- Satisfactory completion of required credits
- Minimum cumulative GPA 3.000
- GPA will be calculated as a composite of all courses taken at the University of Pittsburgh and counting toward completion of the degree
- Completion of all requirements for the program in which student has enrolled
- No outstanding D, F, G or I grade in a required course
- Updated and approved Plan of Study on file in Student Services
- A student must be considered an "active student" at the time of graduation; they must have been registered for at least one credit at the University of Pittsburgh within the last three terms or sessions.
- Students may not enroll in courses outside the University of Pittsburgh in the semester they are graduating.
- An application for graduation must be submitted by the student in PeopleSoft the term prior to the graduation term. A student with outstanding financial obligations to the University is not eligible to receive the diploma, official academic transcripts, or any certification of completion of the academic program.

Credits Required

The number of credits required for the master's degree varies among the departments within SHRS, but all departments require at least 30 credits. Many departments offer a variety of emphases. Individual departments should be contacted for the number of credits and Plan of Study specific to that department and focus.

SHRS Student Organizations

The SHRS Graduate and Professional Student Organization (SHRS GPSO) is a member of the Graduate and Professional Student Government (GPSG) of the University of Pittsburgh. All full- time and part-time graduate students of SHRS who have active status, as defined by the school, and who are in good standing, as defined by the University, are members of the SHRS GPSG. Further information on becoming active in this organization can be obtained by sending an email to: shrssab@shrs.pitt.edu.

Ombudsperson

The Ombudsperson assists students with resolving conflicts and issues that arise in the course of their education and training that they believe have not or cannot be addressed within their academic department. The Ombudsperson can help mediate conflicts and provides information about institutional policies related to the student's issues, including the University's grievance procedures. The Ombudsperson directs students to further resources on campus as appropriate. The Ombudsperson in the School of Health and Rehabilitation Sciences (SHRS) will be a neutral contact person (non-faculty) for students with whom they can engage in informal discussions.

The Ombudsperson for SHRS is Jessica Maguire, Executive Director of Student Affairs. She can be reached maguire@pitt.edu to make an appointment. More information on the Ombudsperson's role for SHRS can be found on the SHRS website.

SHRS Programs and Course Offerings

Master's

Online Master of Arts Degree Program in Speech-Language Pathology, MA

The Online Master of Arts in Speech-Language Pathology program meets the following requirements for the entry-level professional degree as stipulated in the *Regulations Governing Graduate Study at the University of Pittsburgh* through:

- the satisfactory completion of a minimum of 30 credits of graduate study approved by the department or school
- acquisition of professional skills through course work, projects, internships, practica, and/or research papers.
- satisfactory completion of all course requirements and other performances which indicate comprehensive mastery such as examinations, internships, research projects, theses, practica, and so forth
- Minimum admission requirements that will align with all graduate programs at the University of Pittsburgh,
- Maintenance of a 3.00 GPA to remain in good standing and be graduated from the program.

The Online Master of Arts in Speech-Language Pathology program is anticipated to also meet the requirements of the Council on Academic Accreditation (CAA):

- An effective entry-level professional speech-language pathology program allows each student to acquire knowledge and skills in sufficient breadth and depth to function as an effective, well-educated, and competent clinical speech-language pathologist (i.e., one who can practice within the full scope of practice of speech-language pathology). The education program is designed to afford each student with opportunities to meet the expectations of the program that are consistent with the program's mission and goals and that prepare each student for professional practice in speech-language pathology (CAA, 2023).

Note that there are six broad standards related to CAA accreditation (CAA, 2023):

- Standard 1.0: Administrative Structure and Governance
- Standard 2.0: Faculty
- Standard 3.0B: Curriculum (Academic and Clinical Education) in Speech-Language Pathology [Note: Standard 3.0A is deleted here as it relates to the profession of audiology, which is not a consideration of this proposal].
- Standard 4.0: Students
- Standard 5.0: Assessment
- Standard 6.0: Program Resources

The current face-to-face Master of Arts in Speech-Language Pathology degree is compliant with these standards. The program director will be tasked with completing the final application for candidacy accreditation of the online Master of Arts program in Speech-Language Pathology after University of Pittsburgh approvals have been obtained.

Program Duration

The Online Master of Arts program in Speech-Language Pathology curriculum can be completed in as little as six semesters of continuous study. Additional semesters may be added for learners who require more time to complete their clinical placements. However, we do understand that learners may come to the program with a variety of needs and other responsibilities related to their day-to-day lives (e.g., childcare, work responsibilities, other family responsibilities). Therefore, an additional two semesters can be added to the program, if needed, for timely completion.

Program Characteristics, Type of Instruction and Level of Instruction

The graduate-level coursework of the online MA-Speech-Language Pathology program will consist of online courses and will culminate in a Summative Assessment Project. In this project, students will generate a clinical question relative to a population of interest and examine the literature for evidence-based assessment and treatment solutions.

The core curricular concepts will be presented mainly asynchronously, like an in-class lecture. Interactive instructor-led online educational activities to promote knowledge acquisition and interaction will be provided within the context skills labs that are outlined in the plan of study. These activities will facilitate application and synthesis of the knowledge acquired through asynchronous online activities. Additionally, each matriculant will work closely with an assigned faculty advisor who will help guide their studies and mentor them in their Summative Assessment Project. This individualized and learner-centered approach will allow matriculants to engage in scholarly activity that will have a direct and positive impact in their daily work.

Assessments

Assessments will be competency-based and scaffolded to support completion of the Summative Assessment Project. Such assessments will include:

- Reflective writing assignments,
- Scholarly writing assignments,
- Written evidence of literature review,
- Fact-based examination questions,
- Oral presentations (via video submission and during skills lab activities), and
- Written defense of the Summative Assessment Project.

Plan of Studies and Sequence of Courses

Courses will be offered in consecutive semesters in the Fall, Spring, and Summer Terms. The anticipated plan of study will require students to complete coursework, with the option to delay clinical placements, if necessary. This program is intended to be an entry-level professional degree program, with admission in the Fall semester of each academic cycle. The advantage of this design is to allow learners to remain in their communities while earning their degree so they can apply their classroom learning to their clinical practica in a meaningful and impactful way. The curriculum is designed to help students be informed by, and to inform, their current practice as they learn, in a flexible learning environment. This design allows for a balanced curriculum that helps learners stay on track. Individualized plans of study will be considered for students who experience extenuating circumstances that require individualized or personalized plans to meet their academic goals. Remediation plans will be designed in accordance with Council on Academic Accreditation in Audiology and Speech-Language Pathology Standards. Per the *Regulations Governing Graduate Study at the University of Pittsburgh*, this professional degree program, the statute of limitations for students for completion of all Online MA-SLP degree requirements will be set at 5 years. Courses and their sequencing are presented in Table 1.

Proposed Online Master's Program of Study Timeline						
Year 1 Semester	1: Fall	Cr	2: Spring	Cr	3: Summer	Cr
Required Academic courses	CSD 2710: Articulation and Phonology Disorders Across the Lifespan	3	CSD 2714: School Aged Issues: Language and Literacy	3	CSD 2720: Neurodivergent Populations and Issues	2
	CSD 2711: Dysphagia	3	CSD 2715: Communication Intervention for Infants & Preschoolers	3	CSD 2721. Seminar in Special Topics (Multicultural Issues)	1
	CSD 2712: Motor Speech Disorders	3	CSD 2716: Dysphagia: Pediatric Populations	1	CSD 2722: Augmentative and Alternative Communication	3
Required Professional/Clinical Courses	CSD 2713: Professional Tools Virtual Skills Lab 1	2	CSD 2717: Professional Tools Virtual Skills Lab 2	1	CSD 2723: Seminar in Clinical Differential Diagnosis	2
Practicum			CSD 2718: Stuttering Across the Lifespan	3	CSD 2724: Clinical Practicum: (Public School/Pediatrics/School-age)	1

Department of Communication Science and Disorders (CSD)

Master of Arts and Master of Science Degrees in Communication Science and Disorders

The Communication Science and Disorders program provides students with a specialized academic education in communication processes and disorders, including disorders of speech, language, swallowing, hearing and balance. It includes the knowledge and skills needed to critically evaluate empirical research, and clinical expertise in the diagnosis and treatment of individuals having communicative disorders.

The master's degree program has two concentrations: one in speech-language pathology, and one in audiology. There is also an option for meeting educational certification requirements to be a speech-language pathologist in Pennsylvania schools. For students interested in the clinical practice degree in audiology, please see the section on the Doctor of Audiology (AuD) degree in this bulletin.

A research track (resulting in the Master of Science degree) in speech-language pathology is also available for students electing to do a master's thesis.

The Master's degree programs in speech-language pathology and the AuD program in audiology at the University of Pittsburgh are accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology (CAA), Address: 2200 Research Boulevard #310, Rockville, MD 20850. Phone: 800-498-2071.

Contact Information for Admissions

Email: csdadmissions@shrs.pitt.edu
Administrator of Admissions for master's degree Programs: 412-383-3938

General Admission Requirements (CSD MA/MS) Degree

- A baccalaureate degree from an accredited institution. Applicants who do NOT have a CSD major will need to satisfactorily complete the prerequisite coursework listed below.
- A minimum overall and prerequisite GPA of 3.0 is required. However, a GPA of 3.5 or higher is strongly recommended.
- A grade below C- in a CSD major or prerequisite course is not acceptable and must be repeated.
- Applicants who do not meet the minimum requirements for admission may be considered if strong evidence of their ability to complete a graduate program is provided.
- Ability to satisfactorily perform all of the technical standards required for this profession.

Prerequisite Coursework

Applicants should have a minimum of one 3-credit course in each of the following topic areas:

- Anatomy and Physiology of Speech and Hearing
- Language Development
- Speech and Hearing Science
- Transcription Phonetics
- Linguistics

ASHA Requirements

In order to be eligible for clinical certification by the American Speech-Language-Hearing Association (ASHA), you must meet the standards specified by Council for Clinical Certification in Audiology and Speech-Language Pathology (CFCC). This includes satisfactory completion of at least one 3-credit course in each of the following areas prior to starting the graduate program: Biological Sciences (Human Biology, Anatomy & Physiology), Physical Sciences

(Physics or Chemistry), Behavioral Sciences (Sociology, Psychology), and Statistics (not research design). These requirements must be met before students enroll in the MA/MS program courses.

Students enrolling in the speech-language pathology program must complete at least 25 total hours of guided clinical observation to be eligible for clinical certification by CFCC. Prior to beginning the MA/MS SLP program courses students must complete a minimum of 15 of the total 25 observation hours.

Information for International Applicants

All international degrees will need a credential evaluation. We only accept a 4-year bachelor's degree or an international degree that is equivalent as determined by one of the following transcript evaluators: Educational Credential Evaluators Inc. or World Education Services (WES). The program's foreign transcript policies do not apply to study abroad coursework that is itemized on a US college or university transcript (study abroad is processed in the same way as US coursework). International applicants who have earned an undergraduate or graduate degree in the United States do not need a transcript evaluation.

International applicants whose native language is not English must complete a test of English Language Proficiency (Duolingo, IELTS, or TOEFL) within 12 months of the due date of the application. Applicants from Quebec Province are required to submit English Language Proficiency scores; all other Canadian applicants are exempt from the English language proficiency requirement.

Your application for admission will not be reviewed until your credential evaluation and English Language Proficiency scores have been received.

Graduate students must have a 3.0 cumulative GPA to be eligible to graduate.

Graduate students who have completed at least 9 credits and whose cumulative GPA falls below a 3.0 will be placed on academic probation and will receive written notification of this status. At this point, it is the student's responsibility to meet with their advisor. To be removed from academic probation, the student will need to achieve a cumulative GPA of 3.000 within their next two terms of study. Failure to do so may result in the student's immediate dismissal from the program. Students who fail to demonstrate progress toward meeting graduation requirements in a timely manner may be placed on academic probation or be dismissed from the program.

Academic Standards

In addition to following the University-wide academic rules and regulations as detailed in the *General Academic Regulations* section of this bulletin, the master's degree program is regulated by the *SHRS Academic Standards*, as well as the departmental *Student Handbook on Academic and Clinical Requirements*.

Doctor of Clinical Science (CScD) Degree in Medical Speech-Language Pathology

The CScD is an advanced clinical doctorate recommended for the student or clinician seeking to employ state of the art clinical excellence and leadership as a speech-language pathologist in settings such as medical centers, private practices, educational settings, and academic institutions.

The primary objectives of the CScD program are to provide students with advanced academic course work, clinical skills, case-based learning experiences, leadership skills, and knowledge and skill in supervision. Graduates of this program will excel in their specialties and assume leadership roles. Graduates will be prepared for independent clinical practice in the medical setting and clinical faculty positions.

Students are expected to meet the eligibility requirements for application for both American Speech-Language-Hearing Association certification (Certificate of Clinical Competence CCC-SLP) and appropriate state licensure over the course

of their studies. There is no dissertation project required for the CScD degree; however, students will demonstrate expertise in the critical analysis and application of scientific information.

www.shrs.pitt.edu/csd

Admission Requirements

A SLP MS/MA is required in order to fulfill the clinical component of this program.

Once your application is complete, it will be forwarded to the CSD Department for review by the CScD Admissions Committee.

Applicants will be required to participate in interviews addressing content knowledge and discussions of the program.

The department has an application **deadline of January 15th** to begin the program the following fall term. All application materials must be received by the deadline. Rolling admissions means the department will review and admit qualified applicants until a class is full.

All applicants considering the CScD must email CSD admissions before starting the application process.

All applicants are advised to ensure that they meet the certification and licensing requirements before applying to the program.

Graduate students must have a 3.000 cumulative GPA to be eligible to graduate.

Graduate students who have completed at least 9 credits and whose cumulative GPA falls below a 3.000 will be placed on academic probation and will receive written notification of this status. At this point, it is the student's responsibility to meet with his or her adviser. In order to be removed from academic probation, the student will need to achieve a cumulative GPA of 3.000 within his or her next two terms of study. Failure to do so may subject the student to immediate dismissal from the program. Students who fail to demonstrate progress toward meeting graduation requirements in a timely manner may be placed on academic probation or be dismissed from the program.

Doctor of Audiology (AuD) Degree

The primary objective of the AuD program is to provide students with the academic course work, clinical skills, and experience (beyond that obtained with the master's degree) needed to be a licensed audiologist, enter the professional community and assume independent leadership roles. The AuD is the required entry-level degree for audiologists. Graduates will be prepared for independent clinical practice and academic positions upon graduation and will be immediately eligible for professional licensure and for Certification from the American Speech-Language and Hearing Association and American Board of Audiology.

The Doctor of Audiology degree education program in audiology at the University of Pittsburgh is accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology (CAA). Address: 2200 Research Boulevard #310, Rockville, MD 20850. Phone: 800-498-2071. Website: <https://caa.asha.org/>.

General Admission Requirements AuD Degree

- A baccalaureate degree from an accredited institution. Applicants who do NOT have a CSD major will need to satisfactorily complete the prerequisite coursework listed below.
- A minimum overall and prerequisite GPA of 3.0 is required. However, a GPA of 3.5 or higher is strongly recommended.
- A grade below C- in a CSD major or prerequisite course is not acceptable and must be repeated.
- Applicants who do not meet the minimum requirements for admission may be considered if strong evidence of their ability to complete a graduate program is provided.
- Ability to satisfactorily perform all of the technical standards required for this profession.
- Graduate Record Examination scores (GRE-general). The GRE **must be within the past 5 years**.

Prerequisite Coursework

Applicants should have a minimum of one 3-credit course in each of the following topic areas:

- Anatomy and Physiology of Speech and Hearing
- Language Development
- Speech and Hearing Science
- Transcription Phonetics
- Linguistics

ASHA Requirements

In order to be eligible for clinical certification by the American Speech-Language-Hearing Association (ASHA), you must meet the standards specified by the Council for Clinical Certification in Audiology and Speech-Language Pathology (CFCC). This includes satisfactory completion of at least one 3-credit course in each of the following areas prior to starting the graduate program: Biological Sciences (Human Biology, Anatomy & Physiology), Physical Sciences (Physics, Chemistry), Behavioral Sciences (Sociology, Psychology), Statistics (not research design).

Information for International Applicants

All international degrees will need a credential evaluation. We only accept a 4-year bachelor's degree or an international degree that is equivalent as determined by one of the following transcript evaluators: Educational Credential Evaluators Inc. or World Education Services (WES). The program's foreign transcript policies do not apply to study abroad coursework that is itemized on a US college or university transcript (study abroad is processed in the same way as US coursework). International applicants who have earned an undergraduate or graduate degree in the United States do not need a transcript evaluation.

Your application for admission will not be reviewed until your credential evaluation and English Language Proficiency scores have been received.

Graduate students must have a 3.0 cumulative GPA to be eligible to graduate.

Graduate students who have completed at least 9 credits and whose cumulative GPA falls below a 3.0 will be placed on academic probation and will receive written notification of this status. At this point, it is the student's responsibility to meet with his or her adviser. In order to be removed from academic probation, the student will need to achieve a cumulative GPA of 3.0 within his or her next two terms of study. Failure to do so may subject the student to immediate dismissal from the program. Students who fail to demonstrate progress toward meeting graduation requirements in a timely manner may be placed on academic probation or be dismissed from the program.

Academic Standards

In addition to following the University-wide academic rules and regulations as detailed in the *General Academic Regulations* section of this bulletin, the AuD program is regulated by the *SHRS Academic Standards*, as well as the departmental *Academic Handbook for SLP MA/MS and AuD Degree Students*.

Doctor of Philosophy Degree in Communication Science and Disorders

Contact Information

CSD Administrator
Department of Communication Science and Disorders
School of Health and Rehabilitation Sciences
5012 Forbes Tower
412-383-6543

E-mail: csdadmissions@shrs.pitt.edu
Website: www.shrs.pitt.edu/aud/

The PhD program in Communication Science and Disorders is oriented toward the basic scientific questions in the discipline, with an emphasis on basic and applied research.

The expectations of graduating PhD students are that they are able to conduct a program of independent, creative, scholarly research, and that they can plan and execute effective teaching at all levels of pedagogy.

Admission Requirements

Applicants will apply online using the GradCAS application.

No one will be admitted to the CSD PhD program without a suitable advisor in their main area of specialization. Thus, anyone interested in PhD education is encouraged to contact individual faculty members whose research interests mesh most closely with theirs.

PhD applications are due by January 15th. Applicants will be interviewed by faculty members as part of the admissions process. A final admission decision depends on the availability of a suitable research adviser and a review and recommendation by the PhD Admissions Committee.

International applicants must provide English Language Proficiency scores (Duolingo, IELTS or TOEFL) and an academic credential evaluation from Educational Credential Evaluators Inc. or World Education Services (WES).

Submission of GRE scores to institution code 2927 is optional.

It is the responsibility of the applicant to complete all admission requirements prior to enrollment.

Financial Aid

Acceptance into the PhD program does not guarantee financial aid, but each admitted student is automatically put into a merit-based competition for available teaching assistantships, doctoral traineeships, and positions on research grants. Financial assistance is often available from a variety of sources, including teaching assistantships, PhD traineeships, and graduate research assistantships. Such appointments typically require 20 hours each week of teaching, research, and/or clinical service in exchange for a monthly stipend. A scholarship based on merit covers at least partial tuition remission, fees, and health insurance. The Department's Financial Aid Committee works with each admitted student's advisor to secure a funding opportunity that is rewarding both academically and financially. Prospective applicants who are interested in financial support should indicate this on their application for admission.

Doctoral

Communication Science and Disorders, PhD

Doctor of Philosophy in Communication Science and Disorders (CSD)

The Department of Communication Science and Disorders (CSD) research doctoral program is oriented toward scientific inquiry in the discipline of communication science and disorders with an emphasis on basic and applied research training. Much of the CSD PhD program is individually tailored and designed to meet a variety of academic and professional goals.

Program Requirements

A minimum of 72 credits beyond the bachelor's degree level is needed for the PhD degree in communication science and disorders at the University of Pittsburgh. For further detail on allowable credits, see Credit Requirements under Regulations Pertaining to Doctoral Study.

All CSD PhD students are required to take CSD 3048 - *Intro to PhD Studies*, CSD 3049 - *PH.D. Seminar in Audiology*, and CSD 3479 - *Research Seminar in Speech and Language Pathology*.

CSD PhD students also take a minimum of 9 credits of coursework in statistics and experimental design and 6 credits of PhD research practicum. In each semester, until they enter full-time dissertation status, PhD students are required to attend the departmental *PHD Proseminar* (CSD 3060), to participate in professional development sessions, attend

invited colloquium talks, and present their own research. Students also have the opportunity to take elective courses outside of CSD, such as courses in teaching and grant preparation, and to complete teaching practica.

Four formal degree requirements must be satisfied before a student initiates PhD dissertation work:

- In the first semester of study, students, with the help of their major advisers, develop a proposed Plan of Study and detailed Individual Development Plan (IDP) that specifies their background, goals, and tentative plans for their program of study. Students schedule a Plan of Study meeting with a faculty committee, to review this document and their plans (see *Major Adviser and Advising Committees*, below).
- Annually, after the initial plan of study meeting, the student must convene an annual review meeting, in which their Plan of Study and progress will be reviewed.
- The student must complete a pre-dissertation research project during the first year, culminating in a manuscript resulting from a research practicum experience. This project must be completed prior to initiating the comprehensive examination.
- The student must pass a comprehensive examination, to be completed within one semester. It will consist of a substantive written deliverable and an open-ended oral examination. Students on provisional or special status, or on probation, are not eligible to take the comprehensive exam.

Students must then successfully complete both the written dissertation overview (prospectus document) and oral examination of their prospectus. After the prospectus is passed, students file an application for admission to candidacy for the Doctor of Philosophy degree. See below and also *Admission to Candidacy for the Doctor of Philosophy Degree* in this bulletin for details.

Major Advisor and Advising Committees

Students admitted to the PhD program are assigned a major adviser in their main area of specialization. The adviser is primarily responsible for providing assistance and advice to the student throughout all facets of the PhD program, and typically serves as the chair of the Plan of Study, Comprehensive Examination, and Dissertation Committees. Either PhD students or their advisers may initiate a change of adviser, but no student may remain in the program without an adviser.

The student, upon consultation with the major adviser, secures the agreement of at least two other departmental faculty members with graduate faculty status to serve with the adviser on the student's Plan of Study Committee. This committee initially convenes to review and make recommendations about the student's Plan of Study. Thereafter, the committee meets annually with the student to review and make recommendations about the student's progress in the PhD program. Note: The plan of study committee may, but need not be, the student's comprehensive examination or dissertation committee.

See *Doctoral Committee* under Regulations Pertaining to Doctoral Degrees for an overview of the dissertation committee's makeup and responsibilities.

Overview or Prospectus Meeting

See *Overview or Prospectus Meeting* under Regulations Pertaining to Doctoral Study for the regulations pertaining to this meeting and then read the following information that is specific to the PhD program in Communication Science and Disorders. After securing the adviser's approval, each PhD student must submit a written dissertation proposal to the dissertation committee at least two weeks prior to a formal overview meeting with that committee. (See *Dissertation and Abstract* section for details on the characteristics of an appropriate dissertation.)

Final Oral Examination

See *Final Oral Examination* under Regulations Pertaining to Doctoral Study and then note the following additional program-specific information. After securing the adviser's approval, the student submits copies of the complete document to the dissertation committee at least two weeks prior to the final oral examination in defense of the dissertation.

PhD Curriculum

For the CSD PhD degree, a minimum of 72 credits beyond the bachelor's degree is needed.

All CSD PhD students are required to take CSD 3048 *Intro to PhD Studies*, and 3 (or more) credits of CSD 3479 *PhD Seminar in Speech-Language Pathology* and/or CSD 3049 *PhD Seminar in Audiology*. CSD 3050/3480 *Translational Challenges in CSD* will be offered every two years and can also serve to meet this requirement. CSD PhD students are required to take a minimum of 8 credits of coursework in statistics, methods, and experimental design. Three-6 credits of CSD 3971 *Research Practicum* are also required, and this registration takes place while the student is working on their first-year project. In each semester, until they enter full-time dissertation status, PhD students are required to attend the departmental CSD 3060 *Proseminar* (1 credit per semester, 4 credits total) to participate in professional development sessions, attend invited colloquium talks, and present their own research. All PhD students are required to perform two, 3-credit lab rotations with mentors other than their major advisor. These rotations can take place in or outside the CSD department. A 3-credit grant writing course administered by SHRS is also required. The grant writing course must be taken for 2 credits in the fall semester and 1 credit in the spring semester for a total of 3 credits (both parts of the grant writing course are required for a final grade). Six to 9 credits of elective courses will be selected by the student and their major advisor. Elective courses can focus on the major area of study or in professional development, such as teaching practica. Comprehensive exams and prospectus preparation are also required 3-credit registrations.

Otherwise, coursework and other experiences are individually tailored for each student, in consultation with the student's adviser and the adviser-chaired Plan of Study committee.

- CSD 3048 - INTRODUCTION TO PHD STUDIES
- CSD 3049 - PH.D. SEMINAR IN AUDIOLOGY
- CSD 3479 - RESEARCH SEMINAR IN SPEECH AND LANGUAGE PATHOLOGY
- CSD 3060 - PHD PROSEMINAR
- CSD 3050 - TRANSLATION CHALLENGES IN CSD
- CSD 3971 - RESEARCH PRACTICUM FOR PHD STUDENTS
- CSD 2972 - EXAMINATION
- CSD 3000 - DISSERTATION RESEARCH PHD DEGREE

Doctor of Audiology, AuD

Degree Requirements

Students with bachelor's degrees in communication science and disorders can complete the program in four years, while students with a master's degree in Audiology can complete the program in approximately two years. Students applying to the AuD program with a completed master's degree will be required to complete two years of study with a minimum of 30 credits (typically about 38 credits) to satisfy academic and clinical requirements for the degree. A review of successfully completed graduate coursework in the master's degree in CSD (focus in Audiology) will be conducted after being admitted to the AuD Program. Students applying to the AuD program with a completed bachelor's degree (major in CSD) will require four years of study with a minimum of 75 credits (typically about 100 credits) to satisfy academic and clinical requirements for the degree. Students with a bachelor's degree without a CSD

major will have to complete an additional year of post-baccalaureate study. Other requirements include the successful completion of two comprehensive examinations, a mentored research project, and a full-time clinical externship.

Comprehensive Examinations

Students in the AuD program are required to successfully complete two comprehensive examinations before the Doctor of Audiology degree can be awarded. The Comprehensive Exam I is a formative examination that will identify strengths and/or weaknesses in the student's knowledge base. An ad hoc committee of reviewers administers this comprehensive examination.

In addition, students pursuing the AuD are required to successfully complete Comprehensive Exam II. During this examination, the student will demonstrate an ability to apply theoretical knowledge to a real clinical case with which the student has been extensively involved during clinical training. Comprehensive Exam II will have both written and oral portions. The student will identify a case from the student's own clinical experience in which they have been primarily responsible for case management. This case will be thoroughly presented in conjunction with in-depth background information, including relevant clinical research on all aspects of the case. A panel of three reviewers will be constituted to evaluate each individual student's examination performance.

All audiology students in good academic standing are expected to pass their comprehensive examination(s). However, regardless of academic standing, failure to pass either of the above examinations within three examination cycles will result in the student's dismissal from the audiology program.

AuD Curriculum

- CSD 2021 - CLINICAL PROCEDURES LAB 1-1
- CSD 2022 - CLINICAL PROCEDURES LAB 2-2
- CSD 2029 - IMPLANTABLES IN CLINICAL PRACTICE
- CSD 2036 - EVALUATION AND TREATMENT OF TINNITUS AND SOUND INTOLERANCE
- CSD 2040 - AUDIOLOGICAL ASSESSMENT
- CSD 2041 - MANAGEMENT OF HEARING LOSS
- CSD 2042 - AUDIOLOGICAL ASSESSMENT LAB
- CSD 2044 - DIFFERENTIAL DIAGNOSIS
- CSD 2043 - FUNDAMENTALS OF SPEECH-LANGUAGE PATHOLOGY FOR AUDIOLOGISTS
- CSD 2045 - PHYSIOLOGICAL ASSESSMENT
- CSD 2047 - AMPLIFICATION I
- CSD 2051 - CLINICAL PROCEDURES LAB 1-2
- CSD 2052 - CLINICAL PROCEDURES LAB 2-3
- CSD 2053 - CLINICAL PROCEDURES LAB 2-1
- CSD 2055 - PEDIATRIC AUDIOLOGIC REHABILITATION
- CSD 2056 - AUDIOLOGY PRACTICUM NETWORK - AUD (3 terms) - Variable credits
- CSD 2057 - AUDIOLOGY PRACTICUM OUTPLACEMENT (5 terms) - Variable credits
- CSD 2060 - PROSEMINAR - MA (6 terms)
- CSD 2078 - PHYSICS, PHYSIOLOGY AND PSYCHOLOGY OF SOUND
- CSD 2087 - HEARING CONSERVATION AND RESTORATION
- CSD 2081 - RESEARCH STRATEGIES AND TACTICS
- CSD 2085 - AUD SCREENING AND PREVENTION PRACTICUM
- CSD 2101 - DATA AND STATISTICAL LITERACY
- CSD 2103 - PROFESSIONAL WRITING FOR AUDIOLOGISTS
- CSD 2110 - NEUROSCIENCE OF COMMUNICATION
- CSD 2162 - COUNSELING STRATEGIES FOR AUD AND SLP
- CSD 2251 - VESTIBULAR ASSESSMENT AND REHABILITATION

- CSD 2252 - ADVANCED PHYSIOLOGICAL ASSESSMENT
- CSD 2451 - AUDIOLOGY MASTERS COMPREHENSIVE
- CSD 2454 - AMPLIFICATION 2
- CSD 2456 - SPEECH PERCEPTION ACROSS THE LIFESPAN
- CSD 2600 - INTER-PROFESSIONAL ROTATION
- CSD 2601 - SUPERVISION
- CSD 2602 - EDUCATIONAL AUDIOLOGY
- CSD 2652 - ADVANCED CLINICAL SEMINAR 3-1
- CSD 2654 - PRACTICE MANAGEMENT
- CSD 2657 - ADVANCED CLINICAL SEMINAR 3-3
- CSD 2661 - ADVANCED CLINICAL SEMINAR 3-2
- CSD 2971 - RESEARCH PRACTICUM
- Comprehensive Examination II
- CSD 2659 - AUDIOLOGY EXTERNSHIP (3 terms)
- CSD 2655 - ADVANCED CLINICAL SEMINAR 4-1
- CSD 2660 - ADVANCED CLINICAL SEMINAR 4-2
- CSD 2658 - ADVANCED CLINICAL SEMINAR 4-3
- CSD 2046 - PEDIATRIC EVALUATION

Medical Speech-Language Pathology, CScD

The Clinical Doctorate in Speech-Language Pathology is being redesigned. While we are not currently accepting students into the program, announcements will be posted on our website when the new program is approved and open for applications.

Master's

Communication Science and Disorders - Audiology Concentration, MA/MS

Program Requirements

Clinical Practicum

Clinical practicum requirements are met through the Audiology Network and Outplacements clinical rotations. These experiences include varied settings such as hospitals, rehabilitation centers, specialty clinics, private practices, schools for the Deaf, and public schools.

Proseminar

All students must complete the proseminar requirement, which consists of attending a specified number of scientific and professional presentations that have relevance to communication science and disorders.

Comprehensive Exam for MA

All students in the Master of Arts program are required to pass an oral comprehensive examination in the spring of their second year. The comprehensive examination assesses students' ability to think critically, to communicate their thoughts in oral form, and to demonstrate their grasp of the major academic and clinical content provided in their graduate program. Requirements for passing the comprehensive examination are provided in the Academic Handbook.

Students seeking the Doctor of Audiology (AuD) degree must complete a second comprehensive examination which includes a written and oral component. Details about that comprehensive examination can be found in the section on the AuD degree.

Thesis Option for Master of Science (MS) degrees

Students pursuing the Master of Science degree in audiology must successfully complete a thesis project. Thesis students will have an examining committee of at least three University of Pittsburgh faculty members (including the research director, who serves as chair).

Additional requirements are outlined in the academic handbook, which is distributed to students at the beginning of their academic programs.

Concentration

This program is designed for those students who do not plan to provide clinical services, but would like to pursue a research track in audiology. Students pursuing the AuD degree (Clinical Doctorate) also may pursue a research track. The audiology concentration for the master's degree requires a minimum of 30 credits of coursework. All credits must be passed with a B grade or better in order to count towards graduation.

Audiology Curriculum

- CSD 2022 - CLINICAL PROCEDURES LAB 2-2
- CSD 2021 - CLINICAL PROCEDURES LAB 1-1
- CSD 2040 - AUDIOLOGICAL ASSESSMENT
- CSD 2041 - MANAGEMENT OF HEARING LOSS
- CSD 2042 - AUDIOLOGICAL ASSESSMENT LAB
- CSD 2044 - DIFFERENTIAL DIAGNOSIS
- CSD 2045 - PHYSIOLOGICAL ASSESSMENT
- CSD 2046 - PEDIATRIC EVALUATION
- CSD 2047 - AMPLIFICATION 1
- CSD 2051 - CLINICAL PROCEDURES LAB 1-2
- CSD 2052 - CLINICAL PROCEDURES LAB 2-3
- CSD 2053 - CLINICAL PROCEDURES LAB 2-1
- CSD 2055 - PEDIATRIC AUDIOLOGIC REHABILITATION
- CSD 2056 - AUDIOLOGY PRACTICUM NETWORK - AUD
- CSD 2057 - AUDIOLOGY PRACTICUM OUTPLACEMENT
- CSD 2060 - PROSEMINAR - MA
- CSD 2078 - PHYSICS, PHYSIOLOGY AND PSYCHOLOGY OF SOUND
- CSD 2085 - AUD SCREENING AND PREVENTION PRACTICUM
- CSD 2451 - AUDIOLOGY MASTERS COMPREHENSIVE

Communication Science and Disorders - Speech-Language Pathology Concentration, MA/MS

Program Requirements

Clinical Practicum

Clinical practicum requirements are met through the SLP Network, Outplacements, and Practicum in the Schools. These community-based sites consist of more than 100 facilities in Western Pennsylvania with which the program is affiliated. These include varied settings such as hospitals, rehabilitation centers, home based services, specialty clinics, not-for-profit clinics, early intervention, private practices, and schools.

SLP Summative Assessment Project for Master of Arts (MA) degree

All students in the Master of Arts program are required to successfully complete a Summative Assessment Project. This project assesses students' ability to think critically, communicate their thoughts in written and oral form, and demonstrate their grasp of the major academic and clinical content provided in their graduate program. Students pursuing the Master of Arts (MA) degree in Speech Language Pathology must satisfactorily complete a one-credit course, typically taken in the fall or spring term of their last year in the graduate program. Requirements for passing the Summative Assessment Project are provided in the course syllabus.

Program Electives

Thesis Option for Master of Science (MS) degree

Students pursuing the Master of Science degree in speech-language pathology must successfully complete a thesis project. Students who complete a master's thesis are exempt from the Summative Assessment Project. Thesis students will have a committee of at least three University of Pittsburgh faculty members as outlined in the academic handbook. Additional requirements are outlined in the academic handbook, which is distributed to students at the beginning of their academic programs.

Optional Coursework

The master's degree program with a concentration in speech-language pathology has a generally predefined curriculum. For students interested in obtaining school certification, students must complete the regular master's degree requirements plus the following: a 3 credit child/human development course (typically taken as an undergraduate); a language development course (typically taken through the CSD undergraduate program); and CSD 2067 SLP School Practicum (4 days per/ week for a full semester). Additionally, the student must pass specific Praxis examinations as required by the Pennsylvania Department of Education (PDE).

Curriculum

The program is designed to be completed within 5 terms, although some students will elect to complete the program in 6 terms. The program requires 60 credits typically distributed as follows: Required Coursework, Clinic Practicum (minimum of 10 credits), and additional/optional credits. Course work must be passed with a C- grade or better to count for graduation.

The progression of courses for the general clinical requirements are outlined in the student's plan of study, and includes the following Program Curriculum:

- CSD 2028 - AUTISM
- CSD 2039 - MOTOR SPEECH DISORDERS
- CSD 2055 - PEDIATRIC AUDIOLOGIC REHABILITATION
- CSD 2064 - INTRO CLINICAL DECISION-MAKING
- CSD 2070 - ARTICULATION AND PHONOLOGICAL DISORDERS
- CSD 2071 - CHILD LANGUAGE DISORDERS 1
- CSD 2072 - STUTTERING
- CSD 2073 - VOICE DISORDERS
- CSD 2076 - DYSPHAGIA
- CSD 2077 - AUGMENTATIVE COMMUNICATION
- CSD 2079 - PEDIATRIC FEEDING AND SWALLOWING
- CSD 2081 - RESEARCH STRATEGIES AND TACTICS
- CSD 2082 - PROFESSIONAL ISSUES 1
- CSD 2083 - PROFESSIONAL ISSUES 2
- CSD 2086 - SLP SCREENING AND PREVENTION SKILLS LAB
- CSD 2120 - PRINCIPLES OF AUDIOLOGY FOR SPEECH-LANGUAGE PATHOLOGISTS
- CSD 2130 - NEUROGENIC LANGUAGE AND COGNITIVE COMMUNICATION DISORDERS 1
- CSD 2162 - COUNSELING STRATEGIES FOR AUD AND SLP
- CSD 2230 - NEUROGENIC LANGUAGE AND COGNITIVE COMMUNICATION DISORDERS 2
- CSD 2250 - CHILD LANGUAGE DISORDERS 2
- CSD 2514 - EDUCATIONAL SERVICE DELIVERY
- CSD 2525 - INTEGRATED CASES 1

Optional

- CSD 2500 - MEDICAL SPEECH-LANGUAGE PATHOLOGY 3

Clinical Practice

- CSD 2065 - SLP NETWORK PRACTICUM
- CSD 2066 - SLP OUTPLACEMENT PRACTICUM
- CSD 2067 - SLP SCHOOL PRACTICUM

Other Requirements

- CSD 2069 - SLP SUMMATIVE ASSESSMENT PROJECT

Thesis Option

- CSD 2000 - RESEARCH & THESIS MASTER'S DEGR

Department of Counseling and Behavioral Health

The Department of Counseling and Behavioral Health is home to programs that deliver personalized educational experiences for future professional counselors. We prepare our students to address the complex challenges faced by clients of diverse backgrounds, including individuals across cultures, across the lifespan, and living with disabilities and behavioral health challenges. We emphasize experiential training in evidence-based practices while advancing the field through clinical research. We are committed to community engagement, advocacy, and promoting diversity, inclusion, and cultural humility.

Our award-winning educational programs, research projects, and other learning opportunities prepare students to excel in the counseling profession. Pitt graduates are highly successful as they enter this rewarding profession. We take a holistic, hands-on approach to training that provides a strong foundation of knowledge while offering ample opportunity to practice your skills and options for personalizing your education. Our world class faculty include renowned scholars, highly skilled clinicians, and passionate educators.

Clinical Mental Health Counseling (MS)

Our counseling curriculum covers a wide range of themes including:

- Advanced counseling skills techniques- individual, group, family, substance abuse and crisis counseling
- Case conceptualization and treatment planning
- Assessment and diagnosis
- Evidence-based practice

Students complete 60 credits required for a master's degree in Clinical Mental Health Counseling in five terms. The degree requires a 100-hour practicum and 600-hour internship in a professional clinical rehabilitation or mental health counseling setting.

Master's

Clinical Mental Health Counseling, MS

The Clinical Mental Health Counseling program strives to be a world class educational program, delivering a personalized educational experience for future professional counselors. We prepare our students to address the complex challenges faced by clients of diverse backgrounds, including individuals across cultures, across the lifespan, and those with disabilities and mental and behavioral health challenges. Our program emphasizes experiential training in evidence-based practices while advancing the field through clinical research. We are committed to community engagement, advocacy, and promoting diversity, inclusion, and cultural humility.

This program prepares students to practice the profession of clinical mental health counseling and is accredited by the Council for Accreditation of Counseling and Related Education Programs (CACREP) through March 2032.

This in-person program utilizes various instructional methods, including hands-on skills practice and role-plays that complement didactic learning and experiential learning activities. The curriculum includes courses on theories of counseling, foundations of professional counseling, ethics, multicultural counseling, individual and group counseling services, case conceptualization and treatment planning, case management, vocational and career development, assessment and diagnosis, evidence-based practice and research methods. Elective courses focus on trauma and grief counseling, child and adolescent counseling, and disability and assistive technology considerations. See curriculum for more information.

Graduates meet eligibility criteria for national certification as a national certified counselor (NCC) or as a certified rehabilitation counselor (CRC) and the educational requirements for licensure as a professional counselor (LPC) in Pennsylvania.

Graduates of the clinical mental health counseling program may be eligible for the CRC under **Category 3**. Earning the CRC requires the completion of several requirements, including the CRC examination. Students wishing to seek the CRC credential must take COUN 2714 Medical, Psychosocial, and Technology Considerations in Disability and complete their Practicum and Internship under the supervision of a CRC.

For more information on the CRC credential, see the CRCC website: <https://crccertification.com/get-certified/>.

Clinical Mental Health Counseling

Pronouns: she/her/hers

Requirements:

Admission Requirements

- A baccalaureate degree is required, preferably in psychology, rehabilitation sciences, human services, social sciences or a related field of study.
- A minimum overall undergraduate GPA of 3.0 (based on 4.0) is suggested. If your GPA falls below 3.0, your application may still be considered. In such cases, please describe factors that may have negatively impacted your GPA as one element of your professional statement. A minimum GPA of 2.8 is required.
- Applicants should possess strong interpersonal and professional skills, must be committed to developing clinical skills through clinical practice and supervision, and be open to feedback, self-assessment, and self-reflection. Applicants must communicate in a clear, organized, and logical fashion both verbally and in writing.
- Promoting diversity, equity and inclusion is a major emphasis in our program and in the counseling profession. Those with knowledge, experience, skills, interest, and dedication to advancing these values are strongly encouraged to apply and to convey this through their application materials.
- Verification of English Language Proficiency. Verification is required unless the following apply:
 - the applicant is a citizen of a country whose official language is English
 - A group interview conducted via video conference will be required. We will reach out to you with additional instructions if you are invited to an interview.
- Admission is available for fall semester start only.

Application Requirements

- Complete the GradCAS application.
- Submit the application fee of \$50 (U.S.).
- Three professional letters of recommendation. These letters should be from individuals who can describe your potential for graduate level work and may include individuals such as professors, supervisors, or employers.
- Upload a personal statement that demonstrates evidence of graduate level writing skills and discusses career goals, strengths, skills, and experiences that will contribute to success in the program and in the counseling profession. The essay should also include a brief statement discussing professional interest in the field of counseling and reasons for applying to the University of Pittsburgh Clinical Mental Health Counseling Program. (2,500 character limit).
- Answer two short essay prompts (2,000 character limit).
- Curriculum Vitae or Resume.
- A course-by-course evaluation with GPA conversion for all higher institutions attended outside the U.S. The evaluation may be from World Education Services (WES), Inc. or Educational Credential Evaluators (ECE), Inc.
- **All admitted students will be required to provide official transcripts and/or credential evaluations to the SHRS Admissions Office prior to enrolling in classes.**

If applicable:

- Request official English Language Proficiency test scores from one of the following options. Minimum scores accepted follow:
 - Duolingo: 130. Scores should be made available electronically to "University of Pittsburgh - Health and Rehabilitation Sciences."
 - IELTS: 7.0. Scores should be made available electronically to "University of Pittsburgh Health and Rehabilitation Sciences."

- TOEFL: 100. TOEFL sub-scores of 26 for speaking and 24 for listening are required. Submit electronically to institution code "2927."
- Unofficial scores may be provided via GradCAS (in addition to the official scores required).

Curriculum and Course Descriptions

Fall Term - Year 1

- COUN 2720 - FOUNDATIONS OF COUNSELING
- COUN 2721 - CULTURAL CONSIDERATIONS IN COUNSELING
- COUN 2734 - COUNSELING THEORIES AND TECHNIQUES
- COUN 2737 - CLINICAL, DIAGNOSTIC AND FUNCTIONAL ASSESSMENT IN COUNSELING
- COUN 2765 - CLINICAL COUNSELING MENTORSHIP

Spring Term - Year 1

- COUN 2732 - HUMAN DEVELOPMENT ACROSS THE LIFESPAN
- COUN 2733 - COUNSELING SKILLS & TECHNIQUES
- COUN 2738 - DIAGNOSIS & TREATMENT OF COGNITIVE AND MENTAL HEALTH DISORDERS
- COUN 2739 - GROUP COUNSELING
- COUN 2742 - LEGAL, ETHICAL & PROFESSIONAL ISSUES IN COUNSELING
- COUN 2765 - CLINICAL COUNSELING MENTORSHIP

Summer Term - Year 1

- COUN 2736 - CRISIS COUNSELING, RISK MANAGEMENT AND DISASTER PREPAREDNESS
 - COUN 2740 - CLINICAL APPLICATIONS IN COUNSELING
 - COUN 2746 - COUNSELING PRACTICUM
 - COUN 2765 - CLINICAL COUNSELING MENTORSHIP
- Choice of 1 of the following option:
- COUN 2714 - MEDICAL, PSYCHOSOCIAL, AND ASSISTIVE TECHNOLOGY CONSIDERATIONS IN DISABILITY
 - COUN 2766 - INTRODUCTION TO ASSESSMENT AND TREATMENT FOR CHILDREN AND ADOLESCENTS
 - COUN 2767 - TRAUMA AND GRIEF COUNSELING

Fall Term - Year 2

- COUN 2743 - FAMILY AND COUPLES COUNSELING
- COUN 2747 - CONCEPTUALIZATION, TREATMENT PLANNING, & CASE MANAGEMENT
- COUN 2748 - EVIDENCE BASED PRACTICE AND RESEARCH METHODS IN COUNSELING
- COUN 2749 - CLINICAL COUNSELING INTERNSHIP
- COUN 2765 - CLINICAL COUNSELING MENTORSHIP

Spring Term - Year 2

- COUN 2724 - CAREER COUNSELING & VOCATIONAL ISSUES
- COUN 2726 - SUBSTANCE ABUSE AND ADDICTIONS COUNSELING

- COUN 2749 - CLINICAL COUNSELING INTERNSHIP
- COUN 2751 - CLINICAL COUNSELING CAPSTONE EXAM

Clinical Capstone Examination

All Counseling students are required to pass a clinical competency examination. The Clinical Counseling Capstone Exam requires student demonstration of knowledge and skills that reflect entry-level competencies of a professional counselor. Students are assessed on knowledge and skills accumulated through coursework and clinical experiences. The Capstone requires students to synthesize and apply advanced concepts into clinical practice.

The Capstone employs a clinical case study approach. Students are charged with researching and completing a written review on a client issue or population with the expectation of demonstrating expertise. Students are provided a case study in their area of expertise to demonstrate their knowledge and skills. Students are expected to analyze and synthesize case materials for case conceptualization and then develop appropriate, realistic, and evidence-based intervention plans. Students are expected to apply appropriate counseling techniques included in their intervention plan via role-play simulations. Successful completion of the Capstone is needed for the student to demonstrate mastery of graduate study.

Total Credits: 61

Department of Health Information Management

Master of Science Degree in Health Informatics with an Area of Concentration in Health Informatics (HI), Data Science (DS), Health Services Analytics (HSA) or Health Care Supervision and Management (HSAM)

The Master of Science in Health Informatics (MSHI) Program is a STEM Designated Program. The Department of Health Information Management (HIM) offers four tracks leading to the Master of Science degree in Health Informatics (HI), Data Science (DS), Health Services Analytics (HSA) and Health Care Supervision and Management (HSAM).

Contact Information:

Bambang Parmanto, PhD, Chair
Department of Health Information Management

**Admission Requirements for Health Informatics (HI),
Data Science (DS), Health Services Analytics (HSA),**

and Health Care Supervision and Management (HSAM)

- A baccalaureate degree from an accredited institution:
- A minimum grade point average (GPA) of 3.0 (on a 4.0 scale) is required. Admission may be considered for applicants with a GPA of less than 3.0 if other supporting evidence of their ability to complete the graduate program is provided.

Application Process for HI, DS, HSA & HSAM

- Complete the application for admission
- Applications to attend the program are submitted through GradCAS
- Application fee of \$50
- One Letter of Recommendation is required. The recommendation should be from college level instructors or employers/professionals who have supervised your work in a paid or volunteer capacity. These individuals should be able to comment on your academic, professional and interpersonal abilities. People submitting recommendation letters on your behalf are encouraged to send their letters to our admissions office electronically through our application system. For those people who wish to submit their letter of recommendation on paper, please forward them a copy of our Recommendation Form and follow the directions for paper recommendations.
- Statement of Purpose/Essay
- Transcripts from all institutions attended
- International applicants must provide English Language Proficiency scores (Duolingo, IELTS, or TOEFL) and an Academic Credential Evaluation from Educational Credential Evaluators, Inc. or World Education Services (WES), Inc.

Financial Aid

There are scholarships and loan opportunities available to graduate students from the American Health Information Management Association (AHIMA). Further information can be obtained from the AHIMA web site at www.ahima.org under the career and student center tab. Additionally, the Pennsylvania Health Information Management Association (PHIMA) awards scholarships to qualified students in Pennsylvania. Further information can be obtained from PHIMA's web site at <http://www.phima.org/members/scholarships/>.

The Healthcare Information and Management Systems Society (HIMSS) also awards scholarships to HIMSS student members who have achieved academic excellence and have the potential to be future leaders in the health care information and management systems industry. Visit the HIMSS site at <http://www.himss.org/> and navigate to "Scholarships" under the Professional Development menu.

In addition, HIM provides endowment scholarships for both undergraduate and graduate studies.

Certificate

Health Data Analytics Certificate

In the Department of Health Information Management, there are four certificate programs: Health Data Analytics, Health Information Cybersecurity, Revenue Cycle Management, and Leadership in Health Informatics.

These certificate programs can help students open doors in new fields. All students enrolled in these certificate programs are required to complete 12 credits, or four 3-credit courses. A certificate program can be finished in one or two terms.

There are online and on-campus versions of these certificates. The curriculum and course contents are identical in these two versions. Domestic students can choose either of them according to their situation or preference before the enrollment. International students are required to attend the on-campus version of these certificates.

Program Requirements

The admission requirements for these certificate programs are identical to our Master of Science in Health Informatics (MSHI) program. All students enrolled in a certificate program are required to complete 12 credits. For students who pursue a MS degree in MSHI program, the credits obtained from these certificate programs can be counted toward the MSHI program. The required courses for each of the four certificate programs are listed below.

Around half of our courses are only offered once per academic year. In this case, if a student fails to successfully complete a course, the student must retake the course the next academic year. Furthermore, this may also prevent the student from registering for the advanced-level courses and delay the date of graduation.

Required Health Informatics Courses (12 Credits)

Students must complete the following 4 courses for the Health Data Analytics Certificate:

- HI 2022 - INTRODUCTION TO PYTHON FOR HEALTH INFORMATICS
- HI 2451 - DATABASE DESIGN AND BIG DATA ANALYTICS
- HI 2453 - MACHINE LEARNING IN HEALTH SCIENCE
- HI 2454 - DATA SCIENCE IN HEALTH INFORMATICS

Total Credits: 12

Health Information Cybersecurity Certificate

In the Department of Health Information Management, there are four certificate programs: Health Data Analytics, Health Information Cybersecurity, Revenue Cycle Management, and Leadership in Health Informatics.

These certificate programs can help students open doors in new fields. All students enrolled in these certificate programs are required to complete 12 credits, or four 3-credit courses. A certificate program can be finished in one or two terms.

There are online and on-campus versions of these certificates. The curriculum and course contents are identical in these two versions. Domestic students can choose either of them according to their situation or preference before the enrollment. International students are required to attend the on-campus version of these certificates.

Program Requirements

The admission requirements for these certificate programs are identical to our Master of Science in Health Informatics (MSHI) program. All students enrolled in a certificate program are required to complete 12 credits. For students who pursue a MS degree in MSHI program, the credits obtained from these certificate programs can be counted toward the MSHI program. The required courses for each of the four certificate programs are listed below.

Around half of our courses are only offered once per academic year. In this case, if a student fails to successfully complete a course, the student must retake the course the next academic year. Furthermore, this may also prevent the student from registering for the advanced-level courses and delay the date of graduation.

Required Health Informatics Courses (12 Credits)

Students must complete the following 4 courses for the Health Information Cybersecurity Certificate:

- HI 2021 - PRACTICAL STATISTICS AND PROGRAMMING USING R OR
- HI 2210 - HEALTH INFORMATION AND THE HEALTH CARE SYSTEM
- HI 2450 - SECURITY, PRIVACY, LEGAL, AND ETHICAL ISSUES IN HEALTH INFORMATION SYSTEMS
- HI 2452 - DIGITAL HEALTH

Total Credits: 12

Leadership in Health Informatics Certificate

In the Department of Health Information Management, there are four certificate programs: Health Data Analytics, Health Information Cybersecurity, Revenue Cycle Management, and Leadership in Health Informatics.

These certificate programs can help students open doors in new fields. All students enrolled in these certificate programs are required to complete 12 credits, or four 3-credit courses. A certificate program can be finished in one or two terms.

There are online and on-campus versions of these certificates. The curriculum and course contents are identical in these two versions. Domestic students can choose either of them according to their situation or preference before the enrollment. International students are required to attend the on-campus version of these certificates.

Program Requirements

The admission requirements for these certificate programs are identical to our Master of Science in Health Informatics (MSHI) program. All students enrolled in a certificate program are required to complete 12 credits. For students who pursue a MS degree in MSHI program, the credits obtained from these certificate programs can be counted toward the MSHI program. The required courses for each of the four certificate programs are listed below.

Around half of our courses are only offered once per academic year. In this case, if a student fails to successfully complete a course, the student must retake the course the next academic year. Furthermore, this may also prevent the student from registering for the advanced-level courses and delay the date of graduation.

Required Health Informatics Courses (12 Credits)

Students must complete the following 4 courses for the Leadership in Health Informatics Certificate:

- HI 2210 - HEALTH INFORMATION AND THE HEALTH CARE SYSTEM
- HI 2230 - FINANCIAL MANAGEMENT AND HEALTH CARE REIMBURSEMENT
- HI 2231 - TALENT MANAGEMENT AND HUMAN RESOURCES
- HI 2632 - LEADERSHIP AND PROJECT MANAGEMENT

Total Credits: 12

Revenue Cycle Management Certificate

In the Department of Health Information Management, there are four certificate programs: Health Data Analytics, Health Information Cybersecurity, Revenue Cycle Management, and Leadership in Health Informatics.

These certificate programs can help students open doors in new fields. All students enrolled in these certificate programs are required to complete 12 credits, or four 3-credit courses. A certificate program can be finished in one or two terms.

There are online and on-campus versions of these certificates. The curriculum and course contents are identical in these two versions. Domestic students can choose either of them according to their situation or preference before the enrollment. International students are required to attend the on-campus version of these certificates.

Program Requirements

The admission requirements for these certificate programs are identical to our Master of Science in Health Informatics (MSHI) program. All students enrolled in a certificate program are required to complete 12 credits. For students who pursue a MS degree in MSHI program, the credits obtained from these certificate programs can be counted toward the MSHI program. The required courses for each of the four certificate programs are listed below.

Furthermore, this may also prevent the student from registering for the advanced-level courses and delay the date of graduation.

Required Health Informatics Courses (12 Credits)

Students must complete the following 4 courses for the Revenue Cycle Management Certificate:

- HI 2210 - HEALTH INFORMATION AND THE HEALTH CARE SYSTEM
- HI 2230 - FINANCIAL MANAGEMENT AND HEALTH CARE REIMBURSEMENT
- HI 2410 - HEALTH VOCABULARY, TERMINOLOGY AND CLASSIFICATION SYSTEMS
- HI 2411 - REVENUE CYCLE ANALYTICS

Total Credits: 12

Master's

Health Informatics, MS

Data Science Concentration

Data Science (DS), a concentration in the Master of Science in Health Informatics program, is housed in the Department of Health Information Management, School of Health and Rehabilitation Sciences (SHRS).

The Data Science (DS) concentration prepares students to be responsible for the development, evaluation, and management of health information technologies and systems. Graduates of this concentration analyze, design,

implement, and evaluate health information systems. They will also have the ability to conduct in-depth data analytics projects to improve the quality of health care and reduce the cost of health care services. Students enrolled full-time can complete the program in 3-4 consecutive semesters.

There are online and on-campus versions of this concentration. The curriculum and course contents are identical in these two versions. Domestic students can choose either of them according to their situation or preference before their enrollment. International students are required to attend the on-campus version of the concentration.

Program Requirements

All students enrolled in the Data Science concentration are required to complete 36 credits. Courses are chosen with the advisor and a Plan of Study will be developed to enable each student to have an in-depth study of Data Science considering the student's previous academic preparation and experience.

Around half of our courses are only offered once per academic year. In this case, if a student fails to successfully complete a course, the student must retake the course the next academic year. Furthermore, this may also prevent the student from registering for the advanced-level courses and delay the date of graduation.

DS Curriculum

The Data Science curriculum allows students to take required courses and choose from elective courses. Up to 6 credits of elective courses can be chosen from other departments in the SHRS or other academic programs within the University.

Please note: All students are required to finish one course in medical terminology if they do not have that course in their previous study or clinical background. Pitt offers a Coursera course in medical terminology that can meet this program requirement and can be found at this link <https://www.coursera.org/learn/clinical-terminology>. Students can choose an equivalent medical terminology course from somewhere else as well.

Required Courses (24 Credits)

Students must complete the following 8 courses:

- HI 2021 - PRACTICAL STATISTICS AND PROGRAMMING USING R
- HI 2022 - INTRODUCTION TO PYTHON FOR HEALTH INFORMATICS
- HI 2210 - HEALTH INFORMATION AND THE HEALTH CARE SYSTEM
- HI 2250 - FOUNDATIONS OF HEALTH INFORMATICS
- HI 2251 - HEALTHCARE ANALYTICS AND DATA VISUALIZATION
- HI 2451 - DATABASE DESIGN AND BIG DATA ANALYTICS
- HI 2453 - MACHINE LEARNING IN HEALTH SCIENCE
- HI 2454 - DATA SCIENCE IN HEALTH INFORMATICS

Elective Courses (12 Credits)

Students can choose 4 electives from the following list of courses:

- HI 2230 - FINANCIAL MANAGEMENT AND HEALTH CARE REIMBURSEMENT
- HI 2231 - TALENT MANAGEMENT AND HUMAN RESOURCES
- HI 2236 - QUALITY AND PERFORMANCE IMPROVEMENT IN HEALTHCARE: METHODOLOGIES, CORE SKILLS, AND LEAN GREEN BELT C
- HI 2410 - HEALTH VOCABULARY, TERMINOLOGY AND CLASSIFICATION SYSTEMS
- HI 2411 - REVENUE CYCLE ANALYTICS

- HI 2450 - SECURITY, PRIVACY, LEGAL, AND ETHICAL ISSUES IN HEALTH INFORMATION SYSTEMS
- HI 2452 - DIGITAL HEALTH
- HI 2456 - HEALTHCARE IT TRENDS AND INNOVATION
- HI 2457 - DESIGN THINKING IN HEALTH INFORMATICS
- HI 2632 - LEADERSHIP AND PROJECT MANAGEMENT
- HI 2670 - HEALTH INFORMATICS CAPSTONE/INTERNSHIP

Health Services Analytics Concentration

The Health Services Analytics (HSA) concentration leading to a Master of Science degree in Health Informatics prepares students to be responsible for the development and management of health information systems consistent with the clinical, fiscal, administrative, ethical, and legal requirements of healthcare institutions. Graduates of this program analyze and evaluate health information systems. As members of the healthcare team, they interact with other healthcare professionals and administrators, and provide healthcare data for patient care, research, quality improvement, strategic planning, reimbursement, and related analytics and managerial functions.

HSA graduates work in a variety of settings, such as hospitals, health planning agencies, computer companies, consulting firms, information systems vendors, ambulatory care centers, research centers, rehabilitation facilities, and insurance companies.

There are online and on-campus versions of this concentration. The curriculum and course contents are identical in these two versions. Domestic students can choose either of them according to their situation or preference before enrollment. International students are required to attend the on-campus version of the concentration.

Program Requirements - HSA

All students enrolled in the HSA concentration are required to complete 36 credits. Students enrolled full-time normally complete the program in 3-4 consecutive semesters. Courses are chosen with the advisor and a Plan of Study will be developed to enable each student to have an in-depth study of Health Informatics considering the student's previous academic preparation and experience.

Around half of our courses are only offered once per academic year. In this case, if a student fails to successfully complete a course, the student must retake the course the next academic year. Furthermore, this may also prevent the student from registering for the advanced-level courses and delay the date of graduation.

Please note: All students are required to finish one course in medical terminology if they do not have that course in their previous study or clinical background. Pitt offers a Coursera course in medical terminology that can meet this program requirement and can be found at this link <https://www.coursera.org/learn/clinical-terminology>. Students can choose an equivalent medical terminology course from somewhere else as well.

Required Courses for All Students (21 credits)

Students must complete the following 7 courses:

- HI 2210 - HEALTH INFORMATION AND THE HEALTH CARE SYSTEM
- HI 2230 - FINANCIAL MANAGEMENT AND HEALTH CARE REIMBURSEMENT
- HI 2250 - FOUNDATIONS OF HEALTH INFORMATICS
- HI 2251 - HEALTHCARE ANALYTICS AND DATA VISUALIZATION
- HI 2410 - HEALTH VOCABULARY, TERMINOLOGY AND CLASSIFICATION SYSTEMS
- HI 2411 - REVENUE CYCLE ANALYTICS
- HI 2451 - DATABASE DESIGN AND BIG DATA ANALYTICS

Elective Courses for All Students (15 Credits)

Students can choose 5 electives from the following list of courses:

- HI 2021 - PRACTICAL STATISTICS AND PROGRAMMING USING R
- HI 2022 - INTRODUCTION TO PYTHON FOR HEALTH INFORMATICS
- HI 2231 - TALENT MANAGEMENT AND HUMAN RESOURCES
- HI 2236 - QUALITY AND PERFORMANCE IMPROVEMENT IN HEALTHCARE: METHODOLOGIES, CORE SKILLS, AND LEAN GREEN BELT C
- HI 2450 - SECURITY, PRIVACY, LEGAL, AND ETHICAL ISSUES IN HEALTH INFORMATION SYSTEMS
- HI 2452 - DIGITAL HEALTH
- HI 2453 - MACHINE LEARNING IN HEALTH SCIENCE
- HI 2454 - DATA SCIENCE IN HEALTH INFORMATICS
- HI 2456 - HEALTHCARE IT TRENDS AND INNOVATION
- HI 2457 - DESIGN THINKING IN HEALTH INFORMATICS
- HI 2632 - LEADERSHIP AND PROJECT MANAGEMENT
- HI 2670 - HEALTH INFORMATICS CAPSTONE/INTERNSHIP

Healthcare Supervision and Management Concentration

Health Care Supervision and Management (HSAM), a concentration in the Master of Science in Health Informatics program, is housed in the Department of Health Information Management, School of Health and Rehabilitation Sciences (SHRS).

The Health Care Supervision and Management (HSAM) concentration provides students an opportunity for knowledge, skills, and career advancement. Qualified students with interests in administration and supervisory management in health care, long-term care, and rehabilitation may pursue this 36-credit concentration in HSAM. Students enrolled full-time normally complete the program in 3-4 consecutive semesters.

This program is designed for students who wish to attain knowledge and skills at the graduate level to prepare for a supervisory management position or to upgrade competencies developed earlier in his/her career.

There are online and on-campus versions of this concentration. The curriculum and course contents are identical in these two versions. Domestic students can choose either of them according to their situation or preference before enrollment. International students are required to attend the on-campus version of the concentration.

Program Requirements

All students enrolled in the Health Care Supervision and Management concentration are required to complete 36 credits. Courses are chosen with the advisor and a Plan of Study will be developed to enable each student to have an in-depth study of Health Care Supervision and Management considering the student's previous academic preparation and experience.

Around half of our courses are only offered once per academic year. In this case, if a student fails to successfully complete a course, the student must retake the course the next academic year. Furthermore, this may also prevent the student from registering for the advanced-level courses and delay the date of graduation.

HSAM Curriculum

The Health Care Supervision and Management curriculum allows students to choose from required courses and elective courses.

Please note: All students are required to finish one course in medical terminology if they do not have that course in their previous study or clinical background. Pitt offers a Coursera course in medical terminology that can meet this program requirement and can be found at this link <https://www.coursera.org/learn/clinical-terminology>. Students can choose an equivalent medical terminology course from somewhere else as well.

Required Courses (21 Credits)

Students must complete the following 7 courses:

- HI 2210 - HEALTH INFORMATION AND THE HEALTH CARE SYSTEM
- HI 2231 - TALENT MANAGEMENT AND HUMAN RESOURCES
- HI 2236 - QUALITY AND PERFORMANCE IMPROVEMENT IN HEALTHCARE: METHODOLOGIES, CORE SKILLS, AND LEAN GREEN BELT C
- HI 2250 - FOUNDATIONS OF HEALTH INFORMATICS
- HI 2251 - HEALTHCARE ANALYTICS AND DATA VISUALIZATION
- HI 2451 - DATABASE DESIGN AND BIG DATA ANALYTICS
- HI 2632 - LEADERSHIP AND PROJECT MANAGEMENT

Electives (15 Credits)

Students can choose 5 electives from the following list of courses:

- HI 2021 - PRACTICAL STATISTICS AND PROGRAMMING USING R
- HI 2022 - INTRODUCTION TO PYTHON FOR HEALTH INFORMATICS
- HI 2230 - FINANCIAL MANAGEMENT AND HEALTH CARE REIMBURSEMENT
- HI 2410 - HEALTH VOCABULARY, TERMINOLOGY AND CLASSIFICATION SYSTEMS
- HI 2411 - REVENUE CYCLE ANALYTICS
- HI 2450 - SECURITY, PRIVACY, LEGAL, AND ETHICAL ISSUES IN HEALTH INFORMATION SYSTEMS
- HI 2452 - DIGITAL HEALTH
- HI 2453 - MACHINE LEARNING IN HEALTH SCIENCE
- HI 2454 - DATA SCIENCE IN HEALTH INFORMATICS
- HI 2456 - HEALTHCARE IT TRENDS AND INNOVATION
- HI 2457 - DESIGN THINKING IN HEALTH INFORMATICS
- HI 2670 - HEALTH INFORMATICS CAPSTONE/INTERNSHIP

Health Informatics Concentration

Health Informatics (HI), a concentration in the Master of Science in Health Informatics program, is housed in the Department of Health Information Management, School of Health and Rehabilitation Sciences (SHRS).

The Health Informatics (HI) concentration prepares students to be responsible for the evaluation and management of health information technologies and systems. Graduates of this track analyze, design, and evaluate health information systems. They may also perform data analytics projects to improve the quality of health care and reduce the cost of health care services. Students enrolled full-time can complete the program in 3-4 consecutive semesters.

There are online and on-campus versions of this concentration. The curriculum and course contents are identical in these two versions. Domestic students can choose either of them according to their situation or preference before enrollment. International students are required to attend the on-campus version of the concentration.

Program Requirements

All students enrolled in the Health Informatics concentration are required to complete 36 credits. Courses are chosen with the advisor and a Plan of Study will be developed to enable each student to design an in-depth study of Health Care Supervision and Management considering the student's previous academic preparation and experience.

Around half of our courses are only offered once per academic year. In this case, if a student fails to successfully complete a course, the student must retake the course the next academic year. Furthermore, this may also prevent the student from registering for the advanced-level courses and delay the date of graduation.

HI Curriculum

The Health Informatics curriculum allows students to choose from required courses and elective courses.

Please note: All students are required to finish one course in medical terminology if they do not have that course or clinical background. Pitt offers a Coursera course in medical terminology that can meet this program requirement and can be found at this link <https://www.coursera.org/learn/clinical-terminology>, however the student can choose another medical terminology course as well.

Required Health Informatics Courses (12 Credits)

Students must complete the following 4 courses:

- HI 2210 - HEALTH INFORMATION AND THE HEALTH CARE SYSTEM
- HI 2250 - FOUNDATIONS OF HEALTH INFORMATICS
- HI 2251 - HEALTHCARE ANALYTICS AND DATA VISUALIZATION
- HI 2451 - DATABASE DESIGN AND BIG DATA ANALYTICS

Elective Courses (24 Credits)

Students can choose 8 electives from the following list of courses:

- HI 2021 - PRACTICAL STATISTICS AND PROGRAMMING USING R
- HI 2022 - INTRODUCTION TO PYTHON FOR HEALTH INFORMATICS
- HI 2230 - FINANCIAL MANAGEMENT AND HEALTH CARE REIMBURSEMENT
- HI 2231 - TALENT MANAGEMENT AND HUMAN RESOURCES
- HI 2236 - QUALITY AND PERFORMANCE IMPROVEMENT IN HEALTHCARE: METHODOLOGIES, CORE SKILLS, AND LEAN GREEN BELT C
- HI 2410 - HEALTH VOCABULARY, TERMINOLOGY AND CLASSIFICATION SYSTEMS
- HI 2411 - REVENUE CYCLE ANALYTICS
- HI 2450 - SECURITY, PRIVACY, LEGAL, AND ETHICAL ISSUES IN HEALTH INFORMATION SYSTEMS
- HI 2452 - DIGITAL HEALTH
- HI 2453 - MACHINE LEARNING IN HEALTH SCIENCE
- HI 2454 - DATA SCIENCE IN HEALTH INFORMATICS
- HI 2456 - HEALTHCARE IT TRENDS AND INNOVATION
- HI 2457 - DESIGN THINKING IN HEALTH INFORMATICS
- HI 2632 - LEADERSHIP AND PROJECT MANAGEMENT
- HI 2670 - HEALTH INFORMATICS CAPSTONE/INTERNSHIP

Total Credits: 36

Prerequisites for Graduate Internships

If a student chooses to complete their internship/capstone at a site that is under contract with the HIM department (or any other site where a contract is required), the items listed below are required. If a contract is not required, the student must sign a waiver. The student's advisor will provide detailed information and time guidelines for completion of the requirements once the student matriculates into the graduate program.

- Physical examination including proof or completion of specific immunizations
- TB test, 2-step
- Pennsylvania Criminal Record Check
- Pennsylvania Child Abuse Clearance
- Recognizing and Reporting Child Abuse Training
- FBI Background Check (includes fingerprinting)
- HIPAA Training and Certification
- Students must carry personal health insurance while participating in an internship

Students must carry professional student liability insurance coverage while participating in an internship. The University provides liability insurance for internships covered by clinical affiliation contracts.

Some sites may have additional requirements (i.e. drug screen, Covid-19 vaccine, influenza vaccine, or orientation programs specific to their organization).

Internship sites may not allow a student to participate in an internship at their site if the background check reports that they have been convicted of a misdemeanor; a felony; or a felonious or illegal act associated with alcohol and/or substance abuse.

Additional Information Related to Internship

Travel to internship sites is the responsibility of the student. Students are expected to have a car or to provide their own transportation to all remote sites; no exceptions will be made. Not all sites are accessible by public transportation.

All expenses for transportation, parking, meals, and costs of prerequisites associated with clinical education are the responsibility of the student.

For more information on internships, students are encouraged to contact their academic advisor.

The HIM department has affiliation agreements with approximately 125+ clinical sites for student internships. The following list provides a sample of these sites:

- 3M/M*Modal
- Adelphoi Village
- Allegheny Health Network
- Athena Health

- Central Ohio Trauma System
- CVS/Aetna
- Deloitte
- Geisinger Health System
- goShadow
- Grant Thornton Consulting
- Highmark
- HM Health Solutions
- Infinitus
- KPMG
- Mayo Clinic
- Merck
- Neighborhood Resilience Project
- Omnicell
- Pitt CTSI
- Southwest Veterans
- UPMC Health Plan
- UPMC Health System
- UPMC Hillman Cancer Center
- UPMC Physician Services Division
- Western PA Patient Registry

Department of Occupational Therapy

Doctor of Occupational Therapy (OTD)

The Doctor of Occupational Therapy (OTD) program is an entry-level educational program, which prepares students for careers as occupational therapists.

The (OTD) program is a 32 month (8 term) professional course of study requiring 99 credits, including fieldwork education and a Doctoral Capstone that includes a capstone experience (Experiential Preceptorship) and capstone project.

Admission to the OTD program is only available on a full-time basis. The OTD program begins at the end of August (fall term).

The entry-level occupational therapy doctoral degree program is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA), located at 7501 Wisconsin Avenue, Suite 510E, Bethesda, MD 20814. ACOTE's telephone number c/o AOTA is 301-652-AOTA and its Web address is www.acoteonline.org. Graduates of the OTD program are eligible to sit for the national certification examination for the occupational therapist administered by the National Board for Certification in Occupational Therapy (NBCOT). After successful completion of this exam, the individual will be an Occupational Therapist, Registered (OTR). In addition, all states require licensure to practice; however, state licenses are usually based on the results of the NBCOT Certification Examination. Note that a felony conviction may affect a graduate's ability to sit for the NBCOT certification examination or attain state licensure. Additionally, certification and licensure requirements include inquiries as to whether the applicant has been convicted of a misdemeanor, a felony, or a felonious or illegal act, including those associated with alcohol and/or substance abuse.

PLEASE NOTE: The OTD program requires students to complete fieldwork education and a doctoral capstone experience at facilities external to the University of Pittsburgh. All OTD students are responsible for securing required resources and completing required documents to participate in fieldwork and the doctoral capstone experience including but not limited to transportation, physical examinations and associated testing (i.e., drug screen, vaccinations), health insurance, liability insurance, background clearances, CPR/AED training, first aid training, education modules, parking, housing, food, and clothing.

Admission Requirements

Pitt SHRS is committed to fostering a diverse and inclusive academic environment to create a more equitable health care system by welcoming applicants of all abilities/disabilities, religions, marital statuses, familial statuses, sexes, ages, sexual orientations, veteran statuses, national origins, all ethnic and racial backgrounds, genetic information, and gender identities and expressions.

Prerequisite Courses

Completion of the following prerequisite courses within the past 5 years with a minimum grade of B and a minimum GPA in these prerequisites of 3.00 (based on a 4.00 scale).

- Human Anatomy & Physiology (with a laboratory component), 8 credits
- Lifespan Human Development, 3 credits
- Psychopathology/Abnormal Psychology, 3 credits
- Statistics, 3 credits

Note: AP credits are not accepted as fulfillment of prerequisite courses. S grades are not accepted as fulfillment of prerequisite courses (with the exception of prerequisite courses taken during Spring 2020).

Additional Requirements

- Completion of a baccalaureate degree: Students are admitted into the Doctor of Occupational Therapy (OTD) program after successful completion of a baccalaureate degree with a minimum cumulative GPA of 3.00 (based on 4.00 scale).
- Experience in occupational therapy: Complete a minimum of 12 hours of volunteer, paid work and/or telehealth experience. Experiences can occur in one or more occupational therapy practice areas (e.g., children and youth/pediatrics, health and wellness, productive aging/geriatrics, rehabilitation, mental health, work/industry, home

care). **NOTE: Applicants having difficulty obtaining volunteer, paid work or telehealth experience hours may view approved videos to obtain up to 12 experience hours. See OT Video Attestation for the list of approved videos. After viewing the videos, upload the signed attestation in the OTCAS application.**

- Letters of recommendation: Submission of three letters of recommendation (evaluations) attesting to the applicant's academic and professional abilities. Letters of recommendation are submitted through the Occupational Therapy Centralized Application Service (OTCAS).
- Letter #1 - from an occupational therapist (OTR) who was involved in the applicant's occupational therapy experience hours.
- Letter #2 - from a college-level instructor who instructed the applicant in one or more classes.
- Letter #3 - from an individual who can attest to the skills, abilities, and professionalism of the applicant.
- Evidence of graduate level writing skills. Applicants will submit a personal statement through the OTCAS application. In your personal statement explain why you selected occupational therapy as a career and how this degree relates to your immediate and long-term professional goals. You are strongly encouraged to include how your lived experience (e.g., personal, profession, etc.) have influenced your interest in pursuing occupational therapy and how your strengths and skills will contribute to your success in the OTD program.
- Attest to satisfactory performance of the technical standards/essential skills required for successful completion of the OTD curriculum. Students admitted to the OTD program must review the Technical Standards and submit a signed form at the time of matriculation. View more on Technical Standards/Essential Skills.

Application Procedures

Applications must be e-submitted in OTCAS. Applications are reviewed when all materials, including transcripts and letters of recommendation, have been received and verified by OTCAS. The OTCAS application cycle opens in mid-July and applicants are encouraged to apply before November 1 as the Admissions Committee begins reviewing and offering admission at that time. The application deadline is June 1. Note: Prerequisite courses must be completed by June 1.

All applicants must:

- Apply online using the Occupational Therapy Centralized Application Service (OTCAS). To learn more about the application process and to create your account, please visit the OTCAS portal.
- See below for additional requirements for internationally educated students.

Additional Information

Admission to the OTD program is only available on a full-time basis. The OTD program begins in August (Fall Term) of each year. Official transcripts must be sent directly to OTCAS. OTCAS does not accept paper recommendations. Letters of recommendation are submitted electronically through the OTCAS system. Applications are reviewed when all materials, including transcripts and letters of recommendation, have been received and verified by OTCAS. OTCAS uses a verification process that can take several weeks. OTCAS will verify your documents before releasing them to the University of Pittsburgh. Applicants should confirm their status as verified with OTCAS. The Department of Occupational Therapy begins reviewing complete and verified applications and offering admission in November for the program starting the following August.

For questions about the receipt, processing, and verification of your application, please contact OTCAS Customer Service at 617-612-2860, otcasinfo@otcas.org.

International Students

In addition to the above, internationally educated students will be required to provide:

Academic Credential Evaluation:

- Applicants who have completed the equivalent of a baccalaureate degree or higher at an institution outside of the United States are required to provide an official third-party course-by-course evaluation of those academic credentials verifying Grade Point Average (GPA) on a 4.00 scale. The evaluation is an application requirement.
- Upon admission official transcripts of all original language academic records for all post-secondary educational endeavors are required. If original documents are issued in a language other than English, certified English translations must also be submitted. A final transcript or diploma showing completion of the undergraduate degree must be submitted prior to starting all SHRS graduate programs.
- The School of Health and Rehabilitation Sciences (SHRS) requires credential evaluations from one of the companies listed below. Electronic submission is preferred.
- Educational Credential Evaluators, Inc.
- World Education Services (WES), Inc.
- International applicants are not required to submit an evaluation for degrees earned in the United States. Applicants who have attended an English Canadian institution should contact the SHRS Admissions Office.

Verification of English Language Proficiency:

- International graduate applicants must possess proficiency in English at a level that enables them to succeed in graduate-level studies. Applications will not be processed until the required test results are submitted, or eligibility for an exemption has been verified. Only original official test scores received directly from test administration agencies are accepted. Electronic submission is preferred. Copies of test results are not acceptable.
- Request official English Language Proficiency test scores be sent to the University of Pittsburgh from one of the following options. Minimum scores accepted and instructions for sending official test scores follow:
- Duolingo English Test: 130. Scores should be made available electronically to "University of Pittsburgh - School of Health and Rehabilitation Sciences"
- International English Language Testing System (IELTS): 7. Scores should be made available electronically to "University of Pittsburgh Health and Rehabilitation Sciences"
- Test of English as a Foreign Language (TOEFL): 100. Scores should be submitted electronically through ETS to institution code "2927".

Verification is required unless the following apply:

- The applicant is a citizen of a country whose official language is English.
- The applicant has completed a degree program at a regionally accredited institution in the U.S.
- The applicant is not a citizen of a country whose official language is English but has completed a degree program at an institution outside of the U.S. where the language of instruction is English and where the official national language of the country in which the institution is located is English.

PLEASE NOTE: Applicants who already have a baccalaureate degree in occupational therapy and are interested in obtaining a master's degree should apply to the Master of Science (MS) program in Occupational Therapy .

Master of Science (MS) in Occupational Therapy

The Master of Science (MS) in Occupational Therapy program is a one-year graduate program housed within the Department of Occupational Therapy. This advanced practice program is designed for those with a baccalaureate degree in occupational therapy. Students begin the MS in Occupational Therapy program in the fall term (August). The MS in Occupational Therapy program requires the completion of 12 core credits of advanced evidence-based rehabilitation coursework. The MS in Occupational Therapy program offers exposure to a wide variety of occupational therapy practice and research. A Comprehensive Examination is required prior to graduation at the end of the last term.

Admission Requirements

Pitt SHRS is committed to fostering a diverse and inclusive academic environment to create a more equitable health care system by welcoming applicants of all abilities/disabilities, religions, marital statuses, familial statuses, sexes, ages, sexual orientations, veteran statuses, national origins, all ethnic and racial backgrounds, genetic information, and gender identities and expressions.

Qualified applicants for the Master of Science (MS) Program in Occupational Therapy must meet the following admission requirements:

- Bachelor's degree in occupational therapy. For international students, a bachelor's degree or diploma must be from a school/university approved by the World Federation of Occupational Therapists (WFOT) in the year that the applicant graduated and/or national governmental institutions that approve/accredit occupational therapy programs to grant a degree in occupational therapy (e.g., Ministry of Health).
- Minimum cumulative grade point average of 3.00 (based on a 4.00 scale).
- Verification of English Language Proficiency is required unless the following apply:
 - the applicant is a citizen of a country whose official language is English
 - the applicant has completed a degree program at a regionally accredited institution in the U.S., or
 - the applicant is not a citizen of a country whose official language is English but has completed a degree program at an institution outside of the U.S. where the language of instruction is English and where the official national language of the country in which the institution is located is English.
- Interview (personal or virtual) with the MS Program Director and at least one other faculty member from the Department of Occupational Therapy.

Application Requirements

- Complete the GradCAS application
- Submit the application fee of \$50 (U.S.).
- Evidence of graduate level writing skills in a self-evaluation essay that discusses goals, strengths, skills, and experiences that will contribute to success in the program and in the profession. The essay should also include a brief statement discussing interest in the field of study and reasons for applying to the University of Pittsburgh.
- Documented evidence of knowledge of rehabilitation through previous paid work experiences, internships or field experiences, or volunteer work experiences.
- Three letters of recommendation, preferably from individuals who have taught the applicant in an academic setting and/or supervised clinical activities. Letters of recommendation should address academic, professional and personal attributes, and potential for successful graduate education.

- Transcripts from all U.S. institutions attended.
- A course-by-course evaluation with GPA conversion for all higher level institutions attended outside the US. The evaluation may be from World Education Services (WES), Inc. or Educational Credential Evaluators, Inc. (ECE).
- **Admitted students will be required to provide official transcripts and/or credential evaluations from all higher institutions attended to the SHRS Admissions Office prior to enrolling in classes.**

If applicable:

- Request official English Language Proficiency test scores be sent to the University of Pittsburgh from one of the following options. Minimum scores accepted and instructions for sending official test scores follow:
- Duolingo English Test: 115. Scores should be sent to "University of Pittsburgh School of Health and Rehabilitation Sciences"
- International English Language Testing System (IELTS): 6.5. Scores should be sent to "University of Pittsburgh School of Health and Rehabilitation Sciences"
- Test of English as a Foreign Language (TOEFL): 80. Scores should be sent to institution code "2927".
- Unofficial scores may be provided via GradCAS (in addition to the official scores required).

Admitted students who are citizens of a country whose official language is not English, and who score below 120 on the Duolingo English Test, below 100 on the TOEFL ibt, or overall band 7.0 or lower on the IELTS, will be required to take an English Language Proficiency Test to better assess their English Language skills when they arrive at the University of Pittsburgh. The results of this exam may be used to recommend (not require) additional English language instruction that may supplement your education. If you have additional questions about the test, please [click here](#).

Your application will be reviewed once it is complete.

Application Deadlines

May 1st. Applications are accepted for enrollment beginning in the Fall term only (August).

For questions about GradCAS, the application process and needed materials please email admissions@shrs.pitt.edu.

For information about our program, please contact the Department of Occupational Therapy at OTpitt@shrs.pitt.edu.

Doctor of Clinical Science (CScD) in Occupational Therapy

The Doctor of Clinical Science (CScD) program in Occupational Therapy, delivered 100% online, provides post-professional, doctoral-level training to eligible or already credentialed or licensed occupational therapists to practice clinically with competencies above and beyond those expected of entry-level professionals. The highly personalized curriculum focuses on implementation of evidence, assessment, intervention, evidence-based protocols and guidelines and data-based decision making. Degree-seeking students culminate their matriculation through the program with an eight-credit capstone project. With the support of a faculty mentor, students will individually design and complete a capstone project that demonstrates their advanced knowledge for implementing evidence into practice.

This program also offers an Advanced Practice Certificate in Implementation of Evidence in Clinical Practice, which is earned upon completion of the CScD in Occupational Therapy degree or can be earned on a standalone basis.

Admission Requirements and Application Process

Pitt SHRS is committed to fostering a diverse and inclusive academic environment to create a more equitable health care system by welcoming applicants of all abilities/disabilities, religions, marital statuses, familial statuses, sexes, ages, sexual orientations, veteran statuses, national origins, all ethnic and racial backgrounds, genetic information, and gender identities and expressions.

- Applicants who received their occupational therapy training within the United States **must have an entry-level master's degree in occupational therapy** (e.g., MOT) from an Accreditation Council for Occupational Therapy Education (ACOTE)-accredited program, **or a baccalaureate degree in occupational therapy from an ACOTE-accredited program and a master's degree in occupational therapy or another field of study.**
- Applicants who received their occupational therapy training outside of the United States **must have an entry-level master's degree in occupational therapy or a baccalaureate degree in occupational therapy from an ACOTE-accredited program and a master's degree in occupational therapy or another field of study** from a World Federation of Occupational Therapy (WFOT)-approved program and meet all necessary requirements for admission to the University of Pittsburgh.
- U.S. applicants are required to have initial NBCOT certification (or eligibility). International applicants must provide equivalent certification documentation from country of residence.
- Interview*
- Qualified applicants will be invited to a virtual interview with the CScD in Occupational Therapy program director.
- Verification of English Language Proficiency. Verification is required unless the following apply:
 - the applicant is a citizen of a country whose official language is English
 - the applicant has completed a degree program at a regionally accredited institution in the U.S., or
 - the applicant is not a citizen of a country whose official language is English but has completed a degree program at an institution outside of the U.S. where the language of instruction is English and where the official national language of the country in which the institution is located is English.

Please note that the GRE is not required for admission to the program.

Occupational Therapists with Baccalaureate Degrees

Occupational therapists with a baccalaureate degree in occupational therapy, and no additional graduate degrees, should apply to the Master of Science (MS) in Occupational Therapy program.

Occupational Therapists with Master's Degrees

Occupational therapists with 1) an entry-level master's degree in occupational therapy, or 2) a baccalaureate degree in occupational therapy and an advanced master's degree in occupational therapy (or another field) may be able to transfer up to 30 credits from their master's degree, providing that these credits meet requirements in the CScD in Occupational Therapy curriculum.

Application Information

All Applicants

To apply to the online CScD in Occupational Therapy program, you must complete and submit the following:

- Complete the GradCAS application.
- \$50 application fee (U.S.)
- Two (2) Professional Letters of Recommendation: Letters of recommendation should attest to your professional abilities and conduct, collegiality, oral and written communication skills and leadership.*
- Essay*
- Evidence of graduate-level writing skills in an essay that outlines:
 - why you are interested in pursuing the Doctor of Clinical Science in Occupational Therapy degree or Certificate in Implementation,
 - why you are interested in advancing your education through the University of Pittsburgh,
 - what makes you a good fit for an advanced training education program that is delivered online
- How your identity, background, or experiences to date have contributed to your motivation and preparation for this program and will impact your progress in it, and
- the future professional goals that you hope to achieve as a result of this advanced training
- Resume: A professional resume indicating knowledge of rehabilitation through previous paid work experiences, internships or field experiences, or volunteer work experiences.
- Upload unofficial transcripts from all U.S. institutions attended in the Academic History section of CAS.
- Upload a course-by-course evaluation with GPA conversion for all higher institutions you have attended outside the U.S. in the Academic History section of CAS. The evaluation may be from World Education Services (WES), Inc. or Educational Credential Evaluators, Inc.
- **All admitted students will be required to provide official transcripts and, if applicable, credential evaluations to the SHRS Admissions Office prior to enrolling in classes.**
- If applicable, self-report unofficial English Language Proficiency (TOEFL or IELTS) test scores in the Academic History section of CAS (for Duolingo, upload an unofficial score report under Documents in Program Materials) and request official test scores be sent to the University of Pittsburgh. Minimum scores accepted and instructions for sending official test scores follow:
 - Duolingo English Test: 130. Scores should be made available electronically to "University of Pittsburgh - School of Health and Rehabilitation Sciences"
 - International English Language Testing System (IELTS): 7.0. Scores should be made available electronically to "University of Pittsburgh Health and Rehabilitation Sciences"
 - Test of English as a Foreign Language (TOEFL): 100. Scores should be submitted electronically through ETS to institution code "2927".

*Note: the personal essay, professional letters of recommendation and virtual interview are NOT required for Advanced Practice Certificate ONLY applicants.

Application Deadlines

Applications are accepted on a rolling basis for students intending to start the program in August of the same calendar year or January of the following calendar year.

For More Information

Contact the Department of Occupational Therapy at OTpitt@shrs.pitt.edu.

Doctoral

Doctor of Clinical Science (CScD) in Occupational Therapy

Program Requirements

The Doctor of Clinical Science (CScD) program in Occupational Therapy is offered 100% online on a part-time basis and requires completion of 72 credits. Students with an entry-level master's degree in occupational therapy or a baccalaureate degree in occupational therapy and an advanced level master's degree in occupational therapy or another field may be eligible to transfer up to 30 credits from their master's degree, leaving a remaining 42 credits. With a transfer of 30 credits, students will be able to complete the program in as little as 7 terms or 28 months.

This program also offers an Advanced Practice Certificate in Implementation of Evidence in Clinical Practice, which is earned upon completion of the CScD in Occupational Therapy degree or can be earned on a standalone basis.

Curriculum and Course Descriptions

The program requires the completion of 72 credits (up to 30 credits may be transferred from a master's degree, potentially leaving a remaining 42 credits in the CScD in Occupational Therapy program). Each student will be paired with a faculty mentor who will oversee the development, implementation and grading of Preliminary and Comprehensive Examinations necessary to complete the program. Required courses are held in the fall, spring and summer terms.

Preliminary Examination

The preliminary examination is a requirement for doctoral studies at the University of Pittsburgh and is intended to assess the breadth of the student's knowledge of the discipline, the student's achievement following the first year of graduate study, and the potential to apply knowledge appropriately. In the CScD in Occupational Therapy program, the preliminary examination is a writing assignment in response to a writing prompt created by a preliminary examination committee composed of occupational therapy graduate faculty. Questions may address assessment concepts, intervention/education concepts, and/or implementation of evidence. The preliminary examination is typically administered following the student's first year of study and is graded by the preliminary examination committee. Students must successfully pass the preliminary examination at least six months before they graduate.

Capstone Doctoral Committee

Each student will be supervised by a doctoral committee that will be formed before or at the successful completion of the preliminary examination. The doctoral committee will be comprised of two to three members with the chair of this committee being the student's faculty mentor and at least one of the other members being faculty appointed in the Department of Occupational Therapy. Additional members will be determined collaboratively by the student and mentor and can include external stakeholders. This committee will oversee the development, implementation and grading of the capstone project.

Comprehensive Examination

The capstone project serves as the basis of the comprehensive examination and will be developed and implemented in collaboration with the doctoral committee. The comprehensive examination includes a written paper and a presentation of the capstone project, both of which are graded by the student's doctoral committee. Students must successfully pass both the written and oral components of the comprehensive examination to complete the CScD in Occupational Therapy program. Students must be registered for at least one course credit during the semester in which they will graduate from the CScD in Occupational Therapy program.

Plan of Study

CScD in Occupational Therapy Degree Courses

All students will take the following courses:

- OT 3000 - ADVANCED ASSESSMENT
- OT 3010 - EVIDENCE INTERPRETATION FOR IMPLEMENTATION *
- OT 3020 - FOUNDATIONS IN IMPLEMENTATION *
- OT 3030 - THE BUSINESS OF IMPLEMENTATION *
- OT 3040 - ADVOCACY FOR IMPLEMENTATION *
- OT 3100 - EVIDENCE ANALYSIS AND SYNTHESIS
- OT 3200 - EVIDENCE-BASED PROTOCOLS AND PRACTICE GUIDELINES
- OT 3300 - CONCEPTUALIZING AND ASSESSING QUALITY IMPROVEMENT
- OT 3400 - THEORIES OF CHANGE
- OT 3500 - IMPLEMENTATION EVIDENCE

Following completion of the 34 credits of online courses, CScD in Occupational Therapy students will culminate their matriculation through the program with an eight-credit capstone project. With the support of a faculty mentor, students will individually design and complete a capstone project that demonstrates their advanced knowledge for implementing evidence into practice.

- OT 3600 - CAPSTONE PHASE 1
- OT 3700 - CAPSTONE PHASE 2

*Required courses for the Advanced Practice Certificate in Implementation of Evidence in Clinical Practice.

Academic Standards

In addition to following University-wide academic rules and regulations as detailed in the General Academic Regulations section of this Catalog, the CScD in Occupational Therapy program is regulated by the School of Health and Rehabilitation Sciences Academic Standards, as well as the policies and procedures in the SHRS Graduate Student Handbook and the CScD in Occupational Therapy Student Manual.

Doctor of Occupational Therapy (OTD)

Program Requirements

The OTD program is a 32 month (8 term) professional course of study requiring 99 credits, including fieldwork education, and a Doctoral Capstone that includes a capstone experience (Experiential Preceptorship) and a capstone project. Students in the OTD program must successfully complete all didactic coursework, Level II fieldwork, and pass a comprehensive examination prior to commencement of the Doctoral Capstone. Students must complete Level II fieldwork and the Doctoral Capstone within 24 months following completion of the didactic portion of the program.

Curriculum and Course Descriptions

Plan of Study*

Year 1 - Fall Term - 15 Credits

- OT 2200 - FOUNDATIONS OF OCCUPATION
- OT 2201 - BODY FUNCTIONS AND STRUCTURES: ANATOMY **
- OT 2202 - THERAPEUTIC APPROACHES 1 **
- OT 2203 - CLINICAL SEMINAR 1
- OT 2207 - PRINCIPLES OF ASSESSMENT **
- OT 2208 - CRITICAL APPRAISAL OF EVIDENCE
- OT 2234 - HUMAN PERFORMANCE ANALYSIS **

Year 1 - Spring Term - 15 Credits

- OT 2205 - NEUROBEHAVIORIAL SCIENCE **
- OT 2209 - CLINICAL SEMINAR 2
- OT 2210 - PSYCHOSOCIAL/COGNITIVE THEORY AND PRACTICE **
- OT 2213 - OCCUPATIONAL THERAPY AND THE HEALTH SYSTEM
- OT 2214 - THERAPEUTIC APPROACHES 2 **
- OT 2215 - FIELDWORK EDUCATION A (FW I)**
- OT 2235 - CLINICAL CONDITIONS 1
- OT 2236 - ACTIVITY/CONTEXT THEORY AND PRACTICE

Year 1 - Summer Term - 11 Credits

- OT 2216 - CLINICAL SEMINAR 3
- OT 2217 - NEUROREHABILITATION THEORY AND PRACTICE **
- OT 2218 - BIOMECHANICAL THEORY AND PRACTICE **
- OT 2219 - FIELDWORK EDUCATION B (FW I)**
- OT 2237 - CLINICAL CONDITIONS 2
- OT 2238 - ADAPTATION/TECHNOLOGY THEORY AND PRACTICE

Year 2 - Fall Term - 13 Credits

- OT 2220 - CLINICAL SEMINAR 4
- OT 2221 - DEVELOPMENTAL THEORY AND PRACTICE **
- OT 2222 - PRODUCTIVE AGING THEORY AND PRACTICE **

- OT 2224 - MANAGEMENT OF OCCUPATIONAL THERAPY PRACTICE
- OT 2226 - FIELDWORK EDUCATION C (FW I)**
- OT 2239 - PROJECT DEVELOPMENT 1
- OT 2244 - CLINICAL CONDITIONS 3

Year 2 - Spring Term - 13 Credits

- OT 2228 - FIELDWORK EDUCATION D (FW II)**
- OT 2229 - FIELDWORK EDUCATION E (FW II)**

Year 2 - Summer Term - 7 Credits

OT 2229 - FIELDWORK EDUCATION E (FW II)**

Year 3 - Fall Term - 12 Credits

- OT 3206 - ADVANCED THEORY AND PRACTICE **
- OT 3207 - PROJECT DEVELOPMENT 2
- OT 3210 - ADVANCED CONCEPTS IN PROFESSIONAL AND CLINICAL REASONING
- OT 3211 - ADVANCED CONCEPTS IN HEALTH POLICY AND ADVOCACY
- OT 3212 - LEADERSHIP DEVELOPMENT

Year 3 - Spring Term - 13 Credits

- OT 3208 - EXPERIENTIAL PRECEPTORSHIP **
- OT 3213 - PROFESSIONAL DEVELOPMENT SEMINAR

*Curriculum is subject to change.

**Course includes laboratory, fieldwork, or experiential component.

- Admission to the OTD program is only available on a full-time basis. Term 1 begins the end of August.
- A GPA of at least 3.00 is required in the OTD program.
- A misdemeanor or felony charge or conviction may affect a student's ability to complete courses with a clinical component (fieldwork courses and experiential preceptorship).

PLEASE NOTE: The OTD program requires students to complete fieldwork education and the Doctoral Capstone at facilities external to the University of Pittsburgh. All OTD students are responsible for securing required resources and completing required documents to participate in fieldwork education and the Doctoral Capstone including but not limited to transportation, physical examinations and associated testing (i.e., drug screen, vaccinations), health insurance, liability insurance, background clearances, CPR/AED training, first aid training, education modules, parking, housing, food, and clothing. Additionally, certification and licensure requirements include inquiries as to whether the applicant has been convicted of a misdemeanor, a felony, or a felonious or illegal act, including those associated with alcohol and/or substance abuse. Note that a felony conviction may affect a graduate's ability to sit for the certification examination or attain state licensure.

Fieldwork Education and Doctoral Capstone

Fieldwork education and the Doctoral Capstone are essential components of professional preparation for the doctoral-degree-level occupational therapy student and are integrated in the curriculum design. They are an extension of the OTD program within the clinical/community setting. Fieldwork experiences provide the OTD student with the opportunity to learn professional responsibilities through modeling by qualified and experienced personnel and to

practice these responsibilities in a supervised setting. The Doctoral Capstone provides an in-depth capstone experience and includes the completion of a capstone project. Fieldwork education and the Doctoral Capstone are only conducted in sites that have a signed agreement with the School of Health and Rehabilitation Sciences (SHRS). This agreement formally identifies the responsibilities of the University and the site.

Fieldwork education includes Level I and Level II experiences. Level I fieldwork is integrated with coursework during Term 2 (OT 2215 - Fieldwork Education A), Term 3 (OT 2219 - Fieldwork Education B), and Term 4 (OT 2226 - Fieldwork Education C). Level I fieldwork is designed to enrich didactic coursework through direct observation and participation. For Level I fieldwork A (OT 2215) and C (OT 2226), students are assigned to sites in the Greater Pittsburgh Area by the Academic Fieldwork Coordinator in collaboration with the course instructor. These Level I fieldwork experiences are supervised by qualified personnel (e.g., currently licensed or otherwise regulated occupational therapy practitioners, psychologists, physician assistants, teachers, social workers, nurses, and other health or education professionals). Level I fieldwork B (OT 2219) focuses on the development of the student's professional identity. This Level I fieldwork experience occurs internally within the Department and is supervised by faculty (course instructors).

Level II fieldwork is completed in Terms 5 and 6 (OT 2228 - Fieldwork Education D; OT 2229 - Fieldwork Education E). Level II fieldwork is distinct from Level I fieldwork. Students must successfully complete Level I fieldwork experiences prior to enrolling in Level II fieldwork. Level II fieldwork is an in-depth experience in delivering occupational therapy services to clients in traditional and/or emerging settings consistent with the OTD program's curriculum design. Each OTD student is assigned to specific Level II fieldwork sites to ensure exposure to a variety of clients across the life span and to a variety of settings. Students can complete Level II fieldwork in a minimum of one setting if it is reflective of more than one practice area, or in a maximum of four different settings. The OTD program only uses sites within the United States that allow for supervision by an occupational therapist who meets state regulations and has a minimum of one year of practice experience, following initial certification. Level II fieldwork is a minimum of the equivalent of 24 full-time work weeks. Level II fieldwork may be completed on a part-time basis provided it is at least 50% of a full-time equivalent at the site. The OTD student is assigned to a Level II fieldwork site by the Academic Fieldwork Coordinator in collaboration with faculty and students sign the Level II Fieldwork Acknowledgment Agreement. The performance of a student who does not successfully complete Level II fieldwork is critically reviewed by the Academic Fieldwork Coordinator and occupational therapy faculty. Satisfactory completion of targeted interventions by the student may be required prior to enrolling in a subsequent Level II fieldwork. The faculty reserves the right to place a student at a site in the Greater Pittsburgh Area based on the student's performance (i.e., academic, work habits).

In Term 7, after successful completion of Level II fieldwork (OT 2228; OT 2229), the OTD student engages in didactic coursework and training of advanced skills beyond the generalist level of an occupational therapist and completes a comprehensive examination. In Term 8, the final term of the OTD program, students enroll in the Doctoral Capstone (OT 3208-Experiential Preceptorship; OT 3213 Professional Development Seminar). The Doctoral Capstone is a full-time 14-week in-depth experience advancing knowledge and skills in clinical practice, research, administration, program development and evaluation, policy development, advocacy, education, and/or leadership and includes the completion and dissemination of a capstone project. The focus of the Doctoral Capstone is on the development of skills for increased autonomy as a contributor to advancing occupational therapy practice. The Doctoral Capstone is completed in a novel practice setting or a traditional setting with a novel program and has a connection with community issues or needs. Students are assigned a faculty mentor who oversees their Doctoral Capstone, including the development of individual learning objectives and plans for supervision. The Doctoral Capstone is distinct from Level I and Level II fieldwork and is the final step in the preparation of the OTD student for entry-level practice. These learning experiences (Fieldwork and Doctoral Capstone) prepare the OTD student to assume the roles of practitioner, manager, and contributor upon graduation from the OTD program. Prior fieldwork, volunteer, and/or work experience hours cannot be applied towards doctoral capstone experience hours, and a student's current work setting cannot serve as a site for their doctoral capstone experience. The Doctoral Capstone may be completed on a part-time basis.

The Doctoral Capstone is a multi-faceted experience and investigative project that students begin associated preparatory coursework for in Term 1. It is designed to encourage students to think critically, solve challenging problems, collaborate with professionals, and develop advanced skills in communication, research, teamwork, planning, leadership, self-reliance, professionalism, and advocacy - skills that will prepare them to respond positively

and confidently to the many opportunities and challenges in today's evolving and increasingly complex practice settings. Although, the learning objectives for the Doctoral Capstone address all three roles of the occupational therapist - practitioner, manager, and contributor - the focus is on the development of skills for increased autonomy as a contributor to advancing occupational therapy practice.

Level II fieldwork (OT 2228; OT 2229) and the Doctoral Capstone (OT 3208; OT 3213) must be completed within 24 months following completion of the didactic portions of the OTD program (Term 4).

OTD students are responsible for securing all required resources in preparation for and during Level I and II fieldwork and the Doctoral Capstone including but not limited to transportation, physical examinations and associated testing (i.e., drug screen, vaccinations), health insurance, liability insurance, background clearances, CPR/AED training, first aid training, education modules, parking, housing, food, and clothing.

Academic Standards

In addition to following University-wide academic rules and regulations as detailed in the General Academic Regulations section of this Catalog, the OTD program is regulated by the School of Health and Rehabilitation Sciences Academic Standards, as well as the policies and procedures in the SHRS Graduate Student Handbook and the OTD Student Manual.

Graduate Certificate

Advanced Practice Certificate in Implementation of Evidence in Clinical Practice

Certificate Requirements

The Advanced Practice Certificate in Implementation of Evidence in Clinical Practice is offered 100% online on a part-time basis and requires completion of 12 credits. Students with an entry-level doctoral degree in occupational therapy, a post-professional doctoral degree in occupational therapy, a master's degree in occupational therapy or a baccalaureate degree in occupational therapy and an advanced level master's degree in occupational therapy or another field are eligible to apply. View admission requirements here. Students who complete the Advanced Practice Certificate may choose to apply and transition into the Doctor of Clinical Science (CScD) in Occupational Therapy degree program and the 12 certificate credits will be applied toward the degree.

Curriculum and Course Descriptions

The Advanced Practice Certificate in Implementation of Evidence in Clinical Practice requires completion the following four 3-credit courses:

- OT 3010 - EVIDENCE INTERPRETATION FOR IMPLEMENTATION
- OT 3020 - FOUNDATIONS IN IMPLEMENTATION
- OT 3030 - THE BUSINESS OF IMPLEMENTATION
- OT 3040 - ADVOCACY FOR IMPLEMENTATION

Academic Standards

In addition to following University-wide academic rules and regulations as detailed in the General Academic Regulations section of this Catalog, the CScD in Occupational Therapy program is regulated by the School of Health and Rehabilitation Sciences Academic Standards, as well as the policies and procedures in the SHRS Graduate Student Handbook and the CScD in Occupational Therapy Student Manual.

Master's

Master of Science (MS) in Occupational Therapy

Program Requirements

The Master of Science (MS) in Occupational Therapy program begins in the fall term (August). The MS in Occupational Therapy program offers Clinical and Research plans of studies, which provide exposure to a wide variety of occupational therapy practice and research. The Clinical and Research plans include 30 credits/2 terms (Fall and Spring). Additionally, the MS in Occupational Therapy program also offers a Research with Scholarly Project plan of study, which provides an opportunity to complete a scholarly project under the guidance of a faculty mentor. The Research with Scholarly Project is 30 credits/3 terms (Fall, Spring, and Summer). A comprehensive examination, which is different from the scholarly project, is required prior to graduation at the end of the last term.

Curriculum and Course Descriptions

Plan of Study: Clinical (30 credits / 2 terms)

Term 1 - Fall Term - 15 Credits

- OT 2207 - PRINCIPLES OF ASSESSMENT
- OT 2221 - DEVELOPMENTAL THEORY AND PRACTICE **OR** OT 2222 - PRODUCTIVE AGING THEORY AND PRACTICE
- OT 2224 - MANAGEMENT OF OCCUPATIONAL THERAPY PRACTICE
- OT 2241 - CLINICAL PRECEPTORSHIP 1
- OT 3010 - EVIDENCE INTERPRETATION FOR IMPLEMENTATION
- OT 3206 - ADVANCED THEORY AND PRACTICE

Term 2 - Spring Term - 15 Credits

- OT 2210 - PSYCHOSOCIAL/COGNITIVE THEORY AND PRACTICE
- OT 2213 - OCCUPATIONAL THERAPY AND THE HEALTH SYSTEM
- OT 2242 - CLINICAL PRECEPTORSHIP 2
- OT 2248 - PROFESSIONAL REASONING IN OCCUPATIONAL THERAPY
- OT 2249 - SPECIAL TOPICS IN OCCUPATIONAL THERAPY: CLINICAL
- OT 3200 - EVIDENCE-BASED PROTOCOLS AND PRACTICE GUIDELINES

Plan of Study: Research (30 credits / 2 terms)

Term 1 - Fall Term - 15 Credits

- HRS 2927 - STATISTICAL METHODS FOR HEALTH SCIENCE RESEARCH 1
- OT 2221 - DEVELOPMENTAL THEORY AND PRACTICE **OR** OT 2222 - PRODUCTIVE AGING THEORY AND PRACTICE
- OT 2245 - SPECIAL TOPICS IN OCCUPATIONAL THERAPY: RESEARCH
- OT 2246 - RESEARCH PRECEPTORSHIP 1

- OT 3010 - EVIDENCE INTERPRETATION FOR IMPLEMENTATION
- OT 3206 - ADVANCED THEORY AND PRACTICE

Term 2 - Spring Term - 15 Credits

- OT 2210 - PSYCHOSOCIAL/COGNITIVE THEORY AND PRACTICE
- OT 2213 - OCCUPATIONAL THERAPY AND THE HEALTH SYSTEM
- OT 2247 - RESEARCH PRECEPTORSHIP 2
- OT 3100 - EVIDENCE ANALYSIS AND SYNTHESIS
- OT 3200 - EVIDENCE-BASED PROTOCOLS AND PRACTICE GUIDELINES

Plan of Study: Research with Scholarly Project - (30 credits / 3 terms)

Term 1 - Fall Term - 12 Credits

- HRS 2927 - STATISTICAL METHODS FOR HEALTH SCIENCE RESEARCH 1
- OT 2221 - DEVELOPMENTAL THEORY AND PRACTICE **OR** OT 2222 - PRODUCTIVE AGING THEORY AND PRACTICE **OR** OT 3206 - ADVANCED THEORY AND PRACTICE
- OT 2245 - SPECIAL TOPICS IN OCCUPATIONAL THERAPY: RESEARCH
- OT 2246 - RESEARCH PRECEPTORSHIP 1
- OT 3010 - EVIDENCE INTERPRETATION FOR IMPLEMENTATION

Term 2 - Spring Term - 15 credits

- OT 2210 - PSYCHOSOCIAL/COGNITIVE THEORY AND PRACTICE
- OT 2213 - OCCUPATIONAL THERAPY AND THE HEALTH SYSTEM
- OT 2251 - SCHOLARLY PROJECT
- OT 3100 - EVIDENCE ANALYSIS AND SYNTHESIS
- OT 3200 - EVIDENCE-BASED PROTOCOLS AND PRACTICE GUIDELINES

Term 3 - Summer Term - 3 Credits

OT 2251 - SCHOLARLY PROJECT

Preceptorship

The MS in Occupational Therapy program offers clinical and research preceptorships.

Clinical preceptorship provides structured exposure to the U.S. health care system. Students are exposed to occupational therapy practice in various health care settings (e.g., acute and inpatient rehabilitation hospitals, and outpatient clinics) under the supervision of a licensed occupational therapist.

Research preceptorships provide exposure to clinical research in the field of occupational therapy. Students are exposed to occupational therapy research in a variety of areas (e.g., pediatrics, neurology, geriatrics, health systems).

Students find the preceptorships to be rewarding experiences that advance their clinical or research skills and career development.

Academic Standards

In addition to following University-wide academic rules and regulations as detailed in the General Academic Regulations section of this Catalog, the MS in Occupational Therapy program is regulated by the School of Health and

Rehabilitation Sciences Academic Standards, as well as the policies and procedures in the SHRS Graduate Student Handbook and the MS in Occupational Therapy Student Manual.

Department of Physical Therapy

The Department of Physical Therapy offers three academic programs of study:

- Doctor of Physical Therapy (DPT) Program
- Joint DPT/PhD program leading to a DPT degree and a PhD in Bioengineering
- M.S. in Neuromuscular Physical Therapy

Doctoral

Physical Therapy, DPT - Hybrid Program

Doctor of Physical Therapy (DPT) Degree (Hybrid Option)

The Doctor of Physical Therapy (DPT) program is the entry-level educational program which prepares students for a career as a physical therapist in the United States. Upon successful completion of the curriculum, graduates of the program are eligible for the licensure examination (NPTE), which is required to practice as a practicing physical therapist. The goal of the DPT curriculum is to prepare students to become self-directed, self accountable physical therapists who can function in a cost-effective manner in all settings, and with persons of all ages. Graduates of the program will be prepared to enhance human movement and function through the use of evidence-based practice principles. Graduates of the Doctor of Physical Therapy program will have a foundation on which to base further knowledge and skills in specialty areas and to contribute to development of the art and science of physical therapy. Students should note that the requirements for professional licensure could vary drastically by state as well as by country. Because such requirements can change frequently and often without notice, it is strongly encouraged, and is the responsibility of the student, to ensure the degree they earn will meet the requirements for licensure in the state or country in which they seek licensure.

Fax: 412-648-5970
E-mail: ptinfo@shrs.pitt.edu
<https://www.shrs.pitt.edu/dpt>

Application Process

Admission to the Doctor of Physical Therapy program is only available on a full-time basis. The DPT program begins each year with the start of the Fall Term. All applicants must apply to the program through the PT Centralized Application Service (PTCAS). This information is located on the Department website. Within the PTCAS application, applicants will be required to select the specific program (Residential / Hybrid / Either) for which they wish to be considered for admission.

Admissions Requirements

Admission requirements and procedures listed below are for the DPT Residential and Hybrid program formats. Applicants, Residential and Hybrid, will select the University of Pittsburgh Doctor of Physical Therapy program in the PTCAS application portal. In the portal, applicants will be asked to select the specific program format (Residential or Hybrid) to which they wish to apply.

Applicants who are interested in the dual degree Doctor of Physical Therapy/PhD in Bioengineering program must apply directly to that program in the PTCAS application portal. NOTE: There is a specific designation for the Pitt DPT/PhD dual degree program and at this time, the dual degree DPT/PhD program is only available to students participating in the DPT Residential option.

- A bachelor's degree from an accredited institution
Undergraduate degrees MUST be conferred and final transcripts received two months (July) prior to the start of the program
- Minimum GPA of 3.0 (based on a 4.0 scale)
- Minimum of three letters of recommendation
- One letter **MUST** be from academic reference - a professor/instructor from a course(s) for which the applicant was enrolled. The academic course must either be a pre-requisite for the DPT program OR a course associated with student's major area of study. The letter should include insights regarding the applicant's potential for successful navigation through a graduate-level professional degree program and provide specific examples of observed characteristics that support such insights.
- The additional two letters of recommendation may be completed by any of the following: physical therapist, professor/instructor, academic advisor, minister, employer/supervisor, life coach/mentor, research faculty, internship supervisor/faculty, or athletic coach. While it is preferred that the letters of recommendation be completed by individuals from a variety of settings, it is permissible to submit 2 letters from a similar source (i.e. two different physical therapists, or two different employers/supervisors, two different professors, etc...).
- Demonstrated evidence of adequate exposure to the field of physical therapy and an appreciation of the breadth, depth, and scope of practice. This can be accomplished through either volunteer or paid work experience in a physical therapy setting; 40 hours of exposure required. It is preferable for applicants to show evidence of the willingness to work with a variety of patients in different physical therapy settings; we prefer to see the 40 hours completed in at least 2 different clinical settings.
- A 'C' grade or higher in all prerequisite coursework
- Complete PTCAS Application
- Application Fee
- PTCAS Personal Statement
- University of Pittsburgh Essay Question (Included in PTCAS Application)
- Official transcripts from every U.S. college and university attended
- **GRE not required**
- Please note that many clinical sites will require a Child Abuse clearance (Act 33), Criminal Background check (Act 34), and a drug screen prior to participation in a clinical education experience. **If you do not** have a clean background check for either Act 33/34 clearance, or a clean drug screen you may not be able to participate in Clinical Education and therefore will not be able to meet the DPT requirements for graduation.

If applicable:

- Enter all international (non-United States/foreign) institutions you have attended on your PTCAS application. Order a WES ICAP Course-by-Course evaluation from World Education Services (WES) through the PTCAS application.
- Verification of English Language Proficiency is required unless the following apply:
 - the applicant is a citizen of a country whose official language is English
 - the applicant has completed a degree program at a regionally accredited institution in the U.S., or
 - the applicant is not a citizen of a country whose official language is English but has completed a degree program at an institution outside of the U.S. where the language of instruction is English and where the official national language of the country in which the institution is located is English.
- If required, provide Test of English as a Foreign Language (TOEFL) scores in your PTCAS application, and request an official TOEFL scores report be sent to TOEFL code "5312" by the application deadline.

The Department faculty have outlined the Technical Standards deemed essential for successful completion of the DPT curriculum. Students admitted to the DPT program must review the Technical Standards and submit a signed form indicating that they meet the Technical Standards at the time of matriculation into the program.

Additionally, in order to become licensed, many states will inquire as to whether the applicant has been convicted of a misdemeanor, a felony, or a felonious or illegal act and if you have a criminal record you **may** not be able to become licensed to practice as a physical therapist after graduation. Should you have concerns regarding your eligibility, we recommend you contact your state licensing board for further clarification.

Prerequisite Coursework (minimum credit hours listed is based on a semester system equivalent)

- Chemistry I and II sequence with labs, 8 credit hours.
- Physics I and II sequence with labs, 8 credit hours.
- Biology I and II sequence with labs, 8 credit hours.
- Anatomy (human, vertebrate, comparative or anatomical kinesiology), 3 credit hours.
- Physiology (human physiology preferred), 3 credit hours.

*A two course sequence of anatomy/physiology may meet the anatomy and physiology requirements as long as there is a total of 6 credit hours.

**Science courses must be for science majors or pre-med majors. Introductory or remedial courses are not accepted as prerequisites.

- Two courses in Psychology that should include a general psychology course and a specialized psychology course such as developmental psychology, abnormal psychology, psychology of disability, sports psychology - 6 credit hours.
- Statistics, 3 credit hours.
- English Writing (English composition or an upper-division writing course), 3 credit hours.

While not required, faculty have found taking an undergraduate course in Exercise Physiology benefits students during their first term in the DPT program. At the time of application no more than 4 courses can be outstanding or in progress. Any offer of admission will be contingent upon the successful completion of any remaining prerequisites by July 1 prior to the start of the DPT Program. Academic performance on outstanding coursework should not deviate from the performance reflected in the application materials. While not required, it is preferable that courses be completed within the past 5 years.

Academic Standards

In addition to the University-wide academic rules and regulations as detailed in the *General Academic Regulations* section of this catalog, the DPT program is regulated by the *SHRS Academic Standards*.

Statute of Limitations

All requirements of the DPT must be completed within three years. Extension of the statute of limitations may be granted if there are extenuating circumstances. Such requests, listing reasons for the extension and the amount of additional time needed, must be approved by the department chair.

Comprehensive Examinations

Students in the DPT program are required to pass a written comprehensive examination before the Doctor of Physical Therapy degree can be awarded. The written comprehensive examination is a cumulative examination covering the core clinical sciences and focusing on physical therapy practice.

Community Engagement & IPE Requirement

Prior to graduation, students in the DPT Program are required to engage in at least 3 Community Engagement activities, 3 Interprofessional Education experiences, and 2 "self-selected" activities in either of these categories - totaling 8 unique activities across the 7-term program. More information about this requirement can be found in the Student Handbook.

Degree Requirements

The Doctor of Physical Therapy program is a 2.3 year (7 semester*) professional course of study including clinical internships.

**From an Academic Proposal approved in May 2021, the terms were reduced from 8 to 7. This change is effective beginning Fall 2021.*

DPT Curriculum

Our rigorous curriculum is built around 4 key areas: basic science, clinical science, leadership & professional development, and critical inquiry. The DPT plan of study integrates the basic sciences and clinical practice, emphasizes evidence based practice and includes a comprehensive array of course offerings in musculoskeletal, neuromuscular, integumentary, cardiopulmonary, geriatric, and pediatric physical therapy, as well as course content related to leadership & professional development.

We want to make sure our graduates are well prepared to enter the workforce so we complement our didactic education program with a clinical program that includes 42 weeks of full-time clinical internships. The curriculum is designed to emphasize early and intensive integration of our students into the clinical environment throughout their educational program. Our students begin their clinical affiliations during the 2nd semester in the program and conclude with two 15-week terminal clinical education experiences.

- PT 2229 - KINESIOLOGY
- PT 2030 - ANATOMY
- PT 2201 - CARDIOPULMONARY PHYSICAL THERAPY 1
- PT 2241 - PATIENT MANAGEMENT 1
- PT 2060 - NEUROSCIENCE
- PT 2231 - MUSCULOSKELETAL PT 1
- PT 2202 - CARDIOPULMONARY PHYSICAL THERAPY 2
- PT 2040 - SURVEY OF HUMAN DISEASE 1
- PT 2281 - PROFESSIONAL DEVELOPMENT & LEADERSHIP 1
- PT 2141 - CLINICAL EDUCATION 1
- PT 2291 - EVIDENCE BASED PRACTICE 1
- PT 2232 - MUSCULOSKELETAL PT 2
 - *PT 2232 Musculoskeletal PT 2
(Incorrect course title listed.)
- PT 2261 - NEUROMUSCULAR PT 1

- PT 2255 - GROWTH & DEVELOPMENT
- PT 2283 - PROFESSIONAL DEVELOPMENT & LEADERSHIP 3
- PT 2292 - EVIDENCE BASED PRACTICE 2
- PT 2142 - CLINICAL EDUCATION 2
- PT 2102 - PHARMACOLOGY
- PT 2059 - GERIATRICS
- PT 2079 - MANAGEMENT OF THE MEDICALLY COMPLEX PATIENT
- PT 2293 - EVIDENCE BASED PRACTICE 3
- PT 2028 - HEALTH AND WELLNESS
- PT 2233 - MUSCULOSKELETAL PT 3
 - *PT 2223 Musculoskeletal PT 3
(Outdated code listed.)
- PT 2263 - NEUROMUSCULAR PT 3
- PT 2294 - EVIDENCE BASED PRACTICE 4
- PT 2143 - CLINICAL EDUCATION 3
- PT 2144 - CLINICAL EDUCATION 4

Physical Therapy, DPT - Residential Program

Doctor of Physical Therapy (DPT) Degree

The Doctor of Physical Therapy (DPT) program is the entry-level educational program which prepares students for a career as a physical therapist in the United States. Upon successful completion of the curriculum, graduates of the program are eligible for the licensure examination (NPTE), which is required to practice as a practicing physical therapist. The goal of the DPT curriculum is to prepare students to become self-directed, self accountable physical therapists who can function in a cost-effective manner in all settings, and with persons of all ages. Graduates of the program will be prepared to enhance human movement and function through the use of evidence-based practice principles. Graduates of the Doctor of Physical Therapy program will have a foundation on which to base further knowledge and skills in specialty areas and to contribute to development of the art and science of physical therapy. Students should note that the requirements for professional licensure could vary drastically by state as well as by country. Because such requirements can change frequently and often without notice, it is strongly encouraged, and is the responsibility of the student, to ensure the degree they earn will meet the requirements for licensure in the state or country in which they seek licensure.

<https://www.shrs.pitt.edu/dpt>

Application Process

Admission to the Doctor of Physical Therapy program is only available on a full-time basis. The DPT program begins each year with the start of the Fall Term. All applicants must apply to the program through the PT Centralized Application Service (PTCAS). This information is located on the Department website. Within the PTCAS application, applicants will be required to select the specific program (Residential / Hybrid / Either) for which they wish to be considered for admission.

Admissions Requirements

Admission requirements and procedures listed below are for the DPT Residential and Hybrid program formats. Applicants, Residential and Hybrid, will select the University of Pittsburgh Doctor of Physical Therapy program in the PTCAS application portal. In the portal, applicants will be asked to select the specific program format (Residential or Hybrid) to which they wish to apply.

Applicants who are interested in the dual degree Doctor of Physical Therapy/PhD in Bioengineering program must apply directly to that program in the PTCAS application portal. NOTE: There is a specific designation for the Pitt DPT/PhD dual degree program and at this time, the dual degree DPT/PhD program is only available to students participating in the DPT Residential option.

- A bachelor's degree from an accredited institution
Undergraduate degrees MUST be conferred and final transcripts received two months (July) prior to the start of the program
- Minimum GPA of 3.0 (based on a 4.0 scale)
- Minimum of three letters of recommendation
- One letter **MUST** be from academic reference - a professor/instructor from a course(s) for which the applicant was enrolled. The academic course must either be a pre-requisite for the DPT program OR a course associated with student's major area of study. The letter should include insights regarding the applicant's potential for successful navigation through a graduate-level professional degree program and provide specific examples of observed characteristics that support such insights.
- The additional two letters of recommendation may be completed by any of the following: physical therapist, professor/instructor, academic advisor, minister, employer/supervisor, life coach/mentor, research faculty, internship supervisor/faculty, or athletic coach. While it is preferred that the letters of recommendation be completed by individuals from a variety of settings, it is permissible to submit 2 letters from a similar source (i.e. two different physical therapists, or two different employers/supervisors, two different professors, etc...).
- Demonstrated evidence of adequate exposure to the field of physical therapy and an appreciation of the breadth, depth, and scope of practice. This can be accomplished through either volunteer or paid work experience in a physical therapy setting; 40 hours of exposure required. It is preferable for applicants to show evidence of the willingness to work with a variety of patients in different physical therapy settings; we prefer to see the 40 hours completed in at least 2 different clinical settings.
- A 'C' grade or higher in all prerequisite coursework
- Complete PTCAS Application
- Application Fee
- PTCAS Personal Statement
- University of Pittsburgh Essay Question (Included in PTCAS Application)
- Official transcripts from every U.S. college and university attended
- **GRE not required**
- Please note that many clinical sites will require a Child Abuse clearance (Act 33), Criminal Background check (Act 34), and a drug screen prior to participation in a clinical education experience. **If you do not** have a clean background check for either Act 33/34 clearance, or a clean drug screen you may not be able to participate in Clinical Education and therefore will not be able to meet the DPT requirements for graduation.

If applicable:

- Enter all international (non-United States/foreign) institutions you have attended on your PTCAS application. Order a WES ICAP Course-by-Course evaluation from World Education Services (WES) through the PTCAS application.
- Verification of English Language Proficiency is required unless the following apply:
 - the applicant is a citizen of a country whose official language is English
 - the applicant has completed a degree program at a regionally accredited institution in the U.S., or
 - the applicant is not a citizen of a country whose official language is English but has completed a degree program at an institution outside of the U.S. where the language of instruction is English and where the official national language of the country in which the institution is located is English.
- If required, provide Test of English as a Foreign Language (TOEFL) scores in your PTCAS application, and request an official TOEFL scores report be sent to TOEFL code "5312" by the application deadline.

The Department faculty have outlined the Technical Standards deemed essential for successful completion of the DPT curriculum. Students admitted to the DPT program must review the Technical Standards and submit a signed form indicating that they meet the Technical Standards at the time of matriculation into the program.

Additionally, in order to become licensed, many states will inquire as to whether the applicant has been convicted of a misdemeanor, a felony, or a felonious or illegal act and if you have a criminal record you **may** not be able to become licensed to practice as a physical therapist after graduation. Should you have concerns regarding your eligibility, we recommend you contact your state licensing board for further clarification.

Prerequisite Coursework (minimum credit hours listed is based on a semester system equivalent)

- Chemistry I and II sequence with labs, 8 credit hours.
- Physics I and II sequence with labs, 8 credit hours.
- Biology I and II sequence with labs, 8 credit hours.
- Anatomy (human, vertebrate, comparative or anatomical kinesiology), 3 credit hours.
- Physiology (human physiology preferred), 3 credit hours.

*A two course sequence of anatomy/physiology may meet the anatomy and physiology requirements as long as there is a total of 6 credit hours.

**Science courses must be for science majors or pre-med majors. Introductory or remedial courses are not accepted as prerequisites.

- Two courses in Psychology that should include a general psychology course and a specialized psychology course such as developmental psychology, abnormal psychology, psychology of disability, sports psychology - 6 credit hours.
- Statistics, 3 credit hours.
- English Writing (English composition or an upper-division writing course), 3 credit hours.

While not required, faculty have found taking an undergraduate course in Exercise Physiology benefits students during their first term in the DPT program. At the time of application no more than 4 courses can be outstanding or in progress. Any offer of admission will be contingent upon the successful completion of any remaining prerequisites by July 1 prior to the start of the DPT Program. Academic performance on outstanding coursework should not deviate from the performance reflected in the application materials. While not required, it is preferable that courses be completed within the past 5 years.

Academic Standards

In addition to the University-wide academic rules and regulations as detailed in the *General Academic Regulations* section of this catalog, the DPT program is regulated by the *SHRS Academic Standards*.

Statute of Limitations

All requirements of the DPT must be completed within three years. Extension of the statute of limitations may be granted if there are extenuating circumstances. Such requests, listing reasons for the extension and the amount of additional time needed, must be approved by the department chair.

Comprehensive Examinations

Students in the DPT program are required to pass a written comprehensive examination before the Doctor of Physical Therapy degree can be awarded. The written comprehensive examination is a cumulative examination covering the core clinical sciences and focusing on physical therapy practice.

Community Engagement & IPE Requirement

Prior to graduation, students in the DPT Program are required to engage in at least 3 Community Engagement activities, 3 Interprofessional Education experiences, and 2 "self-selected" activities in either of these categories - totaling 8 unique activities across the 7-term program. More information about this requirement can be found in the Student Handbook.

Degree Requirements

The Doctor of Physical Therapy program is a 2.3 year (7 semester*) professional course of study including clinical internships.

**From an Academic Proposal approved in May 2021, the terms were reduced from 8 to 7. This change is effective beginning Fall 2021.*

DPT Curriculum

Our rigorous curriculum is built around 4 key areas: basic science, clinical science, leadership & professional development, and critical inquiry. The DPT plan of study integrates the basic sciences and clinical practice, emphasizes evidence based practice and includes a comprehensive array of course offerings in musculoskeletal, neuromuscular, integumentary, cardiopulmonary, geriatric, and pediatric physical therapy, as well as course content related to leadership & professional development.

We want to make sure our graduates are well prepared to enter the workforce so we complement our didactic education program with a clinical program that includes 42 weeks of full-time clinical internships. The curriculum is designed to emphasize early and intensive integration of our students into the clinical environment throughout their educational program. Our students begin their clinical affiliations during the 2nd semester in the program and conclude with two consecutive 15-week termal clinical education experiences.

Joint Degree

Physical Therapy/Bioengineering, DPT/PhD

Program Overview

The Doctor of Physical Therapy (DPT) - PhD in Bioengineering program combines the entry-level DPT leading to licensure as a physical therapist, with a PhD in Bioengineering that will prepare the student to become an independent researcher. The program will integrate clinical and research experiences, with students receiving mentorship from faculty in the departments of Physical Therapy and Bioengineering. Students should have a Bachelor's degree or higher in engineering or engineering-related discipline, with a strong interest in physical therapy.

Contact Information

Patrick Sparto, PhD, PT
Co-Director, DPT-PhD Program
Department of Physical Therapy
Bridgeside Point 1, Suite 210
Pittsburgh, PA 15219-3130
Phone: 412-383-6732
E-mail: psparto@pitt.edu

Application Process

Applications will need to be submitted through the PT Centralized Application Service (PTCAS) by December 1 for admission to the program the following August. The application is reviewed by faculty in both departments.

Admission Requirements

Students will need to meet the admission requirements of both programs. Applicants must have a minimum of a Bachelor's degree in a field of engineering or closely related (e.g. physics, or applied mathematics, kinesiology). Applicants must demonstrate evidence of exposure to the field of Physical Therapy (PT) through volunteer or work experience. Applicants must submit 3 letters of reference: one physical therapist with whom the student has volunteered or worked for, one academic advisor, and one research supervisor. A minimum GPA of 3.0 is required but competitive applicants typically have a 3.5 GPA or greater. Reporting of GRE scores is optional; typically, admitted students have GRE scores greater than the 50th percentile.

Prerequisite Coursework (minimum credit hours listed is based on a semester system equivalent)

- Chemistry I and II sequence with labs - 8 credit hours
 - Physics I and II sequence with labs - 8 credit hours
 - Biology I and II sequence with labs - 8 credit hours
 - *Anatomy (human, vertebrate, comparative or anatomical kinesiology) - 3 credit hours
 - *Physiology (human physiology preferred) - 3 credit hours
 - Exercise Physiology - 3 credit hours
 - Two courses in Psychology: should include a general psychology course and a specialized psychology course such as: developmental psychology, abnormal psychology, psychology of disability, sports psychology - 6 credit hours
 - Statistics - 3 credit hours
 - English Writing (English composition or an upper-division writing course) - 3 credit hours
 - **Engineering Statics - 3 credit hours
 - **Advanced Mathematics (e.g. calculus) - 3 credit hours
- *A two-course sequence of anatomy/physiology may meet the anatomy and physiology requirements as long as there is a total of 6 credit hours.

**Enrollment in PhD part of the program can be deferred until courses are completed.

Academic Standards

In addition to the University-wide academic rules and regulations as detailed in the *General Academic Regulations* section of this bulletin, the DPT program is regulated by the *SHRS Academic Standards*.

Curriculum Overview

Students will follow the typical plan of study for DPT residential students for the initial seven terms (i.e., 2.3 years) of the program. Then students will follow the plan of study for PhD students in Bioengineering. Clinical internships and research experiences will be performed throughout the program. At a minimum, the program will take 6 years to complete. After completing the didactic and clinical requirements of the DPT program, the student will be allowed to take the licensing exam. Students are required to write and orally defend a dissertation to complete their PhD degree.

DPT Curriculum

Our rigorous curriculum is built around 4 key areas: basic science, clinical science, leadership & professional development, and critical inquiry. The DPT plan of study integrates the basic sciences and clinical practice, emphasizes evidence based practice and includes a comprehensive array of course offerings in musculoskeletal, neuromuscular, integumentary, cardiopulmonary, geriatric, and pediatric physical therapy, as well as course content related to leadership & professional development.

We want to make sure our graduates are well prepared to enter the workforce so we complement our didactic education program with a clinical program that includes 42 weeks of full-time clinical internships. The curriculum is designed to emphasize early and intensive integration of our students into the clinical environment throughout their educational program. Our students begin their clinical affiliations during the 2nd semester in the program and conclude with two consecutive 15-week termal clinical education experiences.

PhD Requirements

The Department of Bioengineering follows university guidelines on students working toward joint degrees like the DPT-PhD in Bioengineering. Typically, we have waived the life science requirement (6 credits) as comparable coursework is covered in the physical therapy curriculum. The remaining course requirements closely follow requirements for the PhD in Bioengineering.

- Bioengineering Track Courses - 9 credits*
- Life Sciences (successfully completing the lecture and lab components of Human Anatomy coursework fulfills this requirement) - 6 credits
- Graduate Electives (successfully completing Musculoskeletal I & II fulfills this requirement) - 6 credits*
- Graduate Engineering Mathematics - 3 credits
- Statistics for Bioengineers - 3 credits
- Societal, Political, and Ethical Issues in Bioengineering (or equivalent bioethics course) - 3 credits
- Seminar - 6 credits total, 4 credits must be BIOENG 2023 - BIOENGINEERING SEMINAR SERIES. One of the four seminars can be substituted with a Preparation for STEM academic career course, when combined with appropriate certification. The other 2 credits may be from BIOENG 2023 or any other seminars deemed appropriate by the Graduate Program Director. Please see list of Approved Seminar Courses for suggestions.
- BIOENG 2900 - GRADUATE FELLOWSHIPS AND PROPOSAL-WRITING WORKSHOP (grant writing) - 1 credit
- Doctoral Dissertation Research, BIOENG 3997 and BIOENG 3999 - 12 credits of 3999 to be taken after the proposal - 35 credits

*The standard policy for PhD students is 9 credits of track courses and 6 credits of electives. There is an exception for the Bioimaging and Signals track, for which the requirement is 12 credits of track courses and 3 credits of electives. DPT-PhD students in this track must take all four track courses, in which case only 3 elective credits are waived.

Total number of credit hours: 72 credits minimum, which includes 6 credits to fulfill life science requirement but does not include credits from foundational courses if applicable.

DPT/PhD students are also required to complete two teaching practicums before presenting their PhD proposal (comprehensive examination). No more than one practicum can be undertaken in a semester. There is no course registration for this educational experience, and fulfillment is monitored by the department.

Students typically take the PhD preliminary exam in the next summer term after they have completed 2 full terms in the program but may be taken after only one term if approved by the Department. The PhD proposal (comprehensive examination) is presented generally at the end of the second year. A final public PhD defense is made by each PhD candidate based on the student's research work.

Please see the Department of Bioengineering's PhD Requirements page for more details.

Master's

Neuromuscular Physical Therapy, MS

This program is designed for the practicing physical therapy professional who has already earned an entry-level degree in physical therapy. This post-professional graduate plan of study enables physical therapists to improve their clinical knowledge and clinical skills through a specific program of advanced physical therapy practice and scholarship. The Master of Science in Neuromuscular Physical Therapy is designed to provide advanced clinical skills in physical therapy.

Fall Term

- PTMS 2001 - ADVANCED NEUROSCIENCE
- PTMS 2002 - MOTOR LEARNING AND CONTROL OF MOVEMENT/HEALTH PROMOTION
- PTMS 2003 - ADVANCED CLINICAL PRACTICE: THE LOWER QUARTER
- PTMS 2004 - PRINCIPLES OF EVIDENCE-BASED PHYSICAL THERAPY PRACTICE

Spring Term

- PTMS 2006 - FALLS AND BALANCE DYSFUNCTION: PHYSICAL THERAPY MANAGEMENT AND INTERVENTION
- PTMS 2007 - ANALYSIS OF NEUROMUSCULAR SIGNS AND SYMPTOMS IN CLINICAL DECISION MAKING
- PTMS 2009 - ADVANCED MUSCULOSKELETAL CLINICAL PRACTICE: THE UPPER QUARTER
- PTMS 2010 - PHYSICAL THERAPY SPECIAL TOPICS SEMINAR (optional)

Summer Term

- PTMS 2012 - SEMINAR IN NEUROLOGIC PHYSICAL THERAPY
- PTMS 2013 - EVIDENCE BASED MEDICAL AND PHYSICAL THERAPY INTERVENTIONS FOR PERSONS WITH NEUROMUSCULAR DISEASE
- PTMS 2014 - CASE STUDIES OF PERSONS WITH NEUROMUSCULAR DISORDERS
- PTMS 2015 - CLINICAL ROUNDS AND CASE PRESENTATION
- PTMS 2008 - CONCEPTS AND PRINCIPLES RELATED TO SENSORY MOTOR CONTROL 1

Total Credits: 33-35

Department of Physician Assistant Studies

Award-winning and internationally recognized faculty and staff prepare you to become a highly qualified physician assistant ready to serve as a future leader in the delivery of health care, patient education and professional service. Pitt's Department of Physician Assistant Studies is deeply committed to graduating a workforce of diverse and inclusive certified PAs to serve our communities here in our city, across the nation and around the world.

By instilling a lifelong desire for continued learning and scholarly productivity, our alumni contribute to advances and advocacy in the profession long after graduation. Together, our faculty, staff, students and alumni help shape PA professional research that informs the science, delivery and administration of health care reaching patients everywhere.

Contact Information

Aileen Brasacchio, MEd
Physician Assistant Studies
School of Health and Rehabilitation Sciences
3420 Forbes Avenue, Second Floor

Webpage: <https://www.shrs.pitt.edu/pas>

Doctoral

Doctor of Medical Science

The Doctor of Medical Science Program meets the following requirements for professional doctoral degrees as stipulated in the *Regulations Governing Graduate Study at the University of Pittsburgh* through:

- Matriculation through a coherent program designed to assure the mastery of a substantial and complex body of knowledge that will serve as preparation for leadership and excellence in the practice of the profession
- A research component to achieve the goal of research competence including a report demonstrating mastery of the subject matter and a high level of communication skills,
- Minimum admission requirements that will align with all graduate programs at the University of Pittsburgh,
- Completion of a defined set of prerequisites so that all students will enter with required basic knowledge, and
- Maintenance of a 3.00 GPA to remain in good standing and be graduated.

Additionally, all potential matriculants should have already completed a clinical component of their education. This component would have been guided by clear goals and objectives as part of their degree as is required by appropriate PA accrediting bodies. These clinical education components would be accepted as transfer credits for matriculants in the DPAS program.

Program Duration

Due to the rigorous and uniform nature of PA studies programs that are accredited by the Accreditation Review Commission on Education for the Physician Assistant, Inc., all potential matriculants will possess the same level of required knowledge as accredited PA studies programs, for admission into this doctoral program. Nationally, the mean credits required for completion of the entry-level PA degree is 112.7. For this reason, the DPAS program will accept the application of 30 credits from University of Pittsburgh PA program alumni to the DPAS degree and the transfer of 30 credits from other matriculants who have graduated from a PA training program accredited by an appropriate accrediting body to the DPAS degree.

Program Characteristics, Type of Instruction, & Level of Instruction

The Doctor of PA Studies Program graduate-level coursework will consist of online courses and will culminate in a Scholarly Practice Capstone Project. The core curricular concepts will be presented primarily asynchronously, similar to an in-class lecture, but using interactive online educational activities to promote knowledge acquisition. This knowledge will be reinforced with synchronous, instructor-led, online activities to facilitate application and synthesis of the knowledge acquired through the asynchronous online activities. Additionally, each matriculant will work closely with an assigned faculty advisor who will help guide their studies and mentor them in their Scholarly Practice Capstone Project. This individualized and learner-centered approach will allow matriculants to engage in scholarly activity that will have a direct and positive impact in their daily work.

Assessments

Assessments will be competency- based and scaffolded to support completion of the Scholarly Practice Capstone. Such assessments will include:

- Reflective writing assignments,
- Scholarly writing assignments,
- Written evidence of literature review,
- Interested party assessments,
- Oral presentations, and
- Written defense of the Scholarly Practice Capstone.

Plan of Studies

Courses will be offered in consecutive semesters in the Spring, Fall, and Summer Terms. It is recommended that students proceed sequentially, as a cohort, through the program. This program is intended to be a post-professional degree program for full-time practicing PAs. The advantage of this design is to allow learners to remain in their clinical practice full-time, while earning their degree part-time, so that they can apply their classroom learning to their clinical practice in a meaningful and impactful way. The curriculum is designed to help students be informed by, and to inform, their current practice as they learn. This design allows for a balanced curriculum that helps working professionals stay on track. Individualized plans of study will be considered for students who experience extenuating circumstances that require individualized or personalized plans to meet their academic goals. Per the *Regulations Governing Graduate Study at the University of Pittsburgh*, this professional doctoral degree program, the statute of limitations for students for completion of all DPAS degree requirements will be set at 8 years and will not be extended beyond the expectation for a Doctor of Philosophy student. Courses and their sequencing are presented in Table 1.

Table 1. DPAS Program Plan of Studies

COURSE NUMBER	TITLE OF COURSE	CREDIT HOURS
PAS 3001	Core Concepts of Scholarly Practice	4
PAS 3002	Examining Supporting Evidence	4
PAS 3003	Internship Experience 1	6

PAS 3004	Personalized Elective (Academic, Administrative, or Digital Health)	4
PAS 3005	Scholarly Practice Capstone Phase 1	4
PAS 3006	Internship Experience 2	6
PAS 3007	Scholarly Practice Capstone Phase 2	8
PAS 3008	Internship Experience 3	6
	DPAS credits	42
	Graduate transfer credits	30
	Total credits for DPAS degree	72

Requirements

- PAS 3001 - CORE CONCEPTS OF SCHOLARLY PRACTICE
- PAS 3002 - EXAMINING SUPPORTING EVIDENCE
- PAS 3003 - DEVELOPING THE PA LEADER: INTERNSHIP EXPERIENCE 1
- PAS 3004 - PERSONALIZED ELECTIVE
- PAS 3005 - SCHOLARLY PRACTICE CAPSTONE PHASE 1
- PAS 3006 - DEVELOPING THE PA LEADER: INTERNSHIP EXPERIENCE 2
- PAS 3007 - SCHOLARLY PRACTICE CAPSTONE PHASE 2
- PAS 3008 - DEVELOPING THE PA LEADER: INTERNSHIP EXPERIENCE 3

Master's

Physician Assistant Studies Residential Program, MS

Program Requirements

Qualified applicants must hold a bachelor's degree from an accredited institution. They should have an Overall GPA of 3.0 (based on 4.0) in all college level coursework and a minimum GPA of 3.0 (based on 4.0) in the prerequisite science courses designated below with an asterisk (*). See the Centralized Application Service for Physician Assistants (CASPA) site for definitions of these GPAs. Exceptions may be made (but are not guaranteed) for candidates who present compelling evidence of success in graduate coursework. This means that if an applicant has an overall GPA of < 3.0, their application may still be reviewed/considered by our team if they have completed an entire masters or doctorate level program. Completion of graduate level courses without a diploma from said programs will not be considered, nor will graduate-level certificate programs. All admissions requirements must be completed by October 1, 2024 to start classes in the Spring 2025 term of the PA Studies Residential program.

Our admissions process operates on a rolling basis. Initially, all 60 seats are available when CASPA opens in April. Applications are reviewed in the order they're received, undergoing a 'verification' step by WebAdmit/CASPA, which can take several weeks. Please note, our faculty cannot begin reviewing applications until verification is complete. Following verification and faculty scoring, applicants may receive interview offers as early as July (specific

dates below). Program seats may be offered to interviewees two weeks after interviews. Applying later in the cycle means fewer program seats might be available.

For transparency, we'll regularly update this page with our current status to include:

1. Actively reviewing applications and conducting interviews to fill program seats.
2. Interview seats are full, but interviews are ongoing (applying at this stage means joining a pre-interview waitlist).
3. Program seats are full (applying now means joining a pre-interview waitlist).

While applications are welcome until the cycle closes on October 1, 2024, keep in mind that later applications might have reduced chances due to verification and seat availability.

Individuals from Health Professions Shortage Areas, Underrepresented Minorities in Medicine, and other minoritized communities are encouraged to apply. We welcome applicants of all abilities/disabilities, religions, marital statuses, familial statuses, sexes, ages, sexual orientations, veteran statuses, national origins, all ethnic and racial backgrounds, genetic information, and gender identities and expressions.

Advanced placement, defined as a waiver of required coursework included in the PA curriculum for applicants to the program and/or a waiver of required coursework included in the PA curriculum for currently enrolled students in the program which results in the student advancing in the curriculum without completing required curricular components at the University of Pittsburgh, is not an option in this program.

PA Studies Residential program applicants need to have completed the following prerequisites:

- Biology with lab designed for science majors, two semesters*
- Chemistry with lab designed for science majors, two semesters*
- Microbiology with lab, one semester*
- Anatomy with lab and Physiology* (This requirement may be met by taking either one semester of Anatomy with lab and one semester of Physiology or two semesters of Anatomy with lab & Physiology combined.)
- Statistics, one semester
- Medical Terminology, one semester for at least 1 college credit
- English Composition/writing, two semesters
- Psychology, one semester

There is no expiration date for prerequisite courses. For questions about whether your specific courses satisfy our prerequisite requirements, please review this detailed prerequisite rubric. If you still have questions after reviewing the prerequisite rubric, please contact pittpa@shrs.pitt.edu for additional information. Please note that the GRE General Test is not required for admission to the program.

Requirements

To apply to the Physician Assistant Studies Residential program, you must complete and submit the following:

- Online Application: Upload all application materials through CASPA. View application timelines below.
- Patient Care Experience: A minimum of 500 hours of direct, "hands-on," patient care experience is required by the admissions requirement deadline. Eligible experiences include work as an RN, EMT, paramedic, medical assistant, physical therapy or occupational therapy assistant.

- **Technical Standards Verification:** Students admitted to the program must review the Technical Standards for admission and graduation, and submit a signed form at the time of matriculation verifying satisfactory performance of the essential skills.
- **Personal Statements:** Students must provide two personal statements in the Centralized Application Service for Physician Assistants (CASPA). Your first essay should be a personal statement focusing on why you want to become a PA. The second essay should reflect the mission of the PA Studies Residential program and commitment to Diversity, Equity and Inclusion.
- **Letters of Recommendation:** Submit three letters of recommendation including one (1) from a former college/university instructor, one (1) from a supervisor of the required patient care experience and one (1) character reference describing your commitment to leadership and service.
- Additional information for International Applicants.

Admissions Decision Process

The application and admissions processes for the PA Studies Residential program does not favor specific groups or individuals based on their personal or social identities.

Student admissions decisions are made in accordance with these practices:

- **Screening of Applications:** Upon receipt of a verified application from the CASPA service, the Admissions Committee (which includes the Program Director and all full-time faculty), along with program staff, award points for certain applicant criteria and characteristics, and the total points are used to decide who is invited to interview for a seat in the program. These criteria and characteristics include:
 - Health care experience and level of experience - Higher scores are awarded for longer service and at higher levels of patient care
 - Diploma and degree - While a bachelor's degree is required, a graduate degree is scored higher
 - Grade Point Averages (GPAs) - Higher undergraduate and specific prerequisite science GPAs receive higher scores
 - Scoring of personal statements - Higher scores are awarded based on the strength of evidence of desire to be a PA, understanding of the role of a PA, demonstration of understanding of the program mission, evidence of how one's background, qualifications, and/or identities match and/or support the mission, language and writing skills, and editorial care
 - Letters of Reference - Scores are compiled from the quality of the letter and score provided by the recommender in CASPA
 - Interview: Interviews for seats in our program are performed and scored by the program director, faculty, current students, and practicing PAs. They include the following parts and scoring:
 - Individual interview - Higher scores are awarded based on the strength of demonstration of the following qualities: adaptability/stress management, conflict resolution, and technical and professional knowledge/ability to learn
 - Group interview - Higher scores are awarded based on the strength of demonstration of the following qualities: active listening, conflict management, probing the group to maximize performance, leadership skills, clarification of group responses, encouraging and harmonizing with fellow group members, articulation, drawing others into the conversation, offering ideas, and summarizing
 - Total Scoring and Final Review by Admissions Committee: After completion of the above, the committee reviews candidate scores, reviewer comments, and application information to decide who is accepted, waitlisted, and denied admission.

Additional Information

- Admitted students must complete a background check.
- Acceptance into and successful completion of the University of Pittsburgh Physician Assistant Studies program does not imply or guarantee National Commission on Certification of Physician Assistants (NCCPA) Certification or that the student will be able to obtain state licensure upon graduation.

APPLY NOW

Questions?

If you have questions, reach out to pittpa@shrs.pitt.edu at any time.

Plan of Study

The Physician Assistant curriculum is comprised of a rigorous 24 month Master of Science Program. The goals and objectives of our program are guided by the criteria set forth in the Standards and Guidelines for an Accredited Educational Program for the Physician Assistant as established by ARC-PA. The first three semesters (12 months) are made up of primarily classroom instruction. Course content is presented through traditional lecture, integrated instruction, case based and hands on skills labs. The clinical year is comprised of rotations in inpatient medicine, primary care, emergency medicine, general surgery, OB/GYN, pediatrics, and behavioral health. The curriculum is presented by practicing physician assistants, medical and surgical physicians, and other health care providers who have expertise in their respective specialties.

Each course in the program is offered only once during the academic year, therefore, any departure from completing a course in its planned sequence (e.g. failure to receive a passing grade of 'C' or better; leave of absence from program) will result in the delay of completion of program requirements and graduation from the program.

Didactic Year 1:

Semester 1:

Course Credits

- PAS 2101 - INTRODUCTION TO THE PHYSICIAN ASSISTANT PROFESSION
- PAS 2102 - HUMAN ANATOMY
- PAS 2105 - HEALTH POLICY
- PAS 2106 - INTERPRETING AND EVALUATING THE MEDICAL LITERATURE
- PAS 2108 - INTRODUCTION TO CLINICAL MEDICINE WITH LAB
- PAS 2109 - MEDICAL PHYSIOLOGY AND PATHOPHYSIOLOGY

Semester Total Credits: 15

Semester 2:

Course Credits

- PAS 2104 - GENETIC AND MOLECULAR MECHANISMS OF HEALTH AND DISEASE
- PAS 2107 - PATIENT EDUCATION AND COUNSELING
- PAS 2201 - HISTORY TAKING AND PHYSICAL EXAMINATION 1
- PAS 2202 - CLINICAL MEDICINE 1
- PAS 2203 - DIAGNOSTIC & THERAPEUTIC PROCEDURES IN MEDICINE 1
- PAS 2204 - PHARMACOLOGY 1

Semester Total Credits: 15

Semester 3:

Course Credits

- PAS 2301 - HISTORY TAKING AND PHYSICAL EXAMINATION 2
- PAS 2302 - CLINICAL MEDICINE 2
- PAS 2303 - DIAGNOSTIC AND THERAPEUTIC PROCEDURES IN MEDICINE 2
- PAS 2304 - PHARMACOLOGY 2
- PAS 2305 - HEALTH ISSUES ACROSS THE LIFESPAN
- PAS 2306 - FUNDAMENTALS OF SURGERY

Semester Total Credits: 15

Year 1 Total Credits: 45

Clinical Year 2:

Semester 4:

Course Credits

- PAS 2701 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 1
- PAS 2702 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 2
- PAS 2703 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 3

Semester Total Credits: 12

Semester 5:

Course Credits

- PAS 2704 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 4
- PAS 2705 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 5
- PAS 2706 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 6

Semester Total Credits: 12

Semester 6:

Course Credits

- PAS 2707 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 7
- PAS 2713 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 8
- PAS 2714 - TRANSITION TO PROFESSIONAL PRACTICE

Semester Total Credits: 13

Year 2 Total Credits: 37

Program Credits Total: 82

Certification

Graduates of the professional program are eligible to sit for the Physician Assistant National Certification Exam (PANCE) administered by the National Commission on Certification of the Physician Assistant (NCCPA). All States and the District of Columbia have legislation governing the qualifications or practice of physician assistants. All jurisdictions require physician assistants to pass the Physician Assistant National Certifying Examination. Only those successfully completing the examination may use the credential "Physician Assistant-Certified." To remain certified, PAs must complete 100 hours of continuing medical education every 2 years. Every 10 years, they must pass a recertification examination.

Physician Assistant Studies, MS - Hybrid Program

Program Requirements

PAS-Hybrid applicants need to have completed the following prerequisites:

- Biology with lab designed for science majors, two semesters*
 - Microbiology with lab, one semester*
 - Chemistry with lab designed for science majors, two semesters*
 - Anatomy with lab and Physiology* (This requirement may be met by taking either one semester of Anatomy with lab and one semester of Physiology or two semesters of Anatomy with lab & Physiology combined.)
 - Statistics, one semester
 - Medical Terminology, one semester for at least 1 college credit
 - English Composition/writing, two semesters
 - Psychology, one semester
- *Both prerequisite science courses and cumulative GPA of 3.0 or higher is required

There is no expiration date for prerequisite courses.

Other Admission Criteria

Successful completion of an undergraduate degree (BS or BA) at an accredited institution

- **Online Application:** Upload all application materials through Centralized Application Service for Physician Assistants (CASPA).
- **Patient Care Experience:** A minimum of 500 hours of direct, "hands-on," patient care experience is required by the application deadline. Examples of eligible experiences may include work as an RN, EMT, paramedic, medical assistant, physical therapy or occupational therapy assistant.
- **Personal Statements:** Students must provide two personal statements in CASPA. Your first essay should be a personal statement focusing on why you want to become a PA. The second essay should reflect the mission of the PA Studies Hybrid program and commitment to Diversity, Equity and Inclusion.
- **Letters of Recommendation:** Submit three letters of recommendation including one (1) character reference, one (1) from a supervisor of the required patient care experience and one (1) instructor.

All coursework, requirements, and degree must be completed by August 31st of the application year in order to be considered for a seat in the class that will begin the following January.

Virtual Interview Process

Interviews for seats in our program are performed and scored by the program director, faculty, and practicing PAs. They include the following parts and scoring:

- **Essay:** Higher scores are awarded based on apparent appreciation for the state of the PA profession, passion for pursuing PA school to positively impact the profession, language and writing skills, and editorial care
- **Individual interview:** Higher scores are awarded based on the strength of demonstration of the following qualities: adaptability/stress management, conflict resolution, and technical and professional knowledge/ability to learn
- **Group interview:** Higher scores are awarded based on the strength of demonstration of the following qualities: active listening, conflict management, probing the group to maximize performance, leadership skills, clarification of group responses, encouraging and harmonizing with fellow group members, articulation, drawing others into the conversation, offering ideas, and summarizing

Program and Admission Notes

- The program is two full years (six consecutive semesters) and classes start each January (spring semester)
- Applications will be considered only until the class is filled
- Students are highly encouraged to apply early
- The program does not offer advanced standing
- All courses within the curriculum are required
- No credit is granted for pre-admission experiential learning
- Only full-time students are admitted
- All applicants need to identify as U.S. citizens, have documentation of permanent residency or have dual citizenship status

Accreditation

The ARC-PA has granted **Accreditation-Provisional** status to the **University of Pittsburgh Physician Assistant Studies Hybrid Program** sponsored by **University of Pittsburgh**.

Accreditation-Provisional is an accreditation status granted when the plans and resource allocation, if fully implemented as planned, of a proposed program that has not yet enrolled students appear to demonstrate the program's ability to meet the ARC-PA Standards or when a program holding Accreditation-Provisional status appears to demonstrate continued progress in complying with the Standards as it prepares for the graduation of the first class (cohort) of students.

Accreditation-Provisional does not ensure any subsequent accreditation status. It is limited to no more than five years from matriculation of the first class.

The program's accreditation history can be viewed on the ARC-PA website at <http://www.arc-pa.org/accreditation-history-university-of-pittsburgh-hybrid/>.

Plan of Study

The University of Pittsburgh PA Studies Hybrid Program is a 24-month program that awards a Master of Science degree upon successful completion. The goals and objectives of the program are guided by the criteria set forth in the Standards and Guidelines for an Accredited Educational Program for the Physician Assistant as established by ARC-PA.

The first three semesters (12 months) are made up of didactic instruction. This didactic component will consist of asynchronous and synchronous online didactic courses. The didactic content will be presented using interactive online educational activities to promote knowledge acquisition. Synchronous, instructor-led, online activities will facilitate application and synthesis of the knowledge acquired through the asynchronous online activities. The onsite intense immersion laboratory experiences will be utilized to master the development of clinical skills necessary for examination, evaluation, diagnosis, prognosis, intervention, and assessment of outcome. The curriculum is presented by practicing physician assistants, medical and surgical physicians, and other health care providers who have expertise in their respective specialties. All didactic component courses are sequential and must be successfully completed in order to progress to the next term of the curriculum.

The last three semesters (12 months) are made up of a clinical component and will consist of Supervised Clinical Practice Experiences (SCPE) in Internal Medicine, Family Medicine, Emergency Medicine, Pediatrics, Surgery, Behavioral Health, Obstetrical and Gynecological Medicine, and an Elective. There is also a Transition to Professional Practice course at the end of the clinical curriculum.

Since each course in the program is offered only once during each academic year, any departure from completing a course in its planned sequence (e.g. failure to receive a passing grade of 'C' or better, leave of absence from the program) will result in a delay by retaking the course the following year, as well as delays in completing the program and graduating with the Master of Science degree.

Didactic Year 1:

Semester 1:

Course Credits

- PAS 2401 - INTRODUCTION TO THE PA PROFESSION
- PAS 2402 - HUMAN ANATOMY AND LAB
- PAS 2403 - HEALTH POLICY
- PAS 2404 - INTERPRETING AND EVALUATING THE MEDICAL LITERATURE
- PAS 2405 - INTRODUCTION TO CLINICAL MEDICINE
- PAS 2406 - MEDICAL PHYSIOLOGY AND PATHOPHYSIOLOGY

Semester Total Credits: 15

Semester 2:

Course Credits

- PAS 2407 - GENETIC AND MOLECULAR MECHANISMS OF HEALTH AND DISEASE
- PAS 2408 - PATIENT EDUCATION AND COUNSELING
- PAS 2409 - HISTORY TAKING AND PHYSICAL EXAMINATION 1 AND LAB
- PAS 2410 - CLINICAL MEDICINE 1 AND LAB
- PAS 2411 - DIAGNOSTIC & THERAPEUTIC PROCEDURES IN MEDICINE 1 AND LAB
- PAS 2412 - PHARMACOLOGY 1

Semester Total Credits: 15

Semester 3:

Course Credits

- PAS 2413 - HISTORY TAKING AND PHYSICAL EXAMINATION 2 AND LAB
- PAS 2414 - CLINICAL MEDICINE 2 AND LAB
- PAS 2415 - DIAGNOSTIC AND THERAPEUTIC PROCEDURES IN MEDICINE 2 AND LAB
- PAS 2416 - PHARMACOLOGY 2
- PAS 2417 - HEALTH ISSUES ACROSS THE LIFESPAN
- PAS 2418 - FUNDAMENTALS OF SURGERY

Semester Total Credits: 15

Year 1 Total Credits: 45

Clinical Year 2:

Semester 4:

Course Credits

- PAS 2421 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 1
- PAS 2422 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 2
- PAS 2423 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 3

Semester Total Credits: 12

Semester 5:

Course Credits

- PAS 2424 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 4
- PAS 2425 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 5
- PAS 2426 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 6

Semester Total Credits: 12

Semester 6:

Course Credits

- PAS 2427 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 7
- PAS 2428 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 8
- PAS 2429 - TRANSITION TO PROFESSIONAL PRACTICE

Semester Total Credits: 13

Year 2 Total Credits: 37

Program Credits Total: 82

Certification

Graduates of the professional program are eligible to sit for the Physician Assistant National Certification Exam (PANCE) administered by the National Commission on Certification of the Physician Assistant (NCCPA). All States and the District of Columbia have legislation governing the qualifications or practice of physician assistants. All jurisdictions require physician assistants to pass the Physician Assistant National Certifying Examination. Only those successfully completing the examination may use the credential "Physician Assistant-Certified." To remain certified, PAs must complete 100 hours of continuing medical education every 2 years. Every 10 years, they must pass a recertification examination.

Department of Rehabilitation Science and Technology

Master of Rehabilitation Technology

Program Overview

In the online Master's in Rehabilitation Technology, you'll learn to assess the applications of assistive devices, participate in hands-on clinical training through in-person workshops and internships and work directly with end-users in this rehabilitation master's centered around technology. Thanks to specialized course credits in clinical rehab, you'll reduce the number of work hours required to obtain Rehabilitation Engineering and Assistive Technology Society of North America's (RESNA) Assistive Technology Professional (ATP) credential.

Contact Information

RST Admin
University of Pittsburgh
6425 Penn Avenue, Suite 401
Pittsburgh, PA 15206
412-383-1150
E-mail: rstinfo@shrs.pitt.edu
<http://www.shrs.pitt.edu/RST/>

Accreditation Status

The Master of Rehabilitation Technology Program has been granted accreditation by Commission on Accreditation for Allied Health Education Programs (CAAHEP) as recommended by the Committee on Accreditation for Rehabilitation Engineering and Assistive Technology Education (CoA RATE).

Application Requirements

All applicants must:

- Complete the GradCAS application;
- Submit the application fee of \$50 (U.S.).
- Submit an essay -- a description of educational and long-term professional goals;
- Submit two letters of reference, preferably from individuals who have instructed you in academic settings. These letters should address the applicant's academic, professional, and personal attributes and potential for meaningful graduate study;
- Submit official transcripts from all colleges and universities you have attended;
- Additional requirements for international applicants

Note: Application can be submitted when course requirements are in progress.

Please note this program requires that you complete clinical internships at facilities external to the University, and such facilities will or may require a criminal background check, an Act 33/34 clearance, and perhaps a drug screen to determine whether you are qualified to participate in the clinical internships.

Tuition and Fees

Tuition and Fee rates for the MRT program can be found at the following website:

- <http://ir.pitt.edu/graduate-tuition/>

Master of Science in Prosthetics and Orthotics

Program Overview

Clinical orthotics and prosthetics includes the evaluation, design, fabrication and custom fitting of orthoses (orthopedic braces) and prostheses (artificial limbs). Artificial limbs, or prostheses, are used to replace missing limbs or portions of limbs, and to improve function of the upper or lower extremities. Orthopedic braces, or orthoses, are used to stabilize or unload joints, improve motion and reduce stresses on tissue, substitute for muscle weakness or paralysis, and assist in normal growth, development and function. Orthoses can be applied to the head, neck, trunk, or limbs. Orthotists and Prosthetists work in a variety of settings, including private practice, hospitals, rehabilitation facilities, nursing homes, and home health settings. Orthotists and Prosthetists are currently in high demand, and the demand is expected to increase in the future.

Orthotists and Prosthetists are part of the health care team, and as such, work with physicians, therapists, and other health care professionals to provide the orthotic and prosthetic services to users. Orthotists and prosthetists are responsible for:

- Performing comprehensive assessment of the orthotic/prosthetic users needs,
- Creating a comprehensive orthotic/prosthetic treatment plan to meet the needs and goals of the user,
- Performing the necessary procedures to deliver the appropriate orthotic/prosthetic services, which may include fabrication of the orthosis/prosthesis,
- Providing continuing patient care and periodic evaluation to assure/maintain/ document optimal fit and function of the orthosis/prosthesis,
- Participating in personal and professional development through continuing education, training, research and organizational affiliations, and
- Developing, implementing and/or monitoring policies and procedures regarding human, business, and organizational management.

The MSPO Program is five consecutive terms in length, including one summer term, and requires a total of 65 credits. It is designed to meet all standards for accreditation by the National Commission on Orthotic and Prosthetic Education (NCOPE) and for preparing students to complete residencies and take the American Board for Certification in Orthotics and Prosthetics examinations.

During the last term of the program, students complete a clinical internship, typically where they gain exposure to a real- world clinical settings. Most students will relocate out of the Pittsburgh area during this term. The MSPO program currently has agreements with clinical sites across the country and we can work with the student to establish new sites for internship for this final term if necessary.

RST Admin
University of Pittsburgh
6425 Penn Avenue, Suite 401
Pittsburgh, PA 15206
412-383-1150
E-mail: rstinfo@shrs.pitt.edu
<http://www.shrs.pitt.edu/po/>

Accreditation Status

The Master of Science Program in Prosthetics and Orthotics has been granted accreditation by the National Commission on Orthotic and Prosthetic Education (NCOPE). Our graduates are eligible for NCOPE residencies, and, upon successful completion of an NCOPE residency, they are eligible to take the certification examinations of the American Board for Certification in Orthotics, Prosthetics & Pedorthics (ABC).

Admission Requirements and Application Process

Admissions Application Deadline

Prerequisite courses

- Baccalaureate Degree. No specific major is mandated; however, the degree should include a well-rounded general education with a distribution of courses in the sciences, mathematics, psychology, social sciences, and humanities.
- Prerequisite coursework includes foundation courses in the following areas:

Physics with lab	4 credits
Biology with lab	4 credits
Chemistry with lab	4 credits
General Psychology	3 credits
Mathematics (algebra or higher)	3 credits
Human Anatomy	3 credits
Human Physiology	3 credits
Statistics	3 credits

- Recommended minimum overall grade point is a 3.0 grade-point average in all college-level courses and a 3.0 average in prerequisite courses. Applicants with less than a 3.0 but with other outstanding qualifications will be considered.

- Applicants applying to the Prosthetics and Orthotics (MS) program will apply online using the Orthotics & Prosthetics Centralized Application Service, known as OPCAS, <https://portal.opcas.org/> submit one copy of their official transcript, letters of recommendation, and other required information directly to OPCAS.

To be assured inclusion in the review process, applications should be completed by the date posted on the MSPO website (<http://www.shrs.pitt.edu/po.>) Application information which must be submitted includes:

- Completed application form
- Official transcriptions of all college-level courses
- Letters of recommendation (three)
- At least one from a college instructor
- At least two from a health care professional (preferably a certified orthotist or prosthetist)
- Essay describing background leading to your choice of this profession and your long-term goals.
- Record of work, shadowing, or volunteer experience related to the profession of orthotics and prosthetics. 250 hour minimum of shadowing time.
- Additional requirements for international applicants

Please note that the University of Pittsburgh's program requires that you complete clinical internships at facilities external to the University, and such facilities will or may require a criminal background check, blood titers, an Act 33/34 clearance, and a drug screen to determine whether you are qualified to participate in the clinical internships. Prior to the start of the program, the student will utilize Exxat to submit the requirements and have them maintained on file during their time at the University. To become licensed, many states will inquire as to whether the applicant has been convicted of a misdemeanor, a felony, or a felonious or illegal act associated with alcohol and/or substance abuse.

Admissions process, application deadline and prerequisites requirements are available on the Prosthetics and Orthotics webpage.

The School of Health and Rehabilitation Sciences does not require a supplemental application. It is the responsibility of the applicant to complete all admission requirements prior to enrollment.

Tuition and Fees

Tuition and Fee rates for the MSPO program can be found at the following websites:

<https://www.tuition.pitt.edu/graduate/tuition/school-health-and-rehabilitation-sciences>

In addition to University Fees, some of the MSPO courses have lab fees associated with them. Current Fees are available on the Prosthetics and Orthotics webpage.

Master's

Prosthetics & Orthotics, MS

Program Requirements/Minimum Credits

Students enrolled in the MSPO Program are required to complete 65 credits to meet degree requirements. The curriculum meets all requirements for students to participate in NCOPE residencies and take the American Board of Certification in Prosthetics, Orthotics, and Pedorthics certification examinations. Specific courses include:

Fall term, year one

- PO 2101 - FUNCTIONAL ANATOMY AND KINESIOLOGY

- PO 2102 - PATHOLOGY IN ORTHOTICS AND PROSTHETICS
- PO 2103 - INTRODUCTION TO MATERIALS, EQUIPMENT, AND FABRICATION
- PO 2104 - REHABILITATION BIOMECHANICS FOR THE HEALTH CARE PROFESSIONS
- PO 2105 - PROFESSIONAL ISSUES IN PROSTHETICS AND ORTHOTICS
- PO 2106 - PATIENT MANAGEMENT IN ORTHOTICS AND PROSTHETICS
- RT 2105 - INTRODUCTION TO EVIDENCE-BASED PRACTICE & RESEARCH METHODOLOGIES

Spring term, year one

- PO 2201 - ORTHOTICS 1
- PO 2202 - PROSTHETICS 1
- PO 2203 - CAPSTONE FOR PROSTHETICS AND ORTHOTICS
- PO 2204 - INTRODUCTION TO EVIDENCE - BASED PRACTICE IN ORTHOTICS AND PROSTHETICS
- RT 2208 - ETHICAL ISSUES IN HEALTHCARE

Summer term, year one

- PO 2301 - ORTHOTICS 2
- PO 2302 - PROSTHETICS 2
- PO 2303 - SPINAL ORTHOTICS

Fall term, year two

- PO 2401 - ORTHOTICS 3
- PO 2402 - PROSTHETICS 3
- PO 2403 - ISSUES IN THE HEALTH SYSTEM
- RT 2101 - FUNDAMENTALS OF REHABILITATION & ASSISTIVE TECHNOLOGY APPLICATIONS
- RT 2103 - INDIVIDUAL & SOCIAL EXPERIENCE OF DISABILITY

Spring term, year two

- PO 2501 - MASTER OF PROSTHETICS AND ORTHOTICS CLINICAL INTERNSHIP
- PO 2502 - SCHOLARLY PAPER
- PO 2503 - PRACTICE MANAGEMENT IN PROSTHETICS AND ORTHOTICS

Program Total = 65 credits

*Each course is offered only once during the academic year, therefore, any departure from completing a course in its planned sequence (for example: failure for any reason, to satisfactorily complete a required course; an unresolved "G" or "Incomplete" grade) will result in a one-year delay in completing the course, the remaining program requirements, and the year of graduation.

Comprehensive Exam

A comprehensive examination will be given, covering all aspects of the Program. All students are required to pass this examination prior to graduation.

Thesis/Non-thesis Options

All MSPO students are required to complete at least a Capstone Project, under the direction of a faculty advisor and an additional faculty reader. However, as a substitute for the Capstone Project, the student may elect to complete a master's thesis, under the direction of a faculty advisor and thesis committee. Students electing to pursue the thesis option will complete 3 credits of Graduate Research Proposal (PO 2924) in place of the 1 credit Capstone (PO 2203) and 2 credits Scholarly Paper (PO 2502). They will also complete 3 credits of Graduate Research (PO 2925). This will change the total amount of completed credits from 65 to 68.

Rehabilitation Technology, MRT

The 35-credit Master of Rehabilitation Technology program can be completed in 1 year (3 semesters), or 2 years. Some students opt for a longer part-time timeframe.

Fall Courses

- RT 2101 - FUNDAMENTALS OF REHABILITATION & ASSISTIVE TECHNOLOGY APPLICATIONS
- RT 2102 - FUNDAMENTALS OF REHABILITATION & ASSISTIVE TECHNOLOGY DESIGN
- RT 2103 - INDIVIDUAL & SOCIAL EXPERIENCE OF DISABILITY
- RT 2104 - FUNCTIONAL & MEDICAL ASPECTS OF DISABILITY RELATED TO ASSISTIVE TECHNOLOGY
- RT 2105 - INTRODUCTION TO EVIDENCE-BASED PRACTICE & RESEARCH METHODOLOGIES

Spring Courses

- RT 2206 - REHABILITATION & ASSISTIVE TECHNOLOGY PRACTICES
- RT 2207 - CLIENT CENTERED REHABILITATION & ASSISTIVE TECHNOLOGY DESIGN
- RT 2208 - ETHICAL ISSUES IN HEALTHCARE
- RT 2209 - CLINICAL APPLICATIONS OF SEATING AND MOBILITY
- RT 2210 - ASSISTIVE TECHNOLOGY FUNDING, POLICY, & MANAGEMENT

Fall, Spring, Summer Courses*

*Most students choose to complete during the Summer term

- RT 2311 - CLINICAL INTERNSHIP
- RT 2312 - SCHOLARLY PAPER

Elective Options

Students completing the 1-year, 35-credit program are not required to take electives in order to graduate. However, students pursuing the 2 year option may be recommended to take elective courses. Below are some recommended options. If there is another course you wish to take, please seek approval from your advisor prior to registration.

- RT 2415 - SOFT TISSUE BIOMECHANICS
- RT 2416 - WHEELCHAIR BIOMECHANICS
- RT 2999 - INDEPENDENT STUDY
- RT 2922 - TEACHING INTERNSHIP

- PO 2104 - REHABILITATION BIOMECHANICS FOR THE HEALTH CARE PROFESSIONS
- LAW 5339 - LAW OF DISABILITY DISCRIMINATION
- HI 2210 - HEALTH INFORMATION AND THE HEALTH CARE SYSTEM
- HI 2451 - DATABASE DESIGN AND BIG DATA ANALYTICS
- HI 2452 - DIGITAL HEALTH

Department of Sports Medicine and Nutrition

In Pitt's Department of Sports Medicine and Nutrition (SMN), there's a vision for the future. It's a place where scientists, using contemporary, state-of-the-art practices have the potential to extend the careers of elite athletes and weekend warriors, where human performance optimization translates to injury prevention and military operational success, where exercise and diet help to prevent and manage disease and nutrition information impacts the well-being of the community and informs public policy.

It's a place where innovative and multidisciplinary research makes an immediate connection to real-world practices. Proof lies in the Department's growing number of regional, national and international partners as well as the quantity and quality of funding from prestigious organizations such as the National Institutes of Health, U.S. Department of Defense, NASA and others.

Through the use of technology and collaborative science, the Department of Sports Medicine and Nutrition is improving the quality of life and resiliency of people from all walks of life and abilities today, and championing health and wellness for life.

