that course requirements will be different for each group.

Academic Career: Graduate

Grade Component: Grad LG/SNC Basis

Psychology in Education

PSYED 1001 - INTRO EDUCATIONAL PSYCHOLOGY

Minimum Credits: 3

Maximum Credits: 3

A survey of current problems in education which psychological theory and research can address. Topics include developmental approaches to teaching, educational applications of learning theory, classroom management, and testing strategies for teachers.

Academic Career: Undergraduate

Course Component: Lecture
Grade Component: Letter Grade

Public & Int'l Affairs

PIA 0101 - HOW PUBLIC POLICY WORKS: FOUNDATIONS OF PUBLIC POLICY

Minimum Credits: 3

Maximum Credits: 3

This course that explores the principles and processes involved in the creation and implementation of public policy. Students will learn about the role of government in shaping policy, the different levels of government, and the various factors that influence policy decisions. They will also examine the politics of the policy making process and learn about policy advocacy. This course will cover the relationship between law, politics, and policy, as well as the role of budgets, resource allocation, and opportunity costs in policy decisions. Students will also learn about policy implementation, evaluation, and evolution, and understand the concept of policy inertia. This course is ideal for students interested in pursuing careers in public policy or related fields, or for anyone interested in understanding how government and policy impact their daily lives and the communities in which they live.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

PIA 0102 - GLOBAL CHALLENGES, GLOBAL SOLUTIONS: INTRODUCTION TO GLOBAL POLICY

Minimum Credits: 3

Maximum Credits: 3

The goal of this course is to examine societal challenges that transcend national borders. The first part of the course will provide the foundations for understanding the governance context in which global challenges emerge, including identifying the relevant state and non-state actors, international institutions, and power dynamics influencing global decisions. The second part of the course will survey a diverse set of individual topic areas, building students' foundational knowledge of modern global challenges and their surrounding policy debates. Through a combination of readings, engaging class discussions, and expert lectures, students will acquire a foundational understanding of global issues while also developing analytical tools essential for comprehending and addressing complex problems. Practical application is emphasized through activities such as crafting policy memos, utilizing data for decision-making, and connecting with practitioners in the field. By scrutinizing international efforts to date and proposing innovative solutions, students will not only deepen their knowledge of global challenges but also acquire practical skills to actively contribute to their resolution. The course enables students to understand the cause and structure of a broad set of global challenges, with an eye towards eventually participating in their management or resolution.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PIA 0201 - SKILLS FOR POLICY RESEARCH AND ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

This is an undergraduate course that focuses on developing the skills necessary to conduct policy research and analysis. The course covers basic analytic methods and hands-on data analysis techniques, as well as statistical tools for policy analysis. It also includes a focus on the communication of analyses, including the use of memos to effectively convey findings. Students will learn how to analyze policy and understand the problem being addressed, as well as the design, implementation, and evaluation of policies. By the end of the course, students will be able to use research and data

analysis skills to inform policy decisions and communicate their findings effectively.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

PIA 0202 - PROGRAM DESIGN & EVALUATION

Minimum Credits: 3

Maximum Credits: 3

This course equips students with the knowledge and skills necessary to develop effective, evidence-based programs in the public and nonprofit sectors, and to evaluate their performance and social impact on the communities they serve.

Through a combination of theoretical foundations and practical applications, students will learn the intricacies of program planning, design, implementation, and evaluation.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PIA 0301 - IDEAS TO ACTION: INFLUENCING PUBLIC POLICY

Minimum Credits: 3

Maximum Credits: 3

In the course "Ideas to Action: Influencing Public Policy," students will explore the dynamic world of policy advocacy and the essential elements involved in shaping public policy. This undergraduate course provides a comprehensive understanding of the politics and methods behind the policy-making process, while also emphasizing the importance of community outreach, partnerships, and stakeholder analysis. Throughout the semester, students will critically examine influential groups, power dynamics, and constitutional/legal limits that impact policy outcomes.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PIA 0401 - RESOURCE DEVELOPMENT: GRANT WRITING, FUNDRAISING & SOCIAL ENTREPRENEURSHIP

Minimum Credits: 3

Maximum Credits: 3

This course is designed to equip students with the foundational skills and knowledge required to thrive in the nonprofit sector. The course focuses on the critical aspects of securing resources and funding for nonprofit organizations, with a focus on fundraising and revenue diversification, grant writing, social entrepreneurship, and the critical perspective of cross-sector/government grants and contracts. Additionally, students will explore compliance and contract management to ensure effective and accountable resource utilization.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PIA 0501 - FOUNDATIONS OF THE NONPROFIT SECTOR

Minimum Credits: 3

Maximum Credits: 3

Foundations of Nonprofit Management is an undergraduate course that provides an overview of the various forms of nonprofit organizations and their importance in American society. The course will examine the policy and service roles of nonprofit organizations, as well as the context in which they are organized, governed, financed, staffed, and managed. Students will learn about the legal and philanthropic aspects of nonprofit organizations, as well as the

principles of voluntarism and the importance of ethical behavior. The course will also cover topics such as strategic planning and marketing, training and development for boards, staff, and volunteers, and the role of nonprofit organizations in promoting social change. Through lectures, discussions, and case studies, students will gain an understanding of the unique challenges and opportunities faced by nonprofit organizations and the strategies used to address them. Upon completing the course, students will be equipped with the knowledge and skills necessary to effectively manage and lead nonprofit organizations.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

PIA 0601 - IDEAS TO IMPACT: PERSUASIVE COMMUNICATION FOR PUBLIC POLICY

Minimum Credits: 3

Maximum Credits: 3

This class is designed to enable students to develop the oral and written skills required to communicate effectively in public policy settings. The course introduces students to evidence-based communication tools, frameworks, and strategies necessary for crafting persuasive policy narratives for diverse audiences targeted by policy professionals. In addition to writing skills, students will develop proficiency in various forms of communication, including oral presentation, visual communication, and digital media. Students will engage in hands-on activities and receive comprehensive feedback on their written and oral communication to enhance clarity, conciseness, and persuasiveness in conveying public policy messages. Attendance and active participation in discussions are essential components of this course.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PIA 0602 - ETHICS & EQUITY IN PUBLIC POLICY

Minimum Credits: 3

Maximum Credits: 3

In this course, students will gain knowledge and understanding of the motivations of various stages of policymaking and analysis. They will be able to identify and examine the ways in which moral and ideological values come into play in the policy process, including in how social problems are defined or framed, in the design of potential policy solutions, and in the policy analysis process. Topics include the tensions between ethics and politics, efficiency and equity, the common good and political feasibility. This course examines the nature and validity of vexing moral issues in policy, including the role of democracy. Students examine basic moral controversies in public life, focusing on different frameworks for policy as the means to an equitable end. An aim of the course is to provide each student with an opportunity to develop their ability to think in sophisticated ways about morally difficult policy issues.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PIA 0700 - APPLIED DATA ANALYSIS FOR PUBLIC POLICY

Minimum Credits: 3

Maximum Credits: 3

This is an undergraduate course designed to equip students with the essential skills and knowledge needed to analyze data effectively in the context of public policy. Through hands-on projects and case studies, students will learn how to collect, clean, and analyze various types of data commonly encountered in policy research, including economic, social, and policy data. Emphasis will be placed on using statistical methods and software tools to derive meaningful insights, make evidence-based recommendations, and communicate findings to policymakers and stakeholders.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

PIA 1001 - INTERNSHIP SEMINAR

Minimum Credits: 3

Maximum Credits: 3

This course serves as a platform for students to earn credit for their internship. The seminar will allow students to reflect on their internship experiences, connect their real-world experience to academic principles, and foster professional development.

Academic Career: Undergraduate

Course Component: Internship

Grade Component: Satisfactory/No Credit

PIA 1003 - PUBLIC POLICY CAPSTONE

Minimum Credits: 3

Maximum Credits: 3

This capstone is designed to integrate skills and knowledge from multiple disciplines in addressing complex real-world challenges. Students will be encouraged to apply critical thinking and problem-solving abilities and to engage in collaborative efforts. Through a hands-on and engaged approach, students will explore the practical applications of their theoretical knowledge to complex issues. The specific topic of the capstone will vary each semester and will be guided by the instructor's expertise and interests.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Letter Grade

PIA 1004 - NONPROFIT MANAGEMENT CAPSTONE

Minimum Credits: 3

Maximum Credits: 3

This capstone is designed to integrate skills and knowledge from multiple disciplines in addressing complex real-world challenges. Students will be encouraged to apply critical thinking and problem-solving abilities and to engage in collaborative efforts. Through a hands-on and engaged approach, students will explore the practical applications of their theoretical knowledge to complex issues. The specific topic of the capstone will vary each semester and will be guided by the instructor's expertise and interests.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Letter Grade

PIA 1102 - CITY OF WHITE SUPREMACY: RACE, SPACE, AND POLICY IN AMERICAN CITIES

Minimum Credits: 3

Maximum Credits: 3

This course will explore the ways in which white supremacy has shaped the American city and how it is perpetuated in urban policies and practices. We will begin by examining the concept of white supremacy and how it relates to urban development. The second part of the course will delve into specific areas of urban policy, such as housing, transportation, education, criminal justice, and urban design, and how these policies and practices contribute to or challenge systems of white supremacy. Through this course, students will gain a deeper understanding of the racial dynamics at play in the American city and how they impact the everyday experiences of its residents.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

PIA 1103 - INTERNATIONAL BUSINESS & POLITICS

Minimum Credits: 3

Maximum Credits: 3

This course examines how businesses strategize, evolve, and adapt in a globalized world. Why and how do multinational firms lobby on cross-national policy issues? How do international businesses navigate sanctions against Russia and China? What are firms' strategies to take advantage of industrial policy in the United States? This course will focus on both firm level organizational structures as well as state level political institutions and multilateral governance frameworks to understand these types of questions. We will start with a historical survey of the role of multinational firms in international politics, then discuss the role of international business interests in current day regulations of international trade, international finance, foreign direct investment, and digital flows. No prerequisites are required for the course.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

PIA 1104 - VIOLENT POLITICS & POLICY RESPONSES

Minimum Credits: 3

Maximum Credits: 3

Why do politics so often turn violent? What are the ways in which violence is used to achieve political objectives? And how can public policy effectively counter political violence? This course will study various ways in which violence is used to political ends. The larger goal of the course is to understand the sources of violence in political competition and the conditions under which political disputes can be peacefully resolved. Specific forms of violence to be covered include assassination, civil war, ethnic conflict, insurgency, revolution, riots, terrorism, and war. Students will learn about these forms of violence and also gain particular expertise in a chosen conflict or case. Students will practice crafting and presenting policy ideas for addressing the causes of political violence. A key course objective is to expose students to the professional policy sectors that deal with violent politics and to teach skills relevant for careers in those fields.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

PIA 1105 - LAW, POLITICS AND POLICY

Minimum Credits: 3

Maximum Credits: 3

This course explores intricate intersections between law, politics, and policy. First, the course examines legal reasoning - how facts, science, morals, and politics blend to form convincing arguments. Real-world examples will be used to illustrate how these arguments function in practical situations. The second section of the course takes students through the Constitutional framework, examining its role in mediating governmental powers and ensuring democratic imperatives. From the Constitutional response to historical crises to its impact on contemporary challenges, students will analyze the successes and failures of the Constitution in maintaining the delicate balance between government authority and individual rights. The course concludes with an exploration of law in action, where students engage in substantive discussions on topical issues such as freedom of speech, equal protection, and the right to bear arms. This undergraduate course equips students with a solid foundation in law, politics, and policy, empowering them to actively participate in and contribute to the evolving discourse in these critical fields. In this process, students will learn to navigate different political perspectives and understand the process of framing policy in legal terms.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

PIA 1106 - THE WAR ON DRUGS

Minimum Credits: 3

Maximum Credits: 3

The War on Drugs examines the history of drug control policy in the United States and the internationalization of drug prohibition. Topics include: the history of drug control policy in the US and internationally; the nature of drug abuse and addiction and current drug use patterns, the different components of drug control policy, including crop eradication, drug interdiction, leadership decapitation, law enforcement, and drug treatment and prevention; the structure of the drug trade in the Andes, Mexico, Afghanistan, and the US; and alternatives to drug prohibition, including legalization and harm reduction. The course highlights similarities and differences between the war on drugs and the war on terror with an eye towards understanding how our experience with the first can better inform our response to the second.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

PIA 1107 - GLOBAL PERSPECTIVES ON LABOR MIGRATION: ECONOMICS, POLITICS & POLICY

Minimum Credits: 3

Maximum Credits: 3

This course explores labor migration through economic, political, and policy lenses in a global perspective. Students will examine the drivers of migration, its social, economic, and political consequences, as well as the national and international policies governing these flows. Topics will include the labor market impacts of immigration, remittances and their effects on economic development, bilateral labor agreements, guest worker schemes, residency and citizenship by investment programs, and the political backlash to migration, among others. Students will critically examine existing theories of migration, evaluate policy approaches related to labor migration in the U.S. and abroad, and practice the "soft skills" of collaboration and public speaking.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

PIA 1109 - STATE & LOCAL GOVERNMENT, POLICY & POLITICS

Minimum Credits: 3

Maximum Credits: 3

The US has 87,000+ governments, only one of which is the US Federal Government. This course explores state and local governments, their politics and management, and the policy decisions they face. How these governments are structured, power dynamics, administrative culture and practices, intergovernmental relations, and how they serve their constituents are key topics to be covered. The course is a seminar that will review and analyze theory; provide practical knowledge through case studies, and feature presentations by elected officials, lobbyists, media, and citizen groups.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

PIA 2115 - ENVIRONMENTAL ECONOMICS

Minimum Credits: 3

Maximum Credits: 3

This course will combine multi-disciplinary environmental topics in an introductory level course. The concept of environmental policy and its impact on environmental management will be introduced. It will focus on the various scientific, technical and social disciplines including the basic sciences as well as law, engineering, public health and economics. Attention will also be given to the effects of developing and changing environmental policy on selected industries as well as natural resources.

Academic Career: GRAD

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2140 - FINANCIAL PRACTICES FOR ECONOMICS AND ENVIRONMENTAL SUSTAINABILITY

Minimum Credits: 3

Maximum Credits: 3

This course examines the financial practices and processes required to promote economic and environmental sustainability (both public and private comparisons). Emphasis is put on how the economic component husbands the wise use of resources to effectively achieve specific organizational successes, promoting societal or external long-term prosperity, enhancing the opportunity for living things in the environment. On the environmental and social sides stress is put on respecting things and people both in particular organizational and external community. Next focus is put on financial indicators (both early warning and long term) that have been developed and applied to predict potential financial problems before they arise. Attention is focused on financial indicators (the financial monitoring trend system-ftms) that have been developed to promote stable and sustainable financial management.

Academic Career: GRAD

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2164 - NATURAL RESOURCES GOVERNANCE AND MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

This course considers how institutions influence resource and environmental outcomes. In particular, this course will focus on how the design of property rights influences prospects for effective management of resources such as energy, water, and biodiversity. Although the problem of resource management is complex, we will study how the structure of property rights, the rules governing ownership in society, provides a framework to understand when societies succeed and fail in their effort to manage resources effectively. In a general sense, the course will show why property rights, and the political institutions within which property rights are specified and enforced, are the key to understanding the extent to which societies are able to manage natural resources effectively.

Academic Career: GRAD

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2231 - CONTEMPORARY US ENERGY POLICY

Minimum Credits: 3

Maximum Credits: 3

This class examines the energy policy choices facing U.S. policymakers. The choices involve myriad issues, including: allowing fuel exports, regulating greenhouse gas emissions, subsidizing renewable fuels and energy efficiency

investments, allowing drilling on public lands, and allocating funds for research across energy sources and technologies. Broader issues include: understanding and evaluating the justifications used to support energy policies; making policy when costs and benefits are uncertain, occur in long term, and are hard to quantify; what's the 'right' price of energy; market and government failures ' what are they and how do we address them?

PIA 2388 - INTERNATIONAL LAW AND POLICY

Minimum Credits: 3

Maximum Credits: 3

This course begins with an exploration of the history and sources of international law. We then survey the legal process and the application of international law to explore laws governing relations among states, and its expansion to non-state actors (e.g., the private individual, international organizations, NGOs, and multinational corporations). Students will learn about how and why international law is created and develop an understanding of the mechanisms and institutions of its enforcement. The enforcement of international law, its successes and difficulties, will require students to learn about, inter alia, the nature of international disputes, the subjects of international law, and the forums in which disputes are settled. Throughout the course, we will consider the emerging challenges faced in an international law paradigm including, organized violence, global markets, cultural coherency and conflict, identity and citizenship, technological evolution, and environmental regulation.

Course Component: Lecture

Grade Component: Grad Letter Grade

PIA 2448 - POLITICAL ECONOMY OF DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

This course seeks to help you understand the causes of international inequality in the distribution of wealth. In simple terms, the course seeks to answer the question, "why are there rich nations and poor nations and rich people and poor people"? To answer this question we will need to understand something about the factors related to economic development and how those factors are tied to income distribution. The course will expose you to some of the major theoretical and empirical literature on the political economy of development.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PIA 2478 - ASYLUM POLITICS & POLICY

Minimum Credits: 3

Maximum Credits: 3

This course will provide a survey of topics about refugees in a comparative perspective. The course will first provide an

overview of the international humanitarian protection framework that differentiates asylum from other types of migration such as the 1951 Convention Relating to the Status of Refugees and the role of the United Nations High Commissioner for Refugees (UNHCR). We will then analyze contemporary issues including but not limited to refugee resettlement, deterrence policies, offshore processing, temporary protections, climate displacement protections, and refugee integration policies. In addition to studying these processes in the United States, we will utilize case studies of refugee producers and hosts in the Global North and South such as the European Union, Venezuela, Australia, Syria, Jordan, Kenya, Turkey, and Myanmar.

PIA 2502 - GLOBAL ENVIRONMENTAL POLICY

Minimum Credits: 3

Maximum Credits: 3

The 1992 Rio Declaration on environment and development states that 'to achieve sustainable development, environmental protection shall constitute an integral part of the development process.' We discuss the linkages between development and the environment, and the role of women, indigenous peoples, and the poor in achieving equitable development and environmental protection. Using tools from economics and policy analysis, we explore the conceptualization of environmental problems (market or government failure); various policy instruments to rectify environmental problems (regulations, voluntary programs, taxes, tradable permits, payments for environmental services and international treaties such as the Basel Convention, the Montreal Protocol, and the Kyoto Protocol), and the link between trade and the environment. Students' case presentations illustrate the challenges of environmental management in developing countries and the roles of civil society, NGOs, corporations, and international institutions such as the world bank, world trade organization, and united nations environmental program. Over the course of the semester, students are responsible for several policy memos and PowerPoint presentations.

Academic Career: GRAD

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2510 - ECONOMICS OF DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

We use basic conceptual frameworks from economics and quantitative methods to examine economic development issues. We begin by discussing Amartya Sen's concept of 'development as freedom' and measures of development such as the Human Development Index. We examine when the market and government can serve as appropriate mechanisms to allocate resources within the economy. We discuss the institutions that are needed to ensure that markets function well. We study innovations, such as disclosure programs, that reduce corruption. We examine gender-sensitive pro-poor strategies, such as micro-credit programs, the granting of property rights to women, investment into girls' schooling and women's reproductive health. We study World Trade Organization provisions that assist or impede poor countries' access to drugs in combating AIDS and other public health crises. We review the rules of the WTO that attempt to balance free trade and countries' ability to protect public health and the environment. We discuss the role of international trade (e.g., OECD subsidies for agriculture), foreign aid and debt in encouraging or impeding economic development. Students will be graded on policy memos that are well written, based on quantitative and qualitative evidence, and oral briefings that recommend solutions to development challenges faced by governments, international organizations, non-governmental organizations or corporations.

PIA 2522 - GLOBAL ENERGY

Minimum Credits: 3

Maximum Credits: 3

The global energy policy course applies tools from economics, science, and policy analysis to address energy issues. We examine various energy sources in the us/eu/developing countries including oil, gas, nuclear, hydro, biofuels, solar and wind. We discuss how market failures and government policies influence the gaps between private and social costs of energy. We examine incentive policies for the adoption of renewable energy and overall benefits from restructuring towards a greener economy. We examine the role of international trade, investment, technology transfer and climate policy in increasing energy efficiency and renewable energy worldwide.

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2715 - GIS FOR PUBLIC POLICY

Minimum Credits: 3

Maximum Credits: 3

A geographic information system (GIS) is a powerful tool for the public sector and used in a variety of disciplines. GIS builds on existing methods while offering new dimensions. This course provides students with a solid foundation of the principles and applications of GIS, an introduction to the desktop software ArcGIS, and demonstrates its uses in the public sectors. Students utilize ArcGIS to analyze and display spatial and demographic data. The construction of policy is then predicated on analysis. Skills learned in core courses can be brought to this course and built upon. Students have the flexibility to focus on their particular area of interest within the public sector through project work. The course is taught via lecture and hands-on experience using the ArcGIS software.

Public Health

PUBHLT 0100 - FUNDAMENTALS OF PUBLIC HEALTH

Minimum Credits: 3

Maximum Credits: 3

This introductory course will provide students with a comprehensive overview of key concepts from all disciplines of public health. The course will address the determinants of public health and expose students to innovative methods and interventions for quantifying and improving population health across the lifespan. The US public health system will be described and used as basis of comparison to explore the field of global health and development.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

PUBHLT 0110 - GENES, CELLS, AND COMMUNITIES: INTRODUCTION TO PUBLIC HEALTH BIOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course will introduce students to the biological basis of the most pressing global public health challenges of the 21st century. It will begin with an overview of the basics of genetics and cell biology, and teach students the fundamentals of the immune response to infectious pathogens. It will then cover the biology of the most serious infectious and non-infectious disease challenges facing the globe.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

PUBHLT 0120 - ESSENTIALS OF HEALTH EQUITY: EXPLORING SOCIAL AND STRUCTURAL DETERMINANTS OF HEALTH

Minimum Credits: 3

Maximum Credits: 3

Students will learn to identify and critically discuss health disparities - historical, political, economic, social, cultural, and environmental determinants of an identified health equity issue - and evaluate the impact or potential impact of interventions to reduce inequities. The course will be rooted in the exploration of the intersectionality of health disparities in race, ethnicity, age, gender, religion, sexual identity, disability, and other areas.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

PUBHLT 0140 - FIRST-YEAR PUBLIC HEALTH SEMINAR

Minimum Credits: 1

Maximum Credits: 1

This seminar is intended to introduce public health major students to their peers and provide an introduction to the interpersonal and professional skills needed for studying and practicing public health. It allows for cross disciplinary interaction between students with varying backgrounds and interests. This course is limited to individuals within the BSPH program. It is strongly suggested that students take this course their first semester in the program.

Academic Career: Undergraduate

PUBHLT 0350 - PUBLIC HEALTH THREATS IN SURINAME; FROM ECOSYSTEMS TO HUMAN HEALTH

Minimum Credits: 3

Maximum Credits: 3

This course features trans-disciplinary science, practice, and policy approaches to addressing public health issues affecting environmental and human health. We will examine key public health issues affecting the health of Suriname's ecosystem and its population, including the leading causes of morbidity and mortality. Through a series of lectures and fieldtrips, students will learn about the role of the ecosystem as a vital component of community health. Each lecture is accompanied by required reading as designated in the syllabus and grading requirements are specified for the course. Fieldtrips and service learning are an integral part of the course to facilitate application on the public health practice frontline. A special area of focus will be the medicinal characteristics of plants. The course will also focus on the risks posed by environmental contamination, specifically those risks related to mercury released from some small-scale gold mining operations. Students will employ community-based participatory research strategies to assess, manage, and communicate those risks. As natives of Suriname and a graduates of the Anton De Kom University of Suriname (AdeKUS), Faculty of Medical Sciences, the instructors have first-hand knowledge of the overall environmental and public health issues of the Suriname population. The instructors responsible for this course will be joined by leading professors from the Faculty of Medical Sciences of AdeKUS, local experts in areas such as toxicology, pharmacology, and ecosystem science, and governmental officials. In addition, the students will learn of traditional healing from local community experts. Public Health Threats in Suriname: From Ecosystem to Human Health has a total of 64 hours of contact time including 58 contact hours in Suriname. There is an additional 20 hours of service learning available for undergraduate students.

PUBHLT 0401 - CAN ART HEAL? AN INTRODUCTION TO THE ARTS IN HEALTH RESEARCH AND INTERVENTIONS

Minimum Credits: 3

Maximum Credits: 3

Can art heal? The short answer is yes, the longer answer is there are many forms of and ways in which art can impact health and wellbeing. Whether it be urban street murals, music and painting, theater and movement, or photography and film, all these forms can be powerful tools for benefiting communities. In this introductory-level course, we will explore the role of the arts from both research and intervention programming perspectives. Students will be engaged in experiential learning through various field visits and cross-disciplinary discussions. Throughout the course students will have the opportunity to develop their own arts and health projects with both local and global community arts organizations. Instructors will pull from their diverse experiences working at the intersection of the arts and health, such as Collaborative Filmmaking projects in Nepal, Madagascar, and the Republic of Georgia; Public Art, mental health, and COVID-19 in Pittsburgh; and creative projects they have showcased at the Smithsonian Institute, Cooper-Hewitt National Design Museum, and United Nations Headquarters in New York.

PUBHLT 0410 - DATA FOR GOOD: BIOSTATISTICS IN ACTION

Minimum Credits: 3

Maximum Credits: 3

This is an overview class to the field of biostatistics that will include case studies on data ethics, reproducibility, and on emerging areas such as text mining, electronic health records, genomics or bioinformatics, and personalized medicine.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: LVL: SOPHOMORE OR HIGHER

PUBHLT 0411 - STATISTICAL PACKAGES FOR PUBLIC HEALTH ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

This course will provide an overview of three statistical software packages, R, SAS and Stata that are used in public health practice and research. It will emphasize the basics of reading data into the program, basic data management, simple data manipulations, creation of new variables, generation of different types of graphical displays, creating basic code macros and performing basic statistical analyses. Best practices for reproducibility will be stressed. Examples will mostly revolve around public health issues and students will receive hands on training using the statistical software.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: LVL: SOPHOMORE or HIGHER

PUBHLT 0412 - DATA TO DECISION: MODELING IN PUBLIC HEALTH

Minimum Credits: 3

Maximum Credits: 3

This course will cover the introductory regression modeling strategies for continuous, binary, and count data as well as tree-based modeling for decision-making and predictions in public health and biomedical data. Statistical software tools will be used to illustrate the data analysis applications. The course will consist of homework assignments, quizzes, labs, and a final project demonstrating students' mastery of the learning objectives.

Academic Career: Undergraduate

Grade Component: Letter Grade

Course Requirements: PREQ: PUBHLT 0310; LVL: SOPHOMORE or HIGHER

PUBHLT 0420 - EVIDENCE-BASED ENVIRONMENTAL AND "ONE HEALTH" POLICY AND PRACTICE

Minimum Credits: 3

Maximum Credits: 3

The purpose of this course is to introduce students to the types of public health policies and practices that serve to prevent or mitigate the adverse effects of environmental risks and hazards. This is in anticipation that any career in public health after graduation will very likely involve developing, executing, enforcing, or evaluating an element of a public health policy in some way. The framework of recognizing a specific policy need and various steps leading to the development an impactful practice will be followed through several examples. These include air and water quality, food security, the built environment, worker safety, and climate change, among others. Different types of practices (regulations, education, advisories, inspections) and the agencies responsible for their oversight will be discussed. The importance of supporting policies in a fact-based data-driven manner will stressed, as well as appreciating the nuances and challenges of social dynamics, human behaviors, health disparities, and environmental injustice. The course will emphasize the emerging One Health approach to environmental public health that recognizes the intimate connection of human health to the health of agriculture landscapes, domestic and wild animals, and the planet where new interdisciplinary collaborations will be required for successful policy implementation.

PUBHLT 0421 - HEALTH CONSEQUENCES OF ATMOSPHERIC POLLUTION AND CLIMATE

Minimum Credits: 3

Maximum Credits: 3

Most scientist warn that the increasing warming of our atmosphere is the greatest threat to global health. The Clean Air Act was a response by the US government to visible air pollution, acid rain and damage to ozone layers. In addition, the Act requires us to regulate hazardous or toxic air pollutants. This course will examine the scientific basis of global warming, the production of toxic substances in the atmosphere and the resulting health effects. Topics will include the chemistry and physics of the atmosphere, specifically focusing on the stratosphere and troposphere. The particular effects of global warming on the environment and public health will be examined in detail, and use a number of applicable case studies.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: Student must be Sophomore level or higher

PUBHLT 0422 - MOLECULES OF LIFE, SICKNESS, AND DEATH

Minimum Credits: 3

Maximum Credits: 3

Daily exposure to environmental molecules, chemicals, and elements in food, water, and air provide both benefits and hazards to health. The objectives of this course are to increase understanding of the mechanisms through which ingestion, inhalation, or absorption of environmental constituents and xenobiotics, promote health, disease, or even death. The course introduces basic concepts and principles of how environmental chemicals and elements impact health. The key tenet of toxicology, the dose makes the poison, will be reinforced through lectures and analysis of current case-studies that present the material in the context of pertinent, real world gene-by-environment interactions that promote human disease, as well as major environmental and public health concerns. Emphasis will be on assessing potential interventions that protect or improve individual and public health. Prerequisites: general education courses in biology and chemistry or permission of the instructors.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: Student must be Sophomore level or higher

PUBHLT 0423 - THE AQUEOUS ENVIRONMENT, SUSTAINABILITY AND PUBLIC HEALTH

Minimum Credits: 3

Maximum Credits: 3

This course will focus on the aqueous environment, or Hydrosphere, and its interactions primarily with the Anthroposphere and the Biosphere; to lesser extent with the Atmosphere and the Geosphere. The basic physicochemical properties of water will be examined along with principal pollutants. A brief introduction to water purification treatments along with the analytical methods employed to monitor these processes will be included. Case studies of specific pollutants and their health consequences will be considered, especially with respect to marginalized populations. The course instruction will take the form of in-class lectures and assigned home works.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: PUBHLT 0320 and CHEM 0120

PUBHLT 0424 - OCCUPATIONAL HYGIENE: PROMOTING WORKPLACE SAFETY & HEALTHY RETIREMENT

Minimum Credits: 3

Maximum Credits: 3

Occupational exposure to noise, extreme temperatures, biological and chemical hazards, stress, ionizing and non-ionizing radiation, and many more, are major risk factors for injuries, morbidity, and even mortality. While introducing students to the core concepts of occupational health and the core functions of public health (assessment, policy development, and assurance) that may be applied in occupational health settings, this course will provide students with a comprehensive overview of recognizing, assessing, and preventing hazardous exposures.

Academic Career: Undergraduate

Course Component: Lecture

PUBHLT 0430 - GET SASSY: DATA MANAGEMENT & ANALYSIS WITH SAS

Minimum Credits: 3

Maximum Credits: 3

This is a course on hands-on data management, simple, descriptive statistical analysis and presentation of health data using the SAS statistical software package. The course consists of lectures and lab sessions, during which students practice in a guided manner what was taught during the preceding lectures. Working on a group project, students get real-world experience in preparing data for analysis, applying simple descriptive statistical and graphical procedures and communicating their findings to their peers in oral and written (in terms of a scientific abstract) form.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: LVL: SOPHOMORE or HIGHER

PUBHLT 0431 - UNDERSTANDING AND INTERPRETING HEALTH RESEARCH

Minimum Credits: 3

Maximum Credits: 3

This course provides an introduction to the fundamental definitions, principles, concepts, methods and critical thinking used in research in the health sciences. The course is directed towards individuals with little or no experience in research. Lectures and discussion material will highlight and emphasize key components of the research process, including planning, design, methodological approaches, analysis, synthesis, publication, and peer review. At the end of this course, students will have a fuller understanding and appreciation of the scope, strengths, and weaknesses of research as it is applied in health and healthcare practices.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: Student must be Sophomore level or higher

PUBHLT 0432 - EPIDEMIOLOGY IN PUBLIC HEALTH PRACTICE

Minimum Credits: 3

Maximum Credits: 3

This course introduces applied epidemiology with an emphasis on the practical application of epidemiological concepts. Discussions will be based on advances in the field of epidemiology and cover a range of timely public health issues, including outbreak investigations, risks associated with lifestyle choices, and public health emergencies. Students will gain knowledge through lectures, case-based studies, exercises, and optional readings. Additionally,

students will develop skills to address public health challenges relating to communication, resource use, and coordination of efforts by participating in Incident Command System (ICS) training.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: PUBHLT 0330; LVL: Junior or higher

PUBHLT 0433 - EPIDEMIOLOGY OF FIREARM INJURIES AND DEATH

Minimum Credits: 3

Maximum Credits: 3

Addressing this crisis means addressing persistent public health problems in the realms of science, and politics. This course will review the epidemiology of gun violence, the data available and the study designs currently used, the obstacles to the thorough study of firearm violence, as well as the approaches to prevent firearm violence. We will address the problem using the Epidemiology Triad - Host, Agent and Environment, where the host are individuals, the agent is the firearm, and the Environment are our communities and politics. We will place all of this in the political and legal context that shapes our collective actions. Through lectures and discussion, students will become familiar with the main factors connected with firearm injury. By reviewing both new and canonical research throughout the course, students will learn how diverse study designs are well-suited to shed light on different aspects of this subject. This course will emphasize the role of social determinants of health (SDOH) in relation to firearm injuries. SDOH are the conditions in the environments where people are born, live, learn, work, play, worship, and age that affect a wide range of health, functioning, and quality-of-life outcomes and risks.

Course Requirements: LVL: Junior or above

PUBHLT 0440 - INTRODUCTION TO THE US HEALTH SYSTEM

Minimum Credits: 3

Maximum Credits: 3

Introduction to the US Healthcare Delivery System provides an historic and current overview of basic participants in, and elements of, the US healthcare delivery system. This course is designed to introduce students to the complex organizational and delivery aspects of healthcare in the United States, including its composition, financing, interrelationships between organizations and professional groups, and major problems and issues in the delivery of health services. The course also includes current perspectives provided by selected guest healthcare leaders.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: LVL: SOPHOMORE or HIGHER

PUBHLT 0441 - IMPROVING COMMUNICATION WITH APPLIED IMPROVISATION TECHNIQUES

Minimum Credits: 3

Maximum Credits: 3

Principles of improvisation are surprisingly applicable in professional and clinical settings. The central tenant of improv is acceptance. Using the core philosophy of "Yes, and", improvisers learn to listen, accept, and empathize. All of us must also use these same skills to communicate and empathize with patients, clinicians, and policy makers. Improvisers use teamwork and spontaneity to build scenes. Professionals must collaborate learn to calmly handle unexpected scenarios. Improvisers use techniques and exercises to hone these skills, which can lead to better patient interactions, collaboration, presentation skills, and even lower stress. We will learn about the principles of improv,

exercises used to develop skills, and how improv training has been applied in professional and clinical settings.

Academic Career: Undergraduate

PUBHLT 0442 - FUNDAMENTALS OF MANAGEMENT FOR HEALTH INDUSTRY LEADERS

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the basic management functions within the health industry. The emphasis is on developing management and leadership skills. Topics covered also include exposure to management theory, planning, organizing, leading, motivating, and controlling. The course will also expose students to the basic business functions, such as Human Resources, Information Management/Information Technology, Finance, and Supply Chain.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: LVL: SOPHOMORE or HIGHER

PUBHLT 0443 - REPRODUCTIVE HEALTH IN THE US: POLICY, POLITICS, AND JUSTICE

Minimum Credits: 3

Maximum Credits: 3

This course focuses on understanding how policies and politics shape reproductive health and wellbeing in the United States. The emphasis is on developing an understanding of current inequities, critical thinking skills, and communication skills. Reproductive Justice (RJ) is a human rights-based framework that will guide our approach understanding to these issues, and content will be organized around the following RJ principles: 1) the right not to have a child; 2) the right to have a child; and 3) the right to parent children in safe and healthy environments. Each class session will cover a specific reproductive health issue and review the topic's major historical and current policy developments. Throughout the course, we will center the reproductive experiences of marginalized populations, specifically: Black, Indigenous, and other people of color, people living on low incomes, immigrants, people living with a disability, young people, trans and queer people, and people who use drugs. Some of the topics covered will include birth control, abortion, sterilization abuse, reproductive technologies, prenatal/postpartum care, and parenting support. Throughout the course we will examine the role of the health care system, social determinants of health, policy making and legal processes, why some interests are privileged over others, and reproductive choice versus justice-based advocacy.

PUBHLT 0444 - HEALTH EQUITY AND THE US HEALTH SYSTEM: WHAT IS AND WHAT COULD BE

Minimum Credits: 3

Maximum Credits: 3

By understanding health inequity across intersecting population characteristics and conditions, and by analyzing the U.S. health system and its policy and management components, students will gain insight as to how each part of the healthcare system both perpetuates health disparities and has a role to play in advancing health equity across populations. In this course, we will build upon students' basic understanding of health equity and health disparities.

Participants will continue to study the definition and history of health equity as a concept and explore a selection of various population characteristics and conditions across which significant health service or health outcomes disparities exist. For each of these, students will study the history underlying the inequity and its current impact on the relevant population, as well as examine how intersectionality of identities may compound or alleviate these disparities. Students will then be introduced to a component of the US healthcare system and examine how it relates to a specific population disparity, including how it may perpetuate the disparity and/or may be leveraged to advance health equity. Invited speakers will allow students to better understand health system components, and how leaders of these organizations and agencies are addressing health inequities.

PUBHLT 0445 - ADMINISTRATIVE BURDEN AND INEQUALITY IN U.S. HEALTH CARE

Minimum Credits: 3

Maximum Credits: 3

Administrative burdens often induce delays and confusion for individuals navigating the American health care system. What's more, these burdens impose significant health literacy demands, which can lead to racial and economic disparities in who has meaningful access to health care. This course will look at how administrative burden and inequality intersect to shape our health care system and consider how health insurance entities can better promote access to care. This course satisfies the writing intensive requirement for Public Health undergraduate students.

Grade Component: Letter Grade

Course Requirements: LVL: Junior or above

PUBHLT 0451 - HUMAN GENETICS: HEALTH AND DISEASE

Minimum Credits: 3

Maximum Credits: 3

This survey course for undergraduates of all majors will explore the role of genetics in health and disease in individuals, families, and communities. The course will cover the molecular basis for DNA as the source of genetic information, heredity, and the causes and consequences of single gene disorders and multifactorial traits. Examples related to cancer, cardiovascular and metabolic diseases, autoimmune disorders, mental health, and chronic diseases will be discussed. Implications of genetics for pathobiology, rare diseases, and discovery of therapeutics will be covered. Themes discussed in this course will be linked to public health.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: LVL: SOPHOMORE or HIGHER

PUBHLT 0452 - HUMAN GENETICS, SOCIETY, & LAW

Minimum Credits: 3

Maximum Credits: 3

This survey course for students of all majors will cover contemporary issues spawned by genetic and genomic data. The course will cover the relevance of human genetics in contemporary society and the healthcare setting. Societal topics include genetic literacy, privacy concerns, the genetic information nondiscrimination act, direct-to-consumer testing, ancestry testing, family revelations sparked by genetic identification of biological relationships, criminal databases, ownership of genetic data and resources, etc. Healthcare topics include genetic testing and treatment,

reproductive technologies, newborn screening, and precision medicine. The role of genetics in healthcare will be considered from the perspectives of genetics professionals (clinical geneticists, laboratory directors, and genetic counselors), public health workers, patient advocates, patients, and at-risk populations. For each topic, the ethical, legal, policy, and equity implications will be addressed.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: LVL: SOPHOMORE or HIGHER

PUBHLT 0453 - INTRODUCTION TO GENETIC COUNSELING

Minimum Credits: 3

Maximum Credits: 3

This introductory course is intended for students of all majors with interests in healthcare, biomedical sciences, genomic medicine, patient advocacy, and public health. The course will provide a foundational overview of the field of genetic counseling, including the roots of the discipline, and contemporary processes of helping people understand and adapt to the medical, psychological and familial implications of genetic contributions to disease. Topics include inheritance, interpreting family history, genetic risk assessment, genetic testing, patient education, informed decision making, and patient support. The various roles of genetic counseling in the healthcare setting and in society will be addressed. Themes discussed in this course will be linked to public health.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: Student must be Sophomore level or higher

PUBHLT 0461 - VECTOR-BORNE DISEASES

Minimum Credits: 3

Maximum Credits: 3

This course will familiarize students in the BSPH program with vector-borne diseases that represent important public health problems around the world. Specifically, the students will receive information on the biology of invertebrate vectors of transmissible pathogens, how the host and pathogen interact in ways that promote pathogen transmission, and how these pathogens cause disease in humans, and in select cases, economically important animal populations. Control approaches for invertebrate vectors, vector-borne pathogens, and the impact of climate change and changing patterns of human land use will also be discussed.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: Student must be Sophomore level or higher

PUBHLT 0462 - HISTORIC AND CONTEMPORARY SOCIETAL IMPACTS OF INFECTIOUS DISEASES

Minimum Credits: 3

Maximum Credits: 3

This course will familiarize students in the BSPH program with the impacts of infectious diseases from pre-germ theory eras into the present day. The course will teach students how past and current diseases have created lasting changes to societies, discourse and perceptions of "health," and public health practices and interventions around the world. The course includes diverse examples from multiple cultures and time periods while also emphasizing social factors and health structures that are most likely to directly students' public health research and practice today. The course will touch on historical and contemporary disease models and infectious diseases ranging from tropical diseases and sexually transmitted infections to global epidemics like HIV and COVID-19.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: LVL: Sophomore or higher

PUBHLT 0464 - INFECTIOUS DISEASE EMERGENCIES: PREVENTION, PREPAREDNESS, & RESPONSE

Minimum Credits: 3

Maximum Credits: 3

This course will introduce students to the strategies for the prevention, preparedness, and response of infectious disease outbreaks and pandemics using a multidisciplinary, global health approach. It will begin with an overview of the causes of infectious disease outbreaks and pandemics and will familiarize students with the fundamentals of the origin and features of pathogens with pandemic potential. Students will then gain insights into the skills needed to prepare and respond to future outbreaks and pandemics through the lens of the lessons learned from previous and current emergencies. The course will look closely at emerging pathogens and their connections with the environment and climate change and discuss the use of a One Health approach to improve preparedness and response efforts for global health security. Students will be introduced to key concepts of integrated disease surveillance for epidemic-prone diseases, public health mitigation strategies, and effective risk communication during outbreaks and pandemics. This course will also examine how outbreaks and pandemics relate to health disparities and discuss local and global strategies to promote health equity during infectious disease emergencies.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: PUBHLT 0100; LVL: Sophomore or above

PUBHLT 0500 - ETHICAL ISSUES IN PUBLIC AND COMMUNITY HEALTH

Minimum Credits: 3

Maximum Credits: 3

This 3-credit course addresses a broad range of historical and contemporary issues in public and community health ethics. This course will begin with an exploration of normative frameworks utilized by ethicists, health professionals, and policy-makers for analyzing and addressing ethical and social challenges in public and community health. These frameworks will be utilized in the course to assess and critically examine a number of general and specific public and community health issues, including (a) conceptual foundations of health promotion and disease prevention at the population level; (b) justification for public/community health policies that may conflict with or intrude upon individual autonomy and interests; (c) justice and the fair allocation of health resources within communities, particularly in disaster and pandemic scenarios; (d) trade-offs between aggregate health benefit promotion and negative impacts on subpopulations; (e) social and environmental determinants of health and remediation policies; (f) vulnerable populations and health disparities; (g) public health harm reduction strategies, particularly for curbing the opioid epidemic; and (h) pediatric health initiatives, including immunization programs, newborn screening, and anti-smoking/vaping campaigns. Finally, the course will provide an overview of research ethics in health contexts, with particular attention to community-based research through student completion of and certification through Pitt's Community Partner Research Ethics Training (CPRET).

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: LVL: SOPHOMORE or HIGHER

PUBHLT 0501 - INTERDISCIPLINARY RESOLUTION OF BIOETHICS CASES

Minimum Credits: 3

Maximum Credits: 3

The purpose of this course will be to create an interdisciplinary forum for the resolution of cases that are ethical, legal, and/or societal in scope that are common to individual health and public/community health arenas. The course will utilize improvisation to develop conflict resolution skills, de-escalation skills and interpersonal skills while resolving ethical dilemmas from an interdisciplinary perspective. Cases will include ethical dilemmas across all aspects of bioethics, including public and community health, individual health, and research involving human subjects.

Prerequisites: Completion and/or concurrent enrollment in the other course requirements of the bioethics certificate.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: PUBHLT 0120 or 0500 or PUBSRV 1305; LVL: SOPHOMORE or HIGHER

PUBHLT 0901 - CAPSTONE: BIOETHICS CERTIFICATE

Minimum Credits: 2

Maximum Credits: 2

Capstone: Bioethics Certificate will include experiences and an in-depth ethical exploration. For the in-depth ethical exploration, students will have the option of completing either a practicum or an independent study. A practicum for the purposes of this class is considered any experience where the patient will be providing or observing patient care services in an individualized, community, public health, or research setting. The independent study is any project, directed research, or study abroad experience with focused end-result. Students will select the in-depth exploration most suitable for their area of interest/specialty in direct patient care, human subjects research, public health or community health initiatives. In addition to the hours required for the practicum or independent study, students will engage in a series of experiences that are skills based and authentic. Students are required to propose and obtain approval for their capstone plan prior to the registration of the capstone. Once a mutually agreeable plan has been made and deadlines clearly established, students will be issued a permission number to enroll in the course. Students should plan to schedule this meeting at least one month prior to registering for the semester in question.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: H/S/U Basis

PUBHLT 0910 - BSPH CAPSTONE PROJECT

Minimum Credits: 3

Maximum Credits: 3

This capstone course serves as a culminating experience for BSPH students following their completion of the required BSPH coursework in their final year of study. This course is anchored by a collaborative project that allows students to apply knowledge and skills obtained during their time in the program. Students will work in teams to address real-world challenges posed by a real case study. Each team will create an innovative solution to public health problem posed to them and present their work at the end of the semester.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: H/S/U Basis

Course Requirements: PREQ: PUBHLT 0100 and 0110 and 0120 and 0140 and 0300 and 0310 and 0320 and 0330 and 0340; PLAN: Public Health (PBHL-BSPH); LVL: Senior

Course Attributes: Capstone Course

PUBHLT 0911 - BSPH CAPSTONE SEMINAR

Minimum Credits: 1

Maximum Credits: 1

This recitation provides an interactive forum for BSPH students engaged in Capstone practicums to reflect and share their experiences and discuss learnings and challenges with their peers and faculty. It will be important for students to apply their public health knowledge gained in the classroom to their on-the-ground field work. Short discussion prompts and activities will help guide students through discussion. This course will also prepare students to present their capstone practicum experience via a poster in the bi-annual Undergraduate Capstone Symposium. Each student will work in small groups to prepare their posters.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: H/S/U Basis

Course Requirements: PREQ: PUBHLT 0100 and 0110 and 0120 and 0140 and 0300 and 0310 and 0320 and 0330 and 0340; PLAN: Public Health (PBHL-BSPH); LVL: Senior

Course Attributes: Capstone Course

PUBHLT 1001 - INTRODUCTION TO GLOBAL HEALTH

Minimum Credits: 3

Maximum Credits: 3

This introductory course covers fundamental concepts in global public health, including determinants of health, key health indicators, global burden of disease, and the relationships among health status, education, and poverty, cross-cutting issues such as culture, ethical and human rights aspects of health, and key actors in global health will also be explored. A variety of teaching modalities will be employed throughout the course including lectures, guest speakers, case studies, class discussion, audio-visual presentations, and student presentations.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: LVL: Soph or Jr or Sr

PUBHLT 1002 - SPECIAL TOPICS IN GLOBAL HEALTH

Minimum Credits: 3

Maximum Credits: 3

This course provides an in-depth look at selected global health issues at a population level. This includes exploration of the determinants of health associated with these issues, prevention and control strategies, and the interplay of behavioral, social, cultural, economic, and political factors that must be considered when addressing the issues. Topics are preselected by the instructor and may vary each term. Examples are accidents and injuries; chronic diseases such as cancer, diabetes, and mental illness; neglected tropical diseases; and reproductive health. In addition, students will be exposed to an array of issues through weekly discussion of current events in global health. A variety of teaching modalities will be employed throughout the course including lectures, guest speakers, case studies, class discussion, audio-visual presentations, and student presentations.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: LVL: Soph or Jr or Sr

PUBHLT 1008 - PUBLIC HEALTH UNDERGRADUATE PRACTICUM FOR SUMMER HEALTH SCHOLARS

Minimum Credits: 1

Maximum Credits: 1

The Public Health Undergraduate Scholars Program provides an opportunity for students to gain and apply knowledge in public health during a summer program through a structured and supervised field experience, classroom instruction, group activities, and mentorship. Field experience sites are selected in consultation with program personnel. This

course has no formal prerequisites. It is intended only for students in the Pitt Public Health Undergraduate Scholars Program.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: Satisfactory/No Credit

PUBHLT 1009 - SUMMER HEALTH SCHOLAR BILLING COURSE

Minimum Credits: 0

Maximum Credits: 0

This is a billing course used to charge tuition for the Summer Health Scholar Program.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: No Grade Required

PUBHLT 1900 - INTERNSHIP

Minimum Credits: 1

Maximum Credits: 3

An internship offers students a unique learning opportunity outside of the classroom to connect the classroom knowledge with real-world settings as they explore careers in public health and gain valuable experience. Students may earn from 1-3 credits for an experience that should be related to a public health field of study. The experience must be pre-professional in nature and must be approved by the School of Public Health BSPH office. Students must seek out and apply for their own internship. Students may contact SPH Experiential Learning office for help with opportunities. Students who are earning credit for PUBHLT 1900 internships may receive pay. Students must work at least 5 hours a week for 1 credit, 10 hours a week for 2 credits and 20 hours a week for 3 credits. In order to earn credit, the student must have a SPH faculty sponsor (full-time only) who may assign related academic work.

Academic Career: Undergraduate

Course Component: Internship

Grade Component: Satisfactory/No Credit

PUBHLT 1901 - UNDERGRADUATE RESEARCH

Minimum Credits: 1

Maximum Credits: 3

A program of independent research, with supporting literature review work, on a topic chosen in consultation with the SPH faculty member who will supervise the work. Research can be done with faculty outside of SPH but there must also be a SPH faculty mentor.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Satisfactory/No Credit

PUBHLT 1902 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 3

Independent study entails an independent program of study, research, or creative activity with some guidance from a sponsoring SPH faculty member.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Satisfactory/No Credit

Public Service

PUBSRV 0020 - INTRODUCTION TO PUBLIC SERVICE

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to the fields of public service. In addition to addressing the concept of public service, it provides students the opportunity to explore the various public service options. These include elected and appointed positions, volunteerism, and work in non-profit organizations. An effort will be made to give students an appreciation of the skills and talents required to effectively serve in these capacities. Classes will involve presentations by a variety of public service professionals, field visits and service learning opportunities.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Urban Studies

PUBSRV 0030 - PUBLIC POLICY PROCESS

Minimum Credits: 3

Maximum Credits: 3

Objective: to stimulate independent, critical and creative thinking about processes of public policy formulation in complex and rapidly changing environments. Course provides an approach to understanding interrelationships between elements of public policy (policy problems, policy alternatives, policy actions, policy outcomes, policy performance) and specific skills necessary to formulate and implement policies (problem identification, forecasting, recommendation, monitoring, and evaluation).

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Civic Learning

PUBSRV 0040 - PUBLIC SERVICE TECHNOLOGIES

Minimum Credits: 3

Maximum Credits: 3

This course presents an overview of existing and emerging technologies that may be used by public service professionals to accomplish organizational goals or improve efficiency and effectiveness. Through discussions, readings, internet research and hands-on computer exercises, it will emphasize current information technology concepts, issues, and practices in the United States. In addition, it will provide students with a technology skill set utilized in subsequent courses and in the practice of a public service career.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PUBSRV 0050 - ETHICS AND ACCOUNTABILITY

Minimum Credits: 3

Maximum Credits: 3

This course is an undergraduate course offered through the Public Service major by the Graduate School of Public and International Affairs. It will be an introduction to Ethics and Accountability and will focus on enhancing the capacity of students to make difficult and necessary ethical choices on the basis of limited information and frequently conflicting values. The purpose of this course is that in their personal lives and future roles as professionals in a chosen field,

students will face moral and unethical dilemmas that resist easy answers or a simpler formula and action.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PUBSRV 1100 - PRACTICES IN PUBLIC ADMINISTRATION

Minimum Credits: 3

Maximum Credits: 3

Examines practices, issues and concepts in governmental administration. Course deals with such matters as current and best approaches to administration, administration and politics, organizational structure and behavior, and decision making.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Urban Studies

PUBSRV 1110 - FINANCIAL MANAGEMENT IN THE PUBLIC SECTOR

Minimum Credits: 3

Maximum Credits: 3

Participants are provided with an overview of the financial management concepts and practices. Stress is put on the strengths, weaknesses, and critical roles financial management plays in aiding public service managers to better realize their programmatic goals and objectives.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PUBSRV 1120 - HUMAN RESOURCES MANAGEMENT IN THE PUBLIC SECTOR

Minimum Credits: 3

Maximum Credits: 3

This course is an introductory survey of the understandings and skills needed by both managers and employees to cope with the myriad human resources management systems in public sector organizations. Specific topics include the history and evolution of human resources management, the legal environment, human resources planning, position classification and compensation, recruitment, promotion, termination, performance evaluation and training. Integrated with these topics will be the technical and legal concerns of labor relations and equal employment opportunity.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Urban Studies

PUBSRV 1130 - PLANNING IN THE PUBLIC SECTOR

Minimum Credits: 3

Maximum Credits: 3

This course will introduce the profession of urban planning through a review of the historical development of cities. With this framework we will look at the actual work of the planner: data gathering, analysis, policy, public process and politics. We will address the relation between the physical nature of cities and the quality of community that develops. Course underscores the importance of physical and geographic determinants to city growth, and makes the connection between democratic values and city development policy.