The department aims to meet these objectives by:

- developing cognitive skills, psychomotor mastery and affective values in students through the delivery of a proven formula of sound classroom education, combined with invaluable clinical education experiences, for the promotion of competent entry-level clinicians and enhancing the health and well-being of individuals and diverse populations
- becoming thoughtful leaders by advancing the state of the science through evidenced-based practice, rigorous curricula, interdisciplinary collaboration and innovative technology
- mitigating injury and disease and optimize human performance by conducting innovative, multidisciplinary basic and applied research and contributing to the scientific community in order to enhance clinical decisions and education

Accelerated

Athletic Training, Accelerated BS-MS

The athletic training degree program earned initial accreditation in 1997 and continuing accreditation in 2004, 2012, and 2024 through the Commission on Accreditation of Athletic Training Education (CAATE). Prior to this, the curriculum had been National Athletic Trainers' Association approved since 1978. The athletic training curriculum is defined by the current Board of Certification, Inc. Role Delineation Study/Practice Analysis, which consists of five performance domains to include: (1) Risk Reduction, Wellness, and Health Literacy; (2) Assessment, Evaluation, and Diagnosis; (3) Critical Incident Management; (4) Therapeutic Intervention; (5) Healthcare Administration and Professional Responsibility. The curriculum is structured to provide both academic and clinical instruction. The academic curriculum includes such courses as anatomy, kinesiology, human and exercise physiology, injury evaluation, medical and pharmacological principles, administrative aspects, among others. The course work provides a foundation for hands-on clinical experiences provided in the clinical education setting. The students' clinical requirements include direct patient care with athletes and physically active patients and evaluation of skills by preceptors who supervise each student's clinical experience. Students rotate through four on-campus athletic training facilities and several off-site affiliated settings during the clinical education component acquiring valuable skills under the direct supervision of certified athletic training staff, team physicians and other allied health professionals. Upon successful completion of the

program, students are eligible to sit for the BOC, Inc. certification examination. Successful completion of this exam affords the candidate a variety of employment opportunities including athletic training positions at the high school, college, or university level; sports medicine and rehabilitation clinics; professional athletic teams; performing arts; the military; industrial settings; and more. Additionally, many students pursue graduate education opportunities in a number of sports medicine-related professions.

Admission Requirements

SHRS's General Education Requirements are included in our upper-level program prerequisites and curriculum requirements; therefore, changes will be reflected in prerequisites and curriculum requirements.

Prerequisite Courses

Basic Athletic Training, ATHLTR 1811	<i>Transfer credit not accepted</i>
Basic Athletic Training Lab, ATHLTR 1812	<i>Transfer credit not accepted</i>
Seminar in Composition*	1 course
Writing Intensive	1 course (<i>ENGCOMP 0400 recommended</i>)
Oral Communication	1 course (COMMRC 0520 preferred; COMMRC 0500, <i>COMMRC 0510, COMMRC 0530 acceptable</i>)
College Algebra	1 course (MATH 0031 or higher math required. <i>Exemption accepted</i>)
Statistics	1 course (STAT 0200 or STAT 1000 required)
Foundations of Biology 1	BIOSC 0150
Foundations of Biology 1 Lab	BIOSC 0050, BIOSC 0057 or BIOSC 0058
General Chemistry 1 and Lab	CHEM 0110
Introduction to Physics	PHYS 0110
Introduction to Psychology	PSY 0010

Developmental Psychology (PSY 0310) or other upper level Psychology	3 credits
Cross-Cultural Awareness*, Global Issues* or Specific Geographic Region*	1 course
Diversity*	1 course
Social Sciences*	1 course

* See the Dietrich School of Arts and Sciences General Education Course Catalog.

Additional Requirements

- Required credits for admission: 60 (Applications may be submitted while prerequisite coursework is in progress).
- Grades of C- or better (C for transfer) in all prerequisite coursework with the exception of ATHLTR 1811 and ATHLTR1812, where a grade of B or better must be earned.
- EMT certification is required either through a course for credit or another qualified course leading to NR-EMT credential.
- Minimum cumulative GPA of 2.8 (based on 4.0).
- Submit admissions application including technical standards for admission document.
- Personal interview with athletic training faculty (as needed).

The Athletic Training Program at the University of Pittsburgh is a rigorous and intense program that places specific requirements and demands on the students enrolled in the program. An objective of this program is to prepare graduates to enter a variety of employment settings and to render care to a wide spectrum of individuals engaged in physical activity. The technical standards set forth by the Athletic Training Program establish the essential qualities considered necessary for students admitted to this program to achieve the knowledge, skills, and competencies of an entry-level athletic trainer, as well as meet the expectations of the program's accrediting agency (Commission on Accreditation of Athletic Training Education [CAATE]).

The following abilities and expectations must be met by all students admitted to the Athletic Training Program. Candidates for selection to the Athletic Training Program must demonstrate:

- The mental capacity to assimilate, analyze, synthesize, integrate concepts and problem solve to formulate assessment and therapeutic judgments and to be able to distinguish deviations from the norm.
- Sufficient postural and neuromuscular control, sensory function, and coordination to perform appropriate physical examinations using accepted techniques; and accurately, safely, and efficiently use equipment and materials during the assessment and treatment of patients.
- The ability to communicate effectively and sensitively with patients and colleagues, including individuals from different cultural and social backgrounds; this includes, but is not limited to, the ability to establish rapport with patients and communicate judgments and treatment information effectively. Students must be able to understand and speak the English language at a level consistent with competent professional practice.
- The ability to record the physical examination results and a treatment plan clearly and accurately.
- The capacity to maintain composure and continue to function well during periods of high stress.
- The perseverance, diligence, and commitment to complete the athletic training program as outlined and sequenced.
- Flexibility and the ability to adjust to changing situations and uncertainty in clinical situations.
- Affective skills and appropriate demeanor and rapport that relate to professional education and quality patient care.

Application Procedures

Application Deadline: March 1

Transfer Student Information

Transfer students must apply to the University of Pittsburgh by completing the Office of Admission and Financial Aid's Transfer Application and selecting Athletic Training as their intended field of study. International transfer students [click here](#). Transfer students must also provide application materials directly to SHRS.

All admission criteria applies to transfer students in the same way as students enrolled at the Pittsburgh campus. Students with prior athletic training experience seeking to transfer to the University of Pittsburgh for admission to the Athletic Training Program must complete the same prerequisite requirements as all other candidates including the Basic Athletic Training (ATHLTR 1811) and Basic Athletic Training Lab (ATHLTR 1812) courses and all observation hours. If admitted to the program, all students must complete University of Pittsburgh core athletic training courses. In some instances, credit may be given for other coursework taken at another institution and will be evaluated on an individual case basis. International transferstudents [click here](#).

Curriculum

Coursework for the professional BS-MS in Athletic Training program is divided into two phases: Pre-Professional Phase and the Professional Phase. Students applying for the Accelerated BS-MS in Athletic Training program will complete prerequisite coursework during the first two years of their undergraduate degree. At the conclusion of their sophomore year, students will apply to the Accelerated BS-MS in Athletic Training program. Upon successful application and acceptance into the program, students will complete one year (two semesters) of pre-professional curriculum. During their last two years, students will complete the professional (graduate) curriculum.

Pre-professional Phase

During the pre-professional phase students complete prerequisite and general education courses along with specific Athletic Training-related prerequisites.

First Semester (Fall)

- REHSCI 1200 - HUMAN ANATOMY
- REHSCI 1201 - HUMAN ANATOMY LAB
- REHSCI 1205 - HUMAN PHYSIOLOGY
- REHSCI 1235 - MEDICAL TERMINOLOGY
- NUTR 1006 - INTRO TO HUMAN NUTRITION
- ATHLTR 1813 - INTRODUCTION TO CLINICAL ATHLETIC TRAINING 1
- ATHLTR 1815 - FOUNDATIONS IN EVALUATION AND TREATMENT
- ATHLTR 1816 - MEDICAL ETHICS

16 Credits

Second Semester (Spring)

- REHSCI 1000 - PRINCIPLES OF RESEARCH METHODOLOGY
- REHSCI 1220 - KINESIOLOGY AND BIOMECHANICS
- REHSCI 1221 - KINESIOLOGY AND BIOMECHANICS LAB
- REHSCI 1265 - PHARMACOLOGY IN REHABILITATION
- REHSCI 1215 - EXERCISE PHYSIOLOGY
- REHSCI 1216 - EXERCISE PHYSIOLOGY LAB
- ATHLTR 1814 - INTRODUCTION TO CLINICAL ATHLETIC TRAINING 2
- ATHLTR 1833 - STRENGTH AND CONDITIONING

15 Credits

Professional Phase

The following courses are to be completed in four semesters and are graduate-level curriculum.

First Semester (Fall)

- ATHLTR 2801 - CLINICAL PRACTICUM 1
- ATHLTR 2805 - INJURY/EVAL 1 - LOWER EXTREMITY
- ATHLTR 2807 - THERAPEUTIC INTERVENTIONS 1
- ATHLTR 2809 - FUNCTIONAL HUMAN ANATOMY
- ATHLTR 2810 - EVIDENCE BASED PRACTICE IN ATHLETIC TRAINING

15 Credits

Second Semester (Spring)

- ATHLTR 2802 - CLINICAL PRACTICUM 2
- ATHLTR 2806 - INJURY/EVAL 2 - UPPER EXTREMITY
- ATHLTR 2808 - THERAPEUTIC INTERVENTIONS 2
- ATHLTR 2813 - GENERAL MEDICAL AND PHARMACOLOGICAL CONDITIONS

15 Credits

Third Semester (Fall)

- ATHLTR 2803 - CLINICAL PRACTICUM 3
- ATHLTR 2811 - GRADUATE RESEARCH 1
- ATHLTR 2814 - ADVANCED CLINICAL PROCEDURES
- ATHLTR 2815 - CURRENT CONCEPTS IN SPORTS MEDICINE
- ATHLTR 2816 - ADMINISTRATIVE ASPECTS OF ATHLETIC TRAINING

15 credits

Fourth Semester (Spring)

- ATHLTR 2804 - CLINICAL PRACTICUM 4 - CLINICALLY IMMERSIVE SEMESTER
- ATHLTR 2812 - GRADUATE RESEARCH 2
- ATHLTR 2817 - LEADERSHIP AND PROFESSIONAL DEVELOPMENT
- ATHLTR 2818 - BOARD OF CERTIFICATION (BOC) PREPARATION
- ATHLTR Elective, 3 credits

15 Credits

Dietitian Nutritionist Program, Accelerated BS-MS

Students who choose to pursue Pitt's Dietitian Nutritionist Program degree are ahead of the game! All Registered Dietitian/Nutritionists (RDNs) entering the field will be required to have a masters level degree to enter the profession. The program is a competency-based educational program that integrates experiential learning with didactic coursework to enable students to demonstrate the higher level of competence that will be needed for future practice as a RDN.

Interested students will apply in the Spring Term of each year to begin the accelerated program as juniors.

For more information, please contact:

Trisha A. Cousins, EdD, RDN, LDN, CLC
Program Director, Dietitian Nutritionist Program
6037 Forbes Tower
412-383-6532
E-mail: tcousins@pitt.edu

About

The Dietitian Nutritionist Program, housed within the Department of Sports Medicine and Nutrition, is an accelerated BS/MS graduate degree program accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) as a Future Education Model Graduate Degree Program (GP). The competency-based educational program that integrates experiential learning with didactic coursework affording graduates a strong foundation in medical nutrition therapy, public health nutrition and food service. Students may apply for a specialty rotation option that provides an immersive experience in a specialty practice area.

This accelerated program offers points of entry for:

- qualified undergraduates
- post-baccalaureate candidates
- graduates of Didactic Programs in Dietetics (DPD)

Undergraduate students will earn both Bachelor of Science and Master of Science degrees. Preparation for a career in dietetics as an RDN requires the following:

- completion of an ACEND accredited degree-granting program
- completion of an ACEND accredited supervised experiential learning meeting all required competencies*
- successful performance on the national Registration Examination for Dietitians**

No matter your professional goals in the Dietetics profession, this program offers an entry-level advanced degree option to provide a competitive edge for today's health care environment. Upon successful completion of the master's program graduates are eligible to take the national registration examination for Dietitians. Graduates passing the registration exam are eligible for licensure in Pennsylvania by the Board of Nursing. For licensing information please visit Instructions for Licensed Dietitian-Nutritionist (LDN) Applicants.

*This program provides supervised experiential learning required to become an RDN. The supervised experiential learning sites are randomly assigned and public transportation is not available to all sites. All students should anticipate the necessity of having access to their own transportation for Year 2 and Year 3 of the program. Please review the experiential learning information.

**The credentialing exam requirements are set by the Commission on Dietetic Registration (CDR).

For more information on becoming an RDN, visit www.eatright.org.

Program Requirements

Admission

There are three ways to enter the Dietitian Nutritionist Program. As an undergraduate, a post-baccalaureate, or as a graduate of a DPD. The application deadline for all entry points is March 1. Application review begins in January. Admission is for the fall term only. Applications can be submitted when course requirements are in progress.

Entry Point for Undergraduate Students to the Accelerated MS Program

Prerequisites must be completed for a letter grade, minimum grade of C- (C for transfer) unless otherwise noted; with the exception of AP/IB credits and/or exemptions awarded by the University of Pittsburgh. Courses listed below are offered at the Pittsburgh Campus, courses taken at the regional Pitt campuses or external institutions must be evaluated as equivalent to satisfy these requirements.

- General Chemistry 1 with lab, CHEM 0110
- General Chemistry 2 with lab, CHEM 0120
- Foundations of Biology 1, BIOSC 0150
- Foundations of Biology 2, BIOSC 0160
- Biology Lab, BIOSC 0057 or BIOSC 0058
- Organic Chemistry, CHEM 0350 or CHEM 0310
- Biochemistry, BIOSC 1000*
- Introduction to Microbiology, BIOSC 1850
- College Algebra, MATH 0031 or higher math required. Exemption accepted.
- Statistics, STAT 0200 or STAT 1000
- Seminar in Composition, ENGCOMP 0200 or equivalent
- English Writing, any "W" or upper-level writing course
- Oral Communication, COMMRC 0520 preferred; COMMRC 0310, COMMRC 0500, COMMRC 0510, and COMMRC 0530 are also accepted.
- Social Science, any
- Psychology, PSY 0010
- Introduction to Nutrition, HRS 1006, NUTR 1006*, or NUTR 1007
- Introduction to Dietetics, NUTR 1600+
- Food and Culture, NUTR 1612+

*These courses need to have been completed within the past five years.

+These courses can be taken in the first year of the Dietitian Nutritionist Program.

Additional Requirements

- Minimum cumulative and prerequisite GPA of 3.0 (based on 4.0)
- Personal interview with nutrition faculty
- 61-63 credits are required to begin the program

Application Requirements

- Complete the application for admission. Please visit the SHRS website to access information about applying;
- A personal essay addressing the following:
 - What you have done to learn about the field of nutrition and dietetics (both the science and supervised experiential learning) in preparation for our dietitian nutritionist program (maximum word count: 200 words); and,
 - An accelerated nutrition and dietetics program is challenging and the application process will be very competitive. Please explain what academic and personal skills you have developed since starting college that will allow you to be successful in this professional degree program. What do you feel are the critical skills, practices, and attitudes that you must continue to work on as you proceed further in your academic studies? (max. word count: 500 words)
 - Resume demonstrating evidence of adequate exposure to the field of dietetics and an appreciation of the breadth, depth, and scope of practice. This can be accomplished through either volunteer or paid work experience in a nutrition and dietetics related settings; there is no minimum number of hours required;
 - Transcripts from all institutions attended. Pitt students do not have to provide transcripts they have already submitted to Pitt.

SHRS General Education Requirements are included in our upper-level program prerequisites and curriculum requirements.

Essential Standards

This information is provided to inform applicants of the non-academic technical performance and expectation standards required to complete the program successfully. Applicants should review the essential program standards to ensure that they are able to meet and maintain the standards program. The University fosters a culture of inclusiveness and is committed to providing an accessible environment for its faculty, staff and students. Please note, the Dietitian Nutritionist Program is committed to non-discrimination, including on the basis of disability. Individuals with disabilities are encouraged to apply and reasonable accommodations will be provided as appropriate. The following link provides detailed information on Essential Program Standards.

Please note that this program requires students to complete portions of their education (e.g., supervised experiential learning experiences) at facilities external to the University to meet requirements for graduation. Many of these external facilities require screening measures such as, but not limited to, criminal background check, child abuse clearance, health appraisal, fingerprint-based background check and/or drug test prior to placement at the facility. The results of these requirements may limit and potentially eliminate placement options for the student which can, in turn, result in an inability to meet graduation requirements. Additionally, a conviction of a misdemeanor, felony, or felonious or illegal act abuse may prevent the student from becoming credentialed and/or licensed to practice in the field.

The University of Pittsburgh, as an educational institution and as an employer, values equality of opportunity, human dignity, and racial/ethnic and cultural diversity. Accordingly, the University prohibits and will not engage in discrimination or harassment on the basis of race, color, religion, national origin, ancestry, sex, age, marital status, familial status, sexual orientation, disability, or status as a disabled veteran or a veteran of the Vietnam era. Further, the University will continue to take affirmative steps to support and advance these values consistent with the University's mission. For information on University equal opportunity and affirmative action programs and complaint/grievance procedures, contact the Office of Affirmative Action, 901 William Pitt Union, University of Pittsburgh, Pittsburgh, PA 15260, 412-648-7860/412-648-7860.

The Dietitian Nutritionist Program is accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) the accrediting agency for the Academy of Nutrition and Dietetics (Academy), (ACEND@eatright.org), phone (1-800-877-1600 or 1-800-877-1600 x5400), or mail (120 South Riverside Plaza, Suite 2190, Chicago, IL 60606-6995).

Program Mission, Goals and Objectives

The mission of the Dietitian Nutritionist Program is the development of graduates with the competence and advanced skills to practice effectively as entry-level RDNs to enhance the health and wellbeing of individuals and diverse populations. In addition, the vision is to lead among dietetics programs in advancing knowledge, skills, and evidence-based practice of RDNs.

The program goals are:

1. Graduates will have the competence and advanced skills to practice effectively as entry-level Registered Dietitian/Nutritionists (RDN).
2. Graduates will have the advanced knowledge and skills to contribute to the evidence-based practice of RDNs.

Program outcomes are available upon request.

Curriculum

Students entering as a junior will complete the program 156 credits.

First Year

Fall Term

- NUTR 1000 - INTRODUCTION TO RESEARCH
- NUTR 1020 - NUTRITION ASSESSMENT
- NUTR 1030 - NUTRIENT METABOLISM
- NUTR 1622 - LIFE CYCLE NUTRITION
- REHSCI 1205 - HUMAN PHYSIOLOGY
- NUTR 1600 - INTRODUCTION TO DIETETICS (if not taken previously)

Spring Term

- NUTR 1605 - PRINCIPLES OF NUTRITION EDUCATION
- NUTR 1604 - FOOD SERVICE MANAGEMENT WITH LAB
- NUTR 1614 - NUTRITION CRITICAL THINKING OR NUTR 1612 - FOOD AND CULTURE (If not taken previously)
- NUTR 1610 - FOOD APPLICATION
- NUTR 1613 - FOOD APPLICATION LAB
- NUTR 1625 - NUTRITION THERAPY

*Students must maintain a 3.0 minimum GPA to matriculate from Year 1 to Year 2 of the program.

Second Year

Fall Term

- HRS 2004 - PATHOPHYSIOLOGY ACROSS THE LIFE SPAN
- HRS 2623 - ADVANCED MEDICAL NUTRITION THERAPY 1
- HRS 2631 - NUTRITION FOCUSED PHYSICAL EXAMINATION
- HRS 2680 - EVIDENCE BASED PROFESSIONALISM IN DIETETICS
- Elective, 3 credits - Advisor approved

Spring Term

- HRS 2612 - ADVANCED MEDICAL NUTRITION THERAPY 2
- HRS 2625 - COUNSELING METHODS
- HRS 2646 - INTRODUCTION TO FUNCTIONAL NUTRITION WITH LAB
- HRS 2655 - RESEARCH METHODOLOGY AND APPLIED STATISTICS
- Elective, 3 credits - Advisor approved

Undergraduate students will receive a BS in Nutrition Science after successful completion of the Year 2.

Third Year

Fall Term

- HRS 2675 - PRACTICUM IN DIETETICS 1

- HRS 2676 - EXPERIENTIAL PRACTICE 1
- HRS 2658 - CAPSTONE PROJECT

Spring Term

- HRS 2659 - PRACTICUM IN DIETETICS 2
- HRS 2672 - EXPERIENTIAL PRACTICE 2
- HRS 2652 - EXPERIENTIAL PRACTICE 3
- HRS 2674 - CAPSTONE PROJECT

Credits / Units: 15

Master's

Athletic Training, MS

The Accelerated BS-MS in Athletic Training was developed for students enrolled at the University of Pittsburgh and is designed as a 4+1 financial model. In addition to the Accelerated BS-MS in Athletic Training degree, a second point of entry for the MS degree in Athletic Training was developed for students who already have obtained a bachelors degree. This 2-year degree is called the MS in Athletic Training degree (Entry Point 2).

The athletic training degree program earned initial accreditation in 1997 and continuing accreditation in 2004, 2012, and 2024 through the Commission on Accreditation of Athletic Training Education (CAATE). Prior to this, the curriculum had been National Athletic Trainers' Association approved since 1978. The athletic training curriculum is defined by the current Board of Certification, Inc. Practice Analysis, which consists of five performance domains to include: (1) Risk Reduction, Wellness and Health Literacy; (2) Assessment, Evaluation and Diagnosis; (3) Critical Incident Management; (4) Therapeutic Intervention; (5) Healthcare Administration and Professional Responsibility. The curriculum is structured to provide both academic and clinical instruction. The professional academic curriculum includes such courses as Injury Evaluation, Therapeutic Interventions, Functional Anatomy, Evidence Based Practice in Athletic Training, General Medical and Pharmacological Principles, among others. The course work provides a foundation for hands-on clinical experiences provided in the clinical education setting. The students' clinical requirements include direct patient care with athletes and physically active patients and evaluation of skills by preceptors who supervise each student's clinical experience. Students rotate through four on-campus athletic training facilities and several off-site affiliated settings during the clinical education component acquiring valuable skills under the direct supervision of certified athletic training staff, team physicians and other allied health professionals. Upon successful completion of the professional program, students are eligible to sit for the BOC, Inc. certification examination. Successful completion of this exam affords the candidate a variety of employment opportunities including athletic training positions at the high school, college, or university level; sports medicine and rehabilitation clinics; professional athletic teams; performing arts; the military; industrial settings; and more. Additionally, many students pursue graduate education opportunities in a number of sports medicine-related professions.

For more information, please contact:

Amy E. Aggelou, PhD, LAT, ATC
Program Director, Athletic Training Education
School of Health and Rehabilitation Sciences
Department of Sports Medicine and Nutrition
6075 Forbes Tower
412-383-9738
E-mail: aaggelou@pitt.edu

Admissions Requirements

Prerequisite Courses for MS in Athletic Training Degree (Entry Point 2)

- Successful completion of a Baccalaureate degree from a regionally accredited institution. Undergraduate coursework must have been completed no longer than 10 years prior to application. Applications may be submitted while baccalaureate degree is in progress.
- Minimum cumulative overall and prerequisite grade point average (GPA) of 3.0 (based on 4.0).
- EMT certification is required either through a course for credit or another qualified course leading to NR-EMT credential.
- At this time observation hours under the direct supervision of a certified athletic trainer are recommended but not required.
- Completion of Technical Standards for admissions document.
- Verification of English Language Proficiency is required unless the following apply:
 - the applicant is a citizen of a country whose official language is English
 - the applicant has completed a degree program at a regionally accredited institution in the U.S., or
 - the applicant is not a citizen of a country whose official language is English but has completed a degree program at an institution outside of the U.S. where the language of instruction is English and where the official national language of the country in which the institution is located is English.
- Successful completion of interview (virtual, phone or in-person).

Prerequisites must be completed for a letter grade, minimum grade of C. Applications may be submitted while prerequisite coursework is in progress. Prerequisites coursework for admission include:

- Human Anatomy, 4 credits minimum
- Human Physiology, 4 credits minimum
- Exercise Physiology, 3 credits minimum
- Introduction to Biology, 4 credits minimum
- Introduction to Physics, 3 credits minimum
- Introduction to Chemistry, 4 credits minimum
- Kinesiology or Biomechanics, 3 credits minimum
- Statistics, 3 credits minimum
- English Composition, 6 credits minimum
- Psychology, 6 credits minimum, must include Introduction to Psychology
- Public Speaking, 3 credits
- Humanities and Social Sciences Electives, 6 credits minimum
- Nutrition, 3 credits minimum

The Athletic Training Program at the University of Pittsburgh is a rigorous and intense program that places specific requirements and demands on the students enrolled in the program. An objective of this program is to prepare graduates to enter a variety of employment settings and to render care to a wide spectrum of individuals engaged in physical activity. The technical standards set forth by the Athletic Training Program establish the essential qualities considered necessary for students admitted to this program to achieve the knowledge, skills, and competencies of an entry-level athletic trainer, as well as meet the expectations of the program's accrediting agency (Commission on Accreditation of Athletic Training Education [CAATE]).

The following abilities and expectations must be met by all students admitted to the Athletic Training Program. Candidates for selection to the Athletic Training Program must demonstrate:

- The mental capacity to assimilate, analyze, synthesize, integrate concepts and problem solve to formulate assessment and therapeutic judgments and to be able to distinguish deviations from the norm.
- Sufficient postural and neuromuscular control, sensory function, and coordination to perform appropriate physical examinations using accepted techniques; and accurately, safely, and efficiently use equipment and materials during the assessment and treatment of patients.

- The ability to communicate effectively and sensitively with patients and colleagues, including individuals from different cultural and social backgrounds; this includes, but is not limited to, the ability to establish rapport with patients and communicate judgments and treatment information effectively. Students must be able to understand and speak the English language at a level consistent with competent professional practice.
- The ability to record the physical examination results and a treatment plan clearly and accurately.
- The capacity to maintain composure and continue to function well during periods of high stress.
- The perseverance, diligence, and commitment to complete the athletic training program as outlined and sequenced.
- Flexibility and the ability to adjust to changing situations and uncertainty in clinical situations.
- Effective skills and appropriate demeanor and rapport that relate to professional education and quality patient care.

Application Procedures

Application Deadline: May 1

Application Platform: Complete the ATCAS application which includes:

- Application fee
- An essay discussing when and how you became interested in the field and program to which you are applying, any work or volunteer experience you have that will demonstrate your awareness of the field and your long-term professional goals
- A current copy of your Curriculum Vitae or Resume;
- A letter of recommendation from a college instructor/professor, academic advisor, supervisor or employer, etc
- Official transcripts from all U.S. colleges/universities attended
- A course by course evaluation with GPA conversion for all higher level institutions attended outside the US. The evaluation may be from World Education Services, Inc. (WES) or Educational Credential Evaluators, Inc. (ECE).
- *Graduate Record Examination (GRE) not required*

If applicable:

- Request official English Language Proficiency test scores be sent to the University of Pittsburgh from one of the following options. Minimum scores accepted and instructions for sending official test scores follow:
- Duolingo English Test: 105. Scores should be made available electronically to "University of Pittsburgh - School of Health and Rehabilitation Sciences"
- International English Language Testing System (IELTS): 6.5. Scores should be made available electronically to "University of Pittsburgh Health and Rehabilitation Sciences"
- Test of English as a Foreign Language (TOEFL): 80. Scores should be submitted electronically through ETS to institution code "2927".

Program Curriculum

Coursework for the professional MS in Athletic Training program is divided into two phases: Pre-Professional Phase and the Professional Phase.

Preprofessional Phase

In the summer, prior to the start of the professional phase, students enrolled in the MS in Athletic Training Degree Program (Entry Point 2) will be required to successfully complete a 1-credit course titled - ATHLTR 1815 Foundations in Evaluation and Treatment.

- ATHLTR 1815 - FOUNDATIONS IN EVALUATION AND TREATMENT

Professional Phase

The following courses are to be completed in four semesters and are graduate-level curriculum.

First Semester (Fall)

- ATHLTR 2801 - CLINICAL PRACTICUM 1
- ATHLTR 2805 - INJURY/EVAL 1 - LOWER EXTREMITY
- ATHLTR 2807 - THERAPEUTIC INTERVENTIONS 1
- ATHLTR 2809 - FUNCTIONAL HUMAN ANATOMY
- ATHLTR 2810 - EVIDENCE BASED PRACTICE IN ATHLETIC TRAINING

Second Semester (Spring)

- ATHLTR 2802 - CLINICAL PRACTICUM 2
- ATHLTR 2806 - INJURY/EVAL 2 - UPPER EXTREMITY
- ATHLTR 2808 - THERAPEUTIC INTERVENTIONS 2
- ATHLTR 2813 - GENERAL MEDICAL AND PHARMACOLOGICAL CONDITIONS

Third Semester (Fall)

- ATHLTR 2803 - CLINICAL PRACTICUM 3
- ATHLTR 2811 - GRADUATE RESEARCH 1
- ATHLTR 2814 - ADVANCED CLINICAL PROCEDURES
- ATHLTR 2815 - CURRENT CONCEPTS IN SPORTS MEDICINE
- ATHLTR 2816 - ADMINISTRATIVE ASPECTS OF ATHLETIC TRAINING

Fourth Semester (Spring)

- ATHLTR 2804 - CLINICAL PRACTICUM 4
- ATHLTR 2812 - GRADUATE RESEARCH 2
- ATHLTR 2817 - LEADERSHIP AND PROFESSIONAL DEVELOPMENT
- ATHLTR 2818 - BOARD OF CERTIFICATION (BOC) PREPARATION
- ATHLTR Elective (3 Credits)

Total Credits: 61

Dietitian Nutritionist Program, MS

Students who choose to pursue Pitt's Dietitian Nutritionist Program degree are ahead of the game! All Registered Dietitian/Nutritionists (RDNs) entering the field will be required to have a masters level degree to enter the profession. The program is a competency-based educational program that integrates experiential learning with didactic coursework to enable students to demonstrate the higher level of competence that will be needed for future practice as a RDN.

Interested students will apply in the Spring Term of each year to begin the program as graduate students in Fall Term.

For more information, please contact:

Trisha A. Cousins, EdD, RDN, LDN, CLC
Program Director, Dietitian Nutritionist Program
6037 Forbes Tower
412-383-6532
E-mail: tcousins@pitt.edu

About

The Dietitian Nutritionist Program, housed within the Department of Sports Medicine and Nutrition, is an MS graduate degree program accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) as a Future Education Model Graduate Degree Program (GP). The competency-based educational program that integrates experiential learning with didactic coursework affording graduates a strong foundation in medical nutrition therapy, public health nutrition and food service. Students may apply for a specialty rotation option that provides an immersive experience in a specialty practice area.

This program offers points of entry for:

- post-baccalaureate candidates
- graduates of Didactic Programs in Dietetics (DPD)

Students will earn a Master of Science degrees. Preparation for a career in dietetics as an RDN requires the following:

- completion of an ACEND accredited degree-granting program
- completion of an ACEND accredited supervised experiential learning meeting all required competencies*
- successful performance on the national Registration Examination for Dietitians**

No matter your professional goals in the Dietetics profession, this program offers an entry-level advanced degree option to provide a competitive edge for today's health care environment. Upon successful completion of the master's program graduates are eligible to take the national registration examination for Dietitians. Graduates passing the registration exam are eligible for licensure in Pennsylvania by the Board of Nursing. For licensing information please visit Instructions for Licensed Dietitian-Nutritionist (LDN) Applicants.

*This program provides supervised experiential learning required to become an RDN. The supervised experiential learning sites are randomly assigned and public transportation is not available to all sites. All students should anticipate the necessity of having access to their own transportation for the program. Please review the experiential learning information.

**The credentialing exam requirements are set by the Commission on Dietetic Registration (CDR).

For more information on becoming an RDN, visit www.eatright.org.

Program Requirements

Admission

There are three ways to enter the Dietitian Nutritionist Program. As an undergraduate (accelerated BS/MS), a post-baccalaureate (MS), or as a graduate of a DPD (MS). The application deadline for all entry points is March 1. Application review begins in January. Admission is for the fall term only. Applications can be submitted when course requirements are in progress.

Entry Point for Post Baccalaureate Students to the MS Program

Prerequisites must be completed for a letter grade, minimum grade of C. Coursework will be evaluated at time of application for equivalency to Pitt courses.

- General Chemistry 1 with lab
- General Chemistry 2 with lab
- Foundations of Biology 1
- Genetics or Foundations of Biology 2
- Biology Lab
- Organic Chemistry 1
- Biochemistry*
- Introduction to Microbiology
- College Algebra or higher math
- Statistics
- Seminar in Composition
- English Writing
- Oral Communication
- Social Science
- Psychology
- Introduction to Nutrition*
- Introduction to Dietetics+
- Food and Culture+

*These courses need to have been completed within the past five years.

+These courses can be taken in the first year of the Dietitian Nutritionist Program.

Additional Requirements

- Baccalaureate degree from an accredited institution
- Minimum cumulative and prerequisite GPA of 3.0 (based on 4.0)
- Personal interview with nutrition faculty

Application Requirements

- Complete the GradCAS application;
- Submit a self-evaluation essay, discussing strengths, skills and experiences that will contribute to success in the program and your professional goals as a registered dietitian;
- Resume demonstrating evidence of adequate exposure to the field of dietetics and an appreciation of the breadth, depth, and scope of practice. This can be accomplished through either volunteer or paid work experience in a nutrition and dietetics related settings; there is no minimum number of hours required;
- Submit one letter of recommendation. This letter should address the academic, professional, and personal attributes and potential for graduate study;
- Transcripts from all institutions attended. Pitt students do not have to provide transcripts they have already submitted to Pitt.
- Additional requirements for international applicants
- Academic Credential Evaluation from World Education Services (WES), Inc. or Educational Credential Evaluators, Inc. A course by course evaluation with GPA conversion is required for baccalaureate degree or higher completed at an institution outside of the United States.
- English Language Proficiency scores. Minimum scores accepted:
- TOEFL: 100. Submit electronically to institution code 2927.
- IELTS: 7.0. Scores should be made available electronically to "University of Pittsburgh Health and Rehabilitation Sciences".
- Duolingo: 130. Scores should be made available electronically to "University of Pittsburgh - Health and Rehabilitation Sciences".

Entry Point for DPD Graduates to the MS Program

Prerequisites must be completed for a letter grade, minimum grade of C. Coursework will be evaluated at time of application for equivalency to Pitt courses.

- Foundations of Biology 1 with Lab, 4 credits
- Genetics or Foundations of Biology 2, 3 credits
- Human Physiology, 4 credits
- Introduction to Microbiology, 3 credits
- General Chemistry 1 with Lab, 4 credits
- General Chemistry 2 with Lab, 4 credits
- †Organic Chemistry 1, 3 credits
- *Biochemistry, 3 credits
- Oral Communication, 3 credits
- Social Science, 3 credits
- Introduction to Psychology, 3 credits
- Seminar in Composition, 6 credits
- *Introduction to Nutrition, 3 credits
- Introduction to Dietetics, 1 credit
- Food and Culture, 3 credits
- Nutrition Assessment, 3 credits
- Nutrition Education, 3 credits
- Nutrient Metabolism, 3-6 credits
- Food Applications with Lab, 4 credits
- Food Service Management, 3 credits
- Life Cycle Nutrition, 3 credits
- Nutrition Therapy, 3 credits

*These courses need to have been completed within the past five years.

†CHEM 0350 (3 cr.) offered each Spring Term will satisfy the Organic Chemistry requirement.

+Genetics is preferred; however, a Biology 2 course with a strong genetics component will fulfill the requirements.

Additional Requirements

- Baccalaureate degree from an accredited institution
- Verification Statement from accredited program
- Minimum cumulative and prerequisite GPA of 3.0 (based on 4.0)
- Personal interview with nutrition faculty

Application Requirements

- Complete the GradCAS application;
- Submit a self-evaluation essay, discussing strengths, skills and experiences that will contribute to success in the program and your professional goals as a registered dietitian;
- Submit resume demonstrating evidence of adequate exposure to the field of dietetics and an appreciation of the breadth, depth and scope of practice. This can be accomplished through either volunteer or paid work experience in a nutrition and dietetics related settings; there is no minimum number of hours required;
- Submit one letter of recommendation. This letter should address the academic, professional, and personal attributes and potential for graduate study;
- Submit official transcripts from all colleges and universities attended;
- Additional requirements for international applicants
- Academic Credential Evaluation from World Education Services (WES), Inc. or Educational Credential Evaluators, Inc. A course by course evaluation with GPA conversion is required for baccalaureate degree or higher completed at an institution outside of the United States.
- English Language Proficiency scores. Minimum scores accepted:

- Duolingo: 130. Scores should be made available electronically to "University of Pittsburgh - Health and Rehabilitation Sciences".
- IELTS: 7.0. Scores should be made available electronically to "University of Pittsburgh Health and Rehabilitation Sciences".
- TOEFL: 100. Submit electronically to institution code 2927.

Essential Standards

This information is provided to inform applicants of the non-academic technical performance and expectation standards required to complete the program successfully. Applicants should review the essential program standards to ensure that they are able to meet and maintain the standards program. The University fosters a culture of inclusiveness and is committed to providing an accessible environment for its faculty, staff and students. Please note, the Dietitian Nutritionist Program is committed to non-discrimination, including on the basis of disability. Individuals with disabilities are encouraged to apply and reasonable accommodations will be provided as appropriate. The following link provides detailed information on Essential Program Standards.

Please note that this program requires students to complete portions of their education (e.g., supervised experiential learning experiences) at facilities external to the University to meet requirements for graduation. Many of these external facilities require screening measures such as, but not limited to, criminal background check, child abuse clearance, health appraisal, fingerprint-based background check and/or drug test prior to placement at the facility. The results of these requirements may limit and potentially eliminate placement options for the student which can, in turn, result in an inability to meet graduation requirements. Additionally, a conviction of a misdemeanor, felony, or felonious or illegal act abuse may prevent the student from becoming credentialed and/or licensed to practice in the field.

The University of Pittsburgh, as an educational institution and as an employer, values equality of opportunity, human dignity, and racial/ethnic and cultural diversity. Accordingly, the University prohibits and will not engage in discrimination or harassment on the basis of race, color, religion, national origin, ancestry, sex, age, marital status, familial status, sexual orientation, disability, or status as a disabled veteran or a veteran of the Vietnam era. Further, the University will continue to take affirmative steps to support and advance these values consistent with the University's mission. For information on University equal opportunity and affirmative action programs and complaint/grievance procedures, contact the Office of Affirmative Action, 901 William Pitt Union, University of Pittsburgh, Pittsburgh, PA 15260, 412-648-7860/412-648-7860.

The Dietitian Nutritionist Program is accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) the accrediting agency for the Academy of Nutrition and Dietetics (A.N.D.), (ACEND@eatright.org), phone (1-800-877-1600 or 1-800-877-1600 x5400), or mail (120 South Riverside Plaza, Suite 2190, Chicago, IL 60606-6995).

Program Mission, Goals and Objectives

The mission of the Dietitian Nutritionist Program is the development of graduates with the competence and advanced skills to practice effectively as entry-level RDNs to enhance the health and wellbeing of individuals and diverse populations. In addition, the vision is to lead among dietetics programs in advancing knowledge, skills, and evidence-based practice of RDNs.

The program goals are:

1. Graduates will have the competence and advanced skills to practice effectively as entry-level Registered Dietitian/Nutritionists (RDN).
2. Graduates will have the advanced knowledge and skills to contribute to the evidence-based practice of RDNs.

Program outcomes are available upon request.

Curriculum

Students entering with a baccalaureate degree that is not from a Didactic Program in Dietetics (DPD) will complete 93-95 credits during this three-year program. Didactic Program in Dietetics (DPD) graduates will complete Year 2 & Year 3 of the program fulfilling a 60-credit course of study.

First Year

Fall Term

- NUTR 1000 - INTRODUCTION TO RESEARCH
- NUTR 1020 - NUTRITION ASSESSMENT
- NUTR 1030 - NUTRIENT METABOLISM
- NUTR 1622 - LIFE CYCLE NUTRITION
- REHSCI 1205 - HUMAN PHYSIOLOGY
- NUTR 1600 - INTRODUCTION TO DIETETICS (if not taken previously)

Spring Term

- NUTR 1605 - PRINCIPLES OF NUTRITION EDUCATION
- NUTR 1604 - FOOD SERVICE MANAGEMENT WITH LAB
- NUTR 1614 - NUTRITION CRITICAL THINKING OR NUTR 1612 - FOOD AND CULTURE (if not previously taken)
- NUTR 1610 - FOOD APPLICATION
- NUTR 1613 - FOOD APPLICATION LAB
- NUTR 1625 - NUTRITION THERAPY

*Students must maintain a 3.0 minimum GPA to matriculate from Year 1 to Year 2 of the program.

Second Year

Fall Term

- HRS 2004 - PATHOPHYSIOLOGY ACROSS THE LIFE SPAN
- HRS 2623 - ADVANCED MEDICAL NUTRITION THERAPY 1
- HRS 2631 - NUTRITION FOCUSED PHYSICAL EXAMINATION

Spring Term

- HRS 2612 - ADVANCED MEDICAL NUTRITION THERAPY 2
- HRS 2625 - COUNSELING METHODS
- HRS 2646 - INTRODUCTION TO FUNCTIONAL NUTRITION WITH LAB
- HRS 2655 - RESEARCH METHODOLOGY AND APPLIED STATISTICS
- Elective, 3 credits - Advisor approved

Third Year

Fall Term

- HRS 2675 - PRACTICUM IN DIETETICS 1
- HRS 2676 - EXPERIENTIAL PRACTICE 1
- HRS 2658 - CAPSTONE PROJECT

Spring Term

- HRS 2659 - PRACTICUM IN DIETETICS 2
- HRS 2672 - EXPERIENTIAL PRACTICE 2
- HRS 2652 - EXPERIENTIAL PRACTICE 3
- HRS 2674 - CAPSTONE PROJECT

Sports Medicine, MS

The Sports Medicine (SM) program focuses on enhancing the knowledge base in the prevention, assessment, treatment and rehabilitation of athletic injuries and illness. Athletic Trainers, other health care professionals, and individuals interested in sports medicine will find the curriculum well-suited to meet their post-professional goals and objectives.

For more information, please contact:

Mary E. Murray, EdD, LAT, ATC

Director, MS in Sports Medicine

Department of Sports Medicine and Nutrition

School of Health and Rehabilitation Sciences

6074 Forbes Tower

Fax: 412-383-6636

E-mail: mmurray1@pitt.edu

<https://www.shrs.pitt.edu/MSSM>

About

The Sports Medicine (SM) concentration leading to a Master of Science degree in Health and Rehabilitation Sciences is a two-year graduate program housed within the Department of Sports Medicine and Nutrition.

Program Summary

36 credits (full-time-only)
4 terms
Program starts fall term only

Sports medicine is a multidisciplinary field that focuses on health care issues for athletes and physically active individuals. The SM program has a research focus and provides a core curriculum that is central to the pathokinesiology of joint injury and the principles by which restoration of joint function is accomplished. Graduates of the program seek appointments in both clinical and educational settings at colleges and universities, high schools and private sports medicine clinics. Individuals who have successfully completed our program include athletic trainers, physical therapists, bioengineers and exercise physiologists.

Research

Students are provided with a research experience within the Neuromuscular Research Laboratory/Warrior Human Performance Research Center that focuses on issues central to clinical research in orthopedics and sports medicine. Research includes the use of electromyography, motion analysis, isokinetic dynamometry, physiological, proprioceptive, and balance assessment modalities for the purpose of defining and restoring function as well as optimizing performance in military personnel, injured athletes, and in physically active individuals.

The NMRL boasts:

- 30 years of comprehensive, relevant sports medicine research as part of the University of Pittsburgh
- A 10-year history of Department of Defense (DoD) Human Performance Operation and Injury Prevention Research
- Unique understanding of DoD Human Performance Operation and Injury Prevention needs
- Multi-disciplinary, team-centric approaches to research
- Cutting-edge and innovative research capabilities

Admission Requirements:

All applicants must:

- Complete the GradCAS application
 - Submit the application fee of \$50 (U.S.)
 - GRE scores are not required
 - Submit a self-evaluation essay addressing your purpose for applying to the program, your ability to successfully complete the program, and your goals (short and long term)
 - Submit two letters of reference, preferably from individuals who have instructed you in academic settings and/or supervised research activities. These letters should address the applicant's academic, professional, clinical (as appropriate) and personal attributes; as well as potential for meaningful graduate study
 - Submit official transcripts from all colleges/universities attended
 - Additional requirements for international applicants can be found on the SHRS website
- Application deadline is March 15.

Students may be eligible for the following scholarships:

Experiential Opportunities

To support graduate student career success, the MS program in Sports Medicine offers experiential opportunities that combine academic scholarship and professional practice. These career-related experiences allow students to be

immersed in a work environment that will build their skillset, deepen their knowledge, and bolster career confidence. Each of these experiences allows for hands-on opportunities, professional networking, and personal development. In addition, each of these positions includes a scholarship. The amount of funding varies by year.

Sports Medicine Resource Fund

This graduate scholarship was created to help defray the cost of professional development activities. Eligible students are those individuals who have completed their undergraduate Athletic Training degree at the University of Pittsburgh and are now continuing their education at Pitt through the Master's in Sports Medicine Program. This scholarship can be used toward travel and attendance at a professional meeting.

Freddie H. Fu, MD Graduate Research Award

The award is named for and presented in honor of Freddie H. Fu, MD for the continued support of research in the field of Sports Medicine. The purpose of this award is to encourage graduate research activity by recognizing exceptional student research projects and defraying some of the expenses associated with the student research. The number of awards presented each year will be contingent on the number of quality proposals submitted and monies available.

American College of Sports Medicine (ACSM)

The ACSM provides research grants and scholarships from various endowments and funds including education, minority scholarships, and Foundation Research Grants. For more information.

NATA Research and Education Foundation Graduate/Doctoral Scholarship

The National Athletic Trainers' Association provides a number of scholarships to eligible students on the basis of academic and clinical excellence as well as participation in campus and community activities that demonstrate qualities of leadership and service. Applicants must be student members of the NATA by November 1 of the year preceding submission of the application, be enrolled in an accredited curriculum program and intend to pursue the profession of athletic training as their means of livelihood and have a minimum GPA of 3.2 or higher. Completed applications must include a statement of support by a certified athletic trainer and verification of academic standing. The amount of each scholarship is \$2,300.00. Applications will be posted on the NATA website approximately September 1. Go to NATA Foundation for additional application information. Deadlines for portions of the application begin in January. Learn more about this scholarship.

NATA Research & Education Foundation Master's/Doctoral Research Grant

View more about this grant [here](#).

Financial Aid

Tuition scholarships are available to master's candidates and may include appointments at the University of Pittsburgh, NMRL or UPMC Sports Medicine. The yearly scholarships vary.

Academic Standards

An average of at least B (GPA=3.00) is required in all courses that make up the MS emphasis in sports medicine. A student who receives a grade lower than a C is required to retake the course according to the School of Health and Rehabilitation Sciences policy.

Student Scholarship Appointment Standards

The Department of Sports Medicine and Nutrition, in accordance with the University of Pittsburgh and School of Health and Rehabilitation Sciences, defines a student scholarship as a teaching assistant, teaching fellow, graduate student assistant, or student employee trainee (TA/TS/GSA/SET). Although student scholarship appointments may not be made for more than one year, a student may be reappointed. While it is impossible to guarantee reappointments, most students making satisfactory progress toward a graduate degree and whose teaching or other service performance

is satisfactory will receive at least one renewal of their appointment or an offer of other financial assistance. If it is impossible to offer renewal or other appointments, priority will be given to those with superior academic, teaching, and service qualifications.

The criteria for reappointment are the quality of assigned work and academic achievement. Unsatisfactory academic performance is a cumulative GPA below 3.00 or completion of fewer than 9 credits of graduate work per term. As such, students who have a cumulative GPA below 3.00 at the time of scholarship reappointment will not receive reappointment of their scholarship. This policy is in accordance with the University of Pittsburgh Policy Statement for Teaching Assistants, Teaching Fellows, and Graduate Student Assistants.

Fall Term

- SPMED 2000 - ANATOMICAL BASIS SPORTS MEDICINE
- SPMED 3000 - RESEARCH SEMINAR SPORTS MEDICINE
- SPMED 3010 - LABORATORY TECHNIQUES 1

Spring Term

- HRS 2655 - RESEARCH METHODOLOGY AND APPLIED STATISTICS
- SPMED 2010 - PATHOKIN ORTHOPADC/ATHL INJURIES
- SPMED 3020 - LABORATORY TECHNIQUES 2

Fall Term

- SPMED 2020 - MUSCULOSKELETAL ASSESSMENT AND INJURY PREVENTION
- SPMED 2030 - INJURY EPIDEMIOLOGY
- Elective

Spring Term

Students will register for either HRS 2925 Graduate Research or HRS 2926 Scholarly Paper depending on the project that is selected.

- SPMED 2040 - SEMINAR IN SPORTS MEDICINE
- HRS 2925 - GRADUATE RESEARCH
- or
- HRS 2926 - SCHOLARLY PAPER
- Elective

Approved Electives

Students can take 3 credits of elective courses during the fall and spring terms of the second year of the progra. The following courses have been approved as electives.

- SPMED 2628 - NUTRITION AND PERFORMANCE
- SPMED 2650 - EXERCISE PHYSIOLOGY
- SPSCI 2100 - ADVANCED HUMAN PERFORMANCE AND TESTING
- SPSCI 2150 - APPLIED SPORTS SCIENCE
- HRS 2921 - CLINICAL INTERNSHIP

- HRS 2922 - TEACHING INTERNSHIP
- HRS 2999 - INDEPENDENT STUDY
- HHD 2390 - NUTRITION IN SPORT AND EXERCISE

Total Credits: 36

Sports Science, MS

The Sports Science concentration in the Master of Science in Health and Rehabilitation Sciences program is designed for students seeking graduate training to advance their knowledge and skills related to understanding and improving sports performance. Primary areas of focus pertaining to education and training in sports science, nutrition, sports medicine, and research. The curriculum integrates coursework, research, and practical application experiences pertaining to multiple aspects of athletic and human performance. All students will complete a 1-year sports science practical experience with a designated sports team or organization and will also have access to the Sports Medicine and Nutrition research facilities and faculty.

For more information, please contact:

Timothy J. Suchomel, PhD, CSCS*D, RSCC*D, USAW-I, mISCP
 Associate Professor | Department of Sports Medicine and Nutrition
 Director of the Sports Science Master's Program
 University of Pittsburgh | School of Health and Rehabilitation Sciences
 Neuromuscular Research Laboratory | Room 112
 Pittsburgh, PA 15203
 412-246-0460
<https://www.shrs.pitt.edu/msss>

About

The Sports Science (SS) Concentration leading to a Master of Science degree in Health and Rehabilitation Sciences is a one-year graduate program housed within the Department of Sports Medicine and Nutrition.

Program Summary
33 credits (Full or part-time)
1-3 years (varies)
Program starts fall term only

The curriculum integrates coursework, research, and practical application experiences pertaining to multiple aspects of athletic and human performance.

Students will have access to the Department of Sports Medicine and Nutrition research facilities and faculty.

Admission Requirements

Prerequisites (satisfactory grades must be earned in all courses)

- Exercise Physiology (3 credits)
- Introduction to Nutrition (3 credits)
- Introduction to Statistics (3 credits)
- Human Anatomy and Physiology I (3 credits)

Applications may be submitted while prerequisite coursework is in progress.

Additional Requirements

Bachelor's degree from an accredited institution.

Minimum undergraduate GPA of 3.0 (out of 4.0). Admission may be considered for applicants with a GPA of less than 3.0 if other supporting evidence of their ability to complete the graduate program is provided.

An interview may be required.

Application Procedures

Application Deadline: July 15. For international students, the application deadline is May 1.

Application Deadline for highly competitive practical experience positions: January 15. Some of the practical experiences are highly competitive and may require an on-campus interview. Qualified applicants will be contacted by the department to schedule an interview.

All applicants must:

- Complete the GradCAS application
- Submit the application fee of \$50 (U.S.)
- Submit an essay - a description of professional and educational goals that are realistically attainable during enrollment in the graduate program
- Submit two letters of reference, preferably from individuals who have instructed you in academic settings and/or supervised research activities. These letters should address the applicant's academic, professional, and personal attributes and potential for meaningful graduate study.
- Submit official transcripts from all colleges/universities you **have attended**
- Additional requirements for international applicants may be found on the SHRS website

Fall Term

- SPSCI 2110 - SPORTS SCIENCE PRACTICUM 1
- SPSCI 2150 - APPLIED SPORTS SCIENCE
This class will be held on Wednesday 4-6:30pm
- SPSCI 3000 - RESEARCH SEMINAR SPORTS MEDICINE
- HRS 2655 - RESEARCH METHODOLOGY AND APPLIED STATISTICS
and
Fall Electives (select one)
- SPMED 3010 - LABORATORY TECHNIQUES 1
or
- SPSCI 2628 - NUTRITION AND PERFORMANCE WITH LAB
or
- SPSCI 2650 - EXERCISE PHYSIOLOGY

Spring Term

- SPSCI 2040 - SEMINAR IN SPORTS MEDICINE
- SPSCI 2100 - ADVANCED HUMAN PERFORMANCE AND TESTING
- SPSCI 2120 - SPORTS SCIENCE PRACTICUM 2
- SPSCI 2140 - SPORTS SCIENCE DATA ANALYTICS
- SPSCI 3020 - LABORATORY TECHNIQUES 2

Summer Term

- SPSCI 2130 - SPORTS SCIENCE PRACTICUM 3

Total Credits: 33

Rehabilitation Science Doctor of Philosophy (PhD)

Doctoral

Rehabilitation Science, PhD

The mission of the PhD program in Rehabilitation Science is to advance the frontiers of knowledge underlying the practice of rehabilitation disciplines and professions through research, teaching, and professional development.

This PhD is an interdisciplinary degree. Students enter the program through the following SHRS departments or programs: Counseling and Behavioral Health, Health Information Management, Occupational Therapy, Physical Therapy, Rehabilitation Science and Technology, and Sports Medicine and Nutrition. Upon degree completion, you will have mastered a specific area of expertise in rehabilitation science and carry an expansive core of related knowledge.

Contact Information:

Courtney Fleck
Assistant to the Associate Dean of Graduate Studies
4032 Forbes Tower
Phone: 412-624-6538
Fax: 412-383-6535
Email: courtney.fleck@pitt.edu
www.shrs.pitt.edu

Program Summary

Program starts in the fall term.

- Statute of limitation is 8 years (with approved credit transfer) or 10 years (without credit transfer)
- Minimum of 72 credits required to graduate (some areas of focus may require more credits)

The Primary Goals of the PhD program in Rehabilitation Science are to:

- Provide core content in theories and models of rehabilitation, disability and/or assistive technology that underpin rehabilitation science;

- Provide in-depth, state of the science, content in basic, clinical, social, medical and/or engineering sciences that support the dissertation research;
- Provide mentorship opportunities for immersion in rehabilitation science research laboratories, projects, and/or ongoing studies;
- Prepare students to conduct and disseminate original research that will advance rehabilitation science;
- Promote interdisciplinary research in preparation for becoming a research team member;
- Promote knowledge, behaviors and skills consistent with the responsible conduct of research;
- Provide opportunities to teach content in an area of expertise.

The doctoral degree in Rehabilitation Science is an interdisciplinary research degree offered by SHRS and not by individual departments within the school. Graduates of this program will have a specific area of expertise in rehabilitation science as well as a core of interdisciplinary knowledge related to this specific area. They will become the researchers, scholars, teachers, thinkers, and planners in the demanding and changing field of rehabilitation science.

Areas of Study

- Assistive technology
- Biomechanics
- Evidence-based practice and epidemiology of disability
- Functioning, disability and health
- Psychosocial, cultural, and behavioral aspects of rehabilitation and disability
- Health information systems and information technology related to health and rehabilitation sciences
- Neural basis of sensory and motor function and dysfunction
- Neuromuscular aspects of sports injuries
- Health Services Research in Rehabilitation

Admission Requirements/ Application Process

Applicants should have a strong interest in rehabilitation research as well as a master's degree in an area related to rehabilitation science. The exceptional student with a bachelor's degree, six or more credits of graduate course work, and compelling clinical/research experience in rehabilitation science will be considered.

Resources, including research mentors, must be available to enable the student to engage in a plan of study in the student's major area of interest in rehabilitation research. Therefore, it is important that there is a match between the research interests of an applicant and an SHRS graduate faculty member.

Admission Requirements

Successful applicants will have a minimum GPA of 3.0 (based on a 4.0 scale) in all college work. We do not require the GRE in our admissions applications. Students for whom English is a foreign language must have a minimum Duolingo English Test score of 130, TOEFL score of 100 (internet), 600 (paper); or Band 7.0 on the IELTS (reading and writing modules).

Application Requirements

Applicants are required to submit the following:

- Completed GradCAS application
- An essay stating career goals, specific research interests and experience, and clinical interests and experience
- Three to five academics or work-related letters of recommendation (at least one academic reference must be included as well as a letter of support from the identified Research Mentor. The Research Mentor's letter should indicate how the student is known to the Mentor, a description of the student's potential for success in the program and as a rehabilitation scientist, and how the Mentor will support the student's dissertation research project (funding/resources))
- A résumé, including work history, formal education, continuing education, licensing and certification, professional organizations, honors and awards, publications, presentations, and grants
- Transcripts from all U.S. institutions attended

- A course-by-course evaluation with GPA conversion for all higher institutions attended outside the U.S. The evaluation may be from World Education Services (WES), Inc. or Educational Credential Evaluators, Inc. (ECE)
- Verification of English language proficiency. (Duolingo English Test, TOEFL or IELTS scores (for candidates whose native language is not English))
- At least one example of written work (class project, course assignment, publication for which candidate is first author, etc.)

The application deadline for a fall enrollment start date is May 1. For example, a student wishing to enroll in the Fall of 2024 will have an application deadline of May 1, 2024.

Applicants are evaluated by the PhD Admissions Committee. Admission to the program requires (1) the applicant to meet the standards for a PhD student in SHRS, and (2) that a faculty member of the PhD program has an opening for an additional PhD student and agrees to be the Academic Advisor for that applicant.

For more information about admission to the PhD program contact:

Office of Admissions
 School of Health and Rehabilitation Sciences
 4044 Forbes Tower
 412-383-6558
 Fax: 412-383-6535
 E-mail: admissions@shrs.pitt.edu
 Website: www.shrs.pitt.edu

Financial Aid

Financial assistance is often available from a variety of sources, including graduate student assistantships and teaching assistantships. These assistantships typically require 20 hours per week of research, teaching, or clinical service in exchange for a tuition, health insurance, and an annual stipend. Other forms of financial assistance, including fellowships, may be available through individual faculty grants. Applicants interested in financial support should indicate this on their applications for admission. Acceptance into the PhD program does not assure that a student will be offered financial aid. Depending on the availability of financial aid, the offer of financial support to an applicant may be deferred until a later date. Since financial aid is limited, applicants who desire financial aid are encouraged to apply early.

Transfer Credits

If a student wishes to transfer credits, the student and the student's Academic Advisor must submit a Credit Transfer Request Form to Student Services during the first year of study. Transcripts verifying the graduate courses and course descriptions must accompany the petition. The student and student's Academic Advisor will be informed by the Associate Dean of Graduate Studies which courses are acceptable as transfer credits, and this information will be placed in the student's file. Based on University guidelines, students who transfer any credits from a master's degree must complete the PhD within 8 years; students who do not transfer credits must complete the PhD within 10 years.

Academic Advisor

Students admitted to the PhD program are assigned an Academic Advisor who is a member of the Graduate Faculty in SHRS. He/she will have research interests similar to the student's interests and will have agreed to be the student's Research Mentor.

The Academic Advisor and student will determine the Plan of Study for the student. They will also plan course work or other experiences to enable the student to demonstrate competency in the proposed content supporting the dissertation, as well as statistics/research methodology content in preparation for the Comprehensive Examination and Dissertation Proposal Defense. It is the responsibility of the Academic Advisor to provide advice to the student during the PhD program, especially with the following steps.

- Petitioning the Associate Dean of Graduate Studies for transfer of credits
- Preparing a Plan of Study outlining course work and dissertation credits leading to the PhD Degree
- Locating research opportunities
- Revising the Plan of Study as needed as the dissertation topic is formulated
- Finding a Primary Research Mentor

Plan of Study

The student and Academic Advisor will prepare a tentative Plan of Study within the first term of enrollment. If a Plan of Study has not been submitted by the end of the first term, the student will not be permitted to enroll in the subsequent term. The Plan of Study Form can be obtained on-line on the SHRS website. The Plan of Study should include transfer credits, course work to date, future course work, and dissertation credits leading to the PhD degree. A copy of the Plan of Study will be placed in the student's file. The Plan of Study should be reviewed each term at registration and updated as needed by the student and Academic Advisor. A final updated Plan of Study must be on file in the student's permanent file in Student Services in the term in which the student graduates, or the student cannot be certified by the Registrar for graduation.

More information regarding the following can be found in the PHD handbook on the SHRS website:

- SHRS Student Statistical Support
- Annual Review/Progress Reports
- Preliminary Examination
- Primary Research Mentor
- Comprehensive Examination
- Dissertation Proposal Defense
- Admission to Candidacy
- Dissertation
- Electronic thesis and Dissertation (ETD)
- Final Oral Defense of Dissertation
- Continued Use of Data After Leaving the University of Pittsburgh

Program Requirements

A minimum of 72 credits beyond the bachelor's degree level is needed for the PhD degree at the University of Pittsburgh. Some areas of focus within the PhD Program may require more than 72 credits. Up to 30 credits taken at the graduate level towards a master's degree may be accepted for transfer. In recognition of graduate study beyond the master's degree, no more than 12 additional credits may be accepted at the time of admission to meet the minimum credit requirement. Credit transfer requests are evaluated by the Associate Dean of Graduate Studies after matriculation.

In all cases, at least 36 credits must be completed as a PhD student at the University of Pittsburgh. No undergraduate credits (1000 level courses) may be applied towards the doctoral degree. Please note, credits transferred from another institution may not be used to substitute for credits of courses required in the degree study plan. For example, credits transferred for a statistics course taken at another institution will not count toward the 9 credits of statistics required in the PhD program here at the University of Pittsburgh. The student will still need to take 9 credits of statistics at the University of Pittsburgh.

The overall form and content of each student's program is the responsibility of the Graduate Faculty of SHRS. To carry out this responsibility, each student has an Academic Advisor who, in consultation with the student, plans a program of study and research in accordance with SHRS guidelines.

Course and Competency Requirements

The following requirements apply to all PhD in Rehabilitation Science students:

HRS 3000 - **Doctoral Seminar: 4 credits**

Core Areas

There are two Core Areas which are required for all students in the PhD in the Rehabilitation Science Program - Methods of Inquiry for Rehabilitation Sciences and Core Concepts in Disability and Rehabilitation Sciences.

All students pursuing a Doctor of Philosophy in Rehabilitation Science degree will be required to demonstrate basic competency in designing and appraising research studies and to demonstrate basic competency in understanding the fundamentals of disability and rehabilitation sciences.

CORE: Methods of Inquiry for Rehabilitation Sciences

Upon completion of the courses, students will be able to design a research study to answer a specific research question, including the best design for the question asked, sampling, controls for bias or confounding, and basic statistical analysis. They will be able to critically appraise research and apply it to clinical practice.

CORE: Core Concepts in Disability and Rehabilitation Sciences

Upon completion of the modules, students will be able to describe and discuss core concepts in disability and rehabilitation sciences, and analyze and synthesize multiple perspectives on the current and future state-of-the science.

A grade of B or better for each term of the Methods of Inquiry for Rehabilitation Scientists Core and Core Concepts in Rehabilitation and Disability Core (2 terms, 2 credits)

- HRS 3002 - Methods of Inquiry I - 1 credit
- HRS 3003 - Core Concepts I - 2 credits
- HRS 3004 - Methods of Inquiry II - 1 credits
- HRS 3005 - Core Concepts II - 2 credits
- HRS 3001 - **Dissertation Research: 18 credits**

Preliminary Examination for the Methods of Inquiry Core and the Core Concepts in Rehabilitation and Disability Core requires an unconditional PASS

Comprehensive Written and Oral Examinations in the content area of the dissertation requires an unconditional PASS

Content in the areas of research design and statistics: 9 credits

Participate in the teaching of at least one course

Successful completion of manuscript submission requirement

Manuscript Submission Requirements

Prior to scheduling the dissertation defense, each PhD student will demonstrate a minimum amount of experience in manuscript writing and submission by completing:

- 1 co-author manuscript accepted for publication
- 1 first author manuscript submitted and reviewed by a peer-reviewed journal
- Data-based manuscripts are strongly preferred.

Successful completion of grant application submission requirement

Grant Submission Requirement

Prior to scheduling the dissertation defense, each PhD student will demonstrate a minimum experience with grant writing and submission by completing one of the following:

- Submission and peer-review of a Doctoral Research or Research Fellowship Grant applications (SHRS Doctoral Scholarship Award or NIH or Private Foundations)
- Submission and peer-review of Pilot study grant applications (e.g., foundations, professional societies, the UPMC Rehab Institute Pilot Award)
- Completion of a grant writing course
- Submission of a provisional and non-provisional patent application
- Submission and peer-review of an SBIR like applications, or other options to secure funding for technology development (pitching an idea for commercial development, etc.)

Note: The peer-review may be internal or external peer review. A copy of the summary report from the review should be submitted with a copy of the grant application to Courtney Fleck (Courtney.fleck@pitt.edu) to be kept in the student's file.

Also, note: Submission to the \$1,000.00 SHRS scholarship award will NOT qualify for satisfying the grant submission requirement.

Successful defense of the dissertation research

Note: PhD students are required to maintain a 3.000 Cumulative GPA and receive a grade of C or better in all courses required by their program curriculum.

Students who receive a grade below a C in a required course must repeat that course and attain a grade of C or better to graduate. (Note: University regulations state that a student may repeat any course in which a grade of B- or lower is received **if an authorization to repeat the course is given by the student's adviser/faculty.**) Students will not be permitted to register for a course until they attain a C or better in its prerequisites. Failure to receive an acceptable grade after the second opportunity to complete a required course may result in the student being dismissed from the program and SHRS.

Department of Community Health Services and Rehabilitation Science

Doctoral

Doctor of Chiropractic

The degree to be awarded will be the *Doctor of Chiropractic (DC)*, which will prepare graduates to sit for the licensure examinations in all 50 states, the District of Columbia, the US Virgin Islands, and Puerto Rico. Upon successful completion of the curriculum, graduates of the program are eligible for the national certification examination through the National Board of Chiropractic Examiners (NBCE), which is required to practice as a chiropractor. The goal of the DC curriculum is to prepare students to become self-directed, self-accountable chiropractors who can function in a cost-effective manner in all settings, and with persons of all ages. Graduates of the program will be prepared to enhance spine and musculoskeletal function using evidence-based practice principles. Graduates of the Doctor of Chiropractic program will have a foundation on which to base further knowledge and skills in specialty areas and to contribute to development of the art and science of chiropractic care. Students should note that the requirements for professional licensure can vary by state as well as by country. Because such requirements can change frequently and often without notice, it is strongly encouraged, and is the responsibility of the student, to ensure the degree they earn will meet the requirements for licensure in the state or country in which they seek licensure.

Structure and function of the human body in health and disease

This includes the biomedical foundations of chiropractic practice, including molecular and cellular biology, anatomy, embryology, genetics, physiology, biochemistry, microbiology, immunology, neuroscience, and pathology.

Chiropractic studies

The curriculum includes an extensive scope of topics related to the skills, knowledge, and behaviors required in chiropractic practice. The history, scope, and nature of the contemporary practice of chiropractic will be covered in detail. Skill development in manual and manipulative procedures will be founded on the principles of biomechanics and kinesiology, integrated with the skills and knowledge of rehabilitation and exercise science. The biopsychosocial approach to pain syndromes will be stressed as the foundation for a deep understanding of the role of the chiropractic practitioner in the emerging value-based US healthcare system.

Diagnosis and clinical reasoning

Students master the knowledge and skills to perform a patient history and examination, to understand the indications for diagnostic imaging and laboratory investigations and their interpretation. Clinical reasoning will be emphasized in the development of professional competency in the differentiation of musculoskeletal and non-musculoskeletal causes of pain and dysfunction and the skill of differential diagnosis required for the practice of chiropractic.

Clinical education

The program proposes clinical education in a wide range of settings such as VA hospitals and community-based outpatient clinics, Federally Qualified Health Clinics and the St. Luke's University Health Network. Within UPMC facilities, inter-professional observational experiences are available within appropriate department settings, such as primary care, radiology, neurology, orthopedics, rheumatology, physical medicine and rehabilitation, pain medicine, neurosurgery, and geriatrics, as well as inpatient rehabilitation and physical/occupational therapy. These experiences will provide for the development and refinement of skills and competencies, progressing from observation, to participation, to independent practice within an integrated clinical model.

An important element embedded within the curriculum is weekly class meetings to integrate the educational content taught within the curricular tracts (Integrative Seminars). These weekly class meetings will be based upon clinical case studies.

- School of Law Faculty
- Programs and Course Offerings

The essential mission of the University of Pittsburgh School of Law is to help lawyers and legal institutions to meet the demands of a rapidly changing legal and professional environment. Pitt Law excels in teaching the next generation of diverse legal professionals; producing research of impact and contributing to society through public service.

In serving its students, the school is committed to an active and inclusive spirit of community and to the effective, efficient, and congenial provision of service. In teaching, research, and public service, the School of Law aspires to conduct all of its programs at a nationally prominent level of quality that adds luster to the legal and business communities of Pittsburgh; that makes the school relevant to the key needs of this region's private, public, and nonprofit sectors; and that distinguishes it as one of the finest public urban law schools in the United States.

For more than 110 years, the School of Law has prepared students to become excellent attorneys and leaders in both the legal profession and in society. Today, Pitt Law builds on this proud history by training lawyers to take on the opportunities and challenges of 21st century legal practice in the United States and around the world.

At Pitt Law we turn out practice-ready lawyers by providing students with both traditional law school classroom experiences designed to develop and hone analytical and communication skills and with experiential learning opportunities in one of our six clinics, which range in subject area from Environmental Law to Family Law to Health Law. Students who wish to focus their studies can enjoy the numerous benefits of enrolling in one of our five certificate programs, with their opportunities for international externships, instruction in litigation skills by teams of top practicing litigators, or membership on an intellectual property moot court team. Seven joint degree programs, including two partnerships with Carnegie Mellon University, permit students to craft discipline-bridging courses of study in areas including public health, business administration, and international affairs. And Pitt Law students can serve as editors at the award-winning website JURIST, the world's only Web-based, student-powered legal news source, which is viewed weekly by 100,000 viewers and is based right here at the School of Law.

Among its first-professional degrees, the School of Law offers the Juris Doctor (JD) degree; a number of joint degree programs with other schools of the University and Carnegie Mellon University, leading to both a JD and a master's degree; and LLM degrees for foreign law graduates as well as several certificate programs. The School of Law also offers graduate programs leading to a Master of Studies in Law (MSL) and a Doctor of Jurisprudence (SJD) degree. *For further information on the graduate programs, see the School of Law-Graduate Programs section of this bulletin.*

Contact Information

Financial Aid and Admissions are located in the same office at the University of Pittsburgh School of Law.

Office of Admissions and Financial Aid
Barco Law Building

3900 Forbes Avenue
Pittsburgh, PA 15260

Website: www.law.pitt.edu

General Information: (412) 648-1413
Admissions Information: (412) 648-1805
Financial Aid Information: (412) 648-1415
Fax: (412) 648-1318

Email Admissions: admitlaw@pitt.edu
Email Financial Aid: lawfa@pitt.edu

Office Hours: 8:00 a.m. - 5:00 p.m. Monday through Friday

Walk in appointments are available during office hours; however, scheduling an appointment is encouraged. To schedule an appointment, please email or call our office.

Admissions

Pitt Law is highly competitive, and we base admissions decisions on many factors. Our admissions committee will carefully evaluate your graduate work, professional experience, and undergraduate GPA and make a decision on a rolling basis, or you may request a priority decision within 14 business days. Each program, degree and certificate has various requirements. Please see each program's requirements.

Qualifications for Admission to the Bar: In addition to a bar examination, there are character, fitness, and other qualifications for admission to the bar in every U.S. jurisdiction. Applicants are encouraged to determine the requirements for any jurisdiction in which they intend to seek admission by contacting the jurisdiction. Addresses for all relevant agencies are available through the National Conference of Bar Examiners.

Transfer Students

The University of Pittsburgh School of Law will accept transfer students after those students have successfully completed the first year of academic study at another law school. Applicants must complete the law school application and submit the following:

- Application fee
- Official LSDAS report
- Letter of good standing from the current law school dean
- Certified law school transcript
- Letter of recommendation from a current law school professor
- Final official undergraduate transcript

The deadline for submitting an application is June 1st of every year. Decisions made on transfer students depends on the number of seats available at Pitt Law, the QPA from the current law school and the competitiveness of the current law school.

If admission is granted, the transfer student's completed law school work will be evaluated for transfer credit in light of the curricular offerings at Pitt Law. Only up to 32 transfer credits will be accepted. However, only up to 29 credits will be accepted in the case of (1) a transfer student admitted from a U.S. law school that is not approved by the American Bar Association, (2) a transfer student who is a graduate of a foreign law school and who is admitted after completion of the Pitt Law LL.M. program, or (3) a transfer student who has not completed the Pitt Law LL.M. program and who

is a graduate of a foreign law school for law school work done outside of the United States. All transferred credits must comply with the restrictions in ABA Standard 505.

In keeping with the requirements of The Order of the Coif, students are eligible for Coif membership only if they complete at least 75% of their law studies in graded courses. For transfer students, any credits transferred without grades will not count toward this requirement.

Visiting Students

A student may apply to visit at Pitt Law if he/she has completed two years of law study at another law school and has the permission of the dean of their current school. Applicants must complete the law school application and submit the following:

- Application fee
- Copy of your LSDAS report
- Letter from the dean stating the third year at Pitt Law will count toward a degree from the previous school
- Certified law school transcript.

The deadline for submitting an application is June 1st of every year. Decisions made on visiting students depends on the number of seats available at Pitt Law, the QPA from the current law school and the competitiveness of the current law school.

Scholarships and Financial Aid

All admitted students are reviewed for merit scholarship awards at time of admissions to Pitt Law. The merit scholarships are renewable for the second and third years of law school provided the recipient maintains a cumulative grade point average of 2.8 in their legal studies. Scholarship renewal review is conducted at the end of the academic year. Students whose scholarship is not renewed may request to have their scholarship reinstated at any time based upon earning the cumulative 2.8 grade point average in their legal studies.

Approximately 70 percent of the student body receives scholarship funds from the School of Law in the form of merit or need-based scholarship awards. The Law School offers various merit scholarships at the time of admissions. Some scholarship require an additional application and others are based on the materials submitted in your admissions application. If admitted, you will be emailed any scholarship application that requires additional materials.

Please visit the Pitt Law website for more details on available scholarships or contact the School of Law Financial Aid Office.

Loans

For most students the major portion of law school costs are met through the Federal Unsubsidized Stafford Loan, Federal Graduate PLUS Loan, and alternative educational loan programs.

Generally, to be considered for an educational loan as a law student, you must:

- Complete the Free Application for Federal Student Aid (FAFSA)
- Be a U.S. Citizen, permanent resident, or other eligible non-citizen
- Enrolled at least half-time in a degree program
- Registered with the Selective Service, if required
- Not owe a refund on a federal grant or be in default on a prior federal loan
- Maintain Satisfactory Academic Progress.

Loan Counseling

Before federal loan funds can be released, all incoming students must complete a Loan Entrance Counseling session, regardless of whether they have borrowed in the past. This counseling session is a federal requirement for all students to insure that they understand their rights and responsibilities as a borrower. Loan counseling can be completed online at www.studentloans.gov.

All students who have borrowed through the Federal Loan Program are required to attend a Loan Exit Counseling session before they graduate or drop below half time. The counseling sessions will be schedule in April for all third year students. All third year students will receive notification of the time of the counseling sessions. The counseling sessions informs students of their rights and responsibilities as a borrower as well as giving students information on their repayment options.

Flex-time Program

The flex-time program is offered to students whose outside obligations necessitate a more flexible program of study than is traditionally available. All classes are still held during the daytime; however, hours may be planned according to personal needs and interests. The pace is intended to be less strenuous than the regular program. Course loads are optimally designed to result in graduation in four years rather than three with no fewer than 10 credits per semester. The option to accelerate is also available to flex-time students after the first year of study. Flex-time students are still required to pay full tuition. Applicants to the flex-program must include a letter with their application explaining their individual circumstances. The application process is otherwise the same.

Please note that flex-time is not a part-time program.

Academic Standards

The School of Law Policy on Written Work for Credit, its Standards of Academic Integrity, the Grading Guidelines, and other academic policies of the school are included in the Academic Rules section of the School of Law's web site.

Professional and Career Development

The Professional Development Office is dedicated to providing students and graduates with the information and tools necessary for successful career development and advancement. Our office assists students and graduates in their pursuit of careers in a wide variety of settings, including private law firms, public interest organizations, government agencies, corporate and business environments, judicial clerkships, academia, and non-traditional careers.

Through an extensive array of services including individual counseling, educational programming, interviewing opportunities, printed and online resources, job posting databases, and a substantial alumni network, the PDO helps educate students and graduates for a lifetime of successful career management.

The PDO also serves as an intermediary between prospective employers and law students. By posting job vacancies, scheduling on-campus interviews, sponsoring programs, and participating in and promoting off-campus job fairs, we provide a range of employment prospects. Through ongoing outreach, the PDO Staff endeavors to create ever-increasing employer interest in Pitt Law students and graduates.

Each student will meet with a Career Counselor during their first year and is encouraged to meet with the counselor as often as needed. As a students begins to develop his or her legal career path they are able to work with an PDO

counselor whose background mirrors the student's desired path. Our office is open Monday- Friday 8:30 a.m. - 5:00 p.m. Additionally, PDO has daily walk-in hours and hosts "Facetime" in the student lounge.

Programs and Course Offerings

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

School of Law's Programs

You expect the Juris Doctor (JD) program at Pitt Law to offer a solid foundation in the basics of legal education. You might not expect the opportunity to specialize in areas like environmental and energy law; health law; and intellectual property, technology, and innovation law.

You might not expect to be able to pursue both a JD and a second master's degree at another Pitt school-in an area such as bioethics, business, public health, and social work-or at nearby Carnegie Mellon University in less time than it would normally take to complete two consecutive degrees.

You might not expect a 30-credit Master of Studies in Law advanced degree designed for graduates and mid-career professionals seeking to enhance their careers with a versatile alternative to the traditional three-year Juris Doctor degree. Or a Master of Laws degree to provide foreign law graduates with critical training in the common law legal tradition and the U.S. legal system during an academic year. Or even a completely-online Health Care Compliance Online Graduate Certificate Program developed by experts in compliance, law, and online education.

And you might not expect how quickly and the extent to which you'll get to apply those classroom lessons. Assisting the public through work with a clinic (health law, elder law, the environment, immigration, and more); serving as a full-time extern on Capitol Hill or throughout Washington, D.C., as part of the Semester in D.C. Program; interning with a federal agency, nonprofit, or corporation; and participating in a national or international moot court competition are just some of the opportunities you'll have to practice your skills and hone your expertise even before you graduate.

Certificate

Law - Environmental and Energy Law Programs

The School of Law is currently in the process of transitioning its longstanding Environmental Law, Science & Policy Certificate Program into a new Energy & Environmental Law Area of Concentration:

Students who were admitted with the Class of 2016 or earlier classes can choose either to pursue the Certificate or the Area of Concentration. Whichever choice a student makes, the student must register for, and complete the requirements of, the chosen program in order to have completion of that program reflected on their transcripts.

Students who are admitted with the Class of 2017 or later classes may only enroll in the Area of Concentration.

The law around the development, sale, use and preservation of natural resources is the practice framework for energy and environmental lawyers. Pitt Law offers a flexible concentration that allows students to pursue transactional, regulatory, litigation, or policy-based courses in the area of energy & environmental law. Students pursuing this concentration may explore the law of shale plays, utility law, international commercial transactions, pollution control laws, conservation statutes, renewable energy incentives, and climate law and policy.

Energy and environmental law is often practiced in or through interactions with administrative agencies and tribunals. The Concentration exposes students to administrative decisionmaking, statutory interpretation, rulemaking and adjudication, and judicial review of agency decisions.

Area of Concentration

All students must follow the JD degree requirements in order to graduate. To qualify for this concentration, students may pursue this concentration by taking foundational courses in environmental or energy law, 5-6 credits of electives, and 4-6 skills-based credits.

Please note that this program may require that you complete an internship, externship, or other field work at a facility or facilities external to the University and that such facility or facilities may require a criminal background check, an Act 33/34 clearance (if applicable), and perhaps a drug screen to determine whether you are qualified to participate.

- LAW 5340 - ENVIRONMENTAL LAW
- Or
- LAW 5038 - ENERGY LAW AND REGULATION
- Elective Courses (5-6 credits required)**

Law - Health Law Certificate

Students enrolled in a degree program at the University of Pittsburgh School of Law can develop an expertise in the rapidly changing, steadily growing field of health law through the Law School's Health Law Certificate Program.

Pitt's program, one of the oldest in the country, is intended to give students interested in health law a basic grounding in the field, complemented by clinical experience and more in-depth study of advanced topics and closely related areas of law. Students are encouraged to obtain the same broad background in law expected of all graduates for the University of Pittsburgh School of Law.

The health care industry comprises more than one-sixth of the entire economy-larger even than the automobile industry. It is also a large consumer of legal services. Law firms ranging from the largest to the smallest provide legal services to hospitals, health insurance companies, nursing homes, physicians' practices, home health agencies, and pharmaceutical and device manufacturers, to name some of the more prominent. In addition, many federal and state agencies and many of the larger providers of health care goods and services employ a large number of lawyers in house. Although there are a few areas that are substantively unique-such as Medicare and Medicaid reimbursement, certificate of need requirements, and fraud and abuse prohibitions-much of health law involves the application of other areas of law, such as corporate law, employment law, and real estate law, to the health care industry's special circumstances.

The Health Law Program provides students with a strong foundation in health law that will enable them to practice in a variety of contexts, including law firms, health care management firms and insurers, government, and health care institutions. A combination of classroom and skills components acquaints students with everything from complex business and legal transactions, to bioethics and patient care issues, to the variety of legal issues that arise in the operation of a health care institution. Students gain hands-on experience in these areas through their work in the Law School's clinics and practicums, and in externships and summer jobs available in the health care setting.

In addition to courses taught by regular law school faculty, leading practitioners in various fields of health law such as fraud and abuse, business transactions, compliance, disabilities law, nonprofit organizations, and privacy teach courses designed to relate theory to practice.

Requirements

The Health Law Certificate Program is an educational program of concentration in health law for students in their second and third years of the JD curriculum. Admission is available to all students entering their second year in the JD program.

Students must complete the following requirements to receive a Certificate in Health Law:

- Complete a minimum of 18 credits in courses in health law, including Health Law and Policy, and Current Issues in Health Law;
- Write their faculty-supervised paper on a topic in health law;
- Complete a clinic, externship, or practicum;
- Take a minimum of two health law electives.

Required Level Courses (register for 1 course)

- LAW 5395 - HEALTH LAW AND POLICY

Core Elective Courses (register for 2 courses)

- LAW 5464 - BIOETHICS AND LAW *

- LAW 5811 - HEALTH CARE BUSINESS TRANSACTIONS *
- LAW 5284 - HEALTH CARE COMPLIANCE *
- LAW 5089 - PUBLIC HEALTH LAW *

Skills Course (register for at least 2 credits)

- LAW 5955 - D.C. EXTERNSHIP
- LAW 5391 - ELDER LAW CLINIC
- LAW 5393 - HEALTH LAW CLINIC
- LAW 5497 - HEALTH LAW PRACTICUM: ADR
- LAW 5538 - MEDICARE & MEDICAID PRACTICUM
- LAW 5875 - SOCIAL SECURITY DISABILITY PRACTICUM
- LAW 5973 - VETERAN'S PRACTICUM

National Health Law Transactional Competition

Additional Electives (register for at least 2 related courses)

- LAW 5251 - BIOTECHNOLOGY LAW
- LAW 5212 - BUSINESS PLANNING, ENTREPRENEURSHIP AND TECHNOLOGY
- LAW 5135 - COMMERCIALIZING NEW TECHNOLOGIES
- LAW 5672 - IMPLICIT BIAS IN HEALTH CARE *
- LAW 5430 - INFORMATION PRIVACY: LAW AND PRACTICE
- LAW 5339 - LAW OF DISABILITY DISCRIMINATION
- LAW 5283 - MENTAL HEALTH LAW
- LAW 5355 - NON-PROFIT ORGANIZATIONS
- LAW 5313 - REPRDCTV LAW & POLICY
- LAW 5201 - ADMINISTRATIVE LAW
- LAW 5731 - CURRENT ISSUES IN HEALTH LAW

* This course may be used to satisfy the Additional Electives requirement or the Core Elective requirement, but not both.

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Total Credits: 18

Law - Intellectual Property, Technology & Innovation Law

The Intellectual Property and Innovation Law Area of Concentration is designed to allow students to obtain a focused introduction to these bodies of law and practice while simultaneously getting a broad grounding in modern law practice generally. No scientific or technical background is required to pursue the Area of Concentration or to practice law in any of the related fields, though students who wish to practice law as a patent prosecutor do need to have an engineering degree or other, similar technical qualification.

Students may pursue this concentration by taking foundational courses in intellectual property law, 5-6 credits of electives, and 4-6 skills-based credits.

Certificate Requirements

All students must follow the JD degree requirements in order to graduate. To qualify for this concentration, students must have a minimum of 14 credits and meet the below course requirements. In addition, students can opt to use one of the following as a Skills Component:

- Giles Sutherland Rich Moot Court Competition (1 credit)
- Cardozo/BMI Moot Court Competition (1 credit)
- Externships with government agencies or other organizations that focus on intellectual property and/or technology law, practice, and/or policy (4 credits)
- Semester in DC externship with a focus on intellectual property and/or technology law, practice, and/or policy (13 credits)

Foundational Courses (2 courses totaling 5-6 credits required)

- LAW 5328 - COPYRIGHT *
 - LAW 5260 - INTELLECTUAL PROPERTY *
 - LAW 5210 - PATENT LAW *
 - LAW 5694 - TRADEMARK LAW *
- * may be taken as elective if not taken as a foundational

Elective Courses (5-6 credits required)

- LAW 5895 - ARTIFICIAL INTEL & LGL RES SEM
- LAW 5251 - BIOTECHNOLOGY LAW

 - LAW 5276 - PATENT LITIGATION
 - LAW 5695 - TRADEMARK LAW PRACTICE

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Law - International and Comparative Law Certificate

The International & Comparative Law Certificate program is intended to provide a foundation for careers and further study in the application of legal regimes to transnational and international relationships. Students should keep in mind that in order to be a good international or comparative lawyer, one must first be a good domestic lawyer. Thus, students in the certificate program are expected and encouraged to obtain the same broad background in law expected of all graduates of the University of Pittsburgh School of Law.

Requirements

To receive the International & Comparative Law Certificate upon graduation, students must complete:

- the required courses (below);
- satisfy the Upper Level Writing Requirement (ULW) with a paper focused on international or comparative law content;
- complete twelve credits of elective courses (below);
- and attend two designated CILE programs in each of the candidate's 2L and 3L years at the School of Law.

The courses that qualify as international and comparative law electives for purposes of the Certificate requirements are determined annually. In general, a course will satisfy the elective requirement if at least 25 percent of its content is in the areas of international or comparative law. Listed below are courses offered in recent years that have satisfied this elective requirement - you should consult the schedule of courses for any given term to determine what courses are being offered and the credits awarded. For new course offerings, you should contact CILE to determine if a given course will satisfy the elective requirement. Courses in the School of Law that do not have a predominantly international or comparative law subject matter may be approved for elective purposes on a case-by-case basis at the discretion of the CILE Academic Director if, in practice, the student's work in the class included that element in a particularly substantial manner; for example, the student satisfies the written requirement of a "W" course with a paper using a comparative law approach. (Note this would not be permitted if the given paper was also being used to satisfy the ULW requirement.)

Coursework outside the School of Law may also be eligible to satisfy up to 3 elective credits if the CILE Academic Director determines that at least 25 percent of its content is in international topics, that it otherwise is an appropriate course for these purposes, and the use of these credits has been approved by the Associate Dean of the School of Law as qualifying under School policy for the six credits of non-School of Law coursework permitted to be credited towards the JD degree. Proposed elective courses outside the School of Law must be approved in advance by the CILE Academic Director as well as in accordance with general School of Law policies.

Required Courses

- LAW 5226 - INTERNATIONAL LAW
- LAW 5225 - INTERNATIONAL BUSINESS TRANSACTIONS

Example Electives

- LAW 5618 - ARABIC FOR LAWYERS 1
- LAW 5619 - ARABIC FOR LAWYERS 2
- LAW 5124 - THE CIVIL LAW TRADITION IN U.S. COURTS
- LAW 5304 - COMMERCIAL TRANSACTIONS
- LAW 5213 - CONFLICT OF LAWS
- LAW 5307 - FOREIGN AFFAIRS, INTERNATIONAL LAW AND THE CONSTITUTION
- LAW 5469 - FRENCH FOR LAWYERS 1
- LAW 5471 - FRENCH FOR LAWYERS 2
- LAW 5986 - INTERNATIONAL ARBITRATION SEMINAR
- LAW 5043 - INTERNATIONAL COMMERCIAL ARBITRATION
- LAW 5275 - INTERNATIONAL AND FOREIGN LEGAL RESEARCH
- LAW 5653 - INTERNATIONAL HUMAN RIGHTS
- LAW 5547 - INT'L INTELLECTUAL PROPRTY LAW

- LAW 5858 - INTERNATIONAL SALES SEMINAR
- LAW 5841 - INTERNATIONAL TAX
- LAW 5365 - INTRODUCTION TO RUSSIAN AND UZBEKISTAN LEGAL SYSTEM
- LAW 5866 - ISLAMIC LAW AND JURISPRUDENCE SEMINAR
- LAW 5873 - PRIVATE INTERNATIONAL LAW SEMINAR
- LAW 5475 - SPANISH FOR LAWYERS 1
- LAW 5476 - SPANISH FOR LAWYERS 2
- LAW 5694 - TRADEMARK LAW
- LAW 5453 - TRANSNATIONAL LITIGATION

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Law - J.G. Civil Litigation Certificate Program

In the Fall of 2021, the J.G. Civil Litigation Certificate Program was inactive for students to enroll in. Students who were enrolled prior to the Fall 2021 must complete the program by Spring 2023 term.

Are you drawn to the real life drama of the courtroom? Do you have dreams of becoming a trial attorney? If so, then the University of Pittsburgh School of Law (PittLaw) may just be the place for you. Through its unique John P. Gismondi Civil Litigation Certificate Program, PittLaw can provide you with a unique curriculum devoted exclusively to training the trial lawyers of tomorrow.

During the first year of law school, all students take the same courses. Those students who wish to register for the Gismondi program, do so at the beginning of their second year of law school. During their second and third years, all students enrolled in the certificate program will take certain required foundational core courses, a clinic or practicum, as well as a number of specialized classes. The heart of the Gismondi program is a collection of specialized courses taught exclusively by a pre eminent group of practicing trial attorneys whose insight and experience offer an invaluable perspective in the classroom. Together with our core courses, these select courses provide a level and depth of litigation training unlike that available at most any other law school.

In each of these specialized skills courses, class size is kept small so as to enrich the learning experience. Students not only are taught legal rules and principles in a typical lecture format, but more importantly, they are assigned to "role play" in a variety of real world litigation scenarios, each designed to develop specific skills which are essential to successful trial work.

Students complete their training by taking a required litigation skills clinic or practicum selected from this group of options: Civil Practice Clinic (Health Law or Elder Law), Tax Clinic, Immigration Clinic, Environmental Law Clinic, PA Practice Practicum, Lawyering III Clinic, Unemployment Compensation Practicum, Criminal Prosecution Practicum, Veterans Practicum or Family Law Clinic. In all of these clinics, students have the potential of representing real clients in actual court proceedings.

The students in the John P. Gismondi Civil Litigation Certificate Program will complete their law school education having developed a set of skills which better prepares them to do courtroom work than traditional law school graduates,

and that advantage, in turn, makes the Gismondi certificate students more attractive to law firms seeking to hire young and enthusiastic litigation associates.

Certificate Requirements

All students must follow the JD degree requirements in order to graduate. To qualify for this certificate, students must complete the Core Courses and Required Specialized Skills Courses listed below. In addition, students must take a litigation skills clinic or practicum, or a combination thereof, approved by the Director of Civil Litigation Program for a minimum of four credits.

Students must participate in the Murray S. Love Trial Moot Court Program during their second or third year or the Interscholastic Mock Trial Team (enroll in the attendant seminar Mock Trial Strategy and Practice).

Students must participate in the Program's Court Observation. Students will spend a day organized by the Academy of Trial Lawyers of Allegheny County observing court proceedings. Students will fulfill this requirement in their third year. Students must sign up with the Program Director in order to participate on one of these dates.

Students are required to complete an Upper Level Writing Requirement of 2 credits. Students may satisfy this requirement by taking any seminar or undertaking an independent study project if the paper they write is on an unresolved litigation related issue and the issue is approved by the Director of the Civil Litigation Certificate Program and the faculty member supervising the seminar or independent study project. The paper must comply also with applicable requirements of the professor and the Student Handbook relating to the Upper Level Writing Requirement.

- LAW 5103 - EVIDENCE
 - LAW 5407 - TRIAL ADVOCACY
- Or
- LAW 5616 - MOCK TRIAL STRATEGY AND PRACTICE
 - LAW 5129 - FEDL COURTS & FEDL LITIGATION

Or

- LAW 5240 - PENNSYLVANIA PRACTICE
- Students must take four of these five courses:
- LAW 5320 - LITIGATION STRATEGY AND PLANNING
 - LAW 5295 - EXPERT WITNESS
 - LAW 5236 - PRE-TRIAL PRACTICE-PLEADINGS AND DISCOVERY
 - LAW 5223 - ADVANCED TRIAL EVIDENCE
 - LAW 5197 - ADVANCED PENNSYLVANIA TORT PRACTICE

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Law - Public Policy Concentration

You can earn the Public Policy Concentration by completing the Policy Track of the Semester in DC Program in the spring semester of your 2L or 3L year.

While law students learn many skills that are useful for policy-related work, they do not typically learn how to apply those skills in a policy context, for example by analyzing a government agency report, mapping the stakeholders on a

particular issue, preparing questions for a Senate hearing, writing a short policy brief, or developing an advocacy campaign.

The Semester in DC Program Policy Track is designed to fill this gap by teaching you how to apply your legal advocacy, research, and writing skills in the policy context, so that you can successfully engage in policy-related work after graduation. The Policy Track is offered each spring semester jointly with the Graduate School of Public and International Affairs (GSPIA) at Pitt's Washington Center in downtown Washington, DC.

Highlights of the Semester in DC Program Policy Track include:

- A policy-related externship with a government or nonprofit organization in Washington, DC
 - Classes that are focused on learning from policy experts who regularly visit as guest speakers and on attaining pragmatic policy advocacy, analysis, and writing skills
 - Joint classes with GSPIA students, so that both policy and law perspectives are represented in each class
 - An individual alumni mentor for each student, as well as connections with Law and GSPIA's alumni network of hundreds of attorneys and policy practitioners in the Washington, DC area
- Semester in DC Program alumni have gone on to do all kinds of policy work after graduation, including positions:

- With the U.S. Departments of State and Health and Human Services
- With U.S. Senate and House offices
- In healthcare policy for Johnson & Johnson, the Maryland Department of Health, and the Legal Resource Center for Public Health Policy
- In environmental policy for the Sierra Club, the Environmental Investigation Agency, and Voices for Progress
- In child/family policy for the Children's Law Center and First Focus
- In labor policy for the AFL-CIO

Requirements

You can earn the Public Policy Concentration by completing the Policy Track of the Semester in DC Program after taking the required 1L Legislation and Regulation course.

The Public Policy Concentration requires students to earn 15 credits in the policy-related classes listed below. Students will have already completed the 3-credit foundational course in Legislation and Regulation in their 1L year. Students can complete the 12 remaining credits by participating in the Semester in DC Program Policy Track, which offers the listed courses. Only the courses listed below may be used to fulfill the requirements of this concentration; other courses may not be substituted.

Foundational Course

- LAW 5032 - LEGISLATION AND REGULATION

Electives (up to 7 credits)

- LAW 5877 - PUBLIC POLICY SEMINAR
- LAW 5666 - LOBBYING AND ADVOCACY
- LAW 5668 - POLICY COLLOQUIUM

or

- LAW 5954 - D.C. SEMINAR

(Students may apply 1 credit from the DC Seminar to the Public Policy Concentration if their seminar papers are approved in advance as policy-focused.)

Skills Component (6 credits required)

- LAW 5667 - POLICY EXTERNSHIP *
- LAW 5955 - D.C. EXTERNSHIP *

* must be approved in advance as policy focused.

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Law - Tax Law Program

The Area of Concentration in Tax Law is intended to provide students with a solid foundation in tax law that can be used either to enter a career in tax law, as a basis for pursuing further study in tax law, or as an adjunct to a career in another area of law. Tax law is unique in that it intersects with every area of the law—from energy and environmental law to corporate law to health law to personal injury law, just to name a few examples. Knowledge of tax law is thus important whether one wishes to specialize in tax law or whether one wishes to gain a deeper knowledge of tax law to improve skills in another area of law (e.g., in advising corporations, partnerships, and other businesses).

Students may pursue this concentration by taking a foundational course in tax law, six credits of elective courses, and three credits of skills-based courses.

Area of Concentration

All students must follow the JD degree requirements in order to graduate. To qualify for this concentration, the Tax Law Area of Concentration requires a minimum of 13 credits. The requirements for the program are divided into three categories—foundational, elective, and skills. Students must take a foundational course in tax law, 6 credits from among the listed elective courses, and 3 credits from among the listed skills courses.

Foundational Course (Required)

- LAW 5105 - FEDERAL INCOME TAXATION

Elective Courses (6 credits required)

- LAW 5817 - CORPORATE TAXATION
- LAW 5371 - PARTNERSHIP TAXATION
- LAW 5259 - ESTATE AND GIFT TAX
- LAW 5841 - INTERNATIONAL TAX *
- LAW 5325 - FEDERAL TAX PRACTICE AND PROCEDURE
- LAW 5355 - NON-PROFIT ORGANIZATIONS
- LAW 5273 - STATE AND LOCAL TAX
- LAW 5511 - TAX LAW & POLICY SEMINAR
- LAW 5931 - PITTSBURGH TAX REVIEW

*Only one credit maximum of work on the Pittsburgh Tax Review can count toward the concentration.

Skills Component (3 credits required)

- LAW 5425 - LOW-INCOME TAX CLINIC
Tax Law Moot Court Competition
- LAW 5414 - ESTATE PLANNING
Externship in the area of tax law
- LAW 5955 - D.C. EXTERNSHIP
* may be alternately used as a Skills Component

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Doctoral

Law - Juridical Science, SJD

Program Information

The Doctor of Juridical Science (SJD) is the Law School's most advanced degree, which is designed for legal academics who wish to pursue advanced independent study, research and writing. The Law School's SJD program offers candidates the opportunity to become active members of a vibrant legal community.

Degree Requirements

The SJD is a research degree. There is no formal requirement for candidates to pursue course work, whether for credit or otherwise, other than required participation in a non-credit, ungraded colloquium for SJD students during their first year in the program. However, a candidate may be required by his advisor to take or audit courses and participate in seminars and discussions which will further the student's understanding of his or her field of knowledge and its relation to other fields. Each candidate will be allowed 2-4 years to complete the program, the first year of which must be spent in residency at the University of Pittsburgh School of Law. The year of residency is in addition to the LLM year for Pitt Law LLM graduates. A candidate is required to conduct rigorous research and produce an original dissertation that will contribute significantly to legal scholarship and further understanding of the law. Specifically, a candidate is required to submit a dissertation overview, defend that overview, submit a doctoral dissertation, and successfully defend the dissertation. The SJD degree must be completed under the supervision of a faculty member who has consented to serve as the faculty advisor.

Graduate Certificate

Law - Corporate Compliance Certificate

The Online Graduate Certificate in Corporate Compliance seeks to fill a growing need for compliance professionals and leverage the Law School's reputation and expertise in this area.

As international trade and globalization continues to grow, U.S. corporations doing business abroad and foreign corporations doing business with U.S. corporations find themselves subject to a multitude of U.S. legal compliance requirements. Organizations are starting to recognize reputational risk can be as great as or greater than strategic, financial or operational risks. As a result, compliance programs are growing as many organizations implement them to prevent and detect misconduct and to protect the interests of employees, shareholders, and businesses and to guard against reputational risk.

Compliance professionals are key to ensuring that organizations are complying with their own policies and procedures as well as applicable legal statutes, regulations, and judicial decisions.

The Online Graduate Certificate in Corporate Compliance is designed for U.S. and foreign corporate employees who work or wish to work in the corporate compliance area, such as lawyers, paralegals, and other compliance professionals in finance, internal audit, human resources and environmental sustainability, in order to enhance their careers by expanding their knowledge, skills, and professional understanding of corporate compliance.

The program will cover key foundational topics in corporate compliance, and it will enhance the ability of students to understand the fundamentals of corporate compliance, to design a compliance program as well as related policies and

procedures, and to evaluate the effectiveness of ethics and compliance programs. Faculty - both full-time and part-time - who teach or practice corporate compliance will teach the four mandatory and one elective 3-credit courses over the course of the 40-week program. The required curriculum will cover legal aspects of corporate compliance; ethics and compliance; designing, measuring effectiveness, and auditing compliance programs; and conducting investigations and risk assessments. In addition, there will be several electives available to students who wish to specialize in a particular area of compliance such as Foreign Corrupt Practices Act, Antitrust, International Trade and Export, Pharmaceutical and Medical Devices, and Securities compliance.

Students will learn how to establish an effective program to monitor organizational misconduct; to ensure that employees and third parties have mechanisms in place to report misconduct and seek advice; to audit compliance and ethics risks; and to evaluate the effectiveness of the ethics and compliance program as well as other issues around public company disclosures and compliance programs. The potential clientele discussed will include individuals, as well as for-profit and nonprofit corporations, and hybrid and governmental entities.

The program will help position students for leadership in:

- Corporate compliance and ethics
- Regulatory affairs
- Compliance program training
- Policy development, including CSR (Corporate Social Responsibility) and ESG (Environmental, Social and Governance)
- Auditing and monitoring
- Financial fraud
- Environmental and other corporate compliance

Curriculum:

- LAW - Conducting Investigations and Risk Assessments
- LAW - Designing, Measuring Effectiveness, and Auditing Compliance Programs (based on US DOJ guidance)
- LAW - Ethics and Compliance
- LAW - Legal Aspects of Corporate Compliance
- LAW - Special Topics in Corporate Compliance

Law - Business Law Graduate Certificate

The Online Graduate Certificate in Business Law is designed for business employees, for those who wish to work in business, and for paralegals, who seek to enhance their careers by expanding their knowledge, skills, and professional understanding of general business law.

The program will cover key foundational topics in business law, and it will enhance the ability students to understand the fundamentals of business law. Faculty - both full-time and part-time - who teach or in some area of business law will teach the five required 3-credit courses over the course of the 40-week program.

Requirements:

- Business Organizations and Tax Law
- Commercial Law and Technology Law
- Human Resources Law
- Regulatory Law
- Dispute Resolution

- LAW 2056 - BUSINESS & TAX LAW
- LAW 2057 - COMMERCIAL & TECHNOLOGY LAW
- LAW 2074 - SELECTED TOPICS IN HUMAN RESOURCES LAW
- LAW 2422 - ALTERNATIVE DISPUTE RESOLUTION

Total Credits: 15

Law - Certificate in Disability Legal Studies

The law exerts a powerful and direct impact on the lives of persons with disabilities. It is estimated that close to 20 percent of the US population, nearly 54 million people, have a disability, with a dramatic increase in the proportion since 1970. People with disabilities comprise one of the largest, least employed, and most disenfranchised minority groups in society.

This 15-credit certificate program is a unique effort to provide legal education to those working in the administration of and provision of services in disabilities programs. Administrators, educators, health practitioners, advocates, social workers, architects, city planners, attorneys, and business leaders, among others, could potentially benefit from the program's instructional content.

Requirements

Students enrolled in the certificate program are required to take four core courses.

- LAW 2814 - U.S. LEGAL SYSTEM
- LAW 5395 - HEALTH LAW AND POLICY
- LAW 5339 - LAW OF DISABILITY DISCRIMINATION
- LAW 5028 - TORTS

Or another first-semester required course if the Certificate Director deems it preferable for a particular student's interest

The remaining 3 credits (minimum) may be satisfied by any of the following (or similar) courses which are offered as instructor availability permits:

- LAW 5464 - BIOETHICS AND LAW
- LAW 5283 - MENTAL HEALTH LAW

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Law - Health Care Compliance Online Graduate Certificate Program

The Health Care Compliance Graduate Certificate Program is a fully online, accelerated 10-month graduate certificate program designed for working professionals. This advanced, accelerated program will support you as you take on more strategic compliance roles. In this program, you will:

- Learn the relevant law, practical applications of compliance, best practices and explore current issues;

- Interact with expert faculty-professors from the School of Law and School of Public Health, current and former federal regulators, and compliance industry experts;
- Network and collaborate with your peers in other industries and locations through innovative online applications; and
- Work on weekly assignments when and where you choose.

This program is designed for:

- Compliance professionals who wish to enhance their understanding and professional development;
- Attorneys who wish to acquire an appreciation of the compliance industry, client needs, and issues;
- Health care professionals who must understand compliance;
- Industry administrators and leaders; and/or
- Those interested in an exciting career change.

HCC Online course work is asynchronous, meaning there are no scheduled meeting times or locations. You will complete each course in the program within eight weeks, working through weekly modules, based on your own schedule and from any location.

The objectives of the Health Care Compliance Online program are to:

- Provide an understanding of the laws that shape the health care industry in general, and compliance in particular;
- Help students acquire a deeper understanding of the regulatory context of compliance;
- Help students develop the skills and knowledge necessary to identify compliance issues, guide change, and navigate complexity while supporting an ethical culture;
- Identify best practices in compliance management;
- Enhance critical thinking and problem solving skills in a compliance context;
- Help students acquire knowledge and skills to manage conflict;
- Improve students' communication and presentation skills; and
- Facilitate peer-to-peer learning and networking opportunities.

Requirements

Applicants must have earned a baccalaureate degree at an accredited institution. Admissions decisions will be made based on professional experience, academic credentials, and a personal statement. In some instances an interview (online or via phone) may be required.

To apply for the program, complete the Health Care Compliance Online Application available at Pitt Online's website.

Note: Please visit the Pitt Online State Authorization page to be sure your state is authorized to enroll students online. Currently, pursuant to state laws and regulations, online programs at the School of Law are authorized to enroll students from all states with the exception of: Arkansas, Kentucky, Minnesota, Missouri, Oregon, Washington State. Maryland Residents: the University of Pittsburgh is registered with the Maryland Higher Education Commission.

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Law - Human Resources Law Certificate

The program will be a ten-month, accelerated program. It will offer five courses designed to be taken in order. Each is eight weeks in length. At the completion of the program, students will be eligible to sit for some of the industry-based

human resources certification exams offered by the Society for Human Resource Management (SHRM) and the HR Certification Institute.

The HRLC courses will be taught by industry experts and Pitt Law Faculty. In addition, the program will seek to create an advisory committee composed of Pitt law and business faculty, program faculty, and human resources professionals.

We do not expect an increase in need for student aid and minimal or no need for additional library resources. As this is a distance-learning program, we do not expect there to be any significant impact on office, laboratory, or classroom space. Instructors will need to coordinate with the Barco Law Library staff concerning planned student projects to ensure that digital resources will be available remotely to students where ever that may be. The Library staff can arrange for 30 students to access the library's existing Lexis and Westlaw databases, and by March 2019 all of the databases the Law Library subscribes to will be available to all students, whether on-campus or off-campus. All students in the program will have a "library liaison" at the Barco Law Library available to them for assistance.

Required Courses

Law - International Business Law Graduate Certificate

The IBL Certificate will be a ten-month, accelerated program. It will consist of five courses designed to be taken in order. Each is eight weeks long.

The IBL courses will be taught by experienced legal professionals serving as part-time professors, and by Pitt Law Faculty.

Students in this program will not be eligible for financial aid from the School of Law. As this is a distance-learning program, we expect there will be no impact on office, laboratory, or classroom space. There will be a minimal need for additional library resources. Instructors will need to coordinate with Barco Law Library staff for student projects to ensure that digital resources will be available remotely to students wherever, and in whatever time zone, they may be. Students will have access to the library's existing digital databases. All students in the IBL will be assigned a "library liaison" at the Barco Law Library available to them for assistance.

Required Courses

The following five courses are required for the certificate.

- LAW 2001 - INTRODUCTION TO US & INTERNATIONAL BUSINESS LAW
- LAW 2002 - COMMERCIAL ASPECTS OF CROSS-BORDER TRANSACTIONS
- LAW 2003 - SPECIALTY AREAS IN CROSS-BORDER TRANSACTIONS
- LAW 2004 - FOUNDATIONS OF INTERNATIONAL DISPUTE RESOLUTION & LITIGATION
- LAW 2005 - SPECIAL TOPICS IN INTERNATIONAL OR DISPUTE RESOLUTION

Law - Sports, Entertainment & Arts Law Graduate Certificate

This online graduate certificate (SEAL) will fill a gap in the legal education market and leverage the strengths of the University of Pittsburgh School of Law, the larger University and its alumni, and the region. Our University and region have long produced leaders in sports, entertainment, and arts, from Panther to Steeler Nation, Fred Rogers to George Romero, and August Wilson to Andy Warhol. In today's rapidly changing, increasingly intersecting, and highly competitive sports, entertainment, and arts industries, leaders also need legal skills, knowledge, understanding and connections to succeed. By launching the SEAL certificate program, Pitt Law will help to ensure that our graduates, University and region will receive their cultural, social and economic return on investment.

The SEAL certificate is a ten-month, accelerated program that will target the market of business, legal and creative professionals who are currently working or planning to work in sports, entertainment, and or arts/sectors, and who wish to expand their legal skills, knowledge and understanding of these industries. These three synergistic sectors present similar legal issues, involving labor and employment, intellectual property, corporate, and commercial transactions law. Pitt Law Faculty with expertise in these fields will oversee the development and implementation of the SEAL courses, which will be taught by regular and adjunct Pitt Law faculty with industry experience.

By combining the study of sports, entertainment, and arts law into one program, the SEAL certificate will seize an opportunity to fill a gap left in the fields of sports, entertainment, and arts law education. Currently, the only programs offered by U.S. law schools that cover all three sectors are costly, in-person, full-time programs limited to lawyers or law students seeking degrees. Although a number of part-time, online programs in these legal fields do now exist, these programs force students to choose one or two sectors, despite the increasing intersection of all three of these competitive industries. By covering the law and providing connections in all three sectors, the SEAL certificate will increase the size of our target market and expand employment opportunities for our graduates. This is an ideal time to launch this program, which would distinguish it as the first online program to cover all three fields, and incoming SEAL students would be well-positioned to apply for impending employment opportunities that will open post-pandemic.

The SEAL certificate will also advance the long-term goals of the Law School and University. The program will "Advance Educational Excellence" by preparing our graduates to "lead lives of impact" through the appropriate use of technology and increased and affordable access to professional education. The SEAL program will "Strengthen Communities" by ensuring that our students understand the legal issues that they must address to fully benefit from the economic impact of their work. The program will "Advance Diversity and Inclusion" by empowering our students to serve as social justice warriors, legally protected from discrimination, censorship and exploitation. And the program will allow our students to "Embrace the World" by understanding the international legal issues presented in this truly global industry.

Finally, offering this new program will positively impact existing University programs and students. SEAL students will be able to apply their credits towards fulfilling the requirements in our Master of Studies in Law (MSL) degree. The SEAL program will also leverage opportunities to work with the Pitt Athletic, Music, Studio, and Theater Arts Departments and with the Film and Media Studies Program to increase the social, cultural and economic impact of our University and region.

Course Requirements: 15 Credits

- Law - Intellectual Property in Sports, Entertainment and the Arts
- Law - Introduction to the Law and Business of Sports, Entertainment and the Arts
- Law - Labor & Employment Law in Sports, Entertainment and the Arts
- Law - Organization, Finance & Distribution Law in Sports, Entertainment and the Arts
- Law - Special Topics in Sports, Entertainment and the Arts Law

Joint Degree

Law and Arts Management (Carnegie Mellon), JD/MAM

The University of Pittsburgh School of Law and Heinz College offer a joint degree program designed to train students for careers in which arts management and law overlap. This program, spanning four years, prepares you for careers in which arts management and law overlap. You must satisfy both schools' degree requirements, but some credit is given by each school for completing the other school's program.

The joint degree program is designed to be completed in eight semesters over four academic years instead of the five years required if pursued separately. Students interested in the joint degree program can pursue both programs

simultaneously. During the first year, students study at either the Heinz School or the School of Law, taking the standard first-year curriculum of the respective school. The second year involves full-time study at the other school. For the third and fourth years, students take courses at both schools. In order to graduate with both degrees, students have to fulfill both schools' degree requirements.

Law Arts Management Requirements

The Heinz School of Public Policy and Management and the Law School have different degree requirements. Carnegie Mellon courses are counted in units and University of Pittsburgh courses are counted in credits. A 12-unit course is the equivalent of a 4-credit course. To fulfill the program requirements for the Law School, students have to complete 88 credits while the Heinz School requires 198 units for the MAM degree. Students in the joint degree program are able to transfer 30 units to the Heinz School degree after completing their JD degree and 14 credits to the JD degree after completing their MAM degree.

Students are required to register for a minimum of one class per semester at Heinz College during years 3 and 4 in order to qualify for the transfer of credits between institutions. A full listing of the requirements for graduation from the University of Pittsburgh School of Law can be found on the Graduation Requirements page.

Before selecting courses for each program, students are required to meet with their Academic Advisors at both programs to map out a course of study. In addition to the course work for both programs, Heinz School students are required to complete a summer internship after their first year at the Heinz School. Students can receive assistance from the Career Services Office in securing an internship.

Since degrees in the joint programs are awarded concurrently, it is important to note that a student who resigns from one program will be subject to all the requirements for graduation from the remaining degree program.

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Law and Bioethics, JD/MA

Program Overview

JD/MA, University of Pittsburgh School of Arts and Sciences and the Center for Bioethics and Health Law

The School of Law and the School of Arts and Sciences (A&S) offer a joint degree program in law and bioethics. Graduates of the program receive the Juris Doctor (JD) degree, the basic professional degree in law, and the Master of Arts (MA) degree from FAS, in bioethics. The joint degree program is directed by Greer Donley, in cooperation with Lisa S. Parker, PhD, who directs the interdisciplinary Master of Arts in Bioethics.

The joint degree program has been established in recognition of the extensive and increasing overlap between law and bioethics. The objective of this educational program is to prepare graduates with an interdisciplinary background in law and bioethics so they can address those issues and situations that require knowledge of and expertise in both. Graduates will be academically prepared for professional roles as bioethicists in health care institutions, in public policy working for government or philanthropic organizations, or in the practice of law, for example, giving counsel to health care institutions.

Contact Information

University of Pittsburgh School of Law
Professor Greer Donley
3900 Forbes Avenue
Pittsburgh, PA 15260

(412) 648-1359

donley@pitt.edu

Requirements

The sequence of the curriculum is designed to allow students maximum flexibility. Students may either take the entire first-year School of Law curriculum intact, or they may take one bioethics course - Theoretical Foundations of Applied Ethics - in place of Criminal Law (which would then be taken in their second year of law school). Students should discuss this plan of study with Prof. Alan Meisel, Director of this joint program.

Writing Requirements

The writing requirements for both degrees are simultaneously satisfied by completion of the master's thesis requirement in a subject in the field of law and bioethics.

Practica

The Clinical Practica ensure that students will be comfortable in and knowledgeable about the clinical setting by learning how to identify the normative issues in clinical cases and to be able to give practical advice regarding difficult

bioethical dilemmas. Students are scheduled for six credits of clinically-based work, which may be reduced to three for students with previous health care training. In Clinical Practica I and II students acquire familiarity with the clinical setting by

- rounding in specified services with residents, attending physicians, and other health care professionals, including one night on call per service
- participating in twice weekly seminars on medical sociology and clinical ethics and to fulfill those seminar requirements of reading, writing, discussion, and case presentations
- observing ethics consultations and clinical ethics teaching sessions
- completing a self-paced programmed text covering basic medical terminology

In Clinical Practicum II, students participate in an intensive four-week rotation in the clinical area of their choice, allowing in-depth development in an area of clinical medicine. Students should relate this intensive clinical experience to their thesis topic.

In addition to meeting the specifically required coursework for the JD degree and the MA degree, students will select electives from among an array of courses available in the two separate degree programs and in other parts of the University. For an up-to-date list of law school courses considered to be especially appropriate for students in this joint degree program, students should consult the courses listed as electives for the Health Law Certificate Program.

Students in the joint law and bioethics program will ordinarily fulfill the requirements of the Health Law Certificate Program in the law school and may obtain this certificate concurrent with the joint degree.

Advising

Students are required to consult with the Director of the Joint Degree Program during or prior to the spring registration period each year in order to assure that they meet all requirements of the Joint Degree program.

For Students Interested in Practicing in New York

Please be advised that students who wish to be admitted to practice in New York should not enroll in this joint degree program unless they limit the number of credits from outside the Law School that count toward their JD degree to no more than 12. See New York Rules of Court § 520(c)(5).

Credits

Students enrolled in the joint degree program accomplish in three to four years what would take four or more years if the two degrees were obtained separately. The total required number of credits 100, as compared with 118 credits if the two degrees were taken separately. The 100 credits include 34 credits of specifically prescribed* law courses, the Bioethics and Health Law Clinical Practicum (3 credits), and 18 specifically prescribed credits in bioethics. Within the remaining 45 credits, students must satisfy requirements for their law degree, take a course from the list of Restricted Elective courses for the bioethics degree, and take at least 3 credits in a course relevant to bioethics (either in the law school or not).

Taken as a joint degree program, the two degrees are ordinarily earned in 7 semesters and one summer.

During at least 5 semesters, joint degree students must be coded by the University Registrar as "primary law." During these semesters, they pay tuition at the Law School rate. They must enroll in at least 10 credits of law school courses.

Specifically Prescribed Law Courses

- LAW 5020 - CONTRACTS
- LAW 5046 - CRIMINAL LAW

- LAW 5720 - LEGAL ANALYSIS AND WRITING (Fall Term)
 - LAW 5076 - LEGAL ANALYSIS AND WRITING (Spring Term)
 - LAW 5028 - TORTS
 - LAW 5033 - CIVIL PROCEDURE
 - LAW 5101 - CONSTITUTIONAL LAW
 - LAW 5032 - LEGISLATION AND REGULATION
 - LAW 5024 - PROPERTY
 - LAW 5061 - PITT LAW ACADEMY (Fall Term)
 - LAW 5062 - PITT LAW ACADEMY (Spring Term)
 - BIOETH 2604 - CLINICAL PRACTICUM 1
 - BIOETH 2904 - MA THESIS IN BIOETHICS
 - BIOETH 2606 - CLINICAL PRACTICUM 2
 - BIOETH 2664 - BIOETHICS
 - BIOETH 2658 - PHILOSOPHY OF MEDICINE
 - BIOETH 2661 - THEORETICAL FOUNDATIONS OF APPLIED ETHICS
- Additional credits to complete the graduation requirement may include courses service as a bioethics restricted elective or a bioethics elective.

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Law and Business Administration (Carnegie Mellon), JD/MBA

The daily interaction of Law and Business in our society presents attorneys, entrepreneurs, and other professionals with a diverse set of challenges arising from public and private institutions, policies, and practices. A joint degree program can provide valuable interdisciplinary skills to tackle these challenges. To prepare the next generation of leaders, the University of Pittsburgh School of Law offers an outstanding joint degree program in Law and Business with a unique option.

Students may combine a Juris Doctor (JD) degree with a Master in Business Administration (MBA) from Carnegie Mellon University Tepper School of Business, which is in the top 20 of all U.S. business schools according to the the U.S. News rankings. The JD/MBA program enables students to receive integrated training in Law and Business while reducing the amount of time ordinarily necessary to earn the two degrees from five years to four years.

Requirements

Students in the JD/MBA program complete the joint degree in either eight (8), nine (9), or ten (10) semesters. During the first four (4) semesters of the program, students must enroll full-time for one (1) entire year at the School of Law and for one (1) entire year at the appropriate School of Business. Students have an option of enrolling either at the School of Law or the School of Business for the first-year of the program. During the third- and fourth-years of the program students enroll in courses at both schools, subject only to availability and each school's respective upper-level requirements. To graduate from the Law School, students in the JD/MBA program must have five semesters of full-time enrollment (minimum of 10 credits per semester) at the Law School (rather than the six that is normally required).

School of Law

Details about the first-year program at the School of Law can be found on the First-Year Curriculum page. A full listing of the requirements for graduation from the University of Pittsburgh School of Law can be found on the Graduation Requirements page.

Tepper School of Business

To graduate with a JD/Tepper MBA degree students must acquire a total 88 credits from the School of Law and 64 credits (or 192 units) from Tepper. However, completing the MBA degree entitles the student to 15 credits of advanced standing at the School of Law, resulting in an actual total of 73 credits; and completing the JD degree entitles the student to 10 credits (or 30 units) at Tepper, resulting in an actual total of 54 credits (or 162 units). This means that, after a year at the School of Law and a year at Tepper, a student must acquire at least 40 additional credits from the School of Law and 22 credits (or 66 units) in electives from Tepper to graduate with a JD/MBA.

More information can be found on their website.

For Students Interested in Practicing in New York

Please be advised that students who wish to be admitted to practice in New York should not enroll in a joint degree program that entitles the student to more than 12 credits of advance standing at the Law School (i.e., the JD/MBA with the Tepper School of Business). See New York Rules of Court § 520.3(c)(5).

MBA Degree Requirements

The following core courses are required of all full-time MBA students:

Accelerated MBA, Signature MA, Part-Time MBA and Dual-Degree MBA/MS programs; MBA with Business Analytics students also complete the MBA Core Curriculum with additional credits required from business analytics curriculum. Joint-Degree MBA students also complete the MBA Core Curriculum, with some exceptions.

- BACC 2401 - FINANCIAL ACCOUNTING
- BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BQOM 2421 - DECISION TECH IN MFG & OPS MGT
- BFIN 2409 - FINANCIAL MANAGEMENT 1
- BMIS 2409 - INFORMATION SYSTEMS
- BMKT 2409 - MARKETING MANAGEMENT
- BSPP 2409 - STRATEGIC MANAGEMENT
- BOAH 2409 - ORGANIZATIONAL BEHAVIOR: LEADERSHIP AND GROUP EFFECTIVENESS
- BSEO 2401 - BUSINESS ETHICS & SOCIAL PERFORM
- BIND 2454 - INTEGRATED MBA CAPSTONE

MBA Professional Courses

In addition to the MBA Core Curriculum, MBA students also complete "professional" coursework:

- Quant Methods for Business
- Programming for Business
- Business Communications

The content of these courses is designed to accelerate a students' academic and personal development as a business professional. The timing, delivery, and credit-load may vary by program (i.e. Accelerated v. Signature v. Part-Time MBA). Any credits earned count toward the minimum 45-credits required for the MBA degree.

- BIND 2404 - PROBABILITY & STATISTICS: FUNDAMENTALS OF MBA QUANTITATIVE METHODS
- BIND 2406 - BUSINESS MATH: FUNDAMENTALS OF MBA QUANTITATIVE METHODS
- BIND 2506 - TIME VALUE OF MONEY: FUNDAMENTALS OF MBA QUANTITATIVE METHODS
- BMIS 2402 - COMPUTATIONAL THINKING FOR BUSINESS LEADERS
- BOAH 2528 - ORGANIZATIONAL BEHAVIOR- COMMUNICATING STRATEGICALLY

Total Credits: 45

A joint degree program can provide valuable interdisciplinary skills to tackle these challenges. To prepare the next generation of leaders, the University of Pittsburgh School of Law offers an outstanding joint degree program in Law and Business with a unique option.

Students may combine a Juris Doctor (JD) degree with a Master in Business Administration (MBA) from the University of Pittsburgh Katz Graduate School of Business, which is in the top 30 of U.S. public business schools according to the U.S. News rankings. The JD/MBA program enables students to receive integrated training in Law and Business while reducing the amount of time ordinarily necessary to earn the two degrees from five years to four years.

Requirements

Students in the JD/MBA program complete the joint degree in either eight (8), nine (9), or ten (10) semesters. During the first four (4) semesters of the program, students must enroll full-time for one (1) entire year at the School of Law and for one (1) entire year at the appropriate School of Business. Students have an option of enrolling either at the School of Law or the School of Business for the first-year of the program. During the third- and fourth-years of the program students enroll in courses at both schools, subject only to availability and each school's respective upper-level requirements. To graduate from the Law School, students in the JD/MBA program must have five semesters of full-time enrollment (minimum of 10 credits per semester) at the Law School (rather than the six that is normally required).

School of Law

Details about the first-year program at the School of Law can be found on the First-Year Curriculum page. A full listing of the requirements for graduation from the University of Pittsburgh School of Law can be found on the Graduation Requirements page.

Katz School of Business

To graduate with a JD/Katz MBA degree students must acquire a total of 76 credits from the School of Law and 39 credits from Katz. This means that, after a year at the School of Law and a year at Katz, a student must normally acquire at least 43 additional credits from the School of Law and 3 credits from Katz to graduate with a JD/MBA.

More information can be found on their website.

For Students Interested in Practicing in New York

Please be advised that students who wish to be admitted to practice in New York should not enroll in a joint degree program that entitles the student to more than 12 credits of advance standing at the Law School (i.e., the JD/MBA with the Tepper School of Business). See New York Rules of Court § 520.3(c)(5).

MBA Degree Requirements

The following core courses are required of all full-time MBA students:

Accelerated MBA, Signature MA, Part-Time MBA and Dual-Degree MBA/MS programs; MBA with Business Analytics students also complete the MBA Core Curriculum with additional credits required from business analytics curriculum. Joint-Degree MBA students also complete the MBA Core Curriculum, with some exceptions.

- BACC 2401 - FINANCIAL ACCOUNTING
- BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BQOM 2421 - DECISION TECH IN MFG & OPS MGT
- BFIN 2409 - FINANCIAL MANAGEMENT 1
- BMIS 2409 - INFORMATION SYSTEMS
- BMKT 2409 - MARKETING MANAGEMENT
- BSPP 2409 - STRATEGIC MANAGEMENT
- BOAH 2409 - ORGANIZATIONAL BEHAVIOR: LEADERSHIP AND GROUP EFFECTIVENESS
- BSEO 2401 - BUSINESS ETHICS & SOCIAL PERFORM
- BIND 2454 - INTEGRATED MBA CAPSTONE

MBA Professional Courses

In addition to the MBA Core Curriculum, MBA students also complete "professional" coursework:

- Quant Methods for Business
- Programming for Business
- Business Communications

The content of these courses is designed to accelerate a students' academic and personal development as a business professional. The timing, delivery, and credit-load may vary by program (i.e. Accelerated v. Signature v. Part-Time MBA). Any credits earned count toward the minimum 45-credits required for the MBA degree.

- BIND 2404 - PROBABILITY & STATISTICS: FUNDAMENTALS OF MBA QUANTITATIVE METHODS
- BIND 2406 - BUSINESS MATH: FUNDAMENTALS OF MBA QUANTITATIVE METHODS
- BIND 2506 - TIME VALUE OF MONEY: FUNDAMENTALS OF MBA QUANTITATIVE METHODS
- BMIS 2402 - COMPUTATIONAL THINKING FOR BUSINESS LEADERS
- BOAH 2528 - ORGANIZATIONAL BEHAVIOR- COMMUNICATING STRATEGICALLY

Total Credits: 45

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Law and Information Security Policy (Carnegie Mellon), JD/MSISPM

Building on their longstanding and successful partnership, the University of Pittsburgh School of Law and Heinz College offer a joint degree program designed to train students for careers in which management, information security, and law overlap. This joint degree offering is particularly beneficial to many students' careers because legal considerations affect many management and policy decisions, and the practice of law is enhanced by a clear understanding of the policy and security concerns facing the public, private, and nonprofit sectors. Participants in the program will emerge with a broad knowledge of the fundamental intersections of law, government, privacy and information security, and management. The fields of cybersecurity, information privacy, intellectual property law, cybercrime, and other IT-related sectors are growing rapidly. There are many job opportunities in this emerging space. Many of those jobs have legal dimensions and will be filled by people with legal training. Graduates of the joint degree program will be better prepared to compete for those jobs and to succeed in them because of their broader, interdisciplinary training. Furthermore, the interdisciplinary nature of this program allows for practical skill sets to solve economic and social problems that require technological, managerial, and legal expertise.

The joint-degree program is designed to be completed in eight semesters over four academic years instead of the five years required if pursued separately. Students interested in the joint degree program can pursue both programs simultaneously. During the first year, students study at either the Heinz School or the School of Law, taking the standard first-year curriculum of the respective school. The second year involves full-time study at the other school. For the third and fourth years, students take courses at both schools. In order to graduate with both degrees, students have to fulfill both schools' degree requirements.

Curriculum & Requirements

The Heinz School of Public Policy and Management and the Law School have different degree requirements. Carnegie Mellon courses are counted in units and University of Pittsburgh courses are counted in credits. A 12-unit course is the equivalent of a 4-credit course. To fulfill the program requirements for the Law School, students have to complete 88 credits while the Heinz School requires 198 units for the MSISPM degree. Students in the joint degree program are able to transfer 30 units to the Heinz School degree after completing their JD degree and 14 credits to the JD degree after completing their MSISPM degree.

Students are required to register for a minimum of one class per semester at Heinz College during years 3 and 4 in order to qualify for the transfer of credits between institutions. A full listing of the requirements for graduation from the University of Pittsburgh School of Law can be found on the Graduation Requirements page.

Before selecting courses for each program, students are required to meet with their Academic Advisors at both programs to map out a course of study. In addition to the course work for both programs, Heinz School students are required to complete a summer internship after their first year at the Heinz School. Students can receive assistance from the Career Services Office in securing an internship.

Since degrees in the joint programs are awarded concurrently, it is important to note that a student who resigns from one program will be subject to all the requirements for graduation from the remaining degree program.

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Law and International Affairs, JD/MPIA

This program provides rigorous, integrated training for students preparing for a professional career that combines law and public and international affairs. Increasingly, lawyers in the public and nonprofit private sectors work in managerial and policy-making capacities for which legal training alone does not prepare them. At the same time, legal considerations impinge more than ever on the work of public managers and planners, although most of them have had no exposure to legal training. Students in the joint-degree program gain a broadened knowledge base and a cross disciplinary approach to solving problems involving the intersection of law, policy, and management. They also develop more marketable professional skills than are usually acquired through single-degree programs. Professionals trained in both law and public and international affairs thus enjoy expanded career opportunities. The University of Pittsburgh's program is unique because of the range of master's degree options available.

Students in the MPIA degree program pursue majors in Global Political Economy or Security and Intelligence Studies. Students interested in international development have a choice of two major fields, which include Development Planning and Environmental Sustainability or Non-Governmental Organizations (NGOs) and Civil Society.

Curriculum & Requirements

The structuring of this four-year degree program is flexible. A student may begin study in either school. The only requirement in this connection is that the first year in the School of Law be taken in its entirety, with no outside courses. GSPIA also expects joint-degree program students to complete the required master's degree core courses early in their program in GSPIA.

Degrees in the joint-degree program are awarded concurrently. Therefore, it is important to note that a student who resigns from one program and elects to remain in the other will be subject to all the requirements of that particular degree program. The previously described arrangement for awarding advanced-standing credits will no longer be in effect.

Each student must satisfy both schools' requirements as modified by participation in the joint-degree program. The credit requirements are as follows:

Program	Joint Degree Credits
Juris Doctor (JD)	79 Credits
Master of Public and International Affairs	36 Credits
Total Credits for Joint Degree	115 Credits

Note

Law and Public Health, JD/MPH

The School of Public Health, Health Policy & Management and the School of Law at the University of Pittsburgh offer a cooperative educational program, through which students may earn both the Juris Doctor (JD) degree, the first professional degree in law, and the Master of Public Health (MPH) degree, the primary professional degree in public health. Students have the option of selecting between two areas of concentration pursuing their MPH degree: health policy and management or public health sciences. The joint-degree program has been established in recognition of extensive and increasing connections between law and the broad range of health services, both public and private, in the United States.

The objective of this specialized educational program is to provide graduates with an inter-disciplinary education to prepare them to address issues and situations that affect personal and public health. Graduates of this joint-degree program are academically prepared for the practice of law with private clients, serving as house counsel with health organizations and systems, and as attorneys representing state, county and local health departments. The threat of bioterrorism and the need to balance both individual rights and public protection in establishing public health preparedness has made public health law an even more vital professional focus for attorneys.

For Additional Information

For information regarding entrance examinations, tuition and financial aid, writing requirements and field experience, please visit the GSPH website.

Requirements

Students enrolled in the joint-degree program receive integrated training in law and public health. Students must complete 37 credits in the MPH curriculum, and 8 JD credits will be applied toward the MPH degree in order to meet the required 45 credits for the MPH degree. Students must complete 76 credits in the JD curriculum, and 12 MPH credits will be applied toward the JD degree in order to meet the required 88 credits for the JD degree. The first year of law school must be completed in a single academic year before embarking on studies in public health. Neither degree may be granted prior to the fulfillment of all requirements for the joint-degree program.

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Law and Public Policy and Management (Carnegie Mellon), JD/MSPPM

The University of Pittsburgh School of Law and Heinz College offer a joint-degree program designed to train students for careers in which management, public policy and law overlap. A successful partnership that has been in existence for over a decade, this program offers students a comprehensive education that marries the analytic and quantitative strength of the Heinz School with the rigorous legal training afforded by the School of Law. This joint degree offering is particularly beneficial to many students' careers since legal considerations affect many public management and policy decisions, and the practice of law is enhanced by a clear understanding of public policy and management concerns. Participants of the program emerge with a broad knowledge of the fundamental intersections of law, government, policy analysis and management. Furthermore, the interdisciplinary nature of this program allows for practical skill sets to solve economic and social problems that require technological, managerial, and legal expertise.

The joint-degree program is designed to be completed in eight semesters over four academic years instead of the five years required if pursued separately. Students interested in the joint degree program can pursue both programs simultaneously. During the first year, students study at either the Heinz School or the School of Law, taking the standard first-year curriculum of the respective school. The second year involves full-time study at the other school.

For the third and fourth years, students take courses at both schools. In order to graduate with both degrees, students have to fulfill both schools' degree requirements.

Law and Social Work, JD/MSW

The School of Social Work (SSW) and the School of Law offer a cooperative educational program through which students may earn both the Master of Social Work (MSW), the primary professional degree in social work, and the Juris Doctor (JD) degree, the first professional degree in law. The MSW-JD program will enable students with interests in a wide range of areas where law and social work converge - such as child welfare, aging, health, mental health, juvenile and criminal justice, family issues, and housing - to engage in a highly integrative educational experience that will include academic courses, field placements, and research opportunities at the intersection of both professions. The joint degree program allows one to earn both degrees in four years rather than five.

Increasingly, social work professionals and attorneys are working together to promote the well-being of their clients. These areas of convergence exist in practice with individuals, families, and groups as well as with communities and organizations. The intersection of legal and social work concerns is also evident at the policy level, and research from both professional disciplines has been used to inform these activities. It is not uncommon for practitioners from both fields to work in concert to draft, implement, and/or advocate for legislation at the local, state, and federal levels.

The MSW-JD program is one among several programs that the Schools of Social Work and Law have jointly established throughout their long and rich history of collaboration.

University of Pittsburgh School of Social Work

Professor Jeffrey Shook, MSW, JD, PhD
2117 Cathedral of Learning
Pittsburgh, PA 15260
(412) 648-9365
jes98@pitt.edu

Requirements

Students enrolled in the joint degree program will receive integrated training in social work and law over a four year period. The combined credit-hour requirements for the MSW and JD degrees obtained separately is 148 credits (60 for the MSW, usually completed in four full-time semesters, and 88 for the JD, usually completed in six full-time semesters). In the joint degree program, the two degrees are awarded for a combined total of 121 credits (46 in Social Work and 75 in Law). This reduction in credit-hour requirements is achieved through the acceptance of up to 14 credit hours of JD course work receiving a grade of C or higher toward the MSW degree and the acceptance of up to 13 credit hours of MSW work receiving a grade of B or higher toward the JD degree. All didactic foundation SW courses must be completed in a single academic year; likewise, all first-year JD courses must be completed in a single academic year. Neither degree may be granted prior to the fulfillment of all requirements for the joint degree program.

For Students Interested in Practicing in New York

Please be advised that students who wish to be admitted to practice in New York should not enroll in a joint degree program that entitles the student to more than 12 credits of advance standing at the Law School (i.e., the JD/MSW with the School of Social Work). See New York Rules of Court § 520(c)(5).

Integrative seminar

All students must complete an Integrative Seminar, to be jointly presented by the School of Social Work and Law School, during each Fall and Spring semester of their enrollment in the MSW-JD program. The integrative seminar will meet twice each Fall and Spring semester. The goal of the seminar will be to allow students the space to discuss issues related to integration and to listen to and have a dialogue with outside speakers who have integrated law and social work in their practice, research, and/or teaching.

Required electives in the Law School

Students must complete at least 2 courses from the Law School menu of MSW-JD "required electives."

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Master's

Law - Foreign Law Graduates, LLM

The Master of Laws (LLM) degree provides foreign law graduates with critical training in the common law legal tradition and the U.S. legal system during an academic year at the University of Pittsburgh, located in Pittsburgh's vibrant Oakland neighborhood. Pitt Law's LLM program provides lawyers who have completed their law degree outside the United States with an opportunity to study the common law legal tradition and the U.S. legal system in the United States.

Degree Requirements

Students must complete a minimum of 24 credits to graduate. The program is completed in one academic year from August to May. Part-time admission is considered on a case-by-case basis. The CILE Academic Director, Executive Director and Program Administrator take an active role in personally counseling each LLM student on their course choices, helping you to plan a course of study that is uniquely tailored to your personal needs. Courses taken must include:

- LAW 5977 - INTRODUCTION TO AMERICAN LAW
- LAW 5813 - U.S. LEGAL ANALYSIS AND WRITING
- LAW 5820 - LL.M COLLOQUIUM
 - Writing Requirement - Choose one of the following:
- LAW 5902 - INDEPENDENT STUDY

or a Seminar Course (Usually 3 credits-various courses are offered each semester). In seminars, the class will meet once a week for two hours with the guidance of a faculty member. The students will conduct research on the seminar topic and prepare drafts of their paper throughout the semester. Each student will present their paper in class and submit a final paper at the end of the semester.

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Total Credits: 24

Law - Foreign Law Graduates, LLM - Hybrid

The Master of Laws (LLM) degree provides foreign law graduates with critical training in the common law legal tradition and the U.S. legal system during an academic year at the University of Pittsburgh, located in Pittsburgh's vibrant Oakland neighborhood. Pitt Law's LLM program provides lawyers who have completed their law degree outside the United States with an opportunity to study the common law legal tradition and the U.S. legal system in the United States.

There are two ways to complete the Hybrid LLM Degree. Students may begin by completing one of the law school's 15-credit online graduate certificates, and then coming to the Pitt campus to take 9 (or more) credits of required and elective classes in the course of one semester. Or, students may choose to come to campus first, complete 9 or more credits of required courses, and then complete an online certificate program.

Degree Requirements

Students must complete a minimum of 24 credits to graduate. The program is completed in one academic year from August to May. Part-time admission is considered on a case-by-case basis. The CILE Academic Director, Executive Director and Program Administrator take an active role in personally counseling each LLM student on their course choices, helping you to plan a course of study that is uniquely tailored to your personal needs. Courses taken must include:

- LAW 5977 - INTRODUCTION TO AMERICAN LAW
- LAW 5813 - U.S. LEGAL ANALYSIS AND WRITING
- LAW 5820 - LL.M COLLOQUIUM

Online Certificate Program Courses

Students must complete one of the following law school 15-credit online graduate certificates.

Corporate Compliance

- LAW 2011 - INTRODUCTION TO CORPORATE COMPLIANCE
- LAW 2012 - ETHICS & COMPLIANCE PROGRAMS
- LAW 2013 - DESIGNING, MEASURING EFFECTIVENESS & AUDITING COMPLIANCE
- LAW 2014 - CONDUCTING INVESTIGATIONS & RISK ASSESSMENTS
- LAW 2015 - SPECIAL TOPICS IN CORPORATE COMPLIANCE

Health Care Compliance

- LAW 2062 - INTRODUCTION TO LEGAL SYSTEM FOR HEALTHCARE AND COMPLIANCE
- LAW 2061 - LEGAL ASPECTS OF HEALTHCARE COMPLIANCE
- LAW 2969 - PROFESSIONAL JUDGEMENT AND ETHICS, THE CANVAS OF COMPLIANCE
- LAW 2968 - EFFECTIVE COMPLIANCE PROGRAM DEVELOPMENT AND SKILLS
- LAW 2970 - SELECT APPLICATIONS IN COMPLIANCE

Human Resources Law

- LAW 2070 - INTRODUCTION TO THE LEGAL SYSTEM FOR HUMAN RESOURCES; HIRING AND FIRING
- LAW 2071 - WAGES, HOURS AND BENEFITS
- LAW 2072 - WORKING CONDITIONS
- LAW 2073 - ANTI-DISCRIMINATION LAW
- LAW 2074 - SELECTED TOPICS IN HUMAN RESOURCES LAW

International Business Law

- LAW 2001 - INTRODUCTION TO US & INTERNATIONAL BUSINESS LAW
- LAW 2002 - COMMERCIAL ASPECTS OF CROSS-BORDER TRANSACTIONS
- LAW 2003 - SPECIALTY AREAS IN CROSS-BORDER TRANSACTIONS
- LAW 2004 - FOUNDATIONS OF INTERNATIONAL DISPUTE RESOLUTION & LITIGATION
- LAW 2005 - SPECIAL TOPICS IN INTERNATIONAL OR DISPUTE RESOLUTION

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Total Credits: 24

Law - Professional Master of Studies in Law - In Person Option

The Professional Master of Studies in Law ("MSL") at the University of Pittsburgh School of Law is a 30-credit advanced degree designed for graduates and mid-career professionals seeking to enhance their careers with a versatile alternative to the traditional three-year Juris Doctor degree.

Professional Master's students gain essential, specialized knowledge of laws and legal systems. Law is a pervasive influence on almost all aspects of life across the globe, but higher education often ill-prepares students and professionals for navigating laws and legal dynamics in business and life. The degree addresses this critical knowledge gap.

Students can complete this degree either by taking classes at the Pitt Law campus in Pittsburgh, through our new online program, or through a hybrid option consisting of some online courses and some in-person courses. For more information about the online program, [click here](#).

Those who choose the in-person program can earn their master's degree full-time in one academic year (August to May) or in two to four years on a flexible part-time schedule.

Pitt Law commands one of the oldest and best established professional Master of Studies in Law programs in the country. Only a handful of students are admitted each year and these students receive personalized mentoring and support. Students can choose from a broad array of workplace-relevant and leading-edge specializations, including a self-designed specialization.

Professional Master's students take the same vast array of courses as Juris Doctor candidates taught by world-class legal scholars, judges and attorneys, and they gain the advantages and benefits of attending the University of Pittsburgh.

Degree Requirements

Applicants must have completed at least an undergraduate bachelor's degree. Applicants need to provide official transcripts of all college, graduate and professional studies, whether a degree was obtained or not. No standardized test is required.

International students are welcome and encouraged to apply. They must have completed the equivalent of a US bachelor's degree, and they must submit a TOEFL, IELTS, or Duolingo score. International students are encouraged to apply as early as possible because of greater amount of time needed to process the application, obtain visas, and obtain housing.

Students must complete 30 course credits in the School of Law to receive the MSL degree. Students are required to take U.S. Legal System, one first-year JD course, and the required courses in their selected area of specialization.

The areas of specialization from which students may choose are as follows:

- Biomedical & Health Services Research
- Business Law
- Commercial Law
- Corporate Law
- Criminal Law and Justice
- Disability Law
- Elder and Estate Planning Law
- Employment and Labor Law
- Energy Law
- Environmental Law
- Family Law
- Health Care Compliance
- Health Law
- Human Resources Law
- Intellectual Property and Technology Law
- International Business Law
- International and Human Rights Law
- Jurisprudence
- Real Estate Law
- Self-Design
- Sports and Entertainment Law
- Tax Law

Students may also design their own unique concentration.

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Total Credits: 30

Law - Professional Master of Studies in Law - Online Option

The Professional Master of Studies in Law ("MSL") at the University of Pittsburgh School of Law is a 30-credit advanced degree designed for graduates and mid-career professionals seeking to enhance their careers with a versatile alternative to the traditional three-year Juris Doctor degree.

Professional Master's students gain essential, specialized knowledge of laws and legal systems. Law is a pervasive influence on almost all aspects of life across the globe, but higher education often ill-prepares students and professionals for navigating laws and legal dynamics in business and life. The degree addresses this critical knowledge gap.

Pitt Law commands one of the oldest and most established Professional Master of Studies in Law programs in the country. Students can complete this degree either online or by taking in-person classes on the Pitt Law campus in Pittsburgh. For more information about the in-person option, or a hybrid option consisting of some online courses and some in-person courses, [click here](#).

The new Online option has been available since 2021, and is a popular and fast-growing program, providing efficiency, flexibility, and affordability. Those who choose the Online-only option can earn their master's degree in two calendar years in a flexible part-time schedule.

The 15-credit Online MSL series of core courses consists of 7 short courses of between 5 and 8 weeks in length. Online students take one course at a time along with their starting cohort. The courses are designed as an asynchronous learning opportunity, so students work largely at their own pace, week by week. Course materials are created specifically for professional master's students. All courses are carefully designed to combine essential legal and policy content with practice applying that content in the workplace.

Pitt Law professors guide students through the core course series, provide personalized feedback to students, and are available for online, on-on-0ne meetings and review sessions.

Degree Requirements

Applicants must have completed at least an undergraduate bachelor's degree. Applicants need to provide official transcripts of all college, graduate and professional studies, whether a degree was obtained or not. No standardized test is required.

International students are welcome and encouraged to apply. They must have completed the equivalent of a U.S. bachelor's degree, and they must submit a TOEFL, IELTS , or Duolingo score. International students are encouraged to apply as early as possible because of the greater amount of time needed to process their application.

Students must complete 30 course credits of School of Law coursework to receive the MSL degree. Students are required to take the entire Online MSL 15-credit core course series, which includes:

- American Legal System
- Contracts
- Torts
- Property
- Constitutional Law

- Criminal Law
- Legislation & Regulation

Students can then complete the master's degree entirely online by taking 15 additional credits through one of our online specializations. These specializations include Healthcare Compliance, Human Resources, Law, Corporate Compliance, and International Business Law. A Business Law specialization is expected to be added in Fall 2024. Students who successfully complete the MSL core courses and a specialization will earn a master's degree plus a certificate in their specialization.

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Total Credits: 30

Micro-Credential

Law - Cyber Law and IT, Micro-Credential

The Micro-credential in Cyber Law and IT will focus on subjects relating to the regulation of technology and cyberspace, privacy law and intellectual property. Credits taken in this micro-credential will also count toward the student's general LL.M. degree. Because all Micro-credential courses are also regular law school courses, and because the LL.M. degree is usually completed within 12 months, there is no limit on the number of credits that can count toward both a Micro-credential and the general LL.M. degree. All Micro-Credential credits earned (with a grade of C or higher) will be valid to count toward the LL.M. degree for two years. 9 required credits for the micro-credential.

Curriculum:

Completion of this micro-credential will require that students take at least nine credit hours, with a grade of C or higher, in courses of which at least one is drawn from each of the following two rubrics:

Cyber Law:

Classes focusing on cyber law, including, for example, Cybersecurity, Privacy, and Democracy, Cyber Law and Policy Seminar, Cyberspace and the Law, or similar courses approved by the CILE Director.

- LAW 5671 - CYBERSECURITY, PRIVACY, AND AMERICAN DEMOCRACY
- LAW 5685 - CYBER LAW & POLICY SEMINAR
- LAW 2404 - CYBERSPACE AND THE LAW

IT Law:

Courses focusing on the IT Law, including, for example, Information Privacy Law and Practice, Commercializing New Technologies, Technology, Law, and Leadership, Intellectual Property, Technology and Employment Law, Applied AI.

- LAW 2430 - INFORMATION PRIVACY: LAW AND PRACTICE
- LAW 2135 - COMMERCIALIZING NEW TECHNOLOGIES
- LAW 5754 - TECHNOLOGY, LAW & LEADERSHIP

- LAW 2260 - INTELLECTUAL PROPERTY
- LAW 2718 - TECHNOLOGY AND EMPLOYMENT LAW
- LAW 5719 - APPLIED LEGAL DATA ANALYTICS AND AI

Law - Energy and Environmental Law, Micro-Credential

The Micro-credential in Energy and Environmental Law will focus on subjects relating to energy regulation and environmental policy. Credits taken in this micro-credential will also count toward the student's general LL.M. degree. Because all Micro-credit courses are also regular law school courses, and because the LL.M. degree is usually completed within 12 months, there is no limit on the number of credits that can count toward both a Micro-credential and the general LL.M degree. All Micro-Credential credits earned (with a grade of C or higher) will be valid to count toward the LL.M. degree for two years. 9 required credits for the micro-credential.

Curriculum:

Completion of this micro-credential will require that students take at least nine credit hours, with a grade of C or higher, in courses of which at least one is drawn from each of the following two rubrics:

Energy Law:

Energy Law and Regulation, Climate Change and the Law, Oil and Gas Law, or similar courses approved by the CILE Director.

- LAW 2038 - ENERGY LAW AND REGULATION
- LAW 2082 - CLIMATE CHANGE AND THE LAW
- LAW 2099 - OIL AND GAS LAW

Environmental Law:

Environmental Law, Environmental Law, Policy, and Politics, Environmental Justice Law Seminar, Environmental Policy & Practice, Land Use or similar courses approved by the CILE Director.

- LAW 2340 - ENVIRONMENTAL LAW
- LAW 5247 - ENVIRONMENTAL POLICY, POLITICS, AND PRACTICE
- LAW 2807 - ENVIRONMENTAL JUSTICE LAW SEMINAR
- LAW 2336 - LAND USE
- LAW 5714 - ENVIRONMENTAL POLICY AND PRACTICE

Law - Health Care Law and Regulation, Micro-Credential

This program requires a minimum of six credit hours of coursework chosen from a menu of courses currently offered on a regular basis by the School. If taken by an LL.M. student or a non-degree student wishing to preserve the ability to transfer credits to the LL.M. program, all requirements must be met on a graded rather than pass-fail basis. Admissions requirements for non-degree students in these micro-credentials will be identical to those for LL.M. students.

Completion of this micro-credential will require that students take at least six credit hours, with a grade of C or higher, in courses of which at least one is drawn from each of the following two rubrics:

Note: This micro-credential program was approved on October 1, 2021 in order to maintain accurate records, the program was added to the catalog on October 25, 2021.

The Landscape of US Health Care Law:

Current Issues in Health Law, Health Law & Policy, or an equivalent course approved by the CILE Academic Director if neither is offered during a student's time in residence.

US Health Law Issues Encountered by Foreign Counsel:

Health Care Business Transactions, Biotechnology Law, Law of Disability Discrimination, or similar courses approved by the CILE Academic Director.

Law - Human Rights Law, Micro-Credential

The Micro-credential in Human Rights Law will focus on subjects relating to the protection of human rights under domestic and international law. Credits taken in this micro-credential will also count toward the student's general LL.M. degree. Because all Micro-credit courses are also regular law school courses, and because the LL.M. degree is usually completed within 12 months, there is no limit on the number of credits that can count toward both a Micro-credential and the general LL.M degree. All Micro-Credential credits earned (with a grade of C or higher) will be valid to count toward the LL.M. degree for two years. 9 required credits for the micro-credential.

Curriculum:

Completion of this micro-credential will require that students take at least nine credit hours, with a grade of C or higher, in courses drawn from the following rubric: Philosophy of Crime and Punishment - National and International Perspective, Legal Institutions and the Holocaust, Conflict of Laws, International Human Rights Law, International Law, Law of Slavery, Abolition & Freedom Seminar, Federal Hate Crimes, Islamic Law and Jurisprudence Seminar, or similar courses approved by the CILE Director.

- LAW 2644 - PHILOSOPHY OF CRIME & PUNISHMENT - NATIONAL & INTERNATIONAL PERSPECTIVE
- LAW 2686 - LEGAL INSTITUTIONS & THE HOLOCAUST
- LAW 2213 - CONFLICT OF LAWS
- LAW 2653 - INTERNATIONAL HUMAN RIGHTS
- LAW 2226 - INTERNATIONAL LAW
- LAW 5709 - LAW OF SLAVERY, ABOLITION & FREEDOM SEMINAR
- LAW 2642 - FEDERAL HATE CRIMES
- LAW 5866 - ISLAMIC LAW AND JURISPRUDENCE SEMINAR

Law - Intellectual Property Law, Micro-Credential

The Micro-credential in Intellectual Property Law will focus on subjects relating to technology policy, patent, trademark and copyright law. Credits taken in this micro-credential will also count toward the student's general LL.M. degree. Because all Micro-credit courses are also regular law school courses, and because the LL.M. degree is usually completed within 12 months, there is no limit on the number of credits that can count toward both a Micro-credential and the general LL.M degree. All Micro-Credential credits earned (with a grade of C or higher) will be valid to count toward the LL.M. degree for two years. 9 required credits for the micro-credential.

Curriculum:

Completion of this micro-credential will require that students take at least nine credit hours, with a grade of C or higher, in courses drawn from the following rubric: Foundations of Intellectual Property Law Seminar, Commercializing New Technologies, Technology, Law, and Leadership, Foundations of Intellectual Property Seminar, Copyright Law, Patent Law Practice, Trademark Law, or similar courses approved by the CILE Director.

- LAW 2862 - FOUNDATIONS OF INTELLECTUAL PROPERTY SEMINAR
- LAW 2135 - COMMERCIALIZING NEW TECHNOLOGIES
- LAW 5754 - TECHNOLOGY, LAW & LEADERSHIP
- LAW 2328 - COPYRIGHT LAW
- LAW 2242 - PATENT LAW PRACTICE
- LAW 2694 - TRADEMARK LAW

Law - International Arbitration Micro-Credential

The micro-credential in International Arbitration will focus on subjects relating to the settlement of disputes outside of national courts and before arbitral fora, and will include specific courses on how to structure international transactions to prepare for arbitration, the practice and theory of international arbitration, and substantive international law related to state-to-state and investor-state arbitration.

Requirements:

Micro-credential in International Arbitration: Completion of this micro-credential requires that students take at least nine credit hours, with a grade of C or higher, in courses drawn from each of the following three rubrics as well as an internship/externship:

International Law:

- LAW 5040 - PUBLIC INTERNATIONAL LAW ADVOCACY or, if not offered in a given term, or another course approved by the CILE Executive Director that provide a comparable introduction to commercial and business law.

Commercial Law:

- LAW 2225 - INTERNATIONAL BUSINESS TRANSACTION or, if not offered in a given term, or another course approved by the CILE Executive Director that provide a comparable introduction to commercial and business law.

Dispute Resolution:

- LAW 5986 - INTERNATIONAL ARBITRATION SEMINAR, The Practice of International Litigation and Arbitration, or another course approved by the CILE Executive Director that provide a comparable introduction to one or more forms of alternative dispute resolution.

Internship/Externship:

An off-campus internship/externship approved by the CILE Executive Director that provides a practical and skills-based introduction to international arbitration.

Total Credits: 9

Law - International Arbitration, Micro-Credential

The Micro-credential in International Arbitration will focus on subjects relating to the settlement of disputes outside of national courts and before arbitral fora, and will include specific courses on how to structure international transactions to prepare for arbitration, the practice and theory of international arbitration, and substantive international law related to state-to-state and investor-state arbitration. Curriculum:

Completion of this micro-credential requires that students take at least nine credit hours, with a grade of C or higher, in courses drawn from each of the following three rubrics as well as an internship/externship:

International Law

Public International Law or, if not offered in a given term, or another course approved by the CILE Executive Director that provide a comparable introduction to commercial and business law.

- LAW 5226 - INTERNATIONAL LAW

Commercial Law:

International Business Transactions or, if not offered in a given term, or another course approved by the CILE Executive Director that provide a comparable introduction to commercial and business law.

- LAW 5225 - INTERNATIONAL BUSINESS TRANSACTIONS

Dispute Resolution:

International Commercial Arbitration, The Practice of International Litigation and Arbitration, or another course approved by the CILE Executive Director that provide a comparable introduction to one or more forms of alternative dispute resolution.

- LAW 5043 - INTERNATIONAL COMMERCIAL ARBITRATION
- LAW 5697 - PRACTICAL ASPECTS OF GLOBAL DISPUTES

Internship/Externship:

An off-campus internship/externship approved by the CILE Executive Director that provides a practical and skills-based introduction to international arbitration.

Unlike other Law micro-credentials, this one will require an externship or internship for credit. CILE has relationships with a number of externship providers in this field who offer regular, academic-year externships to students so long as

those students are earning credit for the work. Satisfaction of the micro-credential will require each student to secure and complete one of these programs, or another suitable externship in the field of international arbitration.

Law - International Commercial Law and Dispute Resolution, Micro-Credential

This program requires a minimum of six credit hours of coursework chosen from a menu of courses currently offered on a regular basis by the School. If taken by an LL.M. student or a non-degree student wishing to preserve the ability to transfer credits to the LL.M. program, all requirements must be met on a graded rather than pass-fail basis. Admissions requirements for non-degree students in these micro-credentials will be identical to those for LL.M. students.

Completion of this micro-credential will require that students take at least six credit hours, with a grade of C or higher, in courses of which at least one is drawn from each of the following two rubrics:

Note: This micro-credential program was approved on October 1, 2021 in order to maintain accurate records, the program was added to the catalog on October 25, 2021.

Commercial Law:

International Business Transactions or, if not offered in a given term, one or more other courses approved by the CILE Academic Director that provide a comparable introduction to commercial and business law.

Dispute Resolution:

International Commercial Arbitration or, if not offered in a given term, one or more other courses approved by the CILE Academic Director that provide a comparable introduction to one or more forms of alternative dispute resolution.

Law - Tax Law, Micro-Credential

The Micro-credential in Tax Law will focus on subjects relating to personal and corporate, domestic and international tax law. Credits taken in this micro-credential will also count toward the student's general LL.M. degree. Because all Micro-credit courses are also regular law school courses, and because the LL.M. degree is usually completed within 12 months, there is no limit on the number of credits that can count toward both a Micro-credential and the general LL.M. degree. All Micro-Credential credits earned (with a grade of C or higher) will be valid to count toward the LL.M. degree for two years. 9 required credits for the micro-credential.

Curriculum:

Completion of this micro-credential will require that students take at least nine credit hours, with a grade of C or higher, in courses drawn from the following rubric: Corporate Taxation, Federal Income Taxation, Low-Income Tax Clinic, Nonprofit Exempt Organizations, Pittsburgh Tax-Review, State and Local Tax, Estate and Gift Tax, Partnership Tax, International Tax, or similar courses approved by the CILE Director.

- LAW 2817 - CORPORATE TAXATION
- LAW 2105 - FEDERAL INCOME TAX
- LAW 2425 - LOW INCOME TAX CLINIC
- LAW 2355 - NON-PROFIT ORGANIZATIONS
- LAW 5931 - PITTSBURGH TAX REVIEW

- LAW 2273 - STATE AND LOCAL TAX
- LAW 2259 - ESTATE AND GIFT TAX
- LAW 2371 - PARTNERSHIP TAX
- LAW 2841 - INTERNATIONAL TAX

Law - U.S. Business and Entrepreneurial Law, Micro-Credential

This program requires a minimum of six credit hours of coursework chosen from a menu of courses currently offered on a regular basis by the School. If taken by an LL.M. student or a non-degree student wishing to preserve the ability to transfer credits to the LL.M. program, all requirements must be met on a graded rather than pass-fail basis. Admissions requirements for non-degree students in these micro-credentials will be identical to those for LL.M. students.

Completion of this micro-credential will require that students take at least six credit hours, with a grade of C or higher, in courses of which at least one is drawn from each of the following two rubrics:

Note: This micro-credential program was approved on October 1, 2021 in order to maintain accurate records, the program was added to the catalog on October 25, 2021.

Structures of Business:

Classes focusing on the law of business entities and their ownership, including, for example, Business Organizations, Agency & Partnership, and Securities Regulation.

Commercial Relations:

Courses focusing on the contractual relations of business entities, including, for example, Contracts, Commercial Transactions in Goods, Secured Transactions, and International Business Transactions.

Professional

Law - Juris Doctor (JD)

Pitt Law offers the Juris Doctor (JD) degree as well as a number of joint degree programs with other Pitt schools, which lead to both a JD and a second master's degree.

In all of these programs, Pitt Law's essential mission is to help lawyers and legal institutions to meet the demands of a rapidly changing legal and professional environment.

The program's first-year curriculum offers a solid foundation in legal analysis and reasoning through courses in subject areas traditionally viewed as basic for legal education.

Pitt Law JD students enjoy a large degree of latitude in designing courses of study that meet their individual goals and interests, with only a handful of graduation requirements beyond the first year.

Pitt Law offers particularly rich opportunities in:

- International law, featuring prominent international/comparative law faculty, a rich international and comparative law curriculum, several courses each year taught by visiting foreign law professors, internships abroad, internationally

focused scholarships and fellowships, Languages for Lawyers courses, strong University programs (including area studies certificate programs), and international moot law competitions.

- "Live-client" clinics in a range of substantive areas and practice settings, giving students opportunities to develop valuable lawyering skills in the context of real-life, not simulated, legal disputes and transactions. Students grapple with legal, ethical, and practical issues, under the supervision of - and in close counsel with - a seasoned attorney faculty member.
- The Semester in D.C. Program, during which students spend a semester in Washington, D.C., earning a full semester's worth of academic credit while working full-time as an extern with a non-profit organization or government agency.
- Seven certificate programs/areas of concentration enabling students to concentrate their studies in particular areas of law. These programs include specialized advanced courses that incorporate lawyering skills relevant to particular areas of practice.
- Cross-disciplinary learning - Pitt Law students may take courses in other schools at Pitt or other local colleges and universities (up to six non-law graduate credits can be used toward the JD requirements). Some Pitt Law courses incorporate multiple disciplines, such as Law & Human Behavior and Law & Economics Seminar, or are jointly taught by law faculty and faculty from other disciplines to classes comprising both law and other graduate/professional students - for example, Commercializing New Technologies.

Pitt Law joint degree programs enable students to earn the JD as well as a master's degree in another discipline through an integrated program, more quickly than earning the two degrees separately.

Degree Requirements

Admission applications for the Pitt Law JD program will be accepted starting September 1 through our deadline of April 1. Applications are considered only for the current year for the fall semester. We require all applicants submit their applications on-line through the Law School Admission Council (LSAC). Pitt Law is highly competitive and decisions are based upon many factors. Once your application is complete, our Admissions Committee will review your application. Once we are able to make a decision, you will be notified by mail within several weeks. You can also verify your application status on-line with a user name and password, which will be sent to you electronically once you apply. We ask for your patience during the admissions cycle as it can become very busy during key times of the year.

Application Requirements:

- Applicants must submit a \$65 application fee
- Applicants must have completed a bachelor's degree from a regionally accredited college or university in the United States before the first day of law school.
- In cases where an applicant has completed studies outside the United States, the requirement is education deemed by the University of Pittsburgh to be comparable to a bachelor's degree from a regionally accredited college or university in the United States. [Click here for more information](#)
- When evaluating an undergraduate degree, the committee pays careful attention to the strength of the major field of study, as evidenced by the courses listed on the undergraduate transcript. Pitt Law is looking for applicants who have demonstrated the discipline and ability to handle a rigorous and demanding program. The admissions committee carefully evaluates graduate work and professional experience, although utilizes the undergraduate GPA.
- Applicants are required to register with the Credential Assembly Service (CAS) through LSAC and must take the LSAT. If an applicant takes the LSAT more than one time the highest score is considered by the admissions committee when making a decision. The latest test score that will be considered for all entrance is the score from the previous February examination. Scores from tests taken more than four years prior to the current admissions year will not be considered. More information can be obtained from the Law School Admission Council (LSAC).
- A required personal statement gives the committee a view into the non-academic world of the applicant and serves as the interview. This is critical in our ability to enroll a diverse class. We ask that you keep your personal statement to no more than two pages, typed, double spaced.

- Letters of recommendation play an equally important role in this process as they can reveal the strengths of the academic achievements of the applicant. We recommend three letters, although none are required. Letters should be submitted through the LSAC letter of recommendation service.
- We encourage applicants to submit a Resume, as they highlight for the admissions committee a broader view of your achievements.
- In addition to a bar examination, there are character, fitness, and other qualifications for admission to the bar in every U.S. jurisdiction. Applicants are encouraged to determine the requirements for any jurisdiction in which they intend to seek admission by contacting the jurisdiction. Addresses for all relevant agencies are available through the National Conference of Bar Examiners.

In order to graduate, a student pursuing a JD must complete 88 credits, including the following:

- A prescribed first-year curriculum, as follows: Contracts, Criminal Law, Legislation and Regulation, Torts, Civil Procedure, Constitutional Law, Property, and Legal Analysis and Writing, as well as attendance at a minimum of five programs (for students entering Fall 2019 or later) or six programs (for students entering before Fall 2019) in the Pitt Law Academy speaker series
- The upper-level writing requirement
- A course in Legal Profession
- Six credits in a course designated as satisfying the professional skills requirement
- The one-credit Foundations of Legal Research course
- A course designated as satisfying the international/comparative law requirement
- A course designated as satisfying the writing ("W") requirement

Additional graduation requirements apply for those students whose grade point averages place them in the bottom 15% of their class at the end of their first or second year. The upper-level writing requirement and other academic requirements are described in the Academic Rules and Graduation sections of the School of Law's web site.

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

First-Year Curriculum

The first-year curriculum is comprised of the following required courses, as well as attendance at a minimum of five programs (for students entering Fall 2019 or later) or six programs (for students entering before Fall 2019) in the **Pitt Law Academy**:

Fall:

- LAW 5020 - CONTRACTS
- LAW 5046 - CRIMINAL LAW
- LAW 5720 - LEGAL ANALYSIS AND WRITING
- LAW 5032 - LEGISLATION AND REGULATION
- LAW 5028 - TORTS

Spring:

- LAW 5033 - CIVIL PROCEDURE
- LAW 5101 - CONSTITUTIONAL LAW
- LAW 5076 - LEGAL ANALYSIS AND WRITING
- LAW 5024 - PROPERTY

Year Long Program

- LAW 5061 - PITT LAW ACADEMY

John P. Gismondi Concentration in Civil Litigation (15-20 Credits)

Through its unique John P. Gismondi Concentration in Civil Litigation, PittLaw provides law students with a unique curriculum devoted exclusively to training the trial lawyers of tomorrow.

During the first year of law school, all students take the same courses. Those students who wish to register for the Gismondi Concentration in Civil Litigation, do so at the beginning of their second year of law school. During their second and third years, all students enrolled in the Concentration will take certain required foundational core courses, a clinic or practicum, as well as a number of specialized classes. The heart of the Gismondi program is a collection of specialized courses taught exclusively by a preeminent group of practicing trial attorneys whose insight and experience offer an invaluable perspective in the classroom. Together with our core courses, these select courses provide a level and depth of litigation training unlike that available at most any other law school.

In each of these specialized skills courses, class size is kept small so as to enrich the learning experience. Students not only are taught legal rules and principles in a typical lecture format, but more importantly, they are assigned to "role play" in a variety of real world litigation scenarios, each designed to develop specific skills which are essential to successful trial work.

Students complete their training by taking a required litigation skills clinic or practicum selected from this group of options: Elder Law Clinic, Health Law Clinic, Tax Clinic, Immigration Clinic, Environmental Law Clinic, Securities Arbitration Clinic, PA Practice Practicum, Lawyering III Clinic, Criminal Prosecution Practicum, Criminal Defense Practicum or Family Law Clinic. In all of these clinics, students have the potential of representing real clients in actual court proceedings.

The students in the John P. Gismondi Civil Litigation Certificate Program will complete their law school education having developed a set of skills which better prepares them to do courtroom work than traditional law school graduates, and that advantage, in turn, makes the Gismondi certificate students more attractive to law firms seeking to hire young and enthusiastic litigation associates.

Core Courses (5 Credits)

- LAW 5103 - EVIDENCE

- LAW 5407 - TRIAL ADVOCACY
OR
- LAW 5616 - MOCK TRIAL STRATEGY AND PRACTICE

Specialized Skills Courses (Must take 3) (6 cr).

(one of the courses marked with * may be substituted for one of the specialized skills course upon request to Director)

- LAW 5223 - ADVANCED TRIAL EVIDENCE
- LAW 5197 - ADVANCED PENNSYLVANIA TORT PRACTICE
- LAW 5295 - EXPERT WITNESS
- LAW 5320 - LITIGATION STRATEGY AND PLANNING
- LAW 5236 - PRE-TRIAL PRACTICE-PLEADINGS AND DISCOVERY
- LAW 5422 - ALTERNATIVE DISPUTE RESOLUTION *
- LAW 5630 - FEDERAL CIVIL LITIGATION SKILLS *

A Clinic or Practicum (min. of 3 credits)

- LAW 5939 - CRIMINAL DEFENSE PRACTICUM

- LAW 5952 - CRIMINAL PROSECUTION PRACTICUM

AND

- OR
- LAW 5908 - INTERSCHOLASTIC MOCK TRIAL

School of Medicine

School of Medicine

The mission of the University of Pittsburgh School of Medicine is to improve the health and well-being of individuals and populations through cutting-edge biomedical research, innovative educational programs in medicine and biomedical science, and leadership in academic medicine. We strive to implement this mission with the highest professional and ethical standards, in a culture of diversity and inclusiveness, and in an environment that enables each individual to develop to his or her fullest potential.

School of Medicine Faculty

Certificate

Clinical Translational Sciences Certificate

This certificate program in Clinical Translational Sciences provides students within MS or PhD programs in the health sciences the opportunity to develop expertise in conducting clinical and translational research. Though the majority of courses are in person, the certificate is considered hybrid because one course is offered online only. The core curriculum provides trainees with the basic set of skills that are required by clinical and translational investigators in all fields of interest. It is made up of 2 curricular cores: the first is the Research Core, which consists of 8 credits of courses in computer methods, clinical research methods and biostatistics. The second is a Regression and Ethics Core, which includes 3 credits of courses in Regression and ANOVA, Logistical Regression and Ethics in research. Combined with the mentorship from their graduate programs, this certificate provides added expertise and develops students' ability to conduct clinical and translational research.

Detailed Admissions Requirements

Students must first be admitted into a doctoral or masters degree granting program in one of the Schools of the Health Sciences prior to their acceptance into the clinical translational sciences graduate certificate program. Once admitted for graduate study within a program, students may apply to the Institute for Clinical Research Education for admission to the certificate program. Students must be in good academic standing and possess a strong interest in clinical and translational science

Contact Information

Institute for Clinical Research Education
200 Meyran Ave, Suite 300
Pittsburgh, PA 15213
Phone: 412-586-9632
Fax: 412-586-9672

Email: icre@pitt.edu

Admissions Criteria

- Applicants must meet the following requirements before filling out an online application.
- Candidates must be in a graduate program (PhD or MS) in the health sciences
- Candidates must have a high level of interest and potential for the pursuit of innovative clinical and translational research as a major focus of their career plan.
- A minimum GPA of 3.2 on a 4.0 scale
- TOEFL, IELTS, and Duolingo scores (when applicable)
- GRE scores are not accepted

Timeline

The Certificate in Clinical Translational Sciences accepts applications from December 15 through February 28 each year. In order to guarantee that you are considered for admission, we must receive your application and all component parts by February 28. Students will be notified via email of admission decisions approximately 1-2 months following the close of the application cycle.

Financial Assistance

The Institute for Clinical Research Education does not provide financial aid. Unless students have other funding sources, they are responsible for covering the tuition costs, taxes, and fees associated with their course enrollment.

Clinical Translation Sciences Certificate - Course Curriculum

Research Core (8 Credits)

- CLRES 2005 - COMPUTER METHODS FOR CLINICAL RESEARCH
- CLRES 2010 - CLINICAL RESEARCH METHODS
- CLRES 2020 - BIOSTATISTICS
 - *CLRES 2020 (Biostatistics) may be substituted for an alternative graduate level biostatistics course up to 6 credits

Regression & Ethics Core (3 Credits)

- CLRES 2021 - REGRESSION AND ANOVA
- CLRES 2022 - LOGISTIC REGRESSION
- CLRES 2050 - ETHICS & RESPONSIBLE CONDUCT OF RESEARCH (ONLINE)

Total Credits: 11

First Professional Program (MD)

The mission of the University of Pittsburgh School of Medicine is to improve the health and well-being of individuals and populations through cutting-edge biomedical research, innovative educational programs in medicine and biomedical science, and leadership in academic medicine. We strive to implement this mission with the highest professional and ethical standards, in a culture of diversity and inclusiveness, and in an environment that enables each individual to develop to their fullest potential.

UPSOM has a well-developed curricular infrastructure that combines a case-based curriculum with early and in-depth clinical experiences. The clinical years are characterized by an integrated clerkship structure and an emphasis on

student flexibility. The UPSOM educational objectives, which are used to guide course content and learning objectives, underwent a school-wide review and update in 2023.

UPSOM introduced the Three Rivers Curriculum (3RC) in 2023. This is a case-based curriculum with more frequent assessment, greater integration across the curriculum, and enhanced coverage of priority areas of four key threads: clinical reasoning, interprofessional education, leadership, and social medicine. Students will also participate in other activities (which includes observation of and appropriate participation in patient care, community-site visits, experiences with standardized patients, high-fidelity simulations, patient conferences, laboratory exercises, and other activities). A longitudinal performance-based assessment program provides formative support as students hone their clinical skills.

The patient focus of the UPSOM curriculum begins on day one, in the Introduction to Being a Physician course. Students interview patients about their experience of illness and experiences with their physicians, to develop an understanding of their roles as medical professionals. Medical interviewing and physical examination courses follow, along with exercises examining the many facets of physician life-in society, ethical and legal settings, and at the patient bedside.

Throughout the Foundations phase, students apply their new skills in local practices and hospitals one afternoon per week.

The Keystone Fundamentals course runs through the fall of the first year and provides language and concepts that underlie the scientific basis of medical practice. Organ Systems block courses integrate physiology, pathophysiology, pharmacology, and introduction to medicine with concurrent courses in the Patient-Centered Care and Patient, Physician and Society blocks. Weekly discussions, patient interviews, and examination of patients reinforce essential clinical skills. In addition, three progress tests will both help students and their coaches track progress through curricular subjects and gauge Step 1 readiness.

There are a number of other learning activities students participate in during their time in the Three Rivers Curriculum. The Longitudinal Alliance Program is designed to create meaningful relationships between patients and medical students to develop empathetic, compassionate physicians and increase awareness of what a patient goes through in today's health care system. The Community Alliance Program is a uniquely innovative program that aims to partner with community organizations to engage students and faculty in communities of practice to address social and structural determinants of health. The Streams are a unique way students can do a deeper dive into select areas such as advocacy or innovation. Flex Weeks are dedicated time for independent learning and remediation, shadowing, research, and personal activities.

The third-year curriculum consists of **required clerkships (ten in Legacy and eight in 3RC)**. They are designed to optimize the balance between out-of-hospital and inpatient learning opportunities, eliminate unintentional curriculum redundancy, and optimize opportunities for student- designed curricula in the junior and senior years. **The third year begins with a one-week clinical focus course.** Every student engages in a mentored longitudinal research project conducted longitudinally throughout the four-year curriculum.

Completion and presentation of the longitudinal research project is due in the spring of the senior year and is a requirement for graduation. An innovative system of web-based learning portfolios facilitates learner-mentor communication and enriches the possibilities for collaboration within and beyond the University.

The information above details the school's MD program.

The MD Curriculum was modified in Spring 2023. Students enrolled in the Legacy curriculum will have until Fall 2031 to complete the previous program requirements. For more information on the legacy curriculum, please reference the First Professional Program, MD in the archived catalogs.

Requirements for Admission

Admission Process

The admissions process is described in great detail on the Office of Admissions and Financial Aid web site. The by-laws of the Admissions Committee specifically state the school's criteria for selecting students for admissions. The by-laws are reviewed and updated at the year-end business meeting of the UPSOM Admissions Committee.

Financial Aid

Financial aid for medical students is available in the form of scholarships, need-based grants, and loans (federal, private, and institutional resources). For maximum consideration of all resources, students should complete the CSS Profile and the Free Application for Federal Student Aid (FAFSA). These applications should include the student's information, spouse's information (if applicable), and both parents' information. Signed copies of federal tax returns (for student/spouse and parents) must be provided to the financial aid office. Aid is awarded on the basis of financial need, as determined from the financial aid applications and supporting documentation.

Newly admitted students should apply by March 1, or if admitted after February 15 no later than two weeks after acceptance, to ensure that an award letter is provided prior to the national decision date of April 15th.

Upperclassmen should provide all required information no later than March 1. The Free Application for Federal Student Aid (FAFSA) should be submitted prior to March 1 to ensure results are available prior to the deadline.

Students who do not wish to provide parental information are still considered for Federal Direct Unsubsidized loans, Federal Direct Graduate PLUS loans, and private loans; these students should complete the FAFSA and provide a signed copy of their federal tax return but do not have to submit parent information or the CSS Profile.

The financial aid process is described in detail on the Office of Financial Aid's website

Academic Standards

The University of Pittsburgh School of Medicine offers a centrally governed, integrated, interdisciplinary curriculum that emphasizes problem solving and self-directed learning. The academic year is in session between 10 and 12 months, depending on the level of study. Academic calendars specific to each year can be found on the Office of Medical Education's web site. The first three years is a set curriculum and the fourth year is a combination of both set and elective offerings. To be considered to be making satisfactory academic progress, the student must complete the first two years of the curriculum by the end of the third year after initial enrollment. The full text of the guidelines for student promotion can be found in the medical student handbook on the Office of Student Affairs web site. Students are governed by a Code of Professionalism, which seeks to support and sustain respect for each other as well as for patients. The full text of the Code can be found in the student handbook.

Grading

The UPSOM makes use of a 2-tiered grading system. The Foundations Phase of the curriculum are graded as Satisfactory/Unsatisfactory. In the second two years of the curriculum, all clinical rotations and most electives are graded using a five-tiered grading system, with narrative comments: Honors, , High Satisfactory, Satisfactory, Low Satisfactory, or Unsatisfactory.

Degree Requirements

To receive the MD degree, students must:

Successfully complete curricular requirements for each of the four years.

The Foundations Phase courses include: introduction to being a physician; keystone fundamentals; cardiology; nephrology; pulmonology; digestion and nutrition; rheumatology; dermatology; evidence, discovery, and reasoning; patient, physician and society; medical interviewing; physical examination, and introduction to clinical medicine 1.

Second year: Courses include: endocrinology; reproduction, sexual health, and gynecology; musculoskeletal; neuroscience, psychiatry; oncology; and introduction to clinical medicine 2.

Third year: **Rotations in inpatient medicine; family medicine; pediatrics; obstetrics and gynecology; neurology; psychiatry; surgery, anesthesiology; and outpatient medicine; emergency medicine; otolaryngology; and ophthalmology.** The third and fourth year schedule is viewed as a continuum and designed so students may enroll in clinical or research electives at any time during the third or fourth years.

Fourth year: An acting internship in either **internal medicine, pediatrics, family medicine, cardiothoracic surgery, physical medicine and rehabilitation, medical intensive care unit, NICU, or surgery;** four weeks of an integrated life science course of the student's selection; a boot camp; and seven to eight months of clinical and/or research elective experiences.

Pass the United States Medical Licensing Examination, both Steps 1 and 2 CK, as well as an internal clinical skills competency assessment.

Complete a Longitudinal Research Project and waiver training for buprenorphine prescribing.

Degree Options

In addition to the MD program, the UPSOM offers a structured MD/PhD dual degree program, an MD/MA in Bioethics, a certificate program in Clinical Research, and a five-year non-degree-granting program for physician-scientists. Students can also participate in a joint degree program with the School of Public Health, earning a MPH, MMPH, or MS degree. The school encourages and facilitates students completing other degree programs during the MD curriculum, such as a MBA or MPA. [Add MS in not graduating here].

Professional Enrichment Courses

Professional Enrichment Courses (PECs) provide increased opportunities for preclinical medical student exploration and growth. Examples of PECs include Medical Spanish, Culinary Medicine, Introduction to Ophthalmology, and Plastic Surgery. Students have the opportunity to enroll in PECs during their Flex Weeks or as longitudinal experiences.

Doctoral

First Professional Program, MD Curriculum

Foundations Phase

- Introduction to Being a Physician - MED 5111
- Keystone Fundamentals - MED 5102
- Patient, Physician, and Society 1 -MED 5103
- Medical Interviewing - MED 5104
- Evidence, Discovery, and Reasoning 1 - MED 5105
- Physical Examination - MED 5108
- Cardiology - MED 5109
- Nephrology - MED 5120
- Pulmonology - MED 5140
- Digestion & Nutrition - MED 5118
- Rheumatology - MED 5130

- Dermatology - MED 5136
- Patient, Physician, and Society 2 - MED 5125
- Evidence, Discovery, and Reasoning 2 - MED 5129

- Oncology - MED 5243
- Introduction to Clinical Medicine 2 - MED 5246
- Patient, Physician, and Society 3 - MED 5244
- Longitudinal Alliance Program - MED 5106
- Community Alliance Program - MED 5107
- Longitudinal Research Project - MED 5134

MS-3

The Preclerkship Course is an introduction that is presented immediately prior to the start of the third year. It includes aspects of clinical, humanistic, and administrative preparation for clinical experiences.

Required clerkships form the core of the combined clinical years (ten required in Legacy, eight required in Three Rivers Curriculum). The overall aim of the clerkship experience is to provide students with the essential experiences where they will apply their knowledge and skills as they develop competence in the care of patients. Together, the clerkships, and all other clinical experiences, share a fundamental set of objectives.

Overall, the objectives of the required clerkships are for students to be able to:

- Integrate basic science concepts with clinical reasoning.
- Establish and maintain appropriate therapeutic relationships with patients.
- Obtain a sensitive and thorough medical history.
- Perform a sensitive and accurate physical examination.
- Perform general clinical procedures.
- Participate in discussions and decision-making with patients and families.
- Clearly communicate medical information in spoken and written form.
- Develop knowledge, skills, and attitudes to practice the basic principles of prevention.

- Demonstrate sound clinical reasoning.
- Appropriately assess patients with common signs and symptoms.
- Appropriately use testing to guide diagnostic and therapeutic decisions.
- Diagnose and demonstrate basic understanding of common diseases and conditions.
- Describe therapeutic options and participate in the care of patients with common problems.
- Recognize acute life-threatening medical problems and initiate care.
- Develop the knowledge and exhibit the skills necessary to assist in the management of chronic diseases.
- Participate in care in a variety of settings.
- Develop the knowledge, skills and attitudes necessary to provide culturally competent care.
- Recognize and develop approaches to mitigate bias, social inequities, and systemic racism that undermine health and create challenges to achieving health equity at individual, organizational, and societal levels.
- Use information and educational technology to facilitate research, education and patient care.
- Incorporate ethical and legal principles in clinical practice and research.
- Demonstrate professional behaviors.
- Work effectively with others as a member or leader of a health care team or other professional group.
- Develop an understanding of the impact of nonmedical determinants of health on health outcomes and health equity.

Clerkships

- Adult Inpatient Medicine
- Adult Outpatient Medicine
- Anesthesiology (Required in third year for Legacy only) Family Medicine
- Neurology
- Obstetrics and Gynecology
- Pediatric Medicine
- Psychiatry
- Specialty Care (Legacy only)
- Surgery

Clinical Clerkships

Ten required clerkships form the core of the combined clinical years. The overall aim of the clerkship experience is to provide students with the essential experiences where they will apply their knowledge and skills as they develop competence in the care of patients. Together, the clerkships, and all other clinical experiences, share a fundamental set of objectives.

Overall, the objectives of the required clerkships are for students to be able to:

- Integrate basic science concepts with clinical reasoning.
- Establish and maintain appropriate therapeutic relationships with patients.
- Obtain a sensitive and thorough medical history.
- Perform a sensitive and accurate physical examination.
- Perform general clinical procedures.
- Participate in discussions and decision-making with patients and families.
- Clearly communicate medical information in spoken and written form.
- Develop knowledge, skills, and attitudes to practice the basic principles of prevention.
- Demonstrate sound clinical reasoning.
- Appropriately assess patients with common signs and symptoms.
- Appropriately use testing to guide diagnostic and therapeutic decisions.
- Diagnose and demonstrate basic understanding of common diseases and conditions.
- Describe therapeutic options and participate in the care of patients with common problems.
- Recognize acute life-threatening medical problems and initiate care.
- Develop the knowledge and exhibit the skills necessary to assist in the management of chronic diseases.
- Participate in care in a variety of settings.
- Develop the knowledge, skills and attitudes necessary to provide culturally competent care.
- Recognize and develop approaches to mitigate bias, social inequities, and systemic racism that undermine health and create challenges to achieving health equity at individual, organizational, and societal levels.
- Use information and educational technology to facilitate research, education and patient care.
- Incorporate ethical and legal principles in clinical practice and research.
- Demonstrate professional behaviors.
- Work effectively with others as a member or leader of a health care team or other professional group.
- Develop an understanding of the impact of nonmedical determinants of health on health outcomes and health equity.

MS-4

General Schedule for Fourth Year

Clerkship Period	1	2	3	4	5	6	7	8	9	10	11	12	12.5
Length (in Weeks)	4	4	4	4	4	4	4	4	4	4	4	4	4

During the combined clinical years (MS-3 & MS-4) students rotate through required clerkships in any sequence. Additional requirements are 1 Acting Internship, 1 Integrated Life Sciences Selective, 1 Boot Camp Selective, and 8 electives.

What do the 12.5 Periods in the MS-4 year include?

- Eight electives
- One acting internship
- One integrated life science course
- One boot camp course
- Two recess/interview periods
- One recess week in the fall

Acting Internship

An acting internship (sub-internship) of four-week duration is required during the senior year. An AI is a clinical rotation offered on an in-patient service in which one or more attending physicians have overall responsibility for coordinated patient care. The service will be structured with both attending staff and house staff.

The acting internship should include the assignment to the student of specific groups of patients upon whom he or she completes an initial history and physical examination, constructs a differential diagnosis, formulates a treatment plan, writes orders, and carries out necessary therapy, all under careful supervision.

Acting internships that fulfill this requirement are offered in:

- Cardiothoracic Surgery
- Family medicine
- Internal Medicine
- Medical Intensive Care Unit
- NICU
- Pediatric
- Physical Medicine and Rehabilitation
- Surgery

Search the Course Catalog for more information on Acting internships.

Acting internships in other departments or out of the city will not fulfill the AI requirement.

Integrated Life Science Course

The fourth year Integrated Life Science (ILS) Program includes a choice of courses that revisit some aspect of basic science after students have had several years of clinical experience. Because of the level of sophistication that students have developed by this stage in their medical education, they can better understand the relevance of basic science to clinical problems. Each student is required to complete one ILS course.

ILS Courses

- Changing Science, Changing Society: A Guide to 21st Century Medicine - MSELCT 5700
- Clinical Pharmacology - MED 5710
- Immunization, Immune Deficiency, and Inflammation in Kids - PEDS 5710
- Infectious Disease in Obstetrics, Gynecology and Reproductive Medicine - OBGYN 5725
- Neoplasia and Neoplastic Disease - MED 5715
- Neurosurgery and Head and Neck Dissection - NSURG 5705
- Science of Resuscitation - EMED 5735

Boot Camp

A Residency Boot Camp of four-week duration is required during the senior year.

Boot Camps that fulfill this requirement are offered in:

- Anesthesiology
- Emergency Medicine
- Internal Medicine
- Obstetrics, Gynecology, and Reproductive Sciences
- Pediatrics
- Psychiatry
- Surgery

Recommended Electives

In order to provide diversity, it is strongly recommended that you take at least one elective in each of the following blocks:

- Medicine or neurology
- Pediatrics, pediatric neurology, pediatric pathology, pediatric surgery
- Surgery or surgical subspecialties, obstetrics and gynecology
- Ambulatory care, community medicine, or psychiatry.

Clinical Competency Assessment (CCA)

- Clinical Competency Assessment Orientation Handbook

Joint Degree

Bioethics, MD/MA

Students enrolled in the University of Pittsburgh School of Medicine may elect to earn the Master of Arts in Bioethics in conjunction with their medical degree. This allows the 30 credit MA degree to be earned in an accelerated program, taking a year away from the MD program, usually between the second and third years of medical school. During this one year, the student will follow the Dietrich School of Arts and Sciences calendar for the fall and spring terms, pay tuition at the in-state tuition rate set for Dietrich School graduate students, and must adhere to the rules, regulations, policies, and procedures of the Dietrich School. Applicants must complete the on-line application and provide official transcripts from their undergraduate and graduate studies, 3 letters of recommendation, a personal statement, and writing sample. Inquires about the MD/MA program, the MA curriculum, and the Center for Bioethics & Health Law, which runs the Bioethics Program may be directed to bioethics@pitt.edu.

Core Course Requirements

The following courses are required for the degree:

- BIOETH 2658 - PHILOSOPHY OF MEDICINE
- BIOETH 2661 - THEORETICAL FOUNDATIONS OF APPLIED ETHICS
- BIOETH 2664 - BIOETHICS
- OR
- LAW 5464 - BIOETHICS AND LAW

Clinical Practica

The following courses are required for the degree:

- BIOETH 2604 - CLINICAL PRACTICUM 1

Thesis Research

Students must complete a research project and write a thesis under the supervision of an advisor, and defend it before a committee. Students may register for up to 6 course credits related to their thesis research.

Restrictive Electives

Students choose one elective from a list of "restricted elective" courses. Courses placed on this list pursue ethical issues related to a particular area in substantial depth, then or employ a particular disciplinary perspective to explore issues in medicine and research. In recent years, restricted electives have included:

- Ethics and Aging
- Gender, Ethics, and the Body
- Medical Anthropology
- Medical Sociology
- Mental Health Law
- New Reproductive Practices and Law
- Philosophy of Psychiatry
- Public Health Law and Ethics
- Special Topics in Bioethics

Electives

The remaining credits may be taken in electives approved by the program director. Students work with the program director and their thesis advisor to pursue their particular interests. Students may take a Special Topics in Bioethics or Directed Reading in Bioethics course, or may identify relevant elective courses from various departments and schools of the University, including:

- Anthropology
- Communication
- Cultural Studies
- English
- Film Studies

- Gender, Sexuality, and Women's Studies
- History and Philosophy of Science
- Law
- Philosophy
- Psychology
- Public Health
- Sociology
- Women's Studies

In addition, through the Pittsburgh Council on Higher Education, full-time students may take courses at consortium-affiliated institutions, including including Carnegie Mellon University.

Clinical Science Training Program, MD/MS

The Clinical Scientist Training Program (CSTP) offers clinical research training and scholarships to University of Pittsburgh medical students who are committed to careers in clinical investigation. Students may complete the dual MD/MS in clinical research or the MD/Certificate in clinical research.

The CSTP involves a research year between third and fourth year of medical school, typically scheduled July 1 - June 30. We expect students to take their research year after completing their core clerkships in the third year of medical school in order to ensure that their research will be informed by their clinical knowledge. The research year includes:

- **Formal coursework:** Students complete the ICRE core curriculum (11 credits). Those completing the MD/Certificate complete 7 additional elective credits. Those completing the dual MD/MS program complete 6 units of thesis research and 10 additional track-specific required and elective credits.
- **Mentored clinical research:** Students complete a mentored clinical research project with their SP mentor.
- **Financial support:** During the research year, students receive a living stipend, health insurance, and travel funds. Additionally, they receive a full tuition scholarship for the cost of the Certificate. The cost of the additional credits for the MS are the student's responsibility to pay. Students who successfully complete their research year objectives additionally receive a substantial tuition scholarship toward the fourth year of medical school upon returning from the research year.

For more information, contact us.

Core Curriculum

All CSTP students complete the core curriculum during the CSTP research year.

- CLRES 2005 - COMPUTER METHODS FOR CLINICAL RESEARCH
- CLRES 2010 - CLINICAL RESEARCH METHODS
- CLRES 2020 - BIOSTATISTICS
- CLRES 2040 - MEASUREMENT IN CLINICAL RESEARCH
- CLRES 2075 - SEMINAR FOR UNDERSTANDING PRINCIPLES AND PRACTICES OF RESEARCH TECHNIQUES (SUPPORT)
- MEDEDU 2140 - SCIENTIFIC WRITING & PRESENTATION SKILLS (ONLINE)
or
- NROSCI 2014 - SPEAKING OF SCIENCE

MD/Certificate

Students completing the dual MD/Certificate register for 18 units during their CSTP research year (9 units in Summer, 4.5 units in Fall, and 4.5 units in Spring). These credits include the 11-credit core curriculum and 7 credits of elective credits.

MD/MS

Students completing the dual MD/MS degree receive 3 credits from pre-clinical courses in the MD curriculum (MED 5180, MED 5181, & MED 5265) toward the 30-credit MS degree. Students register for the remaining 27 credits during their CSTP research year (9 credits in Summer, 6 credits in Fall, and 6 credits in Spring) and after returning to medical school.

Law and Bioethics, JD/MA

Program Overview

JD/MA, University of Pittsburgh School of Arts and Sciences and the Center for Bioethics and Health Law

The School of Law and the School of Arts and Sciences (A&S) offer a joint degree program in law and bioethics. Graduates of the program receive the Juris Doctor (JD) degree, the basic professional degree in law, and the Master of Arts (MA) degree from FAS, in bioethics. The joint degree program is directed by Greer Donley, in cooperation with Lisa S. Parker, PhD, who directs the interdisciplinary Master of Arts in Bioethics.

The joint degree program has been established in recognition of the extensive and increasing overlap between law and bioethics. The objective of this educational program is to prepare graduates with an interdisciplinary background in law and bioethics so they can address those issues and situations that require knowledge of and expertise in both. Graduates will be academically prepared for professional roles as bioethicists in health care institutions, in public policy working for government or philanthropic organizations, or in the practice of law, for example, giving counsel to health care institutions.

Contact Information

University of Pittsburgh School of Law
Professor Greer Donley
3900 Forbes Avenue
Pittsburgh, PA 15260

(412) 648-1359

donley@pitt.edu

Requirements

The sequence of the curriculum is designed to allow students maximum flexibility. Students may either take the entire first-year School of Law curriculum intact, or they may take one bioethics course - Theoretical Foundations of Applied Ethics - in place of Criminal Law (which would then be taken in their second year of law school). Students should discuss this plan of study with Prof. Alan Meisel, Director of this joint program.

Writing Requirements

The writing requirements for both degrees are simultaneously satisfied by completion of the master's thesis requirement in a subject in the field of law and bioethics.

Practica

The Clinical Practica ensure that students will be comfortable in and knowledgeable about the clinical setting by learning how to identify the normative issues in clinical cases and to be able to give practical advice regarding difficult bioethical dilemmas. Students are scheduled for six credits of clinically-based work, which may be reduced to three for students with previous health care training. In Clinical Practica I and II students acquire familiarity with the clinical setting by

- rounding in specified services with residents, attending physicians, and other health care professionals, including one night on call per service
- participating in twice weekly seminars on medical sociology and clinical ethics and to fulfill those seminar requirements of reading, writing, discussion, and case presentations
- observing ethics consultations and clinical ethics teaching sessions
- completing a self-paced programmed text covering basic medical terminology

In Clinical Practicum II, students participate in an intensive four-week rotation in the clinical area of their choice, allowing in-depth development in an area of clinical medicine. Students should relate this intensive clinical experience to their thesis topic.

In addition to meeting the specifically required coursework for the JD degree and the MA degree, students will select electives from among an array of courses available in the two separate degree programs and in other parts of the University. For an up-to-date list of law school courses considered to be especially appropriate for students in this joint degree program, students should consult the courses listed as electives for the Health Law Certificate Program.

Students in the joint law and bioethics program will ordinarily fulfill the requirements of the Health Law Certificate Program in the law school and may obtain this certificate concurrent with the joint degree.

Advising

Students are required to consult with the Director of the Joint Degree Program during or prior to the spring registration period each year in order to assure that they meet all requirements of the Joint Degree program.

For Students Interested in Practicing in New York

Please be advised that students who wish to be admitted to practice in New York should not enroll in this joint degree program unless they limit the number of credits from outside the Law School that count toward their JD degree to no more than 12. See New York Rules of Court § 520(c)(5).

Credits

Students enrolled in the joint degree program accomplish in three to four years what would take four or more years if the two degrees were obtained separately. The total required number of credits 100, as compared with 118 credits if the two degrees were taken separately. The 100 credits include 34 credits of specifically prescribed* law courses, the Bioethics and Health Law Clinical Practicum (3 credits), and 18 specifically prescribed credits in bioethics. Within the remaining 45 credits, students must satisfy requirements for their law degree, take a course from the list of Restricted Elective courses for the bioethics degree, and take at least 3 credits in a course relevant to bioethics (either in the law school or not).

Taken as a joint degree program, the two degrees are ordinarily earned in 7 semesters and one summer.

During at least 5 semesters, joint degree students must be coded by the University Registrar as "primary law." During these semesters, they pay tuition at the Law School rate. They must enroll in at least 10 credits of law school courses.

Specifically Prescribed Law Courses

- LAW 5020 - CONTRACTS
- LAW 5046 - CRIMINAL LAW
- LAW 5720 - LEGAL ANALYSIS AND WRITING (Fall Term)
- LAW 5076 - LEGAL ANALYSIS AND WRITING (Spring Term)
- LAW 5028 - TORTS
- LAW 5033 - CIVIL PROCEDURE
- LAW 5101 - CONSTITUTIONAL LAW
- LAW 5032 - LEGISLATION AND REGULATION
- LAW 5024 - PROPERTY
- LAW 5061 - PITT LAW ACADEMY (Fall Term)
- LAW 5062 - PITT LAW ACADEMY (Spring Term)
- BIOETH 2604 - CLINICAL PRACTICUM 1
- BIOETH 2904 - MA THESIS IN BIOETHICS
- BIOETH 2606 - CLINICAL PRACTICUM 2
- BIOETH 2664 - BIOETHICS
- BIOETH 2658 - PHILOSOPHY OF MEDICINE
- BIOETH 2661 - THEORETICAL FOUNDATIONS OF APPLIED ETHICS

Additional credits to complete the graduation requirement may include courses service as a bioethics restricted elective or a bioethics elective.

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Medical Scientist Training Program, MD/PhD

The Medical Scientist Training Program (MSTP) offers exceptionally talented individuals the opportunity to undertake a physician-scientist training program tailored to their specific research interests. Our primary directive is to create future biomedical investigators by providing the highest quality graduate medical training. This program offers a range of special services and opportunities to facilitate the completion of a dual degree (MD/PhD). In addition to efficiency, the close integration of clinical and basic science training better reflects the future careers of biomedical scientists. Information regarding the application process can be found on the MSTP web site.

Admissions Process: Prospective students must apply individually to the University of Pittsburgh School of Medicine through the American Medical College Application Service (AMCAS) and complete the MSTP online application. The criteria for acceptance to the MSTP include an outstanding academic record and letters of recommendation, positive personal interviews, and significant prior research experience. Admission to the MSTP is competitive, as is admission to graduate school, with students applying to the PhD programs of their choice after the first year of medical school.

Every year the program receives approximately 600 applications for a maximum of 15 available positions. The application review committee screens each completed application and well-qualified applicants are invited for an interview in Pittsburgh. Students recently enrolled in the MSTP have an average undergraduate GPA of 3.78 (This is for general assessment purposes only; applications are considered holistically.) We also review the letters of recommendation that are submitted to the medical school as part of candidates' School of Medicine application. Please be sure to include two letters of recommendation from faculty and/or scientists who are conversant with your research

training. Previous research experience and commitment to a career as a physician-scientist are crucial in the evaluation of applications. Please convey your anticipated research interests and plans as well as past work. Additionally, a bachelor's degree or equivalent must be completed prior to matriculating.

- **MSTP Application Deadline:** Applicants must submit an initial application through AMCAS by October 1. In order to be considered for the MSTP, your MD application along with the supplemental application for Pitt-CMU MSTP and all supporting documents, including letters of recommendation, are due no later than 11:59 PM on **OCTOBER 15**. We do not grant application deadline extensions. Early applications is strongly encouraged, as interview offers are made on a rolling basis. Our MSTP admits only U.S. citizens and U.S. permanent residents; international students are ineligible for the MSTP.

- **Acceptances:** We accept students on a rolling basis; therefore, it is very important to complete the application, including recommendation letters, as early as possible. Applicants must complete their MD secondary application as soon as possible. Starting October 17, those who were chosen for interviews will be informed of their acceptance status to our program within roughly three weeks of their interview date. Applicants are ranked and notified of the following action:

- Acceptance into MSTP with full funding for all years of medical school and graduate school (including tuition and stipend)
- Wait-listed for acceptance into MSTP with funding
- Not accepted into MSTP

A second group of students is placed on the wait list that is considered depending on spots available after admitted student decisions. The University of Pittsburgh MSTP also accepts a small number of matriculated second-year medical students into the dual-degree program based upon their outstanding performance and developing interest in research pursuits during their medical school experience. Once admitted to the program, we do not accept any transfer credits from undergraduate or graduate courses to fulfill the MSTP course requirements.

The University of Pittsburgh and Carnegie Mellon University MSTP recognizes that our training environment is positively enriched by trainees with diverse backgrounds and needs. Our program considers all eligible applicants and does not discriminate on the basis of race, color, sex, veteran status, disability, national origin, creed, marital status, age, disability, gender identity, or sexual orientation.

Tuition and Fees:

MSTP students are fully supported through the entire program. Tuition, health insurance, and stipend are supported by a combination of funds from a National Institute of Health training grant, individual graduate programs, and School of Medicine funds.

Degree and Program Requirements

The MSTP program has many unique aspects of the curriculum, designed to integrate MSTP education through courses such as molecular medicine, the research basis of medical knowledge, professional development, ethics, and longitudinal clinical clerkships. MSTP students begin training to become physician-scientists from the very first week, and are well advised about possible courses and research opportunities. Descriptions of additional MSTP courses are listed below:

- MSTP 5015 - MSTP LABORATORY RESEARCH ROTATION
- MSTP 5010 - MOLECULAR MEDICINE
- MSTP 5290 - RESEARCH BASIS OF MEDICAL KNOWLEDGE
- MSTP 5973 - PROFESSIONAL DEVELOPMENT II: METHODS AND ANALYSIS
- MSTP 5971 - MSTP PROFESSIONAL DEVELOPMENT
- MSTP 5983 - ETHICS FOR MEDICAL SCIENTISTS
- MSTP 5990 - LONGITUDINAL CLINICAL COURSE

- MSTP 5993 - LONGITUDINAL CLN CLERKSHIP 3
- MSTP 5955 - MSTP WORKSHOPS
- MSTP 5975 - CAREER-RELATED RESEARCH

Master's

Medical Science, MS

The academic requirements for this degree will include successful completion, i.e., passing grades, of all courses in the Preclerkship Years (MS 1-2) and submission a scholarly project that incorporates the student's medical knowledge. The scholarly project would represent a mentored capstone project rather than be a credit bearing course. The scholarly project would culminate in a document structured as a research report or literature view. The written product will be at least 5-page summary demonstrating the knowledge gained through the engagement in the project. Together, these requirements would meet the criteria defined by the Program Committee for the Master of Medical Science. No additional courses will be required, and no additional tuition will be required for completion of the scholarly project. The Program Committee for the Master of Medical Science will decide on the acceptability of the project. The student must also submit a letter voluntarily withdrawing from the University of Pittsburgh School of Medicine MD program.

Foundations Phase

Foundations Phase

Non-Degree

Physician Scientist Training Five-Year Non-Degree Program

Overview: The Physician Scientist Training Program (PSTP) at the University of Pittsburgh School of Medicine is a five-year tuition assistance non-degree granting program through which students with a strong basic/translational research interest can start to build careers as physician-scientists. The PSTP website is located at pstp.pitt.edu.

Tuition Assistance: Medical school tuition is partially covered by the program (\$10,000 for each of the four years of medical school). Students do not pay tuition during their research year between MS2 and MS3.

Admissions Process: Applicants invited for an interview at the University of Pittsburgh School of Medicine are eligible to apply to the PSTP. A completed PSTP application consists of both the PSTP supplemental application and two research-focused letters of recommendation.

The PSTP interviews approximately 20 qualified candidates per year. Qualified applicants demonstrate a high degree of scholastic excellence, a sincere commitment to a career in academic medicine, and the potential to be a leader in biomedical research.

Program Completion Requirements

All PSTP students successfully complete paid research rotations during the summer before and after the first year of medical school, and a paid research year between the second and third years of medical school. PSTP students also participate in a longitudinal enrichment curriculum of research-oriented classes:

- MSELCT 5100 - PSTP PROFESSIONAL DEVELOPMENT 1
- MSELCT 5120 - PSTP PROFESSIONAL DEVELOPMENT 2
- MSELCT 5130 - PSTP RESEARCH BASIS OF MEDICAL KNOWLEDGE
- MSELCT 5950 - PSTP WORK IN PROGRESS SEMINAR

- MSELCT 5100 - PSTP PROFESSIONAL DEVELOPMENT 1

- MSELCT 5120 - PSTP PROFESSIONAL DEVELOPMENT 2

- MSELCT 5130 - PSTP RESEARCH BASIS OF MEDICAL KNOWLEDGE

- MSELCT 5950 - PSTP WORK IN PROGRESS SEMINAR

Graduate Programs

The University of Pittsburgh School of Medicine has a long tradition of research excellence and training by world-class faculty committed to mentoring the next generation of scientists. The School of Medicine offers a variety of programs leading to the Doctor of Philosophy, the Master of Science, or a certificate. In addition, it works with other schools of the University through collaborative graduate programs. The School of Medicine also offers an MD degree as well as a

joint MD/PhD program enabling exceptionally able students to earn both degrees simultaneously. These programs are described in the First Professional Program section of the School of Medicine catalog.

Degree Requirements

In addition to School of Medicine requirements, all University requirements as detailed in the *Regulations Governing Graduate Study at the University of Pittsburgh* section of this catalog apply.

Graduate Programs (PhD, MS, Certificate)

Biomedical Informatics (PhD, MS, Certificate)

Biomedical Sciences (MS)

Cancer Biology and Oncology (PhD)

Computational Biology (PhD)

Computational Biomedicine and Biotechnology (MS)

Hearing and Vision Sciences (Certificate)

Institute for Clinical Research Education

Clinical & Translational Science (PhD)

Clinical Research (MS, Certificate)

Medical Education (MS, Certificate)

Integrative Systems Biology (PhD)

Interdisciplinary Biomedical Graduate Program

Cell Biology & Molecular Physiology (PhD)

Cellular & Molecular Pathology (PhD)

Molecular Genetics & Developmental Biology (PhD)

Molecular Pharmacology (PhD)

Microbiology and Immunology (PhD)

Molecular Biophysics and Structural Biology (PhD)

Neurobiology/Neuroscience (PhD)

Certificate

Biomedical Informatics Certificate

Certificate Requirements

The biomedical informatics certificate is a 15-credit (minimum) experience. The curriculum of all students in this program will have the following general structure: required Foundation (9 credits); electives (minimum 3 credits); and research project (3 credits)

Research Project: The research project should be summarized in a report commensurate with its scope, one copy of which must be submitted to the training program coordinator after approval by the student's research advisor.

Additional Requirements for Master's, Doctoral, and Certificate Students in Biomedical Informatics

Instruction in the Responsible Conduct of Research: This Web-based set of instructions and evaluation modules may be accessed at <http://www.ctsi.pitt.edu/RCR/index.shtml>.

Attendance at and participation in the Department of Biomedical Informatics' invited lectures, symposia, conferences, etc. (particularly the Annual Training Program Retreat and special departmental lectures). Such lectures are considered important educational experiences, as well as introducing students to primary researchers and their work in the field of biomedical informatics.

Certificate in Hearing and Vision Sciences

The Certificate in Hearing and Vision Sciences (HVS Doctoral Certificate) is designed to train the next generation of hearing and vision researchers both in basic and translational research. This goal will be accomplished by offering additional coursework and opportunities for collaborative research and mentorship with basic and translational researchers. The certificate will be available to students who are pursuing a doctoral degree in any relevant graduate program at the University of Pittsburgh. This program will attract and train top graduate students and leverage the strengths of our world-class hearing and vision sciences programs. As such, this program will train new graduate students, serve the needs of our faculty, and further promote the highly collaborative academic research environment that is a hallmark of our school and university.

The purpose of the Hearing and Vision Sciences Certificate (HVS Doctoral Certificate) is to allow students in existing doctoral programs in the University of Pittsburgh to obtain additional training in Hearing and Vision research and methodology, and to stimulate involvement in translational research. This goal will be accomplished by offering additional coursework and opportunities for collaborative research and mentorship with translational researchers.

Admission Requirements:

Students must first be admitted into a doctoral degree granting program in one of the graduate programs of the University of Pittsburgh prior to applying to the graduate certificate program. Once admitted for graduate study within a program, students may apply to the PHVC for admission to the Hearing and Vision Sciences Certificate program.

Students must be in good academic standing (i.e., not in probation and must have successfully completed all the required courses and program milestones for their current year of studies) and demonstrate a strong interest in clinical and translational science. Students will enroll in the program after the successful completion of their comprehensive examination.

Course Requirements

The certificate has two main components:

- (1) A set of core courses that provide students with standardized skills that are fundamental to hearing and vision research
- (2) Research support and training through the Center

Successful completion of the required curriculum and elective courses will lead to the granting of the certificate. The requirements for the certificate is expected to be spread over years 2-4 of graduate study. Support will be provided for one year, but requests for extension will be considered. It is estimated that students who complete this certificate will add a maximum of six months to their overall graduate studies.

A. Required Courses

- The Neuroscience of Hearing and Vision (3 credits) - The goal of this course will be to discuss the neurobiology of hearing and vision, starting from the cochlea and retina to cortex and back.
- Methods for Assessing Hearing and Vision (3 credits) - The goal of this course is to cover fundamental concepts and basic methods pertaining to quantify and assess hearing and vision in animal models and humans.
- Recent Advances in Therapy in Hearing and Vision (YYY) (3 credits) - This course is designed to introduce students who have no significant clinical experience to the recent advances in treatment and cures in hearing and vision pathology. Surgeon- and physician-scientists along with our basic scientist faculty will participate in teaching this course.

B. Research

Within the PHVC, our over 50 world-class faculty and trainees are investigating hearing and vision sciences. The PHVC also promotes the translation of findings from basic research into applications for new treatments in hearing and vision pathology. This certificate program is open to students pursuing PhDs in PHVC-affiliated departments and graduate programs. Students may apply for membership upon admission to a PHVC-affiliated doctoral program.

Students involved in basic and translational research will be mentored by accomplished investigators who are actively involved in basic or translational research, have active NIH funding, have established track records of mentoring, and are committed to the career development of students.

Total Credits: 10

Clinical Research (Certificate)

The Certificate in Clinical Research Program is aligned with the mission of the Institute for Clinical Research Education to offer the highest-caliber training and education in clinical research and to enhance collaboration among trainees from multiple disciplines. This program is geared toward clinicians who are pursuing a research career, and can be completed over a year of part-time study.

Contact Information

Institute for Clinical Research Education

Admissions

Admissions Criteria

- Applicants must meet the following requirements before filling out an online application.
- Candidates are encouraged, but not required, to have completed a graduate or professional degree.
- Candidates must have a high level of interest and potential for the pursuit of innovative clinical research as a major focus of their career plan.
- Candidates from departments who ensure 50%-75% of protected time during their pursuit of the degree.
- A minimum GPA of 3.2 on a 4.0 scale
- TOEFL, IELTS, and Duolingo scores (when applicable)
- GRE and MCAT scores are not accepted

Timeline

The Certificate in Clinical Research Program accepts applications from December 15 through February 28 each year. In order to guarantee that you are considered for admission, we must receive your application and all component parts by February 28. Students will be notified via email of admission decisions approximately 1-2 months following the close of the application cycle.

Financial Assistance

The Institute for Clinical Research Education does not provide financial aid. Unless students have other funding sources, they are responsible for covering the tuition costs, taxes, and fees associated with their course enrollment.

Degree Requirements

Coursework Requirement:

Core Curriculum

The purpose of the core curriculum is to provide trainees with the basic set of skills that are required by clinical investigators in all fields of interest. These skills include an understanding of research design, epidemiologic methods, biostatistics, study and survey design, and measurement of outcomes.

The four core courses that comprise the core curriculum are offered in July and August. They are commonly taken together but can be distributed over two summer terms with the guidance of an academic advisor.

CLRES 2005 - COMPUTER METHODS FOR CLINICAL RESEARCH

CLRES 2010 - CLINICAL RESEARCH METHODS

CLRES 2020 - BIostatISTICS

CLRES 2040 - MEASUREMENT IN CLINICAL RESEARCH

Electives

Students collaborate with your academic advisor to enroll in ICRE courses that most benefit their research and future career goals. Certificate students take a minimum of 6 elective credits.

Responsible Conduct of Research (RCR) Requirement:

Clinical Research Certificate students are required to attend eight 1-hour CTSI Responsible Conduct in Research workshops or enroll in the ICRE course CLRES 2050: Ethics and Responsible Conduct of Research. At the time of graduation, students must have at least 8 hours of RCR training through CTSI or have successfully completed CLRES 2050 in order to be eligible to graduate.

More Information:

For additional program details, please visit the certificate program page and review the program handbook.

Comparative Effectiveness Research (Certificate)

The Certificate in Comparative Effectiveness Research aims to teach trainees the skills necessary to design and conduct high quality comparative effectiveness research. The program is for advanced clinical researchers who have already completed the Institute for Clinical Research Education core curriculum. Since this program is highly specialized, please contact the ICRE using the contact information below for further program details.

Contact Information

Institute for Clinical Research Education

Email: icre@pitt.edu
https://www.icre.pitt.edu/degrees/cert_cer.html

Medical Education (Certificate)

This certificate program is flexible and allows students to choose courses within the Medical Education program that align with their learning and professional goals. Students in this program typically choose courses in teaching and

learning to enhance their skills as a clinician-educator at either a university or community-based program. The program is typically completed over one year of part-time study.

Admissions

Admissions Criteria

Applicants must meet the following requirements before filling out an online application.

- Candidates must have completed one of the following degrees: MD, DDS, DMD, DO, ND, OD, PharmD, PhD, DNS in nursing, PhD with clinical responsibilities, or other professional degree as deemed appropriate by the selection committee.
- Candidates must have a clinical appointment within UPMC (faculty, fellow, or resident) and/or an academic appointment within a University of Pittsburgh Health Sciences school. Since successful participation in and completion of our courses depend on having clinical and classroom environments in which to teach, concurrent with the program.
- Candidates must have a high level of interest in and potential for the pursuit of innovative medical education as a major focus of their career plan.
- Candidates must be based in departments that ensure adequate protected time to participate in courses and complete a research project during their pursuit of the degree.
- A minimum GPA of 3.2 on a 4.0 scale
- TOEFL, IELTS, and Duolingo scores (when applicable)
- We do not accept GRE or MCAT scores

Timeline

The Certificate in Medical Education Program has two application cycles per year. The application period for the Spring Term occurs from September 1 through October 31. The application period for the Summer Term occurs from December 15 through February 28. In order to guarantee that you are considered for admission, we must receive your application and all component parts by the last day of the admission cycle. Students will be notified via email of admission decisions 1-2 months following the close of the application cycle.

Financial Assistance

The Institute for Clinical Research Education does not provide financial aid. Unless students have other funding sources, they are responsible for covering the tuition costs, taxes, and fees associated with their course enrollment.

Degree Requirements

The Certificate in Medical Education offers a very flexible curriculum. Students are required to complete 15 credits, but are able to choose courses based on their individual educational interests and research goals. A minimum of 9 credits out of the 15 must be Medical Education courses. Please see the ICRE courses page for a complete list of our courses.

More information

To learn more about the Medical Education Program at the Institute for Clinical Research Education, please visit the program [page](#) and review the program handbook.

Doctoral

Biomedical Informatics (PhD, MS, Certificate)

Biomedical informatics is the science and engineering of information handling in health care delivery and biomedical research, studying and developing models of the various aspects of health care delivery and biomedical research in order to better understand how they operate. Those models suggest interventions that may improve health care delivery and biomedical research, including new methods for capturing, organizing, analyzing, and conveying clinical information to clinicians and researchers. Experiments are performed in which the effect of promising interventions on health care delivery or biomedical research are observed and compared to existing methods, which serve as controls. The analysis of the results of such experiments can lead to greater understanding of health care delivery and biomedical research, and thereby to methods with which to improve them.

Example areas of investigations in biomedical informatics at the University of Pittsburgh include the development and evaluation of new computer-based methods for (1) analyzing proteomic data to diagnosis disease, (2) supporting clinical trials, (3) providing clinical information to patients, (4) understanding the mechanism of diseases from genomic data, (5) natural language processing of electronically available medical text to extract important clinical features, (6) alerting clinicians when patient care appears atypical, (7) real-time detection and assessment of outbreaks of infectious disease and (8) teaching clinical trainees.

This program offers both master's and doctoral degrees. Most students choose to follow a general course of study in biomedical informatics; some, however, elect a specialization in one of the following areas: bioinformatics, clinical informatics, image informatics, or biosurveillance/infectious disease informatics. The specific curricula for the specializations, which are variations of the general course of study in biomedical informatics, can be found on the Training Program Web site at <http://dbmi.pitt.edu>.

Individuals who want a less intensive exposure to informatics may seek a 15-credit certificate in lieu of an academic degree. The biomedical informatics certificate can be a means of augmenting professional training in fields related to informatics and/or fulfilling educational needs associated with a professional position. Trainees across all health professions are welcome.

Contact Information

Toni Porterfield
Training Program Coordinator
415 Baum
412-648-9203
Fax: 412-648-9118

More information on Admissions, Financial Aid, Curriculum, Courses, Degree Requirements, and Faculty, can be found at <http://dbmi.pitt.edu>.

PhD Requirements

Credits: To earn the PhD degree in biomedical informatics, a student must complete a program of study approved by a committee of biomedical informatics faculty. The program requirements include a minimum of 72 credits consisting of a required Foundations course (15 credits); Research Skills (5 credits); Teaching Practicum (3 credits); doctoral dissertation research (18 credits), elective courses (12 credits); additional electives and/or independent study (19 credits); successful completion of a preliminary evaluation; successful completion of a doctoral comprehensive examination; and research work leading to an acceptable dissertation. All required courses must be taken for a letter grade, with the exception of the Journal Clubs/Colloquiums and some independent and/or dissertations studies (to be determined by the faculty advisors). A minimum "B" grade is required in all graduate courses.

Admission to Candidacy/Dissertation: To qualify for admission to candidacy, a student must have completed formal coursework with a 3.3 GPA or higher, passed the comprehensive examination, and received approval of the proposed subject and plan for the dissertations from their dissertation committee following a prospectus meeting. The dissertation committee usually includes the principal dissertation advisor and three additional faculty (a majority of the committee must be biomedical informatics core faculty, and have University graduate faculty status).

An appropriate dissertation project involves a substantive piece of original and independent biomedical informatics research, grounded in an appropriate mode of literature and providing a significant contribution to the field. The dissertation must be successfully defended in a public oral defense. The dissertation process will follow the applicable regulations and procedures of the University and the School of Medicine, as described in the Regulations Pertaining to Doctoral Degrees section of this document.

MS Requirements

Credits: The Master of Science in Biomedical Informatics requires a minimum of 36 credits consisting of required biomedical informatics core Foundation (15 credits); Research Skills (4 credits); electives/independent study (14 credits); and Research (3 credits).

All required courses must be taken for a letter grade, with the exception of the Journal Clubs/Colloquiums and some independent and/or dissertation studies (to be determined by faculty advisors). A minimum "B" grade is required in all graduate courses.

Research Project or Thesis: A key element of the program is a research project with two key deliverables: (1) the writing and submission of a paper of publishable quality based upon the research and (2) the completion of an oral examination on its contents. A master's project committee will oversee the student's research progress, including the oral comprehensive examination. Students have the option of developing their projects into a formal master's thesis.

Successful completion of the oral examination on the research project satisfies the comprehensive examination requirement of the University's Committee on Graduate Studies. Final certification of the completion of the master's degree requires submission of the hard copy of the master's research project to the program coordinator.

Certificate Requirements

The biomedical informatics certificate is a 15-credit (minimum) experience. The curriculum of all students in this program will have the following general structure: required Foundation (9 credits); electives (minimum 3 credits); and research project (3 credits)

Research Project: The research project should be summarized in a report commensurate with its scope, one copy of which must be submitted to the training program coordinator after approval by the student's research advisor.

Additional Requirements for Doctoral, Master's, and Certificate Students in Biomedical Informatics

Instruction in the Responsible Conduct of Research: This Web-based set of instructions and evaluation modules may be accessed at <https://ctsi.pitt.edu>.

Attendance at and participation in the Department of Biomedical Informatics' invited lectures, symposia, conferences, etc. (particularly the Annual Training Program Retreat and special departmental lectures). Such lectures are considered important educational experiences, as well as introducing students to primary researchers and their work in the field of biomedical informatics.

Cell Biology and Molecular Physiology (PhD)

The graduate program in Cell Biology and Molecular Physiology (CBMP) has a rich scientific training and discovery tradition. Graduates of the Ph.D. program have become chairs of departments at six major U.S. medical schools and are represented at all levels of academic and biomedical research. The program combines basic and clinical research faculty who are dedicated to the training of students. Faculty employ an integrative cell biology focus: combining tools of imaging, genetics, biochemistry, molecular biology, structural biology, computational modeling and, physiological approaches to understand the functions of cells, tissues and organisms. The program is home to the Center for Biologic Imaging, a state-of-the-art imaging center, and the NIH-supported O'Brien Kidney Center. Students in CBMP are supported in part by a T32 training grant from NIGMS. Areas of expertise in the program include the cellular trafficking of proteins and lipids, genetic disorders of ion channels, fundamental mechanisms of cell-cell adhesion and cell polarity, DNA damage repair and cancer, models of neurodegeneration and aging, signal transduction in diabetes, cell biology and physiology of renal diseases, and molecular mechanisms of aging.

Core Courses

Apart from the general degree requirements for all IBGP students, CBMP students are required to take the following core courses:

- MSCBMP 2880 - CELLULAR BIOLOGY OF NORMAL AND DISEASE STATES
- INTBP 3240 - GRANT WRITING FOR GRADUATE STUDENTS
And one of the following imaging courses
- MSCBMP 2885 - IMAGING CELL BIOLOGY IN LIVING SYSTEMS

OR

Other electives include:

- MSCBMP 2870 - HISTOLOGY
- MSCBMP 2840 - REGULATION OF MEMBRANE TRAFFIC
- MSCBMP 2875 - EXPERIMENTS AND LOGIC IN CELL BIOLOGY

- MSCBMP 2852 - RESEARCH SEMINAR IN CELLULAR BIOLOGY

Cellular and Molecular Pathology (PhD)

The Cellular and Molecular Pathology program integrates the fields of cell biology, molecular biology, and innate immunity with the study of human disease, primarily in the context of translationally relevant Regenerative Medicine. Utilizing the latest technologies, the program combines both basic science and clinical research to explore fundamental questions related to the biology of normal tissue growth and embryonic development, current best practices in tissue engineering, and the cellular and molecular pathways that lead to the development of disease. Active research programs investigate diverse topics such as liver development, disease and transplantation in the NIH-funded Pittsburgh Liver Research Center; developmental neuroscience and neurological diseases; mechanisms of gene regulation; cancer biology; angiogenesis; pulmonary disease; inflammation and autoimmunity; genetics; bioinformatics; and molecular diagnostics. Research laboratories are located throughout the medical center campus and research studies involve both basic research scientists (PhD's) and clinician scientists (MD's, PhD's, and MD/PhD's).

Core Courses

Apart from the general degree requirements for all Interdisciplinary Biomedical Science Graduate students, the following are core courses for the Cellular and Molecular Pathology program:

- INTBP 3240 - GRANT WRITING FOR GRADUATE STUDENTS
- MSCMP 2280 - BASIC UNDERSTANDING OF EDI AS RELATED TO GRADUATE EDUCATION
- MSCMP 2730 - MOLEC MECHS TIS GROWTH & DIFFRN and EITHER
- MSCMP 3710 - CANCER BIOLOGY AND THERAPEUTICS OR
- MSCMP 2740 - MOLECULAR PATHOBIOLOGY OR
- MSCMP 3790 - BASICS OF PERSONALIZED MEDICINE

Additionally we require at least 5 terms of:

- MSCMP 2750 - RESEARCH SEMINAR

As well as two electives of your choice

from either the above electives or from courses throughout the School of Medicine on diverse topics of interest to students such as the following CMP-sponsored courses (partial listing):

- MSCMP 3735 - EXTRACELLULAR MATRIX IN TISSUE BIOLOGY AND BIOENGINEERING
- MSCMP 3740 - STEM CELLS
- MSCMP 3750 - ANGIOGENESIS
- MSCMP 3770 - CELL THERAPY

Clinical and Translational Science (PhD)

The Institute for Clinical Research Education at the University of Pittsburgh has designed the PhD Program in Clinical and Translational Science to train researchers in this emerging field that aims to close the gap between basic science and clinical research. This rigorous and advanced training program is intended primarily for clinicians, and aims to substantially enhance the capabilities of scientists to conduct high-quality clinical and translational research.

Admissions

Admissions Criteria

Applicants must meet the following requirements before filling out an online application.

- Candidates must have completed one of the following degrees: MD, DDS, DMD, DO, ND, OD, PharmD, PhD, DNS in nursing, PhD with clinical responsibilities, or other professional degree as deemed appropriate by the selection committee.
- Candidates must have a high level of interest and potential for the pursuit of innovative clinical research as a major focus of their career plan.
- Candidates from departments who ensure 50%-75% of protected time during their pursuit of the degree.
- A minimum GPA of 3.5 on a 4.0 scale
- TOEFL, IELTS, or Duolingo scores (when applicable)
- MCAT or GRE scores are not accepted

Timeline

The PhD Program in Clinical and Translational Science accepts applications from September 1 through January 31 each year. In order to guarantee that you are considered for admission, we must receive your application and all component parts by January 31. Students will be notified via email of admission decisions approximately 1-2 months following the close of the application cycle.

Financial Assistance

The Institute for Clinical Research Education does not provide financial aid. Unless students have other funding sources, they are responsible for covering the tuition costs, taxes, and fees associated with their course enrollment.

Degree Requirements

The PhD in Clinical and Translational Science curriculum is organized into 4 categories of coursework: Core, Advanced Selectives, Research Specialization, and Dissertation Research. While students advance through the program they will also complete the Preliminary Evaluation, Comprehensive Exam, and Dissertation Milestone.

To view the curriculum in detail, please visit [this page](#).

Non-credit Requirements/Milestones

Responsible Conduct of Research (RCR) Requirement

PhD in CTS students are required to attend eight 1-hour CTSI Responsible Conduct in Research workshops or enroll in the ICRE course CLRES 2050: Ethics and Responsible Conduct of Research. At the time of graduation, students must have at least 8 hours of RCR training through CTSI or have successfully completed CLRES 2050 in order to be eligible to graduate.

Comprehensive Examination

PhD in CTS students are required to complete a Comprehensive exam. This exam consists of a written examination in the form of an NIH R01-style proposal (including, at a minimum, specific research aims, background and significance, and research methods) and an oral defense of the written portion.

Doctoral Prospectus and Dissertation

PhD in CTS students must complete both a Doctoral Prospectus and successfully complete and defend a Doctoral Dissertation.

- Individuals must prepare a dissertation proposal for presentation to a doctoral dissertation committee at a formal dissertation overview meeting. At this meeting, the dissertation committee members will provide guidance in shaping the conceptualization and methodology for the individual's Doctoral Dissertation.
- The proposal, writing, and defense of a culminating research project. The written work must conform to the University of Pittsburgh style manual. The Final Oral Defense is a public defense of the Doctoral Dissertation.

More information:

Please view the PhD in CTS Program Handbook for complete program details.

Computational Biology (PhD)

Computational biology is defined as the development and application of data-analytical and theoretical methods, mathematical modeling, and computational simulation techniques to the study of biological, behavioral, and social systems.* It is an interdisciplinary approach that draws from specific disciplines such as mathematics, physics, computer science and engineering, biology, and behavioral science.

The Joint Pitt-CMU PhD Program in Computational Biology is an intensive, interdisciplinary training program that provides students with a deep understanding of the current state of the art in computational biology. Students in this program acquire the quantitative background and research skills needed to advance the field of computational biology. In addition, they develop the critical thinking skills needed to appreciate the potential, strength, and limitations of computational, mathematical, and engineering tools for tackling biological problems.

Admissions

The interdisciplinary character of the program is unique and distinct from many other programs that are focused toward a specific discipline. The program seeks outstanding students from the biological, physical and computational sciences, and engineering. For example, computational biology majors, or double majors in biology and quantitative sciences are ideal candidates.

Recommended Prerequisites

For students planning their undergraduate course schedules in anticipation of applying for the PhD in computational biology, prerequisites in life sciences, computer science, physical sciences, mathematics, statistics, and computational biology are recommended. Students whose background does not include these courses may be admitted with the additional requirement to take appropriate compensating classes. For more information on prerequisites, see http://www.compbio.cmu.edu/?page_id=91.

Application

REQUIRED MATERIALS - Deadline December 10, 2019

- The Online Application
- Statement of Purpose
- Three letters of Recommendation
- Unofficial Transcripts (submitted online)
- Conversion of GPA (for international students only)
- Unofficial TOEFL Scores (submitted online)
- Application Fee

Applications are reviewed by the Joint CMU-Pitt PhD Program in Computational Biology. Each admitted student is assigned an initial university of matriculation, and receives an admissions offer letter from that university. Incoming students can be placed directly in a laboratory (if mutual interest exists between a student and an advisor), or go through a period of three rotations, after which the student chooses an advisor. Students have the ability to change advisors (subject to agreement of the new advisor and availability of support) and to transfer between the two universities to reflect advisor changes.

For more information on application process, see www.compbio.pitt.edu/?page_id=163

Financial Aid

All students are provided with a stipend and full tuition remission. Assistance is also provided for health insurance.

Teaching Assistantships

Although all students are supported as research assistants throughout their time in the program, students are required to TA for one semester. There are also opportunities to assist in the teaching courses of the program. Students are also encouraged to develop teaching skills by mentoring other students and passing on their knowledge to lab mates and fellow students.

Curriculum

The curriculum is designed to train students who will shape the next generation of discovery in computational biology in academia and industry. Students are required to complete 72 credit hours of academic work toward partial fulfillment

of the requirements for completion of dissertation study. Of these, 30+ are formal coursework, and the remaining to be completed with full-time research.

All students are required to take five core graduate courses. The core courses aim at providing a strong common background in computational biology before they specialize in particular research areas

Core Courses

- Machine Learning
- Introduction to Computational Structural Biology
- Computational Genomics
- Cellular and Systems Modeling
- Laboratory Methods for Computational Biologists

In addition, all students are required to take three graduate elective courses: a life science/physical science course; an advanced interdisciplinary elective specified for the student's chosen area of specialization; and one general elective.

Specialization Areas

- Computational Genomics
- Computational Structural Biology
- Cellular and Systems Modeling
- Bioimage Informatics

For more information on the curriculum, see www.compbio.pitt.edu/?page_id=87

Other Courses

In addition to core and elective courses, students take complementing courses, if needed, and participate in program seminar, journal clubs, ethics courses and directed studies toward their dissertation projects.

Program Seminar Series

Students enrolled in the program are expected to attend scientific seminars during all years of training. Beginning in their second year and ending in the year before their thesis defense, students present their research progress to fellow students and the faculty on at least an annual basis.

CPCB Course

Effective presentation of scientific data is an invaluable aspect of graduate training. Therefore, all first- and second-year students must present a scientific article on a topic (selected by a faculty member) that introduces students to the methodology and applications of computational biology. The talk is made in a format that allows the student to develop basic presentation skills. Students subsequently receive feedback on their talks, thereby improving their presentations skills as their graduate training advances.

Training in Ethics

Ethical conduct and scientific integrity is an essential aspect of research. This is especially important given the competitive nature of funding processes and the high demand for productivity. Hence, the program instructs students on the significance and practice of ethical conduct.

Directed Study

Credits are given for laboratory projects (wet or computer labs) under the direction of the dissertation advisor prior to admission to candidacy for the doctorate.

Scheduling

We anticipate two types of course schedules for students in the program. The default for students who have taken the prerequisites will be to take three courses in each of the first two terms (50-75% time) and spend the remaining time on research. Such students would normally take the core courses in the first year along with one additional course. The third and fourth terms would be split between taking electives and doing research.

Students who enter with some biology or computer science or physical science background but not with sufficient background to take all of the core courses would take a mix of missing prerequisites and core courses in each of the first two terms (approx. 90% time) and spend 10% time on research. These students would then take a mix of remaining core courses and electives in the third and fourth terms (along with 30% research) and finish electives in the fifth and/or sixth terms.

Comprehensive Examination

Students are required to pass a comprehensive examination after completion of their courses, prior to being officially admitted to candidacy to the PhD degree. Students are expected to complete this examination no later than the beginning of the spring term of their third year. The comprehensive examination consists of two parts: a 12-page "grant-style" written proposal of the proposed research, followed by an oral defense of the proposed research.

Post-Comprehensive Qualifying Examination

Students who have been accepted to PhD candidacy conduct research on a full time basis, and are required to complete a minimum of 40 credit hours (9-14 credits per term) of full-time dissertation study in order to meet the criteria for dissertation defense. Hence, all students will have completed at least 72 credit hours of study prior to graduation, including 29 credit hours of core + elective courses, and at least 40 credit hours of dissertation research.

Completion of Degree

The program is structured in such a way that students can finish their degree within four years of entering their dissertation laboratory. However, it is recognized that the actual time required to attain the degree depends on the specific type of research undertaken and how quickly progress is made in completing the experimental program.

Terminal Master's Degree

The Program does not admit students whose goal is to attain a MS degree. However, it might become necessary for a PhD student to transfer to an MS track for academic reasons or reasons beyond the student's control, e.g., medical circumstances or a change in family circumstances necessitating a long-distance move.

For more information on the program, such as list of training faculty, please see www.compbio.cmu.edu/?page_id=31615

Integrative Systems Biology (PhD)

ISB is an innovative program in graduate training that rapidly immerses students into a research environment, then mentors them to become independent scientific practitioners, skilled not only in the art of technical execution but in the creative multidisciplinary thinking required to address important questions in systems biology. Students receive a PhD in Integrative Systems Biology.

Integrative Systems Biology is a field of study that has emerged within the last decade as a unifying discipline that focuses on placing the molecules that comprise living systems within functional and organism contexts. The goal of ISB is to utilize all of our available resources to create a training and research environment to answer challenging questions of fundamental importance in biomedical and life sciences. The ISB faculty are drawn from cellular, developmental, molecular and systems biologists across the University of Pittsburgh campus and are distributed between research foci:

- Quantitative Biology
- Translational Medicine

Contact Information

Integrative Systems Biology Program

Fax: 412-383-2211
E-mail: sas101@pitt.edu
<http://www.isb.pitt.edu>

Admission Requirements and Procedures

Students most likely to gain admittance will have a baccalaureate degree from a natural science, physical science, or engineering program, a grade point average of 3.0 (on a scale of 4), and three letters of recommendation. As this is an accelerated program, students should have prior immersive experience in research studies. Applicants who are citizens of countries where English is not the official language (and the Province of Quebec in Canada) are required to submit evidence of English language proficiency by submitting the official results of the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). A minimum TOEFL score of 650 (paper), IELTS score of at least 7.50 or iBT score of at least 100 is required for admission to the Program.

Additional information and a link to the online application can be found at <http://www.isb.pitt.edu/how-apply>

Financial Assistance

All full-time students receive a stipend, educational enrichment fund, computing and network service, and individual health insurance (with option to purchase additional family coverage) during their graduate training.

Degree Requirements

This is an accelerated program that provides the opportunity for students to complete their degrees in approximately 4 years. Students enter the program in the fall session, and after performing three rotations identify an advisor and area of research dissertation research project. Areas of research focus include Cell, Development, and Molecular Biology, Quantitative Biology, Translational Medicine, and Genes and Evolution. Required course work is completed during the first two years. After Spring of the students' second year, they take a comprehensive examination that includes the generation of a research proposal ready for submission to national fellowship programs. Students receive career mentoring throughout their ISB training to ensure a seamless transition to the postdoctoral level. Additional information can be found in the Student Handbook: https://www.isb.pitt.edu/sites/default/files/ISB-Handbook_4-13-21.pdf.

A minimum of 72 credits beyond the baccalaureate degree is required for the PhD degree. 32 of these credits are completed taking required and elective course work, and 40 of these credits are taken as dissertation research credits upon completing the comprehensive examination and advancing to candidacy. Required course work includes the following:

- ISB 2000 - LABORATORY RESEARCH ROTATION
- ISB 2070 - THE BEDSIDE TO BENCH
- INTBP 3240 - GRANT WRITING FOR GRADUATE STUDENTS
- MSCBIO 2025 - INTRODUCTION TO BIOINFORMATICS PROGRAMMING IN PYTHON
- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- ISB 2020 - SYSTEMS BIOLOGY I
- ISB 2035 - SYSTEMS BIOLOGY II
- ISB 2060 - ISB CONFERENCE
- ISB 3090 - PHD DISSERTATION RESEARCH

Microbiology and Immunology (PhD)

The Program in Microbiology and Immunology (PMI) is an innovative program in graduate education that is administered through the School of Medicine of the University of Pittsburgh. The program aims to train highly motivated PhD students as self-reliant scholars in an environment where they have ready access to the breadth of expertise, approaches and sub-disciplines of microbiology and immunology. Students in this program will gain broad knowledge of diverse fields within microbiology and immunology, which is supplemented by seminars, journal clubs and laboratory rotations. The program rapidly immerses students into a research environment, and mentors them to become independent and creative scientists.

PMI brings together faculty in basic and translational sciences, including researchers from the University of Pittsburgh School of Medicine (Departments of Microbiology & Molecular Genetics and Immunology; Center for Vaccine Research; Microbiome Center), Magee-Women's Research Institute, Rangos Research Center at the Children's Hospital of Pittsburgh, and the University of Pittsburgh Cancer Center (e.g. Cancer Virology and Cancer Immunology Programs).

Faculty research interests in the PMI can be broadly divided into the following areas:

- Autoimmunity
- Basic immunological mechanisms
- Bacteriology
- Cancer immunology

- Discovery and development of novel antimicrobial therapies
- Host-pathogen interactions
- Immunology of organ transplantation
- Innate Immunity
- Parasitology
- Viral and bacterial pathogenesis
- Virology

www.pmi.pitt.edu

Admission Requirements and Procedures

Students with at least a baccalaureate degree in biological or physical science or in mathematics, computer science or engineering are encouraged to apply. Admissions are based upon the student's academic record, letters of recommendation, previous research experience, written statement of interest and a personal interview. Applicants who are citizens of countries where English is not the official language (and the Province of Quebec in Canada) are required to submit evidence of English Language proficiency by submitting the official results of the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). A minimum TOEFL score of 600 (paper) or 100 (iBT), or IELTS score of at least 7.00 is required for admission to the Program. Applicants who have earned a bachelor's degree or a higher degree from a regionally accredited institution in the United States are exempt from submitting English language proficiency test results.

Additional information and a link to the online application can be found at <https://www.pmi.pitt.edu/admissions>

Financial Assistance

All full-time students receive a stipend, educational enrichment fund, computing and network service, and individual health insurance (with option to purchase additional family coverage) during their graduate training.

Degree Requirements

This is an accelerated program that provides the opportunity for students to complete their degrees in approximately 4-6 years. Students enter the program in the fall sessions and perform four research rotations during their first year. It is expected that four rotations of seven weeks each will be performed in different laboratories of members of the PMI training faculty, but there are several circumstances where the requirement for four rotations or laboratories might be relaxed. Additional information can be found in the Student Handbook on our website by clicking here. https://www.pmi.pitt.edu/sites/default/files/KristinD-Files/Handbook_PMI_05.18.21.pdf

A minimum of 72 credits is required for graduation with a PhD. Of these, 32 credits must come from approved courses, both required and elective course work, and 40 of these credits are taken as dissertation research credits upon completing the comprehensive examination, to be held during the fall term of the second year and advancing to candidacy. Required course work includes the following:

- MSMI 2100 - FIRST PMI LABORATORY ROTATION and
- MSMI 2110 - SECOND PMI LABORATORY ROTATION (taken during fall and spring terms of the first year)
- MSMI 2000 - PRINCIPLES OF MICROBIOLOGY AND IMMUNOLOGY (taken during the fall of the first year)
- MSMI 2200 - COMPREHENSIVE MICROBIOLOGY: MOLECULAR VIROLOGY & MOLECULAR PATHOGENESIS and/or
- MSMI 2210 - COMPREHENSIVE IMMUNOLOGY (taken during the spring of the first year)
- MSMI 2250 - TA: MEDICAL MICROBIOLOGY (taken during the spring of the second and third years)
- MSMI 2300 - SCIENTIFIC WRITING IN MICROBIOLOGY AND IMMUNOLOGY (taken during the summer of the first year)
- INTBP 2013 - D2K: FROM DATA TO KNOWLEDGE- BIOMEDICAL EXPERIMENTAL DESIGN AND ANALYSIS
(taken during the summer of the first year)
- INTBP 2290 - SCIENTIFIC ETHICS AND THE RESPONSIBLE CONDUCT OF RESEARCH (taken during the summer of the first year)
- MSMI 2450 - IMMUNOLOGY RESEARCH SEMINAR (taken every fall and spring term from the second year through graduation)
- MSMI 2460 - MICROBIOLOGY AND RELATED TOPICS SEMINAR SERIES (taken every fall and spring term from the second year through graduation)

- MSMI 3220 - CONTEMPORARY TOPICS - IMMUNOLOGY (taken during the fall and/or spring terms of the second and/or third years)
- MSMI 3230 - MICROBIOLOGY RESEARCH IN PROGRESS (taken every fall and spring term from the second year through graduation)

Molecular Biophysics and Structural Biology (PhD)

The Molecular Biophysics and Structural Biology graduate program at the University of Pittsburgh and Carnegie Mellon University educates students to conduct research at the interface between biology, chemistry, and physics. The disciplines of Molecular Biophysics and Structural Biology aim to unravel and explain biological phenomena and processes in atomic and molecular detail. Research carried out by program faculty covers a diverse range of topics in Molecular Biophysics and Structural Biology. Areas of study focus on understanding fundamental principles involved in reactions and regulatory interactions in biological systems. Our research projects attempt to answer key questions, such as: How do proteins fold and can we prevent misfolding? Can we design proteins with novel functions? How does the coordinated interaction between proteins and nucleic acids lead to cellular differentiation and the formation of an organism? How do macromolecules assemble into molecular machines and viruses? How do these assemblies operate? How do signals traverse membranes?

Admission Requirements and Procedures

Students with at least a baccalaureate degree in physics, chemistry and mathematics or cellular and molecular biology are encouraged to apply. Admissions are based upon the student's academic record, CV, letters of recommendation, previous research experience, written statement of interest, and a personal interview. Applicants who are citizens of countries where English is not the official language (and the Province of Quebec in Canada) are required to submit evidence of English Language proficiency by submitting the official results of the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS), or Duo Lingo. A minimum TOEFL score of 600 (paper) or 100 (iBT), IELTS score of at least 7.00, or a minimum Duo Lingo score of 120 is required for admission to the Program. We actively seek qualified applicants from underrepresented minorities and students with disability.

Additional information and a link to the online application can be found at <http://www.mbsb.pitt.edu/index.php/apply-here>.

Financial Assistance

All students receive complete financial support in the form of stipend, tuition, and health insurance.

Degree Requirements

All students enter the Program in the fall session and after performing three rotations identify an advisor and area of research. Areas of research focus include: Macromolecular recognition; Virus, lipid and protein structure and interactions; Principles of protein structure and dynamics; Membrane proteins; Gene regulation and signaling; Cellular biophysics; Chemical structure and dynamics. Methodologies employed comprise NMR spectroscopy, X-ray crystallography, cryo electron microscopy, atomic force microscopy, mass spectrometry, infrared spectroscopy and computational molecular biology. Required coursework is completed during the first two years. Students are required to complete the Comprehensive Exam by August 31 of their second year in the graduate program.

A minimum of 72 credits beyond the baccalaureate degree is required for the PhD degree. The 72 credits are completed by taking required and elective course work as well as dissertation research credits upon being admitted to candidacy.

- MSMBPH 2000 - LABORATORY RESEARCH ROTATIONS or
- MOLBPH 2000 - LABORATORY RESEARCH ROTATIONS - taken during the first fall, spring & summer term of the first year.

- MSMBPH 2001 - MOLECULAR BIOPHYSICS 1: STRUCTURE or
- MOLBPH 2001 - MOLECULAR BIOPHYSICS 1: STRUCTURE - taken during the fall term of the first year

- MSMBPH 2012 - MOLECULAR BIOPHYSICS 2: MOLECULAR INTERACTIONS AND DYNAMICS or
- MOLBPH 2012 - MOLECULAR BIOPHYSICS 2: MOLECULAR INTERACTIONS AND DYNAMICS - taken during the spring term of the first year

- 09763 - MOLECULAR MODELING AND COMPUTATIONAL CHEMISTRY taken during the spring of the first year

- INTBP 2290 - SCIENTIFIC ETHICS AND THE RESPONSIBLE CONDUCT OF RESEARCH - taken during the summer term of the first year

- INTBP 2013 - D2K: FROM DATA TO KNOWLEDGE- BIOMEDICAL EXPERIMENTAL DESIGN AND ANALYSIS - taken during the summer term of the first year

- MSMBPH 2020 - STRUCTURAL BIOLOGY/MOLECULAR BIOLOGY SEMINAR or
- MOLBPH 2020 - STRUCTURAL BIOLOGY/MOLECULAR BIOPHYSICS SEMINAR - taken every fall and spring term through graduation

- MSMBPH 2030 - DATA AND LITERATURE CLUB or
- MOLBPH 2030 - DATA AND LITERATURE CLUB - beginning with the spring term of the first year, D&L Club is taken every fall and spring term through graduation

- MSMBPH 2040 - TA: MBSB or
- MOLBPH 2040 - TA: MBSB taken once in any term

Advanced Elective Courses (6 Credits Total)

The courses taken here will be chosen on an individual basis based on the background and interests of the individual student. During the first year, the choice will be made by the student in consultation with the First Year Advisor or Dissertation Advisor. Upon proper approval, the elective courses can be taken either at the University of Pittsburgh (both the Dietrich School of Arts & Sciences and the School of Medicine) as well as Carnegie Mellon University.

Additional information on the core curriculum can be found at <http://www.mbsb.pitt.edu/index.php/training/curriculum>.

Molecular Genetics and Developmental Biology (PhD)

The Molecular Genetics and Developmental Biology (MGDB) graduate program provides an exciting and vigorous academic environment for highly motivated and qualified students to prepare for a rewarding career in biomedical research. The MGDB program brings together faculty in both basic and translational sciences, including researchers from the Magee-Womens Research Institute, the Aging Institute, the UPMC Hillman Cancer Center, the Children's Hospital of Pittsburgh and the Department of Biological Sciences. MGDB faculty are pursuing research projects that address fundamental, contemporary issues in biology and medicine using molecular genetic, genomic and computational tools in a spectrum of models from yeasts, worms, flies and mice to human studies. MGDB research is centered at the cutting edge of developmental & Reproductive Biology, Geroscience & Aging Biology, Stem Cells & Regeneration, and DNA Damage & Repair. Our work has direct relevance to cancer, diabetes, heart disease, fertility/infertility, and age-related diseases and regenerative medicine. We are committed translating our bench discoveries to the bedside and graduate students are fully integrated in all aspects of our investigative work.

Core Courses

Apart from the general degree requirements for all Interdisciplinary Biomedical Science Graduate students, the following are core courses in the Molecular Genetics and Developmental Biology program:

- MSMGDB 2525 - DEVELOPMENTAL MECHANISMS OF HUMAN DISEASE
- MSMGDB 2535 - MODEL ORGANISMS
- MSMGDB 2550 - RESEARCH SEMINAR
- INTBP 3240 - GRANT WRITING FOR GRADUATE STUDENTS

Molecular Pharmacology (PhD)

Biomedical research in the Molecular Pharmacology program is focused on cutting-edge discovery of molecular and cellular mechanisms of intracellular signaling using a combination of biochemical, molecular biological, biophysical, ultrastructural, and imaging approaches. Basic research into cellular communication in health and disease is the main emphasis of the program with the added advantage of an array of translational opportunities into the development and testing of novel therapeutic agents. Applications of this common theme are directed toward research in molecular biology of cancer, neuropharmacology, cell and organ system pharmacology, signal transduction, neurodegenerative diseases and drug discovery. Formal collaborative interactions with the Pittsburgh Cancer Institute, the Center for Neuroscience, the Pittsburgh Institute for Neurodegenerative Diseases (PIND), the Division of Clinical Pharmacology, the University of Pittsburgh Drug Discovery Institute, University of Pittsburgh Structural Biology Imaging Center, the Vascular Medicine Institute and the Center for Biological Imaging provide a broad multidisciplinary approach to training in modern molecular pharmacology.

Core Courses

Apart from the general degree requirements for all Interdisciplinary Biomedical Science Graduate students, the following are core courses in the molecular pharmacology program:

- INTBP 3240 - GRANT WRITING FOR GRADUATE STUDENTS
- MSMPHL 2310 - PRINCIPLES OF PHARMACOLOGY

- MSMPHL 3360 - MOLECULAR PHARMACOLOGY
- MSMPHL 2360 - BIOLOGY OF SIGNAL TRANSDUCTION
- MSMPHL 3310 - CANCER BIOLOGY AND THERAPEUTICS
- OR
- MSMPHL 3375 - NEUROPHARMACOLOGY
- OR
- MSMPHL 2370 - DRUG DISCOVERY

Neurobiology/Neuroscience (PhD)

The Center for Neuroscience (CNUP) Training Program is an interschool PhD degree-granting program offered cooperatively by the School of Medicine (Neurobiology, MSNBIO) and the Dietrich School of Arts and Sciences (Neuroscience, NROSCI). The program introduces students to the fundamental issues and experimental approaches in neuroscience and trains them in the theory and practice of laboratory research. Research interests of the training faculty focus on several prominent themes, including behavioral/systems/cognitive, cell and molecular, development/plasticity/repair, and the neurobiology of disease.

CNUP is highly invested in enhancing diversity, which is expressed in multiple forms - race, ethnicity, gender and gender identity, sexual orientation, socioeconomic status, language, culture, national origin, religious commitments, age, (dis)ability status and political perspective. In addition, it strives to create a community that is equitable, so that all persons have equal opportunity, and inclusive, so that everyone feels welcome, and hopes new members share these values and goals.

This large research-based training program offers outstanding opportunities for students to pursue research in laboratories within more than 30 different departments and University centers. Major features of the program include extensive collaborative interactions among its faculty members and its affiliation with Auditory Neuroscience, the Brain Institute, the Center for the Neural Basis of Cognition (a joint program with Carnegie Mellon University), Conte Center for Translational Mental Health Research, Pittsburgh Hearing Research Center, Pittsburgh Institute for Neurodegenerative Diseases, Pittsburgh Center for Pain Research, and other on-campus research centers.

Contact Information

Center for Neuroscience
 E1440 Thomas E. Starzl Biomedical Science Tower
 200 Lothrop Street
 Pittsburgh, PA 15261
 412-648-9537
<https://cnup.pitt.edu/>
argenzio@pitt.edu

Admission Requirements and Procedures

Students are admitted into the CNUP training program on the assumption that they will be able to meet all requirements for the PhD degree. Those who are selected show evidence of a high level of intellectual talent, a strong interest in neuroscience, and a commitment to scholarship and research.

Admission decisions are based on many factors including the candidate's statement of interest and goals in the field of neuroscience, evidence of research experience and accomplishment, letters of recommendation, test scores, grades, and personal interviews. An outstanding record in one of these areas may compensate for poorer performance in another area. In general, successful applicants have a BS degree in biology, chemistry, computer science, mathematics,

neuroscience, or psychology with a cumulative grade point average (GPA) of at least 3.40 (on a 4.00 scale). Applicants with a GPA below 3.0 will not be considered.

Additional information and a link to our on-line application can be found at: <https://www.cnup.pitt.edu/phd-program-training/prospective-students>

Financial Assistance

All students receive full stipend support and individual health benefits. This support is derived from University fellowships and numerous grants funded by the federal government and private agencies. Students in the program also have access to sponsorship on NIH training grants.

PhD Degree Requirements

<https://www.cnup.pitt.edu/phd-program-training/current-students/phd-requirements>

Credits: A minimum of 72 credit hours, including a 23-credit course requirement covering fundamental material in cellular and molecular neurobiology, systems neuroscience, and several elective courses.

Core courses:

- MSNBIO 2020 - SCIENTIFIC ETHICS & PROFESSIONAL DEVELOPMENT 1 or
- NROSCI 2020 - SCIENTIFIC ETHICS & PROFESSIONAL DEVELOPMENT 1

- MSNBIO 2021 - SCIENTIFIC ETHICS & PROFESSIONAL DEVELOPMENT 2 or
- NROSCI 2021 - SCIENTIFIC ETHICS & PROFESSIONAL DEVELOPMENT 2

- MSNBIO 2100 - CELLULAR AND MOLECULAR NEUROBIOLOGY 1 or
- NROSCI 2100 - CELLULAR AND MOLECULAR NEUROBIOLOGY 1

- MSNBIO 2101 - CELLULAR & MOLECULAR NEUROBIOLOGY 2 or
- NROSCI 2101 - CELLULAR & MOLECULAR NEUROBIOLOGY 2

- MSNBIO 2102 - SYSTEMS NEUROBIOLOGY or
- NROSCI 2102 - SYSTEMS NEUROBIOLOGY

- MSNBIO 2627 - THE NEXT THREE YEARS: HOW TO DEVELOP YOUR OWN RESEARCH PROGRAM

Other requirements:

In addition to University requirements for graduate degrees, students are also required to complete a graduate level statistics course, obtain research experience in at least two separate laboratories; participate in program-wide journal clubs and research seminars; pass a reprint exam following their first year of study, a comprehensive exam, and a doctoral dissertation and defense; and, to serve as a teaching assistant for at least one term (or course).

A list of CNUP Training Faculty may be viewed at: <https://www.cnup.pitt.edu/people/core-faculty-members>

A complete list of courses may be viewed at: <https://www.cnup.pitt.edu/phd-program-training/current-students/curriculum>

Master's

Biomedical Sciences (MS)

The Biomedical Master's Program (BMP) is designed to develop critical scientific thinking skills and train students for successful application to professional degree programs in the health sciences. Biomedicine is the centerpiece of the health sciences, interconnecting everything from medicine and dentistry, to clinical and biomedical research. The field of Biomedicine ultimately studies and advances understanding of the human body, how it works in health and how it goes awry in disease. The BMP at the University of Pittsburgh School of Medicine offers educational and experiential training in Biomedicine as preparation for successful careers in the health sciences within a faculty mentored community individualizing each student's success.

Contact Information

Biomedical Master's Program
3500 Fifth Avenue, Suite 206

Pittsburgh, PA 15213 USA

412-383-3265
Fax: 412-648-1077
Email: bmpitt@pitt.edu
www.bmp.pitt.edu

Admissions

Admissions Criteria:

The BMP welcomes candidates who are U.S. Citizens, non-citizen nationals, or lawfully admitted permanent residents of the U.S., or individuals who already hold, or can obtain a J-1, H1-B, or F1 transfer visa.

The program is designed for applicants with long-term goals of entering careers in the health sciences, or applying to DO and MD, PA, DMD/DDS, PhD, other health science degree programs or seeking a master's degree in the Biological Sciences.

Candidates must have distinguished personal qualifications of past academic ability and references. Application requirements include a bachelor's degree with at least a cumulative 3.0 GPA; a 3.3 or higher GPA is preferred. Completion of pre-requisite courses for application to future professional degree programs are required. MCAT, DAT, PCAT, or GRE scores are not required for admission, but should be reported by any applicant who has taken one of these tests. Candidates with community service, clinician shadowing, patient care, clinical or basic research experiences, and strong academic performance will be viewed very favorably.

Applicants who are citizens of countries where English is not the official language (and the Province of Quebec in Canada) and are seeking their first degree in the United States are required to submit evidence of English Language

proficiency by submitting the official results of the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). A minimum TOEFL score of 600 (paper) or 100 (iBT), an IELTS score of at least 7.00, or a Duolingo score of 120 is required for admission to the Program. We actively seek qualified applicants from underrepresented minorities and students with disabilities.

Application Process:

- The online application process starts October 1st and closes on June 1st the following year. Admissions is conducted on a rolling basis. Students matriculate for the beginning of the fall semester. A focus on ensuring student success is employed in the admissions process.
- Admissions are based upon the student's academic record, letters of recommendation, previous experience, written statement of interest, an updated resume/CV, and an interview.

The online application is available at: <https://admissions.gradbiomed.pitt.edu/>

Financial Assistance

Financial guidance is available through the University of Pittsburgh Office of Admissions and Financial Aid: <https://financialaid.pitt.edu/graduate-students> The BMP offers scholarships to select students. Awards are determined based on a holistic evaluation and amounts are based on financial need. All students are responsible for ensuring their tuition is paid.

Degree Requirements

All requirements detailed in the Regulations Governing Graduate Study at the University of Pittsburgh will be met. The MS in Biomedical Sciences requires the completion of a minimum of 32 credits with a GPA of 3.0 or higher. Maximum credits allowed per term will be 15, and a typical course load will be 15 credits for the fall and spring terms and 2 credits for the summer term.

Foundational Components:

The Curriculum: The BMP employs science-based instruction designed to improve student preparation for professional degree programs in medicine, dentistry, research, and other related health science professions. By emphasizing understanding and how to think in addition to what to know, the BMP promotes the development of study habits that enable our students to excel and thrive in the first two years of these demanding professional degree programs. These goals will be achieved through an integrated series of required core courses and elective courses and experiential training opportunities together with dedicated one-on-one advising and mentorship that will enable students to successfully apply to and perform well in their chosen professional school.

Experiential Training. The BMP affords opportunities for experiential training specifically tailored to the strengths and weaknesses of each individual student. The areas selected correspond to the typical aspects considered in the review of standard professional school applications: community service, patient volunteering, clinical shadowing, and research training.

Mentoring and Coaching. The BMP provides a multi-tiered mentoring and coaching model to all students. Each student will meet with their assigned faculty advisor during the initial phase of the program in order to identify strengths and weaknesses of the previous training received by the student. The student and faculty advisor will identify the best selection of academic courses and experiences to maximize long term student learning and success. Career and professional development coursework and access to an internal International Coaching Federation career coach will support individual growth including many of the AAMC Core Competencies. Access to an external International Coaching Federation life coach is also provided to address broader challenges such as limiting beliefs. In addition,

near-peer mentoring is facilitated by the BMP Alumni Mentor Network. Students also engage in large group lectures, larger group discussions, small group discussions, and peer-to-peer writing-and-reflection coursework, with a focus on developing competencies in written and verbal professional communication skills. These activities are specifically targeted to develop the quality of students' professional program application materials.

Expanding on these three components, the BMP enables the student to differentiate with elective courses, experiential opportunities and mentoring to focus on specialized interests. These Areas of Concentration (AOCs) are in Medicine, Dentistry, or Biomedical Research. The AOCs are designed to individualize the program for students seeking future professional programs leading to the MD, DMD, or PhD degree, respectively.

Successful completion of the BMP results in conferral by the University of Pittsburgh of the Master of Science (MS) degree in the major of Biomedical Sciences. The BMP is a 12-month program. Applicants who are working may complete the program part-time over the course of two academic years

Curriculum

The BMP curriculum includes three major components: core, electives, and experiential activities. The "Core Course Requirements" have been designed to provide the foundational sciences for students who have a minimal level of basic science training as well as advanced education in health science thinking skills to serve students well into the first two years of professional degree programs. These courses are complemented by electives and experiential activities that are chosen based on each student's interests in his/her AOC.

Core Courses: Biochemistry and Physiology; Method and Logic in Biomedicine; Cell Signaling and Pharmacology; Comprehensive Analysis of Disease; Organ Systems Physiology; Professional Communications Reflections 1 and 2; Scientific Communication

Elective Courses: Human Anatomy; Histology and Cell Function in Health and Disease; Cell Biology Pathways in Treatment of Disease; Neurophysiology; Clinical Pharmacology; Biomedical Career Planning 1 & 2, Health Equity & Diversity Awareness; Experiential Learning.

Additional Elective Courses: Additional graduate level courses are available with written approval from the student's academic advisor and permission from the instructor and/or department offering the course.

Experiential Courses: The BMP provides ample opportunities for students to engage in community service, hospital volunteering, and clinical shadowing. Research training experiences are also available in a wide range of biomedical and clinical research laboratories. Students are expected to take the initiative, guided by their faculty advisor, to find suitable matches and schedule experiential education and training sessions during the Fall, Spring, and/or Summer terms.

Academic Standards

All graduate students must maintain a minimum cumulative GPA of 3.0 to stay in good academic standing and be eligible for graduation.

Clinical Research (MS)

The Master of Science in Clinical Research Program is aligned with the mission of the Institute for Clinical Research Education to offer the highest-caliber training and education in clinical research and to enhance collaborations among trainees from multiple disciplines. This program is geared toward clinicians who are pursuing a research career, and can be completed over 2 years of part-time study.

Admissions

Admissions Criteria

- Applicants must meet the following requirements before filling out an online application.
- Candidates are encouraged, but not required, to have completed a graduate or professional degree.
- Candidates must have a high level of interest and potential for the pursuit of innovative clinical research as a major focus of their career plan.
- Candidates from departments who ensure 50%-75% of protected time during their pursuit of the degree.
- A minimum GPA of 3.2 on a 4.0 scale
- TOEFL, IELTS, and Duolingo scores (when applicable)
- GRE and MCAT scores are not accepted

Timeline

The Master of Science in Clinical Research Program accepts applications from December 15 through February 28 each year. In order to guarantee that you are considered for admission, we must receive your application and all component parts by February 28. Students will be notified via email of admission decisions approximately 1-2 months following the close of the application cycle.

Financial Assistance

The Institute for Clinical Research Education does not provide financial aid. Unless students have other funding sources, they are responsible for covering the tuition costs, taxes, and fees associated with their course enrollment.

Degree Requirements

Core Curriculum

The purpose of the core curriculum is to provide trainees with the basic set of skills that are required by clinical investigators in all fields of interest. These skills include an understanding of research design, epidemiologic methods, biostatistics, study and survey design, and measurement of outcomes.

The four core courses that comprise the core curriculum are offered in July and August. They are commonly taken together but can be distributed over two summer terms with the guidance of an academic advisor.

CLRES 2005 - COMPUTER METHODS FOR CLINICAL RESEARCH

CLRES 2010 - CLINICAL RESEARCH METHODS

CLRES 2020 - BIOSTATISTICS

CLRES 2040 - MEASUREMENT IN CLINICAL RESEARCH

Advanced Grant Writing Course

This course focuses on research design and development and is a two-part course offered during the fall and spring terms. The Advanced Grant Writing course is taken by MS students during year 2.

CLRES 2071 ADVANCED GRANT WRITING PART 1

CLRES 2072 - ADVANCED GRANT WRITING PART 2

Specialty Track Requirements:

Students who enter the Master of Science in Clinical Research Program will select a curriculum track that offers specialized training in a specific clinical research area. Each specialty track offers a different curriculum of required courses, which can be viewed in the Program Handbook. The MS program has 5 specialty tracks:

- Clinical Trials Research Track
- Comparative Effectiveness Research Track
- Health Services Research Track
- Translational Research Track
- Innovation Track
- Implementation Science Track
- Data Science Track

Each of these tracks has a distinct set of required courses that allow students to specialize in an area of clinical research. All MS students will also take a selection of elective courses to reach the 30 credit minimum required for this degree.

Comprehensive Competency Review:

The Comprehensive Competency review is a program check-in completed at the midpoint of a student's degree progress. The MS in Clinical Research Program is designed to train students in the skills, knowledge, and professional norms for clinical researchers and the Comprehensive Competency Review helps students be confident that they are on track to develop competence in all key areas.

Thesis or Substantive Research Project:

The MS in Clinical Research requires each student to complete a formal thesis or substantive research project. Students are able to write a standard thesis, grant proposal, or 2 manuscripts to fulfill this requirement.

Students must successfully defend their research project to a review committee as required by the University's Committee on Graduate Studies.

Responsible Conduct in Research (RCR) Requirement

Clinical Research Master of Science students are required to attend eight 1-hour CTSI Responsible Conduct in Research workshops or enroll in the ICRE course CLRES 2050: Ethics and Responsible Conduct of Research. At the time of graduation, students must have at least 8 hours of RCR training through CTSI or have successfully completed CLRES 2050 in order to be eligible to graduate.

More Information:

For additional program details, please visit the Master of Science in Clinical Research Program page and review the Program Handbook.

Computational Biomedicine and Biotechnology (MS)

The Computational Biomedicine and Biotechnology (CoBB) Master of Science trains students in translating cutting-edge computational technologies into real-world advances in biomedicine and biotechnology. Seated in the School of Medicine's Department of Computational and Systems Biology, the program focuses on the interface between computer science and applied biology. Our courses are well-suited for students with a variety of backgrounds, such as those in biological sciences or quantitative disciplines. Students in the CoBB program will learn to develop and apply novel computational, mathematical, statistical, and in silico techniques to meet current challenges in biotechnology. Our graduates are equipped with the necessary skills for successful biomedical data science and biocomputing technology careers in the health care and biotechnology industry, government, and academia.

Executive Director:

Mert Gur, PhD

Department of Computational and Systems Biology

ama251@pitt.edu

cobb@pitt.edu

Executive Committee:

Mert Gur, PhD

Joseph Ayoob, PhD

James Faeder, PhD

Frederick (Fritz) Roth, PhD

Program Website:

www.csb.pitt.edu/cobb/

Admissions

CoBB welcomes students from various backgrounds, including but not limited to life science, computer science, physical science, mathematics and statistics, and engineering majors, students with interdisciplinary or multi-disciplinary backgrounds.

Application

Required Materials:

- The Online Application
- Statement of Purpose
- Three letters of Recommendation
- Unofficial Transcripts
- Unofficial TOEFL Scores/IELTS/Duolingo Scores (for international applicants)
- Application Fee

Financial Assistance

Financial guidance is available through the University of Pittsburgh Office of Admissions and Financial Aid: <https://financialaid.pitt.edu/graduate-students/>. All students are responsible for their own tuition.

Degree Requirements

To receive the CoBB MS, all students are required to complete a minimum of 30 credits of masters-level coursework and to maintain an overall GPA of 3.0 or higher. Additional information can be found in the Student Handbook.

Curriculum

- At least four research credits of independent study with a research mentor
- A summer internship or additional directed study, worth three credits
- 3 credits of Fundamentals of Computational Biology
- A Professional Development Course and a Faculty Seminar course
- One course (taken or waived) from each of the six core areas of study
- Data Science, Programming, Probability, and Statistics
- Artificial Intelligence, Machine Learning and Bioimage Analysis
- Genomics and Precision Medicine
- Molecular and Cell Systems Modeling
- Drug Discovery and Quantitative Pharmacology
- Specialized Courses, based on the student's interests, can be selected from a wide range of offerings at the University of Pittsburgh, including the Schools of Medicine, Engineering, and Health Sciences, among others.

Directed Study

Gaining hands on experience in solving problems in computational biology is an essential part of CoBB training. Each student is therefore required to take a minimum of 4 credits of directed study with a University of Pittsburgh faculty member. Students are expected to select a research mentor for the directed study in their first semester, and to complete the research requirement in the second and/or third semesters.

Internship

To gain experience in the professional application of computational biology, students are encouraged to participate in a 2-to-3 month summer internship at a company of their choosing. Acceptable internship sites include industrial labs, biotech/pharma companies, and governmental organizations.

Students will present a written report with well-defined structure and content at the end of their internship to summarize their experience and the skills they acquired during their experiential training, and to make recommendations for future work. They will also make an oral presentation to share their experience with others.

Completion of Degree

The program is structured in such a way that students can finish their degree within 12-20 months, depending on the background of the student. To complete the degree in one year, students must demonstrate proficiency in programming, calculus and linear algebra.

For more information on the program, please visit www.csb.pitt.edu/cobb/

Medical Education (MS)

The Master of Science in Medical Education Program is designed to help academically oriented health care professionals enhance their education, strengthen their teaching skills, and expand their ability to facilitate the learning process of students and residents in a variety of clinical teaching environments. This program is typically completed over 2 years of part-time study. Alumni of this program have gone on to make valuable contributions to the field of medical education, many of them through leadership positions in top training programs across the country.

Institute for Clinical Research Education
200 Meyran Ave., Suite 300
412-586-9632
Fax: 412-586-9672

Learn more.

Admissions

Admissions Criteria

- Candidates must have completed one of the following degrees: MD, DDS, DMD, DO, ND, OD, PharmD, PhD, DNS in nursing, PhD with clinical responsibilities, or other professional degree as deemed appropriate by the selection committee.
- Candidates must have a clinical appointment within UPMC (faculty, fellow, or resident) and/or an academic appointment within a University of Pittsburgh Health Sciences school, since successful participation in and completion of our courses depend on having clinical and classroom environments in which to teach, concurrent with the program.
- Candidates must have a high level of interest in and potential for the pursuit of innovative medical education as a major focus of their career plan.
- Candidates must be based in departments that ensure adequate protected time to participate in courses and complete a research project during their pursuit of the degree.
- A minimum GPA of 3.2 on a 4.0 scale
- TOEFL, IELTS, or Duolingo scores (when applicable)
- GRE and MCAT scores not accepted

Timeline

The Master of Science in Medical Education Program has two application cycles per year. The application period for the Spring Term occurs from September 1 through October 31. The application period for the Summer Term occurs from December 15 through February 28. In order to guarantee that you are considered for admission, we must receive your application and all component parts by the last day of the admission cycle. Students will be notified via email of admission decisions 1-2 months following the close of the application cycle.

Financial Assistance

The Institute for Clinical Research Education does not provide financial aid. Unless students have other funding sources, they are responsible for covering the tuition costs, taxes, and fees associated with their course enrollment.

Degree Requirements

The University requires the successful fulfillment of a minimum of 30 credits for awarding a Master of Science in Medical Education. The degree is granted upon the completion of a tightly integrated curriculum with three components: (1) coursework plus observed teaching activities focusing on adult learning, classroom and clinical teaching skills, curriculum development, innovation in medical education, professional development, and medical administration; (2) additional courses to provide trainees with fundamental research skills; and (3) a project on curriculum development or a mentored research project.

Core Curriculum

All Master of Science trainees in the Medical Education Program enroll in 11 required courses that cover the fundamental aspects of the field of medical education. Below are the required courses:

MEDEDU 2005 - COMPUTER METHODS FOR CLINICAL RESEARCH

MEDEDU 2010 - CLINICAL RESEARCH METHODS

MEDEDU 2020 - BIOSTATISTICS

MEDEDU 2040 - MEASUREMENT IN CLINICAL RESEARCH

MEDEDU 2080 - MASTERS RESEARCH

MEDEDU 2100 - ENHANCING TEACHING SKILLS

MEDEDU 2111 - FUNDAMENTALS OF ADULT LEARNING PART 1

MEDEDU 2120 - PROFESSIONAL DEVELOPMENT

MEDEDU 2125 - ASSESSMENT OF MEDICAL LEARNERS

MEDEDU 2130 - CURRICULUM DEVELOPMENT & EVALTN

MEDEDU 2140 - SCIENTIFIC WRITING & PRESENTATION SKILLS (ONLINE)

Electives

Trainees choose elective coursework to reach the required 30 credits. These courses may be offered through the Medical Education or Clinical Research program.

Independent Research Project

Trainees pursuing the Master of Science in Medical Education are required to complete a substantive research project. This thesis requirement can take the form of a curriculum development project, survey research, qualitative research, or other type of research project. The trainee must be the principal investigator for their thesis project and plan to publish their research in a peer-reviewed journal.

More Information

To learn more about the Medical Education Academic Programs, please visit the program [page](#) and review the [program handbook](#)

Non-Degree

Institute for Clinical Research Education

The Institute for Clinical Research Education (ICRE) is the home for the University of Pittsburgh's premier clinical and translational research training programs. The ICRE offers a variety of educational, training, and career development programs for researchers in clinical and translational science as well as medical education. The degree programs of the ICRE emphasize the multidisciplinary nature of clinical research, translational science, and medical education while engaging adult learners through the use of applied approaches to build skills. [Learn more.](#)

Graduate Training Programs:

- **Clinical and Translational Science (PhD)**
- **Clinical Research (MS)**
- **Clinical Research (Certificate)**
- **Medical Education (MS)**
- **Medical Education (Certificate)**
- **Certificate in Clinical and Translational Science for Doctoral Students in the Health Sciences**

PhD

Cancer Biology and Oncology, PhD

Oncology Graduate Program (OGP)

The proposed OGP will be organized by Hillman Faculty in Hillman Cancer Center and the newly refurbished Ford Assembly Building (5KB) at 5051 Centre Avenue in Shadyside. On a student's diploma it will be a PhD with a major in Cancer Biology and Oncology. The OGP be used to market the cancer focus of the program to students, faculty, and the public.

The OGP will be an innovative program in graduate education that aims to train highly motivated PhD students as self-reliant scholars in an environment with ready access to the breadth of expertise, approaches, and sub-disciplines that constitute the diverse fields of Oncology. This unique program will rapidly immerse students into a research environment that will train them to become independent and creative scientists.

Key features of the OGP include:

- Providing didactic, lecture-based instruction in fundamental and contemporary aspects of Oncology.
- Reinforcement of formal didactic teaching with informal small group discussions led by faculty experts and based on primary scientific literature.
- Providing courses with cohesive themes to facilitate students' understanding of the material, promoting gradual conceptual progression in the classroom with laboratory-based skill building.
- Engaging students early in laboratory research in core competencies of mentors' laboratories with emphasis on multidisciplinary approaches to important research questions.

Faculty research interests in the proposed OGP can be broadly divided into the following areas:

- Cancer Biology Program (CBP)
- Cancer Epidemiology and Prevention Program (CEPP)
- Cancer Immunology and Immunotherapy Program (CIIP)

- Cancer Therapeutics Program (CTP)
- Cancer Virology Program (CVP)
- Genome Stability Program (GSP)

The OGP will be the 12th Graduate Program in the UPSOM, and will have a similar structure and requirements to the other UPSOM programs.

Admission Requirements

- A baccalaureate degree in a biological or physical science or in mathematics, computer science or engineering.
- A minimum grade point average of 3.2 (on a scale of 4) or its equivalent from an accredited institution.
- A minimum of three letters of recommendation. Letters from faculty familiar with the applicant's research accomplishments are of particular value to the evaluation process.
- A personal statement.
- Applicants who are citizens of countries where English is not the official language (and the Province of Quebec in Canada) are required to submit evidence of English language proficiency by submitting the official results of the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS), or Duo Lingo. A minimum overall TOEFL score of 90 (within a minimum score of 22 in each section), 100 iBT, 7.0 on the IELTS, or 120 on Duo Lingo is required for admission to the program. Scores must be less than two years old. To submit TOEFL scores, use Institution Code 2927 and Department Code 45. Applicants who have earned a bachelor's degree or higher from a regionally accredited institution in the United States are exempt from submitting English language proficiency test results.

Course Curriculum

In line with University requirements, students will be required to earn 32 course credits and 40 PhD dissertation credits in order to be eligible for graduation from the program.

Laboratory Rotations

Laboratory rotations are important for helping to ensure a good fit between a student and PhD mentor. Rotations in the OGP will run for 12 weeks. This is sufficient time for the student and potential mentor (and the mentor's lab personnel) to interact, while still allowing time to perform a short-term research project. Each student is required to complete three lab rotations. Students will be expected to complete a short rotation report (2-3 pages), to be turned in within 1 week of the end of the rotation, detailing the goal(s) of the project and its rationale, as well as any results obtained and potential future directions. At the end of each rotation, students will be evaluated by the faculty member supervising the rotation; these evaluations will be forwarded to the Program Directors and will become part of the student's academic record. Rotations will be graded, and each rotation will receive 3 credits.

Course Instruction

Courses will be taught by Oncology Graduate Program Faculty who will be chosen from existing Hillman Cancer Center members. This will fulfill their existing teaching requirement and therefore have no workload impact.

First Year

Fall

All first year OGP students will take a newly developed common courses in the fall semester, to be titled "Fundamentals in Biology" to be directed by Dr. Katherine Aird as well as "Cancer Biology & Therapeutics" an existing course directed by Drs. Laura Stabile and Roderick O'Sullivan (MSCMP3710). These will be three credit courses.

All first-year students will be offered a newly developed common course "Classic Manuscripts in Cancer Biology and Oncology. In this course, students will be taught how to read and analyze scientific literature, with an emphasis on current and classic papers in Oncology. This will be a two-credit course.

Students will also attend one of HCC's research program's work-in-progress conferences where they will learn how to present state-of-the-art research in Oncology.

Finally, students in the fall of year 1 will complete a laboratory rotation of 12 weeks each (three credits).

- MSOGP 2000 - FUNDAMENTALS IN BIOLOGY
- MSCMP 3710 - CANCER BIOLOGY AND THERAPEUTICS
- MSOGP 2001 - CLASSIC MANUSCRIPTS IN CANCER BIOLOGY AND ONCOLOGY

Spring

All first-year students will be required to take a newly developed common course "Fundamentals of Clinical Oncology" to be directed by Dr. Chris Bakkenist. This will be a three-credit course.

All first-year students will be required to take three elective courses in the Spring of the first year (two or three credits). These may be electives offered by OGP or other Graduate Programs. For example, we imagine that some OGP students will elect to take an existing course, Comprehensive Immunology MSMI 2210 with PMI (two credits) prior to taking a new course, Cancer Immunology and Immunotherapy (three credits) in the summer of their first year. Some OGP students may take an existing course, Principles of Pharmacology MSMPHL 2310 (two credits) and/or Drug Discovery MSMPHL 2370 (two credits) prior to a new course, Women's Cancer (three credits) in the summer of their first year. While the OGP will be an innovative, contemporary, and comprehensive Graduate Program to train the next generation of cancer researchers, we do not propose that it be exclusive. We will integrate with existing Graduate Programs who offer electives that interest our students, and our electives will be open to Graduate Students in other programs. Students will also complete a second laboratory rotation.

- MSOGP 2002 - FUNDAMENTALS OF CLINICAL ONCOLOGY
- MSMI 2210 - COMPREHENSIVE IMMUNOLOGY
- MSMPHL 2310 - PRINCIPLES OF PHARMACOLOGY
- MSMPHL 2370 - DRUG DISCOVERY

Summer

In the summer concluding their first year in the Program, OGP students will take the same Scientific Ethics (one credit) and Statistics (three credits) courses currently required of all students in the IBGP and other SOM PhD programs. Many of the faculty who will participate in OGP have participated in the aforementioned courses and will continue to do so once the OGP is established. OGP students will also take an elective (two or three credits).

Students will also complete a third laboratory rotation.

- INTBP 2290 - SCIENTIFIC ETHICS AND THE RESPONSIBLE CONDUCT OF RESEARCH
- STATISTICS COURSE

Second Year

Fall

Upon completion of rotations, students will confer with their first-year advisor, rotation mentors, and/or the members of the OGP executive committee to identify a mentor and laboratory in which to conduct their thesis research. Students

will commence or continue work in their chosen thesis laboratory, depending on when their laboratory rotations were completed.

If a thesis laboratory is not chosen at the end of the third rotation, a fourth rotation may be offered at the discretion of the Program Directors. These situations will be reviewed on a case by case basis.

- MSMPHL 2300 - MS THESIS RESEARCH

Spring

All second-year students will be required to take a course in scientific writing (one credit). Our experience examining written comprehensive exams is that some students need intensive training in scientific writing as they start working on their comprehensive exams.

- MSOGP 2003 - SCIENTIFIC WRITING

OGP Electives

To be completed during the first two years of study.

OGP students will be required to complete 6 credits of Cancer elective courses based upon their particular area of interest. We anticipate that these will generally be of the following:

- MSMPHL 3330 - GENOME INSTABILITY AND HUMAN DISEASE
- MSOGP 2004 - CANCER IMMUNOLOGY AND IMMUNOTHERAPY
- MSOGP 2005 - BIG DATA SCIENCE
- MSOGP 2006 - WOMEN'S CANCER

Research Credits

Lab Rotations (Fall/Spring/Summer First Year, 9 credits): Students will be required to complete three lab rotations of 12 weeks each for 3 credits per rotation. These rotations will commence in early September. After the rotations, students will sign up for Directed Study (Spring/Summer/Fall First/Second Year, 23/24 credits) or Dissertation Study (after completion of the qualifying exam and advancing to candidacy; until graduation).

Total Credits: 72

Interdisciplinary Biomedical Graduate Program

Through the Interdisciplinary Biomedical Graduate Program, students may be admitted into one of the following 4 PhD degree-granting programs in the School of Medicine:

- **Cell Biology and Molecular Physiology (PhD)**
- **Cellular and Molecular Pathology (PhD)**
- **Molecular Genetics and Developmental Biology (PhD)**

● **Molecular Pharmacology (PhD)**

Students will not be admitted to pursue a master's degree. However, students who cannot complete the PhD program due to extenuating personal, financial, academic, or medical reasons may be awarded a master's degree.

The Interdisciplinary Biomedical Graduate Program is flexible and accommodates students whose research interests are still evolving by introducing them to a variety of fields through interdisciplinary courses and laboratory experiences. For those students who have a clearly defined research interest, the program offers the opportunity to move quickly into a laboratory and accelerate their study.

For more information on Admissions, Financial Assistance, Training Faculty, etc. please visit www.gradbiomed.pitt.edu

Contact Information

Associate Dean for Graduate Studies
Office of Graduate Studies
M240 Scaife Hall
3550 Terrace Street, Pittsburgh PA 15261
412-648-8957
Fax: 412-648-1077
E-mail: gradstudies@medschool.pitt.edu
www.gradbiomed.pitt.edu

Academic Standards

Students must maintain a minimum overall cumulative GPA of 3.00. In addition, a minimum of a B grade must be earned in each of the required courses and in each of the degree-granting program core courses.

General Degree Requirements - All Interdisciplinary Biomedical Graduate Students

The first term core course, Foundations of Biomedical Science, is required of all students and is followed by increasingly specialized course work in the discipline-specific program the student has chosen. A course in biomedical experimental design and analysis and a course in research ethics are also required of all students. The first year includes three laboratory research rotations. (*See listing of Required Courses below.*) Students are guided through their first year of graduate study by a faculty mentor assigned by the program.

The mentor helps to identify rotation laboratories, provides advice on classes, and ensures that students reach appropriate milestones in the first year of the program. At the end of the first year, a preliminary student performance evaluation is conducted by the Program Steering Committee. When a student has successfully completed the preliminary evaluation and chosen a dissertation advisor, the student transfers into one of the degree-granting programs.

Evaluation following the first year is undertaken by the degree-granting program and includes course performance and a comprehensive exam at the end of the second year of study. The comprehensive exam is in the form of an original research proposal followed by an oral examination before a faculty committee. Upon successful completion of the comprehensive exam, the student nominates a dissertation advisory committee composed of a minimum of 5 members. A majority of the committee (including the major advisor) must have graduate faculty status. The student then presents

a dissertation proposal to the committee and is admitted to candidacy. The training program is completed by execution of an original and independent research project and defending a dissertation. *Please see Regulations Pertaining to Doctoral Degrees.*

Required Courses-All Students

The following courses are required of all students in the Interdisciplinary Biomedical Graduate Program:

INTBP 2000 - FOUNDATIONS OF BIOMEDICAL SCIENCE

INTBP 2005 - FOUNDATIONS CONFERENCE

INTBP 2013 - D2K: FROM DATA TO KNOWLEDGE- BIOMEDICAL EXPERIMENTAL DESIGN AND ANALYSIS

INTBP 2290 - SCIENTIFIC ETHICS AND THE RESPONSIBLE CONDUCT OF RESEARCH

INTBP 2010 - LABORATORY RESEARCH ROTATION

A minimum of 72 credits (32 course credits and 40 PhD dissertation research credits) beyond the baccalaureate degree is required for the PhD degree.

School of Nursing

School of Nursing

The School of Nursing was established as an independent school of the University by action of the Board of Trustees in April 1939 and was opened in September of the same year. The University conferred the degree Bachelor of Science in Nursing Education for the first time in August 1939. The University conferred the first Bachelor of Science in Nursing degrees in February 1942.

The first Master's degree was awarded in 1944, and the first Doctor of Philosophy degree in 1957. The first Doctorate of Nursing Practice degree was awarded in 2008.

Mission

The University of Pittsburgh School of Nursing, founded in 1939, is one of the oldest programs in baccalaureate and doctoral education in nursing in the United States. As one of the nation's distinguished schools of nursing, the resources of the School of Nursing constitute an invaluable asset for the intellectual, scientific, and economic enrichment of health care in Pennsylvania, the nation, and throughout the world.

The School of Nursing's mission is to:

- provide high-quality undergraduate education in nursing;
- maintain and develop superior graduate programs in nursing that respond to the needs of health care in general and nursing in particular within Pennsylvania, the nation, and the world;
- engage in research and other scholarly activities that advance learning through the extension of the frontiers of knowledge in health care;
- cooperate with health care, governmental, and related institutions to transfer knowledge in health sciences and health care;
- offer continuing education programs adapted to the professional upgrading and career advancement interests and needs of nurses in Pennsylvania; and
- make available to local communities and public agencies the expertise of the School of Nursing in ways that are consistent with the primary teaching and research functions and contribute to the intellectual and economic development in health care within the commonwealth, the nation, and the world.

Master's Program Admission Process and Admission Criteria

Applications are available online at www.nursing.pitt.edu/apply-now. Admission criteria are described on the school's website: www.nursing.pitt.edu/programs/msn/admissions-info. Complete applications will be reviewed and interviews (face to face or virtually) will be conducted prior to an admission decision. The application deadlines are as follows: Fall Term admission-June 15, Spring Term admission-October 1, and Summer Term admission-March 1. International students are advised to apply by the February 15 deadline. Applicants must apply online at NursingCAS.

Applications to the Master's Program in nursing are reviewed by the faculty in the applicant's Major/Area of Concentration. Applicants must meet the criteria listed below. Qualified applicants are considered without regard to race, color, religion, national origin, ancestry, sex, age, marital status, familial status, sexual orientation, disability, or status as a disabled veteran or a veteran of the Vietnam era.

Applicants must have:

- Official transcripts for all undergraduate and graduate work.
- A baccalaureate degree in nursing from an ACEN, NLN, or CCNE accredited program.
- International applicants must provide evidence of a degree comparable to an American baccalaureate degree.
- Current RN license in U.S. state/territory or location where student will complete clinical requirements.
- A GPA of 3.0 or higher from previous nursing degree.
- A pre-admission interview. If the applicant resides at a great distance, a virtual interview may be conducted.
- Pre-requisite statistics course with a grade of B- or better.
- Three letters of recommendation attesting to the applicant's capacity and potential for master's study from each of the following (these can be uploaded into the Nursing Online Application): the director or a faculty member from the most recent academic program attended (if applicant has been a nursing student in the last 5 years); a recent employer; and a person who can speak to the applicant's professional work.
- A personal essay (limit to 2-3 pages, single-spaced) addressing the elements evaluated by the MSN holistic admissions essay writing rubric.
- Completed applicant survey.
- Current CV or resume.
- Non-refundable application fee.

Doctor of Nursing Practice (DNP) Admission Process and Admission Criteria

<https://www.nursing.pitt.edu/programs/dnp/admissions-info>

Application Instructions

Pitt Nursing accepts applications for admission to all areas of the DNP Program via NursingCAS. Each applicant must complete and submit the following:

- Completed application form.
- A non-refundable application fee.
- Complete official transcripts of all undergraduate and graduate education.

- Admission test scores if applicable.
- Three letters of professional recommendation indicating the reviewer's support of the student's ability to successfully complete a demanding graduate level academic and clinical program. At least one recommendation should come from a current or recent direct supervisor. These letters will be submitted by the reviewer through NursingCAS.
- Personal essay addressing the questions:
 - a. Share life experiences that have influenced your interest in progressing your nursing career.
 - b. Describe a time when you advocated for an individual from a disadvantaged group in a healthcare setting.
 - c. Describe how your personal strengths, experiences, & abilities will contribute to your success in nursing school and your career in nursing (community service, leadership experience, healthcare experience).
 - d. Explain the academic challenges, successes, or obstacles in your life that have affected your ability to achieve your goals. How did you respond to the situation?
 - e. Why did you choose your area of concentration?
 - f. What are your expectations for the program?
 - g. What are your expectations for the DNP project?
- Completion of the Experience Survey.
- Current CV or resume.

All completed applications are to be submitted to Student Affairs, which will forward them to the Coordinator of the Area of Concentration or Major for review and appropriate action. DNP admission decisions are the responsibility of the Coordinator of the Area of Concentration or Major.

DNP Admission, Progression & Graduation (APG) Committee presents a summary of admission decisions to the DNP Council including the number and status of students offered admission.

Student Affairs will notify applicants of the admission decision. Applicants who do not qualify for admission to full graduate status may be considered for provisional status except for international applicants.

Admission Criteria

You may apply to the DNP program at various points in your educational career. The school offers both **BSN to DNP** and **MSN to DNP** pathways; your choice will depend upon which degrees you previously earned and which majors/concentrations you select.

Students, who are currently enrolled in their last term of a BSN program, may apply to the BSN to DNP focus areas, which do not require clinical experience beyond the BSN educational experiences. If offered admission, it would be contingent on the student's (1) successful completion of the BSN and (2) obtainment of the RN license.

BSN-prepared students, who are currently enrolled in their last term of an MSN or MS program in a related focus, may apply to the MSN to DNP pathway. If offered admission, it would be contingent on the student's (1) successful completion of the MSN or MS in a related focus and (2) fulfillment of all admission criteria.

The University of Pittsburgh School of Nursing only admits a **Fall Term Cohort** to all DNP Program majors/concentration except the Nurse Anesthesia BSN to DNP major, which only admits a **Spring Term Cohort**. The application deadlines for all areas are February 15th and May 1st. International students are advised to apply by the February 15th deadline. Complete applications received by February 15th will be reviewed and an admission decision will be made by June 1. Complete application received by the May 15th deadline will be reviewed and admission decisions made by June 30th.

Applicants must apply online at NursingCAS.

Admission to the DNP Program

The DNP Program admits BSN graduates and advanced practice nurses and nursing administrators who have completed a graduate degree in nursing from a CCNE, NLN, or ACEN accredited program in nursing.*

*BSN graduates with a master's in other areas may be considered for admission.

BSN to DNP

- Current RN license in US State/Territory or location where student will complete clinical requirements.
- GPA \geq 3.0 in BSN or entry level MSN from ACEN, NLN, or CCNE accredited program.
- Pre-requisite statistics course with a grade B or better.
- Clinical experience for select focus areas** (*required or preferred for selected majors and concentrations*)
- A pre-admission interview. If the applicant resides at a great distance, a virtual interview may be conducted.
- Evidence of ability to communicate in writing through the required personal essay.

MSN to DNP

- Current RN license in US State/Territory or location where student will complete clinical requirements.
- GPA \geq 3.0 in MSN from an accredited program or master's in related field (must have BSN from ACEN, NLN, or CCNE accredited program).
- Pre-requisite statistics course with a grade B or better.
- Clinical experience for select focus areas**
- A pre-admission interview. If the applicant resides at a great distance, a virtual interview may be conducted.
- Evidence of ability to communicate in writing through the required personal essay.
- Nurse Anesthesia MSN to DNP (additional requirements)
- Current Nurse Anesthetist certification in US State/Territory or location where student will complete the DNP Scholarly Project.
- Minimum of 3.0 GPA in MSN or MS in Nurse Anesthesia from an accredited program.

****Clinical Experience for Select Focus Areas**

- **Neonatal NP:** Equivalent of 2 years full time (within last 5 years) nursing experience in the care of critically ill newborns, infants, and children in critical care inpatient settings (preferably Level III NICU). Students may enroll in pre-clinical courses while obtaining practice experience.
- **Health Systems Executive Leadership:** 2 years of management experience preferred.
- **Nurse Anesthesia BSN to DNP:** Minimum 1 year full-time ICU/critical care nursing experience (within last 5 years) by start of program (may apply if employed in ICU/critical care and will have required experience before admission term). Taking the GRE is optional but may be considered supplemental information in the holistic admission process.

Doctor of Philosophy (PhD) Admission Process and Admission Criteria

The Doctor of Philosophy (PhD) program follows a **Fall Term Cohort Only** admissions process. Applications to the PhD program are accepted on a rolling basis throughout the year and will receive an admission decision usually within 4-6 weeks of receiving completed application materials. Application decisions will be communicated electronically (by e-mail). Applicants must apply online at NursingCAS.

The School of Nursing offers BSN-PhD and MSN-PhD options, and a dual DNP/PhD option. A baccalaureate or a master's degree in nursing is preferred. Applicants who do not have a baccalaureate degree in nursing or a master's degree in nursing as the first professional degree will be considered individually. The School of Nursing also offers a

currently matriculating BSN to PhD option, in which a student who has not yet completed the BSN can be admitted conditionally into the PhD program pending successful completion of their BSN. Interested applicants should contact the Student Affairs Office at 412-624-4586 or sao50@pitt.edu for further information.

Admission to the PhD Program

Admission to the PhD program is assessed through interviews, references, and an essay that provides a written statement of goals, focal area of research, and implications for global health. Documentation of academic success is required.

The doctoral faculty strongly recommends that students develop knowledge of and experience with word processing, database management, and computerized literature searches prior to applying to the PhD program.

Length of Program

The post-master's full-time curriculum (MSN to PhD) is comprised of 48 credits minimum, and students may complete the program in a minimum time of approximately two and a half years depending on the nature and complexity of research for the dissertation. Twenty-four credits are granted from the prior master's program. For prior courses taken, an evaluation of the content of a course taken elsewhere must be approved by the Director of the PhD Program to determine its comparability with the coursework at the University of Pittsburgh. Students entering the MSN to PhD program will work with their academic advisor to conduct a gap analysis to review prior research-related coursework to determine if additional research core coursework is needed beyond that specified in the MSN to PhD curriculum plan. The part-time student may complete the program in three to four years. The statute of limitations for completion of the MSN to PhD track is eight consecutive calendar years from the first term of registration for credits that are in the required curriculum plan for the doctoral degree.

The BSN to PhD program requires 72 credits minimum. Students admitted to the BSN to PhD track are expected to enroll full-time, and the program can be completed in a minimum of three years, depending on the complexity of research for dissertation. Students are also encouraged to consider obtaining a simultaneous master's degree. The statute of limitations for completion of the BSN to PhD track is 10 consecutive calendar years from the first term of registration for credits that are in the required curriculum plan for the doctoral degree.

For more information, see Policy 208.

Doctor of Philosophy (PhD)

The Doctor of Philosophy (PhD) program prepares nurse scholars who will discover and extend scientific knowledge that advances the science and practice of nursing and contributes to other disciplines. Graduates can assume leadership roles within research teams, health care systems, industry, and schools of nursing in academic institutions.

The PhD program of study provides a coherent series of courses, seminars, and discussions designed to develop in the student a mature understanding of content, methods, and values of the discipline of nursing and its relation to other fields. The curriculum includes courses in the philosophical underpinnings and theoretical foundations for research, and research design, measurement, and intervention development. Courses also include advanced statistics, advanced quantitative methods, the responsibilities and activities of scientists, and the art and science of teaching and learning. Students work closely with research faculty members from nursing and other disciplines. Each student also participates in two mentored research experiences. The first is the Apprenticeship Practica, wherein students affiliate with a mentor's established research team over time to explore the scientific literature, develop, plan, and implement an apprenticeship research project, and disseminate findings. This experience allows for the opportunity to acquire individualized and tangible research skills within a mentored application environment, which is additive to and precedes the dissertation experience. The second mentored research experience is the students' development and

implementation of their independent dissertation project, culminating in dissertation defense. Students prepare and submit applications for competitive research funding.

Admission of International Students (MSN, DNP, and PhD)

Students who reside outside the United States applying to the School of Nursing should apply using the same admissions process and admissions criteria described above. The application should be completed in English and be accompanied by official academic credentials with notarized English translations. Applicants must successfully complete the TOEFL, IELTS or Duolingo English Test (DET) if English is a second language. Applicants must also have a professional nursing license. The following links specify the licensure requirement for the MSN, DNP, and PhD programs. Applicants who need to apply for a professional nursing license are encouraged to visit the Pennsylvania State Board website, which contains information for internationally educated nurses applying to take the NCLEX-RN examination.

Insurance and Health Care Requirements

All admitted students are required to submit a School of Nursing Initial Health Form with documentation of health insurance; and Act 33, 34 and 73 clearances prior to beginning their program of study. Once enrolled, students must submit the School of Nursing's Annual Health Form with verification of health insurance each year and have an annual influenza vaccination (unless a requested exemption is submitted and approved). Individual students must meet additional health requirements of clinical agencies such as drug testing. Current CPR certification is required prior to enrollment in all clinical courses. Students are required to carry health insurance for the duration of their study, which will cover payment for treatment and follow-up procedures related to injury or medical problems incurred during graduate study. The University of Pittsburgh makes insurance programs available to graduate students (see: <https://www.hr.pitt.edu/students>). All students admitted with full or provisional status are automatically enrolled in a University liability insurance policy annually, which only covers a student acting within the scope of their duties as a student in the School of Nursing.

Financial Assistance

The sources of awards and aid may include: professional nurse traineeships, graduate student assistant positions, graduate student researcher positions, teaching assistant positions, teaching fellow positions, school scholarships, pre- and postdoctoral training grant fellowships, federal Stafford Loans, private loans, and emergency aid. See Scholarship Opportunities for more information.

Academic Policies

All students in the School of Nursing are governed by School of Nursing and University policies. Therefore, it is essential that students regularly review and familiarize themselves with those policies, both general and graduate. Question about policies should be directed to the academic advisor or to their respective program, major or area of concentration director/coordinator. Policies of particular importance deal with admission criteria, registration processes, transfer of credits, clinical requirements, acceptable academic status, warning and probation, readmission, requirements for degree completion, academic integrity, unsafe clinical performance, and impaired clinical performance. View the School of Nursing Policies.

Advising

Each new student who is admitted to the graduate program is assigned a faculty advisor from the specific program, major, or area of concentration to which the student is admitted. The faculty advisor provides initial orientation to the school, the University, and the program requirements. Each student is required to meet with their advisor prior to course selection and enrollment for each term. It is also recommended that they meet with their advisor at least one other time each term to review their academic progress and any other time they have questions or concerns about their program of study. The advisor is actively involved if there are academic concerns.

Students also can use the staff in the Student Affairs Office in the School of Nursing to obtain information about sources of financial aid, scholarships, school policies, registration, course availability, University resources, and community resources for help with personal problems. An online general orientation program is mandatory for all new students.

General Degree Requirements

To earn the Master of Science in Nursing (MSN), the Doctor of Nursing Practice (DNP), and Doctor of Philosophy (PhD), the student must demonstrate satisfactory academic achievement in required coursework prescribed by the curriculum with an overall academic achievement of a minimum Grade Point Average (GPA) of 3.00. Successful completion of a comprehensive examination is also required for the MSN, BSN to DNP, and PhD in nursing. The DNP requires successful completion of a DNP project and the PhD requires successful defense of a dissertation.

Application for Graduation

Each candidate for graduation must file an official Application for Graduation in the School of Nursing Student Affairs Office at least three months before the degree is to be completed. A fee will be assessed after the deadline for application. All students must be registered for at least one credit during the 12 months prior to graduation and must be registered for at least one credit in the term in which they take their comprehensive examination. International students must be registered according to the conditions of their visa.

Major and Degree Options

The School of Nursing offers the following graduate degrees:

- The Master of Science in Nursing with majors and areas of concentration in the following areas:
 - Nurse Practitioner
 - Neonatal Nurse Practitioner
 - Nurse Specialty Role
 - Clinical Nurse Leader
 - Nursing Informatics
 - School Nursing
- The Doctor of Nursing Practice (DNP)
 - MSN to DNP Options
 - Nurse Practitioner
 - Adult-Gerontology Acute Care Nurse Practitioner
 - Adult-Gerontology Primary Care Nurse Practitioner
 - Family (Individual Across the Lifespan) Nurse Practitioner
 - Pediatric Acute Care Nurse Practitioner
 - Pediatric Primary Care Nurse Practitioner
 - Neonatal Nurse Practitioner
 - Psychiatric Mental Health Nurse Practitioner

- Clinical Nurse Specialist
- Adult-Gerontology (CNS)
- Nurse Specialty Role
- Health Systems Executive Leadership
- Nurse Anesthesia
- BSN to DNP Options
- Nurse Practitioner
- Adult-Gerontology Acute Care Nurse Practitioner
- Adult Gerontology Primary Care Nurse Practitioner
- Family (Individual Across the Lifespan) Nurse Practitioner
- Pediatric Primary Care Nurse Practitioner
- Neonatal Nurse Practitioner
- Psychiatric Mental Health Nurse Practitioner
- Clinical Nurse Specialist
- Adult-Gerontology (CNS)
- Nurse Anesthesia
- Nurse-Midwife
- The Doctor of Philosophy (PhD) in Nursing (including the BSN to PhD and MSN to PhD options.)
- Doctor of Nursing Practice and Doctor of Philosophy (PhD) Dual program in these areas of Doctor of Nursing Practice concentrations
- Adult-Gerontology Clinical Nurse Specialist

Special Academic Opportunities/Programs

The School of Nursing offers a variety of special programs within its master's and doctoral programs:

Minors

Students in the Master's program, the DNP program and the PhD program have the option of completing a minor in nursing education, nursing informatics, nursing administration, and gerontology for nurse practitioners, or health care genetics. The minimum credits required to obtain a minor is 8-12 credits.

Post-Professional Certificates

Post-professional certificates are available in nursing education, school nursing, health care genetics, nursing informatics, and gerontology for nurse practitioners, as well as an adult-gerontology acute care nurse practitioner, pediatric acute care nurse practitioner, neonatal nurse practitioner, and psychiatric mental health nurse practitioner. The certificate options require a minimum of 10 credits; additional credits may be required depending on the certificate program and previous graduate course work. All students admitted to a nurse practitioner certificate program must meet all curriculum requirements of the full graduate degree program, either through previous course work or credits earned during the certificate program. Individual review of transcripts will determine the exact number of credits needed to meet curriculum requirements.

Admission criteria for master's level certificate programs include:

- Evidence of successful completion of MSN, DNP, or other relevant first professional degree
- Relevant work experience
- Three letters of recommendation
- Satisfactory interview with program faculty

- Current RN license if the certificate program includes clinical experiences.

School of Nursing Faculty

School of Nursing Faculty

Program and Course Offerings

Certificate

Adult-Gerontology Acute Care Nurse Practitioner Certificate

Post-Professional Certificate in Adult-Gerontology Acute Care Nurse Practitioner

This non-degree certificate is designed for nurse practitioners or clinical nurse specialists with a previous Master of Nursing or Doctor of Nursing Practice who are seeking to expand their roles via nurse practitioner certification in Adult-Gerontology Acute Care. The total credits required are 24.

Overview

The Adult-Gerontology Acute Care Nurse Practitioner (AG-ACNP) Post-Professional Certificate is designed for graduate-prepared Nurse Practitioners (NP) or Clinical Nurse Specialists (CNS) who are seeking to expand their roles via nurse practitioner certification in Adult-Gerontology Acute Care. The curriculum prepares nurse practitioners to function as generalist, principal providers of care for adults and older adults with acute, critical and complex chronic health problems across the continuum of acute care services.

AG-ACNP students select a clinical emphasis for directed study. The directed study allows students to design clinical experiences around a particular area of interest (i.e., internal medicine, general surgery). The curriculum consists of NP and AG-ACNP specialty courses and clinical practice hours.

Graduates of the AG-ACNP Post-Professional Certificate are eligible to sit for a national nurse practitioner certification examination in Adult-Gerontology Acute Care offered by either the American Nurses Credentialing Center (ANCC) or American Association of Critical Care Nurses (AACN). Successful passing of the national certification examination entitles the graduate to apply for certification as a Certified Registered Nurse Practitioner (CRNP) in Adult-Gerontology Acute Care by the State Board of Nurse Examiners of the Commonwealth of Pennsylvania or by the Board of Nursing in the student's US State/Territory or location of employment.

Curriculum Format

- Full time or part time (~3-5 terms)
- 540 clinical hours*
- Online or onsite
- Students are required to attend a 3-day onsite laboratory intensive, usually scheduled in the Summer term, 2nd term of study. Each student will be responsible for transportation costs and for room and board costs during the lab intensive.

- Students will need to arrange for clinical placements and appropriate physician or nurse practitioner preceptors, as directed by their academic advisor.
- An Affiliation Agreement between the University and the clinical site is required before clinical hours can begin. This process often takes some time to finalize, so applicants are highly encouraged to apply early and begin this process as soon as accepted into the program so that there will be no delay in beginning clinical rotations.

Program Outcomes

Graduates of the AG-ACNP Post-Professional Certificate are prepared to accomplish the following:

- Assume responsibility for promoting, maintaining, and restoring health to acutely ill, critically ill, and complex chronically ill adults and older adults
- Identify health risks, promote wellness, and diagnose and manage acute and chronic illness
- Participate in multi-disciplinary research and provide leadership in mobilizing health services

Admission Criteria

- Valid registered nurse license in US State/Territory or location where clinical experiences are performed
- Minimum of one year nursing experience recommended
- BSN required
- Previous MS, MSN, or DNP as a NP or CNS (from ACEN, NLN, or CCNE accredited program)
- GPA \geq 3.0 in the MS, MSN, or DNP degree
- Pre-admission interview
- Complete online application
- *International applicants: see <https://www.nursing.pitt.edu/admissions/international-applicants> and www.ois.pitt.edu*
- Spring term admission only

Admission of International Applicants

Applications from international students are reviewed according to the admission criteria stated above, and admissions deadlines for all programs are available online. The online application must be completed in English. See the School of Nursing International Applicants page for specific admission requirements.

Full-Time Curriculum

Spring Term

- NURNP 2100 - MANAGEMENT OF ADULT EPISODIC/CHRONIC HEALTH PROBLEMS IN ACUTE CARE THEORY
OR
- NURNP 2100D - MANAGEMENT OF ADULT WITH EPISODIC/CHRONIC HEALTH PROBLEMS IN ACUTE CARE THEORY
- NURNP 2101 - MANAGEMENT OF ADULT EPISODIC/CHRONIC HEALTH PROBLEMS IN ACUTE CARE CLINICAL
- NUR 2682 - HUMAN GENETICS AND CLINICAL APPLICATIONS
OR
- NUR 2682D - HUMAN GENETICS AND CLINICAL APPLICATIONS

Summer Term

- NURNP 2104 - MANAGEMENT OF COMPLEX HEALTH PROBLEMS OF THE ACUTELY AND CRITICALLY ILL ADULT
OR
- NURNP 2104D - MANAGEMENT OF COMPLEX HEALTH PROBLEMS OF THE ACUTELY AND CRITICALLY ILL ADULT
- NURNP 2526D - MANAGEMENT: GERIATRIC HEALTH
- NURNP 2028 - ROLE PRACTICUM *

Fall Term

- NURNP 2102 - MANAGEMENT OF COMPLEX HEALTH PROBLEMS OF THE ACUTELY AND CRITICALLY ILL ADULT 2
OR
- NURNP 2102D - MANAGEMENT OF COMPLEX HEALTH PROBLEMS OF THE ACUTELY AND CRITICALLY ILL ADULT 2
- NURNP 2109 - CLINICAL EMPHASIS - DIRECTED STUDY

Notes

Successful completion of the AG-ACNP Specialty Comprehensive Exam is required.

*Dependent on the individual's previous role, population of patients, and years of experience as a nurse practitioner in an acute or critical care setting with adult/gerontology patients, up to 300 clinical hours may be completed through the option of credit by course examination.

The total credits required will vary based on evaluation of the student's previous coursework. Applicants must have completed courses in their prior MSN or DNP nurse practitioner program that meet the core course requirements to sit for the AG-ACNP certification examination (Advanced Pathophysiology across the Lifespan, Advanced Pharmacology across the Lifespan, Advanced Health Assessment across the Lifespan, and Health Promotion). Additional coursework may be required and/or credit may be given for previous coursework that meets the core curriculum requirements.

Total Credits: 24

*Courses with a "D" are delivered synchronously via distance technology for qualified onsite students as per Policy 438.

Certificate in Gerontology for Nurse Practitioners

The online Post-Professional Certificate in Gerontology for Nurses Practitioners is a non-degree certificate designed for graduate-prepared Family, Adult Primary Care, Psychiatric Mental Health, and Adult Acute Care Nurse Practitioners who seek to increase their formal education as a principal provider of primary health care in the care of older adults.

The curriculum includes a total of 11 credits; five (5) credits of core advanced nursing practice and six (6) approved elective credits. The core advanced nursing practice courses are specifically designed to enable Nurse Practitioners to increase their capacity in the complex care of older adults. The curriculum includes a clinical practicum to provide students with the opportunity to synthesize and integrate concepts learned in the delivery of primary health care to older adults across a variety of settings.

Students will select six (6) credits of elective courses related to their career goals or interests (some taught through other departments).

Upon successful completion of all requirements students will receive a Certificate in Gerontology for Nurse Practitioners. Certificate in Gerontology for Nurse Practitioners will appear on the student transcript.

Graduates will increase their marketability across health care settings with expertise in geriatrics and will enhance their clinical practice to better meet the complex health care needs of our aging population.

Curriculum Format

- Part time (2-3 terms)
- Online
- 11 credits (students may add up to 180 hours of optional practicum in student's locale)

Program Outcomes

Graduates of the Certificate in Gerontology for Nurse Practitioners will be prepared to:

- Apply advanced knowledge about gerontology and geriatrics, and specialized knowledge of aging and the aging process
- Bring expertise to the NP role that includes the diagnosis and management of acute, chronic, and preventive health care needs of the older adult population
- Collaborate with and lead inter-disciplinary health care teams in the care of older adults.

Admission Criteria

- Valid registered nurse license in US State/Territory or location where clinical experiences are performed
- MSN or DNP degree as a Family, Adult Primary Care, Psychiatric Mental Health, or Adult Acute Care NP (from ACEN, NLN, or CCNE accredited program)
- GPA \geq 3.0 in MSN or DNP program
- Pre-admission interview
- Short essay
- Complete online application
- *International applicants: see www.nursing.pitt.edu and www.ois.pitt.edu*
- Fall, Spring, and Summer term admission

Admission of International Applicants

Applications from international students are reviewed according to the admission criteria stated above, and admissions deadlines for all programs are available online. The online application must be completed in English. See the School of Nursing International Applicants page for specific admission requirements.

Curriculum

Core Advance Nursing Practice (Required): 5 Credits

- NURNP 2526D - MANAGEMENT: GERIATRIC HEALTH
 - NURNP 2527 - ADVANCED MANAGEMENT: COMPLEX GERIATRIC HEALTH ISSUES
- OR

- NURNP 2527D - ADVANCED MANAGEMENT: COMPLEX GERIATRIC HEALTH ISSUES

Electives: 6 Credits

Choose two courses from the following:

- GERON 2001 - ETHICS AND AGING
- GERON 2002 - PREVENTION AND HEALTHY AGING
- GERON 2004 - MENTAL HEALTH AND MENTAL ILLNESS IN LATE-LIFE
- GERON 2005 - PERSPECTIVES IN AGING
- GERON 2006 - MULTI-DISCIPLINARY ASPECTS OF DEMENTIA
- GERON 2008 - HUMAN PERFORMANCE, NUTRITION AND AGING
- GERON 2009 - AGING AND COMMUNICATION
- NURNP 2529 - GERONTOLOGY CLINICAL PRACTICUM

Total Credits: 11

*Courses with a "D" can be delivered synchronously via distance technology. Such courses are open only to qualified onsite students as per Policy 438.

Certificate in Health Care Genetics

Genetic based health care is routinely becoming a part of daily health care, having major impacts on patient diagnosis, prognosis, and treatment. The Certificate in Health Care Genetics is designed for health care workers who are seeking focused, graduate-level education in the specialty of genetics. Knowledge gained through coursework will enable healthcare workers to better care for and educate their patients.

Curriculum Format

- Full time or part time (~3 terms)
- Onsite
- The curriculum includes courses in genetics (taught through the School of Nursing) and choice of 3 courses related to the student's career goals or interests (taught through other departments in the Schools of the Health Sciences).
- Learning experiences may be enriched through interaction with Pitt Nursing's Genomics of Patient Outcomes Hub, Clinical Genetics Case Conferences, Human Genetics Research Seminars, Genetics Grand Rounds, and a Research Practicum in a molecular genetics laboratory.

Program Outcomes

Graduates of the Certificate in Health Care Genetics are prepared to:

- Guide patients in their understanding of the genetic basis of disease as well as providing patient education and guidance in the areas of available genetic testing, interpretation of testing, recurrence risks, and genetic based therapies
- Provide advocacy for patients and families with genetic conditions
- Utilize family histories to determine disorders for which the patient is at risk
- Utilize a variety of resources to stay up to date with advances in genetic based health care
- Determine when patient referral to a genetic professional is required
- Utilize a variety of resources to provide patients and their families with support mechanisms

- Interpret genetic research findings

Admission Criteria

- Healthcare worker with a Bachelor's or Master's degree (from ACEN, NLN, or CCNE accredited program)
- GPA \geq 3.0 in the Bachelor's or Master's degree
- Pre-admission interview
- Complete online application
- *International applicants: see <https://www.nursing.pitt.edu/admissions/international-applicants> and www.ois.pitt.edu*
- Fall, Spring, and Summer Term admission

Admission of International Applicants

Applications from international students are reviewed according to the admission criteria stated above, and admissions deadlines for all programs are available online. The online application must be completed in English. See the School of Nursing International Applicants page for specific admission requirements.

Curriculum

- Electives (per approval of Coordinator) - **9 cr.**
- NUR 2682 - HUMAN GENETICS AND CLINICAL APPLICATIONS
OR
- NUR 2682D - HUMAN GENETICS AND CLINICAL APPLICATIONS
- NUR 2681 - ADV TOPICS IN HUMAN GENETICS

Total Credits: 15

Neonatal Nurse Practitioner Certificate

The Neonatal Nurse Practitioner (NNP) Post-Professional Certificate is designed for graduate prepared nurse practitioners who are seeking to expand their roles via nurse practitioner certification in neonatal critical care. The NNP is prepared to manage the health care of high-risk infants, within families and children up to 2 years of age. This expanded role is performed in collaboration with neonatologists and other pediatric clinicians. NNPs are primarily employed in neonatal intensive care units (NICUs) and are involved in coordinating and managing care for infants with chronic health problems and providing continuity for these children from hospital to home.

The NNP curriculum provides students with course work and clinical experiences focusing on the care and management of critically ill and convalescent premature and full-term infants. The sequence of courses provides for a logical building of the clinical decision-making skills necessary to function as a neonatal nurse practitioner. Clinical experiences may be in a variety of clinical settings, which include newborn nurseries, intensive care units of various levels, and out-patient clinics.

Graduates are prepared to perform acts of medical diagnosis and prescribe medical therapeutics and corrective measures. In addition, the NNP selects and performs clinically advanced diagnostic and therapeutic invasive procedures on newborns in the intensive care setting.

Graduates are eligible for both legal certification as a Certified Registered Nurse Practitioner (CRNP) and prescriptive authority by the Commonwealth of Pennsylvania as well as other states and national professional certification as an NNP offered by the National Certification Corporation.

Curriculum Format

- Full time or part time (length depends on prior academic preparation)
- 660 clinical hours (neonatal-specific)

Program Outcomes

Graduates of the Post-Professional NNP area of concentration are prepared to accomplish the following:

- Assume responsibility for promoting, maintaining, and restoring health to infants from the newborn period up to 2 years of age
- Identify health risks, promote wellness, and diagnose and manage acute and chronic illness
- Participate in quality improvement projects and provide leadership in mobilizing health care resources in the community

Admission Criteria

- Valid registered nurse license in US State/Territory or location where clinical experiences are performed
- BSN required
- MSN or DNP preparation as a nurse practitioner (from ACEN, NLN, or CCNE accredited program)
- GPA \geq 3.0 in the MSN or DNP degree
- Equivalent of 2 years full-time, recent (within past 5 years) practice experience as a registered nurse in the care of critically ill newborns, infants or children in critical inpatient settings, primarily in Level III or IV NICU. Applicants must have acquired this experience or be currently employed in the indicated settings.
- Pre-admission interview
- Complete online application
- *International applicants: see <https://www.nursing.pitt.edu/admissions/international-applicants> and www.ois.pitt.edu*

Admission of International Applicants

Applications from international students are reviewed according to the admission criteria stated above, and admissions deadlines for all programs are available online. The online application must be completed in English. See the School of Nursing International Applicants page for specific admission requirements.

Curriculum

- NURNP 2570 - COMPREHENSIVE NEONATAL ASSESSMENT THEORY
 - NURNP 2571 - GENERAL MANAGEMENT OF THE SICK NEONATE - THEORY
 - NURNP 2572 - GENERAL ASSESSMENT AND MANAGEMENT OF THE SICK NEONATE - CLINICAL
 - NURNP 2028 - ROLE PRACTICUM
 - NURNP 2573 - NEONATAL DISEASE PROCESS 1 - THEORY
 - NURNP 2574 - NEONATAL DISEASE PROCESS 2 - THEORY
- NNP Clinical Specialty Comprehensive Exam is required.

Total Credits: 25 (minimum)**

**Additional coursework may be required depending upon previous education.

Nursing Education Certificate

The Post-Professional Certificate in Nursing Education combines didactic courses and two field-based practica in clinical and academic settings aligned with the student's interest. The online curriculum prepares students to apply instructional theory and research in the following types of educational settings and roles: schools of nursing, health care agency staff development, continuing education departments, advanced practice nursing and patient and community education agencies. The certificate involves the completion of 10 credits of coursework. The Nursing Education certificate is available to nurses with an MSN, DNP, or PhD.

Upon completion of the certificate, graduates with a valid RN license may be eligible to take the Certified Nurse Educator (CNE) Exam offered by the National League of Nursing (NLN). (Note: visit the NLN website for eligibility requirements).

Curriculum Format

- Part-time (~ 3-4 terms)
- 10 Credits (150 Practicum Hours)
- Online
- Three of the four required courses are to be completed in sequence and are offered once a year (NUR 3293 in Spring, NUR 2084 in Summer, and NUR 2183 in Fall); and NURSP 2093 in Spring term.
- Practica are arranged based on student's needs.
- Applicants must have the curriculum plan approved by the Nursing Education program coordinator.

Program Outcomes

Graduates of the Post-Professional Certificate in Nursing Education are prepared to:

- design current, progressive nursing education programs using research and theories of learning instruction, curriculum, evaluation, and measurement.
- utilize a variety of teaching strategies and media appropriate to learner characteristics, instructional objectives, and nursing or health-related content.
- plan the learning activities of individuals and groups of students in clinical and didactic settings.
- guide the performance of learners in settings where nurses function as educators for nurse colleagues, students, patients, families, and communities.
- apply principles of measurement and evaluation to the development of learner assessment procedures for didactic and educational instruction.
- utilize computer technology and educational informatics as integral components of nursing education and training.
- articulate the role of the nurse educator within the health professions, schools of nursing, and community.
- perform the role of education consultant in settings where nurses, patients, families, and communities participate in education activities.

Admission Criteria

- Valid registered nurse license in US State/Territory or location where clinical experiences are performed
- MSN, DNP, or PhD degree (from ACEN, NLN, or CCNE accredited program)
- GPA \geq 3.0 in the MSN, DNP, or PhD degree
- Pre-admission interview with program coordinator
- Complete online application
- *International applicants: see <https://www.nursing.pitt.edu/admissions/international-applicants> and www.ois.pitt.edu*

- Fall or Spring Term admission

Admission of International Applicants

Applications from international students are reviewed according to the admission criteria stated above, and admissions deadlines for all programs are available online. The online application must be completed in English. See the School of Nursing International Applicants page for specific admission requirements.

Curriculum

- NURSP 2093 - EDUCATION AND MENTORING IN THE CLINICAL SETTING
Spring - 3 credits; 60 hours clinical
- NUR 3293 - ART AND SCIENCE OF TEACHING AND LEARNING
Spring - 2 credits
- NUR 2084 - MEASUREMENT AND EVALUATION IN TEACHING
Summer - 2 credits
- NUR 2183 - PRACTICUM: TEACHING IN ACADEMIC SETTINGS
Fall - 3 credits Fall; 90 hours clinical

Total Credits: 10

Nursing Informatics Certificate

The Post-Professional Certificate in Nursing Informatics is a combination of cognitive science, computer science, information science, and nursing science. It includes the development, analysis, and evaluation of information systems that support, enhance, and manage patient care. Informatics nurses are involved in practice, education, research, administration, and consultation and can work in public, private, or corporate settings. Career opportunities for graduates of this specialty are numerous.

The curriculum includes course work in introduction to informatics, clinical information systems, and project management. Practica are designed to enhance the students' knowledge and skill set through active participation in a selected informatics role.

Curriculum Format

- Part-time (~ 4 terms)
- 240 practicum hours (minimum)
- 15 course credits
- Online

Program Outcomes

Graduates of the Post-Professional Certificate in Nursing Informatics are prepared to:

- Analyze clinical information systems for adoption by healthcare systems
- Manage projects in a multidisciplinary integrated healthcare informatics environment
- Consult with companies in the design of healthcare information systems

- Plan and develop informatics applications for telehealth, consumer health, and community-based care

Admission Criteria

- Valid registered nurse license in US State/Territory or location where clinical experiences are performed
- MSN, DNP or higher nursing degree (from ACEN, NLN, or CCNE accredited program)
- GPA \geq 3.0 in the MSN, DNP or higher nursing degree
- Satisfactory resume
- Pre-admission interview
- Complete online application
- *International applicants: see <https://www.nursing.pitt.edu/admissions/international-applicants> and www.ois.pitt.edu*
- Fall term admission

Admission of International Applicants

Applications from international students are reviewed according to the admission criteria stated above, and admissions deadlines for all programs are available online. The on-line application must be completed in English. See the School of Nursing International Applicants page for specific admission requirements for international applicants.

Curriculum

- NURSP 2075 - INTRODUCTION TO HEALTH INFORMATICS
- NURSP 2076 - CLINICAL INFORMATION SYSTEMS
- NURSP 2070 - INFORMATION TECHNOLOGY PROJECT MANAGEMENT
- NURSP 2085 - NURSING INFORMTCS PRACTICUM 1
- NURSP 2086 - NURSING INFORMTCS PRACTICUM 2

Total Credits: 15

Pediatric Acute Care Nurse Practitioner Certificate

This non-degree certificate is designed for nurses with previous Master's or Doctor of Nursing Practice preparation as another type of nurse practitioner who are seeking to expand their role by certification in Pediatric Nurse Practitioner Acute Care (PNP-AC). The Pediatric Acute Care Nurse Practitioner Post-graduate Certificate is designed for MSN- or DNP-prepared nurse practitioners who want to obtain the education necessary to be eligible to take the certification exam to become a certified pediatric acute care nurse practitioner (CPNP-AC).

PNP-ACs are prepared to provide quality health care to acutely, critically, and chronically ill children, birth through emerging adulthood, and their families. They work in collaboration with other health care professionals, most often in inpatient pediatric settings as well as pediatric emergency rooms and in specialty outpatient clinics. The sequence of courses in the program provides for a logical building of the clinical decision-making skills necessary to function as a PNP-AC. Clinical experiences may be in a variety of general or specialty pediatric acute care settings.

Graduates are eligible for national certification offered by the Pediatric Nursing Certification Board (PNCB) and legal certification as a CRNP and prescriptive authority through the State Board of Nursing of the Commonwealth of Pennsylvania or by the Board of Nursing in the student's state of employment.

Curriculum Format

- Full time or part time
- A minimum of 500 clinical hours (600 clinical hours are recommended by the PNCB)
- Onsite
- Clinical placements will be provided by the program

Program Outcomes

Graduates of the Pediatric Acute Care Nurse Practitioner Post-graduate Certificate are prepared to accomplish the following:

- Assume responsibility for promoting, maintaining, and restoring health to acutely ill, critically ill, and complex chronically ill pediatric patients
- Identify health risks, promote wellness, and diagnose and manage acute and chronic illness
- Participate in quality improvement projects and provide leadership for interprofessional health care teams

Admission Criteria

- Valid registered nurse license in US State/Territory or location where clinical experiences are performed
- BSN required
- MSN or DNP preparation as a nurse practitioner (from ACEN, NLN, or CCNE accredited program)
- GPA \geq 3.0 in the MSN or DNP program
- Minimum of one year nursing experience recommended
- Pre-admission interview
- Complete online application
- *International applicants: see <https://www.nursing.pitt.edu/admissions/international-applicants> and www.ois.pitt.edu*

Admission of International Applicants

Applications from international students are reviewed according to the admission criteria stated above, and admissions deadlines for all programs are available online. The on-line application must be completed in English. See the School of Nursing International Applicants page for specific admission requirements for international applicants.

Full-Time Curriculum

Spring

- NURNP 2531 - PEDIATRIC ACUTE CARE 1
OR
- NURNP 2531D - PEDIATRIC ACUTE CARE 1
- NURNP 2533 - MANAGEMENT: PEDIATRIC ACUTE CARE CLINICAL 1
- NUR 2682 - HUMAN GENETICS AND CLINICAL APPLICATIONS
OR
- NUR 2682D - HUMAN GENETICS AND CLINICAL APPLICATIONS
- NURNP 2028 - ROLE PRACTICUM

Summer

- NURNP 2532 - PEDIATRIC ACUTE CARE 2
OR
- NURNP 2532D - PEDIATRIC ACUTE CARE 2
- NURNP 2534 - MANAGEMENT: PEDIATRIC ACUTE CARE CLINICAL 2
- NURNP 2028 - ROLE PRACTICUM

Notes:

The Pediatric Acute Care Nurse Practitioner Clinical Specialty Comprehensive Exam is required.

Additional coursework may be required depending upon previous education.

Total Credits: 18-21

*Courses with a "D" can be delivered synchronously via distance technology for qualified onsite students as per Policy 438.

Psychiatric Mental Health Nurse Practitioner Certificate

The Psychiatric Mental Health Nurse Practitioner Post-Professional Certificate is designed for graduate prepared Nurse Practitioners (NP) or Clinical Nurse Specialists (CNS) who are seeking to expand their roles via nurse practitioner certification in Psychiatric Mental Health care.

The curriculum includes foundational and psychiatric care content providing students with the advanced practice skills to effectively manage persons with psychiatric disorders across the lifespan. Emphasis is placed on psychobiologic diagnosis and treatment, including psychotherapies for these individuals and their families to promote mental health and prevent subsequent mental disorders.

Clinical experiences are designed so that students provide comprehensive management to psychiatric clients with mental illness in intensive and varied clinical experiences. Culminating clinical management practice provides students with the opportunity to synthesize and integrate concepts from primary health care with their psychiatric knowledge base.

Graduates are eligible for national certification offered by the American Nurses Credentialing Center (ANCC) and legal certification as a CRNP and prescriptive authority through the State Board of Nursing of the Commonwealth of Pennsylvania or by the Board of Nursing in the student's US State/Territory or location of employment.

Curriculum Format

- Full-time or part-time (length depends on prior academic preparation)
- 640 clinical hours (length depends on prior academic preparation)

Program Outcomes

Graduates of the PMHNP are prepared to accomplish the following:

- Provide comprehensive care to psychiatric clients
- Conduct psychotherapies for psychiatric clients and their families

Admission Criteria

- Valid registered nurse license (all students must obtain a Pennsylvania license)
- Previous MS or MSN as a NP or CNS (from accredited program (ACEN, NLN, or CCNE)
- GPA \geq 3.0 in the MS or MSN degree
- Minimum of one year nursing experience recommended
- Prerequisite statistics course (within 10 years) with a grade of B- or higher
- Pre-admission interview
- Complete online application
- *International applicants: see <https://www.nursing.pitt.edu/admissions/international-applicants> and www.ois.pitt.edu*
- Rolling admissions

Admission of International Applicants

Applications from international students are reviewed according to the admission criteria stated above, and admissions deadlines for all programs are available online. The on-line application must be completed in English. See the School of Nursing International Applicants page for specific admission requirements for international applicants.

Curriculum

Fall Term (YR 1)

- NURNP 2026 - ROLE SEMINAR 1
OR

School Nurse PK-12 Certificate

Currently in Pennsylvania, completion of an approved **School Nurse PK- 12 Certificate** program is required to practice as a school nurse. The School Nurse PK-12 Certificate fulfills the educational requirements for the School Nurse Certificate (Education Specialist 1) issued by the PA Department of Education (PDE).

This online School Nurse PK-12 Certificate from the School of Nursing, a 15-credit (three-term) curriculum, is designed for graduates of BSN programs and students and/or graduates of MSN, DNP, or PhD programs. This program will prepare registered nurses to meet the health needs of children of all ages in diverse school settings. The curriculum includes a School Nurse Seminar course that covers the true essentials of school nursing, taught by a certified school nurse. Practica are completed in diverse elementary and secondary school settings and include special needs students. Three nurse practitioner courses enhance students' knowledge of health promotion and disease prevention in culturally diverse populations and their skills in working with psychiatric conditions.

Upon completion of the School Nurse PK-12 Certificate curriculum, you will be eligible to apply for the School Nurse PK-12 Certificate (Education Specialist 1) issued by the Pennsylvania Department of Education (PDE). In addition to meeting PDE educational requirements, Pennsylvania requires certified school nurses to have a BSN and a valid RN license. (Visit education.pa.gov or your home state's Board of Nursing website for state-specific requirements.)

Curriculum Format

- Part time (3 terms)
- 15 credits (includes 120 practicum hours with a Certified School Nurse)
- Online

Program Outcomes

Graduates of the School Nurse PK-12 Certificate will be prepared to:

- Apply nursing knowledge, skills, and abilities in the care of school age children in diverse elementary and secondary school settings.
- This program will help prepare school nurses who in the future may decide to take the National Certification Examination for School Nurses (NCSN). You must have completed 1000 hours working as a school nurse. This test is administered by the National Board for Certification of School Nurses (NBCSN).

Admission Criteria

- Valid registered nurse license in US State/Territory or location where clinical experiences are performed
- BSN or higher nursing degree (from an ACEN, CCNE, or NLN accredited program)
- GPA \geq 3.0 in the BSN or higher nursing degree
- Pre-admission interview
- Satisfactory resume
- Current Criminal Record Clearance (ACT 34 and ACT 73)
- Current Pennsylvania Child Abuse History Clearance (ACT 33)
- Complete online application
- *International applicants: see <https://www.nursing.pitt.edu/admissions/international-applicants> and www.ois.pitt.edu*
- Fall, Spring, and Summer term admission

Admission of International Applicants

Applications from international students are reviewed according to the admission criteria stated above, and admissions deadlines for all programs are available online. The on-line application must be completed in English. See the School of Nursing International Applicants page for specific admission requirements for international applicants.

Curriculum

Fall Term

- NUR 2176 - SEMINAR SCHOOL NURSE
- NUR 2179 - PRACTICUM SCHOOL NURSE

Spring Term

- NUR 2174 - LEADERSHIP IN SCHOOL NURSING

- NUR 2010 - HEALTH PROMOTION AND DISEASE PREVENTION IN CULTURALLY DIVERSE POPULATIONS
OR

- NUR 3120 - DIVERSITY, EQUITY, AND INCLUSION IN HEALTHCARE

Summer Term

- NURNP 3025 - DIAGNOSIS AND MANAGEMENT OF PSYCHIATRIC CONDITIONS IN PRIMARY CARE
OR
- NURNP 3025D - DIAGNOSIS AND MANAGEMENT OF PSYCHIATRIC CONDITIONS IN PRIMARY CARE

Total Credits: 15

*Courses with a "D" can be delivered synchronously via distance technology for qualified onsite students as per Policy 438.

Doctoral

Adult-Gerontology Acute Care Nurse Practitioner BSN to DNP Concentration

The Adult-Gerontology Acute Care Nurse Practitioner (AG-ACNP) is prepared as a generalist, principal provider of care to adults and older adults with acute, critical, and complex chronic health conditions. AG-ACNP students select a clinical emphasis for directed study. The directed study clinical emphasis allows the student to design a clinical around a particular area of interest (i.e., internal medicine, general surgery). The AG-ACNP is prepared to assume responsibility for promoting, maintaining, and restoring health to adults and older adults who are acutely, critically, and complex chronically ill. The AG-ACNP also participates in research and provides leadership in mobilizing health services.

Students may study full time or part time. The BSN to DNP curriculum is only offered onsite on the main campus in Pittsburgh. Selected core courses may be transmitted to students who live a distance from campus. A sample program plan for full-time study is provided below.

The AG-ACNP graduate is eligible for state certification as a Certified Registered Nurse Practitioner (CRNP) by the State Board of Nurse Examiners of the Commonwealth of Pennsylvania or by the Board of Nursing in the student's US State/Territory or location of employment. Certification requires successful completion of a national nurse practitioner certification exam in Adult-Gerontology Acute Care offered by either the American Nurses Credentialing Center (ANCC) or the American Association of Critical Care Nurses (AACN).

Total Credits: 79

Adult-Gerontology Acute Care Nurse Practitioner MSN to DNP Concentration

The Adult-Gerontology Acute Care Nurse Practitioner (AG-ACNP) DNP Program is designed for MSN-prepared AG-ACNPs who want to obtain a practice-focused doctorate. Throughout the program AG-ACNP students develop the clinical, organizational, economic, and leadership skills to design and implement programs of care delivery that significantly impact health care outcomes and have the potential to transform health care. Graduates with this terminal practice degree are prepared for roles in direct care.

The MSN to DNP curriculum can be completed onsite or online, either full time or part time. A sample program plan for full-time onsite study is provided below. Depending on courses completed during the previous MSN program, additional coursework may be required. Students must complete a total of 72 credits between their prior MSN program and the current DNP curriculum, and a minimum of 1000 clinical hours between the prior MSN program and the current DNP curriculum.

*Courses with a "D" are delivered synchronously via distance technology for qualified onsite students as per Policy 438.

Adult-Gerontology CNS BSN to DNP Major

The Adult-Gerontology (CNS) major prepares nurses as expert providers of care to patients/families across the continuum of healthcare services (from wellness through acute care). The CNS functions as a developer and manager of programs of care for populations of patients; as a mentor who provides support to nurses caring for patients at the bedside; as a leader of multidisciplinary groups driving change throughout the organization; and as a developer of evidence-based projects to ensure best patient outcomes.

CNS students choose a clinical emphasis of choice to focus their studies such as: general medicine or surgery, cardiopulmonary, critical care, oncology, or trauma and emergency preparedness (TEP). Students may study full time or part time. The BSN to DNP curriculum is only offered onsite on the main campus in Pittsburgh. Selected core courses may be transmitted to students who live a distance from campus. A sample program plan for full-time study is provided below. A minimum of 1000 clinical hours is included.

Graduates are eligible for national certification by the American Nurses Credentialing Center (ANCC) or the American Association of Critical Care Nurses (AACN).

*Courses with a "D" are delivered synchronously via distance technology for qualified onsite students as per Policy 438.

Adult-Gerontology CNS MSN to DNP Major

The Adult-Gerontology CNS MSN to DNP major is offered onsite or online. Applicants with MSN (CNL, Education, General) will be evaluated for online eligibility.

The Adult-Gerontology CNS major is designed for MSN-prepared AG-CNSs who want to obtain a practice-focused doctorate. The MSN-DNP program builds upon the role of the CNS by further developing one's clinical, organizational, economic, and leadership skills to facilitate the design and implementation of programs of care that significantly impact patient and health care outcomes and have the potential to transform health care.

This program can be completed onsite or online, either full time or part time. Selected core courses may be transmitted to eligible students who live a distance from campus. A sample program plan for full-time study is provided below. Depending on courses completed during the previous MSN program, additional coursework may be required. Students must complete a total of 72 credits between their prior MSN program and the current DNP curriculum and a minimum of 1000 clinical hours between the prior MSN program and the current DNP curriculum.

Graduates are eligible for national certification by the American Nurses Credentialing Center (ANCC) or the American Association of Critical Care Nurses (AACN).

Two components of the DNP Comprehensive Exam are required (DNP Scholarly Project and DNP Portfolio). Clinical Specialty Comprehensive Exam is required if original degree is not as a CNS.

Total Credits: 34-39

*Courses with a "D" are delivered synchronously via distance education for qualified onsite students per Policy 438.

Adult-Gerontology Primary Care Nurse Practitioner BSN to DNP Concentration

The Adult-Gerontology Primary Care Nurse Practitioner (AG-PCNP) is prepared as a generalist, principal provider of primary health care for adolescents through the adult lifespan. In this clinician leadership role, the AG-PCNP assumes responsibility for promoting, maintaining, and restoring health, including the identification of health risks, the promotion of wellness, and the diagnosis and management of acute and chronic illness. AG-PCNPs also participate in research and provide leadership in mobilizing community resources. They are prepared to work in collaboration with other health care professionals in a variety of primary care and subspecialty settings.

The AG-PCNP area of concentration offers post-BSN to DNP preparation with an emphasis on chronic conditions, multi-morbidity, and internal medicine. Students may study full time or part time. The BSN to DNP curriculum is only offered onsite on the main campus in Pittsburgh. Selected core courses may be transmitted to eligible students who live a distance from campus. A sample program plan for full-time study is provided below.

Graduates of the BSN to DNP are eligible for national certification offered by the American Nurses Credentialing Center (ANCC) or the American Academy of Nurse Practitioners Certification Board (AANPCB) and legal certification as a Certified Registered Nurse Practitioner (CRNP) and prescriptive authority through the State Board of Nursing of the Commonwealth of Pennsylvania or by the Board of Nursing in the student's US State/Territory or location of employment.

Total Clinical Credits: 17

Total Credits: 88

Adult-Gerontology Primary Care Nurse Practitioner MSN to DNP Concentration

The Adult-Gerontology Primary Care Nurse Practitioner (AG-PCNP) is prepared as a generalist, principal provider of primary health care for adolescents through the adult lifespan. In this clinician leadership role, the AG-PCNP assumes responsibility for promoting, maintaining, and restoring health, including the identification of health risks, the promotion of wellness, and the diagnosis and management of acute and chronic illness. AG-PCNPs also participate in quality improvement and provide leadership in mobilizing community resources. They are prepared to work in collaboration with other health care professionals in a variety of primary care and subspecialty settings.

Applicants to the MSN to DNP AG-PCNP area of concentration should be MSN-prepared adult, gerontology, or adult-gerontology NPs who are nationally certified and wish to earn the DNP. Students may study full time or part time. The MSN to DNP curriculum is offered both online and onsite. A sample program plan for full-time online study is

provided below. Depending on courses completed during the previous MSN program, additional coursework may be required.

Family Individual Across the Lifespan Nurse Practitioner BSN to DNP Concentration

The Family (Individual Across the Lifespan) Nurse Practitioner (FNP) Doctor of Nursing Practice (DNP) is prepared as a generalist, principal provider of primary health care across the lifespan. In this DNP clinician leadership role, the FNP assumes responsibility for promoting, maintaining, and restoring health to individuals across the life span from newborn through elder years. This role includes the identification of health risks, the promotion of wellness, the diagnosis and management of acute and chronic illness, and referral to specialty services as needed. Our FNP DNP graduates provide leadership in quality improvement, case management, and mobilization of community resources. They work in collaboration with other health care professionals in a variety of primary care and subspecialty settings.

Students may study full time or part time. The BSN to DNP is offered only onsite on the main campus in Pittsburgh. Selected core courses may be transmitted to eligible students who live a distance from campus. A sample program plan for full-time study is provided below.

BSN to DNP graduates are eligible for national certification offered by the American Nurses Credentialing Center (ANCC) or the American Academy of Nurse Practitioners Certification Board (AANPCB) and for licensure as a CRNP and prescriptive authority through State Boards of Nursing.

Family Individual Across the Lifespan Nurse Practitioner MSN to DNP Concentration

The Family (Individual Across the Lifespan) Nurse Practitioner (FNP) Doctor of Nursing Practice (DNP) area of concentration offers post-MSN to DNP preparation for individuals with master's preparation as an FNP. The FNP is prepared as a generalist, principal provider of primary health care across the lifespan from newborn through elder years. In this DNP clinician leadership role, the FNP assumes responsibility for promoting, maintaining, and restoring health to individuals across the life span. This role includes the identification of health risks, the promotion of wellness, and the diagnosis and management of acute and chronic illness, and referral to specialty services as needed. FNP DNP graduates provide leadership in quality improvement, case management, and mobilization of community resources. The FNP works in collaboration with other health care professionals in a variety of primary care and subspecialty settings.

Students may study full time or part time. The MSN to FNP DNP is offered both onsite and online. Selected core courses may be transmitted to eligible students who live a distance from campus. A sample program plan for full-time study is provided below. Depending on courses completed during the previous MSN program, additional coursework may be required.

Applicants should be MSN-prepared nationally certified FNPs who wish to earn the DNP. Only those with a master's degree in the same focus may choose the online option.

Total Credits: 41

*Courses with a "D" are delivered synchronously via distance technology for qualified onsite students as per Policy 438.

***Must take at least 1 credit.

Total Credits (41 credits + NURNP 3038)

Total Didactic Hours - 600 hours (40 credits)

Total Clinical Hours - 120 (from 2 required credits, 1 credit NURNP 3038 and 1 credit NUR 3037) plus NP MSN clinical hours up to 700 + NURNP 3038 sufficient to total 1,000 clinical hours.

Additional coursework may be required depending upon previous education. Post-master's NP DNP students must earn a minimum of 36 new credits, enroll for a minimum of three terms, and complete graduate academic credits for 1000 clinical hours including hours completed during their MSN program.

Health Systems Executive Leadership MSN to DNP Major

The DNP Health Systems Executive Leadership (HSEL) curriculum is designed to accommodate students who have completed their MSN or their BSN with a master's degree in a related field.

This post-MSN program is designed for students with at least two years of management experience preferred. Coursework can be completed on a full-time or part-time basis. This program is fully online and does not require onsite participation. The DNP HSEL curriculum focuses on the knowledge and skills needed to lead complex clinical environments including:

- Understanding organizational behavior
- Implementing evidence-based management, practice, and quality improvement
- Integrating leadership in complex systems
- Utilizing principles of finance and healthcare economics
- Facilitating health policy
- Incorporating data analytics and population health into clinical systems design

Students complete a leadership practicum or residency with a senior-level mentor. The DNP HSEL student completes a DNP project focused on a system-level practice change. The DNP project is a rigorous investigation of a clinical concern or issue that results in the translation of evidence into practice. The DNP project should result in a new or expanded area of expertise for the student and serve as a foundation for future scholarship and practice.

A sample program plan for full-time study is provided below. Credits may be divided across additional semesters if more appropriate for the student. Depending on courses completed during the previous MSN program, additional coursework may be required.

Neonatal Nurse Practitioner BSN to DNP Concentration

The Neonatal Nurse Practitioner (NNP) is prepared to manage the health care of high-risk infants within families and children up to 2 years of age. This expanded clinician role is performed in collaboration with neonatologists and other pediatric clinicians. Graduates assume leadership roles in a variety of clinical settings including intensive care nurseries of various levels, newborn nurseries, and high-risk follow-up clinics. Course work and clinical experiences focus on the care and management of critically ill and convalescent premature and full-term infants. Graduates select and perform diagnostic and therapeutic invasive procedures on newborns in the intensive care setting and are prepared to participate in quality improvement projects.

Students may study full time or part time. The BSN to DNP curriculum is only offered onsite on the main campus in Pittsburgh. Selected core courses may be transmitted to eligible students who live a distance from campus. A sample program plan for full-time study is provided below.

Graduates are eligible for national certification offered by the National Certification Corporation and for legal certification as a CRNP and prescriptive authority through the State Board of Nursing of the Commonwealth of Pennsylvania and other states.

Neonatal Nurse Practitioner MSN to DNP Concentration

The Neonatal Nurse Practitioner (NNP) is prepared to manage the health care of high-risk infants within families and children up to 2 years of age. This expanded clinician role is performed in collaboration with neonatologists and other pediatric clinicians. Graduates assume leadership roles in a variety of clinical settings including intensive care nurseries of various levels, newborn nurseries, and high-risk follow-up clinics. Course work and clinical experiences focus on the care and management of critically ill and convalescent premature and full-term infants. Graduates select and perform

diagnostic and therapeutic invasive procedures on newborns in the intensive care setting and are prepared to participate in quality improvement projects.

The NNP area of concentration offers post-master's to DNP preparation to those applicants who already are master's prepared nationally certified NNPs. Students may study full time or part time. The MSN to DNP curriculum is offered onsite on the main campus in Pittsburgh or online. The online option is only available to applicants with a master's degree in same focus. Selected core courses may be transmitted to eligible students who live a distance from campus. A sample program plan for full-time study is provided below.

Nurse Anesthesia BSN to DNP Major

The University of Pittsburgh Nurse Anesthesia BSN to DNP Degree Program prepares registered nurses for entry into anesthesia practice. Through an integrated program of classroom and clinical instruction, students develop the didactic knowledge base and clinical skills necessary for safe and effective practice. Graduates are prepared to administer a full range of anesthetics to a wide variety of patients across the life span.

Students progress through a series of structured and scaffolded classroom and laboratory learning activities prior to embarking upon clinical learning experiences. Students rotate through numerous clinical sites in Pittsburgh and around the region including the UPMC hospitals, which are nationally known for surgical innovation, trauma medicine, organ transplantation, evidence-based anesthesia practice, research, and biomedical technology. Rotations include specialized experiences in cardiothoracic, neurosurgical, dental, regional anesthesia, organ transplantation, pediatrics, obstetrics, burns, and pain management. An array of additional clinical opportunities in community environments and other unique settings help to enrich the curriculum and prepare the graduate for the full scope of anesthesia practice. Upon completion, graduates are well-prepared to safely manage simple-to-extremely complex patients across the lifespan.

Nurse Anesthesia Curriculum

The nurse anesthesia program doctoral curriculum is offered in a full-time format over 36 months (9 terms) and classes begin each January. The curriculum consists of 84.5 credits (class and clinical). After the first two terms, the curriculum design integrates classroom and clinical experiences. The curriculum consists of 42 core credits and 42.5 anesthesia specialty credits.

Clinical practice begins as two days/week in the third term and increases in both frequency and intensity throughout the course of study. Course work in the final year includes completion of the DNP scholarly project and preparation for the DNP Program Comprehensive Examination, the specialty area Comprehensive Exam, the NBCRNA Self Evaluation Exam, and the National Certification Examination. Anesthesia classes are typically held during daylight hours and students with core courses scheduled both during the daylight and evening hours. In either case, student clinical schedules will be adjusted accordingly to maximize success.

Candidates who have been accepted for admission are assigned a faculty advisor and can discuss enrolling in approved DNP core courses prior to entering the full-time curriculum. This allows the student to lessen future academic requirements within the full-time program. (Note: We recommend meeting with a counselor from the Office of Financial Aid in order to review the financial aid implications of taking coursework prior to the full-time start.)

- NURSAN 3807 - TRANSITION TO CLINICAL PRACTICE

Total Credits: 84.5

Nurse Anesthesia MSN to DNP Major

This online, practice-focused 36 credit doctoral program will prepare nursing leaders for the highest level of clinical nursing practice beyond the initial preparation in the discipline. Applicants will be CRNAs with a master's degree. Throughout the program students will develop clinical, organizational, economic, and leadership skills. Specialty focused and core courses of the University of Pittsburgh School of Nursing Nurse Anesthesia Program MSN to DNP curriculum will focus on evidence-based practice, organizational and systems leadership, informatics, health care policy and finance, patient safety and population health, interprofessional collaboration for improving patient and population health outcomes and genetics and molecular therapeutics.

Directed cognates may be used to expand upon the students' knowledge base within the DNP project focus area. The program will culminate in a DNP project that reflects the synthesis and application of knowledge gained throughout the curriculum. DNP project areas will include quality improvement project, program or practice evaluation, development and testing of an evidence-based clinical protocol, development of policy or legislative initiative, surveillance project, and simulation project.

A sample program plan for full-time study is provided below. Depending on courses completed during the previous MSN program, additional coursework may be required.

Nurse-Midwife, BSN to DNP

The University of Pittsburgh, School of Nursing is pleased to offer the Nurse-Midwife major within our nationally recognized DNP program. Nurse-midwives, part of the centuries-long tradition of midwifery, provide services to foster a supportive environment for clients and their families before, during, and after pregnancy, including wellness care. This major will prepare graduates to sit for the national certification examination in midwifery and to apply for licensure as a Certified Nurse-Midwife (CNM) from appropriate state boards. It achieved FULL accreditation status from the Accreditation Commission for Midwifery Education (ACME) in February 2022.