Academic Career: Undergraduate

Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: MCSI - Sustainability Related

PUBSRV 1200 - PRACTICES OF NON-PROFIT MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

Introduction to forms of non-profit organizations and their roles in American society. Course evaluates how non-profit organizations define their policy and service roles and examines the context of how they are organized, governed, financed, staffed, and managed. Other topics to be examined are law and philanthropy, voluntarism, strategic planning and marketing, training and developing boards, staff and volunteers, and ethical behavior.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: MCSI - Sustainability Related

PUBSRV 1210 - FINANCIAL MANAGEMENT OF NON-PROFIT ORGANIZATIONS

Minimum Credits: 3

Maximum Credits: 3

Students are provided with an overview of the theories, practices and critical role of financial management in the non-profit sector. Major attention is focused on the tools and techniques that are necessary for the manager to effectively achieve an expanding mission in the face of a difficult and competitive revenue raising environment.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Urban Studies

PUBSRV 1220 - HUMAN RESOURCE MANAGEMENT OF NON-PROFIT ORGANIZATIONS

Minimum Credits: 3

Maximum Credits: 3

This course is an introductory survey of the understandings and skills needed by both managers and employees to cope with the myriad human resources management systems in non-profit organizations. Specific topics include the history and evolution of human resources management, the legal environment, human resources planning, position classification and compensation, recruitment, promotion, termination, performance evaluation and training. Integrated with these topics will be the technical and legal concerns of labor relations, equal employment opportunity and volunteer management.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Urban Studies

PUBSRV 1230 - FUNDRAISING FOR NON-PROFIT ORGANIZATIONS

Minimum Credits: 3

Maximum Credits: 3

This course is intended to help students become familiar with the major sources of financial resources available to support the program activities of non-profit organizations. It will introduce students to the basic component of grant proposals and other revenue raising techniques i.e. plan giving, general appeals and endowments.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: Urban Studies

PUBSRV 1300 - LEGAL ISSUES IN PUBLIC SERVICE

Minimum Credits: 3

Maximum Credits: 3

Examines impact of law upon public service and manner in which legal implications condition formulation, adoption, and implementation of programs.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Attributes: Urban Studies

PUBSRV 1305 - HEALTH, LAW AND ETHICS

Minimum Credits: 3

Maximum Credits: 3

This course addresses legal and ethical issues encountered by health care practitioners as well as those working in health care management and public health. Strong emphasis is placed on legal and ethical issues that occur within the realm of direct patient care. Topics include, but are not limited to: advance directives, decision making capacity, informed consent, organ donation, end of life decision making, surrogate decision making, and confidentiality. Students will be able to articulate common health care ethics principles, theories, methodology, laws, and concepts and use the same to analyze health care ethics cases. Students will also develop concrete logical arguments in support of a chosen ethical stance.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PUBSRV 1310 - DIVERSITY ISSUES IN PUBLIC SERVICE

Minimum Credits: 3

Maximum Credits: 3

This course analyzes public service from the perspective of minorities and women. The minorities examined are black American men and women, with lesser attention given to ethnic minorities, those over 45 and the handicapped. The experience and aspirations of these several minorities will be examined in terms of how minority culture illuminates the nature of public service.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Urban Studies

PUBSRV 1315 - MANAGING PROJECTS AND CONTRACTS

Minimum Credits: 3

Maximum Credits: 3

This course provides students with the fundamentals of project management by examining key components of the project cycle, such as: problem identification, results-based planning and design strategies, implementation and scheduling strategies, monitoring and performance indicators, impact learning with evaluation studies, and data management and reporting systems. Students will also be introduced to team building concepts, managing project

budgets, writing scopes of work, and legal issues in the management of contracts and administration of grants.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Attributes: Urban Studies

PUBSRV 1320 - GEOGRAPHIC INFORMATION SYSTEMS IN THE PUBLIC SERVICE

Minimum Credits: 3

Maximum Credits: 3

This course introduces the student to geographic information systems software. In addition to familiarizing the student with the software, each student will apply that knowledge to a particular public problem selected by the student in consultation with the instructor. As this is a hands-on course, the format is a combination of lecture and lab/computer time.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PUBSRV 1340 - STRATEGIC PLANNING PUBLIC SECTOR

Minimum Credits: 3

Maximum Credits: 3

This course is designed to introduce students to strategic planning and its application to the management of public organizations. As an introductory undergraduate course, students will be expected to gain a broad understanding of strategic planning and how it can be applied to mid and long term management of public organizations. Students will be introduced to the terminology used in strategic planning, several types of planning models, their steps and organization, and the importance of mission, vision, and values in strategic planning.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: MCSI - Sustainability Related

PUBSRV 1390 - THEORIES OF LEADERSHIP

Minimum Credits: 3

Maximum Credits: 3

This course is designed to acquaint students with multiple theories and practices associated with effective leadership. In answering the question, "what is leadership", it examines such theories as situational, participative, transformational, and servant leadership. It also addresses those leadership and administrative skills and practices usually associated with effective community organization and professional management.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PUBSRV 1425 - PRINCIPLES OF HOMELAND SECURITY

Minimum Credits: 3

Maximum Credits: 3

This course examines the new problems facing our domestic public service and justice personnel -- the borderless world of globalization and technology. Attention is paid to problems of terrorism, incident management systems, violence incident response procedures, planning for violence, changing federal, state, and local roles and response planning, weapons of mass effects, mass casualty programs, crime scene operations, technology and emergency

responses, the evolving role of the intelligence community, and government, private, and non-government security issues.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Global Studies

PUBSRV 1430 - TRIAL ADVOCACY 1

Minimum Credits: 3

Maximum Credits: 3

This course examines the mechanics of American civil and criminal litigation in both nonjury and jury trials. Topics include basic case analysis, effective advocacy skills, appropriate professional conduct, trial preparation, direct and cross examination of lay witnesses, and an introduction to the legal concepts of relevance and hearsay within the context of the federal rules of evidence. Students will participate in intensive class discussions and in-class presentations.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Attributes: University Honors Course

PUBSRV 1435 - TRIAL ADVOCACY 2

Minimum Credits: 3

Maximum Credits: 3

This course further examines more advanced topics relating to the mechanics of American civil and criminal litigation in both nonjury and jury trials. Topics include the authentication and use of evidentiary exhibits such as documents, real evidence and demonstratives, the direct and cross examination of expert witnesses, character evidence, opening statements, and closing arguments. Students will participate in intensive class discussions and in-class presentations.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Attributes: University Honors Course

PUBSRV 1455 - LAW, ETHICS AND PUBLIC POLICY IN THE MASS MEDIA

Minimum Credits: 3

Maximum Credits: 3

This course examines a variety of public policy issues as those issues are impacted by the role and significance of the news and entertainment media. It explores mass media law and policy, with particular attention to regulatory practices.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

PUBSRV 1900 - INTERNSHIP SEMINAR

Minimum Credits: 1

Maximum Credits: 6

A supervised placement with a government or non-profit agency, or private sector organization undertaking public services. Students will meet several times during the semester with other students to review and discuss their public service experiences. CGS Public Service Majors and Non-Profit Management Certificate students are required to complete a minimum of a 3.0 credit internship. This internship course is optional for Public Service Minors and may

vary from 1.0-6.0 credits. Instructor approval is required prior to enrolling in this course.

Academic Career: Undergraduate

Course Component: Internship

Grade Component: Satisfactory/No Credit

PUBSRV 1901 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 6

Allow advanced student to pursue topics and research of special interest, which are not otherwise available. Course requires construction of plan of study or research on topic selected and approval of instructor who will supervise work.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: LG/SNC Elective Basis

PUBSRV 1910 - INSTITUTE OF POLITICS INTERNSHIP/SEMINAR

Minimum Credits: 4

Maximum Credits: 4

While students are obtaining first-hand internship experience working with an official directly involved in policy making for the Pittsburgh region, they will learn in this seminar to analyze the policy-making process as an example of social problem-solving. They will learn the issues confronting the region; they will study the policy-making process; finally they will analyze the method of participant observation.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Letter Grade

Quant Mthds/Operations Mgt

BUSQOM 0050 - DECISION ANALYTICS

Minimum Credits: 3

Maximum Credits: 3

Provides the foundations for two basic business disciplines; optimization and simulation. Various modeling concepts which have origins and have found wide applications in functional areas such as finance, marketing and operations will be studied in depth. The topics studied are linear programming; models of go/no go" decisions and location decisions; "what if" analysis; decision analysis and multiple criteria decision making models; queuing models and statistical foundations to simulate business systems-input/output analysis.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (MATH 0120 or 0220 or 0121 or 0221 or 0136 or 0140 or MATH 0125 and 0126) and (STAT 1000 or 1040 or 1100 or ECON 0204 or BUSQOM 0101 or ENGR 0021 or STAT 1151 and 1152 or IE 1070 and 1071); PROG: College of Business Admin

BUSQOM 0051 - DECISION ANALYTICS

Minimum Credits: 3

Maximum Credits: 3

Provides the foundations for two basic business disciplines; optimization and simulation. Various modeling concepts which have origins and have found wide applications in functional areas such as finance, marketing and operations will

be studied in depth. The topics studied are linear programming; models of "go/no go" decisions and location decisions; "what if" analysis; decision analysis and multiple criteria decision making models; queuing models and statistical foundations to simulate business systems-input/output analysis.

Academic Career: Undergraduate

Grade Component: Letter Grade

BUSQOM 0100 - PROGRAMMING ESSENTIALS FOR BUSINESS ANALYTICS

Minimum Credits: 3

Maximum Credits: 3

This course introduces data programming to undergraduate business students and focuses on automation of data collection, data cleaning, and data wrangling tasks. Students will learn to use the Python programming language along with Structured Query Language (SQL), Excel, and Tableau for completing data preprocessing and exploratory analysis tasks. Through hands-on exercises and projects, students will develop and execute programming scripts for examining a variety of structured and unstructured business data.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

BUSQOM 0101 - BUSINESS ANALYTICS 1

Minimum Credits: 3

Maximum Credits: 3

This course builds on the Programming Essentials course and introduces foundational topics underlying modern business analytics to undergraduate business students. The course focuses on providing a solid basis in the necessary probability and statistics to understand and apply data-driven methods. Students will learn elementary probability, descriptive statistics, data visualization, hypothesis testing, and analysis of variance, and how to apply these techniques on real-world business datasets using Python and Tableau. Emphasis will be placed on how the fundamentals of probability and statistics equip students to reason about and make decisions using business data, powered by modern data science technologies. Towards the end of the semester, students will learn applied statistical tools that are useful for handling high-dimensional data (e.g., clustering and factor analysis); and, using Python, they will be introduced to some of the challenges of handling Big Data.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: USBIS 0100; PROG: UCBA; PLAN: NOT CASBUS-UNK or BUSNB-MN

BUSQOM 0102 - BUSINESS ANALYTICS 2

Minimum Credits: 3

Maximum Credits: 3

BA II builds on the previous two courses to focus on predictive analytics. The first half of the course covers two foundational techniques: linear (for continuous variables) and logistic (for categorical variables) regression. In addition to understanding the statistical approaches and assumptions behind them, particular emphasis is placed on (i) how to select and create new independent variables (including using data visualization); and (ii) how to avoid overfitting and evaluate model performance on out-of-sample observations. In the second half of the course, students will move beyond statistical and regression analyses and be introduced to some of the most popular machine learning algorithms. Examples include Classification and Regression Trees (CART); recommendation systems, using Association Rules; Social Network Analysis; and Natural Language Processing (e.g., for Sentiment Analysis). This list of topics will be frequently updated to ensure that students are exposed to techniques that are currently valued in business environments.

Course Requirements: PREQ: BUSQOM 0101; PROG: UCBA; PLAN: NOT CASBUS-UNK or BUSNB-MN

BUSQOM 1070 - OPERATIONS MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

Provides foundations for managing operations technology manufacturing & service & discussion of operations management of conversion process. Field is centered on the fundamental problems of managers taking raw materials & transforming them efficiently/effectively into products resulting in satisfied customers. Topics: bottleneck & capacity analysis, capacity expansion; decoupling workstations-buffers versus internal & external variability; economies of scale in materials distribution; reorder point computations; distribution & logistics; & scheduling res; GT, JIT, CIM & FMS.

BUSQOM 1080 - DATA ANALYSIS FOR BUSINESS

Minimum Credits: 3

Maximum Credits: 3

The purpose of this course is to enhance the statistical and analytical skills of Pitt Business students, who have already taken the required STAT 1100 or STAT 1000 course, to the level necessary for them to deal with Data Mining and other essential material in the Business Analytics Certificate. The course should also be of interest to students exploring the analytical parts of other areas, such as marketing. The goals of the course are to: (1) cover material not currently treated in STAT 1100, but which is preparatory to Data Mining; (2) provide software skills in statistical packages used in business, such as SPSS, SAS, or R; and (3) provide experiential exposure to business applications of the material.

BUSQOM 1085 - APPLIED BUSINESS ANALYTICS PROJECT

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Letter Grade

Course Requirements: PREQ: USBIS 0105 and BUSQOM 1760

BUSQOM 1090 - APPLIED OPTIMIZATION AND SIMULATION

Minimum Credits: 3

Maximum Credits: 3

The purpose of this course is to enhance the problem-solving skills of Pitt Business students to the level necessary for them to deal with complex decision problems using optimization and simulation. Building on the foundation provided in the required BUSQOM 0050 Quantitative Methods course, the topics herein will include linear, nonlinear, integer, multiple objective and stochastic optimization. Simulation topics will include both spreadsheet simulation and process simulation. The goals of the course are to: (1) provide advanced modeling skills in optimization and simulation; (2)

provide skills in software packages used in business, such as the Analytic Solver Platform and Arena; (3) get practice on asking the right questions, on dealing with problem complexity, on critical thinking and on gleaning insights to complex problems.

BUSQOM 1715 - OPERATIONS MANAGEMENT INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 3

An independent study course for students desiring to pursue in greater depth a specific set of operations management issues or problems to which they have been introduced in other operations management courses. The course involves directed reading and research under the guidance of a full-time faculty member.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Letter Grade

BUSQOM 1720 - OPERATIONS MANAGEMENT INTERNSHIP

Minimum Credits: 1

Maximum Credits: 3

The operations management internship provides business credits for project assignments that augment a professional operations management work experience.

Academic Career: Undergraduate

Course Component: Internship

Grade Component: Satisfactory/No Credit

BUSQOM 1725 - GLOBAL SUPPLY NETWORKS AND MANUFACTURING CULTURES IN LATIN AMERICA

Minimum Credits: 3

Maximum Credits: 3

The course provides students with the fundamentals of international supply chain methods with a special focus on Latin America and Uruguay. It will feature a 2-week study visit to Uruguay where students can place their understanding of those concepts within a cultural context. The course involves significant teamwork and allows students to complete an in-depth analysis of the global supply networks and manufacturing culture in Latin America with Uruguay as a reference point.

Course Component: Independent Study

Grade Component: Satisfactory/No Credit

Course Requirements: Restricted for College of Business Administration

Course Attributes: Hourly Final

BUSQOM 1745 - SIX SIGMA THEORY AND PRACTICE

Minimum Credits: 3

Maximum Credits: 3

Six Sigma theory and practice has been designed to provide the student with: "strong theoretical knowledge of the six sigma green belt body of knowledge. Practical, hands-on, experience with the Six Sigma methodology. A Katz Six

Sigma green belt certificate, for students earning a grade of "B" or better. Six Sigma is a disciplined, data-driven approach to process improvement aimed at the near-elimination of defects from every product, process, and transaction. Lean topics will be included in this course. Six Sigma utilizes the following five-phase problem solving methodology known by the acronym DMAIC: 1. Define the projects, the goals, and the deliverables to customers (internal and external). Describe and quantify both the defect and the expected improvement. 2. Measure the current performance of the process. Validate data to make sure it is credible and set the baseline. 3. Analyze and determine the root cause(s) of the defects. Narrow the causal factors to the vital few. 4. Improve the process to eliminate defects. Optimize the vital few and their interrelationships. 5. Control the performance of the process. Lock down the gains. To integrate theory and practice, students will be grouped in teams and work under the mentorship of a Six Sigma black belt on an industry client field project.

Grade Component: Letter Grade

BUSQOM 1760 - DATA MINING

Minimum Credits: 3

Maximum Credits: 3

Data mining is the process of extracting useful information and knowledge from a set of data. Mining is typically done on data sets too large to be analyzed by hand, but the same techniques are applicable to small, complex data. This course is an introduction to the most popular methods used in managerial data mining and provides you with hands-on experience in using open-source programming language to explore real data sets. Models considered include those from statistics, machine learning, and artificial intelligence, such as logistic regression, classification and regression trees, random forests, and neural nets. The course is methods-oriented, so you will learn about when and how to use the different techniques and how to interpret their output. An overview of the theory behind each of the methods covered in class will also be conducted. A laptop computer is required.

BQOM 3025 - MARKET DESIGN

Minimum Credits: 3

Maximum Credits: 3

In this course we will examine how prices can coordinate markets. There is a deep literature on how to set prices, rooted traditionally in Economics but which has expanded across multiple fields including Operations Management, Marketing, Industrial Engineering, and Computer Science. The course will be divided into two halves. In the first half of this course, we will explore some foundational models of pricing in operations management, with an emphasis on practical and computational aspects of setting prices. In the second half of the course, we will examine some emerging research, with an emphasis on recent papers related to how changing price structures can affect market outcomes.

BQOM 3581 - SUPPLY CHAIN AND OPERATIONS MANAGEMENT RESEARCH

Minimum Credits: 1.5

Maximum Credits: 1.5

The Operations Management and the Supply Chain Management functions form the core of any organization, be it a service organization like a hospital, an insurance company or a university, or a manufacturing organization that makes automobiles, smartphones or airplanes. Even before the pandemic, the importance of supply chains was well-known, but the pandemic really brought the importance of supply chain management to the forefront. Poorly designed operations and supply chains resulted in product shortages, customer dissatisfaction, lost revenues, and higher costs. In this course, we will review research related to both operations (the processes within an organization) and supply chain management (the processes across firms). These activities enhance value for a firm by both increasing revenue and lowering costs. But, multiple markets, multiple products, interactions with other business functions, coordination across units, and uncertainty in supply and demand, ever-changing technologies, and decisions that span operational to strategic, make operations and supply chain management complex. Since operations and supply chains have an end-to-end perspective, and consider operational, tactical and strategic decisions, they span a wide gamut of topics. In this course, we focus on the following principal topics: (i) Primary goals of operations and supply chains, (ii) Interfunctional and interorganizational channel coordination/integration, (iii) Supply chain finance, (iv) Capacity and Variability, (v) Procurement and global offshoring, (vi) Sales and operations planning, (vii) Inventory management in multi-facility networks, (viii) Risk management in the supply chain, and (ix) Sustainability, and new technologies that are disrupting supply chains.

Quechua/Kichwa

QUECH 0101 - QUECHUA 1

Minimum Credits: 4

Maximum Credits: 4

The greatest part of the first term will be devoted to the presentation and practice of the basic sound patterns of the language, its fundamental sentence patterns, and sufficient vocabulary to illustrate and practice them. An introduction to the writing system will be offered together with the opportunity to acquire elementary writing and reading skills.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Global Studies, Latin American Studies

QUECH 0102 - QUECHUA 2

Minimum Credits: 4

Maximum Credits: 4

At the end of the second term of the first year of study the student should be able to produce all the significant sound patterns of the language, to recognize and use the major grammatical structures within a limited core vocabulary. The student should be able a) to engage in simple conversations with native speakers about a limited number of everyday situations and b) to read and write simple material related to the situations presented.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: LING 0441 or QUECH 0101; MIN GRADE: 'C' FOR LISTED COURSES

Course Attributes: DSAS Second Language General Ed. Requirement, Global Studies, Latin American Studies

QUECH 0103 - QUECHUA 3

Minimum Credits: 3

Maximum Credits: 3

The first term of the second year will concentrate on the further development of fluency in oral production and the improvement in the student's ability to understand the flow of speech as uttered by a native speaker. Increased attention will be paid to reading as a means of augmenting a recognition vocabulary and writing as a drill and as a means of consolidating and communicating the knowledge gained.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: LING 0442 or QUECH 0102; MIN GRADE: 'C' FOR LISTED COURSES

QUECH 0105 - QUECHUA 5

Minimum Credits: 3

Maximum Credits: 3

With around 10 million speakers, Quechua is the most commonly spoken of the indigenous languages in South America. In this class, you will learn intermediate Language skills in order to further your communication in Quechua. You will also continue to learn about Quechua culture and Andean realities, building off of two previous years of Quechua study as well as the summer Pitt in Bolivia program. In addition to focusing on Quechua language and culture, we also will dedicate substantial time to Quechua linguistics. You will participate in the structure of the class, as this is a tailored course. The main goal of this intermediate course is for you to continue to develop the skills necessary to communicate in Quechua. These skills include listening, reading, speaking, and writing. Equally important for communication, you will also deepen your understanding of the various cultural, historical, and political contexts in which Quechua is situated. We will continue our exploration of the multiple Quechua varieties. You will develop your knowledge of Quechua linguistics to complement your research plans.

QUECH 1615 - INDIGENOUS LANGUAGE AND CULTURE IN THE ANDES AND BEYOND: GLOBAL QUECHUA

Minimum Credits: 3

Maximum Credits: 3

This interdisciplinary sociolinguistic course explores the current context of Quechua language and culture, beginning in the Andes and expanding globally. While Quechua is strongly rooted in local Andean traditions and practices, the language and its speakers live, interact, and engage with the modern world. Therefore, students will learn about Quechua traditions in the Andes as well as how those both impact and are impacted by a broader global community. Students can expect to focus on topics such as language revitalization, Quechua diaspora communities, indigenous health, music fusion, and Quechua in the digital realm.

Rehabilitation Science

REHSCI 1000 - PRINCIPLES OF RESEARCH METHODOLOGY

Minimum Credits: 3
Maximum Credits: 3
The study of the nature of research and the applications of the scientific approach in the research procedures. The course focuses on concepts, design techniques and interpretations, as well as limiting factors and ethical considerations.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: (STAT 0200 or 1000) or PSY 0270; MIN GRADE: 'C-' for listed courses; PLAN: REHSCI (BS, BSH, BPH)
Course Attributes: Departmental Final

REHSCI 1200 - HUMAN ANATOMY

Minimum Credits: 3
Maximum Credits: 3
This course uses lecture and laboratory experiences to teach the anatomical structures of the human body. Content focuses on gross human anatomy with particular reference to the musculoskeletal, nervous, cardiovascular and respiratory systems. Emphasis has been laid on application of knowledge of human anatomy in diagnostics of commonly encountered diseases/injuries. Students are encouraged to use their knowledge of anatomical structures learned in class to create such clinical scenarios as a part of learning.
Academic Career: Undergraduate

REHSCI 1201 - HUMAN ANATOMY LAB

Minimum Credits: 1
Maximum Credits: 1
This course uses lecture and laboratory experiences to teach the anatomical structures of the human body. Content focuses on gross human anatomy with particular reference to the musculoskeletal, nervous, cardiovascular and

respiratory systems. Emphasis has been laid on application of knowledge of human anatomy in diagnostics of commonly encountered diseases/injuries. Students are encouraged to use their knowledge of anatomical structures learned in class to create such clinical scenarios as a part of learning.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

Course Requirements: CREQ: REHSCI 1200

REHSCI 1205 - HUMAN PHYSIOLOGY

Minimum Credits: 4

Maximum Credits: 4

This basic human physiology course covers general physiological processes, muscles, blood and lymph, body fluids, renal function, respiration, metabolism, and the nervous, gastrointestinal, cardiovascular and endocrine systems. Problem-based formats will be introduced with particular reference to those problems seen in clinical settings.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: [(BIOSC 0150 or BIOSC 0155 or 0170 or 0715) or (BIOL 0110) or (BIOENG 1070)] and [(BIOSC 0050 or 0057 or 0058 or 0070)] or (BIOENG 1070) or (BIOL 0101 or 0111)]; MIN GRADE: 'C-' for listed courses. PLAN: REHSCI-BS or AT or NS-BS, (PostBACC, NSNDMS-TR)

REHSCI 1206 - HUMAN PHYSIOLOGY LAB

Minimum Credits: 1

Maximum Credits: 1

Detailed study of the functioning, integration and interrelationships of the organ systems of the human body using lecture and lab exercises. Topics will include microscopy, cell transport, bone and joint movement, EMG, EEG, Blood, Cardiovascular including: ECG, blood pressure and heart sounds, pulmonary function, urinalysis and digestion. Must be in or previously taken RESCHI 1205 to register for this lab.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

Course Requirements: PREQ:(REHSCI 1205); MIN GRADE 'C-' for listed course; PLAN: REHSCI (BS, BSH, BPH) or Nutrition Science (NS-BS)

REHSCI 1210 - NEUROSCIENCE

Minimum Credits: 4

Maximum Credits: 4

This course studies the basic structure and function of the central and peripheral nervous system. There is an emphasis on the effects of lesions of the nervous system on human function and disability.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (REHSCI 1200 and 1205) or (BIOSC 1250 or 1070 or NROSCI 1070 or 1250 or (NUR 0013 and 0003); or HRS 1023; MIN GRADE: C- for listed courses; PLAN: REHSCI(BS; BS-H; BPH)

REHSCI 1217 - ADVANCED HEALTH ASSESSMENTS AND EXERCISE PRESCRIPTION

Minimum Credits: 3

Maximum Credits: 3

The purpose of this course is to teach students the knowledge and skills necessary for performing health assessments and designing exercise programs for a variety of populations. Students will learn how to perform health screening and how to properly assess fitness parameters such as body composition, cardiorespiratory fitness, muscular fitness, and flexibility. Students will also learn how to design and implement exercise programs for healthy individuals, as well as those with chronic health conditions or disease. The pathophysiology of the disease process will also be discussed. Potential populations of interest include active and sedentary adults, youth, older adults, pregnancy, osteoporosis, arthritis, cancer, cardiopulmonary diseases, obesity, eating disorders, and depression.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Letter Grade

Course Requirements: PREQ: REHSCI 1215; MIN GRADE C- for listed course; PLAN: REHSCI (BS, BPH, BS-H)

REHSCI 1218 - EMERGING BIOMEDICAL TECHNOLOGIES

Minimum Credits: 3

Maximum Credits: 3

The purpose of this course is to provide the students with an understanding of stem cell biology, tissue engineering, and related applications involved in rehabilitation sciences and regenerative medicine. The course material is designed to aid students considering a future as researchers in biomedical sciences laboratories or biotechnology research and development. It will provide digests of the latest research technologies and clinical applications in these fields. Students will be encouraged to synthesize concepts aimed to test solutions and therapies to improve human health by use of modern biomedical technologies. The lecture and discussion format gives students a broad background and the opportunity to apply critical thinking skills to recent published findings.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

REHSCI 1219 - EXERCISE PHYSIOLOGY WITH LABORATORY

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the effects of exercise in preventing and treating disability, in optimizing the rehabilitation process, and in maintaining the health of individuals. The course emphasizes the effects of exercise on the various body systems, including cardiovascular, neuromuscular, and musculoskeletal. This course includes a laboratory designed to provide the learner with hands-on activities related to exercise.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (REHSCI 1205) or (BIOSC 1250 or 1070) or (NROSCI 1250 or 1070) or (NUR 0013 and 0003) or HRS 1023; MIN GRADE: 'C-' for listed courses.

REHSCI 1220 - KINESIOLOGY AND BIOMECHANICS

Minimum Credits: 2

Maximum Credits: 2

Course will cover the functional anatomy and biomechanics of the major joints of the human body and the application of mechanics to describe and analyze normal and pathological human movement. Students will be analyzing muscle function and joint motions involved in an exercise or functional activity, palpating muscle groups and bony landmarks, testing the strength of a muscle group, and demonstrating exercises to stretch or strengthen various muscles.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: REHSCI 1200 and (PHYS 0101 or 0110 or 0140 or 0150 or 0174); MIN GRADE "C-" for all listed courses; CREQ: REHSCI 1221; PLAN: Rehabilitation Science (BS, BSH, BPH)

REHSCI 1221 - KINESIOLOGY AND BIOMECHANICS LAB

Minimum Credits: 1

Maximum Credits: 1

Required lab component for rehsci 1220 kinesiology and biomechanics: course will cover the functional anatomy and biomechanics of the major joints of the human body and the application of mechanics to describe and analyze normal and pathological human movement. Students will be analyzing muscle function and joint motions involved in an exercise or functional activity, palpating muscle groups and bony landmarks, testing the strength of a muscle group, and demonstrating exercises to stretch or strengthen various muscles.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: Letter Grade

Course Requirements: PREQ: REHSCI 1200 and (PHYS 0101 or 0110 or 0140 or 0150 or 0174); MIN GRADE C- for all listed courses; CREQ: REHSCI 1220 PLAN: Rehabilitation Science (BS, BSH, BPH)

REHSCI 1225 - INTRO TO REHABILITATION SCIENCE

Minimum Credits: 1

Maximum Credits: 1

This course will introduce students to the criteria on which they will be judged in the graduate school application process and topics related to professionalism. Recommended readings will prepare the student to develop basic skills for reading and interpreting research articles. Various researchers and clinicians from within the University of Pittsburgh and the University of Pittsburgh Medical Center will be invited to share their research studies and/or clinical experiences and perspectives.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: H/S/U Basis

Course Requirements: PLAN: REHSCI (BS, BSH, BPH)

REHSCI 1230 - REHABILITATION ETHICS

Minimum Credits: 2

Maximum Credits: 2

This course explores ethical issues of: human value development, decision making, basic principles of health care, the nature of rights, confidentiality and management of health care information, professional gate keeping as a function of role fidelity, autonomy and paternalism, justice and the allocation of scarce resources, withholding and withdrawing life support, euthanasia, abortion, AIDS and health care practice, genetic science, and trans-cultural health. Students will work in teams to create presentations from these various topics for their colleagues. This is a highly interactive program of instruction and requires student be actively engaged in the learning process.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: REHSCI (BS, BSH, BPH)

REHSCI 1235 - MEDICAL TERMINOLOGY

Minimum Credits: 1

Maximum Credits: 1

This course is designed to introduce students to the fundamentals of medical terminology. It includes word structure of basic medical and surgical terms and procedures, body parts and organs, body systems, selected medical specialties, and commonly used medical abbreviations and symbols. This course is a self-directed learning course, using a programmed text, with online quizzes (through Blackboard) and a final exam administered in a classroom.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Online

REHSCI 1240 - ISSUES IN HEALTH CARE

Minimum Credits: 3

Maximum Credits: 3

This course is intended as a survey of current health care issues in the United States and will focus on major trends, issues and problems facing health care professionals and policy makers. In particular, an overview of the US health care system, the role of government, its payers (public and private), health policy, regulatory and accrediting bodies, and an analysis of timely challenges and issues are discussed. Specific topics covered are intended to be representative (not all inclusive) of public and/or service delivery issues widely discussed in current literature. Class participation and assignments will focus on application of principles discussed to current and emerging issues.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: REHSCI (BS, BSH, BPH)

REHSCI 1245 - HUMAN DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

This course follows the development of individuals and highlights the role of rehab science professions from conception until the end of life. It combines theory, research, and practical applications from developmental psychology. Lecture topics include genetic influences on development; prenatal and birth factors; physical, cognitive, social, personality, and cultural variables that influence development across the life-span.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: PSY 0010 or 0101 or 0200; MIN GRADE C- for all listed courses

REHSCI 1250 - PATHOPHYSIOLOGY/HUMAN DISEASE

Minimum Credits: 4

Maximum Credits: 4

This course has been designed as an extension of Physiology, in an effort to provide pre-clinical students with a foundational scientific knowledge and conceptual understanding of pathophysiological processes. The course fundamentally focuses on general mechanisms of disease that are typically applicable to multiple body regions and/or organ systems. In addition to these general mechanisms, focus is also afforded to the pathogenesis of systemic conditions, again, due to their influence on the patient as a whole.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (REHSCI 1205) or (BIOSC 1250 or 1070) or (NROSCI 1250 or 1070) or (NUR 0013

or 0003), or (HRS 1023); MIN GRADE C- for all listed courses; PLAN: REHSCI (BS,BS-H,BPH) or Nutrition Science (NS-BS)

REHSCI 1265 - PHARMACOLOGY IN REHABILITATION

Minimum Credits: 3

Maximum Credits: 3

This course serves as a foundation to general pharmacology, and begins with lectures on the general principles affecting drug response: drug absorption, distribution, metabolism and excretion. The major drug categories will then be discussed, with an emphasis on drug classification, mechanism of action, side effects (especially those that are predictable), and significant drug interactions. At the completion of this course, the student will be able to recognize and describe the action of prototype drugs in each major drug category, compare and contrast their action with other drugs in each category, and explain the role of those drugs in the mitigation, treatment, cure or prevention of disease in humans.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (REHSCI 1205) or HRS 1023 or (BIOSC 1250 or 1070) or (NROSCI 1250 or 1070) or (NUR 0013 and 0003); MIN GRADE C- for all listed courses; PLAN: REHSCI (BS, BSH, BPH)

REHSCI 1275 - INTRO TO OCCUPATION SCIENCE

Minimum Credits: 3

Maximum Credits: 3

This course provides the foundation for understanding the role of activity and occupation in life-span human development by first considering human behavior in the absence of activity/occupation and then in the presence of activity/occupation. Consideration is given to the influence of inactivity and immobility on human systems (biologic, psychological and psychosocial) including knowledge of the disuse syndrome and the deleterious effects of living in stimulus deprived environments (such as nursing homes). The course also examines human behavior in the presence of activity/occupation including the role of movement and purposeful activity (occupation) as determinants of health.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: REHSCI (BS or BS-H or BPH)

REHSCI 1280 - PSYCH AND SOCLGY OF DISABILITY

Minimum Credits: 3

Maximum Credits: 3

Topics covered in this course include individual and societal views of persons with disabilities; both historical and current trends are discussed including disability rights legislation, independent living options, access to everyday living activities, education, employment, assistive technology, and the need for ongoing advocacy, as described by various guest speakers with disabilities.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: REHSCI (BS, BSH, BPH)

REHSCI 1285 - INTRO TO EVIDENCED-BASED REHAB

Minimum Credits: 3

Maximum Credits: 3

This course provides basic skills in reading, reviewing, and critiquing the research literature in the rehabilitation sciences. These skills will be applied to the relevant literature in diagnosis, prognosis and intervention strategies within the spectrum of rehabilitation science. Students will learn to generate relevant research questions and utilize an evidence-based medicine approach to the review, appraisal and synthesis of current research articles within the fore-mentioned areas. The course will culminate in an individual review project aimed at the development and resolution of one particular research question, using the best, current available literature. A basic understanding of research methods, design and or statistics is required.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: REHSCI 1000 or PSY 0036 or PUBHLT 0431; MIN GRADE C- for all listed courses;

PLAN: REHSCI (BS or BS-H or BPH)

REHSCI 1290 - PRACTICAL ISSUES IN DISABILITY

Minimum Credits: 3

Maximum Credits: 3

This course will review the natural progression of several age and non-age related physical disabilities such as Alzheimer's and Dementia, Parkinson's disease, CHF, COPD, DM, Spinal Cord injury, and Multiple Sclerosis (subject to change). When possible, individuals with disabilities are invited to participate in classroom discussions to share their first-hand experiences of living with a disability. This course will likely include an observational experience outside the classroom. This may include traveling to someone's home with a disability and/or their place of employment via public or a student's private mode of transportation. Additional details will be reviewed on the first day of class.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: REHSCI (BS, BPH, BPH)

REHSCI 1291 - FIELD EXPERIENCE INTERPROFESSIONAL FORUM

Minimum Credits: 1

Maximum Credits: 1

This purpose of this course is to expose students enrolled in Field Experience to the process of gathering, identifying, and presenting clinical information on a patient to their peers and faculty. Students will be introduced to the components of organizing and presenting a case study in the written and oral presentation format with input from the perspective of a faculty member representing different healthcare professions.

Academic Career: Undergraduate

Course Component: Clinical

Grade Component: H/S/U Basis

Course Requirements: School of Health and Rehabilitation Sciences students only.

REHSCI 1292 - DIVERSITY AND CULTURAL ISSUES IN HEALTH, DISABILITY AND REHABILITATION

Minimum Credits: 3

Maximum Credits: 3

This course provides a forum for exploring issues of diversity and multiculturalism as they affect both daily interactions and professional practice in health care and rehabilitation. In this course students will build a greater understanding of: personal culture; how factors of culture and diversity influence an individual's health, living needs, and response to stress; international concepts of disability and health & rehabilitation services; and globalization and its relationship to rehabilitation. In addition, students will learn how to apply concepts of cross-cultural competence and intercultural communication to clinical services and program development.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PLAN: Rehabilitation Science (BS, BSH, BPH)

REHSCI 1295 - FIELD EXPERIENCE

Minimum Credits: 1

Maximum Credits: 3

This course provides the student with an opportunity to receive credit for participating in a clinical setting, as a paid employee or as a volunteer. The student will work with the Field Experience Coordinator to make arrangements with a clinical facility and will work with a Faculty Advisor to develop a set of objectives for this experience. The student will be expected to participate a total of 45 hours per credit hour sought. Grade will be determined by Faculty Advisor based on evaluation by the clinical facility and student's internship journal, a written summary of the clinical experience, and if more than 1 credit sought, a research paper. Students are required to complete online training modules and a physical exam, including documentation of up-to-date immunizations and TB test prior to registration. Other policies may apply based on the chosen field experience site.

Academic Career: Undergraduate

Course Component: Clinical

Grade Component: H/S/U Basis

Course Requirements: PLAN: REHSCI (BS, BPH, BS-H)

REHSCI 1296 - ASSISTIVE TECHNOLOGY IN REHABILITATION FIELD EXPERIENCE

Minimum Credits: 1

Maximum Credits: 3

Designed to fulfill the assistive technology in rehabilitation certificate field experience requirement. This course provides an opportunity to interact with assistive technologies, persons who use assistive technologies and with assistive technology researchers and providers. The student will work with the Field Experience Coordinator to make arrangements with a clinical facility and will work with a Faculty Advisor to develop a set of objectives for this experience. The student will be expected to participate a total of 45 hours per credit hour sought. Grade will be determined by Faculty Advisor based on evaluation by the clinical facility and student's internship journal, a written summary of the clinical experience, and if more than 1 credit sought, a research paper. Students are required to complete online training modules and a physical exam, including documentation of up-to-date immunizations and TB test prior to registration. Other policies may apply based on the chosen field experience site.

Academic Career: Undergraduate

Course Component: Clinical

Grade Component: H/S/U Basis

Course Requirements: PLAN: Assistive Technology in Rehab (ATR-CR2)

REHSCI 1297 - CROSS-CULTURAL INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 3

Designed to provide an opportunity to fulfill the RS program global citizenship requirement through extensive cross-cultural immersion and independent study. Students will draw from previous cross-cultural experiences or will work with their independent study faculty advisor to identify an appropriate community service agency with which to volunteer. Additional academic work will help student identify the characteristics of their own culture and learn about the culture of the community in which they are working, as well as the issues affecting its members' health including understanding and treatment of disabilities. Academic credits will be assigned according to number of hours spent in the community and academic work completed.

Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: LG/SNC Elective Basis
Course Requirements: PLAN: REHSCI (BS or BS-H or BPH)

REHSCI 1298 - UNDERGRADUATE TEACHING EXPERIENCE (UTE)

Minimum Credits: 1

Maximum Credits: 3

Provides students with an opportunity to assist the instructor in teaching and managing an undergraduate Rehabilitation Science course. Example of common responsibilities include assistance with course preparation and course materials, interfacing with Canvas, and facilitating or leading class discussions. Additional details of the student's responsibilities and evaluation methods will be reviewed by the instructor of the course with which the student will be assisting.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: LG/SNC Elective Basis

Course Requirements: School of Health and Rehabilitation Sciences students only.

REHSCI 1299 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 6

Provides advanced students an opportunity to explore in depth and area of particular interest to them. It is the student's responsibility to find a faculty member willing to undertake such a tutorial.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: LG/SU3 Elective Basis

Course Requirements: PLAN: REHSCI (BS, BPH, BS-H)

REHSCI 1301 - ANATOMY & PHYSIOLOGY I WITH LABORATORY

Minimum Credits: 4

Maximum Credits: 4

This course is designed to present students with a basic foundation in normal human anatomy and physiology. Topics covered are: cell physiology, histology, integumentary, skeletal, muscular, nervous and sensory systems. Emphasis is on the interaction of structure and function and the mechanisms which maintain homeostasis in the human body. This course includes a laboratory component designed to provide students with hands-on experience related to the anatomy and physiology of the human body. Laboratory instruction emphasizes structure and how it relates to function and the maintenance of homeostasis in the whole body.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

REHSCI 1302 - ANATOMY AND PHYSIOLOGY 2 WITH LABORATORY

Minimum Credits: 4

Maximum Credits: 4

This course is designed to present students with a basic foundation in normal human anatomy and physiology. Body systems covered include: endocrine, cardiovascular, respiratory, digestive, urinary, reproductive, and embryological development. Emphasis is on the interaction of structure and function and the mechanisms which maintain homeostasis in the human body. This course includes a laboratory component designed to provide students with hands-on experience related to the anatomy and physiology of the human body. Laboratory instruction emphasizes structure and

how it relates to function and the maintenance of homeostasis in the whole body.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: REHSCI 1301

REHSCI 1320 - APPLIED ANATOMY & KINESIOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course provides an in-depth exploration of human anatomy and kinesiology with a focus on practical applications in various fields such as sports science, rehabilitation, and fitness training. Through a combination of theoretical knowledge and practical exercises, students will develop a comprehensive understanding of the structure and function of the human body, as well as its movement capabilities. By the end of the course, students will be able to analyze basic human movement patterns and be able to design effective exercise programs to improve functions and decrease risk of injury.

Academic Career: Undergraduate

Course Component: Lecture

Course Requirements: PREQ: (BIOSC 0041 and 0042) or (HHD 1011 and 1012) or (NUR 0012 and 0013) or (REHSCI 1200 and 1201) or (REHSCI 1302); MIN GRADE: 'C-' FOR LISTED COURSES

Rehabilitation Technology

RT 1101 - FUNDAMENTALS OF REHABILITATION & ASSISTIVE TECHNOLOGY APPLICATIONS

Minimum Credits: 3

Maximum Credits: 3

This course provides an introduction to the fundamental principles and practices related to multiple areas of assistive technology. This includes: wheelchair seating and mobility, adaptive sports and recreation, augmentative communication, environmental control and home automation, computer and SmartPhone access, cognitive aids, low vision and hearing loss devices, adaptive driving, vehicle modifications, transportation safety, environmental accessibility as well as prosthetics and orthotics. In addition, common terminology, disability etiquette, ethics, and the service delivery process are discussed throughout. The course also includes various hands-on labs to further learn the applications of various assistive technologies.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: SHRS STUDENTS ONLY

RT 1102 - FUNDAMENTALS OF REHABILITATION & ASSISTIVE TECHNOLOGY DESIGN

Minimum Credits: 4

Maximum Credits: 4

This course is the first course in a two-course sequence on Rehabilitation Engineering Design. RT 1102/2102 is in the Fall, and 1207/2207 is in the Spring. RT 1102/2102 covers the fundamentals of product design and development with a particular emphasis on assistive and rehabilitative technologies. The goal of this course is for students to learn both the design process and the tools necessary to develop high-quality designs.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

RT 1207 - CLIENT CENTERED REHABILITATION & ASSISTIVE TECHNOLOGY DESIGN

Minimum Credits: 3

Maximum Credits: 3

This course is the second course in a two-course sequence on Rehabilitation Engineering Design. RT 1102/2102 is in the Fall, and 1207/2207 is in the Spring. This course is a project-based design course in which students use design methods and tools learned in 1102/2102, follow an iterative design and testing process with clients and experts, and develop assistive technology device prototypes for their clients.

RELGST 0084 - MYTH IN ANCIENT WORLD/Writing PRACTICUM

Minimum Credits: 1

Maximum Credits: 1

Writing practicum for students taking RELGST 0083 as a writing course.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

RELGST 0090 - MYTH IN THE ANCIENT NEAR EAST

Minimum Credits: 3

Maximum Credits: 3

The myths of the ancient Near East are among the earliest written interpretations of the world and human existence. They are also among the most enduring, although they have only been unearthed in the last 200 years. In this course, we read myths from ancient Mesopotamia, Ugarit, and Israel. We study the myths as literary works, representative of the ideas and issues of the original cultural context in which they were shaped. These myths offer insight into the religious mentality of the ancient Near East, as well as societal and political issues. We examine themes such as the

presentation of the life of the gods, the relationship between the human and divine worlds, the issues of mortality and immortality, existence, fertility, kingship, and ethics. The primary goal of this course is to better understand these myths as they existed and developed in their ancient settings. Of course, because the myths are expressions of human thought, we may find that in studying them we also come to better understand ourselves.

RELGST 0105 - RELIGIONS OF THE WEST

Minimum Credits: 3

Maximum Credits: 3

This course is a historical introduction to the religious traditions that developed in ancient Near East and the Mediterranean. Our major emphasis is on the history of the religious traditions that emerged in late antiquity which continue to as the major monotheistic religions: Judaism, Christianity and Islam. We focus on key concepts, historical developments, and contemporary issues. Throughout the course, we also examine interactions among these religious traditions and will make use of documentary film and sacred art to illustrate. In the final segment of the course we examine the issue of secularization and the rise of the category of the non-believer, or "none." The course also serves as an introduction to the academic study of religion and provides a foundation for further coursework in Judaism, Christianity, and Islam. No prior knowledge of any of the religions studied is expected or assumed.

RELGST 0405 - WITCHES TO WALDEN POND

Minimum Credits: 3

Maximum Credits: 3

Why did the prosecution of witches become a priority for the Puritan rulers of New England? What religious ideals convinced Henry David Thoreau to lead a life 'off the grid' in Walden Pond? How did non-Protestant immigrants make their way in the new nation? And how did religious rhetoric undergird the debates over slavery that led to the civil war? These are some of the questions that we will explore in this course, which traces the religious history of the United States from the era of colonization to through the Civil War.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

RELGST 0415 - RELIGION IN MODERN AMERICA

Minimum Credits: 3

Maximum Credits: 3

The course examines the impact of religion as a moral, intellectual, and institutional force in America from 1865 to the present. Despite claims that the nation was becoming less religious, at least seven new religions were founded in the U.S. After the civil war, while millions of migrants from southern and eastern Europe brought large numbers of Catholics and Jews to challenge the dominance of protestants. We seek to understand how religions have both shaped and reflected economic, social, and cultural conditions in the united states. The course combines lecture with student discussion of religious conflicts and critical moments of cultural change, using primary sources and secondary interpreters. We also engage documentary films, slides, and local museums and historical sites. Major emphases include religious responses to intellectual, scientific, and economic change, including biblical criticism, evolutionary theory, immigration, urbanization, industrialization, Marxism, fascism, racism, and feminism. We conclude with questions about the present day: is the united states an exception for its high levels of religious behavior or is secularism on the rise?

RELGST 0417 - THE BLACK CHURCH

Minimum Credits: 3

Maximum Credits: 3

An introduction to the course and historical development of the black church in America, its contribution to the social and religious progress of black people, black leadership, and struggles including the civil rights movement, black theology and other social movements.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

RELGST 0435 - RELIGION, FILM AND LITERATURE

Minimum Credits: 3

Maximum Credits: 3

Alexis de Tocqueville famously called the United States "a nation with the soul of a church." Ironically, his observation refers to a nation whose constitution forbids the establishment of any official religious identity (while simultaneously allowing for "free," voluntary, religious "exercise"). The result--a vibrant spiritual marketplace characterized both by diversity and innovation and a clinging to traditional identities--has marked American culture and the broader stories it tells about itself. In this course we'll read closely in "secular" literary texts (including novels, graphic novels, short stories, poetry, drama, film, and music) with some attention to short, relevant readings in religious thought, practice, and history, aiming for two related objectives: 1) to observe the overt ways religions appear in and contribute to these texts--symbolically, rhetorically, schematically, etc.--and 2) to consider how presumably "secular" literature functions religiously, giving form and coherence to the ambiguities of American experiences, identities, and crises that remain in flux, constantly under revision. Readings will include both "classic" and more contemporary works by Gwendolyn Brooks, Willa Cather, Mark Twain, Flannery O'Connor, William Styron, Oscar Hijuelos, Art Spiegelman, August Wilson, James McBride, the Cohen Brothers, and/or others.

Course Attributes: DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

RELGST 0454 - RISE OF ISLAM: 500-1200 CE

Minimum Credits: 3

Maximum Credits: 3

This course seeks to impart an understanding of the Islamic tradition by exploring the religion's formative period. It integrates two intertwined themes: (1) early Islamic empires as geopolitical formations; and (2) the development of ideas - from ritual to philosophy to law. The first centuries of Islam are fascinating for many of the same reasons they are complex and even controversial: Surviving primary sources are fragmented, partisan, and often retrospective; a tremendous range of voices competed to define the new religion; and nearly all subsequent Muslim thinkers would harken back to this period to legitimize their own positions. The central goal is to develop an understanding of the diversity of voices in this early period and consider why certain conceptualizations of religion displaced others; and then follow those voices beyond the Arabian Peninsula to examine manifestations in the North African and Central Asian borderlands.

RELGST 0455 - INTRODUCTION TO ISLAMIC CIVILIZATION

Minimum Credits: 3

Maximum Credits: 3

This course aims to introduce students to Islamic and Middle Eastern History from the time of the Prophet (ca. 600 C.E.) to the Iranian Revolution in 1979. We will proceed chronologically, focusing mainly on political events. However, a special emphasis will be given to the formation of the Islamic tradition, its evolution across different regions and cultures in time, and its interaction with other traditions. In the modern era, we will particularly explore the Islamic societies' political, cultural, and military encounter with the rising power of the West in the Middle East. In addition to the several historical processes and developments such as modernization, nation-building, Islamic fundamentalism and globalization, which have shaped the history of the Middle East in the last two centuries, our class discussions will also touch on the main theoretical perspectives that have stamped the studies of Islam and the Middle East. Here, concepts such as orientalism, defensive development, and modernity will constitute our main focus.

RELGST 0500 - WHAT IS RELIGION?

Minimum Credits: 3

Maximum Credits: 3

Whether we are religious or not, religion affects us. It shapes the ways we understand our identities, our bodies, and our relationship with nature; it reinforces or undermines the hierarchies that organize our society; it is referenced by the music we listen to and the shows we watch; it saturates the rhetoric of the politicians who govern us. Public conversations on religion are often dominated by people with a particular religious or theological agenda. This course will introduce you to a different way of talking about what religion is—a way that treats it as a kind of human social activity. It provides a survey of a wide variety of theories about what religion is that you can use to understand the place of religion in our world. It also provides an introduction to methods that you can use to gather information about religion both as a part of human history and as a lived part of contemporary human culture. By learning these theories and methods, you will be better equipped to talk about the role of religion in our world in a way that is well-informed and balances critical thinking with cultural sensitivity.

Academic Career: Undergraduate

Course Component: Lecture

RELGST 0505 - RELIGION IN ASIA

Minimum Credits: 3

Maximum Credits: 3

This course serves as an introduction to the major religious traditions of South and East Asia. During the course of the semester, we encounter Hinduism and Jainism; the native Confucian, Daoist (Taoist), and popular traditions of China; and the Shinto, folk and new religions of Japan. Buddhism, which originated in India but later spread to East Asia, is examined in its relation to the history of both Chinese and Japanese religions. We approach these traditions through lectures and discussion based on Chinese classical and popular literature, secondary scholarship, and films, which inform us about cultural and historical context, beliefs, practices, and personal experience. In the process we expect to learn something about the ways in which non-Western religious traditions see themselves and their world on their own terms, and to see how/if they can complement our own worldviews.

Course Attributes: Asian Studies, DSAS Cross-Cult. Awareness General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

RELGST 0525 - RELIGION AND CULTURE IN EAST ASIA

Minimum Credits: 3

Maximum Credits: 3

Words have consequences. How a society defines "religion" and "culture" have much to say about how they balance individual freedom and collective responsibility. This course focuses on how religion has been and is practiced in East Asia in modern and contemporary times. We begin with an overview of the major religions in the region (e.g., Confucianism, Daoism, Buddhism, Shinto, folk traditions), and examine various themes to help us learn how religion influences the lives of individuals and the wider societies in which they live. Themes dealt with include the relationship

between religion and politics and law; nationalism, terrorism, and secularization; gender, sexuality, and the family; healing, the environment, and ethical behavior; and the life cycle and ritual calendar year. By looking at how these issues unfold in modern China and Japan and at their global significance enable us to better understand how religion shapes our world.

RELGST 0760 - RELIGION AND RATIONALITY

Minimum Credits: 3

Maximum Credits: 3

Does--and should--religion have a role in the secular sphere? How does culture shape religion? Is faith compatible with reason? This course critically examines how both religious and nonreligious thinkers have navigated the question of the relation between faith and reason throughout the history of Western thought. Special attention will be paid to evaluating how the relationship between religion and philosophy developed within Christianity, Judaism, and Islam. A further emphasis will be given to how the relationship between religion and philosophy shapes the our approach to myth, race, gender, and science.

RELGST 0780 - QUANTUM KARMA: SCIENCE IN HINDU AND BUDDHIST TRADITIONS

Minimum Credits: 3

Maximum Credits: 3

We have likely all encountered arguments in which sweeping claims are made about the relationship between religion and science. These claims often generalize on the basis of a limited knowledge of a few locally visible religious traditions. This course offers students an opportunity to explore the way science has interacted with some of the traditions often neglected by these debates. In particular, we will explore how the close relationship between European imperialism and scientific institutions created new parameters for conversations about Hindu and Buddhist traditions. This led intellectuals in these traditions to develop systems of thought that integrate scientific and religious ideas. These ideas played an important role in processes of decolonization, the development of religious nationalism, and the transnational spread of Hindu and Buddhist traditions.

RELGST 1100 - ISRAEL IN THE BIBLICAL AGE

Minimum Credits: 3

Maximum Credits: 3

This course explores the history and development of the people of Israel in ancient times. What do we know about the Israelites and how do we know it? Using biblical texts and archaeological remains, students will learn about everyday life in ancient Israel, the role of class and gender, life-cycle events, religious festivals, political institutions, systems of belief, and famous personages in history and lore. The trajectory of the course will begin with the Near Eastern origins of the people, continue through the rise of the Israelite and Judahite monarchies, and end with the Second Temple commonwealth of Judea in the Persian and Hellenistic periods.

RELGST 1102 - THE HISTORY OF GOD

Minimum Credits: 3

Maximum Credits: 3

God has a history. In the earliest days of that history, God was worshipped as one of a plethora of deities controlling various spheres of cosmic activity or the human world. Students in this course will learn about this ancient pantheon - how gods functioned in society and how their presence was experienced by those devoted to them. They will then trace the evolution of the God of Israel from a mountaintop deity of the southern Levant in the late second millennium BCE to a supreme deity worshiped by a small group of absolute monotheists based in Jerusalem in the mid-first millennium BCE. Students will become more sophisticated readers of biblical texts in the process. The sources of the Hebrew Bible reflect not a homogeneous monotheism, but rather a diverse set of belief systems tending toward henotheism or even polytheism. By appropriating and reinterpreting the religious myths of their neighbors, the Israelites arrived at a character of the divine that has proven problematic to many contemporary theologians, particularly on issues of LGBT rights, women's rights, and the environment.

RELGST 1112 - BIBLE AS LITERATURE 2

Minimum Credits: 3

Maximum Credits: 3

This course continues Bible as Literature, and students will examine various forms of biblical literature including prophecy, apocalyptic literature, wisdom literature, psalms and poetry, New Testament epistles, and narrative materials not covered in the earlier course. We will consider these works in terms of literary form and style, and in their origin historical and cultural contexts. We will also read non-biblical texts from the ancient world that help us to better understand the Bible as a literary work.

RELGST 1120 - ORIGINS OF CHRISTIANITY

Minimum Credits: 3

Maximum Credits: 3

This course presents a historical-critical investigation of Christian origins. Special attention is paid to varieties of 1st century Hellenistic and Palestinian Judaism within the Greco-Roman world. Primary readings include selected Biblical passages and apocrypha, 1st century historians and philosophers (Josephus, Tacitus, Suetonius, and Philo), the New Testament corpus (including Paul and the Pastorals), and selected readings from the Dead Sea Scrolls. In addition there will be assignments from various modern New Testament critics, historians, and theologians.

RELGST 1130 - VARIETIES OF EARLY CHRISTIANITY

Minimum Credits: 3

Maximum Credits: 3

This course will examine the many different and often competing forms of Christianity that existed during the first five

centuries of our common era. We will include an historical survey of Mediterranean culture and society in the historical Roman Empire to help us understand the ways in which Christianity developed in relation to the philosophical, sociological, theological, and political environment of this period. We will also focus on the contribution of the early varieties of Christianity to modern Western views of the relationship between the individual body and society. The literature of this period represents a broad variety of beliefs and practices ranging from philosophical views of god and matter (and the nature of each), to notions of life-long celibacy.

RELGST 1135 - ORTHODOX CHRISTIANITY

Minimum Credits: 3

Maximum Credits: 3

This course is designed as an overview of the history, teachings and rituals of Orthodox Christianity in its multinational context. Geographically, this context refers primarily to southeastern Europe (aka the Balkans), Russia and the coastal areas of the eastern Mediterranean. The course examines specific historical experiences of Orthodox Christians, starting with Byzantine empire, through major historical shift in the life of the Christians under Ottoman rule and, finally, to the diverse experiences of various autocephalous churches under communism. Through lectures, readings, discussions, films, and a field trip to a local Orthodox church, students will gain an insight into and broaden their awareness of the multifaceted world of Orthodox Christianity, its spiritual practices, rich artistic, musical and ritual expressions.

RELGST 1142 - THE CONSTRUCTION OF EVIL IN WESTERN RELIGIOUS TRADITIONS

Minimum Credits: 3

Maximum Credits: 3

Why is there evil in the world and who or what is responsible for it? How can we reconcile a belief in a good God with the existence of evil? Even without the theological underpinning, in secular terms, evil poses a problem about the world's intelligibility. This course undertakes a historical analysis of the various ways in which ancient and medieval minds pondered these questions and their solutions to the problem. We begin our survey with the monism of Hebrew Scriptures then move to the changes brought on by Persian culture and the Hellenization of the Mediterranean basin after the conquests of Alexander with the introduction of Dualism. Dualism is a theory or system of thought that recognizes two independent and mutually irreducible principles, which are sometimes complementary and sometimes in conflict. The course focuses on the polarities of "good" and "evil" (and the methods by which "evil" is defined), specifically highlighting the evolution of the emergence of the Devil in Judaism and Christianity and the social construction of good and evil in the Western tradition. At the same time, we consider the rationalization of "our" good against the evil of "others," or the issue of religious intolerance.

RELGST 1143 - DEATH IN THE NAME OF GOD

Minimum Credits: 3

Maximum Credits: 3

The Roman Empire understood Christianity to be an illegal and superstitious movement, and a threat to the traditions of their ancestors. Subsequently, many Christians were charged with the crime of "atheism," and put to death, as atheism was equivalent to treason. Who were these people who voluntarily embraced their own deaths as a vindication of their faith, and how did Rome justify their extinction? How were they understood by their pagan and Jewish neighbors? This course explores the cultural, political and religious context of Christian martyrs, beginning in Second Temple Judaism. We then analyze their stories (martyrologies), imperial transcripts and legislation, and examine the later (Christian) imperial legislation against "heretics." This background helps motivate discussions of contemporary "martyrs," such as "suicide bombers," the political ramifications of such behavior, who gets to decide if someone is a martyr, and reactions to the public spectacle of dying as the ultimate religious act.

RELGST 1148 - RELIGIONS OF ANCIENT EGYPT

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to ancient Egyptian religious thought and practice with its massive temples, multitude of gods and goddesses and fascinating funeral rites. We explore the mythic cycle of Creation and the Osiris cycle of betrayal, revenge, death and rebirth, as well as the place of myriad local and minor deities within Egyptian mythology. We also consider the dynamics of the "monotheistic" revolution of Akhenaton. In the historical and cultural context of ancient Egypt, students encounter the interaction of sacred and secular, and the relationship between state cults and private worship by nobles and commoners alike. A special feature of the course includes group projects to design

educational materials for the 'Egyptian Exhibit' for the Carnegie Museum. To that end, the course includes a session at the Carnegie Museum of Natural History.

RELGST 1151 - DEATH IN THE MEDITERRANEAN WORLD

Minimum Credits: 3

Maximum Credits: 3

In many cultures, people sometimes ask fundamental questions about their existence, including, "what happens after we die?" This course will focus on the evolution of beliefs and rituals related to death and the afterlife in and around the ancient Mediterranean basin, including Egyptian, Greek, Etruscan, and Roman cultures. Using an interdisciplinary approach, we will combine methodologies from anthropology, classics, history, and religious studies. Topics to be covered include myths of the afterlife, books of the dead, magic and death rituals, funeral practices and paraphernalia (disposal of the dead), cults of the dead, divinization, heaven and hell, judgment, and the impact of christianization on the ancient understanding of death.

RELGST 1160 - JERUSALEM: HISTORY AND IMAGINATION

Minimum Credits: 3

Maximum Credits: 3

The holy city of Jerusalem is at the heart of the western religious imagination and of contemporary political conflict in the middle east. Traditionally it has been a center of religious pilgrimage, home to Israelite kings and Islamic caliphs. Today it is a cutting-edge urban center marked by stunning demographic diversity, a rapidly expanding economy, and an intractable political crisis. In this course, we will examine the history of the city-from its earliest days to today-with an eye toward its religious significance in Judaism, Christianity, and Islam. Special attention will be given to Jerusalem's changing urban fabric: its architecture, neighborhoods, natural resources, economy, and religious institutions.

RELGST 1170 - ARCHAEOLOGY OF ISRAEL-PALESTINE

Minimum Credits: 3

Maximum Credits: 3

Is archaeology in a place like Israel-Palestine an objective science? In this course, we explore how past and present are linked as nation-states and religious communities utilize the archaeological record to mold identities and to forward certain narratives. Our focus will be on the major archaeological sites of Israel-Palestine, particularly in Jerusalem and its environs. We will explore the political and religious issues that have emerged from or surround their excavation. Archaeology in the Holy Land has long been driven by a desire to shed light on - or even authenticate - the Bible, while the "exotic Orient" was explored in the 19th and early 20th centuries through western expeditions and excavations that served to further colonial interests. These religious and political motivations persist even if their manifestations have shifted with time. Through site tours, museum visits, student-led discussions, talks with local experts, and even a day participating in an archaeological excavation, students will gain direct experience with the places that have aroused

controversy because of their problematic relationship to biblical and other ancient texts and/or because of their location in politically contested space.

RELGST 1171 - HEALTH AND ILLNESS IN ISRAELI SOCIETY

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to the health field from a socio-cultural perspective and provides an overview of the Israeli social determinants of health, the experience of illness, the doctor-patient relationships, and the health care system in Israel. The course aims to introduce the critical thinking of medical sociology/anthropology, which examine health and illness as a social, cultural, and political phenomena. These perspectives start with the understanding that we cannot grasp problem associate with health and illness based on the biological phenomena and medical knowledge alone. Therefore, during the course, students will learn about different social forces, including the role of the state, politics, social power relations and culture in shaping the medical field. In the course, we will focus on several main issues and concepts within Israeli society related to health and illness: health and reproduction; the intersection of health and the Jewish religion; mental health in Israel; the intersection of health with ethnicity and gender, bioethics in Israel, and more.

RELGST 1240 - JEWS AND THE CITY

Minimum Credits: 3

Maximum Credits: 3

Comedian Lenny Bruce riffed in 1963 that "If you live in New York or any other big city, you are Jewish. It doesn't matter even if you're Catholic; if you live in New York you're Jewish." In this course, we will discover why Lenny Bruce -- and so many other observers of Jewish life -- came to understand urbanity as a core component of the Jewish experience. We will begin our study of the Jewish encounter with urban life in the 19th century, as millions of Eastern European Jews migrated from the small villages of their birth to cities across the globe. This course will trace this Eastern European Jewish diaspora to urban destinations around the world, before training its lens on the Jewish encounter with American cities. We will pay close attention to how patterns of Jewish urbanization changed regionally and over time; how urbanization affected Jews' home-life, leisure time, religious practices and occupational choices; how differences in gender and class affected Jews' experiences in urban spaces; and how Jews interacted with other ethnic groups in diverse, urban environments. Delving into the history, built environment, and archival sources pertaining to the Jewish experience in Pittsburgh will provide us with a dynamic case study for this crucial relationship between Jews and the city.

RELGST 1241 - GENDER AND JEWISH HISTORY

Minimum Credits: 3

Maximum Credits: 3

How did a Jewish teenager named Henriette Herz become the belle of Berlin high society in the late 18th century? Why did 19th century Zionist thinkers like Theodor Herzl and Max Nordau think it so important to transform Jewish men into 'muscle Jews'? Why did Ray Frank, a Jewish woman from San Francisco who did not think that women should be rabbis, feel compelled to lead the first high holiday service ever held in Spokane, Washington? And how have trans* Jews challenged the conventions of contemporary Jewish life? These are some of the questions that we ask in Gender in Jewish History, a course that places gender and its effects at the center of Jewish modernity. We take an international approach to this history, traveling through Europe, the Americas, and the Middle East to show how Jews negotiated gender identity and gender roles in numerous contexts and under varying political and social circumstances. In exploring such themes as religious practice, politics, education, anti-Semitism, work, and family, we see how gender indelibly marked every aspect of Jewish life over the past two hundred years.

RELGST 1243 - JEWS AND THE BODY

Minimum Credits: 3

Maximum Credits: 3

Jews are not only the "People of the Book," but also a people whose books are deeply concerned with the body. This course examines the body as a religious site to explore key questions about humanity, holiness, gender, sexuality, identity, otherness, community, tradition, and health. We will approach religion as a human phenomenon, studying Jewish bodily practices-rituals, commandments, and cultural behaviors-through critical historical and sociological lenses. These practices reflect Judaism's diversity across time and space. We will consider both historical and contemporary Jewish experiences of the body, covering such topics as food, sexuality, reproduction, queerness, health, and death. Questions we will discuss in this course include: How do Jewish practices shape ideas of the body, and conceptions of the body shape Jewish practice? How do Jewish bodily practices engage with scientific developments? How do Jewish cultures imagine bodies that are hungry, pleased, gendered, transgendered, sexual, transgressive, differently-abled, well, sick, and mortal? All of these issues and more come into play when we shift our attention from the image of Jews as a textual community to the ways that Jews have understood and managed their embodied selves.

RELGST 1252 - HOLOCAUST HISTORY AND MEMORY

Minimum Credits: 3

Maximum Credits: 3

The holocaust - that is, the genocide of six million Jews in Nazi-occupied Europe during World War II - was a critical event of the early twentieth-century that continues to resonate today. Our historical survey will look at the holocaust primarily through the experiences of its Jewish victims, though we will discuss some of the other groups, such as the roma, disabled people, and gay men, who were also targeted and systematically murdered by the Nazis. Additionally, we will think about the perpetrators of the holocaust and the ideologies that led to the genocide, such as racism, nationalism, and antisemitism. Finally, we will move beyond the history of the holocaust to think about the ways that this event has been remembered and reconstructed by survivors, nations, institutions, museums, the arts, popular culture and the media. Looking at how institutions here in Pittsburgh commemorate the holocaust will offer us local, concrete examples of how people continue to grapple with this history.

RELGST 1258 - ISRAELI AND PALESTINIAN LITERATURE

Minimum Credits: 3

Maximum Credits: 3

Reading literature from places of conflict provides an opportunity to go beyond headlines and gain insight into the day-to-day existence, desires, imaginings, and perspectives of the people who live there. Reading literature also reveals how religious values and practices become a part of everyday culture and how those values are embraced or challenged.

This course will introduce students to the literature produced by Israeli and Palestinian authors, with a focus on how contemporary issues in Israeli and Palestinian society are depicted by writers from each culture. Topics will include: how these writers construct place; the role of religious texts in literature; conflicts and community within each society; how literature helped shape an Israeli national consciousness and a Palestinian national consciousness; how Israeli and Palestinian writers imagine the other; and the role of the Shoah in Israeli literature and the Nakba in Palestinian literature. The course will equally focus on developing students' academic and reflective writing skills. Students will produce a combination of literary analysis and self-reflective writing that uses techniques of creative nonfiction. Together, these writing assignments will help students respond to both the course texts and the cultural experience of studying in Israel-Palestine.

RELGST 1282 - CONTEMPORARY JEWISH LIFE

Minimum Credits: 3

Maximum Credits: 3

There are many concerns and issues that Jews think about and deal with in contemporary America. Some of these issues have been of long standing, but some have come into focus as a result of dramatic changes and developments in today's society. These issues can invoke real confusion, angst and/or disagreement among Jews, as well as among non-Jews so it is important to raise some of these issues and allow for wide-ranging class discussion. Our class will look at topics such as Zionism in world and American history, the founding of Israel and the relationship of American Jews to that state, antisemitism in history and on campus today, the impact of the Holocaust on Jewry both in the past and now, Jewish feminism, Intermarriage, the shape and structure of the American Jewish community, assimilation and challenges for Judaism in the digital age, and more. To enhance our conversation, we will hear from a variety of Jewish professionals and informed speakers offering their analysis and perspective on important topics. An important component of the class will be the opportunity for students to shadow professionals in charge of a variety of Jewish agencies in the community. This special opportunity will not only give students an understanding of a Jewish agency and its mission in the community, but it will also afford students the opportunity to learn about a subject and make personal contacts that might be important in shaping and furthering a career choice.

RELGST 1300 - RELIGION, THE BOOK, AND BEYOND

Minimum Credits: 3

Maximum Credits: 3

The goal of this course is for students to think about religious ideas and practices as embodied in material texts. We will be looking at the ways that religious ideas are embedded in different kinds of books—scrolls, manuscripts, printed books, ebooks, and smartphone apps. We will also be looking at the ways that religious practices are often performed or acted using texts—reading scripture ritually or silently, studying texts, chanting, or even displaying books without reading them. And these two foci will let us think about the interactive relationships between religious people and their texts and how this relationship shapes the way we understand religion. It can also serve as an introduction to studying the history of the book, using religious books as the focus. So another way to think about what we are doing is considering the relationship between "religion" and the "book." Throughout the course we will try to think about books in two related senses: in terms of books as literary works (texts) and as material objects.

RELGST 1370 - GLOBAL CHRISTIANITY

Minimum Credits: 3

Maximum Credits: 3

This course takes Christianity as a prism through which to consider the origins and growth of global religions. Christianity has tried to achieve a global status since its inception in the ancient Mediterranean world in the first century CE. Stemming from Paul's fateful decision to evangelize the Gentiles, Christianity has long sought to achieve a global network of believers, who now comprise about 20% of the world's population. We will study Christian globalization in the twentieth and twenty-first centuries and focus on two Christian traditions, Catholicism and Pentecostalism, as examples of religions that have deliberately and successfully globalized. We will ask if the contemporary values of and pluralism relativism are good for religions and religious people. And, where religion is no longer a powerful cultural force, what are the prospects for a purely humanitarian approach to common problems in a globalizing world?

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

RELGST 1372 - CATHOLICISM IN THE NEW WORLD

Minimum Credits: 3

Maximum Credits: 3

The course will examine the history of the Roman Catholic church since 1492 in the Americas using various moments of internal crisis or external conflict as focal points for study. Topics will include: missionary and military contact with New World indigenous populations after 1492; the minority situation of Catholics in the new United States; the Irish famine and its global consequences; conflicts between Catholic ethnic groups; the impact of Catholic support for fascist regimes in the 1930s and 1940s; counter cultural forms of Catholicism (conscientious objectors, civil rights activists, pacifists); Vatican ii and its impact; liberation theology, Marxism and structural reform in Latin America; shifting theological positions on social and moral issues; the current sexual abuse crisis; the pope Francis effect. While the emphasis will rest upon the social, economic, and political dimensions of Catholic history, the course will also address the aesthetic and cultural legacy of Catholicism including sacred architecture, music, and the arts, in elite and popular forms.

RELGST 1380 - RELIGION RIGHT NOW: MEDIA AND RELIGIOUS NEWS IN CONTEMPORARY AMERICA

Minimum Credits: 3

Maximum Credits: 3

It is apparent that Americans devote enormous media attention to the coverage of celebrities, movies and sports, but deal much less skillfully with news coverage of religion. Yet, a glance at any daily news source, print or digital, reveals the pervasiveness of news that involves religious beliefs, conflicts, and practices, and that requires basic knowledge of religious traditions. The purpose of this course is to develop student skills at reading and interpreting current news stories about religious topics in print and visual media (newspapers, journals, blogs, polls, and television) in order to increase understanding of important religious issues in the contemporary United States, including American coverage of international religious events and leaders. Instruction will include lecture, discussion, film, and small group exercises to report on current events.

RELGST 1402 - HEALTH AND RELIGION

Minimum Credits: 3

Maximum Credits: 3

What is health, an absence of illness or something more? What is healing, a physical process or something that is not limited to the physical? In order to answer these seemingly basic questions, a host of assumptions about the body, its ideal state, and the kinds of changes to which it can or should be subjected are often implicit. Religious attitudes toward the body and the natural world have a tremendous impact on these assumptions. In this course, you will gain a better understanding of this impact by exploring the relationships between religion and health and seeing these relationships as part of a much larger web of human concerns such as nationalism, resistance to colonization, and gender politics. In order to facilitate cross-cultural comparison and understanding, this course is not organized around geography or history, but rather around the structure human body. After two introductory weeks, each three-week unit will consider a particular aspect of human health through cases drawn from a wide variety of religious contexts. This process is aimed at decentering Western narratives about health, healing, and the body while fostering a more global perspective.

RELGST 1405 - RELIGION AND SEXUALITY

Minimum Credits: 3

Maximum Credits: 3

From Puritan attempts to control women's sexuality to contemporary debates over reproductive rights and gay marriage, religion and sexuality have played a formative role in the political and social history of the United States. Though American political ideologies have often tried to situate both sexuality and religion as private matters that have no bearing on public life, the topics we discuss in this course reveal that quite the opposite is true. We take a chronological approach to our subjects, locating the intersections between religion and sexuality throughout the course of American history. In the process, we'll discover how competing ideas regarding religion and sexuality have transformed, and continue to transform, American politics, culture, and society.

RELGST 1417 - PHILOSOPHY OF RACE AND RELIGION

Minimum Credits: 3

Maximum Credits: 3

The history of European religious thought (particularly Christianity) and the development of the idea of race are interwoven. While many devoutly religious people throughout history have, no doubt, been part of movements to oppose the horrific acts that occurred under colonization, end slavery, oppose Nazi anti-Semitism, or promote Civil Rights, for example, the very concept of separate races and the promotion of the ideal of white supremacy were in many ways innovations of European Christian theology. Indeed, religious arguments for white supremacy undergird many of the justifications for colonization and genocide, for slavery, and for Jim Crow laws and apartheid. As a result, despite important developments toward equality, racism remains ubiquitous and part of the underlying logic of the religious, political, and cultural milieu of American society, even if its effects often remain unnamed or are less explicit. This course is a philosophical exploration of the intersections of race, racism, and religious thought. It begins with an analysis of the philosophical and religious positions that solidified and promoted the idea of race, traces the entanglement of Western philosophy and Christian theology with racist political ideologies, and presents critical responses to race from African-American philosophers and liberation theologies. It ends by evaluating the continued effects of racism in American culture and religious thought and considers how we might both understand and respond to the epistemological, phenomenological, and existential effects of white supremacy in Western thought.

RELGST 1418 - FROM VODOU TO SANTERIA: RELIGIONS OF THE WEST AFRICAN DIASPORA

Minimum Credits: 3

Maximum Credits: 3

This course is an introduction to the study of West African Diaspora religions in the Americas. We define "diaspora" as the spread and dispersal of people of African descent, both forced and voluntary, through the slave trade, imperial and colonial displacements, and postcolonial migrations. In what form do African religious expressions exist in the African Diaspora communities? This course exposes students to the indigenous African foundations of the religious beliefs and religious practices of African communities living in the Diaspora. Students will receive historical, ethnographical, and anthropological approaches to grasp the essence of these non-doctrinaire and non-textual religions focused on a rich memory of African deities, rituals, morality and practices that have been passed from generation to generation. Because most of the Africans forced to migrate to the New World as slaves came from West Africa, this course will provide students with insights into the beliefs and practices of the "Yoruba Religions" also known as the "Afro-Atlantic religions" such as Santeria in Cuba; Vodou in Haiti; Shango in Trinidad and Grenada; Candomblan Brazil among others. Topics to be covered in this course will include sources of African religious beliefs, African theological notions about God and the Universe, African conceptions about the nature of the human being, witchcraft and the problem of Evil in African religious thought and practice, illness, health, death, and ancestor worship. Furthermore, we will also pay close attention to less known Afro-American cults and religions containing Amerindian mythology and shamanism that emphasize divination, healing, and spirit mediumship such as: the Maria Lionza cult in Venezuela, The Palo Monte in Cuba, and the Garifuna Dugu in Central America. A special feature of the course will include the analysis of "spirit possession" as a common denominator to African-derived religions as well as a relevant keystone in transmission

dynamics. Finally, we will examine how these religions have survived cultural and ideological assault and have continued to provide spiritual resources for societies rooted in African cosmologies.

Course Attributes: DSAS Diversity General Ed. Requirement, SCI Diversity General Ed. Requirements

RELGST 1420 - RELIGION AND RACE

Minimum Credits: 3

Maximum Credits: 3

This course examines the intersections of religion, race, and racism. Recently, scholars of religion have demonstrated that religious identities are often racialized as well. In this course, we will discover that religion and race are both modern categories rooted in post-enlightenment ideas about what it means to be human. We will see how the establishment of these religious and racial categories led to new hierarchies and inequalities. We will discuss how post-enlightenment thinkers linked religion and race, and how their ideas played a role in European imperialism. We will also investigate how the discipline of religious studies has developed its analytical tools with a racialized understanding of religion. The course will examine case studies in which religion has been racialized, and consider the political ramifications of these examples. In particular, we will think about the impact of white supremacy on Black religion in the United States, the complicated relationship between antisemitism and Islamophobia, and contemporary Islamophobia in the US. Finally, we will explore the possibilities of anti-racism through faith-based scholarship and activism.

Course Attributes: DSAS Diversity General Ed. Requirement, SCI Diversity General Ed. Requirements

RELGST 1425 - POPULAR RELIGION IN AMERICA

Minimum Credits: 3

Maximum Credits: 3

Students will examine forms of religion that are called everyday, folk, local, or popular traditions, in contrast to "official" denominational categories that so often dominate the study of religion. With our focus on the Western hemisphere, we will learn about new local practices that have emerged since 1492 among African, Caribbean, and Native American peoples and to analyze how they represented responses to colonization, industrial capitalism, or globalization. Examples of popular traditions that we will study include: witchcraft; santería, voodoo, saint's cults, miracles, pilgrimages, speaking in tongues, faith-healing and snake-handling. The course method is interdisciplinary, drawing upon anthropology, documentary film, history, religious studies, psychology, and sociology.

RELGST 1428 - RELIGION AND SPORTS

Minimum Credits: 3

Maximum Credits: 3

This course will provide an overview of research into the relationship of sports, spirituality, and religion. The approach will be cross-cultural with an eye to ancient and non-Western cultures. Informed by anthropological discourse on ritual theory and cultural performance, we will compare sports fandom to religious devotion, sporting venues to holy spaces, and athletes to revered religious figures. We will examine large sporting events such as the Olympics or the Super Bowl as ceremonial activities, rich with symbolism, rather than simply business or entertainment ventures. Seeking to

understand the sense of connectedness and deeper meaning that sports can provide, we will also learn to appreciate how athletes can draw on religious belief or ritualized behavior to enhance their performance. After getting acquainted with academic discourse on the main terms of our inquiry—religion, sports, ritual theory, and cultural performance—we will move through an assortment of case studies. They will include sports and ritual among the ancient Greeks, Romans, Mesoamericans, and Native Americans. For the modern era we will consider sporting rituals in North America and Asia. We will also learn about beliefs in divine agency in modern sports, as well as instances where sports and religion have come into conflict.

RELGST 1441 - ISLAM AND RACE IN THE AMERICAN UMMAH

Minimum Credits: 3

Maximum Credits: 3

This course examines the relationship between Islam and racial identities in the United States. The course is divided into three units. For the first third we conduct a historical overview of the history of Muslims in the United States, beginning with enslaved Muslims. We then focus on histories of migration, both in terms of immigration to the United States, and migration within the United States, including the Great Migration. In the second third of the course, we examine case studies of specific Muslim American communities. Muslims are the most racially diverse religious group in the United States today. We examine racism, racial hierarchy, and contested conceptions of race, both external and internal to Muslim American communities. In the last third of the course, we focus on pertinent themes to the stories of Muslims in America, including gender and state surveillance. Each section of the course builds upon the last. The course's focus is on Muslims in the United States, but we also examine representations of Islam and Muslims, both historically and contemporarily, and the ways that specific tropes have been utilized by the state, from Thomas Jefferson's hypothetical Muslim citizen to the War on Terror. In addition to ethnic and racial diversity we examine intra-Muslim theological diversity. A last reoccurring theme throughout the course is the role of laws in the United States in defining racial identity, and the consequences that these laws have had for Muslims. The reading responses, due on Thursday, will help students synthesize the readings and tie them to the main themes of the course. Every Thursday in class we will examine a primary source. These primary sources range from the autobiography of Omar ibn Said, an enslaved Muslim, to excerpts from the Nation of Islam's newspaper Muhammad Speaks, to news articles written during the Iran hostage crisis. No specific prerequisites are required for this course.

RELGST 1445 - MUSLIM POLITICS IN REAL TIME

Minimum Credits: 3

Maximum Credits: 3

Media representations and news stories about the 'muslim world' often project a troubling ahistorical and sensationalist narrative about a region torn by violence, fanaticism and corruption. This information literacy-driven course will teach you how to place current events in the muslim world or involving people of muslim background in their historical context. It will also teach you to discern what constitutes a valid news source and how to find sources you can trust. We'll develop the skills necessary to make sense out of a news landscape that presents conflicting accounts of the same story and that fails to cover some stories altogether. You'll leave this course with a command over how to find news, how to read news, and then how to make sense of it through rigorous historical and social scientific analysis. To that end, you'll learn how to locate and evaluate scholarly sources with the same rigor as you do news sources. You'll be provided with a number of key aspects and developments in the history of the 'muslim world', so that even if you have no prior knowledge of islamic history you will be familiar with the key terms and themes. You will be introduced to the long history of problematic media portrayals of muslims and the muslim world and efforts to both critique and change these representations. We will work intensively with a librarian to master a set of basic information literacy skills at the start of the semester that we will grow and refine as the class progresses. The remainder of the class syllabus will be determined by the current news cycle, which will generate topics to be considered for further historical analysis.

RELGST 1450 - ISLAM, LAW, AND POLITICS

Minimum Credits: 3

Maximum Credits: 3

The emergence of modern Islamic political movements worldwide has had not only a profound impact on contemporary global geo-politics but has also triggered heated debates around the question of the compatibility of Islam with liberal democracy. This class investigates the "vexed" relation between Islam and politics, profoundly influenced by the experience of colonialism, and standing in complex relationship to concepts such as the modern nation-state, democracy, liberalism, or secularism. The class will combine empirically grounded studies the multiple facets of past and contemporary Muslim politics in Muslim-majority and minority contexts with a more theoretical investigation of modern Islamic political thought; here it will examine its intellectual origins, its arguments, the challenge it poses to its liberal counterparts, but also its conundrums and contradictions.

RELGST 1452 - HYMNS & HIPHOP: SOUNDS OF ISLAM

Minimum Credits: 3

Maximum Credits: 3

From its inception, the Islamic tradition has placed a heavy emphasis on the word and on listening to the word, and has developed a rich and ambiguous relationship to sound. This course draws on theological, historical, anthropological and theoretical perspectives to investigate this relationship. We discuss various scholarly approaches to the senses, the relationship between listening and power, and the changing conceptions of what it has meant to listen in Islamic culture. In particular, we discuss how new media technologies and popular culture have transformed sound in Muslim communities, and how the ongoing "war on terror" has refashioned Islamic soundscapes.

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

RELGST 1455 - ISLAM IN EUROPE

Minimum Credits: 3

Maximum Credits: 3

Since 9/11 Europe has become increasingly anxious about its multi-racial and multi-religious populations, the result of successive waves of non-European immigrants who have, since the end of WWII, made Europe their home. At the heart of these concerns is the question whether followers of the Muslim faith can successfully be integrated into a European society that identifies culturally as Judeo-Christian and defines its social order as secular. The different public debates triggered by this anxiety center on the question of the legitimate limits of cultural difference within liberal democratic societies, thereby also reflecting a growing unpopularity of multicultural ideals. Political discourses stress the need for a robust defense of liberal values that migrant communities (especially Muslim communities) must accept. In order to achieve that, various governmental techniques have been deployed, which are now considered as an essential part of European counter-terrorist strategies, along with security policies and stricter migration controls. Interestingly, many of these government techniques involve gender and sexual politics, which are at the heart of policies and discourses around integration and multiculturalism. The course will look critically at these various developments through an interdisciplinary approach that combines anthropological studies with readings from political and social theory, feminist and queer studies in order to think about the issues at stake around Islam, religious pluralism and secular governance in Europe. As additional course material, the class will draw on a variety of audio-visual material, such as fiction films, documentaries, or youtube clips.

RELGST 1456 - ISLAM IN ASIA

Minimum Credits: 3

Maximum Credits: 3

Although Islamic traditions are generally associated with the Middle East, the vast majority of the world's Muslims live in the Asia-Pacific region. Countries such as India, Pakistan, Bangladesh, and Indonesia are home to vibrant and diverse Islamic traditions. This course introduces students to Asian Muslim communities and their histories, tracing the development of Asian Islamic traditions from their early roots in the medieval period through the age of colonialism and until the current day. Students will learn about mystical Islamic practices (Sufism), Islamic art and architecture, and the regional diversity of lived Islam. We will also examine contemporary conflicts around Islamic identity in Asia, particularly in China and Myanmar, and debates about the place of Islam in modern governments and public life. In the process, students will explore primary historical sources and contemporary studies to examine the role of gender, ethnicity, nationality, and culture in the study of diverse Muslim communities in Asia.

RELGST 1458 - WOMEN AND ISLAM IN ASIA

Minimum Credits: 3

Maximum Credits: 3

This course is a comprehensive engagement with Islamic perspectives on women with a specific focus on the debates about woman's role and status in Muslim societies. Students will learn how historical, religious, socio-economic and political factors influence the lives and experiences of Muslim women. A variety of source materials (the foundational texts of Islam, historical and ethnographic accounts, women's and gender studies scholarship) will serve as the framework for lectures. Students will be introduced to women's religious lives and a variety of women's issues as they are reported and represented in the works written by women themselves and scholars chronicling women's religious experiences. We will begin with an overview of the history and context of the emergence of Islam from a gendered perspective. We will explore differing interpretations of the core Islamic texts concerning women, and the relationship between men and women: who speaks about and for women in Islam? In the second part of the course we will discuss women's religious experiences in Asia, which will serve as a focus for our case study. Students will examine the interrelationship between women and religion with special emphasis on the ways in which the practices of religion in women's daily lives impact contemporary Asia. All readings will be in English. No prior course work is required.

RELGST 1475 - RELIGIOUS DIVERSITY

Minimum Credits: 3

Maximum Credits: 3

What is the best way to accommodate religious and cultural diversity within a nation-state and in civil society? How should individual rights to practice religion be balanced with communal needs? Should freedom from religion be protected as much or more than freedom of religion? These are pressing contemporary issues in many countries, including the United States, but issues of religious diversity and questions of whether and how to tolerate religious minorities have a long history. In this course, we will examine the toleration of minority religions in particular historical settings, and the issues and problems (both doctrinal and social/political) that societies grappled with as they confronted diverse religious landscapes. We will also use these historical precedents as a lens to examine contemporary examples of religious pluralism, diversity, and conflict. Case studies will mainly be drawn from pre-modern Europe and modern Europe and North America, but we will also look at Mughal and modern India and discuss religion in pre-modern China.

Course Attributes: Asian Studies, DSAS Geographic Region General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

RELGST 1510 - HINDU MYTHOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the religious life of India as expressed through storytelling. Central to this life are rich and diverse narrative traditions, both oral and written, some of which have their roots in the ancient Vedic literature, in the famous epics of the Mahabharata and the Ramayana, in popular folk tales and philosophical debates. Through an in-depth exploration of different genres of primarily Hindu narrative traditions, students will be able to see (1) how certain episodes and characters from the selected stories have been used in religious and philosophical teachings about spiritual emancipation and liberation; (2) how the stories and their protagonists have been variously (re)cast over time by members of dominant as well as non-dominant religious and/ or political groups; and also, (3) how they have been appropriated and incorporated in politically sensitive times and situations into a wider narrative of nation(hood). The role of popular media (TV, film, etc.) in linking nation and narration in modern times will also be examined.

RELGST 1511 - YOGA: OF LOINCLOTHS AND LULULEMON

Minimum Credits: 3

Maximum Credits: 3

Is yoga culturally appropriative? This question and others like it have produced heated debate on college campuses and beyond. It is the aim of this course to add nuance to these popular debates by exploring the politically fraught history of yoga. Under the British Empire, Hindu religious reform and physical culture intertwined, leading to the development and spread of modern postural yoga as a form of anti-imperial resistance. In the early twentieth century, Indian proponents of yoga worked as cultural ambassadors and entrepreneurs, spreading their practices to the West. In postcolonial India, yoga often shows up in clinical settings as an inexpensive and culturally familiar alternative to biomedicine, but has also served as a venue for some religious militants to assert their masculinity through physical fitness. Meanwhile, by the late twentieth century, yoga became a booming industry in the West and was marketed, especially to middle-class women, as an "exotic" lifestyle commodity at times.

RELGST 1515 - GENDER AND RELIGION IN INDIA

Minimum Credits: 3

Maximum Credits: 3

As robust debates about gender and equality take place in India today, this course seeks to provide a nuanced historical

perspective on how gender is understood and practiced in different communities in the region. This course introduces students to major debates about gender in India, exploring the intersections between gender, religion, class, caste, and nationhood in the colonial and postcolonial eras. We will enter these debates through surveying discourses of femininities and masculinities as they are elaborated in religious texts and contemporary society and politics. Students will also be introduced to the discussions about third gender and queer identities in India. Specific topics covered will include gender identities in mythology and religious practice in Hindu, Muslim, and Buddhist traditions; gender roles in family and society; transgender identity and religion; and the impacts of colonialism, globalization, and migration on gender and sexuality.

RELGST 1518 - RELIGION AND ECOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course explores various religious perspectives on the meaning and value of nature and the relationship of humans to the environment. How have different religious communities conceived of the natural world and responded to ecological crisis? How have food and farming practices been shaped by religious tradition? Special attention will be given to case studies from contemporary society, with a focus on American religious movements that take issues such as ecojustice, sustainable farming practices, and responsible consumption seriously or are defined by them. Classic religious texts, particularly of the biblical tradition, will be studied when relevant, as will archaeological and ethnographic studies.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: MCSI - Sustainability Related

RELGST 1519 - RELIGION, NATURE AND ENVIRONMENT

Minimum Credits: 3

Maximum Credits: 3

When is religion good for the environment? When is it not? In this course, students will become acquainted with how religious traditions throughout the world have addressed specific ecological problems. They will explore ways in which religious institutions are an important organizational hub in struggles for environmental justice. They will compare the structural features shared by environmentalism and religiosity, both of which are interested in making meaning of the world by appealing to an ultimate authority, such as God or Nature; and in forming identities and building communities by promoting guidelines, norms, and ritualized behaviors. The very construction of Nature as a concept, and its reverence in the context of the sustainability movement, can be informed by theoretical discourse from the field of Religious Studies. After a survey of approaches to the natural world in major religious traditions, students will focus on themes such as garden spiritualities, gendered Nature reverence, and eco-justice. They will also acquire the skills to assess the scripturally inspired indifference-or even antagonism-to environmental science, and the long shadow it has cast on the global economy.

RELGST 1520 - BUDDHISM ALONG THE SILK ROAD

Minimum Credits: 3

Maximum Credits: 3

This class serves as an introduction to Buddhism from its origins through the seventh century CE as it moved along the Silk Road, the ancient EurAsian trading network that is considered one of the earliest and most important super highways of trade and culture. Concomitantly, it serves as an introduction to the silk road as the scenario for contact and exchange. The emphasis is on religious praxis, the actors and places that transformed Buddhism and were transformed by it. We will examine archaeological remains and art and discuss how they complement or sometimes contradict textually-based historical narratives. Through the examination of four case studies we will discuss questions related to religious interaction as embodied in material culture and analyze it in context.

RELGST 1521 - ASIAN RELIGION PERSPECTIVES ON BIOETHICS

Minimum Credits: 3

Maximum Credits: 3

The preservation and enhancement of health and well-being has confronted us with ethical questions since the dawn of culture. The last fifty years, however, have seen an unprecedented development of medical sciences and biotechnology. The discipline of bioethics emerged as a response to both new ethical dilemmas, and others with a much longer history as well. While Christian theological works on issues like euthanasia and organ transplants had served as the basis for the young discipline of bioethics, Asian religions have only much more recently started to participate in the conversation. This course is an invitation to participate in history in the making as this course class introduces bioethics vis-à-vis four of the major Asian religious traditions. It presupposes no previous knowledge of bioethics and thus briefly introduces the basics before presenting the Asian counterpart. This is a comparative course whose main goal is to analyze and contextualize different religious perspectives on bioethical issues. The first part of the course discusses the development of bioethics, its principles and its historical relationship with religions in general in the "West," China and India. The second part focuses on Hindu, Buddhist, Confucian and Daoist ethical perspectives on the body, health and disease, and life and death. The third part discusses specific bioethical issues: euthanasia, abortion, organ donation and transplantation, and cognitive enhancement, from the perspective of Buddhist, Hindu, Confucian and Daoist traditions. The choice of these dominant topics obeys to the availability of sources that allows us to do a comparative analysis that would not be possible with other more recent issues. We approach these issues through lectures and discussion of academic texts, news, documentaries and films, which inform us about cultural and historical context, beliefs, practices, and personal experience. In the process we expect to learn how non-western religious traditions are responding to the challenges of controversial technologies and practices, and contributing to a more nuanced understanding of what it means to be human and enduring existential riddles like suffering and flourishing.

Grade Component: LG/SU3 Elective Basis

RELGST 1540 - SAINTS EAST AND WEST

Minimum Credits: 3

Maximum Credits: 3

A Russian monk once observed that "each saint is a unique event." Indeed, in various religious traditions we encounter men and women who are recognized and venerated as particularly holy and unique witnesses to the divine. Just as each saint is unique within his or her tradition so is each tradition of saints unique in its articulation and expression of the overall religious culture. By looking cross-culturally at the materials on saints selected for this course and discussing (problematizing) the notion of sainthood itself, we examine religious themes, ideas and symbols found in them. These diverse writings are often marked by a very personal tone, a deeply felt relation with the divine (sometimes reflecting a saint), inner struggles, sometimes his/her mystical experience of union), but also by pleas and calls for social and/or

religious reforms. Our examples of devotional literature include Hindu, Muslim, and Christian sources, medieval as well as modern. Even though originating in specific religious contexts, many of these narratives raise issues which have wider human appeal and hence relevance for us today, too.

RELGST 1545 - MYSTICISM IN ASIA

Minimum Credits: 3

Maximum Credits: 3

Mysticism, understood as a living experience of theological doctrines, constitutes an unexpected point of convergence between such different religious traditions as Hinduism and Eastern Orthodox Christianity. In this course we look into how this spiritual kinship is forged from distinct practices in India and in the traditions of eastern Christianity, by examining the selected mystical writings of both religious traditions. The course is structured around three central themes: 1) God as Mystery: negative theology (Hindu and Orthodox ways of unknowing the divine). 2) God as Person: the Hindu notion of avatar and Orthodox understanding of incarnation, and 3) God as Prayer: two selected methods of contemplation (Hindu yoga and Orthodox hesychast prayer). The course is based largely on reading and discussion of primary sources (in English translation) supplemented with selected secondary sources to help enhance students' understanding of the comparative method, on the one hand, and symbolic, often enigmatic and sometimes "upside-down" language of the mystical texts, on the other.

RELGST 1550 - EAST ASIAN BUDDHISM

Minimum Credits: 3

Maximum Credits: 3

The transmission of Buddhism to East Asia was a momentous development in the history of world cultures and religions. Not only did it precipitate major changes in the cultures of China, Korea and Japan, it also was attended by transformations within Buddhism itself. Beginning with an introduction to the basic concepts of Buddhism, this course examines the major doctrinal, meditative, devotional, and institutional traditions and themes within Chinese and Japanese Buddhism in historical perspective. Particular attention is paid to the problems of transmission of thought and practices from one culture to another and to the ways in which Buddhism changed to meet those challenges and make itself relevant to the members of East Asian societies. We strive to develop an awareness of how Chinese and Japanese Buddhism interacted with and helped to shape East Asian history as well as to cultivate sensitivity to and appreciation of East Asian Buddhism as a contribution to our understanding of the human experience.

RELGST 1552 - BUDDHIST MEDITATIVE TRADITIONS

Minimum Credits: 3

Maximum Credits: 3

Buddhist meditation is perhaps the best known of all Buddhist practices particularly in Western countries. In both Asia and the West, it has been popularized in recent times as a technique that can be used for such secular purposes as reducing stress and managing eating disorders. But what is Buddhist meditation? How it is practiced in its traditional contexts? What are the doctrinal foundations of meditation practices? What are the traditional purposes of practicing Buddhist meditation? What are the various types of meditation explained in Buddhist texts? How this practice evolved over time in different geographical regions in Asia? What are the roles of Buddhist or state institutions in shaping meditation practices? Focusing on these questions, this course examines the breath of Buddhist meditation practices and their historical evolution and transmission in Asian Buddhist countries. The course covers the role of meditation in early Indian Buddhism, the development of different types of meditation in Theravadan Buddhist countries, the emergence of the Chan school of meditation in China and its transmission to Japan (Zen), the appropriation of tantra to Buddhist practices in Tibetan Buddhism, and the modernization of Buddhist meditational practices during the colonial period. The course is taught using classical Buddhist texts and meditational manuals in translation, secondary studies, testimonials and films. In the process, we expect to enhance our familiarity with religious practices and our understanding of the human experience.

RELGST 1554 - DEATH AND BEYOND IN BUDDHIST CULTURES

Minimum Credits: 3

Maximum Credits: 3

Death and beyond in Buddhist cultures mortality is the human condition. This seminar focuses on the philosophical discourse, beliefs and practices relating to death, dying and the afterlife in Buddhist cultures, both traditionally and in modern times. We explore Buddhist cosmology, karmic causality, death tales, postmortem journeys, ancestor rites, mortuary practices and ghost placation. Through primary texts in translation, secondary scholarship, discussion and film, we see how dealing with death tells us as much about life as it does about what lies beyond.

RELGST 1558 - BUDDHISM AND PSYCHOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course is divided into four thematic parts. The first part introduces basic knowledge on Buddhism. It then shows how the encounter between Buddhism and psychology has occurred in the wider context of Buddhist modernism, which has involved attempts by Buddhist reformers, psychologists, and neuroscientists to demythologize Buddhism to show how it can be understood as complementing modern empirical science. Part two offers concrete examples of Buddhist modernism by illustrating how Buddhist contemplative practices and doctrines such as sati have been reinterpreted and reformulated in modern psychology. Part three examines how a Japanese Zen practitioner's presentation of Zen compares with psychotherapeutic perspectives on it. Finally, in part four, a Buddhist-inspired psychotherapy widely used in Japan is examined to show how the reformulation of Buddhism to achieve psychotherapeutic goals has occurred in modern times in East Asia, albeit in a way that is distinctive from Buddhist-inspired psychotherapeutic practices in the west.

RELGST 1560 - RELIGION AND HEALING IN CHINA

Minimum Credits: 3

Maximum Credits: 3

This course examines the major traditions and themes that constitute religion in China. The origins and development of Confucianism, Daoism, Buddhism, popular and family religion, and religion and the state are presented within an overall historical framework. As China becomes more and more central to the world's modern commodity culture, some have predicted a decline in traditional religious values and practices. In fact, the reverse is true: from Taiwan and Hong Kong through mainland China, increasing prosperity is resulting in an increased "investment" in religion. In addition to the study of religious ideas, practices, and institutions in premodern China, the course ends by looking at contemporary beliefs and practices and issues of politics, class, and gender. Our purpose is to gain some exposure to Chinese religious thought and practice, to identify dominant themes underlying Chinese values and behavior, and to explore the syncretic nature of religion in China as each tradition finds expression in and comes to influence other aspects of Chinese religion and culture. In this way, we hope to come to understand the critical role played by the various traditions in the unfolding of Chinese history and in the formation of the Chinese view of the world.

RELGST 1561 - CHINESE THOUGHT

Minimum Credits: 3

Maximum Credits: 3

A survey of major themes in the intellectual history of China from ancient times to the twentieth century, with special attention to the traditions of political and ethical debate. Readings include key texts from the classical canon (e.g. analects, menciuss, daodejing), medieval religious traditions (Daoism and Buddhism), and late-imperial metaphysics. The course will conclude with a survey of various attempts at inheriting and disinheriting the past intellectual tradition in the twentieth century.

RELGST 1575 - LAW AND MEDICINE IN ASIAN RELIGIONS

Minimum Credits: 3

Maximum Credits: 3

This course introduces the intersections between law, religion, and medicine in East Asia. It will start with a theoretical orientation on the interaction between law and religion. In order to engage in these discussions in a global context, we will examine the manifestation of legal orientalism in China, Buddhist jurisdiction in Sri Lanka and Burma, religious governance in Tibet, as well as clerical immunity and sanctuary in medieval Europe. Next, students will learn to analyze cases illustrating the roles law has played in regulating religious and medical practices in East Asia. The cases we will examine span a long historical period ranging from the medieval to modern and the contemporary. For medicine and medical practices, the topics we will cover range from acupuncture, the use of wild animal in traditional medicine, the commercialization and regulation of caterpillar fungus, and the social, economic, and religious implications of the circulation of generic drug. To understand how law has shaped religious practices in East Asia, we will examine the infrastructure of legal practices and their applications in dealing with religious offenders. In particular, we will discuss underground jurisdiction, the history of forensic practices, criminal procedures, capital punishment, as well as prosecution of religious practitioners in the imperial and contemporary times. By the end of this course, students are expected to become competent in critically analyzing complex issues on law, medicine, and religion in East Asia for a more balanced understanding of these issues in the global context for personal and professional growth.

RELGST 1600 - ASIAN-AMERICAN RELIGIONS

Minimum Credits: 3

Maximum Credits: 3

Asian Americans have had a substantial impact on the cultural landscape of the United States despite facing distinctive forms of marginalization. Religious institutions have served important roles for Asian American communities, providing a respite from outside prejudices, an opportunity to build community, and a platform for social and political action. Nevertheless, Asian American religious spaces can be marked by a number of tensions, including intergenerational conflict and changing gender hierarchies. Drawing primarily on ethnographic literature, this course examines these issues in contemporary South, East, and Southeast Asian American religious communities. As a culminating project, students will explore local Asian American religious communities through an ethnographic project of their own.

RELGST 1610 - MYTH, SYMBOL AND RITUAL

Minimum Credits: 3

Maximum Credits: 3

Are myths only a thing of the past, or are there contemporary 'myths' that we live by? To what extent are football

games and shopping trips "rituals"? How do plants and animals, the cosmos and the human body, or things we associate with bad luck or good health, function as symbols? This course offers a look at how myths, symbols and rituals, in their traditional and contemporary garb, constantly renew themselves as a way for different cultures to give significance to human life. By understanding these three basic forms of human expression we can gain understanding of a wide range of social and religious phenomena. We start with comparative exploration of myths on the origin of the world, humanity, and the gods, and with such rituals as rites of passage, festivals, and pilgrimages, as well as the theories of these expressions and their significance. The course then moves to observations of and reflections on the role of myth, symbol, and ritual in contemporary life, and their relation to such forms of human expression as literature, art, film and our own dreams.

RELGST 1620 - WOMEN IN RELIGION

Minimum Credits: 3

Maximum Credits: 3

An examination of the place and role of women in Western religious traditions.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Gender, Sexuality & Women's St, Global Studies

RELGST 1622 - BODY SIZE AROUND THE GLOBE

Minimum Credits: 3

Maximum Credits: 3

This course will introduce students to the complex interplay between body size, culture, religion, and social perception. We will discuss basic concepts within the critical research of body size, such as fat stigma, BMI, the 'obesity epidemic' and more, while tracing the intersections between gender ideologies, cultural contexts, medical perspectives, and religious beliefs. Our conversations will examine the following questions: How do cultures around the globe construct a 'correct' and healthy body size? How do people of various gender, racial, and sexual identities experience living in bigger bodies, and how does this change depending on national, religious, regional, and cultural contexts? Can weight loss and diets relieve stigma? How do current understandings of fat stigma and fat acceptance activist groups change the discourse? Throughout the course, students will be exposed to a variety of questions and theoretical perspectives from religious studies, fat studies, and the sociology and anthropology of body size.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SU3 Elective Basis

RELGST 1642 - CHRISTIAN-MUSLIM RELATIONS

Minimum Credits: 3

Maximum Credits: 3

This course surveys the historical interaction between Christian and Muslim communities over the past 1400 years and focuses on the art of polemic as an important tool in the human construction of religious concepts. We will begin by understanding the evolution of Islam in the seventh century, and continue with the encounters between Islam and the byzantine empire, and the medieval caliphate's encounters with the West, including the crusades. We will then consider specific elements of the interaction between Christian and Muslim communities, drawing from a variety of Muslim communities in Europe and the United States.

RELGST 1644 - CHRISTIAN MUSLIMS JEWS IN THE MIDDLE AGES: CONNECTION & CONFLICT

Minimum Credits: 3

Maximum Credits: 3

Was the world of Europe and the Middle East before the Enlightenment a period of unending religious conflict and intolerance? Were Jews the victims of severe persecution and violence everywhere during this period? Did Christians and Muslims engage in unceasing religious wars? The answer to all three of these questions is no. While the Middle Ages were a period of conflict and competition between the three major western religious groups, they were also a time of coexistence and cooperation. This class shifts from extreme dichotomies and simplistic stereotypes to deeply examine the period in all of its complexity: what were the theological, political, and legal contexts in which Christians, Muslims, and Jews interacted in both Christian Europe and the Muslim world? How did these deeply religious societies organize themselves to tolerate the religious "Other"? When and why did toleration break down and lead to expulsion, forced conversion, or violence? What kinds of cross-cultural exchanges and cooperation take place in economic, cultural, intellectual, and social life? We will also look at new ideas of toleration (and intolerance) that emerged at the end of the Middle Ages and examine aspects of inter-religious encounters and dialogues today. We will discuss not only the significance of Jewish-Christian-Muslim interactions in the Middle Ages but also assess these encounters as a case study in the broader history of religious diversity, pluralism, and conflict.

Grade Component: Letter Grade

Course Attributes: SCI Polymathic Contexts: Soc/Behav. GE. Req.

RELGST 1652 - ANTISEMITISM, RACE AND GENDER

Minimum Credits: 3

Maximum Credits: 3

This class on Antisemitism, Race and Gender investigates the similarities between gendered antisemitic representations of Jews and other forms of racism and sectarianism in Europe and America from the Middle Ages onwards. This interdisciplinary class takes a broad and deep approach to its subject matter, tracing the long history of antisemitism and racism; from obsessions with blood purity in early modern Spain and the rise of the Atlantic slave trade to scientific racism, imperialism, and social Darwinism in the nineteenth century. The class ends with a focus on the survival of racism into the twentieth- and twenty-first centuries, contemporary Islamophobia and the recent resurgence

of antisemitism in North America. The prominent role of gender in antisemitic representations of Jews, and in racist iconography more broadly, will be foregrounded throughout. The visual nature of antisemitism and racism is a major theme of this class and in-class discussions would be structured around cartoons, woodcuts, and posters that I would present to the students. As the class progresses, I encourage students to engage in their own interpretations of visual material and students are introduced to the study of history using material culture as a source material - an essential skill for anyone studying gender and race. This class does not aim to give students a complete history of antisemitism - that would almost certainly be impossible to achieve in just 15 weeks. What the class does aim to do, though, is to show how anti-Black racism, white supremacy and misogyny can and should be understood as having a shared history with antisemitism. The hatred and extremism that has come more to the fore in American life since 2016 has anti-Jewish roots. This means that the class has a western-centric focus, not because I think "the West" is more important than anywhere else, but because we all currently live in a western country and in this class we are going to trace the development of a specific and very negative strand of western culture. Sections (i) through (iii) are arranged chronologically, to give an overview of the historical roots and development of antisemitism. Having acquired this historical understanding, students will then engage, sections (iv) and (v), in two extended (and controversial!) case studies of contemporary antisemitism. Classes will be a mixture of lectures and discussions of the assigned readings.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SU3 Elective Basis

RELGST 1665 - ANTHROPOLOGY OF RELIGION

Minimum Credits: 3

Maximum Credits: 3

This course is designed to introduce students to the anthropological study of religion. While it is generally assumed that religious practice exists in nearly every human society, what 'religion' is, how it should be defined, and whether there is a basic common denominator that is universal is a matter of debate among anthropologists. We will explore different theoretical and conceptual approaches that have informed anthropological perspectives in the study of religion, while also investigating anthropological studies of ritual, sacrifice, magic, healing, and death. Furthermore, we examine how these studies have discussed the relation of religion to questions around kinship, gender and sexuality, and social justice. By covering such a range of topics, this class enables students to learn how religion is understood, experienced and expressed across divergent sociocultural contexts, in the past and in the present.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

RELGST 1680 - HISTORY AND MEMORY IN THE JEWISH TRADITION

Minimum Credits: 3

Maximum Credits: 3

Students will be introduced to the manner in which historians have studied and understood the Jewish experience from antiquity through the modern age. The role of historical study in the formation of Jewish identity will be especially highlighted.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Historical Analysis General Ed. Requirement, SCI Polymathic Contexts: Soc/Behav. GE. Req.