As a discipline, midwifery pre-dates hospitals; today, midwifery has evolved beyond caring for a woman during birth. CNMs provide routine prenatal and post-natal care, labor and birth care, newborn care, primary care, and sexual and reproductive health care. Nurse-midwives have secured satisfying and challenging employment in private practices, hospitals, birth centers, and health clinics. It is estimated that CNM-attended births account for 7% of all U.S. births in total. Of these births, approximately 97% occur in hospitals and 1.8% take place in freestanding birth centers. For more information about the profession, including salary and employment details, please visit the American College of Nurse-Midwives website.

The Nurse-Midwife DNP is a practice-focused doctoral program that prepares Certified Nurse-Midwives who will be leaders at the highest level of clinical practice. This major in Pitt Nursing's DNP program will enable graduates to attend births in home, birth centers, and hospital settings; provide clinical care within the full scope of midwifery practice; promote, maintain, and restore health while diagnosing and managing health problems for their clients and their families; participate in quality improvement efforts, and lead in mobilizing community health resources.

Pediatric Acute Care Nurse Practitioner MSN to DNP Concentration

The Pediatric Acute Care Nurse Practitioner (PNP-AC) DNP Program area of concentration is designed for Master of Science in Nursing (MSN)-prepared PNP-ACs who would like to obtain a practice-focused doctorate. PNP-AC students are prepared to provide quality health care to acutely, critically, and chronically ill children, from the newborn stage through emerging adulthood, and their families. Throughout the program, PNP-AC students develop the clinical, organizational, economic, and leadership skills to design and implement programs of care delivery that significantly impact health care outcomes and have the potential to transform health care. Graduates with this terminal practice degree are prepared for roles in direct care. PNP-ACs work in collaboration with other health care professionals.

Applicants should be MSN-prepared certified pediatric acute care nurse practitioners who wish to add the DNP to their educational preparation. The MSN to DNP is offered both onsite and online. The online option is only available to applicants with an MSN in the same focus.

Selected core courses may be transmitted to eligible students who live a distance from campus. A sample program plan for full-time study is provided below. Depending on courses completed during the previous MSN program, additional coursework may be required. Students must complete a minimum of 1000 clinical hours between the prior MSN program and the current DNP curriculum.

Pediatric Primary Care Nurse Practitioner BSN to DNP Concentration

The Pediatric Primary Care Nurse Practitioner (PNP-PC) is prepared as a generalist principal provider of primary health care to children, birth through emerging adulthood. In this leadership clinician role the Primary Care PNP assumes responsibility for promoting, maintaining, and restoring health in youth with emphasis on developmental and health assessment and the diagnosis and management of well, acutely ill, and chronically ill children, adolescents, and emerging adults in primary care and subspecialty settings. Clinical practice hours provide opportunity to deliver comprehensive care to pediatric patients in various supervised primary care and subspecialty settings. The PNP-PC leads quality improvement projects, provides leadership in educating families and communities about child health, and mobilizes community resources for the health and safety of children.

The PNP-PC area of concentration offers post-BSN to DNP and post-MSN to DNP preparation. Students may study full time or part time. The BSN to DNP is only offered onsite on the main campus in Pittsburgh. Selected core courses may be transmitted to eligible students who live a distance from campus. A sample program plan for full-time study is provided below.

BSN to DNP graduates are eligible for national certification offered by the Pediatric Nursing Certification Board (PCNB) and legal certification as a CRNP and prescriptive authority through the State Board of Nursing of the Commonwealth of Pennsylvania or by the Board of Nursing in the student's US State/Territory or location of employment.

- NUR 3052 - MANUSCRIPT DEVELOPMENT

OR

- NUR 3052D - MANUSCRIPT DEVELOPMENT
- NURNP 3038 - DNP NP ROLE PRACTICUM

The three components of the DNP Comprehensive Exam are required (DNP Scholarly Project, DNP Portfolio, and Clinical Comprehensive Exam).

Total Credits: 84

*Courses with a "D" are delivered synchronously via distance technology for qualified onsite students as per Policy 438.

Pediatric Primary Care Nurse Practitioner MSN to DNP Concentration

The Pediatric Primary Care Nurse Practitioner (PNP-PC) is prepared as a generalist principal provider of primary health care to children, birth through emerging adulthood. In this leadership clinician role, the Primary Care PNP assumes responsibility for promoting, maintaining, and restoring health in youth with emphasis on developmental and health assessment, and the diagnosis and management of well, acutely ill, and chronically ill children, adolescents and emerging adults in primary care and subspecialty settings. The PNP leads quality improvement, provides leadership in educating families and communities about child health, and mobilizes community resources for the health and safety of children. The PNP works in collaboration with other health care professionals.

Applicants should be master's-prepared primary care pediatric nurse practitioners who wish to add the DNP to their educational preparation. The PNP-PC program is offered both onsite and online. The online option is only available to applicants with a master's degree in the same focus. Selected core courses may be transmitted to eligible students who live a distance from campus. A sample program plan for full-time study is provided below. Depending on courses completed during the previous MSN program, additional coursework may be required.

Full-Time Curriculum

Fall Term (YR 1)

- NUR 3099 - THE SCIENCE OF HEALTH CARE DELIVERY
OR
- NUR 3099D - THE SCIENCE OF HEALTH CARE DELIVERY
- NUR 2011 - APPLIED STATISTICS FOR EVIDENCE-BASED PRACTICE

Spring Term (YR 2)

- NUR 3032 - DATA ANALYSIS FOR DNP PROJECTS
OR
- NUR 3032D - DATA ANALYSIS FOR DNP PROJECTS
- NUR 3037 - DNP PROJECT CLINICAL

Two components of the DNP Comprehensive Exam are required (DNP Scholarly Project and DNP Portfolio).

Total Credits: 40

*Courses with a "D" are delivered synchronously via distance technology for qualified onsite students as per Policy 438.

**Must take at least one credit.

PhD

- Nursing - BSN to PhD Track

- Nursing - Post-MSN to PhD Track

Psychiatric Mental Health Nurse Practitioner BSN to DNP Concentration

The psychiatric mental health nurse practitioner (PMHNP) concentration prepares principal nurse practitioners to who treat individuals with psychiatric disorders across the lifespan in a variety of settings. PMHNP students begin their plan of study in core courses that include content on physical diagnosis, health promotion, pharmacology, pathophysiology, and differential diagnosis. Psychiatric content directly builds on these core concepts to provide students with the advanced practice skills to effectively manage complex psychobiological problems of people across the lifespan.

PMHNP students prepared at the DNP level will be clinical experts with the organizational, economic, and leadership skills necessary to critique the literature, promote evidence-based practice, and design programs of care delivery that are functional, economically feasible, and significantly impact health care outcomes.

BSN to DNP graduates are eligible for national certification offered by the American Nurses Credentialing Center (ANCC) and legal certification as a CRNP and prescriptive authority through the State Board of Nursing of the Commonwealth of Pennsylvania or by the Board of Nursing in the student's US State/Territory or location of employment.

Total Credits 36-45

*Courses with a "D" are delivered synchronously via distance education for qualified onsite students per Policy 438.

Dual

Doctor of Nursing Practice (DNP) and Doctor of Philosophy (PhD) Dual Program

Your options for education in nursing research and practice don't end with a singular terminal degree. There is an increasing need for doctorally prepared nurses, and an especially crucial need for nursing scientists and nursing faculty.

The University of Pittsburgh School of Nursing offers a journey to get there, through the new dual degree Doctor of Nursing Practice/Doctor of Philosophy (DNP/PhD) program.

This program admits BSN-prepared nurses to simultaneously achieve their DNP and PhD degrees, from which they emerge as both advanced practice nurses and nurse researchers. Students graduate with two separate degrees, but 30 credits are shared between the two programs.

You will join as a dedicated, passionate nurse with a drive and desire to impact nursing research and how health care is delivered, and you will leave with a range of career opportunities available to you, including:

- Nursing faculty at a range of highly ranked universities
 - Nurse leaders of health systems and organizations
 - Advanced practice nurses who bring highly advanced skills in nursing research and clinical practice to their role
- At present, the dual DNP/PhD program is available in these areas of Doctor of Nursing Practice concentrations:

- Adult-Gerontology Clinical Nurse Specialist: <https://www.nursing.pitt.edu/programs/dnp/clinical-nurse-specialist>

The DNP/PhD Program admits BSN graduates to the BSN to DNP/PhD track. Applicants must satisfy the requirements for both PhD program and DNP program admission. The DNP/PhD program follows a **Fall Term Only Cohort Admissions** process. Applicants to the program must submit their completed applications by February 15 or May 1. Complete applications received by February 15 or May 1 will be reviewed and admission decisions made prior to June 1. Application decisions (except for international applicants) will be communicated by email. Applicants must apply online at NursingCAS.

Applications to the programs are reviewed in their entirety and appraised for evidence of intellectual inquisitiveness and rigor, and commitment and motivation for scholarship and the development of nursing science.

Interested applicants should contact the Student Affairs Office by calling 412-624-4586 or emailing sao50@pitt.edu for more information.

Curriculum

BSN-DNP/PhD for AG-CNS Concentration

Students are expected to enroll Full Time.

The BSN Track consists of a minimum of 121 credits (cr):

- 104 cr. of Didactic courses from the Nursing PhD and AG-CNS DNP Curriculum
- 17 cr. of Clinical Hours (1020 hours)

Fall Term (YR 1)

- NUR 3285 - PHILOSOPHICAL UNDERPINNINGS OF NURSING RESEARCH
- NUR 3291 - RESPONSIBILITIES AND ACTIVITIES OF SCIENTISTS 1
- NUR 3010 - PHD DISSERTATION
- NUR 3071 - PHD RESEARCH APPRENTICESHIP
- NUR 3112 - APPLIED PARAMETRIC AND NON-PARAMETRIC STATISTICS FOR THE HEALTH SCIENCES 1

Spring Term (YR 1)

- NUR 3113 - APPLIED PARAMETRIC AND NON-PARAMETRIC STATISTICS FOR THE HEALTH SCIENCES 2
- NUR 3286 - THEORETICAL FOUNDATIONS FOR RESEARCH

- NUR 3287 - RESEARCH DESIGN & METHODS
- NUR 3071 - PHD RESEARCH APPRENTICESHIP
- NUR 3010 - PHD DISSERTATION

Summer Term (YR 1)

- NUR 3114 - APPLIED REGRESSION FOR HEALTH SCIENCE RESEARCH
- NUR 3288 - RESEARCH MEASUREMENT
- NUR 3289 - INTERVENTION DEVELOPMENT
- NUR 3071 - PHD RESEARCH APPRENTICESHIP
- NUR 3010 - PHD DISSERTATION

Fall Term (YR 2)

- NUR 2010 - HEALTH PROMOTION AND DISEASE PREVENTION IN CULTURALLY DIVERSE POPULATIONS
- NUR 3099 - THE SCIENCE OF HEALTH CARE DELIVERY
- NUR 3290 - ADVANCED QUANTITATIVE ANALYTIC METHODS SEMINAR
- CLRES 2107 - COMPARATIVE EFFECTIVENESS RESEARCH AND PCOR
- CLRES 2120 - COST EFFCTVNS ANAL HLTH CARE
- NUR 3010 - PHD DISSERTATION

Spring Term (YR 2)

- NURSP 2098 - HEALTHCARE QUALITY
- NUR 2682 - HUMAN GENETICS AND CLINICAL APPLICATIONS
- NUR 3292 - RESPONSIBILITIES AND ACTIVITIES OF SCIENTISTS 2
- Clinical Research Cognate (CLRES)

Summer Term (YR 2)

- NUR 2034 - ADVANCED PHARMACOLOGY ACROSS THE LIFESPAN
- NUR 2031 - THE DIAGNOSTIC PHYSICAL EXAM ACROSS THE LIFE SPAN
- NUR 3031 - METHODOLOGIES FOR DNP PROJECTS
- NURCNS 2850 - CNS ROLE IMPLEMENTATION
- NUR 3010 - PHD DISSERTATION

Fall Term (YR 3)

- NUR 2033 - DIFFERENTIAL DIAGNOSIS THEORY ACROSS THE LIFE SPAN
- NURCNS 2851 - CNS CLINICAL PRACTICUM 1
- NUR 3010 - PHD DISSERTATION
- NURSP 2062 - ORGANIZATIONAL AND SYSTEMS MANAGEMENT FOR HEALTHCARE LEADERS

Spring Term (YR 3)

- NURNP 2100 - MANAGEMENT OF ADULT EPISODIC/CHRONIC HEALTH PROBLEMS IN ACUTE CARE THEORY
- NURCNS 2852 - CNS CLINICAL PRACTICUM 2
- NUR 3293 - ART AND SCIENCE OF TEACHING AND LEARNING
- NUR 3010 - PHD DISSERTATION
- NURSP 2099 - FINANCIAL, BUSINESS, AND ECONOMICS DRIVERS IN HEALTHCARE MANAGEMENT

Summer Term (YR 3)

- NURNP 2104 - MANAGEMENT OF COMPLEX HEALTH PROBLEMS OF THE ACUTELY AND CRITICALLY ILL ADULT
- NURSP 2388 - DATABASE MANAGEMENT
- NUR 3010 - PHD DISSERTATION
- NURSP 3096 - DATA ANALYTICS AND CLINICAL SYSTEMS DESIGN

Fall Term (YR 4)

- NURCNS 2853 - CLINICAL EMPHASIS SPECIALTY
- NURSP 2075 - INTRODUCTION TO HEALTH INFORMATICS
- NURCNS 3039 - DNP-CNS ROLE PRACTICUM
- NUR 3010 - PHD DISSERTATION

Spring Term (YR 4)

- NURCNS 3039 - DNP-CNS ROLE PRACTICUM
- NUR 3037 - DNP PROJECT CLINICAL
- NUR 3052 - MANUSCRIPT DEVELOPMENT
- NUR 3032 - DATA ANALYSIS FOR DNP PROJECTS
- NUR 3010 - PHD DISSERTATION

Optional Breakout

YR 04 OPTIONAL breakout for Full-Time Dissertation (FTDS). If so, insert last 2 Dissertation Credits scheduled for YR 04 into YR 03.

PhD MILESTONE ORAL DEFENSE IN SUMMER TERM. Clinical practice clerkship - 1 day per week

Total Credits: Minimum of 121 Credits

Preliminary and Comprehensive Examinations and Dissertation Overview

The preliminary examination is taken after completing the following required courses.

- NUR 3285 - PHILOSOPHICAL UNDERPINNINGS OF NURSING RESEARCH
- NUR 3286 - THEORETICAL FOUNDATIONS FOR RESEARCH
- NUR 3287 - RESEARCH DESIGN & METHODS
- and Statistics Courses

- NUR 3112 - APPLIED PARAMETRIC AND NON-PARAMETRIC STATISTICS FOR THE HEALTH SCIENCES

1

- NUR 3113 - APPLIED PARAMETRIC AND NON-PARAMETRIC STATISTICS FOR THE HEALTH SCIENCES

2

By following the established curriculum plan, all full-time students should sit for their Preliminary Examination in their third term of study. The examination is designed to assess the student's breadth of knowledge of the discipline of nursing and potential ability to apply research methods independently. Remediation work may be required if deficiencies are identified that may impede the student's success in program completion. See School of Nursing Policy 230.

The comprehensive examination assesses the student's mastery of the general field of doctoral study, acquisition of depth and breadth of knowledge in a focused area of study, and the ability to use the research methods of the discipline. The comprehensive examination is taken after completion of all required course work and concurrent with the dissertation overview. See School of Nursing Policy 235.

The dissertation overview requires the student to formulate a research plan and to justify the selected approach for studying the topic before the student's dissertation committee.

Dissertation Committee

Prior to the comprehensive examination and the dissertation overview, the student and research advisor propose, subject to approval by the director of the PhD program and the Dean, a committee of four or more members, one of whom must be from another school within the University and the majority of whom must be from the School of Nursing. A majority, including the major advisor, must also be full members of the Graduate Faculty of the University.

See Doctoral Committee under Regulations Pertaining to Doctoral Degrees of the University catalog.

Admission to Candidacy for the Doctor of Philosophy

Admission to candidacy for the Doctor of Philosophy degree constitutes a promotion of the student to the most advanced stage of graduate study and provides formal approval to devote essentially exclusive attention to the research and the writing of the dissertation. To qualify for admission to candidacy, students must be in full graduate status, have satisfied the requirement of the preliminary examination, have completed formal courses with a minimum grade point average of 3.00, have passed the comprehensive examination, and have received approval of the proposed dissertation research by the dissertation committee. Admission to candidacy is granted by the Dean.

Residency Requirement

Students seeking the PhD degree are required to engage in a minimum of one term of full-time doctoral study (nine credits), which excludes any other employment except as approved. The doctoral student must notify the PhD program director in writing the term that this occurs.

Dissertation and Abstract

The date and title of the dissertation defense must be submitted to the PhD program director one month prior to the final defense. *For definitions and detail on what constitutes an acceptable dissertation, please see Dissertation and Abstract under Regulations Pertaining to Doctoral Degrees of this catalog.*

Research Apprenticeship Model

The PhD program includes an apprenticeship model of research training that combines rigorous coursework and an apprenticeship with successful research mentors. This model includes a formalized series of Apprenticeship Practica (minimum of 6 credits under the direction of a research mentor), with recommended experiences and a series of defined deliverables. This experience allows for the opportunity to acquire individualized and tangible research skills within a mentored research application environment, which is additive to and precedes the dissertation experience

All mentors are experienced nurse researchers. During their apprenticeships, students acquire tangible skills in research methodology, grantsmanship, professional skills, the responsible conduct of research, and dissemination of research findings through publications and presentations. Students receive an intense and comprehensive research experience resulting in publications and pilot data to support applications for independent research funding and dissertation work.

Adult-Gerontology CNS-BSN to DNP Major

The Adult-Gerontology (CNS) major prepares nurses as expert providers of care to patients/families across the continuum of healthcare services (from wellness through acute care). The CNS functions as a developer and manager of programs of care for populations of patients; as a mentor who provides support to nurses caring for patients at the bedside; as a leader of multidisciplinary groups driving change throughout the organization; and as a developer of evidence-based projects to ensure best patient outcomes.

CNS students choose a clinical emphasis of choice to focus their studies such as: general medicine or surgery, cardiopulmonary, critical care, oncology, or trauma and emergency preparedness (TEP). Graduates are eligible for national certification by the American Nurses Credentialing Center (ANCC) or the American Association of Critical Care Nurses (AACN).

Master's

Clinical Nurse Leader Concentration

Applications are no longer being accepted. Curriculum is for currently enrolled students.

The CNL is designed for the nurse who wants to assume a leadership role wherever healthcare is delivered and impact quality and safety in patient care. This emerging nursing role was developed by the American Association of Colleges of Nursing (AACN) to improve the quality of patient care and better prepare nurses to thrive in the complex healthcare arena.

The Clinical Nurse Leader curriculum may be completed on a full-time or part-time basis. Courses in pathophysiology, pharmacology, physical diagnosis, health promotion, and patient/family education deepen the student's understanding of wellness, illness, and treatment modalities.

Courses in organizational theory, leadership development, informatics, healthcare quality, finance and economics, ethics, and a role seminar prepare the student to be a leader in the clinical area.

Courses in research and statistics teach the student how to strengthen evidence-based practice. The CNL Clinical Practicum enables the student to transfer theoretical knowledge into practical application. A microsystem project culminates the student's application of the knowledge, skills, and abilities acquired throughout the CNL education experience.

The CNL's graduate education prepares the individual to practice at a higher level of clinical competence at the point of care, improve patient outcomes, serve as a leader within the interprofessional team, and be a resource for nurses.

Upon graduation, candidates are eligible to sit for certification through The Commission on Nurse Certification (CNC), which is the autonomous arm of AACN responsible for all certification functions. The CNL certification is based upon a national standard of requisite knowledge and experiences, thereby assisting employers, the public, and members of the health professions in the assessment of a CNL.

Clinical Nurse Leader Applicant Requirements

- Valid registered nurse license in US State/Territory or location where clinical experiences are performed
- BSN required from an ACEN, CCNE, or NLN accredited program
- Complete online application
- Official transcripts
- Professional references
- A personal essay
- Resume/CV
- Pre-requisite statistics course with a grade of B- or better
- Applicant survey
- Pre-admission interview
- Non-refundable application fee
- One year of clinical experience is preferred prior to beginning clinical courses

- NURSP 2092D - LEADERSHIP DEVELOPMENT
- NURSP 2093 - EDUCATION AND MENTORING IN THE CLINICAL SETTING **
- NUR 2218 - STUDIES IN ADVANCED NURSING ETHICS

Term 4

- NURSP 2075 - INTRODUCTION TO HEALTH INFORMATICS
OR
- NURSP 2075D - INTRODUCTION TO HEALTH INFORMATICS
- NURSP 2095 - CONTEMPORARY ISSUES IN NURSING AND THE CNL ROLE SEMINAR **
- NURSP 2096 - CNL CLINICAL PRACTICUM 1 **
- NURSP 2097 - CNL CLINICAL PRACTICUM 2 **
- Comprehensive Exam

Total Credits: 43

*Courses with a "D" are delivered synchronously via distance education for qualified students per Policy 438.

Total Clinical Hours: 420

**Clinical Practicum

*There is also an online option. All courses can be completed online except the 420 clinical practicum hours, which can be completed at a health care facility near your home. Go to www.online.pitt.edu for additional information related to the online CNL program.

Neonatal Nurse Practitioner BSN to MSN Concentration

The Neonatal Nurse Practitioner (NNP) is prepared to manage the health care of patients from birth at any gestation to two years of age. This expanded clinician role is performed in collaboration with neonatologists and other pediatric clinicians. The NNP is employed in intensive care nurseries of various levels, newborn nurseries, and high-risk follow-up clinics, coordinates and manages care for infants with chronic health problems, and provides continuity for these children from hospital to home. Course work and clinical experiences focus on the care and management of critically ill and convalescent premature and full-term infants. The sequence of courses provides for a logical building of the clinical decision-making skills necessary to function as an NNP. The NNP is prepared to perform acts of medical diagnosis and prescribe medical therapeutics and corrective measures. In addition, the NNP selects and performs diagnostic and therapeutic invasive procedures on newborns in the intensive care setting.

Students may study full time or part time. The BSN to MSN curriculum is offered only onsite on the main campus in Pittsburgh. Selected core courses may be transmitted to eligible students who live a distance from campus. A sample program plan for full-time study is provided below.

Graduates are eligible for national certification as an NNP offered by the National Certification Corporation and for legal certification as a Certified Registered Nurse Practitioner (CRNP) and prescriptive authority through the State Board of Nursing of the Commonwealth of Pennsylvania and other states.

Neonatal Nurse Practitioner MSN Applicant Requirements

- Valid registered nurse license in US State/Territory or location where clinical experiences are performed
- BSN required from an ACEN, CCNE, or NLN accredited program
- Complete online application
- Official transcripts
- Professional references
- A personal essay
- Resume/CV
- Pre-requisite statistics course with a grade of B- or better
- Applicant survey
- Pre-admission interview
- Non-refundable application fee

Full-Time Curriculum

Fall Term (YR 1)

- NUR 2004 - PATHOPHYSIOLOGY ACROSS THE LIFE SPAN
OR
- NUR 2004D - PATHOPHYSIOLOGY ACROSS THE LIFE SPAN
- NURSP 2175 - APPLICATION OF HEALTH INFORMATICS IN HEALTH CARE

Master's in Nursing Comprehensive Exam is required.

Clinical Hours: 780

*Courses with a "D" are delivered synchronously via distance education for qualified students per Policy 438.

Nurse Specialty Role

- Clinical Nurse Leader Concentration
- Nursing Informatics Concentration

Nursing Informatics Concentration

Nursing Informatics online concentration is a combination of cognitive science, computer science, information science, and nursing science. It includes the development, analysis, and evaluation of information systems augmented by technologies that support, enhance, and manage patient care.

In practice, students have an opportunity to observe, apply, analyze, and practice processes and skills relevant to nursing informatics. The Nursing Informatics concentration stresses the development of leadership in nursing.

Career opportunities for graduates with this specialty are numerous. Informatics nurses are involved in practice, education, research, administration, and consultation and can work in public, private, or corporate settings.

There are three different options in Nursing Informatics; a major, a minor, and post-professional certificate. All may be completed on a full- or part-time basis.

The Nursing Informatics area of concentration is only offered online. Students may study full time or part time. A sample program plan for full-time study is provided below. The nursing informatics core serves as a basis for increasing the students' knowledge of nursing theory and research, health care outcomes, and nursing informatics. The nursing informatics core includes course work in introduction to informatics, clinical information systems, database management, evaluation of informatics projects, and consumer health informatics. Practica are designed to enhance the students' active participation in a selected informatics role.

Nursing Informatics Applicant Requirements

- Valid registered nurse license in US State/Territory or location where clinical experiences are performed
- BSN required from an ACEN, CCNE, or NLN accredited program
- Complete online application
- Official transcripts
- Professional references
- A personal essay
- Resume/CV
- Pre-requisite statistics course with a grade of B- or better
- Applicant survey
- Pre-admission interview
- Non-refundable application fee

Full-Time Curriculum

Fall Term (YR 1)

- NUR 2011 - APPLIED STATISTICS FOR EVIDENCE-BASED PRACTICE
- NURSP 2075 - INTRODUCTION TO HEALTH INFORMATICS
- NURSP 2388 - DATABASE MANAGEMENT
- NURSP 2383 - METHODS IN TECHNOLOGY EVALUATION & USABILITY

Spring Term (YR 1)

- NUR 2000 - RESEARCH FOR EVIDENCE-BASED PRACTICE 1
- NURSP 2070 - INFORMATION TECHNOLOGY PROJECT MANAGEMENT

- NUR 2218 - STUDIES IN ADVANCED NURSING ETHICS

Fall Term (YR 2)

Part-time (or you can take elective credits to increase the credits to meet the full-time requirements of 9 credits/term)

- NURSP 2085 - NURSING INFORMATICS PRACTICUM 1
- NUR 3012 - PUBLIC POLICY IN HEALTH CARE

Spring Term (YR 2)

Part-time (or you can take elective credits to increase the credits to meet the full-time requirements of 9 credits/term)

- NURSP 2086 - NURSING INFORMATICS PRACTICUM 2

- NURSP 2099 - FINANCIAL, BUSINESS, AND ECONOMICS DRIVERS IN HEALTHCARE MANAGEMENT
- Comprehensive Exam

Total Credits: 39.5

School Nursing, MSN

School Nursing Major

The School Nursing online major will prepare licensed registered nurses to work in the specialty practice of school nursing, which requires advanced skills to address the complex health needs of students within a school community setting. This innovative online program is a continuation of our online School Nurse PK-12 Certificate. Students will receive a personalized educational experience tailored to school nursing. This program will include evidence-based practice, compassionate care, communication, clinical judgment, diversity, public policy, ethics and social determinants of health. The Future of Nursing Report 2020-2030 notes that school nurses are vital in advancing health equity.

The School Nursing major will meet the needs of nurses looking for programs offering online school nurse certificate (Level 1) and online MSN programs to allow them to get the credits needed for their Level 2 school nurse certificate. Theory and practicum courses in school nursing provide opportunities to meet the school nurse competencies. The practicum in school nursing is completed in person in a school district selected by the student and approved by the course faculty. Career opportunities for graduates with this specialty are numerous in elementary, middle, and high schools in both public and private school settings.

The school nursing major is only offered online. Students may choose to study full time or part time. A sample program plan for full-time study is provided below.

School Nursing Applicant Requirements

- Valid registered nurse license in US State/Territory or location where clinical experiences are performed

Minor

Gerontology Minor for Nurse Practitioners

An 8-credit Gerontology Minor for Nurse Practitioners (NP) can be obtained by DNP students who are enrolled in the Family (Individual Across the Lifespan) Nurse Practitioner (FNP) DNP or the Psychiatric Mental Health Nurse Practitioner (PMHNP) DNP programs.

The Nurse Practitioner functions in an expanded role that includes the diagnoses and management of health care needs of a specific population, and this curriculum will prepare the Nurse Practitioner to develop expertise in the care of older adults. The gerontology courses are specifically designed to address the needs of the older adult in regard to the common geriatric syndromes, geriatric economic and social issues, and the unique presentation of disease. Content includes an emphasis on chronic conditions, multi-morbidity, and internal medicine.

The diagnosis and management of these conditions will be emphasized in keeping with the role of the Nurse Practitioner. The courses were designed using national standards for nurse practitioner education through a combination of didactic and clinical learning experiences.

The Gerontology Minor is an 8-credit curriculum available to DNP students currently enrolled in the Family (Individual Across the Lifespan) Nurse Practitioner (FNP) DNP or Psychiatric Mental Health Nurse Practitioner

(PMHNP) DNP programs who want to increase their knowledge and expertise related to the diagnosis and management of health care needs in the care of older adults.

Curriculum Format

- Part-time (~ 3 terms)
- Onsite
- 180 Practicum Hours

Program Outcomes

Graduates of the Gerontology Minor are prepared to accomplish the following:

- Provide comprehensive, evidence-based geriatric focused care for elderly patients and their caregivers based on physical, mental, emotional, and functional changes
- Practice culturally sensitive care in regard to ethnicity, religion, gender, and socio-economic status
- Identify available community resources to promote health, safety, function, and independence
- Provide leadership to other members of the interdisciplinary team that is focused on the needs and wishes of the patient
- Assume the role of advocate for patients and caregivers in regard to access and transitions within the health care system

Curriculum

- NURNP 2526D - MANAGEMENT: GERIATRIC HEALTH
- NURNP 2527 - ADVANCED MANAGEMENT: COMPLEX GERIATRIC HEALTH ISSUES
OR
- NURNP 2527D - ADVANCED MANAGEMENT: COMPLEX GERIATRIC HEALTH ISSUES
- NURNP 2529 - GERONTOLOGY CLINICAL PRACTICUM

Total Credits: 8

*Courses with a "D" are delivered synchronously via distance technology for qualified onsite students as per Policy 438.

Health Care Genetics Minor

Genetic based health care is routinely becoming a part of daily health care, having major impacts on patient diagnosis, prognosis, and treatment. The curriculum is designed for scientists and health care providers who are seeking focused, graduate-level education in the specialty of genetics. Knowledge gained through coursework will enable healthcare workers to better care for and educate their patients.

The Minor in Health Care Genetics is available to enrolled University of Pittsburgh graduate students. Students should consult with their academic advisor. The Minor includes courses in genetics (taught through the School of Nursing) and a choice of 2 courses related to the student's career goals or interests (taught through other departments in the Schools of the Health Sciences). Learning experiences may be enriched through interaction with Pitt Nursing's Genomics of Patient Outcomes Hub, Clinical Genetics Case Conferences, Human Genetics Research Seminars, Genetics Grand Rounds, and a Research Practicum in a molecular genetics laboratory.

Curriculum Format

- Full time or part time (~ 3 terms)
- Onsite

Program Outcomes

Graduates of the Minor in Health Care Genetics are prepared to accomplish the following:

- Incorporate genomics into their research trajectories
- Guide patients in their understanding of the genetic basis of disease as well as providing patient education and guidance in the areas of available genetic testing, interpretation of testing, recurrence risks, and genetic based therapies
- Provide advocacy for patients and families with genetic conditions
- Utilize family histories to determine disorders for which the patient is at risk
- Utilize a variety of resources to stay up to date with advances in genetic based health care
- Utilize a variety of resources to provide patients and their families with support mechanisms
- Interpret genetic research findings

Admission Criteria

- GPA \geq 3.0 in current graduate program

Curriculum

- Electives (per approval of Coordinator) **6 cr.**
- NUR 2682 - HUMAN GENETICS AND CLINICAL APPLICATIONS
OR
- NUR 2682D - HUMAN GENETICS AND CLINICAL APPLICATIONS
- NUR 2681 - ADV TOPICS IN HUMAN GENETICS

Total Credits: 12

Nursing Administration Minor

The Minor in Nursing Administration is available to enrolled University of Pittsburgh School of Nursing graduate students pursuing education in advanced clinical specialty roles who want the opportunity to also obtain knowledge and experience pertinent in management and leadership. Students should consult with their academic advisor. The minor will prepare nurses to assume positions as advanced practice nurses with some management and/or leadership responsibility.

The curriculum focuses on management in complex social and operational systems for healthcare delivery. Attention is given to applying role-related knowledge and skills in diverse settings and populations, including acute care, long term care, psychiatric settings, and community settings. The culminating practicum is a uniquely designed mentored clinical experience that provides students with an opportunity to experience a leadership role.

Curriculum Format

- Part-time (~ 2 terms)
- 180 Clinical hours

Program Outcomes

Graduates of the Minor in Nursing Administration are prepared to accomplish the following:

- Assume leadership for clinical initiatives and outcomes within their area of clinical focus
- Develop a business case for change within their area of clinical focus

Curriculum

- NURSP 2062 - ORGANIZATIONAL AND SYSTEMS MANAGEMENT FOR HEALTHCARE LEADERS
OR
- NURSP 2062D - ORGANIZATIONAL AND SYSTEMS MANAGEMENT FOR HEALTHCARE LEADERS
- NURSP 2099 - FINANCIAL, BUSINESS, AND ECONOMICS DRIVERS IN HEALTHCARE MANAGEMENT
OR
- NURSP 2099D - FINANCIAL, BUSINESS, AND ECONOMICS DRIVERS IN HEALTHCARE MANAGEMENT
- NURSP 2092 - LEADERSHIP DEVELOPMENT
OR
- NURSP 2092D - LEADERSHIP DEVELOPMENT
- NURSP 2064 - NURSING ADMINISTRATION SEMINAR AND PRACTICUM

Total Credits: 10

*Courses with a "D" are delivered synchronously via distance technology for qualified onsite students as per Policy 438.

Nursing Education Minor

The Nursing Education Minor combines didactic courses and two field-based practica in clinical and academic settings aligned with the student's interest. The online curriculum prepares students to apply instructional theory and research in the following types of educational settings and roles: schools of nursing, health care agency staff development, continuing education departments, advanced practice nursing, and patient and community education agencies. The Nursing Education Minor is available to graduate students enrolled at the University of Pittsburgh School of Nursing. The minor involves the completion of a minimum of 10 credits of coursework. Active students, including those in the Nurse Faculty Loan Program, should consult with their respective academic advisor and the coordinator of the Nursing Education Minor to develop their curriculum plan.

Upon completion of the minor, graduates with a valid registered nurse (RN) license may be eligible to take the Certified Nurse Education Exam offered by the National League of Nursing (NLN) (Note: visit the NLN website for eligibility requirements).

Curriculum Format

- Part-time (~ 3-4 terms)
- Online
- 10 Credits (150 Practicum Hours)

- Fall or Spring Term admission (Starting the coursework in Spring will enable completion of the minor in three consecutive terms).
- Three of the four required courses are to be completed in sequence and are offered once a year (NUR 3293 in Spring, NUR 2084 in Summer, and NUR 2183 in Fall); and NURSP 2093 in Spring term.
- Practica are arranged based on student's needs.
- Curriculum plan must be approved by the coordinator of the Nursing Education Minor and the student's advisor.

Program Outcomes

Graduates of the Nursing Education Minor are prepared to:

- Design current, progressive nursing education programs using research and theories of learning instruction, curriculum, evaluation, and measurement.
- Utilize a variety of teaching strategies and media appropriate to learner characteristics, instructional objectives, and nursing or health-related content.
- Plan the learning activities of individuals and groups of students in clinical and didactic settings.
- Guide the performance of learners in settings where nurses function as educators for nurse colleagues, students, patients, families, and communities.
- Apply principles of measurement and evaluation to the development of learner assessment procedures for didactic and educational instruction.
- Utilize computer technology and educational informatics as integral components of nursing education and training.
- Articulate the role of the nurse educator within the health professions, schools of nursing, and community.
- Perform the role of education consultant in settings where nurses, patients, families, and communities participate in education activities.

Admission Criteria

- Valid registered nurse license in US State/Territory or location where clinical experiences are performed
- GPA \geq 3.0 in current MSN, DNP, or PhD program at the University of Pittsburgh, School of Nursing.

Curriculum

- NURSP 2093 - EDUCATION AND MENTORING IN THE CLINICAL SETTING
Spring - 3 credits; 60 hours clinical
- NUR 3293 - ART AND SCIENCE OF TEACHING AND LEARNING
Spring - 2 credits
- NUR 2084 - MEASUREMENT AND EVALUATION IN TEACHING
Summer - 2 credits
- NUR 2183 - PRACTICUM: TEACHING IN ACADEMIC SETTINGS
Fall - 3 credits; 90 hours clinical

Total Credits: 10

Nursing Informatics Minor

The Minor in Nursing Informatics is a combination of cognitive science, computer science, information science, and nursing science. It includes the development, analysis, and evaluation of information systems that support, enhance, and manage patient care. Informatics nurses are involved in practice, education, research, administration, and

consultation and can work in public, private, or corporate settings. Career opportunities for graduates of this specialty are numerous.

The Minor in Nursing Informatics is available to enrolled University of Pittsburgh School of Nursing graduate students. The Nursing informatics curriculum includes introduction to informatics, clinical information systems, database management, and project management courses. Students should consult with their academic advisor.

Curriculum Format

- Part-time (2-3 terms)
- 11 course credits
- Online

Program Outcomes

Graduates of the Minor in Nursing Informatics are prepared to:

- Analyze clinical information systems for adoption by healthcare systems
- Manage projects in a multidisciplinary integrated healthcare informatics environment
- Consult with companies in the design of healthcare information systems
- Assist in the planning and development of informatics applications for telehealth, consumer health, and community-based care

Curriculum

- NURSP 2075 - INTRODUCTION TO HEALTH INFORMATICS
- NURSP 2388 - DATABASE MANAGEMENT
- NURSP 2076 - CLINICAL INFORMATION SYSTEMS
- NURSP 2070 - INFORMATION TECHNOLOGY PROJECT MANAGEMENT

Total Credits: 11

PhD

Nursing - BSN to PhD Track, PhD

BSN-PhD Curriculum

Students are expected to enroll full time.

The BSN to PhD Track consists of a minimum of 72 credits (cr.):

- 22 cr. from the Research Core
- 9 cr. from the Statistics Core
- 41 cr. for Personalized Scientific Inquiry (PSI) courses (PSI consists of 12 cr. Dissertation, 6 cr. Apprenticeship Practicum, and 23 cr. additional PSI credits which foster knowledge and skills in the students research focus area and are chosen by the student in conjunction with the academic adviser.)

Fall Term (YR 1)

- NUR 2112 - APPLIED PARAMETRIC AND NON-PARAMETRIC STATISTICS FOR THE HEALTH SCIENCES 1
- OR
- NUR 3112 - APPLIED PARAMETRIC AND NON-PARAMETRIC STATISTICS FOR THE HEALTH SCIENCES 1
- NUR 3285 - PHILOSOPHICAL UNDERPINNINGS OF NURSING RESEARCH
- NUR 3291 - RESPONSIBILITIES AND ACTIVITIES OF SCIENTISTS 1
- NUR 3010 - PHD DISSERTATION
- NUR 3071 - PHD RESEARCH APPRENTICESHIP
- Personalized Scientific Inquiry: Professional Development (2 cr)

Spring Term (YR 1)

- NUR 2113 - APPLIED PARAMETRIC AND NON-PARAMETRIC STATISTICS FOR THE HEALTH SCIENCES 2
- OR
- NUR 3113 - APPLIED PARAMETRIC AND NON-PARAMETRIC STATISTICS FOR THE HEALTH SCIENCES 2
- NUR 3286 - THEORETICAL FOUNDATIONS FOR RESEARCH
- NUR 3287 - RESEARCH DESIGN & METHODS
- NUR 3010 - PHD DISSERTATION
- NUR 3071 - PHD RESEARCH APPRENTICESHIP

Summer Term (YR 1)

- NUR 2114 - APPLIED REGRESSION FOR HEALTH SCIENCE RESEARCH
- OR
- NUR 3114 - APPLIED REGRESSION FOR HEALTH SCIENCE RESEARCH
- NUR 3288 - RESEARCH MEASUREMENT
- NUR 3289 - INTERVENTION DEVELOPMENT
- NUR 3010 - PHD DISSERTATION
- NUR 3071 - PHD RESEARCH APPRENTICESHIP
- Personalized Scientific Inquiry: (2 cr)

Fall Term (YR 2)

- NUR 3290 - ADVANCED QUANTITATIVE ANALYTIC METHODS SEMINAR
- NUR 3010 - PHD DISSERTATION
- NUR 3071 - PHD RESEARCH APPRENTICESHIP
- Personalized Scientific Inquiry: Intensive Methods (2 cr)
- Personalized Scientific Inquiry: Content Expertise (2 cr)
- Personalized Scientific Inquiry: Content Expertise (2 cr)

Spring Term (YR 2)

- NUR 3292 - RESPONSIBILITIES AND ACTIVITIES OF SCIENTISTS 2

- NUR 3293 - ART AND SCIENCE OF TEACHING AND LEARNING
- NUR 3010 - PHD DISSERTATION
- NUR 3071 - PHD RESEARCH APPRENTICESHIP
- Personalized Scientific Inquiry: Intensive Methods (2 cr)
- Personalized Scientific Inquiry: Content Expertise (2 cr)
- Personalized Scientific Inquiry: Advanced Statistics (2 cr)

Summer Term (YR 2)

- NUR 3010 - PHD DISSERTATION
- NUR 3071 - PHD RESEARCH APPRENTICESHIP
- Personalized Scientific Inquiry: Content Expertise (2 cr)
- Personalized Scientific Inquiry: (2 cr)
- Personalized Scientific Inquiry: (3 cr)

Fall Term (YR 3)

- FTDP Full Time Dissertation

Spring Term (YR 3)

- FTDP Full Time Dissertation

Summer Term (YR 3)

- FTDP Full Time Dissertation

Total Credits: Minimum of 72 Credits

Note:

- See School of Nursing Policy 230 regarding the taking of the Preliminary Examination and School of Nursing Policy 235 regarding the Comprehensive Examination/Overview
- FTDP (full-time dissertation 0 credits) can only be taken after completing the minimum 12 credits of NUR 3010 - PHD DISSERTATION

Preliminary and Comprehensive Examinations and Dissertation Overview

The preliminary examination is taken after completing the following required courses.

- NUR 3285 Philosophical Underpinnings (3 cr)
- NUR 3286 Theoretical Foundations for Research (3 cr)
- NUR 3287 Research Design & Methods (3 cr) **
- NUR 3071 Apprenticeship Practicum (2 cr)
- NUR 3288 Research Measurement (2 cr)
- NUR 3289 Intervention Development (2 cr)
- and Statistics Courses

- NUR 2112 Applied Parametric and Non-Parametric Statistics for the Health Sciences 1
- OR
- NUR 3112 Applied Parametric and Non-Parametric Statistics for the Health Sciences 1
 - NUR 2113 Applied Parametric and Non-Parametric Statistics for the Health Sciences 2
- OR
- NUR 3113 Applied Parametric and Non-Parametric Statistics for the Health Sciences 2
- **MSN-PhD students should have completed this course in their prior degree program

By following the established curriculum plan, all full-time students should sit for their Preliminary Examination early in their fourth term of study. The examination is designed to assess the student's breadth of knowledge of the discipline of nursing and potential ability to apply research methods independently. Remediation work may be required if deficiencies are identified that may impede the student's success in program completion. See School of Nursing Policy 230.

The *comprehensive examination* assesses the student's mastery of the general field of doctoral study, acquisition of depth and breadth of knowledge in a focused area of study, and the ability to use the research methods of the discipline. The comprehensive examination is taken after completion of all required course work and concurrent with the dissertation overview. See School of Nursing Policy 235.

The *dissertation overview* requires the student to formulate a research plan and to justify the selected approach for studying the topic before the student's dissertation committee.

Dissertation Committee

Prior to the comprehensive examination and the dissertation overview, the student and research advisor propose, subject to approval by the director of the PhD program and the Dean, a committee of four or more members, one of whom must be from another school within the University and the majority of whom must be from the School of Nursing. A majority, including the major advisor, must also be full members of the Graduate Faculty of the University.

See *Doctoral Committee under Regulations Pertaining to Doctoral Degrees of the University bulletin*.

Admission to Candidacy for the Doctor of Philosophy

Admission to candidacy for the Doctor of Philosophy degree constitutes a promotion of the student to the most advanced stage of graduate study and provides formal approval to devote essentially exclusive attention to the research and the writing of the dissertation. To qualify for admission to candidacy, students must be in full graduate status, have satisfied the requirement of the preliminary examination, have completed formal courses and the minimum dissertation credit requirements with a minimum grade point average of 3.00, have passed the comprehensive examination, and have received approval of the proposed dissertation research by the dissertation committee. Admission to candidacy is granted by the Dean.

Residency Requirement

Students seeking the PhD degree are required to engage in a minimum of one term of full-time doctoral study (nine credits), which excludes any other employment except as approved. The doctoral student must notify the PhD program director in writing the term that this occurs.

Dissertation and Abstract

The date and title of the dissertation defense must be submitted to the PhD program director one month prior to the final defense. *For definitions and detail on what constitutes an acceptable dissertation, please see Dissertation and Abstract under Regulations Pertaining to Doctoral Degrees of this bulletin.*

Personalized Scientific Inquiry (BSN to PhD)

The University of Pittsburgh values personalization of students' educational experiences. To that end, the PhD program allows students to develop a personalized approach to choosing additional coursework congruent with knowledge and skill development in their chosen areas of focal research concentration.

Students are encouraged to take Personalized Scientific Inquiry (PSI) courses to develop an understanding of essential knowledge to a focused area of study in nursing.

- Consists of a minimum of 23 credits in the BSN to PhD track.
- Students are encouraged to take PSI courses outside of the School of Nursing and outside of the nursing discipline.
- It is suggested that one PSI course be an advanced statistics/research methods course.
- No more than one of the PSI courses is recommended to be taken as NUR 3060 Independent Study, so as to provide for a richer experience in the presence of other students and other disciplines.

Research Apprenticeship Model

The PhD program includes an apprenticeship model of research training that combines rigorous coursework and an apprenticeship with successful research mentors. This model includes a formalized series of Apprenticeship Practica (minimum of 6 credits under the direction of a research mentor), with recommended experiences and a series of defined deliverables. This experience allows for the opportunity to acquire individualized and tangible research skills within a mentored research application environment, which is additive to and precedes the dissertation experience.

All mentors are experienced nurse researchers. During their apprenticeships, students acquire tangible skills in research methodology, grantsmanship, professional skills, the responsible conduct of research, and dissemination of research findings through publications and presentations. Students receive an intense and comprehensive research experience resulting in publications and pilot data to support applications for independent research funding and dissertation work.

Nursing - Post-MSN to PhD Track, PhD

Post-MSN to PhD Curriculum

The MSN to PhD Track consists of a minimum of 48 credits (cr.):

- 13 cr. from the Research Core
- 9 cr. from the Statistics Core
- 26 cr. for Personalized Scientific Inquiry (PSI) courses (PSI consists of 12 cr. Dissertation, 6 cr. Apprenticeship Practicum, and minimum 8 cr. additional PSI credits)

The advisor and MSN to PhD Track student will, upon admission to the program, prepare a gap analysis based on review of the prior master's program to determine the nature of the 8 additional PSI credits (and possibly more if necessary), and also if additional Research Core coursework is needed. The student's prior preparation in their master's program (research focused or clinically focused) will drive the gap analysis.

- FTDP Full Term Dissertation

Summer Term (YR 2)

- FTDP Full Time Dissertation

Fall Term (YR 3)

- FTDP Full Time Dissertation

Total Credits: Minimum of 48 Credits

(in addition to 24 credits from master's degree)

Note:

- See Policy 230 regarding the taking of the Preliminary Examination and Policy 235 regarding the Comprehensive Examination/Overview.
- FTDP (full-time dissertation, 0 credits) can only be taken after completing the minimum 12 credits of NUR 3010 - PHD DISSERTATION

Preliminary and Comprehensive Examinations and Dissertation Overview

The preliminary examination is taken after completing the following required courses.

- NUR 3285 Philosophical Underpinnings (3 cr)
 - NUR 3286 Theoretical Foundations for Research (3 cr)
 - NUR 3287 Research Design & Methods (3 cr) **
 - NUR 3071 Apprenticeship Practicum (2 cr)
 - and Statistics Courses
 - NUR 2112 Applied Parametric and Non-Parametric Statistics for the Health Sciences 1
- OR
- NUR 3112 Applied Parametric and Non-Parametric Statistics for the Health Sciences 1
 - NUR 2113 Applied Parametric and Non-Parametric Statistics for the Health Sciences 2
- OR
- NUR 3113 Applied Parametric and Non-Parametric Statistics for the Health Sciences 2
- **MSN-PhD students should have completed this course in their prior degree program

By following the established curriculum plan, all full-time students should sit for their Preliminary Examination in their third term of study. The examination is designed to assess the student's breadth of knowledge of the discipline of nursing and potential ability to apply research methods independently. Remediation work may be required if deficiencies are identified that may impede the student's success in program completion. See School of Nursing Policy 230.

The *comprehensive examination* assesses the student's mastery of the general field of doctoral study, acquisition of depth and breadth of knowledge in a focused area of study, and the ability to use the research methods of the discipline. The comprehensive examination is taken after completion of all required course work and concurrent with the dissertation overview. See School of Nursing Policy 235.

The *dissertation overview* requires the student to formulate a research plan and to justify the selected approach for studying the topic before the student's dissertation committee.

Dissertation Committee

Prior to the comprehensive examination and the dissertation overview, the student and research advisor propose, subject to approval by the director of the PhD program and the Dean, a committee of four or more members, one of

whom must be from another school within the University and the majority of whom must be from the School of Nursing. A majority, including the major advisor, must also be full members of the Graduate Faculty of the University.

See Doctoral Committee under Regulations Pertaining to Doctoral Degrees of the University bulletin.

Admission to Candidacy for the Doctor of Philosophy

Admission to candidacy for the Doctor of Philosophy degree constitutes a promotion of the student to the most advanced stage of graduate study and provides formal approval to devote essentially exclusive attention to the research and the writing of the dissertation. To qualify for admission to candidacy, students must be in full graduate status, have satisfied the requirement of the preliminary examination, have completed formal courses and the minimum dissertation credit requirements with a minimum grade point average of 3.00, have passed the comprehensive examination, and have received approval of the proposed dissertation research by the dissertation committee. Admission to candidacy is granted by the Dean.

Residency Requirement

Students seeking the PhD degree are required to engage in a minimum of one term of full-time doctoral study (nine credits), which excludes any other employment except as approved. The doctoral student must notify the PhD program director in writing the term that this occurs.

Dissertation and Abstract

The date and title of the dissertation defense must be submitted to the PhD program director one month prior to the final defense. *For definitions and detail on what constitutes an acceptable dissertation, please see Dissertation and Abstract under Regulations Pertaining to Doctoral Degrees of this bulletin.*

Personalized Scientific Inquiry (Post-MSN to PhD)

The University of Pittsburgh values personalization of students' educational experiences. To that end, the PhD program allows students to develop a personalized approach to choosing additional coursework congruent with knowledge and skill development in their chosen areas of focal research concentration.

Students are encouraged to take Personalized Scientific Inquiry (PSI) courses to develop an understanding of essential knowledge to a focused area of study in nursing.

- Consists of a minimum of 8 credits in the MSN to PhD track.
- Students are encouraged to take PSI courses outside of the School of Nursing and outside of the nursing discipline.
- It is suggested that one PSI course be an advanced statistics/research methods course.
- No more than one of the PSI courses is recommended to be taken as NUR 3060 Independent Study, so as to provide for a richer experience in the presence of other students and other disciplines.

Research Apprenticeship Model

The PhD program includes an apprenticeship model of research training that combines rigorous coursework and an apprenticeship with successful research mentors. This model includes a formalized series of Apprenticeship Practica (minimum of 6 credits under the direction of a research mentor), with recommended experiences and a series of defined

deliverables. This experience allows for the opportunity to acquire individualized and tangible research skills within a mentored research application environment, which is additive to and precedes the dissertation experience.

All mentors are experienced nurse researchers. During their apprenticeships, students acquire tangible skills in research methodology, grantsmanship, professional skills, the responsible conduct of research, and dissemination of research findings through publications and presentations. Students receive an intense and comprehensive research experience resulting in publications and pilot data to support applications for independent research funding and dissertation work.

Department of Acute and Tertiary Care

Department of Health Promotion and Development

School of Pharmacy

School of Pharmacy

Chartered in 1878, the School of Pharmacy has a tradition of developing leaders and innovators that drive the future of pharmacy. We investigate, discover, and create ways to improve patient health and, through partnerships, change practice and improve efficiency of care. We also use computational and bench research methods to discover and develop drugs and drug delivery systems, and optimize drug therapy. The School of Pharmacy leads the way in education, personalizing education and getting students to expert faster. The School of Pharmacy is among the oldest pharmacy schools in the country. Pitt Pharmacy is in the top tier of schools of pharmacy in US News & World Report rankings and NIH-funded research.

Mission

The School of Pharmacy develops pharmacists and pharmaceutical scientists as innovators and leaders to improve the health and well-being of the world around us.

Through inclusive excellence, innovation, and leadership, **we achieve pioneering and exemplary:**

- Pharmacy and pharmaceutical sciences education,
- Research and scholarship, and
- Patient care and service.

Vision

To be an outstanding school of pharmacy renowned for excellence in the discovery and advancement of science-based use of medicines and other interventions to enhance the vitality and quality of life.

Values

Integrity guides our daily work. We foster:

Professionalism
Integrity
Teamwork
Trust
Passion
Health Equity
Accountability
Responsibility
Mutual Respect

Doctor of Pharmacy (PharmD) Program

The professional curriculum is composed of a course of study requiring sixty-two (62) credits of pre-professional study followed by four years of professional courses. The four-year professional curriculum emphasizes problem solving and critical thinking, blending classroom and laboratory learning with experiential learning in practice. The required component of experiential learning is designed to facilitate progress from initial stages of making meaningful connections with patients to caring for complex patients with acute and chronic diseases. Experiences include patient care in communities, in hospitals, and during transitions of care. This experiential education begins in the first weeks of the first professional (P1) year.

Through our commitment to personalizing education, PittPharmacy inspires students to use their unique interests and talents to improve the lives of people through the safe, effective, and responsible use of medications and other interventions.

The PharmD program prepares students to be practitioners who advance the profession by fostering innovation, leadership, interprofessional collaboration, civic engagement, advocacy, life-long learning, and a professional attitude of inclusion.

Accreditation Council for Pharmacy Education

The University of Pittsburgh School of Pharmacy's Doctor of Pharmacy program is accredited by the Accreditation Council for Pharmacy Education, 190 South LaSalle Street, Suite 2850, Chicago, IL 60503, 312/664-3575; FAX 866/228-2631, web site www.acpe-accredit.org.

Contact Information

School of Pharmacy
3501 Terrace St
Pittsburgh, PA 15261
Admissions: 412-383-9000
E-mail: rxschool@pitt.edu
www.pharmacy.pitt.edu

Special Academic Opportunities

PittPharmacy provides opportunities to personalize students' education and get them to expert faster.

Areas of Concentration

Areas of Concentration (ARCOs) provide ways to tailor education to explore personal and professional interests. During pharmacy school, students can pursue an area of pharmacy in depth through specialized courses and experiences, mentoring, and a scholarly project. Students may apply for an ARCO during their second professional (P2) year of PharmD training. Each ARCO has specific requirements.

- Community Leadership, Innovation, and Practice
- Geriatrics and Palliative Care
- Global Health
- Pediatrics
- PharmacoAnalytics
- Pharmacotherapy Scholars
- Pharmacy Business Administration
- Research

International Pharmacy Travel

Pitt student pharmacists have the opportunity to gain exposure to diverse practices of pharmacy and global cultures through international experiences.

Student-Driven Independent Study

Students have the opportunity to work directly with a faculty member to design an elective Special Topics course organized around a specific project, inquiry, or experience. Unlike traditional electives, students play an active role in establishing the goals and parameters of the course and generate a specific product at its conclusion, such as a research poster, article, or teaching resource.

PharmD/PhD Combined Program

If students are committed to extending their research education, we offer an opportunity for a pathway to obtain a Doctor of Philosophy in Pharmaceutical Sciences (PhD) degree.

Selecting Experiential Rotations

Students can design an individualized combination of core and elective rotations that are unique to their professional interests, talents, and goals. Students are able to choose from over 1,000 rotations in a wide range of pharmacy careers locally, nationally, and internationally.

Admissions

The School of Pharmacy admits students to its programs under one of two pathways - guarantee or open. Those two admission pathways are detailed below:

Pharmacy Guarantee First Year Admission

All students should first submit an application to the University of Pittsburgh, Office of Admissions and Financial Aid. The School offers a guaranteed acceptance to a limited number of high school seniors who enroll at one of the University of Pittsburgh campuses. The number of guaranteed offers is limited and offered on a rolling basis. Students who have demonstrated academic success in high school, score 1330 or higher on the SAT I (Math and Critical Reading sections), with a minimum of 660 in the Math section, and specify Pharmacy on the application will be offered the guaranteed admission, if available.

Students who receive the guaranteed admission are expected to perform well in their pre-professional courses. In order to secure a place in the PharmD Program, students must earn:

- a letter grade of a C or better in all preprofessional courses with no repeated courses
- a 3.25 or greater overall GPA in preprofessional courses
- a competitive Math and Science GPA of 3.0

NOTE: Required Math and Science courses must be taken at the University of Pittsburgh (AP credits are acceptable).

Test optional applicants are eligible for this guarantee.

To exercise the Pharmacy guarantee, all applicants must:

- submit a completed PharmCAS application and fee
- participate in a satisfactory interview prior to School of Pharmacy Admission
- submit the Pharmacy College Admissions Test (PCAT) scores (PCAT for Fall 2024 Admissions see below)
- writing assessment

Pharmacy Guarantee students who meet these performance criteria will be admitted into the PharmD Program.

Open Admission

Students admitted to the program through open admission compete for remaining spaces in the class. The requirements to be considered a competitive applicant for the School of Pharmacy's professional program are:

- completion of the pre-professional requirements
- competitive Math and Science GPA of 3.0
- submission of the Pharmacy College Admission Test (PCAT) scores
- submit a completed PharmCAS application and fee
- selected applicants will be required to participate in a satisfactory interview (interviews are by invitation only)

More information about PharmCAS and deadlines for application can be found at www.pharmcas.org.

Students applying for admission must apply through PharmCAS, the Web-based Pharmacy College Application Service.

Visit the School of Pharmacy Web site at www.pharmacy.pitt.edu.

Application Procedures and Deadlines

All applicants must file an application through PharmCAS, a Web-based Pharmacy College Application Service, by March 1, 2024.

The application process, application deadlines, and other admission requirements are summarized on the School of Pharmacy Web site.

Throughout the application process, it is the student's responsibility to follow all instructions and meet all deadlines. Failure to do so might result in their application being canceled. It is highly recommended that students apply early to ensure that all application materials are received by the March deadline.

Preparing to Complete the Application

The School of Pharmacy recommends that students thoroughly review the application process before entering data or filling out forms so that they are aware of all the information they will need to gather and how much time the entire process will take. Visit the PharmCAS Web site at www.pharmcas.org and review the "Preparing to Apply" tab. Then review the Checklist, PharmCAS Instructions, and the Applicant Code of Conduct links. Review the time line for the application process: Admissions Calendar

Complete Pre-professional Courses and Minimum Eligibility Requirements: Math & Science course requirements must be completed by the end of Spring term and all other courses must be completed by the end of the Summer term before students begin the first Fall semester of the PharmD program.

Register to take the PCAT (Pharmacy College Admission Test): The PCAT has been optional starting with the Fall 2022 Admissions cycle and will be considered in the holistic application review process for applicants who have reported scores. Applicants who are unable to complete an exam or choose not to report exam scores will not be disadvantaged.

Visit the PCAT web site for registration deadlines for test dates and register as early as possible since the test sites have a limited number of examinee seats for each exam date. Register to take the PCAT and have your scores sent to PharmCAS, code 104.

Only completed applications are considered for an interview invitation. NOTE: Since the January PCAT scores will not be received until after interviews are offered, the Admissions Committee recommends an earlier PCAT testing date.

Completing the Application Process

The application process consists of one application.

PharmCAS (Pharmacy College Application Service): This service enables students to generate one primary application that can be submitted to multiple PharmD degree programs. For the University of Pittsburgh School of Pharmacy, the application must be electronically submitted on or before midnight Eastern Standard Time on March 1, 2024.

To eliminate any unforeseen problems, it is recommended that students submit their application early; i.e., November 1st. This will ensure eligibility to update fall grades and, if issues arise, they can be investigated and resolved before the March deadline.

After electronically submitting the PharmCAS application and fee for the PharmD program, there are follow-up steps that applicants must address to be certain that all the required documents (such as transcripts to PharmCAS) have been received on time.

Tuition and Financial Aid

Students should investigate their eligibility for federal and state programs by calling the Office of Admissions and Financial Aid at 412-624-PITT or e-mail oafa@pitt.edu.

The University's financial advisors are the best source of information about local grants or scholarships that extend beyond federal and state programs. Students are encouraged to look outside of the health professions for additional support. Students may be able to compete successfully for economically or academically awarded scholarships from private groups and associations.

In addition, the School of Pharmacy has a number of general scholarships provided through the generosity of the School's alumni and friends. These are described in detail on the school's Web site at <http://www.pages.pharmacy.pitt.edu/pharmdhandbook/the-pharmd-student-handbook/admissions/scholarships/>

Tuition Rates and Fees can be found on the school's Web site at <https://oafa.pitt.edu/financialaid/costs/>.

Academic and Professional Standards

Academic Integrity

School of Pharmacy students are responsible for upholding the standards of behavior outlined in the University's Guidelines on Academic Integrity, the University's policy on sexual harassment, and other policies related to student behavior.

Enrollment in the School of Pharmacy carries with it obligations of conduct within and outside of the classroom. Professional students are expected to maintain the highest standards of personal integrity and conduct themselves in a manner that is a credit to themselves, the school, and the profession.

Students sign a copy of the University of Pittsburgh School of Pharmacy Code of Conduct that affirms their commitment to ethical and professional behavior. Details of the Code are outlined on the school's Web site.

Grading System

Doctor of Pharmacy students are subject to the provisions of the Guidelines and Regulations for the Promotion of Students in force at the time. All students will be given a copy of these guidelines and regulations upon entry into the program.

Calculation of grade point average (GPA) will include all required professional courses and approved electives taken while enrolled in the PharmD program. Cumulative GPA will be calculated at the end of each term. All PharmD students must maintain a cumulative GPA of 2.00. Students who fail to maintain a cumulative GPA of 2.00 or above will be placed on academic probation and given one opportunity to repeat selected courses in order to raise their cumulative GPA above 2.00. Students failing to increase their cumulative GPA above a 2.00 during this period of

academic probation will be dismissed from the PharmD program. Term GPA will be calculated at the end of each term. Students with a term GPA under 2.00 will be placed on academic probation and must achieve a GPA of 2.00 or above during the following term. Students failing to achieve a term GPA of 2.00 or above during this period of academic probation will be dismissed from the PharmD program.

It is the responsibility of students to monitor their academic progress and become familiar with the program degree requirements and academic regulations.

Clearance and Immunization Policy

The Office of Experiential Learning manages learning experiences in communities and professional practice environments that are embedded across all four years of the PharmD program. Because these experiences involve direct patient contact, the practice sites where students are placed require proof of immunization to communicable diseases, fingerprinting, background checks, and drug screens. Students who fail to complete these prerequisites no later than two weeks prior to the start of classes will not be able to fulfill their experiential learning requirements. PittPharmacy works with CastleBranch, a background screening and compliance tracking solutions company, to collect and manage the documentation of all such prerequisites. Each student has access to his or her information through the secure CastleBranch web site both as a student and after graduation. CastleBranch maintains a secure site to which only the Office of Experiential Learning Office and the student have access.

A positive criminal history and/or positive drug screen may disqualify a student from completing required experiential learning and may prevent successful completion of the PharmD program. Many of the sites used for experiential learning require students to meet certain prerequisites. These prerequisites may include showing proof of immunization to communicable diseases, undergoing criminal background checks, and drug screening. Failure to meet these prerequisites can result in students being unable to complete their experiential learning requirements.

Additionally, in order to become a licensed pharmacist, many states will inquire as to whether the applicant has been convicted of any misdemeanor, felony, or any illegal act associated with alcohol and/or substance abuse. A criminal history may delay or prevent licensure.

PhD or MS in Pharmaceutical Sciences

The School of Pharmacy offers graduate level training to highly motivated individuals. Our mission is to train the next generation of leaders and decision makers seeking to improve the health of the community through outstanding basic and clinical research. Major strengths include highly accomplished, well-funded research faculty, multidisciplinary training opportunities, and cutting-edge technologies.

Training consists of required core courses, elective courses, journal clubs, research presentations, and an original faculty-advised research project leading to a final thesis or dissertation. Students may select to enroll in one of six tracks: clinical pharmaceutical sciences, medicinal chemistry, health outcomes and policy research, pharmaceuticals, biochemical pharmacology, or pharmacometrics and systems pharmacology (PSP).

Contact Information

Lori Altenbaugh
Graduate Program Coordinator
University of Pittsburgh
School of Pharmacy
3501 Terrace St
Pittsburgh, PA 15261

412-648-1014
altenbaughlm@pitt.edu

Application Process

Applications must be submitted electronically at the Pharmacy College Application Service for Graduate Programs (PharmGrad). Application to our program requires a \$50.00 fee that cannot be waived.

Applications for the Fall term must be submitted no later than January 4, 2024. Applications are reviewed on a first-come, first-served basis so it is wise to apply as early as possible. Applications for Spring term admission are not accepted.

The School of Pharmacy highly recommends that applicants to the PhD program have research experience and that students mention specific faculty with whom they would like to work in their Personal Statement.

When complete, student applications are reviewed. No preliminary assessments are made on individuals applying to the program until all application requirements are complete. The GRE is no longer required.

We require three references that **MUST** be submitted online. Written references are not accepted.

IMPORTANT: WE DO NOT ACCEPT ANY DOCUMENTS SENT VIA MAIL TO OUR DEPARTMENT. You will be notified if your application is reviewed and you are invited for an interview. At that time, you will need to supply an official transcript.

International Students

If English is the official language of your country or if you have graduated from a U.S. institution proof of English proficiency is not required. For all other students, the Test of English as a Foreign Language (TOEFL) is required. The minimum score for consideration for admission is 100. For IELTS the minimum acceptable score is 7.0. We are now accepting Duolingo scores if you are not able to take the TOEFL or IELTS. The minimum score for Duolingo is 130 and the test can be found <https://englishtest.duolingo.com/applicants> Any application with a lesser score will not be reviewed. You must submit TOEFL (or IELTS) scores to PharmGRAD; institution code is 2927.

While not a requirement, it is recommended that applicants have research experience.

Financial Assistance and Tuition

Most students accepted to our PhD program are offered full tuition scholarship plus a teaching assistant stipend. Teaching assistant experience is not necessary as you will be trained upon acceptance into the program.

For the 2023-2024 academic year we granted scholarships and TA positions to 12 new admissions from a pool of approximately 244 applications. No financial assistance is available to MS students. Tuition Rates and Fees can be found on the school's Web site at <https://oafa.pitt.edu/financialaid/costs/>. NOTE: Health insurance is **REQUIRED** for all students.

All fees are the same for those students who are not offered a scholarship.

Length of Programs

The PhD Program requires a minimum of 72 credits. Most students complete the PhD degree within five years. The statute of limitations for completion of the PhD degree is ten years. (See Statute of Limitation/Leaves of Absence in the University catalog for more information.)

The MS (thesis-based) program requires a minimum of 30 credits. Most students complete the MS degree in two academic years. The statute of limitations for completing the MS degree is four consecutive calendar years from the first term of registration.

The Non-Thesis MS program requires a minimum of 34 credits and is usually completed within one calendar year (three semesters). The statute of limitations for completing the MS degree is four consecutive calendar years from the first term of registration.

Academic Standards

School of Pharmacy students are responsible for upholding the standards of behavior outlined in the University's Guidelines on Academic Integrity, the University's policy on sexual harassment, and other policies related to student behavior.

Master of Pharmacy Business Administration

The four semester Master of Pharmacy Business Administration (MPBA) program consists of 33 credits that build critical skills and expertise for pharmacy professionals seeking to substantially increase their business acumen and marketability.

Application and Requirements

Prerequisite

- Candidates with a PharmD or BS in Pharmacy will receive preferential admission

To apply to the program, you must complete the following requirements:

- Completed Application Form (Application PDF)
- Résumé or CV
- One self-nomination letter describing:
 - Current job responsibilities and assignments
 - Finest achievements and greatest disappointments
 - Challenges met within current organization
 - Civic and community activities and any offices held
 - Reasons and motivations for entering the MPBA program
 - Professional and personal goals and plans
- Two letters of professional reference
- College or university transcripts
- Graduate school admission exam scores (recommended)
- GMAT
- TOEFL or the IELTS examination (for anyone who speaks English as a second language)
- In-person interview with MPBA program representatives

Applicants will be contacted for scheduling of an on-site interview following receipt of complete packet of information

Tuition and Financial Aid

Tuition

Tuition Rates and Fees can be found on the school's Web site at <https://mpba.pitt.edu/tuition/>.

Financial Aid

Federal Stafford loans are available to U.S. citizens for up to \$20,500 per academic year. Refer to the University's Office of Admissions and Financial Aid for information on how to apply. U.S. citizens who are funding the degree in full, in part, or whose employer reimburses only after the end of a term, may consider financing. Furthermore, students may also finance their costs through standard loans.

Tuition Includes

- All books, cases, and simulations; meals during class sessions
- Microsoft Windows and Program Bundle software packages
- Access to all University of Pittsburgh student resources such as libraries, fitness facilities, and public transportation while on campus

Certificate in Pharmacy Business Administration

A new and unique executive-style certificate education program designed for working professionals striving to obtain an in-depth understanding of the Business of Medicines. The Certificate program consists of 18 credits and is designed to be completed in one year.

- Learn to Innovate and Solve Real World Healthcare Problems
 - Focus in Specialized Areas of Concentration
 - Increase your Pharmacy Business Acumen
- Focused Tracks

- Advanced Community Pharmacy Management
- Specialty Pharmacy Management
- Managed Care Pharmacy

Application and Requirements

Criteria for qualified candidates for admission into the PBA certificate program include:

- Candidates with a PharmD or BS in Pharmacy will receive preferential admission
- Students enrolled in another graduate program at the University of Pittsburgh are able to apply for concurrent enrollment in the PBA Certificate program. Tuition for the PBA Certificate program will be in addition and separate from the other graduate degree program.

To apply to the program, you must complete the following requirements:

- Completed Application Form (Application PDF)
 - Résumé or CV
 - One self-nomination letter describing:
 - Current job responsibilities and assignments
 - Finest achievements and greatest disappointments
 - Challenges met within current organization
 - Civic and community activities and any offices held
 - Reasons and motivations for entering the MPBA program
 - Professional and personal goals and plans
 - Two letters of professional reference
 - College or university transcripts
 - Graduate school admission exam scores (recommended)
 - GMAT
 - TOEFL or the IELTS examination (for anyone who speaks English as a second language)
 - In-person interview with MPBA program representatives
- Applicants will be contacted for scheduling of an on-site interview following receipt of complete packet of information.*

Tuition & Financial Aid

Tuition Rates and Fees can be found on the school's Web site at <https://oafa.pitt.edu/financialaid/costs/>. Tuition is charged at a per credit rate each term.

Students should investigate their eligibility for federal and state programs by calling the Office of Admissions and Financial Aid at 412-624-PITT or e-mail oafa@pitt.edu. U.S. citizens who are funding the degree in full, in part, or whose employer reimburses only after the end of a term, may wish to consider financing. Students may also finance their costs through standard loans.

The University's financial advisors are the best source of information about local grants or scholarships that extend beyond federal and state programs. Students are encouraged to look outside of the health professions for additional support. Students may be able to compete successfully for economically or academically awarded scholarships from private groups and associations.

Accreditation

Accreditation Council for Pharmacy Education

The University of Pittsburgh School of Pharmacy's Doctor of Pharmacy program is accredited by the Accreditation Council for Pharmacy Education, 190 South LaSalle Street, Suite 2850, Chicago, IL 60503, 312/664-3575; FAX 866/228-2631, web site www.acpe-accredit.org.

Program and Course Offerings

Certificate

Clinical Translational Sciences Certificate

This certificate program in Clinical Translational Sciences provides students within MS or PhD programs in the health sciences the opportunity to develop expertise in conducting clinical and translational research. Though the majority of courses are in person, the certificate is considered hybrid because one course is offered online only. The core curriculum provides trainees with the basic set of skills that are required by clinical and translational investigators in all fields of interest. It is made up of 2 curricular cores: the first is the Research Core, which consists of 8 credits of courses in computer methods, clinical research methods and biostatistics. The second is a Regression and Ethics Core, which includes 3 credits of courses in Regression and ANOVA, Logistical Regression and Ethics in research. Combined with the mentorship from their graduate programs, this certificate provides added expertise and develops students' ability to conduct clinical and translational research.

Detailed Admissions Requirements

Students must first be admitted into a doctoral or masters degree granting program in one of the Schools of the Health Sciences prior to their acceptance into the clinical translational sciences graduate certificate program. Once admitted for graduate study within a program, students may apply to the Institute for Clinical Research Education for admission to the certificate program. Students must be in good academic standing and possess a strong interest in clinical and translational science

Contact Information

Institute for Clinical Research Education
200 Meyran Ave, Suite 300
Pittsburgh, PA 15213
Phone: 412-586-9632
Fax: 412-586-9672

Email: icre@pitt.edu

Admissions Criteria

- Applicants must meet the following requirements before filling out an online application.
- Candidates must be in a graduate program (PhD or MS) in the health sciences
- Candidates must have a high level of interest and potential for the pursuit of innovative clinical and translational research as a major focus of their career plan.
- A minimum GPA of 3.2 on a 4.0 scale
- TOEFL, IELTS, and Duolingo scores (when applicable)
- GRE scores are not accepted

Timeline

The Certificate in Clinical Translational Sciences accepts applications from December 15 through February 28 each year. In order to guarantee that you are considered for admission, we must receive your application and all component parts by February 28. Students will be notified via email of admission decisions approximately 1-2 months following the close of the application cycle.

Financial Assistance

The Institute for Clinical Research Education does not provide financial aid. Unless students have other funding sources, they are responsible for covering the tuition costs, taxes, and fees associated with their course enrollment.

Clinical Translation Sciences Certificate - Course Curriculum

Research Core (8 Credits)

- CLRES 2005 - COMPUTER METHODS FOR CLINICAL RESEARCH
- CLRES 2010 - CLINICAL RESEARCH METHODS
- CLRES 2020 - BIOSTATISTICS
 - *CLRES 2020 (Biostatistics) may be substituted for an alternative graduate level biostatistics course up to 6 credits

Regression & Ethics Core (3 Credits)

- CLRES 2021 - REGRESSION AND ANOVA
- CLRES 2022 - LOGISTIC REGRESSION
- CLRES 2050 - ETHICS & RESPONSIBLE CONDUCT OF RESEARCH (ONLINE)

Total Credits: 11

Concentration

Doctor of Pharmacy - Community Leadership, Innovation, and Practice ARCO

The Area of Concentration in Community Leadership, Innovation, and Practice (ARCO-CLIP) provides students with mentoring and learning experiences to cultivate advanced patient care, develop health service innovations, acquire leadership and management skills, and enhance community health. Students completing the ARCO-CLIP will be well prepared to enter leadership and patient care roles in community practice and will be highly competitive for residencies and other advanced practice training opportunities.

ARCO-CLIP Academic Requirements

The ARCO-CLIP consists of six (6) credits of approved elective classroom-based courses, four Advanced Pharmacy Practice Experiences (APPEs), and an approved project conducted under the guidance of an advisor. A minimum of 21 credits of coursework and rotations in the ARCO-CLIP are required. It does not require the student to take additional credits, but rather is a way for students to concentrate their classroom and experiential learning experiences in a focused way to meet the intent of the area of concentration.

Choose six credits from pre-approved courses inside and outside of the School of Pharmacy:

- PHARM 5819 - COMMUNITY LEADERSHIP INNOVATION & PRACTICE (CLIP)
- PHARM 5812 - HEALTHCARE INNOVATIONS 1
- PHARM 5820 - PHARMACY INNOVATION 1
- PHARM 5821 - PHARMACY INNOVATION 2

OR Additional courses inside or outside the School of Pharmacy may also be accepted on a case-by-case basis with prior approval of the oversight group, the course instructor, and the School of Pharmacy Curriculum Committee

Doctor of Pharmacy - Geriatrics & Palliative Care ARCO

The purpose of the Area of Concentration in Geriatrics and Palliative Care (ARCO-GPC) is to allow students to pursue an area of emphasis with geriatrics and palliative care consistent with their professional interests during their Doctor of Pharmacy (PharmD) education. The ARCO-GPC is intended to give students an in-depth exposure to geriatrics and palliative care pharmacy practice.

ARCO-GPC Academic Requirements

The ARCO-GPC consists of six (6) credits of approved elective classroom-based courses, two Advanced Pharmacy Practice Experiences (APPEs), and an approved project conducted under the guidance of an advisor. A minimum of 16 credits of coursework and rotations in the ARCO-GPC are required. It does not require the student to take additional credits, but rather is a way for students to concentrate their classroom and experiential learning experiences in a focused way to meet the intent of the area of concentration.

Choose six credits from pre-approved courses inside and outside of the School of Pharmacy:

- BCHS 2532 - DIMENSIONS OF AGING: CULTURE AND HEALTH
- BIOETH 2001 - ETHICS AND AGING
- CLRES 2601 - PRINCIPLES AND PRACTICES OF PALLIATIVE CARE PART 1
- CLRES 2602 - PRINCIPLES AND PRACTICES OF PALLIATIVE CARE PART 2
- EPIDEM 2004 - PATHOPHYSIOLOGY ACROSS THE LIFE SPAN
- EPIDEM 2900 - ADVANCED EPIDEMIOLOGY OF AGING
- GERON 2001 - ETHICS AND AGING
- GERON 2006 - MULTI-DISCIPLINARY ASPECTS OF DEMENTIA
- GERON 2008 - HUMAN PERFORMANCE, NUTRITION AND AGING
- GERON 2011 - NAVIGATING GRIEF AND LOSS IN OLDER ADULTS
- PHARM 2003 - PHARMACOEPIDEMIOLOGY
- PHARM 5851 - SPECIAL TOPICS 1

PHARM 1095 Community Connector Course

PSY 1230 Psychology of Death and Dying

SOC 1307 Sociology of Health Illness and Disease

SOC 1450 Health and Illness

OR Additional courses inside or outside the School of Pharmacy may also be accepted on a case-by-case basis with prior approval of the oversight group, the course instructor, and the School of Pharmacy

Curriculum Committee

Doctor of Pharmacy - Global Health ARCO

The purpose of the Area of Concentration in Global Health (ARCO-GH) is to allow students to pursue an area of emphasis within global health consistent with their professional interests and while completing their PharmD degree. The ARCO-GH is intended to give students an in-depth exposure to global health pharmacy practice.

ARCO-GH Academic Requirements

The ARCO-GH consists of six credits of approved elective classroom-based courses, two Advanced Pharmacy Practice Experiences (APPEs) in global health, and an approved project conducted under the guidance of an advisor. A minimum of 16 credit hours of coursework and rotations in the ARCO-GH are required. It does not require the student to take additional credits, but rather is a way for students to concentrate their classroom and experiential learning experiences in a focused way to meet the intent of the area of concentration.

Choose six credits from pre-approved courses inside and outside of the School of Pharmacy:

- BIOINF 2124 - PRINCIPLES OF GLOBAL HEALTH INFORMATICS
- PHARM 5801 - PHARMACEUTICAL CARE TO UNDERSERVED POPULATIONS
- PHARM 5814 - GLOBAL HEALTH: DETERMINANTS AND APPLICATION
- PHARM 5831 - HEALTHCARE FOR LGBTQIA COMMUNITY
- PHARM 5851 - SPECIAL TOPICS 1
- PUBHLT 2025 - CONCEPTS AND METHODS IN GLOBAL HEALTH

OR Additional courses inside or outside the School of Pharmacy may also be accepted on a case-by-case basis with prior approval of the oversight group, the course instructor, and the School of Pharmacy

Curriculum Committee

Doctor of Pharmacy - Pediatrics ARCO

The purpose of the Area of Concentration in Pediatrics (ARCO-PED) is to allow students to pursue an area of emphasis in pediatric pharmacy practice so as to prepare them to better meet the specialization of pediatric pharmacy while completing the PharmD degree.

ARCO-PED Academic Requirements

The ARCO-PED consists of six credits of approved elective classroom-based courses, two Advanced Pharmacy Practice Experiences (APPEs) in pediatrics, and an approved project conducted under the guidance of an advisor. A minimum of 16 credit hours of coursework and rotations in the ARCO-PED are required. It does not require the student to take additional credits, but rather is a way for students to concentrate their classroom and experiential learning experiences in a focused way to meet the intent of the area of concentration

Choose six credits from pre-approved courses inside and outside of the School of Pharmacy:

- PHARM 5806 - PEDIATRIC PHARMACEUTICAL CARE
- PHARM 5826 - ADVANCED PEDIATRIC PHARMACEUTICAL CARE
- PHARM 5851 - SPECIAL TOPICS 1

OR Additional courses inside or outside the School of Pharmacy may also be accepted on a case-by-case basis with prior approval of the oversight group, the course instructor, and the School of Pharmacy Curriculum Committee

Doctor of Pharmacy - PharmacoAnalytics ARCO

The purpose of the Area of Concentration in Pharmacoanalytics (ARCO-PA) in the School of Pharmacy is to allow students to learn and implement data analysis techniques while completing their PharmD degree. The ARCO-PA is designed to help students utilize data and technology to enhance pharmaceutical use, operations, and outcomes and drive better quality patient care while also providing pharmacists with the tools and knowledge necessary to analyze trends from large data sets and then interpret these trends in a way that allows them to improve their daily practice. Students will become acquainted with big data sources, managing data, data analytic techniques from experience with statistical and analytics software to apply towards decision-making processes in the pharmacy field, including drug development, drug pricing and acquisition, and patient care outcomes.

ARCO-PA Academic Requirements

The ARCO-PA consists of six credits of approved elective classroom-based courses, two Advanced Pharmacy Practice Experiences (APPEs), and an approved project conducted under the guidance of an advisor. A minimum of 16 credit hours of coursework and rotations in the ARCO-PA are required. It does not require the student to take additional credits, but rather is a way for students to concentrate their classroom and experiential learning experiences in a focused way to meet the intent of the area of concentration.

Choose six credits from pre-approved courses inside and outside of the School of Pharmacy:

- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- PHARM 3045 - ADVANCED STATISTICAL METHODS
- PHARM 3073 - APPLIED MULTIVARIATE STATISTICAL ANALYSIS IN PHARMACEUTICAL SCIENCES
- PHARM 5830 - DISCOVERING SCIENTIFIC INQUIRY (DSI)
- PHARM 5834 - PYTHON FOR DATA MANAGEMENT AND ANALYTICS
- PHARM 5851 - SPECIAL TOPICS 1

OR Additional courses inside or outside the School of Pharmacy may also be accepted on a case-by-case basis with prior approval of the oversight group, the course instructor, and the School of Pharmacy Curriculum Committee

Doctor of Pharmacy - Pharmacotherapy Scholars Program

ARCO

The purpose of the Area of Concentration - Pharmacotherapy Scholars Program (ARCO-PT) is to prepare pharmacy students to become highly proficient patient care providers and for a successful transition into competitive post-graduate residency training programs.

ARCO-PT Academic Requirements

The ARCO-PT consists of six (6) credits of approved elective classroom-based courses, four Advanced Pharmacy Practice Experiences (APPEs), and an approved project conducted under the guidance of an advisor. A minimum of 16 credits of coursework and rotations in the ARCO-PT are required. It does not require the student to take additional credits, but rather is a way for students to concentrate their classroom and experiential learning experiences in a focused way to meet the intent of the area of concentration.

Choose six credits from pre-approved courses inside and outside of the School of Pharmacy:

- PHARM 5813 - ACUTE CARE PHARMACOTHERAPY SIMULATION
- PHARM 5830 - DISCOVERING SCIENTIFIC INQUIRY (DSI)
OR Additional courses inside or outside the School of Pharmacy may also be accepted on a case-by-case basis with prior approval of the oversight group, the course instructor, and the School of Pharmacy Curriculum Committee

Doctor of Pharmacy - Pharmacy Business Administration

ARCO

The purpose of the Area of Concentration in Pharmacy Business Administration (ARCO-PBA) is to allow students to pursue an area of emphasis within management consistent with their professional interests and expose students to an area of pharmacy practice that may best suit their interests. Student leaders and informal organizers may discover that pharmacy leadership provides an energizing career path.

ARCO-PBA Academic Requirements

The ARCO-PBA consists of six (6) credits of approved elective classroom-based courses, four Advanced Pharmacy Practice Experiences (APPEs), and an approved project conducted under the guidance of an advisor. A minimum of 16 credits of coursework and rotations in the ARCO-PBA are required. It does not require the student to take additional credits, but rather is a way for students to concentrate their classroom and experiential learning experiences in a focused way to meet the intent of the area of concentration.

Choose six credits from pre-approved courses inside and outside of the School of Pharmacy:

- BCHS 2558 - HEALTH PROGRAM EVALUATION
- PHARM 5812 - HEALTHCARE INNOVATIONS 1
- PHARM 5815 - CONCEPTS OF MANAGED CARE PHARMACY
- PHARM 5851 - SPECIAL TOPICS 1
BUSERV 1915 Introduction to Management
COMMRC 1102 Organizational Communication
COMMRC 1106 Small Group Communication
NUR 1900 Global Health Care

OR Additional courses inside or outside the School of Pharmacy may also be accepted on a case-by-case basis with prior approval of the oversight group, the course instructor, and the School of Pharmacy Curriculum Committee

Doctor of Pharmacy - Research ARCO

The purpose of the Area of Concentration in Research (ARCO-RES) in the University of Pittsburgh School of Pharmacy Doctor of Pharmacy (PharmD) program is to provide students exposure to research fundamentals, cultivate an appreciation for clinical and translational research, and to help position students as highly competitive candidates for formal post-PharmD research education and training.

ARCO-RES Academic Requirements

The ARCO-RES consists of six (6) credits of approved elective classroom-based courses, four Advanced Pharmacy Practice Experiences (APPEs), and an approved project conducted under the guidance of an advisor. A minimum of 16 credits of coursework and rotations in the ARCO-RES are required. It does not require the student to take additional credits, but rather is a way for students to concentrate their classroom and experiential learning experiences in a focused way to meet the intent of the area of concentration.

Choose six credits from pre-approved courses inside and outside of the School of Pharmacy:

- PHARM 2001 - PHARMACEUTICAL ANALYSIS
- PHARM 2003 - PHARMACOEPIDEMIOLOGY
- PHARM 3009 - ADVANCES IN PHARMACEUTICAL SCIENCES
- PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3025 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3034 - TOPICS IN TRANSLATIONAL RESEARCH
- PHARM 3040 - STATISTICAL METHODS
- PHARM 3068 - COMPUTATIONAL SYSTEMS PHARMACOLOGY
- PHARM 3069 - PHARMACOMETRICS
- PHARM 3072 - TOPICS IN PHARMACOKINETICS/PHARMACODYNAMICS JOURNAL CLUB
- PHARM 5819 - COMMUNITY LEADERSHIP INNOVATION & PRACTICE (CLIP)
- PHARM 5820 - PHARMACY INNOVATION 1
- PHARM 5821 - PHARMACY INNOVATION 2
- PHARM 5834 - PYTHON FOR DATA MANAGEMENT AND ANALYTICS
- PHARM 5851 - SPECIAL TOPICS 1

Doctoral

Pharmaceutical Sciences - Biochemical Pharmacology Track, PhD

Biochemical Pharmacology

The biochemical pharmacology track focuses on the biochemical mechanisms responsible for drug and other xenobiotic, and gene actions on living systems, both healthy and compromised.

- You will have the opportunity to study with faculty in multiple areas including behavioral, cardiovascular and endocrine pharmacology, neuropharmacology, immunopharmacology, chemotherapy, toxicology, and metabolic diseases.
- Your research opportunities include studying the biochemical mechanism of drugs and genes in cell cultures and/or healthy and compromised animal models.
- You will have the opportunity to create and/or use genetically engineered animals that include transgenic and knockout mice, as well as to integrate disease models into the animal models in order to study the gene function in diseases.
- You will develop a broad knowledge of the regulation of drug metabolizing enzymes and transporters and the implications of this regulation in drug metabolism.

PhD Comprehensive Exam and Dissertation

Requirements:

Students must complete a total of 72 credit hours to fulfill the requirements for the PhD. Required courses for all PhD students are listed below. Students who have had prior course work or extensive experience in a given area may be exempted from the required course at the discretion of the faculty. The remaining credit requirements are completed through elective courses and dissertation research. The specific plan of study is developed by the student and their faculty advisor and committee. Courses should be selected to assure an adequate breadth of knowledge as well as depth in the student's focus area. For students interested in the Clinical Pharmaceutical Scientist Track, you may find the curriculum here: http://www.pharmacy.pitt.edu/research/clinical_pharma_science.php

1st Year: Fall

- PHARM 3040 - STATISTICAL METHODS
- PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3028 - PHARMACOLOGY AND THERAPEUTICS
- PHARM 3043 - TEACH ME TO TEACH YOU
- PHARM 3042 - RESEARCH PRACTICUM

1st Year: Spring

- PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3042 - RESEARCH PRACTICUM
- Track-Specific and/or Electives. - 3-4 credits

2nd Year: Fall

- PHARM 3028 - PHARMACOLOGY AND THERAPEUTICS
- PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3038 - ESSENTIALS COMPETITIVE GRANT WRITING 1
- PHARM 3042 - RESEARCH PRACTICUM
- Track-Specific and/or Electives. - 3-4 credits

2nd Year: Spring

- PHARM 3039 - ESSENTIALS COMPETITIVE GRANT WRITING 2
- PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR

- PHARM 3042 - RESEARCH PRACTICUM
- Track-Specific and/or Electives. - 3-4 credits

3rd Year: Fall

- PHARM 3042 - RESEARCH PRACTICUM
- Track-Specific and/or Electives. - 3-4 credits

PhD Comprehensive Exam and Dissertation

Each student follows a program of study developed in conjunction with the major advisor with input from the student's doctoral committee. The program of study must contain all of the program core courses as well as elective courses specific to the student's focus area.

Following completion of course work, students are required to complete a comprehensive examination. To be eligible for the comprehensive examination, students must be in full graduate status and have completed didactic course work with a minimum grade point average (GPA) of 3.00. To qualify for advancement to candidacy for the Doctor of Philosophy degree the student must pass the comprehensive examination.

Admission to PhD candidacy constitutes a promotion of the student to the most advanced stage of graduate study and provides formal approval to devote essentially exclusive attention to research and writing of the dissertation.

Each PhD student must write a dissertation that presents the results of research carried out by the student. An appropriate research project involves a substantive piece of original and independent research grounded in an appropriate body of literature. It is relevant to an identifiable field as it is currently practiced. It represents a hypothesis tested by collection and analysis of data and provides a significant contribution or advancement to that field.

See Regulations Pertaining to Doctoral Degrees for a full overview of regulations and procedures for PhD candidates.

Further information is available on the School of Pharmacy website:
http://www.pharmacy.pitt.edu/programs/grad/grad_index.php.

Pharmaceutical Sciences - Clinical Pharmaceutical Scientist Track, PhD

Clinical Pharmaceutical Scientist

The clinical pharmaceutical scientist is a specialty track in which students with expertise in pharmacotherapeutics investigate both the clinical and mechanistic elements of drug therapy issues.

- You will learn experimental design, experimental methods, data analysis, and data interpretation of human-based research projects.
- You will study how research discoveries are translated into practices that promote health and prevent disease.
- You will learn the process required to implement new therapies as standards of care through human-based research projects.

Pharmaceutical Sciences - Medicinal Chemistry Track, PhD

Medicinal Chemistry

The medicinal chemistry track is a complex scientific discipline whose focus is to develop molecules that can impact human health by discovering, designing, synthesizing and characterizing safe and effective agents for disease therapy and diagnosis. The research involves a multidisciplinary approach encompassing chemistry and biology, and includes organic synthesis, protein and nucleic acid chemistry, natural product chemistry, computational chemistry, molecular biology, cell biology, structural biology, pharmacology and proteomics.

- You will learn to design, synthesize and characterize new medicinal agents and enhance the biological activity of existing pharmaceutical agents.
- You will learn to use computational, biophysical, structural biology and cell-based screening technologies to identify natural and synthetic compounds for pharmacological activity and to conduct structure-based drug design.
- You will isolate, characterize, and synthesize compounds based on natural products, as well as target identification for biologically active natural products.

Pharmaceutical Sciences - Pharmaceutical Outcomes and Policy Research Track, PhD

Pharmaceutical Outcomes and Policy Research

Pharmaceutical Outcomes and Policy Research (POPR) is a specialty track/program in Pharmaceutical Sciences. The POPR track will train students to investigate the impact and outcomes of pharmaceutical products, pharmacy services, and pharmaceutical policies across health care systems. The core mission of POPR is the advancement of knowledge about the safety and effectiveness of medicines, and pharmacy's role in improving population health. POPR students most often focus on patient-centered outcomes such as access, safety, quality of care, costs, and patient-reported health. Graduates will be trained to work in a broad range of settings, including: academia; pharmaceutical industry; government organizations such as FDA, AHRQ, NIH; contract research organizations; and health care systems

- You will learn epidemiological study designs, data management, data analysis, and data interpretation.
- You will develop strong quantitative methodological skills in pharmaceutical outcomes and health services research.
- You will apply social/behavioral theory to the study of patient, provider, and organizational behaviors as it relates to pharmaceuticals and pharmacy practice.
- You will learn how pharmaceutical outcomes research is used to inform clinical practice and guide health policy decisions.

PhD Comprehensive Exam and Dissertation

Requirements

Students must complete a total of 72 credit hours to fulfill the requirements for the PhD. Required courses for all MS students are listed below. Students who have had prior course work or extensive experience in a given area may be exempted from the required course at the discretion of the faculty. The remaining credit requirements are completed through elective courses and thesis research. The specific plan of study is developed by the student and their faculty advisor and committee. Courses should be selected to assure an adequate breadth of knowledge as well as depth in the student's focus area.

1st Year: Fall

- BOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- EPIDEM 2185 - INTRODUCTION TO SAS
- PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
 - Journal Club
 - Electives

1st Year: Spring

- EPIDEM 2180 - FUNDAMENTALS OF EPIDEMIOLOGICAL METHODS
- PHARM 2003 - PHARMACOEPIDEMOLOGY
- PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR

2nd Year: Fall

- PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3038 - ESSENTIALS COMPETITIVE GRANT WRITING 1
- PHARM 3043 - TEACH ME TO TEACH YOU
 - Journal Club
 - Social and Behavioral Theory

2nd Year: Spring

- PHARM 3039 - ESSENTIALS COMPETITIVE GRANT WRITING 2
- PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3062 - ADVANCED METHODS IN PHARMACEUTICAL OUTCOMES & POLICY RESEARCH
- CLRES 2050 - ETHICS & RESPONSIBLE CONDUCT OF RESEARCH (ONLINE)
 - Journal Club
 - Electives

3rd Year: Fall

- PHARM 3042 - RESEARCH PRACTICUM
 - Track-Specific and/or Electives

Pharmaceutical Sciences - Pharmaceutics Track, PhD

Pharmaceutics

The pharmaceutics track is concentrated on the study of the design of pharmaceutical dosage forms and their interaction with the human body. Topics included are physical pharmacy, bioanalysis, drug delivery and targeting, drug metabolism, drug transport, pharmacokinetics and pharmacodynamics.

- You will develop a thorough understanding of how to apply principles of physical pharmacy to dosage form design and optimization of drug product performance.
- You will develop the fundamentals required for design of both traditional and complex state-of-the-art drug delivery systems and skills essential for the advancement of targeted drug therapies using small molecules, proteins, peptides and other biomolecules, probiotics, and tissue engineered platforms.
- You will gain knowledge of the human body and the interaction of medications with the human body including metabolism, pharmacokinetics and pharmacodynamics.
- Your research opportunities include formulation of dosage forms, development of novel delivery systems and development of complex new therapies for site specific action, establishing novel markers for disease, study of metabolic pathways, development of bioanalytical techniques, and evaluation of absorption, distribution, and elimination of drug substances and their regulation.

Pharmaceutical Sciences - Pharmacometrics and Systems Pharmacology Track, PhD

The Pharmacometrics and Systems Pharmacology (PSP) is an interdisciplinary science to study drug actions and rational development of new drugs through network analysis, multitype-multiscale modeling and simulations "**mechanism-driven**", as well as data analysis "**data-driven**". The PSP track focuses on applying Pharmacometrics and System Pharmacology techniques to facilitate the development of novel drug candidates that are less likely to fail during clinical trials and to provide a better understanding of drug mechanisms of action and therapeutic effects at the systems pharmacology level.

- You will develop a broad knowledge of pharmacometrics and systems pharmacology to develop drug candidates that are less likely to fail during clinical trials.
- You will develop strong computational modeling and simulation expertise from drug target fishing, to drug lead identification, to drug profile optimization.
- You will develop strong computational expertise on pharmacokinetics (PK) and pharmacodynamics (PD) modeling and simulation.
- You will develop skills on multiscale modeling of biological processes at the molecular, gene, organ and organism levels.
- You will have opportunities to study with faculty from a variety of background including computer-aided drug design, computational and systems biology/pharmacology, population PK/PD modeling, computational chemical genomics, computational biophysics, etc.
- Candidates with programming experience, basic/intermediate knowledge in statistics and/or hands-on modeling experience are highly desired.

This program is associated with the Computational Chemical Genomics Screening Center. More about this program track is here.

PhD Comprehensive Exam and Dissertation

Requirements:

Students must complete a total of 72 credit hours to fulfill the requirements for the PhD. Required courses for all PhD students are listed below. Students who have had prior course work or extensive experience in a given area may be exempted from the required course at the discretion of the faculty. The remaining credit requirements are completed through elective courses and dissertation research. The specific plan of study is developed by the student and their faculty advisor and committee. Courses should be selected to assure an adequate breadth of knowledge as well as depth in the student's focus area.

1st Year: Fall

- PHARM 2001 - PHARMACEUTICAL ANALYSIS
- PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3042 - RESEARCH PRACTICUM
 - Choose one of the following Journal Club courses:
- PHARM 3009 - ADVANCES IN PHARMACEUTICAL SCIENCES
- PHARM 3036 - ADVANCES IN DRUG DELIVERY AND REGENERATIVE MEDICINE
- PHARM 3048 - DRUG DESIGN AND DEVELOPMENT JOURNAL CLUB
 - Track-specific and/or Electives
- PHARM 3045 - ADVANCED STATISTICAL METHODS

1st Year: Spring

- PHARM 3025 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3042 - RESEARCH PRACTICUM
 - Choose one of the following Journal Club courses:
- PHARM 3009 - ADVANCES IN PHARMACEUTICAL SCIENCES
- PHARM 3048 - DRUG DESIGN AND DEVELOPMENT JOURNAL CLUB
- PHARM 3072 - TOPICS IN PHARMACOKINETICS/PHARMACODYNAMICS JOURNAL CLUB
 - Track-specific and/or Electives

2nd Year: Fall

- PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3038 - ESSENTIALS COMPETITIVE GRANT WRITING 1
- PHARM 3042 - RESEARCH PRACTICUM
 - Choose one of the following Journal Club courses:
- PHARM 3009 - ADVANCES IN PHARMACEUTICAL SCIENCES
- PHARM 3036 - ADVANCES IN DRUG DELIVERY AND REGENERATIVE MEDICINE
- PHARM 3048 - DRUG DESIGN AND DEVELOPMENT JOURNAL CLUB
 - Track-specific and/or Electives

2nd Year: Spring

- PHARM 3025 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3039 - ESSENTIALS COMPETITIVE GRANT WRITING 2
- PHARM 3042 - RESEARCH PRACTICUM
 - Choose one of the following Journal Club courses:
- PHARM 3009 - ADVANCES IN PHARMACEUTICAL SCIENCES
- PHARM 3072 - TOPICS IN PHARMACOKINETICS/PHARMACODYNAMICS JOURNAL CLUB
- PHARM 3048 - DRUG DESIGN AND DEVELOPMENT JOURNAL CLUB
 - Track-specific and/or Electives

3rd Year: Fall

- PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3042 - RESEARCH PRACTICUM
Choose one of the following Journal Club courses:
 - PHARM 3009 - ADVANCES IN PHARMACEUTICAL SCIENCES
 - PHARM 3036 - ADVANCES IN DRUG DELIVERY AND REGENERATIVE MEDICINE
 - PHARM 3048 - DRUG DESIGN AND DEVELOPMENT JOURNAL CLUBTrack-specific and/or Electives

3rd Year: Spring

- PHARM 3042 - RESEARCH PRACTICUM
Track-specific and/or Electives

PhD Comprehensive Exam and Dissertation

Each student follows a program of study developed in conjunction with the major advisor with input from the student's doctoral committee. The program of study must contain all of the program core courses as well as elective courses specific to the student's focus area.

Following completion of course work, students are required to complete a comprehensive examination. To be eligible for the comprehensive examination, students must be in full graduate status and have completed didactic course work with a minimum grade point average (GPA) of 3.00. To qualify for advancement to candidacy for the Doctor of Philosophy degree the student must pass the comprehensive examination.

Admission to PhD candidacy constitutes a promotion of the student to the most advanced stage of graduate study and provides formal approval to devote essentially exclusive attention to research and writing of the dissertation.

Each PhD student must write a dissertation that presents the results of research carried out by the student. An appropriate research project involves a substantive piece of original and independent research grounded in an appropriate body of literature. It is relevant to an identifiable field as it is currently practiced. It represents a hypothesis tested by collection and analysis of data and provides a significant contribution or advancement to that field.

See Regulations Pertaining to Doctoral Degrees for a full overview of regulations and procedures for PhD candidates.

Further information is available on the School of Pharmacy
website: http://www.pharmacy.pitt.edu/programs/grad/grad_index.php.

Graduate Certificate

Pharmacy Business Administration Graduate Certificate

Certificate in Pharmacy Business Administration

A new and unique executive-style certificate education program designed for working professionals striving to obtain an in-depth understanding of the Business of Medicines. The Certificate program consists of 18 credits and is designed to be completed in one year (four semesters).

- Learn to Innovate and Solve Real World Healthcare Problems

- Focus in Specialized Areas of Concentration
 - Increase your Pharmacy Business Acumen
- Focused Tracks

- Advanced Community Pharmacy Management
- Specialty Pharmacy Management
- Managed Care Pharmacy

Contact Information

Bridget T. Regan, MBA, RPh
 Director of Pharmacy Business Programs and Assistant Professor
 University of Pittsburgh
 School of Pharmacy
 Pittsburgh, PA 15261

Application and Requirements

Criteria for qualified candidates for admission into the PBA certificate program include:

- Candidates with a PharmD or BS in Pharmacy will receive preferential admission
- Students enrolled in another graduate program at the University of Pittsburgh are able to apply for concurrent enrollment in the PBA Certificate program. Tuition for the PBA Certificate program will be in addition and separate from the other graduate degree program.

To apply to the program, you must complete the following requirements:

- Completed Application Form (Application PDF)
- Résumé or CV
- One self-nomination letter describing:
 - Current job responsibilities and assignments
 - Finest achievements and greatest disappointments
 - Challenges met within current organization
 - Civic and community activities and any offices held
 - Reasons and motivations for entering the MPBA program
 - Professional and personal goals and plans
- Two letters of professional reference
- College or university transcripts
- Graduate school admission exam scores (recommended)
- GMAT
- TOEFL or the IELTS examination (for anyone who speaks English as a second language)
- In-person interview with MPBA program representatives

Applicants will be contacted for scheduling of an on-site interview following receipt of complete packet of information.

Tuition & Financial Aid

Tuition Rates and Fees can be found on the school's Web site at <https://oafa.pitt.edu/financialaid/costs/>. Tuition is charged at a per credit rate each term.

Students should investigate their eligibility for federal and state programs by calling the Office of Admissions and Financial Aid at 412-624-PITT or e-mail oafa@pitt.edu. U.S. citizens who are funding the degree in full, in part, or whose employer reimburses only after the end of a term, may wish to consider financing. Students may also finance their costs through standard loans.

The University's financial advisors are the best source of information about local grants or scholarships that extend beyond federal and state programs. Students are encouraged to look outside of the health professions for additional support. Students may be able to compete successfully for economically or academically awarded scholarships from private groups and associations.

Tuition Includes

- All books, cases, and simulations
- Microsoft Windows and Program Bundle software packages
- Access to all University of Pittsburgh student resources such as libraries, fitness facilities, and public transportation while on campus

Requirements

Pharmacy Administration Core Courses

- PHARM 5910 - US HEALTHCARE SYSTEM
- PHARM 5911 - HEALTHCARE SALES AND MARKETING
- PHARM 5912 - LEADERSHIP AND ETHICS IN HEALTHCARE
- PHARM 5914 - GRADUATE EXECUTIVE BOARDROOM
- PHARM 5915 - EXECUTIVE HEALTHCARE INNOVATIONS
- PHARM 5916 - PREDICTIVE ANALYTICS IN PHARMACY AND KNOWLEDGE DISCOVERY FROM BIG DATA

Focused Areas

Choose two paired and sequenced courses from:

- PHARM 5926 - ADVANCED COMMUNITY PHARMACY MANAGEMENT 1
- PHARM 5927 - ADVANCED COMMUNITY PHARMACY MANAGEMENT 2
- PHARM 5928 - SPECIALTY PHARMACY MANAGEMENT 1
- PHARM 5929 - SPECIALTY PHARMACY MANAGEMENT 2
- PHARM 5930 - PHARMACY BENEFITS MANAGEMENT 1
- PHARM 5931 - PHARMACY BENEFITS MANAGEMENT 2

Master's

Pharmaceutical Sciences - Biochemical Pharmacology Track, MS

Biochemical Pharmacology

The biochemical pharmacology track focuses on the biochemical mechanisms responsible for drug and other xenobiotic, and gene actions on living systems, both healthy and compromised.

- You will have the opportunity to study with faculty in multiple areas including behavioral, cardiovascular and endocrine pharmacology, neuropharmacology, immunopharmacology, chemotherapy, toxicology, and metabolic diseases.
- Your research opportunities include studying the biochemical mechanism of drugs and genes in cell cultures and/or healthy and compromised animal models.
- You will have the opportunity to create and/or use genetically engineered animals that include transgenic and knockout mice, as well as to integrate disease models into the animal models in order to study the gene function in diseases.
- You will develop a broad knowledge of the regulation of drug metabolizing enzymes and transporters and the implications of this regulation in drug metabolism.

MS Core Curriculum

Requirements:

Students must complete a total of 30 credit hours to fulfill the requirements for the MS. Required courses for all MS students are listed below. Students who have had prior course work or extensive experience in a given area may be exempted from the required course at the discretion of the faculty. The remaining credit requirements are completed through elective courses and thesis research. The specific plan of study is developed by the student and their faculty advisor and committee. Courses should be selected to assure an adequate breadth of knowledge as well as depth in the student's focus area.

1st Year: Fall

- PHARM 3040 - STATISTICAL METHODS
- PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3028 - PHARMACOLOGY AND THERAPEUTICS
- PHARM 3042 - RESEARCH PRACTICUM
 - Choose one of the following Journal Club Courses:
 - PHARM 3000 - TOPICS IN NEUROSCIENCE
 - PHARM 3009 - ADVANCES IN PHARMACEUTICAL SCIENCES
 - PHARM 3036 - ADVANCES IN DRUG DELIVERY AND REGENERATIVE MEDICINE

1st Year: Spring

- PHARM 2001 - PHARMACEUTICAL ANALYSIS
- PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3042 - RESEARCH PRACTICUM
 - Choose one of the following Journal Club Courses:
 - PHARM 3000 - TOPICS IN NEUROSCIENCE

- PHARM 3009 - ADVANCES IN PHARMACEUTICAL SCIENCES

2nd Year: Fall

- PHARM 2010 - MASTER OF SCIENCE THESIS
- Track-Specific and/or Electives. - 3-4 credits

2nd Year: Spring

- PHARM 2010 - MASTER OF SCIENCE THESIS
- Track-Specific and/or Electives. - 3-4 credits

MS Comprehensive Exam and Thesis

The thesis for the MS must represent an original research project or a comprehensive and detailed survey of some topic of current interest in the pharmaceutical sciences. It must be defended in an oral examination.

Pharmaceutical Sciences - Clinical Pharmaceutical Scientist Track, MS

Clinical Pharmaceutical Scientist

The clinical pharmaceutical scientist is a specialty track in which students with expertise in pharmacotherapeutics investigate both the clinical and mechanistic elements of drug therapy issues.

- You will learn experimental design, experimental methods, data analysis, and data interpretation of human-based research projects.
- You will study how research discoveries are translated into practices that promote health and prevent disease.
- You will learn the process required to implement new therapies as standards of care through human-based research projects.

MS Core Curriculum

Requirements:

Students must complete a total of 30 credit hours to fulfill the requirements for the MS. Required courses for all MS students are listed below. Students who have had prior course work or extensive experience in a given area may be exempted from the required course at the discretion of the faculty. The remaining credit requirements are completed through elective courses and thesis research. The specific plan of study is developed by the student and their faculty advisor and committee. Courses should be selected to assure an adequate breadth of knowledge as well as depth in the student's focus area.

1st Year: Fall

- PHARM 3040 - STATISTICAL METHODS
- PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3028 - PHARMACOLOGY AND THERAPEUTICS

- PHARM 3042 - RESEARCH PRACTICUM
Choose one of the following Journal Club Courses:
- PHARM 3000 - TOPICS IN NEUROSCIENCE
- PHARM 3009 - ADVANCES IN PHARMACEUTICAL SCIENCES
- PHARM 3036 - ADVANCES IN DRUG DELIVERY AND REGENERATIVE MEDICINE

1st Year: Spring

- PHARM 2001 - PHARMACEUTICAL ANALYSIS
- PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3042 - RESEARCH PRACTICUM
Choose one of the following Journal Club Courses:
- PHARM 3000 - TOPICS IN NEUROSCIENCE
- PHARM 3009 - ADVANCES IN PHARMACEUTICAL SCIENCES

2nd Year: Fall

- PHARM 2010 - MASTER OF SCIENCE THESIS
- Track-Specific and/or Electives. - 3-4 credits

2nd Year: Spring

- PHARM 2010 - MASTER OF SCIENCE THESIS
- Track-Specific and/or Electives. - 3-4 credits

MS Comprehensive Exam and Thesis

The thesis for the MS must represent an original research project or a comprehensive and detailed survey of some topic of current interest in the pharmaceutical sciences. It must be defended in an oral examination.

Pharmaceutical Sciences - Medicinal Chemistry Track, MS

Medicinal Chemistry

The medicinal chemistry track is a complex scientific discipline whose focus is to develop molecules that can impact human health by discovering, designing, synthesizing and characterizing safe and effective agents for disease therapy and diagnosis. The research involves a multidisciplinary approach encompassing chemistry and biology, and includes organic synthesis, protein and nucleic acid chemistry, natural product chemistry, computational chemistry, molecular biology, cell biology, structural biology, pharmacology and proteomics.

- You will learn to design, synthesize and characterize new medicinal agents and enhance the biological activity of existing pharmaceutical agents.
- You will learn to use computational, biophysical, structural biology and cell-based screening technologies to identify natural and synthetic compounds for pharmacological activity and to conduct structure-based drug design.
- You will isolate, characterize, and synthesize compounds based on natural products, as well as target identification for biologically active natural products.

MS Core Curriculum

Requirements:

Students must complete a total of 30 credit hours to fulfill the requirements for the MS. Required courses for all MS students are listed below. Students who have had prior course work or extensive experience in a given area may be exempted from the required course at the discretion of the faculty. The remaining credit requirements are completed through elective courses and thesis research. The specific plan of study is developed by the student and their faculty advisor and committee. Courses should be selected to assure an adequate breadth of knowledge as well as depth in the student's focus area.

1st Year: Fall

- PHARM 3040 - STATISTICAL METHODS
- PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3028 - PHARMACOLOGY AND THERAPEUTICS
- PHARM 3042 - RESEARCH PRACTICUM
 - Choose one of the following Journal Club Courses:
- PHARM 3000 - TOPICS IN NEUROSCIENCE
- PHARM 3009 - ADVANCES IN PHARMACEUTICAL SCIENCES
- PHARM 3036 - ADVANCES IN DRUG DELIVERY AND REGENERATIVE MEDICINE

1st Year: Spring

- PHARM 2001 - PHARMACEUTICAL ANALYSIS
- PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3042 - RESEARCH PRACTICUM
 - Choose one of the following Journal Club Courses:
- PHARM 3000 - TOPICS IN NEUROSCIENCE
- PHARM 3009 - ADVANCES IN PHARMACEUTICAL SCIENCES

2nd Year: Fall

- PHARM 2010 - MASTER OF SCIENCE THESIS
- Track-Specific and/or Electives. - 3-4 credits

2nd Year: Spring

- PHARM 2010 - MASTER OF SCIENCE THESIS
- Track-Specific and/or Electives. - 3-4 credits

MS Comprehensive Exam and Thesis

The thesis for the MS must represent an original research project or a comprehensive and detailed survey of some topic of current interest in the pharmaceutical sciences. It must be defended in an oral examination.

Pharmaceutical Sciences - Non -Thesis, MS

The Graduate Program in Pharmaceutical Sciences is pleased to offer the new Non-Thesis MS degree to qualified students.

Why choose the non-research based thesis?

Students will be able to complete the MS degree in one calendar year. Our MS in Pharmaceutical Sciences attracts students interested in drug discovery, delivery, and metabolism in addition to pharmacology, pharmacokinetics, and pharmacodynamics. Graduating with the MS in Pharmaceutical Sciences will prepare you for employment in pharmaceutical manufacturing plants and labs. Pharmaceutically-trained professionals are involved in biotechnology, research, synthesizing and testing new compounds, in marketing and sales of pharmaceuticals and biomedical devices, and in pharmaceutical benefit management. Some areas where graduates with degrees in Pharmaceutical Sciences are sought after are Cosmetic Science, Industrial Pharmacy, and University-based laboratory areas.

Non-Thesis MS Academic Requirements for Acceptance

- A BS or BA in biochemistry, biology, chemistry, pharmacy, pharmaceutical sciences or a related field is required.
- Applications must be submitted electronically.
- We require three references that **MUST** be submitted online. Written references are not accepted.
- Successful applicants will be admitted for Fall Admissions. We do not accept Spring Admissions.
- The Graduate Record Examination (GRE) is required and must have been taken within the past three years. Subject specific tests are not required.
- International applicants with English as a second language must complete the TOEFL or IELTS. For TOEFL a minimal score of 80 (Internet-based test), 550 (Paper-based test), or 213 (Computer-based test) is required. For IELTS the minimum acceptable score is 6.5.
- You must submit GRE and TOEFL (or IELTS) scores to the University of Pittsburgh, institution code is 2927. You do not need a department code. TOEFL scores are good for two years; the ETS will not release TOEFL scores after 2 years from the date of the exam.
- If you have graduated from a U.S. institution OR if English is the official language of your country then TOEFL or IELTS scores are not required.
- **IMPORTANT: WE DO NOT ACCEPT ANY DOCUMENTS SENT VIA MAIL TO OUR DEPARTMENT.** You will be notified if your application is reviewed and you are invited for an interview. At that time you will need to supply an official copy of your transcript.
- Application to our program requires a \$50.00 fee which cannot be waived. Credit cards are accepted. To apply, go to: http://www.pharmacy.pitt.edu/programs/grad/ms_nonthesis.php; click Apply On-line!

Program Requirements for Graduation

- 30 credits are required for graduation. A minimum of 10 credits must be taken in any given semester.
- In lieu of an original research study the student would complete a written project consisting of a comprehensive literature review of a topic of current interest in pharmaceutical sciences. The student would defend the project as an oral examination before their MS committee and major advisor.
- The MS committee will consist of the Director of the Graduate Program in Pharmaceutical Sciences, the student's major advisor and one other member of the faculty chosen by the student and major advisor and approved by the Program Director and Senior Associate Dean.
- Students would be required to attend the training courses offered by the University.
- Small Animal Training
- Bloodborne Pathogens Training
- Chemical Hygiene Plan & Formaldehyde Awareness
- Radiation Safety Course

Sample Curriculum for Non-Thesis MS

Fall Term

- PHARM 3040 - STATISTICAL METHODS
- PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3028 - PHARMACOLOGY AND THERAPEUTICS
- PHARM 3042 - RESEARCH PRACTICUM
- Optional Electives - 0-4 credits

Spring Term

- PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3042 - RESEARCH PRACTICUM
- Optional Electives - 0-4 credits

Summer Term

- PHARM 3042 - RESEARCH PRACTICUM
- Optional Electives - 0-9 credits

Pharmaceutical Sciences - Pharmaceutics Track, MS

Pharmaceutics

The pharmaceutics track is concentrated on the study of the design of pharmaceutical dosage forms and their interaction with the human body. Topics included are physical pharmacy, bioanalysis, drug delivery and targeting, drug metabolism, drug transport, pharmacokinetics and pharmacodynamics.

- You will develop a thorough understanding of how to apply principles of physical pharmacy to dosage form design and optimization of drug product performance.
- You will develop the fundamentals required for design of both traditional and complex state-of-the-art drug delivery systems and skills essential for the advancement of targeted drug therapies using small molecules, proteins, peptides and other biomolecules, probiotics, and tissue engineered platforms.
- You will gain knowledge of the human body and the interaction of medications with the human body including metabolism, pharmacokinetics and pharmacodynamics.
- Your research opportunities include formulation of dosage forms, development of novel delivery systems and development of complex new therapies for site specific action, establishing novel markers for disease, study of metabolic pathways, development of bioanalytical techniques, and evaluation of absorption, distribution, and elimination of drug substances and their regulation.

MS Core Curriculum

Requirements:

Students must complete a total of 30 credit hours to fulfill the requirements for the MS. Required courses for all MS students are listed below. Students who have had prior course work or extensive experience in a given area may be exempted from the required course at the discretion of the faculty. The remaining credit requirements are completed through elective courses and thesis research. The specific plan of study is developed by the student and their faculty

advisor and committee. Courses should be selected to assure an adequate breadth of knowledge as well as depth in the student's focus area.

1st Year: Fall

- PHARM 3040 - STATISTICAL METHODS
 - PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
 - PHARM 3028 - PHARMACOLOGY AND THERAPEUTICS
 - PHARM 3042 - RESEARCH PRACTICUM
- Choose one of the following Journal Club Courses:
- PHARM 3000 - TOPICS IN NEUROSCIENCE
 - PHARM 3009 - ADVANCES IN PHARMACEUTICAL SCIENCES
 - PHARM 3036 - ADVANCES IN DRUG DELIVERY AND REGENERATIVE MEDICINE

1st Year: Spring

- PHARM 2001 - PHARMACEUTICAL ANALYSIS
 - PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
 - PHARM 3042 - RESEARCH PRACTICUM
- Choose one of the following Journal Club Courses:
- PHARM 3000 - TOPICS IN NEUROSCIENCE
 - PHARM 3009 - ADVANCES IN PHARMACEUTICAL SCIENCES

2nd Year: Fall

- PHARM 2010 - MASTER OF SCIENCE THESIS
- Track-Specific and/or Electives. - 3-4 credits

2nd Year: Spring

- PHARM 2010 - MASTER OF SCIENCE THESIS
- Track-Specific and/or Electives. - 3-4 credits

MS Comprehensive Exam and Thesis

The thesis for the MS must represent an original research project or a comprehensive and detailed survey of some topic of current interest in the pharmaceutical sciences. It must be defended in an oral examination.

Pharmaceutical Sciences - Pharmacometrics and Systems Pharmacology Track, MS

The Pharmacometrics and Systems Pharmacology (PSP) is an interdisciplinary science to study drug actions and rational development of new drugs through network analysis, multitype-multiscale modeling and simulations "**mechanism-driven**", as well as data analysis "**data-driven**". The PSP track focuses on applying Pharmacometrics and System Pharmacology techniques to facilitate the development of novel drug candidates that are less likely to fail during clinical trials and to provide a better understanding of drug mechanisms of action and therapeutic effects at the systems pharmacology level.

- You will develop a broad knowledge of pharmacometrics and systems pharmacology to develop drug candidates that are less likely to fail during clinical trials.
- You will develop strong computational modeling and simulation expertise from drug target fishing, to drug lead identification, to drug profile optimization.
- You will develop strong computational expertise on pharmacokinetics (PK) and pharmacodynamics (PD) modeling and simulation.
- You will develop skills on multiscale modeling of biological processes at the molecular, gene, organ and organism levels.
- You will have opportunities to study with faculty from a variety of background including computer-aided drug design, computational and systems biology/pharmacology, population PK/PD modeling, computational chemical genomics, computational biophysics, etc.
- Candidates with programming experience, basic/intermediate knowledge in statistics and/or hands-on modeling experience are highly desired.

This program is associated with the Computational Chemical Genomics Screening Center. More about this program track is here.

MS Core Curriculum

Requirements:

Students must complete a total of 30 credit hours to fulfill the requirements for the MS. Required courses for all MS students are listed below. Students who have had prior course work or extensive experience in a given area may be exempted from the required course at the discretion of the faculty. The remaining credit requirements are completed through elective courses and thesis research. The specific plan of study is developed by the student and their faculty advisor and committee. Courses should be selected to assure an adequate breadth of knowledge as well as depth in the student's focus area.

1st Year: Fall

- PHARM 3068 - COMPUTATIONAL SYSTEMS PHARMACOLOGY
 - PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
 - PHARM 3028 - PHARMACOLOGY AND THERAPEUTICS
 - PHARM 3040 - STATISTICAL METHODS
 - PHARM 3042 - RESEARCH PRACTICUM
 - Choose one of the following Journal Club Courses:
 - PHARM 3009 - ADVANCES IN PHARMACEUTICAL SCIENCES
 - PHARM 3036 - ADVANCES IN DRUG DELIVERY AND REGENERATIVE MEDICINE
 - PHARM 3048 - DRUG DESIGN AND DEVELOPMENT JOURNAL CLUB
- Track-specific and/or Electives

1st Year: Spring

- PHARM 3071 - FOUNDATIONS OF PHARMACEUTICAL SCIENCES
 - PHARM 3025 - PHARMACEUTICAL SCIENCES SEMINAR
 - PHARM 3042 - RESEARCH PRACTICUM
 - Choose one of the following Journal Club courses:
 - PHARM 3009 - ADVANCES IN PHARMACEUTICAL SCIENCES
 - PHARM 3048 - DRUG DESIGN AND DEVELOPMENT JOURNAL CLUB
 - PHARM 3072 - TOPICS IN PHARMACOKINETICS/PHARMACODYNAMICS JOURNAL CLUB
- Track-specific and/or Electives

2nd Year: Fall

- PHARM 3069 - PHARMACOMETRICS
- PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3042 - RESEARCH PRACTICUM

Choose one of the following Journal Club courses:

- PHARM 3009 - ADVANCES IN PHARMACEUTICAL SCIENCES
- PHARM 3036 - ADVANCES IN DRUG DELIVERY AND REGENERATIVE MEDICINE
- PHARM 3048 - DRUG DESIGN AND DEVELOPMENT JOURNAL CLUB

Track-specific and/or Electives

- PHARM 3072 - TOPICS IN PHARMACOKINETICS/PHARMACODYNAMICS JOURNAL CLUB
- PHARM 3048 - DRUG DESIGN AND DEVELOPMENT JOURNAL CLUB

Track-specific and/or Electives

MS Comprehensive Exam and Thesis

The thesis for the MS must represent an original research project or a comprehensive and detailed survey of some topic of current interest in the pharmaceutical sciences. It must be defended in an oral examination.

PharmacoAnalytics - Pharmaceutical Outcomes Research, MS

The School of Pharmacy offers graduate level training to highly motivated individuals. Our mission is to train the next generation of leaders and decision makers seeking to improve the health of the community through outstanding basic and clinical research. Major strengths include highly accomplished, well-funded research faculty, multidisciplinary training opportunities, and cutting-edge technologies.

This MS degree offers healthcare professionals an opportunity to bring data science to the real-world databases with emphasis on using pharmacoanalytic applications. Students will utilize data and technology to enhance pharmaceutical use, operations, and outcomes that drive better quality patient care while also providing pharmacists with the tools and knowledge necessary to analyze trends from large data sets and then interpret these trends in a way that allows them to improve their daily practice. Students will be competent with identifying big data sources, managing data, determining pharmacoepidemiologic observational study designs, data interpretation. Students will apply various data analytic techniques using statistical and analytic software to inform decision-making processes in the pharmacy practice that is driven by patient-centered outcome assessments.

Knowledge of data manipulation in some platform (STATA, SAS, Python, R, Tableau); secondary data sources, methods and tools are preferred prior to enrollment.

Core Courses PharmacoAnalytics

Core Courses PharmacoAnalytics (19.5 credits)

- PHARM 2003 - PHARMACOEPIDEMIOLOGY

- PHARM 3040 - STATISTICAL METHODS
- PHARM 3045 - ADVANCED STATISTICAL METHODS
- PHARM 3049 - SCIENTIFIC WRITING SKILLS
- PHARM 3301 - SECONDARY DATABASE APPLICATIONS
- PHARM 3302 - CONDUCTING RESEARCH WITH LARGE BIOMEDICAL DATABASES
- PHARM 3304 - RESEARCH METHODS FOR PHARMACEUTICAL PRACTICE AND POLICY
- PHARM 3306 - INTRODUCTION TO THE UNITED STATES HEALTHCARE SYSTEM AND PHARMACEUTICALS
- PHARM 3308 - DATA PRIVACY AND SECURITY
- PHARM 3310 - SECONDARY DATA SOURCES, METHODS AND TOOLS
- PHARM 3312 - COMMUNICATING DATA
- PHARM 3303 - TOPICS AND METHODS FOR SECONDARY DATABASE EVALUATIONS
- PHARM 3052 - TOPICS AND METHODS IN PHARMACEUTICAL OUTCOMES AND POLICY RESEARCH

Electives

Choose Electives (minimum 10.5 credits)

- PHARM 3042 - RESEARCH PRACTICUM
- PHARM 3073 - APPLIED MULTIVARIATE STATISTICAL ANALYSIS IN PHARMACEUTICAL SCIENCES
- PHARM 3300 - CONCEPTS IN PHARMACOECONOMIC AND OUTCOME EVALUATIONS IN HEALTH AND MEDICINE
- PHARM 5834 - PYTHON FOR DATA MANAGEMENT AND ANALYTICS
- PHARM 5916 - PREDICTIVE ANALYTICS IN PHARMACY AND KNOWLEDGE DISCOVERY FROM BIG DATA

Pharmacy Business Administration, MPBA

Master of Pharmacy Business Administration

The four semester Master of Pharmacy Business Administration (MPBA) program consists of 33 credits that build critical skills and expertise for pharmacy professionals seeking to substantially increase their business acumen and marketability.

MPBA Value

- Designed for emerging pharmacy professionals seeking executive positions.
- Obtain an in-depth understanding of the business of medicines.
- Learn to innovate and solve real-world problems.
- Focus in specialized area of either Specialty or Community Pharmacy.

MPBA Fit

- Synergistically fusing the expertise of the Schools of Pharmacy and Business
- Efficiently formatted for working professionals

Requirements

1st Semester

- BACC 2401 - FINANCIAL ACCOUNTING
- BMIS 2409 - INFORMATION SYSTEMS
- BMKT 2409 - MARKETING MANAGEMENT
- BOAH 2801 - ORG BEHAV: LDRSHP & GRP EFFECT
- PHARM 5911 - HEALTHCARE SALES AND MARKETING
- PHARM 5915 - EXECUTIVE HEALTHCARE INNOVATIONS

2nd Semester

- BACC 2528 - MANAGERIAL ACCOUNTING
 - BFIN 2306 - FINANCIAL MANAGEMENT
 - PHARM 5912 - LEADERSHIP AND ETHICS IN HEALTHCARE
 - PHARM 5914 - GRADUATE EXECUTIVE BOARDROOM
- Choose One:
- PHARM 5924 - HEALTH SYSTEM PHARMACY MANAGEMENT 1
OR
 - PHARM 5926 - ADVANCED COMMUNITY PHARMACY MANAGEMENT 1
OR
 - PHARM 5928 - SPECIALTY PHARMACY MANAGEMENT 1
OR
 - PHARM 5930 - PHARMACY BENEFITS MANAGEMENT 1

3rd Semester

- BSPP 2409 - STRATEGIC MANAGEMENT
 - PHARM 5910 - US HEALTHCARE SYSTEM
 - PHARM 5916 - PREDICTIVE ANALYTICS IN PHARMACY AND KNOWLEDGE DISCOVERY FROM BIG DATA
- Choose One:
- PHARM 5925 - HEALTH SYSTEM PHARMACY MANAGEMENT 2
OR
 - PHARM 5927 - ADVANCED COMMUNITY PHARMACY MANAGEMENT 2
OR
 - PHARM 5929 - SPECIALTY PHARMACY MANAGEMENT 2
OR
 - PHARM 5931 - PHARMACY BENEFITS MANAGEMENT 2

Professional

Doctor of Pharmacy, PharmD

Doctor of Pharmacy (PharmD) Program

The professional curriculum is configured in a course of study requiring two years (62 credits) of pre-professional study followed by four years of professional courses. The four-year professional curriculum emphasizes problem

solving and critical thinking, blending classroom and laboratory learning with experiential learning practice. The required component of experiential learning is designed to facilitate progress from initial stages of making meaningful connections with patients to caring for complex patients with acute and chronic diseases. Experiences include patient care in communities, in hospitals, and during transitions of care. This experiential education begins in the first weeks of your P1 year.

Through our commitment to personalizing education, PittPharmacy inspires students to use their unique interests and talents to improve the lives of people through the safe, effective, and responsible use of medications and other interventions.

The PharmD program prepares students to be practitioners who advance the profession by fostering innovation, leadership, interprofessional collaboration, civic engagement, advocacy, life-long learning, and a professional attitude of inclusion.

Program Accreditation

University of Pittsburgh's Doctor of Pharmacy Program is accredited by the Accreditation Council for Pharmacy Education, 190 South LaSalle Street, Suite 2850, Chicago, IL 60603, 312/664-3575; FAX 866/228-2631, web site www.acpe-accredit.org

Pre-Professional Requirements

Applicants to the professional pharmacy program must have successfully completed, or be in the process of completing, all prerequisite mathematics and science subjects no later than the spring term of the year of admission. All other pre-professional courses should be completed no later than the first day of the fall term of admission. Pre-professional courses must be taken for a letter grade.

Pre-Professional Courses:

- General Biology (with lab) - 8 credits
- General Chemistry (with lab) - 8 credits
- Organic Chemistry (with lab) - 8 credits
- English Composition - 6 credits
- Calculus - 3-4 credits
- Statistics - 3-4 credits
- Elective courses+ - 24 credits

Total: 60-62 credits

+At least 9 credits must be in the humanities and 9 credits in the social sciences. A course in Public Speaking is recommended.

Non-native English-speaking applicants must supply evidence of their proficiency in the English language.

Degree Requirements

To earn the degree of Doctor of Pharmacy, the student must demonstrate satisfactory achievement in required course work prescribed by the curriculum (*detailed below under Program Description*), earning an overall GPA of 2.00 or higher. Refer to the school's Student Handbook for the guidelines for academic progress.

Program Description

The professional curriculum leads to the Doctor of Pharmacy (PharmD) degree and requires completion of 134.5 credits (note: this curriculum is subject to change):

Fall Term-First Professional Year (P-1)

- PHARM 5110 - PHARMACIST PATIENT CARE 1: PROCESS AND SKILLS
- PHARM 5112 - COMMUNITY HEALTH 1: COMMUNICATION AND WELLNESS
- PHARM 5114 - ANATOMY AND PHYSIOLOGY 1
- PHARM 5118 - PRINCIPLES OF DRUG ACTION
- PHARM 5120 - THE EMERGING PROFESSIONAL
- PHARM 5122 - CASE CONFERENCE SERIES 1
- PHARM 5124 - BIOCHEMISTRY 1: FUNDAMENTALS

Total: 16 credits

Spring Term-First Professional Year (P-1)

- PHARM 5111 - PHARMACIST PATIENT CARE 2: SKILLS AND ENVIRONMENTS
- PHARM 5113 - COMMUNITY HEALTH 2: CULTURAL AWARENESS AND BEHAVIOR
- PHARM 5115 - ANATOMY AND PHYSIOLOGY 2
- PHARM 5219 - DOSAGE FORM DESIGN AND DELIVERY
- PHARM 5121 - CASE CONFERENCE SERIES 2
- PHARM 5125 - BIOCHEMISTRY 2: DNA, PHARMACOGENOMICS & BIOTECHNOLOGY
- PHARM 5133 - PROFESSIONAL AND CAREER DEVELOPMENT 1

Total: 16 credits

Fall Term-Second Professional Year (P-2)

- PHARM 5210 - NONPRESCRIPTION THERAPIES AND SELF-CARE PRACTICE
- PHARM 5212 - COMMUNITY PHARMACIST PRACTICE 1: PATIENT-CENTERED CARE AND SILVER SCRIPTS
- PHARM 5216 - PHARMACOTHERAPY OF CARDIOVASCULAR DISEASE
- PHARM 5218 - PHARMACOKINETICS AND DRUG RESPONSE
- PHARM 5220 - CASE CONFERENCE SERIES 3
- PHARM 5222 - FUNDAMENTALS OF IMMUNOLOGY

Total: 15 credits

Spring Term-Second Professional Year (P-2)

- PHARM 5211 - DRUG LITERATURE ANALYSIS AND EVALUATION
- PHARM 5213 - COMMUNITY PHARMACIST PRACTICE 2: MEDICATION THERAPY MANAGEMENT-IMMERSION IN PRACTICE
- PHARM 5119 - DRUG DEVELOPMENT 1
- PHARM 5223 - GASTROENTEROLOGY/NUTRITION

- PHARM 5227 - CASE CONFERENCE SERIES 4
- PHARM 5229 - FUNDAMENTALS OF NEPHROLOGY/PULMONOLOGY
- PHARM 5231 - PHARMACOTHERAPY OF INFECTIOUS DISEASE 1: COMMUNITY-BASED
- PHARM 5233 - PROFESSIONAL AND CAREER DEVELOPMENT 2

Total: 16 credits

Fall Term-Third Professional Year (P-3)

- PHARM 5312 - HEALTH SYSTEM PHARMACY 1: OPERATIONS AND DISPENSING
- PHARM 5318 - ENDOCRINOLOGY
- PHARM 5320 - POPULATION HEALTH AND MANAGEMENT
- PHARM 5322 - PHARMACY LAW
- PHARM 5324 - CASE CONFERENCE SERIES 5
- PHARM 5326 - PHARMACOTHERAPY OF INFECTIOUS DISEASE 2: HEALTH-SYSTEMS-BASED
- PHARM 5328 - ADVANCED THERAPEUTICS: IMMUNOLOGY
- PHARM - Professional Elective - 3 credits

Total: 16.5 credits

Spring Term-Third Professional Year (P-3)

- PHARM 5311 - SAFE MEDICATION USE AND PHARMAECONOMICS
- PHARM 5313 - HEALTH SYSTEM PHARMACY 2: ADVANCED PRACTICE & MANAGEMENT
- PHARM 5315 - ONCOLOGY/HEMATOLOGY
- PHARM 5319 - NEUROLOGY/PSYCHIATRY
- PHARM 5321 - CRITICAL CARE AND ADVANCED NEPHROLOGY
- PHARM 5323 - CASE CONFERENCE SERIES 6
- PHARM 5333 - PROFESSIONAL AND CAREER DEVELOPMENT 3
- PHARM - Professional Electives - 3 credits

Total: 15 credits

Fourth Professional Year (P-4)

Spans 3 semesters (SUMMER, FALL, SPRING) with several options for credits earned per semester, for a total of 40 weeks

- PHARM 5401 - PHARMD ADVANCED PHARMACY PRACTICE EXPERIENCE 1
- PHARM 5402 - PHARMD ADVANCED PHARMACY PRACTICE EXPERIENCE 2
- PHARM 5403 - PHARMD ADVANCED PHARMACY PRACTICE EXPERIENCE 3
- PHARM 5404 - PHARMD ADVANCED PHARMACY PRACTICE EXPERIENCE 4
- PHARM 5405 - PHARMD ADVANCED PHARMACY PRACTICE EXPERIENCE 5
- PHARM 5406 - PHARMD ADVANCED PHARMACY PRACTICE EXPERIENCE 6
- PHARM 5407 - PHARMD ADVANCED PHARMACY PRACTICE EXPERIENCE 7
- PHARM 5408 - PHARMD ADVANCED PHARMACY PRACTICE EXPERIENCE 8

Total: 40 credits

Total Professional Credits: 134.5 credits

The mission of the University of Pittsburgh Graduate School of Public and International Affairs (GSPIA) is to prepare students to make significant contributions to society through leadership in public service in government, nonprofit organizations, or the private sector. We accomplish this mission through quality teaching, rigorous research, and service to communities and constituencies-at the highest standards of ethical and professional conduct-domestically and around the world.

Contact Information

Recruitment & Admissions Office
Suite 3601 Posvar Hall
412-648-7640
E-mail: gspia@pitt.edu
www.gspia.pitt.edu

Admissions

GSPIA admits persons who have demonstrated intellectual competence and high motivation in an academic and/or professional environment and who will enrich the quality of life in the school. Individuals from varied cultural, academic, and social backgrounds provide an exciting frame of reference for the stimulating exchanges so vital to a dynamic academic process. The following are required of all Master applicants: transcripts, application and fee, TOEFL, Duolingo or IELTS score (if international), letters of recommendation, essays, and resume.

Admission Prerequisites

It is desirable, but not mandatory, that PhD applicants have an earned a master's degree in public and international affairs or a degree in one of the social sciences and work experience prior to undertaking doctoral study.

Admission Requirements

All applicants must have earned a bachelor's degree from a regionally accredited U.S. institution or a degree that is equivalent to a four-year U.S. bachelor's degree. Applicants are expected to have a B+ or better average (3.0 GPA) in their work to date. To be competitive for merit scholarships, applicants normally need at least a 3.5 GPA. The admissions committee also takes into consideration GPA within the major, GPA within the last two years, extenuating circumstances, length of time since graduation from college, rigor of the undergraduate program, and other factors.

Doctoral applicants are only eligible for admission to full-time status in the Fall Term.

Application Requirements

Online Application

Complete and submit the online application in its entirety. All application materials can be submitted electronically using the online system, with the exception of official academic transcripts.

Application Fee

The non-refundable application fee may be paid by credit card. You will be prompted to pay the fee at the end of the online application process. The application fee is waived for Returned Peace Corps Volunteers, AmeriCorps Volunteers, Truman Scholars, Pickering Fellows, Coro Fellows, Rangel Fellows, McNair Fellows, Teach for America alumni, City Year alumni, Payne Fellows, Catholic Volunteer Network alumni, and veterans/active duty members of the US Armed Forces.

TOEFL, IELTS, or Duolingo English Language Test Scores (International Applications Only)

International applicants must submit a score from one of three possible English tests: the TOEFL, the IELTS, or the Duolingo English Test.

Score reports must be sent directly from the testing agency to GSPIA. GSPIA's institutional code for TOEFL score reports is 2574.

The minimum TOEFL score required for admission is 80 on the Internet-based test, although 90 or above is strongly preferred. The minimum IELTS score required for admission is 6.5 (overall, and in each of the subsections). The minimum Duolingo English Test score required for admission is 115.

Exceptions: International students who have completed a degree at a regionally accredited college or university in the United States are not required to submit a TOEFL, IELTS, or Duolingo English Test score. International students who are citizens of certain English-speaking countries are also exempt.

GRE or GMAT scores

For all of our programs, GRE or GMAT scores are optional and not required for admission. If you're applying to the MPA, MPIA, MID, or PhD program, you may choose to submit scores from one of these tests as supplemental material, if you feel that they show evidence of your abilities beyond what the rest of your application reflects.

If you're applying to the mid-career MPPM program (online or on campus) or the non-degree program, you should not submit GRE or GMAT scores. Supplemental materials submitted to those programs will not be reviewed.

If you are submitting test scores, you must order an official score report, sent directly from the testing agency to us. (GRE reports can be ordered at www.gre.org; GMAT reports can be ordered at www.mba.com.) Copies of your own score report are not acceptable. Our institutional code for the GRE is 2574.

Résumé

All applicants should upload a current résumé/curriculum vitae, showing relevant awards, academic achievements, full- and part-time job experience, internships, and volunteer work.

Personal Essay - (Master & PhD applicants)

Use your essay to introduce yourself to the admissions committee. Share your professional goals and why you think a GSPIA degree can help you attain them. Describe your background, interests, and motivation for pursuing graduate work in public and international affairs. There is a limit of 5,000 characters (approximately two double-spaced, typed pages).

For doctoral applicants, identify the broad topic and research questions you envision as the focus of your doctoral dissertation research. Explain the importance of your research questions and identify the GSPIA faculty member with whom you'd like to work. There is a limit of 5,000 characters (approximately two double-spaced, typed pages).

Optional Essay (Master's Applicants) and Research Proposal/Writing Sample (PhD Applicants)

Master's Applicants: If there are any special circumstances you would like the admissions committee to consider, highlight them in the optional essay. Use this essay to include information that you feel is important, but that you're unable to include elsewhere on the application. There is no penalty for leaving this blank.

PhD Applicants: As an applicant to the Ph.D. program, you are required to submit an additional essay that discusses your potential dissertation research. Describe the idea and why it is important. Further, discuss the main questions to be investigated and the types of evidence that would be needed to support conclusions. Finally, identify the GSPIA faculty with whom you would like to work. There is a 5,000 character limit (approximately two double-spaced, typed pages). PhD Applicants are also asked to upload a single-authored writing sample in English that is 25 pages or less. The writing sample does not need to be a published paper but should demonstrate academic or professional research.

Academic Transcripts

When you're completing the online application, you'll be asked to upload copies of your official transcripts from all colleges and universities you have attended, whether or not you earned a degree. You should upload a scanned copy of an official transcript generated by your university's registrar's office. Self-reported transcripts, student grade reports, or copies of unofficial transcripts are not acceptable.

It is not necessary to submit hard copies at the time of application, as long as your scanned copies are uploaded successfully. If you are admitted, you will then be required to submit final, official transcripts directly from your university's registrar's office to us. The official copy must exactly match the scanned copy that you submitted at the time of application.

If you do not have access to technology that will allow you to submit a scanned copy of your transcript at the time of application, you may submit an official copy instead. The official copy must be sent by mail directly from your university's registrar's office to Graduate School of Public and International Affairs (3601 Posvar Hall, Pittsburgh, PA 15260).

Two Letters of Recommendation

Letters should be written by professors who have taught you or supervisors who have overseen your work, either professionally or in a volunteer capacity. If you graduated from college less than three years ago, at least one, if not both, of your letters should be from professors. Letters written by friends, family members, work colleagues, or anyone who has not taught or supervised you are not acceptable.

All letters must be submitted online. When you complete the online application, you will be prompted to enter the names and email addresses of your recommenders. The system will automatically send them an email explaining how they can upload their letters.

Admission Deadlines

US Citizens/Permanent Residents:

- MPA, MPIA, MID (First Priority) - February 1
- MPA, MPIA, MID (Second Priority) - April 15
- MPA, MPIA, MID (Third Priority) - June 1
- MPPM - June 1
- Non-degree - August 1
- PhD - January 15

International Students:

- All applications - January 15

Application Deadlines: Spring Term

US Citizens/Permanent Residents:

- MPA, MPIA, MID, MPPM - November 1
- Non-degree - December 1

International Students:

- MPA, MPIA, MID, MPPM - August 1

Application Deadlines: Summer Term

US Citizens/Permanent Residents:

- MPPM - March 1
- Non-degree - April 1

International Students:

- MPPM - January 15

School-Based Funding

Most students who are accepted to our doctoral program are awarded four years of funding. This allows you to complete your required coursework and your doctoral dissertation. Typically, students receive graduate student assistantships (GSAs) and/or teaching assistantships (TAs), which provide salary, tuition, fees, and medical insurance. If you have an assistantship, you're required to work 20 hours per week as assigned by the associate dean.

Assistantships will be renewed each academic year if you are in good academic standing and making normal progress in achieving your doctoral milestones.

Tuition

Visit the following page, <https://www.tuition.pitt.edu/> for up-to-date tuition and mandatory fee rates. Note that there are different tuition rates for Pennsylvania residents and non-residents.

Academic Standards

Students are in good academic standing when they earn acceptable grades for graduate work and make normal progress toward the degree. Specifically, full-time students must earn a minimum of 9 credits per term with a minimum cumulative GPA of 3.5 in all courses. Part-time students are held to the same standards. However, they are expected to do so while carrying less than 9 credits per term. Full- or part-time students admitted with provisional status must maintain a minimum cumulative GPA of 3.0 in all courses in their first 12 credits.

Students receiving school-based funding are held to higher standards. Master's students must earn, after two terms, 24 credits and a cumulative GPA of 3.0. Doctoral students must earn 24 credits and a cumulative GPA of 3.0.

Probation

Students are automatically placed on academic probation when they fail to maintain a minimum GPA of 3.00 and earn the appropriate number of credits for their status. Students are also placed on academic probation automatically if they receive two G or I grades in one term and/or earn a grade of U, C- or lower.

Dismissal

Students who fail to correct the deficiencies of their academic probation within a specified time period (normally one term) are subject to dismissal. Should a student be dismissed, students may appeal the decision to the associate dean.

For additional information on academic standards and procedures, students are referred to GSPIA's Handbook of Academic Policies and Procedures for Master's Degree Programs, GSPIA's Handbook of Academic Policies and Procedures for the Doctor of Philosophy, and the University's Guidelines on Academic Integrity: Student and Faculty Obligations and Hearing Procedures.

Acceptance of Transfer Credits from Outside Institutions

Students who have completed graduate courses in degree-granting graduate programs at other accredited institutions within the past seven (7) years prior to admission to GSPIA should submit official transcripts from those institutions at the time they apply so that the courses can be evaluated for transfer credits or waivers. If the source institution is located in the United States, the institution must be regionally accredited in order for the credits to be transferrable. Graduate-level courses taken while a student was enrolled in an undergraduate program are generally not eligible to be transferred into GSPIA. Under normal circumstances, only graduate-level courses taken after a student has earned a bachelor's degree may be evaluated as transfer credits. (See "Enrollment in Graduate Courses as an Undergraduate" above.) A maximum of 12 credits can be transferred for students enrolled in the MPA, MPIA, and MID degree programs. A maximum of 6 credits can be transferred for students enrolled in the MPPM program. Students admitted with provisional status cannot transfer credits until full graduate student status has been granted.

Official transcripts certifying graduate courses completed at another regionally accredited institution can be evaluated for acceptability as transfer credits, provided grades of B or better (GPA = 3.0) or its equivalent has been earned. Other documentation such as course syllabi and descriptions will be required to support the student's request. The documents must prove that the course(s) are substantially similar in content to existing GSPIA course(s) in order for the transfer to be approved. Transfer (advanced standing) credits are entered as block transfer credits (advanced standing) on the student's transcript. Grades and quality points are not recorded for credits accepted by transfer.

The completion of requirements for advanced degrees must be satisfied through registration at the Pittsburgh campus of the University. Graduate students already enrolled, may, when approved in advance by the director of student services, spend a term or more at another graduate institution, to obtain training or experience not available at the University, and transfer those credits toward the requirements for a GSPIA degree. In such instances, neither the University nor GSPIA is responsible for any financial assistance to the graduate student.

No credits will be granted toward a GSPIA degree for work completed in extension courses, correspondence courses, or those offered in the off-campus center of another institution unless those credits are approved for equivalent graduate degrees at that institution, and provided that the institution has a regionally accredited program.

Acceptance of Transfer Credits from Other Graduate Schools at the University of Pittsburgh

With the exception of students enrolled in formal joint-degree programs, students who earn/have earned credits while enrolled as a graduate student at another University of Pittsburgh school may petition for some of their credits to count toward the GSPIA degree. Typically, no more than six credits earned while enrolled in another graduate program at the University of Pittsburgh may be counted toward the GSPIA degree. In most cases, such credits will not be listed as transfer credits on the student's GSPIA transcript, and will count only as free electives. The final decision on course acceptability rests with the GSPIA director of student services and the University of Pittsburgh Registrar.

Statute of Limitations

The purpose of the statute of limitations is to ensure that a graduate degree from GSPIA represents mastery of current knowledge in the student's field of study.

Requirements for the professional master's degrees must be completed within a period of five consecutive calendar years from the students' initial registration for graduate study. Joint degrees that require coursework in excess of 50 credits may be granted a longer statute of limitations.

Under exceptional circumstances a candidate may apply for an extension of the statute of limitations. The request must be approved by the division director and submitted to the dean for final action. Each student who requests an extension of the statute of limitations must be prepared to demonstrate proper preparation for the completion of all current degree requirements.

Advising and Career Services

Academic Advising: Each student is assigned a faculty advisor based on, whenever possible, the compatibility of student and faculty academic interests. Faculty advisors assure that students, through proper course selection, can make productive use of the resources of the school and the University during their period of residence. In addition, faculty advisors are responsible for counseling their advisees about career opportunities in the student's area of study; for counseling advisees who have been placed on probation; and for approving the advisee's school-wide required and elective courses, proposed thesis or dissertation topics, and supervised internships. Advisors and students monitor academic progress and identify areas where corrective action on the part of students may be required. It is essential, therefore, that students consult periodically with their advisors. Unless students subsequently request a change, faculty members originally assigned will continue as advisors throughout the students' program of study. If, however, a change in faculty advisor is requested, students must obtain the signed approval of the new advisors. Based on a student-focused approach, we provide students with a academic advisor who serves as the first point of contact for class registration, financial aid application and preparation for graduation. Additionally, academic advisors support students by providing information necessary to navigate the logistical challenges of graduate school and connect students to resources at the University of Pittsburgh.

Career Services: GSPIA places great emphasis on assisting students in determining the best and most appropriate positions available. In addition to faculty advisors, the school provides resources and guidance for students throughout their course of study as they devise strategies to identify professional opportunities. Among the many services offered through Career Services are individual career advising, internship and job search assistance, and a series of career-related workshops and special events. Extensive reference materials on jobs, fellowships, and internships are made available in a variety of ways, including GSPIA Career Launch, GSPIA's online career management system for students and alumni. Workshops cover such topics as resume preparation, job search strategies, negotiation skills, networking, and using technology in securing employment. Special events include Foreign Service information sessions, mock interviews for the Presidential Management Fellowship Program, an internship fair, and networking events with alumni, foundations, and agency representatives on campus and in Washington, D.C.

Concentration and Degree Options

GSPIA offers the following degrees:

Master of Public Administration (MPA) Public Administration, MPA , including concentrations in:

- Energy & Environment
- Governance & International Public Management
- Policy Research & Analysis
- Public & Nonprofit Management
- Social Policy
- Urban Affairs & Planning

Master of Public and International Affairs (MPIA) Master of Public and International Affairs , including concentrations in:

- International Political Economy
- Security and Intelligence Studies
- Human Security

Master of International Development (MID) International Development, MID , including concentrations in:

- Energy & Environment
- Governance & International Public Management
- Human Security
- Nongovernmental Organizations & Civil Society
- Social Policy
- Urban Affairs & Planning

Master of Public Policy and Management (MPPM) Public Policy and Management, MPPM

- Traditional accelerated mid-career master program
- Online accelerated mid-career master program

Doctor of Philosophy (PhD)

Minors

Students have the flexibility to customize their education as any concentration can be taken as a minor. Adding a minor will help differentiate your education, deepen your knowledge base and broaden professional marketability. Each minor consists of a 9-credit sequence of courses within your chosen subject area. This is taken in addition to general required courses and courses for your area of concentration. Any course taken to fulfill a requirement for your degree or concentration cannot count towards your minor. A course may not be double-counted. An approved course must be substituted.

For GSPIA minors, click on this link:

[GSPIA Minors](#)

Joint Degrees

GSPIA students may pursue two graduate degrees simultaneously, through GSPIA's partnerships with other professional schools at the University of Pittsburgh (and two foreign universities). Joint programs reduce the number of credits needed for each degree, allowing students to earn two master's degrees in just three years, or a master's degree and a law degree in just four years.

To participate in a joint degree program, students apply separately to both schools, and must meet all of the usual admissions requirements (including entrance exams like the GRE, GMAT, and LSAT, where applicable). If admitted to both schools, students spend one full year in GSPIA followed by a second full year in the other program (or vice versa). During the third and/or fourth year, they spend a minimum of one additional term in GSPIA, earning a total of 36 GSPIA credits.

Although it is possible to apply to both schools at the same time, currently enrolled students may still apply for a joint degree as long as they have not yet completed on year 9or, in the case of current law students, two years) of full-time study.

Full-time students in the MPA, MPIA, or MID programs may be eligible to participate in the following joint programs:

Juris Doctor with University of Pittsburgh School of Law: The joint JD allows students to combine the study of law and policy, preparing them equally well for employment in the judicial or executive branches of government. Graduates are positioned to work in international law firms, nonprofit advocacy, and in public or nonprofit agencies that require knowledge of legal issues such as refugee services and the Department of Justice.

Master of Business Administration with University of Pittsburgh Katz Graduate School of Business - MPIA and MID students only: Combining a GSPIA degree with an MBA opens many opportunities for a career in international finance, government financial regulation, or multinational corporations. Students with both degrees are highly marketable in the fields of international business and international economic policy.

Master of Public Health with University of Pittsburgh School of Public Health: Students pursuing a joint MPH gain a unique perspective on public management, government responses to epidemics, and the effect of sanitation on international development. They study health policy and the science behind it, both at the local level and on the world stage, where disease recognizes no borders. Graduates are employed by medical relief agencies, nonprofit organizations that distribute vaccines, and government authorities responsible for protecting society from epidemics.

Master of Social Work with University of Pittsburgh School of Social Work: Today's community building arena demands well-trained professionals across a wider array of skills and systems than one degree program may offer. That's why the joint degree program between GSPIA and School of Social Work provides students with focused professional education in the community building arena to prepare them for careers in non-profit and government organizations, community development, social policy, and urban and regional affairs.

Master of Science in Information Science with University of Pittsburgh School of Information Science: The joint MSIS degree allows GSPIA students to combine the study of public management and information technology management, at a time when both fields are increasingly interconnected. Students are prepared to pursue public or nonprofit-sector careers that require strong knowledge of modern information systems.

Master of Quantitative Economics with University of Pittsburgh's Dietrich School of Arts & Sciences: The joint MQE/MPA degree allows a student to pursue two graduate degrees simultaneously between the Department of Economics and the Graduate School of Public and International Affairs. This streamlined, 2 ½ years joint degree program is built for students seeking training in public policy, public administration, and data analytics. It is ideally suited for students looking to enter mid-career positions as policy/data analysts in both the public and private sectors.

Joint Degrees at Kobe University, Japan: Through a special partnership, students may combine their GSPIA degrees with one of several degrees offered by the Graduate School of International Cooperative Studies at Kobe University: the Master of International Affairs, Master of Laws, Master of Economics, or Master of Political Science. The Kobe GSICS curriculum is in English.

Pitt Student - 4+1 Accelerated Program

4+1 Accelerated Program for Pitt undergraduate students to complete their bachelor's degree while working on a master's degree at GSPIA. Once a student has completed 24 credits in GSPIA, they may apply and obtain their bachelor's degree.

This program is open to you if you are a student in the Dietrich School of Arts & Sciences or College of General Studies, have completed at least 96 credits, and have a cumulative GPA of 3.5 or better. Any major is appropriate. You should be finished with virtually all of your gen ed and major requirements, leaving only your electives.

If accepted, you will spend your fourth (senior) year taking your first 24 GSPIA credits while finishing any remaining undergraduate requirements (ideally no more than 3-6 credits). At the end of year four, you will graduate with your bachelor's degree on schedule. In year five, you will finish your remaining 24 GSPIA credits and graduate with your master's degree.

Interested in applying? First, talk to your undergraduate advisor to make sure you are eligible, and make an appointment with a GSPIA admissions counselor to discuss the program (gspia@pitt.edu). Submit a complete application to GSPIA by February 1 of your junior year, and be sure to check the box to indicate that you are applying for the 4+1 accelerated program. One of your two letters of recommendation must be written by Susan Crain in the Arts & Sciences Dean's Office, confirming that you are eligible for the program.

Special Academic Opportunities/Programs

GSPIA offers a variety of academic programs to complement the degree programs offered, including area studies, exchange programs, and research and travel grants.

Centers, Institutes and Initiatives

The Matthew B. Ridgway Center for International Security Studies - educates the next generation of security analysts and produces scholarship and impartial analysis that informs the options available to policymakers who must confront diverse challenges to international and human security on a global scale.

The Ford Institute for Human Security - conducts research that focuses on a series of transnational threats to the human rights of civilian populations and makes independent research and policy papers available to both domestic and international policymakers.

The Johnson Institute for Responsible Leadership - reaffirms GSPIA's commitment to creating ethical leaders and provides an institutional platform from which to launch an innovative program of teaching, research, and public service on issues of ethics and accountability in all areas of public life.

Center for Analytical Approaches to Social Innovation (CAASI) - translates a real-world problem from the community into a set of quantitative research questions and engages experts across disciplines to solve them.

Center for Governance and Markets - to understand the diverse institutions and governance arrangements that affect social order and human well-being in the United States and around the world. Generating knowledge of ways in which individuals and communities overcome challenges to living free, prosperous, and peaceful lives.

The Gender Inequality Research lab (GIRL) - is an interdisciplinary research forum for scholars and practitioners collaborating on policy-relevant research on gender inequality.

Area Studies

The University of Pittsburgh is home to several internationally recognized area studies centers. Many of these centers have been designated National Resource Centers (NRCs) by the US Department of Education, certifying their status as leading centers of their kind in the United States. The NRCs sponsor numerous programs and offer Foreign Language and Area Studies (FLAS) Fellowships for which GSPIA students (U.S. citizens only) are eligible.

UCIS offers graduate certificates that GSPIA students can pursue concurrently with their degrees, allowing them to focus their studies on a particular region or theme. It is normally possible to complete the requirements for a GSPIA master's degree and a UCIS certificate in two years. For further information, click [here](https://www.ucis.pitt.edu/main/graduate-students), <https://www.ucis.pitt.edu/main/graduate-students>

GSPIA Programs Abroad

GSPIA has developed a number of international partnerships that offer students the possibility to study abroad for a regular academic term, during the summer, or-in a double degree program-for an entire year or more:

International Development and Asian Affairs in Kobe, Japan

This program enables students to earn a Certificate in International Development and Asian Affairs from GSICS at Kobe University while completing their masters degree from GSPIA.

Public Administration and/or International Studies in Seoul, Korea

The exchange program enables students to earn credits toward their GSPIA degree by taking courses in the Graduate School of Public Administration and/or the Graduate School of International Studies at Seoul National University. GSPIA and Seoul National University also offer a dual-degree program that will give students the option to earn both a Master of Public Administration from Seoul National University and one of GSPIA's four master's degrees.

Public Policy and International Affairs in Paris, France

This program enables students to earn credits toward their GSPIA degree by taking courses at the Institut d'Etudes Politiques de Paris (in French), or at its English-language wing, the Paris School of International Affairs.

Government or Political Science in Bogota, Colombia

This program enables students to earn credits toward their GSPIA degree by taking courses at the Department of Political Science at the University of the Andes, one of Latin America's leading institutions. Coursework is in Spanish.

Public Management in Nanjing, China

This program enables students to earn credits toward their GSPIA degree by taking courses at Nanjing University's School of Public Management. Coursework is in Chinese.

International Relations, Madrid, Spain

This program allows students to earn credits toward their GSPIA degree by taking courses at the School of International Relations, IE University. Coursework is in English.

Budget permitting, each year the Office of the Dean and the school's academic programs make available small grants to students. Uses for these grants can include attending professional development conferences, presenting papers, and supporting internships and study abroad activities. These grants are awarded through a highly competitive selection process.

Faculty

Lisa S. Alfredson, Professor, PhD, London School of Economics

Ariel Armony, Professor, PhD, University of Pittsburgh

Luke Condra, Assistant Professor, PhD, Stanford University

Sabina E. Deitrick, Associate Professor, PhD, University of California, Berkeley

George W. Dougherty, Assistant Professor, PhD, University of Georgia

Nicola Foote, Professor, PhD, University College London

Melinda Haas, Assistant Professor, JD, PhD, University of Pennsylvania Law School, Princeton University

Gary Hollibaugh, Assistant Professor, PhD, University of Rochester

Muge Kokten Finkel, Assistant Professor, PhD, University of Virginia

Shanti Gamper-Rabindra, Associate Professor, PhD, Massachusetts Institute of Technology

Marcela Gonzalez Rivas, Assistant Professor, PhD, University of North Carolina, Chapel Hill

Ryan Grauer, Assistant Professor, PhD, University of Pennsylvania

Daniel Jones, Assistant Professor, PhD, University of Pittsburgh

Michael Kenney, Associate Professor, PhD, University of Florida

Michael Lewin, Senior Lecturer, PhD, Johns Hopkins University

Huafang Li, Assistant Professor, PhD, Rutgers University

Siyao Li, Assistant Professor, PhD, University of Pennsylvania

Sera Linardi, Assistant Professor, PhD, California Institute of Technology

Jennifer B. Murtazashvili, Assistant Professor, PhD, University of Wisconsin, Madison

Ilia Murtazashvili, Assistant Professor, PhD, University of Wisconsin, Madison

Lisa Nelson, Associate Professor, PhD, University of Wisconsin, Madison

Erica Owen, Assistant Professor, PhD, University of Minnesota

Carissa Schively Slotterback, Dean and Professor, PhD, Florida State University

Taylor Seybolt, Associate Professor, PhD, Massachusetts Institute of Technology

Nuno Themudo, Associate Professor, PhD, London School of Economics

Jeremy Weber, Assistant Professor, PhD, University of Wisconsin, Madison

Rashad Williams, Assistant Professor, PhD, University of Minnesota

Kay Shimizu, Assistant Professor, PhD, Stanford University

Kimberly Turner, Assistant Professor, PhD, Southern Illinois University, Carbondale

Part-time and Visiting Faculty

Kathleen Buechel, Senior Lecturer, MA, Kennedy School of Government, Harvard University

Julie Santucci, Senior Lecturer, MA, University of Arizona

Program and Course Offerings

Certificate

Cybersecurity, Policy and Law Certificate

To be a leader in cybersecurity requires more than just technical knowledge - it also requires a deeper understanding of the of the cyber challenges surrounding law, policy, regulations, and ethics. We are offering a Graduate Certificate in Cybersecurity, Policy and Law from three schools within the University of Pittsburgh: the Graduate School of Public & International Affairs, School of Law and the School of Computing and Information.

Cybersecurity is a multidisciplinary field that involves technical issues, security policies, regulation and law. Our integrated curriculum provides students with the skills to develop comprehensive cybersecurity policies and strengthen cybersecurity environments to minimize risk.

As part of the certificate's multidisciplinary approach, the certificate requires courses to be taken from all three Pitt schools. Students must complete a minimum of three courses from the School of Computing and Information, one course from the Graduate School of Public and International Affairs, and one course from the School of Law to earn the certificate.

Applicants must have a Bachelor's degree. All students are expected to complete the program within one to two years.

Students enrolled in a Graduate School of Public & International (GSPIA) degree program may count no more than six (6) of the certificate credits (two courses) toward their degrees.

Students will need to contact the School of Law or School of Computing & Information to obtain permission to take courses from those schools.

The Certificate curriculum, comprising of 15 credits, follows:

Program Requirements

Courses

School of Computing and Information courses

- INFSCI 2150 - INFORMATION SECURITY AND PRIVACY
- TELCOM 2821 - NETWORK SECURITY
- INFSCI 2620 - DEVELOPING SECURE SYSTEMS
- TELCOM 2811 - INNOVATING FOR PUBLIC IMPACT
- INFSCI 2621 - SECURITY MANAGEMENT AND COMPUTER FORENSICS
- CS 2053 - APPLIED CRYPTOGRAPHY AND NETWORK SECURITY
- CS 2530 - COMPUTER AND NETWORK SECURITY
- CS 3525 - ADVANCED TOPICS IN SECURITY AND PRIVACY

Graduate School of Public and International Affairs courses

- PIA 2156 - LAW, POLICY & THE INTERNET
- PIA 2379 - INTRODUCTION TO CYBER CRIMES
- PIA 2360 - CYBER SECURITY POLICY
- PIA 2389 - CRIMINAL OPERATIONS IN THE CYBERWORLD
- PIA 2327 - TERRORISM AND COUNTER TERRORISM
- PIA 2346 - INTRODUCTION TO AMERICAN INTELLIGENCE
- PIA 2365 - TRANSNATIONAL SECURITY & ILLICIT FINANCE
- PIA 2041 - POLICY ANALYSIS FOR CYBERSECURITY AND INTELLIGENCE STUDIES

School of Law courses

- LAW 5623 - CYBER POLICY, CRIME & NATIONAL SECURITY
- LAW 5380 - CYBERCRIME
- LAW 5404 - CYBERSPACE AND THE LAW
- LAW 5430 - INFORMATION PRIVACY: LAW AND PRACTICE
- LAW 5260 - INTELLECTUAL PROPERTY
- LAW 5877 - PUBLIC POLICY SEMINAR

Global Sustainable Development

This Certificate provides graduate students with tools to engage with complex challenges of global sustainable development. Global sustainable development involves the pursuit of a better world for all through the elimination of chronic poverty, discrimination & injustice, and environmental degradation, in order to ensure a sustainable future of well-being for the earth and its peoples. Worldwide, a common framework used to pursue sustainable development is found in the United Nations Sustainable Development Goals (SDGs), which promotes 17 inter-related, comprehensive, and universally applicable sustainability goals spanning economic, social, political, and environmental issues. This Certificate provides theoretical knowledge, interdisciplinary approaches, and practical skills needed to tackle chronic problems and achieve sustainable development goals on issues including poverty, hunger, health, inequality, gender empowerment, the environment, peace and justice, governance, NGO and civil society participation, and global cooperation. Learn how to solve global problems in comprehensive, sustainable, and ethical ways appropriate to diverse national and regional realities, capacities, and priorities.

The curriculum provides in-depth theoretical understanding of global sustainable development as well as practical skills to engage with complex challenges targeted through the 2030 UN Agenda for Sustainable Development, which encompasses the "5 P's": People, Planet, Prosperity, Peace, and Partnership. Students complete 12 credits and a Digital Portfolio. Courses include two required foundational courses, and two elective courses from an approved course list which addresses a wide range of SDG topics including poverty, hunger, health, education, gender inequality, the environment and natural resources, water and sanitation, energy, employment, development planning and management, global inequalities, peace/inclusion/and justice, governance and global partnerships.

Required Courses

- PIA 2510 - ECONOMICS OF DEVELOPMENT
- PIA 2501 - DEVELOPMENT POLICY AND ADMINISTRATION
- PIA 2448 - POLITICAL ECONOMY OF DEVELOPMENT

Doctoral

Public and International Affairs, PhD

Whether you want to teach, conduct research, or work in a policy environment, our Ph.D. program will equip you with the skills, tools, and knowledge to succeed in highly competitive environments such as leading universities, government agencies, and nonprofit and nongovernmental organizations around the world.

To apply to the PhD program, you must have a bachelor's degree; however, we strongly encourage that students complete a relevant master's degree prior to joining our program - either in public and international affairs or in one of the social sciences. Once you're accepted, you must complete 67 hours of coursework and a six-credit dissertation. If you have earned a master's degree, as many as 30 credits from that degree may be applied to your total credit requirement for our program (or 36 credits if your master's degree was earned at the Graduate School of Public and International Affairs at Pitt).

Embedded within an interdisciplinary school, our newly redesigned program structure is aimed at exposing students to multiple methods and offering the flexibility to conduct research from the perspectives that best fit the topic. We have also redesigned the program to facilitate a faster transition from coursework into dissertation research. To achieve these goals:

- All students are trained in advanced Qualitative and Quantitative methods.
- Some of our required courses are aimed at supporting PhD student development, including a professional development workshop, dedicated time for comprehensive exam preparation, and a research design workshop.
- Students are encouraged to seek out electives in other academic units in the University of Pittsburgh to expand the set of available doctoral-level courses and gain exposure to ideas and faculty in other disciplines.
- Our comprehensive examination is individualized to each student so that the exam prepares students for their own dissertation research and as experts in their field.
- We limit the number of students we admit to ensure that virtually all admitted students will receive at least four years of financial support, contingent on their academic performance.

Most students who are accepted for our doctoral program are awarded four years of funding. This allows you to complete your required coursework and your doctoral dissertation. Typically, students receive graduate student assistantships (GSAs) or teaching assistantships (TAs), which provide salary, tuition, fees, and medical insurance. If you have an assistantship, you're required to work 20 hours per week as assigned by the associate dean.

Assistantships will be renewed each academic year if you are in good academic standing and making normal progress in achieving your doctoral milestones. At the end of your first spring term, your academic record should indicate that you have earned a minimum of 24 credits with a cumulative GPA of at least 3.0, and that you have completed your doctoral core courses.

Requirements

Students must earn 73 credits to graduate, including advanced standing (transfer) credits, 19 credits from required core course, 18 credits from elective course, and 6 dissertation credits (PIA 3099). Full-time students are expected to complete the required core and elective courses within the first two years of study (see also "Expected Degree Progress for Full-time Students" below). Failure to do so may be grounds for dismissal. Comprehensive examinations may only be taken after all courses are completed with a grade of "B" or better.

The required courses are:

Doctoral Core Courses: 19 credits

- PIA 2028 - PUBLIC POLICY ANALYSIS
- PIA 2032 - ADVANCED QUANTITATIVE METHODS: CAUSAL INFERENCE FOR POLICY ANALYSIS

- PIA 3004 - SEMINAR IN RESEARCH DESIGN AND METHODS
- PIA 3026 - PHD PROFESSIONAL DEVELOPMENT WORKSHOP (1 credit)
- PIA 3050 - QUALITATIVE RESEARCH DESIGN & METHODS
- PIA 3097 - INDEPENDENT STUDY PHD (Full-time students are required to register for three credits of Independent Study (PIA 3097) to prepare for their Comprehensive Exam in the Fall Semester of their Second Year in the program. Part-time students must do so two terms before they intend to take their comprehensive exam)
- PIA 3121 - POLICY THEORY

Electives: 48 credits (including transfer credits)

Note that students can transfer up to 30 credits from a relevant master's program (and up to 36 for a graduate from GSPIA).

Must include PIA 2023 Intermediate Quantitative Methods (pre-requisite for PIA 2032) if the student does not have similar coursework from a prior degree.

Students will use electives to fill remaining credits.

PIA 3099 Dissertation: 6 credits

Students must be admitted to candidacy and must be writing their dissertation to be eligible to register for PIA 3099 Dissertation. Six (6) credits of PIA 3099 Dissertation are required to graduate.

- PIA 3099 - DISSERTATION PHD

Minimum Required Credits: 73 credits

Students must complete 67 credits of course work, excluding the 6 dissertation credits, with a minimum GPA of 3.0. Students must meet this requirement in order to qualify for final approval of their comprehensive examinations. Students are required to maintain full-time status while completing the 67 credits of coursework.

Additional Information

Additional Information

Students may register for additional individualized course work or guided research under the direct supervision of a GSPIA faculty member if the following conditions are met: all required course work in the School-wide core has been completed or will be completed in the term PIA 3097 will begin; the student must be in good academic standing and making normal progress toward the degree; and a summary study or research design must be submitted in writing by the students and signed by the faculty member supervisor and Doctoral Program Director.

Doctoral Practicum

As part of their coursework, students are encouraged to use the experience of a Doctoral Practicum course to better prepare themselves for subsequent career practice. This optional course, PIA 3098, can carry from one to three credits and can be taken only with the written agreement of a faculty member to supervise the practical training involved. The approval form for this course can be obtained through Student Services (the form is entitled "Doctoral Practicum"). Appropriate activities for a Doctoral Practicum include, but are not limited to, conducting basic and applied research and public policy analysis in the public, non-profit, or private sectors, teaching in higher educational institutions, and public policy development and management.

FTDK (Full-time Dissertation Study)

Doctoral students who have completed all credit requirements for the degree, including any minimum dissertation credit requirements, and are working full-time on their dissertations may register for full-time dissertation study, which carries no credits or letter grade but provides students full-time status. Students so enrolled are assessed a special tuition fee but are still responsible for paying the full-time computer and network, security/transportation, student health service, and activity fees. Students must consult with the Office of Student Services for permission to register for full-time dissertation study.

Doctoral Milestones

The first two years of the PhD program are structured by coursework and preparation for comprehensive examinations. Students are strongly encouraged to explore dissertation possibilities early in the program. To earn a PhD, students must pass the following milestones.

Plan of Study Meeting

Every student is assigned a first-year advisor at program entry. The student should consult with the first-year advisor to identify coursework for the first semester. Prior to the end of the student's first year the student should meet with their first-year advisor regarding the plan of study. This meeting's aim is to structure a program that best serves the student's interests and ensure that the degree requirements are met in a timely and stipulated manner.

Annual Progress Evaluation: First and Second Years

The annual evaluation serves the following purposes:

- To monitor the student's progress in the program
- To identify any necessary adjustments to the student's original plan of study
- In exceptional circumstances, to signal that a student's performance points to a reconsideration of their doctoral status

In their first two years in the doctoral program, students must meet with their faculty advisor as part of their annual progress evaluation. The relevant advisor for these meetings is the first-year advisor until the student has identified a dissertation advisor, at which point that individual becomes the relevant advisor. During these meetings, the faculty advisor should revisit the plan of study to assess student progress and, if necessary, suggest corrective actions and/or adjust the plan. The student is responsible for scheduling this meeting near the end of the Spring term and should be fully aware that many professors may be unavailable after the end of the term. Failure to schedule this meeting in a timely manner may lead to the evaluation being undertaken without student participation.

Aside from the evaluation undertaken with the faculty advisor, the Doctoral Program Director may also solicit comments from faculty with whom the student has taken coursework during the year, especially in relation to courses in which the student did not perform adequately (i.e. received a G, I or lower than B grade). Unsatisfactory progress may lead to students being put on probation, suspension of financial aid and/or dismissal from the program.

Annual Dissertation Progress Evaluation: Third and Fourth Years

At the end of the third and later years, the student must undergo an annual evaluation of their progress toward the dissertation. The dissertation advisor is the relevant advisor for these meetings. The student is responsible for scheduling this meeting and should be fully aware that many professors may be unavailable during the summer. Failure to schedule this meeting in a timely manner may lead to the evaluation being undertaken without

student participation. As stated in the Regulations Governing Graduate Study at the University of Pittsburgh, "meetings of the doctoral candidate and their dissertation committee must occur at least annually from the time the student gains admission to doctoral candidacy. During these meetings, the committee should assess the student's progress toward the degree and discuss objectives for the following year and a timetable for completing degree requirements."