RELGST 1681 - INVENTING ISRAEL: ZIONISM, ANTI-ZIONISM, AND POST-ZIONISM

Minimum Credits: 3

Maximum Credits: 3

In this course, we will study the origins and development of Zionism as a form of modern Jewish nationalism, the emergence of different Zionist ideological streams, and non-Zionist, anti-Zionist, and post-Zionist views of Jews and non-Jews. We will also explore Zionism as a case study of relations of religion and nationalism in modernity. This course is an opportunity to carefully study and to contextualize writings and ideas of religious and political thinkers that have been both influential and controversial. The goal is to offer students historical background to ideas and issues of contemporary importance as well as skills in interpretation and contextualization of complex texts that continue to inform public discourse.

Academic Career: Undergraduate

RELGST 1710 - PERSPECTIVES ON RELIGION

Minimum Credits: 3

Maximum Credits: 3

A serious introduction to the study of religion is undertaken by reviewing the efforts and insights of the principal scholars in the field in the modern period.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

RELGST 1715 - FEEDING THE SOUL: FOOD, GENDER AND RELIGION

Minimum Credits: 3

Maximum Credits: 3

Food is sustenance and absolutely essential to life. But food is never simply about nutrition. Because it is fundamental to the human experience, food is also a medium for the expression of culture and social identity. Moreover, food relays complex social messages about gender, sexuality, and family. Consequently, food is also a means for expressing the social and symbolic use of power and control in which social inequalities are expressed in culinary forms. This course will examine food from the vantage point of gendered and religious systems of production, distribution, and consumption as we consider: How does your food come to your table (or not) and what are the political implications of personal tastes?

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SU3 Elective Basis

RELGST 1720 - RELIGION AND CULTURE

Minimum Credits: 3

Maximum Credits: 3

Religion is thought, felt, and acted out in social and cultural contexts. The relationship between religion and culture is the focus of the course. The objectives are to understand religion wherever and whenever found and to understand the anthropological approach in the cross-cultural study of religion. Religious belief, ritual, myth, dogma and religious specialists in industrial and non-industrial societies are compared.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: African Studies, Asian Studies, Global Studies

RELGST 1722 - HEALING, SHAMANISM, AND SPIRITUAL POSSESSION

Minimum Credits: 3

Maximum Credits: 3

Anthropological approaches to the study of religion have classically defined shamanism as a spiritual practice opposed to spirit possession. While shamanism is centered on the claims of individuals to exit their bodies and venture into other realms of consciousness and reality, spirit possession would chart the opposite movement, where other spiritual beings take over or are invited into a human host. Both of these activities however, involve fusing or blurring the normal states and boundaries of body, personhood and consciousness, in interaction with other supernatural beings. Both are also routine religious experiences and practices in many parts of the world, past and present. Notwithstanding, these phenomena have been mistakenly associated with mental disorder by sociocultural anthropologists and psychologists in the past. At this point, however, the argument that shamanism and spiritual possession are not a function of mental illness has prevailed. Today, there is no doubt that the impact of these practices in the social life of its practitioners is multiple and complex. Despite that fact, this course will focus on the therapeutic aspects of these traditions. Far from being "primitive" or purely "exotic" phenomena, we will explore how these living practices relate to great civilizations, as part of regional, national, and global ideologies of religion and culture. More precisely, we will examine the role of traditional medicine based on cross-cultural ethnographies. We will explore, for example, how indigenous groups throughout the Americas diagnose and treat folk illness and Western defined diseases with variety of methods. Culturally defined illness such as soul loss, evil eye, witchcraft and other psychosomatic afflictions will be explored through lecture, readings and films. We will examine the use of art, music and ritual as well as psychotropic plants as part of the very heart of many indigenous cultural traditions. That said, this course will also provide an opportunity to understand why these practices have been reawakened not only by modern anthropological inquiry, but also by multidisciplinary interest in states of consciousness and mechanisms of therapy, and by popular interest in alternative forms of spirituality.

Course Attributes: DSAS Cross-Cult. Awareness General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

RELGST 1725 - DEATH AND HEALTHCARE PROFESSIONS

Minimum Credits: 3

Maximum Credits: 3

The American culture of the 20th and 21st centuries has been called, not death-defying, but death-denying. It is often said that America is the only place in the world that treats death as optional. Once upon a time, we couldn't have open, public conversations about breast cancer, because the word could not be uttered aloud. In many places, it is just as hard today to have an open, public conversation about death and dying. This phenomenon is not just a social more; it affects the practice of many professions and entire segments of our economy and society. This course will explore our individual and cultural reactions to mortality, the ways in which dying in today's America is different from dying throughout history or elsewhere in the world, and the responses of a variety of professions, both within the field of healthcare and beyond, to their encounters with people in the various stages of dying. Students will be asked, at turns, to be scientific, philosophical, clinical, analytical, and emotional in encountering the concepts and material presented here. This should be a true interdisciplinary experience.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

RELGST 1726 - HEALING AND HUMANITY

Minimum Credits: 3

Maximum Credits: 3

Medical ethics courses (such as Pitt's "Morality and Medicine") focus on critical analysis of societal questions such as

abortion, euthanasia, genetic engineering, allocation of scarce resources such as organs for transplant, and the opioid crisis. There is no doubt these questions need to be addressed. However, I contend there is a "micro-ethics" of medicine thousands of individual interactions between healers (meaning any persons involved in delivering some part of a person's healthcare) and the people they care for. Their words, actions, demeanor, and the built environment in which they work can all contribute to, or detract from, the ultimate well-being and humanity of the person receiving the care. In this course, we will discuss these "micro-ethics" in detail, beginning with the religious and philosophical underpinnings of what it means to be well and what it means to be human. We will then look at how two individuals in relationship can work towards healing through listening, questioning, speaking, and communicating non-verbally. We will examine how placing those individuals in the context of a system of overlapping relationships affects their interaction. We will assess the impact of different factors about the healer, the person seeking healing, and their shared environment that detract from their relationship. Finally, we will propose and critique ways of strengthening that relationship both within the existing environment of the US healthcare system in 20 and by altering that environment.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SU3 Elective Basis

RELGST 1762 - THE GUIDE OF THE PERPLEXED

Minimum Credits: 3

Maximum Credits: 3

This course will study the guide of the perplexed by the great Jewish thinker Moses Maimonides (1138-1204). It will give special attention to the religious language and arguments for the existence of god in the text, and to Maimonides teachings on religious experience, revelation and his views on human perfection and immortality.

Course Attributes: Children's Literature, DSAS Geographic Region General Ed. Requirement, DSAS Literature General Ed. Requirement, Russian & East European Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Contexts: Humanistic GE. Req.

RUSS 0091 - READING RUSSIAN FAIRY TALES IN RUSSIAN

Minimum Credits: 1

Maximum Credits: 1

This course is a one-credit add-on module for students who are taking (or have taken) Russian fairy tales (RUSS 0090) and who would like to read selected tales and other texts in Russian.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Satisfactory/No Credit

Course Attributes: Russian & East European Studies

RUSS 0092 - HONORS RUSSIAN FAIRY TALES

Minimum Credits: 1

Maximum Credits: 1

This course is a 1-credit honors (UHC) trailer for RUSS 0090 (Russian Fairy Tales), and is designed for students who would like to supplement the survey features of the regular fairy-tale course with an honors-level research-focused experience. Students enrolled in the trailer must either be enrolled simultaneously in RUSS 0090 or have completed it in a prior semester. The trailer course meets once a week, for which students will prepare, for discussion, additional readings or analyses of Russian fairy tale texts. As a focal project for the 1-credit trailer, students will produce, by the end of the semester, a research or analytical paper about Russian fairy tales that builds on the theoretical and critical methods introduced in RUSS 0090 and explored in greater detail in the trailer course. Evaluation will be based on prepared participation in the weekly meetings and on the final paper.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ or COREQ: RUSS 0090. (Students enrolled in the honors trailer must either be enrolled simultaneously in Russ 0090 or have completed it in a prior semester.)

RUSS 0101 - ELEMENTARY RUSSIAN 1

Minimum Credits: 4

Maximum Credits: 4

This proficiency-based hybrid language course (3 face-to-face + 1 online hours) is designed for novice level students with no prior knowledge of Russian or exposure to Russian at home who would like to develop their ability to communicate in Russian in real-life situations and to understand and appreciate Russian culture with the focus on vocabulary and language fluency and accuracy. Students will be presented with various opportunities to perform uncomplicated communicative tasks in typical social situations in all three modes of communication (Interpretive, Presentational, and Interpersonal) by integrating all four skills (listening, speaking, reading, and writing) on predictable, everyday topics, such as hobbies, holidays, vacation, at the doctor's office, going shopping, at the restaurant, traveling, and many more.

Academic Career: Undergraduate

RUSS 0103 - INTERMEDIATE RUSSIAN 1

Minimum Credits: 4

Maximum Credits: 4

The continuation of Russian 0020, this course completes the introduction to basic Russian grammatical structures. The dative case, participles and gerunds, verbs of motion, and questions of verbal government are dealt with systematically. Extra-textbook material introduces the student to samples of unedited real-language texts. In developing spoken language ability, topics related to cross-cultural comparison receive prominence.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

RUSS 0104 - INTERMEDIATE RUSSIAN 2

Minimum Credits: 4

Maximum Credits: 4

This proficiency-based and project-based hybrid language course (3 face-to-face + 1 online hours) is designed to further broaden the students' knowledge of Russian language and culture. It is for lower intermediate level students who want to improve their ability to create with language on familiar topics related to their daily activities and to communicate in Russian in a variety of typical uncomplicated situations. This course will help to improve students' cultural competence, to expand their vocabulary, and improve their language fluency and accuracy. The aim of the course is to present students with opportunities to perform in a range of authentic contexts in all three modes of communication (Interpretive, Presentational, and Interpersonal) by integrating all four skills (listening, speaking, reading, and writing) on different topics, such as a city life, around the world, health, eating out and cooking, celebrating holidays, etc.

RUSS 0110 - RUSSIAN CONVERSATION PRACTICE

Minimum Credits: 1

Maximum Credits: 1

This course has an emphasis on communicative proficiency and offers first-year and second-year Russian students diverse opportunities to practice and improve their Russian listening and speaking skills. Students will enrich their vocabulary, practice and act out dialogues, participate in discussions and situations that simulate everyday Russian life, and improve their Russian pronunciation and intonation. A variety of language learning activities in the three modalities--speaking, listening, and reading--will allow students to develop skills in order to communicate meaningfully and effectively in Russian for real-life purposes.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: LG/SNC Elective Basis
Course Attributes: Russian & East European Studies

RUSS 0111 - THE SOUNDS OF RUSSIAN

Minimum Credits: 1

Maximum Credits: 1

This one-credit course is designed for learners of Russian language at any level of study who seek to improve their pronunciation and listening comprehension. Students will study the articulation and methods of transcription of the sounds (phonemes) of the Russian language. In addition to a detailed study of the consonant and vowel sounds of Russian, students will also examine other topics in phonetics such as intonation and prosody and a selection of regional pronunciation features and sounds that are undergoing change in modern Russian pronunciation. Each weekly class will cover one concrete topic in pronunciation for theoretical understanding and practical application and include guided "ear training" or listening comprehension practice focused on the features covered.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: Any course from RUSS (0101 - 0299), or RUSS (0400 - 0499), or RUSS (1400-1499), or department consent

RUSS 0210 - INTENSIVE BEGINNING RUSSIAN

Minimum Credits: 8

Maximum Credits: 8

A thorough introduction to Russian pronunciation, grammar, and syntax. A full, rigorous treatment of the sound and writing systems is followed by the basic categories of the noun and verb: gender, number, case, tense, and aspect. Nominative, accusative, prepositional, and dative case of nouns and adjectives, present and past perfective and imperfective verbs are presented. Emphasis is placed on communicative competence -- active use of new structures in reading, dialogues, free conversation, listening comprehension.

Academic Career: Undergraduate

Course Component: Workshop

Grade Component: Letter Grade

Course Attributes: DSAS Second Language General Ed. Requirement, Russian & East European Studies

RUSS 0211 - BEGINNING INTENSIVE RUSSIAN PITT/MOSCOW

Minimum Credits: 10

Maximum Credits: 10

This is a first-year Russian course, equivalent to RUSS 0010 and 0020 and RUSS 0210. Four weeks on campus and five weeks in Moscow at Moscow state linguistic university. Part of the Russian summer institute.

Academic Career: Undergraduate

Course Component: Workshop

Grade Component: Letter Grade

Course Attributes: Russian & East European Studies

RUSS 0220 - INTENSIVE INTERMEDIATE RUSSIAN

Minimum Credits: 8

Maximum Credits: 8

A rigorous presentation of the basic uses of all nominal and verbal categories: declensions of nouns and adjectives in all cases, singular and plural, deepening of the knowledge of aspect uses, verbs of motion, conditional sentences, imperatives, indefinite pronouns, comparison of adjectives, time expressions, prepositional phrases. Attention paid to

phraseology on both oral and written levels, introduction to participles and verbal adverbs. Great emphasis is placed on developing fluency in conversation.

Grade Component: Letter Grade
Course Attributes: Russian & East European Studies

RUSS 0236 - ROTC ADVANCED RUSSIAN ABROAD

Minimum Credits: 8

Maximum Credits: 8

This study abroad course at the advanced level of Russian, designed for ROTC project go scholarship recipients, develops an active vocabulary and grammar in practical, everyday topics, improves writing and speaking skills, and enriches cultural competency. Students will participate in a combination of intensive language classes, lectures, and cultural excursions.

Academic Career: Undergraduate

Course Component: Workshop

Grade Component: LG/SNC Elective Basis

RUSS 0240 - INTENSIVE FOURTH-YEAR RUSSIAN

Minimum Credits: 8

Maximum Credits: 8

This intensive course is a survey of 19th century Russian literature aimed at post-third year Russian students. The course will consist of lectures, readings, and discussions covering the major 19th century authors; also translation, grammar review and composition and conversation practice.

Academic Career: Undergraduate

Course Component: Workshop

Grade Component: Letter Grade

Course Attributes: Russian & East European Studies

RUSS 0241 - 4TH YEAR INTENSIVE RUSSIAN PITT/MOSCOW

Minimum Credits: 10

Maximum Credits: 10

This is a fourth-year Russian language course requiring an advanced knowledge of the Russian language. Four weeks on campus and five weeks in Moscow at Moscow state linguistic university. Part of the Russian summer institute.

Academic Career: Undergraduate

Course Component: Workshop

Grade Component: Letter Grade

Course Attributes: Russian & East European Studies

RUSS 0246 - ROTC 4TH YEAR RUSSIAN ABROAD

Minimum Credits: 8

Maximum Credits: 8

This study abroad course at the fourth-year level of Russian, designed for ROTC project go scholarship recipients, develops an active vocabulary and grammar in practical, everyday topics, improves writing and speaking skills at the super advanced level, and enriches cultural competency. Students will participate in a combination of intensive language classes, lectures, and cultural excursions.

Academic Career: Undergraduate

Course Component: Workshop

Grade Component: LG/SNC Elective Basis

RUSS 0250 - INTENSIVE FIFTH-YEAR PROFESSIONAL RUSSIAN

Minimum Credits: 8

Maximum Credits: 8

This is a four skills course in intensive Russian for students who have already achieved an advanced level of proficiency and seek to develop the skills required to use Russian in a professional environment. Vocabulary, syntax, and language registers suitable to journalistic, diplomatic, and business communications will be studied in depth. This course is offered as a part of the Slavic, East European and Near Eastern Summer Language Institute.

Academic Career: Undergraduate

Course Component: Workshop

Grade Component: Letter Grade

RUSS 0325 - THE RUSSIAN SHORT STORY

Minimum Credits: 3

Maximum Credits: 3

This course provides a dynamic introduction to the Russian short story tradition. We will read several nineteenth-, twentieth- and twenty-first-century masterpieces of Russian short prose by such authors as Pushkin, Gogol, Dostoevsky, Tolstoy, Chekhov, Babel, Teffi, Platonov, Shalamov, Pelevin, and Petrushevskaya, among others, with attention to their thematic and formal preoccupations, their historical contexts, and often fascinating histories of reception. All readings, discussions, and written work in English. No prior knowledge of Russian literature, history, or culture required or expected.

RUSS 0590 - THE BOOK WAS BETTER: RUSSIAN LITERATURE ON PAGE AND SCREEN

Minimum Credits: 3

Maximum Credits: 3

Is the book always better than the movie? What does it mean to make a faithful adaptation? What happens to the narrator in a film version of a novel or story? And why is it so hard to make a good movie out of some of the best novels? This course provides a dynamic introduction to some of the most influential works of Russian literature and their fascinating histories of reception and adaptation in multiple media (film, music, theatre, animation, illustration, graphic novels). All readings, discussions, and written work in English. No prior knowledge of Russian literature, history, or culture required or expected.

RUSS 0670 - CRIME AND PUNISHMENT AND HIPHOP

Minimum Credits: 3

Maximum Credits: 3

The first half of this course will introduce you to the Russian masterpiece Crime and Punishment (1866), as well as its literary, social, and philosophical contexts. We will read Fyodor Dostoevsky's novel in its entirety alongside many of the most famous critical analyses that it inspired. We will discuss Dostoevsky's depiction of a murderer's psychology in light of his conservative nationalism, his devout Christianity, his acute sense of social injustice, his sexual politics, his relationship to mental illness and medicine, and his radical narrative innovations. The second half will be devoted to the work of contemporary rap and hiphop artists. We will explore Crime and Punishment's themes as discussed in rap and hiphop lyrics. In addition to major themes, we will discuss the specific literary devices employed by each writer, and their philosophical and ethical consequences. Can rhyme, rhythm, voice, and irony represent a certain experience of time and space? Can they represent racism? Can they dismantle it?

RUSS 0770 - GIRLHOOD: NABOKOV'S LOLITA & TAYLOR SWIFT

Minimum Credits: 3

Maximum Credits: 3

What would Nabokov's most famous novel sound like from Lolita's perspective? Would it sound like a pop song? This

course aims to explore a certain mode of young femininity by juxtaposing one modernist literary masterpiece and the corpus of one contemporary pop star's career. The first half of the semester will be devoted to a close and careful reading of Vladimir Nabokov's most famous novel. We will examine the novel's representation of childhood and adolescent feminine subjectivity and objecthood against the backdrop of bourgeois American culture. We will consider the critical and ethical debates that have arisen around *Lolita*, and we will look at Stanley Kubrick's film adaptation. We will spend many class sessions focusing on Nabokov's prose at the level of the sentence, word, and syllable; and students will be asked to write several short interpretive essays ("close readings") on his language and style. The second half of the semester will be devoted to the work of contemporary American pop star Taylor Swift. Starting with her early country music and moving with her into maturity, we will trace *Lolita*'s themes of adolescence, aspiration, and American feminine experience through songs such as "You Belong With Me," "Blank Space," and "Delicate." Are some permutations of gender, generation, and class better suited to ethical representation through music and song? Does the pop music medium have an especially strong claim on the listener's senses, memory, body? Is there something specifically "feminine" about the way musical expression represents and models experience? As we attend to Taylor's verses, more pressing interpretive questions will bring our readings of Nabokov to bear on her lyrics. How should we interpret cliché? Is it possible to critically orient ourselves to a speaker or character's "relatability"? What, after all, has the image of a young woman been made to represent to us at this moment in history, and in what manner does she evade interpretation?

RUSS 0800 - ADULTERY, MURDER, OMNISCIENCE: INTRODUCTION TO 19TH C RUSSIAN LITERATURE

Minimum Credits: 3

Maximum Credits: 3

Are some people more deserving of life and happiness than others? Am I responsible for the well-being of others? Can you ever really know someone else? Celebrated works of nineteenth-century Russian literature tackle these and other, equally fundamental, questions. This course provides a dynamic introduction to some of the most influential works of Russian literature, texts that became moral, ideological, and aesthetic touchstones for all later periods of Russian

culture. We will study the works of Pushkin, Gogol, Lermontov, Turgenev, Dostoevsky, Tolstoy, and Chekhov with attention to their thematic and formal preoccupations, their historical contexts, and often fascinating histories of reception. Topics of particular interest (vary from one semester to the next and tend to) include Russia's experiment in Westernization; Russian imperialism; the status of the writer within shifting socio-political hierarchies; transgression and criminality; kinship and family; human agency in the natural world; religion; science; the fluctuating meanings of social class; individual subjectivity as an object of artistic representation; the adaptation of literary works in other media (e.g., cinema, opera).

RUSS 0810 - UTOPIA, SOCIALISM, DISSENT: INTRODUCTION TO MODERN RUSSIAN LITERATURE

Minimum Credits: 3

Maximum Credits: 3

Is there a best way to reorganize our communities? What are the consequences of revolution? What is the responsibility of writers and of common citizens under authoritarian rule? How do people respond to radical social and political change? Celebrated works of twentieth- and twenty-first-century Russian literature tackle these and other, equally fundamental, questions. This course provides a dynamic introduction to some of the most influential works of Russian literature, texts produced in the midst of the social upheaval and political transformations that defined twentieth- and twenty-first-century Russian life. We will study the works of such writers as Bely, Akhmatova, Mandelstam, Babel, Zoshchenko, Zamiatin, Platonov, Bunin, Tsvetaeva, Pasternak, Nabokov, Trifonov, Solzhenitsyn, Shalamov, Erofeev, Pelevin, Sorokin, Petrushevskaya, Tolstaya, and Alexievich with attention to their thematic and formal preoccupations, their historical contexts, and often fascinating histories of reception. We will cover the following periods: the Russian Silver Age, the Russian Revolutions, the Russian Civil War, the early Soviet period, Stalinism, World War II, the Thaw, the Stagnation era, Perestroika, the collapse of the USSR, post-Soviet culture, the Putin era. Topics of particular interest (vary from semester to semester and tend to) include utopianism in art and politics, revolutionary aesthetics, Russian emigre culture, totalitarianism, militarism, the Cold War, state socialism, human agency in the natural world, late-Soviet environmentalism, the cultural consequences of rapid political and economic reform, post-socialist postmodernity, and the literary consequences of political dissent.

RUSS 0850 - APPROPRIATING THE PAST: THE EARLY HISTORY AND CULTURES OF THE EASTERN SLAVS, 988-1825

Minimum Credits: 3

Maximum Credits: 3

Long before Vladimir Putin's false assertion that Ukraine is not a sovereign country, claims about borders and statehood in Eastern Europe have been politically fraught. By examining the history and culture of the Eastern European territories that would become Ukraine, Belarus, and Russia - from the "Christianization" of Rus' by Volodymyr in 988, up to the Decembrist Revolt of 1825 - this course will enable students to read against the grain, to recognize propaganda, and to contextualize modern events. This course will trace the history of three cities - Kyiv, Moscow, and St Petersburg - from the medieval period to the start of the nineteenth century and will closely examine the ways they have been expanded, exploited, governed, and co-opted. Topics include cultural identity (Europe v. Asia); the changing relationship between church and state; the influence of geography and climate on the region's development; power dynamics among the grand princes, the tsar, the nobility, and the people as they have changed over time. In richly developed historical context we will analyze primary sources (literary, artistic, and cinematic) and trace their adaptations and re-appropriations.

RUSS 1066 - FORBIDDEN LOVE ON PAGE AND SCREEN

Minimum Credits: 3

Maximum Credits: 3

This course examines the mythology of extramarital transgression. Our primary focus will fall on the screen adaptations of four nineteenth-century novels of adultery: The Scarlet Letter (1850), Madame Bovary (1857), Anna Karenina (1875-1877), and Effi Briest (1895). We will read and analyze graphic novels based on these literary sources. Integrated into the course will be the verbal and visual texts which will allow us to realize that the novels of adultery are on a par with their celluloid and graphic-novel (comics-format) versions constitute the multi-faceted construct resting on the adultery myth.

RUSS 1202 - DOSTOEVSKY: THE MAJOR NOVELS

Minimum Credits: 3

Maximum Credits: 3

A close contextual examination of Dostoevsky's major novels, beginning with "notes from underground": crime and punishment, the idiot, the devils, raw youth, and the brothers Karamazov. Each text will be analyzed in the context of the cultural and intellectual debates that accompanied its reception in imperial Russia and the Soviet Union. Secondary readings will include representative essays by the social critics, formalists, Marxists, and semioticians.

RUSS 1210 - MAN/SUPERMAN: REPRESENTATIONS SUPERIOR INDIVIDUALS IN LITERATURE, FILM, PHILOSOPHY, DRAMA, AND MUSIC

Minimum Credits: 3

Maximum Credits: 3

In 1866, in an apartment in St. Petersburg, Russia, Rodion Raskolnikov decides to rid the world of evil by murdering an old pawnbroker with an axe. This course examines literary, cinematic, dramatic, musical and philosophical responses to that murder, examining such questions as: what is a superior individual? What is the role of motivation in action? Must all action have an underlying motivation or is gratuitous action possible? What is the role of confession and legacy in the actions of the superman and his acts of will? What are the obligations of the superman to society.

RUSS 1307 - ANTON CHEKHOV & WORLD LITERATURE

Minimum Credits: 3

Maximum Credits: 3

The course surveys Anton Chekhov's career as a playwright, short story writer, and a medical doctor in a rigorously articulated literary, critical, and historical context. While contemplating Russian, Western, and global mythologies about the "Chekhovian" trend in literary production, the course places Chekhov's works in conversation with a range of literary and critical texts to investigate world literature as a comparative angle and a conceptual paradigm as well as to think about the aims and methods of humanistic knowledge making in the 21st century. Each time the course is offered a unique set of additional readings is drawn from a wide range of authors, including such writers as Samuel Beckett, David Bezmozgis, William Boyd, Raymond Carver, Fyodor Dostoevsky, Inua Ellams, William Faulkner, Mavis Gallant, Maksim Gorkii, Henrik Ibsen, Nikolai Leskov, Yiyun Li, Audre Lorde, Guy de Maupassant, Alice Munro, R. K. Narayan, Joyce Carol Oates, Lyudmila Petrushevskaya, Vladimir Sorokin, Lev Tolstoi, Reza de Wet, Eudora Welty, Oscar Wilde, Tennessee Williams, and Virginia Woolf, among others.

RUSS 1780 - STALINISM: HISTORY, IDEOLOGY, CULTURE

Minimum Credits: 3

Maximum Credits: 3

This course will examine Stalinism as a complex historical, ideological, and cultural phenomenon that crucially shaped Russia's destiny through the twentieth century and up to the present moment. Giving due attention to its dark sides, we will aim beyond popular stereotypes about this dramatic period (blood-thirsty tyrant; miserable and terrorized population; total propaganda; ersatz art). We will consider major issues in the historiography of Stalinism; the role and nature of ideology in Stalinist society; the doctrine of socialist realism; landmark phenomena and artefacts of Stalinist culture (both official and popular).

SLAV 0500 - CONTEMPORARY CULTURES OF EASTERN EUROPE

Minimum Credits: 3

Maximum Credits: 3

This course is an introduction to East European civilizations with a strong emphasis on contemporary cultural output in its historical contexts. You will study works of literature, film, and art ranging from folklore to classics, from popular culture to the avant-garde. You will learn how contemporary cultural works are connected to history, geography, and politics in a rapidly developing and ethnically diverse region of Europe. By the end of the course, you will have been introduced to the cultures of numerous countries in Eastern Europe (with an emphasis on Belarus, Russian Federation, and Ukraine in Eastern Europe; Poland, Slovakia, and Czechia in East-Central Europe; and Bulgaria, Macedonia, Slovenia, Bosnia and Herzegovina, Croatia, Montenegro, and Serbia in Southeastern Europe).

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

SLAV 0660 - SCI-FI: EAST AND WEST

Minimum Credits: 3

Maximum Credits: 3

This course compares Slavic and Anglophone science fiction to assess how a given culture's dominant values are articulated in a popular genre that enjoys different status in East and West. Those values emerge in works that imaginatively posit "fantastic" situations rooted in biological, spatial, and temporal explorations beyond those verified by science. On the basis of films, film clips, TV shows, stories, novellas, and novels we shall discuss such topics as utopia, progress, human perfectibility, the limits of science, and the nature of knowledge.

SLAV 0860 - CHERNOBYL MEMORY MUSEUM: CULTURAL REPRESENTATIONS OF THE NUCLEAR THREAT

Minimum Credits: 3

Maximum Credits: 3

This course will introduce students to the Chernobyl nuclear disaster, its ecological, environmental, health, social, psychological, economic, and political consequences, and its cultural representations through a range of texts, contexts, genres, and cultures. We will focus on the comparative analysis of literary, visual, and cultural texts that explore the effect of the 1986 nuclear event locally and globally. These texts include history and oral history, literature and poetry, documentary and feature films, TV series, video games, visual and virtual art, photography, music, and other media created by local cultural producers in Ukraine, Belarus, and Russia, as well as by the artists, writers, and filmmakers from Europe and North America. We will examine the historical, cinematic, literary, and popular culture interpretations of immediate and extended impact on personal, social, economic, ideological, political, and cultural structures of the human society. After students examine and analyze in detail each of the cultural texts and artistic works dedicated to the Chernobyl nuclear disaster, they will create their own artistic product to commemorate the tragedy, thus, contributing to the global Chernobyl "memory museum."

SLAV 0873 - CINEMA AFTER SOCIALISM: CONTEMPORARY FILM IN EASTERN EUROPE, CENTRAL ASIA, AND THE RUSSIAN FEDERATIO

Minimum Credits: 3

Maximum Credits: 3

The course introduces students to the diverse cinematic traditions of the regions that emerged from the collapse of the Soviet Union in 1991, including Eastern Europe, Central Asia, the Caucasus, and the Russian Federation. Screenings of key films from the era are paired with historical and theoretical readings that explore the broader context of political, economic, and cultural transformation within the post-Soviet states. In class discussions and assignments, students analyze the formal and narrative aspects of films alongside topics such as globalization, neoliberalism, imperialism, nationalism, and indigeneity, as well as national cinema, genre, and film authorship. In each iteration of the course the selection of films will be drawn from leading filmmakers of the post-Soviet generation as well as emerging contemporary talents, throughout the region broadly understood to include Eastern Europe, the Baltic, Central Asia, the Caucasus, and the Russian Federation. This course is taught in English; the films will have subtitles.

SLAV 1135 - ORTHODOX CHRISTIANITY

Minimum Credits: 3

Maximum Credits: 3

This course is designed as an overview of the history, teachings and rituals of Eastern Orthodox Christianity in its multinational context. Geographically, this context refers primarily to southeastern Europe, Russia and the coastal areas of the eastern Mediterranean, but there is also a significant Orthodox diaspora in the western hemisphere and in other parts of the world. We shall examine specific historical experience of Orthodox Christians in its Byzantine context, under Ottoman rule, in the Russian Empire, under communism, and beyond. We consider the broader context of Eastern Christianity (including Oriental Orthodoxy, the Church of the East, and Eastern Catholicism), as well as relations with Western Catholic and Protestant Christianity, and other religions and systems of belief (e.g., Judaism, Islam, atheism). Through lectures, readings, discussions, films, and a field trip to a local Orthodox church, students will gain an insight into multifaceted world of Orthodox Christianity: its spiritual practices, rich artistic, musical and ritual expressions.

SLAV 1225 - BEHIND BARS: CROSS CULTURAL REPRESENTATIONS OF PRISON IN THE 20TH CENTURY

Minimum Credits: 3

Maximum Credits: 3

This course examines cultural works produced in and about prison in the 20th century, addressing the function of art within the context of incarceration. In structure the course is composed of three parts: prison writings and criminal

culture in America, memoirs from the forced-labor camps of the soviet gulag, and narratives of holocaust concentration camps. This structure allows for a comparison of cultures-- American, Russian, and European--as well as identities-- racial, gender, and religious.

SLAV 1320 - PITTSBURGH, DIASPORA, MIGRATION: SLAVIC AND EAST EUROPEAN COMMUNITIES

Minimum Credits: 3

Maximum Credits: 3

This course provides an overview of the diverse experiences of migration to Pittsburgh from Eastern and Central Europe, extending from the early twentieth century through the current moment. An interdisciplinary selection of readings is supplemented by opportunities for extensive fieldwork in English and in a range of relevant languages throughout western Pennsylvania, as well as in Eastern and Central Europe (the latter via electronic means during the semester, and through possible study abroad in the summer). Focused both on Pittsburgh and on Eastern and Central Europe in the twentieth and twenty-first centuries, the course surveys the experiences of the following communities in and near Pittsburgh: Bosnian, Croatian, Czech, Hungarian, Jewish, Montenegrin, Polish, Russian, Serbian, Slovak, Ukrainian, among others. Students are introduced to the aims and methods of the public humanities and social sciences, learning research and technical skills in support of podcast, website, and short video production. In a future iteration the course will include additional language study through a 1-credit trailer. Students are encouraged to enroll in one of the following languages: HUN, POLISH, RUSS, SERCRO, SLOVAK, UKRAIN.

SLAV 1400 - PROTEST CULTURE AND ART IN THE POST-SOVIET SPACE

Minimum Credits: 3

Maximum Credits: 3

From mass street protests, public performances, graffiti, and social media posts to paintings, poems, literary works, songs, plays, and films, contemporary cultural producers, activists, journalists, social media personas, and civic-minded individuals have been contributing to the symbolics and the language of protest in post-Soviet countries. This course is dedicated to the study of the post-Soviet protest culture and art that have been developing over the past few decades in the Baltic States, Belarus, Central Asia, the South Caucasus, Russia, and Ukraine. In this course, we will contextualize the examples of post-Soviet protest embodied in cultural texts by comparing them to one another and placing them into the broader socio-historical context of cultural resistance and dissident cultural practices before the collapse of the Soviet Union and since the early 1990s through the 2020s. It offers students a comprehensive examination of socio-political, economic, cultural, and ideological transformations of the post-Soviet regions over the past few decades through the analysis of public reactions and cultural responses to various internal and external changes, including intensified state control, various types of discrimination and injustices, increased censorship, corporate corruptions, and harmful environmental impact on the eco-system of these countries. We will examine how protest strategies are shaped and influenced by gender, class, ethnic, religious and other specificities of the regions in which they are created and practiced. We will analyze diverse and multifaceted examples of protest culture from different parts of the post-Soviet space in a span of several decades with the focus on the recent examples (10-15 years) in order to develop a better understanding of these geo-cultural regions and their role in the global political culture.

SLAV 1850 - UNDERSTANDING THE BALKANS: INTRODUCTION TO BALKAN CULTURE AND LITERATURE

Minimum Credits: 3

Maximum Credits: 3

Introduction to Balkan Culture and Literature course will be offered for the first time alongside the current Slavic department offerings and it comes at a very exciting moment of approving a minor in Bosnian/Croatian/Serbian. This course is an introduction to the Slavic countries of the Balkans (Bosnia and Hercegovina, Bulgaria, Croatia, Montenegro, North Macedonia, Serbia, Slovenia), focusing on the period from the 14th century up to the modern days. Students will study Balkan culture, literature and film (classic and modern), and through these and other readings learn about Balkan history, politics, literature and culture. In addition, they will come to appreciate the cultural nuances in the Balkans and gain an understanding of the various regional subjectivities and points of view. Through this course, students will learn -to understand the term "Balkan" as both a construct and a geographical region -to become familiar with major authors of the region and their works -to gain a basic understanding of the cultural specificity of Balkan countries -to develop an appreciation for the literature and film of the region -to engage in productive dialogue and writing about cultural texts This class will appeal not only to the major and minors in Slavic but also to students from all areas of the Dietrich School of Arts and Sciences with an emphasis on those who are interested in pursuing certificates in the Russian and East European Studies, European Studies and Global Studies. Since this course is taught in English, students may learn about the region in a manner that best suits their interests and capabilities.

Minimum Credits: 1

Maximum Credits: 4

This course offers students of Pitt's Slavic, East European, and Near Eastern Summer Language Institute the opportunity to apply the language skills acquired through study at SLI to work and research at site specializing in the SLI regions and languages.

Academic Career: Undergraduate

Course Component: Internship

Grade Component: Satisfactory/No Credit

Slovak

SLOVAK 0010 - ELEMENTARY SLOVAK 1

Minimum Credits: 3

Maximum Credits: 3

This four-skills language course introduces the student to the fundamentals of Slovak pronunciation and speaking, reading, writing and listening, with emphasis on practical conversation. The present tense of verbs, the plural of nouns, and the gradation of adjectives and adverbs is covered.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Russian & East European Studies

SLOVAK 0020 - ELEMENTARY SLOVAK 2

Minimum Credits: 3

Maximum Credits: 3

A continuation of Slovak 0010, this course extends the grammatical coverage to include verbal aspects, numeral expressions, and the locative, dative, and genitive cases. Emphasis continues to be on developing spoken language competence.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Second Language General Ed. Requirement, Russian & East European Studies

SLOVAK 0030 - INTERMEDIATE SLOVAK 3

Minimum Credits: 3

Maximum Credits: 3

The continuation of Slovak 0020, this course focuses more on written Slovak and developing listening comprehension than in the first-year course. Attention is paid to developing a good control of basic idioms, and to the formation of participles.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Russian & East European Studies

SLOVAK 0040 - INTERMEDIATE SLOVAK 4

Minimum Credits: 3

Maximum Credits: 3

The continuation of Slovak 0030, this course attempts to round out the student's basic oral competence in relation to specific matters of Slovak culture and reality. For many students, this course is preparatory to summer study in Slovakia.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Russian & East European Studies

SLOVAK 0210 - INTENSIVE BEGINNING SLOVAK

Minimum Credits: 6

Maximum Credits: 6

This is a four-skills intensive course in beginning Slovak language which is to be offered as part of the summer intensive workshops in Slavic languages.

Academic Career: Undergraduate

Course Component: Workshop

Grade Component: Letter Grade

Course Attributes: DSAS Second Language General Ed. Requirement, Russian & East European Studies, West European Studies

SLOVAK 0211 - BEGINNING INTENSIVE SLOVAK PITT/SLOVAKIA

Minimum Credits: 10

Maximum Credits: 10

This is an intensive course in intermediate intensive Slovak which meets for six weeks during summer term in Pittsburgh, followed by four weeks of study in Slovakia. It is part of the Russian and East European summer language institute.

Academic Career: Undergraduate

Course Component: Workshop

Grade Component: Letter Grade

Course Attributes: Russian & East European Studies

SLOVAK 0220 - INTENSIVE INTERMEDIATE SLOVAK

Minimum Credits: 6

Maximum Credits: 6

This is a four skills intensive course in intermediate Slovak which is offered as part of the summer intensive workshops in Slavic languages.

Academic Career: Undergraduate
Course Component: Workshop
Grade Component: Letter Grade
Course Attributes: Russian & East European Studies, West European Studies

SLOVAK 0221 - INTERMEDIATE INTENSIVE SLOVAK PITT/SLOVAKIA

Minimum Credits: 10
Maximum Credits: 10

This is an intensive course in intermediate intensive Slovak which meets for six weeks during summer term in Pittsburgh, followed by four weeks of study in Slovakia. It is part of the Russian and East European summer language institute.

Academic Career: Undergraduate
Course Component: Workshop
Grade Component: Letter Grade
Course Attributes: Russian & East European Studies

SLOVAK 0222 - INTERMEDIATE INTENSIVE SLOVAK IN SLOVAKIA

Minimum Credits: 4
Maximum Credits: 4

This is a four week course in intermediate intensive Slovak conducted in Slovakia which follows the six-week Pittsburgh intensive course. Students must complete the prior course or have had at least three semesters of Slovak language, or a prior intermediate-level knowledge of the language to register for this component.

Academic Career: Undergraduate
Course Component: Workshop
Grade Component: LG/SNC Elective Basis
Course Attributes: Russian & East European Studies

SLOVAK 0230 - ADVANCED INTENSIVE SLOVAK

Minimum Credits: 6
Maximum Credits: 6

This is a four-skills intensive course in advanced Slovak which is offered as part of a summer intensive workshop in Slavic languages.

Academic Career: Undergraduate
Course Component: Workshop
Grade Component: Letter Grade
Course Attributes: Russian & East European Studies

SLOVAK 0231 - ADVANCED INTENSIVE SLOVAK PITT/SLOVAKIA

Minimum Credits: 10
Maximum Credits: 10

This is an intensive course in advanced intensive Slovak which meets for six weeks during summer term in Pittsburgh, followed by four weeks of study in Slovakia. It is part of the Slavic, East European, and Near Eastern Summer Language Institute.

Academic Career: Undergraduate
Course Component: Workshop
Grade Component: Letter Grade

SLOVAK 0232 - ADVANCED INTENSIVE SLOVAK/BRATISLAVA

Minimum Credits: 6

Maximum Credits: 6

This is an intensive course in advanced intensive Slovak language which meets for six weeks during summer term in Bratislava, Slovak republic. 140 Contact hours. It is part of the Russian and East European summer language institute.

Academic Career: Undergraduate

Course Component: Workshop

Grade Component: LG/SNC Elective Basis

SLOVAK 0234 - ADVANCED INTENSIVE SLOVAK IN SLOVAKIA

Minimum Credits: 4

Maximum Credits: 4

This is an intensive course in advanced intensive Slovak language which meets for four weeks during summer term in Bratislava, Slovak Republic. It is part of the Slavic, East European, and Near Eastern Summer Languages Institute.

Academic Career: Undergraduate

Course Component: Workshop

Grade Component: Letter Grade

SLOVAK 0240 - FOURTH YEAR INTENSIVE SLOVAK

Minimum Credits: 6

Maximum Credits: 6

This is a four-skills intensive course in 4th-year Slovak which is offered as part of the Summer Language Institute's intensive language workshop.

Academic Career: Undergraduate

Course Component: Workshop

Grade Component: Letter Grade

SLOVAK 0380 - SLOVAK TRANSATLANTIC CULTURES

Minimum Credits: 3

Maximum Credits: 3

Slovak European history and the interaction of Slovak and American cultures during the 120-year history of Slovak immigration is conveyed through readings in Slovak and Slovak-American literature, and through issues in literary theory that concern this theme. The course is structured around the history of Slovak, and in a broader cultural sense central European, immigration to the United States with a special focus on Pittsburgh. The students are encouraged to investigate Pittsburgh's rich ethnic heritage and to research and write on topics tailored to their individual interests.

Academic Career: Undergraduate

Course Component: Lecture

SLOVAK 0400 - ADVANCED SLOVAK 5

Minimum Credits: 3

Maximum Credits: 3

This course extends grammatical and conversational skills of those with an intermediate knowledge of Slovak. The course also covers aspects of Slovak culture and makes extensive use of contemporary texts from Slovakia. The students also learn elementary translation skills. Emphasis is put on fluency in conversation and on comprehension of unedited original reading material from newspapers and magazines.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Russian & East European Studies

SLOVAK 0410 - ADVANCED SLOVAK 6

Minimum Credits: 3

Maximum Credits: 3

This course continues in developing skills learned in Advanced Slovak 5. It extends the range of conversational topics and teaches more complex grammatical structures. It builds elementary skills needed to write brief essays in Slovak. The course also expands the students' translation skills and reading and listening comprehension.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Russian & East European Studies

SLOVAK 0890 - SLOVAK, CZECH, AND CENTRAL EUROPEAN FILM

Minimum Credits: 3

Maximum Credits: 3

The course presents central European filmmaking in its cultural context, and central European (Czech, Slovak, Hungarian, etc.) Culture through film. The students learn to discuss them in their cultural context against the panorama of life in central Europe, as well as from the American perspective. The focus is both on film aesthetics, and on the social implications of the content of the films, which was considered crucial by central European directors, screenwriters, and audiences.

Course Attributes: Russian & East European Studies

SLOVAK 1901 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 3

This course allows students to work independently on individually designed projects.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: LG/SNC Elective Basis

Course Attributes: Russian & East European Studies

Social Work

SOCWRK 1000 - INTRODUCTION TO SOCIAL WORK

Minimum Credits: 3

Maximum Credits: 3

Explores social work in terms of what the profession seeks (its goals); what it does to achieve those goals (its direct practice methods); which principles are to be reflected in all professional social work activity (its values and ethics); how the profession evolved (its history); which social issues are of particular concern to social workers (its special mission re: poverty, racism, sexism, among others); what types of agencies/services involve professional social workers (its fields of practice); and how effective is professional social work (its evaluative systems). This is a service learning course and requires 45 hours of volunteer service as part of the course.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Attributes: Civic Learning + Engagement, SCI Diversity General Ed. Requirements

SOCWRK 1001 - INTRODUCTION TO SOCIAL WORK IN CIVIC ENGAGEMENT

Minimum Credits: 1

Maximum Credits: 3

Explores social work in terms of what the profession seeks (its goals); what it does to achieve those goals (its direct practice methods); which principles are to be reflected in all professional social work activity (its values and ethics); how the profession evolved (its history); which social issues are of particular concern to social workers (its special mission re: poverty, racism, sexism, among others); what types of agencies/services involve professional social workers (its fields of practice); and how effective is professional social work (its evaluative systems). This is a service learning course and requires 45 hours of volunteer service as part of the course. This course is required for only students participating in the Upperclass Service to Others Living Learning Community (LLC).

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SNC Elective Basis

SOCWRK 1005 - FOUNDATIONS OF THE WELFARE STATE

Minimum Credits: 3

Maximum Credits: 3

The objective of this course is to examine the nature and structure of social welfare services and institutions; historical and cultural foundations of how societies have provided welfare services for people; current issues in the provision of services.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade
Course Attributes: Urban Studies

SOCWRK 1006 - POLICY ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

Engages students in analyses of the nature and impact of economic/political/social ideologies and forces which shaped the development of American social welfare policies and services from 1935 to present, including policies/services related to personal and social services, health and mental health, income redistribution and income maintenance, employment, and criminal justice and including discussions of the processes of policymaking itself. This is a service learning course and requires 45 hours of volunteer service as part of the course.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: SOCWRK 1000 and 1005

SOCWRK 1008 - GENERALIST SOCIAL WORK PRACTICE WITH DIVERSE POPULATIONS

Minimum Credits: 3

Maximum Credits: 3

This course provides an understanding and working knowledge of the interface of ethnicity and race and the social welfare system. Critical ways in which the social welfare system has been shaped by ethnic and racial factors will be discussed, as well as the effects of race and ethnicity on the ways in which various ethnic and racial groups use the social welfare system, ways in which services/resources are allocated, and reasons that propel individuals and groups to seek out social services and resources.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: SOCWRK-BSW

Course Attributes: Civic Learning, Global Studies

SOCWRK 1011 - INTRODUCTION TO GENERALIST METHODS: SOCIAL WORK WITH INDIVIDUALS AND FAMILIES

Minimum Credits: 3

Maximum Credits: 3

Teaches interventive skills in casework with individuals and families, with emphasis on the problem-solving psychosocial, and behavioral approaches.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Social Work

Course Attributes: Civic Learning

SOCWRK 1012 - SOCIAL WORK WITH COMMUNITIES AND ORGANIZATIONS

Minimum Credits: 3

Maximum Credits: 3

This course introduces the student to macro practice through understanding and analyzing organizations and the

relationship of organizations to the urban community. The focus is on the acquisition of practice skills in community organization, e.g. locality development, social planning, and social action.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Social Work (BSW) ; PREQ: SOCWRK 1011

SOCWRK 1013 - SOCIAL WORK WITH GROUPS

Minimum Credits: 3

Maximum Credits: 3

Introduces the student to social group work as a method in social work practice. The history of the development of groups in social work with emphasis on practice in the United States is also presented. Remedial, reciprocal and social goals models will be analyzed in relation to the worker's use of self, group, structure, group process, phase development and the agency functions used to achieve individual and group goals.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: SOCWRK 1011 (MIN GRADE 'C-'); PLAN: Social Work

SOCWRK 1015 - HUMAN BEHAVR & SOCL ENVIRONMENT

Minimum Credits: 3

Maximum Credits: 3

The objective of this course is to view the range of human needs and behavior as related to various conditions of the urban scene. Examines social, political, economic, and cultural factors which influence individual, group, and community social functioning.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: School of Social Work students only.

SOCWRK 1020 - INTRODUCTION TO SOCIAL WORK RESEARCH

Minimum Credits: 3

Maximum Credits: 3

This course is oriented to the reader and user of social work research. Using standard methodology texts and actual research studies, the lectures and discussions are designed to enable students to read and assess studies relevant to social work practice. In this process, the development and conduct of social research, as it applies to the issues and concerns of social work practice, is described and analyzed.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: Any Statistics Course; PLAN: Social Work (SOCWRK-BSW)

SOCWRK 1024 - PRACTICUM SEMINAR AND LAB 1

Minimum Credits: 3

Maximum Credits: 3

The objective of this course is for students to be able to identify their feelings and behaviors as well as those of their clients and colleagues which affect the course of their interventions within their practice area.

Academic Career: Undergraduate

Course Component: Seminar
Grade Component: Letter Grade
Course Requirements: CREQ: SOCWRK 1025
Course Attributes: Capstone Course

SOCWRK 1025 - PRACTICUM 1

Minimum Credits: 6

Maximum Credits: 6

Placement in an agency will be made according to interest and educational need. Evaluation will be made of the student's ability to use classroom theories to enhance service.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: Letter Grade

Course Requirements: School of Social Work students only.

Course Attributes: Capstone Course

SOCWRK 1026 - PRACTICUM SEMINAR AND LAB 2

Minimum Credits: 3

Maximum Credits: 3

The purpose of this course is to facilitate the student's development of a professional self through the integration of classroom and practicum learning and to provide students an opportunity to amplify their practice learning beyond their immediate placements as a result of guided interactional experiences with other students.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Letter Grade

Course Requirements: PREQ: SOCWRK 1024 (MIN GRADE 'C-'); CREQ: SOCWRK 1027

SOCWRK 1027 - PRACTICUM 2

Minimum Credits: 6

Maximum Credits: 6

A continuation of Practicum 1.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: Letter Grade

Course Requirements: School of Social Work students only.

Course Attributes: Capstone Course

SOCWRK 1030 - DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 6

Directed study provides students with opportunity to explore in-depth a specific social work area beyond that available in regularly scheduled courses. Students must secure a faculty mentor, develop a written plan and receive approval of the plan in order to register for a directed study.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SU3 Elective Basis

SOCWRK 1035 - GLOBAL PERSPECTIVES SOCIAL WORK

Minimum Credits: 3

Maximum Credits: 3

This course is designed to introduce students to the international dimensions of the human condition; the global context of responses to human need; and social development as an approach to global social work practice.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SU3 Elective Basis

Course Attributes: Global Studies

SOCWRK 1050 - RACIAL AND SOCIAL PROBLEMS

Minimum Credits: 3

Maximum Credits: 3

This course covers the history of race in the politics, economics, media, and social fabric of the United States. We go into detail about historical eras and major mechanisms of racial oppression, including large scale social and economic developments in the 20th century that have shaped the racial realities of the US today. We also discuss the degree to which current social phenomena perpetuate racial inequities in contemporary American society, such as mass incarceration and widely held race blindness beliefs. This course strives to help students understand why we see the current racial inequalities that we do in the contemporary US, particularly given the rich civic and cultural histories of West African and Native American societies. It also challenges students to develop ways to address racial injustices in the US where they exist.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

SOCWRK 1058 - ECONOMICS AND SOCIAL WORK

Minimum Credits: 3

Maximum Credits: 3

This course provides an understanding of basic economic theory, and discusses its application to social welfare policy.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SU3 Elective Basis

Course Requirements: PREQ: SOCWRK 1000

SOCWRK 1059 - CHILD AND FAMILY ADVOCACY

Minimum Credits: 3

Maximum Credits: 3

This is a practical skills course in legal advocacy for non-lawyers. The emphasis is on practical techniques and courtroom skills to enhance the professional effectiveness of social workers in the courtroom setting. Typical areas of discussion include rules of evidence, legal procedure, expert witnesses, interview techniques, cross-examination, law reform, case review and readings and the legal rights of children.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SU3 Elective Basis

Course Requirements: School of Social Work students only.

SOCWRK 1063 - AFRICAN-AMERICAN HEALTH ISSUES

Minimum Credits: 3

Maximum Credits: 3

Course will focus on black health issues from analytical, theoretical and practical perspectives. These perspectives will be introduced through cross-examination of health topics which are critical to the black population, the development of health policies and conceptual models for health promotion and disease prevention.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: School of Social Work students only.

SOCWRK 1079 - CHILD WELFARE SERVICES

Minimum Credits: 3

Maximum Credits: 3

Engages students in the study of child welfare, its historical roots, the services provided to families and children, the problems and policy issues in the current child welfare system and culturally competent practice. The study will focus on the etiology, rationale for service, and the current and future provision of services, with emphasis given to legislative mandates for service.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: SOCWRK 1000

SOCWRK 1080 - BROWNE LEADERSHIP FELLOWS SEMINAR

Minimum Credits: 1

Maximum Credits: 1

This seminar engages students in a practice that will lead to their own professional growth and development. The primary focus of this seminar will be on the development of the knowledge, values, and skills of a professional. During seminars, browne fellows will begin program design and implementation strategies for the summer program. Fellows will have the opportunity to hear from experts in the field but spend significant time exploring the topics. The final assessment is focused on a presentation and poster session. Only students that have applied to and been accepted into the Browne Leadership Fellows program are eligible to enroll in this course.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SU3 Elective Basis

SOCWRK 1088 - SPECIAL TOPICS

Minimum Credits: 1

Maximum Credits: 3

Given the changing nature of generalist practice, the BASW program occasionally offers courses in new and/or unique content areas. This course is designed to provide skill and knowledge content not covered in other BASW courses.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SU3 Elective Basis

Social Work Research

SWRES 2023 - DIRECTED STUDY IN RESEARCH

Minimum Credits: 3

Maximum Credits: 3

A supervised experience in designing, implementing, and reporting an individually defined empirical research project. This course provides research experience for advanced research students.

Academic Career: Graduate

Course Component: Dir Study

Grade Component: Grad LG/SU3 Basis

Sociology

SOC 0002 - SOCIOLOGY OF EVERYDAY LIFE

Minimum Credits: 3

Maximum Credits: 3

This course takes as its object of inquiry the ordinary, familiar, routine, and unremarkable stuff of everyday life, beginning from the premise that, rather than being insignificant or inconsequential, what happens in everyday life crucially structures the world. As well, daily life is structured by larger social phenomena. As such, the study of everyday life provides a lens through which to explore such themes as the workings and effects of power, social change or the lack thereof, social inequality, quiescence and resistance, ideology, identity and difference, norms and normativity, subject formation and subjectivity, and practices of meaning making. Our mode of analysis will be to bring sociological concepts and theory to the sites and practices of everyday life to refine our sociological thinking and our understandings of the world. Along with exposing students to different schools of thought with regard to the study of everyday life, this course will provide students with the necessary tools to defamiliarize and denaturalize that which might seem natural, obvious, and axiomatic. It also is designed to help students think about the relationship between social processes and the individual and about what is at stake in understanding how they mutually affect one another in any given context.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

SOC 0003 - TECHNOLOGY AND SOCIAL CHANGE

Minimum Credits: 3

Maximum Credits: 3

To acquaint the student with major sociological concepts, approaches and theories that are applicable to the analysis of the interaction between technology and society. The discussions are organized around three issues; 1. The effects of technology upon various aspects of the social structure and functioning, 2. The social conditions which lead to innovations and the diffusion of innovations throughout society, and 3. Technology assessment and environmental impact statement processes as they bear on current national decisions bearing on technology/society interfaces.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

SOC 0005 - SOCIETIES

Minimum Credits: 3

Maximum Credits: 3

This introductory course is devoted to furthering an understanding of life in America today by comparing it to a variety of societies worldwide. Among the societal aspects explored; political and economic systems, cultural styles, major religions and religious trends.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Asian Studies, DSAS Global Issues General Ed. Requirement, Global Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req., West European Studies

SOC 0007 - SOCIAL PROBLEMS

Minimum Credits: 3

Maximum Credits: 3

The major aims of this course are to understand the nature of important social problems in American society and analyze their causes and consequences. The two competing perspectives, one, that social problems are created when individuals fail to conform to societal norms, and two, that social problems are caused when institutions fail to meet changing needs and aspirations of individuals will be used in our analysis. Future trends and policy alternatives toward amelioration will be examined.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Diversity General Ed. Requirement, DSAS Social Science General Ed. Requirement, Global Studies, SCI Polymathic Contexts: Soc/Behav. GE. Req.

SOC 0010 - INTRODUCTION TO SOCIOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course introduces the student to the discipline of sociology, its development, theories, major findings, and to the sociological interpretation of modern society. Emphasis will be given to the importance of careful empirical investigation for the understanding of recent social and cultural changes. Students should be prepared to encounter basic issues in sociological method and in theory; an inclination toward systematic and abstract reasoning will help.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Social Science General Ed. Requirement, SCI Polymathic Contexts: Soc/Behav. GE. Req.

SOC 0140 - CLASSICAL SOCIOLOGICAL THEORIES

Minimum Credits: 3

Maximum Credits: 3

This course will deal with the foundations of modern sociological theory through a study of major social theorists of the 19th and early 20th centuries.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: DSAS Social Science General Ed. Requirement, SCI Polymathic Contexts: Soc/Behav. GE. Req., Writing Intensive Course (WRIT)

SOC 0150 - SOCIAL THEORY

Minimum Credits: 3

Maximum Credits: 3

The aim of this course is to provide a survey of major developments in sociological theory in recent times. The classic background for these developments is included as part of the course. Lectures, readings and discussions help the

student to acquire a grasp of the significance of theoretical analysis in sociology and of basic sociological problems addressed by a variety of theorists.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Social Science General Ed. Requirement, Global Studies, SCI Polymathic Contexts: Soc/Behav. GE. Req.

SOC 0230 - SOCIAL RESEARCH METHODS

Minimum Credits: 3

Maximum Credits: 3

Students begin to learn to do social research in this course. They learn how to define an appropriate problem, select an appropriate method, collect and analyze data, discuss their results, and draw conclusions. Students study both quantitative and qualitative methods.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Undergraduate Research

SOC 0312 - SCIENCE IN SOCIETY

Minimum Credits: 3

Maximum Credits: 3

The course aims at conveying an understanding of the social significance of science in modern society, dealing with questions of why science is valued, how society supports science, how scientists are selectively recruited and trained, how scientific activity is organized, and how scientific knowledge is utilized in society, especially in the United States and Europe. Focus is on the values attached to science by society, the interest in making new discoveries, organization of research, diffusion and transmission of scientific knowledge.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Social Science General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Contexts: Soc/Behav. GE. Req.

SOC 0317 - GLOBALIZATION

Minimum Credits: 3

Maximum Credits: 3

The aim is to analyze the dynamics of civilization in today's interconnected world. How is people's social and cultural life shaped by their position in the world, by local traditions and distant forces? How have the independently coexisting civilizations of earlier centuries become incorporated into a global civilization in which colonial empires and the communist regime have given way to wider democracy and a capitalist regime with global dynamics? How is Western culture (beliefs, values and symbols) disseminated and embraced, modified or resisted in non-Western societies?

Academic Career: Undergraduate

SOC 0411 - DECEPTION AND BETRAYAL

Minimum Credits: 3

Maximum Credits: 3

Students learn what sociologists and social psychologists have discovered about deception and betrayal in personal relationships, social institutions, national affairs, and international affairs.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: Global Studies, Writing Intensive Course (WRIT)

SOC 0424 - SMALL GROUPS

Minimum Credits: 3

Maximum Credits: 3

In this course, the study of small groups is viewed as one means of building general sociological knowledge. Such groups exhibit basic social processes, such as the emergence of status structures and of group cultures. Basic theory and research methods on such groups are treated. It is likely that the readings will include case studies of real groups that illustrate how group processes and structures are analyzed.

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: Writing Intensive Course (WRIT)

SOC 0431 - BUREAUCRACIES

Minimum Credits: 3

Maximum Credits: 3

This course examines bureaucratic organizations of all types (industrial, commercial, governmental, religious, educational, social welfare, etc.) giving special attention to decision-making. People make decisions according to bureaucratic rules, in problem-solving groups, and in interest groups which seek to win advantages for themselves and their members. Decisions and other organizational acts will be studied sociologically.

SOC 0432 - WEALTH AND POWER

Minimum Credits: 3

Maximum Credits: 3

In this course we aim to understand the fundamental structure and workings of modern capitalist society. We will examine the distribution of wealth, income, and power in both the US and globally, and consider the notions of democracy and imperialism in the context of what we broadly call, "globalization". Can we have political equality in societies with high degrees of economic inequality? Are corporations too powerful? Whose side does government usually take the little guys' or the corporations'? Why? How is it possible that the richest nation in the world also has more poverty than any other "democratic" country? We will explore these and many other topics from the macro- to the micro- levels of analysis

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Attributes: DSAS Social Science General Ed. Requirement, SCI Polymathic Contexts: Soc/Behav. GE. Req.

SOC 0434 - POLITICAL SOCIOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course examines the relationship between political institutions and the institutions of the economy, family, education, religion, and stratification. With a major focus on American society and the conditions underlying stable democracy, these relationships are studied in historical and cross-societal comparative perspective as well as in terms of a society's location in the system of international relations.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

SOC 0436 - SOCIAL ASPECTS OF SEXUALITY

Minimum Credits: 3

Maximum Credits: 3

Students consider the social analysis of human sexual behavior and experience. Topics considered include sexual motivation, masturbation, premarital intercourse, marital intercourse, extramarital intercourse, homosexuality, and sexual norms and values.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Diversity General Ed. Requirement, DSAS Social Science General Ed. Requirement, Gender, Sexuality & Women's St, SCI Polymathic Contexts: Soc/Behav. GE. Req.

SOC 0438 - SOCIOLOGY OF THE FAMILY

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to the sociological perspective on the family and analyzes how the structure and nature of family life are shaped by larger historical and social forces. We will look at how changes in the economy and technology affect the family; how ideas concerning gender roles affect male/female relationships and the socialization of children; how race, ethnicity, and class shape family life; and the wide variety of family forms, historical and contemporary.

Course Attributes: Children's Literature, DSAS Social Science General Ed. Requirement, SCI Polymathic Contexts: Soc/Behav. GE. Req.

SOC 0444 - URBAN SOCIOLOGY

Minimum Credits: 3

Maximum Credits: 3

The modern city is simultaneously many different things. It is an assortment of neighborhoods, it is a workshop with factories and offices, it is a crisscross of transportation arteries, it is a marketplace for the interplay of economic interests, it is an object which several different governments try to understand and control, and it is an astonishing mixture of religious, racial, ethnic, recreational, avocational, professional, educational, medical, political, social, and deviant communities. This urban complex will be studied with a sociological approach.

SOC 0446 - SOCIOLOGY OF GENDER

Minimum Credits: 3

Maximum Credits: 3

This course will analyze the various processes and institutions through which gender roles are defined and shaped in our society. It will analyze the interaction between individual conceptions of gender and larger social institutions such as the family, the workforce, the media, religion, etc. The current changes in these roles will be related to changes in other social institutions. We will also examine the multiple forms of inequality in our society--based on sex, race, class, and sexual preference--and see how they interact.

Academic Career: Undergraduate

SOC 0460 - RACE AND ETHNICITY

Minimum Credits: 3

Maximum Credits: 3

This is a course presenting the central sociological interpretations of majority/minority relations. The course begins with a consideration of minorities around the world. With world minorities as a frame of reference, the course turns to the United States and its special opportunities and problems.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

SOC 0465 - SOCIOLOGY OF SPORTS

Minimum Credits: 3

Maximum Credits: 3

This course examines sports from a political economy perspective, emphasizing wealth and power in this social institution. We will do a critical examination of the role of sports in society, amateur and professional sports and how they affect our lives. In the process, we inevitably see how sports affects how we see ourselves as a society and as individuals, including notions of class, race and gender among other things. The focus of my course is the political economy of sports including the peculiar American NCAA and Power 5 college athletics, and of course the colossal sphere of professional sports. This analysis will reveal all of the traits upon which this institution sits capitalism. That means we will see exploitation, profit and power, all in the gladiators arena of sports.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Urban Studies

SOC 0471 - DEVIANCE AND SOCIAL CONTROL

Minimum Credits: 3

Maximum Credits: 3

This course raises questions about what is "deviant" and how certain actions and beliefs come to be considered deviant.

It also raises questions concerning the social, structural and cultural determinants of the decision to view something as "deviant" and in need of "control". The course explores changes in the definition of behavior which lead the same behaviors to be considered 'sins', 'crimes', 'illnesses', and 'alternative life-styles'.

SOC 0473 - SOCIOLOGY OF GLOBALIZATION AND HEALTH

Minimum Credits: 3

Maximum Credits: 3

This course is designed to help students understand how economic and political globalization impacts health outcomes in the United States and around the world. In this course we will explore how a variety of global factors affect people's health and their access to health care. For instance, expanded international travel and migration contributes to the spread of infectious diseases and shapes a growing international labor market in health care. International economic policies such as patent law and trade agreements affect access to and delivery of health services and treatments and contribute to national, racial, and gendered inequities in health care. Climate change increases the prevalence of certain diseases and impacts availability of food and water. In addition, global economic forces shape the possibilities for national and local governments to provide for their citizens' basic human needs such as safe drinking water, nutrition, and a healthy environment. Students will gain enough familiarity with global processes to appreciate the multiple influences on human health that are relevant to careers in a variety of fields related to the physical and social sciences and the humanities. This course fulfills social sciences and foreign culture/international global general education requirements.

SOC 0474 - SOCIETY AND THE LAW

Minimum Credits: 3

Maximum Credits: 3

Every society regulates behavior and the means, i.e. Either informal or formal, with which this is done varies according to level of social development. This course examines the regulation of behavior in primitive, transitional, and modern societies and traces the development of law and legal systems and their relationship to different characteristics of social development. We will examine legal jurisprudence and the application of the principles of these philosophies and explore how they have shaped legal action.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

SOC 0475 - SOCIOLOGY OF AGING

Minimum Credits: 3

Maximum Credits: 3

This course studies the fate of being old in American society in terms of income-adequacy, participation in political life, family relations, the status of retirement as an institution, health, the loss of independence and life in nursing homes. These and related issues are examined in cross-national perspective to assess the level and some nationally distinctive ways in which modern society cares for its elderly.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

SOC 0477 - MEDICAL SOCIOLOGY

Minimum Credits: 3

Maximum Credits: 3

This is a course on socio-cultural aspects of health, illness, disease and (medical) treatment in American society. The historical transformation of American medicine into a powerful sovereign profession with unparalleled authority, autonomy and control over all aspects of health and illness will be examined. On the basis of this historical survey, recent empirical studies of distribution of health, disease and medical care will be examined as well as specific substantive issues and contemporary debates.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

SOC 0490 - MASS MEDIA

Minimum Credits: 3

Maximum Credits: 3

This course deals with the many faceted roles of mass media in our society and explains how and why the media have achieved their present prominence and influence on our lives.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

SOC 0713 - ASIA NOW

Minimum Credits: 3

Maximum Credits: 3

The course is innovatively interdisciplinary, reflecting current anthropological theory. The topical focus is on contemporary Asia. It is creatively structured around a series of high-profile, public guest lectures given by leading, internationally recognized Asian Studies and Global Studies Scholars representing a spectrum of disciplines. The class will meet twice a week, once for a lecture and once for a seminar discussion focused on reading assignments chosen to highlight anthropological problems, questions and analytical perspectives that relate to the weekly guest lecture.

Academic Career: Undergraduate

SOC 1002 - SOCIOLOGY HONORS SEMINAR

Minimum Credits: 3

Maximum Credits: 3

Sociology Honors Seminar (SOC 1002) is the first of a two semester sequence (SOC 1903, taken in the Spring semester, is the second) designed to facilitate students' independent research toward the completion of an honors thesis, a requirement for graduating with honors. The seminar affords students the opportunity to utilize the skills they have acquired as sociology majors, apply their sociological imaginations, dive deep into a topic that is important to them, and produce a work of original scholarly research. Each student will formulate a research problem, identify a faculty member who will serve as their advisor, design a research strategy, locate an appropriate research setting, and begin collecting data. By the end of the Fall semester, students will be well positioned to continue the remaining work on their theses in the Spring semester under Directed Research (SOC 1903) with their thesis advisors.

SOC 1115 - GLOBAL CHANGE AND MODERN LIFE

Minimum Credits: 3

Maximum Credits: 3

This course is directed at discussion of the processes involved in the making of the modern world into a single sociocultural system. It combines matters usually discussed in courses on modernization, the comparative analysis of whole societies, international relations, and the relationship between individual and societies into a cohesive whole. More specifically it combines the analysis of relations "between" societies with the analysis of changes "within" societies.

SOC 1227 - REBELLION AGAINST AUTHORITY

Minimum Credits: 3

Maximum Credits: 3

The objective of this course is to explore how and why individuals and social groups rebel against authority. This course will investigate the conditions that stoke rebellion against immoral and oppressive power structures, shared conditions, and social norms; explain how we know when authorities are acting immorally or unjustly; analyze why injustice and illegitimacy only fuel rebellion in some cases and induce conformity in others; explore the various forms that resistance and rebellion can take, and theorize the factors that shape rebellion's varied forms, such as exit, sabotage, protest, withholding, reclamation, violent struggle, and revolution. The empirical topics covered will address a range of rebellion under tyranny, including rebellion during slavery in the United States, rebellion against Nazi power and the Holocaust during World War II, and resistance to colonialism and imperialism, among other notable topics.

SOC 1234 - SOCIOLOGY OF TOURISM

Minimum Credits: 3

Maximum Credits: 3

Tourism as a global social activity and as a global industry is analyzed through sociological lenses in this course. The role of culture in the development of hospitality, leisure and travel in modern society, as are the socio-cultural impacts of tourism and the boundaries of hospitality. Focusing on the understanding of travel and leisure and the meaning of

hospitality, the course introduces the student to tourism as a growing activity in a global environment. The course enables students to comprehend the social values defining hospitality for both hosts and guests, shaping tourists desire to travel. In addition, students taking the course are introduced to the social and cultural forces which define the image of tourism and leisure, as well as the social and political economy impacts of tourism development. This course demonstrates how travel and tourism can be media for social change in both positive and negative directions. Links between tourism and other sociological areas of inquiry, such as global perspectives; health, leisure and medicine; development; religion, and culture, are developed through this course. Likewise, specialized forms of tourism and relations between hosts and guests allow students to see how tourism development affect and are affected by inequalities of class, race, gender and sexuality.

SOC 1277 - PITTSBURGH AREA STUDY

Minimum Credits: 3

Maximum Credits: 3

Pittsburgh Area Study is a research practicum. This course will give hands-on research experience examining gender and race equity within the city of Pittsburgh. Students in this course will be a part of a larger project that has been commissioned by the City of Pittsburgh to evaluate current equity and write a report for the city. This report will then be used to inform policy makers creating initiatives gear at fostering opportunities. In the course, students will conduct background information, collect primary data, conduct both quantitative and qualitative analyzes, write sections of the report as well as other associated research tasks. Some previous courses in social science methodology are strongly encouraged.

SOC 1312 - PITTSBURGH, DIASPORA, MIGRATION: SLAVIC AND EAST EUROPEAN COMMUNITIES

Minimum Credits: 3

Maximum Credits: 3

This course provides an overview of the diverse experiences of migration to Pittsburgh from Eastern and Central Europe, extending from the early twentieth century through the current moment. An interdisciplinary selection of readings is supplemented by opportunities for extensive fieldwork in English and in a range of relevant languages throughout western Pennsylvania, as well as in Eastern and Central Europe (the latter via electronic means during the semester, and through possible study abroad in the summer). Focused both on Pittsburgh and on Eastern and Central Europe in the twentieth and twenty-first centuries, the course surveys the experiences of the following communities in and near Pittsburgh: Bosnian, Croatian, Czech, Hungarian, Jewish, Montenegrin, Polish, Russian, Serbian, Slovak,

Ukrainian, among others. Students are introduced to the aims and methods of the public humanities and social sciences, learning research and technical skills in support of podcast, website, and short video production.

SOC 1415 - RELIGIOUS DIVERSITY

Minimum Credits: 3

Maximum Credits: 3

What is the best way to accommodate religious and cultural diversity within a nation-state and in civil society? How should individual rights to practice religion be balanced with communal needs? Should freedom from religion be protected as much or more than freedom of religion? These are pressing contemporary issues in many countries, including the United States, but issues of religious diversity and questions of how - and even whether- to tolerate religious minorities have a long history. In this course, we will examine the toleration of minority religions in particular historical settings, and the issues and problems (both doctrinal and social/political) that societies grappled with as they confronted diverse religious landscapes. We will also use these historical precedents as a lens to examine contemporary examples of religious pluralism, diversity, and conflict. Case studies will mainly be drawn from pre-modern Europe and modern Europe and North America, but we will also look at Mughal and modern India and discuss religion in pre-modern China.

SOC 1421 - BODY POLITICS: TECHNOLOGIES, DISABILITY, DIFFERENCE

Minimum Credits: 3

Maximum Credits: 3

My body is different from yours. Our bodies work as markers of difference. Our bodies have different capacities, powers, and abilities. Our bodies incorporate technologies, prostheses, extensions. The limitations of our bodies have, for some time, been something simply to overcome. We think we can overcome the limitations of our body physiology through technology. Plugging in, reconfiguring. Our bodies, like our minds, are supposedly plastic, capable of rewiring and change. Like upgrading an app, we work on our bodies and sculpt them at the gym. We work with our bodies in the workplace, feel fatigue, exert effort. We subject our bodies to surveillance at work, in urban spaces, in civic protests. Our bodies are increasingly machine-readable. Our bodies are being shaped by automation on factory floors and in warehouses, sensed and tracked by surveillance technologies. Our bodies will increasingly interact with, and be replaced by, robots.

SOC 1445 - SOCIETY AND ENVIRONMENT

Minimum Credits: 3

Maximum Credits: 3

The state of the environment reaches the pages of our newspapers every day. How did we get to this state? Throughout history, human societies have made use of the environment as all human activity is dependent on through puts of energy and materials. The course will seek to understand the social, economic, and political processes as they lead to impacts on the environment. Far from being 'out there', the state of the environment is integrally related to the ways societies work.

SOC 1446 - CONSUMPTION & EVERYDAY LIFE

Minimum Credits: 3

Maximum Credits: 3

The course is composed of three interrelated blocs: 1. The Times of Consumption: Modernity. The rise of the 'new' bourgeois consumer at the turn of the 20th Century through Veblen, Simmel, and Benjamin, and the Frankfurt School. This period includes changes in the architectures of the spaces of consumption, including the Parisian arcades and early department stores. 2. How We Consume Now. We learn about the transformations of consumption practices that accelerate in the twenty-first century. This includes new ways of consuming and experiencing nature, consuming food; the production of certain types of consumer bodies in terms of race, class and gender; and the growth and effectiveness of retail psychology. 3. The Spaces of Consumption: Globalization. The consumer-citizen in the age of Globalization, including the global spread of malls; agro-food networks that provide sushi and McDonalds to cities around the world, and the rise of supply-chain cities to produce goods for global consumers.

SOC 1509 - CONTEMPORARY ISSUES THROUGH SERVICE-LEARNING

Minimum Credits: 3

Maximum Credits: 3

This service-learning course combines a structured curriculum and extensive partnership with a local community-based organization to offer tangible community service. Here, student community service includes direct engagement as well as a research-based action plan addressing a specific challenge or goal identified by a community-based organization. . Student service-learning will include exploring the proximate and ultimate drivers of the organizations chosen challenge, and the organizations infrastructure, resources, limitations and possibilities for reducing barriers to achieving the organizations self-identified goals. In concert, coursework probes the role of community-based organizations in both local and global contexts, common challenges of community-based organizations in defining and implementing their goals, the role of service-learning in addressing these issues, and effective ways for students to help them achieve their mission, vision, and goals. Coursework also guides the students service-learning experience by helping students develop sound international service ethics, provide tools to investigate solutions to common development issues, aid in data analysis and presentation, and provide best practices to illustrate findings and deliver approved joint recommendations orally and in writing. Throughout, students use service-learning as a means to expand their global awareness and understanding, explore shared aspirations for social justice, and develop skills to work with others to effect positive change.

Course Requirements: PREQ: SPAN 0003 or 0103 (MIN GRADE 'C') or Spanish Placement Test Score equal/greater
4

SPAN 0115 - INTENSIVE ELEMENTARY SPANISH

Minimum Credits: 3

Maximum Credits: 3

This is a condensed version of the first two courses of the Spanish language program (Spanish 0101 and 0102, formerly 0001 and 0002), and it has been designed for students who have taken at least two years of high school Spanish or its equivalent. Spanish 0115 follows a communicative approach: from the first day of class you will interact in Spanish in a meaningful context with your instructor and classmates. By the end of this course you will have a general knowledge of the grammar of the Spanish language and you will be able to communicate effectively in Spanish according to this level.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Second Language General Ed. Requirement

SPAN 0120 - CONVERSATION

Minimum Credits: 3

Maximum Credits: 3

The goal of this fifth-semester course is to enhance fluency and the development of oral proficiency in Spanish. Although the emphasis is on speaking and listening skills, reading and writing assignments are an important part of the syllabus. This course helps students to improve their fluency, pronunciation, and strategic competence such as paraphrasing skills, and increases their vocabulary through readings, films, digital recordings and other authentic materials.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: SPAN 0004 or 0104 (MIN GRADE 'C+') or Spanish Placement Score equal to 20

Course Attributes: Latin American Studies, West European Studies

SPAN 0125 - GRAMMAR AND COMPOSITION

Minimum Credits: 3

Maximum Credits: 3

This course reviews Spanish grammar, and, in addition, is designed to aid the students in vocabulary building, improving their knowledge of idiomatic usage, and their ability to translate from English to Spanish.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: SPAN 0004 or 0104 (MIN GRADE C+) or Spanish Placement Test Score equal/greater 20

Course Attributes: Latin American Studies, West European Studies

SPAN 0126 - SPANISH ADVANCED GRAMMAR AND COMPOSITION FOR HERITAGE SPEAKERS

Minimum Credits: 3

Maximum Credits: 3

This course is specially designed for Spanish Heritage students who already understand and speak Spanish but they communicate almost exclusively in English and for students who speak Spanish mostly in informal settings and would like to improve their writing and spelling skills. This course aims to identify the skills that the heritage students already bring with them and develop them further. Through readings and film screenings, class presentations, discussions and debates, writing workshops and peer editing, this course seeks to strengthen the student's confidence in the language. Students will review basic grammar structures and spelling, expand vocabulary and develop writing skills. The goal of this course is also to expose students to different products, practices, and perspectives from the Hispanic cultures in the US and abroad.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

SPAN 1031 - ELEMENTARY SPANISH 1 FOR MBAS

Minimum Credits: 1.5

Maximum Credits: 1.5

This is an introductory conversational course specifically designed for business students who do not know Spanish. The student will be presented with the basic structures of the language, as well as the necessary vocabulary to be able to understand simple Spanish and converse on everyday ("survival skills") topics. The course, conducted in Spanish, will be relatively fast-paced, and will require students to participate actively in a variety of exercises, group activities, and exchange of information.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

SPAN 1032 - ELEMENTARY SPANISH 2 FOR MBAS

Minimum Credits: 1.5

Maximum Credits: 1.5

Spanish 0032, designed specifically for business majors, is a continuation of 0031 at the elementary level. Emphasis is on improving listening and speaking skills, with considerable in-class conversational practice. New grammatical structures and increased vocabulary are introduced. Limited business language will be included, along with selected cultural information.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

SPAN 1055 - INTRODUCTION HISPANIC LITERATURE 1

Minimum Credits: 3

Maximum Credits: 3

This course is designed to introduce students to the study of Spanish and Latin American literatures, while dealing with concepts and terms that can be applied to all literature.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: [SPAN 0020 or 0120] and [SPAN 0025 or 0125 or 0126] (Min Grade 'C' for all listed courses)

Course Attributes: Latin American Studies, Undergraduate Research, Writing Intensive Course (WRIT)

SPAN 1056 - READING, WRITING, & HEALTH IN SPANISH

Minimum Credits: 3

Maximum Credits: 3

What is literature? What does the literary do? This course, conducted in Spanish, is designed to introduce students to the study of Hispanic literature, while the same time dealing with concepts which can be applied to all literature. We will analyze Hispanic literature understood in its broadest sense, touching upon significant works, genres, movements, and authors from Spain and Latin America, all of which will have either health-related themes or relevance to the field of narrative medicine. More than a survey course, however, this course is designed to teach students how to read literature, how to write about it, and why it matters. In partial answer to this question, this course is an introduction to the health humanities and narrative medicine in Spanish. Students will learn how narrative is central to empathy, to cultural competence, to the expression and processing of pain, sickness, and healing, and how developing the skills to interpret narratives and interact with them is key to promoting global health.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: [SPAN 0020 or 0120] and [SPAN 0025 or 0125 or 0126]

SPAN 1250 - HISPANIC CIVILIZATIONS

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: [SPAN 0020 or 0120] and [SPAN 0025 or 0125 or 0126] (Min Grade 'C' for all listed courses)

Course Attributes: DSAS Geographic Region General Ed. Requirement, DSAS Historical Analysis General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Contexts: Soc/Behav. GE. Req.

SPAN 1260 - OVERVIEW OF SPANISH LITERATURE

Minimum Credits: 3

Maximum Credits: 3

This course provides a broad overview of Spanish literature from the Middle Ages to the present in its historical, cultural, aesthetic, and social context. Reading chronologically, we will engage particularly with questions of identity, both personal and collective, and of authorship and the formation of the canon, in order to discover how we can read "Spain" through Spanish art and literature and to what extent the "idea of Spain" emerges from its own literary culture.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: SPAN 1250

Course Attributes: DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

SPAN 1300 - SPANISH PHONETICS AND PHONEMICS

Minimum Credits: 3

Maximum Credits: 3

This course is an introduction to the study and practice of the sounds of Spanish. The overall objective of this course is to understand the sound system of Spanish as compared to English. Successful students will develop good auditory perception of Spanish and awareness of their own pronunciation, which could help to improve it.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: [SPAN 0020 and 0025 (MIN GRADE 'C' for Listed Courses) PLAN: Spanish (BA, BPH)] or [SPAN 0020 or 0025 (MIN GRADE 'C' for Listed Courses) PLAN: Spanish (MN)]

Course Attributes: Latin American Studies, West European Studies

SPAN 1302 - ADVANCED COMPOSITION AND STYLISTICS

Minimum Credits: 3

Maximum Credits: 3

This writing course builds upon the student's knowledge of Spanish grammar and composition. In particular attention will be given to the many syntactical and lexical usages that the foreign language learner needs to incorporate in advanced writing. The teacher will help the student improve and polish his/her individual style, with some imitation of literary models.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: [SPAN 0020 and 0025 (MIN GRADE 'C') PLAN: Spanish BA, BPH, MN] or [SPAN 0020 or 0025 (MIN GRADE 'C');ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or ENGFLM 0210 or FP (0003 or 0006)

Course Attributes: Latin American Studies, West European Studies, Writing Intensive Course (WRIT)

SPAN 1303 - SEMINAR IN LANGUAGE AND CULTURE

Minimum Credits: 3

Maximum Credits: 3

This course will deal in depth with various cultural and linguistic topics.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (SPAN 1400 or 1600) and SPAN 0050 (MIN GRADE 'C' for Listed Courses); PLAN: Spanish (BA); LVL: Sr

Course Attributes: Capstone Course, Latin American Studies, West European Studies

SPAN 1304 - METHODS OF TEACHING SPANISH

Minimum Credits: 3

Maximum Credits: 3

A course designed for those who plan to teach Spanish. Main focus is on practical information of how best (method and technique) to teach the language. Topics include: theory of learning, approaches, activities, dialogs and drills, the role of grammar, the lab, testing, vocabulary, and the like. Practice teaching, including videotaping.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: [SPAN 0020 and 0025 (MIN GRADE 'C' for Listed Courses) PLAN: Spanish (BA, BPH)] or [SPAN 0020 or 0025 (MIN GRADE 'C' for Listed Courses) PLAN: Spanish (MN)]

SPAN 1305 - SPANISH APPLIED LINGUISTICS

Minimum Credits: 3

Maximum Credits: 3

A thorough analysis of the linguistic problems in teaching Spanish to speakers of English. Particular emphasis on problems of interference by transfer from the native to the target language, using contrastive analysis as a method of problem solving. Study of phonology and grammar, with attention also to certain techniques in foreign language teaching. Included is a brief survey of the teaching of Spanish in the United States and elsewhere.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: SPAN 0020 or 0120 AND 0025 or 0125 (MIN GRADE 'C' for Listed Courses) or Spanish Placement Test Score equal to 13.

SPAN 1306 - SPECIAL TOPICS IN APPLIED LINGUISTICS

Minimum Credits: 3

Maximum Credits: 3

The goal of this course is to further develop the oral proficiency of students through authentic materials including but not limited to interviews, movies, music, newspaper articles and role-playing. Emphasis on fluency and speaking skills, although reading and writing skills will not be ignored. We will review certain grammar points but communicative competence is not measured by grammatical competence alone. Pronunciation, comprehension skills, strategic competence such as paraphrasing skills, and an extensive active vocabulary are all equally important when it comes to becoming proficient in a foreign language. Students will often work in groups and pairs so it is imperative that they be willing to interact with one another and be tolerant of one another's opinions. The instructor will rate students' oral proficiency at the beginning and end of the semester based on the ACTFL speaking proficiency guidelines. These guidelines are used nation-wide as an assessment tool to identify an individual's level of speaking competence in a foreign language.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: [SPAN 0020 and 0025 (MIN GRADE 'C' for Listed Courses) PLAN: Spanish (BA, BPH)] or [SPAN 0020 or 0025 (MIN GRADE 'C' for Listed Courses) PLAN: Spanish (MN)]

SPAN 1310 - LINGUISTIC SEMINAR

Minimum Credits: 3

Maximum Credits: 3

This course allows students to work on various linguistic topics in depth; these may be theoretical or applied in nature. Students are expected to do original research and to present it both orally in class and as a written research document. Taught in Spanish.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: [SPAN 0020 and 0025 (MIN GRADE 'C' for Listed Courses) PLAN: Spanish (BA, BPH)] or [SPAN 0020 or 0025 (MIN GRADE 'C' for Listed Courses) PLAN: Spanish (MN)]

SPAN 1312 - OVERVIEW OF SPANISH LINGUISTICS

Minimum Credits: 3

Maximum Credits: 3

This is a content course taught entirely in Spanish with the goal of developing students' competence beyond colloquial and formal registers toward an academic use of the language. It will examine various aspects of Hispanic linguistics such as phonology, phonetics, morphosyntax, semantics and pragmatics. Students will develop a basic of Hispanic linguistics in order to be able to critically evaluate other linguistic theories and studies in the future. Fields such as applied linguistics (both language acquisition and sociolinguistics) will be covered in order to observe the relationship between theory and current use of Spanish.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: [SPAN 0020 or 0120] and [SPAN 0025 or 0125 or 0126] (Min Grade 'C' for all listed courses)

SPAN 1315 - SPANISH FOR PROFESSIONAL COMMUNICATION

Minimum Credits: 3

Maximum Credits: 3

This course will present a variety of formal communication-related topics throughout the Hispanic world and help students begin to develop their professional profile in Spanish. The main objective is to introduce students to the Hispanic professional environment through formal Spanish terminology and usage, cultural practices, and professional communication. This class will be conducted in a seminar format, with a strong focus on conversation and writing. Students will also learn about the geographical, political, demographic and economic realities of Hispanic countries. In order to develop intercultural competence, students will be invited to make connections and comparisons between the US and Hispanic world. Moreover, students will engage with invited speakers and job interviewers from Latin America.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (SPAN 0020 or SPAN 0120) AND (SPAN 0025 or SPAN 0125 or 0126)

SPAN 1320 - INTRODUCTION TO TRANSLATION

Minimum Credits: 3

Maximum Credits: 3

This course provides an introduction to the theory, the basic processes, techniques and practice of English to Spanish translation and Spanish to English translation of a wide variety of materials. The students will learn how to approach the linguistic and cultural issues involved in the translation of general as well as specialized texts of various fields such

as journalism, advertising, business, medicine, literature, government publications and legal documents, among others. In the process, the students will increase their vocabulary of the target language and further their understanding of the structures of both languages.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (SPAN 0020 or SPAN 0120) and (SPAN 0025 or 0125) (MIN GRADE 'C' FOR LISTED COURSES)

SPAN 1321 - BUSINESS SPANISH 1

Minimum Credits: 3

Maximum Credits: 3

This course is designed to acquaint students with the essential forms and documents utilized in the Spanish business world.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: [SPAN 0020 and 0025 (MIN GRADE 'C' for Listed Courses) PLAN: Spanish (BA, BPH)] or [SPAN 0020 or 0025 (MIN GRADE 'C' for Listed Courses) PLAN: Spanish (MN)]

Course Attributes: West European Studies

SPAN 1323 - MEDICAL SPANISH

Minimum Credits: 3

Maximum Credits: 3

This course is intended for translators in training who desire experience in translating the types of medical documents professional translators handle "on-the-job". Course emphasizes acquisition of practical translation skills, and introduces basic medical principles and terminology, as they are used in medical texts.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: [SPAN 0020 or 0120] and [SPAN 0025 or 0125 or 0126] (Min Grade 'C' for all listed courses)

SPAN 1400 - SURVEY LATIN AMERICAN LITERATURE

Minimum Credits: 3

Maximum Credits: 3

This course surveys the development of Latin American literature from the Cronistas to the present. Taught in Spanish.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: SPAN 0050 or 1250 or 1260 or 1280 or 1400 or 1600; (MIN GRADE 'C' for all listed courses)

Course Attributes: Latin American Studies

SPAN 1403 - LATIN AMERICAN NARRATIVE

Minimum Credits: 3

Maximum Credits: 3

This course deals with the development of Latin American prose narrative as it moves from 19th century realism and

naturalism in the direction of modernista and vanguardista innovations, culminating in the narrative of the boom and the post-boom. Taught in Spanish.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (SPAN 0050 or 1250); PLAN: Spanish (BA, BPH, MN); (MIN GRADE 'C' for all courses listed)

SPAN 1404 - LATIN AMERICAN TOPICS

Minimum Credits: 3

Maximum Credits: 3

This course deals with literary, linguistic or cultural topics, or a combination of these. Its primary emphasis is on developing an understanding of contemporary cultures in Latin America. Taught in Spanish.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (SPAN 0050 or 1250); PLAN: Spanish (BA, BPH, MN); (MIN GRADE 'C' for all courses listed)

Course Attributes: Latin American Studies

SPAN 1405 - SEMINAR: LATIN AMERICAN LITERATURE AND CULTURE

Minimum Credits: 3

Maximum Credits: 3

This course studies various cultural and literary topics according to the needs and interests of the students. Its purpose is to allow students to do original research on their own on topics of interest in the field of Latin American literature and culture. Taught in Spanish.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (SPAN 0050 or 1250); PLAN: Spanish (BA, BPH, MN); (MIN GRADE 'C' for all courses listed)

Course Attributes: Latin American Studies

SPAN 1406 - U.S. LATINO LITERATURE

Minimum Credits: 3

Maximum Credits: 3

This course will focus on U.S. Latino literature. While Mexican-Americans have roots in North America that go back to colonial times, the Latino explosion has happened mainly in the last thirty years, giving rise to new processes and forms of cultural expression, including an emerging literature that is neither a subset of U.S. Literature nor an extension of modern Latin American literature, though it has connections to both. To get an idea of what this literature involves and where it is going, we will look at some representative novels, poetry, memoirs, plays and films.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (SPAN 0050 or 1250); PLAN: Spanish (BA, BPH, MN); (MIN GRADE 'C' for all courses listed)

SPAN 1407 - U.S. LATINO FILM

Minimum Credits: 3

Maximum Credits: 3

The major purpose of the course consists of illustrating and analyzing the role of the audiovisual media film (fiction and documentary) and video (and television, to a certain degree) for an understanding of the socio-cultural and conceptual status that Latina/o identities have acquired in today's society. Thematically, the course will focus on themes of modernity vs. tradition in U.S. Latino culture. The course uses a selection of audiovisual materials which is fairly innovative in its variety. Chicano films and videos will constitute the major part of the material.

Academic Career: Undergraduate

Course Component: Lecture

Course Requirements: PREQ: (SPAN 0050 or 1250); PLAN: Spanish (BA, BPH, MN); (MIN GRADE 'C' for all courses listed)

Course Attributes: Film Studies, Global Studies, Undergraduate Research

SPAN 1413 - SHORT STORY IN SPANISH AMERICA

Minimum Credits: 3

Maximum Credits: 3

This course is a survey of the short story in Spanish America in the twentieth and early twentieth century. Authors to be studied in a given year will include some of the following: Leopoldo Lugones, Horacio Quiroga, Maria Luisa Bombal, Jorge Luis Borges, Silvina Ocampo, Felisberto Hernandez, Juan Carlos Onetti, Juan Rulfo, Elena Garro, Augusto Roa Bastos, Gabriel Barcia Marquez, , Julio Cortazar, Juan Jose Saer, Marvel Moreno, Ricardo Piglia, and Mariana Enriquez. Particular attention will be paid to writers who are also theorists of the short story (Quiroga, Borges, Cortazar, Piglia among others) and to scholars of the short story genre in Spanish America. There will also be consideration of the genre of the novella (including distinctions in short story theory between the long and the short), with examples from Bombal, Jose Bianco, Slivina Ocampo, Felisberto Hernandez, Ricardo Piglia and others.

SPAN 1414 - THEATRE AND PERFORMANCE IN LATIN AMERICA

Minimum Credits: 3

Maximum Credits: 3

This course examines the use of performance by the State, by oppositional groups, and by theatre and performance practitioners, to solidify or challenge structures of power. It looks at specific example of how theatre an public spectacles have been used since the 1960s to control or contest the political stage.

SPAN 1418 - VIOLENT VISIONS: REPRESENTATIONS/AESTHETICS OF VIOLENCE IN CONTEMPORARY LATIN AMERICA

Minimum Credits: 3

Maximum Credits: 3

This course will explore the role of violence in contemporary Latin American cinema by examining both film media's representational capacity and its aesthetic composition or form. Departing from the contention that films not only create narratives, but also produce thought, we will focus on an analysis of Latin American films produced in the last twenty years, to interrogate whether violence can function as an aesthetic, theoretical and/or affective device to rethink the social, the political, and the economic. Are Latin American films merely faithful representations of the sociopolitical and economic violence that characterizes the Latin American "reality" of today? Do manifestations of violence in Latin American cinema offer new ways of thinking about and processing sociopolitical and economic conflicts? Or is violence being commodified and reified as Latin American cultural difference in order to promote and brand Latin American cinema in the global market and circuit of international film festivals? We will address these questions by exploring the ways in which Latin America cinema is placed in a constitutive and disruptive relationship to the violent forces of the neoliberal state and globalization. These inquiries will be made in three inter-related ways. First, we will study several Latin American films from various nations and productions. Second, we will look at specific events and cases of violence with which these films engage, such as gender, racial and class oppression, military dictatorships and the police state, drug trafficking and neoliberal restructuring. Lastly, we will read critical texts by various key authors on theories of violence, film studies, and Latin American cultural studies.

SPAN 1419 - DRUGS, MONEY AND VIOLENCE: NARCO-CULTURE IN LATIN AMERICAN FILM

Minimum Credits: 3

Maximum Credits: 3

This course explores the complex, multi-layered, and often contradictory world of transnational narcotics traffic particularly as it is configured in and through contemporary Latin American cinema. Departing from the contention that the relations between drug trafficking networks, governmental responses to the drug trade, drug production and consumption, are not clear and transparent as depicted in dominant discourses exemplified by the narrative of the War on Drugs, this course analyzes narco-culture not as a simplistic response centered merely on the idolization of drug lords or drug culture, but as a dynamic creative current that tries to make sense of the complexity and violence of the

world of drugs. Why do official narratives of capitalist enterprise disavow the capitalist foundation of the drug trade? How are discourses of security and protection ironically embodied in violent militarized actions and neo-imperial ventures? How does the criminalization of certain cultural practices and symbols - particular languages, dress codes, music - relate to the racialization and sexualization of certain peoples and bodies? Moreover, how can we understand the (global) commercial success of narco-culture as exemplified by recent mainstream media and popular culture? In this course, we will address these questions by engaging in close reading/viewing of contemporary Latin American films that center on representations and (re)productions of narco-culture. These primary works will be examined in conjunction with secondary readings that discuss topics relevant to our analysis of narco-culture, such as globalization, neoliberal capitalism, immigration, femicides, cultural appropriation, and racial and gender construction.

SPAN 1421 - POPULAR CULTURE IN LATINX AMERICA

Minimum Credits: 3

Maximum Credits: 3

This course looks at a variety of popular culture manifestations from Mexico, the Caribbean, Central and South America, and the US, including music, dance, sport, television and film, social media, art, beauty and consumer products. Taking a cultural studies approach to this subject, we will interrogate the ways that popular culture draws from, comments upon, and at times resists political issues, notions of authenticity, social problems, cultural agency, and inequalities. In the context of Latinx America, race/ethnicity, gender, location, citizenship, ability, and class are important conceptual frameworks to thinking otherwise. In this course we will ask the following questions: How do understandings of gender, class, location, ability, citizenship, and race/ethnicity shape the production of popular culture? What do these social assemblages tell us about popular culture manifestations? and How does a comparison between seemingly different contexts enrich our understanding of these key concepts? We will consume both theoretical discussions of popular culture as well as concrete examples of popular media (online streaming, social media, TV, fanzines, video games, comics, music, etc.) with careful attention to its material, affective and political implications. Students will explore these relationships by way of individual and collaborative projects, culminating in both written papers, as well as a digital project that translates the student's reflections for an ample audience. Students will leave this course with an increased understanding of the concepts of spectacle, popular politics, location, ability, race/ethnicity, citizenship, and gender/sexuality that exceed 'academic' definitions, and of the ways in which popular culture manifestations and practices question the very idea of globalization, hybridity, nationalism, and cultural essentialism from a hemispheric perspective.

SPAN 1422 - MEXICAN LITERATURE, ARTS, AND CULTURE

Minimum Credits: 3

Maximum Credits: 3

This course reviews the last hundred years of Mexican cultural history, from the 1910 Revolution to the present. Taking into consideration the meta concepts that define national culture: "the cosmic race", "the post-Mexican condition" and "the labyrinth of solitude", and under the lens of indigenous, nationalist, feminist and postmodernist theories, this course examines several milestones of national culture. This analysis focus on the cultural programs of the post-

revolutionary period (muralism), the rise of the Mexican cultural industry (radio, cinema, comics, telenovela), the transcendental moments of conflict (the 1968 Olympic Games, the implementation of the Free Trade Agreement and the rebellion of the Zapatistas in 1994) and transnational tendencies (the pachuco, the narcoculture). The objective of the course is not, however, to define Mexican national culture, but to analyze, problematize and unsettle the ideological conflicts and cultural struggles that contextualize the production and diffusion of the great works of the last century through critical approaches guided by such concepts as those of ideology, race, gender, nationalism, the border, and post-nationalism.

Academic Career: Undergraduate

SPAN 1426 - LITERATURE OF THE SOUTHERN CONE COUNTRIES

Minimum Credits: 3

Maximum Credits: 3

This course is a survey of the literature of the Southern Cone countries, Argentina, Chile, Uruguay and Paraguay, from the nineteenth century to the present. Issues to be examined will include debates about nation formation and nationalism, relations between indigenous peoples and European settler (including the massive waves of European migration in the period around 1900), the relations between literature and the press, questions of canon formation, and the literary production of minority communities (European and Asian immigrants, Afro-Latin American communities, indigenous peoples, LGBTI communities) and questions of gender and sexuality. Writers to be studied in a given term will include some of the following: Domingo Faustino Sarmiento, Jose Hernandez, Alberto Blest Gana, Jose Enrique Rodo, Leopoldo Lugones, Horacio Quiroga, Delmira Agustini, Florencio Sanchez, Roberto Arlt, Maria Luisa Bombal, Jose Donoso, Jorge Luis Borges, Gabriela Mistral, Juan Carlos Onetti, Felisberto Hernandez, Augusto Roa Bastos, Silvian Ocampo, Idean Velarino, Ricardo Piglia, Dimela Eltit and Pedro Lemebel

SPAN 1427 - TRANSATLANTIC HISPANIC LITERATURE AND CULTURE

Minimum Credits: 3

Maximum Credits: 3

The literature's of Latin American and Spain have been in dialogue, whether intentional or otherwise, since the first points of contact and subsequent colonization and independence. Reading cultural products side-by-side illuminates these dialogues and allows students to place these works of Latin America and Spain in their global context. In this course, we will analyze significant Spanish and Latin American cultural and literary texts, broadly defined to include visual art, performances, and music, to explore space, society, and culture through the perspectives of various authors and artists.

SPAN 1432 - WRITING FEMINISM

Minimum Credits: 3

Maximum Credits: 3

This course attempts to examine writing and art produced by women. A writer from the Colony, as poet Juana Ines de la Cruz, or a character as Teresa in the film Retrato de Teresa, or painters as Frida Kahlo (Mexico) or Myrna Baez (Puerto Rico) are all important characters within a timeline, a context, and the struggle for voice and visibility. Ours is an intersectional approach to Patriarchy, violence, sexuality, race and art, which are the five topics of this course.

SPAN 1433 - WOMEN'S NARRATIVES IN LATIN AMERICA

Minimum Credits: 3

Maximum Credits: 3

For centuries in Latin America, women have been expressing their perspectives on important topics in various narrative formats such as essays, short stories, articles, speeches, testimonios and novels. In this course, students will examine representative narratives from two primary stances: first, as a response to the necessity of expression in a cultural context where writing has traditionally been seen as masculine; and second, as a claimed space for expressing the women's condition in their own social and cultural context in Latin America. The course will be organized by topics the authors examine in their works, such as politics, education, reproductive rights, domestic violence, sexuality, religion, violence, trauma, discrimination, health issues, and so on. Works will be chosen to represent various writing styles throughout the 19th, 20th and 21st centuries. Representative authors to be discussed will include Clorinda Mato de Turner, Teresa de la Parra, Juana Paula Manso, Antonieta Rivas Mercado, Nahui Olin, Eva Peron, Nela Martinez, Silvia Rivera Cusicanqui, Domitila Barrios de Chungara, Rosario Castellanos, Rosario Ferre, Elena Poniatowska, Sylvia Molloy, and Guadalupe Nettel.

SPAN 1435 - POETICS OF BILINGUALISM

Minimum Credits: 3

Maximum Credits: 3

Concentrating on what is bilingualism, and after reviewing its historical and cultural parameters in Latin America, we will study the violent encounter between the Indigenous languages and the languages brought by the Conquistadores (Spanish, English, French, Portuguese), and its impact on the formation of the nation, class relations, race and language. This will be a non-chronological account of the cultural and linguistic genocides, encounters, shocks and invasions from the times of La Malinche, Sor Juana, and other authors to Latino Writing Today. Theories of Francine Massiello, Doris Sommer, and Juan Flores will be examined, as well as authors such as Sylvia Molloy, Octavio Paz, Esmeralda Santiago, Luis Rafael Sánchez, Guillermo Gómez Peña, Pedro Pietri, Dolores Prida Gloria Anzaldúa, and Lhasa di Sela, among others. We will explore questions regarding bilingualism, language and nation formation, translation studies, border studies, and minority writing. Discussion on the importance of bilingualism in a globalized world, as well as issues conforming publication and expectations on Latino writing will also be addressed.

SPAN 1436 - NATURE AND THE ENVIRONMENT IN HISPANIC LITERATURE AND CULTURE

Minimum Credits: 3

Maximum Credits: 3

The human imagination has long been captivated by nature and compelled to express it in art. In an age of a global environmental crisis, we turn to our own cultural production to make sense of nature, to wonder whether we can survive it, or whether it can survive us. Literature explores whether humans can achieve harmony with nature, questions what, if any, of our most human, most artificial trappings can coexist with the natural world. Environment has shaped the cultural production-and vice versa- of Latin America and the global reaches of the former Spanish empire. From the aquatic engineering that made the city of México-Tenochtitlán possible and Spanish colonizers' aspirations of earthly paradise to the 21st-century climate migrants of the Dry Corridor of Central America and the hurricanes of the Caribbean and Gulf of Mexico and tsunamis of the Philippines, the persistent tension between humans and nature spans centuries and continents. In this course, we will trace the depiction of nature and the environment as well as environmental issues in global Hispanic literature and cultural production (to include visual art, music, and performance). Using the theoretical framework of ecocriticism, we will analyze these works to ask what they contribute to environmental understanding and action.

SPAN 1438 - AFRO-HISPANIC CULTURAL PRODUCTION: AFRO HISPANIC WRITERS

Minimum Credits: 3

Maximum Credits: 3

This course offers a survey of writing and other forms of cultural production in Spanish by and about Africans and Afro-descendants in the twentieth century (poetry, short stories, novel, visual media) in their national and historical context(s). The writers will be taken from Equatorial Guinea, a former Spanish colony in West Africa, the Caribbean and South America. The courses general objectives are to enable students to appreciate and to demonstrate knowledge

of the historical circumstances governing black writing and the black presence in the Hispanic world in the twentieth century, and to appreciate their thematic concerns and specificities, as well as the importance of their contributions to literature and culture in the national and universal contexts. It is also the course's objective to enable students to appreciate the thematic range of this body of materials, especially its engagement with race, with nationalism, with gender, and with the colonial past.

SPAN 1439 - QUEER MEXICO

Minimum Credits: 3

Maximum Credits: 3

From a queer theoretical perspective, as an extension of gender and sexuality studies, this course offers a panoramic view of cultural production in Mexico from 1901 to the present. As a point of departure, several milestones are presented in the sociocultural constructions of masculinity, femininity and sexuality and their respective transformations throughout the 20th century. Similarly, this course examines the themes, dynamics, trends and common sites of sexual diversity in contemporary Mexico. Incorporating a diversity of cultural texts (i.e. novels, essays, newspaper articles, videos, films, art, music, and performance.), this course centers thematically on the gender models that circulated before, during and after the 1910 Revolution, the debates about homosexuality during the decade of the 40s, 50s and 60s, the emergence of activist movement in favor of sexual diversity in the 70s, the cultural production of homosexual themes, the urban space in the development of sexually dissident practices, the HIV/AIDS pandemic, nightlife culture, sexual manifestations in the borderlands and in the indigenous communities of Oaxaca, lesbianism, transsexualism, the debate on queerness, the cultural symbols and practices of the LGBT community in Mexico. This course aims to develop critical thinking skills through the rigorous examination of the assumptions that fix, homogenize and perpetuate the traditional narratives that lead to a dichotomy of sexuality in contemporary Mexico.

SPAN 1441 - READING COLONIAL LATIN AMERICA

Minimum Credits: 3

Maximum Credits: 3

In this course, students analyze significant Latin American literary texts, broadly defined to include visual art, performances, and music, to explore space, society, and culture through the perspectives of indigenous, mestizo, European, and creole authors of the colonial period, from the first European presence in the Americas in 1492 through the eighteenth century. Students will develop their skills and knowledge to read, analyze, write, and speak effectively in Spanish about colonial literature, situating their own arguments in relation to ongoing scholarly debates and a broader historical framework.