The student's dissertation committee will undertake the evaluation. Students' full dissertation committees must sign off on normal progress for each academic year following defense of the proposal. This will normally occur for the first time at the end of the third academic year. If the committee decides that insufficient progress has been made, one semester will be permitted for correction prior to removal from the program.

The annual review should be scheduled at least once every academic year.

Unsatisfactory progress may lead to students being put on probation, suspension of financial aid and/or dismissal from the program.

Comprehensive Examination

The comprehensive examination is designed to assess the student's mastery of their intended field of research. The examination is based on a reading list jointly written by the student and two faculty advisors in the end of the first year of doctoral study (more detail below). Unless an exception is granted by the Doctoral Program Director, comprehensive examinations are taken in May following a student's fourth semester, after the student completes all required courses and earns at least 67 credits (including advanced student credits). In addition, all incomplete grades must be removed by meeting the requirements to complete the courses: even if the course is viewed by the student as not being relevant to their degree program.

The process for the comprehensive examination is as follows:

One month prior to the last day of the Spring semester of the student's first year, the student identifies two faculty members to serve as advisors (a "chair" and a "reader") for the exam and second year research paper. Ideally, the student would seek out individuals who would go on to serve as members of the dissertation committee in following years, but there is no commitment to do so at this stage on either end. The chair must be a GSPIA faculty member. The reader should also be a GSPIA faculty member but may be external to GSPIA with permission from the PhD Program Director.

After identifying advisors, the student and advisors discuss the student's initial dissertation research interests and plans and would collaboratively form a reading list around those interests. This process should be complete by the last day of the Spring semester of the student's first year. The reading list will form the basis of material that may be covered on the comprehensive exam at the end of the year. The reading list must contain readings in three categories.

- Core readings in the student's field (where "field" is defined on an individual basis), even if not directly related to the student's specific research plans, to ensure that the student is well-read in the field that the student will be working in
- Topical readings specific to the student's research interests
- Methodological readings specific to the student's research plans

All readings should be aimed towards providing knowledge and expertise necessary to execute the planned dissertation research. This does not presume that the student has solidified specific research questions(s) for their dissertation at the time that the list is being formed; indeed, part of the aim of this process should be to help the student identify where there are gaps in the literature which will then help them pose or refine their research questions.

Individualized reading lists will be reviewed by the PhD director (with assistance from members of the PhD committee in relevant fields as necessary) to ensure sufficient coverage of each of the three categories described above. No changes may be made to the reading list within six months of the comprehensive examination date.

Students will register for an independent study in the first semester of the second year, supervised by the comprehensive exam chair, to facilitate absorbing material on the reading list.

The chair and reader will then write an exam based around the reading list with six questions, asking the student to respond to three. However, we will require that the questions cover the three broad categories noted above. That is, the student must respond to one question on "core readings", one on topic-specific readings, and one on methodology.

Each exam will be 60-hour take-home exam. Answers are limited to 3,000 words per question (not including references or footnotes). During the 60-hour period, students cannot communicate with others about the exam questions.

Students will take the exam in May and will receive either a "high pass", "pass", or "fail". If a student fails, they must retake the exam prior to the start of the following Fall semester. A second failure will result in dismissal from the program.

Second Year Paper

In addition to an exam, students will complete a second-year research paper. A second-year paper will require students to complete a research project which could (though it not required to) become a chapter of their dissertation and/or could be submitted to a peer-reviewed journal for publication. The student will pose an original research question, review relevant literature, outline the methods used to answer their question, employ those methods, report their results, and provide a conclusion.

The timeline for the paper is as follows: students will submit a short proposal for their planned paper to their chair and reader no later than the last day of the Spring semester of the second year; students can and could be encouraged to complete the proposal sooner. Approval of the proposal by chair and reader will be submitted to the PhD director. Students must then submit a complete paper by the first day of the following Fall semester of the third year. Student should present their research in a venue with their chair, reader, and the PhD program director present by the end of October of their third year. The presentation should incorporate feedback provided by reader and chair following submission of the draft. The paper (and presentation) will then be evaluated as "high pass", "pass", or "fail". As with comprehensive exam, a "fail" can result in dismissal from the program.

Establishing the Dissertation Committee

During the fifth semester (typically the fall of the third year of studies), and before admission to candidacy for the PhD degree, the academic advisor proposes, for the approval of the director of the school's doctoral program and the dean, a committee of four or more persons, including at least one from another department in the University of Pittsburgh or from an appropriate graduate program at another academic institution, to serve as the dissertation committee. The majority of the committee, including the advisor, must be full or adjunct members of the Graduate Faculty. This committee must review and approved the proposed research project before the student may be admitted to candidacy. A published Graduate Faculty Membership Roster is updated three times a year. *Only a GSPIA faculty member is eligible to serve as the chair of the committee.*

This dissertation committee has the responsibility to advise the student on their research and has the authority to require high-quality research and/or the rewriting of any portion or the entire dissertation. It conducts the final oral examination and determines whether the dissertation meets accepted standards. The student must meet with their dissertation committee at least once a year (see Annual Dissertation Progress Evaluation above). The membership of the dissertation committee may be changed whenever it is appropriate or necessary, subject to the approve of the Doctoral Program Director and the Dean.

When a dissertation committee member leaves the University, the member must be replaced unless the dissertation is almost complete or the member has an essential role on the committee. In the latter case, the dean's approval should be obtained. When the chair of a committee leaves and cannot be conveniently replaced, a co-chair must be appointed

from within the department, and the restructured committee requires the approval of the dean and either the department chair or the director of the school's doctoral program. If the defense takes place within a few months of the chair's departure, the requirement of the co-chair is usually waived.

Retired faculty members may remain as members or chairs of committee if they are spending considerable time in Pittsburgh or the vicinity and are still professionally active. Retired faculty who meets these criteria may also be appointed as a member or as a co-chair (but not chair) of a newly formed committee. Retired faculty who leave the Pittsburgh area and/or do not remain professionally active should be replaced on committees and the revised committee approved by the dean and either the department chair or the school's director of doctoral programs.

The completed and signed Dissertation Committee Approval Form and/or the Change in Dissertation Committee Form should be submitted to the Academic Advising office for posting and filing.

All coordination between Dissertation Committee members is the responsibility of the student.

Dissertation Proposal

Immediately after passing the comprehensive examinations, and establishing the dissertation committee, the students should meet with the chair to discuss the development of a dissertation proposal, which outlines the goals and objectives, theoretical argument, policy implications, literature, research design, and timetable for the dissertation research. Students must defend their dissertation proposal by the end of the term after they take comprehensive exams, which will normally correspond to the end of Fall semester of the third year of studies. Students who do not defend their proposal by the end of the semester after their comprehensive exams will be placed on probation; students who do not defend their proposal by the end of the following semester (the probationary semester) are removed from the program.

The student will submit the Announcement of Dissertation Proposal Meeting Form to the Academic Advising office or the Doctoral Program Director ten days prior to the proposal meeting. The announcement will be sent to the faculty and graduate student email lists. Proposal defense meetings are open to all faculty and students.

There must be a minimum of three members present for the meeting to be convened, and the absent member is required to submit a written evaluation of the proposal to the Committee Chair. Under no circumstances can the meeting be held without the Chair. If the Committee accepts the proposal, all Committee members will sign the Approval of Dissertation Proposal Form. The completed and signed form is then submitted along with a copy of the approved proposal to the PhD.D. Program Director, who has final approval. According to University guidelines, only after the proposal has been accepted as final by the Doctoral Program Director does the student advance to candidacy. The signed and completed form is to be returned to Academic Advising office for posting and filing.

Dissertation

The Dissertation Committee must meet a minimum of once a year; however, students are strongly encouraged to schedule more frequent committee meetings.

An appropriate dissertation should be a substantive piece of original and independent research grounded in an appropriate body of literature. The characteristics which a dissertation should demonstrate are:

- the establishment of a historical context for the presentation of an innovative and creative approach to the problem analysis and solution,
- a clear understanding of the problem area as revealed by analysis and synthesis of a broad literature base,
- a well-defined research design,
- clarity in composition and careful documentation,
- results of sufficient merit to be published in refereed journals or to form the basis of a book or monograph,
- sufficient detail so that other scholars can build on it in subsequent work, and

- the preparation of the author to assume a position within the profession.

Oral Defense of the Dissertation

At the oral defense, the student will be asked to explain and justify dissertation research and to assess its relation and contribution to the literature and policy in the field. The final oral examination in defense of the doctoral dissertation is conducted by the dissertation committee and need not be confined to materials in and related to the dissertation. Any member of the Graduate Faculty of the University may attend and participate in the examination. The date, place, and time of the examination should be published well in advance in the University Times. Other qualified individuals may be invited by the committee to participate in the examination. Only members of the dissertation committee may be present during the final deliberations and may vote on the passing of the candidate. A report of this examination, signed by all the members of the dissertation committee, must be sent to the Office of Student Services for posting and filing. If the decision of the committee is not unanimous, the case is referred to the dean for resolution. The chair of the dissertation committee should ensure that the dissertation is in final form, i.e., all required changes have been made, before requesting signatures of the members of the committee

Electronic Thesis and Dissertation (ETD)

After approval of the dissertation, all candidates are required to publish the document electronically via d-scholarship. For access to more information on ETD and training, go to www.pitt.edu/~graduate/etd/training.html.

General Academic Regulations in GSPIA

Applying for Advanced Standing (Transfer Credits)

At the Plan of Study Meeting students who have completed a master's degree from an accredited institution prior to admission to GSPIA must submit official transcripts certifying graduate courses completed. They can then be evaluated for acceptability as advanced standing, provided grades of B (or its equivalent) or better have been earned. Other documentation such as course syllabi and descriptions will be required to support the student's request. All accepted course credits will be entered as block credits on the student's transcript. Grades and GPAs are not recorded for transfer credits.

The required 72 credits of coursework may include credits obtained through meeting Advanced Standing requirements. In no cases, however, will accepted credits be used to waive required core courses. For students with master's degrees, a maximum of 30 credits for coursework may be applied to the PhD.D. degree. For those students who have a master's degree from GSPIA, a maximum of 36 credits for coursework may be applied.

In recognition of relevant doctoral study completed at a school other than GSPIA, a maximum of 12 additional credits may be applied to the minimum credit requirement. In no case, however, can the total of all credits accepted through advanced standing exceed 36 credits (master's degree and relevant doctoral degree credits together, regardless of where the credits were obtained). Course Credit Acceptance forms are available through the Academic Advising office. When completed and signed, this form and supporting documentation must be submitted to the Academic Advising office for further evaluation, approval, posting and filing.

Acceptance of Transfer Credit

The completion of requirements for advanced degrees must be satisfied through registration at the Pittsburgh campus of the University; however, graduate students already enrolled may, when approved in advance by the Doctoral Program Director, spend a term or more at another graduate institution to obtain training or experience not available at the University, and transfer those credits toward the requirements for a GSPIA degree. In such instances, neither the University nor GSPIA is responsible for any financial assistance to the graduate student.

Credit acceptance will not be granted for courses in which a grade lower than a B (GPA=3.0) or its equivalent has been received. No credits will be granted toward a GSPIA degree for work completed in extension courses, correspondence courses, courses delivered electronically, or those offered in the off-campus center of another institution unless those credits are approved for equivalent graduate degrees at that institution, and provided that the institution has an accredited program.

Course Work Acceptable as Graduate Credit

Courses at the University of Pittsburgh numbered 2000-2999 and 3000-3999 are acceptable graduate courses. No undergraduate language courses, courses numbered below 2000, or language acquisition courses may be applied toward GSPIA degree requirements.

Substituting Non-GSPIA Courses for Degree Requirements

Required courses for the individual degree programs are considered by the School as essential to the study of public and international affairs. Accordingly, students are required to take these courses in GSPIA. In exceptional cases, and on a case-by-case basis, students may be permitted to substitute comparable courses offered in other Schools and departments, provided they obtain prior approval from the Doctoral Program Director *and* the faculty advisors for either or both the fields of specialization.

Statute of Limitations

The purpose of the statute of limitation is to ensure that a graduate degree from GSPIA represents mastery of current knowledge in the student's field of study.

Requirements for the doctoral degrees must be completed within a period of eight consecutive calendar years from the students' initial registration for doctoral study.

Under exceptional circumstances a candidate may apply for an extension of the statute of limitations. The request must be approved by the program director and submitted to the assistant dean for final action. Each student who requests an extension of the statute of limitations must be prepared to demonstrate proper preparation for the completion of all current degree requirements.

Leaves of Absence

Under special conditions, graduate students may be granted one leave of absence. A maximum leave of two years may be granted to doctoral students. The length and rationale for the leave of absence must be stated in advance and approved by the dean or his/her designee. Only students in good academic standing will be approved for a leave of absence. If approved, the time of the leave shall not count against the total time allowed for the degree being sought by the students. Readmission following an approved leave of absence is a formality.

Students who take an unapproved leave of absence may, at the discretion of the dean and the program director, be readmitted to the School, but must finish their degree requirements within the et by their original matriculation.

Parental accommodation. Consistent with the University's efforts to be inclusive and to support academic personal life balance, the University believes it is important to provide accommodations for graduate and professional students who become new parents, whether by childbirth or adoption, so that they may contribute to their family responsibilities while continuing to make progress towards their degree. This practice will help develop students who can successfully integrate their academic and personal pursuits. In recognition of the challenges of balancing the demands of graduate study and parenting a new child, these guidelines aim to improve the academic environment for student parents. The Graduate and Professional Student Parental Accommodation Guidelines assist graduate students immediately following the birth or placement for adoption of a child. The purpose of these guidelines is to make it possible for a student to maintain registered full-time student status, along with all the benefits of such status, while facilitating the return to full participation in courses, research and teaching.

Eligibility: The Parental Accommodation Guidelines apply only to full- and part-time students enrolled in graduate and professional programs who are in good academic standing and who are making satisfactory progress toward completion of a graduate degree. Students must have completed at least one full-time semester of their degree program to become eligible for coverage under these guidelines. The guidelines cover the situation of students who experience a childbirth, who adopt a child who is unable to be enrolled in full-day public school due to age or other developmental reasons, or who is a partner of someone who has experienced a childbirth or an adoption for whom the student has parental responsibilities. These eligibility requirements cover all provisions of the guidelines.

Graduation

Certification Requirements for Graduation

GSPIA doctoral program requires the satisfactory completion of:

- Minimum of 67 credits of coursework (includes transfer credits)
- Dissertation credits (PIA 3099) - 6 credits

Successful completion of the following milestones:

- Plan of Study Meeting
- Annual Progress Evaluations
- Comprehensive Examinations
- Approval of Dissertation Committee
- Dissertation Proposal
- Dissertation Defense
- Electronic Dissertation Submission

Moreover, all candidates for graduation must be in good academic standing and registered in the term in which they wish to graduate.

Application for Graduation

Students must submit an application for graduation early in the term in which graduation is expected. As noted above, students should be registered in the term in which they are to graduate; in exceptional circumstances, students who complete all the degree requirements at the end of a term but graduate in the next term may petition the Academic Advising office for a waiver of this registration requirement.

Master's

Master of Public and International Affairs

The MPIA degree is a multidisciplinary program designed to prepare students for careers of influence in the international arena - as government policymakers, diplomats, intelligence officials, global business leaders, analysts, and policy researchers. The program emphasizes the practical skills and knowledge necessary to participate in international policy processes and shape their future. The MPIA curriculum includes traditional courses on international economics and international affairs, along with practical courses on intelligence collection and analysis, diplomacy, and international finance and professionalization. It also includes one of the country's few graduate specializations in Human Security - a unique field that focuses on the security of civilian populations and human rights.

Students must complete at least 36 credits in public and international affairs and may choose one of three majors: International Political Economy, Human Security, or Security & Intelligence Studies. Students may also pursue a minor in any area of concentration offered at GSPIA (e.g., policy research and analysis), as well as a multidisciplinary one in cybersecurity. Students wishing to study a language or earn a university certificate can do so (though we note that could extend the time to degree beyond 18 months). Students can also choose to specialize in a region or area studies or design their own specialization. Students are encouraged to meet with an academic advisor to plan their course of study.

Concentration requirements

Take one of these three courses plus 9 concentration electives.

- PIA 2301 - INTERNATIONAL POLITICAL ECONOMY
- PIA 2307 - HUMAN SECURITY
- PIA 2303 - SECURITY AND INTELLIGENCE STUDIES

Required courses

Take all 5 courses.

- PIA 2021 - INTERNATIONAL AFFAIRS
- PIA 2096 - CAPSTONE SEMINAR:
- PIA 2022 - QUANTITATIVE METHODS
- PIA XXXX - International Economics
- PIA XXXX - Skills for Global Policy Professionals

Free electives

Take 9 credits of graduate-level electives

Micro-Credential

Public Policy

The "Public Policy" micro-credential consists of three GSPIA courses on Public Policy. It is aimed at attracting PhD students from other units on campus who are interested in supplementing their disciplinary training with some exposure to theory and practice of the Public Policy process. We anticipate that students will primarily use required elective credits in their own programs to fulfill the requirements of this Micro-credential.

Required Course 1:

- PIA 3121 - POLICY THEORY

Required Course 2:

- PIA 2028 - PUBLIC POLICY ANALYSIS

Required Course 3: Choose one from a list:

- Any GSPIA 3000-level course (except for PIA3004 - Seminar in Research Design and Methods)
- PIA 2032 - ADVANCED QUANTITATIVE METHODS: CAUSAL INFERENCE FOR POLICY ANALYSIS
- PIA 3050 - QUALITATIVE RESEARCH DESIGN & METHODS
- PIA 2231 - CONTEMPORARY US ENERGY POLICY
- PIA 2502 - ENVIRONMENTAL POLICY: US AND GLOBAL
- PIA 2522 - CLIMATE POLICY - LOCAL & GLOBAL
- PIA 2216 - ECONOMICS OF SOCIAL POLICY
- PIA 2210 - RACE, GENDER, LAW AND POLICY
- PIA 2224 - REPARATIONS: POLICY, THEORY AND HISTORY
- PIA 2743 - URBAN AND LOCAL POLICY MAKING IN THE UNITED STATES
- PIA 2125 - CITY AND REGION THEORY AND PRACTICE
- PIA 2740 - PLN & ANAL SUSTAINABLE REGIONS
- PIA 2510 - ECONOMICS OF DEVELOPMENT
- PIA 2501 - DEVELOPMENT POLICY AND ADMINISTRATION
- PIA 2553 - GLOBAL HEALTH POLICY
- PIA 2460 - LATIN AMERICA SOCIAL & PUBLIC POLICY
- PIA 2507 - HUMAN RIGHTS AND SOCIAL CHANGE
- PIA 2429 - THE WAR ON DRUGS
- PIA 2327 - TERRORISM AND COUNTER TERRORISM

Public Administration Program

Master of Public Administration (MPA)

Public administration is a field practiced at the intersection of the government, nonprofit, and private sectors. GSPIA's MPA program trains managers to balance the needs of each community with its resources, promoting neighborhood development, effective local government, ethical leadership, and responsible business practices. Students gain an incredibly diverse and flexible set of professional skills that will prepare you for leadership in nonprofit agencies, government offices, and private businesses worldwide.

Students will develop professional skills in neighborhood development, data interpretation, advocacy for effective local government, ethical leadership, responsible business practices and critical thinking and problem solving.

Degree Requirements

All MPA students are required to complete the GSPIA core & MPA Degree Core courses along with the required Concentration courses and Electives.

Degree Core required courses (12 credits):

PIA 2022 Quantitative Methods

PIA 2025 Microeconomics

PIA 2028 Public Policy Analysis

PIA 2096 Capstone Seminar OR PIA 2099 Thesis

All students must complete an approved internship of at least 300 hours while enrolled at GSPIA. The internship must be approved by the student's career advisors in advance. Students with at least three years of relevant full-time work experience may petition their career advisor for a waiver of this requirement during their first semester.

MPA Degree Core required courses (9 credits):

PIA 2020 Administration of Public Affairs

PIA 2117 Program Evaluation

PIA 2104 Financial Management

MPA Concentrations (12 credits):

Applicants will select from one of the following concentrations. Please click on this link for concentration details, [Public Administration, MPA](#)

Energy & Environment

Governance & International Public Management

Policy Research & Analysis

Public & Nonprofit Management

Social Policy

Urban Affairs & Planning

Free Electives/Minor Courses (15 credits)

Total MPA degree credits = 48

Minor

MPA students may also pursue a minor. Please click on the following link: [GSPIA Minors](#)

Joint Degree Options

MPA students are eligible to pursue one of several joint degrees at the University of Pittsburgh, including a joint MPA/law degree (JD), MPA/Master of Public Health (MPH), MPA/Master of Science in Information Science (MSIS), and MPA/Master of Social Work (MSW). They may also pursue a joint master's degree through the Graduate School of International Cooperative Studies at Kobe University in Japan. An accelerated, five-year bachelor's/master's degree program is available to select University of Pittsburgh undergraduates.

Master of Public Administration/JD

Master of Public Administration/MPH

Master of Public Administration/MSW

Master of Public Administration/MIS

Quantitative Economics/Public Administration, MS/MPA

Accreditation

GSPIA's Master of Public Administration degree is accredited by the National Association of Schools of Public Affairs and Administration (NASPAA). NASPAA accreditation recognizes that a master's program in public affairs has gone through a rigorous process of voluntary peer review conducted by the Commission on Peer Review and Accreditation (COPRA), and has met NASPAA's Standards for Professional Master's Degree Programs in Public Affairs, Policy, and Administration.

Master's

Public Administration, MPA

Today's policymakers require analytical skills from a variety of disciplines: quantitative, economic, political, and organizational. Students in the policy research & analysis major enjoy access to a rich array of resources to help them prepare for careers in both the public and private sectors. Recent graduates of our program have gone on to work in such careers as budget examiners for the state of New York, analysts for the Government Accountability Office and the U.S. Mint and consultants for the leading firm Booz Allen Hamilton.

Motivated and inquisitive people looking to acquire the technical skills and knowledge to contribute to research and policymaking decisions will appreciate our curriculum. It is infused with a rich variety of interdisciplinary viewpoints to give students a well-informed view of policy analysis that is both national and international in scope.

Required Courses: 21 credits

Along with the 48 credits of Required MPA courses, all students must complete a 300-hour internship with approval from GSPIA career services.

- PIA 2020 - ADMINISTRATION OF PUBLIC AFFAIRS
- PIA 2022 - QUANTITATIVE METHODS
- PIA 2025 - MICROECONOMICS
- PIA 2028 - PUBLIC POLICY ANALYSIS
- PIA 2104 - FINANCIAL MANAGEMENT
- PIA 2117 - PROGRAM EVALUATION
- PIA 2096 - CAPSTONE SEMINAR:
OR
- PIA 2099 - THESIS

Energy and Environment Concentration: 12 credits

Energy & Environment explores the politics and policies of the worldwide energy industry, examining ways to meet global energy needs in a sustainable, environmentally conscious way. Pittsburgh is a global epicenter of one of the biggest energy revolutions of the 21st century - the shale gas boom. New technologies like "fracking" are making

billions of dollars of natural gas accessible to world markets for the first time, generating thousands of new jobs from Europe to North America. Western Pennsylvania sits atop one of the largest and most productive shale deposits anywhere on the planet, raising major questions about how to extract the gas responsibly, how to protect communities from environmental harm, and how to tax and regulate the rapid growth. GSPIA Students study the economics of the global energy industry, environmental sustainability, and regulatory policy in one of the world's best living laboratories. Graduates are prepared for jobs at environmental protection agencies, energy corporations, and a host of local, state, and national government offices that make energy policy.

Take two of the following five courses:

- PIA 2115 - ENVIRONMENTAL ECONOMICS
- PIA 2164 - NATURAL RESOURCES GOVERNANCE AND MANAGEMENT
- PIA 2231 - CONTEMPORARY US ENERGY POLICY
- PIA 2502 - ENVIRONMENTAL POLICY: US AND GLOBAL
- PIA 2522 - CLIMATE POLICY - LOCAL & GLOBAL
- Plus: at least **two** additional E&E elective courses.

Governance and International Public Management Concentration (12 credits)

Governance and International Public Management provides a comparative perspective on international development, focusing on the ways in which public and nonprofit organizations must adapt to meet the different cultural, political, and economic circumstances of the communities they serve.

It explores how public agencies around the globe, faced with similar problems like poverty, illiteracy, and inequality, have addressed those issues differently in different countries. Students confront the challenges of implementing complex policies in a global, multicultural context. This major focuses on developing the management and analytical skills necessary to take leadership roles in the multilateral sector, governments abroad, or any organization that delivers services internationally. Graduates are well-prepared to pursue careers at the United Nations, the U.S. Agency for International Development, and similar organizations.

Take one of the following five courses:

- PIA 2310 - MARKETS AND STATES
- PIA 2519 - COMPARATIVE GOVERNANCE
- PIA 2528 - GOVERNANCE, LOCAL GOVERNMENT AND CIVIL SOCIETY
- PIA 2529 - POLITICAL ECONOMY ANALYSIS FOR GLOBAL AFFAIRS
- PIA 2552 - MANAGING ORGANIZATIONS IN DEVELOPMENT

Plus:

PIA 2xxx Approved GIPM Concentration Course

PIA 2xxx Approved GIPM Concentration Course

PIA 2xxx Approved GIPM Concentration Course

Public & Nonprofit Management Concentration (12 credits)

Public service is a discipline practiced at many levels: local, national and international often with ripple effects across each. Through grassroots contributions and global applications, GSPIA students pursuing a public & nonprofit management major acquire a deep understanding of the many contexts in which public and nonprofit organizations operate. Many look forward to the opportunity to leverage change in a mixed economy.

Our curriculum stresses responsible leadership and our students develop the skills to diagnose leadership challenges and opportunities from a variety of ethical and moral frameworks. Our interdisciplinary approach draws from a variety of fields such as philosophy, law, organizational design and political science. Our approach gives students the skills

they need to meet the challenges of a world in which services increasingly span boundaries among business, government and nonprofit organizations.

- PIA 2103 - TALENT MANAGEMENT IN THE PUBLIC & NONPROFIT SECTOR
 - PIA 2185 - STRATEGIC MANAGEMENT
- Plus:
- PIA 2xxx Approved PNM Concentration Course
 - PIA 2xxx Approved PNM Concentration Course

Policy Research and Analysis Concentration (12 credits)

Today's policymakers require analytical skills from a variety of disciplines: quantitative, economic, political, and organizational. Students in the policy research & analysis major enjoy access to a rich array of resources to help them prepare for careers in both the public and private sectors. Recent graduates of our program have gone on to work in such careers as budget examiners for the state of New York, analysts for the Government Accountability Office and the U.S. Mint and consultants for the leading firm Booz Allen Hamilton.

Motivated and inquisitive people looking to acquire the technical skills and knowledge to contribute to research and policymaking decisions will appreciate our curriculum. It is infused with a rich variety of interdisciplinary viewpoints to give students a well-informed view of policy analysis that is both national and international in scope.

- PIA 2023 - INTERMEDIATE QUANTITATIVE METHODS
- Plus:
- PIA 2xxx Approved PRA Concentration Course
 - PIA 2xxx Approved PRA Concentration Course
 - PIA 2xxx Approved PRA Concentration Course

Social Policy Concentration (12 credits)

Gain the quantitative, political, administrative and legal skills to analyze social needs and policy impact on human lives worldwide. You'll learn to monitor, evaluate, and communicate data to convey the consequences of policy development and implementation.

- Take one of the following two courses:
- PIA 2210 - RACE, GENDER, LAW AND POLICY
 - PIA 2216 - ECONOMICS OF SOCIAL POLICY
- Take one of the following four courses (*the course chosen above may not be counted a second time*):
- PIA 2210 - RACE, GENDER, LAW AND POLICY
 - PIA 2216 - ECONOMICS OF SOCIAL POLICY
 - PIA 2223 - CITY OF WHITE SUPREMACY
 - PIA 2224 - REPARATIONS: POLICY, THEORY AND HISTORY
- Plus:
- PIA 2xxx Approved SP concentration course
 - PIA 2xxx Approved SP concentration course

Urban Affairs and Planning Concentration (12 credits)

The major in Urban Affairs and Planning takes a city-focused perspective on urban development. More than half of the world's people now live in urban areas, raising important questions about how governments should meet the public's needs for transportation, health and sanitation, education, and other essential services.

As the developing world urbanizes, and the developed world undergoes redevelopment, booming cities like Shanghai, Mumbai, Buenos Aires, and Johannesburg face critical challenges, including poverty, homelessness, and pollution, while other cities in developed countries, like Newcastle and Pittsburgh, face similar challenges of their own. The concentration prepares students to confront those problems while developing valuable skills in Geographic Information Systems (GIS), regional economic planning, sustainable development management, and social justice in the context of urban development.

- PIA 2125 - CITY AND REGION THEORY AND PRACTICE
 - PIA 2715 - GIS FOR PUBLIC POLICY
 - Take one of the following three courses:
 - PIA 2188 - ECONOMIC DEVELOPMENT STRATEGIES AND PRACTICES
 - PIA 2223 - CITY OF WHITE SUPREMACY
 - PIA 2740 - PLN & ANAL SUSTAINABLE REGIONS
- Plus:
- PIA 2xxx Approved UAP concentration course

Elective/Minor Courses: 15 credits

48 Credits

MPA Joint Degrees

Students pursuing an MPA have the option to do a Joint Degree:

MPA/JD

MPA/MIS

MPA/MPH

MPA/MSW

Quantitative Economics/Public Administration, MS/MPA

Public and International Affairs Program

Master of Public and International Affairs (MPIA)

From the halls of the United Nations to the streets of war-torn conflict zones, the modern international system is in a state of rapid flux that demands versatile, well-educated professionals. The MPIA degree is a multidisciplinary program designed to prepare students for careers of influence in the international arena - as government policymakers, diplomats, intelligence officials, global business leaders, nonprofit managers, and policy researchers. The program emphasizes practical skills and knowledge necessary to participate in the world policy process and shape its future.

The MPIA curriculum includes traditional courses on world history, economics, and international relations theory, along with practical courses on intelligence collection and analysis, diplomacy, and international finance. It also includes one of the country's only graduate specializations in Human Security - a unique field that focuses on the

security of civilian populations and human rights. Students will gain professional skills in human security and rights, intelligence collection and analysis, international relations, diplomacy and international trade and finance.

Degree Requirements

All MPIA students are required to complete the GSPIA core & MPIA Degree Core courses along with the required Concentration courses and Electives.

Degree Core required courses (12 credits):

PIA 2022 Quantitative Methods

PIA 2025 Microeconomics

PIA 2028 Public Policy Analysis

PIA 2096 Capstone Seminar OR PIA 2099 Thesis

All students must complete an approved internship of at least 300 hours while enrolled at GSPIA. The internship must be approved by the student's career advisors in advance. Students with at least three years of relevant full-time work experience may petition their career advisor for a waiver of this requirement during their first semester.

MPIA Degree Core required courses (6 credits):

PIA 2023 International Affairs

Based on Concentration, students must take one of the following:

PIA 2303 Security & Intelligence Studies or

PIA 2307 Human Security or

PIA 2301 International Political Economy

MPIA Concentrations (12 credits):

Applicants will select from one of the following concentrations. Please click on this link for concentration details, Master of Public and International Affairs

Human Security

International Development Program

Master of International Development (MID)

GSPIA's Master in International Development (MID)-one of the oldest programs of its kind in the country-is dedicated to achieving social, economic, and political progress in countries worldwide, through means that fundamentally promote human dignity, well-being, empowerment, and rights. Distinguished by a multidisciplinary and comprehensive approach, our degree program combines cutting-edge knowledge and an essential balance of theory and practice.

We offer a flexible curriculum including six major **concentration** options and numerous minor concentrations, valuable capstone and **internship** experiences, and **joint degree** and **regional certificate** options. Students gain essential development skills and insights, with emphasis on application to vulnerable and discriminated groups and to critical world problems such as impoverishment, climate change, ill health and disease, gender inequality, racial and ethnic discrimination, education gaps, migration, and urbanization.

Our program enables students to follow their passions and to develop effective and collaborative responses to critical issues and the UN Sustainable Development Goals. Graduates go on to pursue valuable careers and participate in meaningful processes of social change in diverse local contexts and at global levels.

Degree Requirements

All MID students are required to complete the GSPIA core & MID Degree Core courses along with the required Concentration courses and Electives.

Degree Core required courses (12 credits):

PIA 2022 Quantitative Methods

PIA 2025 Microeconomics

PIA 2028 Public Policy Analysis

PIA 2096 Capstone Seminar OR PIA 2099 Thesis

All students must complete an approved internship of at least 300 hours while enrolled at GSPIA. The internship must be approved by the student's career advisors in advance. Students with at least three years of relevant full-time work experience may petition their career advisor for a waiver of this requirement during their first semester.

MID students are eligible to pursue one of several joint degrees at the University of Pittsburgh, including a joint MID/law degree (JD), MID/Master of Public Health (MPH), MID/Master of Science in Information Science (MSIS), MID/Master of Social Work (MSW) and MID/Master of Business Administration (MBA).

Master of International Development/JD

Master of International Development/MPH

Master of International Development/MIS

Master of International Development/MSW

Master of International Development/MBA

Master's

International Development, MID

MID students promote respect for human life and human rights, often working behind the scenes to bring real improvements to the human condition through hands-on careers in public service. They work face-to-face with underprivileged and vulnerable populations, in the front offices of aid agencies, and in international organizations dedicated to protecting those who need help most.

The 48-credit MID degree is designed to prepare students to make a difference locally, nationally, and globally by emphasizing intellectual rigor and practical skills. Students study development theoretically, but also learn concrete technical and managerial skills necessary to work in organizations that promote equality in the developing world. Graduates exit the program prepared for professional work in the United Nations, public aid agencies, and charities of all sizes. Often, they pursue work in the private sector, research groups, and prominent non-governmental organizations.

Required Courses: 18 credits

Along with the required MID courses, all students must complete a 300-hour internship with approval from GSPIA career services.

- PIA 2022 - QUANTITATIVE METHODS
- PIA 2025 - MICROECONOMICS
- PIA 2028 - PUBLIC POLICY ANALYSIS

OR
- PIA 2099 - THESIS

Energy & Environment Concentration: 12 credits

This concentration explores the politics and policies of environmental sustainability and environmental protection, climate change and climate emergencies, natural resource governance and the worldwide energy industry, and ways to meet global energy needs in an ethical and sustainable way. International Development students are equipped to confront the global climate emergency that threatens human survival, especially the in the poorest countries. Students study efforts to achieve a just and equitable transition to renewable energy, thereby cutting global greenhouse gas emissions, while securing affordable and resilient energy systems and investing in economic diversification of traditional fossil fuel reliant regions. Students learn about international, national, state and local policy strategies to govern and protect the environment. Successes such as the Montreal Protocol for the protection of the ozone layer inform current efforts to address climate change, biodiversity loss, and transboundary air, water and waste issues.

Take two of the following five courses:

- PIA 2115 - ENVIRONMENTAL ECONOMICS
- PIA 2164 - NATURAL RESOURCES GOVERNANCE AND MANAGEMENT
- PIA 2231 - CONTEMPORARY US ENERGY POLICY
- PIA 2502 - ENVIRONMENTAL POLICY: US AND GLOBAL
- PIA 2522 - CLIMATE POLICY - LOCAL & GLOBAL

Governance & International Public Management Concentration: 12 credits

*****On August 8, 2023 the following Governance and International Public Management course information was updated in the published catalog. In an effort to provide accurate information the update was made on August 8, 2023.*****

Governance and International Public Management provides a comparative perspective on international development, focusing on the ways in which public and nonprofit organizations must adapt to meet the different cultural, political, and economic circumstances of the communities they serve.

It explores how public agencies around the globe, faced with similar problems like poverty, illiteracy, and inequality, have addressed those issues differently in different countries. Students confront the challenges of implementing complex policies in a global, multicultural context. This major focuses on developing the management and analytical skills necessary to take leadership roles in the multilateral sector, governments abroad, or any organization that delivers services internationally. Graduates are well-prepared to pursue careers at the United Nations, the U.S. Agency for International Development, and similar organizations.

Take one of the following five courses:

- PIA 2310 - MARKETS AND STATES
- PIA 2519 - COMPARATIVE GOVERNANCE

PIA 2xxx Approved GIPM Concentration Course

PIA 2xxx Approved GIPM Concentration Course

Human Security Concentration: 12 credits

Human security threats are wide-ranging, manifesting in critical problems of deprivation, indignity, and fear that are also deeply interconnected. Human Security students learn to develop forward-thinking solutions to such problems by using analytical tools that are people-centered, and that tackle linkages between threats through comprehensive interdisciplinary analysis and innovative multi-sectoral collaboration across the fields of development, human rights, and security. By focusing on people as the central unit of analysis, human security approaches mark a shift away from traditional state-centered threats and responses, instead emphasizing peoples' lived experiences, as well as participatory or "bottom-up" solutions that foster resilience and sustainability. Students benefit from GSPIA's multidisciplinary faculty and its highly regarded Ford Institute for Human Security, one of the oldest human security programs in the country.

The flexible design of this concentration enables International Development students to use GSPIA's comprehensive course offerings in order to study how development intersects with other issues, for example: the empowering tools

offered by human rights for achieving Sustainable Development Goals such as education, poverty, hunger, and inequality; the importance of environmental sustainability goals for development work to prevent root causes of human displacement and ill-health; the role of development in fostering peace, reducing interpersonal violence such as human trafficking and gender-based violence, as well as political violence and armed conflict; and the value of intersectional and gender analysis across human security threats.

- PIA 2xxx Approved HS concentration course
- PIA 2xxx Approved HS concentration course

Nongovernmental Organizations & Civil Society Concentration: 12 credits

The explosive growth of non-governmental organizations (NGOs) worldwide has fostered demand for deeply committed staff with solid development policy and organizational management skills. This concentration focuses on how NGOs and civil society drive social change and enable participation and empowerment, especially among vulnerable and excluded groups. It gives students the skills they need for careers in NGOs and social-change organizations including foundations, social movement coalitions, community organizations, non-profit associations, and social enterprises. Key topics of study include NGO management, program design and evaluation, advocacy, community participation and social movements, rights-based approaches, project and financial management, fundraising and grant writing, and policy analysis. Students apply such learning to wide-ranging policy issues at the heart of NGO work, for example food security, health policy, poverty and inequality, environmental sustainability, migration and refugees, human rights, and other UN SDGs. NGOCS students learn to apply essential organizational and management skills to address these and other important policy issues in diverse contexts around the world. Students also develop valuable direct experience through NGO internships, benefiting from the GSPIA-to-DC pathway for internships with national and international organizations in the nation's capital and the option to study at GSPIA's DC Center, GSPIA's dedicated support for a wide range of international NGO internships and study abroad experiences, and local opportunities within our own vibrant nonprofit community.

Take one of the following four courses:

- PIA 2507 - HUMAN RIGHTS AND SOCIAL CHANGE
- PIA 2508 - NGO ADVOCACY & INTERNATIONAL COALITIONS
- PIA 2526 - NGOS CIVIL SOCIETY AND DEVELOPMENT
- PIA 2552 - MANAGING ORGANIZATIONS IN DEVELOPMENT

Plus:

Social Policy Concentration: 12 credits

The concentration in Social Policy appeals to students who are committed to the study of social issues of public importance, who would like to pursue careers analyzing social needs and policy impacts as well as advocating for improved policies and implementation. To that effect, the curriculum offers courses on pressing social problems both in the U.S. and internationally, and highlights linkages between inequality and discrimination, conflict, poverty, political and community participation, and social mobility. Students use essential methods such as policy analysis and other rigorous tools of social science to bear on these important policy questions. Master of International Development students address social policies that are core to development problems in diverse contexts worldwide, including those highlighted in the UN Sustainable Development Goals (SDGs), such as poverty, food insecurity, health, gender inequality, human rights, and environmental sustainability.

Two of the following five courses:

- PIA 2512 - POVERTY AND INEQUALITY
- PIA 2531 - HUMAN RIGHTS, THE SDGS AND DEVELOPMENT
- PIA 2551 - GENDER AND DEVELOPMENT
- PIA 2553 - GLOBAL HEALTH POLICY
- PIA 2590 - LOCAL AND GLOBAL FOOD POLICY & SUSTAINABILITY

Public Policy and Management Program

Master of Public Policy & Management (MPPM)

Traditional Master of Public Policy and Management (MPPM)

The accelerated, 30-credit Master of Public Policy and Management (MPPM) degree provides mid-career professionals an opportunity to expand their knowledge, develop new analytic tools and professional skills, explore new ideas and theories, and interact with experienced faculty and practitioners. The program is designed to help enhance and advance the careers of professionals in the public and nonprofit sectors. It is also ideal for professionals in other fields looking to change careers, and begin a new, rewarding life in public service. Degree requirements can be completed within one year of full-time study or two years of part-time study.

Online Master of Public Policy and Management (MPPM)

The online Master of Public Policy and Management (MPPM) degree is a part-time, 30-credit program for mid-career professionals with at least five years of full-time work experience. It is an online version of the MPPM program that GSPIA has offered to talented mid-career students for more than a decade. Students who apply to the MPPM program may now choose whether they want to pursue the degree in its traditional, on-campus format or in a 100% online format.

Special Admissions Requirements

The MPPM program seeks applicants with a bachelor's degree and a minimum of five or more years of experience beyond an entry-level position. Candidates' experience should demonstrate increasing levels of responsibility, leadership, and professional competence, particularly in areas such as budgeting and finance, human resource management, or policy formulation or implementation. Candidates with fewer than five years of such experience should not apply to the MPPM program, but should apply instead to one of GSPIA's other, 48-credit master's degree programs. The flexible curriculum of the MPPM program is ideal for full-time and part-time students, as it allows them to take any of the courses offered at GSPIA. Students are free to study international affairs, international development, or public administration, and may focus their course selection on any of the fields of study offered under GSPIA's traditional, 48-credit master's degree programs.

Master's

Public Policy and Management, MPPM

Master of Public Policy and Management (MPPM)

Accelerated Mid-Career Masters (Traditional)

The accelerated mid-career, 30-credit Master of Public Policy and Management (MPPM) degree provides mid-career professionals an opportunity to expand their knowledge, develop new analytic tools and professional skills, explore new ideas and theories, and interact with experienced faculty and practitioners.

The program is designed to help enhance and advance the careers of professionals in the public and nonprofit sectors. It is also ideal for professionals in other fields looking to change careers, and begin a new, rewarding life in public service. Degree requirements can be completed within one year of full-time study or two years of part-time study. Students may specialize in security & intelligence, global political economy, human security, development planning & environmental sustainability, non-governmental organizations & civil society, urban & regional planning, public & nonprofit management, and policy research & analysis.

The MPPM program seeks applicants with a bachelor's degree and a minimum of five or more years of experience beyond an entry-level position. Candidates' experience should demonstrate increasing levels of responsibility, leadership, and professional competence, particularly in areas such as budgeting and finance, human resource

management, or policy formulation or implementation. Candidates with fewer than five years of such experience should not apply to the MPPM program, but should apply instead to one of GSPIA's other, 48-credit master's degree programs.

Online Accelerated Mid-Career Masters

The online Master of Public Policy and Management (MPPM) degree is a part-time, 30-credit program for mid-career professionals with at least five years of full-time work experience. It is an online version of the MPPM program that GSPIA has offered to talented mid-career students for more than a decade. Students who apply to the MPPM program may now choose whether they want to pursue the degree in its traditional, on-campus format or in a 100% online format.

The program provides mid-career professionals with an opportunity to expand their knowledge, develop new analytic tools and professional skills, explore new ideas and theories, and interact with experienced faculty and practitioners. It is designed to help enhance and advance the careers of working professionals in the public and nonprofit sectors, but is also ideal for professionals in other fields looking to change careers, and begin a new, rewarding life in public service.

Online Program Structure

As an online MPPM student, you will enroll in two web-based courses (for a total of 6 credits) per term. You will be able to complete the 30-credit degree in just five terms. By taking courses during the spring, summer, and fall terms, you can earn your degree in just 20 months. You may, if you prefer, complete the program at a slower pace by taking just one course at a time.

You will follow a set curriculum of online courses, all of which are taught by regular GSPIA faculty who are dedicated to your success, wherever you are. You will complete your coursework using the Pitt Online Website, where you can login at your convenience to view course material and submit assignments.

In addition to the professors teaching your courses, you will be assigned to a faculty advisor and a full-time enrollment counselor who will be able to assist you by phone, Skype, or email with any questions you may have. Your advisor and enrollment counselor will help you navigate the registration process and work with you throughout your time at GSPIA to ensure your success.

Traditional Requirements:

MPPM Core Courses: 12 credits

- PIA 2020 - ADMINISTRATION OF PUBLIC AFFAIRS
OR
- PIA 2021 - INTERNATIONAL AFFAIRS
OR
- PIA 2501 - DEVELOPMENT POLICY AND ADMINISTRATION

- PIA 2185 - STRATEGIC MANAGEMENT

- PIA 2117 - PROGRAM EVALUATION

- PIA 2896 - MPPM POLICY SEMINAR

Specialization Courses (six courses): 18 credits

- PIA 2xxx - MPPM specialization course
- PIA 2xxx - MPPM specialization course
- PIA 2xxx - MPPM specialization course
- PIA 2xxx - MPPM specialization course
- PIA 2xxx - MPPM specialization course
- PIA 2xxx - MPPM specialization course

Minimum Required Credits: 30 credits

Minimum Required Credits: 30 credits

School of Public Health

School of Public Health

Note: Students should refer to the catalog in use in their year of matriculation for course and credit requirements. All other information should be obtained from the current catalog.

The School of Public Health consists of graduate programs offered by the Departments of Behavioral and Community Health Sciences, Biostatistics, Environmental and Occupational Health, Epidemiology, Health Policy and Management, Human Genetics, and Infectious Diseases and Microbiology, the Multidisciplinary MPH program for doctoral-level health professionals, and nine certificates. Programs and specialty tracks, including joint programs, are detailed under individual department sections. The School of Public Health also offers an undergraduate degree in public health (BSPH).

The mission of the School of Public Health (Pitt Public Health) is to promote health, prevent disease, and achieve health equity for everyone through leadership in education, research, and service. Visit our website, www.sph.pitt.edu, for more information.

Community-based Participatory Research and Practice
Environmental Health Risk Assessment
Evaluation of Public Health Promotion and Health Education Programs
Global Health
Health Care Systems Engineering
Health Equity
Health Systems Leadership and Management
Lesbian, Gay, Bisexual, and Transgender (LGBT) Individuals' Health and Wellness

Admissions

Application instructions differ depending on whether you are applying for a degree, a certificate, or for non-degree coursework. Please follow the application instructions for your plan of study when applying to Pitt Public Health.

Pitt Public Health has general admission requirements for all applicants, plus each department has requirements specific to their programs. It's important to review both requirements before applying.

Accelerated Bachelor's/Master's Degree Program

University of Pittsburgh undergraduates may apply for admission to a number of accelerated bachelor's/master's programs. Designed to allow students to complete a bachelor's and master's degree in approximately 5 years. Students must have completed the number of undergraduate credits required by their program (minimum of 96 credits) before they can become a Pitt Public Health student. Besides the regular admission requirements, undergraduates must also meet additional requirements, which are specific to this program.

Non-Degree Status

Non-degree students can take up to 12 credits (cumulative maximum). If a non-degree student is later accepted into a degree program, that program will decide which of those credits may be applied to the degree requirements.

Requirements

A U.S. bachelor's degree or the equivalent foreign degree is required to become a non-degree student. Official transcripts must be submitted for all education, as well as a WES evaluation for study outside of the U.S. and TOEFL scores, if applicable.

Non-degree applicants must be U.S. citizens or permanent residents. In some cases, local applicants currently holding an F or J visa status may be eligible to apply; however, these applicants must contact the Office of Student Affairs for approval before submitting an application. Pitt Public Health does not sponsor I-20s for non-degree study.

How to Apply

- Apply online through SOPHAS Express and complete required sections only
- Pay application fee online directly to SOPHAS Express
- Submit official transcripts for all education in the United States and/or Canada to Pitt Public Health Office of Student Affairs
- Submit a course-by-course WES evaluation for all education outside of the United States (excluding study abroad but including non-English speaking Canadian institutions) to Pitt Public Health Office of Student Affairs
- Submit official TOEFL scores (if applicable) to the University of Pittsburgh institution code 2927, with no department code. IELTS or Duolingo scores may be substituted for the TOEFL.

Note: *Non-degree applicants are not required to submit recommendations, upload transcripts through SOPHAS Express, submit test scores, or submit any non-required sections of the SOPHAS Express application.*

What classes should I take?

If you're planning to apply and you know which department you're interested in, you should contact that department directly for suggestions about classes. Many non-degree students choose to enroll in the Pitt Public Health core courses (unless restricted) as a way to learn more about our various programs and/or to start working towards a degree.

Here's a sample of courses that may interest you:

- BCHS 2509 - SOCIAL AND BEHAVIORAL SCIENCES AND PUBLIC HEALTH *
- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS *
- EOH 2013 - ENVIRONMENTAL HEALTH AND DISEASE *
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY *
- HPM 2001 - HEALTH POLICY AND MANAGEMENT IN PUBLIC HEALTH *
- HUGEN 2049 - INTRODUCTION PUBLIC HEALTH GENETICS
- PUBHLT 2015 - PUBLIC HEALTH BIOLOGY *
- PUBHLT 2033 - FOUNDATIONS IN PUBLIC HEALTH *

**Pitt Public Health MPH Core Curriculum*

Note: *Pitt Public Health encourages non-degree students to apply to a degree program, but acceptance as a non-degree student does not guarantee admission to a degree program. Non-degree students are encouraged to reach out to program directors to discuss future degree options.*

Financial Aid

Almost all Pitt Public Health doctoral students and many master's students receive financial aid. Most financial aid is provided through the departments, and the amount of aid available varies among programs. Applicants should contact departments directly for information about available financial aid.

Academic Standards and Academic Integrity

Students are expected to exhibit academic honesty and to uphold the ethical standards of public health professionals. A student who is not in satisfactory academic standing will be placed on probation and may be subject to dismissal. Students should refer to the Pitt Public Health Academic Handbook for complete information on the school's academic performance standards.

Grading Policies

The School of Public Health follows the University's letter grade system in evaluating student performance in course work, though a variety of options are detailed below.

Pitt Public Health school-wide core courses are graded A, B, C, etc.

Students electing to audit a course must register for the course as for any other course, and must also complete a grade option form in the Office of Student Affairs and obtain the instructor's permission to audit the course. Students receive a grade of N for audited courses and receive no academic credit for the course.

See the University Grading Policy for Graduate Courses section of this bulletin for detailed information.

Withdrawal and Resignation

To withdraw from a class after the official add/drop period while still enrolled in other classes, you must process a Monitored Withdrawal Request Form through the dean's office of the school offering the class.

If you wish to drop all of your classes after the end of the add/drop period, you must resign from the term. The effective date of your resignation determines if you are eligible for an adjustment in the tuition and fees you were charged for the term. The effective date of your resignation will normally be the date you notify the University. You are responsible for satisfying all financial obligations accumulated until the time you officially resign. The timing of your resignation also has an impact on how grades are recorded on your transcript. The last day to resign from a term is when sixty percent of the term has passed. If you decide to resign, call or email the resignation hotline (412-624-7585, resignation@cfo.pitt.edu) immediately and leave your name, seven digit PeopleSoft ID number, daytime phone number, term you intend to resign, last time you attended class, and reason you are resigning.

Official University Record: GPA Calculation

A student's graduate Grade Point Average (GPA) is obtained by dividing the total number of letter grade credits taken in the graduate program into the total number of grade points earned in the graduate program. Only letter grades with GPA values will be used in computing the GPA.

A student may repeat any course in which a grade of B- or lower is received if an authorization to repeat the course is given by the student's adviser. A school may restrict the type and/or number of different courses which may be repeated during one degree program. The grade earned by repeating a course is used in lieu of the grade originally earned, although the original grade is not erased from the transcript. No course may be repeated more than twice. No sequence course may be repeated for credit after a more advanced course in that sequence has been passed with a B or higher grade. The repeated course must be the same as that in which the original grade was earned. In extenuating circumstances, a department chair or program director, with the dean's approval, may substitute another course of similar content. Grades of W, R, or N reported for the repeated course will not be counted as a course repeat.

To initiate only the last course grade being computed in the GPA, a Course Repeat form must be filed with the Office of Student Affairs.

See the Official University Record: GPA Calculation section of this bulletin for detailed information.

Advanced Standing and Transfer Credits

For details on advanced standing and transfer credits, students should consult the Pitt Public Health Academic Handbook and their academic advisor. Acceptance of transfer credits is at the discretion of the program.

Acceptance of a maximum of 12 credits taken as a non-degree student at Pitt Public Health is at the discretion of the program.

Students enrolled at Pitt Public Health may take credits in another school or institution, providing that their department has approved application of those credits to the degree requirements. In all cases, any combination of advanced standing credits and credits taken from another school or institution during enrollment at Pitt Public Health may not exceed the limits established by the University or the Regulations Governing Graduate Study at the University of Pittsburgh.

See the Acceptance of Transfer Credits section of this bulletin for detailed information.

Academic Advising

The School of Public Health considers effective academic advising an essential component of educating students. Departments have the primary responsibility for identifying and assigning to each student a major advisor, who, in consultation with the student, plans a program of study and research in accord with school and departmental guidelines. Departments are expected to provide students with a copy of school and departmental regulations appropriate for their

program, and students are expected to become familiar with University, school, and department regulations concerning graduate study and to accept responsibility for the completion of all degree requirements.

The student's academic advisor is to direct and assist the student in the selection of classes and the conduct of research. Waivers from program requirements are processed at the program level, and waivers from school requirements by the Office of Student Affairs provided the student has met CEPH competencies. The Application for Graduation is processed through the Pitt Public Health Office of Student Affairs after clearance has been received from the academic advisor. A student will be certified for graduation only after the academic advisor has confirmed that all degree requirements have been met.

For students required to take preliminary, comprehensive, or defense examinations, the academic advisor, in consultation with the student, designates faculty members to act as the examining committee.

Each doctoral student is required to complete an Independent Development Plan per year and to submit it to his/her advisor. A suggested template is provided.

Each doctoral student, together with the student's doctoral committee, is responsible for assuring accomplishment of all elements of the student's course of studies, including the core requirements, the research tools requirement, course work in the field of specialization, advanced standing, the qualifying and comprehensive examinations, and the dissertation overview and its final oral defense.

Career Services

Pitt Public Health Career Services is dedicated to providing informative programs, individualized career counseling services, and networking opportunities to help masters and doctoral students effectively prepare for, develop and manage a career related to their field of study. We offer a broad range of resources to achieve these goals including participation in Handshake, Pitt's comprehensive career services platform and job board. A career counselor is available to meet with students and alumni on a daily basis. Appointments can be scheduled online.

Faculty

School of Public Health Primary Faculty

Program and Course Offerings

A number of courses of general interest to all departments are offered. Course descriptions and class schedules are available to students in PeopleSoft. A list of course offerings by department can also be accessed through the departmental sections of this catalog.

Certificate

Global Health Certificate

This certificate emphasizes an integrative problem-solving approach to Global Health, based in health equity. The certificate provides a global perspective to the graduate degree, through focused coursework and field study. Certificate course content covers a range of issues relevant to Global Health, such as community-based interventions, health education, health equity, policy analysis, ethics, human rights, epidemiologic trends, and evaluation of Global Health programs.

The baseline requirements for admission to the Global Health Certificate are equivalent to those for an MPH degree and include an additional Statement of Purpose and Objectives (no more than 1500 words). Additional information for certificate applications can be found [here](#).

Required Courses

8 Credits

The certificate core courses cannot overlap with any other departmental requirement. Overlap is permitted for the remaining required courses and these may also fulfill departmental requirements.

- PUBHLT 2025 - CONCEPTS AND METHODS IN GLOBAL HEALTH
- PUBHLT 2173 - TRANSFORMING GLOBAL HEALTH EDUCATION INTO ACTION
- One of the following Graduate School of Public and International Affairs (GSPIA) courses (3 credits) is required from the list of courses below. Students can request a substitute PIA course with approval of certificate advisor.
 - PIA 2448 - POLITICAL ECONOMY OF DEVELOPMENT
 - PIA 2449 - HUMANITARIAN INTERVENTION
 - PIA 2502 - ENVIRONMENTAL POLICY: US AND GLOBAL
 - PIA 2522 - CLIMATE POLICY - LOCAL & GLOBAL
 - PIA 2551 - GENDER AND DEVELOPMENT
 - PIA 2553 - GLOBAL HEALTH POLICY

Field Practicum

1 Credit Minimum

Students must complete a field experience, which can be combined with the required practicum for the degree program, provided the experience is relevant to global health. Students have the opportunity to complete this global health practicum in the form of local opportunities or in an international setting.

Elective Courses

1-6 Credits

Students select electives, as recommended by certificate advisor, that align with their specific area of interest and intended skillset.

Total Credits: 15

Master's

Multidisciplinary, MPH

The mission of the Multidisciplinary Master of Public Health (MMPH) degree program is to prepare doctoral level health professionals to practice in community, public, and global health settings. They will use population-based concepts, health education, health promotion and the preventive components of public and personal health care and

practice. The educational program provides these individuals who have varied health science backgrounds with the advanced public health training in which they can incorporate and apply the public health knowledge and skills in a public or private setting. The program is designed to foster a comprehensive overview to bridge the gaps among public health disciplines and subdisciplines. The MMPH is uniquely designed for individuals with advanced degrees (MD, RN, DDS, DO...) and allows them the freedom to design their MPH. Comprised of the Pitt Public Health core curriculum (21 credits) the students are encouraged to choose electives from varied public health departments to form an area of focus of relevance to them. This degree gives the student the flexibility necessary to work around busy clinical schedules. Upon completion of the MMPH, students will have an understanding of statistics, health policy, research design and the ability to contribute to new research in their chosen fields of interest.

In addition to the Public Health core courses, students must complete a master's essay under the guidance of a faculty committee and a 200-hour practicum experience. The curriculum consists of 42 credits and can be completed in a year.

Pitt Public Health Required Courses

- BCHS 2509 - SOCIAL AND BEHAVIORAL SCIENCES AND PUBLIC HEALTH
- BIOST 2011 - PRINCIPLES OF STATISTICAL REASONING
- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- EOH 2013 - ENVIRONMENTAL HEALTH AND DISEASE
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- HPM 2001 - HEALTH POLICY AND MANAGEMENT IN PUBLIC HEALTH
- PUBHLT 2015 - PUBLIC HEALTH BIOLOGY
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS (*two terms*)
- PUBHLT 2033 - FOUNDATIONS IN PUBLIC HEALTH
- PUBHLT 2034 - PUBLIC HEALTH COMMUNICATIONS
- PUBHLT 2035 - APPLICATIONS IN PUBLIC HEALTH

MMPH Required Courses

- PUBHLT 2002 - ESSAY-MMPH (*1-2 credits*)
- PUBHLT 2029 - MMPH PRACTICUM (*1-3 credits*)

Elective Courses

Add electives as recommended by academic advisors to earn total credits required for the degree program.

Total Credits Required for Degree: 42

Department of Behavioral and Community Health Sciences

The Department of Behavioral and Community Health Sciences at the University of Pittsburgh examines the social determinants of health, that is, the set of social and behavioral factors that either promote or threaten public health. Our interventions alter these social and behavioral factors (such as housing, health literacy, or care management) to assess effects on community health. The BCHS mission statement summarizes our approach:

VISION

Healthy people living in thriving and equitable communities.

MISSION

Improve and promote health and equity by engaging individuals, communities, and systems through our research, teaching, and practice.

VALUES

Open communication; active collaboration; integrated and strength-based approaches; social justice and health equity; application of knowledge in the context of people's lives.

The primary educational mission of the Department is to prepare students for positions of responsibility and leadership in public health practice, research, and training. Our students learn to employ the most current health behavior theories and community development strategies in approaching public health challenges. They develop applied research skills in community health assessment and planning, program implementation and evaluation, health education, and health communication. They learn how to design programs and conduct community-based research, and to work as part of interdisciplinary teams examining behavioral interventions and community assessment strategies. These educational and practice experiences prepare our graduates to move into leadership positions at the local, national, and international levels.

The department has a world-class faculty that is involved in teaching, research, and community service on the local, national, and international level. We collaborate with local and regional public health systems, and many of the leadership staff in these organizations also have faculty appointments and teach classes in the department.

Admission: All Applicants

Applications for admission to the Department of Behavioral and Community Health Sciences are processed through the Office of Student Affairs at Pitt Public Health. You must apply for the MPH and PhD programs through SOPHAS, the centralized application service for graduate schools of public health.

Please review the School-level Admission Requirements and Department-specific Admission Requirements before applying.

Application instructions differ depending on whether you are applying for a degree, a certificate, or for non-degree coursework. Please follow the Applying for Admission to Pitt Public Health for your plan of study when applying to Pitt Public Health.

Joint Degrees

Students in the BCHS MPH program can pursue two graduate degrees simultaneously, through partnerships with other schools and departments at the University of Pittsburgh. Joint programs typically reduce the number of credits needed for each degree, allowing students to earn two degrees in three years for master's programs and four to five years for MPH/PhD programs.

To participate in a joint degree program, students apply separately to both schools, and must meet all of the usual admissions requirements.

Although it is possible to apply to both schools at the same time, currently enrolled students can still apply for a joint degree as long as they have not yet completed one year of full-time study.

Financial Assistance

All MPH applicants are automatically reviewed for School and Departmental scholarships. Small grants and awards are available from the Department, the School of Public Health, and from the University, and many BCHS students have been successful in competing for these awards. In addition, a small number of Graduate Student Assistant and Graduate Student Researcher assistantships are available for full-time doctoral students. There are also opportunities for paid field practicum positions, and many students are able to supplement their income through part-time employment on public health-related service or research projects conducted within the Graduate School, the University, University of Pittsburgh Medical Center (UPMC), or in the community.

Research Focus

The Department of Behavioral and Community Health Sciences has an extensive array of funded research and training projects. BCHS faculty and staff are skilled in the use of both quantitative and qualitative research methods, and the Department is particularly well known for its community-based participatory research strategies and modeling-simulation efforts designed to improve the health and welfare of communities.

Areas of research strengths include:

- Addiction Sciences/Harm Reduction
- Social Media/Infodemics
- Tobacco Control and Prevention
- Health Equity
- Public Health and Aging
- LGBT Health
- Maternal and Child Health
- Sexual and Reproductive Health
- Evaluation Science
- Global Health
- Modeling of health behavior and linked disease dynamics
- Mental Health

Research and training projects are funded by organizations such as:

- National Institutes of Health (NIH)
- Centers for Disease Control and Prevention (CDC)
- National Cancer Institute (NCI)
- National Institute on Aging (NIA)
- National Institute on Alcohol Abuse and Alcoholism (NIAAA)
- National Institute of Nursing (NINR)
- Health Resources and Services Administration, U.S. Department of Health & Human Services (HRSA)
- Pennsylvania Department of Health
- Local and National Philanthropic Organizations

Certificate

Evaluation of Public Health Promotion and Health Education Programs Certificate

Demand for comprehensive program evaluations is rising in a range of public and private organizations dealing with the health and social welfare needs of populations in the United States as well as worldwide. Graduates with a specialization in program evaluation in public health have expanded opportunities for employment in organizations such as health departments and ministries of health, health and hospital systems, educational programs, philanthropic foundations, and consulting firms. Students in the BCHS program evaluation certificate study under expert faculty and research staff. Students are trained in the application of both quantitative and qualitative methods for evaluation, and have the opportunity to participate directly on interdisciplinary evaluation teams on actual community-based projects. The evaluation concentration typically involves taking courses in basic and advanced evaluation methods, qualitative approaches, health survey methods, and the evaluation practicum.

Applicants must meet the requirements for admission to Pitt Public Health. The certificate program is designed to be completed in four semesters of full-time study, but completion time may vary.

Note: Some additional credits that do not apply to any degree or other certificate must be completed for each certificate program.

Doctoral Student Required Courses

12 Credits

- BCHS 2525 - INTRODUCTION TO APPLIED RESEARCH
- BCHS 2558 - HEALTH PROGRAM EVALUATION
- BCHS 3003 - SEMINAR IN ADVANCED EVALUATION TECHNIQUES
- BCHS 3703 - EXECUTIVE MANAGEMENT PRACTICUM (3 credits, 320 hours)

Doctoral Student Elective Courses

3 Credits

- BCHS 2511 - INDEPENDENT STUDY (*Students may qualify for independent study in evaluation as determined by the certificate program director*)
 - BCHS 2608 - INTRODUCTION TO COMMUNITY BASED PARTICIPATORY RESEARCH
 - BCHS 2610 - CONCEPT MAPPING: A PARTICIPATORY RESEARCH METHOD
 - BCHS 2612 - PROJECT MANAGEMENT IN PUBLIC HEALTH
 - BCHS 2990 - SOCIAL DYNAMICS IN PUBLIC HEALTH
 - BCHS 3002 - HEALTH SURVEY METHODS
 - BCHS 3007 - ETHNOGRAPHIC AND QUALITATIVE METHODS
 - BCHS 3015 - COMMUNITY MAPPING AND INTRODUCTORY SPATIAL ANALYSIS
 - BCHS 3030 - MEASUREMENT IN THE SOCIAL AND BEHAVIORAL SCIENCES
 - NUR 3055 - COMMUNITY DEVELOPMENT AND FOCUS GROUPS: PREPARATION, FACILITATION AND APPLICATION
- OR
- PIA 2730 - COMMUNITY DEVELOPMENT AND FOCUS GROUPS

Master's Student Required Courses

9 Credits

- BCHS 2503 - PRACTICUM (3 credits, 400 hours)
- BCHS 2525 - INTRODUCTION TO APPLIED RESEARCH
- BCHS 2558 - HEALTH PROGRAM EVALUATION

Master's Student Elective Courses

6 credits

- BCHS 2511 - INDEPENDENT STUDY (*Students may qualify for independent study in evaluation as determined by the certificate program director*)
- BCHS 2608 - INTRODUCTION TO COMMUNITY BASED PARTICIPATORY RESEARCH
- BCHS 2610 - CONCEPT MAPPING: A PARTICIPATORY RESEARCH METHOD
- BCHS 2612 - PROJECT MANAGEMENT IN PUBLIC HEALTH
- BCHS 2990 - SOCIAL DYNAMICS IN PUBLIC HEALTH
- BCHS 3002 - HEALTH SURVEY METHODS
- BCHS 3003 - SEMINAR IN ADVANCED EVALUATION TECHNIQUES

- BCHS 3007 - ETHNOGRAPHIC AND QUALITATIVE METHODS
- BCHS 3015 - COMMUNITY MAPPING AND INTRODUCTORY SPATIAL ANALYSIS

- NUR 3055 - COMMUNITY DEVELOPMENT AND FOCUS GROUPS: PREPARATION, FACILITATION AND APPLICATION

OR

- PIA 2730 - COMMUNITY DEVELOPMENT AND FOCUS GROUPS

Total Credits: 15

Health Equity Certificate

This innovative certificate program was created to address the systemic root causes of health disparities. While racial and ethnic health disparities are examples of the consequences of social and economic disadvantages, disparities may also be related to sexual orientation, religion, gender, native language, age, and disability status. The certificate provides students with an academic foundation for achieving health equity through assessing the complexity of inequities among diverse groups of marginalized populations, mobilizing communities where disparities exist, developing/evaluating culturally tailored interventions, and advocating for healthy public policy. The program is designed to increase the cultural competency of public health and other professionals and provide an interdisciplinary vehicle for individuals to pursue and strengthen their career interests relevant to health equity.

Applicants must meet the requirements for admission to the MPH program. The certificate program is designed to be completed in four semesters of full-time study. An option does exist for finishing in three semesters.

Note: Some additional credits that do not apply to any degree or other certificate must be completed for each certificate program.

Requirements for the Certificate

Students must complete 15 credits, including Overview of Health Equity, Introduction to Community Health, Health Equity: Research and Interventions (or approved methods class substitute), and the Integrative Seminar in Health Equity. A field experience such as an equity-focused MPH practicum or participation in the Health Equity Journal Club is required.

Required Courses

- BCHS 2554 - INTRODUCTION TO COMMUNITY HEALTH
- BCHS 2524 - OVERVIEW OF HEALTH EQUITY
- PUBHLT 2501 - HEALTH EQUITY RESEARCH: METHODS AND INTERVENTIONS
- PUBHLT 2500 - INTEGRATIVE SEMINAR IN HEALTH EQUITY

Please note that certificate students must complete BCHS 2524, or an equivalent course approved by course instructors, prior to enrolling in the culminating seminar course PUBHLT 2500.

Approved Substitutes for Methods Course

Behavioral and Community Health Sciences:

- BCHS 2523 - PUBLIC HEALTH PROGRAM PLANNING AND PROPOSAL WRITING
- BCHS 2525 - INTRODUCTION TO APPLIED RESEARCH (*Non-BCHS students only; this is a required course for BCHS students*)

- BCHS 2551 - SOCIAL NETWORKS & HEALTH
- BCHS 2558 - HEALTH PROGRAM EVALUATION
- BCHS 3003 - SEMINAR IN ADVANCED EVALUATION TECHNIQUES
- BCHS 3007 - ETHNOGRAPHIC AND QUALITATIVE METHODS
- BCHS 2608 - INTRODUCTION TO COMMUNITY BASED PARTICIPATORY RESEARCH
- BCHS 2609 - TRANSLATING RESEARCH FOR POLICY AND PRACTICE
- BCHS 2610 - CONCEPT MAPPING: A PARTICIPATORY RESEARCH METHOD
- BCHS 2990 - SOCIAL DYNAMICS IN PUBLIC HEALTH
- BCHS 3030 - MEASUREMENT IN THE SOCIAL AND BEHAVIORAL SCIENCES
- BCHS 3002 - HEALTH SURVEY METHODS
- BCHS 3015 - COMMUNITY MAPPING AND INTRODUCTORY SPATIAL ANALYSIS
- BCHS 3503 - PREVENTION SCIENCE: TRANSLATING KNOWLEDGE TO PRACTICE

Biostatistics:

- BIOST 2011 - PRINCIPLES OF STATISTICAL REASONING
- BIOST 2016 - SAMPLING DESIGN AND ANALYSIS
- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- BIOST 2162 - CLINICAL TRIALS: METHODS AND PRACTICE

Epidemiology:

- EPIDEM 2144 - AGENT-BASED EPIDEMIOLOGICAL MODELING OF SOCIAL DETERMINANTS OF HEALTH
- EPIDEM 2161 - METHODS INFECTIOUS DISEASES EPIDEMIOLOGY
- EPIDEM 2180 - FUNDAMENTALS OF EPIDEMIOLOGICAL METHODS
- EPIDEM 2181 - DESIGN AND CONDUCT OF CLINICAL TRIALS
- EPIDEM 2189 - EPIDEMIOLOGICAL METHODS OF LONGITUDINAL & TIME-TO-EVENT ANALYSES
- EPIDEM 2221 - GEOSPATIAL MAPPING AND SPATIAL ANALYSIS IN EPIDEMIOLOGY
- EPIDEM 2230 - SECONDARY DATA ANALYSIS: A CAPSTONE COURSE
- EPIDEM 2981 - EPIDEMIOLOGY OF AGING-METHODS

Health Policy and Management:

- HPM 2064 - HEALTH POLICY ANALYSIS (*master's students*)
- HPM 3064 - HEALTH POLICY ANALYSIS (*doctoral students*)
- HPM 2063 - THE POLITICS OF HEALTH POLICY
- HPM 2028 - MICROECONOMICS APPLIED TO HEALTH
- HPM 2220 - COST EFFECTIVENESS ANALYSIS HEALTH CARE
- HPM 2905 - QUASI-EXPERIMENTAL DESIGN FOR HEALTH SERVICES RESEARCH
- HPM 3125 - INTERMEDIATE HEALTH ECONOMICS

Graduate School of Public and International Affairs:

- PIA 2022 - QUANTITATIVE METHODS
- PIA 2730 - COMMUNITY DEVELOPMENT AND FOCUS GROUPS
- PIA 2250 - WORKING WITH PUBLIC INTEREST TECHNOLOGIES AND CIVIC DATA
- PIA 2715 - GIS FOR PUBLIC POLICY

Nursing:

- NUR 2010 - HEALTH PROMOTION AND DISEASE PREVENTION IN CULTURALLY DIVERSE POPULATIONS

Elective Courses

- BCHS 2532 - DIMENSIONS OF AGING: CULTURE AND HEALTH
- BCHS 2560 - INTRODUCTION TO POPULATION PROBLEMS
- BCHS 2600 - HARM REDUCTION APPROACHES IN HEALTH AND PUBLIC HEALTH SETTINGS
- BCHS 2993 - MODELING HEALTH BEHAVIOR CHANGE
- BCHS 2995 - GLOBAL PERSPECTIVES ON WOMEN'S HEALTH: EMPOWERMENT, GENDER EQUALITY, AND HEALTH
- EPIDEM 2400 - PSYCHOSOCIAL FACTORS IN DISEASE
- EPIDEM 2143 - SOCIAL EPIDEMIOLOGY
- EPIDEM 2170 - CHRONIC DISEASE EPIDEMIOLOGY
- EPIDEM 2162 - INFECTIOUS DISEASES AND GLOBAL HEALTH
- EPIDEM 2260 - EPIDEMIOLOGICAL BASIS DISEASE CONTROL
- EPIDEM 2709 - EPIDEMIOLOGY OF WOMEN'S HEALTH
- EPIDEM 2719 - REPRODUCTIVE EPIDEMIOLOGY
- EPIDEM 2981 - EPIDEMIOLOGY OF AGING-METHODS
- IDM 2032 - HUMAN DIVERSITY AND PUBLIC HEALTH
- CLRES 2200 - INTRODUCTION TO RESEARCH DISPARITIES ON HEALTH CARE
- MEDEDU 2240 - CULTURAL COMPETENCE MEDICAL EDUCATION
- NUR 2010 - HEALTH PROMOTION AND DISEASE PREVENTION IN CULTURALLY DIVERSE POPULATIONS
- NUR 3013 - ETHICS IN HEALTHCARE
- PUBHLT 2025 - CONCEPTS AND METHODS IN GLOBAL HEALTH
- PUBHLT 2018 - OVERVIEW OF LESBIAN, GAY, BISEXUAL AND TRANSGENDER HEALTH DISPARITIES
- PUBHLT 2020 - ADVANCED TOPICS IN LESBIAN, GAY, BISEXUAL, AND TRANSGENDER RESEARCH
- GSWS 2252 - THEORIES OF GENDER AND SEXUALITY
- HPS 2245 - EUGENICS AND SOCIAL DARWINISM
- PIA 2210 - RACE, GENDER, LAW AND POLICY
- SOC 3493 - TOPICS IN SOCIOLOGY OF RACE & ETHNICITY

Total Credits: 15

Lesbian, Gay, Bisexual, and Transgender (LGBT) Health and Wellness Certificate

The interdepartmental (BCHS, EPIDEM, IDM) certificate program will prepare students to collaborate and conduct independent research designed to improve the understanding of unique health concerns among lesbian, gay, bisexual, and transgender (LGBT) populations; participate in agency or organization planning, training, and delivery of health care for LGBT populations; work with local, state, and federal agencies in developing LGBT competent health care providers; provide leadership in public and private sector organizations serving the health and wellness needs of LGBT populations; and evaluate the effectiveness of health care delivery systems to meet the needs of LGBT populations.

In the United States, public health professionals seek to address health disparities. Students enrolled in this program will be prepared to address health disparities affecting subpopulations who may be experiencing a lower quality of health and wellness, due in part, to historic discrimination, with a focus on lesbian women, gay men, bisexuals, and transgender/transsexual individuals. As such, the certificate will offer courses that include information on identifying and documenting health disparities; impact of historical stigmatizing politics that contribute to development of health disparities; impact of politics and policy to improve means of addressing health disparities; design of appropriate research programs to address health disparities; theories behind intervention programs that work among disparate populations; and means to develop competency skills in working with stigmatized populations.

Applicants must meet the requirements for admission to Pitt Public Health. The certificate program is designed to be completed in four semesters of full-time study. An option does exist for finishing in three semesters.

Note: Some additional credits that do not apply to any degree or other certificate must be completed for each certificate program.

Requirements for the Certificate

Students must complete 15 graduate credits, a practicum, and a thesis or project related to LGBT health and wellness and oral presentation of the thesis or project for peers and members of the Center for LGBT Health Research, or at approved scientific meeting.

Required Courses

9 Credits

- PUBHLT 2018 - OVERVIEW OF LESBIAN, GAY, BISEXUAL AND TRANSGENDER HEALTH DISPARITIES
- PUBHLT 2019 - PUBLIC HEALTH SPECIAL STUDIES (*1 credit, Departmental independent studies/thesis/dissertation credits may be substituted with advisor approval*)
- PUBHLT 2020 - ADVANCED TOPICS IN LESBIAN, GAY, BISEXUAL, AND TRANSGENDER RESEARCH
- BCHS 3503 - PREVENTION SCIENCE: TRANSLATING KNOWLEDGE TO PRACTICE

Elective Courses

Minimum 6 credits

Other electives may be taken with the approval of one of the certificate directors.

- BCHS 2520 - THEORIES OF HEALTH BEHAVIOR AND HEALTH EDUCATION
- BCHS 2525 - INTRODUCTION TO APPLIED RESEARCH
- BCHS 2558 - HEALTH PROGRAM EVALUATION
- BCHS 3002 - HEALTH SURVEY METHODS
- EPIDEM 2160 - EPIDEMIOLOGY OF INFECTIOUS DISEASES
- EPIDEM 2400 - PSYCHOSOCIAL FACTORS IN DISEASE
- HPM 2010 - ORGANIZATION STUDIES: THEORY AND APPLICATIONS TO HEALTH CARE SYSTEMS
- IDM 2032 - HUMAN DIVERSITY AND PUBLIC HEALTH
- IDM 2034 - CONTROL AND PREVENTION OF HIV/AIDS
- IDM 2161 - METHODS OF INFECTIOUS DISEASE EPIDEMIOLOGY

Total Credits: 15

Doctoral

Behavioral and Community Health Sciences, PhD

The Doctor of Philosophy (PhD) program prepares students to conduct research in the social and behavioral sciences areas of public health in a variety of settings as well as teach in academic settings. The PhD curriculum is formed by a social-ecological perspective regarding the determinants of health and opportunities for intervention. Within this overarching framework, the curriculum also emphasizes theory-driven research, addressing health issues across the developmental life span of populations, examining variation across socio-demographic categories such as gender, age, and sociocultural status as it affects health and health disparities. The curriculum addresses the following areas: individual behavior, population health, research design and methods, statistical analysis; behavioral interventions; and the integration of public health research and practice.

The minimum credit requirement for the PhD program is 72 credits of completed course work and independent research. Twenty-four credits may be awarded for a previously earned master's degree. In recognition of graduate study beyond the master's degree successfully completed elsewhere, 12 additional credits may be accepted at the time of admission to meet the minimum credit requirement. All students must complete a common core of courses in the following categories:

- Theories of behavior and community (6 credits)
- Research design and methods (11 credits)
- Elective: theory and methods (3 credits)
- Statistical analysis (9 credits)
- Interventions (6 credits)
- Integration of public health research and practice (5-10 credits)
- Milestones (2-4 credits)
- Electives (1-6 credits)

PhD students will typically earn 3 credits preparing for their comprehensive exam and a minimum of 1 dissertation credit must be earned. All PhD students must be enrolled as a full-time student at least 1 semester during their program. Registration for FTDR 3999 (i.e. Full-time Dissertation Research) after completion of 72 credits will fulfill this requirement. The program is designed to be completed in four years.

BCHS PhD Requirements

Theories of Behavior & Community

6 Credits

- BCHS 2554 - INTRODUCTION TO COMMUNITY HEALTH
- BCHS 3555 - DOCTORAL SEMINAR IN BEHAVIORAL AND COMMUNITY HEALTH SCIENCES THEORIES AND MODELS

Research Design & Methods

11 Credits

- BCHS 2525 - INTRODUCTION TO APPLIED RESEARCH
- BCHS 3007 - ETHNOGRAPHIC AND QUALITATIVE METHODS
- BCHS 3030 - MEASUREMENT IN THE SOCIAL AND BEHAVIORAL SCIENCES
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY

Elective: Theory & Methods

3 Credits

3 credits from the list below or 3 credits of relevant graduate-level coursework as recommended by academic advisor.

- BCHS 2608 - INTRODUCTION TO COMMUNITY BASED PARTICIPATORY RESEARCH
AND
- BCHS 2609 - TRANSLATING RESEARCH FOR POLICY AND PRACTICE
AND
- BCHS 2610 - CONCEPT MAPPING: A PARTICIPATORY RESEARCH METHOD
- BCHS 3002 - HEALTH SURVEY METHODS
- BCHS 3003 - SEMINAR IN ADVANCED EVALUATION TECHNIQUES
- BCHS 3504 - DOCTORAL SEMINAR ON HEALTH COMMUNICATIONS
- HPM 2010 - ORGANIZATION STUDIES: THEORY AND APPLICATIONS TO HEALTH CARE SYSTEMS

Statistical Analysis

9 Credits

- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- BCHS 3707 - APPLIED MULTIPLE REGRESSION ANALYSIS AND CAUSAL MODELING FOR THE BEHAVIORAL AND COMMUNITY HEALTH SCI

Interventions

6 Credits

- BCHS 2558 - HEALTH PROGRAM EVALUATION
- BCHS 3506 - IMPLEMENTATION SCIENCE IN PUBLIC HEALTH

Integration of Public Health Research & Practice

5-10 Credits

- BCHS 3100 - GRANT WRITING
- BCHS 3006 - INTEGRATIVE RESEARCH SEMINAR: WRITING FOR PUBLICATION
- FACDEV 2200 - PRACTICUM ON UNIVERSITY TEACHING
OR
- BCHS 2511 - INDEPENDENT STUDY (*1-3 credits*)
Students must complete 6 UCTL Workshops
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS (*two terms*)
- PUBHLT 2011 - ESSENTIALS OF PUBLIC HEALTH

Milestones

2-4 Credits

- BCHS 3888 - PREPARATION FOR COMPREHENSIVE EXAMINATION (*1-3 credits*)
- BCHS 3010 - RESEARCH AND DISSERTATION PHD (*1 credit*)
- OR
- FTDR 3999 - FULL-TIME DISSERTATION STUDY

Electives

1-6 Credits

As recommended by academic advisor.

Total Credits: 72

Joint Degree

Behavioral and Community Health Sciences, MPH/MID

This program is a collaboration between the Graduate School of Public and International Affairs and the School of Public Health, Department of Behavioral and Community Health Sciences. The MPH/MID joint degree program prepare students for careers as public health practitioners in emerging economies where health issues are closely linked to social, political, and economic problems.

The BCHS MPH/MID joint degree is designed to be completed in three years of full-time study. The BCHS requirements for the MPH/MID joint degree are listed below. Students should refer to the Graduate School of Public and International Affairs page for the most current MID requirements.

- 45 Public Health credits (*6 credits of public health-relevant electives taken in GSPIA can be applied to the 45 credit requirement*)
- 78 total credits, including coursework and one 300 contact hour field placement
- practicum
- essay or thesis

Pitt Public Health Required Courses

- BIOST 2011 - PRINCIPLES OF STATISTICAL REASONING
- OR
- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- EOH 2013 - ENVIRONMENTAL HEALTH AND DISEASE
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- HPM 2001 - HEALTH POLICY AND MANAGEMENT IN PUBLIC HEALTH
- PUBHLT 2015 - PUBLIC HEALTH BIOLOGY
- PUBHLT 2033 - FOUNDATIONS IN PUBLIC HEALTH
- PUBHLT 2034 - PUBLIC HEALTH COMMUNICATIONS
- PUBHLT 2035 - APPLICATIONS IN PUBLIC HEALTH

BCHS MPH/MID Required Courses

- BCHS 2503 - PRACTICUM (*1-3 credits*)
- BCHS 2520 - THEORIES OF HEALTH BEHAVIOR AND HEALTH EDUCATION
- BCHS 2521 - ESSAY (*1-3 credits*)
- BCHS 2525 - INTRODUCTION TO APPLIED RESEARCH
- BCHS 2554 - INTRODUCTION TO COMMUNITY HEALTH
- BCHS 2990 - SOCIAL DYNAMICS IN PUBLIC HEALTH
- BCHS 2992 - SYSTEMS THEORIES AND APPROACHES

Elective Courses

Minimum 6 credits from list below. Additional electives must be added, as recommended by academic advisor, to earn total number of credits required for degree program. Students can apply a maximum of 6 credits of public health-relevant coursework taken in GSPIA to meet elective requirements.

- BCHS 2504 - THEORY AND PRACTICE OF HEALTH COMMUNICATIONS
- BCHS 2516 - VIDEO FOR HEALTH PROMOTION
- BCHS 2523 - PUBLIC HEALTH PROGRAM PLANNING AND PROPOSAL WRITING
- BCHS 2524 - OVERVIEW OF HEALTH EQUITY
- BCHS 2551 - SOCIAL NETWORKS & HEALTH
- BCHS 2558 - HEALTH PROGRAM EVALUATION
- BCHS 2572 - RISK COMMUNICATION
- BCHS 2605 - COMMUNITY DEVELOPMENT AND FOCUS GROUPS: PREPARATION, FACILITATION AND APPLICATION
- BCHS 2608 - INTRODUCTION TO COMMUNITY BASED PARTICIPATORY RESEARCH
- BCHS 2609 - TRANSLATING RESEARCH FOR POLICY AND PRACTICE
- BCHS 2610 - CONCEPT MAPPING: A PARTICIPATORY RESEARCH METHOD
- BCHS 2612 - PROJECT MANAGEMENT IN PUBLIC HEALTH
- BCHS 2660 - HARM REDUCTION APPROACHED IN HEALTH & PUBLIC HEALTH SETTINGS
- BCHS 2991 - MULTILEVEL ANALYSIS IN PUBLIC HEALTH
- BCHS 3002 - HEALTH SURVEY METHODS
- BCHS 3003 - SEMINAR IN ADVANCED EVALUATION TECHNIQUES
- BCHS 3007 - ETHNOGRAPHIC AND QUALITATIVE METHODS
- BCHS 3015 - COMMUNITY MAPPING AND INTRODUCTORY SPATIAL ANALYSIS
- BCHS 3021 - SOCIAL NETWORKS AND HEALTH II: COMPUTER METHODS
- BCHS 3506 - IMPLEMENTATION SCIENCE IN PUBLIC HEALTH
- PUBHLT 2501 - HEALTH EQUITY RESEARCH: METHODS AND INTERVENTIONS

Total School of Public Health Credits: 45

Total Joint Degree Credits: 78

Behavioral and Community Health Sciences, MPH/MPA

This program is a collaboration between the Graduate School of Public and International Affairs and the School of Public Health, Department of Behavioral and Community Health Sciences. The MPH/MPA joint degree program prepare students for careers as public health practitioners in emerging economies where health issues are closely linked to social, political, and economic problems.

The BCHS MPH/MPA joint degree is designed to be completed in three years of full-time study. The BCHS requirements for the MPH/MPA joint degree are listed below. Students should refer to the Graduate School of Public and International Affairs page for the most current MPA requirements.

- 45 Public Health credits (*6 credits of public health-relevant electives taken in GSPIA can be applied to the 45 credit requirement*)
- 78 credits, including coursework and one 300 contact hour field placement
- practicum
- essay or thesis

Behavioral and Community Health Sciences, MPH/MSW

This program is collaboration between the School of Social Work and the School of Public Health, Department of Behavioral and Community Health Sciences. Students graduate with both Master of Social Work and Master of Public Health degrees, and are prepared to pursue a wide range of social work and public health careers to improve the health of a target population and/or community.

The BCHS MPH/MSW joint degree typically is completed with a three-year curriculum plan for Direct Practice or COSA. The BCHS requirements for the MPH/MSW joint degree are listed below. Students should refer to the School of Social Work for the most current MSW program requirements.

- 45 Public Health credits (*9 credits taken in Social Work can be applied to the 45 credit requirement ; 3 credits of field placement in place of BCHS 2503 and 6 credits of public health-relevant electives*)
- 33 Social Work credits (*plus 18 field placement credits*)
- practicum
- essay or thesis

Pitt Public Health Required Courses

Behavioral and Community Health Sciences, MPH/PhD, Anthropology

This program is a collaboration between the Dietrich School of Arts and Sciences, Department Anthropology and the School of Public Health, Department of Behavioral and Community Health Sciences. The MPH/PhD joint degree program prepares anthropologists for research, teaching, and program planning/evaluation for specialization in the cultural, social, and behavioral aspects of health and health care in either a domestic or international setting. This degree program prepares you for an academic career that encompasses the interdisciplinary competencies of anthropology and public health.

The MPH/PhD joint degree is designed to be completed in four to five years including time for dissertation research. The BCHS requirements for the MPH/PhD joint degree are listed below. Students should refer to the Department of Anthropology for the most current PhD requirements.

- 45 Public Health credits (*6 credits of public health-relevant electives taken in Anthropology can be applied to the 45-credit requirement*)
- 78 total credits, including coursework, research and fieldwork
- Practicum (*The Anthropology fieldwork fulfills the MPH practicum requirement; students must submit SPH required documentation*)
- Essay or thesis (*The Anthropology dissertation fulfills this requirement; students must submit SPH required documentation*)

Behavioral and Community Health Sciences, MPH/PhD, Social Work

This program is a collaboration between the School of Social Work and the School of Public Health, Department of Behavioral and Community Health Sciences. The MPH/PhD joint degree program prepares students to fulfill leadership roles in public health systems or academic settings. Students in this program have opportunities to work with local organizations on a variety of planning, evaluation, and research activities.

The MPH/PhD joint degree is designed to be completed in four to five years including time for dissertation research. The BCHS requirements for the MPH/PhD joint degree are listed below. Students should refer to the School of Social Work for the most current PhD requirements.

- 45 Public Health credits (*6 credits of public health-relevant electives taken in Anthropology can be applied to the 45 credit requirement*)
- 72 total credits, including coursework and research
- practicum
- essay or thesis (*Social Work dissertation fulfills this requirement*)

Pitt Public Health Required Courses

- BIOST 2011 - PRINCIPLES OF STATISTICAL REASONING OR
- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- EOH 2013 - ENVIRONMENTAL HEALTH AND DISEASE
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- HPM 2001 - HEALTH POLICY AND MANAGEMENT IN PUBLIC HEALTH
- PUBHLT 2015 - PUBLIC HEALTH BIOLOGY
- PUBHLT 2033 - FOUNDATIONS IN PUBLIC HEALTH
- PUBHLT 2034 - PUBLIC HEALTH COMMUNICATIONS
- PUBHLT 2035 - APPLICATIONS IN PUBLIC HEALTH

BCHS MPH/PhD Social Work Required Courses

- BCHS 2503 - PRACTICUM (1-3 credits)
- BCHS 2520 - THEORIES OF HEALTH BEHAVIOR AND HEALTH EDUCATION
- BCHS 2521 - ESSAY (1-3 credits)
- BCHS 2525 - INTRODUCTION TO APPLIED RESEARCH
- BCHS 2554 - INTRODUCTION TO COMMUNITY HEALTH
- BCHS 2990 - SOCIAL DYNAMICS IN PUBLIC HEALTH
- BCHS 2992 - SYSTEMS THEORIES AND APPROACHES

Elective Courses

Minimum 6 credits from list below. Additional electives must be added, as recommended by academic advisor, to earn total number of credits required for degree program. Students can apply a maximum of 6 credits of public health-relevant coursework taken in Social Work to meet elective requirements.

- BCHS 2504 - THEORY AND PRACTICE OF HEALTH COMMUNICATIONS
- BCHS 2516 - VIDEO FOR HEALTH PROMOTION
- BCHS 2523 - PUBLIC HEALTH PROGRAM PLANNING AND PROPOSAL WRITING
- BCHS 2524 - OVERVIEW OF HEALTH EQUITY
- BCHS 2551 - SOCIAL NETWORKS & HEALTH
- BCHS 2558 - HEALTH PROGRAM EVALUATION
- BCHS 2572 - RISK COMMUNICATION

- BCHS 2605 - COMMUNITY DEVELOPMENT AND FOCUS GROUPS: PREPARATION, FACILITATION AND APPLICATION
- BCHS 2608 - INTRODUCTION TO COMMUNITY BASED PARTICIPATORY RESEARCH
- BCHS 2609 - TRANSLATING RESEARCH FOR POLICY AND PRACTICE
- BCHS 2610 - CONCEPT MAPPING: A PARTICIPATORY RESEARCH METHOD
- BCHS 2612 - PROJECT MANAGEMENT IN PUBLIC HEALTH
- BCHS 2660 - HARM REDUCTION APPROACHED IN HEALTH & PUBLIC HEALTH SETTINGS
- BCHS 2991 - MULTILEVEL ANALYSIS IN PUBLIC HEALTH
- BCHS 3002 - HEALTH SURVEY METHODS
- BCHS 3003 - SEMINAR IN ADVANCED EVALUATION TECHNIQUES
- BCHS 3007 - ETHNOGRAPHIC AND QUALITATIVE METHODS
- BCHS 3015 - COMMUNITY MAPPING AND INTRODUCTORY SPATIAL ANALYSIS
- BCHS 3506 - IMPLEMENTATION SCIENCE IN PUBLIC HEALTH
- PUBHLT 2501 - HEALTH EQUITY RESEARCH: METHODS AND INTERVENTIONS

Total School of Public Health Credits: 45

Total Joint Degree Credits: 72

Master's

Behavioral and Community Health Sciences, MPH

The MPH Program is a 45-credit program requiring students to complete the Pitt Public Health core courses, departmental core courses, and electives that pertain to a student's area of interest.

Students are required to complete a 200-hour practicum in a public health setting and prepare an essay or thesis that addresses an issue of public health significance and that demonstrates the ability to synthesize information from numerous sources. The MPH program is designed to be completed in four semesters of full-time study. An option does exist for finishing in three semesters.

Pitt Public Health Required Courses

- BIOST 2011 - PRINCIPLES OF STATISTICAL REASONING
OR
- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- EOH 2013 - ENVIRONMENTAL HEALTH AND DISEASE
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- HPM 2001 - HEALTH POLICY AND MANAGEMENT IN PUBLIC HEALTH
- PUBHLT 2015 - PUBLIC HEALTH BIOLOGY
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS (*two terms*)
- PUBHLT 2033 - FOUNDATIONS IN PUBLIC HEALTH
- PUBHLT 2034 - PUBLIC HEALTH COMMUNICATIONS
- PUBHLT 2035 - APPLICATIONS IN PUBLIC HEALTH

BCHS MPH Required Courses

- BCHS 2503 - PRACTICUM (*1-3 credits*)

- BCHS 2520 - THEORIES OF HEALTH BEHAVIOR AND HEALTH EDUCATION
- BCHS 2521 - ESSAY (1-3 credits)
- BCHS 2525 - INTRODUCTION TO APPLIED RESEARCH
- BCHS 2554 - INTRODUCTION TO COMMUNITY HEALTH
- BCHS 2990 - SOCIAL DYNAMICS IN PUBLIC HEALTH
- BCHS 2992 - SYSTEMS THEORIES AND APPROACHES

Elective Courses

Minimum 6 credits from list below. Additional graduate-level electives must be added, as recommended by academic advisor, to earn total number of credits required for degree program.

- BCHS 2504 - THEORY AND PRACTICE OF HEALTH COMMUNICATIONS
- BCHS 2516 - VIDEO FOR HEALTH PROMOTION
- BCHS 2523 - PUBLIC HEALTH PROGRAM PLANNING AND PROPOSAL WRITING
- BCHS 2524 - OVERVIEW OF HEALTH EQUITY
- BCHS 2551 - SOCIAL NETWORKS & HEALTH
- BCHS 2558 - HEALTH PROGRAM EVALUATION
- BCHS 2572 - RISK COMMUNICATION
- BCHS 2605 - COMMUNITY DEVELOPMENT AND FOCUS GROUPS: PREPARATION, FACILITATION AND APPLICATION
- BCHS 2608 - INTRODUCTION TO COMMUNITY BASED PARTICIPATORY RESEARCH
- BCHS 2609 - TRANSLATING RESEARCH FOR POLICY AND PRACTICE
- BCHS 2610 - CONCEPT MAPPING: A PARTICIPATORY RESEARCH METHOD
- BCHS 2612 - PROJECT MANAGEMENT IN PUBLIC HEALTH
- BCHS 2660 - HARM REDUCTION APPROACHED IN HEALTH & PUBLIC HEALTH SETTINGS
- BCHS 2991 - MULTILEVEL ANALYSIS IN PUBLIC HEALTH
- BCHS 3002 - HEALTH SURVEY METHODS
- BCHS 3003 - SEMINAR IN ADVANCED EVALUATION TECHNIQUES
- BCHS 3007 - ETHNOGRAPHIC AND QUALITATIVE METHODS
- BCHS 3015 - COMMUNITY MAPPING AND INTRODUCTORY SPATIAL ANALYSIS
- BCHS 3021 - SOCIAL NETWORKS AND HEALTH II: COMPUTER METHODS
- BCHS 3506 - IMPLEMENTATION SCIENCE IN PUBLIC HEALTH
- PUBHLT 2501 - HEALTH EQUITY RESEARCH: METHODS AND INTERVENTIONS

Total Credits: 45

Department of Biostatistics

Biostatistics is an innovative field that involves the design, analysis, and interpretation of data for studies in public health and medicine. Biostatistics experts play a crucial role in drawing insightful conclusions about disease and health risks by applying, adjusting, and developing mathematical and statistical methods to address factors that impact health.

Our students benefit from collaboration as statisticians with the renowned University of Pittsburgh School of Medicine and UPMC, Pennsylvania's largest academic medical center, and have access to real-world research opportunities and extensive University computing facilities. Through rigorous courses, students will

- gain a comprehensive understanding of statistical methods in the context of public health and medical problems;
- work with faculty on developing new and innovative methodologies and analytical techniques;

- have the opportunity through both research and service to apply these methods to current and pressing concerns in medicine and public health.

Admissions

In addition to the School-level Admission Requirements, admission to all Biostatistics degree programs requires two semesters (six credits) of college-level calculus. Calculus courses taken in the Advanced Placement Program can be considered towards this requirement.

Applying for Admission to Pitt Public Health

Early Admission

University of Pittsburgh undergraduates may apply for early admission to the Biostatistics MS Program. Students must have completed the number of undergraduate credits required by their school before they can become a Biostatistics MS student.

Accelerated Bachelor's/Master's Program

Financial Aid

The department awards tuition and stipend to full-time PhD students. The department awards financial aid to applicable MS students at the time of admission and a limited number of awards for the enrolled students.

Tuition and Billing

Tuition & Financial Aid

Advanced Standing and Credit Transfer

Acceptance of a maximum of 12 credits taken as a non-degree student at Pitt Public Health is at the discretion of the department and program.

Students enrolled at Pitt Public Health may take credits in another school or institution, providing that their department has approved application of those credits to the degree requirements. In all cases, any combination of advanced standing credits and credits taken from another school or institution during enrollment at Pitt Public Health may not exceed the limits established by the University or the Regulations Governing Graduate Study at the University of Pittsburgh.

Students with previous graduate experience in Biostatistics or a related field may apply to transfer credits for graduate-level coursework successfully completed with a grade of B or better. PhD students may apply to transfer up to 24 credits and MS students up to 6 credits. The course credits to be transferred must be reviewed and approved by the student's academic advisor. Students who receive transfer credits for a public health core course must complete a Core Course Exemption Form in addition to the credit transfer paperwork to exempt out of those classes. Students who receive transfer credits for BIOST 2179 must complete a Course Exemption Form in addition to the credit transfer paperwork to exempt out of the course. All transfer credit and course exemption paperwork must be completed by the end of a student's first term of study.

Doctoral

Biostatistics, PhD

As of Fall 2024, the catalog numbers, titles, and credits of some of our courses have been changed. Please refer to Course Mapping Summary for the course mapping.

Required Courses

- BIOST 2025 - BIostatISTICS SEMINAR (3 terms)
- BIOST 2141 - BIostatISTICAL METHODS
- BIOST 2142 - APPLIED REGRESSION ANALYSIS
- BIOST 2143 - LONGITUDINAL AND CLUSTERED DATA ANALYSIS
- BIOST 2173 - SAS FOR DATA MANAGEMENT AND ANALYSIS
- BIOST 2179 - BIostatISTICS CONSULTING PRACTICUM
- BIOST 3000 - DOCTORAL TEACHING PRACTICUM

- BIOST 3011 - INTRODUCTION TO STATISTICAL INFERENCE 1
- BIOST 3012 - INTRODUCTION TO STATISTICAL INFERENCE 2
- BIOST 3021 - ADVANCED STATISTICAL INFERENCE 1
- BIOST 3022 - ADVANCED STATISTICAL INFERENCE 2
- BIOST 3025 - LINEAR MODELS
- BIOST 3042 - MIXED MODELS
- BIOST 3050 - SURVIVAL ANALYSIS
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- PUBHLT 2011 - ESSENTIALS OF PUBLIC HEALTH
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS (*2 terms*)
- BIOST 3010 - RESEARCH AND DISSERTATION PHD (*3 credits*)
OR
- FTDR 3999 - FULL-TIME DISSERTATION STUDY (*1 term*)

Elective Courses

In situations where a student's special interests or needs indicate an alternative course is more appropriate it may be substituted with the permission of the student's academic advisor.

BIOST Elective Courses

6 of the following courses

- BIOST 2040 - ELEMENTS OF STOCHASTIC PROCESSES
- BIOST 2067 - APPLIED META-ANALYSIS
- BIOST 2080 - ADVANCED STATISTICAL LEARNING
- BIOST 2145 - INTRODUCTION TO HEALTH DATA SCIENCE
- BIOST 2151 - BAYESIAN DATA SCIENCE
- BIOST 2154 - STATISTICAL METHODS FOR OMICS DATA
- BIOST 2155 - INTRODUCTORY STATISTICAL LEARNING FOR HEALTH SCIENCES
- BIOST 2162 - CLINICAL TRIALS: METHODS AND PRACTICE
- BIOST 2165 - STATISTICAL EVALUATION OF BIOMARKERS AND CLASSIFICATION TOOLS
- BIOST 2168 - INTRODUCTION TO CAUSAL INFERENCE
- BIOST 2174 - ADVANCED R COMPUTING
- BIOST 3065 - ANALYSIS OF DATA WITH MISSING VALUES

Outside Elective Courses

At least 3 graduate-level credits taken outside BIOST

Total Credits Required for Degree: 72

Master's

Biostatistics, MS

Full-time students normally complete graduation requirements for the MS degree within three to five terms (18 to 24 months).

As of Fall 2024, the catalog numbers, titles, and credits of some of our courses have been changed. Please refer to the Course Mapping Summary for the course mapping.

Required Courses

- BIOST 2025 - BIostatISTICS SEMINAR
- BIOST 2081 - MATHEMATICAL METHODS FOR STATISTICS
- BIOST 2131 - FOUNDATIONS OF STATISTICAL THEORY
- BIOST 2141 - BIostatISTICAL METHODS
- BIOST 2142 - APPLIED REGRESSION ANALYSIS
- BIOST 2143 - LONGITUDINAL AND CLUSTERED DATA ANALYSIS
- BIOST 2150 - APPLIED SURVIVAL ANALYSIS: METHODS AND PRACTICE
- BIOST 2173 - SAS FOR DATA MANAGEMENT AND ANALYSIS
- BIOST 2179 - BIostatISTICS CONSULTING PRACTICUM
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- PUBHLT 2011 - ESSENTIALS OF PUBLIC HEALTH
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS (*two terms*)
- BIOST 2021 - SPECIAL STUDIES (*faculty-guided thesis research: two terms required; 1st term one credit, 2nd term 2 credits*)
OR
- BIOST 2022 - CAPSTONE PREPARATION
FOLLOWED BY (*in the next term*)
- BIOST 2099 - CAPSTONE

Elective Courses

At Least 8 Credits

In situations where a student's special interests or needs indicate an alternative course is more appropriate it may be substituted with the permission of the student's academic advisor. BIOST 2025 cannot be used to fulfill elective credits.

- BIOST 2067 - APPLIED META-ANALYSIS
- BIOST 2080 - ADVANCED STATISTICAL LEARNING
- BIOST 2145 - INTRODUCTION TO HEALTH DATA SCIENCE
- BIOST 2151 - BAYESIAN DATA SCIENCE
- BIOST 2154 - STATISTICAL METHODS FOR OMICS DATA
- BIOST 2155 - INTRODUCTORY STATISTICAL LEARNING FOR HEALTH SCIENCES
- BIOST 2162 - CLINICAL TRIALS: METHODS AND PRACTICE
- BIOST 2165 - STATISTICAL EVALUATION OF BIOMARKERS AND CLASSIFICATION TOOLS
- BIOST 2168 - INTRODUCTION TO CAUSAL INFERENCE
- BIOST 2174 - ADVANCED R COMPUTING

Total Credits Required for Degree: 40

Biostatistics, MS - Health Data Science (HDS) Concentration

Full-time students normally complete graduation requirements for the MS degree within three to five terms (18 to 24 months).

As of Fall 2024, the catalog numbers, titles, and credits of some of our courses have been changed. Please refer to the Course Mapping Summary for the course mapping.

Required Courses

- BIOST 2025 - BIOSTATISTICS SEMINAR
- BIOST 2081 - MATHEMATICAL METHODS FOR STATISTICS
- BIOST 2131 - FOUNDATIONS OF STATISTICAL THEORY
- BIOST 2141 - BIOSTATISTICAL METHODS
- BIOST 2142 - APPLIED REGRESSION ANALYSIS
- BIOST 2145 - INTRODUCTION TO HEALTH DATA SCIENCE
- BIOST 2155 - INTRODUCTORY STATISTICAL LEARNING FOR HEALTH SCIENCES
- BIOST 2174 - ADVANCED R COMPUTING
- BIOST 2179 - BIOSTATISTICS CONSULTING PRACTICUM
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- PUBHLT 2011 - ESSENTIALS OF PUBLIC HEALTH
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS (*two terms*)
- BIOST 2021 - SPECIAL STUDIES (*faculty-guided thesis research: two terms required; 1st term one credit, 2nd term 2 credits*)
OR
- BIOST 2022 - CAPSTONE PREPARATION
FOLLOWED BY (*in the next term*)
- BIOST 2099 - CAPSTONE

Elective Courses

At Least 10 Credits

In situations where a student's special interests or needs indicate an alternative course is more appropriate it may be substituted with the permission of the student's academic advisor. BIOST 2025 cannot be used to fulfill elective credits.

- BIOST 2080 - ADVANCED STATISTICAL LEARNING
- BIOST 2151 - BAYESIAN DATA SCIENCE
- BIOST 2173 - SAS FOR DATA MANAGEMENT AND ANALYSIS
- BMIS 2542 - DATA PROGRAMMING ESSENTIALS WITH PYTHON
- BMIS 2588 - DATA BASE MANAGEMENT
- INFSCI 2160 - DATA MINING
- INFSCI 2410 - INTRODUCTION TO NEURAL NETWORKS
- INFSCI 2595 - MACHINE LEARNING
- INFSCI 2725 - DATA ANALYTICS (*Prior R, Java, or Python programming experience required*)
- PHARM 5834 - PYTHON FOR DATA MANAGEMENT AND ANALYTICS
- STAT 2270 - DATA MINING

Total Credits Required for Degree: 40

Biostatistics, MS - Statistical and Computational Genomics (SCG) Concentration

Full-time students normally complete graduation requirements for the MS degree within three to five terms (18 to 24 months).

As of Fall 2024, the catalog numbers, titles, and credits of some of our courses have been changed. Please refer to Course Mapping Summary for the course mapping.

Required Courses

- BIOST 2025 - BIOSTATISTICS SEMINAR
- BIOST 2081 - MATHEMATICAL METHODS FOR STATISTICS
- BIOST 2131 - FOUNDATIONS OF STATISTICAL THEORY
- BIOST 2141 - BIOSTATISTICAL METHODS
- BIOST 2142 - APPLIED REGRESSION ANALYSIS
- BIOST 2154 - STATISTICAL METHODS FOR OMICS DATA
- BIOST 2155 - INTRODUCTORY STATISTICAL LEARNING FOR HEALTH SCIENCES
- BIOST 2174 - ADVANCED R COMPUTING
- BIOST 2179 - BIOSTATISTICS CONSULTING PRACTICUM
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- PUBHLT 2011 - ESSENTIALS OF PUBLIC HEALTH
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS (*two terms*)
- BIOST 2021 - SPECIAL STUDIES (*faculty-guided thesis research: two terms required; 1st term one credit, 2nd term 2 credits*)
OR
- BIOST 2022 - CAPSTONE PREPARATION
FOLLOWED BY (*in the next term*)
- BIOST 2099 - CAPSTONE

Elective Courses

At Least 10 Credits

In situations where a student's special interests or needs indicate an alternative course is more appropriate it may be substituted with the permission of the student's academic advisor. BIOST 2025 cannot be used to fulfill elective credits.

- BIOSC 2140 - GENOMICS
- BIOSC 2940 - MOLECULAR BIOLOGY
- BIOST 2080 - ADVANCED STATISTICAL LEARNING
- HUGEN 2022 - HUMAN POPULATION GENETICS
- HUGEN 2071 - GENOMIC DATA PROCESSING AND STRUCTURE
- HUGEN 2072 - GENOMIC DATA PIPELINES AND TOOLS
- HUGEN 2073 - GENOMIC DATA VISUALIZATION AND INTEGRATION
- HUGEN 2029 - INTRODUCTION TO GENE MAPPING
- HUGEN 2080 - STATISTICAL GENETICS

Total Credits Required for Degree: 40

Department of Environmental and Occupational Health

The Department of Environmental and Occupational Health at Pitt Public Health is dedicated to understanding the health effects of biological, chemical, and physical agents through cutting-edge research in molecular and biochemical toxicology, epigenetics, gene-environment interactions, and computational toxicology. Embracing the concept of the exposome, our faculty investigates environmental and occupational exposures and their interactions with genetic and epigenetic factors over a lifetime. Beyond theoretical research, we emphasize environmental health practice, pollution prevention, policy or management with a focus on applied science and more practical problem solving. The department engages in active collaborations with community partners, other faculties, and national and global research centers, enriching our teaching and research endeavors. Our academic programs, characterized by rigorous mentoring and a flexible curriculum, offer students hands-on research opportunities and practical experiences, shaping them for careers in public health policy, consulting, risk assessment, academia, regulatory compliance & enforcement, industry, and beyond. Our graduates are well-equipped to work collaboratively with multidisciplinary professionals and are often employed in leading health organizations, contributing significantly to the field of environmental and occupational health.

For information on admission or registration, contact Bryanna Snyder at bms85@pitt.edu.

Admissions

Please refer to School-level Admission Requirements and Department-specific Admission Requirements for all admissions requirements.

Financial Assistance

Financial support is available for tuition and stipend for PhD students through a graduate research assistance program from the University of Pittsburgh School of Public Health. Stipends are made available from the Department of Environmental and Occupational Health, and from individual research laboratories. Although master's students in the environmental health and/or environmental health risk assessment programs are eligible for support, in general it is expected that tuition and stipends for these students will be derived from external sources.

Certificate

Environmental Health Risk Assessment Certificate

Risk assessment, a process developed in 1983 by the National Academy of Sciences, provides the framework for most current studies of environmental health concerns. Students in this certificate program will be provided concentrated graduate education that will enable them to:

- Specify/measure the magnitude, duration and route of human exposure to selected hazardous environmental/occupational agents.
- Describe methods for quantifying dose and specify how this knowledge can be used to estimate probability of developing environmental/occupational disease outcomes.

Required Courses

11 Credits

- EOH 2122 - TRANSPORT AND FATE OF ENVIRONMENTAL AGENTS
- EOH 2175 - PRINCIPLES OF TOXICOLOGY
- EOH 2181 - RISK ASSESSMENT PRACTICUM
- EOH 2504 - PRINCIPLES OF ENVIRONMENTAL EXPOSURE

Suggested Elective Courses

Minimum 4 credits

A statistics course is not required, however experience in statistical applications will assist students in understanding some of the program concepts.

- BCHS 2572 - RISK COMMUNICATION
- EOH 2180 - INTRODUCTION TO RISK SCIENCES
- EOH 2309 - ENVIRONMENTAL HEALTH CHEMISTRY
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY

Total Credits: 15

Doctoral

Environmental and Occupational Health, PhD

The objective of the Environmental Health Sciences PhD training program is to provide a broad theoretical and practical education for individuals who desire positions in academic, industrial or government positions as teachers, researchers, or regulators in the multifaceted discipline of Environmental Health Science. The program emphasizes study of the environmental impacts on human disease risk and disease susceptibility. The Environmental Health Sciences program is designed as an integrated modern curriculum combining training in toxicology, environmental exposure pathways, environmental epidemiology, and risk assessment with the new and continually developing fields of cellular and molecular pathobiology of environmental disease. The program provides an understanding of how

relevant environmental exposures, laboratory-based model systems, and gene-environment responses can be interpreted and applied in the study of disease etiology in exposed and potentially exposed human populations

Required Courses

- BOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- BOST 2142 - APPLIED REGRESSION ANALYSIS
- EOH 2109 - ENVIRONMENTAL AND OCCUPATIONAL HEALTH SCIENCES JOURNAL CLUB (*four terms*)
- EOH 2110 - ROTATION/PRACTICUM

Students who are established in a mentor's research program may exempt with approval

- EOH 2122 - TRANSPORT AND FATE OF ENVIRONMENTAL AGENTS
- EOH 2175 - PRINCIPLES OF TOXICOLOGY
- EOH 2180 - INTRODUCTION TO RISK SCIENCES
- EOH 2181 - RISK ASSESSMENT PRACTICUM
- EOH 2310 - MOLECULAR FUNDAMENTALS
- EOH 2504 - PRINCIPLES OF ENVIRONMENTAL EXPOSURE
- EOH 2805 - EPIGENETICS AND EPIGENOMICS OF ENVIRONMENTAL HEALTH
- EOH 3010 - RESEARCH AND DISSERTATION PHD (*17 credits*)
- EOH 3110 - SCIENCE COMMUNICATIONS AND PROFESSIONAL DEVELOPMENT
- EOH 3210 - PATHOPHYSIOLOGY OF ENVIRONMENTAL DISEASE
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- EPIDEM 2223 - INTRODUCTION TO ENVIRONMENTAL EPIDEMIOLOGY
- PUBHLT 2011 - ESSENTIALS OF PUBLIC HEALTH
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS (*two terms*)
- FTDR 3999 - FULL-TIME DISSERTATION STUDY

Elective Courses

Add a minimum of 12 credits in consultation with advisor to earn total credits required for the program.

Total Credits: 72

Environmental and Occupational Health, PhD, Public Health Practice (PHP)

The public health practice PhD in environmental and occupational health provides a broad theoretical and practical education for individuals who desire positions in academic, industrial, or government laboratories in the multifaceted discipline of environmental health sciences. The program provides a degree that emphasizes a practice-oriented, interdisciplinary approach to research that encompasses in its coursework the competencies of the five core areas of Public Health: environmental health, biostatistics, epidemiology, health policy and management, and behavioral and community health aspects of Public Health. It further includes courses to develop proficiencies in one of several high-level career directions.

Pitt Public Health Required Courses

- BCHS 2509 - SOCIAL AND BEHAVIORAL SCIENCES AND PUBLIC HEALTH
- BOST 2041 - INTRODUCTION TO STATISTICAL METHODS

- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- HPM 2001 - HEALTH POLICY AND MANAGEMENT IN PUBLIC HEALTH
- PUBHLT 2015 - PUBLIC HEALTH BIOLOGY
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS (*two terms*)
- PUBHLT 2033 - FOUNDATIONS IN PUBLIC HEALTH
- PUBHLT 2034 - PUBLIC HEALTH COMMUNICATIONS
- PUBHLT 2035 - APPLICATIONS IN PUBLIC HEALTH

EOH PhD, PHP Required Courses

- BIOST 2142 - APPLIED REGRESSION ANALYSIS
- BIOST 2143 - LONGITUDINAL AND CLUSTERED DATA ANALYSIS
- EOH 2021 - SPECIAL STUDIES (*two terms*)
- EOH 2108 - ENVIRONMENTAL AND OCCUPATIONAL HEALTH PRACTICUM
- EOH 2122 - TRANSPORT AND FATE OF ENVIRONMENTAL AGENTS
- EOH 2140 - CLIMATE CHANGE AND HUMAN HEALTH
- EOH 2175 - PRINCIPLES OF TOXICOLOGY
- EOH 2180 - INTRODUCTION TO RISK SCIENCES
- EOH 2181 - RISK ASSESSMENT PRACTICUM
- EOH 2260 - ENVIRONMENTAL JUSTICE AND HEALTH EQUITY: REGULATIONS, POLICIES, AND PRACTICES
- EOH 2309 - ENVIRONMENTAL HEALTH CHEMISTRY
- EOH 2504 - PRINCIPLES OF ENVIRONMENTAL EXPOSURE
- EOH 3210 - PATHOPHYSIOLOGY OF ENVIRONMENTAL DISEASE
- EPIDEM 2223 - INTRODUCTION TO ENVIRONMENTAL EPIDEMIOLOGY
- EOH 3010 - RESEARCH AND DISSERTATION PHD
AND/OR
- FTDR 3999 - FULL-TIME DISSERTATION STUDY

Elective Courses

Add electives as recommended by academic advisors to earn total credits required for the program.

Total Credits: 72

Master's

Environmental and Occupational Health, MPH

The MPH program in environmental and occupational health provides an opportunity for students interested in environmental and occupational health to become familiar with the relevant concepts as they apply to public health practice. The program provides an opportunity for working health professionals to achieve an in-depth environmental perspective as well as a degree in public health. The degree may be tailored more toward either environmental health science or risk assessment depending on the choice of electives and desire of the student.

Students are required to complete a 200-hour practicum in a public health setting and prepare an essay or thesis. The program typically takes two years to complete.

Pitt Public Health Required Courses

- BCHS 2509 - SOCIAL AND BEHAVIORAL SCIENCES AND PUBLIC HEALTH
- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- HPM 2001 - HEALTH POLICY AND MANAGEMENT IN PUBLIC HEALTH
- PUBHLT 2015 - PUBLIC HEALTH BIOLOGY
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS (*two terms*)
- PUBHLT 2033 - FOUNDATIONS IN PUBLIC HEALTH
- PUBHLT 2034 - PUBLIC HEALTH COMMUNICATIONS
- PUBHLT 2035 - APPLICATIONS IN PUBLIC HEALTH

EOH MPH Required Courses

- BIOST 2142 - APPLIED REGRESSION ANALYSIS
- EOH 2021 - SPECIAL STUDIES (*2 credits*)
- EOH 2108 - ENVIRONMENTAL AND OCCUPATIONAL HEALTH PRACTICUM
- EOH 2122 - TRANSPORT AND FATE OF ENVIRONMENTAL AGENTS
- EOH 2175 - PRINCIPLES OF TOXICOLOGY
- EOH 2180 - INTRODUCTION TO RISK SCIENCES
- EOH 2181 - RISK ASSESSMENT PRACTICUM
- EOH 2309 - ENVIRONMENTAL HEALTH CHEMISTRY
- EOH 2504 - PRINCIPLES OF ENVIRONMENTAL EXPOSURE

Elective Courses

Add electives as recommended by academic advisors to earn total credits required for the program.

Total Credits: 47

Environmental and Occupational Health, MS

The emphasis of the MS in Environmental and Occupational Health is directed towards the theoretical underpinnings of environmental health sciences and toxicology with more limited involvement in laboratory-based research. The program is designed as an integrated modern curriculum combining the training in the toxicological and environmental biophysics disciplines that are traditional to the Department of Environmental and Occupational Health with the new and continually developing fields of cellular and molecular pathobiology of environmental disease and gene environment interactions. The program provides an understanding of how relevant environmental exposures, laboratory based model systems, and gene-environment responses can be interpreted and applied to the study of disease etiology in exposed and potentially exposed human populations.

The program typically takes approximately 2 years to complete.

Required Courses

- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- BIOST 2142 - APPLIED REGRESSION ANALYSIS
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY

- PUBHLT 2011 - ESSENTIALS OF PUBLIC HEALTH
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS (*two terms*)
- EOH 2021 - SPECIAL STUDIES (*2 credits*)
- EOH 2109 - ENVIRONMENTAL AND OCCUPATIONAL HEALTH SCIENCES JOURNAL CLUB (*four terms*)
- EOH 2122 - TRANSPORT AND FATE OF ENVIRONMENTAL AGENTS
- EOH 2175 - PRINCIPLES OF TOXICOLOGY
- EOH 2310 - MOLECULAR FUNDAMENTALS
- EOH 3210 - PATHOPHYSIOLOGY OF ENVIRONMENTAL DISEASE

Elective Courses

Add electives as recommended by academic advisors to earn total credits required for the program.

Total Credits: 42

Department of Epidemiology

Epidemiology is the application of the scientific method to the study of disease in populations for the purpose of prevention or control. It is a key basic science of public health and preventive medicine. Epidemiologists play a fundamental role in public health and preventive medicine by identifying variabilities in human situations that may have a critical influence on the occurrence of disease within populations.

The epidemiological method for studying a problem involves three approaches:

- Description of the frequency and determinants of a disease in a defined population;
- Evaluation of factors that may cause a disease; and
- Experimental studies of the effects of modifying risk factors on the subsequent frequency of a disease.

Vice Chair for Education Samar El Khoudary, PhD, MPH, FAHA sae25@pitt.edu

Director, Doctoral Program Tina Costacou, PhD costacout@edc.pitt.edu

Director, Master's Programs Nancy W. Glynn, PhD epidnwg@pitt.edu

Director, MD/PhD Program Iva Miljkovic, MD, PhD, FAHA ivm1@pitt.edu

Admissions

Applying for Admission to Pitt Public Health

The department accepts students from a variety of undergraduate disciplines for our MPH and MS degrees. Our PhD program typically accepts superior students with health-related professional degree backgrounds and prior graduate degrees. A joint MD/PhD program is also available for exceptionally qualified candidates. Major areas of emphasis within the department are aging, psychiatric, social epidemiology, cancer, injury prevention, applied public health cardiovascular and diabetes, clinical trials and methods, infectious disease, molecular and genetic epidemiology, environmental epidemiology, global health, prevention lifestyle and physical activity, neuroepidemiology, nutritional epidemiology, reproductive, perinatal, and pediatric epidemiology, and women's health.

Financial Assistance

Graduate Student Researcher (GSR) Appointment Information for doctoral program applicants and students only: Epidemiology Graduate Student Researcher Assistantship

Financial Assistance: Tuition & Financial Aid

Minority Student Support Information: <https://www.sph.pitt.edu/research-practice/research-centers-and-institutes/center-health-equity>

Research

In fiscal year 2023-2024, the faculty within the Department of Epidemiology received approximately \$46 million in research funds. These projects, mostly federally funded, included activity in the major areas of focus within the department. For additional information, review details about our research practices and areas of research emphasis .

The student's course of study includes School of Public Health core courses, department core courses, electives drawn from our frequently used courses, and other appropriate selections throughout the University. The sequencing of courses is developed in conjunction with the academic advisor, taking into account background, area of focus, degree program, and Pitt Public Health requirements.

The minimum credit requirement is 30 for the MS program for health professionals and 72 for the PhD. A 45-credit MPH or MS is available for students who are not health professionals. MPH students will be involved in a hands-on internship. Master's students must complete a (MS) thesis or essay (MPH) and doctoral students (PhD) must complete a dissertation and one-semester Teaching Practicum experience.

Doctoral

Epidemiology, PhD

The Epidemiology PhD program provides students with an advanced level of academic preparation to conduct research, teach, and mentor students. This includes concentrated training in epidemiological concepts and methodology and the completion of a research-based dissertation. Students may choose from a number of areas of research emphasis as they plan coursework with their faculty mentors, and prepare for dissertation collaboration with their mentors and faculty committee members.

Please note that the Epidemiology PhD can be adapted to have an applied focus. Through elective coursework, internship opportunities, and the dissertation, PhD candidates can obtain the essential skills required for public health practice.

Graduates are employed at federal governmental agencies including the US Centers for Disease Control and Prevention, the US Food and Drug Administration, National Institute for Occupational Safety and Health, the Epidemic Intelligence Service, and the US Department of Health and Human Services, in addition to local and state departments of health, and the consulting, insurance and pharmaceutical industries.

Alumni are also leading research efforts at universities across the US and internationally, and inspiring students in the classroom as faculty instructors who are sharing their cutting-edge training, wealth of experience, and accomplishments with future public health leaders.

Required Courses

- EPIDEM 2004 - PATHOPHYSIOLOGY ACROSS THE LIFE SPAN
OR
 - EOH 3210 - PATHOPHYSIOLOGY OF ENVIRONMENTAL DISEASE
 - EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
 - EPIDEM 2160 - EPIDEMIOLOGY OF INFECTIOUS DISEASES
 - EPIDEM 2170 - CHRONIC DISEASE EPIDEMIOLOGY
 - EPIDEM 2180 - FUNDAMENTALS OF EPIDEMIOLOGICAL METHODS
 - EPIDEM 2181 - DESIGN AND CONDUCT OF CLINICAL TRIALS
 - EPIDEM 2185 - INTRODUCTION TO SAS
OR
 - EPIDEM 2186 - INTRODUCTION TO R
 - EPIDEM 2189 - EPIDEMIOLOGICAL METHODS OF LONGITUDINAL & TIME-TO-EVENT ANALYSES
 - EPIDEM 2192 - CAUSAL INFERENCE IN EPIDEMIOLOGIC RESEARCH
 - EPIDEM 2193 - MACHINE LEARNING IN EPIDEMIOLOGICAL RESEARCH
 - EPIDEM 2215 - TEACHING PRACTICUM
 - EPIDEM 2230 - SECONDARY DATA ANALYSIS: A CAPSTONE COURSE
 - EPIDEM 2250 - SEMINAR IN EPIDEMIOLOGY
 - EPIDEM 2260 - EPIDEMIOLOGICAL BASIS DISEASE CONTROL
 - EPIDEM 2600 - INTRODUCTION TO MOLECULAR EPIDEMIOLOGY
 - EPIDEM 2921 - GRANT WRITING
 - EPIDEM 3183 - READING, ANALYZING, AND INTERPRETING THE PUBLIC HEALTH AND MEDICAL LITERATURE
 - BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
 - BIOST 2142 - APPLIED REGRESSION ANALYSIS
 - PUBHLT 2011 - ESSENTIALS OF PUBLIC HEALTH
 - PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS
(two terms)
 - PUBHLT 2030 - RESEARCH ETHICS AND THE RESPONSIBLE CONDUCT OF RESEARCH
 - **One advanced quantitative course is required.** Choose one from the following:
BCHS 2991, BCHS 3002, BCHS 3015, BIOST 2016, BIOST 2143, BIOST 2150, EFOP 3408, HPM 3505, HUGEN 2080
 - EPIDEM 3100 - RESEARCH AND DISSERTATION PHD (3 credits)
OR
 - FTDR 3999 - FULL-TIME DISSERTATION STUDY
- These training requirements must also be completed:**
- Pitt Public Health Academic Integrity Module
 - Internal Review Board (IRB) Training
 - Independent Development Plan (IDP) Requirement
 - Primary Data Collection & Management Requirement
 - Presentation Training-Competency in Communication Requirement

Elective Courses

Select electives as recommended by academic advisors to earn total credits required for the program.

Total Credits: 72

Master's

Epidemiology, MPH

The Epidemiology MPH program provides a strong foundation in epidemiology and biostatistics, as well as the other core competencies of public health. It provides a clinically relevant educational and practical experience based on research excellence. Students are trained to engage in research and/or applied public health practice activities that impact public health by evaluating and responding to important public health issues such as infectious diseases, aging, and chronic disease prevention, global, reproductive, or environmental health, population neuroscience, and injury prevention.

Recent graduates are employed at state, county, and local health departments, the Centers for Disease Control and Prevention, the National Institutes of Health, hospitals, pharmaceutical and consulting companies. Some pursue medical or dental careers or doctoral programs in epidemiology or biostatistics.

Pitt Public Health Required Courses

- BCHS 2509 - SOCIAL AND BEHAVIORAL SCIENCES AND PUBLIC HEALTH
- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- EOH 2013 - ENVIRONMENTAL HEALTH AND DISEASE
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- HPM 2001 - HEALTH POLICY AND MANAGEMENT IN PUBLIC HEALTH
- PUBHLT 2015 - PUBLIC HEALTH BIOLOGY
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS (*two terms*)
- PUBHLT 2033 - FOUNDATIONS IN PUBLIC HEALTH
- PUBHLT 2034 - PUBLIC HEALTH COMMUNICATIONS
- PUBHLT 2035 - APPLICATIONS IN PUBLIC HEALTH

EPIDEM MPH Required Courses

- BIOST 2142 - APPLIED REGRESSION ANALYSIS
- EPIDEM 2160 - EPIDEMIOLOGY OF INFECTIOUS DISEASES
- EPIDEM 2170 - CHRONIC DISEASE EPIDEMIOLOGY
- EPIDEM 2180 - FUNDAMENTALS OF EPIDEMIOLOGICAL METHODS
- EPIDEM 2181 - DESIGN AND CONDUCT OF CLINICAL TRIALS
- EPIDEM 2185 - INTRODUCTION TO SAS
- OR
- EPIDEM 2186 - INTRODUCTION TO R
- EPIDEM 2210 - SPECIAL STUDIES - ESSAY (*1-2 credits*)
- EPIDEM 2214 - PUBLIC HEALTH INTERNSHIP (*1-2 credits*)
- EPIDEM 2250 - SEMINAR IN EPIDEMIOLOGY

These training requirements must also be completed:

- Pitt Public Health Academic Integrity Module
- Human Subjects Internal Review Board (IRB) Module
- Oral Presentation Communications Competency Requirement

Elective Courses

Select electives as recommended by academic advisor to earn total credits required for the degree program.

Total Credits: 45

Epidemiology, MS (30 Credit)

For those who hold a professional health degree or a related doctoral degree, the department offers a 30 credit condensed MS program that provides concentrated training in epidemiological concepts, skills, and methodology with a research focus. Epidemiology, MS (45 Credit) is available for those with a similar research focus who do not already hold a professional health degree or a related doctoral degree. Both MS programs require completion of a flexible mix of courses in epidemiology and biostatistics. Applicants may reference the credit option that best fits their qualifications and needs in the application goals statement, although this is not required.

Recent graduates are employed at universities and governmental agencies as well as pharmaceutical and consulting companies.

Required Courses

- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- BIOST 2142 - APPLIED REGRESSION ANALYSIS
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- EPIDEM 2160 - EPIDEMIOLOGY OF INFECTIOUS DISEASES
OR
- EPIDEM 2170 - CHRONIC DISEASE EPIDEMIOLOGY
OR
- EPIDEM 2260 - EPIDEMIOLOGICAL BASIS DISEASE CONTROL
- EPIDEM 2180 - FUNDAMENTALS OF EPIDEMIOLOGICAL METHODS
- EPIDEM 2181 - DESIGN AND CONDUCT OF CLINICAL TRIALS
- EPIDEM 2185 - INTRODUCTION TO SAS
OR
- EPIDEM 2186 - INTRODUCTION TO R
- EPIDEM 2210 - SPECIAL STUDIES - ESSAY (3-5 credits, credits may be split over multiple terms)
- EPIDEM 2250 - SEMINAR IN EPIDEMIOLOGY
- PUBHLT 2011 - ESSENTIALS OF PUBLIC HEALTH
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS (two terms)

These training requirements must also be completed:

- Pitt Public Health Academic Integrity Module
- Human Subjects Internal Review Board (IRB) Module
- Oral Presentation Communications Competency Requirement

Elective Courses

Select electives as recommended by academic advisor to earn total credits required for the degree program.

Total Credits: 30

Epidemiology, MS (45 Credit)

The 45 credit Epidemiology MS program provides concentrated training in epidemiological concepts, skills, and methodology with a research focus. It includes a flexible mix of courses in epidemiology and biostatistics. For those who hold a professional health degree or a related doctoral degree, the department offers Epidemiology, MS (30 Credit). Applicants may reference the credit option that best fits their qualifications and needs in the application goals statement, although this is not required.

Recent graduates are employed at universities and governmental agencies, as well as pharmaceutical and consulting companies. Some pursue medical or dental careers or doctoral programs in epidemiology or biostatistics.

Required Courses

- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- BIOST 2142 - APPLIED REGRESSION ANALYSIS
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- EPIDEM 2160 - EPIDEMIOLOGY OF INFECTIOUS DISEASES
- EPIDEM 2170 - CHRONIC DISEASE EPIDEMIOLOGY
- EPIDEM 2180 - FUNDAMENTALS OF EPIDEMIOLOGICAL METHODS
- EPIDEM 2181 - DESIGN AND CONDUCT OF CLINICAL TRIALS
- EPIDEM 2185 - INTRODUCTION TO SAS
- OR
- EPIDEM 2186 - INTRODUCTION TO R
- EPIDEM 2210 - SPECIAL STUDIES - ESSAY (3-5 credits, credits may be split over multiple terms)
- EPIDEM 2250 - SEMINAR IN EPIDEMIOLOGY
- EPIDEM 2189 - EPIDEMIOLOGICAL METHODS OF LONGITUDINAL & TIME-TO-EVENT ANALYSES
- PUBHLT 2011 - ESSENTIALS OF PUBLIC HEALTH
- PUBHLT 2015 - PUBLIC HEALTH BIOLOGY
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS (two terms)

These training requirements must also be completed:

- Pitt Public Health Academic Integrity Module
- Human Subjects Internal Review Board (IRB) Module
- Oral Presentation Communications Competency Requirement

Elective Courses

Select electives as recommended by academic advisor to earn total credits required for the degree program.

Total Credits: 45

Department of Health Policy and Management

The Department of Health Policy and Management (HPM) prepares individuals to assume roles of leadership, policy development, and management within the health industry and in the broader field of public health. Its educational programs are grounded in the faculty's contributions in advancing the state of knowledge and professional practice in health system leadership and in the development, advocacy, analysis, and implementation of health policy. The HPM Faculty are engaged in interdisciplinary research addressing a range of problems relevant to public policy, organization, and management as applied to health care organizations and systems and in various professional and community service activities.

Department of Health Policy and Management leadership also includes Julie M. Donohue, PhD, Chair, and Tina Micale, Department Administrator.

Admission Requirements

Masters Degree Programs: The School of Public Health requires that applicants apply online for all degree programs. Requirements for admission include a bachelor's degree from an accredited college or university, and successful completion of the following: 3 post-secondary (college/university) level semester credits in biology; 3 post-secondary (college or university) level semester credits in mathematics (algebra or higher); and 6 post-secondary (college/university) level semester credits in social and behavioral sciences, preferably including one course in economics. GRE scores are not required for MS, MHA, or MPH applications. Students who feel that prior academic performance or work history does not adequately represent their skill set (or strength of their application) have the option to submit the GRE for additional consideration. Strong test scores can offset an average academic record or lack of industry experience.

In addition, the HPM Admissions Committee cites the following factors in admissions decisions: undergraduate performance, GRE scores (when provided), letters of recommendation, relevant work (or volunteer) experience, and good interpersonal and communication skills. Most applicants are interviewed as part of the application review process. Students enroll in August of each year. Although a rolling admissions process is in place, applicants are encouraged to apply as soon as possible. US applicants should apply before the end of May; international applicants should apply by February 1.

Doctoral Degree Program: Applicants to the PhD Program in Health Services Research and Policy must hold a baccalaureate degree with a GPA of at least 3.3 desirable; college level coursework in calculus with a grade of 3.0 or better is a prerequisite; GRE scores are not a required component for the PhD application. Applicants who feel that their past academic performance and/or prior work history do not adequately represent their skill set may submit GRE scores for consideration; Applicants for whom English is not their first language must submit scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) exam. Students must score a minimum of 213 on the computerized TOEFL (or 550 on the paper-based version). The minimum score for the IELTS is 65.

In addition, applicants must demonstrate in their personal statement that they have a clear understanding of how the program of study will benefit them in achieving their career goals. Three letters of recommendation are required from individuals who are in a position to judge the applicant's professional and/or academic abilities. At least one recommendation should be from an individual who can comment on the applicant's academic qualifications (e.g., former instructor or advisor).

Health Care Systems Engineering Certificate: Applicants to this program must be admitted to or enrolled in the MHA program, the HPM-MPH program, or the MS program in industrial engineering.

Health Systems Leadership and Management Certificate: All Certificate applicants, except those already enrolled in SPH, need to apply through SOPHAS. In addition, the Certificate applicant will submit a brief statement addressing interest in health systems leadership and management; previous experience; areas of interest; and the relation of the Certificate to career goals.

The admission requirements for applicants are based on completion of at least an advanced health care provider degree (e.g. MD, RN, PharmD, PT, OT) or appropriate job experience.

Financial Assistance

The Department of Health Policy and Management has limited scholarship funds and these funds are allocated separately from admission decisions. The scholarship funds are mainly awarded to incoming high-caliber students on an annual basis.

Department Website: <https://www.sph.pitt.edu/hpm>

Certificate

Health Care Systems Engineering Certificate

Offered jointly by the University of Pittsburgh Swanson School of Engineering and Pitt Public Health, this program provides students with specific competencies and analytical tools required for effective problem solving relevant to quality improvement and process engineering in the health care industry. Students are equipped to serve as quality champions and agents of change in addressing the challenges health care faces in the twenty-first century. Engineering students gain knowledge of health care operations, the organizational culture, and the strategic issues facing the industry. Health care management students will learn engineering principles, models, and tools within a systems approach to analysis, problem-solving, and project implementation.

This certificate is intended for individuals pursuing careers in the management, redesign, and improvement of the health care industry. Designed for master's students in the Department of Health Policy and Management and the Department of Industrial Engineering, this program provides a rigorous and multidisciplinary education as a complement to the core curriculum of both programs. With a focus on innovation, effectiveness, and efficiency in health care and public health, the certificate nurtures well-educated professionals and leaders in their disciplines.

Students in this certificate program will be able to:

- Demonstrate knowledge of the structures, performance, quality, policy and environmental context of health and health care to formulated solutions for health policy problems,
- Design and implement projects, including collecting, analyzing, interpreting data and offering sound evidence-based recommendations, and
- Summarize and present health care engineering-related research orally and in writing.

Required Courses

- BOST 2011 - PRINCIPLES OF STATISTICAL REASONING
or
- BOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- HPM 2050 - HEALTH SYSTEMS ENGINEERING SEMINAR
- HPM 2017 - QUANTITATIVE METHODS: DECISION TECHNOLOGIES AND OPERATIONS MANAGEMENT IN HEALTH CARE
- HPM 2207 - QUALITY ASSESSMENT AND PATIENT SAFETY
- HPM 2220 - COST EFFECTIVENESS ANALYSIS HEALTH CARE
- IE 2001 - OPERATIONS RESEARCH
- IE 2102 - LEAN SIX SIGMA I (GREEN BELT)
- IE 2108 - HEALTH SYSTEMS ENGINEERING: QUANTITATIVE ANALYTICS

or

- IE 2122 - FUNDAMENTALS OF SYSTEMS ENGINEERING
- IE 2303 - WORK DESIGN
- IE 2998 - GRADUATE PROJECTS/PRACTICUM

Doctoral

Health Services Research and Policy, PhD

The Health Services Research and Policy (HSRP) PhD program meets an ongoing need for public health researchers who focus on cost, access and quality of the health care system. Graduates will be prepared to conduct research on policy issues affecting the organization, financing, and delivery of health care and public health services.

Students must successfully pass a preliminary exam given after the first year, a comprehensive exam given after the second year, and typically present their dissertation overview towards the end of the third year. The doctoral dissertation will take the form of three thematically linked manuscripts of publishable quality.

Required Courses

- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
 - BIOST 2142 - APPLIED REGRESSION ANALYSIS
 - EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
 - HPM 2905 - QUASI-EXPERIMENTAL DESIGN FOR HEALTH SERVICES RESEARCH
 - HPM 3000 - DOCTORAL RESEARCH AND PROFESSIONAL DEVELOPMENT SEMINAR PART 1 (*2 terms*)
 - HPM 3001 - DOCTORAL RESEARCH AND PROFESSIONAL DEVELOPMENT SEMINAR PART 2 (*2 terms*)
 - HPM 3010 - SEMINAR ON ORGANIZATIONAL STUDIES: HEALTHCARE ORGANIZATIONS AND ENVIRONMENTS
 - HPM 3064 - HEALTH POLICY ANALYSIS
 - HPM 3065 - ADVANCED HEALTH POLICY ANALYSIS: IMPLEMENTATION, EVALUATION, AND TRANSLATION
 - HPM 3125 - INTERMEDIATE HEALTH ECONOMICS
 - HPM 3501 - SEMINAR IN HEALTH SERVICES RESEARCH METHODS 1
 - HPM 3502 - SEMINAR IN HEALTH SERVICES RESEARCH METHODS 2
 - HPM 3505 - ADVANCED EMPIRICAL MICROECONOMICS METHODS WITH APPLICATIONS FOR HEALTHCARE RESEARCH
 - HPM 3506 - DISSERTATION GRANT WRITING CAPSTONE
 - HPM 3508 - RESEARCH AND DISSERTATION PHD (*3 credits*)
- OR
- FTDR 3999 - FULL-TIME DISSERTATION STUDY
 - HPM 3510 - DOCTORAL TEACHING PRACTICUM
 - PUBHLT 2011 - ESSENTIALS OF PUBLIC HEALTH
 - PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS (*two terms*)
 - PUBHLT 2030 - RESEARCH ETHICS AND THE RESPONSIBLE CONDUCT OF RESEARCH

Note:

- Students without previous experience in health care must take HPM 2105 INTRODUCTION TO THE US HEALTHCARE DELIVERY SYSTEM 1

- Students who have not recently taken a course in microeconomics must take HPM 2028 MICROECONOMICS APPLIED TO HEALTH

Elective Courses

Minimum of 12 elective credits recommended by academic advisor. Must include one methods focused course.

Total Credits: 72

Joint Degree

Health Policy and Management, JD/MPH

For the JD/MPH degree, students enrolled in the joint-degree program receive integrated training in law and public health over a four year period. Students must apply to, and be accepted into, both the School of Law and the School of Public Health.

Once admitted, the student completes the first year of law school before registering for courses in public health. During subsequent semesters students are encouraged to integrate coursework between the schools to best accommodate the students learning objectives.

Pitt Public Health Required Courses

- BCHS 2509 - SOCIAL AND BEHAVIORAL SCIENCES AND PUBLIC HEALTH
- BIOST 2011 - PRINCIPLES OF STATISTICAL REASONING
- EOH 2013 - ENVIRONMENTAL HEALTH AND DISEASE
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- HPM 2001 - HEALTH POLICY AND MANAGEMENT IN PUBLIC HEALTH
- PUBHLT 2015 - PUBLIC HEALTH BIOLOGY
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS (*two terms*)
- PUBHLT 2033 - FOUNDATIONS IN PUBLIC HEALTH
- PUBHLT 2034 - PUBLIC HEALTH COMMUNICATIONS
- PUBHLT 2035 - APPLICATIONS IN PUBLIC HEALTH

HPM JD/MPH Required Courses

- HPM 2012 - FINANCIAL MANAGEMENT FOUNDATIONS HEALTH CARE AND PUBLIC HEALTH
- HPM 2020 - PROFESSIONAL DEVELOPMENT SEMINAR 1
- HPM 2021 - PROFESSIONAL DEVELOPMENT SEMINAR 2
- HPM 2025 - HPM PRACTICUM (*1 credit*)
- HPM 2028 - MICROECONOMICS APPLIED TO HEALTH
- HPM 2037 - ESSAY-HA (*LAW Upper-level Legal Writing requirement, with appropriate modifications/revisions to meet MPH essay requirements, satisfies this course requirement*)
- HPM 2055 - MANAGING HEALTH PROGRAMS AND PROJECTS
- HPM 2063 - THE POLITICS OF HEALTH POLICY
- HPM 2064 - HEALTH POLICY ANALYSIS
- HPM 2081 - PUBLIC HEALTH AGENCY MANAGEMENT

- HPM 2105 - INTRODUCTION TO THE US HEALTHCARE DELIVERY SYSTEM 1
- HPM 2131 - PUBLIC HEALTH LAW AND ETHICS

Elective Courses

Add electives as recommended by academic advisors to earn total credits required for the program. Students can apply a maximum of 3 credits of public health-relevant coursework taken in LAW to meet joint degree requirements.

Total School of Public Health Credits: 45

Total Joint Degree Credits: 113

Health Policy and Management, MHA/MBA

An outstanding opportunity to become highly skilled in the management of health care processes, quality, and finances, the MHA/MBA joint degree program is designed to create future leaders in the management of health care organizations. Uniting the strengths of the University of Pittsburgh's School of Public Health and Joseph M. Katz Graduate School of Business, the program blends outstanding training in management and finance with the content expertise in health care quality improvement, outcomes measurement, and analytics.

Students must complete applications for, and be accepted into, both the School of Public Health and the Joseph M. Katz Graduate School of Business. Application to Pitt Public Health must be submitted through SOPHAS at www.sophas.org. Application to the Katz Graduate School of Business should be made at www.business.pitt.edu/katz/apply.

Our highly trained graduates will be fully prepared to assume fast-track leadership positions in a variety of health care organizations. The Bureau of Labor Statistics estimates that the demand for health care managers will grow by 17 percent in the next decade. The U.S. health care system is the largest industry in the United States, currently consuming nearly 18 percent of GDP. At the same time, there remain significant problems with access and quality. The joint training in business and health care management should provide a strong foundation for a variety of positions in health care finance, insurance, operations, disease and population health management.

The standard full-time curriculum is a three-year, 73-credit course of study leading to the joint degree. The competency-based curriculum emphasizes both professional and leadership development, as well as functional management skills, blending courses across both the Katz School (MBA) and Pitt Public Health's Department of Health Policy and Management (MHA) in six academic terms.

Students are required to complete a management residency in the first summer term that may be extended into the second summer term. These supervised placements in health care services or health-related practice sites are an invaluable experience for professional development and networking. The student must also complete a master's essay and an applied management project at the residency site.

Required Courses

- BACC 2401 - FINANCIAL ACCOUNTING
- BFIN 2409 - FINANCIAL MANAGEMENT 1
- BIND 2404 - PROBABILITY & STATISTICS: FUNDAMENTALS OF MBA QUANTITATIVE METHODS
- BIND 2406 - BUSINESS MATH: FUNDAMENTALS OF MBA QUANTITATIVE METHODS
- BIND 2506 - TIME VALUE OF MONEY: FUNDAMENTALS OF MBA QUANTITATIVE METHODS
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT

- HPM 2020 - PROFESSIONAL DEVELOPMENT SEMINAR 1
- HPM 2105 - INTRODUCTION TO THE US HEALTHCARE DELIVERY SYSTEM 1
- HPM 2108 - LEADERSHIP
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS (*two terms*)
- BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS
- BOAH 2528 - ORGANIZATIONAL BEHAVIOR- COMMUNICATING STRATEGICALLY
- HPM 2021 - PROFESSIONAL DEVELOPMENT SEMINAR 2
- HPM 2106 - HEALTH SYSTEMS LEADERSHIP AND PROFESSIONAL DEVELOPMENT 2
- HPM 2141 - MANAGERIAL EPIDEMIOLOGY
- HPM 2216 - HEALTH INSURANCE: FINANCING HEALTH CARE
- HPM 2115 - HEALTH POLICY AND MANAGEMENT RESIDENCY
- BMKT 2409 - MARKETING MANAGEMENT
- BOAH 2421 - HUMN RESORC COMPETITIVE ADVNTG
- BOAH 2517 - INTERPERSONAL SKILLS MANAGERS 1
- HPM 2012 - FINANCIAL MANAGEMENT FOUNDATIONS HEALTH CARE AND PUBLIC HEALTH
- HPM 2028 - MICROECONOMICS APPLIED TO HEALTH
- HPM 2130 - HEALTH LAW AND ETHICS
- BMIS 2409 - INFORMATION SYSTEMS
- BQOM 2421 - DECISION TECH IN MFG & OPS MGT
- BSEO 2401 - BUSINESS ETHICS & SOCIAL PERFORM
- BSPP 2409 - STRATEGIC MANAGEMENT
- HPM 2014 - APPLICATIONS AND ISSUES IN FINANCIAL MANAGEMENT OF HEALTH CARE INSTITUTIONS
- HPM 2220 - COST EFFECTIVENESS ANALYSIS HEALTH CARE
- BIND 2454 - INTEGRATED MBA CAPSTONE
- BMIS 2402 - COMPUTATIONAL THINKING FOR BUSINESS LEADERS
- HPM 2017 - QUANTITATIVE METHODS: DECISION TECHNOLOGIES AND OPERATIONS MANAGEMENT IN HEALTH CARE
- HPM 2145 - MARKETING HEALTH SERVICES STRATEGY AND BUSINESS PLANS
- HPM 2207 - QUALITY ASSESSMENT AND PATIENT SAFETY
- BOAH 2409 - ORGANIZATIONAL BEHAVIOR: LEADERSHIP AND GROUP EFFECTIVENESS
- HPM 2037 - ESSAY-HA (*1 credit*)
- HPM 2150 - STRATEGIC MANAGEMENT OF HEALTH SERVICE ORGANIZATIONS
- PUBHLT 2011 - ESSENTIALS OF PUBLIC HEALTH

Elective Courses

Remaining MBA elective credits may be taken in spring of 2nd or 3rd year. Student may take HPM 2115 for an optional 1 credit.

Total Joint Degree Credits: 73

Master's

Health Policy and Management, MHA

The MHA program offers students a competency-based curriculum and an array of professional development resources and activities to prepare graduates for managerial roles in health care systems and networks, managed care, health

insurance, and long-term care organizations. The broad curriculum provides students with a foundation of knowledge, analytical and communication skills, and core values for ongoing career growth and professional and leadership development. Upon completion of the MHA program, our graduates obtain post-graduate fellowships or full-time employment in hospitals, academic medical centers, physician practices, long-term care facilities, health plans, and consulting firms.

The mission of the Masters in Health Administration (MHA) Program is to provide students with the competencies necessary for early to mid-level management positions and provide the foundation for subsequent professional development, leadership and executive management in organizations involved in the delivery or financing of health care services. The program's curriculum is based on evidence-based practice enriched by the research activity of the faculty.

In order to be eligible for graduation, students must complete 60 credit hours with a B average or better including a supervised management residency, which is typically scheduled during the summer term, and prepare a scholarly master's essay relating to the culminating experience. The curriculum includes select Pitt Public Health core courses, the required health management core, and elective credits offered within and outside the schools of the health sciences.

Required Courses

- BIOST 2011 - PRINCIPLES OF STATISTICAL REASONING
- HPM 2010 - ORGANIZATION STUDIES: THEORY AND APPLICATIONS TO HEALTH CARE SYSTEMS
- HPM 2012 - FINANCIAL MANAGEMENT FOUNDATIONS HEALTH CARE AND PUBLIC HEALTH
- HPM 2014 - APPLICATIONS AND ISSUES IN FINANCIAL MANAGEMENT OF HEALTH CARE INSTITUTIONS
- HPM 2017 - QUANTITATIVE METHODS: DECISION TECHNOLOGIES AND OPERATIONS MANAGEMENT IN HEALTH CARE
- HPM 2020 - PROFESSIONAL DEVELOPMENT SEMINAR 1
- HPM 2021 - PROFESSIONAL DEVELOPMENT SEMINAR 2
- HPM 2028 - MICROECONOMICS APPLIED TO HEALTH
- HPM 2029 - HEALTH MANAGEMENT INFORMATION SYSTEMS
- HPM 2037 - ESSAY-HA (*1 credit*)
- HPM 2049 - HUMAN RESOURCES MANAGEMENT FOR HEALTH CARE AND PUBLIC HEALTH PROFESSIONALS
- HPM 2105 - INTRODUCTION TO THE US HEALTHCARE DELIVERY SYSTEM 1
- HPM 2106 - HEALTH SYSTEMS LEADERSHIP AND PROFESSIONAL DEVELOPMENT 2
- HPM 2108 - LEADERSHIP
- HPM 2115 - HEALTH POLICY AND MANAGEMENT RESIDENCY
- HPM 2130 - HEALTH LAW AND ETHICS
- HPM 2141 - MANAGERIAL EPIDEMIOLOGY
- HPM 2145 - MARKETING HEALTH SERVICES STRATEGY AND BUSINESS PLANS
- HPM 2150 - STRATEGIC MANAGEMENT OF HEALTH SERVICE ORGANIZATIONS
- HPM 2207 - QUALITY ASSESSMENT AND PATIENT SAFETY
- HPM 2216 - HEALTH INSURANCE: FINANCING HEALTH CARE
- HPM 2220 - COST EFFECTIVENESS ANALYSIS HEALTH CARE
- PUBHLT 2011 - ESSENTIALS OF PUBLIC HEALTH
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS (*two terms*)

Elective Courses

Add electives as recommended by academic advisor to earn total credits required for the program.

Total Credits: 60

Health Policy and Management, MPH

The MPH in Health Policy and Management (HPM) prepares students for careers as public policy analysts, advocates for public health and high quality care, and professionals engaged in the development and implementation of health policies. The program provides professional development through a combination of coursework, a health policy or management related practicum, a Public Health Leader-in-Residence, and other curricular activities.

This two-year, 45-credit Program prepares students for careers in both health policy development, analysis and advocacy and program and organization management in public health agencies, foundations, other nonprofits and the private sector. Graduates of our MPH Program should be well-prepared to pass the Certification in Public Health (CPH) exam, pursue related Doctoral studies and/or obtain professional employment in public health and related sectors, nationally and globally.

In order to be eligible for graduation, students must complete 45 credit hours with a B average or better including a supervised 200-hour practicum, and prepare a scholarly master's essay relating to culminating experience.

Pitt Public Health Required Courses

- BCHS 2509 - SOCIAL AND BEHAVIORAL SCIENCES AND PUBLIC HEALTH
- BIOST 2011 - PRINCIPLES OF STATISTICAL REASONING
- OR
- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- EOH 2013 - ENVIRONMENTAL HEALTH AND DISEASE
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- HPM 2001 - HEALTH POLICY AND MANAGEMENT IN PUBLIC HEALTH
- PUBHLT 2015 - PUBLIC HEALTH BIOLOGY
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS (*two terms*)
- PUBHLT 2033 - FOUNDATIONS IN PUBLIC HEALTH
- PUBHLT 2034 - PUBLIC HEALTH COMMUNICATIONS
- PUBHLT 2035 - APPLICATIONS IN PUBLIC HEALTH

HPM MPH Required Courses

- HPM 2012 - FINANCIAL MANAGEMENT FOUNDATIONS HEALTH CARE AND PUBLIC HEALTH
- HPM 2020 - PROFESSIONAL DEVELOPMENT SEMINAR 1
- HPM 2021 - PROFESSIONAL DEVELOPMENT SEMINAR 2
- HPM 2025 - HPM PRACTIICUM (*1 credit*)
- HPM 2028 - MICROECONOMICS APPLIED TO HEALTH
- HPM 2037 - ESSAY-HA (*1 credit*)
- HPM 2055 - MANAGING HEALTH PROGRAMS AND PROJECTS
- HPM 2063 - THE POLITICS OF HEALTH POLICY
- HPM 2064 - HEALTH POLICY ANALYSIS
- HPM 2081 - PUBLIC HEALTH AGENCY MANAGEMENT
- HPM 2105 - INTRODUCTION TO THE US HEALTHCARE DELIVERY SYSTEM 1
- HPM 2131 - PUBLIC HEALTH LAW AND ETHICS

Elective Courses

Add electives as recommended by academic advisor to earn total credits required for the degree program. Recommended electives are listed below.

- HPM 2108 - LEADERSHIP
- HPM 2220 - COST EFFECTIVENESS ANALYSIS HEALTH CARE

Total Credits: 45

Health Services Research and Policy, MS

The Master of Science in Health Services Research and Policy program prepares graduates for positions in health services research and policy, analytics and also prepares them for higher level education (such as a PhD). Graduates will be prepared to conduct research on policy issues affecting the organization, financing, and delivery of health care and public health services.

The MS requires a minimum of 42 credits. The program includes coursework in statistics and research methods as well as foundations in public health. Students must successfully pass a comprehensive exam given during the second year and submit and successfully defend a master's thesis.

Required Courses

- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- BIOST 2142 - APPLIED REGRESSION ANALYSIS
- BIOST 2143 - LONGITUDINAL AND CLUSTERED DATA ANALYSIS
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- HPM 2001 - HEALTH POLICY AND MANAGEMENT IN PUBLIC HEALTH
- HPM 2905 - QUASI-EXPERIMENTAL DESIGN FOR HEALTH SERVICES RESEARCH
- HPM 3508 - RESEARCH AND DISSERTATION PHD (*1-2 credits*)
- PUBHLT 2011 - ESSENTIALS OF PUBLIC HEALTH
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS (*two terms*)

Area of Focus Courses

Students work with their academic advisor to identify an area of focus with at least 11 credits that focuses on a discipline or area of interest.

Elective Courses

Students add electives as recommended by academic advisors to earn total credits required for the degree program.

Total Credits: 42

Department of Human Genetics

The Department of Human Genetics provides graduate training in the fields of human genetics, public health genetics, genetic counseling, and genome bioinformatics. The mission of the department is to discover new knowledge about the genetic determinants of human health and disease through basic and applied research; to educate students, trainees, and

other interested persons in that knowledge; and to apply that knowledge to improve the health of populations, families, and patients.

Contact Information

Noel Harrie
Department Office: 3102A Public Health
412-624-3066
Fax: 412-624-3020
nce1@pitt.edu
<https://www.sph.pitt.edu/hugen>

Admission

In addition to meeting the School-level Admission Requirements, applicants to the MS and PhD programs in human genetics should have completed courses in calculus and genetics. For the MS in genetic counseling program, the preferred undergraduate background includes courses in each of the following: genetics, organic chemistry-general biochemistry, statistics, and a behavioral or social science. In some cases, deficiencies can be made up after admission. For applicants to the MPH in public health genetics program, an introductory course in genetics is required; other college level coursework in biology may be considered to fulfill this requirement on a case-by-case basis. For the MS in genome bioinformatics, applicants should have completed courses in calculus, genetics, and programming or coding. For information on admission and registration contact the Department of Human Genetics at 412-624-3066 or nce1@pitt.edu.

Financial Assistance

Graduate student assistantships are often available for PhD students. The department awards financial aid to applicable MS and MPH students at the time of admission.

Tuition and Billing

Tuition & Financial Aid

Certificate

Public Health Genetics Certificate

The overall goal of the certificate program in public health genetics is to give public health trainees or professionals the core genetics competencies that they need to integrate genetics into any public health discipline. Students enrolled in this certificate program are trained to incorporate knowledge of how genes, together with the environment and behavior, influence health and to apply this insight into their area of practice or research. The certificate program assumes that participants already have standard public health competencies or are in the process of acquiring them through other coursework.

The curriculum consists of 15 credits, of which at least 12 must be traditional classroom courses. The remaining 3 credits may be additional coursework, seminar, project, or practicum work, as described below.

Students enrolled in Human Genetics degree programs other than the MPH in Public Health Genetics may receive the certificate, with the stipulation that the certificate curriculum must include at least 9 credits of coursework, seminar, project, or practicum work that is not part of the coursework for their degree.

Required Course

- HUGEN 2049 - INTRODUCTION PUBLIC HEALTH GENETICS

Basic Science of Genetics Competency Courses

At least 6 credits from the following six courses are required to achieve competency in the basic science of genetics.

- HUGEN 2010 - BIOINFORMATIC RESOURCES FOR GENETICISTS
- HUGEN 2020 - INTRODUCTION TO POPULATION GENETICS AND GENETIC EPIDEMIOLOGY
- HUGEN 2040 - MOLECULAR BASIS OF HUMAN INHERITED DISEASE
- HUGEN 2054 - APPLICATIONS IN PUBLIC HEALTH GENETICS AND GENOMICS
- HUGEN 2060 - CHROMOSOMES - STRUCTURE AND FUNCTION
- HUGEN 2090 - MOLECULAR BASIS OF COMPLEX DISEASES
- HUGEN 2091 - GENETICS OF COMPLEX DISEASES

Additional Courses - Maximum 3 Credits

The following courses can be taken to fulfill the certificate program, but a maximum of 3 credits may come from these courses.

- HUGEN 2021 - SPECIAL STUDIES
Can be taken if a student's essay/thesis/dissertation project is related to Human Genetics or Public Health Genetics or if the student wishes to conduct a small independent research project on a topic in Public Health Genetics. A final written document must be submitted and reviewed. This can be in the form of the student's essay/thesis/dissertation or a research paper on the independent project.
- HUGEN 2028 - HUMAN GENETICS JOURNAL CLUB AND PEER REVIEW
- HUGEN 2047 - CLINICAL GENETICS CASE CONFERENCE
- HUGEN 2050 - PUBLIC HEALTH GENETICS PRACTICUM
Can be taken if the student's practicum or other practice-based experience is related to Human Genetics or Public Health Genetics. A written document summarizing the experience must be submitted to Certificate Leadership.

Additional Courses to Fulfill 15 Credit Requirement

Additional courses permitted for the certificate to fulfill the 15 credit requirement include, but are not limited to, the following courses. Other courses may be permitted but must be pre-approved by the Director of the Public Health Genetics Certificate Program in the Department of Human Genetics.

- ALL OTHER HUGEN COURSES
- EOH 2805 - EPIGENETICS AND EPIGENOMICS OF ENVIRONMENTAL HEALTH
- EPIDEM 2600 - INTRODUCTION TO MOLECULAR EPIDEMIOLOGY
- BCHS 2572 - RISK COMMUNICATION
- IDM 2001 - MOLECULAR BIOLOGY OF MICROBIAL PATHOGENS
- IDM 2002 - MOLECULAR VIROLOGY
- IDM 2010 - PATHOGEN BIOLOGY

- IDM 2014 - FUNCTIONAL GENOMICS OF MICROBIAL PATHOGENS
- IDM 2032 - HUMAN DIVERSITY AND PUBLIC HEALTH

Presentation Requirement

In addition, all students receiving the certificate must give a presentation in the Public Health Genetics course (HUGEN 2049 or other as determined by the Director of the Public Health Genetics Certificate Program).

Total Credits: 15

Doctoral

Human Genetics, PhD

The Doctoral Program in Human Genetics prepares students for careers leading genetics and genomics research in academia or industry. The flexible curriculum provides a broad background in the field while allowing customized emphasis on molecular genetics/genomics, statistical genetics and genetic epidemiology, or genetic counseling. Typically about ten doctoral students are admitted each year, including external applicants and internal applicants currently pursuing Master's degrees within the department. In addition to core coursework and advanced classes in a chosen area of interest, doctoral students pursue mentored research projects culminating in the production and defense of a dissertation.

Required Courses

- BOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- HUGEN 2010 - BIOINFORMATIC RESOURCES FOR GENETICISTS
- HUGEN 2011 - SCIENTIFIC WRITING IN HUMAN GENETICS
- HUGEN 2020 - INTRODUCTION TO POPULATION GENETICS AND GENETIC EPIDEMIOLOGY
- HUGEN 2025 - HUMAN GENETICS SEMINAR (*four terms*)
- HUGEN 2028 - HUMAN GENETICS JOURNAL CLUB AND PEER REVIEW
- HUGEN 2029 - INTRODUCTION TO GENE MAPPING
- HUGEN 2040 - MOLECULAR BASIS OF HUMAN INHERITED DISEASE
- HUGEN 2060 - CHROMOSOMES - STRUCTURE AND FUNCTION
- HUGEN 2090 - MOLECULAR BASIS OF COMPLEX DISEASES
- HUGEN 2091 - GENETICS OF COMPLEX DISEASES
- HUGEN 3020 - DOCTORAL RESEARCH AND PROFESSIONAL SKILLS DEVELOPMENT (*two terms, must present at least once*)
- HUGEN 2021 - SPECIAL STUDIES
AND/OR
- HUGEN 3010 - RESEARCH AND DISSERTATION PH.D.
- PUBHLT 2011 - ESSENTIALS OF PUBLIC HEALTH
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS (*two terms*)
- PUBHLT 2030 - RESEARCH ETHICS AND THE RESPONSIBLE CONDUCT OF RESEARCH

HUGEN Elective Courses

Students must complete one of the following electives. In situations where a student's special interests or needs indicate an alternative course is more appropriate, it may be substituted for an elective course with the permission of the student's academic advisor.

- HUGEN 2080 - STATISTICAL GENETICS
- HUGEN 2071 - GENOMIC DATA PROCESSING AND STRUCTURE
- HUGEN 2072 - GENOMIC DATA PIPELINES AND TOOLS
- HUGEN 2073 - GENOMIC DATA VISUALIZATION AND INTEGRATION
- HUGEN 2051 - INBORN ERRORS OF DEVELOPMENT

Additional Elective Courses

In addition to the courses listed above, students are expected to select, in consultation with their academic advisor and research mentor, additional courses appropriate for their areas of concentration. In addition, a student's Dissertation Committee may require that a student register for elective courses within or outside the Department of Human Genetics to gain knowledge in an area relevant to the student's area of concentration. Furthermore, students who are not fluent in English are strongly recommended to take a University course in conversational English.

Total Credits: 72

Joint Degree

Genetic Counseling and Public Health Genetics Dual-Degree Program, MS/MPH

The University of Pittsburgh established the MPH in Public Health Genetics and MS in Genetic Counseling dual degree program in 2004, which was the first program of its kind to be offered to students pursuing a genetic counseling degree. The dual degree program enables students to build upon the clinical skills that they acquire through the Genetic Counseling Program to understand the importance of genetics, genomics, and genetic counseling in the field of public health.

Given the rapid expansion of available genetic and genomic testing, the current focus on precision medicine, and the increasing interest of national organizations, state public health offices, and hospitals in the application of genomics to public health, there is a growing need for professionals with skills in both disciplines. Graduates of the dual degree program are well-prepared to integrate public health genetics into clinical, research, public health, and industry settings. The dual degree program also benefits students by broadening their areas of expertise and career qualifications in other areas of public health including program development, evaluation, and policy.

There are a variety of options for completing the dual degree, which depend in part on the timing of the student entering the program. However, most students starting the degrees at the same time are able to complete the dual degree program in 22 months, which is one additional summer session beyond the typical completion time for the MS in Genetic Counseling degree program.

More information regarding the program can be found on the Pitt Public Health website, Department of Human Genetics, under the Dual MPH/MS Genetic Counseling program designation.

Dual-Degree Requirements

Students interested in both genetic counseling and public health genetics can pursue both degrees in a combined 62-credit program. All requirements for each individual program must be completed. All required courses for both degrees must be taken by dual degree students, with the exception of PUBHLT 2011 Essentials of Public Health and HUGEN 2062 Ethical Issues in Public Health Genetics and Research.

Given that some of the curriculum overlaps, the dual degree requires the completion of a minimum of 62 credits. In addition to completing all rotation and thesis requirements of the MS in Genetic Counseling degree, students enrolled in the dual degree will fulfill the MPH practicum and MPH essay requirements. Students using their clinical rotations for their practicum do not need to take HUGEN 2050 Practicum as these credits are represented in HUGEN 2036 Genetic Counseling Internship.

The required courses for the dual-degree program are outlined below. Schedules are discussed on an individual basis with Program Leadership in the MPH in Public Health Genetics and MS in Genetic Counseling Programs.

Required Human Genetics Courses

- HUGEN 2010 - BIOINFORMATIC RESOURCES FOR GENETICISTS
- HUGEN 2011 - SCIENTIFIC WRITING IN HUMAN GENETICS
- HUGEN 2020 - INTRODUCTION TO POPULATION GENETICS AND GENETIC EPIDEMIOLOGY
- HUGEN 2021 - SPECIAL STUDIES (2-4 credits)
Students can take up to 4 credits for their essay/thesis but only 2 credits are required
- HUGEN 2025 - HUMAN GENETICS SEMINAR (two terms)
- HUGEN 2032 - GENETIC TECHNIQUES
- HUGEN 2035 - PRINCIPLES OF GENETIC COUNSELING
- HUGEN 2036 - GENETIC COUNSELING INTERNSHIP (two terms - fall and spring of 2nd year)
Fulfills the MPH practicum requirement, students must complete and submit all materials required for the MPH practicum
- HUGEN 2037 - GENETIC COUNSELING PROFESSIONAL DEVELOPMENT AND RESEARCH SERIES
- HUGEN 2038 - INTERVENTION SKILLS FOR GENETIC COUNSELING
- HUGEN 2039 - GENETIC COUNSELING RISK ASSESSMENT AND APPLICATION
- HUGEN 2040 - MOLECULAR BASIS OF HUMAN INHERITED DISEASE
- HUGEN 2047 - CLINICAL GENETICS CASE CONFERENCE (two terms)
- HUGEN 2049 - INTRODUCTION PUBLIC HEALTH GENETICS
- HUGEN 2052 - ETHICAL ISSUES IN GENETIC COUNSELING
- HUGEN 2054 - APPLICATIONS IN PUBLIC HEALTH GENETICS AND GENOMICS

At Least 3 Credits from the Following Courses

- HUGEN 2090 - MOLECULAR BASIS OF COMPLEX DISEASES
- HUGEN 2091 - GENETICS OF COMPLEX DISEASES
- HUGEN 2060 - CHROMOSOMES - STRUCTURE AND FUNCTION
- HUGEN 2061 - CANCER GENETIC COUNSELING
- HUGEN 2029 - INTRODUCTION TO GENE MAPPING
- HUGEN 2056 - GENETIC CONDITIONS AND PUBLIC HEALTH PROGRAMS

Pitt Public Health Required Courses

- BCHS 2509 - SOCIAL AND BEHAVIORAL SCIENCES AND PUBLIC HEALTH
- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- EOH 2013 - ENVIRONMENTAL HEALTH AND DISEASE

- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- HPM 2001 - HEALTH POLICY AND MANAGEMENT IN PUBLIC HEALTH
- PUBHLT 2015 - PUBLIC HEALTH BIOLOGY
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS (*two terms*)
- PUBHLT 2033 - FOUNDATIONS IN PUBLIC HEALTH
- PUBHLT 2034 - PUBLIC HEALTH COMMUNICATIONS
- PUBHLT 2035 - APPLICATIONS IN PUBLIC HEALTH

Thesis and Essay Requirements

Students in the dual degree program will complete both the thesis requirement for the MS in Genetic Counseling degree and the Essay requirement for the MPH in Public Health Genetics degree. Depending on the thesis and essay topics, sometimes these documents can be combined into one document comprising the student's thesis project with additional background on public health genetics relevance and, at least one additional, extensive chapter focusing on an application of public health genetics. The student's thesis committee and the Program Director for the MPH in Public Health Genetics will work with the student to identify the additional components or topics that are needed to satisfy the MPH Essay requirement.

Elective Courses

Add electives as needed recommended by academic advisor to earn total credits required for the degree program.

Total Credits: 62

Master's

Genetic Counseling, MS

The Genetic Counseling Graduate Program at the University of Pittsburgh is committed to providing cutting-edge training in the complex science of genetics while fostering a strong foundation in counseling. This unique program is constantly evolving to ensure the continued success of graduates entering a dynamic workforce. Each year between 10 and 12 students are welcomed into the incoming class to be trained by world-renowned faculty. The Genetic Counseling Program is grounded in three important elements: scientific training in human genetics and genomics, comprehensive clinical experience, and understanding the psychological and social aspects of counseling, with an added focus on integrating up to the minute discoveries in genetics and genomics as well as valuable concepts from other academic disciplines.

The Genetic Counseling Program is fully accredited by the Accreditation Council for Genetic Counseling, Inc. (ACGC), 7918 Jones Branch Drive, Suite 300 McLean, VA 22102; Phone: 703-506-7667. Our comprehensive program helps students to achieve and often surpass the standards outlined by the ACGC.

Required Courses

- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- HUGEN 2010 - BIOINFORMATIC RESOURCES FOR GENETICISTS
- HUGEN 2011 - SCIENTIFIC WRITING IN HUMAN GENETICS
- HUGEN 2020 - INTRODUCTION TO POPULATION GENETICS AND GENETIC EPIDEMIOLOGY

- HUGEN 2021 - SPECIAL STUDIES (*3 Total Credits*)
- HUGEN 2025 - HUMAN GENETICS SEMINAR (*two terms*)
- HUGEN 2032 - GENETIC TECHNIQUES
- HUGEN 2035 - PRINCIPLES OF GENETIC COUNSELING
- HUGEN 2036 - GENETIC COUNSELING INTERNSHIP (*two terms - fall and spring of 2nd year*)
- HUGEN 2037 - GENETIC COUNSELING PROFESSIONAL DEVELOPMENT AND RESEARCH SERIES
- HUGEN 2038 - INTERVENTION SKILLS FOR GENETIC COUNSELING
- HUGEN 2039 - GENETIC COUNSELING RISK ASSESSMENT AND APPLICATION
- HUGEN 2040 - MOLECULAR BASIS OF HUMAN INHERITED DISEASE
- HUGEN 2047 - CLINICAL GENETICS CASE CONFERENCE (*two terms*)
- HUGEN 2052 - ETHICAL ISSUES IN GENETIC COUNSELING
- HUGEN 2060 - CHROMOSOMES - STRUCTURE AND FUNCTION
- HUGEN 2061 - CANCER GENETIC COUNSELING
- PUBHLT 2011 - ESSENTIALS OF PUBLIC HEALTH
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS (*two terms*)

Clinical Rotations

Genetic counseling students have the opportunity to participate in patient care at world-renowned medical facilities. They typically see 100 cases or more and are exposed to a variety of genetic referral types as well as diverse medical systems.

All students participate in rotations in Cancer genetics, Prenatal genetics, Pediatric genetics, Adult/Specialty genetics, Primary Care, Precision Medicine and a thesis focused block. In addition, students spend three weeks at an optional rotation site. This allows students the opportunity to select specific training experiences to develop a higher level of expertise based on their interests.

Total Credits: 45

Genome Bioinformatics, MS

The Master of Science in Genome Bioinformatics (MSGB) program prepares students for careers analyzing the human genome both in academia and in pharmaceutical and genomic testing industries. Graduates of the program meet the growing need for computational analysts with expertise in manipulating, annotating, and interpreting human genome data. In addition to coursework and hands-on training, students will participate in an internship experience in an industry, academic, or governmental setting to provide exposure to genome bioinformatics and hone analytic and communication skills in preparation for entering the job market.