SPAN 1442 - INDIOS CHINOS, INCA WITCHES, AFRICAN HEALERS, CRYPTO JEWISH, AND OLD CHRISTIANS REFLECTION

Minimum Credits: 3

Maximum Credits: 3

Indios Chinos, Inca Witches, African Healers, Crypto Jewish, and Old Christians: Racial, Ethnic and Religious Difference in Colonial Latin America Diversity has been a constant of human societies, and so have been the different ways in which people have made sense of it. Colonial Latin America was no exception. After 1492 Indigenous Latin American polities progressively went from independent entities to subordinated units of the Portuguese and Spanish Empires, and large numbers of African and Asian peoples were uprooted and transported to Latin America. During this long, protracted process of transformation Western ideas about difference were put to the test and gave birth to unexpected questions. Was it the stars that made people different? Or was it that the sun was stronger in the tropics? Perhaps it was the mother's imagination, or the Devil messing with it? Were all people descendants of the same act of creation or had there been many? Were the varying degrees of masculinity at the roots of it all? And anyway, how fundamental were the differences? Could skin color be rubbed off? Was the soul the same color as the skin? Was the blood tainted? Would conversion to Christianity solve it all? If the colonizers' plural, often contradictory theories made simple answers difficult, the questions got even more complex as a result of the West's Others' adaptations and resistance. Native peoples of the Americas, Asians and Africans did not simply endure Western theories about difference, they also actively engaged them to build their own identity projects and social selves. At times, they used Western ideas to protect their polities. Aware of the many contradictions between them, Indigenous, Asian and African actors used one theory against the other and pretended to be the best example of a particular theory's results when it was convenient to them, like "playing Indian." At other times, they questioned Spanish and Portuguese classifications and advanced their own arguments. Yet at other times, they rejected Western racial policies flatly and argued that Europeans should go native which they sometimes did, becoming Indigenous witches who joined forces with disguised Jews to subvert the colonial order of things. This course examines this constant process of change in its multiple manifestations as well as the different scholarly views of it. The materials go from European ideas about difference pre-1492 to the end of the colonial period in the 1800s, from Indian and Philippine slaves in Mexico City to Africans in Peru, Brazil, and Colombia, from Jews conspirators in the Andes to Spanish witches in Lima, from transvestites to Inquisitors, from slaves to saints, and from sugar mill owners to Inca activists. We also examine the diverse ways in which current scholars think about difference in colonial times. As it happens, there is no agreement today on the meaning of central concepts like "race" or "ethnicity" perhaps because in colonial times there was no clear consensus either. The goal of the course is, therefore, not to arrive to a fast and sure answer, but to become familiar with the questions and problems that informed and continue to inform past and present conversations about racial, ethnic and religious difference and diversity.

SPAN 1451 - DISRUPTIVE BODIES: STORIES OF ILLNESS AND DISABILITY

Minimum Credits: 3

Maximum Credits: 3

Departing from the idea that illness and disabilities disrupt the establishment in terms of normality, ability and productivity, this course will focus on the politics of illness and disabilities with the goal of humanizing these processes through narratives and testimonies. Through this we aim to confront the notions of stigma, tragedy and abnormality that have surrounded chronic illness, "catastrophic" illness, and disability; notions that ultimately affect people who experience these conditions. Humanizing means to visibilize journeys, processes, feelings, and experiences of those who are going through sickness or live with disabilities. With the premise that an ill or disabled body is a disruptive body, we will approach sickness and disability from a sociocultural perspective in Latin America and Spain. We will address questions such as: What does it mean to be ill or to live with disabilities? How are these "disruptive bodies" seen and treated? What are the differences and connections between an ill body and a disabled one? What are the politics of pain and suffering in relation to these processes? How do stories told by protagonists, or their loved ones inform us compared to accounts from the medical institution and ableist social paradigms? We will also examine the relationship between illness and disability and the cultural, economical, and political issues of different countries in the

Hispanic world. We will try to demystify preconceptions and highlight relevant testimonies from an intersectional perspective. Students will analyze illness and disability through critical interpretation of literary texts, poems, movies*, documentaries, music, media and visual materials using theoretical approaches. Students will be exposed to the following issues: Frontiers and Intersections between Illness and Disability. The implications of Chronic Illness, Perceptions of the Sick Body, Loved Ones' Reflections on Illness, Parenting Children with Disabilities, Demystifying Cancer, The Invisibility of Pain of Ill and Disabled Bodies, The Relevance of Mental Health in Current Times, Sick Writers, Illness as Stigma: AIDS, Covid-19 Pandemic Accounts, and Disabilities and Activism. Students will be expected to engage in critical discussions and engage with invited speakers, and they will be given the opportunity to connect and contrast these issues with their own cultural experience. The course will be student-centered, with mandatory participation. Classes will employ a discussion format led by the instructor.

SPAN 1453 - AVANT GARDE MOVEMENTS IN LATIN AMERICA

Minimum Credits: 3

Maximum Credits: 3

This course focuses on avant garde movements in Spanish American and Brazil, including creacionismo (Vicente Huidobro) ultraismo (Jorge Luis Borges, antropofagia (Oswald de Andrade and others), estridentismo (Manual Maples Arce and others), the Contemporaneos group (Xavier Villaurrutia, Salvador Novo and others), and various other groups. The core readings will be the manifestoes and other documents in the Jorge Schwartz anthology (Vanguardias latinoamericanas), Mihail Grunfeld's anthology of Latin American avant garde poetry and Hugo Verani's anthology of Latin American avant garde prose. Selected critical writing on the avant garde (Burger, Poggioli and others) will also be considered.

SPAN 1455 - BORDER STUDIES

Minimum Credits: 3

Maximum Credits: 3

This course is a comparative and relational examination of borders/boundaries/borderlands in the Americas, looking specifically at Latin American (im)migration to the US and (im)migration within Latin America. Starting with national/territorial borders, we move to explore the literal and figurative borders experienced by racialized immigrants, refugees and minoritized communities. Paying attention to the roles of gender, sexuality and racialization in shaping the experiences and life opportunities for migrant populations, we will focus on cultural texts (literature, film, visual culture, music etc.) and critiques from feminist, queer, indigenous, and people of color.

SPAN 1456 - LATIN AMERICAN SOCIAL MOVEMENTS

Minimum Credits: 3

Maximum Credits: 3

This course is designed to introduce students to the concepts of resistance and social activism in Latin American: how social movements and activism are organized, exercised, enacted, and contested. From everyday forms of resistance to organized movements, we will examine some concrete historical and cultural situations in relation to major topics: the legacy of past revolutions, human rights and memory, Neoliberalism and globalization, environmental issues, women and gay activism, and Hispanic immigration to the US. Through critical and fictional texts, films and documentaries, music and visual arts, students will gain a multidimensional understanding of contemporary Hispanic issues and different ways and instances of social resistance.

Course Attributes: Undergraduate Research

SPAN 1458 - PLANTS, SPIRITUALITY AND HEALING IN LATIN AMERICAN CULTURE

Minimum Credits: 3

Maximum Credits: 3

The basic premise of this course is that literature and cultural expressions in general provide a robust articulation of imaginary, symbolic, philosophical, ethical, and spiritual aspects of health and healing. We will examine academic articles, essays, poems, narratives, films, videos and paintings that explore the relationship between plants, spirituality and healing as constructed by popular, indigenous and Afrodescendant traditions in Latin America. These expressions offer insightful approaches that contribute to an ongoing critical discussion concerning these topics. Given that our purpose is to address artistic and philosophical aspects that relate to peoples' conceptions about spirituality, health and healing, which in-of-themselves constitute an essential part of any comprehensive approach to health in general, this course does not specifically address the empirical therapeutic value (of lack of) of specific practices. Section I will discuss current global and national contexts of traditional medicine. Section II will provide an overview of significant issues in Latin American ethnobotany. Section III will analyze the fundamental metaphysics and ethics of Amerindian myth and ritual. Section IV will examine literary works and films that provide critical insights to contemporary philosophies of spirituality and healing, and, as the arts usually do, connect these insights to a sundry array of contemporary issues, opening up unexpected vistas. Geo-cultural matrices of examined works include indigenous and Afrodescendant societies in Mexico, Central America, the Andes, Amazonia, and the Caribbean (Haiti-Dominican Republic), as well as urban societies in Bolivia, Colombia, and Argentina.

SPAN 1459 - MAPPING THE FEMALE BODY: A CULTURAL APPROACH TO WOMEN'S HEALTH IN THE HISPANIC WORLD

Minimum Credits: 3

Maximum Credits: 3

This course provides an overview of the female body and women's health in Latin America and Spain from a cultural perspective, which addresses related social implications and health rights. Students will analyze women's health issues through critical interpretation of literary texts, poems, movies, documentaries, and photography using media perspectives and theoretical approaches. Students will be exposed to topics across four overarching themes: adolescence, reproduction, illness, and aging, with subtopics such as sexuality, sexual orientation, gender identities in relation to transgender and intersex issues, pregnancy, infertility, breast cancer, menopause, and eating disorders, among others. At the same time, students will be exposed to a broader geographical and historical panorama by

examining the relationship between women's health issues to the political and cultural issues of different countries in the Hispanic world. Based on these particular contexts, communities, and identities, we will try to answer the question why these women's issues happened in those regions and within specific communities. Students will be expected to engage in critical discussions, and will be given the opportunity to connect and contrast these issues with their own cultural experience.

SPAN 1463 - BORGES SHORT STORIES

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the short stories of the Argentine writer Jorge Luis Borges (1899-1986), with some discussion of his essays and poetry also. The short stories of *Ficciones* (1944) and *El Aleph* (1949) revolutionized the genre of the short story, and have been hugely influential in world literature, the history of science, philosophy and other fields. Attention will also be paid to the earlier stories of *Historia universal de la infamia* (1935) and to the stories Borges dictated after he went blind in 1955. The resources of Pitt's Borges Center (www.borges.pitt.edu) will be integral to the course. This course is taught in Spanish.

SPAN 1472 - MEXICAN LITERATURE, ARTS AND CULTURE: UNSETTLING MEXICAN NATIONALISMS

Minimum Credits: 3

Maximum Credits: 3

This course reviews the last hundred years of Mexican cultural history, from the 1910 Revolution to the present. Taking into consideration the meta concepts that define national culture: "the cosmic race", "the post-Mexican condition" and the "labyrinth of solitude", and under the lenses of indigenous, nationalist, feminist and postmodernist theories, this course examines several milestones of national culture. This analysis focuses on the cultural programs of the post-revolutionary period (muralism), the rise of the Mexican cultural industry (radio, cinema, comics, telenovela), the transcendental moments of conflict (the 1968 Olympic Games, the implementation of the Free Trade Agreement, and the rebellion of the Zapatistas in 1994) and transnational tendencies (the pachuco, the narcoculture). The objective of this course is not, however, to define Mexican national culture, but to analyze, problematize and unsettle the ideological conflict and cultural struggles that contextualize the production and diffusion of the great works of the last century through critical approaches guided by such concepts as those of ideology, race, gender, nationalism, the border, and post nationalism.

Academic Career: Undergraduate

Course Component: Lecture

SPAN 1480 - U.S. LATINX CULTURAL STUDIES

Minimum Credits: 3

Maximum Credits: 3

What and who is Latinx? What is the difference between Latina/o and Latinx? How do Latinx imaginaries shape and how are they shaped by the so-called "American" experience? This course provides an overview of how Latinxs have created competing representations of their experience in contemporary cultural production within the United States. We will examine the factors that determine the overrepresentation or underrepresentation of certain Latinx groups. Therefore, this class will consider the Chicana/o and Caribbean-American diaspora experience, as well as less-represented groups such as Central American-Americans, Brazilian-Americans or "Brazucas," and Afro-Latinxs. By critically engaging with the cultural specificities of local Latinx communities through community-engaged learning, we will develop a theoretical and experiential understanding of the continuities and discontinuities that characterize their relationship with Latin America and Spain. We will pay close attention to how their experiences and encounters with different rural and urban settings have shaped Latinxs' understanding of national belonging to the United States, Latin America, and the Spanish-speaking world at large. Ultimately, what is at stake is the consideration of how linguistic, cultural, and political dis-encounters remap the US-Latinx American experience in relation to the American experience per se. This course is taught in Spanish.

Statistics

STAT 0200 - BASIC APPLIED STATISTICS

Minimum Credits: 4

Maximum Credits: 4

This course teaches methods of descriptive and inferential statistics. Topics include data collection and description, hypothesis testing, correlation and regression the analysis of variance, and contingency tables. Students will learn how to use a statistical computer package.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Quant.-Formal Reason General Ed. Requirement, SCI Quantitative: Statistics GE. Req.

STAT 0800 - STATISTICS IN THE MODERN WORLD

Minimum Credits: 3

Maximum Credits: 3

The course introduces statistical reasoning to a diverse audience. The main goal is the understanding of some basic statistical principles so that the student can understand research reports involving statistics and applications of statistics reported in the media. Statistical reasoning will be taught through the use of examples. An important part of the course will be a nontechnical discussion of controlled and randomized experiments. The subject matter will emphasize examples from the health and social sciences.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Quant.-Formal Reason General Ed. Requirement

STAT 1000 - APPLIED STATISTICAL METHODS

Minimum Credits: 4

Maximum Credits: 4

This course is an intensive introduction to statistical methods. It is designed for students who want to do data analysis and to study further ideas in applied statistics beyond this course. The topics covered include descriptive statistics, elementary probability, random sampling, controlled experiments, hypothesis testing, regression and the analysis of variance. Emphasis will be placed on the statistical reasoning underlying the methods. Students will also become proficient at the use of a statistical software package.

Course Attributes: DSAS Quant.-Formal Reason General Ed. Requirement, SCI Quantitative: Statistics GE. Req.

STAT 1050 - DATA JAM: USING BIG DATA FOR COMMUNITY GOOD

Minimum Credits: 3

Maximum Credits: 3

This is a course that introduces students to the various aspects of big data science --- data visualization and analytics, engaging communities in using big data, and the ethics and equitable access to big data. The course will be co-taught by faculty with expertise in these various areas. Big Data Science is becoming increasingly relevant as big data is everywhere and its use is impacting almost every aspect of modern life. This is a "hands-on" learning experience as university students taking the course will also serve as mentors for teams of high school students in a local big data competition, The Pittsburgh DataJam (see <http://pghdataworks.org> to learn about the Pittsburgh DataJam).

Academic Career: Undergraduate

Course Component: Lecture
Grade Component: LG/SU3 Elective Basis

STAT 1053 - DATA JAM LAB

Minimum Credits: 1

Maximum Credits: 1

This lab course accompanies STAT 1050: Using Big Data for Community Good, a one semester, 3-credit, lecture course that teaches (1) the basics of data science (data visualization and analytics), and how to communicate these skills to others, (2) a Community-Based Research approach - to gain insight and ideas about how academic structures can be used for positive community impact, (3) principles guiding the ethics of collecting and using big data, (4) guidance in how to work fairly, safely and effectively with high school students, and (5) practical mentorship experience working with high school students as they participate in the DataJam. DataJam Lab is a one semester, 1-credit course that extends the practical mentorship experience of working with high school students as they participate in DataJam. Mentorship of high school DataJam teams involves helping teams (a) select a research question to focus their DataJam project on, (b) develop a hypothesis which they will test by data analysis, (c) find publicly available datasets that can be analyzed to answer their research question, (d) prepare a DataJam proposal, (e) use various computer programs (Google Sheets, Excel, Tableau, GGPlot) to prepare data visualizations, (f) develop an analytical strategy for answering their research question from the data they have identified, (g) use various computer programs (Google Sheets, Excel, R Studio, Python) to undertake statistical analyses of the data to answer their question, (h) interpret their statistical results, (i) prepare a poster summarizing the results of their research project, and (j) prepare and practice a 10-minute presentation summarizing the results of their research project.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

STAT 1060 - DATA SCIENCE FOUNDATIONS

Minimum Credits: 4

Maximum Credits: 4

This course is a general introduction to the rapidly growing field of data science. The topics covered include descriptive statistics, probability, sampling, hypothesis testing, and ANOVA. Broader topics such as regression analysis, model selection, model diagnostics, etc. will also be discussed if time permits. The course will be very hands-on with students actively carrying out the techniques/procedures to foster the ability to reason with data. As part of this process, students will learn the basics of programming in R, and these skills will be reinforced through weekly labs. In developing the core concepts, students will also be exposed to ancillary topics such as data ethics, simulation, and best practices in programming. No previous coding experience nor background in statistics will be assumed.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

STAT 1100 - STATISTICS AND PROBABILITY FOR BUSINESS MANAGEMENT

Minimum Credits: 4

Maximum Credits: 4

This is a one-term introduction to statistics and probability. Both modeling and data analysis will be emphasized. Various probability models for discrete and continuous variables will be analyzed. Inferential, descriptive and data analysis techniques will be covered with examples from management. A statistical package will be introduced and used to conduct data analyses.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: MATH 0120 or MATH 0126 or MATH 0220 or MATH 0235

Course Attributes: SCI Quantitative: Statistics GE. Req.

STAT 1151 - INTRODUCTION TO PROBABILITY

Minimum Credits: 3

Maximum Credits: 3

This course presents at both a theoretical and applied level the basic probability concepts required for statistical inference. Topics include set theory and basic probability, independence and Bayes' theorem, discrete random variables and their distributions--Bernoulli, Binomial, Poisson, and geometric, continuous random variables and their distributions--uniform, exponential, gamma, beta, and normal, transformation of random variables, moment and moment generating functions, multivariate discrete distribution, marginal and conditional distribution and independent variables.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: MATH 0230 or 0235 or 0240 or 0245

Course Attributes: SCI Quantitative: Statistics GE. Req.

STAT 1152 - INTRODUCTION TO MATHEMATICAL STATISTICS

Minimum Credits: 3

Maximum Credits: 3

This course is continued from STAT 1151, Introduction to Probability, and brings together the elementary concepts of statistical inference, which are essential for advanced statistical methods. A brief review of probability theory will be provided at the beginning. Topics include functions of random variables; sampling distributions and order statistics; methods of point and interval estimation for variances and differences in two means and proportions; properties of estimators and their applications; theory and applications of hypothesis testing including the Neyman-Pearson lemma, power function of a test, and likelihood ratio tests; regression; and analysis of variance.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PLAN: STAT or ECON-STAT or DATA SCI; PREQ: STAT 1151 or MATH 1119

Course Attributes: SCI Quantitative: Statistics GE. Req.

STAT 1201 - APPLIED NONPARAMETRIC STATISTICS

Minimum Credits: 3

Maximum Credits: 3

The purpose of this course will be to prepare students to use standard nonparametric tests for problems that frequently occur in applications. The Wilcoxon, Fisher (sign), Ansari-Bradley, Miller (jackknife), Kruskal-Wallis, Kendall, and Kolmogorov-Smirnov tests will be discussed. Minitab subroutines will be used to facilitate computation.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: STAT 0200 or 1000 or 1100 or 1152; MIN GRADE: STAT 0200 B-

STAT 1211 - APPLIED CATEGORICAL DATA ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

The purpose of this course is to provide contingency table techniques for research workers in the social sciences,

medical sciences and other areas where it is necessary to investigate relationships between areas where it is necessary to investigate relationships between qualitative variables. The course deals with the chi-square test and standard 2x2 and RXC contingency tables, as well as log linear and other special types of contingency tables analysis.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: STAT 0200 or 1000 or 1100 or 1152; MIN GRADE: STAT 0200 B-

STAT 1221 - APPLIED REGRESSION

Minimum Credits: 3

Maximum Credits: 3

This course covers simple linear regression (one variable) and one way analysis of variance followed by more complicated regression models. More complex ANOVA models are treated if time permits. Some computer applications will usually be considered.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: STAT 0200 or 1000 or 1060 or 1100 or 1152; MIN GRADE: B-

Course Attributes: Capstone Course

STAT 1223 - APPLIED REGRESSION WRITING COMPONENT

Minimum Credits: 1

Maximum Credits: 1

This course satisfies the writing course requirement for statistics majors and must be taken in conjunction with STAT 1221 applied regression.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: STAT 0200 or 1000 or 1100 or 1152; CREQ: STAT 1221; MIN GRADE: STAT 0200 B-; PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGCOMP 0213 or ENGCOMP 0214 or ENGFLM 0210 or FP (0003 or 0006)

Course Attributes: Capstone Course, Undergraduate Research, Writing Intensive Course (WRIT)

STAT 1241 - APPLIED SAMPLING

Minimum Credits: 3

Maximum Credits: 3

This course considers basic applied principles and approaches for conducting a sample survey. The following will be discussed: how to design a survey, how to analyze a survey with attention paid to different types of survey techniques and corresponding statistical methods. The course will provide survey skills for the social sciences, psychology, economics, marketing and management, and health sciences.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: STAT 0200 or 1000 or 1100 or 1152; MIN GRADE: STAT 0200 B-

STAT 1251 - STATISTICAL QUALITY CONTROL

Minimum Credits: 3

Maximum Credits: 3

This course teaches students to design valid statistical experiments and to analyze them. Among the designs considered are completely randomized designs, randomized block designs, Latin lemmas, factorial designs, and complete block designs.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: STAT 0200 or 1000 or 1100 or 1152; MIN GRADE: STAT 0200 B-

STAT 1251 - STATISTICAL QUALITY CONTROL

Minimum Credits: 3

Maximum Credits: 3

This course is involved with statistical methods for quality and process control. It is intended for all students who will use statistics in an industrial setting. Introductory topics include probability models and statistical estimation for quality. The main focus will be on control charts and tolerances. Acceptance sampling will also be discussed. A final but quite important topic will be Taguchi methods.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: STAT 0200 or 1000 or 1100 or 1152; MIN GRADE: STAT 0200 B-

STAT 1261 - PRINCIPLES OF DATA SCIENCE

Minimum Credits: 3

Maximum Credits: 3

This course is a gentle introduction to data science. Data science is an emerging interdisciplinary field stemming from statistics, mathematics and computer science. At its core, data science involves using automated methods to analyze massive amounts of data and to extract knowledge from them. The objective of this course is to provide students with a principled introduction to data science that properly combines inferential thinking and computational thinking. Students will learn the fundamental pipeline of data science, ranging from data acquisition, data clean-up, data exploration and visualization, modeling and inference, to professional reporting.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: STAT 0200 or 1000 or 1100 or 1060

STAT 1281 - DATA SCIENCE WITH PYTHON

Minimum Credits: 3

Maximum Credits: 3

This course is a gentle introduction to the field of data science and machine learning. You will learn how to import data, tidy and transform it, visualize it, and how to join data sets. You will also learn about training, tuning, and testing various machine learning models, and ultimately generating reproducible reports. Python as well as a collection of powerful, open-source tools will be explored and experienced within the context of solving data science problems: Jupyter notebook (creating reports) Numpy (data structure) pandas (data wrangling) matplotlib (data visualization) scikit-learn (machine learning) Learning Objectives Workflow of Data Science Data Wrangling and Visualization Machine Learning Models Python and Jupyter Notebook By the end of the course, you should be able to get the data, explore it, formulate a research question, use tools and techniques in data science to explore the answer to the question, and share your findings.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

STAT 1291 - TOPICS APPLIED STATISTICS 1

Minimum Credits: 3

Maximum Credits: 3

Various topics concerning the applications of statistics will be taught on an irregular basis depending on faculty interests and students' needs. Example of possible topics include re-sampling techniques in statistics; statistical graphics; cluster analysis; and classification methods.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

STAT 1292 - TOPICS IN APPLIED STATISTICS 2

Minimum Credits: 3

Maximum Credits: 3

This course is a gentle introduction to the field of data science and machine learning. Major topics include data import, data wrangling, data visualization, training, tuning, and testing various machine learning models, and generating reproducible reports. Python basics and a collection of packages, such as Jupyter Notebook, NumPy, Pandas, Matplotlib, and Scikit-Learn, will be studied within the context of solving data science problems.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

STAT 1293 - TOPICS IN APPLIED STATISTICS 3

Minimum Credits: 3

Maximum Credits: 3

Various topics concerning the applications of statistics will be taught on an irregular basis depending on faculty interests and students' needs. Example of possible topics include re-sampling techniques in statistics; statistical graphics; cluster analysis; and classification methods.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: STAT 0200 or STAT 1000 or STAT 1100

STAT 1294 - TOPICS IN APPLIED STATISTICS 4

Minimum Credits: 3

Maximum Credits: 3

This course is a gentle introduction to the field of data science and machine learning. Major topics include data import, data wrangling, data visualization, training, tuning, and testing various machine learning models, and generating reproducible reports. Python basics and a collection of packages, such as Jupyter Notebook, NumPy, Pandas, Matplotlib, and Scikit-Learn, will be studied within the context of solving data science problems.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

STAT 1301 - STATISTICAL PACKAGES

Minimum Credits: 3

Maximum Credits: 3

This course will cover a variety of topics concerning computing and statistics. Basic statistical analysis packages such as BMPD, SPSS, Minitab, and IMSL will be discussed and compared. Other computational issues that will be discussed include simulation, graphics, elementary database management, and certain stand-alone statistical programs.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: STAT 1221

STAT 1311 - APPLIED MULTIVARIATE ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

We start with the basic concepts of regression and correlation. After developing the necessary linear algebra, we will study the multivariate normal and then go on to do one or more of the following: cluster analysis, discriminant analysis, directional data, and factor analysis. We will make use of the Minitab and BMDP computer packages.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: STAT 1221

STAT 1321 - APPLIED TIME SERIES

Minimum Credits: 3

Maximum Credits: 3

The objective of the course is to present at the elementary level, a unified and reasonably complete exposition of statistical methods used in time series analysis. Serious consideration is given to both time and frequency domain approaches. Real data from a number of subject fields will be analyzed as they occur in the exposition.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: STAT 1151 and (STAT 1221 or ECON 1150)

STAT 1331 - FINANCIAL ECONOMETRICS

Minimum Credits: 3

Maximum Credits: 3

This course will provide a comprehensive and systematic account of financial econometric models and their applications to modeling and prediction of financial time series data, focusing on asset returns. Most of the emphasis is on applied time series modeling and forecasting. Students at the end of the course will have a working knowledge of financial time series data and gain expertise in statistical software to conduct the analyses.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ECON 1150 or STAT 1221

STAT 1341 - SPORTS ANALYTICS

Minimum Credits: 3

Maximum Credits: 3

This course will explore various techniques for analyzing and assessing players and teams across the four major sports. Students will learn about advanced metrics in baseball, football, hockey, and basketball. The course will also cover different methods of rating sports teams, in-game win probability, Monte Carlo simulations, and the statistics behind

sports betting. The statistical software package R will be used throughout the course.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: STAT 1221 or STAT 1261

STAT 1361 - STATISTICAL LEARNING AND DATA SCIENCE

Minimum Credits: 3

Maximum Credits: 3

This course is designed to provide a broad introduction to the field of data science and to expose students to many of the statistical tools most commonly used by modern data scientists. We will explore a wide variety of models and algorithms in a data-driven fashion. Topics will include modeling techniques ranging from classic statistical modeling (e.g. linear and logistic regression) to modern statistical learning (e.g. regularization and lasso) to fundamental machine learning (e.g. random forests and support vector machines). Particular attention will be given to the sorts of scientific questions that can be asked and answered within the different frameworks. Students will have the opportunity to utilize modern, interesting datasets to both provide data-driven analytical solutions and also to formally assess the uncertainty in making such determinations. The R language will be used extensively for statistical computing. Some prior knowledge or experience with R or related programming languages is helpful but not essential

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: STAT 1261 or STAT 1291 or (STAT 1221 and Knowledge of R)

STAT 1631 - INTERMEDIATE PROBABILITY

Minimum Credits: 3

Maximum Credits: 3

This course is the first half of a two term sequence in mathematical statistics intended for undergraduate students and graduate applied statistics majors. Topics to be covered include probability concepts, random variable, discrete and continuous variables, joint distributions, functions of random variables, and some sampling distributions.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: STAT 1151 and MATH 0240

Course Attributes: Capstone Course

STAT 1632 - INTERMEDIATE MATHEMATICAL STATISTICAL

Minimum Credits: 3

Maximum Credits: 3

This course is the second half of a two term course. Topics to be covered include estimation, inference, linear models, and an introduction to Bayesian estimation.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: STAT 1631 and MATH 0240

Course Attributes: Capstone Course

STAT 1651 - INTRODUCTION TO BAYESIAN STATISTICS

Minimum Credits: 3

Maximum Credits: 3

This course will give an introduction to Bayesian statistics. Topics to be covered include prior and posterior distributions, multi-level models, model checking and selection, stochastic simulation by Markov Chain Monte Carlo.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: STAT 1151 OR 1631, STAT 1152 OR 1632, STAT 1221 Recommended STAT 1311.

STAT 1661 - LINEAR REGRESSION

Minimum Credits: 3

Maximum Credits: 3

The topics to be covered include: fitting a straight line, examination of residuals, two independent variables, polynomial models, selection procedures, and model building.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: STAT 1221 and (1152 or 1632)

STAT 1731 - STOCHASTIC PROCESSES

Minimum Credits: 3

Maximum Credits: 3

This course provides an introduction to stochastic processes and its applications. The major topics are Markov chains, Poisson processes, Brownian motion, and branching processes.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: STAT 1151 or MATH 1119

STAT 1741 - APPLIED PROBABILITY THEORY

Minimum Credits: 3

Maximum Credits: 3

The course will begin with an introduction to conditional probability. Topics to be covered include the Poisson process, queueing processes, renewal processes, and reliability theory.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: STAT 1151 or 1631

STAT 1900 - INTERNSHIP

Minimum Credits: 1

Maximum Credits: 3

Under faculty supervision the student participates in a statistics project.

Academic Career: Undergraduate

Course Component: Internship

Grade Component: H/S/U Basis

Course Attributes: Capstone Course, Undergraduate Internship

STAT 1902 - DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 9

With approval from an instructor, the student will participate in a program of directed study in statistics or probability.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SNC Elective Basis

Course Attributes: Capstone Course

STAT 1961 - STATISTICAL DATA SCIENCE IN ACTION

Minimum Credits: 3

Maximum Credits: 3

This course is designed to provide senior students majoring in data science an opportunity to complete a realistic, in-depth applied data science project from start to finish. Students will begin by identifying a dataset and key questions of interest to be examined. Once approved, students will prepare a detailed analysis plan utilizing the various statistical modeling and machine learning strategies learned throughout previous courses. As these analyses are carried out, students will regularly provide interim progress reports and updates; students not presenting will ask questions and provide suggestions and constructive criticism. The semester will culminate with each student providing a final professional presentation of results along with detailed written technical and non-technical reports. These projects and reports are designed so as to be easily incorporated into a student portfolio of professional data science work. Students are expected to utilize the R programming language to perform the necessary computing for their project. Prior knowledge and experience with R is expected.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: LG/SNC Elective Basis

STAT 2131 - APPLIED STATISTICAL METHODS 1

Minimum Credits: 3

Maximum Credits: 3

This introductory graduate level course on applied statistics covers a wide variety of problems. We begin with simple data description and go on to standard estimation and testing problems. We then study various types of linear models. We make extensive use of the computer; the student will learn BMDP and Minitab.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC

STAT 2132 - APPLIED STATISTICAL METHODS 2

Minimum Credits: 3

Maximum Credits: 3

This course is a continuation of STAT 2131.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC

Course Requirements: PREQ: STAT 2131

STAT 2381 - SUPERVISED STATISTICAL CONSULTING

Minimum Credits: 1

Maximum Credits: 6

In this course students will consult with clients in the consulting center. The consulting will be under the supervision of experienced consultants. Students will be taught how to provide statistical methods in conjunction with real problems and how to analyze and report the results.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: STAT 2132

STAT 2730 - STOCHASTIC PROCESSES

Minimum Credits: 3

Maximum Credits: 3

This course provides an introduction to stochastic processes and its applications. The major topics are Markov chains, Poisson processes, Brownian motion, and branching processes.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Graduate students in statistics or applied statistics.

Strategic Planning & Policy

BUSSPP 0020 - MANAGING COMPLEX ENVIRONMENTS

Minimum Credits: 3

Maximum Credits: 3

This 3-credit course introduces students to managing large firms in complex and rapidly changing environments. Students examine what managers do when faced with incomplete, noisy, and often inconsistent information about competitive forces, given (a) the firm's resources, capabilities, and constraints; (b) the effects of law, regulation, culture, and ethics; (c) the claims of various stakeholder constituencies, (d) industry structure and competition, (e) firm-level governance, and (f) market forces. This requires attention to the basic concepts, vocabulary, tools, and techniques of business and to the complex interrelations among the multiple dimensions of firm performance. The optional project will provide additional opportunity to develop several practical business skills, such as teamwork, the means of acquiring and using standard business and industry data, and fact-based reporting.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: UCBA; PLAN: NOT CASBUS-UNK or BUSNB-MN

Course Attributes: Global Studies

research projects that are linked to specific firms and industries. Business environment and practices abroad are compared to those in the US. The trip abroad includes company visits, lectures, and cultural excursions during a two-week study period in The Netherlands under the guidance of a faculty member.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

BUSSPP 1080 - STRATEGIC MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

Focuses on corporate and divisional policy formulation and implementation. Knowledge and techniques learned in earlier courses will be applied in an integrated fashion to the process of strategic decision-making and organizational change. Among topics considered in the course will be relationships of organizations to their environments, hierarchy of organizational objectives, structured as well as informal approaches to strategic planning, integration of business functions, organizational structure, and policy implementation and evaluation. Notable devotion to firms competitive dynamics.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PROG: College of Business Admin; LVL: Jr, Sr

BUSSPP 1740 - GLOBAL STRATEGY AND COMPETITIVE ADVANTAGE

Minimum Credits: 3

Maximum Credits: 3

This course explores the opportunities and challenges of global business in the 21st century. The discussions and exercises are designed to reveal the nuanced nature of competing globally, emphasizing both the increasing openness of borders and the continuing differences between countries. The course will employ case study analysis and discussion, along with a set of readings that are drawn from both academic and practitioner sources. An individual research project that involves identifying and researching a global business topic of interest to you will be a key part of the course.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: BUSPP 1080 (MIN GRAD 'C'); PLAN: Global Management (BSBA)

BUSSPP 1750 - COMMERCIALIZING NEW TECHNOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course covers theory, conceptual frameworks, and tools used to formulate strategies for commercializing new technologies. The analytical frameworks cover elements of commercialization strategy that are equally critical to start-ups and to corporate technology ventures. In addition, we discuss some of the key challenges that differ for start-ups versus established firms. The primary deliverable in the course is a professional quality project which evaluates the commercialization alternatives for an emerging technology. Your project team will be paired with a local inventor, unless you prefer to evaluate a technology of special interest to your team. Experienced entrepreneurs and experts in financing new technology ventures will also address the class.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

BUSSPP 1757 - FUNDAMENTALS OF STRATEGY CONSULTING

Minimum Credits: 3

Maximum Credits: 3

This course will begin to prepare students for a career in the consulting industry (or any problem-solving assignment outside of consulting). While our focus is specifically on strategy consulting, most of the concepts map nicely to other types of management consulting (e.g., supply chain, IT, HR, risk, etc.) or, again, problem-solving assignments outside of consultancy (e.g., financial or marketing planning & analysis). The curriculum is centered around what is known broadly in the consulting industry as "delivery", that is, the process of delivering a "strategy" or problem-solving project. The key activities include: Problem Definition (or "framing"); Work Planning (which includes hypothesis generation and analytical tool selection); Project Execution; Team Management; and Client Management (which includes all relevant stakeholders, most especially senior management). The curriculum will integrate and apply concepts students will have studied in other undergraduate business offerings, including (but not limited to) courses on business analytics, business communications, accounting/finance, marketing, and operations/project management. To practice core delivery concepts, we will simulate a few project elements with an actual Pittsburgh-based company.

Course Requirements: LVL: Junior or Senior

BUSSPP 1790 - GLOBAL MANGEMENT INTERNSHIP

Minimum Credits: 1

Maximum Credits: 3

The strategic management internship provides business credit for project assignments that augment a professional strategic management work experience.

Academic Career: Undergraduate

Course Component: Internship

Grade Component: Satisfactory/No Credit

BUSSPP 1795 - GLOBAL MANAGEMENT INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 3

An independent study course for students desiring to pursue in greater depth a specific set of strategic management issues or problems to which they have been introduced in other strategic management courses. The course involves directed reading and research under the guidance of a full-time faculty member.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Letter Grade

Studio Arts

SA 0110 - VISUAL THINKING

Minimum Credits: 3

Maximum Credits: 3

Visual Thinking offers an introduction and insight into the process and practice of creating visual art. The subject is explored by making images supported by lectures, discussions, and critiques. Students are introduced to the dynamics of composition, relationships of form and content, principles of color, visual analysis, and creative problem-solving. The course also seeks to provide some experience with a variety of media, develop skills in observation and technique, and encourage personal engagement in solving visual problems.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Creative Work General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

SA 0120 - PAINTING STUDIO 1

Minimum Credits: 3

Maximum Credits: 3

This course is an introduction to oil painting that emphasizes color mixing, painting techniques, and composition. The purpose of the course is to promote sensitivity to color interaction, advance technical and compositional skills, and provide a basis for creative growth and expression.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Creative Work General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

SA 0130 - DRAWING STUDIO 1

Minimum Credits: 3

Maximum Credits: 3

This course provides a comprehensive introduction to observational drawing. The coursework follows a sequence of exercises in various media that introduce basic drawing skills, techniques, and composition through observation and analysis of natural and manufactured forms. The course culminates with an introduction to the human figure.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Creative Work General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

SA 0140 - SCULPTURE STUDIO 1

Minimum Credits: 3

Maximum Credits: 3

This hands-on course is an introduction to the practice of sculpture in contemporary and historical context. Using clay, plaster, wire, and cardboard, projects address material and technical processes as well as expressive, conceptual, and critical concerns.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Creative Work General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

SA 0170 - DIGITAL STUDIO: CREATIVE CODING

Minimum Credits: 3

Maximum Credits: 3

This studio course is designed to be an introduction to the fundamentals of coding and digital circuits with a focus placed specifically on creative application (visual arts, sound/music, theater). In much the same way that introductory studio arts courses such as painting and sculpture are designed to explore materials, processes, tools and techniques, this course will take a parallel approach to technology as a medium. With a focus on digital systems of hardware and software, we will take a hands on approach to understand, explore and experiment with the core fundamentals of digital tools, materials, processes and ideas. As a grounding context for this course, we will look at the early artistic experiments on mainframe computers, which set the stage for the integrations of media and technology into contemporary creative practice (examples will cover visual arts, music, theater, poetry and others). No prior experience with programming, electronic circuits, or art is required or expected. We will work with the Arduino open source

microcontroller platform.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Attributes: DSAS Creative Work General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

SA 0180 - PHOTO STUDIO 1

Minimum Credits: 3

Maximum Credits: 3

Digital Studio:Photography introduces students to the technical, conceptual, and expressive potential of digital photography as an art form. Emphasis will be placed on creative use of digital cameras and software to conceptualize and translate ideas into meaningful images. Projects will be assigned in order to advance technical skills and develop new insights and approaches to image making. Students will begin to develop an individual voice as an artist by exploring and questioning the use of photography in their work; giving special attention to its conceptual and historical underpinnings, and its material form.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Creative Work General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

SA 1220 - PAINTING STUDIO 2

Minimum Credits: 3

Maximum Credits: 3

This course is a comprehensive exploration of painting techniques and concepts designed to expand awareness of the craft of painting and expose students to issues relevant to contemporary painting. Students have the option to work with either oil or acrylic paints. The course concludes with the development of a self-directed painting project.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: SA 0120 and 0130

SA 1230 - DRAWING STUDIO 2

Minimum Credits: 3

Maximum Credits: 3

Drawing Studio 2 builds on the knowledge, skills and ideas practiced in Drawing Studio 1 while introducing more advanced approaches to developing content and style in drawing. The coursework therefore is roughly divided between continued practice and development of essential aspects of drawing - such as mark, tone structure, light, space, form, composition and perspective - and assignments designed to spark student explorations of the conceptual and communicative possibilities of drawing. Students will continue to develop observational drawing skills including figure drawing during class meetings; projects will be concerned with technical and formal aspects of drawing while emphasizing ideas and expression. The class will include a diverse range of examples of drawing from art historical through contemporary practices.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: SA 0110 and 0130

SA 1240 - SCULPTURE STUDIO 2

Minimum Credits: 3

Maximum Credits: 3

A continuation of SA 0140, this course explores in greater depth the relationship between material, technique, process, and content in sculpture. Through expanded projects in plaster, wood, and metal, students deepen their experience and develop new skills, while interpreting assignments independently.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: SA 0110 and 0140

SA 1260 - PRINT STUDIO: INTAGLIO

Minimum Credits: 3

Maximum Credits: 3

Intaglio printmaking is a diverse process, offering artists a variety of approaches to create marks, experiment and communicate. This course focuses on making intaglio prints from copper plates. Basic intaglio printmaking techniques are explored through the use of dry point, hard ground line etching, and aquatint. Advanced techniques are explored as the semester progresses. Experimentation is encouraged while developing techniques as well as researching printmaking as a tool to challenge studio practice and content.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: SA 0110 and 0130

SA 1270 - DIGITAL STUDIO: IMAGING

Minimum Credits: 3

Maximum Credits: 3

Digital Studio: Imaging is a studio designed to immerse students in the investigation of digital art practices. Emphasis will be on the history and aesthetics of art and digital technology, including screen-based imaging practices, creative coding, and digital fabrication. Throughout the course, you will acquire and enhance technical skills, but the emphasis will be on the use of the computer as an art-making tool for your creative expression. Thoughtfulness, experimentation and curiosity is encouraged.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: SA 0110 and 0180

Course Attributes: Film Studies, Undergraduate Research

SA 1280 - PHOTO STUDIO 2

Minimum Credits: 3

Maximum Credits: 3

Photo 2 is centered around creating photographic images and an advanced inquiry into contemporary photographic practices and discourse. The course builds on the knowledge, skills, and ideas practiced in Digital Studio: Photography 1 while introducing advanced shooting techniques and an in-depth exploration of digital printing and modes of presentation. Early shooting exercises will ask you to experiment with different ways of seeing and thinking about image making and to discover uncharted photographic territory both literally and psychologically. You will be expected to create new images weekly, generating contact sheets and prints on a regular basis. The second half of the semester will give you the opportunity to develop a final project where content and form is determined by your personal interests.

Academic Career: Undergraduate

Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: SA 0110 and SA 0180
Course Attributes: Undergraduate Research

SA 1320 - PAINTING STUDIO: PROJECTS

Minimum Credits: 3

Maximum Credits: 3

Painting 1320 is a continuation of Painting 1220, with increased emphasis on developing a personal direction and focus in painting. Students in Painting 1320 are expected to declare a set of painting goals at the start of the course, formally and thematically related, to begin the process of creating a coherent body of work for portfolio development.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: SA 1220

Course Attributes: Undergraduate Research

SA 1330 - DRAWING STUDIO: PROJECTS

Minimum Credits: 3

Maximum Credits: 3

Drawing Studio: Projects is the third level drawing class for studio arts majors. The course builds on and expands on the foundation of drawing as an expressive and conceptual practice explored in Drawing Studio 2. The emphasis is on individual student drawing-based projects. The first part of the semester includes project assignments where students respond to open-ended prompts. During the second part of the semester students develop an ambitious body of work that involves drawing as a broadly defined discipline as it is situated in contemporary practice. Student work may take many forms which might include, but are not limited to: drawings on paper; installation or drawing in space; mapping; digitally produced drawing; comics or other narrative series; or time-based works such as artist books.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: SA 1230

Course Attributes: Capstone Course, Undergraduate Research

SA 1340 - SCULPTURE STUDIO: PROJECTS

Minimum Credits: 3

Maximum Credits: 3

Environmental art is grounded in interrelationships. These connections include not only physical and biological pathways but also cultural, political and historical aspects of any ecological system. This course focuses on the creation of metaphoric and functional artworks that reveal ecological consideration; these artistic gestures serve to enact change and as connection for the community.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: SA 1240

Course Attributes: Capstone Course, Undergraduate Research

SA 1345 - SCULPTURE STUDIO: INSTALLATION

Minimum Credits: 3

Maximum Credits: 3

This is an advanced sculpture course examining site specific and installation works as strategies in contemporary art. Continually challenged by newly revised and emerging roles in the art world and society at large, the purpose of this studio course is to provide a forum for the discussion and exploration of issues playing a role in the contemporary critical debate.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: SA 1240

Course Attributes: Undergraduate Research

SA 1365 - PRINT STUDIO: SCREENPRINT

Minimum Credits: 3

Maximum Credits: 3

This course approaches screenprinting as a medium of artistic expression. Basic screenprinting techniques will be covered, from image generation and screen preparation to the use of screenprinting as a creative outlet. Students will learn the use of basic equipment, printing approaches, papers, a variety of stenciling processes, and photographic and computer techniques to create marks, values, and textures. As the semester progresses, students will gain an awareness of the creative and expressive possibilities of screenprinting and be expected to develop an increasingly complex body of work through their personal vocabulary with the media which may include installation and sculpture.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: SA 0110 and 0120

Course Attributes: Undergraduate Research

SA 1370 - PREPARATION AND PRACTICE IN THE VISUAL ARTS

Minimum Credits: 3

Maximum Credits: 3

This is an upper-level writing course that is required for Studio Arts majors and may be taken by minors. Conducted in a seminar format, the course will inspect the wide range of career options in, and related to, the visual arts. Course topics and visitors will offer survival skills for maintaining a visual art practice, while course writings support preparations for professional opportunities.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: SA 0110 and 0120 and 0130 and 0140; PLAN: Studio Arts (BA); PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or 0213 or 0214 or ENGFLM 0210 or FP (0003 or 0006)

Course Attributes: Capstone Course, Undergraduate Research, Writing Intensive Course (WRIT)

SA 1380 - DIGITAL STUDIO: VIDEO

Minimum Credits: 3

Maximum Credits: 3

This is an advanced studio designed for students to intensely experiment and explore the moving digital image in an art context. Students will explore the concepts and skills involved in working with digital video, from pre to post-production. Each student will propose and undertake a final, self-designed project during the final four weeks of the term. Major effort, time, research, imagination, productivity, and involvement are expected throughout the term.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (SA 0110 and 0180) or ENGFLM 0590 or FILMST 0001 or FMST 0800 or FMST 0710

Course Attributes: Film Studies, Undergraduate Research

SA 1385 - DIGITAL STUDIO: ANIMATION

Minimum Credits: 3

Maximum Credits: 3

Digital Studio: Animation will introduce the concepts and skills involved in working with 2D digital animation - from pre to post-production. Each student will propose and undertake a final, self-designed project during the final four weeks of the term. Major effort, time, imagination, productivity, and involvement are expected throughout the term.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (SA 0110 and 0180) or ENGFLM 0590 or FILMST 0001 or FMST 0800

Course Attributes: Film Studies, Undergraduate Research

SA 1430 - DRAWING STUDIO: PERSPECTIVE

Minimum Credits: 3

Maximum Credits: 3

This course is designed to provide students with a thorough understanding of linear perspective and the role it plays in the development of a drawing. The focus is on how these conventions work and the role they play in developing the structural integrity of both form and space. The class will explore how to set up everything from simple perspective drawings to more complex perspectival compositions. Drawings done throughout the term will ultimately be edited and compiled into a bound text to be used as a reference guide for future studies.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: SA 0130 and (SA 0110 or ARC 0201); PLAN: Studio Arts (BA) or Architectural Studies (BA)

SA 1440 - SCULPTURE - FIGURE AND PORTRAIT

Minimum Credits: 3

Maximum Credits: 3

This course specializes in the study of the human form and the application of that study in portraiture. Close analysis of skeletal and muscle structure provides a basis for development of a life-size portrait modeled in clay. Modeling techniques are stressed. Interpretation of the subject is encouraged with the expectation of achieving likeness. This course also provides experience in plaster mold making and plaster casting procedures which are employed in the reproduction of the clay original.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: SA 0140; PLAN: Studio Arts (BA)

SA 1450 - PAINTING STUDIO: FIGURE

Minimum Credits: 3

Maximum Credits: 3

The purpose of this course is to develop skills in the representation of the human form using a variety of painting strategies. The figure will be examined using direct observation of live models and also by employing other sources such as: photography, film, and digital images. Through lecture and critique the class will study and apply concepts that focus on a variety of roles the figure plays in personal, social, and art historical contexts.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: SA 0120 and 0130

Course Attributes: Undergraduate Research

SA 1504 - DIRECTED STUDY: STUDIO

Minimum Credits: 3

Maximum Credits: 3

Directed study is a course for art majors to promote concentrated individual development in students who have demonstrated exceptional ability in studio courses.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Letter Grade

Course Attributes: Capstone Course

SA 1542 - WYOMING FIELD STUDY

Minimum Credits: 3

Maximum Credits: 3

This course is a directed study-like elective for Studio Arts majors. The field study is situated in Rock River, Wyoming between a 1930s motor lodge as primary residence, a 1919 bank building as makeshift studio, and the University's 4,000 acre Spring Creek Preserve. Students interact with others simultaneously enrolled in the Paleocology field study on the preserve exploring the landscape, flora and fauna, and gaining greater historical and geologic context while absorbing impressions for their creative work - the group camps at the preserve along with the science group at least two nights. Offering a complete focus on creative work within a community of others engaged in the same pursuits, students are fully engaged in their work approximately eight hours per day. Spontaneous and planned critiques, guest artists, and local field trips offer additional insights. A mid-field study trip to Utah offers a new landscape with the exploration of two, land-art works in more remote locales. The course culminates with presentations to the Paleocology group regarding creative work and Wyoming influences. A journal, artist statement, and reflective final paper are submitted upon return to Pittsburgh.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Letter Grade

SA 1550 - DIRECTED STUDY-PAINTING

Minimum Credits: 3

Maximum Credits: 3

Directed study is a course for art majors to promote concentrated individual development in students who have demonstrated exceptional ability in painting.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Letter Grade

Course Attributes: Capstone Course

SA 1570 - DIRECTED STUDY-DIGITAL

Minimum Credits: 3

Maximum Credits: 3

Directed study is a course for art majors to promote concentrated individual development in students who have demonstrated exceptional ability in electronic media.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Letter Grade

Course Attributes: Capstone Course

SA 1600 - SENIOR SEMINAR

Minimum Credits: 3

Maximum Credits: 3

Senior Seminar is a course that develops critical skills necessary to take your work to the next level. Throughout the course you will develop a body of work, engage in robust discussions about contemporary issues and critique your projects. Finally, you will collaborate to create a pop-up exhibition to present your work. Additionally, students will spend time off-campus meeting with artists and exploring art in the Greater Pittsburgh region.

Academic Career: Undergraduate

Course Attributes: Undergraduate Research

SA 1900 - INTERNSHIP

Minimum Credits: 1

Maximum Credits: 6

An internship is an elective which provides the opportunity for a studio arts major to obtain practical experience through on-the-job training in an art-related field. The candidate makes such arrangements for an internship under the supervision of a faculty sponsor.

Academic Career: Undergraduate

Course Component: Internship

Grade Component: Satisfactory/No Credit
Course Attributes: Capstone Course, Undergraduate Internship

SA 1902 - DIRECTED RESEARCH

Minimum Credits: 1

Maximum Credits: 3

Students can register for 1-3 credits of Directed Research with a faculty mentor.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Letter Grade

SA 1904 - UNDERGRADUATE TEACHING ASSISTANTSHIP

Minimum Credits: 1

Maximum Credits: 3

This course partners advanced studio arts majors with a faculty member as a teaching assistant in a current departmental course. The partnership is intended to offer further experience to dedicated students exploring a particular media with mentorship in studio management and an introduction to teaching, will enhance the course by offering enrolled students additional support and access for skill development and questions throughout the term, and will offer faculty valuable studio management and assistance in working with students.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: Satisfactory/No Credit

Course Attributes: Capstone Course

Supply Chain Management

BUSSCM 1720 - OPERATIONS MANAGEMENT INTERNSHIP

Minimum Credits: 3

Maximum Credits: 3

The operations management internship provides business credits for project assignments that augment a professional business environment work experience.

Academic Career: Undergraduate

Course Component: Internship

Grade Component: Letter Grade

BUSSCM 1725 - GLOBAL SUPPLY NETWORKS AND MANUFACTURING CULTURES IN LATIN AMERICA

Minimum Credits: 3

Maximum Credits: 3

The course provides students with the fundamentals of international supply chain methods with a special focus on Latin America and Uruguay. It will feature a 2-week study visit to Uruguay where students can place their understanding of those concepts within a cultural context. The course involves significant teamwork and allows students to complete an in-depth analysis of the global supply networks and manufacturing culture in Latin America with Uruguay as a reference point.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Satisfactory/No Credit

Course Requirements: PLAN: Accounting, Finance, General Management, Global Management, Marketing, Business Information Systems, Human Resources Management, Supply Chain Management, Undeclared CBA majors

BUSSCM 1730 - MANAGING GLOBAL SUPPLY CHAINS

Minimum Credits: 3

Maximum Credits: 3

Supply chain management explores the management of the flow of materials, information, and funds through the network of suppliers, manufacturers, distributors, retailers, and customers. Using the methodologies of optimization and simulation, where applicable, this course covers topics in distribution network design, inventory management, procurement and outsourcing, revenue management, and channel coordination. For marketing majors, this course counts as a marketing elective.

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: BUSQOM 1070 (MIN GRADE 'C'); PROG: UCBA; PLAN: NOT CASBUS-UNK or BUSNB-MN

Course Attributes: MCSI - Sustainability Focused

BUSSCM 1740 - PURCHASING & SUPPLY MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

Purchasing and supply management play an essential role in the ability of the firm to operate efficiently and be competitive in the contemporary global business environment. Included in these processes are activities involved in identifying potential suppliers, creating relationships with selected suppliers, obtaining the needed materials in the most efficient quantities at the highest quality levels, and developing strategies designed to ensure an uninterrupted flow of goods and materials. Purchasing is increasingly a strategic activity which impacts all areas of the firm, including product design, information system design, e-commerce activities, manufacturing planning and control, inventory management, human resource development, financial planning, forecasting, sales, and quality management. The objective of this course is to make students aware of the demands placed upon purchasing professionals, and to understand the impact of purchasing on the competitive success and profitability of the firm. They must also have an understanding of legal and ethical considerations which affect purchasing decision-making.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: BUSQOM 1070 (MIN GRADE 'C'); PROG: UCBA; PLAN: NOT CASBUS-UNK or BUSNB-MN

BUSSCM 1745 - TRANSPORT AND LOGISTICS MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

This course aims to equip students with the knowledge and skills necessary to effectively manage the transportation and logistics operations of a company or organization. By completing this course, students will understand the fundamentals of transportation and logistics, including developing related analytical and problem-solving skills, learning how to enhance operational efficiency, understanding regulatory and legal considerations, addressing sustainability and environmental concerns, and developing effective communication and leadership skills. The course will cover a range of related topics, including: transport modes, modal capabilities and limitations, the contribution of transportation and logistics (place and time utility) to national and international economies, transport companies' commercial practices and economics, the role of governments in transport infrastructure, regulation, and safety, the range of stakeholders' interests, and environmental issues.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: BUSQOM 1070 (Min Grade 'C'); PROG: UCBA; PLAN: NOT CASBUS-UNK or BUSNB-MN

BUSSCM 1750 - REVENUE MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

Increasingly, due to shortening product life cycles and capital-intensive capacity decisions, companies are being forced to place greater emphasis on managing constrained, but perishable inventory and capacity. Examples include the transportation industry (encompassing airlines, shipping, car rentals, and trucking), the hotel industry, the entertainment and sporting industry, and the retail industry. The underlying managerial issue is complex, but improved decision making can increase a company's revenues and profits. In this course, we study quantity and pricing strategies to improve profitability and the course uses microeconomics, operations research, segmentation, and pricing and forecasting concepts that the students would have learned in their economics, quantitative methods, operations, and marketing classes. The methodologies covered in the course include deterministic and stochastic optimization, forecasting, and statistical estimation.

Academic Career: Undergraduate

Grade Component: Letter Grade

Course Requirements: PREQ: BUSQOM 1070 (MIN GRADE 'C'); PROG: UCBA; PLAN: NOT CASBUS-UNK or BUSNB-MN

BUSSCM 1755 - SUSTAINABILITY IN THE SUPPLY CHAIN AND OPERATIONS

Minimum Credits: 3

Maximum Credits: 3

Many sustainability-critical business decisions are made by a firm's supply chain and operations (SC&O) leadership and teams. This class will give the students an understanding of how business leaders in these organizations balance conventional SC&O goals alongside newer sustainability goals - together they comprise the overarching business goals. As students enter their profession careers, this course will help them identify, propose and drive initiatives that improve both SC&O sustainability and overall business performance. The course flow will begin with an overview of SC&O, covering the goals and key business decision areas that SC&O leadership must navigate. Next, the course will provide an overview of how projects and initiatives to improve the business (both small/tactical and large/strategic) are proposed, approved and launched in SC&O. This will include a focus on how sustainability-focused projects and initiatives, which are often new and require organizations to change and improve, fit into the transformation process. Then, an overview of sustainability and firms' business goals and measures related to sustainability are presented. Following this, the course will examine the "hot spots" where SC&O decision-making has significant impact on sustainability goals and measures. These hot spots will vary by business sector. Identifying the key SC&O hot spots will provide a roadmap for the course to explore these specific areas in more depth, including: Energy Water Zero Landfill Transportation and Logistics Product Design, Product Life Cycle, and the Circular Economy Suppliers' operations' sustainability Labor in the supply chain Sustainable Sourcing Students will be preparing and participating in case discussions that feature examples of firms that are achieving sustainability goals within their SC&O organizations. Local and international firms will be showcased in these discussions. The course will also provide students with first-hand experience in these topics through: Tour of a local facility that embraces sustainability in their SC&O Guest speaker lecture from a leader driving sustainability initiatives in their firm's SC&O The final weeks of the course will culminate in a business simulation that puts students in the driver's seat to make decisions, requiring them to balance meeting both the conventional SC&O objectives and the sustainability goals for their simulated company..

BUSSCM 1760 - DATA MINING

Minimum Credits: 3

Maximum Credits: 3

Data mining is the process of extracting useful information and knowledge from a set of data. Mining is typically done on data sets too large to be analyzed by hand, but the same techniques are applicable to small, complex data. This course is an introduction to the most popular methods used in managerial data mining, and provides experience in using commercial software to explore real data sets. Models considered include those from statistics, machine learning, and artificial intelligence, such as discriminate analysis, logistic regression, clustering, neural nets, tree/rule induction, and association rule modeling. This course is methods-oriented, as opposed to being methodology-oriented, so students learn about when and how to use techniques and how to interpret their output rather than the details about how those techniques work. A laptop computer is required.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: STAT 1100 and BUSQOM 1080; PLAN: Accounting, Finance, General Management, Global Management, Marketing, Business Information Systems, Human Resources Management, Supply Chain Management, Undeclared CBA majors

BUSSCM 1766 - PROJECTS IN SUPPLY CHAIN MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

BUSSCM 1785 connects undergraduate supply chain management students with a partner organization to development/implement specific supply chain/logistics strategies for an on-campus, student-operated business. Topics include: procurement and purchasing, revenue management, supply chain interruptions/disruptions, inventory management, and risk management across the supply chain.

Academic Career: Undergraduate

Course Requirements: PREQ: BUSQOM 1070 (MIN GRADE 'C'); PROG: UCBA; PLAN: NOT CASBUS-UNK or BUSNB-MN

BUSSCM 1780 - SIX SIGMA

Minimum Credits: 3

Maximum Credits: 3

Six Sigma is a disciplined, data-driven approach to process improvement aimed at the near-elimination of defects from every product, process, and transaction. Six Sigma utilizes the following five-phase problem solving methodology known by the acronym DMAIC: 1. Define the problems/opportunities, the goals, and the deliverables to customers (internal and external). Describe and quantify both the defect and the expected improvement. 2. Measure the current performance of the process. Validate data to make sure it is credible and set the baseline. 3. Analyze and determine the root cause(s) of the defects. Narrow the causal factors to the vital few. 4. Improve the process to eliminate defects. Optimize the vital few and their interrelationships. 5. Control the performance of the process. Lock down the gains. BUSSCM 1780 Six Sigma will progress through DMAIC methodology providing the student not only with strong theoretical knowledge of the Six Sigma Green Belt Body of Knowledge, but also with practical, hands-on, experience based learning through the application of Six Sigma tools and techniques via in-class labs. Students who earn an overall course grade of "B" or better will be awarded a CBA Six Sigma Yellow Belt Certificate.

Grade Component: Letter Grade

Swahili

SWAHIL 0101 - SWAHILI 1

Minimum Credits: 4

Maximum Credits: 4

The greatest part of the first term will be devoted to the presentation and practice of the basic sound patterns of the language, its fundamental sentence patterns, and sufficient vocabulary to illustrate and practice them. An introduction to the writing system will be offered together with the opportunity to acquire elementary writing and reading skills.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: African Studies, Global Studies

SWAHIL 0102 - SWAHILI 2

Minimum Credits: 4

Maximum Credits: 4

At the end of the second term of the first year of study the student should be able to produce all the significant sound patterns of the language, to recognize and use the major grammatical structures within a limited core vocabulary. The student should be able a) to engage in simple conversations with native speakers about a limited number of everyday situations and b) to read and write simple material related to the situations presented.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: LING 0501 or AFRCNA 0523 or SWAHIL 0101; MIN GRADE: 'C' FOR LISTED COURSES

Course Attributes: African Studies, DSAS Second Language General Ed. Requirement, Global Studies

SWAHIL 0103 - SWAHILI 3

Minimum Credits: 3

Maximum Credits: 3

The first term of the second year will concentrate on the further development of fluency in oral production and the improvement in the student's ability to understand the flow of speech as uttered by a native speaker. Increased attention will be paid to reading as a means of augmenting a recognition vocabulary and writing as a drill and as a means of consolidating and communicating the knowledge gained.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: LING 0502 or AFRCNA 0524 or SWAHIL 0102; MIN GRADE: 'C' FOR LISTED COURSES

Course Attributes: African Studies, DSAS Second Language General Ed. Requirement, Global Studies

SWAHIL 0104 - SWAHILI 4

Minimum Credits: 3

Maximum Credits: 3

At the end of the second term of the second year the student should be able to converse comfortably with a native speaker on a variety of non-specialized subjects. The student will be offered an opportunity to experience and more fully understand the culture of the people who use the language through readings of various types. More complex writing tasks will be expected at this level.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: LING 0503 or AFRCNA 0525 or SWAHIL 0103; MIN GRADE: 'C' FOR LISTED COURSES

Course Attributes: African Studies, DSAS Second Language General Ed. Requirement, Global Studies

SWAHIL 0105 - SWAHILI 5

Minimum Credits: 3

Maximum Credits: 3

Swahili 5

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: LING 0504 or AFRCNA 0526 or SWAHIL 0104; MIN GRADE: 'C' FOR LISTED COURSES

Course Attributes: African Studies, Global Studies

SWAHIL 0106 - SWAHILI 6

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: LING 0505 or SWAHIL 0105; MIN GRADE: 'C' FOR LISTED COURSES

Course Attributes: African Studies, Global Studies

SWAHIL 0107 - SWAHILI 7

Minimum Credits: 3

Maximum Credits: 3

Students in this class will deepen their knowledge of Swahili by delving into Advanced Swahili. They will build advanced conversational proficiency, while simultaneously building advanced knowledge of the discussions of global issues of interest. Writing, listening and reading comprehension skills will be enhanced in light of advanced Swahili. Students will continue to use vocabulary learned throughout previous courses. They will also utilize new vocabulary learned in reading and listening to news items.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: LING 0506 or AFRCNA 0526 or SWAHIL 0106; MIN GRADE 'C' FOR ALL LISTED COURSES

Course Attributes: African Studies, Global Studies

SWAHIL 0108 - SWAHILI 8

Minimum Credits: 3

Maximum Credits: 3

Students in this class will work together to achieve near-native fluency in speaking, reading, writing and listening. Students will continue to build on the knowledge gained throughout past Swahili classes in order to deepen their understanding of the complexities of conversation, discussion and understanding Swahili in the context of everyday life and academic knowledge. They will practice to speak extensively on topics of interest, analyzing and offering opinions on various issues. Students will have opportunities to display their prowess through independently carrying out research on topics of interest and global topical issues and presenting their work from the readings.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: SWAHIL 0107; MIN GRADE 'C'

Course Attributes: African Studies, Global Studies

SWAHIL 0111 - INTRODUCTION TO SWAHILI LANGUAGE ABROAD

Minimum Credits: 3

Maximum Credits: 3

This study abroad course will provide a basic introduction to Swahili language for students with no or very little background in Swahili. It does not take the place of SWAHIL 0101 - Swahili 1 taught on the Pittsburgh campus.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

SWAHIL 0112 - CONTINUING SWAHILI LANGUAGE ABROAD

Minimum Credits: 3

Maximum Credits: 3

This study abroad course provides students with some background in Swahili to continue their language study. It does not take the place of a regularly sequenced Swahili language course taught on the Pittsburgh campus.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

SWAHIL 1615 - SWAHILI COASTAL CULTURE: GATEWAY TO AFRICA

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to the Swahili culture, and will serve as a gateway to understanding African culture and society. It explores the social-cultural customs, traditions, values, beliefs and experiences that give a unique identity to the Swahili people of East Africa. The course will draw concrete examples from literature, film, music, social media and other sources of cultural information. Students will examine and discuss different cultural aspects of Swahili people, and will identify the similarities and disparities between the Swahili (African) culture and American or student's own culture. This course may be helpful to people who are planning to travel to East Africa, other parts of Sub-Saharan Africa, or people who want to understand the East African culture and Africa in general.

SWE 0107 - SWEDISH 7

Minimum Credits: 3

Maximum Credits: 3

In level 7, we will continue to practice understanding, speaking, reading and writing Swedish, stylistically focusing on adding more formal grammar and lexicon. My goal is to improve your fluency to a point where you feel comfortable living, continuing your studies or working in Sweden. Our textbook readings will be centered around 5 different themes; crime and punishment, social media, holidays, consumerism and networking/job seeking. In addition to the textbook, we will read the novel *Andr es ballongf rd*. You will be responsible for creating your own vocab lists at this level, as well as keeping a reading journal with thoughts on your readings. We will discuss your readings in class, but now without the guidance of questions and reading packets, etc. from previous courses. The focus will as always be on your speaking skills and we will use a variety of other course materials as well to maximize our speaking activities. With a very low number of students signed up this semester, take advantage of the personalized instruction and the speaking opportunities a class with only a few students offer!

Academic Career: Undergraduate

Grade Component: LG/SNC Elective Basis

SWE 0108 - SWEDISH 8

Minimum Credits: 3

Maximum Credits: 3

In Swedish 8 students will continue to practice understanding, speaking, reading, and writing Swedish, stylistically focusing on adding more formal grammar and lexicon. At this highest level of Swedish offered, students can expect to improve their fluency to a point where they would feel comfortable living, continuing their studies, and working in Sweden. Textbook readings will be centered around the following themes; the history of family in Sweden, Vikings and their beliefs vs religion today, life in the workforce-understanding Swedish codes, comparing (learning) languages and code switching, and Sweden in the world. A variety of other supplemental materials will maximize exposure to many different styles and genres.

SWE 0111 - INTRODUCTION TO SWEDISH LANGUAGE IN SWEDEN

Minimum Credits: 3

Maximum Credits: 3

This study abroad course offers an introduction to the Swedish language together with hands-on experiential learning activities such as role-plays, quizzes, out-of-classroom activities and Swedish language partners. Students that have no previous knowledge of Swedish will learn basic vocabulary, grammar and pronunciation in order to be able to do grocery shopping, order at a cafe, conduct small talk in Swedish, etc. The course also focuses on teaching students culture-specific vocabulary and concepts in order to improve their understanding of Swedish culture. This course is an introductory course only and will not replace SWE 0101 taught at Pitt.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

SWE 0112 - CONTINUING SWEDISH LANGUAGE IN SWEDEN

Minimum Credits: 3

Maximum Credits: 3

This highly conversational course allows intermediate and advanced level students of Swedish to continue their studies by immersing themselves in the language in Sweden. The focus will be on developing fluency in speaking and writing as well as furthering the understanding of Swedish culture. Building on existing skills, we will take advantage of being in-country and utilize authentic materials (popular literature, media, information pamphlets, etc.) and combine it with hands-on experiential learning activities, such as role-plays, interviews and out-of-classroom activities. This course will not replace any higher-level Swedish (3-8) taught at Pitt.

SWE 1620 - SWEDEN HERE AND NOW - A SOCIETY IN CHANGE

Minimum Credits: 3

Maximum Credits: 3

This course is designed for students who want to experience studying abroad and learn more about modern day Sweden. We will study the traditional culture of this previously homogeneous country and try to understand just how much is changing in Swedish society as it struggles with multiculturalism and integration of its new Swedes. Students will get a first-hand experience of the issues the country is facing trying to accommodate an unprecedented number of asylum seekers and refugees, and the ramifications on society.

Teaching, Learning and Leading

TLL 1000 - INTRODUCTION TO TEACHING

Minimum Credits: 3

Maximum Credits: 3

Introduction to teaching explores contemporary perspectives of education. It provides a basic introduction to instructional planning, curriculum, and classroom management. Additionally, the class provides opportunities for practice of proven teaching strategies designed to meet individual student needs.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

TLL 1008 - STEAM: INSTRUCTIONAL DESIGN

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the instructional content of STEAM, which includes subject-matter alignment (the ways in which teachers present material from multiple disciplines or content areas in clear and connected ways), discipline integration (the selection of material across disciplines - including concepts, methods, and approaches - as well as how they are synthesized to support deeper learning), and ways to employ problem-solving skills. These skills include cognitive skills (modeling, analyzing, interpreting), collaborative skills (communication, problem-solving), and creative skills (designing, creating) necessary for 21st century learning.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

TLL 1041 - INTRO TO EARLY CHILDHOOD ED

Minimum Credits: 3

Maximum Credits: 3

The course is a general introduction to the theoretical, political, economic, and social issues that are inherent in the conduct and development of services for young children. The primary thrust is intended to provide students with both an overview of current issues and a basis for assessment.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

TLL 1042 - LANGUAGE AND LITERATURE FOR THE YOUNG CHILD

Minimum Credits: 3

Maximum Credits: 3

An introduction to language and literacy for children birth through grade 4. Includes applied theories and stages of language development, transitions from oral to written expression, family literacy, and guidelines for the selection and use of quality literature.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Letter Grade

TLL 1045 - YOUNG ENGLISH LANGUAGE LEARNERS

Minimum Credits: 3

Maximum Credits: 3

Prospective early childhood education teachers will identify, investigate and assess impacts of a variety of social agencies, organizations and current issues in early childhood education through planned interviews as well as class lectures, discussions and reports.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

TLL 1047 - INTEGRATED CURRICULUM PRE-K - 4

Minimum Credits: 3

Maximum Credits: 3

Engagement with general and specific issues related to the development of content and lessons that cross a broad range of curricular areas for children in pre-k through grade 4.

Academic Career: Undergraduate

Course Component: Lecture
Grade Component: Letter Grade

TLL 1049 - SEMINAR RELATED TO PRE-STUDENT TEACHING PRE-K

Minimum Credits: 1

Maximum Credits: 1

This a weekly seminar that supports students during their pre-k practicum. This course is designed to facilitate student learning as they make connections between theory and practice. Students will receive guidance in the completion of required field practicum competencies and the preparation of the on-line pre-k portfolio.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Letter Grade

TLL 1203 - LANGUAGE AND LANGUAGE SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

This course provides an overview of literacy research and instructional approaches that relate to language and language systems with emphasis on the historical development of English, linguistic and sociocultural perspectives on second language learners and speakers of dialects, and instructional approaches for encoding and decoding.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

TLL 1208 - READING/WRITING METHODS 1: PRE-KINDERGARTEN - GRADE 1

Minimum Credits: 3

Maximum Credits: 3

This course is intended for teacher candidates who are pursuing prek-4 certification. It is the first in a two-course sequence that focuses on classroom teaching methods for literacy. It is also part of a set of courses that focus on literacy development and instruction. Other courses in the set include reading/writing methods 2: grades 2-4, language and literature for the young child, and literacy assessment and instruction for children with disabilities in inclusive settings. Teacher candidates in reading/writing methods 1 will have opportunities to build their knowledge about specific aspects of literacy, including: (a) oral language development, (b) emergent literacy, (c) concepts about print, (d) comprehension, and (e) writing. In addition, candidates will learn about specific instructional approaches and resources for supporting students in developing those aspects of literacy in pre-kindergarten - grade 1.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

TLL 1209 - READING/WRITING METHODS 2: GRADES 2-4

Minimum Credits: 3

Maximum Credits: 3

This course is intended for teacher candidates who are pursuing prek-4 certification. It is the second in a two-course sequence and builds on concepts introduced in reading/writing methods 1. It is also part of set of courses that focus on literacy development and instruction. Other courses in the set include language and literature for the young child, and literacy assessment and instruction for children with disabilities in inclusive settings. Teacher candidates in reading/writing methods 2 will have opportunities to build their knowledge about specific aspects of literacy, including: (a) word study--decoding, spelling, and vocabulary, (b) comprehension, and (d) composition, including handwriting. In addition, candidates will learn about specific instructional approaches and resources for supporting students in

developing those aspects of literacy in grades 2-4.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

TLL 1257 - TEACHING ENGLISH LANGUAGE LEARNERS

Minimum Credits: 3

Maximum Credits: 3

This course will explore strategies for teaching English language learners (ell's) in formal and informal education settings. Students will be introduced to foundational theories and current research on the social and academic factors that influence ell's learning experiences. The class will include a video component so students can observe instructional approaches for working with linguistically and culturally diverse ell's.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Attributes: Asian Studies, Learning Sciences

TLL 1260 - INTRO TO SOCIAL STUDIES EDUC

Minimum Credits: 3

Maximum Credits: 3

A basic introductory course; primary focus is upon secondary schools as institutions in contemporary society and the role of social studies programs and teachers within this context.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Attributes: Asian Studies, Global Studies

TLL 1268 - SOCIAL STUDIES METHODS PRE-K - 4

Minimum Credits: 3

Maximum Credits: 3

This course is designed to provide a theoretical background in social studies education and to exemplify the appropriate principles and practices necessary to deliver effective social studies instruction in pre-k through grade 4.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

TLL 1270 - INTEGRTG ART & MUSIC ELEM CLSSRM

Minimum Credits: 3

Maximum Credits: 3

To introduce preservice classroom teachers to art and music contents and processes with relevance to their expected role in integrating authentic arts learning experiences in their instruction. Emphasis is placed on developmental aspects of children's' responsive and expressive skills in art and music.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

TLL 1433 - MATH METHODS FOR PREK-GRADE 4 STUDENTS

Minimum Credits: 3

Maximum Credits: 3

This course investigates methods for teaching mathematics to diverse elementary school children. The course is intended to contribute to your development as a critical, equity-oriented, supportive, reflective, and effective elementary teacher of mathematics. We will use readings, assignments, projects, and our classroom discussions to facilitate your understanding of important issues related to equitable mathematics teaching and learning. We will focus on topics such as cognitive demand, classroom discourse, group work (e.g., Complex Instruction), equitable pedagogical and assessment practices, culturally relevant pedagogy, social justice pedagogy, building relationships with students and their families, and developing political knowledge for teaching mathematics. You will work in small groups, partnerships, and individually in class and for your assignments and projects. Our class community will support each other's progress toward the course learning goals.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

TLL 1434 - SCIENCE METHODS FOR PREK- GRADE 4 STUDENTS

Minimum Credits: 3

Maximum Credits: 3

How do teachers assist elementary children in doing science and understanding science concepts? What environment facilitates elementary children's understanding in science? What equitable and just methods can teachers employ to ensure all elementary children can access and engage with science? These are just a few of the questions we will be addressing over the course of this semester. You will explore these ideas through thinking about yourself as a science learner; by demonstrating reflective teaching practices; and through examining how elementary science teaching and learning can be integrated across disciplines.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

TLL 1452 - DISCIPLINING ENVIRONMENTAL EDUCATION: USING DIGITAL STORYTELLING TO UNPACK ENVIRONMENTAL ISSUES

Minimum Credits: 1

Maximum Credits: 1

In other parts of the world, such as Finland, environmental education is infused throughout the curriculum in history, science, technology, and math. This pop-up course serves as one way to provide a platform for Pitt students to experience Finnish nature schools in their backyard. The goal of the pop-up classes will be to provide a space for developing student projects at both the undergraduate and graduate levels. This course is geared for students interested in authoring visual content and testing the productive tensions of this new media. During the pop-up classes, we will establish a student-led AR/VR authoring club, training sessions for students, and work to amplify and circulate our content across our local and global communities.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: MCSI - Sustainability Related

TLL 1473 - MATH FOR ELEMENTARY TEACHERS

Minimum Credits: 3

Maximum Credits: 3

Students will improve their mathematics knowledge and skills in numeration systems, integers, rationales, geometry, probability/statistics, and other selected topics.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

TLL 1498 - DIRECTED STUDY IN MATH & SCIED

Minimum Credits: 1

Maximum Credits: 9

The student proposes and carries out a study project under the direction and supervision of an appropriate member of the faculty.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SU3 Elective Basis

TLL 1502 - SUPPORTING STUDENTS WITH DISABILITIES IN INCLUSIVE CLASSROOMS

Minimum Credits: 3

Maximum Credits: 3

This course focuses on understanding challenges faced by students with disabilities in inclusive settings and examines the responsibilities of educational professionals for all students. Students will develop skills in adapting instruction, ensuring access to curriculum, positive behavior support, and strategies for classroom management.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: TLL 1580

TLL 1505 - AUTISM: CHARACTERISTICS AND INTERVENTIONS

Minimum Credits: 3

Maximum Credits: 3

This course will present information on the characteristics of and intervention approaches for children with autism spectrum disorders (ASDS). Introductory material will include diagnosis criteria and characteristics of ASDS. Current research on theories of etiology will be explored and analyzed. Screening tools and assessments specific to this population will be examined in detail. Intervention approaches (e.g. IBI/discrete trial, ABBLs, precision teaching, teach) will be described and analyzed in terms of basic premises, research base, associated curricula, and evaluative guidelines from the autism society of America and national institute of mental health. Representatives from local education and behavioral health systems serving children with ASDS will present services/intervention models available in the area.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

TLL 1509 - APPLIED BEHAVIOR ANALYSIS AND POSITIVE BEHAVIOR SUPPORT

Minimum Credits: 3

Maximum Credits: 3

The course focuses upon the application of applied behavior analysis principles to the instruction of students with disabilities. These include individual, small group, and class-wide instruction. The course emphasizes the acquisition, fluency, maintenance and generalization of skills, and providing positive behavior support for changing behaviors.

Academic Career: Undergraduate

Course Component: Lecture
Grade Component: Letter Grade

TLL 1511 - CURRICULUM DEVELOPMENT FOR STUDENTS WITH INTELLECTUAL AND DEVELOPMENTAL DISABILITIES

Minimum Credits: 3

Maximum Credits: 3

This course covers information regarding assessment, curriculum and instruction, and program design for students with intellectual and developmental disabilities.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: TLL 1580

TLL 1512 - ASSESSMENT AND INSTRUCTION FOR STUDENTS WITH HIGH INCIDENCE DISABILITIES

Minimum Credits: 3

Maximum Credits: 3

This course is designed to provide knowledge of assessment procedures for designing academic programs for children and youth with disabilities in grades K-12, with emphasis on assessment for teaching mathematics, reading, and written language. The course includes assessment for eligibility for special education and ongoing assessment of instructional effectiveness. Instruction and evaluation of student progress are always intertwined in teaching; this mesh of activities is even more important when teaching students with learning difficulties. The emphasis of this course is the interplay between assessment and teaching activities. The central focus of this semester's work will be how the teacher can evaluate status and progress in math, reading, and written language; and the implications of these evaluations for teaching. In addition to conducting evaluations, students will develop portions of Individual Education Plans for specific students. Assignments begin with evaluation of current academic levels and progress in an academic area. Application of the results of those evaluations will result in designing appropriate individual education plans, including specific goals and specially designed instruction. Assessment is at the center of all good teaching. This class is designed to provide a clear guide to the assessment of students with disabilities. Students will gain an understanding of the assessment process, and concrete, practical skills necessary to assess students with disabilities needed to teach effectively. Popular instruments will be discussed in some depth because these are the tests that reflect current practices and will be those that special educators will be expected to administer and/or interpret. However, every attempt will be made to provide a balanced coverage of both formal and informal assessments. This class will provide the connection between gathering assessment information and using it to make informed decisions. In the context of the team approach to educational assessment, with particular emphasis on the role of the special educator, students will consider assessment data in relation to the classroom setting. In alignment with the University of Pittsburgh School of Education Mission, the course will center discussions of educational equity including overrepresentation of marginalized populations in special education, issues of bias in the assessment process and fair practices in grading students.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: TLL 1580

TLL 1513 - INSTRUCTIONAL METHODS FOR STUDENTS WITH HIGH INCIDENCE DIS/ABILITIES

Minimum Credits: 3

Maximum Credits: 3

This course is designed to prepare special education teacher candidates to teach children with high incidence

dis/abilities such as learning dis/abilities, intellectual dis/abilities, and behavioral dis/abilities. The curriculum focuses on the special educators' role in the continuum of classroom settings and evidence-based teaching methods. Reading, spelling, and written language are often primary areas of concern for these students. The course will provide systematic approaches to determining students' academic levels and explicit instructional strategies for each of these areas. Mathematics and content area instruction will also be addressed. Throughout the course, the importance of appropriate materials selection and modes of instruction to increase student engagement will be illustrated. The course assignments intend to assist special education teacher candidates in the skills of designing appropriate teaching lessons and strategies and monitoring the effect of these strategies on student learning.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: TLL 1580

TLL 1520 - SUPPORTING LITERACIES IN INCLUSIVE CLASSROOMS

Minimum Credits: 3

Maximum Credits: 3

Equitable instruction includes recognizing and honoring the literacies of all students while also supporting their development of new literacies. This course is designed to prepare pre-service secondary educators to: 1) support the literacies of students with disabilities; and 2) support the disciplinary literacies of all students.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: TLL 1580

TLL 1521 - PROACTIVE STRATEGIES FOR A POSITIVE CLASSROOM

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the support of all students with positive, proactive strategies in academic settings. The central theme will focus on the development and implementation of effective strategies that promote positive student outcomes, both academic and behavioral and improve interpersonal relationships. Evidence-based approaches as well as practices required by the Individuals with Disabilities Education Improvement Act will be emphasized.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: TLL 1509

TLL 1560 - EARLY EDUCATION OF YOUNG CHILDREN WITH DISABILITIES

Minimum Credits: 3

Maximum Credits: 3

The course focuses on (1) an overview of early childhood special education, including its rationale, historical and legal foundations, efficacy, service delivery systems, and current trends and practices; (2) the developmental assessment of young children with disabilities in the areas of motor, cognition, social-emotional, language/communication, and adaptive skills; (3) designing preschool classroom environments that meet the needs of children with disabilities through adaptations and accommodations, embedded Learning, and special instruction.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

TLL 1562 - ASSESSMENT: YOUNG CHILDREN WITH DISABILITIES

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

TLL 1563 - INCLUSION PRE-K

Minimum Credits: 3

Maximum Credits: 3

This course will cover the rationale, service delivery methods, teaming components, family considerations and curriculum development that are a part of inclusive pre-k settings. In addition, it will cover adaptations, accommodations, and individualized instructional strategies for creating early childhood programs that meet the needs of children without disabilities in inclusive pre-k settings.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

TLL 1580 - FOUNDATIONS OF SPECIAL EDUC

Minimum Credits: 3

Maximum Credits: 3

Course provides an overview of the field of special education. It includes such topics as 1) identification; 2) placement; 3) programming; 4) inclusion; 5) advocacy; and other topics relating to individuals with disabilities, and gifted and talented individuals. The course examines the various philosophical views of exceptionality.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Attributes: Learning Sciences

TLL 1581 - CRITICAL HISTORIES OF EDUCATION

Minimum Credits: 3

Maximum Credits: 3

This course provides a critical introduction to historical moments, movements, and concepts that have characterized education and schooling, primarily in the US. The course focuses on histories of both self-determined and colonial education, with attention to eras and movements (e.g., maternalism and the boarding or residential schools; Freedom Schools and the complexities of law and desegregation). Students will engage topics such as labor, migration, and militarism. Students will learn how these larger forces have shaped contemporary schooling. Students will also study historical examples of anti-/de-colonial and freedom-based collective educational work that transformed dominant educational practices and institutions and cultivated autonomous organizations and schools.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

TLL 1582 - CULTURES, KNOWLEDGE TRADITIONS, AND SOCIAL SYSTEMS OF SCHOOLING I

Minimum Credits: 3

Maximum Credits: 3

This course introduces issues of freedom and liberation and considers frameworks of access, equity, and inclusion in relation to school contexts. We do this by providing an overview of sociocultural and sociopolitical aspects of

education and inviting students to situate themselves and their own educational histories within a broader understanding of the role(s) of schools in society. Students will examine significant knowledge traditions (e.g., Black Radical Tradition, Indigenous Knowledge Systems, Feminisms, Queer, Borderland Epistemologies) and learn how the educational praxes of knowledge traditions and language shape sociocultural and sociopolitical systems. This course takes culture as a key conceptual component for understanding: the traditions themselves; how structural, systemic responses to these traditions create repressive conditions; and how cultural knowledge is used to shape liberatory systems. This study of culture will be anchored in schools and counterpart learning contexts and will help students understand the networks of systems and knowledges within which schooling operates.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

TLL 1584 - CRITICAL PEDAGOGIES AND PRAXES

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to key critical pedagogical traditions and praxes for the secondary classroom. Students learn and practice lesson design and instructional scaffolding and sequencing. The course includes strategies for liberatory and just student and course evaluation. It also attends to critical praxis in relation to required state, district, and other assessments. Students consider and develop just classroom community-building approaches that move toward freedom and away from dehumanizing management and discipline frameworks.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

TLL 1585 - TEACHING AND LEARNING IN SECONDARY ENGLISH 1

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to secondary English language arts pedagogy, including lesson design. Drawing on critical theories of instruction, students learn to design and evaluate lesson plans. Teacher candidates will learn the characteristics of English classrooms, curriculum, and instruction that are inquiry-based, cognitively challenging, and engaging for youth. The course focuses on how to create lessons that are engaging, relevant, and aligned with state standards. This course also focuses on constructing a transformative learning environment.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

TLL 1586 - TEACHING AND LEARNING IN SECONDARY ENGLISH 2

Minimum Credits: 3

Maximum Credits: 3

This course focuses on learning contexts to support secondary students' English teaching. Drawing on critical theories of instruction, teacher candidates learn to design and implement unit plans that support inquiry-based and relevant instruction.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: TLL 1585

TLL 1587 - TEACHING AND LEARNING IN SECONDARY MATH 1

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to secondary mathematics pedagogy, including lesson design. Drawing on critical theories of instruction, students learn to design and evaluate lesson plans. The course focuses on how to create lessons that are engaging, relevant, and aligned with mathematical standards. This course also focuses on constructing a transformative learning environment.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

TLL 1588 - TEACHING AND LEARNING IN SECONDARY MATH 2

Minimum Credits: 3

Maximum Credits: 3

This course focuses on learning contexts to support secondary students' engagement in mathematical practices. Drawing on critical theories of instruction, teacher candidates learn to design and implement unit plans that engage students in mathematical practices that support multiple ways of solving problems, high-leverage practices, and collaboration. Teacher candidates will learn the characteristics of science classrooms, curriculum, and instruction that are inquiry-based, cognitively challenging, and engaging for youth. This course also focuses on how to authentically assess students. Emphasis is placed on multiple knowledge types for assessment.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: TLL 1587

TLL 1589 - TEACHING AND LEARNING IN SECONDARY SCIENCE 1

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to secondary science pedagogy, including lesson design. Drawing on critical theories of instruction, students learn to design and evaluate lesson plans. Teacher candidates will learn the characteristics of science classrooms, curriculum, and instruction that are inquiry-based, cognitively challenging, and engaging for youth. The course focuses on how to create lessons that are engaging, relevant, and aligned with science standards. This course also focuses on constructing a transformative learning environment.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

TLL 1590 - TEACHING AND LEARNING IN SECONDARY SCIENCE 2

Minimum Credits: 3

Maximum Credits: 3

This course focuses on learning contexts to support secondary students' engagement in science practices. Drawing on critical theories of instruction, teacher candidates learn to design and implement unit plans that engage students in scientific practices that support inquiry-based instruction, high-leverage practices, and collaboration. This course also focuses on how to authentically assess students. Emphasis is placed on multiple knowledge types for assessment.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: TLL 1589

TLL 1591 - TEACHING AND LEARNING IN SECONDARY SOCIAL STUDIES 1

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to secondary social sciences pedagogy, including lesson design. Drawing on critical theories of instruction, students learn to design and evaluate lesson plans. Teacher candidates will learn the characteristics of social sciences classrooms, curriculum, and instruction that are inquiry-based, cognitively challenging, and engaging for youth. The course focuses on how to create lessons that are engaging, relevant, and aligned with state standards. This course also focuses on constructing a transformative learning environment.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

TLL 1592 - TEACHING AND LEARNING IN SECONDARY SOCIAL STUDIES 2

Minimum Credits: 3

Maximum Credits: 3

This course focuses on learning contexts to support students' teaching in the secondary social sciences. Drawing on critical theories of instruction, teacher candidates learn to design and implement unit plans that support inquiry-based and relevant instruction.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: TLL 1591

TLL 1593 - TEACHING AND LEARNING IN WORLD HERITAGE LANGUAGES 1

Minimum Credits: 3

Maximum Credits: 3

The purpose of this course is to introduce students to instructional practices that are essential for effective world language teaching. A practice-based approach is utilized to allow students to deconstruct, co-plan, and rehearse strategies that foster equitable development of target language and cultural proficiency.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

TLL 1594 - TEACHING AND LEARNING IN WORLD HERITAGE LANGUAGES 2

Minimum Credits: 3

Maximum Credits: 3

In this course, students deconstruct, discuss, and practice a variety of planning, teaching, and assessment strategies that support the World-Language Readiness Standards. In addition, students are introduced to current theories of second language acquisition and apply these theories to explain and design effective instruction.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: TLL 1593

TLL 1595 - CULTURES, KNOWLEDGE TRADITIONS, AND SOCIAL SYSTEMS OF SCHOOLING 2

Minimum Credits: 3

Maximum Credits: 3

This capstone course draws on the topics covered in Cultures, Knowledge Traditions, and Social Systems of Schooling

I and other education coursework focused on developing equitable and just approaches to secondary teaching and learning. Advanced theoretical understandings of issues of cultures, knowledge traditions, and systems of schooling will be addressed, and students will be given opportunities to link these concepts to their own developing teaching praxis.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: TLL 1582 or EFOP 1001

TLL 1596 - PRE-STUDENT TEACHING SEMINAR

Minimum Credits: 1

Maximum Credits: 1

This is a one-credit seminar designed to support students during their pre-student teaching semester. This seminar will guide students through Pennsylvania Department of Education Stages I, II, and III Early Field Competencies. Students will reflect on instructional practices and efforts towards building positive learning communities. There is a focus on developing relationships with families, students, colleagues, and the school's community. Career readiness, communication, and professionalism in education are incorporated in the seminar.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

TLL 1597 - PRE-STUDENT TEACHING

Minimum Credits: 2

Maximum Credits: 2

School-based practicum for students seeking teacher certification. Requires a part-time placement for the entire semester under the supervision of a mentor teacher with coaching from a university supervisor.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: H/S/U Basis

Course Requirements: Minimum GPA: 3.0

TLL 1598 - STUDENT TEACHING

Minimum Credits: 8

Maximum Credits: 8

School-based practicum for students seeking teacher certification. Requires a full-time placement for the entire semester under the supervision of a mentor teacher with coaching from a university supervisor.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: Satisfactory/No Credit

Course Requirements: GPA: Greater or Equal to 3.0

TLL 1599 - STUDENT TEACHING SEMINAR

Minimum Credits: 1

Maximum Credits: 1

A seminar for student teachers in the certification field which emphasizes collaborative problem solving of practical teaching problems and continued professional development.

Academic Career: Undergraduate

Course Component: Lecture
Grade Component: Letter Grade

TLL 1602 - Advanced Practicum in World and Heritage Language Education

Minimum Credits: 3

Maximum Credits: 3

This course prepares students to enact equitable and justice-oriented teaching practices that address local and global cultural contexts in elementary, secondary, and post-secondary World and Heritage Language Education school settings. Through a practice-based approach, students gain advanced understandings of home and target language cultures and the role they play in World and Heritage Language teaching. The course views culture as a key conceptual component for understanding: addresses the cultural traditions themselves; how structural, systemic responses to these diverse traditions create repressive conditions for students and teachers; and how cultural knowledge is used to shape liberatory systems. Students apply their knowledge of local and global cultural contexts to plan, teach, and reflect on their own world language teaching and to advocate for revisions of unjust and oppressive systems.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Letter Grade

TLL 1698 - DIRECTED STUDY-EARLY CHILDHOOD

Minimum Credits: 1

Maximum Credits: 9

This course is a directed study with a faculty member on the topic of Early Childhood.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Letter Grade

TLL 1701 - EARLY FIELD EXPERIENCE-SECONDARY

Minimum Credits: 3

Maximum Credits: 3

This is an introductory field experience class for undergraduate students who plan to enter the teaching profession. The course provides opportunities for students to observe adolescent learners in middle and high school settings through observations in a classroom, talking with school personnel and meeting in student seminars at Pitt to reflect on what they have seen and heard. Students are provided with guidelines that will assist them in analyzing their observations.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: LG/SU3 Elective Basis

TLL 1702 - DIGITAL LITERACIES AND LEARNING ACROSS EDUCATIONAL CONTEXTS

Minimum Credits: 3

Maximum Credits: 3

This course will explore how literacy and learning are changing as people utilize digital technologies and traverse an evolving media landscape. To do so we will examine how people - particularly PreK-12 youth - are reading, writing, and making meaning with digital media and technology across educational contexts from schools to museums to library makerspaces. In this course, students will learn how to digitally compose a range of artifacts (e.g. digital stories, games, podcasts), engage in critical analysis of digital artifacts, and think about how to design digital experiences to nurture learning and literacy. Through our creation and reflection on digital artifacts we will also focus on key concepts in digital literacies like participatory cultures, multimodality, multiliteracies, algorithmic rights, and more.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: Letter Grade
Course Attributes: Learning Sciences

TLL 1704 - CURRENT ISSUES IN SECONDARY EDUCATION

Minimum Credits: 3

Maximum Credits: 3

What would the ideal high school look like? How would it provide an engaging, equitable and quality education to all adolescents? In Current Issues in Secondary Education: Reimagining the American High School we will explore current issues in U.S. high schools, such as systemic racism and unequal funding, and learn about innovative schools that are doing things differently. We will reflect on our own schooling experiences and collaborate to design a model high school.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

TLL 1800 - PRE-STUDENT TEACHING PRE-K

Minimum Credits: 2

Maximum Credits: 2

Full-time practicum for teacher certification candidates. Provides opportunities to observe, plan, conduct, and evaluate instruction in the school setting and receive professional feedback from university supervisors and experienced master teachers.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: Satisfactory/No Credit

TLL 1850 - LIFE SKILLS PRACTICUM

Minimum Credits: 2

Maximum Credits: 2

For this practicum, which is part of the case program, students will be placed in either a primary life skills classroom or a preschool special education program and will be mentored by a classroom teacher, co-teacher, or itinerant teacher depending on the placement. Students will be expected to complete specific requirements in these settings to fulfill state competencies and program requirements.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: Satisfactory/No Credit

TLL 1852 - FIELD SEMINAR IN EARLY CHILDHOOD EDUCATION

Minimum Credits: 1

Maximum Credits: 1

Students participate in district-based in-service activities and complete field-based assignments aimed at promoting an understanding of the professional, personal, social, and political dimensions of schools.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Letter Grade

TLL 1907 - COLLABORATIVE PARTNERSHIPS WITH FAMILIES AND THE COMMUNITIES

Minimum Credits: 3

Maximum Credits: 3

This course will focus on the role of the professional in supporting families of young children (pre-k - grade 4), including families of children with disabilities and other diverse characteristics. Students will learn about family systems, including how family characteristics affect the development of children, how to communicate, interact, and collaborate with families in school settings, and how to link families with formal and informal community resources.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

TLL 2290 - RESEARCH SEMINAR FOR MED STUDENTS

Minimum Credits: 3

Maximum Credits: 3

The student proposes, carries out, and prepares a careful report of a study germane to the student's professional role.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

TLL 2414 - HEALTH, MENTAL HEALTH, & SAFETY

Minimum Credits: 3

Maximum Credits: 3

Within the leader as learner block in leadership initiative for transforming schools (lifts), a k-12 principal certificate program, the health, mental health, and safety module will focus on creating the optimal conditions for teaching and learning. Aspiring school leaders will gain the knowledge and skills needed to conduct a school-wide mental health and safety audit. In addition, they will learn about implementing a crisis management plan and the role and responsibilities of a crisis management team.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2434 - SCIENCE METHODS FOR PREK-GRADE 4 STUDENTS

Minimum Credits: 3

Maximum Credits: 3

How do teachers assist elementary children in doing science and understanding science concepts? What environment facilitates elementary children's understanding in science? What equitable and just methods can teachers employ to ensure all elementary children can access and engage with science? These are just a few of the questions we will be addressing over the course of this semester. You will explore these ideas through thinking about yourself as a science learner; by demonstrating reflective teaching practices; and through examining how elementary science teaching and learning can be integrated across disciplines.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2509 - APPLD BHVR ANAL/POSTV BHVR SUPRT

Minimum Credits: 3

Maximum Credits: 3

The course focuses upon the application of applied behavior analysis principles to the instruction of students with disabilities. These include individual, small group and class room-wide instruction. The course emphasizes the acquisition, fluency, maintenance and generalization of skills and providing positive behavior support for changing behaviors.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2511 - CURR PRG DVLP-LOW INCDNC DISABS

Minimum Credits: 3

Maximum Credits: 3

This course addresses program and curriculum development for students with moderate/severe disabilities. Topics include the development of assessment, instruction/curricula for the following areas: personal management, social interaction, language communication, leisure, community, vocational, and functional academics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2512 - ASSMNT INSTRUC-HIGH INCDNC DISAB

Minimum Credits: 3

Maximum Credits: 3

Course is designed to provide knowledge of assessment procedures for designing academic programs for children and youth with mild disabilities, with emphasis on assessment for teaching reading, written language and mathematics.

Course includes assessment for eligibility for special education and ongoing assessment of instructional effectiveness.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

TLL 2513 - INSTRNL METH-HIGH INCDNC DISABS

Minimum Credits: 3

Maximum Credits: 3

This course explores the methods and procedures for developing literacy for students with learning disabilities, mild mental retardation, and behavioral disorders. The focus of the first 5 sessions is on learning to teach young students who have extraordinary difficulty; the next sections address the literacy needs of older students.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

TLL 2522 - ED STDNT EMOTIONAL DISTURBANCE

Minimum Credits: 3

Maximum Credits: 3

The course provides knowledge of curriculum content, teaching techniques and instructional materials for children and youth with emotional disturbance through a focus upon academic content areas and social skills. The utilization of instruction as therapeutic programming will be the central theme.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2707 - FIELD SEMINAR IN EARLY CHILDHOOD EDUCATION

Minimum Credits: 1

Maximum Credits: 1

Students participate in district-based in-service activities and complete field-based assignments aimed at promoting an understanding of the professional, personal, social, and political dimensions of schools.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

TLL 2751 - SPECIAL EDUCATION PROCEDURES AND TRANSITION PROCESSES

Minimum Credits: 3

Maximum Credits: 3

This course is designed for students entering the teacher preparation program in mental and physical disabilities. Instruction concerning how to prepare for instruction, write lesson plans, and implement lessons is provided. Field observations and micro-teaching experiences are also provided.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2800 - STUDENT TEACHING-EARLY CHLDHD ED

Minimum Credits: 1

Maximum Credits: 10

Full-time practicum for teacher certification candidates. Provides opportunities to observe, plan, conduct, and evaluate instruction in the school setting and receive professional feedback from university supervisors and experienced master teachers.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad HSU Basis

TLL 2853 - STUDENT TEACHING - STUDENTS WITH HIGH INCIDENCE OF DISABILITIES

Minimum Credits: 2

Maximum Credits: 6

Teacher candidates engage in fieldwork five days a week in school sites with students with high incidence disabilities. Teacher candidates will collaborate with special education mentor teachers to develop and implement a plan by which the teacher candidate will, by the end of the experience, assume responsibility for the majority of provided instruction and classroom management. Experiences are designed to support teacher candidates' ability to recognize and apply evidence-based practices in the school context.

Academic Career: Graduate

Course Component: Internship

Grade Component: Grad HSU Basis

TLL 2858 - STUDENT TEACHING SEMINAR - SPECIAL EDUCATION TEACHER PREPARATION

Minimum Credits: 2

Maximum Credits: 2

This weekly seminar is offered concurrently with the full-time student teaching requirement. The seminar permits teacher candidates to discuss and process situations and problems as they arise in the field and assists teacher candidates in the completion of program and student teaching requirements. A focus on the preparation of a professional portfolio prepares teacher candidates for the job search and interview process.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

Telecommunications

TELCOM 2813 - SECURITY MANAGEMENT AND COMPUTER FORENSICS

Minimum Credits: 3

Maximum Credits: 3

Security management in information systems and networks. Intrusion detection systems, anomaly detection, network forensics, application logging, auditing and data management, contingency planning, digital immune systems; alarm and responses; security standards; ethical and legal issues in information; cyber-evidence.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: (TELCOM 2810 or 2821 or INFSCI 2150) or (PLAN: Telecommunications (TELCOM-MST/TCOMM-MST) or Telecommunications Certificate (TELCOM-AC/TCOMM-AC) or Info Science PHD w/TELE option (PHDTEL-TR))

TELCOM 2820 - CRYPTOGRAPHY

Minimum Credits: 3

Maximum Credits: 3

Principles of number theory, cryptographic algorithms and cryptanalysis. Steganography, block and stream ciphers, secret key encryption (des, res, re-n), primes, random numbers, factoring, and discrete logarithms. Public key encryption (rsa, Diffie-Helman, elliptical curve cryptography, n'tru); key management, hash functions (md5, sha-1, ripemd-160, HMAC).

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: (TELCOM 2000 or 2100 or INFSCI 1070) or (PLAN: Telecommunications (TELCOM-MST/TCOMM-MST) or Telecommunications Certificate (TELCOM-AC/TCOMM-AC) or Info Science PHD w/TELE option (PHDTEL-TR))

Theatre Arts

THEA 0115 - THE ALEXANDER TECHNIQUE

Minimum Credits: 1

Maximum Credits: 1

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

THEA 0375 - INTRODUCTION TO OPERA

Minimum Credits: 3

Maximum Credits: 3

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS The Arts General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

THEA 0505 - ENJOY PERFORMANCES

Minimum Credits: 3

Maximum Credits: 3

We are always and everywhere performing. We produce plays and inhabit other places and times. We participate in religious rituals. We occupy public and virtual spaces to protest political injustice. We invest significant time, labor, and energy in managing our social identities. And when we work, if we work, we receive performance reviews. This course engages performance as lens for exploring embodiment, representation, identity, and history. Drawing upon the breadth and depth of performance studies as an interdisciplinary field of inquiry over the past half-century, this course will introduce students to performance as both a subject and method of humanistic inquiry. Through lectures, discussions, and performance analysis exercises we will explore what a performance studies perspective enables us to understand anew.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Diversity General Ed. Requirement, DSAS The Arts General Ed. Requirement, SCI Diversity General Ed. Requirements, SCI Polymathic Contexts: Humanistic GE. Req.

THEA 0804 - THEATRE AND COLLABORATION

Minimum Credits: 3

Maximum Credits: 3

The key to achieving a successful theatrical production is effective communication among all theatre artists during the process of development. Emphasis in this course is placed on collaboration, visualization, research, script interpretation, concept development and performance. Students will be exposed to the work of notable artists in each field and explore theatre making from the vantage point of designers, dramaturgs, playwrights, producers, critics, historians, directors and actors. Over the first two weeks, students will gain a broad base of knowledge regarding the roles and responsibilities inherent in any collaborative theatre process. In the ensuing weeks students will explore a number of contemporary artists and devise their own collaborative projects. Students will become theatre makers.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Attributes: DSAS Creative Work General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

THEA 0810 - INTRODUCTION TO DRAMATIC ART

Minimum Credits: 3

Maximum Credits: 3

This course focuses on script analysis (the examination of how a dramatic text is put together). Exploring a diverse range of dramatic forms spanning histories and geographies, we will study how a play and its structural characteristics offer possible meaning on the page and on the stage. What different analytical tools help us interpret a play text or production? How does a play's dramatic structure and historical circumstances inform its visualization and staging in a specific time and space for an intended audience? The course will evaluate written texts as well as live performances.

THEA 0830 - INTRODUCTION TO PERFORMANCE

Minimum Credits: 3

Maximum Credits: 3

This course is designed to develop the students' awareness of the actor's process and to foster a general sense of theatre as an area of human endeavor. Students will be introduced to basic communication skills, including physical and vocal presence in front of an audience. The course will also develop an introductory level of acting skill through the use of regular warm-ups, theater games, improvisation, and simple scene study. The class will culminate in the performance of a final scene. Scenes will be selected from a diverse range of playwrights and students will examine the political, cultural and social context of each play. The course will also provide an introduction to basic theater terminology, and foster the ability to respond to and reflect on theatrical performances. Each student is required to buy a semester pass and attend university theatre productions.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Creative Work General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

THEA 0840 - INTRODUCTION TO THEATRE DESIGN

Minimum Credits: 3

Maximum Credits: 3

This course is an introduction to the design of scenery, costumes and lights used in theatre. Class work consists of several design projects focusing on design development, drawing and rendering, and drafting. This course will create an awareness of the role of the designer within the scope of the total collaborative process of theatre production. Students may be required to purchase a semester pass and attend university theatre productions.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Creative Work General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

THEA 0842 - INTRODUCTION TO STAGECRAFT

Minimum Credits: 3

Maximum Credits: 3

This is a production-oriented course involving the study and application of the process and skills utilized in the

realization of theatrical scenery, props, and lighting. This includes standard scenic construction techniques, materials and equipment of the scene shop, an introduction to scenic painting, drafting, properties design and construction, and basic lighting practices. An introduction to basic lighting equipment and stage electrics will also be addressed. This will be emphasized through experience working in the scene shop, on stage, and on department running crews. 45 Hours of work in one of these areas is required for the course.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

THEA 0880 - THEATRICAL PRODUCTION

Minimum Credits: 1

Maximum Credits: 1

A practical application course which gives the student hands-on experience in university theatre productions in one or more of the following areas: scenery/props, costume, lighting, sound, and/or stage management. The goal is to expand the student's knowledge and understanding of production processes through team participation in the presenting of a full production. A student must complete at least 45 hours of work in an assigned area to receive 1 credit. Students must usher for 2 performances during the semester enrolled. Note: this course is offered by appointment.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

THEA 1023 - FRENCH THEATRICAL WORKSHOP

Minimum Credits: 3

Maximum Credits: 3

Three plays by Moliere will be read and analysed, and one of the adapted and staged. FR 0055 is a prerequisite.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

THEA 1100 - VOICE AND MOVEMENT 1

Minimum Credits: 3

Maximum Credits: 3

This course will explore the anatomy, physiology, and physicality of the human voice and body. The approach will be holistic mind, body, and vocal practice. Techniques learned and practiced will be applied directly to specific performance assignments throughout the semester. Students will begin by examining and identifying healthy, effective, and expressive voice and body use. Students will receive an introduction to the practices of Patsy Rodenburg, Edith Skinner, the Viewpoints, Rudolf Laban, yoga, among others. The work will focus on voice and bodywork as they relate to acting and to any area of life requiring effective communication. Emphasis in text work will be on clarity of thought, physical connection, emotional availability, and clear communication.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

THEA 1101 - VOICE AND MOVEMENT 2

Minimum Credits: 3

Maximum Credits: 3

This course will build on the practices introduced in Voice & Movement 1 including presence, healthy and expressive vocal use, and effective communication. It will introduce the international phonetic alphabet, accents and dialects.

Methods of accent and dialect acquisition will include vocal viewpoints, imagery, phonetics, and physical exercises. Students will research dialects and accents using such sources as: the international dialects of English archive, the visual accent archive, audio and visual recordings. Research and techniques will then be expressed through performances of monologues, scenes and poetry. This course culminates with each student's creation and development of a solo dialect performance.

Grade Component: LG/SNC Elective Basis

THEA 1102 - ACTING 1

Minimum Credits: 3

Maximum Credits: 3

This course is designed to build foundational acting skills using Stanislavski-based exercises such as those devised by Sanford Meisner, Stella Adler and/or Uta Hagen. These exercises aim to develop the actor's ability to listen and respond truthfully in the moment, be present and connect, work with spontaneity, build concentration, and incite the imagination. Students will learn to craft behavior by working on contemporary text and engaging in improvisational exercises with partners as well as a series of solo projects. Students will also explore given circumstances and actions/objectives while working on audition techniques with a monologue. Students will then apply textual analysis skills and build rehearsal technique by bringing him/her-self to life in a role in a scene. This course is a building block and prerequisite for other performance courses in the theatre department. Students interested in the Theater major or minor or who have theatre experience are encouraged to audition into this course (in lieu of Introduction to Performance).