Required Courses

- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- HUGEN 2010 - BIOINFORMATIC RESOURCES FOR GENETICISTS
- HUGEN 2020 - INTRODUCTION TO POPULATION GENETICS AND GENETIC EPIDEMIOLOGY
- HUGEN 2025 - HUMAN GENETICS SEMINAR (*two terms*)
- HUGEN 2040 - MOLECULAR BASIS OF HUMAN INHERITED DISEASE
- HUGEN 2071 - GENOMIC DATA PROCESSING AND STRUCTURE
- HUGEN 2072 - GENOMIC DATA PIPELINES AND TOOLS
- HUGEN 2073 - GENOMIC DATA VISUALIZATION AND INTEGRATION

- HUGEN 2075 - GENOME BIOINFORMATICS THESIS AND WRITING
- HUGEN 2076 - GENOME BIOINFORMATICS CAPSTONE
- HUGEN 2077 - GENOME BIOINFORMATICS PROFESSIONAL SKILLS
- HUGEN 2078 - GENOMIC DATA ADVANCED TOPICS IN BIOINFORMATICS
- PUBHLT 2011 - ESSENTIALS OF PUBLIC HEALTH
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS (*two terms*)
- PUBHLT 2030 - RESEARCH ETHICS AND THE RESPONSIBLE CONDUCT OF RESEARCH

HUGEN Elective Courses

5 or more credits

- HUGEN 2029 - INTRODUCTION TO GENE MAPPING
- HUGEN 2060 - CHROMOSOMES - STRUCTURE AND FUNCTION
- HUGEN 2090 - MOLECULAR BASIS OF COMPLEX DISEASES
- HUGEN 2091 - GENETICS OF COMPLEX DISEASES

Additional Elective Courses and Internship

In addition to the required courses listed above, MS in Genome Bioinformatics students are expected to select at least 6 additional credits of elective courses approved by the Program Director and must complete an internship in an industry, academic, or governmental setting after the first year.

Total Credits: 45

Human Genetics, MS

The Master of Science program in Human Genetics prepares students for careers as contributing members of genetics and genomics research teams in academia or industry. Graduates of the program often go on to PhD level study and become independent scientists. The flexible curriculum provides a broad background in the field while allowing customized emphasis on laboratory genetics or genetic data analysis. In addition to core coursework and advanced classes in a chosen area of interest, MS students pursue mentored research projects culminating in the production and defense of a thesis.

Required Courses

- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- HUGEN 2010 - BIOINFORMATIC RESOURCES FOR GENETICISTS
- HUGEN 2011 - SCIENTIFIC WRITING IN HUMAN GENETICS
- HUGEN 2020 - INTRODUCTION TO POPULATION GENETICS AND GENETIC EPIDEMIOLOGY
- HUGEN 2021 - SPECIAL STUDIES (*two credits*)
- HUGEN 2025 - HUMAN GENETICS SEMINAR (*two terms*)
- HUGEN 2028 - HUMAN GENETICS JOURNAL CLUB AND PEER REVIEW
- HUGEN 2040 - MOLECULAR BASIS OF HUMAN INHERITED DISEASE
- PUBHLT 2011 - ESSENTIALS OF PUBLIC HEALTH
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS (*two terms*)
- PUBHLT 2030 - RESEARCH ETHICS AND THE RESPONSIBLE CONDUCT OF RESEARCH

HUGEN Elective Courses

5 or more credits

- HUGEN 2029 - INTRODUCTION TO GENE MAPPING
- HUGEN 2060 - CHROMOSOMES - STRUCTURE AND FUNCTION
- HUGEN 2090 - MOLECULAR BASIS OF COMPLEX DISEASES
- HUGEN 2091 - GENETICS OF COMPLEX DISEASES

Additional Elective Courses

In addition to the required courses listed above, students must complete at least 11 credits through elective courses within or outside the Department of Human Genetics, HUGEN 2021 Special Studies research credits, or transfer credits from previous graduate level coursework. Elective courses and transfer credits counting toward the degree must be discussed and approved by the student's academic and research advisors. Students who are not fluent in English are strongly recommended to take a University course in conversational English.

Total Credits: 36

Public Health Genetics, MPH

The Master of Public Health in Public Health Genetics program integrates human genetics and the public health science disciplines of epidemiology, behavioral and community health sciences, biostatistics, environmental health, and health services research with ethics, social sciences, public affairs, and law to prepare students for a career in the evolving field of public health genetics. Public health genetics integrates genetics with multiple public health disciplines to address society's legal, ethical, financial, regulatory, and organizational responsibilities in offering genetic services and developing interventions to bring genetic services to the public.

A detailed program description can be found on the Pitt Public Health website, Department of Human Genetics, under the Master of Public Health (MPH) in Public Health Genetics designation.

The MPH in Public Health Genetics curriculum is designed to give students a strong knowledge base in Human Genetics with a broad understanding of the field of public health. Through the coursework, students are immersed in current topics in human genetics, public health, and the ethical, legal and social issues important to the field of public health genetics. The curriculum, 200-hour practicum experience, and public health essay focus on the development of skills that are desirable to employers after graduation. The entire requirements for the program are usually fulfilled in two years. An accelerated completion is available on a case-by-case basis, and the degree can also be completed part-time. can be completed in 1 1/2 years, although most students prefer to spread it out over two years.

Required Human Genetics Courses

- HUGEN 2010 - BIOINFORMATIC RESOURCES FOR GENETICISTS
- HUGEN 2011 - SCIENTIFIC WRITING IN HUMAN GENETICS
- HUGEN 2020 - INTRODUCTION TO POPULATION GENETICS AND GENETIC EPIDEMIOLOGY
- HUGEN 2021 - SPECIAL STUDIES (*1 credit*)
Students can take up to 3 credits for their essay/thesis projects, but only 1 credit is required
- HUGEN 2025 - HUMAN GENETICS SEMINAR (*two terms*)
- HUGEN 2040 - MOLECULAR BASIS OF HUMAN INHERITED DISEASE
- HUGEN 2049 - INTRODUCTION PUBLIC HEALTH GENETICS

- HUGEN 2050 - PUBLIC HEALTH GENETICS PRACTICUM (*1 credit*)
- HUGEN 2054 - APPLICATIONS IN PUBLIC HEALTH GENETICS AND GENOMICS
- HUGEN 2062 - ETHICAL ISSUES IN PUBLIC HEALTH GENETICS AND RESEARCH

At Least 3 Credits from the Following Courses

- HUGEN 2090 - MOLECULAR BASIS OF COMPLEX DISEASES
- HUGEN 2091 - GENETICS OF COMPLEX DISEASES
- HUGEN 2060 - CHROMOSOMES - STRUCTURE AND FUNCTION
- HUGEN 2061 - CANCER GENETIC COUNSELING
- HUGEN 2029 - INTRODUCTION TO GENE MAPPING
- HUGEN 2056 - GENETIC CONDITIONS AND PUBLIC HEALTH PROGRAMS

Pitt Public Health Required Courses

- BCHS 2509 - SOCIAL AND BEHAVIORAL SCIENCES AND PUBLIC HEALTH
- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- EOH 2013 - ENVIRONMENTAL HEALTH AND DISEASE
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- HPM 2001 - HEALTH POLICY AND MANAGEMENT IN PUBLIC HEALTH
- PUBHLT 2015 - PUBLIC HEALTH BIOLOGY
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS (*two terms*)
- PUBHLT 2033 - FOUNDATIONS IN PUBLIC HEALTH
- PUBHLT 2034 - PUBLIC HEALTH COMMUNICATIONS
- PUBHLT 2035 - APPLICATIONS IN PUBLIC HEALTH

Additional Elective Courses

Students fulfill the remaining credits with electives from the School of Public Health based on their interests and future career goals. Elective courses outside of the School of Public Health are permitted with Program Leadership approval.

Total Credits: 47

Department of Infectious Diseases and Microbiology

Our mission is to advance the understanding and control of infectious diseases through cutting-edge research, comprehensive training programs, and exceptional public health services. We strive to be a world-renowned center of excellence in infectious diseases research, training, and public health solutions.

The strategic priorities of our department lie in the study of emerging and vector-borne infectious diseases, One Health, climate change and global health, HIV and Tuberculosis, as well as pandemic prevention and preparedness. Degree programs in IDM integrate molecular biology, immunology, epidemiology, medicine, health education, and community intervention. Through these collaborative approaches, our students are provided with opportunities for engaging in cross-disciplinary research.

Program graduates pursue careers in academia, industry, government, NGOs and community service. You will find IDM graduates working with prestigious employers in the USA and worldwide. Examples include the National

Institutes of Health, the Centers for Disease Control and Prevention, state and local health departments, pharmaceutical companies, hospitals, and major universities and other academic institutions.

The Department offers Doctor of Philosophy (PhD), Master of Science (MS), and Master of Public Health (MPH) programs. MPH students can pursue one of two concentrations: Infectious Disease Pathogenesis, Eradication, and Laboratory Practice (PEL) or Infectious Disease Management, Intervention, and Community Practice (MIC).

Vice Chair for Education

Velpandi Ayyavoo

412-624-3070

velpandi@pitt.edu

For more information on admissions and registration contact the department at 412-624-3331 or idsm@pitt.edu.

Financial Assistance

Financial support through assistantships is available for full-time doctoral students. A limited number of partial scholarships are available to outstanding new MS and MPH students.

Doctoral

Infectious Diseases and Microbiology, PhD

The PhD program in the Department of Infectious Diseases and Microbiology prepares students for competitive research and teaching careers in academia, government agencies, and private industry. Our PhD students complete coursework that emphasizes the fundamentals of pathogen biology, immunology, cell biology, and molecular biology, which provides the necessary educational basis to conduct independent research mentored by our faculty.

PROGRAM REQUIREMENTS

- 72 credits total
- Preliminary exam
- Comprehensive exam
- Research project and Dissertation
- First author publication

PROGRAM LENGTH

- Students complete the PhD program on an average of 6 years

Required Courses

- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- EPIDEM 2161 - METHODS INFECTIOUS DISEASES EPIDEMIOLOGY
- IDM 2001 - MOLECULAR BIOLOGY OF MICROBIAL PATHOGENS
- IDM 2002 - MOLECULAR VIROLOGY
- IDM 2004 - VIRAL PATHOGENESIS

- IDM 2014 - FUNCTIONAL GENOMICS OF MICROBIAL PATHOGENS
- IDM 2021 - SPECIAL STUDIES IN MICROBIOLOGY (*six terms*)
- IDM 2023 - MICROBIOLOGY LABORATORY
- IDM 2025 - MICROBIOLOGY SEMINAR (*four terms*)
- IDM 2038 - PREVENTION, TREATMENT, AND CONTROL OF GLOBAL INFECTIOUS DISEASES
- IDM 2041 - RESEARCH ETHICS AND SCIENTIFIC COMMUNICATION
- IDM 3440 - VACCINES AND IMMUNITY
- PUBHLT 2011 - ESSENTIALS OF PUBLIC HEALTH
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS (*two terms*)

Elective Courses

Students add electives as recommended by academic advisors to earn total credits required for the degree program.

Total Credits: 72

Master's

Infectious Disease Management, Intervention, and Community Practice (MIC), MPH

The Infectious Disease Management, Intervention, and Community Practice (MIC) MPH program in the Department of Infectious Diseases and Microbiology (IDM) for the student focuses on the development of knowledge of infectious disease pathogenesis, prevention, clinical diagnosis, and treatment as well as skills and competencies aimed at equipping graduates with coursework and experiential learning on global infectious diseases, HIV and the related syndemics of STIs, TB, Hepatitis, and emerging infectious diseases. The program has specific focus on infection prevention in hospitals and other clinical settings, and in communities to respond to outbreaks in infectious diseases. The program connects these infectious diseases with the environmental, geographic, socio-economic, and behavioral drivers that impact infectious diseases transmission and provides approaches to develop, implement, or evaluate infection prevention in clinical and community settings, surveillance, containment, and policies for prevention and control. Students receive education and mentoring to develop evidenced-based approaches to infectious disease research, practice or policy development for infectious clinical conditions, outbreaks/clusters in institutional and community settings and the dissemination of findings and approaches to improve public health response, services, and coordination.

Program Length:

- Full-time students complete the program in 2 years or less
- Part-time students complete the program in 3-4 years on average

Program Requirements:

- 42 credits
- 200-hour practicum or infection prevention internship (minimum 200 hours)
- essay or thesis

Pitt Public Health Required Courses

- BCHS 2509 - SOCIAL AND BEHAVIORAL SCIENCES AND PUBLIC HEALTH

- BIOST 2011 - PRINCIPLES OF STATISTICAL REASONING
- EOH 2013 - ENVIRONMENTAL HEALTH AND DISEASE
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- HPM 2001 - HEALTH POLICY AND MANAGEMENT IN PUBLIC HEALTH
- PUBHLT 2015 - PUBLIC HEALTH BIOLOGY
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS (*two terms*)
- PUBHLT 2033 - FOUNDATIONS IN PUBLIC HEALTH
- PUBHLT 2034 - PUBLIC HEALTH COMMUNICATIONS
- PUBHLT 2035 - APPLICATIONS IN PUBLIC HEALTH

IDM-MIC MPH Required Courses

- IDM 2007 - PUBLIC HEALTH COMMUNICABLE DISEASE PRACTICUM (*3 credits*)
OR
- IDM 2068 - INFECTION PREVENTION AND CONTROL PRACTICUM/INTERNSHIP
- IDM 2021 - SPECIAL STUDIES IN MICROBIOLOGY (*2-3 credits*)
- IDM 2025 - MICROBIOLOGY SEMINAR (*two terms*)
- IDM 2034 - CONTROL AND PREVENTION OF HIV/AIDS
- IDM 2035 - ADVANCED VECTOR-BORNE INFECTIOUS DISEASES
- IDM 2038 - PREVENTION, TREATMENT, AND CONTROL OF GLOBAL INFECTIOUS DISEASES
- IDM 2069 - INFECTION PREVENTION AND CONTROL IN HEALTH CARE SETTINGS

Electives

Add electives as recommended by academic advisor to earn total credits required for degree program.

Total Credits: 42

Infectious Disease Pathogenesis, Eradication, and Laboratory Practice (PEL), MPH

The Infectious Disease Pathogenesis, Eradication, and Laboratory Practice (PEL) MPH program enables students a unique educational experience, which brings together pathogen biology, immunology, and epidemiology within the broader framework of public health. Students then have the opportunity to apply what they learn in a laboratory setting. Students graduate from the MPH PEL program with the expertise necessary for occupations in public health education, analysis, and research in the non-profit, government, or private sectors. The program also prepares students for further education in medical or graduate programs.

Program Length:

- Full-time students complete the program in 2 years or less
- Part-time students complete the program in 3-4 years on average

Program Requirements:

- 42 credits
- 200-hour practicum
- essay or thesis
- optional lab rotation

Pitt Public Health Required Courses

- BCHS 2509 - SOCIAL AND BEHAVIORAL SCIENCES AND PUBLIC HEALTH
- BIOST 2011 - PRINCIPLES OF STATISTICAL REASONING
OR
- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- EOH 2013 - ENVIRONMENTAL HEALTH AND DISEASE
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- HPM 2001 - HEALTH POLICY AND MANAGEMENT IN PUBLIC HEALTH
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS (*2 terms*)
- PUBHLT 2033 - FOUNDATIONS IN PUBLIC HEALTH
- PUBHLT 2034 - PUBLIC HEALTH COMMUNICATIONS
- PUBHLT 2035 - APPLICATIONS IN PUBLIC HEALTH

IDM-PEL MPH Required Courses

- IDM 2004 - VIRAL PATHOGENESIS
- IDM 2007 - PUBLIC HEALTH COMMUNICABLE DISEASE PRACTICUM (*3 credits*)
- IDM 2010 - PATHOGEN BIOLOGY
- IDM 2021 - SPECIAL STUDIES IN MICROBIOLOGY (*2-3 credits*)
- IDM 2025 - MICROBIOLOGY SEMINAR
- IDM 2161 - METHODS OF INFECTIOUS DISEASE EPIDEMIOLOGY

Electives

Add electives as recommended by academic advisor to earn total credits required for degree program.

Total Credits: 42

Infectious Diseases and Microbiology, MS

The Master of Science program within the Department of Infectious Diseases and Microbiology provides students with a unique basic science education within the School of Public Health. Graduates of our MS program develop skills and experience to become more competitive applicants for medical school and doctoral programs, as well as qualified researchers in academia, government and industry. This two year program emphasizes coursework in immunology, cell biology, and virology, and enables students to apply their coursework to their thesis research projects completed under a faculty advisor.

PROGRAM REQUIREMENTS

- 36 credits total
- Comprehensive exam
- Research project
- Written thesis & defense

PROGRAM LENGTH

- Full-time students complete the program in 2 years or less
- Part-time students complete the program in 3-4 years on average

Required Courses

- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- EPIDEM 2161 - METHODS INFECTIOUS DISEASES EPIDEMIOLOGY
- IDM 2021 - SPECIAL STUDIES IN MICROBIOLOGY (*every term*)
- IDM 2022 - SPECIAL TOPICS (*3 credits*)
- IDM 2023 - MICROBIOLOGY LABORATORY
- IDM 2025 - MICROBIOLOGY SEMINAR (*four terms*)
- IDM 2037 - ADVANCED VECTOR-BORNE INFECTIOUS DISEASES
- IDM 3440 - VACCINES AND IMMUNITY
- IDM 2041 - RESEARCH ETHICS AND SCIENTIFIC COMMUNICATION
- PUBHLT 2011 - ESSENTIALS OF PUBLIC HEALTH
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS (*two terms*)

Elective Courses

Students add electives as recommended by academic advisors to earn total credits required for the degree. Recommended electives can be found below.

- IDM 2001 - MOLECULAR BIOLOGY OF MICROBIAL PATHOGENS
- IDM 2002 - MOLECULAR VIROLOGY
- IDM 2004 - VIRAL PATHOGENESIS
- IDM 2014 - FUNCTIONAL GENOMICS OF MICROBIAL PATHOGENS

Total Credits: 36

School of Social Work

School of Social Work

The University of Pittsburgh's School of Social Work, successor to the Division of Social Work in the Department of Sociology of the University, was founded in September 1918, and accepted its first class of MSW students that year. The school shares with the University a commitment to the advancement and application of knowledge. Students in Pitt's School of Social Work learn the knowledge, skills, and values to engage in culturally competent practice with diverse populations and communities. They learn to critically analyze personal, familial, and environmental factors affecting practice settings and practice techniques, and to advocate for those who confront barriers to fulfilling their potential.

The school's students and faculty members also engage in scholarly activities that contribute to professional knowledge about complex social problems and innovative approaches to ameliorate those problems. In addition, school students, alumni, and personnel serve local, national, and international communities by developing and participating in collaborations with social agencies, community-based organizations, government, and foundations.

The mission of the School of Social Work is to advance knowledge and to apply that knowledge for the fulfillment of human potential through the prevention and amelioration of social problems. The school is committed to promoting the values of social and economic justice. Recognizing the complexities of contemporary society, the school dedicates itself through its educational, research, and public service activities to advocating for a society that respects the dignity and achievement of all individuals, families, and communities.

In furtherance of its mission, the School of Social Work strives to:

- Educate professional social workers with the knowledge, skills, and values needed to engage in culturally competent practice with diverse populations and communities; to critically analyze personal, familial, and environmental factors affecting practice settings and practice techniques; and to advocate for those who confront barriers to maximizing the achievement of their fullest potential.
- Engage in scholarly activities that contribute to professional knowledge about complex social problems and innovative approaches to ameliorate those problems.
- Provide service to local, national, and international communities through the development of and participation in collaborations with social agencies, community-based organizations, government, and foundations.

The school offers a full continuum of social work educational programs at the undergraduate, master's, and doctoral levels (as well as a continuing education program for practicing social workers). The school's bachelor's and master's programs in social work are accredited by the Council on Social Work Education, and graduates are eligible for full membership in the National Association of Social Workers.

Degree Options

The School of Social Work offers the Master of Social Work (MSW) and the Doctor of Philosophy (PhD) degrees. MSW students may combine their degree work with course work leading to a certificate. In addition, the School of Social Work has joint and cooperative degree options with other schools in the University as well as external institutions. The degree options include:

Master of Social Work

<http://www.socialwork.pitt.edu/academics/master-social-work-msw>

- Skill Concentrations (one is required)
- Direct Practice with Individuals, Families, and Groups
- Community, Organization, and Social Action (COSA)
- Direct Practice Certificate Programs
- Gerontology Certificate
- Home and School Visitor/School Social Worker Certificate
- Children Youth and Families Certificate
- Mental Health Certificate
- Integrated Healthcare Certificate
- Human Services Management Certificate

Doctor of Philosophy

<http://www.socialwork.pitt.edu/academics/doctorate-social-work-phd>

Joint and Cooperative Degrees

<http://www.socialwork.pitt.edu/academics/msw/dualjoint-cooperative-degrees>

- **MSW**
- Master of Social Work/Master of Divinity
- Master of Social Work/Master of Public Administration
- Master of Social Work/Master of Public and International Affairs
- Master of Social Work/Master of International Development
- Master of Social Work/Doctor of Philosophy (PhD) in Social Work
- Master of Social Work/Master of Public Health
- Master of Social Work/Juris Doctorate
- Master of Social Work/Certificate of Advanced Study in Teaching
- Master of Social Work/Master of Business Administration
- **PhD**
- Master of Social Work/Doctor of Philosophy (PhD) in Social Work
- Master of Public Health/Doctor of Philosophy (PhD) in Social Work

Specific details regarding course requirements are described in this bulletin and on the School of Social Work Web site and in the Student Handbook.

Admissions

Admission to the MSW and PhD programs is for fall term (September) only. Applicants seeking full-time or part-time admission should submit the application far in advance of their expected entry into the program; all application materials are due no later than May 31 for the MSW program and December 31 for the PhD program of the year in which entry is expected. Applications are reviewed only upon receipt of all required materials. Application forms are available from:

School of Social Work
Office of Admissions

2101 Cathedral of Learning
412-624-6302

E-mail: sswadmissions@pitt.edu
www.socialwork.pitt.edu/admissions/

Online applications are accepted via the MSW or PhD sections of our website located at <http://www.socialwork.pitt.edu>

For more specifics on admissions requirements for the MSW or the PhD, consult the description of the relevant degree program.

Admission of Students from Other Countries

The School of Social Work welcomes applications from students in other countries whose credentials meet the requirements and the standards of the School of Social Work and the Office of International Services of the University.

MSW and PhD applicants from other countries must apply directly to the School of Social Work. Applicants must submit the completed application form, additional required forms, and other required materials in English. Additional University of Pittsburgh application procedures for international students are described at <http://www.socialwork.pitt.edu/admissions-aid/international-students>. Other information and assistance for international students can be found online at www.ois.pitt.edu/intladmissions.html.

For MSW applicants only: International students who hold a baccalaureate degree in social work from a program that is not accredited by the Council on Social Work Education and who are interested in obtaining advanced standing credit must submit their transcript to the council for a determination of equivalency. Further Information can be found online at www.cswe.org.

Financial Assistance

Students interested in financial assistance to meet tuition and/or living costs should direct inquiries to both the Office of Admissions of the School of Social Work and the University's Office of Admissions and Financial Aid.

Students should be advised that limited resources often preclude any one funding source from granting awards that meet total financial needs. As a result, students are strongly encouraged to seek financial aid packages consisting of partial awards (including loans and scholarships) from a variety of sources, including the Office of Admissions and Financial Aid in Alumni Hall (412-624-PITT) and the School of Social Work Financial Aid Sources, Office of Admissions, Room 2104 Cathedral of Learning (412-624-6302; <http://www.socialwork.pitt.edu/admissions-aid/financial-aid>). *See also the University-wide information on Financial Aid.*

Applications for financial assistance are accepted only after an admissions decision has been made. Awards are made for a one-year period. New applications are required for each succeeding period.

Academic Standards

The School of Social Work's expectations for student and faculty conduct are described in school policies and embody the standards of professional social work. Students in the School of Social Work are required to adhere to the NASW Code of Ethics.

Academic Review Policy

The school maintains an academic review policy that applies to all degree students in the school and that seeks to ensure academic standards of achievement (i.e., satisfactory performance in the field, satisfactory grades for academic

course work, and reasonable rates of progress toward completion of degree requirements). The policy statement on academic review appears in the Student Handbook.

Academic Integrity Policy

The school also has an academic integrity policy that applies to all students and faculty members in the school and seeks to ensure that students and faculty members respect the ethical standards expected of them in the performance of their duties and responsibilities. The policy statement on academic integrity appears in the School of Social Work Student Handbook.

Statute of Limitations for School of Social Work Degrees and Leaves of Absence

MSW Program

There is a four-year limitation on the earning of the MSW degree. The four-year period is counted from the date of entry into the program for four full academic calendar years. Under extenuating circumstances (listed below), an advisor can recommend an extension of time to the MSW program director and the associate dean for academic affairs. If approved, the period of extension and the conditions for completing the program will be recorded in the student's folder, with a copy sent to the student. Extenuating circumstances include the following:

- extended illness of the student,
- extended personal emergency,
- involuntary mobilization into a U.S. military unit, and
- death of a close family member.

Under special conditions, MSW students may be granted one leave of absence. A maximum leave of one full academic year may be granted to master's students. A student wishing to take a leave of absence must submit in advance to the MSW program director a written request that indicates the length and rationale for the leave. The MSW program director and the associate dean for academic affairs will review the request. If approved, the time of the leave will not count against the total time allowed for the degree being sought by the student. Readmission following an approved leave of absence is a formality.

PhD Program

There is an eight-year statute of limitations for the completion of the PhD for students who enter with an MSW and who are not pursuing an MPH. There is a 10-year statute of limitations for students in the MSW/PhD program or the MPH/PhD program. Course work and the comprehensive examinations should be completed within three years and the dissertation within five. Under exceptional circumstances, a candidate for the PhD may apply for an extension of the statute of limitations. Requests for an extension of the statute of limitations must be submitted to the doctoral program director and must be approved by the doctoral committee and the dean. The request must be accompanied by a program assessment of the work required of the student to complete the degree and evidence of the extenuating circumstances leading to the requested extension. Students who request an extension of the statute of limitations must demonstrate proper preparation for the completion of all current degree requirements.

Under special conditions, doctoral students may be granted one leave of absence. A maximum leave of two academic calendar years may be granted to doctoral students. A student wishing to take a leave of absence must submit in advance to the doctoral program director a written request that indicates the length and rationale for the leave. The doctoral program director and the associate dean for academic affairs will review the request. If approved, the time of

the leave will not count against the total time allowed for the degree being sought by the student. Readmission following an approved leave of absence is a formality.

NASW Code of Ethics

Professional ethics are at the core of social work. The profession has an obligation to articulate its basic values, ethical principles, and ethical standards. The NASW Code of Ethics sets forth these values, principles, and standards to guide social workers' conduct. The Code is relevant to all social workers and social work students, regardless of their professional functions, the settings in which they work, or the populations they serve. The NASW code of ethics can be viewed online at www.naswdc.org/pubs/code/default.asp.

Advising

Students are assigned a faculty advisor at the beginning of the student's matriculation into the MSW or PhD program. Students in the MSW program are assigned an advisor from among the faculty and professional staff. The assignment is made by the MSW program director and remains in effect until changed after a request by an advisor or advisee, as indicated by field assignment or program change, or due to a change in the advisor's assignment.

Special Academic Opportunities

The school offers several academic resources and programs for its students, as detailed below:

Student Participation on School Committees

Students have opportunities to participate in the governance of the School of Social Work by serving on school committees. Information about the purposes and functions of the committees is distributed during the beginning of each fall term. Through the Office of the Associate Dean for Admissions and Student Affairs, students can volunteer to serve on committees and become full members of those committees.

Student Executive Council (SEC)

All degree students in the School of Social Work comprise the membership of the student organization that elects the Student Executive Council. The council concerns itself with student life and serves as a liaison with the administration and faculty.

The Student Executive Council relies heavily on student participation and it endeavors to be of service to the student body. Activities include the publication of a student newsletter, the development of discussion sessions around critical social issues, the provision of opportunities for social action, the participation in planning for orientation, and the planning of a variety of social events.

In addition, SEC members, representing the student body, are appointed to serve in the following organizations and/or committees: Black Action Society; Student Chapter, NASW; Student Chapter, NABSW; Alumni Association (Liaison); BASW Club; and Graduate and Professional Student Association (GPSA).

The Student Executive Council is working to strengthen its involvement in diversity initiatives to benefit the student body. More information regarding the activities and goals regarding diversity initiatives will be published as they are created.

The Student Executive Council supports the MSW student body and welcomes any feedback from all students. The SEC Office is located in Room 2201B CL. Please reach us at our e-mail address at pitt.sec@gmail.com.

SEC's website can be found at: <http://www.socialwork.pitt.edu/student-resources/student-executive-council>

Buhl Library

The Buhl Library of Social Work is a special collection of books, journals, and other resource materials specifically focused on social work. The Buhl Library is located on the first floor of Hillman Library and is staffed by a full-time social work librarian. Additionally, students at the School of Social Work have full access to the wide range of services provided by the University of Pittsburgh library system.

School of Social Work Faculty

Yodit Betru, *Director, MSW Program and Assistant Professor*, DSW, University of Pennsylvania

Jaime Booth, *Associate Professor*, PhD, Arizona State University

Laura Borish, *CWEB/CWEL Agency Coordinator and Field Assistant Professor*, MSW, University of Pittsburgh

Cynthia K. Bradley-King, *Clinical Assistant Professor and Academic Coordinator, Child Welfare Education For Baccalaureates Program*, PhD, Indiana University of Pennsylvania

Helen Cahalane, *Principal Investigator, Child Welfare Education and Research Programs, Clinical Associate Professor*, PhD, University of Pittsburgh

Keith Caldwell, *Associate Dean for Student Success and Assistant Professor*, EdD, University of Pittsburgh

Melvin Cherry, Jr., *Field Education Coordinator and Lecturer*, MSW, University of Pittsburgh

Valire Carr Copeland, *Professor, Associate Director of the Public Health Social Work Training Program, and faculty affiliate in the Center for Minority Health at the University of Pittsburgh's School of Public Health*, PhD, University of Pittsburgh

John Dalessandro, *Director of Field Education*, MSW, University of Pittsburgh

Larry Davis, *Donald M. Henderson Professor*, PhD, University of Michigan

Amy DeGurian, *Field Education Coordinator and Lecturer*, MSW, University of Pittsburgh

Aliya Durham, *Assistant Professor and Director of Community Engagement*, MSW, MPA, University of Pittsburgh

Shawn M. Eack, *James and Noel Browne Endowed Chair, Associate Dean for Research, and Professor of Social Work and Professor of Psychiatry*, PhD, University of Pittsburgh

Stephanie Eckstrom, *Program Coordinator, Pitt-Bradford MSW Program*, MSW, University of Maryland At Baltimore

Rafael J. Engel, *Associate Professor, Associate Dean of Academic Affairs*, PhD, University of Wisconsin

Elizabeth M.Z. Farmer, *Dean*, PhD, Duke University

Rachel Gartner, *Assistant Professor*, PhD, University of California-Berkeley

Sara Goodkind, *Associate Professor, School of Social Work, Department of Sociology, and Gender, Sexuality, and Women's Studies Program*, PhD, University of Michigan

Catherine Greeno, *Associate Professor and Doctoral Program Director*, PhD, Stanford University

James Huguley, *Interim Director, Center on Race and Social Problems and Assistant Professor*, EdD, Harvard University

Leah Jacobs, *Assistant Professor*, PhD, University of California-Berkeley

Aaron R. Mann, *Associate Professor*, PhD, University of Pittsburgh

Alicia Melnick, *Field Education Coordinator and Lecturer*, MSW, University of Pittsburgh

Deborah Moon, *Assistant Professor*, PhD, University of Kansas

Beth Mulvaney, *Clinical Assistant Professor*, University of North Carolina-Chapel Hill

Christina Newhill, *Professor*, PhD, University of California at Berkeley

Mary L. Ohmer, *COSA Chair and Associate Professor*, PhD, University of Pittsburgh

Marlo Perry, *Research Assistant Professor, Child Welfare Education and Research Programs*, PhD, University of Pennsylvania

Helen Petracchi, *Associate Professor; Director*, PhD, University of Wisconsin at Madison

Mary Elizabeth Rautkis, *Research Associate Professor*, PhD, University of Pittsburgh

Daniel Rosen, *Professor*, PhD, University of Michigan

Jeffrey Shook, *Associate Professor*, PhD, University of Michigan

Bobby Simmons, *Director of Career Services*, MSW, University of Pittsburgh

Fengyan Tang, *Professor*, PhD, Washington University in St. Louis

John Wallace, *David E. Epperson Chair and Professor, Center on Race and Social Problems Senior Fellow for Research and Community Engagement*, PhD, University of Michigan

Darren Whitfield, *Assistant Professor, School of Social Work and Department of Psychiatry and Direct Practice Chair*, PhD, University of Denver

Liz Winter, *Clinical Assistant Professor, Child Welfare Resource Center*, PhD, University of Pittsburgh

Misha Zorich, *MSW Program Director, UPJ*, MSW, University of Pittsburgh

Program and course Offerings

Master of Social Work Program

MSW Mission and Goals

The University of Pittsburgh's School of Social Work, successor to the Division of Social Work in the Department of Sociology of the University, was founded in September 1918, and accepted its first class of MSW students that year. The school shares with the University a commitment to the advancement and application of knowledge. Students in Pitt's School of Social Work learn the knowledge, skills, and values to engage in culturally competent practice with diverse populations and communities. They learn to critically analyze personal, familial, and environmental factors affecting practice settings and practice techniques, and to advocate for those who confront barriers to fulfilling their potential.

The school's students and faculty members also engage in scholarly activities that contribute to professional knowledge about complex social problems and innovative approaches to ameliorate those problems. In addition, school students, alumni, and personnel serve local, national, and international communities by developing and participating in collaborations with social agencies, community-based organizations, government, and foundations.

The mission of the School of Social Work is to advance knowledge and to apply that knowledge for the fulfillment of human potential through the prevention and amelioration of social problems. The school is committed to promoting the values of social and economic justice. Recognizing the complexities of contemporary society, the school dedicates itself through its educational, research, and public service activities to advocating for a society that respects the dignity and achievement of all individuals, families, and communities.

In furtherance of its mission, the School of Social Work strives to:

- Educate professional social workers with the knowledge, skills, and values needed to engage in culturally competent practice with diverse populations and communities; to critically analyze personal, familial, and environmental factors affecting practice settings and practice techniques; and to advocate for those who confront barriers to maximizing the achievement of their fullest potential.
- Engage in scholarly activities that contribute to professional knowledge about complex social problems and innovative approaches to ameliorate those problems.
- Provide service to local, national, and international communities through the development of and participation in collaborations with social agencies, community-based organizations, government, and foundations.

The school offers a full continuum of social work educational programs at the undergraduate, master's, and doctoral levels (as well as a continuing education program for practicing social workers). The school's bachelor's and master's programs in social work are accredited by the Council on Social Work Education, and graduates are eligible for full membership in the National Association of Social Workers.

MSW Admissions

<http://www.socialwork.pitt.edu>

The following section details admissions information particular to applicants to the MSW program.

Persons seeking admission to the MSW program must exhibit potential and professional capabilities essential to function effectively in a graduate school environment.

An applicant must meet the following requirements:

- A bachelor's degree from an accredited college or university.
- A minimum average of a B (3.0 GPA on a 4.0 scale) in all undergraduate work.

A student with a grade point average of less than 3.0 may be admitted provisionally to the program. Applicants with grade point averages of less than 3.0 may be required to interview with the school's admissions office.

- Successful completion of 3-credit coursework in statistics or quantitative analysis (If a student does not have a course in Statistics, this requirement must be completed before enrollment)
- A minimum of 60 undergraduate (or undergraduate plus graduate) divided into 30 credits in the liberal arts and 30 credits in the social sciences is recommended, not required.

Liberal Arts classes include:

- Humanities-English, fine arts, languages, literature, philosophy, religion, and communication.
- Fine Arts- Art, photography, dance, and theater
- Natural science-biology, chemistry, physics, mathematics, and statistics.

Social Sciences courses include:

- Psychology
- Sociology
- Anthropology
- Economics
- Political Science
- Social Work
- History
- Criminal Justice

(Human Biology no longer required effective November 2007)

Applicants applying for advanced standing must have earned a BSW degree from an accredited Council on Social Work Education (CSWE) baccalaureate program within seven years of their scheduled enrollment dates.

School of Social Work Policy #25:4: Consistent with the Council on Social Work Education's Educational Policies and Accreditation Standards, the School of Social Work's MSW Program does not grant course credit, transfer credit, or exemptions for prior life, volunteer, or employment experience

We do not require GRE Scores.

Bradford & Johnstown Campuses

The School of Social Work offers its MSW degree program at both the University of Pittsburgh's Bradford and Johnstown campuses. Admissions requirements at those two campuses are the same as at the Pittsburgh campus, except that the Bradford and Johnstown campuses offer the MSW degree in a part-time-only program format. In addition, the Bradford and Johnstown campuses will only admit students once every other year (in 2020, 2022, 2024, etc.).

Readmission

Formerly enrolled students who withdrew from Pitt's MSW program for more than one year and wish to be readmitted to the school must resubmit an MSW application. In addition, such students must submit a two-page, double spaced personal statement stating why they are requesting readmission and why they believe they will be successful this time around. Also, one new letter of recommendation (not from a reference previously submitted upon initial enrollment to the school) must be submitted.

Transfer Applications

Applicants who within the past seven academic years have completed graduate-level coursework may be granted transfer credit. For applicants requesting transfer credit from non-social work graduate degree programs, a maximum of 12 credits can be transferred. Applicants transferring from other Council on Social Work Education (CSWE) accredited schools can receive a maximum of 30 transfer credits.

School of Social Work Policy #25:4: Consistent with the Council on Social Work Education's Educational Policies and Accreditation Standards, the School of Social Work's MSW Program does not grant course credit, transfer credit, or exemptions for prior life, volunteer, or employment experience

Application and Admission Materials

Completed applications include the school online application form, transcripts, three letters of reference, a written statement, a resume, an agreement to participate in field education form and a \$40 application fee. Applicants may request an interview, but this is not required. The director of admissions and student affairs may also request an interview.

Applications and other admissions information are available from:

Office of Admissions
School of Social Work
412-624-6302

E-mail: sswadmissions@pitt.edu

Online applications are accepted at:

<http://www.socialwork.pitt.edu/admissions/msw/application-process>

Application materials may also be downloaded from the School of Social Work Web site or applications may be completed directly online. These materials are available at www.socialwork.pitt.edu/admissions/.

Each year, the school has a priority admissions deadline of January 10, 2020. All first time MSW applicants to the school who complete their application by the priority deadline, and have a minimum 4 year undergraduate GPA of 3.4 are guaranteed both acceptance and a scholarship assistance. The school's regular application deadline is May 31.

Selection of Skill Concentration

At the time of admission, students are required to designate a skill specialization. Students can choose to specialize in either:

- Direct Practice with Individuals, Families, and Small Groups (Direct Practice)
- Community, Organization, and Social Action (COSA)

The two skill specialization curricula build on foundation curriculum content and prepare students for autonomous social work practice at an advanced level. The specializations expose students to: specific practice roles; the uses and applications of research for practice; practice with and on behalf of the welfare of the poor and oppressed; practice with diverse populations; policy, organizational, and environmental influences on practice; and advanced practice theories, methods, and strategies.

Admissions Interview

Admissions interviews may be initiated by the admissions officer of the school in some special circumstance. Decisions on applications for admission are usually made without such an interview. All applicants are welcome to seek information-sharing interviews.

Financial Assistance for MSW Students

The University of Pittsburgh School of Social Work recognizes that financing graduate education is extremely important, especially because the cost of higher education continues to increase each year. Please note that it is the University's Financial Aid Office that administers the process of awarding loans to graduate students. The School of Social Work awards scholarships to its master's level students and scholarship and assistantships to its PhD students.

Financial aid is not awarded to any student until admission to the School has been granted. Early application for financial aid is strongly encouraged.

Each year, the school has a priority admissions deadline of January 10, 2020. All first time MSW applicants to the school who complete their application by the priority deadline, and have a minimum 4 year undergraduate GPA of 3.4 are guaranteed both acceptance and a scholarship assistance. The school's regular application deadline is May 31.

Students applying for financial aid must complete the Free Application for Federal Student Aid (FAFSA) form. Pitt's federal school code is **008815**. The FAFSA form is not available until January for those applying for the next academic year.

MSW Degree Requirements

The MSW curriculum is designed to provide students, who enter with a liberal arts perspective, a professional education that includes both breadth and depth of knowledge and skills development. The Generalist Curriculum addresses the acquisition of knowledge, skills, and values that comprise the generalist social work perspective.

Upon this common foundation rests the curricula for the two advanced Skill Specializations:

- Direct Practice with Individuals, Families, and Small Groups » (Direct Practice)
- Community, Organization, and Social Action » (COSA)

Employees of public child welfare agencies interested pursuing an MSW degree should visit the CWEL home page.

Those interested in working with older adults should visit the Aging Initiatives & Programs page.

The MSW degree requires completion of a minimum of 60 credits-42 class and 18 field practicum. Both the class and field requirements include foundation and skill concentration curricula. Please refer to the MSW Student Handbook (PDF) to obtain more detailed information on course of study plans for the various MSW curricula options.

Field education is an important component of the MSW educational experience. Students complete both a foundation and a concentration-specific placement as part of their MSW studies.

The School of Social Work offers seven joint degree options for master's level students. Learn more about these dual, joint and cooperative degree program options.

MSW Academic Standards: Probation

A student in the MSW program will be placed on academic probation if:

- after completing at least nine (9) quality point credits, the student's cumulative GPA falls below 3.00;
- the student receives a grade lower than a B- in a required course (including the five foundation courses, the required concentration skill courses, the second-level human behavior, policy, and research courses, and any specific courses needed to fulfill specialization or certificate requirements), or
- the student receives an NC grade for field placement (SWGGEN 2099, SWINT 2099, or SWCOSA 2099).

The MSW program director will send a letter to the student and the student's advisor notifying them of the student's placement on academic probation. The letter will advise the student and the student's advisor of the date and location of an academic review meeting, to be convened by the MSW program director, to discuss the terms of the student's academic probation. A copy of this letter will be placed in the student's folder. Depending on the outcome of the meeting, a student placed on academic probation may be required to modify the student's course of study in the MSW program, including changing the academic courses for which the student is registered and/or delaying entry into or suspending field placement.

Part-Time MSW Students

Students pursuing a part-time course of study must complete the MSW degree in four academic years.

The school offers part-time study for persons seeking to earn the master's degree whose economic, occupational, or familial situation precludes their current enrollment on a full-time basis. Preference for admission to part-time study will be given to persons currently employed in social service positions or to persons whose social service careers were interrupted by family responsibilities. Others interested in social work as a career are, of course, welcome to apply and will be given full consideration.

To the extent feasible, courses will be offered during evenings. However, part-time students must be prepared to take some courses during the day. Part-time students will have to make accommodations and be flexible in scheduling field instruction since field placement sites that offer evening or weekend instruction are very limited.

Part-time students will need to enroll in at least two courses a term during two of the three terms each academic year in order to qualify for the MSW degree. The following options are acceptable:

Two courses (three credits per course)

OR

One course (three credits) plus a minimum of three field credits

OR

A minimum of six field credits (equivalent to two courses)

Part-time students must complete all of the MSW degree requirements in four years.

Advanced Standing and Exemptions for MSW Course Work

Students entering the MSW program may be granted advanced standing, receive transfer credit, or be exempt from specific course requirements if their coursework was completed within the past 7 years. The definition for each is:

Advanced Standing is defined as the awarding of academic credit toward a degree by the School of Social Work for prior baccalaureate course or field work completed at an undergraduate social work program accredited by the Council on Social Work Education when such work is evaluated as entirely comparable. Those granted advanced standing during the admission process can receive up to 12 academic credits and six field education credits. In addition, they can also receive an exemption from Foundations of Social Work Practice with Diverse Populations (SWGEM 2034). Full-time students who have advanced standing graduate in December of their second year. Students who have advanced standing are allowed to pursue their MSW degree on a part-time basis, but must complete all of the requirements for the MSW degree in four years.

Transfer Credit is defined as the awarding of academic credit toward a degree by the School of Social Work for post-baccalaureate course or field work completed at an accredited academic institution when such work is evaluated as entirely comparable.

Exemption is defined as the waiving of a required academic course by the School of Social Work following an evaluation of the student's previous course work that is determined to be essentially identical to the required course being waived. Such an exemption does not, however, reduce the number of credits required for graduation.

Specific details and limitations regarding this policy and related procedures are described in the Student Handbook and on the School of Social Work Web site, <http://www.socialwork.pitt.edu/academics/policies-handbooks>.

Consistent with the Council on Social Work Education's (CSWE's) Educational Policies and Accreditation Standards, the School of Social Work's MSW program does not grant advanced standing, transfer credit, or exemption for prior life, volunteer, or employment experience.

Generalist Curriculum

The generalist curriculum is designed to provide all incoming master's students with the basic values, knowledge, and skills needed to gain competence in applying the generalist social work perspective to practice. An understanding of the profession's values orientation, history and philosophy, and frames of reference for practice establishes a basis for students to progress through the MSW Program's advanced concentration curricula. All MSW students must complete the MSW Generalist requirements listed below unless they are exempted via advanced standing credit or testing.

Required Generalist Courses

SWRES 2021 Generalist Social Work Research 3 crs.

SWGEM 2034 Social Work Practice with Diverse Populations 3 crs.

SWBEH 2063 Human Behavior and the Social Environment 3 crs.

SWWEL 2081 Social Welfare 3 crs.

SWGEM 2098 Generalist Social Work Practice 3 crs.

SWGEM 2099 Generalist Field Education 6 crs.

Certificate

Children, Youth and Families Certificate

The Children Youth and Families Certificate is designed to prepare graduates of the MSW program to provide services to at-risk children and families through a wide range of public and private agencies. Through specialized coursework and internship opportunities, students are prepared for professional practice in settings such as family service agencies, child protection, the courts, early intervention, community-based treatment, and other child and family-focused programs. The Children, Youth and Families Certificate is awarded by the School of Social Work, and provides students with the opportunity to enhance professional competency in providing services to young persons and their families.

COSA Community Organizing and Practice Certificate

The MSW Program at the School of Social Work is accredited to offer two advanced specializations: Direct Practice with Individuals, Families, and Small Groups (DP) and Community, Organization, and Social Action (COSA). All students in the MSW must select a single specialization when they matriculate. The proposed COSA Community Organizing and Practice Certificate will be part of the COSA specialization.

COSA specialization students pursuing this proposed certificate will complete twelve course credits and twelve field credits in the areas of community organizing; community planning; community development; and community social change. For the course work, students must complete the following four courses: (1) SWCOSA 2084: Human Services Organization Management (3 crs.); (2) SWCOSA 2088: Community Organizing and Planning (3 crs.); (3) SWCOSA 2090: Working with Group/Intergroup Relations: Facilitation, Negotiation and Mediation (3 crs.); and (4) SWCOSA 2096: Community Planning and Development (3 crs.). Students must also complete a COSA specialization field placement (12 credits - 720 clock hours) in a community organizing and practice setting to apply the knowledge, values, and skills they are learning through their coursework. This proposed certificate builds on the School's existing field placement opportunities around community organizing and practice.

Required Core Courses

- SWCOSA 2084 - HUMAN SERVICE ORGANIZATION MANAGEMENT
- SWCOSA 2088 - COMMUNITY ORGANIZING AND PLANNING

COSA Skill Electives

- SWCOSA 2090 - WORKING WITH GROUP AND INTERGROUP RELATIONS: FACILITATION/NEGOTIATION/MEDIATION
- SWCOSA 2096 - COMMUNITY PLANNING AND DEVELOPMENT

COSA Specialization Field Placement

- SWINT 2099 - FIELD WORK

Total Credits: 24

COSA Gerontology Certificate

The MSW Program at the School of Social Work is accredited to offer two advanced specializations: Direct Practice with Individuals, Families, and Small Groups (DP) and Community, Organization, and Social Action (COSA). All students in the MSW must select a single specialization when they matriculate. The proposed COSA Community Organizing and Practice Certificate will be part of the COSA specialization.

The proposed COSA Gerontology Certificate is designed to prepare students for professional practice in communities and organizations addressing the needs of older adults. Knowing how to work with older adults as a social work professional offers many opportunities in an era when that segment of the population continues to increase steeply.

Through specialized courses and a dedicated field placement experience, the proposed COSA Gerontology Certificate students will be exposed to the various roles and settings that constitute contemporary social work practice in aging.

Required Courses

- SWBEH 2077 - HUMN BHVR: ADLT DVLP AGING
- SWWEL 2039 - SOCIAL POLICY AND GERONTOLOGY

Elective Courses

At least one SWCOSA elective (3 credits) where student completes a gerontology project or assignment and presents this to their academic advisor and the Gerontology Certificate Chair. Possible courses are:

- SWCOSA 2040 - GRANT PROPOSAL WRITING
- SWCOSA 2090 - WORKING WITH GROUP AND INTERGROUP RELATIONS: FACILITATION/NEGOTIATION/MEDIATION
- SWCOSA 2096 - COMMUNITY PLANNING AND DEVELOPMENT

A 2nd above SWCOSA elective or 3 credits of other graduate level gerontology coursework from the wider university.

Specialized Field Placement

- SWCOSA 2099 - FIELD WORK

Total Credits: 24

COSA Human Services Management Certificate

The MSW Program at the School of Social Work is accredited to offer two advanced specializations: Direct Practice with Individuals, Families, and Small Groups (DP) and Community, Organization, and Social Action (COSA). All students in the MSW must select a single specialization when they matriculate. The proposed COSA Community Organizing and Practice Certificate will be part of the COSA specialization.

Students pursuing the proposed Human Services Management Certificate will complete twelve course credits and twelve field credits covering the Community, Organization, and Social Action (COSA) MSW competencies in areas of executive leadership; resource management; strategic management and community collaboration. Students will enroll in and successfully complete the following COSA core and skill electives courses: (1) SWCOSA 2084 Human Service Organization Management (3 crs.); (2) SWCOSA 2088 Community Organizing & Planning (3 crs.); (3) SWCOSA 2086: Human Resources, Supervision and Financial Management (3 crs.); and (4) SWCOSA 2040: Grant and Proposal Writing (3 crs.). Students will also complete their second (specialized COSA) field placement (12 credits - minimum 720 clock hours) in a community-based or human services organization where they will have the opportunity to apply and build on organizational management theories and skills they are learning in their courses.

Required Courses

- SWCOSA 2084 - HUMAN SERVICE ORGANIZATION MANAGEMENT
- SWCOSA 2088 - COMMUNITY ORGANIZING AND PLANNING

COSA Electives

- SWCOSA 2086 - HUMAN RESOURCE/SUPERVISION AND FINANCIAL MANAGEMENT
- SWCOSA 2040 - GRANT PROPOSAL WRITING

COSA Specialization Field Placement

- SWCOSA 2099 - FIELD WORK

Total Credits: 24

DP-Children, Youth, & Families Certificate

The MSW Program at the School of Social Work is accredited to offer two advanced specializations: Direct Practice with Individuals, Families, and Small Groups (DP) and Community, Organization, and Social Action (COSA). All students in the MSW must select a single specialization when they matriculate. The proposed COSA Community Organizing and Practice Certificate will be part of the COSA specialization.

The proposed Children, Youth, and Families certificate is designed to prepare students to provide services to diverse child, adolescent, young adult, and family populations through a wide range of public and private agency settings. Students in this certificate will deepen their knowledge and skills in social work practice with at-risk children and families through coursework and field placement experiences in settings which serve vulnerable children and their

families. Students wishing to obtain the proposed CYF certificate must complete Children and Families at Risk (SWBEH 2062) as their second-level human behavior course and Child and Family Policy (SWWEL 2059) as their second-level policy course. They will also be required to complete two children, youth, or family-focused courses as direct practice skill electives as well as complete their 12 credit specialized field placement in a setting/program serving children, youth, parents, families, and groups.

Required Courses

- SWWEL 2059 - CHILD AND FAMILY POLICY
- SWBEH 2062 - HUMN BHVR: CHLD FMLY AT RISK

Direct Practice Skill Electives - Choose two courses from the following list:

- SWINT 2011 - SOCIAL WORK PRACT WITH FAMILIES
- SWINT 2035 - INTIMATE PARTNER VIOLENCE
- SWINT 2042 - SOCIAL WORK WITH SUBSTANCE USE AND OTHER ADDICTIVE DISORDERS
- SWINT 2049 - DIRECT PRACTICE WITH CHILDREN
- SWINT 2063 - ISSUES IN CHILD MALTREATMENT
- SWINT 2072 - SOCIAL WORK PRACTICE AND TRAUMATIC STRESS
- SWINT 2096 - CLIN SOCL WRK AFRCN AMERCN FMLY

Specialized Field Placement

- SWINT 2099 - FIELD WORK

Total Credits: 24

DP-Gerontology Certificate

The Certificate Program in Aging has been in place since 1980 and continues to attract numerous MSW students. The goals of the DP Gerontology Certificate program are to enhance students' understanding of the aging process and to provide them with the skills relevant to practice with and/or on behalf of the elderly and their family members. Knowing how to work with the elderly as a social work professional offers many opportunities in an era when that segment of the population continues to increase steeply.

Through courses and the field placement experience, DP Gerontology Certificate students are exposed to the various roles and settings that constitute contemporary social work practice in aging. Emphasis is given to understanding client and family strengths; diversity among the aged population; the social, cultural, community, and policy contexts of aging; and how these factors inform, and may be influenced by, social work practice. DP Gerontology Certificate students are encouraged to apply to the Hartford Program Partnership in Aging Education Fellowship.

DP-Home and School Visitor/ School Social Worker Certificate

The MSW Program at the School of Social Work is accredited to offer two advanced specializations: Direct Practice with Individuals, Families, and Small Groups (DP) and Community, Organization, and Social Action (COSA). All students in the MSW must select a single specialization when they matriculate. The proposed COSA Community Organizing and Practice Certificate will be part of the COSA specialization.

The proposed Home and School Visitor/ School Social Work Certificate is designed to enhance professional competency in the development and delivery of high-quality social work services to diverse student populations in both public and private elementary and secondary schools. Through coursework and direct practice specialized field placements, students will gain advanced knowledge and skills in social work practice with individuals, families, and small groups in educational settings. Students in the proposed certificate will complete HBSE-Children and Families at Risk (SWBEH 2062) as their second-level human behavior course and Child and Family Policy (SWWEL 2059) as their second-level policy course. They will also complete the existing (SWINT 2058) Social Work in a School Setting as one of their direct practice skill electives. The HSV/SSW certificate is a part of the Direct Practice (DP) specialization and consistent with that, students must complete their 12 credits of specialized field placement in a school-based setting serving individuals, families, and groups.

Additionally students who elect the HSV/SSW certificate will complete the following four courses from the School of Education: (TLL 2500) Foundations of Special Education, (TLL 2257) Instructing English Language Learners, (TLL 2101) PA School Law, and (TLL 2501) Students with Disabilities in the Classroom or (TLL 2502) Students with Disabilities in the Secondary Classroom.

Required Core Courses

- SWWEL 2059 - CHILD AND FAMILY POLICY
- SWBEH 2062 - HUMN BHVR: CHLD FMLY AT RISK

Direct Practice Skill Elective

- SWINT 2058 - SOCIAL WORK EDUCATIONAL SETTINGS

Specialized Field Placement

- SWINT 2099 - FIELD WORK

Required School of Education Courses

- TLL 2101 - PENNSYLVANIA SCHOOL LAW
- TLL 2257 - TEACHING ENGLISH LANGUAGE LEARNERS
- TLL 2500 - FOUNDATIONS OF SPECIAL EDUC
- TLL 2501 - STUDENT W/DISAB IN ELEM CLSSRM
- TLL 2502 - STUDNT W/DISAB IN SECNDRY CLSSRM

Total Credits: 33

DP-Integrated Health Care Certificate

The DP Integrated Health Care Certificate Program prepares graduate social work students specializing in direct practice with the knowledge and skills necessary to work with individuals, families, groups, and communities in a variety of institutional and community-based health-related settings. With a focus on leadership and advocacy, the goal of the certificate program is to increase the number of students focused on health and social work. Master's level social work training (MSW), along with a Certificate in DP Integrated Health Care, provides the knowledge and skills to work in a variety of integrated healthcare settings. Students completing the DP Integrated Health Care Certificate Program will have a deeper understanding of the relationship between behavioral health (.e., mental health, substance use) and

physical health. New opportunities abound in health care for social workers trained in an interdisciplinary approach who are prepared to bridge the gap between health care providers and patient needs within a coordinated system of care.

Students interested in integrated health care may also apply for the Edith Baker Behavioral Health Care Fellowship, a competitive program that will provide successful applicants with stipends of \$10,000 during their concentration field placement

For more information regarding this fellowship, please e-mail BHWET@pitt.edu.

DP-Mental Health Certificate

The Mental Health Certificate is designed to prepare students for professional practice with individuals, families, and/or small groups with mental/behavioral health challenges. Mental health practice can be found in a wide range of social and human services agencies. Through courses and field placement experiences, students are exposed to a wide range of mental health conditions and disorders and contemporary modalities to address these conditions and disorders. Students in this proposed certificate will complete Human Behavior: Mental Health (SWBEH 2065) as their second-level human behavior course and Mental Health and Public Policy (SWWEL 2057) as their second-level policy course. They will also be required to complete two mental health focused courses as direct practice skill electives as well as complete their 12 credit specialized field placement in a mental health setting.

Required Core Courses

- SWBEH 2065 - HUMAN BEHAVIOR: MENTAL HEALTH
- SWWEL 2057 - MENTAL HEALTH AND PUBLIC POLICY

Direct Practice Skill Electives - Choose two courses from the following list:

- SWINT 2007 - INTRO PSYCHMCLGY SOCL WRK PRACT
- SWINT 2011 - SOCIAL WORK PRACT WITH FAMILIES
- SWINT 2018 - CLINICAL SKILLS IN SOCIAL WORK PRACTICE FOR MENTAL HEALTH RECOVERY
- SWINT 2042 - SOCIAL WORK WITH SUBSTANCE USE AND OTHER ADDICTIVE DISORDERS
- SWINT 2046 - PLANNED SHORT-TERM TREATMENT
- SWINT 2049 - DIRECT PRACTICE WITH CHILDREN
- SWINT 2053 - GROUP INTERVENTIONS WITH HIGH-RISK POPULATIONS
- SWINT 2072 - SOCIAL WORK PRACTICE AND TRAUMATIC STRESS
- SWINT 2031 - ADV DRCT PRAC: COGNITV/BEHVRL
- SWINT 2032 - ADV DRCT PRAC: SOCIAL SYSTEMS
- SWINT 2033 - ADV DRCT PRAC: PSYCHODYNAMIC

Specialized Field Placement

- SWINT 2099 - FIELD WORK

Total Credits: 24

Home and School Visitor Certificate

Since the 1930s, the School of Social Work has offered a Home and School Visitor/School Social Worker certificate. The program was started by pioneering social work practitioner and educator Marion Hathway. The H&SV/SSW is an interprofessional Educational Specialist certificate program, operated jointly with the University of Pittsburgh School of Education and the Pennsylvania Department of Education, and is intended for students who plan to deliver social work services in elementary or secondary schools. There are three models for certification:

- Certification earned while earning the MSW
- Certification earned post-MSW
- Certification earned without an MSW

The H&SV/SSW certificate program is designed to enhance professional competency in the development and delivery of high quality social work services to diverse student populations in both public and private elementary and secondary schools. The certificate program is organized around the Direct Practice concentration and offers students the opportunity to gain advanced knowledge and skills via courses taken in the Schools of Social Work and Education and a field placement in an educational setting.

For further information, please contact Deborah Robinson, MSW, LSW, Director, dcrl6@pitt.edu.

Home and School Visitor/School Social Worker Certificate

The Home and School Visitor/School Social Worker (H&SV/SSW) certificate, a joint effort with the University of Pittsburgh School of Education that is accredited by the Pennsylvania Department of Education, prepares students for professional practice in both public and private educational settings throughout Pennsylvania. The H&SV/SSW certificate program is designed to enhance professional competency in the development and delivery of high-quality social work services to diverse student populations in elementary and secondary schools.

Human Services Management Certificate

Many MSW's often find themselves moving up quickly into supervisor, management, and even executive positions. The generalist perspective and systems knowledge from their social work education provides a strong basis for leadership growth in a range of social work settings. However, to better prepare macro practice/COSA students to take advantage of leadership opportunities and enhance their personal and professional development, the School now offers the Human Services Management Certificate in collaboration with the Network of Social Work Management under a new University partnership initiative.

This national Human Services Management Certificate can be completed by COSA students in the course of their MSW studies. Students pursuing this certification option must complete twelve credits through the following COSA core and skill electives course work covering Network of Social Work Management (NSWM) competency and practice behaviors in the areas of:

- Social Administration/Human Services Management
- Community Organizing (Community Collaboration)
- Human Resources & Financial Management with Supervision
- Grants, Proposals, and Funding Development

COSA students are encouraged to take other skill electives in COSA, as well as skills courses in other schools. For more information on the NSWM competencies: <https://socialworkmanager.org/competencies>

In addition, COSA student in Social Administration/Human Service Management must also complete a COSA concentration field placement (12 credits) in a community-based or human services organization to apply their course knowledge, values, and skills in the organizational setting.

For more information on the Human Services Management Certificate, please contact the Community Organization, and Social Action Concentration Chair, Tracy M. Soska, at 412-624-3711 or tsssw@pitt.edu.

Mental Health Certificate

The Certificate in Mental Health is designed to prepare MSW graduates for professional practice with individuals, families, and/or groups with mental and/or behavioral health challenges through a wide range of social and human service agencies. Students in the MSW Program take a series of required and elective courses leading to the Certificate in Mental Health within the normal MSW requirements and need not exceed the length of the degree program. Direct practice social workers in mental health services have a wide array of career opportunities across a range of public and private settings, including psychiatric inpatient services, outpatient psychotherapy services, child and family services, partial hospitalization and case management services, drug and alcohol services, and private practice.

Joint Degree

Social Work, MSW/MBA

The MBA/Master of Social Work joint degree program is designed to provide students with a unique combination of social work knowledge and skills, with exceptional strength in management decision-making and leadership. The degree is offered jointly through the University of Pittsburgh School of Social Work and the Joseph M. Katz Graduate School of Business.

Faced with an increasingly competitive market, nonprofit organizations are beginning to emulate management methods and paradigms being practiced by for-profit companies, such as financial operations, human resource and data management, market and economic analysis, and evidence-based strategic planning. As philanthropic organizations become more concerned about their accountability and utility of financial supports provided to various human service organizations, they are beginning to evaluate nonprofits beyond program outcomes or average cost per client to more advanced assessments, such as cost-efficiency and effectiveness and cost-benefit ratio. Unfortunately, such analytic methodologies are rarely offered to social work students by the traditional social work curriculum.

Initially, the proposed MSW/MBA dual-degree program will be open to the SSW's Community Organization and Social Action (COSA) students. Upon successful execution of this initiative, the school plans to open the program to all MSW full-time students (COSA and Direct Practice students).

Students who want to earn a dual-degree must gain acceptance into both graduate degree programs by applying separately to each school. The joint-degree program applicants will also be required to submit their Graduate Management Admission Test (GMAT) or Graduate Records Exam (GRE) examination scores to both schools. MSW/MBA Joint Degree Admissions Criteria

● **SSW Requirement**

- A Baccalaureate degree that must be completed prior to the program start date. Applications must include transcripts of coursework completed at the time of submission of the application. Admission will be contingent upon submission of an official, final transcript of the completed Bachelors program before the start of the MSW program.
- Undergraduate students with social work and human service backgrounds are preferred.
- In general, we would expect an undergraduate GPA of 3.0 or better for admission.
- International students must submit originals or certified copies of transcripts/mark sheets and degree/diploma certificate in the original language plus a certified English translation (if the original is not in English).
- Paid work experience is preferred but not required.
- GMAT/GRE scores are not required for regular MSW students applicants but for the joint degree applicants in MSW and MBA must have their official Graduate Management Admission Test (GMAT) or Graduate Record Examination (GRE) score reports forwarded directly to the University of Pittsburgh, Katz Graduate School of Business (KGSB), by the admission deadline.
- Applicants will submit a 3-5 page double spaced typed personal statement describing their post-graduate career goals, skills in which they excel, and key accomplishments.
- Applicants will submit three recommendations from persons who have known the applicant in academic or professional capacities. At least one from a faculty member is preferred. (Recommendations from friends and family will not be accepted.)
- Applicants will submit their current resume.
- English Proficiency Exams (for international applicants who are citizens of countries where the official language is not English)- the Test of English as a Foreign Language (TOEFL) with minimum acceptable score: Internet-based test: 100; paper-based test: 600.
- Non-refundable application fee is \$40.
- Prospective candidates, domestic or international, may be interviewed before admission, in person or by telephone.
- Submission of online MSW application form by the admissions deadline data of **May 31**.

● **Katz GSB Requirement**

- A Baccalaureate degree that must be completed prior to the program start date. Applications must include transcripts of coursework completed at the time of submission of the application. Admission will be contingent upon submission of an official, final transcript of the completed Bachelors program before the start of the MBA program.

- Undergraduate students with strong analytical backgrounds are preferred.
- In general, we would expect an undergraduate GPA of 3.0 or better for admission.
- International students must submit originals or certified copies of transcripts/mark sheets and degree/diploma certificate in the original language plus a certified English translation (if the original is not in English).
- Work experience is not necessary, though highly desirable.
- GMAT/GRE scores: Applicants must have their official Graduate Management Admission Test (GMAT) or Graduate Record Examination (GRE) score reports forwarded directly to the University of Pittsburgh, Katz Graduate School of Business, by the admission deadline. In general, we would expect a GMAT score of 600 or higher for admission. (Corresponding GRE scores will be equivalent to these levels, after conversion.)
- Applicants will submit a 250 word essay describing their post-graduate career goals, skills in which they excel, and key accomplishments.
- Applicants will submit two recommendations from persons who have known the applicant in academic or professional capacities. At least one from a faculty member is preferred. (Recommendations from friends and family will not be accepted.)
- Applicants will submit their current resume.
- English Proficiency Exams (for international applicants who are citizens of countries where the official language is not English): Either the Test of English as a Foreign Language (TOEFL) or the International English Language Testing Systems (IELTS) is required.
- TOEFL Minimum acceptable score: Internet-based test: 100; paper-based test: 600.
- IELTS Minimum acceptable score: 7.0
- \$50 non-refundable application fee.
- Prospective candidates, domestic or international, may be interviewed before admission, in person or by Skype.

Learning outcome goals

The MSW/MBA dual-degree program is designed to provide students with a unique combination of social work knowledge and skills, with exceptional strength in management decision-making and leadership. In addition to the MSW learning outcomes that are already in place, supplementary MSW/MBA objectives include:

- Proficiency in the management functions of accounting, finance, computer information systems, marketing, operations management, organizational behavior, human resource management, and social enterprise.
- Special emphasis on development of skills and abilities to lead strategically and to position an organization effectively for continued growth and development in both for-profit and nonprofit sectors.
- Knowledge and understanding of complex organizations, their development and transformation, administrative principles, the decision-making process, and competence in managerial functions.
- To provide applied learning experiences, the required field practicum will include professional supervision through appropriate concentration settings that will focus on community and human service organization management.

Program requirements

- A graduate-level course grade of B or higher must be maintained throughout the joint-degree program.
 - The MBA program requires a minimum 45 credits for the part-time or one-year program, of which at least 33* credits must be from KGSB courses, while the balance maximum of 17 credits may be from other graduate programs.
- *On July 27, 2021 the program requirements for the program were approved to be decreased from 34.5 to 33 to align with the overall MBA redesign approved in 2019.*

Core Courses

The following MBA "core" courses (total of 22.5 credits) are required:

- BACC 2401 - FINANCIAL ACCOUNTING

- BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BFIN 2409 - FINANCIAL MANAGEMENT 1
- BMKT 2409 - MARKETING MANAGEMENT
- BOAH 2409 - ORGANIZATIONAL BEHAVIOR: LEADERSHIP AND GROUP EFFECTIVENESS
- BQOM 2421 - DECISION TECH IN MFG & OPS MGT
- BSPP 2409 - STRATEGIC MANAGEMENT
- BMIS 2409 - INFORMATION SYSTEMS
- BSEO 2401 - BUSINESS ETHICS & SOCIAL PERFORM
- BIND 2454 - INTEGRATED MBA CAPSTONE

Program requirements

- All MSW/MBA joint degree students will be required to take at least 34.5 credits of KGSB credits, consisting of the above 22.5 credits of core courses plus an additional 12 credits of KGSB electives. Thus, up to 16.5 credits will be accepted from courses successfully completed in the MSW program to achieve the total of 51 credits required for the completion of the Katz MBA degree.
- All MSW/MBA joint degree students will be required to take a course entitled Social Entrepreneurship (1.5 credits) from the KGSB.
- The following KGSB courses will count as credits towards the MSW degree:
 - BACC 2401 - FINANCIAL ACCOUNTING will qualify as equivalent to SWCOSA 2085 - FINANCIAL MANAGEMENT SOCIAL SERVICE INSTITUTIONS (3 credits), and will count as 3 credits for both the MSW and MBA programs,
 - BOAH 2409 - ORGANIZATIONAL BEHAVIOR: LEADERSHIP AND GROUP EFFECTIVENESS and Strategic Management (1.5 credits) will qualify as equivalent to SWRES Organizational Research, and will count as 3 credits for both the MSW and MBA programs (SA track only),
 - SW General Elective 1-One 3-credit or two 1.5-credit required MBA courses (e.g., BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS), which will count as 3 credits for both the MSW and MBA programs, and
 - SW General Elective 2- One 3-credit or two 1.5-credit required MBA courses (e.g., BIND 2444 - MANAGEMENT SIMULATION CAPSTONE), which will count as 3 credits for both the MSW and MBA programs.
 Thus, the double-counted credits make it possible for students to earn both degrees without having to take the total sum of credits required for completing the two degree programs separately.
- It should be noted that a long-standing educational policy of the SSW is that students who, within the past seven academic calendar years, have received a social work degree from a CSWE-accredited undergraduate program are eligible for advanced standing. Those granted advanced standing during the admission process can receive up to 12 academic credits and six field education credits that will count towards completion of the MSW program.
- Thus, full-time COSA students with advanced standing must earn grand total of 64.5 credits for CO students, and 61.5 credits for SA students (adding all MSW and MBA courses). This means total of 30 social work credits (including total of 12 field credits) to be taken by CO students and 27 credits (including total of 12 field credits) to be taken by SA students. Additionally, they must take minimum of 34.5 credits of MBA courses, which includes 22.5 and 12 credits of required and electives, respectively.
- Full-time COSA students **without** advanced standing must earn grand total of 85.5 credits for CO students, and 82.5 credits for SA students (adding all MSW and MBA courses). This means total of 51 social work credits to be taken by CO students and 48 credits to be taken by SA students. Additionally, they must take minimum of 34.5 credits of MBA courses, which includes 22.5 and 12 credits of required and electives, respectively.

Master's

PT Online MSW Program

On 11/07/2024 the following description and required course information was updated in the published catalog in an effort to provide accurate information.

The School of Social Work offers an online version of our existing part-time Master of Social Work (MSW) program, accredited by the Council on Social Work Education (CSWE) Board of Accreditation.

The School of Social Work has offered an MSW program since 1918 and has been continuously accredited since the end of its first year. The MSW is a terminal professional degree that students earn by successfully completing 60 graduate credits-42 in-class credits and 18 practicum credits.

The part-time Online MSW Program features our most popular specialization, Direct Practice with Individuals, Families, and Small Groups (Direct Practice), with the option to pursue one of three certificates that align with projected areas of growth in the profession:

- Direct Practice with Children, Youth, and Families (CYF)
- Direct Practice in Integrated Healthcare (IHC)
- Direct Practice in Mental Health (MH)

As with our face-to-face part-time program, by Fall 2026 there will be two types of students enrolled in the part-time Online MSW Program: Advanced Standing and Non-Advanced Standing students.

In Fall 2025, we will admit Non-Advanced Standing students, who will complete their coursework over 10 consecutive semesters (enrolling in six credits per semester). By Fall 2026, we will begin admitting Advanced Standing students. Advanced Standing students can transfer up to 21 credits from an undergraduate social work program accredited by the CSWE Board of Accreditation. These students will complete the part-time Online MSW Program over six consecutive semesters (year-round), also enrolling in six credits per semester.

Required Core Generalist Courses Include:

- SWGEN 2098 - GENERALIST SOCIAL WORK PRACTICE
- SWGEN 2034 - SOCIAL WORK PRACTICE WITH DIVERSE POPULATIONS
- SWBEH 2063 - HUMAN BEHAVIOR & SOCIAL ENVRNMNT
- SWWEL 2081 - SOCIAL WELFARE
- SWRES 2021 - GENERALIST SOCIAL WORK RESEARCH
- SWGEN 2099 - GENERALIST PRACTICUM

Required Second-level Behavior Courses (Certificate Specific):

- SWBEH 2062 - HUMN BHVR: CHLD FMLY AT RISK **required CYF**
- SWBEH 2065 - HUMAN BEHAVIOR: MENTAL HEALTH **required for MH**
- SWBEH 2066 - HUMAN BEHAVIOR: HEALTH/MENTAL HEALTH **required for IHC**

Required Second-level Policy Courses (Certificate Specific):

- SWWEL 2059 - CHILD AND FAMILY POLICY **required for CYF**

- SWWEL 2056 - HEALTH SYSTEMS AND PUBLIC POLICY **required for IHC**
 - SWWEL 2057 - MENTAL HEALTH AND PUBLIC POLICY **required for MH**
- Required Second-level Research Course for All Certificates:**

- SWRES 2040 - DIRECT PRACTICE ADVANCED APPLIED RESEARCH
- Required DP Skill Electives for All Certificates:**

- SWINT 2020 - DIRECT PRACTICE WITH INDIVIDUALS
- SWINT 2021 - DIRECT PRACTICE WITH FAMILIES AND GROUPS

Required Specialized Practicum for All Certificates:

- SWINT 2099 - DIRECT PRACTICE SPECIALIZATION PRACTICUM

Required General Elective Course for All Certificates:

- SWGEN 2080 - RACE AND SOCIAL PROBLEMS

Additional DP Skill Electives that Fulfill the 60 Credit Course Requirements (Certificate Specific):

- SWINT 2025 - SOCIAL WORK PRACTICE IN INTEGRATED HEALTH **IHC**
- SWINT 2042 - SOCIAL WORK WITH SUBSTANCE USE AND OTHER ADDICTIVE DISORDERS **CYF, IHC, MH**
- SWINT 2049 - DIRECT PRACTICE WITH CHILDREN & ADOLESCENTS **CYF**
- SWINT 2072 - SOCIAL WORK PRACTICE AND TRAUMATIC STRESS **CYF, MH**
- SWINT 2007 - INTRO PSYCHMCLGY SOCL WRK PRACT **IHC, MH**

Total Credits: 60

Required Core Generalist Courses Include:

- SWGEN 2098 - GENERALIST SOCIAL WORK PRACTICE
- SWGEN 2034 - SOCIAL WORK PRACTICE WITH DIVERSE POPULATIONS
- SWBEH 2063 - HUMAN BEHAVIOR & SOCIAL ENVRNMNT
- SWWEL 2081 - SOCIAL WELFARE
- SWRES 2021 - GENERALIST SOCIAL WORK RESEARCH
- SWGEN 2099 - GENERALIST FIELDWORK

Required Second-level Behavior Courses (Certificate Specific):

- SWBEH 2062 - HUMN BHVR: CHLD FMLY AT RISK **required CYF**
- SWBEH 2065 - HUMAN BEHAVIOR: MENTAL HEALTH **required for MH**
- SWBEH 2066 - HUMAN BEHAVIOR: HEALTH/MENTAL HEALTH **required for IHC**

Required Second-level Policy Courses (Certificate Specific):

- SWWEL 2059 - CHILD AND FAMILY POLICY **required for CYF**
- SWWEL 2056 - HEALTH SYSTEMS AND PUBLIC POLICY **required for IHC**
- SWWEL 2057 - MENTAL HEALTH AND PUBLIC POLICY **required for MH**

Required Second-level Research Course:

- SWRES 2033 - EVALUATIVE RESEARCH SOCL SERVS

Required DP Skill Elective :

- SWINT 2082 - MODELS OF INTERVENTION

Required skill elective:

Students must take one of the two classes for all certificate options

- SWINT 2031 - ADV DRCT PRAC: COGNITV/BEHVRL
- SWINT 2033 - ADV DRCT PRAC: PSYCHODYNAMIC

Specialized Field Course

- SWINT 2099 - FIELD WORK

Total Credits: 60

Social Work - Community, Organization, and Social Action Concentration, Community Organization Track, MSW

Community, Organization, and Social Action (COSA) Concentration Curriculum Requirements

COSA offers concentration courses in Human Behavior and the Urban Environment, Organizational Policy Analysis, and a social work research course related to either of the two COSA specialization tracks from which students may choose: Community Organization or Social Administration. Students must take one of the required specialization core skill courses; however, many students prefer to pursue both COSA specializations. Students fulfill their remaining credits from a range of COSA skill elective courses, which include such topics as Supervision and Personnel Management, Financial Management, Public Relations/Marketing, Issue-Based Organizing, Community and Economic Development, and Grants, Proposals and Social Work, Social Work and the Law, and Race and Social Problems. Students may also pursue elective courses in other related professional schools. All students must complete six credits of foundation field work followed by twelve credits of concentration field placement in a range of organizational settings across an array of social work issues and program areas.

Required Skill Courses

- SWCOSA 2084 - HUMAN SERVICE ORGANIZATION MANAGEMENT
- SWCOSA 2088 - COMMUNITY ORGANIZING AND PLANNING

Second-Level HBSE Course

- SWBEH 2008 - HUMN BHVR: URBAN ENVIRONMENT

Second-Level HBSE Course

- SWWEL 2087 - ORGANIZATIONS AND PUBLIC POLICY

Second-Level Research Course

Select one of the two courses below based on your specialized track (CO or SA)

- SWRES 2009 - ORGANIZATIONAL AND COMMUNITY DEVELOPMENT RESEARCH (SA)
- SWRES 2023 - DIRECTED STUDY IN RESEARCH (CO)

Electives and Field Placement

- COSA Skill Electives - 6 credits (two courses related to CO or SA track - see below)
- General Electives - 6 credits
- SWCOSA 2099 - FIELD WORK - 12 credits (related to CO or SA track)

Community Organizing Electives

- SWCOSA 2090 - WORKING WITH GROUP AND INTERGROUP RELATIONS: FACILITATION/NEGOTIATION/MEDIATION **
- SWCOSA 2096 - COMMUNITY PLANNING AND DEVELOPMENT

Note:

**Courses required for Human Services Management Certificate (COSA or DP)*

*** Courses can count for either Social Administration or Community Organizing*

Social Work - Community, Organization, and Social Action Concentration, MSW

Foundation Requirements

All MSW students must complete the MSW Foundation requirements listed below before being permitted to take concentration skill courses; second-level human behavior and the social environment, social welfare, or research courses; skill electives; and concentration field practicum, unless they are exempted via Advanced Standing credit or examination or an academic plan that is approved by the advisor and the program director.

The foundation course requirements (15 credits total) are:

- SWRES 2021 - GENERALIST SOCIAL WORK RESEARCH
- SWBEH 2063 - HUMAN BEHAVIOR & SOCIAL ENVRNMNT
- SWWEL 2081 - SOCIAL WELFARE

- SWGEN 2098 - GENERALIST SOCIAL WORK PRACTICE
- SWGEN 2034 - SOCIAL WORK PRACTICE WITH DIVERSE POPULATIONS

Note:

In addition to the five courses listed above, students must complete 6 credits of Foundation Field Work. Students entering with advanced standing may be exempted from part or all of the Foundation Field Work requirement.

Skill Concentration Curricula

Upon completion of the foundation requirements, students begin course work in either of the two skill concentrations: Direct Practice with Individuals, Families, and Groups or Community, Organization, and Social Action (COSA). In each skill concentration, students can opt to choose a University of Pittsburgh certificate program, or a School of Social Work certificate program.

Community, Organization, and Social Action

The **Community, Organization, and Social Action (COSA)** specialization in the MSW Program (*formerly Community Organization and Social Administration*) is seeking socially-active and civically-engaged students who seek leadership careers in community human services, community development, and community change/social policy practice as professional social workers. Graduates pursue established and emerging professional opportunities in public and private, profit, nonprofit and community-based organizations in such fields as health, children and youth, family services, disability services, community revitalization and development, philanthropy, policy and advocacy, community and social planning, community/neighborhood centers, human resources and community affairs, and more. In COSA, we see our work as:

**community Organizing, Planning, Development,
and Change**

**organizational Leadership and Human Services
Management**

**social Policy & Advocacy Practice in the Social
Policy Arena**

**action as Activist social workers leading change in
communities, organizations, & policy arenas**

COSA Curriculum

The MSW in COSA can be generally completed in two-years of graduate study; however, students have options for either part-time study (must be completed in four years) and a new one-year option (for students with advanced standing from an undergraduate social work degree). *See Curriculum Requirements.*

COSA Specialization - Human Services Management Certificate

Our School of Social Work is one a number of leading macro social work program in schools of social work to offer a national Human Services Management Certificate in partnership with the Network of Social Work Management, a national organization supporting education and practice for human services management competency. *See Human Services Management Certificate Requirements.*

COSA Joint Degrees

Many COSA students pursue joint degree study with other professions, including a new joint MSW/MBA option, as well as long-standing joint degree studies in Public Health (MSW/MPH), Public and International Affairs (MSW/MPA, MID, or MPIA), Law (MSW/JD), and Divinity (MSW/MDiv) in partnership with the Pittsburgh Theological Seminary. The School of Social Work and COSA strong support and seek to develop opportunities for inter-professional study and practice for social workers. *See Joint Degree Opportunities.*

Celebrating 60 Years of Community Organizing (CO)

The School of Social Work has the first and long-standing program in Community Organizing (CO) in any social work or professional school in the country. In fall 1958, the School launched its first two-year curriculum in Community Organizing, and with our 100th Anniversary as a school of social work in 2018 we are also celebrating our 60th year of CO. Read a history of the community organizing program.

Social Work - Direct Practice with Individuals, Families, and Groups Concentration, MSW

Foundation Requirements

All MSW students must complete the MSW Foundation requirements listed below before being permitted to take concentration skill courses; second-level human behavior and the social environment, social welfare, or research courses; skill electives; and concentration field practicum, unless they are exempted via Advanced Standing credit or examination or an academic plan that is approved by the advisor and the program director.

The foundation course requirements (15 credits total) are:

- SWRES 2021 - GENERALIST SOCIAL WORK RESEARCH
- SWBEH 2063 - HUMAN BEHAVIOR & SOCIAL ENVIRONMENT
- SWWEL 2081 - SOCIAL WELFARE
- SWGEN 2098 - GENERALIST SOCIAL WORK PRACTICE
- SWGEN 2034 - SOCIAL WORK PRACTICE WITH DIVERSE POPULATIONS

Note:

In addition to the five courses listed above, students must complete 6 credits of Foundation Field Work. Students entering with advanced standing may be exempted from part or all of the Foundation Field Work requirement.

Skill Concentration Curricula

Upon completion of the foundation requirements, students begin course work in either of the two skill concentrations: Direct Practice with Individuals, Families, and Groups or Community, Organization, and Social Action (COSA). In each skill concentration, students can opt to choose a University of Pittsburgh certificate program, or a School of Social Work certificate program.

Direct Practice with Individuals, Families, and Groups

The Direct Practice specialization is designed to develop students' advanced practice skills to prepare them for autonomous practice, grounded in the values and ethics of the social work profession using a strengths-based, person-in-the-environment perspective. Through course work and field education, students are equipped with the knowledge and skills needed to engage in direct practice with diverse populations of individuals, families, and small groups. The specialization focuses on evidence-based modalities and provides students with community-based learning opportunities. Consistent with an emphasis on strengths perspective, students become skilled at assisting clients to address their needs and realize their potential.

Direct practice certificates entail a specific array of courses and field placement experiences that permit students to tailor their education and professional preparation.

Five certification programs are available to direct practice students. Direct practice students in the MSW program can elect to pursue a certificate in:

- Children, Youth and Families Certification (School of Social Work Certificate)
- Gerontology (University of Pittsburgh Certificate)
- Home and School Visitor (School of Social Work, School of Education, and PA Department of Education Certificate)
- Integrated Health Certificate (University of Pittsburgh Certificate)
- Mental Health Certification (School of Social Work Certificate)

Students are not required to pursue a certificate. Those who choose to do so, must declare their choice of a certificate program no later than the end of the first term of full-time study. Individuals intending to complete the Home and School Visitor certificate must declare their interest in their application for admission to the MSW program.

Information about curriculum requirements, specialization, and certificate programs are available on the school's Web site, <http://www.socialwork.pitt.edu/academics/msw/concentrations/direct-practice>

Electives:

MSW Courses

Social Work, MSW

Students who have received a social work degree within the past seven academic calendar years from a CSWE-accredited undergraduate program (or one recognized by the Council on Social Work Education's International Social Work Degree Recognition and Evaluation Service, or covered under a memorandum of understanding with international social work accreditors) are eligible for advanced standing. The students who are granted advanced standing during the admission process can receive up to 15 academic credits. The number of advanced standing credits granted depends on the comparability of the student's undergraduate courses to this Program's generalist courses and on the grades they earned in those undergraduate courses (i.e., must be a "B-" grade or higher). Such students also may be granted an exemption from a diverse populations course. Eligibility for a course exemption is contingent upon the comparability of the student's undergraduate course(s) to this Program's generalist course and on the grade(s) obtained (i.e., "B-" grade or higher). If an exemption is granted, the student must fulfill the three academic credits through additional coursework, typically by enrolling in another elective course.

In addition, students entering with advanced standing can receive six (6) field education credits. The six (6) credits of field education are granted based on the number of hours of field experience completed at the undergraduate level, provided that the undergraduate social work practicum totals a minimum of 400 clock hours and the student has achieved a passing grade or at least a "B-" grade or better.

The proposal will increase the maximum number of credits awarded for advanced standing from 18 to 21. This would reduce the minimum number of credits a student takes in our MSW program from 42 to 39. The key rationale informing this policy change is curricular alignment and recognition of demonstrated competency between undergraduate and graduate social work diversity courses.

Previously students have an exemption from our Social Work Practice with Diverse Populations course (SWGEN 2034) as part of their advanced standing, removing the requirement to take the course but not receiving the 3-credits applied to their 60 credit MSW. This policy change would allow for the full recognition of a students' competency in this requirement (demonstrated through an earned B- or better in the undergraduate comparable social work diversity course).

Doctorate in Social Work Program

We are committed to training the next generation of scholars in social work, whose research will inform policy and practice addressing society's most pressing problems.

Doctoral education in Social Work prepares students for leadership roles in social work research, social work education, social policy, planning, and administration. We provide students with advanced academic training that will allow them to contribute to the knowledge base of our profession.

Our faculty includes nationally recognized leaders in every area of social work practice and research, and we take a hands-on, supportive approach to doctoral education.

The doctoral program is open to applicants who have demonstrated intellectual capacity, critical thinking skills, and potential for research and scholarship.

Why Pitt?

- Nationally recognized leaders in every area of social work practice and research
- Supportive, hands-on approach to doctoral education
- Opportunities to collaborate through three world-class centers that address race and social problems, behavioral health practice in community settings, and child welfare
- Four years of funding and health insurance

The University of Pittsburgh's social work doctoral program is among the oldest and most-respected in the United States. Our full time program is highly competitive, and we accept 6-8 students each year. Students are fully funded with tuition and stipend support for four years of study. Tuition support includes health insurance, and our wonderful Social Work Library is part of Pitt's world-class University Library System.

The doctoral program is open to applicants who have demonstrated intellectual capacity, critical thinking skills, and potential for research and scholarship.

Please visit our PhD Admissions webpage for admissions-related information.

In addition to the description of the PhD in Social Work given below, doctoral students should consult the Regulations Pertaining to Doctoral Degrees in the General Academic Regulations section of this document.

Admission to Doctoral Program

Persons seeking admission to the PhD Program must demonstrate the potential for doctoral studies. All applicants to the Doctoral Program in Social Work must provide the following:

- Completion of the PhD Application.
- Official copies of all official undergraduate and graduate transcripts.
- GREs taken within the last five years.(Use code **2927**).
- A general statement of the applicant's academic and professional experience, including future career goals. This statement should relate past and current experience to the applicant's future educational and career objectives.
- A short analysis of a social policy issue.
- Three letters of reference from professors and persons who have known the applicant in a professional capacity. Do not include personal references.
- \$50 application fee.

Apply to the School of Social Work PhD Program

Application components should be sent to:

University of Pittsburgh
School of Social Work
Office of Admissions
2101 Cathedral of Learning
4200 Fifth Avenue
Pittsburgh, PA 15260
412-624-6302

Email: SSWPhDAdmissions@pitt.edu

The doctoral program is strongly committed to a policy of equal educational opportunity for people of all races, creeds and ethnic origins.

Admission to the program is for the fall term only and the deadline for the application is December 15. To apply to the program, please access our [online application](#). Log into your online application frequently to monitor your progress.

Certificate in Gender, Sexuality, and Women's Studies

In addition, the University Of Pittsburgh School Of Social Work is one of a few schools to offer doctoral students the option to simultaneously obtain a certificate in Certificate in Gender, Sexuality, and Women's Studies and a PhD in social work.

This certificate is based on a strong interdisciplinary program focusing on new scholarship concerning women and gender. The University of Pittsburgh Gender, Sexuality, and Women's Studies Program provides opportunities for students to explore the historical development, cultural variations, and changing representations of gender and sexuality as they organize identities, interactions, and institutions and intersect in complex ways with sex, race, class, ethnicity, ability, age, religion, and nation.

Program Transfer Credits

Students who have earned doctoral-level credits at the University of Pittsburgh or at another accredited institution within seven years preceding entry to the doctoral program may be eligible for advanced standing. Advanced standing consists of awarding academic credit toward the degree for post-master's work completed when such work is evaluated as entirely comparable. Official transcripts certifying graduate course work completed in a degree-granting graduate program should be submitted at the time of application. The maximum number of credits that can be transferred and accepted for advanced standing is 12.

See Allowable Credits in the General Academic Regulations section of this bulletin for more details on requirements for transfer credits.

Financial Support for Doctoral Students

Doctoral students are supported in years 1 and 2 by research-based graduate student assistantships (GSAs) and in years 3 and 4 by teaching assistantships (TAs). Exceptional students with post-master's teaching experience and who have defended their overviews may apply for our teaching fellowships (TFs). Both GSAs and TA/TFs provide tuition remission and stipends for the fall, spring and summer terms. There is a 20-hour-per-week work requirement for both GSR and TA appointments.

Students receive GSA or TA support for four years as long as they are making satisfactory progress toward their doctoral degrees. If a fifth year is required, it is usually supported by adjunct teaching. Students are also encouraged to apply for pre-doctoral research traineeships and other awards.

In addition to the above, we offer some support for conference travel after the first year.

Doctoral Curriculum Objectives

The program curriculum strongly emphasizes social problem areas, as well as coordinating themes in theory, research methodology, and social policy courses. The overall goal is to integrate the acquisition of basic advanced knowledge, methods of empirical testing, and application to real-world situations. Course materials draw heavily on several priority areas of social work concern, including aging, mental health, income maintenance, child welfare, women's issues, child and family policy, and health services, and social justice. diversity issues.

By the time students have completed the program, they should have acquired the following:

- Knowledge of relevant social science theory
- Advanced skills in research methodology and statistics
- Advanced knowledge of social welfare policy (historical and contemporary) and policy analysis
- Knowledge of relevant fields of practice, theoretical and policy perspectives, and research findings
- Exposure to an interdisciplinary frame of reference through mechanisms provided internally by the doctoral program and externally through access to other disciplines and professions in the wider University

Although entering students are not required to have completed course work or other experience relevant to computer literacy, possessing basic computer skills will be an asset to students beginning the program.

Doctoral

Social Work, PhD

PhD Degree Requirements

The PhD program requires 10 core courses, one policy elective, plus a minimum of five electives, which may be 2-, 3- or 4-credit courses. During their first year, all students are required to take the Doctoral Seminar (0 credits). Students will spend two years meeting their course requirements. Full-time status is defined as nine or more credit hours per semester. Fifty (50) credit hours must be completed before students are permitted to take the comprehensive examination.

Doctoral Requirements

During the first two academic years in the program, full-time students are primarily involved in taking the required courses in the four essential areas of study: social welfare, social science theory, research methods, and social policy. Students take courses in the fall and spring terms of their first and second years; summer courses are necessary if a student is enrolled in one of our joint degree programs or desires a nine-credit schedule for the fall and spring terms.

Curriculum

Courses are taken in the fall and spring terms during the student's first and second years; summer courses are needed if a student desires a nine-credit schedule for fall and spring terms and/or is enrolled in one of the joint degree programs (no more than 12 credits are recommended for the student's first semester in the program). Learn more about our curriculum.

Comprehensive Examination

Students take a comprehensive examination after completion of all required and elective courses. The Comprehensive examination is taken in the summer of the second year. For students in the MSW/PhD program, the comprehensive examination is taken in the summer of the 3rd year.

Doctoral Dissertation

The doctoral dissertation involves:

- Dissertation Research: begins after passing the comprehensive examination
- Defense of a Dissertation Overview: occurs after a committee review of the dissertation overview and includes an introduction to the problem, a literature review, and a detailed methodology (admission to PhD candidacy)
- Final Dissertation Defense: occurs at least one year following admission to candidacy

Grades in Course Work

It is required that students will maintain an average grade point average of 3.00 or better in all course work. If a student receives a grade lower than B- in a required course, the course will have to be repeated. Whether the courses are required or elected, more than one grade of C+ or lower will be the basis for a formal Academic Review.

Program Flexibility and Individualization

An individual student's program should reflect the student's developing professional expertise, career goals, and personal interest. This program, therefore, maintains as much flexibility and individualization as possible.

This individualization is built upon the core curriculum through planning for elective course work and enrichment experiences, including teaching and research assistantships. The PhD program provides a set of structured and integrated core courses that can be applied to each students' area of specialization. This core curriculum is supplemented by six elective courses that allow students to obtain more depth in their specialization areas. Faculty advisors work closely with students in planning their course work and progress through the doctoral program.

A minimum of three years of full-time study is required for doctoral program completion. The curriculum is distributed between a nine-course core curriculum and elective courses followed by the comprehensive examination and doctoral dissertation.

Core Doctoral Curriculum

During the first two academic years in the program, students are primarily involved in taking the required courses in the four essential areas of study: social welfare, social science theory, research methods and statistics, and social policy.

These core courses are provided by the doctoral program. A brief description of each area of study follows with a listing of credits awarded and terms offered. All 1st year students are required to take the non-credit Doctoral Seminar. More information on each doctoral course is available in the Student Handbook.

Required (Core) Courses

Research Methods (17 total credits)

- SWRES 3020 - RESEARCH METHODS 1
- SWRES 3029 - INFERNTL STAT SOCL WORKERS
- SWRES 3021 - MULTIVARIATE ANALYSIS
- SWRES 3022 - RESEARCH METHODS: CAPSTONE SEMINAR 1
- SWGEN 3066 - SEMINAR IN SOCIAL WORK EDUCATION
- SWRES 3023 - RESEARCH METHODS: CAPSTONE SEMINAR 2
- Doctoral Seminar - 0 credits

Theory (6 total credits)

- SWGEN 3044 - THEORY 1
- SWGEN 3053 - THEORY 2

Policy (6 total credits)

- SWWEL 3030 - EVAL OF AMERICAN SOCIAL WELFARE
- SWWEL 3037 - SOCIAL POLICY ANALYSIS

Elective Courses (21 credits)

In addition to the above core course requirements, the student selects seven elective courses to pursue more specialized interests. All electives must be at least 2 credit graduate level courses with a credit total = 21 credits. Elective options available in the program, including the Joint Public Health Master's/Social Work PhD option and the graduate certificate in women studies offer particular advantages but tend to restrict the number of electives open to students. Although some doctoral elective courses are offered within Social Work, students are encouraged to take relevant course work in other schools and departments of the University. Many social welfare-related fields are open: sociology, economics, women's studies, political science, law, urban affairs, public health, and others. The student can choose his or her courses from all graduate programs in the University. The students may take no more than two MSW courses for elective credit. All electives must be approved by the student's advisor as contributing to the student's area of specialization.

Interdisciplinary Components of Doctoral Curriculum

In addition to the core doctoral courses, the student has seven elective course selections to pursue more specialized interests. Certain options available in the program, especially the Joint Public Health Master's/Social Work PhD option and the graduate certificate in women's studies, offer particular advantages but tend to restrict the number of electives open to students. Students are encouraged to take graduate-level course work in other schools and departments of the University insofar as this is feasible within their program requirements. Many social welfare-related fields are open: sociology, economics, women's studies, social psychology, political science, law, urban affairs, public health, and others. The student can choose his or her courses from all graduate programs in the University. The student may take no more than two MSW courses as electives.

Cooperative Degrees Program

<http://www.socialwork.pitt.edu/academics/master-social-work-msw>

In addition to the MSW and PhD degrees, graduate students in the School of Social Work have the opportunity to select from several unique dual degree programs. MSW students can avail themselves of one of the eight joint or cooperative degree programs; two joint degree programs are available to PhD students.

Detailed below are joint degree programs offered by the School of Social Work in tandem with the Graduate School of Public and International Affairs, the School of Public Health, the School of Law, the School of Education, the School of Business, and the Pittsburgh Theological Seminary.

MSW/Master of Public Administration, MSW/Master of Public and International Affairs, and MSW/Master of International Development

Three unique joint degree programs are offered by the University of Pittsburgh School of Social Work, through its COSA concentration, and the Graduate School of Public and International Affairs. These joint programs provide students with a broad professional education to prepare them for eventual service in urban non-profit and government organizations, community development policy, and social and urban planning. They provide experienced students with opportunities to expand their knowledge base and enable other students to develop more marketable professional skills than are usually acquired through single-degree programs. Students in these joint programs earn a Master of Social Work from the School of Social Work and a Master of Public Administration, Master of Public and International Affairs or a Master of International Development from the Graduate School of Public and International Affairs.

Students must be admitted to both programs in order to qualify for admission to the joint degree program. Degree candidates must meet the minimum foundation, concentration, and specialized requirements of both schools, except where substitutions are appropriate and approved by the faculty advisors. Depending upon which joint degree program the student elects, the total number of credits required for graduation ranges from 72 to 88 credits. For most students, this means that individual programs can be completed within six to seven terms of full-time residency. Students electing to terminate the joint degree program before its completion must complete all the work required by the respective schools for either degree in order to receive that degree separately.

Graduate School of Public and International Affairs

Complex and emerging issues influence us, our towns, our countries, and our world: Fair housing. Economic and community development. Environmental sustainability. Emergency preparedness. Disaster response. Human rights. International security.

We live in a world both illuminated by great hope and darkened by great conflict. Make a difference and take the lead. Prepare yourself with a comprehensive education from the Graduate School of Public and International Affairs (GSPIA) at the University of Pittsburgh.

Your academic options begin with GSPIA's integrated academic structure of three distinct master's degree programs offering eight different majors. Click on the links below to learn more about GSPIA's academic programs and related learning and research opportunities at GSPIA and the University of Pittsburgh. And-as always-we're ready to answer any questions you may have! Contact the Office of Student Services at 412-648-7640 or by email, gspia@pitt.edu.

The easiest way to apply to the Master's Degree in Social Work Program at the University of Pittsburgh School of Social Work is to use our online application.

Students who prefer to apply through the mail may contact:

MSW/Master of Public Health program

What is the MSW/MPH joint degree program?

The joint degree program is collaboration between the School of Social Work and the School of Public Health, Department of Behavioral and Community Health Sciences. Students graduate with both a Master of Social Work and Master of Public Health degrees and are prepared to pursue a wide range of social work and public health careers to improve the health of a target population and/or community. Students participate in class work, field placements, and leadership seminars to acquire the knowledge and skills to address health problems.

White Paper Stemming from the National Public Health Social Work Summit

What principles guide this program?

The program has a strong commitment to social justice, the elimination of health disparities, and a holistic definition of community and population health, including individuals' physical health conditions and the behavioral and social ecological determinants of health. Moreover, both social work and public health share a commitment to involving consumers/community members in the development of policies and in the planning, delivery and evaluation of health promotion interventions, health behavior change, and health education.

What are the advantages of the program?

- Students develop knowledge, values and skills for *both* professional social work practice and (e.g. direct practice or community organization/social administration) and community public health practice (e.g. primary, secondary, and tertiary prevention).

- Advising and mentoring focuses on supporting students to achieve their professional goals (e.g., selection of field placements, papers written as part of course-work, leadership training activities, focus of final thesis/essay in the MPH program).
- Students increase their career marketability as a result of being able to work from a cross disciplinary perspective. Students have gone on to jobs, for example, in various social service organizations, health departments, other government agencies, academic institutions, think tanks, and the Centers for Disease Control and Prevention.

What competencies will individuals gain as a result of the program?

- Application of theoretical principles to primary, secondary, and tertiary health interventions targeting the promotion of health behavior change, enhancement of the environment, and the elimination of risk factors in neighborhoods and communities that contribute to disease and poor health status outcomes
- Application of principles of community-based participatory research and practice to community health assessment
- Application of quantitative and qualitative skills to program planning and evaluation research
- Processes involved in community health planning, program implementation, and program evaluation
- Written communication to inform the public, policymakers, and other key-stakeholders
- Develop skills in micro practice with individuals, families, and groups or macro practice

What are the requirements of the program?

Typically a three-year curriculum plan for Direct Practice or COSA (2.5 years for advanced standing students)

- MSW/ MPH DP Course Requirements
- MSW/MPH COSA Course Requirements
- 33 Social Work credits (plus 18 field placement credits) **NOTE: Beginning 2019-20 academic year, the required BCHS 2525 Applied Research Methods course(3crs.) fulfills the SWRES 2021 Foundation of Social Work Research course (3crs.) In addition, MSW/MPH students who are pursuing the IHC certification are not permitted to take SWBEH 2066HB as a second-level HBSE course. The content of SWBEH 2066HB significantly overlaps with the course content of BCHS2520. Students are required to choose another second-level HBSE course.**
- 36 Public Health credits

Some highlights of the program are:

- 18 field placement credits representing two separate field placement experiences, foundation and concentration, coordinated by the School of Social Work, Office of Field Education.
- Several certification programs are offered at each School
- Public Health final essay or thesis

Note: Students register for two years (two fall and spring semesters) through the School of Social Work and one year (one fall and spring semester) through the School of Public Health. You are eligible for funding through the School of Social Work for a maximum of 2 years (these are the two years you register through that school). You must be registered for **at least 9 credits** in the School of Social Work during the two years you register in that school to be eligible for funding from the School of Social Work. **You must have both school advisors approve your course schedule each term. Your advisor in the School of Social Work will lift your "hold" to register each term.**

What types of careers do graduates of the MSW/MPH joint degree program engage in?

- Patient Services Managers
- Research Scientist
- Policy Advocates
- Program Directors
- Communication Directors
- Adjunct and Part-time faculty in MSW and BSW degree programs
- Bridging the gap between the public's health and social work practice
- Program Planners

Application Process

Students must apply separately to the School of Social Work and the School of Public Health's Office of Admissions (GSPH). The easiest way to apply to the Master's Degree in Social Work Program at the University of Pittsburgh School of Social Work is to use our online application, and to apply to the Master's Degree of Public Health in Behavioral and Community Health Sciences, School of Public Health (SPH) use online application.

MSW/Juris Doctorate

The School of Social Work (SSW) and the School of Law offer a cooperative educational program through which students may earn both the Master of Social Work (MSW), the primary professional degree in social work, and the Juris Doctor (JD) degree, the first professional degree in law. The MSW-JD program will enable students with interests in a wide range of areas where law and social work converge - such as child welfare, aging, health, mental health, juvenile and criminal justice, family issues, and housing - to engage in a highly integrative educational experience that will include academic courses, field placements, and research opportunities at the intersection of both professions. The joint degree program allows one to earn both degrees in four years rather than five.

Increasingly, social work professionals and attorneys are working together to promote the well-being of their clients. These areas of convergence exist in practice with individuals, families, and groups as well as with communities and organizations. The intersection of legal and social work concerns is also evident at the policy level, and research from both professional disciplines has been used to inform these activities. It is not uncommon for practitioners from both fields to work in concert to draft, implement, and/or advocate for legislation at the local, state, and federal levels.

The MSW-JD program is one among several programs that the Schools of Social Work and Law have jointly established throughout their long and rich history of collaboration.

Neither degree may be granted prior to fulfillment of all requirements for the joint degree program.

Master of Social Work/Master of Business Administration

The MBA/Master of Social Work joint degree program is designed to provide students with a unique combination of social work knowledge and skills, with exceptional strength in management decision-making and leadership. The degree is offered jointly through the University of Pittsburgh School of Social Work and the Joseph M. Katz Graduate School of Business.

Faced with an increasingly competitive market, nonprofit organizations are beginning to emulate management methods and paradigms being practiced by for-profit companies, such as financial operations, human resource and data management, market and economic analysis, and evidence-based strategic planning. As philanthropic organizations become more concerned about their accountability and utility of financial supports provided to various human service organizations, they are beginning to evaluate nonprofits beyond program outcomes or average cost per client to more advanced assessments, such as cost-efficiency and effectiveness and cost-benefit ratio. Unfortunately, such analytic methodologies are rarely offered to social work students by the traditional social work curriculum.

Initially, the proposed MSW/MBA dual-degree program will be open to the SSW's Community Organization and Social Action (COSA) students. Upon successful execution of this initiative, the school plans to open the program to all MSW full-time students (COSA and Direct Practice students).

Students who want to earn a dual-degree must gain acceptance into both graduate degree programs by applying separately to each school. The joint-degree program applicants will also be required to submit their Graduate Management Admission Test (GMAT) or Graduate Records Exam (GRE) examination scores to both schools. Specific questions may be addressed to:

MSW/MBA Joint Degree Admissions Criteria

A. SSW Requirement

1. A Baccalaureate degree that must be completed prior to the program start date. Applications must include transcripts of coursework completed at the time of submission of the application. Admission will be contingent upon submission of an official, final transcript of the completed Bachelors program before the start of the MSW program.

- a) Undergraduate students with social work and human service backgrounds are preferred.
- b) In general, we would expect an undergraduate GPA of 3.0 or better for admission.
- c) International students must submit originals or certified copies of transcripts/mark sheets and degree/diploma certificate in the original language plus a certified English translation (if the original is not in English).
- d) Paid work experience is preferred but not required.

2. GMAT/GRE scores are not required for regular MSW students applicants but for the joint degree applicants in MSW and MBA must have their official Graduate Management Admission Test (GMAT) or Graduate Record Examination (GRE) score reports forwarded directly to the University of Pittsburgh, Katz Graduate School of Business (KGSB), by the admission deadline.

3. Applicants will submit a 3-5 page double spaced typed personal statement describing their post-graduate career goals, skills in which they excel, and key accomplishments.

4. Applicants will submit three recommendations from persons who have known the applicant in academic or professional capacities. At least one from a faculty member is preferred. (Recommendations from friends and family will not be accepted.)

5. Applicants will submit their current resume.

6. English Proficiency Exams (for international applicants who are citizens of countries where the official language is not English)-- the Test of English as a Foreign Language (TOEFL) with minimum acceptable score: Internet-based test: 100; paper-based test: 600.

7. Non-refundable application fee is \$40.

8. Prospective candidates, domestic or international, may be interviewed before admission, in person or by telephone.

9. Submission of online MSW application form by the admissions deadline date of **May 31**.

B. Katz GSB Requirement

1. A Baccalaureate degree that must be completed prior to the program start date. Applications must include transcripts of coursework completed at the time of submission of the application. Admission will be contingent upon submission of an official, final transcript of the completed Bachelors program before the start of the MBA program.
 - a) Undergraduate students with strong analytical backgrounds are preferred.
 - b) In general, we would expect an undergraduate GPA of 3.0 or better for admission.
 - c) International students must submit originals or certified copies of transcripts/mark sheets and degree/diploma certificate in the original language plus a certified English translation (if the original is not in English).
 - d) Work experience is not necessary, though highly desirable.
2. GMAT/GRE scores: Applicants must have their official Graduate Management Admission Test (GMAT) or Graduate Record Examination (GRE) score reports forwarded directly to the University of Pittsburgh, Katz Graduate School of Business, by the admission deadline. In general, we would expect a GMAT score of 600 or higher for admission. (Corresponding GRE scores will be equivalent to these levels, after conversion.)
3. Applicants will submit a 250 word essay describing their post-graduate career goals, skills in which they excel, and key accomplishments.
4. Applicants will submit two recommendations from persons who have known the applicant in academic or professional capacities. At least one from a faculty member is preferred. (Recommendations from friends and family will not be accepted.)
5. Applicants will submit their current resume.
6. English Proficiency Exams (for international applicants who are citizens of countries where the official language is not English): Either the Test of English as a Foreign Language (TOEFL) or the International English Language Testing Systems (IELTS) is required.
 - a) TOEFL Minimum acceptable score: Internet-based test: 100; paper-based test: 600.
 - b) IELTS Minimum acceptable score: 7.0
7. \$50 non-refundable application fee.
8. Prospective candidates, domestic or international, may be interviewed before admission, in person or by Skype.

Learning outcome goals

The MSW/MBA dual-degree program is designed to provide students with a unique combination of social work knowledge and skills, with exceptional strength in management decision-making and leadership. In addition to the MSW learning outcomes that are already in place, supplementary MSW/MBA objectives include:

- Proficiency in the management functions of accounting, finance, computer information systems, marketing, operations management, organizational behavior, human resource management, and social enterprise.
- Special emphasis on development of skills and abilities to lead strategically and to position an organization effectively for continued growth and development in both for-profit and nonprofit sectors.
- Knowledge and understanding of complex organizations, their development and transformation, administrative principles, the decision-making process, and competence in managerial functions.

- To provide applied learning experiences, the required field practicum will include professional supervision through appropriate concentration settings that will focus on community and human service organization management.

Program requirements

- A graduate-level course grade of B or higher must be maintained throughout the joint-degree program.
- The MBA program requires 51 credits for the part-time or one-year program, of which at least 34 credits must be from KGSB courses, while the balance maximum of 17 credits may be from other graduate programs.
- The following MBA "core" courses (total of 22.5 credits) are required:
 - a. BACC 2401 Financial Accounting (3 credits)
 - b. BECN 2401 Economic Analysis for Managerial Decisions (3 credits)
 - c. BQOM 2401 Statistical Analysis (3 credits)
 - d. BFIN 2409 Financial Management 1 (1.5 credits)
 - e. BMKT 2409 Marketing Management (1.5 credits)
 - f. BOAH 2409 Organizational Behavior (1.5 credits)
 - g. BQOM 2421 Decision Technologies (1.5 credits)
 - h. BSPP 2409 Strategic Management (1.5 credits)
 - i. BMIS 2409 Information Systems (1.5 credits)
 - j. BSEO 2401 Business Ethics & Social Performance (1.5 credits)
 - k. BIND 2444 Management Simulation Capstone (3 credits)
- 4. All MSW/MBA joint degree students will be required to take at least 34.5 credits of KGSB credits, consisting of the above 22.5 credits of core courses plus an additional 12 credits of KGSB electives. Thus, up to 16.5 credits will be accepted from courses successfully completed in the MSW program to achieve the total of 51 credits required for the completion of the Katz MBA degree.
- 5. All MSW/MBA joint degree students will be required to take a course entitled Social Entrepreneurship (1.5 credits) from the KGSB.
- 6. The following KGSB courses will count as credits towards the MSW degree:
 - a) BACC-2401 Financial Accounting (3 credits) will qualify as equivalent to SWCOSA-2085 Financial Management (3 credits), and will count as 3 credits for both the MSW and MBA programs,
 - b) BOAH-2409 Organizational Behavior (1.5 credits) and Strategic Management (1.5 credits) will qualify as equivalent to SWRES Organizational Research, and will count as 3 credits for both the MSW and MBA programs (SA track only),
 - c) SW General Elective 1-One 3-credit or two 1.5-credit required MBA courses (e.g., BECN-2401 Economic Analysis for Managerial Decisions, 3 credits), which will count as 3 credits for both the MSW and MBA programs, and
 - d) SW General Elective 2- One 3-credit or two 1.5-credit required MBA courses (e.g., BIND-2444 Competitive Management Simulation, 3 credits), which will count as 3 credits for both the MSW and MBA programs.

Thus, the double-counted credits make it possible for students to earn both degrees without having to take the total sum of credits required for completing the two degree programs separately.

a. It should be noted that a long-standing educational policy of the SSW is that students who, within the past seven academic calendar years, have received a social work degree from a CSWE-accredited undergraduate program are eligible for advanced standing. Those granted advanced standing during the admission process can receive up to 12 academic credits and six field education credits that will count towards completion of the MSW program.

b. Thus, full-time COSA students with advanced standing must earn grand total of 64.5 credits for CO students, and 61.5 credits for SA students (adding all MSW and MBA courses). This means total of 30 social work credits (including total of 12 field credits) to be taken by CO students and 27 credits (including total of 12 field credits) to be taken by SA students. Additionally, they must take minimum of 34.5 credits of MBA courses, which includes 22.5 and 12 credits of required and electives, respectively.

c. Full-time COSA students **without** advanced standing must earn grand total of 85.5 credits for CO students, and 82.5 credits for SA students (adding all MSW and MBA courses). This means total of 51 social work credits to be taken by CO students and 48 credits to be taken by SA students. Additionally, they must take minimum of 34.5 credits of MBA courses, which includes 22.5 and 12 credits of required and electives, respectively.

Master of Social Work with a Secondary Education Teaching Certificate

Overview

The Master of Social Work with a Certificate of Advanced Study in Teaching in Secondary Education (MSW/CAST) combined program is designed to cultivate school-based practitioners that will have a wide range of skills for supporting vulnerable adolescents and families in urban school contexts. The MSW/CAST curriculum design incorporates the person-in-context approach of social work with culturally relevant secondary teaching methods. As such, graduates will be trained to identify, design, and facilitate programmatic responses to the unique needs of children in schools in urban communities, and also to enhance classroom teaching and student learning through their specialized evidence-based expertise.

The program is efficiently designed to be completed in two calendar years (5 semesters), and has two distinct components. First, the teaching certification portion is a two-semester fall-spring full-time program preparing students to be secondary education teachers (grades 7-12) in one of 5 core disciplines: English, Mathematics, Science, Social Studies, or Foreign Language. Then starting in the summer of year two, the 3-semester MSW degree experience prepares students for leadership roles in urban education in high need communities. By combining courses of study in the School of Education and School of Social Work, graduates will:

- 1) Understand the learning environment of students in the urban settings
- 3) Understand schools as organizations in context
- 2) Utilize culturally relevant classroom instruction to promote academic growth of adolescents
- 4) Facilitate intervention programs and student support services that focus on the social and emotional needs of students

Upon successful completion of this combined program graduates will be awarded a Masters Degree in Social Work (MSW) from our direct practice concentration, and certifications in secondary school teacher (grades 7-12) and school social work (pending praxis and licensure exams for relevant certifications).

Admissions and Prerequisites

Candidates for this combined program will need to enter having completed sufficient credits at the baccalaureate or higher level in fields relevant to one of the five secondary teaching disciplines: English, Mathematics, Science, Social Studies or Foreign Language. If a candidate is from a related field and just shy of credits (e.g. political science), they may choose to take relevant courses prior to enrollment. Also, two education courses (6 total credits) are also required as prerequisites and are available the summer before the start of the program (Foundations of Special Education; Teaching English Language Learners). All prerequisites must be met by the start of the first fall semester of year 1.

Interested candidates should apply to the School of Social Work MSW program and the School of Education Instruction 1 program separately, indicating their interest in the MSW/CAST program where asked in the respective application materials. Applicant qualifications for each school will be reflective of the general standards of each individual program. Candidates who are accepted to both programs will be accepted to the combined program, and will be notified and welcomed to the upcoming cohort.

Program Requirements

Coursework. In this uniquely rigorous and efficient program, students will meet an adapted set of the core requirements of both schools, whereby a number of pre-approved courses electives in one program count dually toward course requirements in the other. The total number of credits taken will be 51-54 in Social Work and 22-25 in Education. These credits include required field experiences for both programs.

Fieldwork. The Professional Year (year 1) School of Education field experiences will consist first of ten hours a week during the fall semester observing and teaching in a grade 7-12 classroom alongside an experienced mentor teacher. In the spring semester, the students will complete a full-time student teaching experience in the same classroom. Then in the summer semester following year 1, students will complete their foundation field placement for the School of Social Work. Finally, the concentration field practicum for social work will occur in the fall and spring semesters of year two. This field practicum will be in a primary social work role within a school setting.

Tuition

Students will pay the tuition of whichever school they are enrolled in for the majority of their credits that term. Specifically, fall and spring Year 1 students will pay School of Education tuition, and the remainder of the program will be paid to the School of Social Work. Significant scholarship support is available to students in the program.

Employment

The secondary education focus, along with the 2 calendar year quickened pace, makes MSW/CAST program one-of-a-kind nationally. Upon graduation, students will be prepared to serve as either a School Social Worker or a Classroom Teacher. To the teaching profession, graduates bring therapeutic, person-in-context, and family-relations perspectives that will uniquely equip them to build positive relations and supports for students in particularly challenging contexts. Conversely, a school social worker with teacher training will have enhanced skills to support teachers in identifying effective interventions to address psychosocial issues in the classroom. More broadly, a social work with

teacher training will be able to construct and deliver instruction more effectively to impact change and understanding amongst his/her clients, colleagues, and staff.

In sum, graduates of this program are uniquely qualified for, although not limited to, work in high need urban educational environments. Ultimately, this degree is a rare and powerful distinction for individuals looking for enhance their preparation and employability in secondary schools.

PhD Joint Degree Programs

The School of Social Work offers two joint degree programs to PhD students: one leading to the MSW and the PhD and another with the School of Public Health. (Separate applications are required for either MSW or MPH admission.)

Joint Degree

Social Work, JD/MSW

Master of Social Work/Juris Doctorate

The School of Social Work (SSW) and the School of Law offer a cooperative educational program through which students may earn both the Master of Social Work (MSW), the primary professional degree in social work, and the Juris Doctor (JD) degree, the first professional degree in law. The MSW-JD program will enable students with interests in a wide range of areas where law and social work converge - such as child welfare, aging, health, mental health, juvenile and criminal justice, family issues, and housing - to engage in a highly integrative educational experience that will include academic courses, field placements, and research opportunities at the intersection of both professions. The joint degree program allows one to earn both degrees in four years rather than five.

Increasingly, social work professionals and attorneys are working together to promote the well-being of their clients. These areas of convergence exist in practice with individuals, families, and groups as well as with communities and organizations. The intersection of legal and social work concerns is also evident at the policy level, and research from both professional disciplines has been used to inform these activities. It is not uncommon for practitioners from both fields to work in concert to draft, implement, and/or advocate for legislation at the local, state, and federal levels.

The MSW-JD program is one among several programs that the Schools of Social Work and Law have jointly established throughout their long and rich history of collaboration.

Neither degree may be granted prior to fulfillment of all requirements for the joint degree program.

Social Work, MID/MSW

Joint Degree Programs with the Graduate School of Public and International Affairs

Master of Social Work/Master of Public Administration

Master of Social Work/Master of Public and International Affairs

MSW/Master of International Development

Three unique joint degree programs are offered by the University of Pittsburgh School of Social Work, through its COSA concentration, and the Graduate School of Public and International Affairs. These joint programs provide students with a broad professional education to prepare them for eventual service in urban non-profit and government organizations, community development policy, and social and urban planning. They provide experienced students with opportunities to expand their knowledge base and enable other students to develop more marketable professional skills than are usually acquired through single-degree programs. Students in these joint programs earn a Master of Social Work from the School of Social Work and a Master of Public Administration, Master of Public and International Affairs or a Master of International Development from the Graduate School of Public and International Affairs.

Students must be admitted to both programs in order to qualify for admission to the joint degree program. Degree candidates must meet the minimum foundation, concentration, and specialized requirements of both schools, except where substitutions are appropriate and approved by the faculty advisors. Depending upon which joint degree program the student elects, the total number of credits required for graduation ranges from 72 to 88 credits. For most students, this means that individual programs can be completed within six to seven terms of full-time residency. Students

electing to terminate the joint degree program before its completion must complete all the work required by the respective schools for either degree in order to receive that degree separately.

Graduate School of Public and International Affairs

Complex and emerging issues influence us, our towns, our countries, and our world: Fair housing. Economic and community development. Environmental sustainability. Emergency preparedness. Disaster response. Human rights. International security.

We live in a world both illuminated by great hope and darkened by great conflict. Make a difference and take the lead. Prepare yourself with a comprehensive education from the Graduate School of Public and International Affairs (GSPIA) at the University of Pittsburgh.

Your academic options begin with GSPIA's integrated academic structure of three distinct master's degree programs offering eight different majors. Social Work, MPH/MSW

MSW/MPH

MSW/Master of Public Health Program

What is the MSW/MPH joint degree program?

The joint degree program is collaboration between the School of Social Work and the School of Public Health, Department of Behavioral and Community Health Sciences. Students graduate with both a Master of Social Work and Master of Public Health degrees and are prepared to pursue a wide range of social work and public health careers to improve the health of a target population and/or community. Students participate in class work, field placements, and leadership seminars to acquire the knowledge and skills to address health problems.

White Paper Stemming from the National Public Health Social Work Summit

What principles guide this program?

The program has a strong commitment to social justice, the elimination of health disparities, and a holistic definition of community and population health, including individuals' physical health conditions and the behavioral and social ecological determinants of health. Moreover, both social work and public health share a commitment to involving consumers/community members in the development of policies and in the planning, delivery and evaluation of health promotion interventions, health behavior change, and health education.

What are the advantages of the program?

- Students develop knowledge, values and skills for *both* professional social work practice and (e.g. direct practice or community organization/social administration) and community public health practice (e.g. primary, secondary, and tertiary prevention).
- Advising and mentoring focuses on supporting students to achieve their professional goals (e.g., selection of field placements, papers written as part of course-work, leadership training activities, focus of final thesis/essay in the MPH program).

- Students increase their career marketability as a result of being able to work from a cross disciplinary perspective. Students have gone on to jobs, for example, in various social service organizations, health departments, other government agencies, academic institutions, think tanks, and the Centers for Disease Control and Prevention.

What competencies will individuals gain as a result of the program?

- Application of theoretical principles to primary, secondary, and tertiary health interventions targeting the promotion of health behavior change, enhancement of the environment, and the elimination of risk factors in neighborhoods and communities that contribute to disease and poor health status outcomes
- Application of principles of community-based participatory research and practice to community health assessment
- Application of quantitative and qualitative skills to program planning and evaluation research
- Processes involved in community health planning, program implementation, and program evaluation
- Written communication to inform the public, policymakers, and other key-stakeholders
- Develop skills in micro practice with individuals, families, and groups or macro practice

What are the requirements of the program?

Typically a three-year curriculum plan for Direct Practice or COSA (2.5 years for advanced standing students)

- MSW/ MPH DP Course Requirements
- MSW/MPH COSA Course Requirements
- 33 Social Work credits (plus 18 field placement credits) **NOTE: Beginning 2019-20 academic year, the required BCHS 2525 Applied Research Methods course(3crs.) fulfills the SWRES 2021 Foundation of Social Work Research course (3crs.) In addition, MSW/MPH students who are pursuing the IHC certification are not permitted to take SWBEH 2066HB as a second-level HBSE course. The content of SWBEH 2066HB significantly overlaps with the course content of BCHS2520. Students are required to choose another second-level HBSE course.**
- 36 Public Health credits

Some highlights of the program are:

- 18 field placement credits representing two separate field placement experiences, foundation and concentration, coordinated by the School of Social Work, Office of Field Education.
- Several certification programs are offered at each School
- Public Health final essay or thesis

Note: Students register for two years (two fall and spring semesters) through the School of Social Work and one year (one fall and spring semester) through the School of Public Health. You are eligible for funding through the School of Social Work for a maximum of 2 years (these are the two years you register through that school). You must be registered for **at least 9 credits** in the School of Social Work during the two years you register in that school to be eligible for funding from the School of Social Work. **You must have both school advisors approve your course schedule each term. Your advisor in the School of Social Work will lift your "hold" to register each term.**

What types of careers do graduates of the MSW/MPH joint degree program engage in?

- Patient Services Managers
- Research Scientist
- Policy Advocates
- Program Directors
- Communication Directors
- Adjunct and Part-time faculty in MSW and BSW degree programs
- Bridging the gap between the public's health and social work practice
- Program Planners

Application Process

Students must apply separately to the School of Social Work and the School of Public Health's Office of Admissions (GSPH). The easiest way to apply to the Master's Degree in Social Work Program at the University of Pittsburgh School of Social Work is to use our online application, and to apply to the Master's Degree of Public Health in Behavioral and Community Health Sciences, School of Public Health (GSPH) use online application.

Social Work, MPH/PhD

The joint MPH/PhD program, is designed for social workers seeking administrative, policy, and/or academic positions.

Objectives

The program's overall educational objective is to train social workers for leadership positions in public health systems and prepare them for research and teaching posts.

This involves:

- a primary focus on populations at risk rather than individuals
- use of an interdisciplinary approach
- a focus on primary prevention of social and health problems
- reliance on systematic data collection and analysis for administrative decision making

The learning objectives include:

- Understanding incidence, prevalence, prevention, treatment, and epidemiological trends of the health and social needs of vulnerable populations
- Becoming aware of the health and social work systems available for prevention, treatment, and rehabilitation
- Understanding the interrelationship of the identified population-at-risk with other populations
- Understanding the impact of socioeconomic, racial, cultural, geographical, and financial factors on health service delivery and use
- Understanding the technical and legal issues related to service delivery to the population-at-risk
- Understanding the implications of legislation and policy on program funding, planning and development, and patterns of service delivery

It is expected that graduates also will be prepared through the educational experience to:

- Coordinate population specific health services within primary, secondary, and tertiary sites
- Develop social work consultation and training skills and apply them to interdisciplinary settings
- Use epidemiological data and statistics, and conduct community needs assessments to support program and policy development
- Prepare technical reports, proposals, and publications

Academic Curriculum

The MPH/PhD curriculum comprises core courses in public health and social work, with a heavy emphasis on research methods and statistics. The following list of courses is provided as an example, as the exact course requirements may vary by student.

GSPH Core & BCHS Core Courses (minimum 33 credits):

BIOST 2011 Principles of Statistical Reasoning (3 credits)
EOH 2013 Environmental & Occupational Health (2 credits)
EPID 2110 Principles of Epidemiology (3 credits)
HPM 2001 Health Policy & Management in Public Health (3 credits)
PUBHLT 2033 Foundations in Public Health (1 credit)
PUBHLT 2015 Public Health Biology (2 credits)

PUBHLT 2034 Public Health Communications (2 credits)

PUBHLT 2035 Applications in Public Health (2 credits)
BCHS 2520 Theories of Health Behavior and Health Education (1 credit)

BCHS 2992 Systems Theories and Approaches (1 credit)

BCHS 2990 Social Dynamics (1 credit)
BCHS 2525 Applied Research Methods (3 credits)

BCHS 2554 Intro to Community Health (3 credits)
BCHS 2521 Master's Essay/Thesis (1-3 credits)
BCHS 2503 Practicum (3 credits)

SSW Courses (50 credits):

SWRES 3029 Inferential Statistics (3 credits)
SWRES 3021 Multivariate Methods (4 credits)
SWRES 3020 Research Methods I (3 credits)
SWRES 3022 Capstone I (1 credit)
SWRES 3023 Capstone II (3 credits)
SWGEM 3053 Social Science Theory I (3 credits)
SWGEM 3044 Social Science Theory II (3 credits)
SWWEL 3030 Evaluation of American Social Welfare History and Policy (3 credits)
SWWEL 3037 Social Policy Analysis (3 credits)
SWGEM Seminar in Social Work Education (3 credits)
One additional policy course (2-3 credits)

One additional statistics course

One additional methods course

General electives (12 credits)

Frequently Asked Questions

How long does it take to complete the program?

It takes two to three years for the PhD/MPH course work, and approximately two additional years to complete doctoral research.

What are the research areas of the faculty?

Read about the School of Social Work faculty or visit the School of Public Health web site for information about faculty research interests.

Tuition and fees

Read about the School of Social Work PhD funding or **Financial Aid**. Visit the School of Public Health Web site for information about their **tuition and fees**.

Admissions

Those students seeking the MPH/PhD are admitted to both the School of Public Health **and** the School of Social Work as joint students. Therefore, applicants must also meet the admission requirements of the doctoral program of the School of Social Work, and formal applications must be submitted to **both** programs.

Those seeking further information regarding the requirements and processes for this joint degree program are encouraged to contact:

Valire Carr Copeland
Professor
School of Social Work
University of Pittsburgh
2117 Cathedral of Learning
Pittsburgh, PA 15260
Email address: sswvcc@pitt.edu

or

Steven M. Albert
Professor and Chair
Behavioral and Community Health Sciences
6126 Public Health
Pittsburgh, PA 15261
412-383-8693
smalbert@pitt.edu

Requirements:

This joint degree requires the completion of a minimum of 81 credits, a comprehensive examination and successful defense of a dissertation. Graduate Students in the joint MPH/PhD program generally apply 12 credits from the MPH curriculum toward their elective course work for the PhD.

Social Work, MPA/MSW

Joint Degree Programs with the Graduate School of Public and International Affairs

Master of Social Work/Master of Public Administration Master of Social Work/Master of Public and International Affairs MSW/Master of International Development

Three unique joint degree programs are offered by the University of Pittsburgh School of Social Work, through its COSA concentration, and the Graduate School of Public and International Affairs. These joint programs provide students with a broad professional education to prepare them for eventual service in urban non-profit and government organizations, community development policy, and social and urban planning. They provide experienced students with opportunities to expand their knowledge base and enable other students to develop more marketable professional skills than are usually acquired through single-degree programs. Students in these joint programs earn a Master of Social Work from the School of Social Work and a Master of Public Administration, Master of Public and International Affairs or a Master of International Development from the Graduate School of Public and International Affairs.

Students must be admitted to both programs in order to qualify for admission to the joint degree program. Degree candidates must meet the minimum foundation, concentration, and specialized requirements of both schools, except where substitutions are appropriate and approved by the faculty advisors. Depending upon which joint degree program the student elects, the total number of credits required for graduation ranges from 72 to 88 credits. For most students, this means that individual programs can be completed within six to seven terms of full-time residency. Students electing to terminate the joint degree program before its completion must complete all the work required by the respective schools for either degree in order to receive that degree separately.

Graduate School of Public and International Affairs

Complex and emerging issues influence us, our towns, our countries, and our world: Fair housing. Economic and community development. Environmental sustainability. Emergency preparedness. Disaster response. Human rights. International security.

We live in a world both illuminated by great hope and darkened by great conflict. Make a difference and take the lead. Prepare yourself with a comprehensive education from the Graduate School of Public and International Affairs (GSPIA) at the University of Pittsburgh.

Social Work, MSW/MDiv

Pittsburgh Theological Seminary and the Graduate School of Social Work at the University of Pittsburgh present the unique opportunity to receive a joint degree in Master of Divinity (M.Div.) and Master of Social Work (M.S.W.) for those students passionate about pursuing their call to social work both inside and outside of a church setting.

What Makes Us Special?

As the oldest continuous joint degree program in the country, established in 1967, the MDiv/ MSW joint Masters degree program allows students to complete their coursework and graduate in four years of post-baccalaureate study instead of the usual five. Within the joint program students will still be provided a full course of study in both theology and social work, along with the academic support and one-on-one attention given by our excellent faculty. In order not to skip any required courses and still graduate in the four years, the MDiv/MSW program counts certain courses taught in one school as electives in the other and vice-versa, along with developing specialized field placements.

Who Is This Program For?

This joint masters program is built for those seeking to integrate their love of theology with their heart for social work and to make a change, along with those interested in pursuing a career in pastoral counseling or other forms of counseling. Positions that have been held by MDiv/MSW graduates in the past include: chaplain/clinical pastoral education supervisor for a health care facility, associate director of campus ministry, chaplain/chair committee holder at a nursing home, executive director of a pastoral institute, Christian counseling, various work with nonprofits, and so many more.

With the Seminary's campus located in the East Liberty / Highland Park neighborhood of Pittsburgh, PTS is within driving distance of other cities in Pennsylvania like Johnstown, Harrisburg, Philadelphia, State College, Allentown, Scranton, and other rural regions as well. Pitt classes meet at the University of Pittsburgh in Oakland.

How the MDiv/MSW Degree Works

Candidates for the joint degree who enter the program through the Seminary will concentrate on theological studies during the first two years. Application should be made to the University of Pittsburgh Graduate School of Social Work during the first term of the second year at the Seminary. The third and fourth years will be spent predominantly at the School of Social Work. Being that degrees in the joint program will be awarded concurrently, it is important to note that a student who resigns from one program will be subject to all requirements for graduation from the remaining degree program.

The easiest way to apply to the Master's Degree in Social Work Program at the University of Pittsburgh School of Social Work is to use our online application.

Pittsburgh, PA 15260

Email address: kjc45@pitt.edu

After earning her joint Master of Divinity/Master of Social Work degrees in 2005 from Pittsburgh Theological Seminary and the University of Pittsburgh, alumna Elizabeth Trexler went on to be a missionary in Southeast Asia and then served as associate director of Catholic campus ministry at Bloomsburg University. She says, "The joint degree program with masters in social work and masters in divinity is something that you can't put a price on. It just works so well together."

MDiv Program Curriculum Sequence

Courses are generally three credit hours. When followed on a full-time basis (12-13 credits), the program is completed in three academic years. Student pastors are encouraged to spread their degree work over four academic years.

Social Work, MSW/PhD

An MSW degree from an accredited school of social work is required to be considered for admission to the PhD program. Applicants without an MSW degree who wish to pursue a social work academic career may apply to the joint MSW/PhD program. Such applicants typically are interested in grounding themselves in the practice base of the social work profession, while also seeking to develop their advanced research and teaching skills. Preference is given to MSW/PhD applicants who have prior social work-related professional experience.

Separate applications are required for admission to each program. Those seeking further information regarding this dual degree program are encouraged to contact Dr. Catherine Greeno, Associate Professor and Doctoral Program Director, at kgreeno@pitt.edu or 412-624-5292.

University Center for International Studies

University Center for International Studies

Mediterranean Studies Certificate

The University Center for International Studies (UCIS) is the primary resource for initiating and managing international studies and global programs and support services while promoting the University's reputation as a global leader in research and education. A key goal of UCIS is to cultivate globally capable and engaged students toward lives of impact in their community and beyond. This is achieved by certificate programs, study abroad, professional development opportunities, support for research and teaching, and a wide array of co-curricular offerings. UCIS offers 11 graduate certificates at both a masters and Ph.D. level to meet the needs of students from any school or department. Certificates are academic credentials that attest to acquisition of international knowledge about a particular world region or global theme, cross-cultural understanding, and language proficiency relevant for international careers or for advanced degrees.

Certificates are available in:

- African Studies
- Asian Studies
- European Union Studies
- Global Studies
- Latin American Social and Public Policy Studies
- Latin American Studies
- Mediterranean Studies
- Russian, East European and Eurasian Studies
- Transatlantic Studies
- Transnational Asia Studies
- West European Studies

The certificates are administered through the African Studies Program, Asian Studies Center, European Studies Center, Global Studies Center, Center for Latin American Studies, and the Center for Russian, East European and Eurasian Studies. All six centers are designated by the federal government as National Resource Centers and can offer federal Foreign Language and Area Studies (FLAS) Fellowships for both academic year and summer study.

UCIS certificates evidence language proficiency, regional knowledge and cultural competency that students find useful for international careers.

Admission to Certificate Programs

For admission, graduate students must first apply to a graduate program at one of the Schools. Applicants are encouraged to contact a UCIS international advisor as early as possible with questions about their interest in a world region or global theme. Formal admission to the UCIS certificate programs is accomplished by completing a simple application form. Generally, no additional tuition is charged for enrollment as a certificate student. Students holding a master's degree from an accredited institution may obtain any of the UCIS graduate certificates without enrolling in a graduate degree program at the University of Pittsburgh. They may apply directly to the UCIS center or program if they wish to enroll only in the certificate program.

Certificate Requirements

UCIS Graduate certificates are awarded after completion of all certificate requirements *as well as* completion of all requirements for the master's degree, or *after* the student has passed the comprehensive examinations for the doctorate. Upon graduation, both the academic degree and the certificate are posted on the student's transcript. Specific certificate requirements for each international studies certificate are listed under the program offerings below.

Advising

All UCIS certificate programs provide personalized advising services to students interested or registered in its programs in addition to those routinely offered by the students' major advisors. Center advisors assist in selecting courses, language training, and arranging internships or study abroad to fit the students' academic and personal interests. See the program offerings below for contact information.

The Graduate Certificate

The African Studies Program offers the graduate certificate in African Studies designed to provide students the opportunity for the interdisciplinary study of Africa. Students seeking a graduate degree at any school within the University may pursue a graduate certificate in African Studies by enrolling in the program and meeting the stipulated requirements. The Graduate Certificate program is specifically designed for graduate students who desire an opportunity to intensify their study of Africa and develop real insights into issues of critical importance in their fields of research and career interests as relates to Africa. The program provides students with fundamental grounding in African Studies through exposure to the major areas of research and knowledge on Africa in their respective disciplines. In addition, students are provided with opportunities to participate in research projects, symposia, lectures, conferences, and workshops on Africa. They are also encouraged to participate in internship opportunities with a specific focus on Africa.

Admission to the Certificate Program

Although formal admission to the program is allowed at any point in the student's academic career, students are encouraged to apply for admission early enough to allow them ample time to complete all the requirements in a timely manner. Application information can be obtained from the African Studies Web site or students can apply for admission to the program at our office.

The Graduate Certificate

The African Studies Program offers the graduate certificate in African Studies designed for students who wish to intensify their study of Africa as a world region. Students seeking a graduate degree at any school or department within the University may pursue a graduate certificate in African Studies by enrolling in the program and meeting the stipulated requirements. This certificate is specifically designed for graduate students who desire to develop real insights into issues of critical importance in their fields of research and career interests as relates to Africa. The program provides students with fundamental grounding in African Studies through exposure to the major areas of research and knowledge on Africa in their respective disciplines and professions. In addition, students are provided with opportunities to participate in research projects, symposia, lectures, conferences, fellowships, internships and workshops on Africa. Successful completion of a certificate in African Studies can provide an important building block for careers in international development, foreign service, government, business, law, academia and public service.

Certificate Requirements

To receive the Graduate Certificate in African Studies, students must complete the following requirements:

- **African Studies Courses:** Students will complete six courses (18 credits) with at least 25% or more Africa related content. One of these courses must be taken from outside the student's department or professional school. Any Graduate Class can count towards the Certificate if there is at least 25% African content and individual students may focus on an issue or country in Africa while doing their project and or research paper for the class. In special instances, with the consent of the academic advisor, approved upper-level undergraduate courses may be accepted. For a full list of approved undergraduate courses, [click here](#).
- Graduate students should complete a minimum of 6 unique credits of coursework. In other words, at least 6 credits of the course work used to complete the requirements of any graduate level certificate in UCIS must be in addition to the credits used to complete the student's primary degree program. In consultation with the academic advisor, students may fulfill these standards through one of the following options, [click here](#)
- For students completing two graduate level UCIS certificates, *at least nine (9) credits* of the course work used to complete the certificate requirements *must be in addition to the credits used to complete the student's primary degree program*. At least 3 of these credits must be in content coursework. *All 9 cannot be language course credits*
- **Language Proficiency:** Students will complete two years (4 semesters) of college level study of an African language or equivalent Proficiency of a European language other than English relevant to African Studies as a consequence of Africa's historical experience—a student with two years or more of French, Portuguese, German or Spanish meets the language proficiency requirement.

- **Capstone Research Paper:** Each student will complete a **capstone paper, which** will be the culmination of his or her learning experience in the African Studies program. Each student will select a topic focused on his or her area of concentration and work on this project under the supervision of an African Studies affiliated faculty.
- **GPA in African Studies Courses should be 2.5 or higher.**

Academic Opportunities

Internships: There are several internship opportunities locally and in Africa for student internships. Meet with the academic advisors to learn about these opportunities and sources of funding.

Professional Development: The African Studies Program offers graduate fellowships every semester where a student is given full exposure to the field of African Studies while they also develop their professional skills such as networking, public speaking, communications, media relations, critical thinking, and knowledge of Africa through the various assignments. Graduate students will especially build their outreach, networking and organizational skills through coordinating and hosting community engagement programming.

UCIS International Career Toolkit Series: The Toolkit Series introduces students to the multitude of careers available by meeting and interacting with professionals in a variety of fields. Many of the guests are Pitt alumni and those that graduated with an International Studies Certificate. By attending one of these panels students will gain insight on career choices, what specific careers entail, how to articulate and prepare for short and long term career goals, and utilize resources at Pitt to make their goals a reality. Each year, students enrolled in the certificate program will have the opportunity to visit Washington, DC to interact with professionals and learn about a variety of opportunities for employment possibilities.

African Studies Certificate

The African Studies Program offers the Graduate Certificate in African Studies and the Advanced Certificate in African Studies designed for students who wish to intensify their study of Africa as a world region. Students seeking a graduate degree at any school or department within the University may pursue a graduate certificate in African Studies by enrolling in the program and meeting the stipulated requirements. These certificates are specifically designed for graduate students who desire to develop real insights into issues of critical importance in their fields of research and career interests as relates to Africa. The program provides students with fundamental grounding in African Studies through exposure to the major areas of research and knowledge on Africa in their respective disciplines and professions. In addition, students are provided with opportunities to participate in research projects, symposia, lectures, conferences, fellowships, internships, and workshops on Africa. Successful completion of a certificate in African Studies can provide an important building block for careers in international development, foreign service, government, business, law, academia, and public service.

Language Proficiency

Students must complete one year of the study of either an indigenous African language or a European language that is relevant to African studies. Native speakers of an African language, or relevant European language, can have the language requirement waived.

Content Courses

12 credits of content coursework are required. 9 credits can overlap with the major. 3 credits must be outside the student's major and in addition to the required credits in the major.

Students may contextualize non-credit-bearing internships that are required in various graduate degree programs as credit-bearing experiences for UCIS certificate programs. Prior approval must be received from the academic advisor to pursue this option.

Research Paper

This research paper/project is the culmination of the student's learning experience and clearly demonstrates in-depth knowledge of African studies issues in at least one academic discipline. The capstone must be an assignment submitted as part of coursework, such as a final term paper and must have received a B or above grade. The paper must be at least 7 to 10 pages long and contain a minimum of 10 references.

Graduation Presentation

The graduation presentation is an opportunity for students to reflect on the African Studies Certificate and how their years of study have culminated into enhancing their knowledge and understanding of Africa. The presentation contains 4 slides, where students are asked to reflect on their research paper, experiential learning, and growth in African Studies. They are asked to submit a 1-page reflection on their presentation. The ASP uses the presentation to evaluate the certificate program to examine if the students have enhanced their knowledge and understanding of Africa. Students can choose to do an online portfolio instead of the presentation and paper if they so wish.

The Asian Studies Center at the University of Pittsburgh is widely recognized as being among the best and most comprehensive in the country in research, public service, and teaching about East Asia. The center's mandate is to promote an enhanced understanding of East Asia, South Asia, Southeast Asia, and the Pacific Islands through exceptional undergraduate and graduate academic programs, strong interdisciplinary faculty development, and energetic community outreach. ASC has nationally recognized programs in Chinese and Japanese language and culture studies, with growing strengths in Indian and Korean studies. Its affiliated faculty spans the disciplines. Typically more than 3,500 graduate and undergraduate students enroll each year in Asia-related courses. Undergraduate students from any field or school interested in Asia can supplement and strengthen their major field of study by enrolling in the Asian Studies certificate program.

The East Asian Library (EAL)

<http://www.library.pitt.edu/east-asian-library>

Located in Hillman Library, the EAL contains significant collections of books and periodicals in both the Chinese and Japanese languages, in addition to materials in English and other Western languages housed in the general collections. Those pursuing research on current topics concerned with Japan can make use of the Japan Information Center (JIC), which gives users direct access to a wide array of government documents, economic reports, and a wide range of data related to social and economic issues.

Financial Assistance

Asian Studies Certificate students may be eligible for a variety of scholarships and research awards. For information, visit <http://www.ucis.pitt.edu/asc/funding/graduate>

Advanced Certificate Requirements

The Advanced Certificate in Asian Studies may be earned by U.S. and international students from any department or school at the University. The certificate combines the language training and multidisciplinary area studies necessary for both communicative and cultural competence. The certificate is designed for students who wish to intensify their study of Asia, either because they would like to be able to use their knowledge of that critical part of the world in their careers after graduation, or because they recognize the importance of an understanding of Asian history, language, and culture for all well-informed people.

- **A minimum of five upper-level courses or graduate seminars dealing with Asia, in at least two departments.** The five courses must include one seminar outside the student's major department.
- Graduate students should complete a minimum of 6 unique credits of coursework. In other words, at least 6 credits of the course work used to complete the requirements of any graduate level certificate in UCIS *must be in addition to the credits used to complete the student's primary degree program.* In consultation with the academic advisor, students may fulfill these standards through one of the following options:
 - Students may contextualize non-credit bearing internships that are required in various graduate degree programs as credit bearing experiences for UCIS certificate programs. Prior approval must be received from the academic advisor to pursue this option.
 - Students who can add content courses without affecting their tuition bill will be encouraged to do so.
 - Students who are exempt from the language requirement because of previous coursework or heritage language skills may use language course credits towards the requirement for "additional work beyond the graduate degree.
 - The 6 credits may be comprised of the following combinations:

- Two language courses (* see notes below)
- A language course (* see notes below) and a content course
- Two content courses

* Language courses may be used in the following circumstances:

For certificate programs that require three years of language proficiency, students may count language courses in the third year (i.e. grammar, conversation, courses taught in target language) that are above the intermediate level.

For students in any certificate program who are exempt from the language requirement due to previous coursework or as a heritage speaker, the introductory courses in a second language (either LCTLs, or a commonly taught language with a clear and stated relevance to their research or professional goals) will count.

For students completing two graduate level UCIS certificates, *at least nine (9) credits* of the course work used to complete the certificate requirements *must be in addition to the credits used to complete the student's primary degree program*. At least 3 of these credits must be in content coursework. *All 9 cannot be language course credits.*

- **A research paper.** The student can fulfill this requirement by presenting either an interdisciplinary seminar paper or thesis (which draws upon more than one scholarly discipline). The paper can be used to complete departmental requirements for a graduate degree as well as for the certificate, but must include research using the student's approved Asian language.
- **Demonstration of proficiency in reading and speaking an approved Asian language related to one of the student's countries or regions of interest.** Proficiency is interpreted to mean at least three years of study or the equivalent, and may be demonstrated by successfully completing courses or by passing a special examination.
- **GSPIA option:** Students enrolled in the Graduate School of Public and International Affairs (GSPIA) may fulfill a more targeted set of requirements for their program. For details, visit <http://www.ucis.pitt.edu/asc/academics/certificate-program/graduate-certificate-program>
- **GPA requirement** is 3.0 for all courses to be counted towards the Asian Studies Certificate.

Financial Assistance

Asian Studies Certificate Students are eligible for a variety of scholarships, grants, and fellowships for research, presentations at conferences, language learning, and tuition replacement. For information visit <http://www.ucis.pitt.edu/asc/funding/graduate>.

Asian Studies Certificate

The Certificate in Asian Studies may be earned by U.S. and international students from any department or school at the University. The certificate combines the language training and multidisciplinary area studies necessary for both communicative and cultural competence. The certificate is designed for students who wish to intensify their study of Asia, either because they would like to be able to use their knowledge of that critical part of the world in their careers after graduation, or because they recognize the importance of an understanding of Asian history, language, and culture for all well-informed people.

Language Proficiency

Students must demonstrate language proficiency in an Asian language equivalent to two years of a college language or higher. This can be demonstrated through language courses at Pitt, in the student's undergraduate institution or through transcripts of reputable language programs, or through examination of language proficiency.

Content Courses

Students must complete four courses with significant Asian Studies content. At least one of these courses must be taken in a discipline outside of the student's major.

Students who are exempt from the language requirement because of previous coursework or heritage language skills may use language course credits towards the requirement for additional work beyond the graduate degree. Students may contextualize non-credit-bearing internships that are required in various graduate degree programs as credit-bearing experiences for UCIS certificate programs. Prior approval must be received from the academic advisor to pursue these options.

Research Paper, Presentation, or Project

Students must submit a significant research paper, project, or presentation as a representation of their work in Asian area studies. Papers must demonstrate engagement with issues, regional concerns, and/ or languages of Asia. Students should consult with the advisor for Asian Studies about questions regarding the research paper, presentation, or project.

12 Credits

Transnational Asia Advanced Certificate

The new Transnational Asia certificate will focus on the expansive mobility, connectivity, and communication between Asia and the world, and the impact of these relationships in fields such as economics, history, business, anthropology, political science, and public policy, among others. This new graduate certificate program will help students prepare for international careers with a global or Asian focus. The Transnational Asia Advanced Certificate would allow students with a strong linguistic background, or students who were working intensively on more than one Asian language to document their advanced skills in Asian languages and flows. The proposed Transnational Asia Certificate would complement, not replace, graduate programs in traditional academic disciplines, while also making certificate coursework more attainable and desirable graduate students in professional programs. The interdisciplinary and transnational nature of the certificate would encourage students to take courses in multiple departments and thus work to increase student exposure to departmental offerings outside of their majors and minors.

Course Requirements

- EFOP 2106 - INTERNATIONAL AND GLOBAL EDUCATION
- EFOP 2355 - ADVANCED QUALITATIVE RESEARCH
- EFOP 3347 - INTERNATIONAL ORGANIZATION DEVELOPMENT EDUCATION
- ANTH 2541 - REGIONAL SETTLEMENT PATTERNS
- ANTH 2724 - THE ANTHROPOLOGY OF SCIENCE: GLOBAL PERSPECTIVES
- CHIN 2047 - CHINESE AND WESTERN POETRY
- CHIN 2059 - ADAPTED FOR THE SCREEN: CHINESE LITERATURE AND FILM
- CHIN 2084 - MASTERPIECES OF CHINESE LITERATURE: MODERN
- CHIN 2089 - THE WORLD OF CHINA
- EAS 2005 - APPROACHES TO EAST ASIA
- EAS 2702 - READING JAPANESE 2
- HAA 2612 - SPECIAL TOPICS-ASIAN
- HAA 2641 - MODERN AND CONTEMPORARY CHINESE ART
- HIST 2020 - INFORMATION ECOSYSTEMS: INTERDISCIPLINARY USES OF DIGITAL METHODS
- HIST 2043 - SOCIAL MOVEMENTS

- HIST 2400 - APPROACHES TO ASIAN HISTORY
- HIST 2737 - HISTORY FROM BELOW
- JPNSE 2035 - PRAGMATICS OF JAPANESE
- JPNSE 2057 - JAPANESE CULTURE AND SOCIETY THROUGH CINEMA
- JPNSE 2071 - THE WORLD OF JAPAN
- JPNSE 2080 - GHOSTS, MASKS AND ACTORS
- PIA 2301 - INTERNATIONAL POLITICAL ECONOMY
- PIA 2308 - COVERT ACTION IN WORLD POLITICS
- PIA 2370 - TERRORISM AS AN INTELLIGENCE PROBLEM
- PIA 2424 - POLITICS ,DEVELOPMENT AND CONFLICT IN THE MIDDLE EAST
- PIA 2530 - GENDER EQUALITY AND THE UNITED NATIONS

Transnational Asia Graduate Certificate

The new Transnational Asia certificate will focus on the expansive mobility, connectivity, and communication between Asia and the world, and the impact of these relationships in fields such as economics, history, business, anthropology, political science, and public policy, among others. This new graduate certificate program will help students prepare for international careers with a global or Asian focus. The proposed Transnational Asia Certificate would complement, not replace, graduate programs in traditional academic disciplines, while also making certificate coursework more attainable and desirable graduate students in professional programs. The interdisciplinary and transnational nature of the certificate would encourage students to take courses in multiple departments and thus work to increase student exposure to departmental offerings outside of their majors and minors. Similarly, the policy and professional orientation would encourage Dietrich School of Arts and Sciences students to explore graduate offerings in professional schools such as business, education or GSPIA, while simultaneously increasing the visibility of UCIS programs for students in those schools.

Required Courses

- EFOP 2106 - INTERNATIONAL AND GLOBAL EDUCATION
- EFOP 2355 - ADVANCED QUALITATIVE RESEARCH
- EFOP 3347 - INTERNATIONAL ORGANIZATION DEVELOPMENT EDUCATION
- ANTH 2541 - REGIONAL SETTLEMENT PATTERNS
- CHIN 2047 - CHINESE AND WESTERN POETRY
- CHIN 2089 - THE WORLD OF CHINA
- CHIN 2090 - GREAT MINDS OF CHINA
- EAS 2005 - APPROACHES TO EAST ASIA
- HAA 2612 - SPECIAL TOPICS-ASIAN
- HAA 2641 - MODERN AND CONTEMPORARY CHINESE ART
- HIST 2020 - INFORMATION ECOSYSTEMS: INTERDISCIPLINARY USES OF DIGITAL METHODS
- HIST 2043 - SOCIAL MOVEMENTS
- HIST 2805 - HISTORY OF SEXUALITY
- JPNSE 2035 - PRAGMATICS OF JAPANESE
- JPNSE 2058 - WESTERNS AND SAMURAI FILMS
- JPNSE 2080 - GHOSTS, MASKS AND ACTORS
- PIA 2021 - INTERNATIONAL AFFAIRS
- PIA 2216 - ECONOMICS OF SOCIAL POLICY
- PIA 2301 - INTERNATIONAL POLITICAL ECONOMY
- PIA 2370 - TERRORISM AS AN INTELLIGENCE PROBLEM

European Studies Center

Contact Information

Graduate Advisor: Dr. Allyson Delnore
European Studies Center

<http://www.ucis.pitt.edu/esc/>

Since 1984, the European Studies Center formerly (ESC) has offered a strong curriculum on Europe by bringing together the rich assets of a major research university to create a unique learning community. The ESC has developed an international scholarly reputation in European Union studies and was selected by the European Commission to host one of only ten European Union Centers of Excellence in the United States.

Hillman Library at the University of Pittsburgh has been a depository library for EU publications since 1974. Dr. Phil Wilkin, the West European bibliographer, has developed the Archive of European Integration that provides a wide array of EU-related documents through the Web. Please visit <http://aei.pitt.edu> for details.

Financial Assistance

The ESC offers several possible funding opportunities to students in its certificate program. Please visit <http://www.ucis.pitt.edu/euce/content/graduate-student-funding-opportunities> for further details.

Graduate Certificate

Advanced European Union Studies Certificate

Graduate Advisor: Dr. Allyson Delnore
European Studies Center
4215 Wesley W. Posvar Hall
Phone: 412-624-5404
adelnore@pitt.edu
<http://www.ucis.pitt.edu/esc/>

The Certificate of Advanced Study-European Union Studies enables students to complement a graduate or professional degree in any discipline (including the sciences) with an interdisciplinary set of courses related to the EU and proficiency in a relevant language. Students may enroll in the Certificate through the European Studies Center (ESC) or the Center for Russian and Eastern European Studies(REES).

Requirements:

Students seeking the Certificate of Advanced Study-European Union Studies must fulfill the following requirements:

- Complete **18 credits of EU studies courses** in at least two schools or disciplines, with at least nine credits from outside the student's home department or school. Six credits must be selected from the list of core courses. Courses must be approved by the ESC.
 - Graduate students should complete a minimum of 6 unique credits of coursework. In other words, at least 6 credits of the course work used to complete the requirements of any graduate level certificate in UCIS *must be in addition to the credits used to complete the student's primary degree program.* In consultation with the academic advisor, students may fulfill these standards through one of the following options:
 - Students may contextualize non-credit bearing internships that are required in various graduate degree programs as credit bearing experiences for UCIS certificate programs. Prior approval must be received from the academic advisor to pursue this option.
 - Students who can add content courses without affecting their tuition bill will be encouraged to do so.
 - Students who are exempt from the language requirement because of previous coursework or heritage language skills may use language course credits towards the requirement for "additional work beyond the graduate degree."
 - The 6 credits may be comprised of the following combinations:
 - Two language courses (* see notes below)
 - A language course (* see notes below) and a content course
 - Two content courses
- * Language courses may be used in the following circumstances:

For certificate programs that require three years of language proficiency, students may count language courses in the third year (i.e. grammar, conversation, courses taught in target language) that are above the intermediate level.

For students in any certificate program who are exempt from the language requirement due to previous coursework or as a heritage speaker, the introductory courses in a second language (either LCTLs, or a commonly taught language with a clear and stated relevance to their research or professional goals) will count.

For students completing two graduate level UCIS certificates, *at least nine (9) credits* of the course work used to complete the certificate requirements *must be in addition to the credits used to complete the student's primary degree program.* At least 3 of these credits must be in content coursework. *All 9 cannot be language course credits.*

- For the approved course list, [click here.](#)
- Write an **interdisciplinary research paper** of 15-25 pages that ideally entails the use of second language materials. The paper may be prepared for a course, but students are urged to conceptualize it with the certificate in mind.
- **Language proficiency:** Students must have three years of progressive college-level instruction in an official EU Member State or official EU candidate country language other than English, or the equivalent proficiency. Students for whom English is a second language may use English to meet the requirement.
- Participate in an EU-related cocurricular activity approved by the ESC's Graduate Advisor.
- Be awarded a graduate or professional degree.

Certificate of Advanced Study

The Certificate of Advanced Study-West European Studies enables students to complement a graduate or professional degree in any discipline (including the sciences) with an interdisciplinary set of courses related to Western Europe and proficiency in a relevant language.

Requirements:

Students seeking the Certificate of Advanced Study-West European Studies must fulfill the following requirements:

- Complete **18 credits of West European Studies courses** in at least two schools or disciplines, with at least nine credits from outside the students home department or school. Distribution of these 18 credits is tailored to each academic program. Courses must be approved by the ESC.
- Graduate students should complete a minimum of 6 unique credits of coursework. In other words, at least 6 credits of the course work used to complete the requirements of any graduate level certificate in UCIS *must be in addition to the credits used to complete the student's primary degree program.* In consultation with the academic advisor, students may fulfill these standards through one of the following options:
 - Students may contextualize non-credit bearing internships that are required in various graduate degree programs as credit bearing experiences for UCIS certificate programs. Prior approval must be received from the academic advisor to pursue this option.
 - Students who can add content courses without affecting their tuition bill will be encouraged to do so.
 - Students who are exempt from the language requirement because of previous coursework or heritage language skills may use language course credits towards the requirement for "additional work beyond the graduate degree.
 - The 6 credits may be comprised of the following combinations:
 - Two language courses (* see notes below)
 - A language course (* see notes below) and a content course
 - Two content courses
- * Language courses may be used in the following circumstances:

For certificate programs that require three years of language proficiency, students may count language courses in the third year (i.e. grammar, conversation, courses taught in target language) that are above the intermediate level.

For students in any certificate program who are exempt from the language requirement due to previous coursework or as a heritage speaker, the introductory courses in a second language (either LCTLs, or a commonly taught language with a clear and stated relevance to their research or professional goals) will count.

European Union Studies Certificate

The University of Pittsburgh has long been a leader throughout the U.S. and the world in European Union Studies. Students interested in the politics, policies, or institutions of the EU, or in the history of and prospects for European integration can obtain a Pitt credential that signals to others a unique understanding of the EU and broad

competence in international studies. The European Union Studies Certificate enables students to complement a graduate or professional degree in any discipline (including the sciences) with an interdisciplinary set of courses related to the EU or European integration, as well as proficiency in a relevant world language. The requirements for this certificate are tailored specifically to allow graduate students in 2- and 3-year Masters programs to complete the program without adding any additional time to degree completion.

Language Proficiency

Students must have two (2) years of progressive college-level instruction in an official EU Member State or official EU candidate country language other than English, or the equivalent proficiency. Students for whom English is a second language may use English to satisfy the requirement.

Content Courses

Students must complete 15 credits of EU studies related courses in at least two departments, with at least 3 credits of the course work in addition to the credits used to complete the student's major.

In consultation with the academic advisor, students may contextualize non-credit bearing internships that are required in various graduate degree programs as credit bearing experiences for UCIS certificate programs. Prior approval must be received from the academic advisor to pursue this option.

Students who are exempt from the language requirement because of previous coursework or heritage language skills may use third year or above (i.e. grammar, conversation, etc.) courses taught in the target language towards the content course requirements. Additionally, introductory courses in a second or third language (with a clear and stated relevance to their research or professional goals) will count.

Research Paper

Write an interdisciplinary research paper of 15-25 pages that ideally entails the use of second language materials. The paper may be prepared for a course, but students are urged to conceptualize it with the certificate in mind. Alternatively, students may choose to prepare a digital portfolio detailing courses and co-curricular experiences related to European Union studies and offering reflections on the development of specific competencies related to a detailed rubric.

15 Credits

Mediterranean Studies Advanced Certificate

The Advanced Certificate in Mediterranean Studies provides students with interests in Mediterranean history, culture, politics, and languages to complement their major with a regional specialization, and to explore the interconnectedness of North Africa, the Levant, Anatolia, Southern Europe, and the Balkans. The certificate is self-designed, and students may choose any theme to organize their studies and class choices. Examples of possible themes immigration, regional politics and security, ancient civilizations, and Mediterranean arts and architecture.

Required Courses

- CLASS 2019 - GLOBAL ISSUES THROUGH CLASSICS 1
- ENGLIT 2851 - GENDER, TECHNIQUES, AND MEDIA: FROM PLATO TO VIDEO GAMES
- FR 2761 - FRENCH STUDIES GENDER STUDIES

- GREEK 2220 - GREEK SEMINAR: PHILOSOPHERS
- HAA 2131 - ROMAN ART
- HIST 2729 - SEAS, PEOPLES, AND EMPIRES
- ITAL 2088 - TOPICS IN ITALIAN DIASPORA STUDIES
- PHIL 2070 - ANCIENT PHILOSOPHY
- THEA 2205 - WORLD THEATRE: 500 BCE TO 1640

Mediterranean Studies Certificate

The Certificate in Mediterranean Studies provides students with interests in Mediterranean history, culture, politics, and languages to complement their major with a regional specialization, and to explore the interconnectedness of North Africa, the Levant, Anatolia, Southern Europe, and the Balkans. The certificate is self-designed, and students may choose any theme to organize their studies and class choices. Examples of possible themes immigration, regional politics and security, ancient civilizations, and Mediterranean arts and architecture.

Required Courses

- CLASS 2019 - GLOBAL ISSUES THROUGH CLASSICS 1
- ENGLIT 2851 - GENDER, TECHNIQUES, AND MEDIA: FROM PLATO TO VIDEO GAMES
- FR 2761 - FRENCH STUDIES GENDER STUDIES
- GREEK 2220 - GREEK SEMINAR: PHILOSOPHERS
- HAA 2131 - ROMAN ART
- HIST 2729 - SEAS, PEOPLES, AND EMPIRES
- ITAL 2088 - TOPICS IN ITALIAN DIASPORA STUDIES
- PHIL 2070 - ANCIENT PHILOSOPHY
- THEA 2205 - WORLD THEATRE: 500 BCE TO 1640

Transatlantic Studies Advanced Certificate

The Transatlantic Studies Advanced Certificate lets students pursue a comparative study of Europe and the United States, as well as countries that touch the Atlantic. Primary areas of study include governance, policy and security issues in the context of the transatlantic relationship, the history of colonialism, humanities and culture, and the comparative study of various professional fields such as business and medicine.

Required Courses

- EFOP 3006 - SOCIAL CHANGE IN LOCAL AND GLOBAL CONTEXTS
- ANTH 2516 - CHIEFDOMS
- BACC 2466 - RISK MANAGEMENT AND COMPLIANCE ISSUES FACING INTERNATIONAL ORGANIZATIONS
- EDUC 2100 - EDUCATION AND SOCIETY
- ENGLIT 2353 - POST COLONIAL THEORY AND CULTURE CRITIQUE
- FR 2765 - COMPARATIVE FRANCOPHONE CULTURE
- HAA 2025 - HISTORY AND ETHICS OF COLLECTING
- HIST 2540 - EUROPEAN EMPIRES IN THE WORLD
- HPS 2522 - SPEC TOPICS-HISTORY OF SCIENCE
- ITAL 2088 - TOPICS IN ITALIAN DIASPORA STUDIES
- LAW 2910 - LAWYERS IN AMERICAN SOCIETY

- LING 2235 - LANGUAGE, GENDER AND SEXUALITY
- MUSIC 2038 - MUSIC, CULTURE & TECHNOLOGY
- PIA 2327 - TERRORISM AND COUNTER TERRORISM
- PS 2312 - COMPARATIVE PARTIES AND ELECTIONS
- SOC 2035 - RACE & ETHNICITY
- SPAN 2410 - DISCOVERY AND CONQUEST
- THEA 2207 - WORLD THEATRE: 1890-PRESENT

Transatlantic Studies Certificate

The Transatlantic Studies Certificate lets students pursue a comparative study of Europe and the United States, as well as countries that touch the Atlantic. Primary areas of study include governance, policy and security issues in the context of the transatlantic relationship, the history of colonialism, humanities and culture, and the comparative study of various professional fields such as business and medicine.

Requirements

- EFOP 3006 - SOCIAL CHANGE IN LOCAL AND GLOBAL CONTEXTS
- ANTH 2516 - CHIEFDOMS
- BACC 2466 - RISK MANAGEMENT AND COMPLIANCE ISSUES FACING INTERNATIONAL ORGANIZATIONS
- EDUC 2100 - EDUCATION AND SOCIETY
- ENGLIT 2353 - POST COLONIAL THEORY AND CULTURE CRITIQUE
- FR 2765 - COMPARATIVE FRANCOPHONE CULTURE
- HAA 2025 - HISTORY AND ETHICS OF COLLECTING
- HIST 2540 - EUROPEAN EMPIRES IN THE WORLD
- HPS 2522 - SPEC TOPICS-HISTORY OF SCIENCE
- ITAL 2088 - TOPICS IN ITALIAN DIASPORA STUDIES
- LAW 2910 - LAWYERS IN AMERICAN SOCIETY
- LING 2235 - LANGUAGE, GENDER AND SEXUALITY
- MUSIC 2038 - MUSIC, CULTURE & TECHNOLOGY
- PIA 2327 - TERRORISM AND COUNTER TERRORISM
- PS 2312 - COMPARATIVE PARTIES AND ELECTIONS
- SOC 2035 - RACE & ETHNICITY
- SPAN 2410 - DISCOVERY AND CONQUEST
- THEA 2207 - WORLD THEATRE: 1890-PRESENT

West European Studies Certificate

The Certificate in Western European Studies provides students with strong interests in predominantly Western European history, culture, politics, and languages to complement their major with a regional specialization. The certificate is self-designed, and students may organize their courses around themes and countries relevant to their broader career and research interests. Students in 2- and 3-year graduate degree programs with only basic understanding of a relevant foreign language can complete the certificate with no additional time to degree or expense. Contact the advisor to get started as soon as possible.

Language Proficiency

Two years or equivalent proficiency of a relevant West European language. Students whose first language is English must choose a language other than English. Students for whom English is a second language can use English proficiency or coursework to meet this requirement. (English is unarguably a language of Western Europe, but the purpose of the certificate is to showcase foreign language proficiency, so it is not an appropriate choice for native English speakers.)

Content Courses

15 credit hours; 9 within the major; 6 interdisciplinary credits from two different departments outside of the major.

Students who are exempt from the language requirement because of previous coursework or heritage language skills may use language course credits towards the requirement for unique credits in addition to the degree program. Students may contextualize non-credit bearing internships that are required in various graduate degree programs as credit bearing experiences for UCIS certificate programs. Prior approval must be received from the academic advisor to pursue these options.

Research Paper

A 15-25 page research paper showing evidence of interdisciplinary and the use of foreign language sources and overseen by an Affiliated Faculty member of the European Studies Center in consultation with the graduate advisor of the European Studies Center. Alternatively, students may choose to complete an e-portfolio detailing courses and co-curricular experiences related to West European studies and offering reflections on development of specific competencies related to a detailed rubric. Students pursuing this second option are those likely to be considering careers outside of academia after graduation.

The Global Studies Program provides students with a "global competence," the ability to communicate effectively across cultural and linguistic boundaries and to focus on issues that transcend cultures and continents. The global studies graduate certificate is a joint offering of the University Center for International Studies (UCIS) and the Graduate School of Public and International Affairs (GSPIA), and is open to all students enrolled in a graduate program at the University.

The Global Studies Program draws on the strengths of the Area Studies Centers within the University Center for International Studies and the departments and schools at the University of Pittsburgh. The Asian Studies Center, the Center for Latin American Studies, the Center for Russian and East European Studies, and the Center for West

European Studies have been designated by the U.S. Department of Education as National Resource Centers. The University Library System possesses extensive holdings of books and journals to support research and study in these world areas.

Admission to Global Studies Program

Applications to the Global Studies Program may be submitted either at the same time as applications to the University or after the student has been admitted. In either case, students cannot be accepted until they have received notification of admission to the University of Pittsburgh.

Students holding a master's degree from an accredited institution may obtain the Graduate Certificate in Global Studies. They may apply directly to the program if they wish to enroll only for the graduate certificate.

<http://www.ucis.pitt.edu/global/>

Global Studies is an exciting - and evolving - interdisciplinary field. It is concerned with transnational structures, processes, and interactions, and how these affect social, economic, cultural, political, and ecological environments. Scholars of Global Studies understand and analyze how these structures, processes, and interactions both connect people and places and disrupt established norms, communities, institutions, and relationships. That is, they think globally about these processes.

Within the Global Studies Certificate, graduate students from the Dietrich School of Arts and Sciences can tailor a unique plan of interdisciplinary study within their field of interest drawn from more than 200 courses across 6 global concentrations. The certificate allows students to adopt a transnational lens that can inform their research projects, and to conduct research in one of 35 languages offered at Pitt.

Global Concentrations: To complete the certificate, student choose one of five global concentration/themes:

- **Cultural Dynamics**
- **Peace, Conflict, and Security**
- **Ecology and Sustainability**
- **Health and Well-Being**
- **Politics and Economy**

In addition to the certificate, the Global Studies Center offer numerous complementary programs and opportunities that support students' intellectual and personal development: research skills, career exploration and career readiness, experiential education and civic engagement, and a critical understanding of current events. The center offers tuition remission for students studying less commonly taught languages and internship positions.

Certificate Requirements

Six Global Thematic Courses (18 credits): After students select a global concentration, they choose from a comprehensive and dynamic list of courses ensuring three disciplines are represented to provide an interdisciplinary perspective on their chosen global concentration.

- Graduate students should complete a minimum of 6 unique credits of coursework. In other words, at least 6 credits of the course work used to complete the requirements of any graduate level certificate in UCIS *must be in addition to the credits used to complete the student's primary degree program.* In consultation with the academic advisor, students may fulfill these standards through one of the following options:

- Students may contextualize non-credit bearing internships that are required in various graduate degree programs as credit bearing experiences for UCIS certificate programs. Prior approval must be received from the academic advisor to pursue this option.

- Students who can add content courses without affecting their tuition bill will be encouraged to do so.

- Students who are exempt from the language requirement because of previous coursework or heritage language skills may use language course credits towards the requirement for "additional work beyond the graduate degree.

- The 6 credits may be comprised of the following combinations:

- Two language courses (* see notes below)

- A language course (* see notes below) and a content course

- Two content courses

* Language courses may be used in the following circumstances:

For certificate programs that require three years of language proficiency, students may count language courses in the third year (i.e. grammar, conversation, courses taught in target language) that are above the intermediate level.

For students in any certificate program who are exempt from the language requirement due to previous coursework or as a heritage speaker, the introductory courses in a second language (either LCTLs, or a commonly taught language with a clear and stated relevance to their research or professional goals) will count.

For students completing two graduate level UCIS certificates, *at least nine (9) credits* of the course work used to complete the certificate requirements *must be in addition to the credits used to complete the student's primary degree program.* At least 3 of these credits must be in content coursework. *All 9 cannot be language course credits.*

Language Proficiency: Building on Pitt's vast offering of over 30 languages, a minimum of three years of college-level study (six semesters) in a foreign language is required. Students can fulfill this requirement by passing a proficiency exam at the Intermediate mid proficiency level.

Global Studies Capstone Research Paper: This research paper is the culmination of a student's learning experience related to their global concentration. It demonstrates analytical skills within a transnational context. It must be written as part of a course and graded by a faculty member.

It is concerned with transnational structures, processes, and interactions, and how these affect social, economic, cultural, political, and ecological environments. Scholars of Global Studies understand and analyze how these structures, processes, and interactions both connect people and places and disrupt established norms, communities, institutions, and relationships. That is, they think globally about these processes.

Within the Global Studies Certificate, graduate students from Pitt's professional schools can tailor a unique plan of interdisciplinary study within their field of interest drawn from more than 200 courses across 6 global concentrations. The certificate allows students to adopt a transnational lens that can inform their research projects, and to conduct research in one of 35 languages offered at Pitt.

Global Concentrations: To complete the certificate, student choose one of five global concentration/themes:

- **Cultural Dynamics**
- **Peace, Conflict, and Security**
- **Ecology and Sustainability**
- **Health and Well-Being**
- **Politics and Economy**

In addition to the certificate, the Global Studies Center offer numerous complementary programs and opportunities that support students' intellectual and personal development: research skills, career exploration and career readiness, experiential education and civic engagement, and a critical understanding of current events. The center offers tuition remission for students studying less commonly taught languages and internship positions.

Language Proficiency

Building on Pitt's vast offering of over 30 languages, a minimum of two years of college-level study (four semesters) in a foreign language is required. Students can fulfill this requirement by passing a proficiency exam at the intermediate-mid proficiency level.

Content Courses

Four Global Thematic Courses (12 credits): After students select a global concentration, they choose from a comprehensive and dynamic list of courses ensuring three disciplines are represented to provide an interdisciplinary perspective on their chosen global concentration.

- Graduate students should complete a minimum of 3 unique credits of coursework. In other words, at least three credits of the course work used to complete the requirements of any graduate level certificate in UCIS *must be in addition to the credits used to complete the student's primary degree program.* In consultation with the academic advisor, students may fulfill these standards through one of the following options:
 - Students may contextualize non-credit bearing internships that are required in various graduate degree programs as credit bearing experiences for UCIS certificate programs. Prior approval must be received from the academic advisor to pursue this option.
 - Students who can add content courses without affecting their tuition bill will be encouraged to do so.
 - Students who are exempt from the language requirement because of previous coursework or heritage language skills may use language course credits towards the requirement for "additional work beyond the graduate degree.
 - The 3 credits may be comprised of the following combinations:
 - A language course
 - A content course

Research Paper

Submission of a digital portfolio.

www.ucis.pitt.edu/clas

The Center for Latin American Studies (CLAS), established in 1964, is internationally recognized for excellence in undergraduate, graduate, and professional education. In 1979 the U.S. Department of Education designated CLAS as a comprehensive National Resource Center (NRC) on Latin America—a distinction it has retained continuously to the present.

CLAS' programs cover the entire Latin American and Caribbean region. Two academic programs are especially noteworthy: The Latin American Archaeology Program, housed in the Department of Anthropology, involves research, training, and publications and emphasizes collaboration between North American and Latin American archaeologists. Fellowships and a bilingual publication series (funded by the Howard Heinz Endowment and The Andrew W. Mellon Foundation) further enhance this exceptional program. The Latin American Social and Public Policy Program draws on the impressive array of faculty and student expertise on Latin American policy issues available at the University of Pittsburgh. The program brings together researchers from different fields with the goal of contributing information of relevance to policy decisions facing Latin America. Social and Public Policy Fellowships are annually awarded to scholars interested in studying various dimensions of social policy at the University of Pittsburgh. The Latin American Social and Public Policy Graduate Certificate is available to students in this more specialized program.

Admission to the Center for Latin American Studies

http://www.ucis.pitt.edu/clas/grad_admissions

Applications to the Center for Latin American Studies may be submitted either at the same time as applications to the University or after the student has been admitted. In either case, the center cannot accept students until they have received notification of admission to the University.

Latin American Library Collection

<http://www.library.pitt.edu/eduardo-lozano-latin-american-collection>

One of the major resources on Latin America available to students at the University of Pittsburgh is the Eduardo Lozano Latin American Library Collection. Its resources include exceptional collections on Bolivia and Cuba as well as extensive holdings on Argentina, Brazil, Ecuador, Guatemala, Mexico, Peru, and Venezuela.

Financial Assistance

Latin American Studies offers a variety of financial assistance to students in its certificate programs. Please visit http://www.ucis.pitt.edu/clas/grad_funding for further details.

Graduate Certificate

Advanced Latin American Social & Public Policy Certificate

Language Proficiency

Equivalent of three years college level language skill in Spanish, Portuguese, Quechua, and Haitian Creole.

Content Courses

Total of six courses (18 credits). Three of these can overlap with their other credentials and three must be in at least two different departments/schools. At least 6 credits of the course work used to complete the requirements must be in addition to the credits used to complete the student's major.

Students who are exempt from the language requirement because of previous coursework or heritage language skills may use language course credits towards the requirement for unique credits in addition to the degree program. Students may contextualize non-credit bearing internships that are required in various graduate degree programs as credit bearing experiences for UCIS certificate programs. Prior approval must be received from the academic advisor to pursue these options.

Research Paper

A final multidisciplinary research paper (10-15 pages in length, with 10+ references), a Master's thesis, or a Doctoral Dissertation will fulfill the requirement for the research paper.

Requirements for Certificates

CLAS offers two graduate certificates: the Certificate in Latin American Studies and the Certificate in Latin American Social and Public Policy. Requirements for each are detailed below. GPA requirement is 3.0 for all courses to be counted toward any Latin American Studies Certificate. For a list of approved courses, [click here](#).

- Graduate students should complete a minimum of 6 unique credits of coursework. In other words, at least 6 credits of the course work used to complete the requirements of any graduate level certificate in UCIS *must be in addition to the credits used to complete the student's primary degree program*. In consultation with the academic advisor, students may fulfill these standards through one of the following options:
 - Students may contextualize non-credit bearing internships that are required in various graduate degree programs as credit bearing experiences for UCIS certificate programs. Prior approval must be received from the academic advisor to pursue this option.
 - Students who can add content courses without affecting their tuition bill will be encouraged to do so.
 - Students who are exempt from the language requirement because of previous coursework or heritage language skills may use language course credits towards the requirement for "additional work beyond the graduate degree."
 - The 6 credits may be comprised of the following combinations:
 - Two language courses (* see notes below)
 - A language course (* see notes below) and a content course
 - Two content courses
- * Language courses may be used in the following circumstances:

For certificate programs that require three years of language proficiency, students may count language courses in the third year (i.e. grammar, conversation, courses taught in target language) that are above the intermediate level.

For students in any certificate program who are exempt from the language requirement due to previous coursework or as a heritage speaker, the introductory courses in a second language (either LCTLs, or a commonly taught language with a clear and stated relevance to their research or professional goals) will count.

For students completing two graduate level UCIS certificates, *at least nine (9) credits* of the course work used to complete the certificate requirements *must be in addition to the credits used to complete the student's primary degree program*. At least 3 of these credits must be in content coursework. *All 9 cannot be language course credits.*

Graduate Certificate in Latin American Studies

To fulfill the requirements for this certificate, students must complete six Latin American area studies courses: two courses in the student's major department or school and four courses in at least two departments/schools other than that in which the student is receiving the advanced degree. The courses should total 18 credits. In addition, students are required to be proficient in a language of the area and to submit a research paper as detailed below.

Graduate Certificate in Latin American Social and Public Policy

To fulfill the requirements for this certificate, students must complete six courses focusing on social and public policy issues of Latin America: three courses should be in the student's major department or school and three courses should

be in at least two departments/schools other than that in which the student is receiving the advanced degree. The courses should total 18 credits. In addition, students are required to be proficient in a language in their area and to present a research paper as detailed below.

Language Proficiency

The certificates in CLAS require three years, or the equivalent, of college-level Spanish, Portuguese, or an Amerindian language of the area. Students must have adequate proficiency to converse and conduct research in Latin America. A standardized examination is given to each candidate by a faculty member of the Department of Hispanic Languages and Literatures.

Interdisciplinary Research Paper

Students in CLAS certificate programs must complete a research paper on Latin America that reflects competence in at least two disciplines. The master's thesis or a revised research paper may be used to fulfill this requirement.

Latin American Social & Public Policy Certificate

The Certificate in Latin American Social & Public Policy Studies is a multidisciplinary program of study focused in social and public policy in Latin America, Caribbean and diasporic studies, and is designed for students who want to graduate with a credential that indicates a specialization on this region of the world as well as policy of that region in addition to their graduate degree. Students who complete this certificate will demonstrate advanced knowledge and a dimension of expertise on social and public policy in Latin America, Caribbean and Diaspora (such as Latinx Studies). The requirements for this certificate have three components: language proficiency, content courses and a research paper. GPA requirement is 3.0 for all courses to be counted toward any Latin American Studies Certificate.

Language Proficiency

Equivalent of two years college level language skill in Spanish, Portuguese, Quechua, and Haitian Creole.

Content Courses

Total of five courses (15 credits). Three different departments must be represented, and three courses can overlap with the student's major.

Students who are exempt from the language requirement because of previous coursework or heritage language skills may use language course credits towards the requirement for unique credits in addition to the degree program. Students may contextualize non-credit bearing internships that are required in various graduate degree programs as credit bearing experiences for UCIS certificate programs. Prior approval must be received from the academic advisor to pursue these options.

Research Paper

A final multidisciplinary research paper (10-15 pages in length, with 10+ references), a Master's thesis, or a Doctoral Dissertation will fulfill the requirement for the research paper.

Center for Russian and Eastern European Studies

Contact Information

Graduate Advisor: Andrew Behrendt
Associate Director
Center for Russian and Eastern European Studies
4402 Wesley W. Posvar Hall
Phone: 412-648-7403
aeb72@pitt.edu
www.ucis.pitt.edu/crees

Established in 1965, the Center for Russian and Eastern European Studies (REES) at the University of Pittsburgh is designated by the U.S. Department of Education for Title VI funding as a National Resource Center.

There are three broad focus areas for the research conducted by faculty and graduate student specialists in the REES program. They are (1) contemporary Russian, East European, and Eurasian cultures, (2) politics, economics, and societies of Russia, Eastern Europe, and Eurasia (3) foreign policy issues as they relate to the REES world area.

The Center for Russian and East European Studies offers graduate certificates in East European Studies, Russian Studies, or Soviet Studies to students who successfully combine second language expertise and multidisciplinary area-focused courses.

Admission Information

Application for admission to graduate study is made directly to the academic department or graduate/professional school of the student's choice. The applicant should include a statement requesting admission to the REES certificate program.

To enroll in one of the certificate programs, admitted students should make an appointment with the REES graduate advisor as soon as possible after their arrival at the University.

Financial Assistance

The Center for Russian and East European Studies offers several means of financial assistance to students in its certificate program. Please visit <http://www.ucis.pitt.edu/main/scholarships> for further details.

Graduate Certificate

Advanced Russian, East European, and Eurasian Studies Certificate

Overview

REEES is one of a select few National Resource Centers for Russian, East European, and Eurasian Studies funded by the US Department of Education. REEES has 72 affiliated faculty members and has programs with 14 Arts and Sciences departments and five professional schools. Our many areas of focus include subjects such as the transformations of post-communist societies, history, foreign policy and international relations, anthropology, music, film, and contemporary culture and literatures. Recognizing that regional boundaries are constantly contested and redefined, our geographic scope includes Russia, Ukraine, Belarus, the Baltic states, Central Asia and the Caucasus, the Western Balkans, Poland, Hungary, Slovakia, Czech Republic, Romania, Bulgaria, Moldova, Mongolia, and Turkey. REEES currently offers Certificates in Advanced East European Studies, Russian Studies, or Soviet Studies, which may be earned in conjunction with most masters and doctoral programs in the School of Arts and Sciences and a number of professional schools.

Requirements for REEES Certificates

The requirements for each of the REEES graduate certificates are as follows:

- Completion of **six approved Russian, East European, and Eurasian area studies courses**, including four courses from at least two departments other than the student's home department, for a total of 18 credits.
 - Graduate students should complete a minimum of 6 unique credits of coursework. In other words, at least 6 credits of the course work used to complete the requirements of any graduate level certificate in UCIS *must be in addition to the credits used to complete the student's primary degree program*. In consultation with the academic advisor, students may fulfill these standards through one of the following options:
 - Students may contextualize non-credit bearing internships that are required in various graduate degree programs as credit bearing experiences for UCIS certificate programs. Prior approval must be received from the academic advisor to pursue this option.
 - Students who can add content courses without affecting their tuition bill will be encouraged to do so.
 - Students who are exempt from the language requirement because of previous coursework or heritage language skills may use language course credits towards the requirement for additional work beyond the graduate degree.
 - The 6 credits may be comprised of the following combinations:
 - Two language courses (* see notes below)
 - A language course (* see notes below) and a content course
 - Two content courses
- * Language courses may be used in the following circumstances:

For certificate programs that require three years of language proficiency, students may count language courses in the third year (i.e. grammar, conversation, courses taught in target language) that are above the intermediate level.

For students in any certificate program who are exempt from the language requirement due to previous coursework or as a heritage speaker, the introductory courses in a second language (either LCTLs, or a commonly taught language with a clear and stated relevance to their research or professional goals) will count.

For students completing two graduate level UCIS certificates, *at least nine (9) credits* of the course work used to complete the certificate requirements *must be in addition to the credits used to complete the student's primary degree program*. At least 3 of these credits must be in content coursework. *All 9 cannot be language course credits*.

- Demonstration of **language proficiency** equivalent to three years of college-level study in a language of the former Soviet Union (plus Mongolia) or Eastern Europe (including Turkish).
- Completion of a **research paper** of at least 15 pages in length, based substantially on primary sources in one or more languages of the REEES world area.
- Students must maintain a minimum GPA of 3.0 in REEES-related coursework.

Russian, East European & Eurasian Studies Certificate

The Graduate Certificate in Russian, East European, and Eurasian Studies (REEES) may be earned in conjunction with most master's and doctoral programs in the School of Arts and Sciences and a number of professional schools. In order to receive the Graduate Certificate in Advanced REEES, students must complete area studies coursework and demonstrate proficiency in a language spoken in Russia, East Europe, and/or Eurasia. REEES is one of a select few National Resource Centers for Russian, East European, and Eurasian Studies funded by the US Department of Education. Our many areas of focus include subjects such as the transformations of post-communist societies, history, foreign policy and international relations, anthropology, music, film, and contemporary culture and literature's. Recognizing that regional boundaries are constantly contested and redefined, our geographic scope includes but is not limited to Russia, Eastern and East Central Europe, the Baltic states, Central Asia, the Caucasus, the Balkans, and Turkey.

Language Proficiency

Demonstration of language proficiency equivalent to two years of college-level study in a language of the former Soviet Union (plus Mongolia) or Eastern Europe (including Turkish and Greek).

Content Courses

Completion of five approved Russian, East European, and Eurasian area studies courses, including four courses from at least two departments other than the student's home department, for a total of 15 credits. A minimum of 6 credits must be unique (in addition to the credits used to complete the student's major).

Digital Portfolio

Creation of a personal website to highlight the student's research, coursework, co-curricular activity, and other certificate-related accomplishments.

15 Credits

Special Academic Opportunities

Special academic opportunities provide students with ways to augment their education and experience with expanded study programs both on and off campus, in both university and professional settings.

Area of Concentration (subplans) and Minors (plans)

Some graduate programs may include approved areas of concentration or minors. Areas of concentration define and describe the student's training and expertise within the broader discipline. Minors represent significant course work completed in an area related to the student's specialty. A graduate minor offered by the faculty at the Pittsburgh campus is available to any graduate student enrolled in an academic degree program on the campus provided that the school from which the student is graduating recognizes this minor. See the Schools, Departments, and Programs section of this bulletin for available areas of concentration and minors.

Certificate Programs

Students may enrich their educational experience by electing to take an academic interdisciplinary certificate program in the areas listed at the start of the Schools, Departments, and Programs section of this bulletin.

A certificate program at the graduate level is a coherent set of courses and related work in a particular area. Most certificate programs require a minimum of 15 credits, of which 12 credits must be earned at the University of Pittsburgh. The certificate may appear on the transcript as a degree goal and will appear on the final transcript as an awarded certificate.

A student must be formally admitted into a certificate program. The requirements for each certificate vary and students should contact the certificate program director.

Cross-Registration

Carnegie Mellon University, Duquesne University, the Pittsburgh Theological Seminary, Robert Morris University, and the University of Pittsburgh offer graduate students the opportunity for cross-registration in graduate programs in the

five institutions in the fall and spring terms. See Cross-Registration in the Registration section of this bulletin for further details.

Two Independent Degree Programs Simultaneously

Students may pursue two independent graduate degrees simultaneously in two different schools within the University (joint degree) or two different departments within the same school (dual degree). Students desiring to enroll in two degree programs must have approval from both program faculties and their respective deans, must be admitted into both programs, and must satisfy the degree requirements of both programs. Students are billed at the tuition rate of the primary academic program. Normally, such students should be enrolled for no more than a total of 15 credits per term.

The same examination, thesis, or dissertation cannot be used to fulfill requirements for two independent degrees, although a maximum of 6 credits of course work may be used in partial fulfillment of the requirements of both degrees. It is the responsibility of the dean or deans, if two schools are involved, to ensure that this regulation is enforced.

Cooperative, Dual-Degree, and Joint-Degree Programs

Dual- and joint-degree programs result in two degrees being awarded. Requirements for these programs include all or most of the requirements of two distinct academic degree programs. These programs may result in a student earning two separate master's degrees, a master's and a first-professional degree, or a master's or first-professional degree and a doctoral degree, but never result in a student earning two separate doctoral degrees. Dual programs exist within a single school; joint programs exist between two or more schools; cooperative programs are administered by two or more institutions. The same course, examination, or thesis may be used to fulfill requirements only if so specified in the documents formally establishing the joint- or dual-degree program approved by the University.

Students must be admitted to both academic programs offering the dual or joint degrees being sought and must graduate from both degree programs at the same time. Students are advised to see the individual school for other specific requirements that apply.

Africana Studies

AFRCNA 2031 - CRITICAL AFRICANA PEDAGOGY

Minimum Credits: 3

Maximum Credits: 3

This seminar examines the arts of teaching and learning in Africana Studies. Students are introduced to Africana-centered pedagogical tools while also being exposed to resources from the University's Center for Teaching and Learning. In the process of learning the fundamentals of Africana pedagogy and being introduced to the pioneers of Africana pedagogy, students learn how to weave African and African diasporic politics, economics, history, philosophy, psychology, religion, literature, arts, music, and culture to create different Africana-centered syllabi.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad Letter Grade

AFRCNA 2340 - LITERARY PAN-AFRICANISM

Minimum Credits: 3

Maximum Credits: 3

At the intersection of history and literature, this course is a study of the phenomenon of Pan-Africanism, or global unity, cooperation, and mutual cultural and political kinship among people of African descent, as it appears in Africana literatures. Students will explore the three primary theoretical orientations to Literary Pan-Africanism, contextualize Pan-Africanism in tandem with related concepts of transnationalism and internationalism, and explore both fiction and nonfiction genres that represent Diasporan and African experiences of return, heritage travel, and multidirectional migration.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

AFRCNA 2345 - INEQUALITIES IN AFRICAN DIASPORA LITERATURE

Minimum Credits: 3

Maximum Credits: 3

This course explores literary portrayals of inequalities in fiction by African American, Caribbean, and African women writers. Using contemporary novels, the course focuses particularly on inequalities associated with people's class position. Class has been at the center of a number of debates due to recent dramatic (and traumatic) fluctuations in global economic transactions. Using a range of critical perspectives, we will examine how women writers within the African Diaspora portray the impacts of class and its interconnections with matters such as employment, housing, and education. Students will conduct analyses of the cultural, historical, and theoretical contexts surrounding the literary works while also evaluating key literary features, such as voice, language, structure, and style, to better comprehend the depictions of characters' quest for self-fulfillment. The course uses a variety of pedagogical approaches.

Academic Career: Graduate

Course Component: Seminar
Grade Component: Grad Letter Grade

AFRCNA 2405 - MENTAL HEALTH IN THE BLACK COMMUNITY

Minimum Credits: 3

Maximum Credits: 3

This course explores the mental health of Black individuals from an Afrocentric perspective and worldview. We will examine how historical, social, and political factors have influenced their mental health, with a particular focus on the transatlantic slave trade, systemic racism, and decolonization. Our analysis will draw on empirical research, literature, historical records, and multimedia. We will also explore the intersection of race, culture, and mental health, further examining the impact of gender role socialization, cultural resilience and resistance, communal support, and systemic racism on mental wellness within the Black community. The course will cover current topics and modern practices.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

AFRCNA 2450 - AFRICANA CULTURAL MEMORY

Minimum Credits: 3

Maximum Credits: 3

In the academy, in both national and international contexts, cultural memory/ transcultural memory studies are orientations to memory from the perspectives of Holocaust, war, migration, trauma, and exile, but there are gaps in the scholarship that do not yet deliberately or coherently address the Africana experience. As a new contribution to intellectual discourse in the discipline of Africana Studies, this course corresponds to innovative, ground-breaking, and emergent ideas and scholarship on Africana Cultural Memory Studies as a sub-field of Africana Studies.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

AFRCNA 2728 - TRANSNATIONAL ISSUES IN AFRO-LATIN AMERICAN AND AFRO-LATINX STUDIES

Minimum Credits: 3

Maximum Credits: 3

This seminar course will address hemispheric themes in Afro-Latin American and Afro-Latinx Studies. These will include conceptual frameworks that center human agency alongside political and social constraints in the transnational processes of migration; community formation, linked issues including invisibility, representation, civil rights, and social and environmental justice; the intersectionality of race, gender, and ethnicity in identity adaptation, and the use of information, the arts, and technology/digital spaces to foster knowledge, understanding, and diasporic connectivity. Students will be encouraged to make connections with African American and/or other diasporic populations. Students will conduct research and present their findings and analysis in an array of formats, such as via a traditional research paper, an exhibition of select archival materials, a short documentary-style video, or a curriculum development project.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

AFRCNA 2750 - AFRICANA STUDIES PROSEMINAR 1

Minimum Credits: 3

Maximum Credits: 3

This seminar is designed to familiarize graduate students with some of the key texts and debates in Africana Studies

concerning the relationship between racial slavery, colonialism, and freedom movements in Africa and the African diaspora. Beginning with the Haitian Revolution, much of black freedom movements have advocated for group solidarity and cohesion in the face of often overwhelming conditions of servitude, enslavement and coercion within the political economy of slavery and the moral economy of white supremacy. Ideas and practices of freedom, however, articulated by political actors and intellectuals alike, have been as varied as the routes to freedom itself. As expressed by C.L.R. James, W.E.B. Dubois, Aime Cesaire, Frantz Fanon, and others' ideas and practices of liberty, equality, and citizenship within many African and Afro-descendant communities have revealed multiple, often competing forms of socio-political imagination. Students will engage these and other authors in an effort to understand and craft a genealogy of Africana thoughts and practices.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

AFRCNA 2850 - AFRICANA STUDIES PROSEMINAR II

Minimum Credits: 3

Maximum Credits: 3

As a result of migration processes, Black subjects have challenged and reconfigured local, global, and national identities. This seminar will introduce students to a range of theories about diaspora, transnational migration, and globalization from the perspective of Africana Studies. Students will explore how Africana methodology complicates these theories and paint a much more complex idea of what is understood as migrant communities, displaced communities, exiles, enclaves, ghettos, and refuge communities.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

AFRCNA 2860 - AFRICANA RESEARCH METHODS

Minimum Credits: 3

Maximum Credits: 3

This seminar explores how Africana scholars formulate their research questions and design their methodologies. It explains how they use a variety of methodological approaches for conducting research in Black communities worldwide and creating new ideas that contribute to the advancement of Africana Studies scholarship. Students will explore how humanities and the social sciences research methodologies complement the interdisciplinary characteristic of Africana Research Methods. Students will be exposed to a variety of award-winning manuscripts and research projects that followed an Africana-centered research methodology.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

AFRCNA 2902 - DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 12

Graduate students desiring to research or carry out a project in an area not normally available in a regular course or to study a subject not dealt with thoroughly in a seminar may take AFRCNA 2902 under the supervision of a faculty member. Students must see the Department of Africana Studies advisor for special permission.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SNC Basis

AFRCNA 2990 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 12

Graduate students who are preparing for required exams, such as the comprehensive examination, or who want to pursue an independent program of study, research, or reading with a faculty member may register for AFRCNA 2990. Students must see the Department of Africana Studies for special permission

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad LG/SNC Basis

Anthropology

ANTH 2000 - RESEARCH AND THESIS MA DEGREE

Minimum Credits: 1

Maximum Credits: 9

This course involves directed research and writing oriented towards the completion of a master's thesis.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

ANTH 2001 - NAVIGATING THE DISCIPLINE

Minimum Credits: 1

Maximum Credits: 1

This is the first part of a two-course sequence (one credit per term) required of all first-year anthropology graduate students. In the fall term, students will learn how to navigate the first years of the graduate program at Pitt, get to know the faculty and each other, begin discussing research interests and practicing presentation skills, learn some of the ins and outs of grants and publishing, and consider possible professional trajectories after the Ph.D.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

ANTH 2002 - ANTHROPOLOGICAL RESEARCH

Minimum Credits: 1

Maximum Credits: 1

This is the second part of a two-course sequence (one credit per term) required of all first-year anthropology graduate students. In the fall term, students will learn how to navigate the first years of the graduate program at Pitt, get to know the faculty and each other, begin discussing research interests and practicing presentation skills, learn some of the ins and outs of grants and publishing, and consider possible professional trajectories after the Ph.D.

Grade Component: Grad LG/SNC Basis

ANTH 2490 - LINGUISTICS ANTHROPOLOGY CORE COURSE

Minimum Credits: 4

Maximum Credits: 4

This course approaches language as a practice through which social relations, cultural models, and consciousness are constituted. Specific topics include: approaches to signs and significance; linguistic relativity (relationships between habits of speech, thought, and action); analysis of conversation and interaction; relationships between meaning and

intention; models of variation and change; linguistic dimensions of cultural stereotypes; and the means by which languages, styles, and other aspects of cultural patterning, can be mapped onto populations. Throughout the course we pay particular attention to how tools from linguistic and semiotic anthropology can be applied to the study of topics other than language ' as a framework for ethnography, for textual research, and for the study of material culture.

Minimum Credits: 3

Maximum Credits: 3

This class introduces you to the objectives, methodologies, and applications of archaeobotany and provides you with hands-on experience working with plant remains found in archaeological sites. Archaeobotanists study plant remains to understand how ancient people interacted with their surroundings, sustained themselves, and used food to express social and political relationships. This course is designed as a practical laboratory experience, where each week, you will participate in seminars and laboratory sessions to develop the necessary skills for independent archaeobotanical research. We will analyze macrobotanical remains such as seeds, nuts, wood, and other tissues, which are often visible under low-powered microscopes. Students will learn basic identification skills, create a comparative collection, and analyze archaeobotanical samples from an archaeological site. In addition to sorting the samples, we will analyze the data, prepare interpretive reports, and discuss the results of our analyses.

Course Component: Credit Laboratory

Grade Component: Grad LG/SNC Basis

ANTH 2510 - LITHIC ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

For roughly 3 million years before the use of metals, human populations relied on making and using stone tools to survive-and thrive- in environments all over the world. Stone tools both compose a huge percentage of the archaeological record and serve as a direct reflection of human activities, making their analysis fundamental to studying the past. This course engages students with the practical and statistical methodologies and approaches archaeologists use to identify stone tools and to extract behavioral information from them. We will examine knapping mechanics, raw material economy, mobility, technological strategies, tool use, and discard behavior. Students learn how to identify the stone tools that characterize major prehistoric periods and discuss controversies about stone tools'

role in human evolution, behavioral complexity, origins of agriculture, and craft specialization. By combining hands-on replication experiments, lab analysis, methods coursework on quantitative and qualitative statistical analyses, and discussion, students will learn everything necessary to carry out stone tool analysis.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ANTH 2513 - SELECTED ARCHEOLOGICAL PROBLEM

Minimum Credits: 3

Maximum Credits: 3

Examines current topics and controversies in anthropological archaeology. Special problem areas vary from year to year.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Attributes: Global Studies

ANTH 2516 - CHIEFDOMS

Minimum Credits: 3

Maximum Credits: 3

Chiefdoms are defined more by what they are not than by what they are: societies whose hierarchical organization makes them non-egalitarian, but that lack the bureaucratic institutions of the state. Seen as stepping stones in the evolution of states or as part of another evolutionary trajectory entirely, chiefdoms are the subject of debate, including just in what sense, or even whether, the word "chiefdom" has any utility. This seminar discusses how chiefdoms can be investigated and understood archeologically, using materials from all the Americas, Polynesia, Europe, and other areas.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Attributes: Asian Studies, Global Studies, Latin American Studies

ANTH 2517 - ARCHEOLOGICAL METHOD AND THEORY

Minimum Credits: 3

Maximum Credits: 3

This course surveys contemporary method and theory in anthropological archeology. It begins with varieties of high level theoretical approaches to a study of prehistory, including cultural historical, cultural evolutionary, cultural ecological systems-oriented, Marxist and post-Procession Archaeologies. It covers several methodological problems; construction of research designs, uses of analogy, style, classification and site level or regional level spatial analysis.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

ANTH 2524 - ARCHEOLOGICAL DATA RECOVERY AND ANALYSIS 2

Minimum Credits: 4

Maximum Credits: 4

Advanced analysis of archeological data, primarily quantitative. This course carries on where ANTH 1534 leaves off. Topics include sampling, design of variable sets, advanced database management, computer graphics (plotting, contouring, fishnet surfaces), multivariate statistics (factor analysis, cluster analysis, multi-dimensional scaling), and analysis of spatial distributions (nearest neighbor, clustering, and graphical approaches).

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ANTH 2531 - HOUSEHOLD ARCHAEOLOGY

Minimum Credits: 3

Maximum Credits: 3

This seminar will explore the role of the household as an important analytical unit in anthropological archaeology. Topics to be addressed include: archaeological definition of residential units, modeling the evolution of domestic life, analysis of spatial patterns at the household level, and proxemic and symbolic approaches to the prehistoric dwelling. The seminar will also consider the relationship between households and larger societal structures and the cross-cultural compositional and dynamic characteristics of households will be examined.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Attributes: Global Studies, Latin American Studies

ANTH 2532 - ADVANCED TOPICS IN GIS: ANALYSIS OF REGIONS AND RESOURCES

Minimum Credits: 3

Maximum Credits: 3

A brief introduction to GIS techniques in the context of archaeological analysis. The focus will be on how to accomplish analytical tasks of proven utility in archaeology, using autocad map when a vector-based program is most useful and Idris when a raster-based is better. The course is designed to complement ant 2541: regional settlement patterns, although the GIS techniques dealt with are applicable to other scales of analysis as well.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

ANTH 2533 - ANCIENT STATES IN THE NEW WORLD

Minimum Credits: 3

Maximum Credits: 3

Drawing on the fact that the ancient new world was a dazzling treasure house of non-Western political thought and organization, this course uses archaeology and ethnohistory to document and make comparative sense of the rich variety of political arrangements which existed among pre-Hispanic states in MesoAmerica and Andean South America. A special aim is to understand how Amer-Indian concepts about state craft and rulership mesh with anthropological and other theories about ancient states.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

ANTH 2534 - ARCHEOLOGICAL DATA ANALYSIS 1

Minimum Credits: 4

Maximum Credits: 4

An introduction to quantitative data analysis in archeology, this course covers basic principles of statistics, including exploratory analysis of batches, sampling, significance, t tests, analysis of variance, regression, chi-square, and estimating universe means and proportions from samples. The approach is practical, concentrating on understanding these principles so as to put them to work effectively in analyzing archeological data. Much of the statistical work is

done by computer.

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

ANTH 2536 - SPECIAL TOPICS IN COMPARATIVE ARCHEOLOGY PART 1

Minimum Credits: 1

Maximum Credits: 1

A research seminar in comparative archaeology led by a regular faculty member in anthropology and the visiting scholar in the center for comparative archaeology. The topic changes from year to year depending on the expertise of the visiting scholar. Meets about five times during the fall term, and is concluded during the spring term in ANTH 2537: special topics in comparative archaeology ii. In order to receive credit students must complete both parts of the seminar (I and II).

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

ANTH 2537 - SPECIAL TOPICS IN COMPARATIVE ARCHEOLOGY PART 2

Minimum Credits: 2

Maximum Credits: 2

A research seminar in comparative archaeology led by a regular faculty member in anthropology and the visiting scholar in the center for comparative archaeology. The topic changes from year to year depending on the expertise of the visiting scholar. Meets about five times during the spring term, and is the conclusion of ANTH 2536: special topics in comparative archaeology i offered during the preceding fall term. In order to receive credit students must complete both parts of the seminar I and II).

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

ANTH 2541 - REGIONAL SETTLEMENT PATTERNS

Minimum Credits: 3

Maximum Credits: 3

This seminar will take up both theoretical and methodological aspects of regional settlement pattern studies in archeology. Appropriate objectives for settlement patterns will be discussed. Advantages and disadvantages of different field and analytic methodologies in terms of their effectiveness in achieving clearly defined goals will be explored. This exploration will be pursued primarily through critical examination and reanalysis of data from primary reports of regional settlement patterns studies from different parts of the world.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Attributes: Global Studies, Latin American Studies

ANTH 2550 - ETHNOARCHAEOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course will focus on issues in ethnoarchaeology and archaeological implications. Some of these issues have to do with theory and the role of analogy in understanding the past. Others concern how we can use material remains to make inferences about social groups including kinship, organization, ethnicity, work groups, etc.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Attributes: Global Studies

ANTH 2551 - PEOPLES IN CONTACT

Minimum Credits: 3

Maximum Credits: 3

This course examines patterns of cultural, economic, biological, and linguistic exchange and interaction through major historic and pre-historic population migrations. We aim to assess how interactions between diverse communities at a micro-scale shape broader population movements. Multidisciplinary data sets are employed to detect and discuss evidence for the emergence of new group identities and strategies in contact and frontier zones. We discuss the long-term archaeological and anthropological implications for these instances of "ethnogenesis" and challenge traditional unilinear models for tracing and understanding migrations in the human past.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Attributes: Global Studies

ANTH 2553 - ARCHAEOLOGICAL CERAMICS

Minimum Credits: 3

Maximum Credits: 3

This course is designed to provide you with a broad introduction to archaeological ceramics. We will cover a number of topics during the course so that you will be conversant in the archaeological literature on pottery and will have a greater understanding of the types of research problems that are most readily investigated through the analysis of archaeological ceramics. You will also gain experience in handbuilding pottery vessels so you have an understanding of pottery from the perspective of the potter and will know how the limitations and possibilities within this medium affect both the manufacture and processes used in creating pottery. We also discuss a variety of archaeological analyses of pottery. Readings drawn from archaeological, ethnoarchaeological, and material culture literature are an important component of this course.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ANTH 2554 - HUMAN BEHAVIORAL ECOLOGY

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

ANTH 2555 - WORKSHOP IN PUBLISHING

Minimum Credits: 2

Maximum Credits: 2

This one-credit graduate course is intended as a workshop for refining papers for publication as journal articles or edited book chapters. The course is intended for relatively advanced graduate students who have a good idea at the outset of what they plan to publish and have the support of their advisor in this plan. We will go through the process of identifying suitable publication venues, revising drafts and figures for publication, and understanding what to expect

from the peer-review process. Because the class involves substantial peer feedback, students are asked to commit to supporting their fellow students' revision process as well as devoting time to their own. The aim is for every student to submit a paper for publication by the end of the semester.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

ANTH 2556 - ZOOARCHAEOLOGY

Minimum Credits: 4

Maximum Credits: 4

Animal remains are often some of the most frequently encountered material remains recovered from archaeological sites and therefore provide crucial information relating to subsistence strategies, animal husbandry patterns, paleoenvironments and a wide range of other human behaviors. This course provides an introduction to the main elements of Zooarchaeology research and will focus on the recovery, identification and contextual analysis of animal remains. The course will provide both laboratory training as well as seminar discussions in order to evaluate the significance of Zooarchaeology within archaeological research. Participants will therefore have the opportunity to gain practical laboratory skills in identification and analysis and to learn how this information can be applied to the study of complex societies in both the Old and New World.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SNC Basis

ANTH 2565 - ARCHAEOLOGY OF FOODWAYS

Minimum Credits: 3

Maximum Credits: 3

What counts as food? Food is a universal requirement for humans to survive. Although universal, different cultures across the globe have developed cuisines that are diverse in forms, tastes, and meanings. Beyond production and sustenance, the acts of cooking, eating, and drinking bind people together through symbolism, shared experiences, and status. Through both inclusionary and exclusionary strategies, food and drink serve to define identity, strengthen social bonds, and enact memory. In this course, we will learn about the origins of cooking over 1 million years ago, the 'real' Paleodiet, how early states used beer to cement social alliances, and how Columbus's discovery of the Americas spurred global-scale shifts in food and agriculture. The course begins with an overview of how anthropologists and archaeologists study food and then moves through time, beginning with our early hominid ancestors and ending with colonialism.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

ANTH 2575 - UNRAVELING THE ANTHROPOCENE

Minimum Credits: 3

Maximum Credits: 3

Our current moment in planetary history is one in which Earth's environmental systems are dominated by humans. Scientific consensus is that this period - called the Anthropocene - can (and should) be distinguished from what went before and what will come after. Still debated, however, are questions about the timing, nature, and outcomes of the Anthropocene. This course offers a critical introduction to the Anthropocene, and explores the ways that archaeology offers insights into interactions between human societies and their environments. We will cover the underlying theoretical issues, survey the methodologies employed, and critically examine cross-cultural narratives about past human-environment interactions that archaeologists produce. Drawing on these conceptual tools, we will examine debates about the origins and antiquity of the Anthropocene, its identification in the archaeological record, and the uses

of the concept by in the present. Finally, we will use our discussions about the Anthropocene to answer important question facing humanity today: How sustainable are the current ecologies of this planet? What kinds of changes can we expect in our own lifetimes?

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

ANTH 2587 - ARCHAEOLOGY CORE COURSE

Minimum Credits: 3

Maximum Credits: 3

A broad introduction to current archaeological thinking on cultural evolution, focusing on early hunters and gatherers, the rise of agriculture and settled village life, the growth of complex societies, and the development of cities. Examines the recent intellectual controversies surrounding these topics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

ANTH 2603 - HUMAN SKELETAL ANALYSIS

Minimum Credits: 4

Maximum Credits: 4

Make no bones about it--the human skeleton provides a range of information about the individual, such as their biological sex, activity level and health. The extraction of this information rests on the identification of each skeletal element. This methods course traces the development and growth of the human skeleton until it is fully mature.

Participants will learn how to: identify and side complete and partial adult bones and their features, and distinguish between animal and human bones. Additional topics may include feature analysis to estimate the individual's profile (age at death, biological sex and stature); tooth development and identification; variation; and the identification of muscle insertion points. This course is for students considering anthropological careers in forensic anthropology, bioarchaeology and paleontology, as well as students pursuing careers in health sciences, biomechanics and biology. The course features lectures and required lab time.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SNC Basis

ANTH 2603 - HUMAN SKELETAL ANALYSIS

Minimum Credits: 4

Maximum Credits: 4

Make no bones about it--the human skeleton provides a range of information about the individual, such as their biological sex, activity level and health. The extraction of this information rests on the identification of each skeletal element. This methods course traces the development and growth of the human skeleton until it is fully mature.

Participants will learn how to: identify complete and fragmentary adult bones; identify complete nonadult bones; and distinguish between animal and human bones. Additional topics may include normal and abnormal variation; the identification of muscle insertion sites and their implications for physical activity; the effect of disease on bone and the methods used to estimate the individual's profile (age at death, biological sex, stature and ancestry). This course is essential for students considering anthropological careers in forensic anthropology, bioarchaeology and paleontology, as well as students pursuing careers in health sciences, biomechanics and biology. The course features lectures and required lab time with written and practical exams.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SNC Basis

ANTH 2608 - PRIMATE BIOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course is a survey of the major groups of living primates (including humans) and of the various hard and soft tissue, as well as physiological and biochemical, systems that distinguish the group as primates and further distinguish the diverse lot of primate subgroups.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

ANTH 2612 - EVOLUTIONARY THEORY 1: A HISTORY OF ALTERNATIVE IDEAS 18TH CENTURY UNTIL THE SYNTHESIS

Minimum Credits: 3

Maximum Credits: 3

This course will be an in-depth survey of the historical development of evolutionary thought, with emphasis on the alternatives to theories that became incorporated into the grand evolutionary synthesis and those alternatives that have emerged since. Students will read and annotate original works in comparative anatomy, embryology, paleontology, genetics and lead class discussion based on this literature.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

ANTH 2614 - HISTORY OF PALEOANTHROPOLOGY

Minimum Credits: 3

Maximum Credits: 3

In this course we will read primary literature that is relevant to the study of human evolution, both neo and paleobiologically. After a brief overview of the separate histories, and thus foci, of paleontology in general and human paleontology specifically, we will begin formal reading with Blumenbach's two major works, some Buffon, Linnaeus, and Lankester (and probably a few others), Huxley's essays of 1863, Darwin's descent these basically on the topic of "man's place in nature" and then delve into specific articles and monographs on the discovery, naming, and acceptance of human fossils. These readings will cover (but not necessarily be limited to) the debate between Schaffhausen and Fuhlrott, the naming by William, king of the first new hominid species (*homo neanderthalensis*), the works of Eugene DuBois (*homo erectus*) and Raymond Dart (*australopithecus*) and reactions to them, the Leakeys' discoveries at Olduvai Gorge, and some of the more recent finds. We will also discuss *ramapithecus* and its relevance to the still not satisfactorily answered question, "what is a homind?" The thrust of the course will be to tease apart fact from assumption as they were cobbled together in promoting one's favorite scenario on human evolution. Students will be expected to hand in annotated bibliographies based on the readings, and to take turns in leading discussion. Each student will also produce a term paper that will expand on a topic relevant to the course.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

ANTH 2617 - PALEOPATHOLOGY

Minimum Credits: 3

Maximum Credits: 3

Paleopathology is the study of disease and its process among ancient peoples using primary evidence from Human Skeletal remains. Additional lines of inquiry draw on archaeological, ethnographical, clinical and documentary sources to aid in our interpretation. In this course you will learn how to recognize abnormal bone, differentiate between disease

processes, describe abnormal bone changes, evaluate recording methods and investigate the epidemiological history of various disease processes. The impact of disease upon the individual and ancient societies will be considered throughout the course and in student research. The combined lecture, seminar and laboratory format provides a comprehensive foundation of skeletal pathology, experience with recording methods and an understanding of the relationship between disease, environment, the individual and their community.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

ANTH 2619 - ADVANCED SKELETAL ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

This course provides the student with an in-depth understanding of the skeletal features used to develop the osteobiographic profile (e.g., Age, sex, stature, ancestry, handedness, etc.) Of an individual. This analysis is essential for forensic identification and forms the foundation for the reconstruction of ancient individuals and their life-ways. Each student will select some aspect of skeletal analysis and present an overview of the bone biology, the history of the analytical methods, the problems and advantages of each method, modifications that others have made to address these issues, and the current state of knowledge. In the past, some students have proposed new methods of analysis. This will be complemented by a lab exercise designed by the student that will provide data for interobserver analysis of various techniques. The results of this lab will be presented as posters which will be posted on CW at the end of the term. Prior osteological experience is required.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

ANTH 2620 - SPECIAL TOPICS IN PHYSICAL ANTHROPOLOGY

Minimum Credits: 3

Maximum Credits: 3

Examines current topics and controversies in physical anthropology. Special problem areas vary from year to year.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

ANTH 2620 - SPECIAL TOPICS IN PHYSICAL ANTHROPOLOGY

Minimum Credits: 3

Maximum Credits: 3

Examines current topics and controversies in physical anthropology. Special problem areas vary from year to year.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

ANTH 2625 - BIOARCHAEOLOGY

Minimum Credits: 3

Maximum Credits: 3

The human skeleton provides the most direct and unchallenged evidence for an individual's past behavior as the skeleton is plastic in its response to stress, much the same as a society responds to social and environmental stress. While the artifacts, architecture and features recovered from an excavation leave a cultural imprint on the landscape, so too does culture and behavior leave an impression on the deceased. The individual is not just a biological shell to be

cleaved from its cultural context, but rather forms a social package contingent upon culture during life and in death. We will examine social change and behavior from the perspective of the deceased within geographically diverse funerary contexts. We will evaluate factors that may influence the funerary context, such as differential burial practices and preservation. We will examine traditional labels to explore the topics of gender, biological vs. chronological age, and life course thresholds. Lectures will be supplemented with a practical component as well as writing exercises.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ANTH 2626 - WOMB TO TOMB

Minimum Credits: 3

Maximum Credits: 3

This course will address basic theories and principles pertaining to the human lifecycle from both a biological and cultural point of view. It will also discuss evolutionary changes in human growth patterns and assess environmental and genetic influences on human populations both past and present.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ANTH 2630 - PHYSICAL ANTHROPOLOGY RESEARCH

Minimum Credits: 3

Maximum Credits: 3

The student conducts independent research developed in consultation with, and carried out under the supervision of, a faculty member in biological anthropology.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SNC Basis

ANTH 2687 - CORE COURSE IN PHYSICAL ANTHROPOLOGY

Minimum Credits: 4

Maximum Credits: 4

This course presents an integrated view of the diverse topics that biological anthropology encompasses. Emphasis is placed on how evolutionary, genetic and developmental processes shape human biology.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

ANTH 2688 - BIOLOGICAL ANTHROPOLOGY CORE COURSE

Minimum Credits: 3

Maximum Credits: 3

This course presents an integrated view of the diverse topics that biological anthropology encompasses. Emphasis is placed on how evolutionary, genetic and developmental processes shape human biology.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

ANTH 2715 - DIMENSIONS OF AGING: CULTURE AND HEALTH

Minimum Credits: 2

Maximum Credits: 2

Provides an overview of the aging experience from a cross cultural and a public health perspective. The ways in which people cope with and adapt to the aging process is the major theme.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Attributes: Asian Studies, Global Studies

ANTH 2720 - POETICS AND POLITICS OF ETHNOGRAPHY

Minimum Credits: 3

Maximum Credits: 3

The 1980s was described as "an experimental moment" in the human sciences and as a time of "crisis of representation" when anthropology has taken a literary, experimental, reflexive, modern, late-modern, postmodern, textualist turn. This seminar examines this experimental moment, its history and anthropological precursors, the critiques that have followed, and the suggestions for the future of ethnography and anthropological writing that have ensued. Readings include a number of recent experimental ethnographies as well as a sample of older "classics".

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

ANTH 2724 - THE ANTHROPOLOGY OF SCIENCE: GLOBAL PERSPECTIVES

Minimum Credits: 3

Maximum Credits: 3

Science and technology are integral to contemporary societies. Understanding how science is produced and how it shapes daily life is a crucial challenge for anthropologists, who have studied the production of scientific knowledge in labs, hospitals, field sites, and elsewhere. While early studies of science as a cultural practice focused primarily on the U.S. and Europe, science and technology are produced and consumed globally. Through analyses of case studies of biotechnology, medicine, genetics, conservation, agriculture, energy, climate science, and computing around the world, this class will investigate the global dynamics of science and technology. Juxtaposing readings on different scientific fields from around the globe, we will look for recurring themes that connect these studies. What happens when science and technology travel, and how do new places emerge as centers of knowledge production? How are culture, identity, technology, and science linked?

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Attributes: MCSI - Sustainability Focused

ANTH 2725 - GLOBAL PHARMACEUTICALS

Minimum Credits: 3

Maximum Credits: 3

This course examines pharmaceuticals as cultural and social phenomena, following their development, production, marketing, and use around the globe. We will investigate a number of issues, including the growing number of drugs prescribed to Americans each year, the lack of access some populations have to essential medicines, the increasingly global nature of clinical trials, and the role of pharmaceutical companies in the opioid crisis. We will use the study of drugs and medicines to analyze the production of medical knowledge, changing perceptions of health and illness, and the role of the state and the market in the development and distribution of therapeutics. Pharmaceuticals bring together science, clinical practice, marketing, and consumerism, and this course will draw on anthropological research to trace the role they play in global flows of knowledge, capital, commodities, and people.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ANTH 2730 - ENVIRONMENTS, HEALTH AND POWER

Minimum Credits: 3

Maximum Credits: 3

This graduate seminar examines anthropology that illuminates the connections between capitalism, colonialism, environmental crisis, land dispossession, and toxic exposure. Focusing on conservation, exploitation, contamination, and re-imagination, we will consider with how power operates in and through environment at a moment when human/nature relationships have become matters of life and death. Topics include Anthropocene/Plantationocene studies, coloniality & decolonization, infrastructure, affect, resistance, and repair.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

ANTH 2731 - MEDICAL ANTHROPOLOGY 2

Minimum Credits: 3

Maximum Credits: 3

This course deals with topics surveyed in medical anthropology 1, looking at them in more ethnographic depth and with greater attention to current research findings.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Attributes: Global Studies

ANTH 2732 - THEORIZING FROM EX-CENTRIC SITES

Minimum Credits: 3

Maximum Credits: 3

In a recent essay, anthropologist Faye Harrison (2016, 170) calls on anthropologists to theorize from "ex-centric sites"- "Southern" locations, "particularly the peripheral zones where critical intellectual trajectories have been sustained despite trends toward erasure." Taking up Harrison's call, this advanced graduate seminar engages decolonial theories advanced by scholars from Southern locations or peripheralized social groups. We will critically engage the works of scholars like Anibal Quijano, Amie Cesaire, Christina Sharpe, David Scott, Faye Harrison, Franz Fanon, Jean Casimir, Michel-Rolph Trouillot, Nelson Maldonado-Torres, Walter D. Mignolo, Catherine E. Walsh, Yanick Lahens, Valentine Y. Mudimbe, Ramon Grosfoguel, Ngg wa Thiong'o, and others. We will also explore how these scholars' ideas and methods may inform how we engage our research praxis.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ANTH 2741 - ANTHROPOLOGY OF LAW

Minimum Credits: 3

Maximum Credits: 3

This course will examine anthropological analyses of law and law-like phenomena in a number of different societies, concentrating on the development of theory in this field. Since this theory reflects larger theoretical developments in anthropology and in post-war social science, the study of the anthropology of law is a case study in the development of modern theoretical paradigms.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Attributes: Russian & East European Studies

ANTH 2744 - GRANTS AND RESEARCH DESIGN

Minimum Credits: 3

Maximum Credits: 3

This seminar will focus on the formulation of individual research problems and research designs in preparation for thesis research. Course requirements center around the development of a research proposal which will include a research design, area and theoretical background, field techniques and procedures, methodology, data analysis, and significance of the research. Grantsmanship, including how to submit proposals to various agencies, will be explored.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

ANTH 2750 - CONTEMPORARY ANTHROPOLOGICAL THEORY

Minimum Credits: 3

Maximum Credits: 3

This seminar surveys recent developments in anthropological theory, with emphasis on social and cultural anthropology. Topics covered vary with interests of students and the instructor. The course centers on the close reading of several contemporary texts.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Attributes: African Studies, Global Studies

ANTH 2755 - THE ART OF PUBLICATION

Minimum Credits: 3

Maximum Credits: 3

This graduate course is intended as a workshop for refining papers for publication as journal articles or edited book chapters. The course is intended for relatively advanced graduate students who have a good idea at the outset of what they plan to publish and have the support of their advisor in this plan. We will go through the process of identifying suitable publication venues, revising drafts and figures for publication, and understanding what to expect from the peer-review process. Because the class involves substantial peer feedback, students are asked to commit to supporting their fellow students' revision process as well as devoting time to their own. The aim is for every student to submit a paper for publication by the end of the semester.

Academic Career: Graduate

ANTH 2763 - FIELD METHODS

Minimum Credits: 4

Maximum Credits: 4

Designed to acquaint students with basic ethnographic field work techniques. Topics addressed include taking and managing field notes on participant-observation and use of archival materials. There will also be some discussion of the relationship among research design, data collection, and data analysis.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

ANTH 2770 - PRECARIETY AND POLITICS

Minimum Credits: 3

Maximum Credits: 3

Crisis seems to have become the normalized condition in which we live our lives and make sense of the world around us. Each new iteration of this condition, caused by wars, natural disasters, and recently the Covid-19 pandemic, further cement our perception that crisis has become permanent. This perception is further fueled by neoliberal globalization that builds on what Naomi Klein conceptualized as disaster capitalism. Governments that adopt neoliberal economic policies, Klein notes, tend to exploit crises to introduce structural adjustment plans during times when populations are too beaten down to mount an efficient opposition. By doing so, neoliberalism intensifies our sense of crisis as it grinds down our sense of security. Whereas theories of neoliberalism focus on the role of the economy in generating conditions of precarity, in recent years, scholars also started examining the social lives and cultures of this condition. Furthermore, they began exploring how conditions of precarity give us hope and galvanize our desire to reform our lives, reach out to others, and build new communities. This course will introduce students to theories and ethnographies of precarity, as well as works that analyze transformations in the ways we participate in the political domain to fight locally specific conditions of precarity. We will read texts by David Harvey, Isabell Lorey, Wendy Brown, Judith Butler, Michael Hardt and Antonio Negri, Sara Ahmed, Kathleen Stewart, Silvia Federici, Elizabeth Povinelli, Deva Woodly, and Susan Buck-Morss, among others. The course will be divided into three units that will build on each other: Theories of Precarity, Ethnographies of Precarity, and Theories and Ethnographies of Precarity Politics.

ANTH 2771 - GENDER AND THE STATE

Minimum Credits: 3

Maximum Credits: 3

This course will critically engage with scholarship that theorizes the relationship between gender and the state. We will discuss such topics as pronatalism as a form of governance, low birth society, the governmental regulation of sexuality, alternative economic practices, women's role in maintaining various forms of the commons, women's systemic mobilization to various genres of reproductive labor, and the reproductive justice movement. The course inquires whether we could think of declining fertility rates in the advanced capitalist world as both an effect and an expression of an enduring crisis in familial productivism, the social factory, and the prevalent system of wage labor, which no longer serves as fair mechanism of redistribution. We will examine governmental responses to these developments and

feminist strategies to intervene in them. We will discuss how invisible labor is increasingly integrated into formal processes of capitalist accumulation through harnessing the unremunerated labor of communication and sociality especially in the service industries or through extracting surplus value from "the labor of love" in the context of reproduction. We will explore what forms of feminist activism and feminist politics emerge in the wake of chronic care deficit and women's growing unwillingness to assume the responsibility for filling in the void created by the neoliberal dismantling of the welfare state and, more recently, failures in the delivery of public services and breakdowns in global supply chains due to the COVID-19 pandemic.

ANTH 2782 - SPECIAL TOPICS IN CULTURAL ANTH

Minimum Credits: 3

Maximum Credits: 3

This course will be on a topic in the area of specialization in cultural anthropology of a visiting scholar.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Attributes: Asian Studies

ANTH 2788 - CULTURAL ANTHROPOLOGY CORE COURSE

Minimum Credits: 3

Maximum Credits: 3

This course is an introduction to the anthropological study of human culture and society. We will examine how different modes of description and explanation in contemporary cultural anthropology are applied to various domains (e.g., How different peoples feed themselves, mate and have children, cooperate and fight with one another, deal with the inevitability of death, etc.). By comparing the ways the human beings cope with the natural environment and each other, we will seek a better understanding of ourselves and what it is to be human.

ARC 2137 - AMERICAN ARCHITECTURE SINCE INDUSTRIALIZATION

Minimum Credits: 3

Maximum Credits: 3

By 1880 traditional American architectural values had broken down under a barrage of ornament and imported European styles. But at the same moment a new American architecture was taking shape to express the new wealth of post-Civil War America and its new social order. The next hundred years would see a succession of brilliant architects in Sullivan, Wright, Mies, Johnson and the pluralists of today. These individual successes only partially mask some major problems; both constitute the underlying themes of this course.

ARC 2138 - BLACK BUILT AMERICA: ARCHITECTURES OF BLACK RESISTANCE IN THE UNITED STATES

Minimum Credits: 3

Maximum Credits: 3

This course offers a critical history of the Black labor, creativity, craftsmanship, engineering, and activism that built the United States of America. It is undeniable that Black Americans and African Americans have been brutally marginalized by the instruments of systemic racism including segregation, redlining, eviction, and more recently gentrification. In this class, however, that very real and continuing history of oppression is studied as the fuel for the creative agency of Black individuals and communities. Appropriating, intervening, and shaping the built environment became one of the many forms of Black resistance to racism and systemic injustices. In doing so, Black hands and Black minds shaped the very fabric of America's landscape. Our class begins and ends in Washington DC, posing important questions about the hidden and overt symbols of Black heritage in the nation's capital.

ARC 2152 - ROMAN ARCHITECTURE

Minimum Credits: 3

Maximum Credits: 3

The course will examine the development of roman architecture from its origins in Etruria and central Italy to the middle empire (ca. 150 Ad). Special attention will be given to the relationship of architectural forms, types and

functions to changes in roman politics and society and the significance of materials and outside influences on the development of local Italian traditions and forms. The interaction between roman architectural forms and local traditions in the provinces to create a roman imperial "koine" will be treated only in passing.

ARC 2158 - ARCHITECTURE AND ENLIGHTENMENT

Minimum Credits: 3

Maximum Credits: 3

This course will examine architecture, city planning, interior design, and gardening in eighteenth-century Europe as the product of social, industrial, administrative, and intellectual transformations that began to radically challenge traditional spatial configurations and conventional approaches to building. In cosmopolitan centers like London and Paris, an unprecedented explosion of print media, rapid rises in literacy, and the development of a public sphere outside official power structures opened debate in the arts to previously marginal figures. A range of new voices thus emerged that impacted policy decisions in the urban realm and proffered advice and guidance in thinking about aesthetics and artistic production. The rise of science held out the possibility that cities and institutions could be reshaped to improve human welfare through better hygiene and the expansion of commerce. Influential new classes defined by wealth or specialized knowledge generated the creation of building types for a range of new activities. Elite domestic space in particular reflects a wholesale transformation of social priorities motivated by the novel concept of privacy. Narrowly defined Renaissance discourses on the arts founded exclusively on the model of ancient Rome collapsed under an avalanche of data gathered in remote sites around the Mediterranean and through contact with more far-flung civilizations around the world. New intellectual paradigms reconfigured the relationship between individual and nature, between modern present and historical past. Consequently, the purpose of architecture mutated in the course of the eighteenth century as a bewildering range of new possibilities for shaping building and reshaping social relations were explored. Well before political revolution rocked European governments and toppled traditional hierarchies, the built environment served as a laboratory for experimentation and as a forum for reimagining society.

ARC 2162 - CAMPUS-COMMUNITY WORKSHOP

Minimum Credits: 3

Maximum Credits: 3

Architects and designers have a vital role to play as thinkers and advocates who work with organizations and communities to help imagine ways to reshape the environments in which we live and interact. Over the course of the term, students will investigate the Pitt campus and surrounding Oakland neighborhoods, conduct original research using primary and secondary sources, and think critically and creatively about ways the environment can be shaped to make positive change. Each student will develop an original, written proposal for either [1] an intervention that responds to a need, enhances the experience of being at the university, or improves the quality of life on campus or in an adjacent neighborhood; or [2] a research project that could be continued in a subsequent term for independent study credit.

Academic Career: Graduate

Course Component: Workshop

Grade Component: Grad Letter Grade

ARC 2180 - WORLD CITIES

Minimum Credits: 3

Maximum Credits: 3

This course establishes a set of issues and a chronological context through which to understand the main patterns of city development. Thus the paring of St. Petersburg and Brasilia, London and Los Angeles, Amsterdam and Chicago, points out similarities and differences in their shape and social context. Student reports on individual cities are an integral element of the course, and influence the choice of cities to be studied in detail.

ARC 2181 - PITTSBURGH ARCHITECTURE/URBANISM

Minimum Credits: 3

Maximum Credits: 3

The course studies the physical environment of Pittsburgh; the topography, early settlement, the expansion of its industrial center, the post-war renewal, and the current shift from production to a service-based economy. A parallel study in the architectural history of Pittsburgh focuses on images of individual buildings from fort Pitt to the new skyscrapers. Student papers either expand research in building categories (industrial, domestic, etc.) or integrate the physical development of the region with its political and social history.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

ARC 2182 - PITTSBURGH NEIGHBORHOODS

Minimum Credits: 3

Maximum Credits: 3

Pittsburgh Neighborhoods is a course where students learn about people, culture, history, and current issues that confront under-represented communities and neighborhoods in Pittsburgh. Throughout the semester, with direction from the instructor, students learn about and employ ways to see, document, and interpret a neighborhood by engaging the built environment, historical documents, and community members in storytelling. They approach the built environment as a cultural product, explore place as a fusion of material culture and human perceptions and practices, and frame questions of power around the politics of the built environment. In this class, we will employ methods that help us transcend the realm of the visual and explore the experiential and ephemeral. We will learn to observe with all our senses, listen to community members, and document life when in the field, and excavate and explore visual and textual records when in the archive. In doing so, we will adopt theories and methodologies from multiple fields, including urban/architectural history, cultural geography, anthropology, public history, and material culture studies.

ARC 2330 - GLOBAL PRESERVATION

Minimum Credits: 3

Maximum Credits: 3

The late-nineteenth and early-twentieth century debates regarding the role of the architectural monument as a signifier of the past, as a container of memory and more importantly authenticity, were the definitive moment in the institutionalization and professionalization of architectural preservation around the world. In a 1903 essay titled 'the modern cult of monuments,' art historian Alois Riegl claimed that while the creation of monuments (i.e. structures built to memorialize certain events or persons) had a long history that predates modernity, the 'cult of the monument' (i.e. the allocation of the monument as a unique and original object in a pre-ordained historical narrative of social and cultural evolution) came about as recently as the nineteenth-century. It is this coupling of the advent as well as the progress of modernity along with the formalization of systems of historic preservation that this course seeks to explore.

ARC 2340 - HERITAGE SITES

Minimum Credits: 3

Maximum Credits: 3

According to the United Nations Educational, Scientific and Cultural Organization (UNESCO), heritage sites encompass sites of "outstanding universal value from the historical, aesthetic, ethnological or anthropological point of view." This course will develop the fundamental themes, ideas, and case studies required to analyze, understand and critically engage with heritage sites in a comparative and global perspective. We will begin charting the European origins of the western understandings of heritage and exploring the development of national and international heritage legislation, charters and organizations. The course will then explore emerging trends that challenge Eurocentric notions of heritage: from critical heritage studies to approaches that specifically focus on minorities, women, and indigenous groups, and the broader issues of human rights and development. Starting from the second third of the semester, case studies from different geographic areas, time periods and themes will be discussed: heritage sites and national identity; heritage sites and tourism; heritage sites and sustainable development; threats to heritage; negative and difficult heritage; heritage and human rights; heritage futures. Finally, we will discuss the increasing interest in bottom-up initiatives that focus on grassroots, people-centered approaches to foster community engagement and participation in the management, programming and interpretation of heritage.

Athletic Training

ATHLTR 1811 - BASIC ATHLETIC TRAINING

Minimum Credits: 3

Maximum Credits: 3

This course is designed to provide the student with an introduction to the athletic training profession. Topics to include

medical terminology, mechanisms of injury, and recognition and treatment of common athletic injuries to major body parts.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

ATHLTR 1812 - BASIC ATHLETIC TRAINING LAB

Minimum Credits: 1

Maximum Credits: 1

An introduction to basic taping techniques and injury evaluation techniques used in the profession of athletic training. Basic supportive strappings and paddings for immediate care and competition are presented as well as basic joint evaluation procedures, assessment of vital signs, and crutch fitting.

Academic Career: Undergraduate

Course Component: Clinical

Grade Component: Letter Grade

Course Requirements: CREQ: ATHLTR 1811

ATHLTR 1813 - INTRODUCTION TO CLINICAL ATHLETIC TRAINING 1

Minimum Credits: 1

Maximum Credits: 1

This course is designed to help prepare students for the demands associated with experiential learning and future clinical placements in the Athletic Training Education Program (ATP). The course will have a combined in-person meetings and associated class assignments that will include field observations at approved clinical education sites through the University of Pittsburgh. This course is a prerequisite for the Practicum I-IV Courses in the ATP.

Academic Career: Undergraduate

ATHLTR 1815 - FOUNDATIONS IN EVALUATION AND TREATMENT

Minimum Credits: 1

Maximum Credits: 1

The objective of this course is to introduce and develop fundamental understanding of the component for evaluation and acute care. Specific objectives are to introduce the student to concepts related to patient interaction in regards to the evaluation process; the components and general principals of the evaluation process (patient observation, history, range of motion, strength, neurovascular, special tests, palpation, and diagnostics); a basic understanding and ability to perform range of motion and strength assessments and apply the appropriate grading tools. This course is a prerequisite for Therapeutic Interventions I-II courses in the Athletic Training Program.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Athletic Training (AT-MS) or SUBPLAN: Pre-Athletic Training (BSPATH-SP)

ATHLTR 1816 - MEDICAL ETHICS

Minimum Credits: 2

Maximum Credits: 2

This course addresses legal and ethical issues encountered by athletic trainers and other healthcare professionals who are part of the Sports Medicine team. Strong emphasis is placed on legal and ethical issues that occur within the realm of direct patient care. Additionally, the course will expose students with legal and institutional positions and examine relevant case studies. Students will also practice developing concrete logical arguments in support of a chosen ethical stance.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

ATHLTR 1833 - STRENGTH AND CONDITIONING

Minimum Credits: 2

Maximum Credits: 2

Instruction is provided describing the physiological basis for development of pre-season, in-season and off-season strength and conditioning programs. Laboratory experiences will include the theory and technique of operating contemporary isotonic, isokinetic and isometric strength training equipment.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Athletic Training (BS, BS-H, BPH)

ATHLTR 2020 - ATHLETIC TRAINING HEALTHCARE FOR YOUTH AND SPECIAL POPULATIONS

Minimum Credits: 3

Maximum Credits: 3

This course provides an in-depth exploration of athletic training healthcare for physically active youth and special populations. Anatomical and physiological differences of a variety of special populations will be explored. For this course, the term special populations does not just pertain to intellectual disabilities but also age, pregnancy, para-sport, etc. Athletic training healthcare challenges will be addressed that include evaluation, treatment, and rehabilitation of injuries and illness unique to special populations.

ATHLTR 2807 - THERAPEUTIC INTERVENTIONS 1

Minimum Credits: 4

Maximum Credits: 4

The instruction and participation of this 4-credit course aim are to educate the student on intervention strategies for pre-operative, post-operative, and non-operative healthcare conditions. Students will develop the ability to implement an evidence-based care plan to address physical and social determinants of health needs through the introduction of therapeutic modalities and therapeutic exercise intervention for the lower extremity. The development of these skills will optimize the student's ability to critically think and apply skills to address a patient's or client's individual healthcare needs through prescription, administering, and assessment of therapeutic interventions. Topics in this course include but are not limited to tissue healing, pain control theory, lower extremity rehabilitation exercise, and foundations of therapeutic modalities. A combination of learning strategies from individual and group activities will allow students to establish and refine a clinical practice philosophy for injury/illness rehabilitation and prevention for the lower extremity.

Minimum Credits: 4

Maximum Credits: 4

The instruction and participation of this 4-credit course aim are to supplement the student on traditional and complementary therapeutic intervention strategies for pre-operative, post-operative, and non-operative healthcare conditions for the spine and upper extremity. Students will refine the ability to implement an evidence-based care plan to address physical and social determinants of health needs through the introduction of therapeutic intervention for the spine and upper extremities. The development of these skills will build and further optimize the student's ability to critically think and apply skills to address a patient or client's individual healthcare needs through prescription, administering, and assessment of therapeutic interventions. Topics in this course include but are not limited to manual therapy, spine and upper extremity rehabilitation exercise, complementary healthcare intervention, and psychology of sport rehabilitation. A combination of learning strategies from individual and group activities will allow students to evaluate and evolve their clinical practice philosophy to injury/illness rehabilitation and prevention for the spine and upper extremity.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

ATHLTR 2808 - THERAPEUTIC INTERVENTIONS 2

Minimum Credits: 4
Maximum Credits: 4
THERAPEUTIC INTERVENTIONS 2
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

ATHLTR 2809 - FUNCTIONAL HUMAN ANATOMY

Minimum Credits: 2
Maximum Credits: 2

This 2-credit course utilizes the basic structural knowledge provided in Human Anatomy and concepts learned in Kinesiology and Biomechanics to develop an understanding of the functional significance of the structures of the musculoskeletal system, within a movement setting (covering mechanical properties and functional characteristics). In addition to normal function, mechanisms of and adaptations to, common injuries, disease and rehabilitation is discussed.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Athletic Training (AT-MS) or SUBPLAN: Pre-Athletic Training (BSPATH-SP)

ATHLTR 2809 - FUNCTIONAL HUMAN ANATOMY

ATHLTR 2810 - EVIDENCE BASED PRACTICE IN ATHLETIC TRAINING

Minimum Credits: 2
Maximum Credits: 2

This 2-credit course provides athletic training students basic skills in reading, critiquing and applying research literature to patient care within athletic training. It will introduce the student to key concepts of EBP that are relevant to the field of athletic training and rehabilitation. This course will also review the principles and key components of clinical research, study design, and the differentiation between different levels of evidence. Students will learn how to appraise peer reviewed literature and apply to clinical practice. In this course students will identify and discuss evidence-based issues related to intervention and diagnosis through materials presented in lecture and the use of real-world clinical scenarios and literature. Topics will include but not be limited to cultural competency, diagnostic accuracy, clinical prediction rules, patient-oriented outcomes, disablement models/ICF codes, epidemiology & health informatics.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Athletic Training (AT-MS) or SUBPLAN: Pre-Athletic Training (BSPATH-SP)

ATHLTR 2810 - EVIDENCE BASED PRACTICE IN ATHLETIC TRAINING

Minimum Credits: 2
Maximum Credits: 2
EVIDENCE BASED PRACTICE IN ATHLETIC TRAINING

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

ATHLTR 2811 - GRADUATE RESEARCH 1

Minimum Credits: 3

Maximum Credits: 3

This 3-credit course consists of lectures, group discussion, and assignments aimed to develop understanding of the principles of research and application to clinical practice. It will expand concepts of Research Methods and Evidence Based Practice in Athletic Training by allowing the student to gain a more in-depth knowledge of methodologies utilized in the field of athletic training. In class, students will be exposed to research instrumentation and methodology for the assessment of anthropometrics, strength, flexibility/postural testing, proprioception, balance/neuromuscular control, electromyography, kinetics, and kinematics. Further the student will apply principles from previous courses by conducting a critical appraisal. This project will encompass: 1. Developing and answering a clinically relevant question; 2. Conducting a search to find and appraise the best evidence; 3. Synthesize the evidence and come to a clinical recommendation. This course includes a lab component.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad HSU Basis

Course Requirements: School of Health and Rehabilitation Sciences students only.

ATHLTR 2812 - GRADUATE RESEARCH 2

Minimum Credits: 3

Maximum Credits: 3

This 3-credit course consists of in field experiences and assignments aimed to apply evidence-based practice through integration of outcomes and patient care. Students will apply and demonstrate proficiency of concepts from Research Methods and Evidence Based Practice in Athletic Training by using outcomes collected through patient care to answer a clinical research question. Students will gain hands on experience in conducting a literature review related to their clinical question, data reduction/processing, data analysis, and dissemination of their findings. These outcomes will be completed in conjunction with ATHLTR 2804 and their immersive clinical experience.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad HSU Basis

Course Requirements: School of Health and Rehabilitation Sciences students only.

ATHLTR 2813 - GENERAL MEDICAL AND PHARMACOLOGICAL CONDITIONS

Minimum Credits: 4

Maximum Credits: 4

This 4-credit course will provide didactic knowledge and clinical medical skills to provide the athletic training students with an opportunity to understand and identify epidemiology, etiology, pathogenesis, and signs and symptoms to common illness and disease to the body systems. Examination of basic principles of pharmacology comprising knowledge, skills, and values that the entry-level certified athletic trainer should possess. Examination of the indications, contraindications, precautions, and interactions of medication as well as governing regulations relevant to treating and caring for common illnesses and diseases to the body's systems will be discussed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

ATHLTR 2813 - GENERAL MEDICAL AND PHARMACOLOGICAL PRINCIPLES

Minimum Credits: 4

Maximum Credits: 4

GENERAL MEDICAL AND PHARMACOLOGICAL PRINCIPLES

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ATHLTR 2814 - ADVANCED CLINICAL PROCEDURES

Minimum Credits: 3

Maximum Credits: 3

This 3-credit course introduces students to advanced clinical practice in athletic training and affords them an opportunity to learn and practice emerging clinical skills in the practice. Specific techniques will be modified as needed based upon the current Athletic Training Practice Analysis, core competencies as outlined by the CAATE, and current literature. Additionally, students will explore strategies for life-long learning as it pertains to awareness, knowledge, and acquisition of emerging evidence-based skills, techniques, and treatments.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

ATHLTR 2815 - CURRENT CONCEPTS IN SPORTS MEDICINE

Minimum Credits: 2

Maximum Credits: 2

The purpose of this 2-credit course is to present case-based, cutting-edge medical information on sports medicine and sports related injuries that health care professionals can directly apply to the care of their patients. Topics may include advanced orthopedic biomechanical assessment methods, surgical procedures, post-operative rehabilitative options, advanced understanding of musculoskeletal pathology and treatments as well as updates in position and consensus statements.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad HSU Basis

Course Requirements: School of Health and Rehabilitation Sciences students only.

ATHLTR 2816 - ADMINISTRATIVE ASPECTS OF ATHLETIC TRAINING

Minimum Credits: 4

Maximum Credits: 4

This 4-credit course provides the athletic training student with knowledge and skills needed to manage an athletic training facility. This course presents current organizational and administrative topics in athletic training, including policy and procedure development, athletic training facility design and management, ethical and legal considerations, insurance and reimbursement, budgetary strategies, emergency planning and preparticipation screenings.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

ATHLTR 2817 - LEADERSHIP AND PROFESSIONAL DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

This 3-credit course is designed to introduce the student to the knowledge and skills essential as a healthcare professional in clinical practice rooted in inter-professional care and collaboration. Students will learn critical communication skills, task management strategies and work-life balance techniques. Specific attention will be placed upon lifestyle leadership and learning as a healthcare provider, the importance of professional and personal advocacy and strategies to achieve success. Lastly, students will develop preliminary professional development plans that can be used to map their continuing education and growth as young professionals and life-long learners.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

ATHLTR 2818 - BOARD OF CERTIFICATION (BOC) PREPARATION

Minimum Credits: 1

Maximum Credits: 1

This 1-credit course aims to aid each athletic training student in the final stages of preparation for the Board of Certification (BOC) examination.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad HSU Basis

Course Requirements: School of Health and Rehabilitation Sciences students only.

ATHLTR 2819 - MENTAL HEALTH CONSIDERATIONS IN SPORTS MEDICINE

Minimum Credits: 3

Maximum Credits: 3

This course examines the psychological factors involved in sport, sport-related injuries, the rehabilitation process, as well as examining the mental health aspects of the athletic trainer working in the sports setting. Course topics include: sport participation, psychological responses to injury, the relationship between injury and stress, recognizing and referring mental health related issues, pain tolerance, rehabilitation adherence, and returning to sport after injury, critical incident stress management, psychological first aid, workplace mental health policy & procedures, and peer support.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Athletic Training (AT-MS)

Behavioral and Community Health Sciences

BCHS 2135 - LEADERSHIP

Minimum Credits: 3

Maximum Credits: 3

This course examines theories about leadership and provides students with feedback on their own leadership styles. Leadership skills are defined and applied. Teams, as one context for demonstrating leadership, are explored in depth and methods for recognizing and managing group dynamics are introduced. Concepts regarding organization leadership are introduced. The course combines theory with practical application. It is highly participative and students are expected to join in a wide range of exercises and simulations. The two major assignments require that the students work in teams with other students.

Academic Career: Graduate

Course Component: Lecture
Grade Component: Grad Letter Grade

BCHS 2503 - PRACTICUM

Minimum Credits: 1

Maximum Credits: 3

Short term field placement relevant to the student's area of interest in an operating organization or agency.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad SN Basis

Course Attributes: Community Element - Building Understanding, Community Element -General Community Impact

BCHS 2504 - THEORY AND PRACTICE OF HEALTH COMMUNICATIONS

Minimum Credits: 3

Maximum Credits: 3

This course equips public health professionals with the knowledge and skills to develop and implement effective health communication strategies. Through a mix of theory, case studies, and practical applications, students will learn how communication shapes health behaviors, influences policy, and impacts public health outcomes, culminating in developing a health communication product for an organization. This course is ideal for graduate students in public health and associated fields pursuing careers in health education, health promotion, program evaluation, or communication and for students preparing for the CHES exam.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Behavioral & Community Hlth Sc (MPH, DPH)

Course Attributes: Community Element - Building Understanding, Community Element -General Community Impact

BCHS 2509 - SOCIAL AND BEHAVIORAL SCIENCES AND PUBLIC HEALTH

Minimum Credits: 3

Maximum Credits: 3

The core course provides an overview of the social and behavioral sciences and their importance in the interdisciplinary field of public health. A primary emphasis is on the social-ecological model, its application to public health issues, and its use in the development of policies, strategies, interventions and programs. The course content will introduce students to several relevant social and behavioral theories as well as a range of community health assessment and planning models used by public health professionals in both domestic and international venues. Through a series of assigned readings, discussion exercises, group projects, quizzes and written assignments, students will enhance their knowledge and awareness of the role of social and behavioral sciences in public health and its relevance to their specific discipline. At the conclusion of the course students will be able to: identify the important social and behavioral determinants of health; describe the inter-relationships between the social, behavioral, bio-medical, physiological, and environmental factors related to individual and community health; identify the major health disparities related to social, behavioral and economic factors; describe the role of culture and socio-economic status in health behavior, access to services, and decision-making; and understand the importance of community partnerships and participatory approaches in the development, implementation, management and evaluation of community policies and programs.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: All Public Health MPH degrees

Course Attributes: MCSI - Sustainability Focused

BCHS 2511 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 3

Students with major interests in specialty areas participate in courses of individual study, research activities, or advanced readings with a specified faculty member.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad SN Basis

BCHS 2516 - VIDEO FOR HEALTH PROMOTION

Minimum Credits: 3

Maximum Credits: 3

Video is an increasingly important media for the distribution of health promotion messages. The purpose of this class is to provide students with basic principles of script development and the video production process to be able to produce educational and persuasive short-form videos for health promotion. Students will develop, direct, and produce short-form health promotion videos for distribution on social media platforms.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

BCHS 2520 - THEORIES OF HEALTH BEHAVIOR AND HEALTH EDUCATION

Minimum Credits: 1

Maximum Credits: 1

The course is designed as an introduction to the major theories that are the foundation for most health promotion and health education interventions. It will provide the student with exposure to the current theories that are being used in health behavior and health promotion educational interventions. Also it will provide students with a theoretical foundation for designing, implementing and evaluating health promotion and education programs.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Behavioral & Community Hlth Sc (MPH, DPH)

Course Attributes: Global Studies

BCHS 2521 - ESSAY

Minimum Credits: 1

Maximum Credits: 3

The essay requirement is designed to provide the student with an opportunity to integrate the major components of the public health learning experience. The student is expected to demonstrate verbal and technical proficiency in expository writing.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

BCHS 2523 - PUBLIC HEALTH PROGRAM PLANNING AND PROPOSAL WRITING

Minimum Credits: 3

Maximum Credits: 3

This course is designed to expose students to critical health program planning, implementation and evaluation tools and strategies in a format that models actual program implementation. This class complements other BCHS coursework in that it gives the student the opportunity to apply theories and models learned in other classes. In particular, the socio-ecological theory heavily influences the content of this course. Through discussions, presentations, written assignments, and in-class activities, students will learn resources for, and gain practice in, the stages of program development, including budgets and use of logic models. Students will learn how to present their program proposals in both written and oral formats.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Behavioral & Community Hlth Sc (MPH, DPH, PHD)

BCHS 2524 - OVERVIEW OF HEALTH EQUITY

Minimum Credits: 3

Maximum Credits: 3

Achieving health equity and understanding health disparities involve a critical analysis of historical, political, economic, social, cultural, and environmental conditions that have produced an inequitable health status for vulnerable populations in the United States. Eliminating health disparities and achieving health equity are primary goals of are primary goals of Healthy People and the US Office of Disease Prevention and Health Promotion, in order to 'improve the health and well-being of all'. The purpose of this class is to introduce basic issues that underlie health disparities. This course will include an overview of current data and literature, foster discussions that will examine health disparities, explore social, structural and environmental determinants of those disparities, critically review measurement issues, and determine public health's response to addressing these disparities and achieving health equity. Students should seek to critically reflect on their professional roles in eliminating health disparities and achieving health equity.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Attributes: MCSI - Sustainability Focused

BCHS 2525 - INTRODUCTION TO APPLIED RESEARCH

Minimum Credits: 3

Maximum Credits: 3

The goal of the course is to give students a basic understanding of social and behavioral sciences research principles, as well as how these methods are implemented in the field of public health. Relationship of applied research to program evaluation, the link of theory to research, and the translation of research information to applied public health programs and policies will be emphasized. Participatory research will be highlighted. Quantitative and qualitative strategies, research designs, data collection methods, participant selection, and data analysis will be covered.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Behavioral & Community Hlth Sc (MPH, DPH, PHD)

BCHS 2526 - HEALTH EQUITY RESEARCH: METHODS AND INTERVENTIONS

Minimum Credits: 3

Maximum Credits: 3

This course is one of the series of courses required for the certificate in health equity, and will examine the challenges in, and methods for, health inequities research and interventions. It is intended to both complement and expand upon the knowledge gained in other BCHS courses and/or professional exposure by focusing on a wide range of populations

that experience health inequities. Inequities that we will explore include (but not be limited to) those evidenced by gender, ethnicity, disability, socioeconomic status, sexual orientation, and rural/urban living. Through discussions, presentations, written assignments, and in-class activities, students will gain exposure to methods and resources for research in health inequities. This will include ethics and research in diverse communities; barriers and facilitators to engaging diverse populations in health research; advisory boards and coalitions; data bases and research designs utilized in equities research, and the application of research findings to program development. Students will work both in interdisciplinary teams and individually to effectively present their work in written and oral presentations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

BCHS 2528 - INTEGRATIVE SEMINAR IN HEALTH EQUITY

Minimum Credits: 1

Maximum Credits: 1

This one credit seminar serves as the integrative course for the health equity certificate. Students build upon and apply the knowledge and experiences gained from all of the previous certificate core and elective courses to specific public health problems while considering a health policy framework. The seminar is designed to expose students to the critical analysis of a health policy as it affects health equity, as well as provides an opportunity for students to network with a variety of academic and community leaders that can potentially further their knowledge and practical skills in this area.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

BCHS 2532 - DIMENSIONS OF AGING: CULTURE AND HEALTH

Minimum Credits: 2

Maximum Credits: 2

Provides an overview of the aging experience from a cross cultural and a public health perspective. The ways in which people cope with and adapt to the aging process is the major theme.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Attributes: Asian Studies, Global Studies

BCHS 2534 - CLINICAL ASPECTS OF DEMENTIA CARE

Minimum Credits: 2

Maximum Credits: 2

This course is designed as an independent study for students in the public health and aging program. Its focus is on the methods and technology for diagnosis and treatment of Alzheimer's Disease.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

BCHS 2551 - SOCIAL NETWORKS & HEALTH

Minimum Credits: 1

Maximum Credits: 1

This course is an introduction to the theory, methods, and procedures of network analysis with emphasis on applications to health and social behavior. The goal of the course is to provide a working knowledge of concepts and methods used to describe and analyze social networks so that professionals and researchers can understand the results

and implications of this body of research. The course also provides the training necessary for scholars to conduct network analysis in their own research and practice careers.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

BCHS 2554 - INTRODUCTION TO COMMUNITY HEALTH

Minimum Credits: 3

Maximum Credits: 3

This course uses strengths-based and social ecological approaches to prepare students for practicing public health with communities. Through in-class activities, discussions, community-based experiences, and written assignments, students will learn ways to engage communities and assist them in building their own capacity to identify and address health issues. Students will also learn techniques for conducting community health needs assessments using both primary and secondary data.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Behavioral & Community Hlth Sc (PHD, DPH, MPH)

Course Attributes: Community Element - Building Understanding

BCHS 2558 - HEALTH PROGRAM EVALUATION

Minimum Credits: 3

Maximum Credits: 3

Surveys the evaluation and policy research methods applied to health. Students learn to critically assess the adequacy of evaluations and how to plan and pilot test an evaluation.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

BCHS 2560 - INTRODUCTION TO POPULATION PROBLEMS

Minimum Credits: 3

Maximum Credits: 3

The impact of population growth, distribution, and change on social, economic, environmental, and health relationships is presented with a focus on the sociopolitical responses to population dynamics.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Attributes: Global Studies, MCSI - Sustainability Focused

BCHS 2562 - SEMINAR IN FAMILY PLANNING

Minimum Credits: 3

Maximum Credits: 3

Participants explore the history of contraception and the birth control movement. Issues related to contraceptive care and the broader concerns of women's health are discussed.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

BCHS 2572 - RISK COMMUNICATION

Minimum Credits: 3

Maximum Credits: 3

Course focuses on risk communication within the context of terrorism and natural disasters. The didactic and experiential course will include core principles of risk communication, examine special challenges of risk communication with diverse audiences and media, and prepare students to create risk and crisis communication campaigns.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

BCHS 2575 - SEMINAR MATERNAL AND CHILD HEALTH

Minimum Credits: 3

Maximum Credits: 3

Seminar deals with current issues in society affecting the health of children and their families. For example, problems of adolescent pregnancy, child abuse and neglect, emotional abuse and sexual abuse; prevailing attitudes and responses; etiology and risk factors; and multidisciplinary preventive strategies.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

BCHS 2599 - PUBLIC HEALTH APPROACHES TO WOMEN'S HEALTH

Minimum Credits: 3

Maximum Credits: 3

Public health problems affecting women, i.e., Alcoholism, smoking, occupational health, reproductive health, aging and cancer, as well as health and social problems relating primarily to women are discussed. Etiology of health problems, prevention and treatment, high-risk groups, and controversies related to care are covered.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

BCHS 2600 - HARM REDUCTION APPROACHES IN HEALTH AND PUBLIC HEALTH SETTINGS

Minimum Credits: 1.5

Maximum Credits: 1.5

The aims of this seven week course are to introduce students to harm reduction (HR) principles as a conceptual approach to care rather than simply as a set of strategies, like syringe exchange, and to challenge them to consider how HR-informed approaches to care may improve participant and provider outcomes. The approach to care builds on lessons learned from community and provider settings that have demonstrated success in engaging and caring for marginalized populations including those who use substances. However, this course extends the conversation about harm reduction to aspects of care that can promote health improvement among all patient and client populations, not just those who use drugs. Concepts that will be discussed include universal harm reduction and herd harm reduction. The course will incorporate a number of speakers who will address the application of HR in specific settings.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

BCHS 2605 - COMMUNITY DEVELOPMENT AND FOCUS GROUPS: PREPARATION, FACILITATION AND APPLICATION

Minimum Credits: 1

Maximum Credits: 1

This workshop introduces students to the focus group as a data collection strategy and prepares them to use focus groups as a research tool. The workshop uses lectures, discussions and interactive exercises to familiarize students with all aspects of focus groups. Topics covered include the theoretical basis of focus groups, formulating questions, recruiting participants, designing sampling schemes, facilitating the discussion, taking notes and applying/reporting out on the data. Students will complete a series of assignments designed to sharpen their listening, facilitating and analytical abilities. Critical components of the class will be observation of and hands-on experience with facilitating discussions, taking notes and reporting. Ability to role play highly desirable.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

BCHS 2608 - INTRODUCTION TO COMMUNITY BASED PARTICIPATORY RESEARCH

Minimum Credits: 1

Maximum Credits: 1

This course is organized around themes central to the conceptualization and implementation of community-based participatory research (CBPR). The goal of this course is to familiarize students with CBPR. Students will become conversant in seminal CBPR literature. Discussion, interactive learning exercises, and examples of current research will be used to provide an understanding of CBPR and the associated strengths and limitations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Attributes: Community Element - Building Understanding, Community Element -General Community Impact

BCHS 2609 - TRANSLATING RESEARCH FOR POLICY AND PRACTICE

Minimum Credits: 1

Maximum Credits: 1

This course provides an introduction to concepts and skills in knowledge translation (a coordinated, collaborative approach to ensure that research findings are utilized by key stakeholders) and to the role of research in changing policy and practice at local, regional, and national levels. This module will build on concepts in community-partnered research introduced in module a of this three-part sequence in community based participatory research. This skills-based module will introduce learners to theoretical concepts in knowledge translation (KT), dissemination and implementation science, and apply these concepts to practical exercises to translate research findings for relevance to other key stakeholders, including community partners, program developers, and policy makers. One session will be devoted specifically to skills building in legislative and media advocacy. The goal of this course is to familiarize learners with the critically important steps involved in translating research findings for relevance to stakeholders beyond academia. Discussion, interactive learning exercises, and examples of research dissemination and implementation science will be used to provide a foundation in kt as an aspect of community-partnered research.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Attributes: Community Element - Building Understanding, Community Element -General Community Impact

BCHS 2610 - CONCEPT MAPPING: A PARTICIPATORY RESEARCH METHOD

Minimum Credits: 1

Maximum Credits: 1

This course provides hand-on training in the participatory research method known as concept mapping (cm). Cm gives community members and other stakeholders a unique chance to have their own words communicate ideas and concepts. Research participants contribute directly in the processing of this information as it directly relates to their community and intervention needs. The goal of the course is to familiarize students with example applications of the research method and to provide training related to concept mapping data collection and analysis. Discussion, interactive learning exercises, and examples of current research will be used to provide an understanding of cm and the associated strengths and limitations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Attributes: Community Element - Building Understanding, Community Element -General Community Impact

BCHS 2612 - PROJECT MANAGEMENT IN PUBLIC HEALTH

Minimum Credits: 2

Maximum Credits: 2

The purpose of the course is to prepare students to effectively manage a range of public health projects. The course is lecture/discussion/laboratory/application based. Project management software is used including Microsoft Project and Visio. Industry standard body of knowledge is the foundation of the course further illustrated with case studies and examples. There are no pre-requisite courses or software skills.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

BCHS 2660 - HARM REDUCTION APPROACHED IN HEALTH & PUBLIC HEALTH SETTINGS

Minimum Credits: 1

Maximum Credits: 1

The aims of this seven week course are to introduce students to harm reduction (HR) principles as a conceptual approach to care rather than simply as a set of strategies, like syringe exchange, and to challenge them to consider how HR-informed approaches to care may improve participant and provider outcomes. The approach to care builds on lessons learned from community and provider settings that have demonstrated success in engaging and caring for marginalized populations including those who use substances. However, this course extends the conversation about harm reduction to aspects of care that can promote health improvement among all patient and client populations, not just those who use drugs. BCHS 2990 - SOCIAL DYNAMICS IN PUBLIC HEALTH

Minimum Credits: 1

Maximum Credits: 1

This course is an introduction to historic and current concepts about complex, dynamic systems in public health research and practice. We will discuss the rationale for adopting systems thinking - an approach to analyzing the impact of systems within their social, spatial, and temporal context - in behavioral and community health research and practice and illustrate how this approach is critical for the development of public health policy. The course will include didactic sessions, guest lectures, hands-on engagement with tools that allow us to represent dynamic social systems, as well as

seminar-style discussions of studies that examine dynamic social systems in public health. (Note: BCHS 2520 is recommended.)

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Graduate Sch of Public Health

BCHS 2991 - MULTILEVEL ANALYSIS IN PUBLIC HEALTH

Minimum Credits: 1

Maximum Credits: 1

Multilevel analysis is an essential statistical tool in public health that can simultaneously investigate the effects of factors at multiple social ecological levels on individual-level outcomes. In this course, students will learn to identify scientific problems that necessitate the use of multilevel statistical modeling techniques and understand the essential theoretical underpinnings of multilevel analysis. Students will conduct multilevel statistical modeling procedures using Stata and interpret the statistical and practical meaning of fixed and random effect coefficients from the output of these models. Special emphasis will be placed on the strengths and limitations of multilevel analysis in investigating social and group-level determinants of health. BIOST 2041, PSYED 2018, or permission to enroll from the instructor required. Knowledge of linear regression, logistics regression or ANOVA strongly preferred.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

BCHS 2992 - SYSTEMS THEORIES AND APPROACHES

Minimum Credits: 1

Maximum Credits: 1

Systems science approaches were developed to understand connections between a system's structure and its behavior over time. The use of such approaches within public health research and practice has grown tremendously over the past decade. Identifying and understanding the dynamic relationships between individuals and their social and physical environments can help us identify potential leverage points for intervention. This course provides an introduction to systems thinking and models in public health, explores the importance of associated theories and underscores the utility of systems science approaches within public health research and practice. We will highlight current systems science public health research and encourage students to think critically about the utility of systems theories and approaches within public health.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

BCHS 2993 - MODELING HEALTH BEHAVIOR CHANGE

Minimum Credits: 3

Maximum Credits: 3

In this class, we focus on the dynamics of health behavior change: (i) the ways social interaction and community factors affect individual health behavior, and (ii) how changes in the behavior of individuals may in turn reorganize larger networks or communities. These dynamics involve temporal processes, but they may also involve spatial processes. In the class we will examine very simple behaviors relevant for health and develop models to predict how behavior changes and what patterns may emerge. Even simple behaviors and artificial social situations can quickly become complex. We use computer representations to "model" these relationships. With this approach we acknowledge complexity and dynamics in health behavior.

Academic Career: Graduate

Course Component: Lecture
Grade Component: Grad Letter Grade

BCHS 2995 - GLOBAL PERSPECTIVES ON WOMEN'S HEALTH: EMPOWERMENT, GENDER EQUALITY, AND HEALTH

Minimum Credits: 2

Maximum Credits: 2

Limited educational opportunities, financial dependence, and gender bias and discrimination are intersecting factors that contribute to poor health status and well-being among women around the world. This course examines the relationship between such macro-level factors and women's health and explores promising interventions and policy changes aimed at promoting women's empowerment, gender equality, and improved and sustained health outcomes for women. Specific attention is given to examining the connection between women's health and educational and legal initiatives and microfinance programming. Illustrative case examples are drawn from instructor global experience conducted on related research in Thailand, India, and Peru and relevant readings. Key health issues discussed will include gender-based violence, reproductive and sexual health, and pregnancy outcomes. To emphasize key points, guest speakers from diverse fields, including women's studies, ethics, law, and economics will be invited to provide additional insights regarding the complexities associated with the topic and with effective and innovative intervention development.

BCHS 3002 - HEALTH SURVEY METHODS

Minimum Credits: 3

Maximum Credits: 3

Introduces techniques for the collection of health data through survey methods.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

BCHS 3003 - SEMINAR IN ADVANCED EVALUATION TECHNIQUES

Minimum Credits: 3

Maximum Credits: 3

Evaluates theory and methodology with emphasis upon human service organizations.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

BCHS 3004 - INTEGRATIVE RESEARCH SEMINAR: GRANT WRITING

Minimum Credits: 1

Maximum Credits: 1

Every graduate of a doctoral program needs to know how to write a successful grant application to fund their work. Whether you are a senior manager leading a public health program in the public or non-profit sectors or you are a researcher working in an academic setting, you will need funding to support your work! We begin this doctoral seminar by asking the question, "how do you write a grant proposal that will attract the attention of a funding agency and convince them that your application is significant and should be a priority for funding?" building on the ideas articulated in BCHS doctoral students' preliminary examination, we will focus on writing the specific aims and significance sections for an NIH grant proposal. The students' written work will be shared with and critiqued by other

students and faculty participating in the seminar. Finally, we will review and critique examples of successful and unsuccessful grant applications "both program and research grants (especially research grants that the students will most likely be writing at the beginning of their academic careers" namely, ro-3s or r-21s).

Course Component: Seminar

Grade Component: Grad SN Basis

Course Attributes: Global Studies

BCHS 3006 - INTEGRATIVE RESEARCH SEMINAR: WRITING FOR PUBLICATION

Minimum Credits: 1

Maximum Credits: 1

The Integrative Research Seminar: Writing for Publication focuses on the process of developing a manuscript for publication in a peer-reviewed journal. All doctoral students must develop the skills to enable them to write and publish the results of their work. The goal of this seminar is to provide students with the requisite knowledge and skills to develop a manuscript for submission to an appropriate journal for publication. As part of this process students will also learn about the peer review process and how reviewers rate manuscripts submitted for publication. It is expected that students in this seminar will work closely with their academic mentor(s) on the development of manuscripts throughout their doctoral program. And, this seminar will assist students in fulfilling the requirement to submit at least one first-authored manuscript-- ideally based on their dissertation research, before they graduate. The seminar content will be delivered via a series of faculty presentations and discussions. There are no prerequisites for this seminar.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

Course Requirements: PLAN: Behavioral & Community Hlth Sc (PhD or DPH)

BCHS 3007 - ETHNOGRAPHIC AND QUALITATIVE METHODS

Minimum Credits: 3

Maximum Credits: 3

Students will be introduced to the basic principles of ethnographic research and their application to the evaluation of human service and health care programs. They will become familiar with research design in ethnographic studies; the process of fieldwork in urban settings; the methodology of participant observation and ethnographic interviewing; recording ethnographic data; ethnographic writing; and ethical questions surrounding ethnographic research.

BCHS 3010 - RESEARCH AND DISSERTATION PHD

Minimum Credits: 1

Maximum Credits: 15

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

BCHS 3015 - COMMUNITY MAPPING AND INTRODUCTORY SPATIAL ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

This course provides an introduction to the use of spatial data in public health. The two main goals are (1) to familiarize students with the use of geographic data in public health research and practice; and (2) to introduce basic spatial

analytic skills applied to geographic and spatial data. Students will be taught how to use geographic information systems (GIS) to inform both community practice and research. They will learn how to create, manage, and analyze geographic data and gain hands-on experience applying these techniques to research questions. No previous knowledge of mapping or GIS is assumed. One lecture and one lab per week.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Attributes: Global Studies

BCHS 3021 - SOCIAL NETWORKS AND HEALTH II: COMPUTER METHODS

Minimum Credits: 1

Maximum Credits: 1

This course provides hands-on training in social network analysis using 3 different software packages: UCINet, R, and Gephi. It is intended for those students who are interested in conducting their own social network studies using the latest available software. It is a time-intensive lab and project course. Topics to be covered include: -How to use UCINet to conduct intermediate and advanced SNA -How to use R to use custom SNA packages -How to use Gephi to conduct basic SNA and generate descriptive network graphs This course consists of in-class examples using SNA software, designing a network analysis plan in consideration of software features, and a final project. Assignments are designed to build components of a full network study, using specific analytic features from available software, visualizing network(s), and culminating in the final project. Individual projects will use data that can be provided or is collected by the student themselves.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

BCHS 3030 - MEASUREMENT IN THE SOCIAL AND BEHAVIORAL SCIENCES

Minimum Credits: 2

Maximum Credits: 2

The goal of this two-credit course is to provide you with fundamental skills to identify, use and create scales and indices for research and evaluation. The course will be primarily based on classical measurement theory, yet we will discuss item response theory as well. We will also cover good measurement processes, including establishing and evaluating validity and reliability. We will address communication of measurement principles and applications to lay and scientific audiences. Throughout the course, materials will highlight the influence that culture and socio-demographics have on measurement tools and their validity.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

BCHS 3100 - GRANT WRITING

Minimum Credits: 3

Maximum Credits: 3

The goal of this course is to write a grant proposal in the format of a National Institutes of Health (NIH) research grant application. The research topic should be a student's dissertation topic and/or build on their BCHS doctoral preliminary examination. The grant application will include specific aims and a research plan that includes significance, innovation, and approach. Students will participate in small-group discussions to provide and receive peer feedback and will be expected to present and defend their research plan to peers. Additionally, students will learn about the other components required for an NIH fellowship (F31) grant proposal. They will also critique an NIH R01 grant using the same approach that is currently used by NIH study sections.

Academic Career: Graduate

Course Component: Lecture
Grade Component: Grad Letter Grade

BCHS 3200 - SCALE DEVELOPMENT AND SURVEY DESIGN IN SOCIAL AND BEHAVIORAL SCIENCES

Minimum Credits: 3

Maximum Credits: 3

The course provides a comprehensive introduction to survey methods and psychometrics for the social and behavioral sciences. The course covers both theory and practical application. This course will provide a basis for designing and implementing surveys to collect information for administrative purposes or for scientific investigation. Through class time, course assignments, and practical firsthand experience, you will learn the appropriate use of the survey approach, sampling, development of survey instruments, data collection, processing, and analysis. Moreover, the course will explore good measurement processes, such as establishing and evaluating validity and reliability, along with procedural, administrative and ethical contingencies in planning for, and conducting health surveys.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: BCHS-MPH or BCHS-PHD; PREQ: BIOST 2041

BCHS 3503 - PREVENTION SCIENCE: TRANSLATING KNOWLEDGE TO PRACTICE

Minimum Credits: 3

Maximum Credits: 3

The purpose of this course is to provide a solid grounding in basic concepts, theories, practical approaches and methods associated with prevention (defined here as both problem prevention and health promotion). The course will focus on behavioral and psycho-social areas including substance abuse, mental health, victimization, and sexually transmitted infections, including HIV.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Attributes: Community Element - Building Understanding, Community Element -General Community Impact

BCHS 3504 - DOCTORAL SEMINAR ON HEALTH COMMUNICATIONS

Minimum Credits: 3

Maximum Credits: 3

This doctoral seminar provides an opportunity for in depth exploration of health communication topics with a particular emphasis on critical analysis of past and current health communication techniques and the application of current best practices in health communication. This class is required for DRPH students in BCHS and will allow students to explore health communication issues within their individual fields of interest.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Behavioral & Community Hlth Sc (PHD or DPH)

BCHS 3506 - IMPLEMENTATION SCIENCE IN PUBLIC HEALTH

Minimum Credits: 3

Maximum Credits: 3

The purpose of this course is to prepare students with the knowledge and skills to conduct implementation science within the field of public health. Although evidence-based interventions are widely available, they are underutilized to address a wide variety of public health challenges. We will examine barriers that exist with respect to the implementation of evidence-based interventions (EBIs) and strategies to overcome these barriers. Specific topics include strategies to identify EBIs, assessing and strengthening organizations' and communities' readiness to utilize EBIs, dissemination and scaling up, cultural adaptation of EBIs, and implementation science theories and conceptual frameworks.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

BCHS 3555 - DOCTORAL SEMINAR IN BEHAVIORAL AND COMMUNITY HEALTH SCIENCES THEORIES AND MODELS

Minimum Credits: 3

Maximum Credits: 3

This course is a requirement for students in the doctoral program in the department of behavioral and community health sciences. The seminar is designed to stimulate critical thinking about specific public health issues from within the framework of various behavioral and community theories and models. The purpose of this doctoral seminar is to critically apply and evaluate specific conceptual models and theoretical frameworks to particular significant public health problems or issues. This requires that seminar participants acquire close working familiarity with various conceptual tools and substantive issues. One goal underlying the selection of the substantive issues has been to select those which challenge, provoke, confront, excite, and stimulate seminar participants about economic and political controversies in contemporary healthcare and public health. Similarly, the selection of issues and reading materials dealing with those issues, challenge taken-for granted assumptions with respect to health and illness, public health and medical care as well as health policies and health politics. A final objective of the seminar is to challenge participants to reassess their conception of the field of public health and their place in it. Is it a profession? A discipline? An applied social science? What are the implications/consequences of each?

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Behavioral & Community Hlth Sc (PHD or DPH)

BCHS 3703 - EXECUTIVE MANAGEMENT PRACTICUM

Minimum Credits: 1

Maximum Credits: 3

The purpose of the executive management practicum is to provide a structure for students in the DRPH program to gain experience in the application of the core set of competencies in high level practice settings. The association of schools of public health has identified seven competencies that students are expected to master during their doctoral study. Four of these are the focus of the practicum: advocacy, communication, leadership, and management. Practicum sites will be chosen based on the mission of the organization and the opportunity for the student to be able to exercise and refine their skills in the areas of management, leadership, communication and advocacy.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad SN Basis

BCHS 3707 - APPLIED MULTIPLE REGRESSION ANALYSIS AND CAUSAL MODELING FOR THE BEHAVIORAL AND COMMUNITY HEALTH SCI

Minimum Credits: 3

Maximum Credits: 3

This course was designed to teach advanced graduate students how to use applied multivariate regression analysis to design, propose, and test complex research questions using a causal modeling framework. The course will include a brief review of simple linear regression, and quickly move to advanced multiple regression analysis topics including multiple predictor regression, stepwise regression approaches, the analysis of longitudinal data with regression, and examining mediators, moderators and confounding variables and their relationship to the independent and dependent variables of interest. The course will also include several other brief seminars on regression diagnostics, dichotomous predictors and outcome variables, power analysis, and an introduction to other multivariate analysis frameworks including structural equation modeling and longitudinal growth modeling. Students will be required to bring their own multivariate data set and research questions to use for class assignments, preferably data directly related to their dissertation project.

Bioengineering

BIOENG 2001 - MATHEMATICAL METHODS IN BIOENGINEERING 1

Minimum Credits: 3

Maximum Credits: 3

All you don't want to miss in mathematics will be covered in this first course of bioengineering graduate students. Solving systems of linear equations and ordinary differential equations will be covered with engineering examples and assignments. Finite difference methods for boundary value problems, Laplace equation, Poisson equation, parabolic partial differential equations, and hyperbolic differential equations will be discussed along with project assignments. Fourier series will be introduced as well.

BIOENG 2005 - RADIOFREQUENCY MEDICAL DEVICES AND APPLICATIONS OF ELECTROMAGNETICS IN MEDICINE

Minimum Credits: 3

Maximum Credits: 3

The course will cover topics related to applied electromagnetics in medicine. Topics such as Maxwell equations, wave equations, transmission lines, electromagnetic theorems, introduction to antennas, and introduction to computational electromagnetics will be presented. The class will include analyses of several RF devices used in medical applications

such as MRI, biological sensors, RF ablation.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Graduate School of Engineering

BIOENG 2016 - FUNDAMENTAL PRINCIPLES OF BIODEGRADABLE

Minimum Credits: 3

Maximum Credits: 3

Biodegradable metals have emerged as a new class of materials with significant potential for myriad biological applications, in particular, the craniofacial, orthopedics and cardiovascular areas. The latter has already witnessed clinical trials with few patients already being implanted with a biodegradable metallic stent. This course is designed to introduce the principles and various fundamental concepts of this novel class of metallic alloys. These include fundamental principles of metal alloy physics and theory, important concepts of phase diagrams, physical metallurgy concepts, metallic glass theory, processing fundamentals, biocompatibility, and toxicity issues. The effect of microstructure on biocompatibility and corrosion will also be discussed. The course objective is to introduce the student to this new family of bio-functional metals and their biodegradable properties. In doing so, the student will be familiar with these materials and their useful applications. The students are expected to have had courses in thermodynamics and physiology. Introduction to materials science and engineering would be preferred but is not a prerequisite.

BIOENG 2040 - TRANSPORT PHENOMENA FOR BIOMEDICAL AND CHEMICAL ENGINEERS

Minimum Credits: 4

Maximum Credits: 4

Biomedical and chemical engineering graduate students require a similar comprehensive understanding of the underlying principles of heat transfer, chemical species transfer, and momentum transfer or fluid mechanics. This graduate course provides a unified treatment to heat, mass, and momentum transfer at the graduate level. The first part of the course covers the constitutive relations that describe the diffusive flux of material properties, including thermal energy, chemical species concentration, and momentum. Conservation principles and boundary conditions are covered for these material properties and numerous example paradigm problems of steady-state unidirectional (1-D) transport in biomedical and chemical engineering applications are reviewed. The second part of the course covers more advanced concepts including non-Newtonian rheology, unsteady state and 2-D transport, convective transport processes, turbulence, and creeping flow. The focus throughout is on extensive problem-solving and computer simulation using Comsol multi-physics using both biomedical and chemical engineering examples.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOENG 2045 - COMPUTATIONAL CASE STUDIES IN BIOMEDICAL ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

Bioengineering 2045 computational case studies in Biomedical Engineering this is an interdisciplinary course that will combine: basic sciences such as electromagnetics and thermodynamics applied sciences such as numerical methods and simulations biomedical research and applications such as magnetic resonance imaging, hypothermia, heat transfer in biological bodies, and cardiac action potential, and mathematical concepts such as optimizations, linear and nonlinear equations. This course will be based on solving computational biomedical engineering problems using simulations. Some of the numerical topics will include: numerical solutions of matrices, finite element and finite-difference methods. These topics will be described with emphasis on their use in solving these problems. The course will cover setting up the mathematical description of the models and solving these problems using advanced computer codes and the supercomputer center at Pittsburgh. There will be 1d, 2d, and 3d modeling projects.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

BIOENG 2067 - MUSCULOSKELETAL BIOMECHANICS

Minimum Credits: 3

Maximum Credits: 3

Course work will include the structure, function, and mechanics of the musculoskeletal system. Specific topics will include the kinematics and control of human movement and the mechanics of the musculoskeletal connective tissues, such as ligament, tendon, bone, cartilage, and muscle. Special emphasis will be placed on the relationship between function and material properties of these tissues. A research paper will be required as a term project.

Academic Career: Graduate

Grade Component: Grad LG/SU3 Basis

Course Requirements: PLAN: Bioengineering(PHD, MBE)

BIOENG 2095 - GRADUATE PROJECTS

Minimum Credits: 1

Maximum Credits: 6

Individual study program under guidance of faculty member.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SNC Basis

BIOENG 2150 - MEDICAL PRODUCT IDEATION

Minimum Credits: 3

Maximum Credits: 3

A didactic class that explores the principles and use of "ethnography" as a tool to observe and document clinical activity in order to draft a clear statement of a clinical problem in need of solution and methods for concept generation to identify potential solutions. Students will be able to describe and use ethnographical techniques in identifying workplace problems and be able to describe and use concept generation methods to develop potential solutions. Topics covered: ethnography in the workplace; group brainstorming; brain-writing; affinitization; morphological analysis; basic human factors design.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

BIOENG 2151 - MEDICAL PRODUCT DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

A didactic course that uses principles of system engineering, the stage-gate process for medical product development and engineering and business analysis principles to evaluate the commercial potential proposed medical devices to further develop feasible solutions to a clinical problem identified in BIOENG 2150. Students will demonstrate use of systems engineering techniques to prioritize a set of feasible device and/or system solutions and ability to use intellectual property (IP) tools to determine suitability for further development. Students will demonstrate use of course principles in development of a commercialization plan for a proposed medical product. Design controls required by FDA and international bodies; systems engineering methodologies; intellectual property (IP) and IP search tools; brief market analysis; size by region, growth, competition, barriers to entry, sustainable advantage; reimbursement issues for proposed medical device/system; basic financial analysis ' students will construct spreadsheets typically presented to senior business management. This will include estimates of costs, margins, break-even analysis, NPV, hurdle rates, ROI, IRR; codes, standards, and regulatory processes (FDA, IEC & ISO, UL, ministry of health (Japan), NRC, BRH,

notified bodies, obtaining broad indications for use); safety, reliability, product liability considerations, manufacturability considerations (DFM ' design for manufacture, workflows)

Academic Career: Graduate

Grade Component: Grad Letter Grade

Course Requirements: PREQ: BIOENG 2150; PLAN: Medical Product Innovation or Medical Product Engineering

BIOENG 2152 - MEDICAL PRODUCT PROTOTYPING FOUNDATIONS LAB

Minimum Credits: 3

Maximum Credits: 3

This graduate level course focuses on frequently utilized tools and techniques used in medical product design, conceptualization, and early prototyping. This is a foundational course, where no prior (or assumed) knowledge of design or prototyping is required. Students will be introduced to a series of commonly utilized prototyping techniques including sketching, foam core modeling, 3d modeling, digital fabrication, and electronics building blocks. This immersive course introduces students to the fundamental principles of device prototyping through engaging team projects and guided technical workshops, empowering them with crucial foundational skills to bring their ideas to life. In parallel with learning the tools and techniques, students will also be placed in teams and challenged to implement these tools into an innovative and creative wearable technology that can augment human performance. The focus on the design project will be to harness students' creative potential, exercise flexible thinking skills, and to learn to implement the design process and project management software and strategies. Although this course was designed specifically for the bioengineering MS-MPE program, it is open to other graduate level students that have had minimal exposure to hands-on and/or foundational skills for medical device prototyping.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

BIOENG 2154 - WORKSHOP IN DESIGN FOR MANUFACTURABILITY

Minimum Credits: 1

Maximum Credits: 1

Design for Manufacturability (DFM) provides a systematic methodology that can be used to analyze product design for improvements in assembly and manufacturing. Students will use DFM to redesign current products for changes in manufacture that lead to reduction in production cost and improved operability/ customer satisfaction. Students will employ modern software tools that accurately model parts for specific manufacturing operations, model part costs, simplify products, find specific avenues to reduce manufacturing and assembly costs, benchmark products, and quantify improvements. Course Objectives : Students will gain hands-on experience incorporating the DFM concepts in a project. Upon completing the course, the students should be able to describe the utility of DFM in product development and early manufacturing design, be able to quantitatively evaluate the impact of design choices on manufacturing cost, and be able to use modern quality control concepts and approaches.

Academic Career: Graduate

Course Component: Workshop

Grade Component: Grad SN Basis

BIOENG 2165 - MEDICAL PRODUCT ENTREPRENEURSHIP

Minimum Credits: 3

Maximum Credits: 3

Medical product ideation, prototyping, and development are cornerstones for identifying unmet clinical needs and navigating the complexities of the development process. But how does one translate new medical products into the marketplace? Entrepreneurship is a discipline with established tools and methods that must be properly harnessed in order to translate medical products into a startup or an incumbent company (big or small.) After the completion of this

course students will be able to understand and differentiate between 'right sized' entrepreneurial methodologies for both startups and existing companies.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Medical Product Engineering or Medical Product Innovation

BIOENG 2166 - MANAGING MEDICAL PRODUCT RESEARCH AND DEVELOPMENT

Minimum Credits: 4

Maximum Credits: 4

This course will provide the student a theoretical and practical knowledge of professional project management for medical product development in industry. Through lectures, workshops, and industry seminars, students will acquire skills in the following areas: 'project engineering, project management, and innovation management. 'Managing product portfolios. Strategic planning and product planning. 'Creating and managing effective project teams. 'Stage gate process and lean methodology. 'Concurrent engineering. 'Project management tools, including: 'systems engineering 'work breakdown structures' budgeting' resource allocation and scheduling 'monitoring and control of product development students will be introduced to project management tools developed by PDMA (product development and management association) and the PMI (project management institute). The course will be taught by industry professionals with long experience in the medical products industry.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

BIOENG 2167 - MANAGING MEDICAL PRODUCT INNOVATION

Minimum Credits: 3

Maximum Credits: 3

This course will provide the student theoretical and practical knowledge of new product development principles and practices used today in the creation of medical products and services. The course covers the entire innovation process from Idea Discovery through Product Development and into Product Launch. Knowledge is provided through the use of dynamic lectures, videos, case studies, team exercises and guest speakers from industry. Students will acquire skills in the following areas: Team Performance, Project Management, Lean Startup, Ideation, Market Research, Design Thinking, Clinical NPD, Risk Management, Financial Analysis, Product Innovation Management, Strategy, Portfolio Management, Product Innovation Process and How to Pitch Your Idea. Students are introduced to project development and management tools established by the PDMA (Product Development and Management Association) and become certified in the PDMA Body of Knowledge.

Academic Career: Graduate

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Medical Product Innovation or Medical Product Engineering

BIOENG 2170 - CLINICAL BIOENGINEERING

Minimum Credits: 3

Maximum Credits: 3

This graduate level course focuses on the early stages of the innovation process; strategic analysis of complex clinical problem solving through the needs finding, concept generation and refinement. Students, under the mentorship of participating CMI faculty (SSOE, SHS, business, law), interview and observe clinical personnel at the University of Pittsburgh school of medicine performing clinical work in order to rigorously define and document clinical needs in the environment of use. Using principles articulated in BIOENG 2150 (medical product ideation), the students produce a

document that clearly defines and communicates one or more clinical problems and prioritized feasible solution paths.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: BIOENG 2150; PLAN: Medical Product Engineering or Medical Product Innovation

BIOENG 2171 - MEDICAL PRODUCT PROTOTYPING

Minimum Credits: 3

Maximum Credits: 3

This graduate level course focuses on the later stages of the innovation process; prototyping, market analysis, strategic planning, intellectual property protection, and business planning. Students, under the mentorship of participating CMI faculty (SSOE, SHS, business, law), will apply the principles and techniques from BIOENG 2151 (medical product development) and prioritize clinical needs identified in BIOENG 2170 (clinical bioengineering) and, using the resources of the swanson innovation center, create a prototype for pre-clinical and clinical evaluation. Students will use basic principles of intellectual property (IP) for engineers and publicly available search tools to determine patentability, freedom to operate, and patent strength. Students will then produce a medical device/product prototype and complete documentation set suitable for technology transfer.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: BIOENG 2170; PLAN: Medical Product Engineering or Medical Product Innovation

BIOENG 2173 - MEDICAL DESIGN FOR LOW RESOURCE ENVIRONMENTS

Minimum Credits: 3

Maximum Credits: 3

This course focuses on designing medical products, systems, and solutions for resource-poor settings using creative problem-solving tools in the face of extreme limits. Tools include Human-Centered Design, Frugal Innovation and Design for Extreme Affordability. The course is primarily project-based, where students' projects will focus on a unique and specific challenge identified by a low resource hospital, partner, or the Engineering World Health (EWH) Design Competition. Student teams will work with their partner to implement the design thinking process to define the problem and iteratively ideate, prototype, and test their proposed solution. Student teams will also be partnered with a local domain expert to ensure they have access to the expertise needed to successfully complete the design within the constraints of the course. Throughout the semester, students will also receive hands-on experience and exposure to ongoing efforts to address the problems of medical device accessibility, usability, and feasibility in low resource environments and actively participate in regular classroom projects and discussions about low resource conditions, regulatory concerns, and engineering ethics amongst other topics. During this course, students will rigorously define and document a clinical need in a low resource environment, clearly define and communicate the clinical problem, prioritize feasible solution paths, and create a prototype for pre-clinical and clinical evaluation. After completing this course, students will have a deeper understanding of why empathy is so important to designing solutions that (actually) work for people and the benefits of applying the concepts of Frugal Innovation and Reverse Innovation to all their design and entrepreneurial efforts regardless of the problem or environment (globally or in their own backyard).

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Medical Product Engineering or Medical Product Innovation

BIOENG 2175 - HUMAN FACTORS ENGINEERING IN MEDICAL DEVICES

Minimum Credits: 3

Maximum Credits: 3

Human Factors Engineering (HFE) is the application of knowledge about human behavior, abilities and limitations to the design and evaluation of products and systems. HFE draws upon a number of disciplines, such as biomechanics, anthropometry, design, physiology and psychology to improve performance, reduce human error and enhance safety. The application of HFE to medical devices is critical to their effective and safe use. This is recognized by industry and regulatory agencies. In fact, all medical devices that are used by patients or clinicians are required to have a human factors evaluation in order to be approved by the Food and Drug Administration (FDA). This course focuses on the application of HFE in design, development and evaluation of medical devices. The educational goals are: a) to learn the fundamentals of HFE relevant to medical devices, and b) to understand the HFE process in medical device design and evaluation according to the Food and Drug Administration (FDA). The course will include didactics and hands-on experience.

Academic Career: Graduate

BIOENG 2241 - SOCTL, POL & ETHCL ISS BIOTEC

Minimum Credits: 3

Maximum Credits: 3

As professionals who will ultimately contribute to research on and design of biomedical processes and devices, students should understand that ethical dilemmas are part of the design process-not separate from it. Students in the course will be presented with a combination of case-based discussion, guest and instructor lectures, small group exercises and a final presentation and paper analyzing a bioengineering focused ethical dilemma. At the end of this course, our goal is that students will be able to identify, analyze, and resolve the ethical dilemmas that arise in a professional bioengineering career. An overarching goal is to enable students to become "comfortable talking about the uncomfortable". Course topics include, but are not limited to research ethics, regulatory considerations of bioengineering projects, stakeholder analysis, ethical approaches, professional standards, and codes of ethics relevant to the profession.

Course Requirements: PROG: Swanson School of Engineering

BIOENG 2265 - BIOMEDICAL FLUID MECHANICS

Minimum Credits: 3

Maximum Credits: 3

Biomedical Fluid Mechanics is an upper-level undergraduate and graduate course designed for students that have already had some undergraduate exposure to fluid mechanics through a biotransport, transport or similar course. The course studies how momentum (i.e. fluid flow) principles arise and are applied to biomedical flow systems. The course is not exhaustive but focuses instead on systems in which 1) the application of fluid mechanics enhances understanding of the underlying biomedical process; and/or 2) the biomedical process itself teaches an important and sometimes novel fluid mechanical principal. The principal means of analyzing biomedical fluid mechanics in this course will be through the application of differential mass and momentum balances. These principles will be applied to take the student from a qualitative understanding to a quantitative understanding of a biomedical flow process. The course will primarily study principles of fluid mechanics in the cardiovascular system, including arterial flow and pressure and microcirculatory flow. Non-Newtonian blood rheology and flow will also be covered. Students also will have the opportunity to propose biomedical flow processes that may be relevant to their research projects (e.g. respiratory, ocular, micro-devices).

Prerequisite: undergraduate fluid mechanics or transport.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

BIOENG 2270 - BIOMEDICAL MICROFLUIDICS

Minimum Credits: 3

Maximum Credits: 3

By accurately controlling the movement of fluids at the microscale, microfluidics presents a unique opportunity to accurately establish mechanical and biochemical conditions that mimic the dynamic microenvironment in healthy and diseased tissue states. This course covers principles of biofluid mechanics and mass transport that are applied for the design and analysis of biomedical microfluidic systems. Microfluidic models of both healthy and diseased tissue microenvironments will be presented. Topics include tissue morphogenesis (e.g., epithelial layer and vascular pattern), tissue homeostasis (e.g., regeneration and wound healing) and cancer (angiogenesis and interactions with inflammatory cells). Lectures, in-class journal paper, research proposal discussion, and projects will focus on microfluidics approaches to mechanistically understand basic cellular functions or advance drug screening and personalized medicine.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

BIOENG 2330 - BIOMEDICAL IMAGING

Minimum Credits: 3

Maximum Credits: 3

Biomedical imaging introduces the major imaging modalities (x-ray, cat-scan, MRI, ultrasound) used in clinical medicine and biomedical research, as well as the fundamentals of images, from a signals and systems standpoint.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

BIOENG 2340 - INTRODUCTION TO MEDICAL IMAGING AND IMAGE ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

Introduction to Medical Imaging and Image Analysis presents the physics of image formation as well as methods for tomographic image reconstruction for major medical imaging modalities, including X-ray Computed Tomography (CT) and Magnetic Resonance Imaging (MRI). Also introduced are fundamentals of digital image processing, with particular emphasis on medical applications, including basic techniques to enhance image quality, image de-noising, methods for extracting, classifying, and tracking features of and objects in images, etc. Students will learn how to implement these techniques in MATLAB (The MathWorks Inc., Natick, MA) to solve practical image processing problems. MATLAB exercises will demonstrate to students how filtering operations applied in the image domain or the Fourier domain affect medical images. In addition to these fundamentals, more advanced algorithmic approaches for image segmentation and image as well as point-cloud registration techniques will also be reviewed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

BIOENG 2351 - BIOSIGNAL ACQUISITION AND ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

The objective of this course is to develop data acquisition interfaces that include software and hardware to interact with and sample real world phenomena with bioengineering applications. Students will be expected to have basic MATLAB programming experience before joining this course; basic circuits knowledge is also advantageous. Students will build circuits, and will learn to work with several toolboxes and advanced features in Matlab to build graphical user interfaces (GUIs), communicate with data acquisition systems (DAQs) for measuring signals with sensors and/or controlling actuators to interact with the physical world, and perform signal processing and analysis functions to extract meaningful information from electrical and/or biological measurements. Practical applications may include measuring and analyzing bioelectric phenomena related to heart rate or tissue impedance, processing and analyzing neural signals collected from implanted electrodes in the brain, etc. Students will be able to create solutions for real world engineering problems after completing this course successfully.

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Bioengineering (MBE, PHD)

BIOENG 2370 - COMPUTATIONAL SIMULATION IN MEDICAL DEVICE DESIGN

Minimum Credits: 3

Maximum Credits: 3

Computational simulation is increasingly utilized as a method to assess the performance of medical devices. The course provides students with a hands on learning experience on how to use computational simulation in the modeling and design of medical devices. The course details the important steps in computational simulations from preprocessing to solution to post-processing and data presentation. Commercially available software programs are introduced and used to simulate a variety of physical phenomena (solid, fluid, transport) pertinent to medical device design. Upon

completing the course, the student should be able to simulate the solid, fluid, and transport phenomena that are useful in medical device design. Particular attention will be placed on avoiding common mistakes in the preprocessing and interpretation of computational results. Topics covered: geometry creation; discretization; appropriate assignment of material properties; solver management; error mitigation and debugging; post-processing and data presentation; data interpretation; introduction to design optimization.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

BIOENG 2383 - BIOMEDICAL OPTICAL MICROSCOPY

Minimum Credits: 3

Maximum Credits: 3

This course is designed to teach the basic principles and applications of optical microscopy and imaging techniques commonly used in biomedical research. The enormous growth of optical microscopy has become an essential tool to investigate biological processes, diagnose diseases and quantitatively measure the biological system at unprecedented cellular and molecular level. It has become increasingly important for biomedical researchers to learn the proper use of optical microscopy, understand the advantages and limitations of each type of optical microscopy and how to apply them for specific biomedical applications. In this course, we will cover the physical principles involved in basic light, basic and advanced optical microscopy techniques. Strong emphasis will be given to biomedical applications for each type of optical microscopy. At the end of the course, a student will have a thorough understanding of basic principles of optical imaging and optical microscopy, learn how to apply optical microscopy to address biological questions and perform basic quantitative image analysis.

Academic Career: Graduate

Grade Component: Grad Letter Grade

BIOENG 2390 - ARTIFICIAL INTELLIGENCE APPLICATIONS IN BIOENGINEERING

Minimum Credits: 3

Maximum Credits: 3

Artificial Intelligence Applications in Bioengineering is a hands-on exploration of linear to non-linear modeling paradigms for biomedical data. In this course students will learn about aspects of information processing including data pre-processing, visualization, regression, dimensionality reduction (PCA, ICA), feature selection, classification (logistic regression, SVM, neural networks, etc.) and their usage for decision support in the context of healthcare. The course will provide an overview of the basics of scientific computing on local and cloud-based resources (i.e. relevant DevOps and MLOps) and scientific programming fundamentals, in addition to covering machine learning techniques for classification as well as regression modeling from biomedical datasets in tabular forms, including time series data. Students will additionally learn how to address classification and regression modeling tasks starting with 2D/3D medical imaging data. The course is designed to be practical with computer based tutorials and assignments on machine learning in general including popular kernelized models and deep neural networks.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOENG 2411 - MATHEMATICAL METHODS IN CHEMICAL ENGINEERING 1

Minimum Credits: 3

Maximum Credits: 3

Application of mathematical techniques to chemical engineering problems requiring the solution of ordinary differential equations and partial differential equations. Series solutions, transform solutions, vector calculus, and quadrature are covered.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

BIOENG 2505 - MULTI MODAL BIOMEDICAL IMAGING TECHNOLOGIES: FUNCTIONAL, MOLECULAR AND HYBRID IMAGING TECHNIQUES

Minimum Credits: 3

Maximum Credits: 3

In this course some newly evolving multi-modal imaging techniques and analysis methods in biomedical applications will be introduced. The course will briefly cover the fundamental physics, core signal processing, image reconstruction of a variety of current standalone imaging modalities such as X-Ray, computer tomography (CT), magnetic resonance imaging (MRI), nuclear imaging (PET, SPECT), optical imaging (fluorescence, optical diffuse tomography, bioluminescence), and ultrasound. Subsequently, the concept, fundamental physics, and image analysis of some exemplary multi-modal imaging techniques and systems will be introduced. Their applications in Biomedicine in different scales from organ to cellular and molecular level, and from structural to functional imaging will be discussed. The course will also briefly address the issues related to image-based diagnosis, intervention and therapy.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

BIOENG 2515 - CARDIO SYSTEM DYNAMICS & MODELING

Minimum Credits: 3

Maximum Credits: 3

The mechanical behavior of the cardiovascular system will be explored in a quantitative manner. The goal is to understand the behavior of each component in isolation and the interactions among various components. Mathematical modeling will be used with an emphasis on model development, validation, and application. The function of the intact organ will be correlated with underlying structural and cellular processes, both for normal and pathological states. Student projects will contribute to the existing library of cardio vascular models.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

BIOENG 2520 - MOLECULAR CELL BIOLOGY

Minimum Credits: 6

Maximum Credits: 6

Topics covered in this course are bio-macromolecules, protein purification and microscopic techniques, genetics (chromatin organization, DNA replication, recombination, transcription, translation and control of gene expression), molecular perturbation, membrane biophysics and bioenergetics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Bioengineering (MBE or PhD)

BIOENG 2525 - APPLIED BIOSTATISTICS

Minimum Credits: 3

Maximum Credits: 3

This course is designed to provide an understanding of basic statistics through application. Descriptive and inferential statistics, encompassing both parametric and non-parametric methods will be taught.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

BIOENG 2540 - NEURAL BIOMATERIALS AND TISSUE ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

This course is designed to introduce students to an advanced understanding of biomaterials and tissue engineering specialized in neural applications. It will review biomaterials used for neural prosthesis, drug delivery devices, and tissue engineering scaffold. The student will gain a fundamental understanding of the biocompatibility issues relevant to a variety of neural implantable devices and the current strategies to solve these issues. Topics will include basic material science, neural tissue biocompatibility with implant, BBB and CNS drug delivery, tissue engineering and regenerative medicine for PNS, tissue engineering and regenerative medicine for CNS, neural electrode/tissue interface (including both stimulating and recording electrodes, both peripheral and cortical neural interface). The student should have some exposure to biomaterials and tissue engineering before taking this course.

Academic Career: Graduate

Course Component: Lecture

BIOENG 2585 - QUANTITATIVE CELLULAR NEUROSCIENCE

Minimum Credits: 3

Maximum Credits: 3

This course is designed to be a comprehensive introduction to cellular neuroscience for engineers. Modern cellular neuroscience is an interdisciplinary field that seeks to understand the function of single cells and populations in the context of the thinking brain. This course provides a survey of cellular brain science ranging from molecules to simple neural circuits. In addition to principles and theory this class will also cover basic quantitative concepts and provide opportunity to analyze real-life data from molecular and cellular neural engineering. In the context of each cellular brain function we will also address cellular dysfunction with translational engineering applications to neurological brain disease. Required software is MATLAB. Enrolled students should have a working knowledge of matrix algebra, first order dynamic systems and programming in MATLAB environment.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

BIOENG 2586 - QUANTITATIVE SYSTEMS NEUROSCIENCE

Minimum Credits: 3

Maximum Credits: 3

Systems neuroscience is the field that attempts to explain perception, cognition, and behavior in terms of the activity of populations of neurons. This course examines major scientific results in systems neuroscience, and the computational principles of brain function they illustrate. Neuroscience topics include sensory processing, motor control, and memory. Computational and engineering principles include signals and systems, statistics, machine learning, and control theory. Brain-Computer Interfaces are highlighted as an example of the convergence of basic neuroscience and engineering applications. Course format consists of interactive lectures, student-led discussions of important publications, guided analysis of neuroscience data, and designing an original set of experiments.

BIOENG 2601 - PRINCIPLES AND PROPERTIES OF COMPLEX ENGINEERED MATERIALS

Minimum Credits: 3

Maximum Credits: 3

Complex engineered materials are a new class of systems comprising a variety of inorganic materials. This course is designed to introduce the principles and various functional properties exhibited by inorganic materials at the Nano, Micro and Meso scales. Since inorganic materials comprising metallic and non-metallic systems are a very complicated class of materials that display myriad properties, this course is outlined to discuss the most important properties. Thus, the course will mainly cover optical, electrical, thermal and electrochemical properties of both crystalline and amorphous inorganic complex engineered materials. In each category, the principles underlining each property will be discussed followed by the material class, behavior and applications. The effect of microstructure on each of the properties will also be discussed. The course objective is to introduce the student to these complex engineered materials family and their properties. In doing so, the student should be able to identify a material for a particular application

Grade Component: Grad Letter Grade

BIOENG 2620 - INTRODUCTION TO TISSUE ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

The purpose of this course is to introduce students to tissue engineering. Tissue engineering is defined as the development and manipulation of laboratory-grown molecules, cells, tissues, or organs to replace and/or support the function of injured body parts. Tissue engineering is highly interdisciplinary and therefore crosses numerous engineering and medical specialties. Upon completing this course, the graduate and undergraduate students should: understand the basic principles behind human cell and tissue biology and cell. Be familiar with the general types of

biomaterials used in tissue engineering. Understand techniques utilized to design, fabricate, and functionally assess tissue engineering systems. Apply the combined knowledge of tissue organization and tissue engineering strategies to design a unique, reasonable tissue engineering solution. This five part course covers cell and tissue biology, biomaterials, drug delivery, engineering methods and design, and clinical implementation.

Course Requirements: PROG: Swanson School of Engineering

BIOENG 2632 - BIOMECHANICS 3: BIODYNAMICS OF MOVEMENT

Minimum Credits: 3

Maximum Credits: 3

Biodynamics, the area of focus in biomechanics 3, is the study of large-scale movements in biologic systems. As such, the course focuses on the analysis of human movement, which is used in clinical and research settings to understand how various pathologies impact movement and how interventions can be implemented to aid those affected by movement disorders. We cover the fundamentals of biomechanics of human movement using mechanical modeling techniques. The major focus is kinematic analyses in three dimensions using matrix techniques. Some fundamentals of kinetics are covered as well, 2D and 3D inverse dynamics. Upon completing the course, the student should be able to describe basic methods of kinematic/kinetic analysis used in multi-link systems and be able to implement the methods in the analysis of human movement. Students should also be able to apply the methods to study common human movements, e.g. gait analyses, eye movement analyses, etc. Finally, students should be able to use the computer programming language, matlab, to perform computations on kinematic data.

Academic Career: Graduate

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

BIOENG 2633 - BIOMECHANICS 4: BIOMECHANICS OF ORGANS, TISSUES, AND CELLS

Minimum Credits: 3

Maximum Credits: 3

This is the second part of a two semester advanced graduate course that uses the application of bio solid mechanics to describe the mechanical behavior living structures. The course will be separated into the following: 1) fundamental concepts: a. Kinematics, stress, strain b. Balance principles, objectivity c. Hyperelastic materials 2) biological applications a. Mechanical properties of specific tissues, (e.g. Tendon, muscle, heart, vascular) b. Growth and remodeling using mixture theories c. Approaches used to model cells (e.g. Blood cells, myofibroblasts)

Grade Component: Grad Letter Grade

BIOENG 2650 - LEARNING & CONTROL OF MOVEMENT

Minimum Credits: 3

Maximum Credits: 3

The course will blend robotics, probability, and neuroscience to better understand the human motor system, particularly motor learning and control of movement. While motor control will be discussed as a feedback control problem, these theories will be compared during the entire course to what we know about the motor system. We will begin by studying muscle activation and forces, muscle sensory organs, spinal control structures, and inertial dynamics of a multi-joint limb. This will give us a sense of the machinery that the nervous system must control in order to generate coordinated movements. Probability foundations will be used as a framework to model how the nervous system updates estimates of limb position and sensory feedback during movements. Finally we will consider how disease can inform us about principles of movement control and motor learning. The course material and associated homework will require the students to use matlab to simulate control of biomechanical systems. This will allow students to appreciate the value of models to generate hypothesis and possibly explain biological behaviors.

BIOENG 2671 - IMAGING IN REGENERATIVE MEDICINE

Minimum Credits: 3

Maximum Credits: 3

Imaging is an essential analytical technique widely used in regenerative medicine. Imaging tools range from microscopy to validate by histology that regenerative therapies repaired damaged tissues, but non-invasive modalities, such as magnetic resonance imaging, are also used to define implantation coordinates and monitor tissue restoration in patients. This course will provide an overview of the applications of imaging in regenerative medicine. It will detail the rationale for using specific imaging techniques by contrast their advantages and disadvantages in particular applications. The student will learn to choose appropriate imaging methods for different questions that arise in regenerative medicine.

BIOENG 2675 - FINITE ELASTICITY OF SOFT TISSUES

Minimum Credits: 3

Maximum Credits: 3

This team-taught course is designed as the second course in graduate biomechanics that applies and builds on the concepts of finite elasticity to study the constitutive response of various soft tissues. Course topics will include kinematics of large deformation, concepts of stress, thermodynamic principles, and development of constitutive relationships for hyperelastic materials. Isotropy, transverse isotropy, incompressibility, viscoelasticity as well as isotropic damage will be discussed. Specific application areas will include the mechanics of three general types of primary load-bearing soft tissues: vascular, orthopedic, and reproductive.

BIOENG 2811 - MICROFABRICATION AND CHARACTERIZATION OF NEURAL INTERFACE DEVICES

Minimum Credits: 3

Maximum Credits: 3

This course is designed to provide graduate students an advanced understanding of a) photolithography process for microfabrication of neural devices (with clean room training and hands-on experience), b) the biocompatibility considerations for the materials used for the fabrications and the device configuration, and c) the standard electrochemical and biocompatibility characterization of the microelectrodes for neural applications (including both stimulating and recording electrodes, both peripheral and cortical neural interface). The students will learn in detail the fundamentals of lithography processes and MEMS in neurotechnology applications (in parallel with hands on clean room lab experience at the Nano Fabrication and Characterization Facility (NFCF)). Materials science for neural prosthesis (on both insulating and conducting materials) and contemporary and future directions of the nano/micro neural devices will also be reviewed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

BIOENG 2821 - MICROPHYSIOLOGICAL SYSTEMS AND TISSUE MIMICRIES

Minimum Credits: 3

Maximum Credits: 3

Microphysiological systems (MPS) are a growing area of focus for bioengineers as well as basic scientists, biopharmaceutical industry and regulatory agencies. They offer enormous potential in accelerating and lowering cost of preclinical drug development, allowing pathophysiological modeling of biological and disease processes in a human-relevant manner, and enabling translational discoveries to benefit the human health and the society. MPS are commonly referred to Organs-on-Chips, but also cover three-dimensional (3D)-Bioprinted Tissue and Organ Mimicries. Organs-on-Chips are biomimetic, microfluidic, cell culture devices created with microchip manufacturing methods that contain continuously perfused hollow microchannels inhabited by living tissue cells arranged to simulate organ-level physiology. By recapitulating the multicellular architectures, tissue-tissue interfaces, chemical gradients, mechanical cues, and vascular perfusion of the natural organ, these devices produce levels of tissue and organ functionality not possible with conventional 2D or 3D culture systems. They also enable high-resolution, real-time imaging and in vitro analysis of biochemical, genetic and metabolic activities of living human cells in a functional human tissue and organ context. 3D-Bioprinting is an additive manufacturing technique that is applied to biological materials and allows creation of cell-free and cell-laden scaffold for a diverse array of applications including regenerative medicine and preclinical pathophysiological modeling. In this course, we will cover advances made over the past two decades on these emerging technologies (Human Organs-on-Chips and 3D-Bioprinting). In addition, we will cover other methods of cellular, tissue and organ engineering that traditionally do not fall into MPS categories. These include decellularization and recellularization of natural scaffolds (e.g., heart, lung), stem cell-based tissue engineering approaches (e.g., iPSCs-derived tissues, spheroids, and organoids) and precision-cut organ slices (e.g., lung, liver). Moreover, this course includes workshops where trainees would have a chance to fabricate simple microfluidic organ-on-chip devices (to be carried out at Dr. Benam's labs) and 3D-bioprint sample matrices (need to identify available resources in BIOE Department; if none is available, Dr. Benam will use inexpensive 3D bioprinters for training purpose at his labs).

BIOENG 2901 - TECHNICAL WRITING WORKSHOP II: OUTLINE ORGANIZATION, PUBLISHING PAPERS, AND PREPARING FOR PRELIMS

Minimum Credits: 1

Maximum Credits: 1

Communication is the most crucial skill in Science and Engineering and written communication has the potential to be the most far reaching medium of communication. This course will explore the ways that engineering students can develop their own technical writing from an engineering perspective. Lectures will cover the structure modules and technical elements that go into publishing journal articles as well as identifying and writing to your specific audience, including non-experts. Assignments are designed to develop your ability to understand, analyze, summarize, and reformulate hypotheses (scientific methods) or design criteria (engineering method) for journal articles, reports, and manuals. Students will also learn how to apply the philosophy and principles behind technical writing into effective project planning including the prelim exam. Lastly, we will debunk some common myths and misconceptions of technical writing including for the prelim exam.

BIOENG 3780 - HUMAN FACTORS OF AGING

Minimum Credits: 3

Maximum Credits: 3

Research often leads to ideas and findings that can be developed into new medical devices or interventions. One limiting step in the development of these new ideas into action is the incorporation of the human factors components in the design. This is particularly true for devices/interventions meant to be used by older adults. This course provides an introductory understanding of how human factors is used in medical device design with a focus on older adults. The target audience for this course is broad, encompassing anyone that wants to learn how to design, test and evaluate medical devices or interventions used by older adults. This includes investigators (faculty, scientists, post-docs), engineers, and clinicians. The course will be at the graduate level, but general in scope. No pre-requisites are required.

Minimum Credits: 3

Maximum Credits: 3

Survey of contemporary ethical thought with reference to its historical bases, intended to prepare students to read and think critically and creatively about the literature in applied ethics, especially bioethics and health policy.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SU3 Basis

BIOETH 2664 - BIOETHICS

Minimum Credits: 3

Maximum Credits: 3

Survey of major topics and methods in bioethics, including informed consent, treatment refusal, transplantation, resource allocation, genetics, and public health.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SU3 Basis

BIOETH 2667 - BIOPOWER: BIOPOLITICAL READINGS OF THE BODY

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

BIOETH 2668 - SUSTAINABILITY IN LATIN AMERICA

Minimum Credits: 3

Maximum Credits: 3

Latin America hosts some of the most biologically diverse and productive ecosystems on Earth, yet economic and social development are frequently at odds with efforts to conserve and use these ecosystems sustainably. This upper-level seminar focuses on the issues surrounding environmental sustainability in Latin America from a holistic, interdisciplinary perspective. The course will start with a general introduction to the three legs of sustainability and sustainable development theory, as well as the ecology and evolution of Neotropical biodiversity. We will use published primary literature to explore the particular complexities of Latin American sustainable development, and analyze case studies of moments through history in which environmental issues were either championed or de-emphasized. The course will feature several guest lectures, optional seminars for extra credit, and discussions of current sustainability news. Students will be responsible for a final research project and presentation.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SU3 Basis

Course Attributes: MCSI - Sustainability Focused

BIOETH 2698 - SPECIAL TOPICS

Minimum Credits: 3

Maximum Credits: 3

Seminar on particular topics in bioethics; topics vary from term to term.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

BIOETH 2902 - DIRECTED READING IN BIOETHICS

Minimum Credits: 1

Maximum Credits: 3

Students discuss with instructor set readings in bioethics. Topics and readings may vary.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SU3 Basis

BIOETH 2904 - MA THESIS IN BIOETHICS

Minimum Credits: 1

Maximum Credits: 6

Research under the supervision of the advisor which culminates in the master's thesis.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

BIOETH 2905 - MA THESIS PROSPECTUS IN BIOETHICS

Minimum Credits: 1

Maximum Credits: 9

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad HSU Basis

BIOETH 2906 - MA THESIS RESEARCH IN BIOETHICS

Minimum Credits: 1

Maximum Credits: 9

Grade Component: Grad SN Basis

Biomedical Informatics

BIOINF 2010 - BIOMEDICAL INFORMATICS COLLOQUIUM

Minimum Credits: 1

Maximum Credits: 1

The Biomedical Informatics Colloquium is a weekly series of seminars focused on current research in biomedical informatics. Guest speakers come primarily from universities, but also government labs and the private sector.

Registration is not required for seminar attendance but is required to take the course for credit. Grading is based on the extent of active participation throughout the semester.

Academic Career: Graduate

Course Component: Colloquium

Grade Component: Grad HSU Basis

BIOINF 2011 - FOUNDATIONS OF CLINICAL AND PUBLIC HEALTH INFORMATICS

Minimum Credits: 3

Maximum Credits: 3

A survey of fundamental concepts and activities on information technology applied to health care. Topics include computer-based medical records, knowledge-based systems, tele health, decision theory, and decision support, human-computer interfaces, system integration, the digital library, and educational applications. Department-specific applications such as pathology, radiology, psychiatry and intensive care are also discussed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

BIOINF 2014 - BIOMEDICAL INFORMATICS PROJECT COURSE

Minimum Credits: 3

Maximum Credits: 3

The course consists of three main parts. In the first part of the course the projects are conceived. In the middle part, the projects are defined and designed. In the final part, the projects are carried out, analyzed, and reported. In all three phases, students will first have classroom discussions among themselves and the instructor about their ideas for that phase of the project. Next, they will work outside of the classroom on that project phase and write a report. Finally, they will orally present the main ideas of their report to the class. The instructor will provide written and oral feedback on each stage of the project, as it occurs.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

BIOINF 2016 - FOUNDATIONS OF TRANSLATIONAL INFORMATICS

Minimum Credits: 3

Maximum Credits: 3

The field of translational bioinformatics emerged because of the recent advances in biotechnology with which several new types of patient and disease specific data are being created for large subpopulations. Computer science methods are being rapidly adapted to process and analyze this data, with the goal of drawing biologically and medically-relevant inferences. By analyzing these different types of data individually or integratively, it is now feasible to attempt deciphering biological root cause of a disease (at least the 'why' of the disease if not 'how'), to identify biomarkers, and to design personalized medicine.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

BIOINF 2018 - INTRODUCTION TO R PROGRAMMING FOR SCIENTIFIC RESEARCH

Minimum Credits: 3

Maximum Credits: 3

Science is increasingly inter-disciplinary, and programming has become a valuable skill in many investigations. This course is designed to empower you with the ability to solve scientific problems through writing computer programs. Emphasis is placed on using the R language to solve biology problems.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

BIOINF 2019 - BIOMEDICAL DATA STREAMING

Minimum Credits: 1

Maximum Credits: 3

In this project students and a faculty mentor will explore data streaming technologies to implement scalable and distributed biomedical data ecosystems. In particular, students and a faculty mentor will conduct a project to learn how biomedical data processing can be enhanced with processing power of modern data-streaming infrastructures to enable continuous biomedical data acquisition and analysis. Upon completion of this project students will be able to understand major principles and trade-offs in design and development of a comprehensive biomedical data processing pipeline for data-intensive applications. Students will gain practical skills in selecting, applying, and developing data streaming solutions appropriate for specific data processing and data analysis tasks.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

BIOINF 2032 - BIOMEDICAL INFORMATICS JOURNAL CLUB

Minimum Credits: 1

Maximum Credits: 1

This course meets once each week for one hour. The research being presented will be taken from recent journal papers.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad SN Basis

BIOINF 2051 - FOUNDATIONS OF BIOINFORMATICS

Minimum Credits: 3

Maximum Credits: 3

Provides an introduction to selected topics of bioinformatics also known as computational biology. In this course, the difficult computational problems involving different types of biological information are identified using case studies from current literature. Emphasis is on genomic aspects of computational biology with some overview of proteomics and structural aspects. The course is structured as a seminar course intending to draw students into participating in discussions related to both problems and existing solutions.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

BIOINF 2061 - SINGLE-CELL AND SPATIAL GENOMICS DATA ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

Students could work on a wide range of projects centered on the themes of preprocessing, analysis, integration, interpretation, visualization, manipulation and design of single-cell and spatial genomics data and experiments in life

sciences and biomedicine. Ideas for potential projects will be suggested, and students are also free to choose their own topics. We will meet twice a week (class and recitation). Class time will be used to introduce necessary concepts from biology and computational methodology. Recitation time will be used to discuss students' progress in their projects. For most projects, knowing R or Python will be necessary, and students should be ready to pick it up in the first few weeks of the seminar. Students may pair to work on more ambitious projects, or on complementary aspects of a project.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

BIOINF 2062 - FOUNDATIONS OF ALGORITHMS

Minimum Credits: 3

Maximum Credits: 3

This course serves as an introduction to core methods and topics in algorithms. Course content will include the traditional key components of an algorithm course, together with a flavor of newer technologies such as advanced data structures. Time complexity analysis is an important matter and will be discussed where it fits throughout the course.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

BIOINF 2070 - FOUNDATIONS OF BIOMEDICAL INFORMATICS 1

Minimum Credits: 3

Maximum Credits: 3

This course serves as an introduction to core methods and topics in biomedical informatics using the context of the Learning Health System (LHS). A LHS combines data and information managements, discovery, and application of discoveries to clinical and population health. Discussion of the challenges associated with the construction of a LHS will be used to contextualize and motivate content to be covered in the course (people, data and knowledge, and evaluation).

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: CS 1501 and CS 2710

BIOINF 2071 - FOUNDATIONS OF BIOMEDICAL INFORMATICS 2

Minimum Credits: 3

Maximum Credits: 3

This course serves as an introduction to core methods and topics in biomedical informatics using the context of the Learning Health System (LHS). A LHS combines data and information managements, discovery, and application of discoveries to clinical and population health. Discussion of the challenges associated with the construction of a LHS will be used to contextualize and motivate content to be covered in the course (challenges and analysis and interpretation to create knowledge).

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

BIOINF 2103 - DESIGN AND ANALYSIS OF BIOMARKER STUDIES

Minimum Credits: 2

Maximum Credits: 2

The objective of this course is to identify, describe, and apply the statistical and epidemiological knowledge, tools, and perspectives necessary for effectively designing, analyzing, and interpreting biomarker studies (which may include diagnostic and medical tests, prognostic markers for prediction of future disease outcomes, and/or predictive markers for treatment response). The course will also focus on writing a funding proposal; students will develop a 3-4 page concept proposal as the class project.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: BIOINF 2118

BIOINF 2105 - ARTIFICIAL INTELLIGENCE FOR BIOMEDICAL INFORMATICS

Minimum Credits: 3

Maximum Credits: 3

This course provides the required introduction to artificial intelligence (AI) for all Biomedical Informatics students in the Department of Biomedical Informatics. It is designed to complement the two Foundations of Biomedical Informatics courses by providing a rigorous and practical education on fundamental AI topics. While the lessons are on AI subjects that not specific to the biomedical domain, the course will point the students to problems and applications from biomedicine relevant to each AI subject. The course is practical in the sense that the homework assignments will give students hands-on experience applying the AI methods covered throughout the course.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

BIOINF 2110 - CONCP SOFTWR PROJ ENGR HLTH CARE

Minimum Credits: 3

Maximum Credits: 3

This course examines how health care organizations implement both clinical and financial information systems. The course will study the implementation process and how to integrate systems to create the computerized patient record (CPR). Students will have the opportunity to learn about the industry-wide implementation data standards and how to manage them.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

BIOINF 2117 - APPLIED CLINICAL INFORMATICS

Minimum Credits: 3

Maximum Credits: 3

This course is designed to provide an overview of the field of applied medical informatics. Students will learn about the myriad issues that arise when deploying information technology into clinical environments. Practical, real world solutions to the challenges of hit will be addressed by experts involved in the day-to-day operations of these types of systems.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

BIOINF 2118 - STATISTICAL FOUNDATIONS OF BIOMEDICAL INFORMATICS

Minimum Credits: 3

Maximum Credits: 3

This is an introductory probability and statistics course intended primarily for biomedical informatics students. The first part of the course covers probability, including basic probability, random variables, univariate and multivariate distributions, transformations, expectation, numerical integration, and approximations. The second part of the course covers statistics, including study design, classical parametric inference, hypothesis testing, Bayesian inference, non-parametric methods, classification, ANNOVA, and regression. We will use r for statistical computing and applications. Examples and applications will focus on biomedical informatics and related discipline.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

BIOINF 2119 - PROBABILISTIC METHODS IN ARTIFICIAL INTELLIGENCE

Minimum Credits: 3

Maximum Credits: 3

This course is designed for students who do not necessarily have a background in computer science and want to learn and apply methods in artificial intelligence to problems in biomedicine. The course will introduce and provide the foundations artificial intelligence methods in search, probabilistic knowledge representation and reasoning, and machine learning with applications to biomedical informatics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

BIOINF 2120 - SYMBOLIC METHODS IN ARTIFICIAL INTELLIGENCE

Minimum Credits: 3

Maximum Credits: 3

This course is designed for students who do not necessarily have a background in computer science and want to learn and apply methods in artificial intelligence to problems in biomedicine. The course will introduce and provide the foundations of artificial intelligence methods in logical knowledge representation and reasoning, biomedical ontologies and terminologies and information retrieval. Prerequisites for this course include introductory mathematics and programming.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: BIOINF 2012 and 2015

BIOINF 2121 - HUMAN-COMPUTER INTERACTION AND EVALUATION METHODS

Minimum Credits: 3

Maximum Credits: 3

This course is designed to provide informatics students with the knowledge necessary to take an applied role in the design, implementation and evaluation of healthcare information systems. In this course, students will apply principles of usability and evaluation theory to informatics projects. Topics include: critical success factors, test plan development and user interface design.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

BIOINF 2122 - CRITL REFLCTN BIOMD INFORMTCS

Minimum Credits: 3

Maximum Credits: 3

This course will showcase presentations from DBMI researchers and invited speakers from across campus and beyond. Session will be videotaped and presented as weekly one-hour recording. The on-site Q/A session afterwards will be substituted by a facilitated asynchronous online discussion in blackboard. Special emphasis will be put on peer- and self-assessment of the contributions to the online discussion which will promote higher-level thinking among the students.

Academic Career: GRAD

Course Component: Lecture

Grade Component: Grad Letter Grade

BIOINF 2124 - PRINCIPLES OF GLOBAL HEALTH INFORMATICS

Minimum Credits: 3

Maximum Credits: 3

This course explores challenges and opportunities in developing and supporting health information systems in developing-world settings by examining differences, and ways to both integrate and sustain systems in an appropriate way in low-resource settings. The course will review the current "state-of-the-art" in this field by looking at examples of systems currently deployed in the developing world, and explore opportunities for advancing this work through a series of case studies and hands-on exercises based on real-world scenarios.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Attributes: MCSI - Sustainability Focused

BIOINF 2125 - INFORMATICS AND INDUSTRY

Minimum Credits: 1

Maximum Credits: 1

The focus of the class is to provide an opportunity for students to interact with leading industry representatives and to learn techniques/tools that would enable them to market their skills in non-academic environments. We will invite speakers from various local, regional, national, and international industry relationships that we have established.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad SN Basis

BIOINF 2129 - INTERNSHIP IN GLOBAL HEALTH INFORMATICS

Minimum Credits: 3

Maximum Credits: 3

The internship in global health informatics will be expanded to accommodate 5 students from the US. Students will travel to Malawi to study global health informatics in low-resource settings alongside Malawian health and technology

professionals. Students will have an opportunity to propose, design and develop a product or intervention relevant to solving a particular problem the group has identified.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SNC Basis

BIOINF 2131 - PRACTICUM IN ADV BIOMEDICAL IT

Minimum Credits: 1

Maximum Credits: 6

This course is designed for people who want a practical experience in working with advanced information technology in the center for biomedical informatics.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SNC Basis

BIOINF 2132 - SPECIAL TOPIC SEMINAR IN MEDICAL INFORMATICS

Minimum Credits: 1

Maximum Credits: 3

This course is designed for faculty to offer small groups of students a study course on a topic of mutual interest and concern in the faculty member's area of expertise.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SNC Basis

BIOINF 2133 - PRACTICUM IN ADVANCED INFECTIOUS DISEASE AND PUBLIC HEALTH SURVEILLANCE (BIOSURVEILLANCE) TECHNOLOGY

Minimum Credits: 1

Maximum Credits: 6

This course is designed for people who want a practical experience in working with advanced bio surveillance technology in the real time outbreak and disease surveillance (rods) laboratory.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SNC Basis

BIOINF 2134 - PUBLICATION AND PRESENTATION IN BIOMEDICAL INFORMATICS

Minimum Credits: 3

Maximum Credits: 3

This course provides a practical overview of how to write a research manuscript and how to give a scientific talk. It is usually taken after completing the project course (BIOINF 2014). Students taking this course must have a completed research project that can be used to complete the course exercises. Each week, we will target a specific section of the manuscript or scientific talk. Didactic sessions describing common problems and approaches will alternate with student presentation and peer critique. The course also covers the details of the publication process. At the end of the course, a special presentation workshop gives students the opportunity to improve their talks using videotaping and debriefing methods. By the end of the course, students will have completed a research paper and a finalized colloquium presentation.

Academic Career: Graduate

Course Component: Practicum
Grade Component: Grad LG/SNC Basis

BIOINF 2204 - INT HLTH INFORMTCS TEC DENTY

Minimum Credits: 3

Maximum Credits: 3

An introduction to health information technology (HIT) for dentists, dental team members and others involved in dentistry with three objectives: (1) understand how hit can support the activities and processes of clinical dental care; (2) select and evaluate hit applications; and (3) plan, administer and manage hit implementations. Course covers topics such as dental care workflow and analysis; electronic dental records; dental data and their representation; controlled vocabularies and terminologies; human computer interaction; information design; computer-based decision support; strategic planning; requirements analysis; evaluating technology; managing human resources for it; planning and implementing hit; basics of hardware and software; and privacy, confidentiality and security of patient information.

BIOSC 2000 - RESEARCH AND THESIS MS DEGREE

Minimum Credits: 1

Maximum Credits: 15

Students working on their early research requirement may (but are not required to) register for BIOSC 2000. A grade of Incomplete is automatically given for this course until the Comprehensive exam is passed.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

Course Requirements: PLAN: Biological Sciences (PHD)

BIOSC 2025 - RESEARCH ROTATION 1

Minimum Credits: 1

Maximum Credits: 6

Students in the graduate programs in the department of biological sciences perform research rotations in the first year. These rotations supplement classroom-based educational opportunities and provide settings for students to interact with faculty, who may serve on their dissertation committees or be their advisor, and to meet the members of different labs. Students present their results at the end of each research rotation as a brief talk. Students in the MCDB Program do three rotations, those in the EE Program do 2 or 3. Each rotation is worth a single credit.

Academic Career: Graduate

BIOSC 2050 - STUDENT RESEARCH SEMINAR

Minimum Credits: 1

Maximum Credits: 1

In this course, students present their research to faculty, students and postdocs.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad SN Basis

Course Requirements: PLAN: Biological Sciences (PHD)

BIOSC 2055 - SCIENCE COMMUNICATION: PREDOCTORAL FELLOWSHIPS & GRANTS

Minimum Credits: 1

Maximum Credits: 1

The goals of this course are to inform students about the tools and background needed to prepare for seminar and poster presentations and submit pre-doctoral fellowships and grants.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

BIOSC 2056 - SCIENCE COMMUNICATION: SEMINAR & POSTER PRESENTATIONS

Minimum Credits: 1

Maximum Credits: 1

The goals of this course are to prepare students for oral and written presentation of their work. Topics will include seminar preparation, maintaining linear train of thought, balancing data with context, data presentation as a reinforcement tool, preparing for 15-, 30- and 45-minute talks, preparing for broad and narrow scientific audiences, speaking with the general public, preparation of useful abstracts, assembly of effective posters, effective presentation of posters, tips and tricks for fielding questions.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

BIOSC 2057 - SCIENCE COMMUNICATION: PAPERS

Minimum Credits: 1

Maximum Credits: 1

This course covers the process of writing scientific papers, including primary data papers, review articles, and general opinion pieces. Topics include strategies for data organization, figure preparation, targeting the introduction for the audience, logic flow in the results, and focusing the discussion.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

BIOSC 2058 - ETHICAL PRACTICES IN SCIENTIFIC RESEARCH

Minimum Credits: 1

Maximum Credits: 1

This course familiarizes students with areas of ethical concern in scientific research, including data integrity, intellectual property, plagiarism, collaboration and cooperation, data sharing, treatment of animal and human subjects, and responsibilities to the general public.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

BIOSC 2075 - MOLECULAR EVOLUTION

Minimum Credits: 3

Maximum Credits: 3

Sequencing technology is continually progressing, and genome sequences from different species and populations continue to become available in increasing numbers. Such data allows questions about molecular evolution to be addressed in new and exciting ways. This course introduces students to the evolutionary analysis of DNA and amino acid sequences. Lectures on theory will be accompanied by practical instruction in the use of contemporary computational methods and software. Topics include: population genetics of selection and mutation, models of sequence evolution, phylogenetic models, analysis of multiple sequence alignments for rates and patterns of divergence, inference of natural selection, and co-evolution between proteins. Emphasis is placed on quantitative modeling and the biological principles underlying observed patterns of molecular evolution. Interested students should have a basic grasp of molecular biology and calculus.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

BIOSC 2090 - ADVANCED DEVELOPMENTAL BIOLOGY

Minimum Credits: 2

Maximum Credits: 2

This course will examine selected topics in developmental biology at an advanced level. Topics may include pattern formation in insects, cell lineage analysis, cell-cell interactions and the specification of cell fates, cell adhesion molecules, genetic approaches to mammalian embryo genesis and the extracellular matrix in development. Emphasis will be placed on the critical reading of papers and classroom discussion.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

BIOSC 2100 - CELLULAR STRUCTURE AND MORPHOLOGY

Minimum Credits: 2

Maximum Credits: 2

This course will explore biological processes within eukaryotic cells. Topics include: mechanotransduction/biomechanics; cellular interactions; polarity; cytoskeletal dynamics; cell-matrix interactions.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Biological Sciences (PHD)

BIOSC 2105 - CELL SIGNALING

Minimum Credits: 2

Maximum Credits: 2

This course will examine the pathways used to transmit information within and between cells. Topics include: receptors with enzymatic activity; RTK and map kinase; protein scaffolds; BMP-, WNT- and SHH-pathways; g-protein coupled receptors; calcium and camp-dependent signaling; excitation and ion channels; mechanisms of cell death.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

BIOSC 2110 - MICROBIAL DIVERSITY

Minimum Credits: 2

Maximum Credits: 2

This course will survey important genetic, genomic, physiological, cell biological and developmental processes that distinguish viral, prokaryotic and unicellular eukaryotic organisms. Topics include: bacteriophages, plants and animal viruses; bacterial intracellular pathogens, parasites and symbionts of plants and animals; eukaryotic pathogens.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

BIOSC 2121 - BIostatISTICS

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

BIOSC 2130 - GENETICS OF MODEL ORGANISMS

Minimum Credits: 2

Maximum Credits: 2

This course will compare genetic approaches in a variety of model systems. Topics include: genetics screens and selections; linkage mapping; genetic manipulation in haploid and diploid model systems; epigenetics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

BIOSC 2140 - GENOMICS

Minimum Credits: 2

Maximum Credits: 2

Advances in molecular biology have enabled the collection of a great deal of sequence data. Genomic studies seek to understand the organization of, and information embedded within, entire genomes. Students will learn a variety of techniques in structural genomics (finding information within genomes), functional genomics (describing gene function and interaction), comparative genomics (assessing how that information changes) and metagenomics (assessing the gene content of multiorganism communities) directed at using genome sequence data to address questions of interest.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

BIOSC 2147 - PROTEIN STRUCTURE AND FUNCTION

Minimum Credits: 2

Maximum Credits: 2

This course will focus on the biophysical and biochemical characterization of proteins. Topics include: methods for determining protein structure; protein folding; molecular dynamics and modeling protein movement; linking structure and function; protein-DNA interactions.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

BIOSC 2150 - NUCLEIC ACIDS

Minimum Credits: 2

Maximum Credits: 2

BIOSC 2150 focuses on the molecular biology of DNA and RNA, and how biological information is stored, replicated, recombined, and processed. Topics to be discussed include: DNA replication and its regulation; DNA segregation; homologous, illegitimate and site-specific recombination; DNA repair; structural and functional roles of RNA in the activity and regulation of telomerase; small nuclear RNAs and the spliceosome; processing of ribosomal and transfer RNAs; regulation by micro RNAs and long non-coding RNAs. There will be an emphasis on the primary literature.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

BIOSC 2155 - GENE EXPRESSION

Minimum Credits: 2

Maximum Credits: 2

This course will examine the regulation of gene expression from a variety of standpoints. Topics to be discussed include: transcriptional mechanisms and regulation in prokaryotes and eukaryotes; mRNA splicing; RNA processing; RNAi; chromatin.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

BIOSC 2220 - ADVANCED BIOSTATISTICS

Minimum Credits: 2

Maximum Credits: 2

This course provides an advanced, model-driven survey of statistical methods in the biological sciences. The first part of the course, led by the instructor, will cover general and generalized linear models, maximum likelihood, model selection, model validation, and mixed models. The second part of the course, co-led by students and the instructor, will cover other advanced topics of interest to be selected by the students. We will use R extensively throughout the course.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

BIOSC 2320 - POPULATION BIOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course focuses on ecological and evolutionary processes at the population level. We will learn how to represent ecological and evolutionary dynamics using increasingly realistic mathematical models. We will first explore population ecology including models of single populations, meta-populations, and interactions between species. We then shift to population and evolutionary genetics studying how the mechanisms of evolution interact with each other. Finally, we will study the explicit interaction between ecological and evolutionary processes that can occur over short timescales.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

BIOSC 2350 - EVOLUTION

Minimum Credits: 3

Maximum Credits: 3

This course is an introduction to biological evolution. The first half of the course will address the history of evolutionary theory, inheritance and variation, population genetics, natural selection, speciation, and adaptation. The second part will cover evolutionary history, with an emphasis on the fossil record, phylogenetics, and the origin of evolutionary novelties, including molecular characters. Emphasis throughout will be placed on how the history of life is studied in the context of scientific methodology.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Biological Sciences (PHD)

BIOSC 2351 - ADVANCED EVOLUTION

Minimum Credits: 2

Maximum Credits: 2

This course explores factors that influence inheritance. Topics include: gene-by-environment interactions; polymorphism and polyphenism; sexual dimorphism; causes and consequences of individual variation; extended phenotypes; nutrition and the phenotype; fitness landscapes; mutation and novelty; trait mapping onto phylogenies.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

BIOSC 2355 - SPECIES INTERACTIONS

Minimum Credits: 2

Maximum Credits: 2

This course examines the interactions between species in a variety of contexts. Topics include: coevolution, mutualism & parasitism; plant-herbivore coevolution; cospeciation; hybridization and signaling of species identity; predation, predator-avoidance and aposematism; predator-prey interactions; foraging ecology; competition; tri-trophic level interactions; herbivory; context-, condition- and trait-dependent species interactions.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

BIOSC 2361 - ADVANCED ECOLOGY

Minimum Credits: 2

Maximum Credits: 2

This course examines the relationship between organisms and their environment. Topics include: colonization strategies; succession; biogeography; climate change; trait-mediated assemblages; spatial models; trophic cascades.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Attributes: MCSI - Sustainability Focused

BIOSC 2370 - EVOLUTIONARY GENETICS

Minimum Credits: 2

Maximum Credits: 2

This course will cover a wide variety of traits and model organisms in which genetic and developmental studies of evolution have been performed. Topics and concepts will include phylogenetics, population genetics, the evolution of novelty, host-pathogen interactions, and multicellularity. The course will consist of lectures, journal article discussions, and essays relevant to the lecture topic.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

BIOSC 2405 - ADVANCED GLOBAL CHANGE BIOLOGY

Minimum Credits: 2

Maximum Credits: 2

This advanced course focuses on the ecological and evolutionary impacts humans have on the environment, explores the interconnectedness between humans and the natural world, and evaluates options for mitigating environmental problems.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

BIOSC 2435 - ENVIRONMENTAL PHYSIOLOGY OF ANIMALS

Minimum Credits: 3

Maximum Credits: 3

This course in ecophysiology is a physiology course taught from an ecological and evolutionary perspective. The organismal, ecological, and evolutionary significance of physiological function will be emphasized along with molecular and cellular mechanisms.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

BIOSC 2450 - BIOLOGICAL SCIENCES SEMINAR

Minimum Credits: 2

Maximum Credits: 2

Papers to be selected from current periodicals in the biological sciences for presentation. Emphasis will be placed on a critical evaluation of experimental procedures, data, and the interpretation of data.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Biological Sciences (PHD)

BIOSC 2500 - CURRENT TOPICS IN ECOLOGY

Minimum Credits: 1

Maximum Credits: 3

This course will cover population ecology, community ecology, and ecosystem ecology. A strong undergraduate background in ecology will be assumed. Some lectures will be included, but most emphasis will be placed on reading and discussing papers from the primary literature, including papers of both historical and current interests.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SNC Basis

Course Attributes: MCSI - Sustainability Focused

BIOSC 2540 - SEMINAR IN ECOLOGY AND EVOLUTION

Minimum Credits: 2

Maximum Credits: 2

Students will participate in the critical review of the current literature relating to a topic in ecology. Specific topic is to be selected later.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Attributes: Global Studies, MCSI - Sustainability Focused

BIOSC 2545 - THE MATHEMATICS OF BIOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course uses examples from across biology to illustrate how simple mathematical models can increase our understanding of biological systems. We will focus on several foundational modeling approaches, including systems of difference equations, matrix models, probability, and statistical data analysis. Students will discover how these approaches are used, their strengths and limitations, and how they could be extended to more complex problems. Students should be prepared to use both spreadsheet programs and scripts, written in a language such as Python or R, to explore these models.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

BIOSC 2570 - ENVIRONMENTAL SCIENCE TEACHER'S WORKSHOP

Minimum Credits: 1

Maximum Credits: 3

Teachers spend five days at Pymatuning Laboratory of Ecology exploring the relationship between land use, water quality and aquatic community structure. Lectures, field work, data analysis, interpretation of results. Includes development of modules for classroom use.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad SN Basis

BIOSC 2810 - MACROMOLECULAR STRUCTURE AND FUNCTION

Minimum Credits: 3

Maximum Credits: 3

Course is concerned primarily with the structure and functions of proteins and nucleic acids. These are large polymers where structure and function are determined by the sequence of monomeric units. Topics will include the physical and chemical properties of the monomer units (amino acids/nucleotides); the determination of the linear sequence of these units; the size, shape and general properties of the biopolymers in aqueous systems; and the relation between structure and function, particularly in transport (hemoglobin) and in catalysis (enzymes).

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

BIOSC 2840 - REGULATION OF MEMBRANE TRAFFIC

Minimum Credits: 2

Maximum Credits: 2

Course analyzes membrane/protein traffic along both the biosynthetic and endocytic pathways. Emphasis placed on how this traffic is regulated. Topics include the role of G proteins (both heterotrimeric and small), coat proteins (coatamer 1 and 2 and adaptors), signal transduction cascades (pkc, pka, ip3, etc), and snare complexes in protein trafficking.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

BIOSC 2940 - MOLECULAR BIOLOGY

Minimum Credits: 3

Maximum Credits: 3

Course will examine the molecular basis of life processes, with a primary emphasis on genes (what they are, what they do, how they determine the properties of an organism). Topics covered will include replication of DNA, transcription of DNA into mRNA, and translation of RNA into protein. Much of the course will be concerned with how these processes are regulated in response to changes in the environment, and how this regulation relates to the observed properties and behavior of the organism.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

BIOSC 2950 - SEMINAR JOURNAL CLUB

Minimum Credits: 1

Maximum Credits: 1

Research papers will be discussed prior to departmental seminar.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad SN Basis

BIOSC 2960 - DEPARTMENTAL SEMINAR

Minimum Credits: 1

Maximum Credits: 1

Students will attend lectures on selected topics of current research in the biological sciences. The lecturers will primarily be invited scientists from outside the university, with a few lectures by faculty from within the department or other departments in the university.

Academic Career: Graduate

BIOSC 3001 - PREPARATION FOR THE STEM CLASSROOM

Minimum Credits: 1

Maximum Credits: 1

This seminar series is designed for Ph.D. students and post-doctorate fellows interested in pursuing an academic career

and wish to gain didactic knowledge and skills related to teaching in a science, technology, engineering and mathematics (stem) classroom. Experienced faculty provide topics and discussion based seminars.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SU3 Basis

BIOSC 3002 - ADVANCED LEARNING THROUGH EVIDENCE-BASED STEM TEACHING

Minimum Credits: 1

Maximum Credits: 1

Designed for graduate students and postdocs preparing for academic careers in the stem disciplines, this course provides an introduction to the scholarship of teaching and learning (SOLT). This is the second course in a series; however, the former course (3001) is not a required prerequisite. The course will utilize material presented in a massive open online course (MOOC) available through coursera.org and sponsored by the center for the integration of research, teaching and learning (CIRTL). Participants will learn about effective teaching strategies and the research that supports them in addition to learning how to collect, analyze, and act upon their own evidence of student teaching. Topics include but are not limited to: 1. Learning through diversity, 2. Cooperative learning/peer instruction, 3. Inquiry-based labs, 4. Problem-based learning, 5. Flipped classroom pedagogy. Further, participants will learn the process for developing a teaching as research plan as well as the role of human subjects consent for classroom based research.

MSBMS 2028 - COMPREHENSIVE ANALYSIS OF DISEASE 2

Minimum Credits: 2

Maximum Credits: 2

This course is designed to give the students the opportunity to integrate all the knowledge accumulated during the program and in the fall session of CAD in a comprehensive study of disease states. Faculties will present lectures on various diseases with particular emphasis on the physiology and pharmacology. At the end of term there will be Special

Topic Session in which students will present short lectures on current and interesting topics. The students will identify the topics and discuss them in advance with the course director. Participation to these sessions is not mandatory but will be considered in the final grade.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PLAN: BMP (BIOSCI-MS)

MSBMS 2029 - COMPREHENSIVE ANALYSIS OF DISEASE

Minimum Credits: 3

Maximum Credits: 3

This course is designed to give the students the opportunity to integrate all the knowledge accumulated during the program into a comprehensive study of disease states. Small groups of students will work collaboratively to develop an in-depth analysis of a specific disease, from the diagnosis to the pathogenesis, the molecular and cellular basis, and the treatment options currently available. Each group of students will work in a web-based platform under faculty supervision to develop an interactive, knowledge-based teaching/research study.

MSBMS 2061 - FOUNDATIONS OF SUCCESSFUL BIOMEDICAL CAREER PLANNING AND DEVELOPMENT II

Minimum Credits: 1

Maximum Credits: 1

The course provides foundational training in career planning and professional development. Key skills that students build are: Increasing your capacity for self-directed career development; Fostering life-long career management habits; Maximizing your scholarly training success; Shaping positive career outcomes. Students will engage in experiential learning, small-group discussions, and peer mentoring. These different approaches enable individually relevant and self-constructed understandings of career development, consistent with expectations of independence in scholarly activities. Areas for discussion include: self-assessments, exploration of different career options, how to set goals, career adaptability, and other topics identified by students. A final self-authoring paper will be required.

MSBMS 2074 - EXPERIENTIAL LEARNING

Minimum Credits: 1
Maximum Credits: 10

The bmp offers experiential learning activities in the areas of community service, patient volunteering, laboratory research and clinical shadowing. For this course, the bmp student and instructor plan onsite experiential learning activities designed to provide goal oriented outcomes for the student. Students are expected to take initiative to find suitable matches and schedule several experiential sessions. Available opportunities are posted on the bmp website and matches are made each term to optimize the experiential benefit for all bmp students. Students are responsible for documenting all experiential dates and hours, along with what was learned in each activity. Students are also responsible for ensuring all activities are approved by the instructor. Students will also provide a five page maximum reflect on the experiences at the end of the term and a laboratory report for any research conducted, both of which are graded. Students are also required to ensure they complete the appropriate onsite requirements for the number of credits they are registered for.

MSBMS 2105 - BMP SCIENTIFIC COMMUNICATION

Minimum Credits: 1

Maximum Credits: 1

The Scientific Communication course will explore the different ways science is described and communicated. Topics will include methods and techniques for efficient and clear scientific writing; the different types of publications (research papers, reviews, abstracts, letters, commentaries); the structure and organization of grants (especially research and fellowships); scientific posters and presentations, and peer review. The class will include presentation by faculty to introduce the most important concepts. Students will use their own research (current or past) as a basis for writing assignments on the various topics. Students will also review each other's work and significant time will be devoted to

discussion, both in class and online.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

MSBMS 2110 - ORGAN SYSTEMS PHYSIOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course discusses the integrative physiology of all of the major organ systems, including the cardiovascular system, respiratory system, renal system, gastrointestinal system, and reproductive system. The systems will be considered in the context of the function of the body as a whole, and how they respond during challenges (e.g. exercise) and pathological states. Current research related to the functioning of these systems will be emphasized throughout the course.

MSBMS 2360 - BIOMEDICAL CAREER PLANNING 1

Minimum Credits: 1

Maximum Credits: 1

"Students will engage in a group coaching format. Together, we will critically examine and discuss questions pertaining to career planning and implementation. Course topics are rooted in research and practical application. The underlying theories and research stem from positive psychology, neuroscience, applied practice, and one's own lived experience. Students will create artifacts that facilitate their career development. Common areas of interest include burnout, imposter phenomenon, sociocultural medicine, boundaries, and gap year preparation. Students will gain skills

and perspectives to thrive in their career and life. Upon completion of this course, students will be able to: Implement research and self-reflection to enhance the individual career planning process. Summarize a variety of models, theories, and frameworks to achieve individual career and life satisfaction. Demonstrate skills such as oral and written communication, resilience, and adaptability. Sustain habits that facilitate career success and wellbeing.