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: THEA 0830; PROG: School of Arts and Sciences

THEA 1103 - ACTING 2

Minimum Credits: 3

Maximum Credits: 3

Acting II builds on the work of Acting I with a deeper exploration of character development and advanced acting skills by challenging the student with texts from plays written and/or originally set during the Industrial era to the Modern era. This course goes beyond simply exploring the works of early twentieth century playwrights but also examines contemporary adaptations of the original work. Playwrights explored (but not limited to) are Ibsen, Chekhov, Regina Taylor, Aaron Posner, OyamO, Tanya Saracho and others. In addition, by using exercises developed by various practitioners and responding and reacting to the Stanislavski system, students will explore character through textual analysis and physicality. Students will perform character projects and strengthen rehearsal techniques by working on scenes that inhabit more complex language from an earlier period of history. Prerequisites: Introduction to Performance and/or Acting I

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

THEA 1104 - ACTING 3

Minimum Credits: 3

Maximum Credits: 3

This course focuses on preparing and presenting roles from classical plays. Using heightened text from diverse textual sources including ancient and modern plays and poetry, students will explore language as it applies to character and intention. Actors will build on their foundational acting craft with advanced vocal and physical acting exercises to

enhance character, will develop textual analysis and rehearsal skills, and will apply those techniques to performing scenes (ancient Greek playwrights, Elizabethan playwrights and other lyrical writers). Students will perform three scenes from various historical periods, at least one of which will be from a Shakespearean text. In addition, students will examine the political, cultural and social context of each play.

THEA 1110 - DIRECTING 1

Minimum Credits: 3

Maximum Credits: 3

This course intends to discover, explore, and develop the directorial crafts of the student/director. It addresses the theoretical, analytical, and practical skills requisite to the craft of directing plays for the theatre. Plays of the realistic style will be its primary focus, although some discussion may range over other styles and periods in order to provide the proper context for approaching realistic plays. The student's directing ability will be developed through class discussion and exercises, written assignments, outside reading, and the direction of scenes from realistic plays. Students will learn methods to analyze plot, character and theme in scripts as well as techniques to translate that analysis into clear, vivid stage action.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: THEA 0830

THEA 1111 - DIRECTING 2

Minimum Credits: 3

Maximum Credits: 3

This course will entail a study of scene analysis and directing projects from plays of 1860-1980. Will deal with the special demands of different playwrights.

THEA 1227 - SCENE PAINTING

Minimum Credits: 3

Maximum Credits: 3

This course is a study of scene painting practices for theatre. Students will study the techniques and processes of painting in a studio class atmosphere. Tools and techniques will be demonstrated by the instructor then executed by the student on a large format canvas. Some painting projects may include how to paint marble, foliage, and/or woodgrain.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

THEA 1229 - STAGE MANAGEMENT 1

Minimum Credits: 3

Maximum Credits: 3

Principles and techniques of stage and production management as applied to professional, educational, and community theatre. Studies will include auditions, rehearsal process and organization; technical and performance process and procedures; production personnel and cost management.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

THEA 1230 - STAGE LIGHTING 1

Minimum Credits: 3

Maximum Credits: 3

An introduction to Stage Lighting including awareness of light, instrumentation, color theory, texture, control, basic theatrical electricity and artistic design, with an emphasis on the organization of theatrical lighting. This course will reflect the study of lighting as an art form, including design concepts, light plots, artistic elements of theatre, sequential cue relationships, and script analysis.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

THEA 1231 - STAGE LIGHTING 2

Minimum Credits: 3

Maximum Credits: 3

Using lecture, lab projects, and critique to develop the communication and implementation of ideas in lighting, while also exploring the artistic and conceptual practices of design. Advancing the development of working process consistent with current professional practices in the field of Lighting Design.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

THEA 1233 - SOUND DESIGN 1

Minimum Credits: 3

Maximum Credits: 3

An introduction to the elements, tools, and styles used for theatrical sound design and reinforcement of live theatre productions. The projects will be varied and will include creating cues, paperwork, and full designs for new works, existing texts, and other innovative forms of live design within the community. From this course, one will have the knowledge to create and implement basic sound design in production.

Academic Career: Undergraduate

Course Component: Lecture
Grade Component: Letter Grade

THEA 1235 - SCENE DESIGN 1

Minimum Credits: 3

Maximum Credits: 3

This is an introduction to scenic design for the theatre exploring creative uses of space to tell stories on stage. Topics covered may include introductions to script analysis, visual research, color theory, basic perspective sketching, model building, and drafting. This course will reflect the current industry practices in scenic design as an art form and may include introductions to contemporary software used in the field.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

THEA 1240 - COSTUME PRODUCTION AND TECHNOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course is a production-oriented studio course involving the processes and skills utilized in the realization of theatrical costumes. The student will develop an understanding of the costume production process in addition to acquiring the skills necessary in the aid of the construction and completion of theatrical costumes. The student will learn basic hand sewn stitches and fasteners, proper use and operation of the sewing machinery. The student will also learn basic functions of the personnel in the costume shop, health and safety, fabric and textiles, draping, commercial and drafted patterning and costume finishing. Lectures, demonstrations and projects will supplement work done in class. Practical experience is obtained through lab hours which are obtained by working outside of class time in the costume shop on departmental theatre productions (30 hours) or get involved backstage on the wardrobe run crew. These experiences provide the students opportunities to practice skills learned in the classroom.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

THEA 1245 - STAGE MAKEUP

Minimum Credits: 3

Maximum Credits: 3

This course will offer the student a practical guide to the theory and practice of theatrical makeup and design. The student will learn how to conduct conceptual research, attain a basic skill level in stage makeup application and color selection. Using the student's own face as a canvas, this course will familiarize students with fundamental makeup techniques, equipment, and materials. Through a combination of reading assignments, lectures, supervised demonstrations and practice sessions students will explore the relationship between the theatrical makeup designer, performer and character development thru stage makeup. The course will also introduce the student to entry level specialty/special FX makeup techniques and skills. Professional Makeup kit and textbook are required for this course.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

THEA 1246 - COSTUME DESIGN 1

Minimum Credits: 3

Maximum Credits: 3

This course is a foundation for the study of the basic principles, practices and techniques of costume design for the

stage. Skills and methodologies used in this course will include: how the elements and principles of design relate to and are utilized in costume design; collaboration; script and character analysis; research methods; an introduction to fashion and dress history as it relates to the assigned play; fabric selection; figure drawing and costume rendering techniques.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

THEA 1247 - TECHNIQUES IN PERFORMANCE PEDAGOGY

Minimum Credits: 3

Maximum Credits: 3

Techniques in Performance Pedagogy is designed for graduate students to address the unique needs of teaching theatre performance at the college level and beyond. Students will examine various training methods used in university training programs (in a BA, BFA or MFA). Students will formulate their own style and teaching philosophy as they develop lesson plans, create innovative pedagogical exercises, conduct warm-up sessions, coach actors and develop methods of assessing performance work. In addition, students will create and refine application materials such as a statement teaching philosophy, cover letter and CVs in order to be competitive in the academic job market. The course does not have an in-person final. They have a final project which is turned in on the last day of the semester.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

THEA 1250 - ADVANCED THEATRE DESIGN

Minimum Credits: 3

Maximum Credits: 3

This course is an exploration in advanced topics in the design of scenery, costumes, sound, and lights used in theatre. Class work consists of several design projects focusing on design development, drawing, rendering, collaborative design skills, and drafting. This course will build on the students' awareness of the role of the designers within the scope of the total collaborative process of theatre production.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

THEA 1315 - CONTEMPORARY ACTOR TRAINING

Minimum Credits: 3

Maximum Credits: 3

Contemporary Actor Training explores new and emerging performance styles, synergies, and techniques. These may include novel approaches to voice, movement, collaboration, ensemble work, diversity, and interdisciplinarity. Students will examine their own performance approach in relation to those of a diverse range of practitioners and sources, enacting and incorporating those methods into their own individual performance practice.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

THEA 1331 - NEW PERFORMANCE METHODS

Minimum Credits: 3

Maximum Credits: 3

New Performance Methods is an exploration of cutting-edge actor training, taught by today's professional performing artists. This course will deepen students understanding of their instrument, as well as the "why?" and "how?" of

performing in given social, artistic, and political contexts. Through in-class exercises, rehearsals, journaling, and individual/group assignments, this course functions as a research laboratory with students as active participants and collaborators. Over the course of the semester, students will assess training methods, approaches towards ensemble-building, and collaborative structures, culminating in a live public performance /demonstration.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

THEA 1338 - MUSICAL THEATRE PERFORMANCE

Minimum Credits: 3

Maximum Credits: 3

This course is designed to introduce students to the foundational elements of the musical theatre performer's process and to examine the use of song in a theatrical context as a mode of human expression. Students will be introduced to the fundamentals of vocal structure and technique as well as physical and vocal presence in front of an audience within the context of specific genres/ style periods of musical theatre. Fundamental acting techniques will be developed in the context of musical theatre practice through the use of regular warm-ups, theater games, improvisation, and study of song texts. Each of the three main units of the course, ensembles, duets and solo songs, will culminate in a public performance of the pieces studied in class. Standard professional practices for musical preparation and auditions will also be addressed and will include a mock audition process at the end of the term. Students will be required to attend a full production of a musical and will develop critical analytical skill through written reflection on that production as well as on their own development throughout the term.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

THEA 1339 - MUSICAL THEATRE PERFORMANCE 2

Minimum Credits: 3

Maximum Credits: 3

This process-based course focuses on the application of foundational techniques introduced in Musical Theatre Performance 1 to collaborative scene work. Students will cultivate personalized warmups, create strategies for learning music independently, and engage in advanced text study and analysis. Students will explore the body to brain connection and sing with integration of text and technique. Meaningful memorization will be emphasized and applied through weekly solo, small group, and ensemble performances in class time. Students will be encouraged to seek out local auditions, connect with professional musical theatre performers, and learn best practices for audition repertoire selection and preparation. Students will be required to attend two full productions of live musicals and use their critical analytical skills to compare and contrast the performances and material.

Academic Career: Undergraduate

THEA 1341 - WORLD THEATRE: 500 BCE TO 1640

Minimum Credits: 3

Maximum Credits: 3

World Theatre 500 BCE to 1640 is the first in a three-part world theatre history sequence designed to explore the development of dramatic forms, theatre practices, and performances from the 5th century BCE to today. World Theatre 500 BCE to 1640 investigates histories of theatre and performance (scripts, embodiment, design, audiences, conventions, cultural functions, etc.) within local and global social, artistic and political contexts. The course focuses on evidence and interpretation as well as historical causation. Within each survey section, we will analyze and compare representative case studies to better understand performance as a practice and as a site of history making, with

particular attention to questions of race, gender, sexuality, and class. Throughout the semester, we will explore a variety of theatre and performance forms, including Roman comedy, early Sanskrit drama, medieval commemorative drama, and Japanese theatre forms including Noh and Kabuki, among others. We will investigate world theatre history from a historiographical perspective. This means that we will examine our material not only for content, but also for how it conveys that content. In our exploration of how theatre history is crafted, we will develop critical historical skills and tools, including how to ask historical questions, assess primary sources, critique narratives, and clearly communicate our historiographical ideas and arguments. Students will produce historical knowledge about theatre and performance with respect to questions of racial, gender, sexual, and class diversity throughout the semester.

THEA 1342 - WORLD THEATRE: 1640-1890

Minimum Credits: 3

Maximum Credits: 3

World Theatre 1640 - 1890 is the second in a world theatre history sequence designed to explore the development of dramatic forms, theatre practices, and performance from the fifth century B.C.E. to today. We will discuss histories of theatre and performance (scripts, design, audiences, conventions, cultural functions, etc.) within contexts of social, artistic, economic, and political events, both local and global. The survey is split into five sections that focus on key themes, questions, and narratives in world theatre history. Within each section, we will analyze and compare representative case studies to better understand performance as a practice and as a site of history making. We also will question how theatre and performance helps produce, reinforce, and challenge understandings of race, gender, class, and sexuality throughout the world. Throughout the semester, we will explore a variety of theatre and performance forms, including seventeenth century French comedy, bunraku, Beijing opera, indigenous performance in the Americas, transatlantic anti-slavery performances, melodrama, and realism among others. We will investigate world theatre history from a historiographical perspective. This means that we will examine our material not only for content, but also for how it conveys that content. We will question how the construction of theatre history impacts the perspectives and performances included and excluded in our narratives as well as reflects and generates ideas about race, gender, sexuality, and class. In our exploration of how theatre history is crafted, we will develop critical historical skills and tools, including how to ask historical questions, assess primary sources, critique narratives, and clearly communicate our historiographical ideas and arguments. In the process, we will reflect on our own roles in the production of historical knowledge, especially in relation to race, gender, class, and sexuality.

THEA 1343 - WORLD THEATRE: 1890-PRESENT

Minimum Credits: 3

Maximum Credits: 3

World Theatre 1890-present is the third in a world theatre history sequence designed to explore the development of dramatic forms, theatre practices, and performance from the fifth century B.C.E. to today. We will discuss histories of

theatre and performance (scripts, design, audiences, conventions, cultural functions, etc.) within contexts of social, artistic, economic, and political events, both local and global. The survey will focus on representative case studies that will help us examine broader themes, questions, and narratives in world theatre history. We also will question how theatre and performance helps produce, reinforce, and challenge understandings of race, gender, class, and sexuality throughout the world. Throughout the semester, we will explore a variety of theatre and performance forms, including avant-garde performances in Europe, indigenous performance in the Americas, political theatre in South Africa, musical and dance performances in Japan, and hip-hop performance in the United States, among others. We will investigate world theatre history from a historiographical perspective. This means that we will examine our material not only for content, but also for how it conveys that content. In our exploration of how theatre history is crafted, we will develop critical historical skills and tools, including how to ask historical questions, assess primary sources, critique narratives, and clearly communicate our historiographical ideas and arguments. In the process, we will reflect on our own roles in the production of historical knowledge, especially in terms of generating understandings of race, gender, class, and sexuality.

THEA 1349 - DISABILITY AND PERFORMANCE

Minimum Credits: 3

Maximum Credits: 3

This course brings disability studies into conversation with the ways we think about performance. In disability studies, we approach disability not as an individual medical impairment but as a social, cultural, and political phenomenon. While focusing on theatre and performance in the United States in the wake of the disability rights and liberation movements of the 1970s, we will make geographical and historical detours beyond this purview. We will explore commercial, experimental, and community-based theatre alongside dance, film, and multi-disciplinary performance practices by artists with physical, sensory, intellectual, neurological, and mental disabilities. Through reading, screenings, and a combination of critical and creative assignments, we will address questions including: how has theatre participated in constructing contemporary ideas about disability? What aesthetic strategies have disabled artists and activists used to challenge these representations? How have activists mobilized performance in pursuit of disability justice? What is the relationship between accessibility and aesthetics in contemporary performance? How have disabled artists challenged and reshaped the norms of professional theatre training and production? Throughout, we will pay particular attention to intersections between disability and race, gender, sexuality, and class. This course presumes no prior familiarity with disability studies.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Letter Grade

THEA 1360 - THEATRE CRITICISM

Minimum Credits: 3

Maximum Credits: 3

A practical course in the craft of theatre criticism. The class attends local theatrical productions and writes weekly reviews. Course is designed to develop skills in interpretation of the theatrical art, in understanding of how the play operates in the theatre, and in creative writing. Each student receives individual attention to interpretation problems.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCOMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or

Grade Component: LG/SNC Elective Basis

THEA 1393 - THEATRE AND THE BLACK LIVES MATTER MOVEMENT

Minimum Credits: 3

Maximum Credits: 3

We will collectively read contemporary theatrical, political, theoretical and sociological works that engage with race in the United States, Black Lives Matter, white silence, and ally capacity building. Some of us may be just learning how to talk about the above; some of us may live it daily. Theatrical pieces, plays and performance, function as the spine for our work, around which contextual critical and historical works will coalesce. We will also actively engage with journalistic and social media, as well as films, music and dance, both in Pittsburgh and beyond. The reading and viewing materials in the course are inspired by American Theatre Magazine's, Ferguson Theatre Syllabus, and Prof. Frank Leon Roberts, (NYU Gallatin) Black Lives Matter Movement syllabus.

Academic Career: Undergraduate

Grade Component: Letter Grade

THEA 1406 - MUSICAL THEATRE APPRECIATION

Minimum Credits: 3

Maximum Credits: 3

This course is designed to investigate the history of Musical Theatre and to gain a greater appreciation for the art form through listening, script analysis, and critical examination. Students will explore the genre through scenes and songs, observation of professional performance followed by critical response, and guest demonstrations. No experience in performance is necessary for participation.

Academic Career: Undergraduate

Course Component: Lecture
Grade Component: LG/SNC Elective Basis

THEA 1407 - INTRO MUSICAL THEATRE DESIGN

Minimum Credits: 3

Maximum Credits: 3

This is an introductory course in the theory, process, and techniques of set, costume, sound, and lighting design. The course will look at musical theatre scripts and learn to apply design concepts to these texts utilizing class discussion and projects. Students will learn to develop artistic and conceptual approaches to storytelling and how to implement these concepts into theatre design. This course will also investigate how designers' partner with technology in creating the environment of productions within the spectacle of musical theatre. Industry standards in design principles, technology, and script analysis will be explored.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

THEA 1408 - IMMIGRANTS AND THE MUSICAL

Minimum Credits: 3

Maximum Credits: 3

This course examines how immigrants helped shape musical theatre into the form audiences know and love today. It also will analyze the transformation of musical theatre's representation of immigrants over three centuries. Through the analysis of race, ethnicity, class, gender, and sexuality, the class will examine how the experiences of immigrant artists and musical theatre representation reflected, responded to, and rebelled against prevailing anxieties and tensions surrounding immigrants in U.S. society and globally.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

THEA 1409 - QUEER BROADWAY

Minimum Credits: 3

Maximum Credits: 3

The American musical has long found its most devoted and enthusiastic fans in LGBTQ+ communities. This class is less concerned with why this has come to pass than how. Moving across memoirs, cast recordings, activist protest, daytime television, diva worship, social media, cruise ships, drag shows, and experimental theatre, we will examine how queer communities engage musical theatre to various social, cultural, and political ends. While focusing on LGBTQ+ communities, we will also draw upon the insights of queer theory to analyze how musicals generate "queer" forms of attachment for people inhabiting a range of identities in and beyond the United States.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

THEA 1480 - DIRECTED PROJECT SCENERY/PROPS

Minimum Credits: 1

Maximum Credits: 3

Students will work directly with the scenic faculty and staff on department productions on either theoretical or practical projects.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SNC Elective Basis

Course Attributes: Capstone Course

THEA 1481 - DIRECTED PROJECT COSTUME/MAKEUP

Minimum Credits: 1

Maximum Credits: 3

Students will work directly with the costume faculty and staff on department productions on either theoretical or practical projects.

THEA 1482 - DIRECTED PROJECT LIGHTING/SOUND

Minimum Credits: 1

Maximum Credits: 3

Students will work directly with the lighting/sound faculty and staff on department productions on either theoretical or practical projects.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SNC Elective Basis

Course Attributes: Capstone Course

THEA 1483 - DIRECTED PROJECT DIRECTING/PERF

Minimum Credits: 1

Maximum Credits: 3

This course will entail a study of acting and directing, concentrating on the problems and techniques of the realistic/naturalistic styles and other 20th century correlatives.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SNC Elective Basis

Course Attributes: Capstone Course

THEA 1484 - DIRECTED PROJECT BUSINESS MGT

Minimum Credits: 1

Maximum Credits: 3

Students will work directly with the design and tech faculty and staff on department productions on either theoretical or practical projects.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SNC Elective Basis

Course Attributes: Capstone Course

THEA 1485 - DIRECTED PROJECT STAGE MANAGEMENT

Minimum Credits: 1

Maximum Credits: 3

Students will work directly with the stage management faculty and staff on departmental productions on either theoretical or practical projects.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SNC Elective Basis

THEA 1486 - DIRECTED PROJECT DRAMATURGY

Minimum Credits: 1

Maximum Credits: 3

This course involves studying the practice and theory of dramaturgy under the direct supervision of a faculty member. Depending on the student's area of interest and experience, the course may focus on dramaturgy at the introductory level or a more specialized dramaturgy project.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Letter Grade

Course Attributes: Capstone Course

THEA 1487 - DIRECTED PROJECT UNDERGRAD TEACHING ASSISTANT

Minimum Credits: 1

Maximum Credits: 3

Students will work directly with a faculty member as a Teaching Assistant for a course. To be eligible for a T.A. position, students must: be a Theatre Arts Major or Minor, be at least an emerging Junior or farther in their academic career, have completed both THEA 0804 and THEA 0810, be in good academic standing with a GPA of 3.0 or better, and have completed the course in which the TA position is sought, earning a 3.5 or better in the class. This Directed Study can be taken for 1-3 credits depending on the amount of work and class time agreed upon with the instructor of record. Permission from the Director of Undergraduate Studies in the Theatre Department and the faculty member acting as Instructor of Record is required. Please see the Director of Undergraduate Studies in the Theatre Department for more details.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Letter Grade

THEA 1488 - THEATRE PRODUCTION

Minimum Credits: 1

Maximum Credits: 3

This course will entail participation in the theatre arts department's productions in one of several categories for upper classmen and graduate students.

Academic Career: Undergraduate

Course Component: Credit Laboratory

Grade Component: LG/SNC Elective Basis

THEA 1489 - DIRECTED PROJECT IN ONE-ACTS/LABS

Minimum Credits: 1

Maximum Credits: 1

Directed Project in One-Acts/Labs involves studying the practice and theory of producing one-acts or lab productions under the direct supervision of a faculty member. Depending on the student's area of interest and experience, the course may focus on design, management, or performance practices at the introductory level or a more specialized project.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Letter Grade

THEA 1491 - DESIGN IN MUSICAL THEATRE

Minimum Credits: 1

Maximum Credits: 3

Design in Musical Theatre involves studying the practice and theory of designing for musical theatre under the direct supervision of a faculty member. Depending on the student's area of interest and experience, the course may focus on musical theatre design practices at the introductory level or a more specialized project.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Letter Grade

THEA 1492 - DRAMATURGY IN MUSICAL THEATRE

Minimum Credits: 1

Maximum Credits: 3

Dramaturgy in Musical Theatre involves studying the practice and theory of dramaturgy for musical theatre under the direct supervision of a faculty member. Depending on the student's area of interest and experience, the course may focus on dramaturgy at the introductory level or a more specialized dramaturgy project.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Letter Grade

THEA 1493 - DIRECTED PROJECT IN VOICE

Minimum Credits: 1

Maximum Credits: 1

Directed Project in Voice involves studying the practice and theory of developing your vocal instrument for musical theatre under the direct supervision of a faculty member. Depending on the student's area of interest and experience, the course may focus on vocal practices at the introductory level or a more specialized project.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Letter Grade

THEA 1495 - PERFORMANCE IN MUSICAL THEATRE

Minimum Credits: 1

Maximum Credits: 3

Performance in Musical Theatre involves studying the practice and theory of performing musical theatre under the direct supervision of a faculty member. Depending on the student's area of interest and experience, the course may focus on musical theatre performance practices at the introductory level or a more specialized project.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: Letter Grade

THEA 1498 - DIRECTED RESEARCH: THEATRE ARTS

Minimum Credits: 1

Maximum Credits: 6

Independent work on a project in theatre, supervised by a member of the theatre faculty.

Academic Career: Undergraduate

Course Component: Directed Studies

Grade Component: LG/SNC Elective Basis

THEA 1500 - MODERN ACTING

Minimum Credits: 3

Maximum Credits: 3

This course builds students' acting skills and styles. It provides the means through which students may develop or expand their acting abilities through practical work with a variety of scripts, focusing primarily on 20th-century English plays. This course has been designed based upon the technical foundations established by Stanislavky, and requires students to develop acting skills through exercises and methods taken from a mixture of America, European, as well as Russian acting traditions. Such techniques are fundamental to most lessons given at British universities and acting schools and are often used throughout rehearsals in the context of professional productions.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

THEA 1501 - SHAKESPEARE ACTING

Minimum Credits: 3

Maximum Credits: 3

In this course students develop a fluency in Shakespeare's rhetorical style through practical study, performing extracts from Shakespeare plays as well as speaking a Sonnet. The course will enable students to place Shakespeare firmly in the context of his own time, as well as in ours. The course gives an introduction to the rules of rhetorical theatre, with particular reference to the role of the iambic pentameter in Shakespeare's plays. Students are shown how to 'work' a line to the point of delivery, through attention to meaning, scansion, stress and breathing.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

THEA 1900 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 6

The terms of the student's independent study will be agreed upon by the instructor and the student.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: LG/SNC Elective Basis

Course Attributes: Capstone Course

THEA 1901 - INTERNSHIP

Minimum Credits: 1

Maximum Credits: 6

The location and terms of the student's internship will be agreed upon by the instructor and student.

Academic Career: Undergraduate

Course Component: Internship

Grade Component: LG/SNC Elective Basis

Course Attributes: Capstone Course

THEA 1903 - SEMINAR IN THEATRE ARTS

Minimum Credits: 3

Maximum Credits: 3

This course covers a specialized topic in Theatre Arts. Topics vary every semester. Current course descriptions can be found in the notes section.

Academic Career: Undergraduate

Course Attributes: Capstone Course, Undergraduate Research, Writing Intensive Course (WRIT)

THEA 2207 - WORLD THEATRE: 1890-PRESENT

Minimum Credits: 3

Maximum Credits: 3

World Theatre 1890-present is the third in a world theatre history sequence designed to explore the development of dramatic forms, theatre practices, and performance from the fifth century B.C.E. to today. We will discuss histories of theatre and performance (scripts, design, audiences, conventions, cultural functions, etc.) within contexts of social, artistic, economic, and political events, both local and global. The survey will focus on representative case studies that will help us examine broader themes, questions, and narratives in world theatre history. We also will question how theatre and performance helps produce, reinforce, and challenge understandings of race, gender, class, and sexuality throughout the world. Throughout the semester, we will explore a variety of theatre and performance forms, including avant-garde performances in Europe, indigenous performance in the Americas, political theatre in South Africa, musical and dance performances in Japan, and hip-hop performance in the United States, among others. We will investigate world theatre history from a historiographical perspective. This means that we will examine our material not only for content, but also for how it conveys that content. In our exploration of how theatre history is crafted, we will develop critical historical skills and tools, including how to ask historical questions, assess primary sources, critique narratives, and clearly communicate our historiographical ideas and arguments. In the process, we will reflect on our own roles in the production of historical knowledge, especially in terms of generating understandings of race, gender, class, and sexuality.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Turkish

TURKSH 0101 - TURKISH 1

Minimum Credits: 4

Maximum Credits: 4

The greatest part of the first term will be devoted to the presentation and practice of the basic sound patterns of the language, its fundamental sentence patterns, and sufficient vocabulary to illustrate and practice them. An introduction to the writing system will be offered together with the opportunity to acquire elementary writing and reading skills.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Asian Studies, European Union Studies, European and Eurasian Studies, Global Studies, Russian & East European Studies

TURKSH 0102 - TURKISH 2

Minimum Credits: 4

Maximum Credits: 4

At the end of the second term of the first year of study the student should be able to produce all the significant sound patterns of the language, to recognize and use the major grammatical structures within a limited core vocabulary. The student should be able a) to engage in simple conversations with native speakers about a limited number of everyday situations and b) to read and write simple material related to the situations presented.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: LING 0561 or TURKSH 0101; MIN GRADE: 'C' FOR LISTED COURSES

Course Attributes: Asian Studies, DSAS Second Language General Ed. Requirement, European Union Studies, European and Eurasian Studies, Global Studies, Russian & East European Studies

TURKSH 0103 - TURKISH 3

Minimum Credits: 3

Maximum Credits: 3

The first term of the second year will concentrate on the further development of fluency in oral production and the improvement in the student's ability to understand the flow of speech as uttered by a native speaker. Increased attention will be paid to reading as a means of augmenting a recognition vocabulary and writing as a drill and as a means of consolidating and communicating the knowledge gained.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: LING 0562 or TURKSH 0102; MIN GRADE: 'C' FOR LISTED COURSES

Course Attributes: Asian Studies, DSAS Second Language General Ed. Requirement, European Union Studies, European and Eurasian Studies, Global Studies, Russian & East European Studies

TURKSH 0104 - TURKISH 4

Minimum Credits: 3

Maximum Credits: 3

At the end of the second term of the second year the student should be able to converse comfortably with a native speaker on a variety of non-specialized subjects. The student will be offered an opportunity to experience and more fully understand the culture of the people who use the language through readings of various types. More complex writing tasks will be expected at this level.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: LING 0563 or TURKSH 0103; MIN GRADE: 'C' FOR LISTED COURSES

Course Attributes: Asian Studies, DSAS Second Language General Ed. Requirement, European Union Studies, European and Eurasian Studies, Global Studies, Russian & East European Studies

TURKSH 0105 - TURKISH 5

Minimum Credits: 3

Maximum Credits: 3

Students in this course will: refine and consolidate their language skills in everyday communicative situations covered in Turkish 1 through 4; expand and build on their language skills in more complex communicative situations that require creative and resourceful use of the Turkish Language; learn to express themselves creatively in both spoken and

written Turkish at higher levels of articulation with context specific vocabulary, cultural formulas and grammar forms; and, advance their skills in reading and comprehending various types of texts with advance level grammar forms. Focus will be on communicative competence grounded in solid knowledge of grammar, writing, listening and reading comprehension skills.

Academic Career: Undergraduate

Ukrainian

UKRAIN 0010 - ELEMENTARY UKRAINIAN 1

Minimum Credits: 3

Maximum Credits: 3

A four-skill language course, this course introduces the student to the fundamentals of Ukrainian pronunciation and speaking, reading, writing and listening, with emphasis on practical conversation. The present tense of verbs, the plural of nouns, and the gradation of adjectives and adverbs is covered.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Russian & East European Studies

UKRAIN 0020 - ELEMENTARY UKRAINIAN 2

Minimum Credits: 3

Maximum Credits: 3

A continuation of elementary Ukrainian 1, this four-skill language course extends the grammatical coverage to include verbal aspect, numeral expressions, and the locative, dative and genitive cases. Emphasis continues to be on developing spoken language competence.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Second Language General Ed. Requirement, Russian & East European Studies

UKRAIN 0030 - INTERMEDIATE UKRAINIAN 1

Minimum Credits: 3

Maximum Credits: 3

The continuation of elementary Ukrainian 2, this course focuses more on written Ukrainian and developing listening comprehension than in the first-year course. Attention is paid to developing a good control of basic idioms, and to the formation of participles.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Russian & East European Studies

UKRAIN 0040 - INTERMEDIATE UKRAINIAN 2

Minimum Credits: 3

Maximum Credits: 3

The continuation of intermediate Ukrainian 1, this course attempts to round out the student's basic oral competence in relation to specific matters of Ukrainian culture and reality. For many students, this course is preparatory to summer study in the Ukraine.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Russian & East European Studies

UKRAIN 0210 - INTENSIVE BEGINNING UKRAINIAN

Minimum Credits: 6

Maximum Credits: 6

This is a four skills intensive course in beginning Ukrainian which is offered as part of the summer intensive workshops in Slavic languages.

Academic Career: Undergraduate

Course Component: Workshop

Grade Component: Letter Grade

Course Attributes: DSAS Second Language General Ed. Requirement, Russian & East European Studies

UKRAIN 0220 - INTENSIVE INTERMEDIATE UKRAINIAN

Minimum Credits: 6

Maximum Credits: 6

This is a four skills intensive course in intermediate Ukrainian that is offered as a part of the Slavic, East European and Near Eastern Summer Language Institute.

Academic Career: Undergraduate

Course Component: Workshop

Grade Component: Letter Grade

UKRAIN 0400 - ADVANCED UKRAINIAN

Minimum Credits: 3

Maximum Credits: 3

This is a course in advanced Ukrainian language (third-year, first semester) and is a four-skill course.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

UKRAIN 0410 - ADVANCED UKRAINIAN 2

Minimum Credits: 3

Maximum Credits: 3

This is a continuation (second semester, third year) course in advanced Ukrainian language.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: Russian & East European Studies

UKRAIN 0450 - UKRAINIAN CULTURE

Minimum Credits: 1

Maximum Credits: 1

This 1-credit mini-course is designed to improve students' ability to read and discuss texts in Ukrainian. The artifacts under study acquaint students with various aspects of Ukrainian culture. It is open to all students who have completed or are currently enrolled in Intermediate Ukrainian, as well as heritage learners. This course may be repeated for credit.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

UKRAIN 0860 - CHORNOBYL IN UKRAINIAN CULTURAL MEMORY

Minimum Credits: 1

Maximum Credits: 1

This 1-credit mini-course is designed to improve students' ability to read and discuss texts in Ukrainian. The artifacts under study (poetry, prose, songs) are drawn from the rich repository of artistic responses to the 1986 disaster at the

Chornobyl' nuclear power plant. It is open to all students currently enrolled in Ukrainian, as well as heritage learners.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Satisfactory/No Credit

UKRAIN 1901 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 3

This course allows students to work independently on individually designed projects.

Academic Career: Undergraduate

Course Component: Independent Study

Grade Component: LG/SNC Elective Basis

Urban Studies

URBNST 0010 - INTRODUCTION TO URBAN STUDIES

Minimum Credits: 3

Maximum Credits: 3

This course serves as the required introduction into the Urban Studies major or as a general course in the social sciences for the non-major. The course explores the problems and potentials of cities by combining the various disciplinary perspectives--economics, Africana studies, history, political science, sociology, and anthropology. As the course is providing the students with the necessary concepts and information to understand cities, the students will be developing their own skills through field trips, debates, group presentations and journal writing.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: Restricted ARTSC UGRD Students

Course Attributes: DSAS Diversity General Ed. Requirement, DSAS Social Science General Ed. Requirement, SCI Polymathic Contexts: Soc/Behav. GE. Req.

URBNST 0019 - COVID-19 AND THE CITY

Minimum Credits: 3

Maximum Credits: 3

The global pandemic COVID-19 has disrupted the way we live, and this is especially true for those of us living in metropolitan areas. This introductory course addresses the current pandemic by exploring the interconnections between urbanization, globalization, and public health. Using lectures, discussions, and guest speakers we will explore what this public health crisis reveals about the way cities are constructed. By looking back at previous global pandemics including the Great Plague, Spanish Flu, and SARs we can evaluate the potential of COVID-19 to change urban life at scales from the global to the local. This course is designed for any Pitt student interested in the interdisciplinary dimensions of the crisis.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Attributes: DSAS Global Issues General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

URBNST 0030 - INTRODUCTION TO GIS

Minimum Credits: 3

Maximum Credits: 3

Geospatial data are digital representations of our physical world. As such, many public policy programs are critically informed by applications of geospatial data. This course will teach students how to acquire, manage, analyze, and visualize spatial data using ArcGIS Desktop. Students will also be introduced to applied data analysis using R. R is powerful, free, and flexible software used in many "big data" application. Assignments, applications, and course discussion will emphasize contemporary issues in public policy. Upon completing this course, students should expect to be proficient in basic GIS analysis and prepared for more advanced statistical coursework.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

URBNST 0050 - INTRODUCTION TO URBAN RESEARCH

Minimum Credits: 3

Maximum Credits: 3

In this course students will learn and apply a set of basic research and communication skills relevant to work in urban settings. After active participation in the course, students will be able to locate data, analyze in thorough and theory based fashion, and present clearly and persuasively. Skills include defining a research question, questionnaire design and interviewing, finding and interpreting secondary data, using pc based spreadsheet, database and presentation software and participating on a team. Coursework is organized around real world problems.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Letter Grade

Course Attributes: Capstone Course, Undergraduate Research

URBNST 0070 - INTRODUCTION TO URBAN THEORY

Minimum Credits: 3

Maximum Credits: 3

This course introduces the practice of close and critical reading of theories about urban social theory. During the course you will encounter different theories that characterize significant evolutions in the way we think about urban form. By learning how to evaluate the strengths and weaknesses of these theories you will be prepared to engage with the conceptual foundations of urban studies.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Letter Grade

URBNST 0100 - WORLD URBAN PATTERNS

Minimum Credits: 3

Maximum Credits: 3

On May 23, 2007, for the first time in human history, more of the world's population became urban than rural. This course explores two related aspects of global urbanization: changing patterns of urban growth and urbanization, and similarities and differences in the nature of urban processes at the regional level. This course begins by exploring the causes of urbanization, factors driving urban growth, impacts of globalization, and regional variations in urbanization levels at a variety of scales including the global north and global south. In contrast, the second part of the course focuses on the differences and similarities in the characteristics of the economic, social, demographic, and cultural processes that shape urban places and urban life in different regions of the world. The optics covered include, but are not limited to, residential and commercial gentrification, residential segregation, gated communities, common interest developments, and sustainability.

Academic Career: Undergraduate

Course Component: Seminar
Grade Component: LG/SNC Elective Basis

URBNST 0108 - URBAN ECONOMIC GEOGRAPHY

Minimum Credits: 3

Maximum Credits: 3

Participants in this course will learn about the evolving forms of metropolitan government and governance in the United States, with a special focus on the post-1992 period. Course units examine the history and contemporary shape of urban politics, and the opportunities and challenges facing local communities during the 21st century. By the end of the course students will be able to appraise how the contemporary landscape of regional governance in the United States is affecting specific cities.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Attributes: Urban Studies

URBNST 0112 - SOCIAL JUSTICE AND THE CITY

Minimum Credits: 3

Maximum Credits: 3

Social justice and economic justice are popular buzz-words that are closely tied to urban environments: but what do they really mean, and how can we understand them? URBNST 1612 uses critical social geography to interrogate both historical and contemporary social justice movements that claim to protect human rights, fair housing, or to expand definitions of public space and citizenship. Taken together these agendas form a powerful prescription for social action, one often emerging in urban settings. Using a combination of lectures, Concept Mapping exercises, and case studies, we will examine the historical and theoretical context for social justice in the city and then evaluate different geographies of social change. By the end of the course students will be able to use a critical perspective to understand how the rhetoric of social justice is changing the urban geographies of specific cities worldwide.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Letter Grade

Course Attributes: Asian Studies, MCSI - Sustainability Related

URBNST 0114 - URBAN SUSTAINABILITY

Minimum Credits: 3

Maximum Credits: 3

This course provides a critical introduction to the concept of sustainability in relation to cities in the United States and internationally. We will investigate how the fuzzy concept of sustainability has developed, and look at how principles of urban sustainability are put into practice. In particular, we will look at the Pittsburgh city-region, and draw on examples from Singapore, Auckland (New Zealand), and Tianjin (China). In particular, the class will concentrate on how sustainability is embedded in planning urban structures, organizing for sustainable communities, and mitigating environmental risks and vulnerability. Students will hear from a variety of professionals engaged in sustainable urbanism, and learn about specific tools used to assess sustainability at different geographic scales.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Social Science General Ed. Requirement, SCI Polymathic Contexts: Soc/Behav. GE. Req.

URBNST 0120 - URBAN GEOGRAPHY

Minimum Credits: 3

Maximum Credits: 3

The course introduces students to urban geography by addressing both theoretical and empirical areas of interest. Students will engage with material relating to the economic, social and cultural, and historical geographies of urban areas. Students will gain a grounding in the historical and contemporary geographies of city-regions, drawing primarily upon case studies taken from Europe and North America, but also engaging with urbanization and urbanism in from the global South. The course will provide the foundations for advanced Urban Studies modules, field courses and research within the Urban Studies Program. On completion of the module, students will have a clear understanding of the diversity of urban geography as a field of study, will be able to connect theories and concepts with real world case studies and examples, and will be familiar with the approaches and sources used within the subdiscipline.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: URBNST 0010 completed, C- or above

URBNST 0130 - APPLIED GIS

Minimum Credits: 3

Maximum Credits: 3

This course provides an introduction to core methods for analyzing geo-spatial data, questions and applications with an emphasis on spatial and cluster analysis of point data using ArcGIS desktop. It will focus on teaching students the principles of GIS through computer-based exercises. Classroom projects will train students in acquiring, constructing, and managing geo-spatial data in order to solve spatially explicit problems. Exercises and projects will be geared toward equipping students with the set of quantitative tools that are relevant to courses taught in the urban studies program, especially courses taken by students in the planning and politics concentrations. This will provide students with the background for pursuing advanced work in urban economic geography, public administration, economic and community development, and regional analysis. However, the core methods presented in this course form the foundation for quantitative work in political science, sociology, and economics as well. This is a self-contained course. Students who have taken courses in Introduction to GIS or Introductory Statistics will find such courses useful, but they are not essential.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: URBNST 0030 OR GEOL 1445 OR PUBSRV 1320

Course Attributes: DSAS Creative Work General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

URBNST 0140 - CRIME, PUNISHMENT, JUSTICE, REINTEGRATION

Minimum Credits: 3

Maximum Credits: 3

This course will focus on the concept of punishment as a response to a criminal act. While in religiously-grounded societies punishment is seen as a retribution for an evil act, tendencies in modernity (and post-modernity) privilege the use of punishment as a tool for social reintegration. With the rise of human rights-based doctrines, the characterization of punishment as retribution has proven to be more and more difficult to justify. Even if sayings such as "paying my debt to society" are still in use, it is becoming more and more evident - especially in a time of mass incarceration - how incarceration as punishment cannot be the only solution. This course exposes students to ideas of justice as a process aimed at reintegrating wrong-doers in society through a path of reconciliation and re-socialization, so that the end of the process will produce fellow citizens rather than ex-felons.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

URBNST 0150 - GIS & COMMUNITY DATA

Minimum Credits: 3

Maximum Credits: 3

This course will introduce students to the application of mapping community data to inform decisions at the municipal level. The ability to problem scope, analyze and think critically about complex local issues is critical to the successful application of GIS to decision making by local groups/ actors including Community Development Corporations (CDCs), neighborhood associations, resident associations and planning groups using different types of community data. Throughout the course, students will explore real world scenarios involving real stakeholders using local data and GIS to make decisions and practice planning. Students will be expected to engage with community stakeholders and data about technical and non-technical issues to complete exercise and projects. The course will primarily use ArcGIS Desktop, Microsoft Excel, and Carto online mapping software.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Letter Grade

URBNST 0160 - DATA VISUALIZATION

Minimum Credits: 3

Maximum Credits: 3

This course is all about data visualization, the art and science of turning data into readable graphics. The course explores how to design and create data visualizations, including graphs, Story Maps and maps. Students will also learn to evaluate the effectiveness of visualization designs, and think critically about each design decision, such as choice of color and choice of visual encoding. Students will create their own data visualizations and learn to use Open Source data visualization tools and software like Excel and Tableau. Students will also read papers from the current and past visualization literature and complete a short individual project.

Academic Career: Undergraduate

Course Requirements: PLAN: Urban Studies (BA or BPH)

Course Attributes: Capstone Course, Undergraduate Internship

URBNST 0220 - UNDERGRADUATE TEACHING EXPERIENCE

Minimum Credits: 1

Maximum Credits: 3

This course offers the opportunity for qualified third- and fourth-year students to assist in teaching urban studies courses. The experience develops students' communication and leadership skills, and their understanding of the learning process. Each student must have taken the course previously as a student (with a minimum grade of B) and will work under the direct supervision of the relevant urban studies faculty member. Responsibilities might include (but are not limited to): assisting students outside of class (e.g., conducting weekly review sessions), assisting with

classroom activities, or assisting faculty with developing course materials and/or maintaining Canvas sites. Each student must receive permission of the instructor, complete a teaching agreement with that instructor, and get permission from the departmental advisor. Credits gained through this course may only be used toward the intermediate Study Abroad/Interdisciplinary elective requirement of the Urban Studies major.

URBNST 0300 - REMAKING CITIES THROUGH POLICY AND PRACTICE

Minimum Credits: 3

Maximum Credits: 3

Who holds political power in cities across the United States, and how do they use it to remake cities? "Remaking Cities through Policy and Practice" lets you explore the political and community development dynamics of US cities, and builds a practical toolkit that you will use to evaluate the capacity for community change in the post-pandemic era. During the semester you will meet regional leaders and conduct practical research on the way that Pittsburgh neighborhoods are using comprehensive plans and other policy tools to generate economic growth. Key skill-building includes evaluation analysis, participatory research, and action research.

URBNST 0320 - RENT, BUY OR SQUAT: HOUSING AND PROPERTY IN US CITIES

Minimum Credits: 3

Maximum Credits: 3

Housing is the basic building block of the city. Whether you rent or own, shelter is a basic necessity for urban life, but how does housing work? This survey course explores the changing forms of urban housing in the United States, and introduces you to the people and organizations responsible for housing from developers, bankers and landlords to local, federal, and non-profit agencies.

Grade Component: LG/SNC Elective Basis

URBNST 0340 - URBAN MOBILITY AND TRANSPORTATION ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

This is an issue-oriented course with an emphasis on building transportation planning skills. Students become familiar with the effect of transportation systems on patterns of metropolitan development. Reading assignments discuss theories of transportation geography and planning, methods of empirical analysis, and policy issues as a foundation for skill-building exercises. Students distinguish between different modes of transportation and analyze implications of modal split for urban planning. Class discussions sharpen rhetorical skills while written assignments develop the ability to analyze literature through scholarly criticism.

URBNST 0360 - INTERNATIONAL URBANISM SEMINAR

Minimum Credits: 3

Maximum Credits: 3

It is undeniable that the world has become integrated through the globalization of social, political, cultural and economic activity. Cities worldwide have been markedly affected by globalization, but in turn have played a role in the process. By utilizing published material, films, slides and the internet, this course will compare the economic, social, political, historical and cultural differences between different global cities as they struggle to survive in the twenty-first century.

URBNST 0404 - REMAKING EUROPEAN CITIES WITH CULTURE AND CREATIVITY: POLICIES AND PRACTICES

Minimum Credits: 3

Maximum Credits: 3

This course provides students with an active, place-based perspective on how culture and creativity are used in Lille to overcome urban decline. The City of Lille, France was named Europe's Capital of Culture in 2004, and uses a mix of culture based urban regeneration policies to remake itself into a vibrant urban hub at the crossroads of northern Europe. Students will learn the policy context for Lille's creative regeneration practices, observe the impact of these policies through site visits and interviews, and evaluate whether Lille's policy mix can be translated and transferred to other urban contexts. Key skill-building includes evaluation analysis, field research, and comparative policy analysis.

URBNST 0412 - GLOBAL CITY - LILLE

Minimum Credits: 3

Maximum Credits: 3

This course will provide students with an overview of the cultural heritage and museums of Lille's region, settled in the heart of Europe, at the crossroads of London, Paris and Brussels, close to Amsterdam. Students will have course sessions in various museums and sites as mentioned below. Topics to be covered will normally include: Architecture: guided tours of Lille to discover the typical Flemish architecture and the industrial architecture; visit to the Villa Cavrois, a modern museum in an art-deco home Medieval history and architecture: visit to Hospice Comtesse Museum, town museum of Lille housed in a former hospital founded in 1237 by Jeanne, Countess of Flanders. It focuses on the commercial and artistic and scientific history of Lille, and the collection features 17th and 18th century paintings and decorative arts (furniture, ceramics, tapestries) Fine arts: including a visit of the fine arts museum in Lille, one of the premier museums in France, which houses numerous European paintings across periods, a collection of antiquities, a medieval and Renaissance collection, 17th and 18th-century ceramics, 19th-century French sculptures and 18th-century scale models Modern art: visit to LaM (Lille Metropole Museum of Modern Art), contemporary art and art brut - an important museum for 20th and 21st century art in the north of Europe, including three permanent collections: modern art (Modigliani, Picasso, Kandinsky, Klee, Miro, Van Dongen ;), contemporary art (Deacon, Soulages, Allan McCollum, Dennis Oppenheim;), outsider art (Aloise Corbaz, Adolf Wolfli, Henry Darger;) and a unique outdoor sculpture park Visit to the Louvre-Lens, the only regional branch of the Louvre in France, including art works from the Louvre Paris collection displayed in a contemporary building of glass and light created by SANAA, world-famous Japanese architects, in harmony with the location, an historical mining site La Piscine, in Roubaix, one of the most celebrated museums in France outside of Paris, in a former Art Deco swimming-pool Note: students will travel to these museums on foot or by public transportation and will be guided there by staff of the Universite Catholique de Lille. Class hours may vary according to visited sites.

URBNST 0418 - GLOBAL CITY - SHANGHAI

Minimum Credits: 3

Maximum Credits: 3

This three-credit course is designed to encourage students to engage in a critical analysis of the development of modern Shanghai. It is a municipality that already exhibits the key characteristics of many global cities. Students will discuss what that concept means in general terms, and in ways that are specific to Shanghai. Students will explore how this city has been imagined, invented, and transformed by the forces of foreign engagement, industrialization, and globalization. The cityscape and social landscape of Shanghai are the "texts" that students will explore, interpret, and analyze.

URBNST 0440 - AMAZONIAN CITIES: ENVIRONMENTAL CHALLENGES AND SUSTAINABILITY

Minimum Credits: 3

Maximum Credits: 3

This course introduces environmental and social issues related to Latin America's Amazon cities, with a deeper focus on Brazil, exploring issues and controversies related to transformations, impacts and sustainability development in the Amazon. The Amazon region occupies 9 countries in Latin America. In Brazil alone, more than 20 million people live in the Amazon; almost 80% live in urban areas. The immediate international attention focuses on the role of forests in climate regulation and the conditions of pressure and degradation of the natural and social resources. However, the region is undergoing permanent transformations, mainly associated with a growing urbanization process, with major environmental and social consequences, which affect the region's sustainable development.

Academic Career: Undergraduate

URBNST 0500 - INTRODUCTION TO URBAN & REGIONAL PLANNING

Minimum Credits: 3

Maximum Credits: 3

This course provides an overview of the planning of cities and metropolitan regions. The legal and historical context of urban planning are addressed, and current trends in planning as a professional field are introduced. Key dimensions include the economic, environmental, and equity impacts of public policies and private development. Methods for public participation in planning are surveyed.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

URBNST 0506 - URBAN PLANNING PROCESS

Minimum Credits: 3

Maximum Credits: 3

This course introduces the practice of urban planning, focusing on the opportunities and challenges of professional planning in Pittsburgh's metropolitan region. The course focuses on how planning processes and methods can address different urban needs. Students will engage with guest speakers and plans that illustrate approaches to land use, zoning, transportation planning, placemaking, public health, and sustainability.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: Letter Grade

URBNST 0512 - NEIGHBORHOOD PLANNING

Minimum Credits: 3

Maximum Credits: 3

Thriving cities require vibrant, diverse, and safe neighborhoods that feature jobs, local businesses, connectivity, and appropriate public services. This course provides an introduction to the principles and practices of neighborhood planning, with a focus on developing the skills to promote quality urban experiences in low-income, minority, and other disadvantaged communities. Students will learn how planners should work with development officials, community partners, community development corporations, and the public sector in building neighborhood goals.

Academic Career: Undergraduate

Grade Component: Letter Grade

URBNST 0518 - SMART CITIES: FRONTIERS IN URBAN ANALYTICS & BIG DATA

Minimum Credits: 3

Maximum Credits: 3

The growing importance of big data and urban analytics are contributing to cities becoming 'smarter'. Smart city planning requires creating data structures and methods frameworks to gather, store, and analyze information that can inform planning practices and policymaking. This course will outline the frontiers in urban data science, including the ethical and analytical considerations that underpin the smart city paradigm. Students will gain practical experience with analyzing, modelling, and interpreting quantitative and qualitative data using R and RStudio. The course is designed to accommodate students with diverse backgrounds, and while no prerequisites are required some familiarity with statistical methods and coding is beneficial. The course emphasizes a geographical perspective in addressing urban topics (including infrastructure, transportation, and sustainability), empowering students to contribute to future urban planning practices and policymaking.

URBNST 0800 - URBAN STUDIES FIELD RESEARCH SEMINAR

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to the urban studies methodology of "field study". The class will go on field trips to Pittsburgh communities that epitomize current urban problems and issues. Readings and classroom discussions will focus on how to "read" the urban landscape as well as provide background on current urban problems.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

URBNST 0900 - URBAN RESEARCH SEMINAR

Minimum Credits: 3

Maximum Credits: 3

The Urban Research Seminar focuses the knowledge and skills, which the student has gained through the program, on a particular topic. The specific topic varies from term to term and faculty member to faculty member, but it always concerns an issue of relevance to the immediate Pittsburgh environment. Examples include riverfront development, the

impact of Reagan's cutbacks, the redevelopment of East Liberty, etc. To investigate the topic students will review secondary sources as well as collect and analyze their own information through interviews, field trips, surveys, etc.

URBNST 1000 - URBAN PLANNING & GEOGRAPHIC ANALYSIS CAPSTONE

Minimum Credits: 3

Maximum Credits: 3

This is the research capstone for the BS in Urban Planning & Geographic Analysis. Students will engage in a semester-length project that draws on the fundamental concepts, methodological and technical skills, and professional approaches taught through courses in the major. Students will develop a significant research project that demonstrates proficiency and original thought in planning and geographic analysis. The writing-intensive course will include instruction on project management and data presentation, as well as advanced consideration of emerging research and trends in urban and regional planning and geographic analysis. All other major requirements for the BS in Urban Planning & Geographic Analysis must be completed before enrolling in this seminar.

URBNST 1502 - FIELD ANALYSIS OF GLOBAL URBANISM

Minimum Credits: 3

Maximum Credits: 3

This course presents University of Pittsburgh students with the opportunity to travel to Singapore and Malaysia for a two-week Urban Studies field course, guided by Pitt faculty. This 3-credit IFTA (integrated Field Trip Abroad) is a base three-credit course that facilitates comparative analysis of urban processes in two strategic Southeast Asian cities. This course is available to all Pitt undergraduates, and does not include any prerequisite courses. The course consists of lectures and site visits to places of significant urban interest in both Singapore and Kuala Lumpur. Students will complete readings and discussions about urban processes in both cities, and will develop a blog and independent reports about these places. The content for this three-credit course will be contained within the two-week field course, and will focus on Asian urbanization, consumption, and sustainable city development.

Grade Component: Letter Grade

URBNST 1504 - ADVANCED INTERNATIONAL FIELD PLACEMENT

Minimum Credits: 3

Maximum Credits: 3

This course presents Urban Studies students with the opportunity to travel to Singapore and Malaysia for a two-week Urban Studies field course, guided by Pitt faculty. This 3-credit IFTA (integrated Field Trip Abroad) is a three-credit course that supplements URBNST 1502, and your domestic research courses (URBNST 1300 & URBNST 1500). Therefore, it is expected that you will have previously completed 1300 and 1500, and be taking URBNST 1502 concurrently with this course. The course focuses upon design and implementation of a pilot research project that attempts a comparative analysis of some aspect of urbanism within Southeast Asia. Students will work in teams to complete this project, under the supervision of Pitt Faculty. This three-credit course will be preceded by five pre-departure meetings, and the research project should in some way focus on one of the course themes.