MSBMS 2361 - BIOMEDICAL CAREER PLANNING 2

Minimum Credits: 1

Maximum Credits: 1

Course Description The first two months of the course will be conducted asynchronously; materials and assignments will be available on Canvas. In person classes will resume in March and be facilitated in a coaching format. Together, we will critically examine and discuss career planning and development. Course topics are rooted in research and practical application. The underlying theories and mechanisms stem from career construction, positive psychology, neuroscience, applied practice, and one's own lived experience. Scholars will practice ongoing reflection, planning, and action. During the course scholars will create artifacts that will be used throughout their career.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad HSU Basis

MSBMS 2365 - HEALTH EQUITY AND DIVERSITY AWARENESS

Minimum Credits: 2

Maximum Credits: 2

"We will critically examine and discuss overarching questions that focus on health equity within the biomedical sciences. We will pose, examine, and discuss questions to help understand the relationship between and among health and systems. Cultivating diversity awareness is a lifelong process. This course will build on existing knowledge and lay the groundwork for further exploration and action. Student interests and relevant research will drive course topics. Upon completion of this course, students will be able to: Summarize a variety of models, theories, and frameworks of health disparities and apply these in their biomedical science endeavors (research, medicine, etc). Translate health disparity research into interventions that can be used in biomedical science professions. Utilize discourse and dialogue skills to improve health equity.

Biostatistics

BIOST 2000 - TEACHING PRACTICUM

Minimum Credits: 3

Maximum Credits: 3

This course will provide doctoral students with an opportunity to obtain teaching experience. This course is intended for doctoral students during their dissertation stage. Teaching experience will enhance the professional growth of students. Students will further develop oral and written communication skills and an art for explaining material, which is an integral part of a biostatistician's career.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

BIOST 2011 - PRINCIPLES OF STATISTICAL REASONING

Minimum Credits: 3

Maximum Credits: 3

Acquaints students with the concepts of statistical reasoning as applied to the study of public health problems. Students learn the general principles of statistical analysis and acquire the ability to utilize a statistical software package as a tool to facilitate the processing, editing, storing, displaying, analysis and interpretation of health research related data.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: Graduate School of Public Health; PLAN: Excluded Plans = Biostatistics(DPH, PHD, MPH, MS, MSH)

Course Attributes: Global Studies

BIOST 2016 - SAMPLING DESIGN AND ANALYSIS

Minimum Credits: 2

Maximum Credits: 2

This is an applied statistical methods course designed to provide students with a working knowledge of introductory and intermediate-level sample designs and associated methods of statistical analysis along with a basic understanding of the theoretical underpinnings. Emphasis is placed on sampling human populations in large communities. Students will also learn statistical software used in survey data analysis, including sample selection and survey procedures in the STATA software package. Lecture topics include: simple probability samples, stratified sampling, ratio and regression estimation, cluster sampling, sampling with unequal probabilities, variance estimation and weighting in complex surveys, two-phase sampling, estimating population size and estimation of rare populations and small areas. The course will consist of one weekly 2-hour lecture and one class devoted to student presentations related to a term project assigned at midterm.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: BIOST 2011 or 2039 or 2041; PROG: Graduate Sch of Public Health (PPBHL)

BIOST 2021 - SPECIAL STUDIES

Minimum Credits: 1

Maximum Credits: 15

Qualified students may undertake advanced work or research with the approval and under the guidance of a member of the staff.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad SN Basis

BIOST 2022 - CAPSTONE PREPARATION

Minimum Credits: 1

Maximum Credits: 1

This course is preparation necessary to complete the Capstone course BIOST 2099. It will involve brainstorming a thesis topic, meeting with one of the course directors weekly to discuss possible data sets, write an outline for a possible data analysis plan, think of potential research questions, write a project prospectus and identify an external faculty members in departments other than Biostatistics to serve as an external reviewer.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad HSU Basis

BIOST 2025 - BIOSTATISTICS SEMINAR

Minimum Credits: 1

Maximum Credits: 1

Biometry seminars introduce the students to current health problems involving the application and development of biostatistics methods and theory.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad SN Basis

BIOST 2040 - ELEMENTS OF STOCHASTIC PROCESSES

Minimum Credits: 3

Maximum Credits: 3

Covers generating functions and convolutions of random variables, the poison and compound poison distributions, branching processes, random walk, and the gambler's ruin problem, Markov chains, and simple birth and death processes.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: BIOST 2043

BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS

Minimum Credits: 3

Maximum Credits: 3

Discusses techniques for the application of statistical theory to actual data. Topics include probability theory, estimation of parameters, and tests of hypothesis for both the discrete and continuous case.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

BIOST 2058 - SCIENTIFIC COMMUNICATION SKILLS

Minimum Credits: 2

Maximum Credits: 2

This course is meant to help students develop oral, visual and written scientific communication skills and to familiarize students with research resources. Students may use their own research topic, including work on a thesis or dissertation, or help will be provided in selecting one.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

BIOST 2059 - CONSTRAINED STATISTICAL INFERENCE WITH APPLICATIONS

Minimum Credits: 2

Maximum Credits: 2

This is an applied biostatistics course for biostatistics graduate students, other quantitative public health students, and

health career professionals who will make use of statistical methods in research projects and possibly develop new biostatistical methods in the future. While this course is intended to be an application oriented course motivated by real scientific problems, it will rely on some statistical theory. Students are expected to have basic understanding of statistical theory at the level of BIOST 2044 (Introduction to Statistical Theory 2) and have applied analysis skills at the level of BIOST 2049 (Applied Regression Analysis). Additionally, students are expected to have working knowledge of the programming language R. Topics covered in this course include: (a) Brief review of some important concepts from BIOST 2043, BIOST 2044 and BIOST 2049, such as parametric and nonparametric estimation and testing of hypotheses, linear fixed and mixed effects models, best linear unbiased predictor (BLUP) and generalized linear models. (b) Some real world motivating examples of various types of constraints on parameter spaces. Reasons for constrained inference. (c) Estimation of parameters and testing of hypotheses under inequality constraints in a variety of settings - challenges and solutions. Various estimation and testing procedures such as Pool Adjacent Violators Algorithm (PAVA), Restricted Maximum Likelihood Estimation (RMLE), Isotonic Regression, Likelihood Ratio Test (LRT), Williams' test, Dunnett's test, Jonckheere-Terpstra test. Substantial reduction in samples sizes and gain in power when using constrained inference based methods in comparison to standard methods. (e) Resampling methods for constrained inference, why they fail for confidence intervals but are suitable for some testing problems. (f) Nonparametric problems - various notions of orderings of random variables, univariate and multivariate analysis. (g) Applications in clinical trials, toxicology, high dimensional gene expression studies, microbiome, cell-cycle and circadian clock.

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: BIOST 2044 and BIOST 2049

BIOST 2067 - APPLIED META-ANALYSIS

Minimum Credits: 1

Maximum Credits: 1

Meta-analysis (MA) is a quantitative approach that provides a systematic way of integrating the findings of individual research studies. The purpose of this course is to familiarize attendees with statistical techniques and R packages specific to MA, to enable them to use these techniques in the execution of their own MA and equip them to interpret and critique existing MAs. This course is then designed to present an overview of MA from the theoretical models to their implementations in the popular publicly available free software R with a variety of examples. These examples are compiled from real applications in medical and public health literature and the analyses are illustrated in a step-by-step fashion using appropriate R packages. Topics include an overview of systematic literature review, fixed- and random-effects MA, MA for binary data, MA for continuous data, heterogeneity in MA, meta-regression, publication bias, and R packages for MA. It is strongly recommended that all students have taken an introductory course in biostatistical methods (e.g., BIOST 2039, or BIOST 2041, or equivalent). Prior programming knowledge of R is not required for this course.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: BIOST 2039 or BIOST 2041

BIOST 2068 - INTRODUCTION TO CASUAL INFERENCE

Minimum Credits: 3

Maximum Credits: 3

With the increasing demand for identifying causal effects, causal inference methods have been greatly developed in the last decades. In public health, most studies require more or less causal inference due to the prevalence of confounding and selection bias. This course will introduce 1) the concepts of causal effects, causal assumptions, and causal graphs, 2) widely-used causal inference methods (e.g., propensity score, instrumental variables, and causal mediation analysis), and 3) methods implementation and applications in public health. Students enrolling in this course are expected to have taken an introductory biostatistical course (BIOST 2038, 2039, or 2049) and familiar with programming. The course

will be taught through lectures, followed by homework and a final project.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

BIOST 2069 - STATISTICAL METHODS FOR OMICS DATA

Minimum Credits: 2

Maximum Credits: 2

This 2-credit course is a graduate level course to cover popular statistical and computational methods for high-throughput omics data analysis. With the rapid advances of many omics technologies, the course will focus on the fundamental concepts of various topics (e.g. data preprocessing, association analysis, causal mediation analysis, differential analysis, statistical learning, pathway analysis, etc.) and their specific applications to different omics data types (e.g. microarray, next-generation sequencing, single cell sequencing, mass spectrometry, microbiome, etc.). The major target audience is graduate students (master or PhD students) interested in omics data analysis and related research. Through homework problem sets, computer labs and a final project, students train with hands-on materials to understand the methods, implement the algorithms and interpret results in real omics applications.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

BIOST 2080 - ADVANCED STATISTICAL LEARNING

Minimum Credits: 2

Maximum Credits: 2

This is a 2-credit course in advanced statistical learning, covering topics related to the statistical interpretation and theory behind machine learning models/methods. Emphases will be given to in-depth derivation of models/algorithms from topics covered in BIOST 2079 (Introductory Statistical Learning for Health Sciences) as well as additional topics on modern statistical learning methodologies, with special focus on methods for health science applications. This course is designed for graduate students in the Department of Biostatistics and other interested graduate students who already have sufficient statistical and programming background. Students are expected to be familiar with R. Experience in C/C++, Python or Matlab may be helpful, but is not required. Programming skills/training shall be demonstrated by previous programming (or programming heavy) courses in R, Python, Matlab, C/C++, etc.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: BIOST 2049 and BIOST 2079; Special Instructions: Programming skills/training shall be demonstrated by previous programming (or programming heavy) courses in R, Python, Matlab, C/C++, etc.

BIOST 2081 - MATHEMATICAL METHODS FOR STATISTICS

Minimum Credits: 3

Maximum Credits: 3

Differentiation and integration of functions of several variables. Infinite sequences and series. Fundamentals of matrix algebra. Class examples and homework problems will emphasize applications to probability and statistics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Biostatistics (PHD, MS, MPH)

BIOST 2099 - CAPSTONE

Minimum Credits: 2

Maximum Credits: 2

The capstone course is a heavily directed and mentored statistical data analysis project course leading to an ETD formatted thesis and formal oral presentation of the work. This course will be an intense data analysis and writing course with the goal of producing an ETD formatted thesis document containing rigorous analytic methods, appropriately summarized analysis results with logical, statistically and scientifically valid conclusions. The Capstone course will ensure that the written thesis milestone demonstrates the student's competency in biostatistics (and area of concentration if applicable) as well as oral and written communication skills in general.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad HSU Basis

Course Requirements: PLAN: Biostatistics (MS); Required to have passed MS comprehensive exam.

BIOST 2131 - FOUNDATIONS OF STATISTICAL THEORY

Minimum Credits: 4

Maximum Credits: 4

The course covers the basic theory of probability and statistical inference with a focus on the appropriate use of standard methods and on the construction of new statistical inference tools. Topics covered in the first half include joint, marginal, and conditional probabilities; random variables and functions thereof; distribution characteristics of random variables; basic asymptotic theory and univariate theorems including Chebyshev's inequality, the law of large numbers, and the central limit theorem. Topics covered in the second half include principles and methods of constructing estimators (e.g., MLE, MME, CRLB), confidence intervals, and hypothesis testing (including Neyman-Person and generalized likelihood ratio tests); data reduction principles and techniques, and their relationship to optimal statistical inference (including sufficiency and Rao-Blackwell principle); basic likelihood-based, exact, conditional, and asymptotic statistical inference. The course is taught through lectures and recitation sessions.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

BIOST 2137 - FOUNDATIONS OF STATISTICAL THEORY

Minimum Credits: 4

Maximum Credits: 4

The course covers the basic theory of probability and statistical inference with a focus on the appropriate use of standard methods and on the construction of new statistical inference tools. Topics covered in the first half include joint, marginal, and conditional probabilities; random variables and functions thereof; distribution characteristics of random variables; basic asymptotic theory and univariate theorems including Chebyshev's inequality, the law of large numbers, and central limit theorem. Topics covered in the second half include principles and methods of constructing estimators (e.g., MLE, MME, CRLB), confidence intervals, and hypothesis testing (including Neyman-Person and Generalized Likelihood Ratio tests); data reduction principles and techniques, and their relationship to optimal statistical inference (e.g., sufficiency, Rao-Blackwell principle); basic likelihood-based, exact, conditional, and asymptotic statistical inference. The course is taught through weekly series of two lectures and one recitation session clarifying the typical theoretical problems and proving computational examples illustrating theoretical concepts.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

BIOST 2141 - BIostatistical METHODS

Minimum Credits: 3

Maximum Credits: 3

BIOST 2141 is an introductory applied biostatistics course for biostatistics graduate students, other quantitative public health students, and health career professionals who will make use of statistical methods in research projects, interpreting literature and possibly develop new biostatistical methods in the future. This class is intended for students needing a more research-oriented approach than that provided in BIOST 2011 (Principles of Statistical Reasoning) and an approach with a greater emphasis on mathematical foundation than provided in BIOST 2041 (Introduction to Statistical Methods I). Students in BIOST 2141 are expected to have a working knowledge calculus including multivariable differentiation and integration. Topics covered in this course include exploratory and descriptive analyses, both quantitative and graphical. Probability is discussed, including sample spaces, probability measures, probability calculus, and popular continuous and discrete distributions. Estimation and hypothesis testing are discussed in detail for one- and two-sample problems for both continuous and discrete data. One-way ANOVA, ANCOVA, simple linear regression, and correlation methods are explored. Nonparametric and computationally intensive resampling and simulation-based methods are discussed in addition to classical parametric approaches. Broad goals include: the use of R to analyze data sets and answer research questions; recognition of situations when procedures are and are not appropriate; and intuitive understanding of the rationale used in creating the statistical procedures presented.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: BIOST-MS or BIOST-PHD

BIOST 2142 - APPLIED REGRESSION ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

This is an introductory course in statistical modelling intended for Masters or PhD students in biostatistics or other disciplines who have already had basic training in statistical methods. The course focuses on all types of regression methods with the following learning objectives: To fit and interpret linear regression models with multiple continuous and/or categorical predictors. To fit and interpret generalized linear models (GLMs) with emphasis on logistic and Poisson regression. To justify and apply standard modelling procedures using data, including model interpretation and assessment of model adequacy. To analyze data sets taken from the fields of medicine and public health. To develop oral and written communication skills through the description of analytic strategies and the summarization and interpretation of results.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: BIOST 2041 or BIOST 2039 or BIOST 2141

BIOST 2143 - LONGITUDINAL AND CLUSTERED DATA ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

Course topics include linear mixed models; generalized estimating equations (GEEs); and generalized linear mixed models for analyzing longitudinal and clustered data, from an applied perspective. Students will learn the justification and applicability of standard procedures, model interpretation, and assessment of model fit.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: BIOST 2049 or BIOST 2142

BIOST 2145 - INTRODUCTION TO HEALTH DATA SCIENCE

Minimum Credits: 2

Maximum Credits: 2

This course focuses on teaching basic data science concepts and data analysis methods that are motivated by dealing with real life problems in public health. Students will become familiar with data science terms such as data wrangling. Students will learn the concepts of exploratory data analysis, data cleaning, data wrangling, and visualization. Students will learn the necessary skills to tidy, manage, and visualize data and communicate results. This course will mainly use the R programming language. The course lectures will cover the following general themes: data structures and representation, data wrangling and processing, computational tools and techniques, and case studies illustrating steps of analysis of real data, including examples from public health.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: BIOST 2039 or BIOST 2141

BIOST 2150 - APPLIED SURVIVAL ANALYSIS: METHODS AND PRACTICE

Minimum Credits: 3

Maximum Credits: 3

This course covers fundamental concepts and methods important for the analysis of datasets where the outcome is the time to an event of interest, such as death, disease occurrence, or disease progression. An important feature of survival data is censoring and truncation. Topics include quantities for summarizing and presenting time-to-event data; non-parametric estimation and hypothesis testing methods such as Kaplan-Meier estimator and (weighted) log-rank tests; semi-parametric Cox proportional hazards model and other commonly used parametric models; methods for model development and diagnostics, and sample size considerations. Statistical theory is presented in the context of informing practical data analysis; homework assignments and examinations emphasize appropriate analysis strategy and model interpretation. Students are expected to be familiar with fundamental statistical concepts such as probabilities, distributions, likelihood, hypothesis testing, estimation, and inference. Basic knowledge of either SAS or R programming is also required.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: BIOST 2049 or BIOST 2142

BIOST 2151 - BAYESIAN DATA SCIENCE

Minimum Credits: 3

Maximum Credits: 3

This is a course in Bayesian methods for applied statistics and data science whose broad goal is to provide students with the skills needed to be able to select, conduct, report and interpret appropriate Bayesian analyses for a wide variety of applied problems. General topics covered include Bayesian concepts of statistical inference, Markov chain Monte Carlo and other computational methods, linear, hierarchical and generalized linear models, model selection and diagnostics, and Bayesian learning. The course explores the use of the popular and free software packages R, JAGS and Stan for conducting Bayesian analyses.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: BIOST 2039 or BIOST 2141 or BIOST 2041 and BIOST 2049 or BIOST 2142

BIOST 2154 - STATISTICAL METHODS FOR OMICS DATA

Minimum Credits: 2

Maximum Credits: 2

This 2-credit course is a graduate level course to cover popular statistical and computational methods for high-throughput omics data analysis. With the rapid advances of many omics technologies, the course will focus on the fundamental concepts of various topics (e.g. data preprocessing, association analysis, causal mediation analysis, differential analysis, statistical learning, pathway analysis, etc.) and their specific applications to different omics data types (e.g. microarray, next-generation sequencing, single cell sequencing, mass spectrometry, microbiome, etc.). The major target audience is graduate students (master or PhD students) interested in omics data analysis and related research. Students are trained with hands-on materials to understand the methods, implement the algorithms and interpret results in real omics applications.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: BIOST 2049 and (BIOST 2037 or BIOST 2131 or BIOST 2043 or BIOST 3011)

BIOST 2155 - INTRODUCTORY STATISTICAL LEARNING FOR HEALTH SCIENCES

Minimum Credits: 2

Maximum Credits: 2

This 2-credit course is a graduate level course to introduce basic concept and methods for statistical learning with emphasis on modern health science applications. The syllabus includes: linear regression with regularization, supervised machine learning, unsupervised clustering and dimension reduction. Target audience will be second year Biostatistics master students or early PhD students with interests in statistical learning techniques for health science data. Students will be trained with hands-on materials to understand the methods, implement the algorithms and interpret results in real applications.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: (BIOST 2039 or BIOST 2141) and (BIOST 2043 or BIOST 3011)and BIOST 2049

BIOST 2162 - CLINICAL TRIALS: METHODS AND PRACTICE

Minimum Credits: 3

Maximum Credits: 3

The course lectures integrate web-based material covering fundamental concepts in the design and conduct of modern clinical trials. Topics include: experimental designs, interim monitoring, analysis methods for comparative clinical trials, ethical, organizational and practical considerations of design, case studies, and international guidelines for publication of trials in major journals and meta-analyses.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: (BIOST 2039 or BIOST 2141) and (BIOST 2093 or BIOST 2173)

BIOST 2165 - STATISTICAL EVALUATION OF BIOMARKERS AND CLASSIFICATION TOOLS

Minimum Credits: 3

Maximum Credits: 3

The course provides an introduction to the concepts and approaches for statistical evaluation of classification markers and tools applied in various detection and prediction tasks. Topics include evaluation of the accuracy of classifiers and diagnostic tests, biomarkers and classification/prognostic models, ROC curves, decision-theoretic approaches, combining multiple markers for improved classification, the accuracy of future event prediction.

Academic Career: Graduate

Course Component: Lecture
Grade Component: Grad Letter Grade

BIOST 2168 - INTRODUCTION TO CAUSAL INFERENCE

Minimum Credits: 3

Maximum Credits: 3

This 3-credit course is a graduate-level course that will cover modern statistical methods for estimating causal effects. With the emerging statistical literature on causal inference in the last decades, the course will first introduce the fundamental concepts of causal effects, causal assumptions, and causal diagrams. We will then focus on popular statistical methods such as propensity score, instrumental variables, and causal mediation analysis and their applications in public health. The target audience is graduate students with statistical background and interests in causal inference and related research. Students will be trained with hands-on materials to understand causal inference methods, implement them with R packages, and interpret results in real data applications.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: BIOST 2049 and (BIOST 2037 or BIOST 2131, BIOST 2043 or BIOST 3011)

BIOST 2173 - SAS FOR DATA MANAGEMENT AND ANALYSIS

Minimum Credits: 2

Maximum Credits: 2

The goal of this course is to provide students with an understanding of the SAS program environment as well as the skills needed to use SAS as a tool to conduct research, prepare data, and perform analyses. Upon completion of the course the student will have an understanding of SAS at the intermediate level and will be adequately equipped to take the SAS base programming certification. The course covers the utility of SAS as a data management, data manipulation, and data analysis tool. The focus will not be statistical analysis, but rather how to use SAS as a programming tool. Emphasis will be placed on program code writing. Concepts will be illustrated with numerous examples from basic descriptive analysis.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad HSU Basis

Course Requirements: PREQ: BIOST 2041 or BIOST 2039 or BIOST 2141

BIOST 2174 - ADVANCED R COMPUTING

Minimum Credits: 2

Maximum Credits: 2

BIOST 2174 is an advanced statistical computing course using R designed for graduate level biostatistics students with basic R programming background. The course will cover topics, including but not limited to, R in modeling and optimization, advanced R graphics, functional programming, object-oriented field guide, efficient computing in R, GUI for R-shiny, embedding C/C++, R package/documentation, Github, etc. The course will also include real life application for students to practice the programming techniques learnt in class.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: (BIOST 2037 or BIOST 2131) and (BIOST 2039 or BIOST 2141)

BIOST 2179 - BIOSTATISTICS CONSULTING PRACTICUM

Minimum Credits: 1
Maximum Credits: 1
Course Component: Practicum
Grade Component: Grad Letter Grade

BIOST 3000 - DOCTORAL TEACHING PRACTICUM

Minimum Credits: 3
Maximum Credits: 3

This course provides Biostatistics doctoral students with training and opportunities to develop practical skills in teaching and (peer-)mentoring students who are taking certain Biostatistics courses. As part of the teaching practicum, students will lecture and/or lead recitation/review/lab sessions, hold office hours, grade homework assignments and/or exams, update course materials, and manage course websites. Course goals include improving oral and written communication skills and exposure to classroom teaching experience.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad HSU Basis
Course Requirements: PLAN: BIOST-PHD

BIOST 3010 - RESEARCH AND DISSERTATION PHD

Minimum Credits: 1
Maximum Credits: 15
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

BIOST 3011 - INTRODUCTION TO STATISTICAL INFERENCE 1

Minimum Credits: 3
Maximum Credits: 3

The course covers basic theory of probability and mathematical statistics. Topics include sample space, probability, random variables and expectation of a random variable; joint distribution, conditional distribution, independence and transformations for random variables; a few representative and popular distributions, including binomial, multinomial, Poisson, normal, t- and F-distributions; statistical inference on data: statistics, confidence intervals, hypothesis testing, test statistics, Monte Carlo and Bootstrap; Convergence in probability, convergence in distribution, central limit theorem.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOST 3012 - INTRODUCTION TO STATISTICAL INFERENCE 2

Minimum Credits: 3
Maximum Credits: 3

This course focuses on theory of statistical inferences. Topics covered include principles and methods of constructing and evaluating point estimators, sufficiency and completeness concepts and their applications, methods of constructing interval estimators, and approaches for developing and evaluating statistical hypothesis tests.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: BIOST 2037 or BIOST 2131 or BIOST 2043 or BIOST 3011

BIOST 3021 - ADVANCED STATISTICAL INFERENCE 1

Minimum Credits: 3

Maximum Credits: 3

This is the first course of the sequence that covers advanced topics in probability theory and statistical inference. This course introduces large sample theories, including basic modes of convergence in point estimation and distributions. It covers several point and interval estimation methods, including the Newton-Raphson and Expectation-Maximization algorithms, hypothesis tests, and their asymptotic properties, with particular attention to maximum likelihood estimation.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: BIOST-PHD; PREQ:(BIOST 2141 or BIOST 2039 or BIOST 2049 or BIOST 2142) and (BIOST 2044 or BIOST 3012)

BIOST 3022 - ADVANCED STATISTICAL INFERENCE 2

Minimum Credits: 3

Maximum Credits: 3

This is the second course of the sequence that covers advanced topics in probability theory and statistical inference. It covers various methods for parameter estimation and statistical inference, hypothesis testing, Monte Carlo simulations, resampling based inference procedures, and other related large sample theory.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: BIOST-PHD; PREQ: BIOST 2051 or BIOST 3021

BIOST 3025 - LINEAR MODELS

Minimum Credits: 3

Maximum Credits: 3

This course is providing an introduction to the theory of linear models. In this class, we will discuss various topics including least squares estimation, the Gauss Markov model, the Aitken model (Generalized linear model), BLUEs, distributional theory such as multivariate normal and noncentral distributions, inference in linear models (linear hypothesis testing, likelihood ratio test, confidence intervals, multiple comparisons), Cochran's Theorem, sequential SS, and model checking of underfitting and overfitting. This is a theoretical course and requires knowledge of statistical theory and linear algebra.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: (BIOST 2044 or 3012); PLAN: Biostatistics (BIOST-PHD)

BIOST 3042 - MIXED MODELS

Minimum Credits: 3

Maximum Credits: 3

This is a PhD level course in Mixed Models. Students are expected to be comfortable and familiar with linear algebra (e.g., matrix notation and computation) and have taken courses in linear/generalized linear models. Using a mixed model allows one to relax the usual independence assumptions from linear/generalized linear models and take into account complicated data structures. This course will cover mainly theoretical aspects of various types of mixed models, together with practical implications of their use. Topics covered will include linear mixed models, generalized mixed models, mixed models for categorical data, repeated measures data analysis and cross-over trials with mixed

models. Mathematical formulations and statistical assumptions of the fitted models will be covered. Key concepts of the theories and estimation methods behind these mixed models will also be illustrated. The main software used for fitting the mixed models will be SAS or R.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: BIOST-PHD; PREQ: BIOST 2083 or BIOST 3025

BIOST 3050 - SURVIVAL ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

The problem of analyzing time-to-event data, often referred to as survival data, arises in many fields such as medicine, public health, engineering, economics, and demography. An important feature with survival data is censoring and truncation. The materials covered in this course include introduction of basic concepts and terminologies, estimation of summary statistics for survival data, hypothesis testing of comparing time-to-event distributions under censoring and/or truncation, regression methods for survival data, and multivariate models for survival data. The statistical techniques will be exemplified mainly through medical or biological data. The course will focus on both theories and applications. Students are expected to be familiar with fundamental statistical concepts and theories such as probabilities, distributions, likelihood, hypothesis testing, estimation and inference. Knowledge on using SAS and R programming for data management and analysis is also required.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: (BIOST 2039 or BIOST 2141) and (BIOST 2044 or BIOST 3012)

BIOST 3065 - ANALYSIS OF DATA WITH MISSING VALUES

Minimum Credits: 3

Maximum Credits: 3

This course will present missing-data problems in statistics and discuss naive methods such as complete-case analysis, available-case analysis and imputation; standard likelihood-based methods, theory and application of multiple imputation, data augmentation, Gibbs sampler, and some recently developed methodologies in the missing data literature and related fields.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: (BIOST 2039 or BIOST 2141) & (BIOST 2051 or BIOST 3021)

Business Accounting

BACC 2060 - INDEPENDENT STUDY IN ACCOUNTING

Minimum Credits: 1

Maximum Credits: 9

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad LG/SU3 Basis

Course Requirements: Katz Grad School of Business students only.

BACC 2100 - MACC INTERNSHIP

Minimum Credits: 1

Maximum Credits: 3

To enroll for an IFC through the MACC program, you must be a MACC student and work for a minimum of 10 hours a week for 10 weeks during the semester you intend to take the internship for credit. You may receive up to six internship credits, but only three per semester, and no more than three credits for an experience. The grade for these credits will be pass/fail (satisfactory/unsatisfactory). The deadline to apply for an internship for credit is the date the add/drop period ends for that given semester. All internship offers must be approved by the MACC office prior to enrollment for that experience. Performance appraisals must be submitted to your faculty advisor and to career services and your employer must complete a midpoint and final performance appraisal.

Academic Career: Graduate

Course Component: Internship

Grade Component: Grad HSU Basis

BACC 2251 - FORENSIC ACCOUNTING

Minimum Credits: 3

Maximum Credits: 3

"Fraud is extremely costly to our society, and the costs seem to be growing. The AICPA recently called forensic accounting one of the seven hot, new, "sizzling" career areas in accounting. It is estimated that there will be a shortage of between 25,000 and 50,000 professionals working in this area in the next few years in the U.S., So there are many opportunities for students knowledgeable in fraud to work in various federal agencies (e.g. FBI), major corporations, and professional service firms. The objectives of the forensics course are to familiarize students with several forms of fraud and the methods that fraud examiners use to prevent and detect it. Students will develop expertise in detecting financial statement fraud from the external auditor perspective, and learn how to use technology to detect fraud. They will acquire a basic understanding of how interviews are conducted in order to detect deception. The class will also provide a historical view of financial statement fraud. The tools used in the class will include interviewing, document examination, and public records searches, which will be helpful to students wanting to become consultants, auditors, tax professionals, managers, etc. The class, of course, includes an ethics component. It will help students to understand the common ethical dilemmas that they might encounter in the business world, and will help prepare them to resist pressure to commit fraud."

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: Katz Grad School of Business students only.

BACC 2252 - TAXATION FOR ENTITIES

Minimum Credits: 3

Maximum Credits: 3

The objective of this course is to help students understand how important features of the internal revenue code influence decisions regarding how to organize and structure business operations and select the most appropriate form of doing business. After beginning with a general discussion of regulations governing practice before the Internal Revenue Service (IRS), the course continues with a comparison of the issues surrounding the choice of taxable business entity, comparing the regular corporation (c corporation), the small business corporation (s corporation), the partnership, and the sole proprietorship. Further lectures incorporate determinations of entity tax bases and resulting tax obligations with special emphasis placed upon differences for each entity type. Tax planning is an integral part of the course. Income shifting, tax deductions, tax credits, income exclusions, book (GAAP) vs. taxable income, and mergers and acquisitions (M&A) are discussed in detail. The course uses case studies and tax return preparation to help students to apply the theory and details of the tax code. Course materials are updated as tax laws change.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: ACCT-MS or ACCTBA-MS

BACC 2254 - ADVANCED FINANCIAL ACCOUNTING

Minimum Credits: 3

Maximum Credits: 3

This course covers topics that are of particular interest to financial report preparers and auditors. Special emphasis is placed on accounting for business combinations and consolidated financial reporting. Other topics include international accounting, accounting for partnerships, and accounting by fiduciaries.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Accounting (MS)

BACC 2255 - ACCOUNTING DISCLOSURES FOR DERIVATIVES

Minimum Credits: 1.5

Maximum Credits: 1.5

This accounting elective will focus on derivative instruments and their impact on accounting and internal controls. The course will cover various topics tied to derivative instruments including the benefits, hedging, the risks, cash flow implications, internal controls, accounting & reporting requirements, taxation, and regulations. The course will analyze various incidents where internal controls were compromised and the implications. Upon successful completion of this course, the student will have the knowledge and background required to account for, audit, and monitor the use of derivative products. This course will also help those students who plan on sitting for the CPA examination.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: BUSACC 1238

BACC 2256 - STRATEGIC COST MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

This course deals with strategic implications of alternative methods of product cost measurement. The discussions will primarily be case-based and will include cost measurement issues in both conventional and modern manufacturing environments.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PLAN: Accounting (MS)

BACC 2258 - STRATEGIC COST MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

The quality, timeliness and credibility of the cost information used in corporate decision-making can have a significant impact on value creation. This is because cost information is important not only in strategy formulation and in the development and implementation of action plans that link strategies to value creation, but also because such data serve as measures of financial performance for products, processes, organizational sub-units and managers. In particular, product and service cost estimates have a major influence on corporate strategic decisions such as pricing, resource allocation, product development, supply chain design and customer focused management. In addition, product costs are informative signals of operational efficiency. Therefore, they constitute financial measures of the success of management actions such as continuous improvement and business process reengineering. Over-aggregate or obsolete cost systems can have a significant adverse impact on cost reduction in particular and overall corporate strategy and

competitiveness in general. The objective of this course is to develop an integrated approach to analyzing these issues. In particular, we will study (a) how product cost measurement affects strategy and resource allocation decisions; (b) how to be sophisticated users of cost feedback and how to understand the strategic distortions that are induced by flaws in cost system design; (c) the strategic role of value-driver information and the relationship between process improvement and cost reduction; (d) the use of budgetary control systems and financial measures in performance evaluation and management and (e) incentive conflicts in organizations and their mitigation through appropriate mechanisms.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: RESTRICTED ACCT-MS,ACCTBA-MS

BACC 2401 - FINANCIAL ACCOUNTING

Minimum Credits: 3

Maximum Credits: 3

The major objective of this course is to help students understand the basic structure and substance of a firm's reports from a user's point of view. This includes what is (and what is not) included in the reports, how and when events affect the statements, and what can be inferred from these reports about the firm's past activities, present position and the future prospects.

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

BACC 2466 - RISK MANAGEMENT AND COMPLIANCE ISSUES FACING INTERNATIONAL ORGANIZATIONS

Minimum Credits: 1.5

Maximum Credits: 1.5

This course will be valuable to MBA and mac students interested in working for global businesses, regardless of their desired career paths. As business organizations continue to seek growth in markets outside the United States and Western Europe, they will face increasingly complex and difficult challenges, including compliance with U.S. And foreign criminal and civil laws in places that are corrupt. Compliance with the U.S. Foreign corrupt practices act, which forbids businesses from providing certain benefits to government officials, is essential for global organizations, as penalties are severe. And to succeed in their careers, auditors will need to understand that businesses in certain geographic areas maintain multiple sets of books and hide bribery and tax fraud schemes. Strategic planners and supply-chain professionals will face cross-border risks, including demands by government customs and tax inspectors for bribe payments. Energy executives will confront violence, corruption and supply-chain problems in many oil and gas-producing areas. Sales professionals will confront demands for kickbacks. The course will cover these issues, and will provide students with the knowledge and compliance tools necessary to advance their professional careers in a global economy.

BACC 2510 - ANNUAL REPORTS TO SHAREHOLDERS

Minimum Credits: 1.5

Maximum Credits: 1.5

This financial accounting elective covers the rules for financial disclosures under the U. S. Securities and Exchange Commission (SEC) and exposes students to the annual financial reporting processes followed by public companies in the United States. In our study, we will focus on the fundamentals of the important filings made by public companies with the SEC, including these important disclosures: Management's Discussion and Analysis, Critical Accounting Estimates, Overview of Business, Quantitative and Qualitative Disclosures about Market Risk, the report of the Independent Auditors and the full set of company financial statements themselves. Our study covers the material accounting judgements that companies make in their financial statements as well as the discretionary disclosures made to help stakeholders better understand the business environment.

BACC 2511 - GOING PUBLIC & PROXY STATEMENTS

Minimum Credits: 1.5

Maximum Credits: 1.5

A continuance of BACC 2510 and includes topics such as understanding current reports on Form 8-K, the company's annual Proxy statement solicitations and the process of going Public (filed on Form S-1). The course also covers going public through direct listing and through the use of a Special Purpose Acquisition Company (SPAC). These advanced topics in SEC Reporting touch on the various ways that companies can list shares to the public and the differing regulatory requirements under each method. In our study of proxy solicitation materials, we cover the various elements of executive compensation and the disclosures regarding the pay philosophy made by the board of directors. Shareholder advocacy as well as the responsibility of the outside auditors are included in this section of the course.

BACC 2523 - ACCOUNTING DATA ANALYTICS

Minimum Credits: 3

Maximum Credits: 3

Accounting data analytics exposes macc students to the role of big data in accounting and the information technology tools and techniques used by accountants and auditors to produce more timely and accurate reports. Topics include advanced excel, data modeling, statistical sampling and cluster analysis, business intelligence, and xbrl generation and analysis. The course will cover data analytics covering four major themes: financial reporting, performance evaluation, audit analytics, and tax. Each theme will include hands-on instruction using commercial and open source software and requires students to complete a related data analysis project. Accounting data analytics is different from other database and information systems courses in that it will show students how to use specific tools to complete projects and develop an analytical mindset with a specific focus on accounting and auditing processes. This is primarily a project-based course. The students will complete three projects, showing their mastery of the tools, decisions, and the steps they followed to reach their conclusions. The final exam would be used to evaluate general understanding of the concepts

discussed throughout the semester. There is potential for additional ebl components including field trips if we can work out logistics. I'm currently developing relationships with the accounting firms to bring in local experts and to work on real-world cases.

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

BACC 2524 - INTERNAL AUDIT: RISK & ADVISORY

Minimum Credits: 1.5

Maximum Credits: 1.5

Students are introduced to generally accepted auditing standards (GAAS). Internal control is studied in detail with emphasis on how to test for its effectiveness. Audit objectives, planning and sampling techniques are developed as a basis for the audit opinion.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: Katz Grad School of Business students only.

BACC 2525 - FINANCIAL STATEMENT ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

Financial statement analysis focuses on the evaluation of publicly traded company financial statements and related note disclosures as well as the correlation of this historic financial performance to the company's stock prices. This course will assist students' development of a systematic approach to analyzing reported financial data and understanding the underlying risks and possible inconsistencies among comparative companies. Requirements of the course include interim exams and written and oral presentations of analysis.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Accounting (MS)

BACC 2528 - MANAGERIAL ACCOUNTING

Minimum Credits: 1.5

Maximum Credits: 1.5

Students learn how the costs of products and services are determined in cost accounting systems and how this data is used in managerial decisions and in planning and control of business operations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: BACC 2401; PROG: Katz Graduate School of Business

BACC 2533 - ACCELERATED INTERMEDIATE FINANCIAL REPORTING

Minimum Credits: 3

Maximum Credits: 3

Accelerated intermediate financial reporting fulfills the prerequisites of intermediate financial reporting 1 and intermediate financial reporting 2 for students who are entering the MACC program. This course studies the preparation, communication, interpretation and analysis of financial data with emphasis on the information needs of users of financial information prepared under us GAAP. General topics covered in this course include revenue

recognition, inventory accounting, long term assets and impairment, investments, current liabilities and contingencies, long term liabilities, capital and retained earnings, leases, pensions and postretirement benefits, income taxes, and preparation of the statement of cash flows. Students are expected to have an accounting background. This course is designed to sit on top of an existing foundation in accounting and will assume students already have taken several financial accounting courses or knowledge obtained through work experience. It is expected that students are fluent with accrual accounting and the accounting cycle and that they have already studied some of the topics in the course in depth. The course will move quickly.

BACC 2534 - CONTROLLERSHIP

Minimum Credits: 1.5

Maximum Credits: 1.5

This accounting elective is designed for MAcc students seeking a role in corporate accounting and controls. The course will cover the changing role of the controller and the major functions managed by the controller of a typical company. Topics covered include: role of the controller, general accounting, cash management, accounts receivable, accounts payable, payroll, financial planning and budgeting, management reporting and designing well-controlled financial processes and systems. The content will focus not only on the processes managed by the controller, but also the optimization of these processes, policies and procedures and leadership issues. The use of experts from the accounting community will be used as a complement to the theoretical materials presented to illustrate the practical applications and challenges of controllership. Because the course is practical in nature, an experience-based learning group project will be a large part of the curriculum and learning experience offered to students.

BACC 2543 - TAX POLICY 1

Minimum Credits: 1.5

Maximum Credits: 1.5

Our nation was born from a revolution over taxation without representation. Nearly 250 years later, the debate over tax policy continues to dominate political debates and presidential campaigns. Why the tax system attracts all this attention is no mystery. It is the aspect of government that directly affects more people than any other. This course will explore the history of tax policy in the united states, the tax legislative process in congress, how our tax policies influence people's decisions and behavior, international tax considerations, and ideas for future tax reform. Students will discuss what factors are important in designing a good tax system and survey the social justices and injustices that arise from how the government raises its revenue. Upon completion of this course, students should be able to think critically about our tax system and form opinions grounded in facts and policy. This course is for any student that wants to become a more educated citizen (and voter!) With respect to our nation's ongoing debate over tax reform.

Academic Career: Graduate

Course Component: Lecture

Course Requirements: PREQ: BACC 2401; PROG: Joseph M. Katz Grad Sch Bus

BACC 2558 - NON-PROFIT AND GOVERNMENTAL ACCOUNTING

Minimum Credits: 3

Maximum Credits: 3

This course focuses on financial reporting and disclosure for not-for-profit and governmental entities based on the standards and principles promulgated by the financial accounting standards board (FASB) and the governmental accounting standards board (GSAB). Students will learn how such entities prepare their financial reports and how to interpret and use such information. The course covers financial reporting for not-for-profit entities, balancing the focus on internal operations with fiduciary responsibility. In addition, the course examines the objectives of financial reporting for governmental units and the preparation and use of the financial statements for such entities. A sample of specific entities will be reviewed to illustrate the preparation and use of their financial statements. In addition, accounting software for governmental transactions will be introduced.

BACC 2560 - VOLUNTEER INCOME TAX ASSISTANCE

Minimum Credits: 3

Maximum Credits: 3

The course provides training to students related to basic tax return preparation and more complex issues facing this client population, including the availability of government assistance and refundable tax credits. In addition to assisting the local Pittsburgh community, we also assist students and scholars enrolled/employed at the University of Pittsburgh and Carnegie Mellon University. Therefore, student preparers get exposure to international tax return preparation. Significant use of technology and virtual preparation methods are used in the course. Students are trained to use tax preparation software, tax research methods on the Internal Revenue Service website, and virtual document storage using the IRS secured website. Students will work with clients in person as well as virtually, and therefore, must be proficient in all platforms. Students will also guide taxpayers about to how to navigate these methods.

BACC 2561 - SUSTAINABILITY REPORTING

Minimum Credits: 1.5

Maximum Credits: 1.5

In today's world, businesses, governments, and consumers are increasingly recognizing the importance of transparent reporting to hold companies accountable for their environmental, social, and governance practices. Sustainability reporting has emerged as a powerful tool for measuring, disclosing, and communicating a company's sustainability story and performance while driving continued business success. This course will provide you with an understanding of sustainability reporting and its significance in today's business landscape. We will explore the key principles, frameworks, and guidelines that companies use to report their sustainability metrics for internal and external use. You will also gain insights into the benefits, challenges, and best practices associated with managing and reporting on environmental, social, and governance topics. By the end of this course, students will be able to: 1) Understand how to measure environmental, social, and governance data and incorporate insights into corporate decision-making 2) Identify relevant regulatory requirements related to non-financial disclosures and analyze impacts on an organization 3) Communicate an effective and transparent sustainability story using quantitative and qualitative metrics and disclosures 4) Assess sustainability performance as an external user of sustainability reporting

BACC 2562 - VOLUNTEER INCOME TAX ASSISTANCE

Minimum Credits: 3

Maximum Credits: 3

This course is 3.0 credits. Students must be enrolled at Pitt Business pursuing an accounting degree. CBA students must have completed or be concurrently enrolled in BUSACC 0030. Financial Accounting. Students performing a supervisory role must have completed a prior year as a preparer. The Volunteer Income Tax Assistance (VITA) program exposes undergraduate and graduate students to the preparation of federal, state, and local tax returns for individuals and families in lower socio-economic circumstances. The course provides training to students related to basic tax return preparation and more complex issues facing this client population, including the availability of government assistance and refundable tax credits. In addition to assisting the local Pittsburgh community, we also assist students and scholars enrolled/employed at the University of Pittsburgh and Carnegie Mellon University. Student preparers may get exposure to international tax return preparation. Significant use of technology and virtual preparation methods are used in the course. Students are trained to use tax preparation software (Taxslayer for U.S. citizens and resident aliens; Sprintax for nonresident aliens), tax research methods on the Internal Revenue Service website, and virtual document storage using the IRS secured site GetYourRefund.org. Students will work with clients in person as well as virtually, and therefore, must be proficient in all platforms. Students will also guide taxpayers about to how to navigate these methods. By the end of this course, first year student preparers will be able to: 1) Understand the basics of individual tax law 2) Prepare simple tax returns 3) Communicate effectively with taxpayers from diverse

backgrounds In addition, students returning for a second year in a supervisory role, will develop skills supervising the work of first year preparers and providing constructive feedback.

BACC 2901 - ACCOUNTING AND CONTROL FOR HEALTH CARE ORGANIZATIONS

Minimum Credits: 3

Maximum Credits: 3

In this course you will develop an understanding of the various roles that accounting information plays in healthcare organizations. We will begin by analyzing the needs of managers, healthcare professionals, healthcare consumers and other parties for financial information concerning a healthcare organization's financial position, current financial performance and cash generating ability. You will learn how standard financial statements (balance sheet, income statement, and statement of cash flows) address these needs, and the strengths and weaknesses of the statements in supplying this information. Financial statement analysis concepts and techniques will be introduced as cost-effective tools that enable healthcare decision makers to draw appropriate inferences from published financial statements. We will also study key issues that arise in accounting for a healthcare organization's operations, investing and financing

decisions. The final part of the course will analyze specific uses of accounting information in support of organizational decisions. We will study how accounting systems measure the cost and profitability of healthcare services, the effect of volume on profitability, and the proper use of accounting cost information in supporting decisions such as whether to invest in new equipment and whether or not to expand existing services.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Business Administration

BUSADM 3001 - BEHAVIORAL RESEARCH METHODS

Minimum Credits: 3

Maximum Credits: 3

The primary objective of this course is to familiarize you with and develop an appreciation for business research methodology. Research skills will be an important determinant of your success as an academic. The course will introduce you to a variety of research approaches, allow you to develop an understanding to effectively use these approaches in your own research, and prepare you to evaluate research done by others. The course will also provide you with an introduction to causal modeling techniques (lisrel, pls). By the end of the course you should develop a sound appreciation of the research process and a range of research approaches that can be applied to management problems. In addition, you should have an appreciation for what constitutes "good" research so that you can constructively critique and make use of research done by others.

Academic Career: Graduate

BUSADM 3013 - WORK AND ORGANIZATIONS

Minimum Credits: 3

Maximum Credits: 3

This seminar is intended for Ph.D. students who wish to develop an understanding of the theoretical underpinnings of research on the management of knowledge and work in organizations. It reviews the major theoretical perspectives, but places a particular emphasis on the current empirical literature related to human resource management. Because of the multi-disciplinary nature of this research space, readings draw on a broad range of material including studies from sociology, organization theory, strategy, economics, and policy. These are used to develop an integrative understanding of the underpinnings of work and employment-related research published in top tier management journals.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

BUSADM 3030 - MANAGING THE TRIPLE BOTTOM LINE

Minimum Credits: 3

Maximum Credits: 3

Issues such as climate change and global warming, human rights, and health and sanitation for all have garnered significant attention in recent years. Leading businesses realize that it is no longer enough to maximize profits and cater to shareholders but as well critical to integrate the wellbeing of the planet and its people into their business models. Such a transformation to managing the triple bottom line of people, planet and profit requires us to look at business and its operations through a new lens. This doctoral seminar will focus on theories, concepts and methodologies that we can use to understand the role of the firm in 21st century society and develop strategies for long run sustainability. The course will be interdisciplinary, drawing on literatures in strategy, marketing, organizational behavior, operations, and finance as well as methods spanning lab experiments to structural equation models to understand the conditions under which creating social and environmental value can drive business value. The course will feature academic guest speakers from the aforementioned disciplines of business to highlight the interdisciplinary nature of sustainability research.

BUSADM 3040 - RESEARCH AND THEORY ON DIVERSITY, EQUITY AND INCLUSION

Minimum Credits: 3

Maximum Credits: 3

This seminar focuses on research, theory and applications related to diversity, equity and inclusion (DE&I) within organizations. We will examine DE&I across three levels of analyses - individual, group and organizational. Our primary goal is to better understand the ways in which research and theory has addressed topics, processes and outcomes related to diversity and its impact on key outcomes studied by organizational scholars. To accomplish this, we will review a wide array of research and theory that will provide the necessary lens for you to connect this work to your own fields of study and future research. We will also explore a variety of frameworks, strategies and research tools used to advance our understanding of this dynamic and critically important topic.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SU3 Basis

BUSADM 3050 - METHODS FOR BEHAVIORAL BUSINESS RESEARCH

Minimum Credits: 1.5

Maximum Credits: 1.5

Experienced behavioral business researchers usually fall into a pattern that emphasizes a subset of diverse methods and approaches. But both new and experienced researchers must depend on a vast literature that makes use of a diverse set of methods, many of which are outside of their expertise. Therefore, drawing from a limited set of approaches would disadvantage any researcher who desires to understand, the literature of his or her chosen field. Another by-product of following only a limited set of approaches is a likely narrowed understanding of trade-offs necessary in any choice of research method. Because no single method can answer all questions, it is important to make good decisions about those trade-offs. This course provides a "hands on" survey of research methods, covering phases from developing research ideas, theorizing, collecting data, identifying what to measure, and determining how it should be measured. A rolling writing assignment throughout the course will provide opportunities for feedback at each step of the way. As a result of this course, you should be a better consumer, critic, and provider of research results in your field.

BUSADM 3501 - QUANTITATIVE RESEARCH METHODS 1

Minimum Credits: 3

Maximum Credits: 3

Quantitative Research Methods I (Topics: Hypothesis Testing and Analytical Modeling) This course will help develop the concepts and skills needed for effective analysis of data and the interpretation of results for decision making. Course will review inferential statistics: confidence interval, hypothesis tests, and regression. Cover optimization (LP review, DEA, Network Modeling, Integer Programming, Nonlinear programming, and Simulation), as well as, Management Science and Operations Research techniques: - Build analytical and modeling skills for both deterministic & stochastic optimizations. - Understand Simulation, Decision - and Queueing-Theory to assist in better management decisions. - Develop skills needed for effective analysis of data and the interpretation of results for decision making. Possible software package for the course are Excel, Tableau, SPSS, SAS-JMP.

BUSADM 3502 - QUANTITATIVE RESEARCH METHODS 2

Minimum Credits: 3

Maximum Credits: 3

This course is designed to broaden and enrich students' knowledge and understanding of statistical concepts. Multivariate statistical techniques can be used to analyze data in many fields such as Finance, Production and Operations, Accounting, Marketing, Personnel Management, etc. Through overviewing actual applications in various fields and in-class exercises involving real-world data, students can apply the techniques to topics such as consumer and market research, supply chain analytics, creditworthiness and risk assessment, stress test, and early warning signals outside pre-set limits, and make better business decisions. The second half of this class will dive deeper into the statistical techniques, tools, and processes necessary to solve analytic problems in a multitude of business domains. In this class, we will conduct an overview of data mining techniques, focusing primarily on business-oriented datasets and examples.

BUSADM 3503 - BEHAVIORAL RESEARCH METHODS 1

Minimum Credits: 1.5

Maximum Credits: 1.5

Behavioral Research Methods (Topics: Inquiry Strategies, Measurement, and Sampling) Reviews options for performing quantitative and qualitative research studies in firms that focus on individuals' attitudes, intentions, and behaviors. Firms can investigate research questions concerning employees, customers, and trading partners. For quantitative methods, the course will cover topics such as how to create a behavioral study strategy, formulate research questions based on theory, design questionnaires and surveys, design experiments, carry out the studies, and assess the results. Qualitative topics to be covered include methods for designing and conducting studies involving interviews, focus groups, and archival documents such as filings, news reports, and social network posts. Methods for analyzing unstructured data will be covered, using software such as Dedoose, NVIVO, and/or LIWC. Machine learning concepts will also be discussed. Co/Prerequisite: Quantitative Research Methods I.

BUSADM 3504 - QUANTITATIVE RESEARCH METHODS 1A

Minimum Credits: 1.5

Maximum Credits: 1.5

This course will show you how to interpret and extract information from data, and to use your experience and judgment to make decisions in complex environments in a systematic and consistent manner. It will also provide the necessary tools to carry out the correct analyses needed in other disciplines. The emphasis in this course is not on memorization or mimicking text examples. In real applications, your computer is the best tool for number crunching. Your function is to think and reason about the types of analyses to do. Statistical thinking is more an art than a science. While there are guidelines, and there are wrong ways to do things, in general, there is no flowchart you can use to figure out the "right" way to handle a set of data.

Academic Career: Graduate

BUSADM 3505 - QUANTITATIVE RESEARCH METHODS 1B

Minimum Credits: 1.5

Maximum Credits: 1.5

This course is a combination of management-science/operations research (MS/OR) and Decision Analysis Techniques. The MS/OR portion of the course develops and builds modeling skills using optimization methodologies. The topics covered include: Linear programming (review), Integer programming and Non-Linear programming. The decision analysis under uncertainty will be discussed using optimistic, pessimistic, most likely and expected value criteria. Decision making under conflict/game theory concepts will be discussed briefly. Other topics covered may include Queuing Theory and Simulation. By the end of the course, the students should be able to identify, formulate and solve a real-life problem using the above techniques.

Academic Career: Graduate

Grade Component: Grad Letter Grade

BUSADM 3506 - BEHAVIORAL DECISION-MAKING AND CHOICE

Minimum Credits: 1.5

Maximum Credits: 1.5

In this course, you will develop a broad foundation of key topics in the decision-making research arena and critically evaluate theoretical and empirical aspects of articles (conceptual). This course will assist you to strengthen your ability to apply this research to identify, develop, and present your research ideas (practical). Each session, we will discuss a key topic in the decision-making literature (that is, how people really make choices in the real world). The topics covered in this seminar will range from normative utility maximization theory to heuristics and biases, to applications in the marketplace.

BUSADM 3509 - QUANTITATIVE RESEARCH METHODS 2B

Minimum Credits: 1.5

Maximum Credits: 1.5

Business Analytics is a strategic initiative for many companies and organizations. Many organizations use data analysis and decision science techniques to drive strategic decisions and to solve critical problems. This class will dive deeper into the statistical techniques, tools, and processes necessary to solve analytic problems in a multitude of business domains. The amount of data available to companies and other organizations has grown and continues to grow, exponentially. Companies that manage to successfully incorporate data analysis in their decision-making are both more productive and more profitable. As a result, a professional's ability to use data to extract insights and generate predictions has become increasingly valuable. In this class, we will conduct an overview of data mining techniques, focusing primarily on business-oriented datasets and practical examples.

BUSADM 3598 - PRACTICUM RESEARCH PROJECT

Minimum Credits: 1

Maximum Credits: 15

DBA students are required to demonstrate their capacity to engage in a sustained research effort by completing a Practicum Research Project (PRP). The PRP entails an independent investigation of a problem of acknowledged significance and size in a management-related area. Generally accomplished at the conclusion of coursework, the DBA candidate would formulate a research problem, review the literature, devise a research plan, collect and analyze meaningful data to draw appropriate conclusions from their findings. The PRP is designed to allow students to investigate a problem relevant to a current issue in the business world. An ideal problem would involve rigorous processes that identify and apply existing theory.

BECN 3531 - ADVANCED TOPICS IN APPLIED MICROECONOMICS A

Minimum Credits: 1.5

Maximum Credits: 1.5

This course will consist of various applications of microeconomics in the field of Industrial Organization. The field of Industrial Organization focuses on the conduct of firms as implied by the competitive structure of the market in which they operate and the welfare implication of such conduct. Several dimensions of firm conduct are addressed, including various pricing mechanisms, product mix selection, advertising strategies, internal organization of the firm, and the implication of asymmetry of information on firm behavior and market outcomes.

Academic Career: Graduate

Grade Component: Grad Letter Grade

BECN 3532 - ADVANCED TOPICS IN APPLIED MACROECONOMICS B

Minimum Credits: 1.5

Maximum Credits: 1.5

Economic events shape global policy and strategic decision making for businesses. These factors drive overall national economic activity, movements in major macroeconomic variables, especially interest rates and exchange rates, and influence the performance of national and global financial markets. A keen understanding of the 'macro'-economic environment is key to analyzing such factors. The course will introduce students to the empirical analysis of the growth forces by providing numerous hands-on opportunities using real-world data. The students are expected to build a thorough econometric analysis using available World Bank Data to determine elements that are responsible for driving

growth and advancement. This will enable students to handle cross-country panel data sets, visualize data, perform descriptive analysis, create econometric model specifications that requires comprehensive statistical analysis and interpret results that would help readers gain deeper insight.

BFIN 2035 - VALUATION

Minimum Credits: 3

Maximum Credits: 3

This course examines the topic of value: what it is, how to measure it, and how to use it to guide managerial decisions. This is done by accomplishing three objectives: 1) providing students with a conceptual framework for thinking about

value; 2) providing students with tools for estimating value and measuring value creation and destruction; and 3) teaching students how to apply valuation models in different settings. Prerequisites: BFIN 2409 Financial Management 1, BFIN 2410 Financial Management 2

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

BFIN 2036 - CORPORATE FINANCE

Minimum Credits: 3

Maximum Credits: 3

This course is an introduction to corporate financial management. The course builds on BFIN 2006 (introduction to financial management) to provide students with the conceptual framework and analytical tools necessary to appreciate, understand, and analyze the problems facing corporate financial managers. The course consists of four main parts. The first part develops the tools necessary to conduct the analysis of corporate finance problems. These tools include the analysis of data reported on financial statements, building pro-forma financial statements, the basics of put and call options, and an introduction to corporate valuation techniques. The second part of the course examines how managers set the two primary corporate financial policies: capital structure and payout policy (e.g. Dividends and share repurchases), and the process of restructuring in financial distress and bankruptcy. The third part of the course analyzes the process of issuing securities in the capital markets, including the role of the investment banker. Finally, the fourth part explores several aspects of mergers and acquisitions, including the motives for these transactions, the structure of the deal, and the role of private equity firms.

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: BFIN 2006 or BFIN 2410; PROG: Joseph M. Katz Grad Sch Bus (PKATZ)

BFIN 2039 - INVESTMENT MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

Focuses on security analysis, portfolio analysis, and the fundamentals of investment theory. Topics include bond and stock valuation, determination of interest rates, effects of inflation and taxes on security values.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: BFIN 2006 or BFIN 2410 ; PROG: Katz Graduate School of Business

BFIN 2042 - ACQUISITION OF PRIVATELY HELD COMPANIES

Minimum Credits: 1.5

Maximum Credits: 1.5

The course will provide an introduction to the acquisition of privately held companies along with strategies for value creation in the acquired business. The course, which is exclusively taught using the case method, takes lessons taught in the valuation courses extending these concepts to the valuation of privately held business, the structuring of the acquisition balance sheet and the execution of the acquisition process. While a discussion of secured financing alternatives will be included, the application of junior capital, both mezzanine debt and equity will be the focus of the course. A risk analysis of the target will be performed and an investment thesis intended to illustrate value creation techniques will be central to each class discussion. Upon completion, students will be better prepared how to assess both operational and financial forms of risk, develop techniques intended to reduce both forms of risk, and consider value creation strategies in marketing, operations, finance and management. Each case will involve a real company acquired over the years by PNC equity partner along with actual selling memorandum, diligence prepared by PNC

principals, market research firms, accounting firms and law firms employed by PNC as part of their diligence process.

BFIN 2066 - FINANCE PROJECT COURSE

Minimum Credits: 1.5

Maximum Credits: 1.5

Brief description: project will focus is on valuation of potential acquisitions.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BFIN 2068 - MARKETS AND TRADING

Minimum Credits: 1.5
Maximum Credits: 1.5

This course is designed to give participants a broad understanding of the operations of various financial markets with special focus on liquidity, market structure and trading. With this objective in mind, the course will concentrate on the operations of exchanges, trading systems and broker-dealer intermediaries. Participants will be exposed to a range of issues regarding the formulation of trading decisions and market structure design and regulation. Simulation software will be used to provide hands-on experience with making tactical trading decisions in different market structure environments.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: BFIN 2006 or BFIN 2410; PROG: Joseph M. Katz Grad Sch Bus

BFIN 2069 - FIXED INCOME SECURITIES

Minimum Credits: 1.5
Maximum Credits: 1.5

This course examines the concepts that are most frequently encountered in the market for fixed income securities. Specifically, the course describes the most important fixed income securities and markets and develops tools for valuing these securities and managing their interest rate and credit risk. Historically, "fixed-income" refers to securities which promise fixed cash flows over their lives such as a fixed-rate coupon bond. Now, it is generally accepted that a fixed income instrument is one whose value is driven by the level of interest rates and/or the value of a related underlying asset. This classification would include floating rate bonds, callable bonds, bond futures, bond options, caps, floors and collars, interest rate swaps, credit derivatives and asset-backed securities. The analysis of fixed income securities is quantitative in nature. We will focus on the intuition behind the various concepts presented in class but there will be a fair amount of computation involved. Students should be comfortable with linear algebra, calculus, probability distributions, regression analysis and statistical concepts like mean, variance and correlation (covariance). The course will also assume a high level of familiarity with a spreadsheet package like microsoft excel.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: BFIN 2006 or BFIN 2410; PROG: Joseph M. Katz Grad Sch Bus

BFIN 2126 - INVESTMENTS ANALYSIS & STRATEGIES

Minimum Credits: 3
Maximum Credits: 3

The objective of this course is to provide students with thorough practical and theoretical exposure to the credit segment of securities markets. The course covers the major topics of bond pricing, international markets, term structure of interest rates, duration, convexity and their implications for portfolio management, interest rate models, asset-backed securities, interest rate derivatives and credit risk analysis. Real-world examples are utilized to demonstrate connections with the theoretical framework.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BFIN 2129 - ENERGY PROJECT FINANCE

Minimum Credits: 1.5

Maximum Credits: 1.5

This course will cover all aspects of infrastructure project finance with a focus on the energy industry. We will look in depth at why project finance exists and who the players are, how deals are structured and investors evaluate opportunities, the unique contractual issues and risks in the transactions and the specialized financial modeling and analysis. This course is designed to provide students who are interested in the energy and other infrastructure-reliant industries (like transportation or real estate development) with a practical understanding of how large-scale projects are financed in today's marketplace.

Academic Career: Graduate

Course Component: Lecture

BFIN 2140 - REAL ESTATE FINANCE

Minimum Credits: 1.5

Maximum Credits: 1.5

This course provides an introduction to real estate with a focus on the valuation and financing of real estate. The following topics are expected to be covered as the course focuses on income producing properties: economic theory of real estate, valuation technique (including pro-forma cash flow projections), financing strategies, risk analysis, taxation, and the securitization of real property interests. No prior knowledge of the industry is required, but students are expected to rapidly acquire a working knowledge of real estate terminology and real estate markets. Classes are conducted in a standards lecture format with discussion required.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: BFIN 2006 or BFIN 2410; PROG: Katz Graduate School of Business

BFIN 2141 - REAL ESTATE FINANCE

Minimum Credits: 3

Maximum Credits: 3

Real estate represents the largest asset class in the world and is historically the asset most closely associated with wealth in every culture and country. Our objective is to understand the financial characteristics of income-producing real estate by focusing on capital costs, cash flow characteristics, discount rates, exit values, and required rates of return. We will explore some of the unique characteristics that shape the economic performance of real estate assets. We will deploy a set of analytical tools to model potential economic outcomes of real estate investments; review the most common sources of capital deployed in income producing properties; and explore how securitization and secondary markets have revolutionized financing approaches, not always with positive results.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BFIN 2145 - FINANCIAL MODELING

Minimum Credits: 3

Maximum Credits: 3

The course will apply finance theory to solve various problems in financial management and investments. It will take a hands-on approach in building financial spreadsheet models using Microsoft excel. Students will learn to address issues that arise in various areas of financial analyses. These issues include but are not limited to discounted cash flow valuation, cost of capital estimation, asset return calculations, portfolio theory, index models, option pricing models, bond pricing and investment performance analysis.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: COREQ: BFIN 2409 and 2410; PLAN: Joseph M. Katz Grad Sch Bus

BFIN 2150 - RISK MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

This course examines financial risk management from the perspective of the corporate manager. We will examine three issues. The first is why a corporation should manage risk. To understand this, we need to consider how corporations create value for shareholders and the frictions they face that create wedges between what the corporation produces and what is ultimately passed through to shareholders. The second issue is how a corporation should manage risk. This requires an understanding of certain financial instruments that are generally referred to as derivatives - instruments whose values derive from other more fundamental assets such as commodities, currency exchange rates, stocks (equities) and bonds (interest rates). The building blocks for many of these financial instruments are two basic derivative instruments, forwards/futures and options. The third issue is the cost of risk management. We will start by pricing forwards/futures and options under the assumption that markets are efficient and there is no arbitrage. We will then use Monte Carlo simulation as a tool for pricing more exotic derivatives.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

BFIN 2306 - FINANCIAL MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

An introduction to the tools used in corporate financial decision making. Develops two basic valuation models commonly used in finance--present value models and the capital asset pricing model and focuses on the use of these models in corporate decision making. Examines capital budgeting, corporate structure policy, and corporate dividend policy.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: Katz Grad School of Business students only.

BFIN 2307 - HEALTHCARE AS AN ASSET CLASS - A PRIVATE EQUITY PERSPECTIVE

Minimum Credits: 1.5

Maximum Credits: 1.5

The course endeavors to create an understanding of the global private equity market, identify stakeholders, assess evaluation techniques of portfolio companies, examine the financing techniques, review how portfolio companies are managed and evaluate exit realization strategies. The discussion focuses on Healthcare as an asset class and its growing importance.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

BFIN 2308 - MERGERS, ACQUISITIONS AND CORPORATE RESTRUCTURING

Minimum Credits: 1.5

Maximum Credits: 1.5

This course will examine strategic and practical issues associated with restructurings, including those related to mergers, acquisitions, divestitures, activist investors, governance challenges, financial distress, and leveraged buyouts. We will investigate these issues in the context of a firm's overall strategic goals and discuss how restructuring strategies must be formulated to be consistent with a firm's business strategy and corporate culture. We will focus on the tools for measuring value and value creation/destruction and the economics underlying the value creation process. The goal of this course is to provide a practical overview of the market for corporate assets viewed from the perspective of firms, employees, bankers, consultants, and investors.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

BFIN 2409 - FINANCIAL MANAGEMENT 1

Minimum Credits: 1.5

Maximum Credits: 1.5

The main objective of this course is to gain understanding of the theory and practice of financial decision making. This course develops the tools and framework necessary to address the question what investment projects should be undertaken to maximize shareholder wealth? To examine this question, we will learn how to value an uncertain stream of cash flows and apply the concept of the time value of money in valuing bonds and equity. The course covers a number of market-based investment criteria and develops an entity valuation model, based on discounted cash flows (DCF) used for standard capital budgeting decisions. We will conclude with a short introduction to the concept of risk and return, resulting in the cost of capital. We will cover a case discussion on capital budgeting to put our framework in a more realistic environment.

Academic Career: Graduate

Course Requirements: CREQ: BACC 2401 or BQOM 2401; PROG: Joseph M. Katz Grad Sch Bus

BFIN 2410 - FINANCIAL MANAGEMENT 2

Minimum Credits: 1.5

Maximum Credits: 1.5

This course builds on financial management i and develops an asset pricing framework used in corporate finance based on the trade-off between risk and return. We use modern portfolio theory to determine a suitable asset pricing model and arrive at determining the relevant discount rate to reflect the risk associated with the cash flow we focused on in financial management i. Finally, we will address how financing and capital structure choices affect project and firm value using the above techniques and methods. The course will conclude with three valuation methods: WACC, APV, and FTE and an extensive case discussion. Financial management i & ii are prerequisite courses for any other finance

elective in the curriculum.

BFIN 2420 - FINTECH

Minimum Credits: 3

Maximum Credits: 3

This course focuses on applications of new technologies in financial settings. The course introduces FinTech topics such as digital lending, blockchain and cryptocurrency, and digital wealth management. Applications of machine-learning and big-data techniques in finance are also examined. The course also explores various trading technologies, algorithmic trading, and portfolio management tools such as risk/return optimization and value-at-risk. The course leverages current data acquisition tools and statistical software packages to improve students' analytical skills.

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

BFIN 2430 - CORPORATE FINANCIAL STRATEGY

Minimum Credits: 3

Maximum Credits: 3

This is an advanced course in corporate financial strategies. The objective of the course is to highlight the role of finance in strategic decision-making and to extend, integrate, and apply what students have learned in other courses in the context of complex business cases. The course examines the interplay between asset management issues and liability management issues in a variety of different contexts, with an emphasis on situations in which firms find themselves in changing business environments or in situations where change is needed to enhance value. Key strategic and financial choices will be examined in the context of large capital structure changes, mergers, acquisitions, divestitures, LBOs, debt restructurings, activist investor activity, incentive conflicts, and the creation of specialized organizational forms. The course focuses on the role of corporate financial strategies in the value-creation process and discusses how corporate financial strategies and decisions must be optimally formulated in the context of a firm's business strategy and corporate culture.

BFIN 3018 - MARKET MICROSTRUCTURE

Minimum Credits: 3

Maximum Credits: 3

Analyzes the process and results of trading assets under a set of explicit trading rules. Research in this area examines the structure provided by various market mechanisms to model how rules for price setting evolve in markets. The purpose of this seminar is to provide an introduction to the basic paradigms that are used to explain the behavior of markets and their participants. In addition to discussing the theory underlying market microstructure, we will examine a variety of empirical papers that use tick-by-tick data on bonds, stocks, options and futures.

BFIN 3561 - CORPORATE FINANCE RESEARCH

Minimum Credits: 1.5
Maximum Credits: 1.5

The primary objective of this course is to provide you with the knowledge and skills necessary to make objective, data-driven, financial decisions under uncertainty. In this process, you will learn/improve your research methodologies which will help you better set a research question and collect/filter/analyze financial data to make sound objective recommendations/decisions. This course covers the following seven topics: 1. Asset pricing models, risk measurement, and event studies. 2. Fundamental accounting-based asset pricing & cost of capital. 3. Financial statement analysis using data mining techniques, assessing the real economy. 4. FinTech and access to finance. 5. Corporate Valuation Under Uncertainty, ESG, IT, & Intangibles. 6. Multinational Corporation Hedging FX Strategies. 7. Capital Budgeting, Investment Decisions, and Venture Capital.

BMKT 2035 - CONSMR BEHAV THEORY & PRACTICE

Minimum Credits: 3
Maximum Credits: 3
A variety of social and psychological theories and concepts related to consumer behavior as well as their practical application to the field of marketing are examined and discussed. Students have the opportunity to further apply what they learn through case presentations.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMKT 2036 - APPLIED BEHAVIORAL ECONOMICS

Minimum Credits: 1.5
Maximum Credits: 1.5
This course will introduce students to the theory and application of "behavioral economics," a sub-domain that has gained considerable practical popularity across a range of fields, including marketing, finance, accounting, human resources and public policy. Popularized by books such as "Predictably Irrational" by Dan Ariely and "Nudge" by Cass Sunstein and Richard Thaler, Behavioral Economics focuses on the ways that humans' natural psychological tendencies can be used or overcome in ways that lead to desirable outcomes. Importantly, behavioral economics acknowledges that humans generally do not conform to the assumptions that underlie classical economics and that the ways in which we fail to be rational, self-interested, perfect information processors can be used to our benefit, rather than to our

detriment.

Self designed elective course in marketing management.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad LG/SNC Basis

Course Requirements: Katz Grad School of Business students only.

BMKT 2306 - MARKETING MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

Topics include the role of marketing in a developed society, consumer behavior, competitive behavior, social and technological change, demand analysis and measurement, marketing research and model building, and marketing planning, strategy, and control.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: Katz Grad School of Business students only.

BMKT 2409 - MARKETING MANAGEMENT

Minimum Credits: 1.5

Maximum Credits: 1.5

This course examines the role of marketing in creating value for the firm. It helps students answer the central question

of marketing strategy, what value to provide and to whom, using the tools of segmentation, targeting, and positioning (STP) of brands. The course shows how central aspects of marketing mix programs, product, place, pricing, and promotion, all follow from an effective STP program, and how marketing support functions such as marketing research, advertising, and new product development can support effective marketing decisions. Emerging trends in digital marketing, competition and globalization are examined. The course emphasizes experience-based learning to develop the necessary marketing knowledge and skills among students.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: Katz Grad School of Business students only.

BMKT 2509 - MARKETING PLANNING & STRATEGY

Minimum Credits: 1.5

Maximum Credits: 1.5

Designed to create an understanding of marketing problems and perspectives and the contexts in which they arise. The ability to structure and analyze marketing problems is reviewed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: (PREQ: BMKT 2411 or CREQ: BMKT 2409); PROG: Joseph M. Katz Grad Sch Bus

BMKT 2513 - CONSUMER BEHAVIOR 1

Minimum Credits: 1.5

Maximum Credits: 1.5

Examines a wide variety of social science concepts as they relate to the behavior of consumers. Although consumer research methodology is not a main focus, students will be expected to become familiar with the more common research techniques used to study consumers.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

BMKT 2544 - SHOPPER ANALYTICS

Minimum Credits: 3

Maximum Credits: 3

To achieve the objectives of this course, we will be using several methods during the semester, including lectures, guest speakers, readings, and class assignments/presentations. The philosophy underlying this course may be a bit different than you are accustomed to. While lectures will be a component, the general approach will be that of a practicum. That is, you will be exposed to a concept or database, then apply those concepts and databases via a project which is presented to the class. Readings are drawn from both business publications and academic journals. You are strongly encouraged to bring in other relevant materials that you encounter.

BMKT 2551 - DIGITAL AND SOCIAL MEDIA ANALYTICS

Minimum Credits: 1.5

Maximum Credits: 1.5

This course presents a data-driven approach to strategic and tactical marketing decision making in the context of digital and social media. Covering the three main media types of paid, owned, and earned media, students will learn about frameworks and methods that allow them to take data from sources such as google, Facebook, and twitter to be able to generate valuable and actionable managerial insights. The focus is on learning how to use digital and social media activity data to make better decisions, not on statistical methodologies (however, familiarity with excel is needed). The course will involve a combination of lectures, guest speakers, and hands-on workshops. This course is part of the digital marketing certificate and complements the "marketing and social media strategy" course.

Academic Career: Graduate

BMKT 2553 - SOCIAL MEDIA STRATEGY

Minimum Credits: 1.5

Maximum Credits: 1.5

Social media is changing how business is done around the world in almost every industry. How does social media effect your business? This course provides students with a detailed and up-to-date understanding of social media from a business strategy perspective. Through a series of lectures, case studies, and workshops, students learn how to identify opportunities for using social media in a variety of business areas, including marketing, operations, advertising, services, and human resources. The course takes a broad perspective and considers how social media it can be used successfully for business-to-consumer, business-to-business, and intra-company purposes. A central theme in this course is for students to apply what they learn to their own businesses and industries in order to identify opportunities for strategic, value creating uses of social media in their companies. After taking this course students will see how social media impacts business in many different ways and goes beyond simply using Facebook, twitter, or other popular social platforms for basic marketing purposes.

BMKT 3551 - RESEARCH IN MARKETING

Minimum Credits: 1.5

Maximum Credits: 1.5

The purpose of this seminar is to give you an overview of the foundations of marketing strategy research and familiarize you with recent marketing strategy research. Marketing strategy examines strategic decisions and actions taken by firms in various sub-areas within marketing, and integrates consumer-level perspectives as an input to marketing strategy. This seminar examines marketing strategy from a multidisciplinary perspective and utilizes theories emanating from economics, sociology, psychology, management, as well as marketing. There are many interesting levels of analysis in marketing strategy research, including individual, dyadic, group, firm, inter-organizational, and industry level. In addition, this seminar will introduce you to a variety of research designs and techniques for doing marketing strategy research. Each week we will cover literature on a specific topic.

Cardiothoracic Surgery

CTSURG 5461 - PEDIATRIC CARDIOTHORACIC SURGERY

Minimum Credits: 0

Maximum Credits: 0

Four-week elective with clinical experience on pediatric cardiothoracic surgery service. Student will actively participate in care of pediatric cardiac surgery patient and attend weekly med/surg cardiology conference. Covers types of congenital heart disease, physiology and patho-physiology and current methods of operative intervention for palliation or repair. Time can be spent participating in clinical or laboratory research in progress.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

CTSURG 5462 - ADULT CARDIAC SURGERY ACTING INTERNSHIP

Minimum Credits: 0

Maximum Credits: 0

This is a four-week (4) elective that offers a student clinical experience on the adult cardiac surgical service at UPMC

Presbyterian. The student will participate in the preoperative, intraoperative, and postoperative care of a variety of patients suffering from acquired cardiac diseases, including but not limited to coronary artery disease, valvular and aortic and end stage heart failure. The student will be expected to understand anatomic and physiologic concepts that will be reviewed from preoperative studies and available for intraoperative interpretation. Active participation in the operating room and ICU will be encouraged.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

CTSURG 5463 - ADULT THORACIC SURGERY

Minimum Credits: 0

Maximum Credits: 0

Students will be assigned to the thoracic service of UPMC. Participation will be in operative experiences, clinic setting and ward work. Focuses will be on benign and malignant surgical problems of the lungs, esophagus, mediastinum, chest wall and diaphragm. Students will be exposed to minimally invasive approaches including esophagostomy, lobectomy and others.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

CTSURG 5650 - INDIVIDUALIZED CLINICAL COURSE

Cell Biol & Molecular Physio

MSCBMP 2800 - MS THESIS RESEARCH

Minimum Credits: 1

Maximum Credits: 14

A directed research project which results in a thesis for a master's degree.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

MSCBMP 2840 - REGULATION OF MEMBRANE TRAFFIC

Minimum Credits: 2

Maximum Credits: 2

Course analyzes membrane/protein traffic along both the biosynthetic & endocytic pathways. Emphasis placed on how this traffic is regulated. Topics include the role of g-proteins (both heterotrimeric & small), coat proteins (coatamer 1 & 2 & adaptors), signal transduction cascades (pkc, pka, ip3, etc.), & Snare complexes in protein trafficking. Also, we will discuss the role of the cytoskeleton in transporting cargo & signal transduction. Membrane traffic in several specialized cell types will be covered including polarized epithelial cells, cells of the immune system, & neurons.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MSCBMP 2870 - HISTOLOGY

Minimum Credits: 5

Maximum Credits: 5

The objective of this lecture/lab course is student comprehension of the relationship between cell structure and organ function, and the application of this knowledge to the identification of light and electronmicroscopic images of cells and organs.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MSCBMP 2875 - EXPERIMENTS AND LOGIC IN CELL BIOLOGY

Minimum Credits: 1

Maximum Credits: 1

The purpose of experiments and logic in cell biology (ELCB) is to engage the students of the cell and molecular physiology graduate program in a self-directed seminar structured to stimulate the students' ability to think scientifically and critically as future scientists. The iterative, collaborative and collegial process of ELCB is the same used by teams of collaborating scientists to develop and solve biomedical projects.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

Course Requirements: PROG: School of Medicine (PMEDS)

MSCBMP 2880 - CELLULAR BIOLOGY OF NORMAL AND DISEASE STATES

Minimum Credits: 4

Maximum Credits: 4

This one-term course will explore the cellular basis of multiple disease states. The course, which meets twice a week (two hours each session), will be taught through both lecture and in class discussion of primary literature. Each of seven modules will examine normal cell biology and function and then define how defects in these processes lead to the spectrum of pathologies associated with each disease. Discussion of how bench top findings can be translated to treatments in the clinic will be facilitated by a diverse faculty that includes both basic and physician scientists. The seven modules are as follows: the first examines insulin secretion and signaling and how these events are perturbed in diabetes mellitus. The second module focuses on cell-cell adhesion and its role in cancer progression and epithelial barrier function. The third module defines how defects in endocytosis of the low-density lipoprotein receptor leads to hypercholesterolemia. The fourth analyzes the cellular basis of hypertension and how altered internalization of the epithelial sodium channel leads to elevated blood pressure. The fifth module investigates the role of apical membrane recycling and how defects in aquaporin-2 traffic leads to nephrogenic diabetes insipidus. The sixth module appraises the current state of our understanding of cystic fibrosis and how degradation of defective cystic fibrosis transmembrane conductance regulator by the quality control machinery in the endoplasmic reticulum and cell periphery leads to disease. The last module examines cell migration in wound healing and angiogenesis. At the end of the course students will have an increased understanding of normal cellular function and how research in cell biology can lead to a deeper understanding of diseases that impact millions of people each year.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

MSCBMP 2885 - IMAGING CELL BIOLOGY IN LIVING SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

The focus of this new course will be to study relevant problems in cell biology, immunology, developmental biology and neurobiology and how they have been solved using imaging approaches. For example at the cell level we will investigate how techniques such as TIRF and high speed confocal have addressed basic problems in endocytosis; at the organismal level we will use multiphoton, confocal, fret, and other approaches to understand aspects of cell biology in cell polarity, respiration and organ development in c. Elegans, Drosophila, Zebra fish and mice. In each case the application will focus on how imaging tools are used to study defined problems in living systems. The course will follow a lecture/demo/journal club format. Lectures will be two part, the first 1/3 will be a description of the technology, how it was developed and how it works (10-15 minutes) followed by description of the scientific problem and how it was solved. This will be followed by lab demonstrations showing the approach in action. Lectures will be interspersed with a journal club discussion of a relevant paper on each technology. Students will prepare the journal club presentations in an alternating fashion. Examination will be a combination of class participation, journal club and written exam.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MSCBMP 2890 - DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 9

This course provides the student an opportunity to carry out a specific laboratory project in any area of interest in cell biology or physiology.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Cell Biol & Molecular Physio (PHD) or Interdis Biomedical (UNK)

MSCBMP 2895 - CELLULAR PHYSIOLOGY OF THE KIDNEY

Minimum Credits: 2

Maximum Credits: 2

This summer course will provide an introduction to the kidney and lower urinary tract, with emphasis on kidney structure and function. The course, which meets once a week (two hours each session), will be taught through both lecture and in class discussion of the primary literature. Discussion of how bench top findings can be translated to treatments in the clinic will be facilitated by a diverse faculty that includes both basic and physician scientists. You will first learn about the specialized cell types that comprise the kidney and lower urinary tract. Subsequently, you will be introduced to renal stem cells and how they lead to kidney development. Next, you will learn the functions of the kidney, including regulation of water and ion balance. This will be followed by a discussion of the lower urinary tract. Finally, you will learn how drugs can be used to treat kidney dysfunction and how kidney transplants can be used to treat those patients with end-stage renal disease.

MSCBMP 3800 - PHD DISSERTATION RESEARCH

Minimum Credits: 1

Maximum Credits: 14

After advancement to candidacy for the Ph.D. degree, students enroll in this course to pursue original experimental laboratory research, the results of which will provide the substance of their doctoral dissertation. A minimum of forty credits of this course are required for the Ph.D. degree in the school of medicine.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

Course Requirements: PLAN: Cell Biol & Molecular Physio (PHD)

MSCBMP 3835 - DNA REPAIR JOURNAL

Minimum Credits: 1

Maximum Credits: 1

The course is a journal club on current topics in DNA repair as it relates to human disease, DNA damage processing, genome stability, telomere biology, cancer and aging. Primarily designed for students in the second year of their graduate program and beyond. Presentations will be held twice per month during the fall and spring semester. In order to receive credit for the course, students must attend a minimum of 80% of the sessions, present once per semester, participate in class discussion and complete anonymous peer-evaluations for each presenter. One week prior to presentation, presenters will identify a recent publication in the field and distribute it to their classmates. Presenters must define the hypothesis of the paper, provide background and significance, describe experimental methods used, interpret the data, conclude whether the data support the authors' conclusions and propose future experiments. Grades will be determined by attendance (10%), class participation (20%) and quality of presentation (70%).

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

MSCBMP 3840 - REPRODUCTIVE DEVELOPMENT FROM MODEL ORGANISMS TO HUMANS

Minimum Credits: 2

Maximum Credits: 2

This course focuses on the molecular aspects of the transition from gamete to a reproductive organism. The course progresses through the building of germ cells, fertilization and stem cell participation to sex determination, gonad morphogenesis, puberty, menopause and pregnancy. This course highlights both human and model organisms to bring together diverse aspects of the cell and developmental biology of reproductive tissues and their impact on disease pathology.

Grade Component: Grad SN Basis

MSCMP 2730 - MOLECULAR MECHANISMS OF TISSUE GROWTH & DIFFERENTIATION

Minimum Credits: 3

Maximum Credits: 3

The course covers the anatomy, embryology, histology, function, and growth regulation (growth factors, receptors, and signaling pathways) of various differentiated tissues (central nervous system, lung, liver, pancreas, urinary and reproductive systems, breast, endocrine system, skin, bone, skeletal muscle, bone marrow). Multidisciplinary lectures are given by the members of the departments of pathology, cell biology and physiology, medicine, and surgery who have ongoing research in these areas.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MSCMP 2740 - MOLECULAR PATHOBIOLOGY

Minimum Credits: 3

Maximum Credits: 3

Some representative of major disease categories (autoimmune, inflammatory, toxic, degenerative, infectious, genetic, and neoplastic) will be examined in terms of patient demographics (who), gross and microscopic morphology (what), and etiology/molecular mechanisms (why).

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MSCMP 2750 - RESEARCH SEMINAR

Minimum Credits: 1

Maximum Credits: 1

Students present their research, or a recent research article from a broad range of topics selected by the student in

consultation with a faculty advisor. The course meets weekly during which the student presents his/her research in progress or an article of his/her choice. Emphasis is placed on a careful analysis and critical evaluation of the manuscript as well as the development of teaching and speaking skills needed for scientific presentation. The student is expected to elucidate issues relevant to the topic and to answer questions from other graduate students and faculty.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

MSCMP 2760 - INTRODUCTION TO TISSUE ENGINEERING AND REGENERATIVE MEDICINE

Minimum Credits: 3

Maximum Credits: 3

The purpose of this course is to introduce students to the fields of tissue engineering and regenerative medicine. Tissue engineering is defined as the development and manipulation of laboratory-grown molecules, cells, tissues, or organs to replace and/or support the function of injured body parts. Regenerative medicine is a related and overlapping field, focusing on methods that enable the body to heal itself rather than using laboratory made constructs. Tissue engineering and regenerative medicine are highly interdisciplinary and therefore cross numerous engineering and medical specialties. Upon completing this course, the graduate and undergraduate students should: understand the basic principles behind human cell and tissue biology, be familiar with the general types of biomaterials used in tissue engineering and regenerative medicine, understand techniques utilized to design, fabricate, and functionally assess tissue engineered systems. Students should be able to apply the combined knowledge of tissue organization, tissue engineering and regenerative medicine strategies to design a unique, reasonable tissue engineered or regenerative solution to an unmet clinical need. This course covers cell and tissue biology, biomaterials, drug delivery, engineering methods and design, and clinical implementation.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

MSCMP 2770 - BIOMATERIALS AND BIOCOMPATIBILITY

Minimum Credits: 3

Maximum Credits: 3

Chemical and physical properties of Orthopaedic and Cardio Vascular Biomaterials, wear and corrosion of implant materials; fracture healing, inflammatory response; fixation and loosening of permanent implants; protein absorption; coagulation cascade, bacterial adhesion.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MSCMP 2780 - SPECIAL TOPICS

Minimum Credits: 3

Maximum Credits: 3

Students will focus on a selected topic in cellular and molecular pathology and write a paper under the direction of a faculty advisor.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SNC Basis

MSCMP 2790 - DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 9

This course provides the student an opportunity to carry out a specific laboratory project in any area of interest in cellular and molecular pathology.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Cellular & Molecular Pathology (PHD) or Interdis Biomedical (UNK)

MSCMP 2820 - SYNTHETIC BIOLOGY-ENGINEERING LIVING SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

An introduction to the engineering of biological systems with synthetic biology tools. Emphasis on synthetic biological networks and biological control. Design and analysis of computational and experimental tools in synthetic biology including microfluidic systems. Applications of synthetic biology in biomedical, chemical, and environmental engineering problems.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

MSCMP 3700 - PHD DISSERTATION RESEARCH

Minimum Credits: 1

Maximum Credits: 14

After advancement to candidacy for the Ph.D. degree, students enroll in this course to pursue original experimental laboratory research, the results of which will provide the substance of their doctoral dissertation. A minimum of 40 credits of this course are required for the Ph.D. degree in the school of medicine.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

MSCMP 3710 - CANCER BIOLOGY AND THERAPEUTICS

Minimum Credits: 3

Maximum Credits: 3

This course presents biochemical and clinical aspects of cancer biology and therapy, and is designed for graduate students training in the basic sciences or medicine. The lectures cover: the biology of normal and neoplastic cells, mechanisms of neoplastic transformation, chemical and environmental carcinogenesis, viral oncogenesis, breast and prostate cancer, chemotherapy, radiotherapy, gene therapy, tumor immunology, and nutrition and cancer.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MSCMP 3715 - BIOINF CANCER BIOL & THERPUTCS

Minimum Credits: 1

Maximum Credits: 1

Reading and discussion on bioinformatics resources available to enhance research on cancer biology and therapeutics. We will discuss bioinformatics databases and other resources related to: regulatory networks and signal transduction pathways, genes associated with cancer risk and the progression of cancer; cytogenomics, sources of information on the distribution of cancer occurrence and trends in the us population, databases DNA repair genes, their structure &

function, models of cancer progression & responses to therapy, biomarkers for cancer detection, treatment & prevention.

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

MSCMP 3730 - TOPICS IN EXPERIMENTAL NEUROPATH

Minimum Credits: 1

Maximum Credits: 1

This course critically evaluates the latest scientific literature concerning diseases of the central nervous system. Emphasis will be placed on methodologies as they are applied to the study of human neurologic diseases. Participants will present their own research data or scientific papers and lead the classroom discussions. This course is open to students of all levels and will include both basic scientists and clinicians (residents, faculty).

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

MSCMP 3735 - EXTRACELLULAR MATRIX IN TISSUE BIOLOGY AND BIOENGINEERING

Minimum Credits: 3

Maximum Credits: 3

Extracellular matrix (ECM) is an important structural and signaling component of all tissues. It plays a defining role in how differentiated cells and tissues respond to homeostatic signals, tissue regeneration, response to inflammation, and wound healing. Indeed one can generalize and state that there is no aspect of the biology or function of any given tissue in which ECM does not play an important role. The objective of the proposed course is to bring to students the knowledge of fundamental aspects of ECM, its importance for tissue function and its potential use in bioengineering applications. The course will start by providing information about structure and gene expression regulation of the main protein and glycosaminoglycan components of ECM. This will be followed by lectures describing the mechanisms by which ECM components interact with their receptors (integrins) and the intracellular signaling cascades and multiple protein allosteric interactions mediating the transmission of the signal from integrins to multiple intracellular targets affecting cell proliferation, function and cell-cell communication. TGF-beta is an important regulator of ECM synthesis and a special lecture will be devoted to gene regulation of ecm components and the role of TGF-beta. Subsequent lectures will focus on histologic techniques for visualization of ECM and specific tissue examples in which ECM changes define a particular biological model. ECM is known to be remodeled early in liver regeneration and re-synthesized at the end of the regenerative process. ECM signaling is defining the regulation of liver size and termination of regeneration. This will provide an example to illustrate the multifaceted aspects of ecm and cell interaction in a well-known model of tissue biology. Specific targeted lectures will also be given on ECM in wound healing, and repair of tissue in central nervous system, bone and cartilage. ECM is important as a potential barrier for cancer invasion. The mechanisms by which cells invade ECM will be examined in the context of cancer and also in the context of organ building and tissue morphogenesis in embryonic development. The cellular approaches utilizing ECM in bioengineering and tissue reconstruction will be also presented. These will include preparation of decellularized organs (a technique currently applied to liver with partial success in cell recolonization); functions of hyaluronic acid in tissue reconstruction and aspects of its signaling; ECM in vascular reconstruction, and biology of joints; ECM in muscle biology and reconstruction. The course is addressed to graduate students of the interdisciplinary biomedical science program of the school of medicine as well as the bioengineering graduate program. We are expecting a roughly equal proportion of students from those two groups in a class of 20 students. Even though both groups of students are highly sophisticated, particular attention will be given to ensure that the differences in backgrounds do not interfere with assimilation of the fundamental concepts imparted from the lectures. It is also anticipated that some of the concepts to will be presented will be summaries of a vast amount material of biomedical literature. To facilitate full development of lectures and topics which chose a format of 1.5 hours per lecture, to give the lecturers the opportunity of covering all relevant issues in proper depth. To our knowledge, there is no comparable course fully dedicated to

ECM biology and bioengineering applications in either the school of medicine or the bioengineering curriculum. It should also be noted that the reviewers of the Cater Training grant noticed the absence of such a course and expressed a desire to have one developed. We believe this course will be important in generating an interest and a depth of knowledge in issues related to matrix biology as well as support the mission of the cater training grand.

Academic Career: Graduate

Course Component: Lecture

MSCMP 3740 - STEM CELLS

Minimum Credits: 3

Maximum Credits: 3

The course will provide a comprehensive overview on this intriguing and timely topic. The course will focus on the biology of stem cells and their role in health and disease with emphasis on development, carcinogenesis, aging and tissue engineering. Lectures on various aspects of stem cells from renowned experts will cover embryonic, adult, and induced pluripotent stem cells. Specific lectures will include stem cells in the blood, placenta, bone, liver, brain, adipose, pancreas, gonads, lung, gut, skin, breast, dental/oral tissues and eye. Students will also be educated on therapeutic cloning, bio-ethical issues, synthetic and systems biology, and existing laws governing stem cell research. Please note that this is now a required course for the CATER Program.

MSCMP 3760 - REGENERATIVE MEDICINE RESEARCH SEMINAR

Minimum Credits: 1

Maximum Credits: 1

The seminar in regenerative medicine provides exposure to cutting-edge research in the broad fields of regenerative medicine, tissue engineering, and synthetic biology. The course blends lectures by experienced faculty, work-in-progress talks by graduate students, and professional development seminars (e.g., alternative careers in science, grant writing, and scientific communication). Lectures are held approximately twice per month, and student engagement is strongly encouraged. Grades are based on attendance and participation.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

MSCMP 3770 - CELL THERAPY

Minimum Credits: 3

Maximum Credits: 3

This course is meant to be unlike any other graduate course. This course showcases cell therapy from theory to practice, from the bench to the bed-side. In each area of cell transplantation lectures are provided by those who have implemented cell transplantation techniques and have moved it to a clinical therapy. Most of the lectures in the course are given by those who actually do the patient transplants. Immunology and pharmacology and cellular engineering&Edition will be addressed as it directly relates to cellular therapy. Stem cell biology will not be addressed individually, but will be raised in the context of specific applications. It is expected that students will be independently exposed to these related areas in other courses.

MSCMP 3780 - SYSTEMS APPROACH INFLAMMATION

Minimum Credits: 2

Maximum Credits: 2

This course is focused on particular topics of great biologic complexity in critical illness, where modeling has the potential to translate in improved patient care. Lectures are provided by basic (biological and mathematical sciences) and clinical faculty, in conjunction with members of industry and speakers from outside institutions. This information will be communicated within the framework of defined themes that describe the complexity of inflammation in acute and chronic illnesses.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MSCMP 3790 - BASICS OF PERSONALIZED MEDICINE

Minimum Credits: 3

Maximum Credits: 3

Personalized medicine is becoming a reality that is being driven by ongoing discoveries in cell biology, genomics, proteomics, and metabolomics. The translational speed of these discoveries, particularly in the diagnostic, prognostic, and theragnostic arenas, is rapid. We believe that in the future personalized medicine diagnostics will involve both physicians and basic scientists. A major obstacle to this approach is the lack of training components for basic scientists in this area. This course aims to close that gap and provide an appreciation for, and understanding of, key principles of clinical development and testing in order to help bridge this gap. The course will be designed to delve into concepts of personalized medicine using focused topic areas. The first week will introduce the principles and overriding concepts of clinical test development, which differ qualitatively from investigational research. Next there will be six 2-week sessions, with each section focusing on a separate testing modality. Topics will include inherited genetic diseases and predispositions, acquired genetic changes (cancer), metabolomic profiles of endocrine diseases, immune networks for transplant and rejection, proteomic profiling in blood disorders, and proteomic detection of shock and organ failure.

CHE 2016 - FUNDAMENTAL PRINCIPLES OF BIODEGRADABLE METALLIC ALLOYS

Minimum Credits: 3

Maximum Credits: 3

Biodegradable metals have emerged as a new class of materials with significant potential for myriad biological applications, in particular, the craniofacial, orthopedics and cardiovascular areas. The latter has already witnessed clinical trials with few patients already being implanted with a biodegradable metallic stent. This course is designed to introduce the principles and various fundamental concepts of this novel class of metallic alloys. These include fundamental principles of metal alloy physics and theory, important concepts of phase diagrams, physical metallurgy concepts, metallic glass theory, processing fundamentals, biocompatibility, and toxicity issues. The effect of microstructure on biocompatibility and corrosion will also be discussed. The course objective is to introduce the student to this new family of bio-functional metals and their biodegradable properties. In doing so, the student will be familiar with these materials and their useful applications. The students are expected to have had courses in thermodynamics and physiology.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Graduate School of Engineering

CHE 2017 - CHEMICAL ENERGY AND THE NATURE OF THE CHEMICAL BOND

Minimum Credits: 3

Maximum Credits: 3

An overview of energy transformations arising from chemical bonding in chemical catalysis, electrocatalysis, and combustion. Students will be introduced to qualitative quantum chemistry concepts: potential energy and kinetic energy operators, wave functions, electron correlation, and GVB diagrams for analysis of chemical bonds and molecular structures in energy transformations. Students are expected to have completed Undergraduate physical chemistry course on quantum mechanics or equivalent or have prior consent from the instructor.

Academic Career: Graduate

Course Component: Lecture

CHE 2018 - INTRODUCTION TO SURFACE ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

Surface and interface engineering is critical to many important applications, e.g., coating, composite, biomedical device and membrane. With the fast growth of nanotechnology, understanding the surface properties becomes even more important since nano-sized materials, e.g., graphene, have no bulk phase but surfaces. This course combines elements of physical chemistry and materials of surface and interface in order to serve as the introduction to the surface engineering. The course spans from surface tension, capillary, superwettability to lubrication as well as 2D materials, allowing a comprehensive view to both classic surface science and cutting-edge surface technology. By the end of this class, students will understand both the fundamental principles of surface science and engineering approaches on tailor a given solid surface.

CHE 2475 - STATISTICS AND COMPUTATIONAL METHODS FOR SYS BIO

Minimum Credits: 3

Maximum Credits: 3

Statistics and computational modeling are major drivers of the modern economy and critical tools for discovery in scientific research. These two fields are linked in a common goal: how do we make competent decisions in uncertain, complex, and connected environments? With the rapid expansion of machine learning technologies, it has become incredibly important for engineers and scientists to understand the basic methods underlying these algorithms and to be able to critically assess algorithm performance. This course will cover the basic theory and application of three related areas: statistics, dynamic simulation and machine learning classification. While theory will be discussed, the proper application of these tools and the methods for critically analyzing the results will be the primary focus of the course. The statistical and computational tools to be discussed are agnostic in their application, important to all research areas. However, in the course, the application of these tools will be to problems in biology and medicine. By the end of the course, students will be able to identify the proper statistical tests to be used for various scenarios, be able to develop customized tests for non-standard data types (bootstrapping), understand the computational challenges related to dynamic simulations of nonlinear systems, and be able to apply and evaluate off-the-shelf machine learning algorithms.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

CHE 2540 - PRACTICAL ELECTROCHEMISTRY

Minimum Credits: 3

Maximum Credits: 3

This graduate-level elective focuses on the practice of electrochemistry in laboratory analysis and in a wide range of technological applications. We will begin with a brief overview of the fundamentals of electrochemistry in terms of thermodynamics, kinetics, and transport processes. We will then dive immediately into practical concepts with a survey of laboratory methods and technological/industrial applications of electrochemistry.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

CHE 2545 - PROCESS INTENSIFICATION - REACTION ENGINEERING FOR THE 21ST CENTURY

Minimum Credits: 3

Maximum Credits: 3

Process Intensification is an emerging trend in reaction engineering that aims to replace existing large-scale chemical processes with smaller, often modular, units with substantially reduced physical footprint and capital cost, and dramatic reductions in energy intensity, improvements in process efficiency and process safety, and reduction or complete elimination of waste streams. At its heart, PI thus aims not for incremental improvements but rather for a paradigm change in chemicals manufacturing and processing "by rethinking existing operation schemes into ones that are both more precise and efficient than existing operations" (DOE, 2015). While the roots of PI can be traced back half a century into the 1970s, it has taken on new significance in recent years as a critical enabling approach for the design of more sustainable chemical industry in particular in the context of 'decarbonizing' and 'electrifying' the chemical industry. In this course, we will discuss the fundamental engineering concepts underlying process intensification and then proceed to explore novel, "intensified" process equipment and process operation schemes across the chemical industry.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: CHE 0400

CHE 2550 - SOLVING ENGINEERING PROBLEMS WITH COMPUTATIONAL CHEMISTRY

Minimum Credits: 3

Maximum Credits: 3

This course will discuss theoretical and computational methods in chemistry and their applications to chemical engineering problems. Emphasis will be given on performing computational chemistry calculations for the prediction of chemical structures, properties, reaction mechanisms, etc., connecting molecular with macroscopic level behavior. This course will keep a balance between lectures on basic computational chemistry theories/models and hands-on experience with computational chemistry calculations. Students will have a class project, and will be encouraged to identify a project related to their own research interests.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

CHE 2600 - PRINCIPLES AND PROPERTIES OF COMPLEX ENGINEERED MATERIALS

Minimum Credits: 3

Maximum Credits: 3

Complex engineered materials are a new class of systems comprising a variety of inorganic materials. This course is designed to introduce the principles and various functional properties exhibited by inorganic materials at the Nano, Micro and Meso scales. Since inorganic materials comprising metallic and non-metallic systems are a very complicated

class of materials that display myriad properties, this course is outlined to discuss the most important properties. Thus, the course will mainly cover optical, electrical, thermal and electrochemical properties of both crystalline and amorphous inorganic complex engineered materials. In each category, the principles underlining each property will be discussed followed by the material class, behavior and applications. The effect of microstructure on each of the properties will also be discussed. The course objective is to introduce the student to these complex engineered materials family and their properties. In doing so, the student should be able to identify a material for a particular application.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

CHE 2631 - DESIGN FOR CIRCULAR ECONOMY

Minimum Credits: 3

Maximum Credits: 3

The current linear consumption model of raw material extraction, production, use, and disposal has dominated the global economy for hundreds of years. While an extremely wasteful approach to resource management, the linear model was tractable so long as it was employed by a small fraction of the global population, namely the developed world, so that both raw material acquisition and waste management remained economically viable. Today, we clearly see that this linear model has led to serious unintended global consequences. Circular economy (CE) offers promising solutions. CE principles are based on efficient use of resources and eliminating waste from product life cycles through clever design. Valuable material either moves in loops through the economy, or, if biologically derived, returns to the ecosystem to serve as nutrients; a truly circular economy thus keeps material in continuous use by design. The goal of this course is to provide students a thorough introduction to circular economy, along with integrating design. This course will provide students with skills and knowledge related to CE. Through experiential and project-based learning, the students will develop circular economy affinity groups that will tackle a pressing challenge including design for degradation solutions for ocean plastics and design for reuse of construction materials.

Academic Career: Graduate

Course Component: Lecture

CHE 2900 - GRADUATE FELLOWSHIPS AND PROPOSAL-WRITING WORKSHOP

Minimum Credits: 1

Maximum Credits: 1

This workshop will provide information and guidance to students interested in competing for external fellowships to support their graduate research, as well as instruction on proposal writing in general. The workshop will consist of structured class time and outside-the-class mentoring teams to work with students on the preparation of a fellowship application.

Academic Career: Graduate
Course Component: Workshop
Grade Component: Grad SN Basis

CHE 2910 - SPECIAL PROJECTS

Minimum Credits: 1

Maximum Credits: 12

Individual study programs at MS Level.

Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad Letter Grade

CHE 2980 - MS RESEARCH METHODOLOGY

Minimum Credits: 1

Maximum Credits: 1

This course involves the discussion and application of research methodology important for the successful completion of MS thesis research.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

CHE 2982 - ISSUES IN RESEARCH AND TEACHING

Minimum Credits: 2

Maximum Credits: 2

This course will present to graduate students issues relating to safety, ethics in science, and research methods. Topics in scientific writing, data analysis and oral presentation skills will be discussed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

CHE 2999 - M.S. THESIS

Minimum Credits: 1

Maximum Credits: 15

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

CHE 3001 - GRADUATE SEMINAR

Minimum Credits: 1

Maximum Credits: 1

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad SN Basis

Course Requirements: PROG: Swanson School of Engineering

CHE 3004 - PRACTICUM

Minimum Credits: 1

Maximum Credits: 1

This course is designed to provide students who are engaged in thesis or dissertation research an opportunity to participate in an internship with an external organization. The internship must be related to the thesis or dissertation research.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad SN Basis

Course Requirements: PROG: Swanson School of Engineering

CHE 3910 - INDIVIDUAL STUDY

Minimum Credits: 1

Maximum Credits: 3

Individual study program at Ph.D. Level.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad Letter Grade

CHE 3980 - PHD RESEARCH METHODOLOGY

Minimum Credits: 1

Maximum Credits: 1

This course involves the discussion and application of research methodology important for the successful completion of Ph.D. dissertation research.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

CHE 3990 - ADVANCED GRADUATE PROJECTS

Minimum Credits: 1

Maximum Credits: 15

Preliminary work for Ph.D. Dissertation.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

CHE 3999 - PH.D. DISSERTATION

Minimum Credits: 1

Maximum Credits: 15

Academic Career: Graduate

Chemistry

CHEM 2000 - RESEARCH AND THESIS MS DEGREE

Minimum Credits: 1

Maximum Credits: 12

Course designed to be taken by master's degree students who are writing their thesis.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

CHEM 2090 - SEMINAR IN CHEMISTRY

Minimum Credits: 1

Maximum Credits: 1

This course is created for graduate students to register for their thesis seminar when they do not declare a division or do not satisfy divisional requirements. Only students planning to present a seminar should register for this course. Others may attend without registering.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

CHEM 2110 - CHEMICAL SYMMETRY: APPLICATIONS IN SPECTROSCOPY AND BONDING

Minimum Credits: 3

Maximum Credits: 3

Group theory and molecular symmetry, with emphasis on their application to the theoretical aspects of bonding in inorganic and organometallic complexes, as well as to the experimental techniques (electronic, vibrational, and photoelectron spectroscopy) typically used to elucidate the nature of intramolecular interactions.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

CHEM 2120 - DESCRIPTIVE INORGANIC AND ORGANOMETALLIC CHEMISTRY

Minimum Credits: 3

Maximum Credits: 3

This course is intended to provide a solid background in modern inorganic chemistry for those doing research in all branches of chemistry. Much of the course material is descriptive, but the objective of the selection and presentation of the material will be to develop an understanding of the principles controlling the structures and reactivity of inorganic materials. Aspects of all areas of inorganic chemistry will be discussed, including main group, transition metal, and organometallic chemistry.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

CHEM 2130 - PHYSICAL METHODS IN INORGANIC AND MATERIALS CHEMISTRY

Minimum Credits: 3

Maximum Credits: 3

Inorganic and materials chemistry encompasses vast classes of chemical compounds spanning the solution and solid state which necessitate a diverse collection of physical characterization methods for understanding their chemical constitutions, structures, and physical properties. This course presents the most common and relevant methods of characterization from both a theoretical and practical perspective, which are introduced in the context of topical areas in inorganic and materials chemistry.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

CHEM 2180 - INORGANIC CHEMISTRY

Minimum Credits: 3

Maximum Credits: 3

Modern bonding theories are developed to the level that permits some understanding of the effects of structure and bonding on chemical properties. Periodic relationships are discussed and applied to selected families of elements. Emphasis is placed on those aspects of structure, bonding and periodic relationships that are helpful in unifying a large body of chemical knowledge. Selected topics of current interest in inorganic chemistry are discussed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

CHEM 2190 - SEMINAR IN INORGANIC CHEMISTRY

Minimum Credits: 1

Maximum Credits: 1

Only students planning to present a seminar should register for this course. Others may attend without registering.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

CHEM 2210 - ELECTROANALYTICAL CHEMISTRY

Minimum Credits: 3

Maximum Credits: 3

Fundamental electrode processes common to all electrochemical cal methods; thermodynamics and kinetics of electrode processes; reaction coordinate diagrams for faradaic currents; exchange current and activation polarization; non-faradaic currents and electric double layer. Mass transfer processes. Linear sweep, cyclic and pulse voltammetric methods and their application to analysis as well as the study of reaction mechanisms and problems in battery technology, electrocatalysis, photovoltaic cells and chemically modified electrodes.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

CHEM 2220 - CHEMICAL SEPARATIONS

Minimum Credits: 3

Maximum Credits: 3

A broad thermodynamic and kinetic framework encompassing all chemical separations is used to classify techniques. Concepts such as separation efficiency are generalized. The most powerful and widely used separations techniques are chromatographic, thus solution chemistry will be discussed to provide a chemical framework for chromatography. The use of gas and liquid chromatography will be presented.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

CHEM 2230 - ANALYTICAL SPECTROSCOPY

Minimum Credits: 3

Maximum Credits: 3

This course will be broken into two sections. In the first section we will discuss different components of spectrometers, with a focus on optical spectroscopy. In the second section we will focus on understanding what we can learn from using spectroscopy and what sort of dynamical processes can be observed with different spectroscopic techniques. Topics to be covered include: spectrometer design, selection rules, line shapes, time-dependent perturbation theory, and the time-dependent approach to spectroscopy.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

CHEM 2240 - MASS SPECTROMETRY

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

CHEM 2290 - SEMINAR IN ANALYTICAL CHEMISTRY

Minimum Credits: 1

Maximum Credits: 1

Only students planning to present a seminar should register for this course. Others may attend without registering.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

CHEM 2310 - ADV ORGANIC CHEMISTRY 1

Minimum Credits: 3

Maximum Credits: 3

A qualitative discussion of modern mechanistic interpretations of relations between structure and reactivity. Special emphasis is placed on the roles of reactive intermediates such as Carbonium ions, carbanions, carbenes and radicals. Study of the factors that influence the equilibria and reaction mechanisms of organic molecules.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

CHEM 2320 - ADV ORGANIC CHEMISTRY 2

Minimum Credits: 3

Maximum Credits: 3

A course designed to cover modern synthetic methods for the assembly of complex organic molecules (stereospecific olefin synthesis, cycloaddition reactions, sigmatropic rearrangements, organometallic chemistry, natural product synthesis).

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

CHEM 2330 - ORGANOMETALLIC CHEMISTRY

Minimum Credits: 2

Maximum Credits: 2

A single-semester two-credit lecture course focusing on the mechanistic and synthetic aspects of state-of-the-art organometallic chemistry will be offered. Understanding how organometallic structure and electronics influence reactivity patterns will provide students with predictive tools for interpreting and exploiting organometallic reactivity. The course will focus on the thermodynamics, kinetics and stereoselectivity of main group- and transition metal-mediated reactions having applications in organic synthesis.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

CHEM 2370 - SYNTHETIC ORGANIC CHEMISTRY

Minimum Credits: 2

Maximum Credits: 2

This early graduate level course builds onto sophomore organic I and II courses by applying the learned principles to the synthesis of FDA-approved drug molecules. The emphasis of the course will be on analyzing the molecular structures of drugs in a retrosynthetic fashion, followed by developing suitable synthetic routes to these molecules. The

reaction mechanisms of key steps of these syntheses will be discussed in detail. Further discussion will include fundamental functional group interconversions, chemoselectivity, and protecting group use, enantioselective synthesis, and organometallic chemistry. Students will learn about the complexities of modern drug molecules, how their structures can be analyzed, and how they are synthesized.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

CHEM 2380 - TECHNIQUES OF ORGANIC RESEARCH

Minimum Credits: 2

Maximum Credits: 2

A course which serves as a guide to the interpretation of ultraviolet, infrared, nuclear magnetic resonance and mass spectra of organic compounds.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

CHEM 2390 - SEMINAR IN ORGANIC CHEMISTRY

Minimum Credits: 1

Maximum Credits: 1

Only students planning to present a seminar should register for this course. Others may attend without registering.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

CHEM 2430 - QUANTUM MECHANICS AND KINETICS

Minimum Credits: 3

Maximum Credits: 3

Basic quantum mechanics, with emphasis on the theory of chemical structure and dynamics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

CHEM 2440 - THERMODYNAMICS & STATISTICAL MECHANICS

Minimum Credits: 3

Maximum Credits: 3

Development of equilibrium statistical mechanics and thermo dynamics. Applications to chemical systems. These applications include solutions, phase transitions (Ising Model) and reaction theory.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

CHEM 2490 - SEMINAR IN PHYSICAL CHEMISTRY

Minimum Credits: 1

Maximum Credits: 1

Only students planning to present a seminar should register for this course. Others may attend without registering.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

CHEM 2600 - SYNTHESIS & CHARACTERIZATION OF POLYMERS

Minimum Credits: 3

Maximum Credits: 3

Synthesis and characterization of polymers is focus of course. Current methods of polymer synthesis will be surveyed, practical implementation of reactions and kinetic consequences of reaction strategies in homopolymer, copolymer and block copolymer synthesis. Techniques for characterization of polymer molecular weight, chemical composition, and stereochemistry (FT-IR, NMR, other spectroscopic and chemical methods) will be discussed. Brief treatment of polymer solution thermodynamics and selected topics in polymer chemistry will be discussed.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 2620 - ATOMS, MOLECULES AND MATERIALS

Minimum Credits: 3

Maximum Credits: 3

This course will use qualitative molecular orbital theory to understand the design and performance of new materials. A link will be made between "small molecule" intuition and the solid-state perspective on large molecules, clusters and solids.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 2700 - GRADUATE RESEARCH SEMINAR

Minimum Credits: 0

Maximum Credits: 0

Seminar given by faculty on graduate research opportunities in chemistry. This course is designed especially to help students in their selection of a research adviser.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad SN Basis

CHEM 2710 - CHEMISTRY RESEARCH ROTATION EXPERIENCE

Minimum Credits: 1

Maximum Credits: 1

First year graduate students will spend a term carrying out research in various laboratories in order to make a well informed decision about choosing a PhD research adviser.

Academic Career: Graduate
Course Component: Credit Laboratory
Grade Component: Grad LG/SNC Basis

CHEM 2810 - BIOLOGICAL CHEMISTRY 1

Minimum Credits: 3

Maximum Credits: 3

This course considers the chemical properties of amino acids, oligopeptides, and proteins; the biosynthesis of proteins; the physical interactions that determine the properties of proteins; the conformational properties of polypeptide chains and biomacromolecules, integral membrane proteins and ion channels; interactions between proteins and other molecules; enzyme kinetics; catalytic antibodies; and biosynthesis of small molecules.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

CHEM 2820 - BIOLOGICAL CHEMISTRY 2

Minimum Credits: 3

Maximum Credits: 3

This course will discuss select biological systems and problems and the chemical tools that are being developed in order to study and address them. In addition to an introduction to cell biology and molecular and cell biological techniques, topics may include: conditional control of gene editing, forward and reverse chemical genetics, sensors of cellular processes, protein bioconjugation, small molecule inhibitors of kinase function, activity-based probes, small molecule dimerizers of proteins, and targeted protein degradation. This will lead to the following expected learning outcomes: basics of cell biology, biological techniques and vocabulary relevant to the field of chemical biology, important research topics and research areas in the field of chemical biology, navigating and critical reading of chemical biology primary articles and review articles, and knowledge of key labs that are major contributors to the field of chemical biology.

CHEM 3001 - PREPARATION FOR THE STEM CLASSROOM

Minimum Credits: 1

Maximum Credits: 1

PREPARATION FOR THE STEM CLASSROOM

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

CHEM 3002 - ADVANCED LEARNING THROUGH EVIDENCE-BASED STEM TEACHING

Minimum Credits: 1

Maximum Credits: 1

This course consists of a MOOC offered by Coursera, jointly developed at Boston University, Vanderbilt, Michigan State and Wisconsin-Madison, combined with in-person class meetings of the local learning community at the University of Pittsburgh. Students will meet with the facilitator for the course, Dr. Mary Besterfield-Sacre, four times during the semester to go over the material in the online sessions, and to relate it to their teaching experiences in labs, discussions, and classrooms. The course will draw on the expertise of experienced stem faculty, educational researchers, and staff from University teaching centers, many of them affiliated with the center for the integration of research, teaching and learning (CIRTL), a network of 22 research universities collaborating in the preparation of stem graduate students and post-docs as future faculty members.

Grade Component: Grad LG/SNC Basis

CHEM 3380 - ORGANIC GROUP MEETING

Minimum Credits: 1

Maximum Credits: 1

A weekly meeting to discuss the most recent advances in organic chemistry.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

CHEM 3390 - SYNTHETIC ORGANIC COLLOQUIUM

Minimum Credits: 1

Maximum Credits: 1

A weekly workshop on current synthetic organic chemistry literature and state of the art research.

Academic Career: Graduate

Course Component: Colloquium

Grade Component: Grad LG/SNC Basis

CHEM 3450 - MOLECULAR MODELING AND GRAPHICS

Minimum Credits: 3

Maximum Credits: 3

This course will introduce the student to computational methods to determine molecular structures and stabilities, Monte Carlo and Molecular Dynamics Simulation Methods, and the use of graphics for displaying structures, charge densities, and other properties. Use will be made of both microcomputers and the Cray XMP at the Pittsburgh Super Computing Center.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

CHEM 3460 - INTRO MODERN COMPUTATIONAL SCI

Minimum Credits: 3

Maximum Credits: 3

This course will emphasize the application of microcomputers and numerical methods for solving problems of importance in chemistry. Methods to be studied include solving systems of linear and differential equations, least squares fitting, eigenvalue problems, solution of nonlinear equations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

CHEM 3700 - SCIENTIFIC PROPOSAL WRITING

Minimum Credits: 1

Maximum Credits: 1

Academic Career: Graduate

Course Component: Seminar

Chinese

CHIN 2000 - RESEARCH AND THESIS MA DEGREE

Minimum Credits: 1

Maximum Credits: 6

This course recognizes work performed in the course of preparing the thesis.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

Course Attributes: Asian Studies

CHIN 2025 - ASPECTS OF THE CHINESE LANGUAGE

Minimum Credits: 3

Maximum Credits: 3

Aspects of the Chinese language will offer a linguistic introduction to Chinese. No prior knowledge of linguistics is assumed although familiarity with linguistic analysis is a plus. The Chinese language is substantially different from English or other Indo-European languages. It is also distinct from some other East Asian languages. For instance, it has a logographic writing system and is a tonal language. Its word order is more flexible than English and is a topic-prominent language. It does not have rich grammatical inflections but has a limited number of aspectual markers. The course serves the following purposes: (1) introduce the basic facts of the Chinese language including its development, the phonology, morphology, the semantic and syntactic aspects of Mandarin Chinese, and the interactions of the language with Chinese culture and the society; (2) introduce elementary linguistic concepts relevant to Chinese to enable students to use the right tool to describe and critically analyze the features of a language; (3) encourage students to reflect on their language learning experience or knowledge of other languages to conduct reasoning, such as analyzing the sources of difficulty in their studying of Chinese; (4) to inspire interest in a range of topics including differences in modern and classical Chinese, philosophical belief embodied in the language, Chinese culture manifested in the language (such as the notion of politeness, face, etc.), and to lay a foundation for further studies in linguistics as well as in those relevant topics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

CHIN 2027 - CHINESE AS A SECOND LANGUAGE AND BILINGUALISM

Minimum Credits: 3

Maximum Credits: 3

The course introduces students to research methods and findings on Chinese as a Second Language (CSL) and it familiarizes students with pedagogical and issues of learning in CSL. The course content includes (1) linguistic perspectives of CSL and second language learners' grammatical knowledge development, including how key structures are acquired and typically dealt with in language classroom; (2) psycholinguistic experimental methods and cognitive development of bilingual speakers of Chinese and English, including in character recognition/production, vocabulary acquisition, morphological awareness development, etc.; (3) corpus approaches in CSL and applications; (4) pragmatics in L2 Chinese; (5) other CSL topics such as learner motivation, Chinese as a heritage language, proficiency assessment, and technologies in CSL. The course will use a combination of lectures, discussions, and presentations. Class will be conducted largely in English, while enrolled students are expected to have an intermediate or above level Chinese proficiency.

CHIN 2045 - THE CHINESE WRITING SYSTEM IN EAST ASIA

Minimum Credits: 3

Maximum Credits: 3

The Chinese script is presumed to be difficult to the untrained eye, but much of the myth lies in misunderstandings or misinformation. The course will introduce students to the Chinese writing system through historical and applied linguistic perspectives, and it will provide opportunities of discussion on how the Chinese script influences topics in anthropology, arts, education, and politics in the East Asian region. Students will gain foundational knowledge

regarding the linguistic features of the Chinese writing system, including its historical development, acquire an insight into the cultural aspect of the script, and be challenged to apply such knowledge to make critical inquiries on the relationship between the writing system and literacy development, cognitive science, visual arts, and society.

CHIN 2047 - CHINESE AND WESTERN POETRY

Minimum Credits: 3

Maximum Credits: 3

A comparative study of Chinese and Western lyric poetry. This course explores the world of feeling as expressed in the poetry of two vastly different worlds: china and the West and focuses on the language of feeling in a poetic medium. The purpose of this course is to appreciate how differences between the two poetic traditions is essential to a better understanding of the two cultures.

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Attributes: Film Studies

CHIN 2083 - MASTERPIECES OF CHINESE LITERATURE: PREMODERN

Minimum Credits: 3

Maximum Credits: 3

This course is devoted to the study of Chinese literature from ancient times to the end of the 19th century. Lectures and readings include prose (historical, philosophical and literary texts, legends and myths of the remote past, anecdotes, short stories and fantastic tales of ghosts and love) and poetry (from the book of songs to the poetry of the T'ang and Sung periods).

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHIN 2084 - MASTERPIECES OF CHINESE LITERATURE: MODERN

Minimum Credits: 3

Maximum Credits: 3

A critical analysis of some of the most representative literary works in modern China from a literary and socio-political perspective.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Attributes: Film Studies

CHIN 2085 - INTRODUCTION TO EAST ASIAN CINEMA

Minimum Credits: 3

Maximum Credits: 3

This course investigates the ways in which film addresses and treats the major socio-cultural issues in modern society through a critical study of the works of Chinese and Japanese master filmmakers. The course focuses on changes in marriage and family patterns, women's roles and the plight of youth.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHIN 2086 - LOVE IN CHINESE AND WESTERN LITERATURE

Minimum Credits: 3

Maximum Credits: 3

The course will explore and compare expressions of love in Chinese and Western literature. The course will examine a succession of theories and ideas of love such as platonic, religious, courtly, romantic and post-romantic from the Western tradition; love in Confucianism, Mohism, Taoism, and Buddhism.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Attributes: Gender, Sexuality & Women's Studies

CHIN 2088 - NEW CHINESE CINEMA

Minimum Credits: 3

Maximum Credits: 3

Students will study Chinese films made by filmmakers of mainland China and Taiwan. They will learn about origins, development, themes, and styles with major directors and important films of new Chinese cinema being studied. Students will have an opportunity to understand contemporary Chinese culture and society.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHIN 2089 - THE WORLD OF CHINA

Minimum Credits: 3

Maximum Credits: 3

Various topics are covered.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

CHIN 2090 - GREAT MINDS OF CHINA

Minimum Credits: 3

Maximum Credits: 3

First segment on Confucianism, including the Analects and Mencius, will be studied with relevant commentaries, stressing implications for Chinese culture, especially in ethical and socio-political dimensions. Second segment on Taoism, Lao Tzu and Chuang Tzu, will be studied with emphasis on impact on the arts and literature. Final segment on Buddhism will concentrate on representative sutras of the tradition, Diamond Sutra and texts from the Chan (Zen) masters.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

CHIN 2700 - CHINESE TRANSLATION THEORY AND PRACTICE

Minimum Credits: 3

Maximum Credits: 3

This course is intended for speakers of English who possess advanced Chinese proficiency. It is an overview of theory and practice of translation from Chinese to English, including the training on hands-on translation practices. Students will use real-life translation materials such as news articles, legal documents, commercial flyers, financial reports, and technical manuals to simulate a professional translation process. Basic techniques and strategies that are practiced commonly in the translation field will be introduced and further reinforced through lectures, and research and analysis of Chinese-English bilingual websites.

Minimum Credits: 3
Maximum Credits: 3
This course focuses on materials science topics relevant to the application of nonconventional materials in [civil] engineering structures, infrastructure and products. Increasingly, engineers are looking to [often locally-sourced] nonconventional materials to augment or replace resource-intensive conventional engineered materials, such as steel and concrete. This is especially true in resource-scarce regions of the planet. This course will address a broad range of nonconventional materials falling into three categories: i. advanced reinforced polymer composites (GFRP, CFRP, BFRP, pGFRP) and metals (Al and Ti); ii. traditional and vernacular materials such as earth-based materials and bamboo; iii. historic materials (and the repair and restoration thereof); Course deliverables are partially project driven, allowing students to pursue materials issues of interest to their plan or study or research. This course is open to all Engineering and Architecture students (as a technical elective).
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: CEE 1105 or ENGR 0022; CEE and ENGR Undergraduates must have at least 75 credit hours completed and a GPA greater than 3.2.; BS (Architecture) students may take course with permission

CEE 2201 - CONSTRUCTION COST ENGINEERING

Minimum Credits: 3
Maximum Credits: 3
This course teaches the methodology for estimating construction costs. The course covers all types of costs and all types of construction. The student is introduced to standard reference materials and to computerized estimating systems. The course teaches methods and procedures for developing accurate estimates and the basis for follow-on cost control.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering

CEE 2202 - CONSTRUCTION SCHEDULING

Minimum Credits: 3

Maximum Credits: 3

This course teaches the student the theory and practice of planning, scheduling, and controlling the time and cost of construction projects. The course covers various advanced techniques such as cost duration analysis, critical resource analysis, stochastic modeling, and cost control. The course teaches the use of contemporary computerized software systems with hands-on application.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Graduate School of Engineering

Course Attributes: Global Studies

CEE 2203 - CONSTRUCT METHODS AND EQUIPMENT

Minimum Credits: 3

Maximum Credits: 3

This course teaches the student how to plan, organize, and execute construction operations. The course includes typical operations in both building construction and engineering construction. The course describes how to properly construct in order to achieve quality and productivity objectives.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Graduate School of Engineering

CEE 2204 - CONSTRUCTION LAW AND RISK MGMNT

Minimum Credits: 3

Maximum Credits: 3

This course introduces the student to the legal and risk management issues in construction. The course covers the principles of contract law and various legal areas affecting construction such as environmental regulations, insurance, bonds, tort liability, dispute resolution, and professional services.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Graduate School of Engineering

CEE 2205 - CONSTRUCT FINANCE & COST CONTROL

Minimum Credits: 3

Maximum Credits: 3

This course introduces the student to the company level financial and accounting systems which are used in the construction industry, and to project control systems which are used to manage cost and time. The course includes such topics as financial accounting, cost accounting, financial statements, and variance analysis.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Graduate School of Engineering

Course Attributes: Global Studies

CEE 2206 - CONSTRUCT & COST OF ELEC SUPPLY

Minimum Credits: 3

Maximum Credits: 3

This course teaches basic construction and cost estimating methodologies for single and three-phase electrical distribution systems that include wiring, power, and controls. The course uses commercial estimating systems and the national electrical code.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Graduate School of Engineering

CEE 2207 - CONSTRUCT & COST OF MECHL SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

This course teaches the student how to plan, organize, and execute mechanical construction operations; and the methodologies for estimating their costs. The course covers mechanical systems such as water (supply and waste), HVAC, fire protection, and their controls.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Graduate School of Engineering

CEE 2213 - CONSTRUCTION SAFETY

Minimum Credits: 3

Maximum Credits: 3

Safety is an integral and essential element of the construction industry. This course will teach students the role all personnel play in establishing an effective safety culture in order to achieve a goal of reducing and eliminating worker injuries and illnesses. Industry standards established by OSHA and ANSI will be highlighted. Additionally, the financial impact that accidents have on a company will be taught.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

CEE 2230 - BUILDING INFORMATION MODELING

Minimum Credits: 3

Maximum Credits: 3

The goal of this course is to introduce the students to building information modeling (BIM) and other new and evolving technologies which are revolutionizing the building and horizontal infrastructure construction industry. Students will learn how BIM and other innovative technologies are being adopted currently by progressive builders to streamline the construction process through enhanced coordination, visualization, logistical planning, cost estimation and analysis. They will also learn how these new tools are enabling (and in some instances requiring) new highly integrated processes that are redefining architecture, engineering, construction and operations (AECO) business relationships and delivery contracts.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

Course Attributes: MCSI - Sustainability Related

CEE 2320 - ADVANCED MECHANICS OF MATERIALS

Minimum Credits: 3

Maximum Credits: 3

The fundamentals of elasticity are introduced and related to various problems such as beams and bars on elastic foundations, unsymmetrical bending, torsion of thin walled members, curved bars, failure theories, and stability.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Graduate School of Engineering

CEE 2321 - ELASTICITY, PLASTICITY AND FRACTURE MECHANICS

Minimum Credits: 3

Maximum Credits: 3

This course provides first-year graduate students with the fundamentals regarding mathematical derivations, mechanical models and numerical analyses in elasticity, plasticity and fracture mechanics. It is aimed at laying the foundations for the students for their future study and research in advanced mechanical problems. The main topics of this course includes: 1) equilibrium and compatibility in elastic domains; 2) complex potential method for elasticity problems; 3) plasticity fundamentals; 4) linear elastic fracture mechanics; 5) stress intensity factors; 6) cohesive crack model and crack band model; 7) size effect and scaling; 8) probabilistic fracture mechanics; and 9) micromechanics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Swanson School of Engineering (PENGR)

CEE 2323 - PRACTICAL DATA SCIENCE AND MACHINE LEARNING

Minimum Credits: 3

Maximum Credits: 3

This course will introduce data science and machine learning concepts to engineering students and professionals with emphasis on practical engineering applications. Key approaches and techniques for working with applied data science and machine learning with many step-by-step engineering examples, illustrations, and exercises will be presented. The course will cover a range of machine learning methods for classification, clustering and regression including k-nearest neighbors, logistic regression, Naive Bayes, support vector machines, decision trees, neural networks, support vector machines, genetic programming, and deep learning.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

CEE 2325 - INTRODUCTION TO GENERATIVE ARTIFICIAL INTELLIGENCE FOR CIVIL ENGINEERS

Minimum Credits: 3

Maximum Credits: 3

This course provides an in-depth exploration of large language models and their applications in the field of civil engineering. Large language models, such as GPT-3.5, have revolutionized various domains, and this class will equip undergraduate and graduate students with the knowledge and skills to leverage these powerful tools for innovative solutions in civil engineering. From natural language understanding to data analysis and decision support, students will learn how to harness the potential of large language models to tackle real-world civil engineering challenges.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

CEE 2330 - ADVANCED STRUCTURAL ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

Theory and application of matrix stiffness and flexibility methods for analysis of framed structures. Computer implementation for the solution of two- and three-dimensional frames, trusses, and grid systems.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Graduate School of Engineering

CEE 2331 - PLATES AND SHELLS

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the theory of plates and shells and the analytical and numerical solutions to problems associated with plates and shells. Topics covered include classical plate and plate buckling theories and solution methods including Navier, Levy, Ritz and the finite difference method. Topics in shell theory will include membrane and bending stresses. Examples will include cylindrical shells, pipes, tanks and pressure vessels.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

CEE 2333 - INTRODUCTION TO FINITE ELEMENTS

Minimum Credits: 3

Maximum Credits: 3

Introduction to the finite element method and its application to various problems of elastic elements and structures. Both physical and variational approaches are used.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Swanson School of Engineering

CEE 2340 - CONCRETE STRUCTURES 2

Minimum Credits: 3

Maximum Credits: 3

Advanced behavior, strength and design of reinforced concrete structures, including column and frame stability effects, two-way slabs, and serviceability criteria. Introduction to earthquake design concepts.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Graduate School of Engineering

CEE 2341 - DESIGN OF STEEL STRUCTURES

Minimum Credits: 3

Maximum Credits: 3

A course on the design of steel structures based on the load and resistance factor design (LRFD) philosophy. Fundamental topics related to the design of tension members, columns, beams, beam-columns, floor systems, plate

girders and steel connections are treated. Issues in stability, fracture and fatigue are also introduced.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Graduate School of Engineering

CEE 2343 - PRESTRESSED CONCRETE

Minimum Credits: 3

Maximum Credits: 3

Design of prestressed concrete beams and slabs, including shear and torsion effects.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Graduate Engineering Students

CEE 2345 - DESIGN OF TIMBER STRUCTURES

Minimum Credits: 3

Maximum Credits: 3

An introductory course focusing on the design of light-frame timber and 'mass' (or 'heavy') timber structures. Material characterization and properties of wood are addressed including aspects of durability and long-term performance.

Fundamental topics related to design of linear (beams and columns) and planar (plates, panels and floors) structural elements are covered. More advanced topics addressed include stability and design of connections. An introduction to fire performance of building structures is included. The course will be focused toward a student-driven design project.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

CEE 2346 - REPAIR AND RETROFIT OF STRUCTURES

Minimum Credits: 3

Maximum Credits: 3

Introduction and use of performance-based design concepts. Analysis and modeling techniques for existing and repaired structures. Gravity and lateral load retrofit procedures. Selection, modeling and design of repair and/or retrofit measures for a variety of structures and building materials. Retrofit for blast loads.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Swanson School of Engineering

CEE 2347 - BRIDGE ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

Introduce concepts of bridge engineering by providing the students with the necessary knowledge and skills to apply the AASHTO IRFD specifications for the analysis and design of highway bridge superstructure components.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Swanson School of Engineering

CEE 2350 - MACHING LEARNING IN INFRASTRUCTURE ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

This course covers theory and practical algorithms in machine learning from a variety of perspectives, with applications to solve problems in civil infrastructure engineering. The topics include linear methods for regression and classification, regularization, kernel smoothing methods, bayesian inference, sampling, decision tree learning, support vector machines, statistical learning methods, unsupervised learning and deep learning, as well as their field applications. This course is designed to give graduate-level students a thorough grounding in methodologies, technologies and algorithms in machine learning and push field applications in, but not limited to, civil infrastructure engineering.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

CEE 2360 - DYNAMICS OF STRUCTURES

Minimum Credits: 3

Maximum Credits: 3

Fundamentals of free and forced vibration of one and multi degree of freedom structures, including damping. Matrix formulation of multi-degree of freedom structures. Analytical and numerical methods for determining response; deflection and stress evaluation including damping effects.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Swanson School of Engineering

CEE 2370 - INTRODUCTION TO NONDESTRUCTIVE EVALUATION AND STRUCTURAL HEALTH MONITORING

Minimum Credits: 3

Maximum Credits: 3

The course aims at providing an overview of the different techniques for the nondestructive evaluation (NDE) and the structural health monitoring (SHM) of civil and aerospace structures. Techniques such as electrical resistance strain gauges, fiber optic sensing and ultrasonics will be described within the framework of the NDE. Applications to materials characterization and defect detection will be discussed with emphasis on steel and composite structures. Global and local methods for SHM will be introduced with emphasis on vibration and ultrasonic methods, respectively. The course will also provide the essential tools necessary for the digital signal processing of ultrasonic data. Mat lab and laboratory exercises on recent researches will be investigated.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Swanson School of Engineering

CEE 2371 - STRUCTURAL HEALTH MONITORING

Minimum Credits: 3

Maximum Credits: 3

The course introduces Honors students to the modern paradigm of Structural Health Monitoring (SHM) as it applies to engineering infrastructures and systems with a specific focus on bridges. SHM refers to the implementation of 24/7 nondestructive evaluation (NDE) techniques to detect damage, characterize materials, or to determine non-invasively the static and dynamic response of a given structure to external load such traffic and wind. Typical SHM systems

receive and elaborate data from sensors bonded or embedded to the infrastructure or material of interest to establish whether the structure is damaged or if it operates according to design specifications. SHM is a multidisciplinary field that embraces knowledge in areas that include but are not limited to sensors fabrication, signal processing, NDE, materials science, hardware design, and soft computing.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

CEE 2401 - OPEN CHANNEL HYDRAULICS

Minimum Credits: 3

Maximum Credits: 3

Basic theories and principles of open channel flows (including flows in rivers and streams). Methods of calculating uniform flow, gradually varied flow, rapidly varied flow, and unsteady flow. Design of open channels.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Graduate Engineering Students

CEE 2410 - WATER RESOURCES ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

This course addresses fundamental and practical issues of water resources engineering. The increasing demand for sufficient water quantity and quality that is distributed in time and space forces engineers and policy makers to develop more comprehensive, complex, and ambitious plans for environmental and water systems. This course emphasizes understanding, formulating, and approaches of solving problems of water resources engineering. Quantitative overview of the water resources development, water resources problems, impacts of climate variability and global warming on water resources, and the fundamental principles and basic tools to solve these problems will be covered. Topics to be discussed also include introduction to basic concepts of hydrology, GIS (Geographic Information Systems) applications, theory of unit hydrograph, frequency analysis, flood routing through reservoirs and rivers, introduction to rainfall-runoff analyses, and watershed modeling.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Graduate Engineering Students

Course Attributes: MCSI - Sustainability Related

CEE 2411 - CURRENT ISSUES AND CHALLENGES IN WATER RESOURCES

Minimum Credits: 3

Maximum Credits: 3

This course covers a wide range of topics related to current issues and challenges related to water resources, especially those associated with climate changes. Through this course, the students are expected to gain in-depth understanding of the fundamentals as well as the up-to-date advances. Students are required to study selected research articles and participate in guided discussions. Topics covered include floods, droughts, winter storms, accurate forecasts of precipitation and streamflow, urban hydrology and its sustainability. Contemporary and new frontiers in modeling and data processing are also part of the curriculum.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

CEE 2500 - ENVRNMNTL ENGRG MICROBIOL

Minimum Credits: 3

Maximum Credits: 3

Biological fundamentals as applied to the description and evaluation of natural environments and environmental quality control systems.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Graduate School of Engineering

Course Attributes: MCSI - Sustainability Related

CEE 2501 - ENVIRONMENTAL ENGINEERING CHEMISTRY

Minimum Credits: 3

Maximum Credits: 3

Chemical fundamentals as applied to the description and evaluation of natural environments and environmental quality control systems.

Academic Career: Graduate

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Graduate School of Engineering

Course Attributes: Global Studies, MCSI - Sustainability Related

CEE 2502 - PHYSICAL-CHEMICAL PRINCIPLES IN ENVIRONMENTAL ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

Basic principles and applications of thermodynamics, reaction kinetics, equilibria, diffusion, and mass transfer.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Graduate School of Engineering

Course Attributes: Global Studies

CEE 2505 - WATER TREATMENT AND DISTRIBUTION SYSTEMS DESIGN

Minimum Credits: 3

Maximum Credits: 3

Stepwise development and process design, equipment selection, economic evaluation, layout, and operating guidelines for water treatment, storage and distribution systems.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Graduate School of Engineering

Course Attributes: MCSI - Sustainability Related

CEE 2513 - ENVIRONMENTAL IMPACT ASSESSMENT

Minimum Credits: 3

Maximum Credits: 3

Technical and procedural aspects of environmental impact analysis and assessment with emphasis on regulatory framework, characterization of impacts and their remediation, and the decision process when applied to engineering systems.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Graduate School of Engineering

Course Attributes: Global Studies, MCSI - Sustainability Related

CEE 2515 - WASTEWATER COLLECTION AND TREATMENT PLANT DESIGN

Minimum Credits: 3

Maximum Credits: 3

Stepwise development and process design, equipment selection, economic evaluation, layout, and operating guidelines for wastewater collection and treatment systems.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Graduate School of Engineering

Course Attributes: Global Studies, MCSI - Sustainability Related

CEE 2522 - FATE AND TRANSPORT IN ENVIRONMENTAL ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

An introduction to the thermodynamic and kinetic drivers of chemical fate in the environment. Processes governing the diffusion, advection and transformation of chemicals in air, water and soil. Inter-media exchange, environmental degradation and uptake into biotic systems.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

CEE 2531 - AIR POLLUTION AND CONTROL

Minimum Credits: 3

Maximum Credits: 3

This course covers terminology, scientific principles, control options, regulatory requirements, permitting procedures, testing/modeling techniques and current topics associated with air pollution and control. This course requires quantitative understanding and covers design considerations associated with air pollution and control. It also covers environmental issues and requires an appreciation of the non-technical aspects of air quality management.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

CEE 2605 - SUSTAINABLE MATERIALS

Minimum Credits: 3

Maximum Credits: 3

Materials are the building block of the natural and built environment. You rely on and interact with materials every

day, but have you ever stopped to consider, what is a material? What does it mean to design a material more sustainably? How can you make materials more sustainable and better performing? Answers to these questions, and more, are the foundation for the course. In this course you will learn about sustainable design frameworks (e.g., Green Chemistry, Green Engineering, Cradle-to-Cradle, Biomimicry, Circular Economy) and existing examples of their successful application in markets ranging from consumer electronics, clothing, and personal care products. In addition to these case studies, we will discuss material classes relevant to civil and environmental engineering. The course will be collaborative and highly participatory. In addition, a cornerstone of the class will be a material challenge project. You will work in groups applying what you learn in the course to uncover innovative solutions to currently unsustainable material practices.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

CEE 2609 - LIFE CYCLE ASSESSMENT METHODS AND TOOLS

Minimum Credits: 3

Maximum Credits: 3

Life cycle assessment (LCA) is a tool for evaluating the environmental impacts of a product or process by documenting energy and material flows from inception to ultimate disposal. This course teaches framework, methods, and tools that can be applied to decision making in the design, construction, operation, and maintenance of the built environment. Topics include the principles of life cycle assessment, case studies of applications of life cycle assessment, methods for life cycle inventory, and methods for life cycle impact assessment. The course aims to encourage systems thinking and to facilitate life cycle applications to graduate students' individual research topics. Students can expect to develop a project and paper applying LCA to their research topic. In most cases, students will produce a publishable journal article at the end of the semester.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Attributes: MCSI - Sustainability Focused

CEE 2610 - ENGINEERING AND SUSTAINABLE DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

This course is intended as an introductory interdisciplinary engineering course. Topics include principles of sustainable design in engineering, manufacturing, infrastructure, communications, and community development; overview of environmental issues for engineers; design for the environment; models of environmental processes; introduction to the use of life cycle assessment; and case studies examining the relationship of green design and the field of engineering.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Attributes: MCSI - Sustainability Focused

CEE 2612 - DESIGN AND ANALYSIS OF EXPERIMENTS

Minimum Credits: 3

Maximum Credits: 3

Principles of designing experiments, analysis of variance techniques for hypothesis testing, simultaneous confidence intervals, robust design and Taguchi methods, block designs, factorial experiments, random effects and mixed models, split plot designs, analysis of covariance, response surface design

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

CEE 2620 - ADVANCED GREEN BUILDING AND CONSTRUCTION

Minimum Credits: 3

Maximum Credits: 3

This course first provides an overview all of the major aspects of green building design and construction, including sustainable sites, water efficiency, energy and atmosphere, materials and resources, indoor environmental quality, innovation, and design process. The course then focuses on energy modeling, indoor environmental quality monitoring, and post-occupancy evaluations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Attributes: MCSI - Sustainability Focused

CEE 2630 - DESIGN FOR CIRCULAR ECONOMY

Minimum Credits: 3

Maximum Credits: 3

The current linear consumption model of raw material extraction, production, use, and disposal has dominated the global economy for hundreds of years. While an extremely wasteful approach to resource management, the linear model was tractable so long as it was employed by a small fraction of the global population, namely the developed world, so that both raw material acquisition and waste management remained economically viable. Today, we clearly see that this linear model has led to serious unintended global consequences. Circular economy (CE) offers promising solutions. CE principles are based on efficient use of resources and eliminating waste from product life cycles through clever design. Valuable material either moves in loops through the economy, or, if biologically derived, returns to the ecosystem to serve as nutrients; a truly circular economy thus keeps material in continuous use by design. The goal of this course is to provide students a thorough introduction to circular economy, along with integrating design. This course will provide students with skills and knowledge related to CE. Through experiential and project-based learning, the students will develop circular economy affinity groups that will tackle a pressing challenge including design for degradation solutions for ocean plastics and design for reuse of construction materials.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

CEE 2700 - TRAFFIC MGMNT AND OPERATIONS

Minimum Credits: 3

Maximum Credits: 3

Introduction to traffic flow theory and characteristics. Highway capacity analysis. Basic traffic management and control.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Swanson School of Engineering

CEE 2710 - TRAFFIC CONTROL SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

A range of traffic control systems including the analysis and design of traffic signals are discussed along with traffic

signal systems. Other topics covered include data collection for traffic control systems, optimization software and models; traffic signal hardware design; traffic signal systems selection (adaptive traffic signal systems versus traditional systems) and design and implementation. Pre-requisite CEE 1703 for 1710 and CEE 2700 for 2710

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: CEE 2700; PROG: Swanson School of Engineering

CEE 2711 - ADVANCED TRANSPORTATION MANAGEMENT STRATEGIES

Minimum Credits: 3

Maximum Credits: 3

This is a management-oriented course that covers key aspects of how government transportation agencies operate their transportation systems. Focus is on the strategies that are used to improve public safety and mobility, including traffic incident management, traffic management, traveler information and pricing. Emphasis is also placed on processes, including planning, performance management and systems engineering, that agencies apply in advancing programs and projects. The course concludes with a look at the future, including the effects that automated vehicles and Smart City concepts will have on the future of transportation.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

CEE 2713 - DIGITALIZATION IN CIVIL ENGINEERING: FROM CAD TO VIRTUAL REALITY

Minimum Credits: 3

Maximum Credits: 3

Course Description: This course will introduce students to the fundamentals of technical drawing and the modern tools utilized in drafting, modeling, and 3-D visualization for Civil Engineering applications. Topics will include technical drawing and engineering graphics, Computer-Aided Design (CAD), Building Information Modeling (BIM) and modern Virtual Reality (VR) applications in Civil Engineering. More specifically, students will: 1. Gain fundamental knowledge in technical drawing and engineering graphics. 2. Become proficient in modern drafting and modeling software tools for Civil Engineering applications. 3. Gain an understanding of the required workflows for data exchange between 3-D modeling software and immersive Virtual Reality simulations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

CEE 2714 - PAVEMENT DESIGN AND ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

Concepts and principles in the structural design of pavements for highways and airfields including: traffic loads, climatic factors, soil and material characterization. Application of current pavement design practices and procedures. Economic evaluation of highway and airport pavements.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Graduate School of Engineering

CEE 2715 - PAVEMENT MAINTENANCE AND REHAB

Minimum Credits: 3

Maximum Credits: 3

Engineering concepts and information needed to maintain and rehabilitate pavements. Project evaluation, testing and analysis. Design of rigid and flexible overlays, and other methods of rehabilitation. Selection of rehabilitation alternatives. Analysis of the effects of maintenance activities on pavement performance. Initial and life cycle cost analysis of various rehabilitation alternatives.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Graduate School of Engineering

CEE 2716 - PAVEMENT CONSTRUCTION

Minimum Credits: 3

Maximum Credits: 3

This course teaches the students the theory and practice of constructing highway and airfield pavements and associated construction management responsibilities. The students will learn how pavements are constructed, including earthwork, base and subbase construction, and the paving of the concrete and asphalt surface layers. The course also covers the impact of construction quality on long-term pavement performance and modern methods utilized for construction quality control.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

CEE 2717 - COMPONENTS, PROPERTIES AND DESIGN OF PORTLAND CEMENT CONCRETE

Minimum Credits: 3

Maximum Credits: 3

Examines the influence of constituent materials (cements, aggregates and admixtures) on the properties of fresh and hardened concrete, mix design handling and placement of concrete; and behavior of concrete under various types of loading and environment; test methods, designing concrete mixes for specific applications.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Graduate School of Engineering

CEE 2720 - URBAN TRANSPORTATION PLANNING

Minimum Credits: 3

Maximum Credits: 3

All aspects of the transportation planning process including transportation planning and decision making, transportation modeling, demand and supply analysis, transportation studies, environmental issues and project implementation.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: CEE 2700; PROG: Swanson School of Engineering

Course Attributes: MCSI - Sustainability Related

CEE 2725 - PUBLIC TRANSPORTATION SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

This course is designed to give seniors and graduate students a basic background in the planning, operations and development of public transportation systems within the context of the overall transportation system.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering (PENGR)

CEE 2730 - HIGHWAY ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

Highway administration, classification, planning and programming. Geometric design of highways. Traffic characteristics and capacity analyses. Traffic operations and control. Highway design project.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Swanson School of Engineering

CEE 2750 - PROJECT DEVELOPMENT AND IMPLEMENTATION

Minimum Credits: 3

Maximum Credits: 3

Project development and implementation - 3 credits: this course provides overview of the process used in project programming and planning, design, construction and operation. The course will emphasize the process used for implementation of major projects with emphasis on construction management and how that task interfaces with other aspects of project development. Students will be involved in a team effort to conceptualize the project, plan alternatives, determine the environmental impact, examine design alternatives, prepare the project for construction documents, recommend award of the contract, manage the contract during construction and determine operational needs of the project.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

CEE 2800 - ENGINEERING GEOLOGY

Minimum Credits: 3

Maximum Credits: 3

Review of basic geologic principles with emphasis on the importance and influence of geology and geologic processes on engineering projects such as dam sites, foundations, tunnels, mine subsidence, landslides, highways, groundwater problems, and seismic studies.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Swanson School of Engineering

Course Attributes: Global Studies

CEE 2801 - ADVANCED SOIL MECHANICS

Minimum Credits: 3

Maximum Credits: 3

Mathematical and graphical operations on stress and strain, seepage analysis and flow net, consolidation theory, upper and lower bound analysis, earth pressure theory, bearing capacity, and plasticity based soil models.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Graduate School of Engineering

CEE 2802 - GEOTECHNICAL ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

Fundamentals of the analytical and numerical methods in geotechnical engineering are explored. Emphasis will be placed upon implementation and verification of various formulations into basic programs. Seepage, stress distribution, settlement, consolidation, sheet piling wall, and beams on elastic foundations are some of the topics covered.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

CEE 2805 - EARTHQUAKE ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

Earthquake hazard assessment, time domain and frequency domain analysis of multi-degrees of freedom systems, response spectrum, material nonlinearity, stochastic response and failure assessment, soil-structure interaction.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Swanson School of Engineering

CEE 2809 - HYDRAULIC FRACTURING MECHANICS

Minimum Credits: 3

Maximum Credits: 3

This class will prepare students to wisely and critically design hydraulic fracturing treatments as well as make informed recommendations to employers, governments, and communities about the risks and benefits of hydraulic fracturing methods. Upon completion of this course, students will be equipped to use engineering formulae to estimate hydraulic fracture dimensions, evaluate strengths and weaknesses of various modeling approaches, characterize subsurface conditions from wellbore pressure analysis, make sound recommendations for monitoring, and compare and contrast approaches and risks for a range of application domains.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

CEE 2814 - SLOPES & EARTH RETAINING STRUCT

Minimum Credits: 3

Maximum Credits: 3

Conventional methods and recent advances in slope stability analyses; classical and modern earth pressure theories; design of rigid and flexible retaining structures; earth dams, their design and stability.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Graduate School of Engineering

CEE 2900 - GRADUATE FELLOWSHIPS AND PROPOSAL-WRITING WORKSHOP

Minimum Credits: 1

Maximum Credits: 1

This workshop will provide information and guidance to students interested in competing for external fellowships to support their graduate research, as well as instruction on proposal writing in general. The workshop will consist of structured class time and outside-the-class mentoring teams to work with students on the preparation of a fellowship application.

Academic Career: Graduate

Course Component: Workshop

Grade Component: Grad SN Basis

CEE 2996 - SPEC INVSTGTN FOR M.S. STUDENTS

Minimum Credits: 1

Maximum Credits: 9

A special project course in which students may broaden their knowledge by studying approved topics or problems in a specific field within the department under the guidance of a faculty member.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad Letter Grade

CEE 2997 - RESEARCH, M.S.

Minimum Credits: 1

Maximum Credits: 15

Non-thesis option research project for the MS Degree under the guidance of a civil engineering faculty member.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad SN Basis

CEE 2999 - M.S. THESIS

Minimum Credits: 1

Maximum Credits: 15

Scheduled discussion periods with the student's advisor. Literature survey, selection of thesis topic, development of research methods and procedures, and preparation of thesis under the guidance of a civil engineering faculty member.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

CEE 3333 - ADVANCED FINITE ELEMENT METHODS

Minimum Credits: 3

Maximum Credits: 3

This second course in the finite element method focuses on the challenges and solution strategies for nonlinear boundary value problems in mechanics. Topics include nonlinear heat transfer as well as geometric and material nonlinearity in solid mechanics. In addition, an overview is presented of various transient analysis techniques (i.e. time integration) within the finite element method.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Civil & Environmental Engineer (PHD)

CEE 3414 - ADVANCED HYDROLOGY

Minimum Credits: 3

Maximum Credits: 3

Fundamental and advanced theories and processes of hydrology. Topics to cover include processes of water in the atmosphere, over land surface, and within soil; advanced representation of infiltration and evapotranspiration processes; partitions of water and energy budgets at the land surface; snow and snowmelt processes; applications of remote sensing (e.g., Satellite and radar), and flood and drought analysis.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

CEE 3501 - ENVRNMTL ENGRG PROCESSES 1

Minimum Credits: 3

Maximum Credits: 3

Theory and applications of physical and chemical principles to water and wastewater treatment and disposal. Mixing, equalization, coagulation, sedimentation, filtration, disinfection and solids handling.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Graduate School of Engineering

Course Attributes: Global Studies

CEE 3502 - ENVRNMTL ENGRG PROCESSES 2

Minimum Credits: 3

Maximum Credits: 3

Theory and applications of aerobic, anoxic and anaerobic biological processes in environmental quality control.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Graduate School of Engineering or (PREQ: CEE 1503 or CET 1141; PROG: Undergraduate School of Engineering)

Course Attributes: Global Studies

CEE 3609 - ADVANCED TOPICS IN LIFE CYCLE ASSESSMENT

Minimum Credits: 3

Maximum Credits: 3

Life cycle assessment (LCA) is a tool for evaluating the environmental impacts of a product or process by documenting energy and material flows from inception to ultimate disposal. This course teaches framework, methods, and tools that can be applied to decision making in the design, construction, operation, and maintenance of the built environment. Topics include the principles of life cycle assessment, case studies of applications of life cycle assessment, methods for life cycle inventory, and methods for life cycle impact assessment. The course aims to encourage systems thinking and to facilitate life cycle applications to graduate students' individual research topics. Students can expect to develop a project and paper applying LCA to their research topic. In most cases, students will produce a publishable journal article at the end of the semester.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Attributes: MCSI - Sustainability Related

CEE 3714 - ADVANCED PAVEMENT DESIGN & ANAL

Minimum Credits: 3

Maximum Credits: 3

Theoretical models for analysis of pavement systems. Design and analysis of pavements through the use of transfer functions relating pavement response to pavement performance. Evaluation of current pavement design practices and procedures. Economic evaluation of highway and airport pavements.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Graduate School of Engineering

CEE 3805 - ROCK MECHANICS

Minimum Credits: 3

Maximum Credits: 3

Behavior and properties of rock as an engineering material; failure of rock; design and construction of underground structures and slopes in rock; design of rock abutments for dams.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Graduate School of Engineering

CEE 3996 - SPECIAL INVSTGTN FOR PH.D. STDNT

Minimum Credits: 1

Maximum Credits: 6

A special project course in which advanced students may broaden their knowledge by studying approved topics or problems in a specific field within the department under the guidance of a faculty member.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad Letter Grade

CEE 3997 - RESEARCH, PH.D

Minimum Credits: 1

Maximum Credits: 15

Directed research and study for the preparation of the Ph.D. Dissertation proposal.

Academic Career: Graduate

Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

CEE 3999 - PH.D. DISSERTATION

Minimum Credits: 1
Maximum Credits: 15

Scheduled discussion periods with the student's advisor. Literature survey, selection of dissertation topic, development of research methods and procedures, and preparation of the dissertation, under the guidance of a civil engineering graduate faculty member.

Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

Classics

CLASS 2019 - GLOBAL ISSUES THROUGH CLASSICS 1

Minimum Credits: 1
Maximum Credits: 1

This course represents the first half of a two-semester graduate proseminar introducing students to global issues through ancient Greek and Roman sources in translation. The course proposes that global issues are not only transnational but in fact transhistorical: that is to say, the processes of connection and disruption, inequality, precarity, and violence, associated with the uneven flows of people and power through space and over time can be found operating around the ancient world as much as in the modern. Consequently, not only can ancient texts, sources, and ideas be used to enrich our understanding of today's global issues, but methods from Global Studies can also be usefully applied to probe these same processes in antiquity. Topics may include: poverty and inequality; war, peace, and diplomacy; citizenship and xenophobia; indigeneity and nationalism; migration and mobility; center versus periphery; terrorism; imperialism; conceptions of race and ethnicity; and the organization of knowledge and circulation of information. Students are expected to complete weekly readings of ancient texts, and to prepare materials for discussions of ancient and contemporary global issues.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

CLASS 2020 - GLOBAL ISSUES THROUGH CLASSICS 2

Minimum Credits: 2
Maximum Credits: 2

This course is the continuation of a two-semester graduate proseminar investigating contemporary global issues through ancient Greek and Roman sources in translation. The course proposes that global issues are not only transnational but in fact transhistorical: that is to say, the processes of connection and disruption, inequality, precarity, and violence, associated with the uneven flows of people and power through space and over time can be found operating around the ancient world as much as in the modern. Consequently, not only can ancient texts, sources, and ideas be used to enrich our understanding of today's global issues, but methods from Global Studies can also be usefully applied to probe these same processes in antiquity. Topics may include: poverty and inequality; war, peace, and diplomacy; citizenship and xenophobia; indigeneity and nationalism; migration and mobility; center versus periphery; terrorism; imperialism; conceptions of race and ethnicity; and the organization of knowledge and circulation of information. Students are expected to complete weekly readings of ancient texts, to prepare materials for discussions of ancient and contemporary global issues, and to develop an independent research project or paper.

Academic Career: Graduate

Course Component: Seminar
Grade Component: Grad LG/SNC Basis

CLASS 2090 - TOPICS IN CLASSICS

Minimum Credits: 3

Maximum Credits: 3

Close study of selected topics in classical studies. Course may be repeated for credit provided material covered is different.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

CLASS 2140 - ANCIENT POETRY AND RECEPTION

Minimum Credits: 3

Maximum Credits: 3

Students will read, in translation, a selection of Greek and Roman poets and the reception of their works across varying genres, cultures and timeframes. Particular focus will be placed on the specific literary, cultural and historical contexts, those in which the authors wrote and those in which their works were received.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

CLASS 2301 - ANCIENT PHILOSOPHY

Minimum Credits: 3

Maximum Credits: 3

This is a beginning to intermediate level graduate seminar in ancient philosophy, with emphasis on Plato and Aristotle, taken almost exclusively by students in the doctoral program, usually during their first or second year of residence. The exact contents of the course vary from one occasion to the next.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

CLASS 2319 - FROM PHILO TO PHILOPONUS: AN INTRODUCTION TO THE HISTORY OF PHILOSOPHY IN LATE ANTIQUITY

Minimum Credits: 3

Maximum Credits: 3

This course is designed thematically and historically to expand the course offerings of the Departments of Classics and Philosophy. The history of philosophy in Late Antiquity is lamentably neglected by historians of ancient philosophy, even though the thinkers of this period made crucial and formative contributions to the development of Western philosophy, theology, and science. The aim of this course is to provide students with a clear sense of the cultural and social forces that shaped the doctrinal and philosophical debates and concerns of the first six centuries CE, and to familiarize them with the roots of what was to become medieval and Renaissance philosophy.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

CLASS 2320 - CLASSICS, PHILOSOPHY, AND ANCIENT SCIENCE GREEK AND LATIN SEMINAR 1

Minimum Credits: 3

Maximum Credits: 3

Bringing together students and faculty members, the aim of this course is to read and discuss a variety of Ancient Greek and Latin authors in their original language. The format of the course is flexible. Each participant translates a portion of text and singles out topics for discussion, whether philological, philosophical or methodological in nature. All members are encouraged to interrupt and participate as the mood strikes. We attempt to cover authors both central and at the margins of the curriculum, depending on students' interest. The course alternates weekly between Greek and Latin authors.

Academic Career: Graduate

CLASS 2390 - TOPICS IN ANCIENT PHILOSOPHY

Minimum Credits: 3

Maximum Credits: 3

Study of selected topics in the area of ancient philosophy. Course may be repeated for credit if the material covered is different.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Attributes: West European Studies

CLASS 2392 - ARISTOTLE'S CONCEPT OF NATURAL SCIENCE

Minimum Credits: 3

Maximum Credits: 3

Among theoretical forms of investigation and knowledge, Aristotle distinguishes mathematics, natural science and first philosophy (metaphysics). This seminar explores Aristotle's understanding of the aims, methods and the conceptual and explanatory structure of natural science, and the relationship between it and the other forms of theoretical inquiry.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Attributes: West European Studies

CLASS 2547 - ARISTOTLE'S PHILOSOPHY OF SCIENCE

Minimum Credits: 3

Maximum Credits: 3

This seminar explores Aristotle's views on the nature of science, such as explanation, causation, demonstration, and necessity. We will study a number of Aristotle's works, including the analytics and physics.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

CLASS 2990 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 9

Independent study on classical topics for graduate students.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad LG/SNC Basis

CLASS 2992 - DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 3

Directed study on classical topics for students in the graduate program.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SNC Basis

CLASS 2995 - DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 9

Directed study on classics topics for students in the graduate program.

Clinical Nurse Specialist

NURCNS 2161 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 3

Students elect an area of interest and work with a specific faculty member to meet agreed upon objectives.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad LG/SNC Basis

NURCNS 2352 - FAMILY THEORY/THERAPY TECHNIQUES

Minimum Credits: 2

Maximum Credits: 2

This course examines models of community mental health and mental health nursing from a holistic nursing perspective with a focus on family mental health and family functioning. Theories and research about family dynamics and processes are examined as the student develops a conceptual framework to guide clinical practice. Clinical therapeutics focus on the use of interventions for maintaining functional and altering dysfunctional patterns of responses with family systems and in a selected clinically related management role in community mental health services.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Nursing students only.

NURCNS 2352D - FAMILY THEORY/THERAPY TECHNIQUES

Minimum Credits: 2

Maximum Credits: 2

This course examines models of community mental health and mental health nursing from a holistic nursing perspective with a focus on family mental health and family functioning. Theories and research about family dynamics and processes are examined as the student develops a conceptual framework to guide clinical practice. Clinical therapeutics focus on the use of interventions for maintaining functional and altering dysfunctional patterns of responses with family systems and in a selected clinically related management role in community mental health services.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Nursing students only.

NURCNS 2353 - FAMILY THERAPY ROLE SEMINAR AND CLINICAL PRACTICUM

Minimum Credits: 1

Maximum Credits: 1

This clinical practicum is taken concomitantly with NURCNS 2352 and includes clinical experiences as a family therapist. Experiential seminars are held. Knowledge gained from theory course is applied and synthesized into a conceptual framework for advanced nursing practice.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad Letter Grade

Course Requirements: School of Nursing students only.

NURCNS 2354 - INDIVIDUAL PSYCHOTHERAPY THEORY

Minimum Credits: 2

Maximum Credits: 2

This course will focus on the theory relevant to individual psychotherapy. The emphasis is on preparing the student to provide appropriate models of psychotherapy within the managed care and private practice environments.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: CREQ: NURCNS 2355; PROG: Graduate School of Nursing

NURCNS 2354D - INDIVIDUAL PSYCHOTHERAPY THEORY

Minimum Credits: 2

Maximum Credits: 2

This course will focus on the theory relevant to individual psychotherapy. The emphasis is on preparing the student to provide appropriate models of psychotherapy within the managed care and private practice environments.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: CREQ: NURCNS 2355; PROG: Graduate School of Nursing

Course Attributes: Distance Education

NURCNS 2355 - INDIVIDUAL PSYCHOTHERAPY PRACTCM

Minimum Credits: 1

Maximum Credits: 1

The goal of this practicum is to provide the student with an opportunity to gain skills in the practice of individual psychotherapy with patients across the life span and in different populations. The student will be expected to provide psychotherapy to patients through the beginning, middle, and end phases of treatment, utilizing concepts learned in NURCNS 2354 individual psychotherapy theory.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

Course Requirements: CREQ: NURCNS 2354

NURCNS 2361 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 3

An in-depth study in a particular area of interest by arrangement with a designated faculty member.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad LG/SU3 Basis

NURCNS 2850 - CNS ROLE IMPLEMENTATION

Minimum Credits: 2

Maximum Credits: 2

This course is designed to provide a framework for clinical nurse specialist (CNS) practice that is organized around the three spheres of influence (patient, nursing personnel, organization/network) that encompass consumers of CNS services. Students are introduced to unique competencies in each sphere of influence as operationalized in acute care. Emphasis will be placed on acquisition of skills needed to develop population-based programs of care; facilitate systems that promote innovative, cost-effective and comprehensive care; develop and implement evidence-based practice initiatives; and collaborate with health team members to improve health care delivery and patient outcomes. Using model cases and problems derived from their practice, students examine how leadership, consultation and collaboration skills can be used to solve problems for patients/populations, health team members, and organizations/systems.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

NURCNS 2851 - CNS CLINICAL PRACTICUM 1

Minimum Credits: 4

Maximum Credits: 5

Practicum is the first of two clinical practica designed to provide experience in role development for the clinical nurse specialist (CNS). Emphasis is placed on enhancing competencies within the three spheres of influence of the CNS (patient, nursing personnel, organization/network) and developing characteristics essential to CNS practice.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NUR 2850

NURCNS 2852 - CNS CLINICAL PRACTICUM 2

Minimum Credits: 1

Maximum Credits: 4

This practicum is designed to provide experience in role development for the clinical nurse specialist (CNS). Emphasis is placed on further refinement of characteristics essential to CNS practice and competencies

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad Letter Grade

NURCNS 2853 - CLINICAL EMPHASIS SPECIALTY

Minimum Credits: 3

Maximum Credits: 3

This course is designed to develop a comprehensive theoretical and practical foundation for advanced nursing care of adult-gerontology patients with dysfunctions/alterations in the selected area of clinical specialization. The course integrates the pathophysiology of dysfunctions/alterations in the selected area with appropriate diagnostic parameters and management strategies. Aspects of health promotion and maintenance appropriate to these patients and families will also be emphasized.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NUR 2004; PROG: NURS

NURCNS 3039 - DNP-CNS ROLE PRACTICUM

Minimum Credits: 1

Maximum Credits: 10

This course is designed to provide a culminating practicum experience for the DNP clinical nurse specialist (CNS). Students will focus on promoting evidence based practice as interdisciplinary team members and providing high quality, cost effective care in a dynamic health care environment. Emphasis is placed on further refinement of competencies within the three spheres of influence of the CNS (patient, nursing personnel, and systems) and further development of characteristics essential to CNS practice at the doctoral level.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad HSU Basis

Clinical Rehab and Mental Health Counseling

COUN 2714 - MEDICAL, PSYCHOSOCIAL, AND ASSISTIVE TECHNOLOGY CONSIDERATIONS IN DISABILITY

Minimum Credits: 3

Maximum Credits: 3

This course is designed to allow counseling professionals to understand, interpret, and apply medical information relevant to the counseling relationship. Students examine major chronic illnesses and disabilities to obtain a theoretical and practical understanding of the implications of these conditions on all areas of functioning and participation, including psychosocial adaptation, interpersonal relationships, sexuality, education, employment, and independent living. Course content will explore individual response to disability, including the role of families, communities, other social networks, and the role of integrated behavioral healthcare in facilitating outcomes. Technology interventions for major functional areas will be discussed and demonstrated.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Clinical Mental Health Counsel (CMHC-MS)

COUN 2716 - MEDICAL & PSYCHOSOCIAL ASPECTS OF DISABILITY

Minimum Credits: 2

Maximum Credits: 2

This course is designed to prepare counseling professionals to become skillful interpreters and users of medical information and terminology. Students examine major chronic illnesses and disabilities in order to obtain a practical and theoretical understanding of the implications of these conditions on all areas of functioning and participation, including interpersonal relationships, sexuality, education, employment, and independent living.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

COUN 2716 - MEDICAL & PSYCHOSOCIAL ASPECTS OF DISABILITY

Minimum Credits: 2

Maximum Credits: 2

This course is designed to prepare counseling professionals to become skillful interpreters and users of medical information and terminology. Students examine major chronic illnesses and disabilities in order to obtain a practical and theoretical understanding of the implications of these conditions on all areas of functioning and participation, including interpersonal relationships, sexuality, education, employment, and independent living.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

COUN 2720 - FOUNDATIONS OF COUNSELING

Minimum Credits: 3

Maximum Credits: 3

This course is an investigation of the historical, philosophical, legislative, and clinical dimensions, scope, and practice of counseling. Through interactive discussions and practical exercises, students will understand the roles of counselors and the various settings and systems in which they work. The course also underscores the importance of developing a counselor identity, encouraging students to reflect on personal values, strengths, and areas for growth to become effective and authentic practitioners.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Clinical Mental Health Counsel

COUN 2721 - CULTURAL CONSIDERATIONS IN COUNSELING

Minimum Credits: 3

Maximum Credits: 3

This course is designed to examine the practice of multicultural counseling, emphasizing awareness, knowledge, and skills development. Through rigorous self-examination, students will explore their own cultural identities, biases, and belief systems. Topics covered include foundational theories and models in multicultural counseling, the intersections of identity and oppression, strategies for promoting social justice and advocacy within counseling contexts, recognition and mitigation of implicit bias, effective cross-cultural communication techniques, and understanding the pervasive impact of microaggressions and generational trauma. Throughout the course, an emphasis is placed on fostering cultural humility and its importance in developing connections with clients from diverse backgrounds. Evaluation of learning outcomes will be conducted through a blend of theoretical exploration, experiential learning opportunities, and critical analysis of historical and contemporary cultural events.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Clinical Mental Health Counsel

COUN 2723 - ASSISTIVE TECHNOLOGY TO PROMOTE MENTAL & PHYSICAL FUNCTIONING

Minimum Credits: 2

Maximum Credits: 2

This course will address aspects of assistive technology for use at home, in education and the workplace. Topics will include legislation, computer access, ergonomics, mobility, and adaptations for visual, auditory, motor, cognitive and mental health impairments. Field trips and guest speakers will provide unique experiences and insights.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad HSU Basis

Course Requirements: School of Health and Rehabilitation Sciences students only.

COUN 2724 - CAREER COUNSELING & VOCATIONAL ISSUES

Minimum Credits: 3

Maximum Credits: 3

This course focuses on theory and practice of career and vocational counseling. This course reviews culturally responsive models of career development theories and career counseling practices. Students learn to incorporate theory into career-specific and mental health counseling practice. Students will learn to conceptualize the interrelationships among and between work, socioeconomic standing, wellness, disability, trauma, relationships, and other life roles and factors. The course also emphasizes vocational issues including job placement, client-readiness, job development, job modification, and workplace culture and attitudes. Content includes applied practice analyzing transferable skills, functional assessments, and work-related supports for achieving and maintaining meaningful employment.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Clinical Mental Health Counsel (CMHC-MS)

COUN 2724 - CAREER COUNSELING & VOCATIONAL ISSUES

Minimum Credits: 3

Maximum Credits: 3

This course focuses on theory and practice of career and vocational counseling. Module 1 of this course focuses on

models of theories of career development and career counseling, with cultural considerations taken into account. Students learn to incorporate theory into career counseling practice. Module 2 emphasizes vocational issues including job placement, pre-placement analysis, client-readiness, job development, job modification, and employer culture and attitudes. Module 2 content includes sources of occupational data, labor market analysis, job analysis, job seeking skills, and procedures for analyzing transferable work skills. Students learn various employment alternatives including competitive employment, supported employment, self-employment, etc.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

COUN 2725 - FOUNDATIONS OF COUNSELOR ROLES & RESPONSIBILITIES

Minimum Credits: 1

Maximum Credits: 1

This course provides additional instructional material regarding counselor roles and responsibilities. Various practice settings and functions of counselors, as well as organizational structures, standards, and case management, will be highlighted.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

COUN 2725 - FOUNDATIONS OF COUNSELOR ROLES & RESPONSIBILITIES

Minimum Credits: 1

Maximum Credits: 1

This course provides additional instructional material regarding counselor roles and responsibilities. Various practice settings and functions of counselors, as well as organizational structures, standards, and case management, will be highlighted.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

COUN 2726 - SUBSTANCE ABUSE AND ADDICTIONS COUNSELING

Minimum Credits: 3

Maximum Credits: 3

This course is an introduction to substance abuse counseling. The expected student outcomes of the course include: develop understanding of substance use disorders; develop evidence-based addiction counseling competencies; and increase competence in providing substance abuse evaluation, education, and treatment services. Students are introduced to the theories of etiology and intervention for alcohol and substance use, abuse, and addiction. Students explore community resources providing substance use intervention.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Clinical Mental Health Counsel (CMHC-MS)

COUN 2726 - SUBSTANCE ABUSE AND ADDICTIONS COUNSELING

Minimum Credits: 3

Maximum Credits: 3

This course is an introduction to substance abuse counseling. The expected student outcomes of the course include:

develop understanding of substance use disorders; develop evidence-based addiction counseling competencies; and increase competence in providing substance abuse evaluation, education, and treatment services. Students are introduced to the theories of etiology and intervention for alcohol and substance use, abuse, and addiction. Students explore community resources proving substance use intervention.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

COUN 2728 - FOUNDATIONS OF REHABILITATION & MENTAL HEALTH COUNSELING

Minimum Credits: 2

Maximum Credits: 2

The course provides an overview of the professional practice of counseling. The content includes the origins of counseling and rehabilitation, the professions associated with rehabilitation and mental health counseling through the philosophy, legislative, and clinical history of the disciplines. The goal of studying history and foundations is to gain perspective on the nature and scope of counseling practice. Students are exposed to the requisite knowledge and skills for effective practice. Students understand need for, and develop skills for professional and sociopolitical advocacy for the counseling professions and service recipients. The course also provides fundamental knowledge about psychosocial aspects of disability, including models of disability and adjustment to disability.

Academic Career: Graduate

Course Component: Lecture
